CALL TO ORDER

Joint Meeting of the City Council, Community Services District, City as Successor Agency for the Community Redevelopment Agency, Housing Authority and the Board of Library Trustees - actions taken at the Joint Meeting are those of the Agency indicated on each Agenda item.

PLEDGE OF ALLEGIANCE

INVOCATION

Pastor Diane Gardner - Beautiful Women of God - Diane Gardner Ministries

ROLL CALL

INTRODUCTIONS

PUBLIC COMMENTS ON MATTERS ON THE AGENDA WILL BE TAKEN UP AS THE ITEM IS CALLED FOR BUSINESS, BETWEEN STAFF'S REPORT AND CITY COUNCIL DELIBERATION (SPEAKER SLIPS MAY BE TURNED IN UNTIL THE ITEM IS CALLED FOR BUSINESS.)

PUBLIC COMMENTS ON ANY SUBJECT NOT ON THE AGENDA UNDER THE JURISDICTION OF THE CITY COUNCIL

Those wishing to speak should complete and submit a BLUE speaker slip to the Bailiff. There is a three-minute time limit per person. All remarks and questions shall be addressed to the presiding officer or to the City Council and not to any individual Council member, staff member or other person.

AGENDA
August 26, 2014

JOINT CONSENT CALENDARS (SECTIONS A-D)

All items listed under the Consent Calendars, Sections A, B, C, and D are considered to be routine and non-controversial, and may be enacted by one motion unless a member of the City Council, Community Services District, City as Successor Agency for the Community Redevelopment Agency, Housing Authority or the Board of Library Trustees requests that an item be removed for separate action. The motion to adopt the Consent Calendars is deemed to be a separate motion by each Agency and shall be so recorded by the City Clerk. Items withdrawn for report or discussion will be heard after public hearing items.

A. CONSENT CALENDAR-CITY COUNCIL

A.1 ORDINANCES - READING BY TITLE ONLY

Recommendation: Waive reading of all Ordinances.

A.2 MINUTES - REGULAR MEETING OF JULY 8, 2014 (Report of: City Clerk's Department)

Recommendation:

1. Approve as submitted.

A.3 CITY COUNCIL REPORTS ON REIMBURSABLE ACTIVITIES (Report of: City Clerk's Department)

Recommendation:

1. Receive and file the Reports on Reimbursable Activities for the period of July 2 - August 19, 2014.

A.4 APPROVAL OF PAYMENT REGISTER FOR JUNE, 2014 (Report of: Financial & Management Services Department)

Recommendation:

1. Adopt Resolution No. 2014-68. A Resolution of the City Council of the City of Moreno Valley, California, Approving the Payment Register for the month of June, 2014 in the amount of \$18,341,897.32.

A.5 ADOPT RESOLUTION NO. 2014-69 AUTHORIZING THE CITY ENGINEER TO ACCEPT COMPLETED CONSTRUCTION PROJECTS AS COMPLETE AND TO PROVIDE FOR ALL NECESSARY FOLLOW-UP TO CLOSE OUT PROJECTS (Report of: Public Works Department)

Recommendation:

1. Adopt Resolution No. 2014-69. A Resolution of the City Council of the City of Moreno Valley, California, authorizing the City Engineer to

AGENDA
August 26, 2014

accept completed construction projects as complete, accept the improvements into the City's maintained system, sign the Notice of Completion, authorize the filing of the Notice of Completion with the County Recorder's Office, and authorize the timely release of the contractor's retention payment, if no claims are filed against the project.

- A.6 AUTHORIZATION TO AWARD CONSTRUCTION CONTRACT TO MAMCO, INC. DBA ALABBASI CONSTRUCTION, FOR THE DELPHINIUM AVENUE SIDEWALK IMPROVEMENTS
PROJECT NO. 801 0051 70 77
(Report of: Public Works Department)

Recommendations

1. Award the construction contract to Mamco, Inc. dba Alabbasi Construction, 16810 Van Buren Blvd. Suite 200, Riverside, the lowest responsible bidder, for the Delphinium Avenue Sidewalk Improvements.
2. Authorize the City Manager to execute a contract with Mamco, Inc. dba Alabbasi Construction.
3. Authorize the issuance of a Purchase Order to Mamco, Inc. dba Alabbasi Construction, for the amount of \$239,878.80 (\$199,899.00 bid amount plus 20% contingency) when the contract has been signed by all parties.
4. Authorize the Public Works Director/City Engineer to execute any subsequent related minor change orders to the contract with Mamco, Inc. dba Alabbasi Construction up to, but not exceeding, the 20% contingency amount of \$39,979.80, subject to the approval of the City Attorney.

- A.7 APPROVE THE FIRST AMENDMENT TO AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH PARSONS BRINCKERHOFF, PROJECT NO. 801 0001 70 77
(Report of: Public Works Department)

Recommendations

1. Approve the "First Amendment to Agreement for Professional Consultant Services" with Parsons Brinckerhoff (PB) to provide temporary project management services to the Capital Projects Division of the Public Works Department.
2. Authorize the City Manager to execute the "First Amendment to Agreement for Professional Consultant Services" with PB.

AGENDA
August 26, 2014

3. Authorize an increase in the Purchase Order to PB in the amount of \$158,000, when the "First Amendment to Agreement for Professional Consultant Services" has been signed by all parties.

A.8 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DELEGATING AUTHORITY OF THE ADMINISTRATIVE SERVICES DIRECTOR TO ACT ON BEHALF OF THE CITY OF MORENO VALLEY IN MATTERS RELATING TO EXCESS INSURANCE AUTHORITY (EIA)
(Report of: Administrative Services Department)

Recommendation:

1. Adopt Resolution No. 2014-70. A Resolution of the City Council of the City of Moreno Valley, California, Delegating Authority of the Administrative Services Director to Act on behalf of the City of Moreno Valley in matters relating to Excess Insurance Authority (EIA).

A.9 APPROPRIATION OF EQUIPMENT REPLACEMENT RESERVE FUNDS FOR THE PURCHASE OF TWO PARAMEDIC SQUADS
(Report of: Fire Department)

Recommendations

1. Authorize a transfer of \$370,000 from Equipment Replacement Reserve Fund (Fund 7510) to the General Fund (1010) for the replacement of Asset #40036 a 1991 Ford Super Duty Squad and Asset #40039 a 1993 Ford Super Duty Squad and their associated equipment.
2. Authorize an appropriation of \$370,000 for the purchase of two paramedic squads and their associated equipment upon approval of the above transfer.
3. Waive the formal bidding process in accordance with Moreno Valley Municipal Code 3.12.260 for the purchase of two (2) Dodge 5500 Crew Cab SLT 4x2 utilizing cooperative purchasing, or "piggybacking", on Riverside County Fire Department's bid awarded to Maintainer Custom Bodies Inc.
4. Authorize the City Manager, or her designee, to execute a purchase order in the amount of \$290,000 to Maintainer Custom Bodies Inc. for two (2) Dodge 5500 Crew Cab SLT 4x2.
5. Authorize the Fire Chief to execute any subsequent related minor change orders to the purchase order, not to exceed \$29,000 during the construction of the vehicle.

AGENDA
August 26, 2014

6. Reserve remaining equipment funds of \$316,686 within Fund 7510 specifically for future Fire Department vehicle or equipment replacement for eighteen months.

A.10 APPROPRIATION OF EQUIPMENT REPLACEMENT RESERVE FUNDS FOR THE PURCHASE OF A THERMAL IMAGING CAMERA
(Report of: Fire Department)

Recommendations

1. Approve the transfer of \$8,700 from Equipment Replacement Reserve Fund (Fund 7510) to the General Fund (Fund 1010)
2. Authorize an appropriation of \$8,700 for the purchase of a thermal imaging camera upon approval of the above transfer.

*A.11 PA13-0045 (TR 36598) – APPROVE FINAL MAP AND ACCEPT THE AGREEMENT AND SECURITY FOR PUBLIC IMPROVEMENTS. DEVELOPER – HABITAT FOR HUMANITY RIVERSIDE, INC., A CALIFORNIA NON-PROFIT CORPORATION, RIVERSIDE, CA, 92507
(Report of: Public Works Department)

Recommendations

1. Approve Final Map for PA13-0045, authorize the City Clerk to sign the map and transmit said map to the County Recorder's Office for recordation.
2. Authorize the Executive Director of the Moreno Valley Housing Authority to sign the map.
3. Accept the Agreement and Security for Public Improvements for Habitat for Humanity Riverside, Inc., a California non-profit corporation.
4. Authorize the Mayor to execute the Agreement.
5. Direct the City Clerk to forward the signed Agreement to the County Recorder's Office for recordation.
6. Authorize the City Engineer to execute any future time extension amendments to the agreement, subject to City Attorney approval, if the required public improvements are not completed within said timeframe.

- A.12 RECEIPT OF QUARTERLY INVESTMENT REPORT – QUARTER ENDED JUNE 30, 2014
(Report of: Financial & Management Services Department)

Recommendation:

1. Receive and file the Quarterly Investment Report for quarter ended June 30, 2014, in compliance with the City's Investment Policy.

- A.13 PA09-0043 (PARCEL MAP 36262) – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF THE SOUTHWEST CORNER OF ALESSANDRO BOULEVARD AND MORENO BEACH DRIVE ASSOCIATED WITH THIS PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM
(Report of: Public Works Department)

Recommendations

1. Adopt Resolution No. 2014-71. A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the Acceptance of the Public Improvements as Complete within Project PA09-0043 (Parcel Map 36262) and Accepting the Portion of the Southwest Corner of Alessandro Boulevard and Moreno Beach Drive Associated with the Project into the City's Maintained Street System.
 2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.
- A.14 ACCEPTANCE OF THE RIVERSIDE COUNTY TRANSPORTATION COMMISSION'S (RCTC) CONGESTION MANAGEMENT AND AIR QUALITY GRANT; ACCEPTANCE OF THE MOBILE SOURCE AIR POLLUTION REDUCTION REVIEW COMMITTEE GRANT; AND AUTHORIZE EXECUTION OF COOPERATIVE AGREEMENTS FOR THE TRANSPORTATION MANAGEMENT CENTER (TMC) ITS DEPLOYMENT PHASE 1B
PROJECT NO. 808 0015 70 76
(Report of: Public Works Department)

Recommendations

1. Accept the Congestion Management and Air Quality (CMAQ) grant award from the Riverside County Transportation Commission (RCTC) of up to \$1,541,700 for the TMC ITS Deployment Phase 1B Project.

2. Authorize the City Manager to execute a Cooperative Agreement with RCTC for the CMAQ grant, subject to approval by the City Attorney.
3. Accept the Mobile Source Air Pollution Reduction Review Committee (MSRC) grant award from the RCTC of up to \$490,000 for the TMC ITS Deployment Phase 1B Project.
4. Authorize the City Manager to execute a Cooperative Agreement with RCTC for the MSRC grant when it is received, subject to approval by the City Attorney.
5. Approve the transfer of \$368,300 from the DIF Traffic Signal Capital Projects Fund (Fund 3302) to the Capital Projects Grants Fund (Fund 2301).

A.15 APPROVE RESOLUTION NO. 2014-74 IN SUPPORT OF SB 69 (ROTH) AND AB 1521 (FOX) VEHICLE LICENSE FEE FUNDING FOR NEWLY INCORPORATED CITIES
(Report of: City Manager Department)

Recommendations

1. Adopt Resolution No. 2014-74. A Resolution of the City Council of the City of Moreno Valley supporting SB 69 and AB 1521 which advocate for provision of Vehicle License Fee revenues for newly incorporated cities.
2. Authorize the Mayor to sign a letter of support.

B. CONSENT CALENDAR-COMMUNITY SERVICES DISTRICT

B.1 ORDINANCES - READING BY TITLE ONLY

Recommendation: Waive reading of all Ordinances.

B.2 MINUTES - REGULAR MEETING OF JULY 8, 2014 (Report of: City Clerk's Department)

Recommendation:

1. Approve as submitted.

B.3 LASSELLE SPORTS PARK - EXECUTION OF EASEMENT DEED FOR STORM DRAIN PURPOSES TO THE RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT (RCFC&WCD)
(Report of: Parks & Community Services Department)

Recommendations

1. Adopt Resolution No. CSD 2014-12. A Resolution of the Board of

Directors of the Moreno Valley Community Services District of the City of Moreno Valley, California, Authorizing the Execution of an Easement Deed for Storm Drain Purposes Over Lasselle Sports Park APN 312-130-024 to the Riverside County Flood Control and Water Conservation District.

2. Direct the City Clerk to forward the signed Easement Deed to the Riverside County Flood Control and Water Conservation District (RCFC&WCD) for further processing and recordation.

B.4 ACCEPTANCE OF GRANT MONIES FROM THE CALIFORNIA DEPARTMENT OF EDUCATION, CHILD DEVELOPMENT SERVICES, FOR CHILD CARE SERVICES AND ADOPTION OF THE RESOLUTION TO CERTIFY THE APPROVAL OF THE GOVERNING BOARD
(Report of: Parks & Community Services Department)

Recommendations

1. Authorize the acceptance of grant monies in the amount of \$561,056 for Fiscal Year (FY) 2014/2015 from the California Department of Education, Child Development Division, for the purpose of providing school age child care and development services.
2. Adopt Resolution No. CSD 2014-13. A Resolution of the Moreno Valley Community Services District of the City of Moreno Valley, California, Certifying the Approval of the Governing Board to enter into a Transaction with the California Department of Education for the Purpose of Providing Child Care and Development Services and to Authorize Designated Personnel to Sign Contract Documents for FY 2014/2015

C. CONSENT CALENDAR - HOUSING AUTHORITY

C.1 ORDINANCES - READING BY TITLE ONLY

Recommendation: Waive reading of all Ordinances.

C.2 MINUTES - REGULAR MEETING OF JULY 8, 2014 (Report of: City Clerk's Department)

Recommendation:

1. Approve as submitted.

*C.3 PA13-0045 (TR 36598) – APPROVE FINAL MAP AND ACCEPT THE AGREEMENT AND SECURITY FOR PUBLIC IMPROVEMENTS. DEVELOPER – HABITAT FOR HUMANITY RIVERSIDE, INC., A CALIFORNIA NON-PROFIT CORPORATION, RIVERSIDE, CA, 92507
(Report of: Public Works Department) **(See Item A.11 for materials)**

AGENDA
August 26, 2014

Recommendations

1. Approve Final Map for PA13-0045, authorize the City Clerk to sign the map and transmit said map to the County Recorder's Office for recordation.
2. Authorize the Executive Director of the Moreno Valley Housing Authority to sign the map.
3. Accept the Agreement and Security for Public Improvements for Habitat for Humanity Riverside, Inc., a California non-profit corporation.
4. Authorize the Mayor to execute the Agreement.
5. Direct the City Clerk to forward the signed Agreement to the County Recorder's Office for recordation.
6. Authorize the City Engineer to execute any future time extension amendments to the agreement, subject to City Attorney approval, if the required public improvements are not completed within said timeframe.

D. CONSENT CALENDAR - BOARD OF LIBRARY TRUSTEES

D.1 ORDINANCES - READING BY TITLE ONLY

Recommendation: Waive reading of all Ordinances.

D.2 MINUTES - REGULAR MEETING OF JULY 8, 2014 (Report of: City Clerk's Department)

Recommendation:

1. Approve as submitted.

E. PUBLIC HEARINGS

Questions or comments from the public on a Public Hearing matter are limited to five minutes per individual and must pertain to the subject under consideration. Those wishing to speak should complete and submit a GOLDENROD speaker slip to the Bailiff.

E.1 PUBLIC HEARING TO ADOPT SUBSTANTIAL AMENDMENT #1 TO THE 2014-15 ANNUAL ACTION PLAN AFFECTING THE HOME PROGRAM AND ADDING THE EMERGENCY SOLUTIONS GRANT (ESG) TO MORENO VALLEY'S CONSOLIDATED PLAN (Report of: Financial & Management Services Department)

AGENDA
August 26, 2014

Recommendations That the City Council:

1. Conduct a Public Hearing to allow public comment on the proposed Substantial Amendment, ESG and HOME.
2. Review and adopt the proposed Substantial Amendment to the FY 2014/15 Annual Action Plan.
3. Approve the necessary Revenue and Expense Appropriations and authorize the Chief Financial Officer to process the adjustments.
4. Authorize the City Manager to reallocate grant funds between HUD-approved grant activities and to execute the necessary agreements for approved grant activities.

E.2 PUBLIC HEARING FOR THE FOURTH AMENDMENT TO THE DEVELOPMENT AGREEMENT FOR TOWNGATE. THE APPLICANT IS PALM TREE COMMUNITIES CONSULTING INC.

(Report of: Community & Economic Development Department)

Recommendations That the City Council:

1. RECOGNIZE that the Development Agreement will not have the potential for any direct or indirect impacts under the California Environmental Quality Act (CEQA) and is therefore exempt under Section 15061 of the CEQA Guidelines.
2. ADOPT Resolution No. 2014-72. A Resolution of the City Council of the City of Moreno Valley, California, Approving P13-138, the Fourth Amendment to the Annexation and Development Agreement for TownGate to Extend the Life of the Agreement for a Total of Five Years.

1. Commented that Luther Sandusky, retired Air Force was in intensive care in the hospital asked for prayers.

Council Member George E. Price

1. Commented that the 4th of July fireworks grand finale was spectacular the best ever seen; lots of people in the parade route; was really pleased with the whole event, the organization and gave a thank you to the Park and Recreation staff.

Mayor Pro Tem Victoria Baca

1. 4th of July was spectacular; parade had over 90 entries; fireworks was the best seen; she observed upon her departure people still outside barbecuing and enjoying the music, and fireworks
2. Recall; briefly commented was not aware of what was going on with the FBI investigation.
3. Council Recess; everyone be safe

Jesse L. Molina

1. Thank you to everyone; the parade was spectacular; thank you to County Supervisor Marion Ashley and Assemblyman Jose

Medina for attending our parade; enjoyed giving out candy to the children; the event only gets better and better.

CLOSED SESSION - none

REPORT OF ACTION FROM CLOSED SESSION, IF ANY, BY CITY ATTORNEY

ADJOURNMENT

The Mayor stated he would like to adjourn the City Council meeting in memory of Richard Tegley, who unselfishly served the community. He was a retired Air Force veteran and realtor.

Mr. Tegley was an advocate for real estate, housing and legislative reform. He served as President of the Riverside/Moreno Valley Association of Realtors, director for the California Association of Realtors, and National Association of Realtors.

Mr. Tegley was also a member of the Riverside Community College District Foundation. Mr. Tegley's late wife, Coral Ann Tegley, was a graduate of the Riverside Community College Nursing Program, and he established an endowed scholarship in her name which he recently awarded at this year's nursing scholarship ceremony.

Mr. Tegley gave countless hours of service to our community. He always found the energy, time, and commitment to be involved. He will be truly missed.

Our thoughts and prayers go out to his family.

There being no further business to conduct, the meeting was adjourned at 11:09 p.m. by unanimous informal consent.

Report to City Council

TO: Mayor and City Council

FROM: Richard Teichert, Chief Financial Officer

AGENDA DATE: August 26, 2014

TITLE: APPROVAL OF PAYMENT REGISTER FOR JUNE, 2014

RECOMMENDED ACTION

Recommendation:

1. Adopt Resolution No. 2014-68. A Resolution of the City Council of the City of Moreno Valley, California, Approving the Payment Register for the month of June, 2014 in the amount of \$18,341,897.32.

DISCUSSION

To facilitate Council's review, the Payment Register lists in alphabetical order all checks and wires in the amount of \$25,000 or greater, followed by a listing in alphabetical order of all checks and wires less than \$25,000. The Payment Register also includes the fiscal year-to-date (FYTD) amount paid to each vendor.

FISCAL IMPACT

The disbursements itemized in the attached Payment Register are reflected in the 2013-14 budget. Therefore, there is no fiscal impact other than the expenditure of budgeted funds.

Report to City Council

TO: Mayor and City Council

FROM: Ahmad R. Ansari, P.E., Public Works Director/City Engineer

AGENDA DATE: August 26, 2014

TITLE: ADOPT RESOLUTION NO. 2014-69 AUTHORIZING THE CITY ENGINEER TO ACCEPT COMPLETED CONSTRUCTION PROJECTS AS COMPLETE AND TO PROVIDE FOR ALL NECESSARY FOLLOW-UP TO CLOSE OUT PROJECTS

RECOMMENDED ACTION

Recommendation:

1. Adopt Resolution No. 2014-69. A Resolution of the City Council of the City of Moreno Valley, California, authorizing the City Engineer to accept completed construction projects as complete, accept the improvements into the City's maintained system, sign the Notice of Completion, authorize the filing of the Notice of Completion with the County Recorder's Office, and authorize the timely release of the contractor's retention payment, if no claims are filed against the project.

SUMMARY

This report recommends adoption of the proposed Resolution which will authorize the City Engineer to close out construction projects in a timely manner. With this authorization, the City Engineer will be able to formally accept the project into the City's maintained system, file the Notice of Completion with the County Recorder's Office and release the contractor's retention payment in a timely manner to meet legal requirements. Failure to act in a timely manner can result in valid claims from the contractor and other financial repercussions.

DISCUSSION

Each year the City Council approves the Capital Improvement Plan (CIP) Budget for the timely repair, replacement and new construction of public infrastructure to meet the

demands of a growing community. The approved FY14/15 CIP Budget is approximately \$55 Million and consists of approximately 85 fully and partially funded projects. The implementation process of such public infrastructure projects is primarily defined in the State of California Public Contract Codes (PCC) and supplemented by the Streets and Highway Code, Business and Professions Code, Civil, Government and Labor Codes.

In order to ensure compliance with all the applicable Codes, the City's legal consulting firm, Gibbs, Giden, Locher, Turner, Senet & Wittbrodt, LLC (GGLTSW) periodically reviews the City's public projects contracting documents to ensure it is current with the applicable laws and requirements. During a recent update, GGLTSW recommended that the City Council delegate in writing, by approving a Resolution, the authority of the City Engineer to accept projects as complete on behalf of the City and provide for all necessary follow-up to close-out projects. This Resolution removes any ambiguity as to who is authorized to closeout a project on behalf of the City. Currently, there are not any clear, explicit statements contained within the City's Municipal Code or any other City documents which grants this authority to the City Engineer.

Under current practices, staff recommends that City Council grant the authority to close out projects to the City Engineer upon bid award on each individual project. Providing this authority to the City Engineer by adopting this resolution will update Moreno Valley's process to conform with industry best practices, expedite acceptance of completed construction projects and bring them into the City's maintained system, ensure timely filing of the Notice of Completion with the County Recorder's Office, and support timely release of the contractor's retention payment to meet legal requirements.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *This alternative will provide for the timely and expeditious close-out of projects within prescribed timelines. Staff recommends this course of action.*
2. Do not approve and authorize the recommended actions as presented in this staff report. *This alternative could potentially delay filing notices of completion and thereby extend the period funds are held in retention. Public Contract Code 7107(c) requires the release of retention within 60 days after completion of the work.*

FISCAL IMPACT

This resolution will not result in any additional cost to the City, but potentially could result in a savings in time for staff.

CITY COUNCIL GOALS

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

RESOLUTION NO. 2014-69

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE CITY ENGINEER TO ACCEPT COMPLETED CONSTRUCTION PROJECTS AS COMPLETE, ACCEPT THE IMPROVEMENTS INTO THE CITY'S MAINTAINED SYSTEM, SIGN THE NOTICE OF COMPLETION, AUTHORIZE THE FILING OF THE NOTICE OF COMPLETION WITH THE COUNTY RECORDER'S OFFICE, AND AUTHORIZE THE TIMELY RELEASE OF THE CONTRACTOR'S RETENTION PAYMENT, IF NO CLAIMS ARE FILED AGAINST THE PROJECT

WHEREAS, the City constructs public improvements to provide for a safer and more pleasant environment for residents and visitors to the City of Moreno Valley, it is in the City's best interest to accept the City's public improvements into the City's maintained system; and

WHEREAS, after construction of the public improvements are complete, the City will file the Notice of Completion with the County Recorder's office, this limits the timeline for subcontractors and suppliers to file Stop Payment Notices down to 30 days, after which it is no longer effective, per Civil Code, Section 9356; and

WHEREAS, in accordance with Civil Code, Section 7107, the City is required to release the retention held from a contractor within 60 days after the date of completion; and

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Authorize the City Engineer to accept completed construction projects as complete.
2. Authorize the City Engineer to accept the improvements into the City's maintained system.
3. Authorize the City Engineer to sign the Notice of Completion.
4. Authorize the City Engineer to file the Notice of Completion with the County Recorder's Office.
5. Authorize the City Engineer to release the Contractor's retention payment, if no claims are filed against the project.

Report to City Council

TO: Mayor and City Council

FROM: Ahmad R. Ansari, P.E., Public Works Director/City Engineer

AGENDA DATE: August 26, 2014

TITLE: AUTHORIZATION TO AWARD CONSTRUCTION CONTRACT TO MAMCO, INC. DBA ALABBASI CONSTRUCTION, FOR THE DELPHINIUM AVENUE SIDEWALK IMPROVEMENTS PROJECT NO. 801 0051 70 77

RECOMMENDED ACTION

Recommendations:

1. Award the construction contract to Mamco, Inc. dba Alabbasi Construction, 16810 Van Buren Blvd. Suite 200, Riverside, the lowest responsible bidder, for the Delphinium Avenue Sidewalk Improvements.
2. Authorize the City Manager to execute a contract with Mamco, Inc. dba Alabbasi Construction.
3. Authorize the issuance of a Purchase Order to Mamco, Inc. dba Alabbasi Construction, for the amount of \$239,878.80 (\$199,899.00 bid amount plus 20% contingency) when the contract has been signed by all parties.
4. Authorize the Public Works Director/City Engineer to execute any subsequent related minor change orders to the contract with Mamco, Inc. dba Alabbasi Construction up to, but not exceeding, the 20% contingency amount of \$39,979.80, subject to the approval of the City Attorney.

SUMMARY

This report recommends approval of a contract with Mamco, Inc. dba Alabbasi Construction, to construct the sidewalk improvements on the north side of Delphinium Avenue from 600 feet west to 590 feet east of Perris Boulevard. This project will provide a continuous sidewalk for the north side of Delphinium Ave from east to west of Perris Boulevard to enhance safety for students walking to and from Chaparral Hills Elementary School and Badger Springs Middle School. This project is funded by Measure A and state grants under the Safe Routes to School (SR2S) Grant Program (Fund 2001) and has been approved in the Fiscal Year 2014/2015 Capital Improvement Plan (CIP).

DISCUSSION

This project will provide sidewalk and other related street improvements for the north side of Delphinium Avenue from approximately 600 feet west of Perris Boulevard to 590 feet east of Perris Boulevard where improvements do not currently exist. The project includes the construction of curb, gutter, sidewalk, asphalt concrete pavement extension to join new curbs, driveway approaches, installation of street lights, and re-establishment of traffic striping.

In March 2012, the City submitted a grant application for the SR2S program to obtain funds for improving walking routes and enhancing safety for students travelling to and from Chaparral Hills Elementary School and Badger Springs Middle School. In June 2012, the City received the grant award notice in the amount of \$416,700 for the design and construction of the Delphinium Avenue Sidewalk Improvements. In accordance with the City Council approved Resolution No. 2011-43, the Public Works Director/City Engineer executed the Program Supplement Agreement with the Department of Transportation on March 21, 2013 to finalize the acceptance of the SR2S grant for this project.

The Planning Division of the Community and Economic Development Department determined on January 23, 2013 that this project qualifies for a Class I Categorical Exemption as defined in both Section 15301c of the California Environmental Quality Act (CEQA) and Section 4.6b of the City's rules and procedures for implementation of CEQA.

The design and bid documents were completed in May 2014 by in house engineering staff as a cost savings solution for the City. In June 2014, the project was advertised for construction bids. Formal bidding procedures have been followed in conformance with the Public Contract Code. The City Clerk opened bids on July 16, 2014, and eight (8) bids were received as follows:

<u>CONTRACTORS</u>	<u>Verified Bid Amounts</u>
1. Mamco, Inc. dba Alabbasi Construction, Riverside	\$199,899.00
2. Hillcrest Contracting, Corona.....	\$221,020.00
3. CLS Constructors, Inc., Grand Terrace.....	\$221,192.00
4. Martinez Concrete, Inc., Azusa.....	\$222,125.00
5. Southwest Construction Co, Inc., Fallbrook	\$254,180.00
6. C.S. Legacy Construction, Inc., Pomona.....	\$276,471.00
7. El Camino Const. & Eng. Corp., Long Beach.....	\$354,825.00
8. Vido Samarzich, Inc., Alta Loma.....	\$369,590.00

The lowest responsible bidder was determined by comparing the cumulative total for all bid items, as stipulated in the Bidding Documents. Staff has reviewed the bid by Mamco, Inc. dba Alabbasi Construction and finds it to be the lowest responsible bidder in possession of a valid license and bid bond. No outstanding issues were identified through review of the references submitted by Mamco, Inc. dba Alabbasi Construction in their bid.

Following the bid opening, staff reviewed the bids and available funding, and is recommending the award of the construction contract and issuance of a Purchase Order to Mamco, Inc. dba Alabbasi Construction for \$239,878.80 which includes a 20% contingency.

The contingency of 20% of the bid amount (\$39,979.80) is recommended to account for any latent or unforeseen circumstances encountered during construction. Unforeseen conditions may include unsuitable soils or hazardous wastes which need to be properly processed and removed. There also may be other conflicting appurtenances that will have to be addressed during grading and excavating of the roadways.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *This alternative will provide for the timely construction of the Delphinium Avenue Sidewalk Improvements from 600 feet west to 590 feet east of Perris Boulevard.*
2. Do not approve and authorize the recommended actions as presented in this staff report. *This alternative will result in delaying the timely construction of the project and prohibit the City from receiving the SR2S grant reimbursement.*

FISCAL IMPACT

This project is included in the Fiscal Year 2014/2015 Capital Improvement Plan Budget and will be financed by Measure A/SR2S Grant Fund (Fund 2001). There is no impact to the General Fund. Once constructed, sidewalk maintenance costs over a 50 year period are estimated to average approximately \$5,400 per six foot sidewalk mile, per

year. Maintenance costs are typically funded by Measure A or Gas Tax monies that the City receives on an annual basis.

ADOPTED BUDGET FISCAL YEAR 2014-2015:

Measure A/SR2S Grant	
(Account No. 2001-70-77-80001) (Project No. 801 0051 70 77)	\$400,000
Total Available Funds.....	\$400,000

ESTIMATED CONSTRUCTION RELATED COSTS:

Construction Costs (including contingency)	\$250,000
Construction Survey Services	\$17,000
Construction Geotechnical Services.....	\$15,000
Project Management and Inspection*	\$25,000
Total Estimated Construction Related Costs*	\$307,000

** Project Management and Inspection will be provided by City Staff*

ANTICIPATED PROJECT SCHEDULE:

Start Construction.....	October 2014
Anticipated Completion of Construction	January 2015

CITY COUNCIL GOALS

PUBLIC SAFETY:

Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work, and visit the City of Moreno Valley.

PUBLIC FACILITIES AND CAPITAL PROJECTS:

Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

NOTIFICATION

The City has created and implemented a SR2S educational program with public outreach to inform the public about this project and other activities such as Walk School Buses and Parent Paths to promote walking and bicycling to schools. Prior to construction starting, all utilities, adjacent property owners, business owners, law enforcement, fire department, and other emergency services responders in the area will be notified of the construction.

AGREEMENT

PROJECT NO. 801 0051 70 77

DELPHINIUM AVENUE SIDEWALK IMPROVEMENTS

North Side of Delphinium Avenue from 600 feet West to 590 feet East of Perris Boulevard

THIS Agreement, effective as of the date signed by the City of Moreno Valley by and between the City of Moreno Valley, a municipal corporation, County of Riverside, State of California, hereinafter called the "City" and **Mamco, Inc, dba Alabbasi Construction**, hereinafter called the "Contractor."

That the City and the Contractor for the consideration hereinafter named, agree as follows:

1. CONTRACT DOCUMENTS. The Contract Documents consist of the following, which are incorporated herein by this reference:

- A. Governmental approvals, including, but not limited to, permits required for the Work
- B. Any and all Contract Change Orders issued after execution of this Agreement
- C. This Agreement
- D. Addenda issued prior to the opening of the Bids
- E. City Special Provisions, including the General Provisions and Technical Provisions
- F. Standard Specifications for Public Works Construction ("Greenbook") – latest edition in effect at the Bid Deadline, as modified by the City Special Provisions
- G. Reference Specifications/Reference Documents other than those listed in paragraph 2, below
- H. Project Plans
- I. City Standard Plans
- J. Caltrans Standard Plans
- K. The bound Bidding Documents
- L. Contractor's Certificates of Insurance and Additional Insured Endorsements
- M. Contractor's Bidder's Proposal and Subcontractor Listing

In the event of conflict between any of the Contract Documents, the provisions placing a more stringent requirement on the Contractor shall prevail. The Contractor shall provide the better quality or greater quantity of Work and/or materials unless otherwise directed by City in writing. In the event none of the Contract Documents place a more stringent requirement or greater burden on the Contractor, the controlling provision shall be that which is found in the document with higher precedence in accordance with the above order of precedence.

2. REFERENCE DOCUMENTS. The following Reference Documents are not considered Contract Documents and are made available to the Contractor for informational purposes:

- A. None

3. SCOPE OF WORK. The Contractor shall perform and provide all materials, tools, equipment, labor, and services necessary to complete the Work described in the Contract

Documents, except as otherwise provided in the Plans, Standard Specifications, or City Special Provisions to be the responsibility of others.

4. PAYMENT.

4.1. **Contract Price and Basis for Payment.** In consideration for the Contractor's full, complete, timely, and faithful performance of the Work required by the Contract Documents, the City shall pay Contractor for the actual quantity of Work required under the Bid Items awarded by the City performed in accordance with the lump sum prices and unit prices for Bid Items and Alternate Bid Items, if any, set forth in the Bidder's Proposal submitted with the Bid. The sum of the unit prices and lump sum prices for the Bid Items awarded by the City is **One Hundred, Ninety-Nine Thousand, Eight Hundred Ninety-Nine Dollars (\$199,899.00)** ("Contract Price"). It is understood and agreed that the quantities set forth in the Bidder's Proposal for which unit prices are fixed are estimates only and that City will pay and Contractor will accept, as full payment for these items of work, the unit prices set forth in the Bidder's Proposal multiplied by the actual number of units performed, constructed, or completed as directed by the City Engineer.

4.2. **Payment Procedures.** Based upon applications for payment submitted by the Contractor to the City, the City shall make payments to the Contractor in accordance with Article 9 of the Standard Specifications, as modified by Article 9 of the City Special Provisions.

5. CONTRACT TIME.

A. Initial Notice to Proceed. After the Agreement has been fully executed by the Contractor and the City, the City shall issue the "Notice to Proceed to Fulfill Preconstruction Requirements." The date specified in the Notice to Proceed to Fulfill Preconstruction Requirements constitutes the date of commencement of the Contract Time of **sixty (60) Working Days**. The Contract Time includes the time necessary to fulfill preconstruction requirements, and to complete construction of the Project (except as adjusted by subsequent Change Orders).

The Notice to Proceed to Fulfill Preconstruction Requirements shall further specify that Contractor must complete the preconstruction requirements within **ten (10) Working Days** after the date of commencement of the Contract Time; this duration is part of the Contract Time.

Critical preconstruction requirements include, but are not limited to, the following:

- Submitting and obtaining approval of Traffic Control Plans
- Submitting and obtaining approval of the Stormwater Pollution Prevention Plan (SWPPP)/Water Pollution Control Plan (WPCP)
- Submitting and obtaining approval of critical required submittals
- Installation of the approved Project Identification Sign
- Obtaining an approved no fee Encroachment Permit
- Mix designs for AC, PCC, Radar Speed Feedback Sign, and striping materials
- Notifying all agencies, utilities, residents, etc., as outlined in the Bidding Documents

If the City's issuance of a Notice to Proceed to Fulfill Preconstruction Requirements is delayed due to Contractor's failure to return the fully executed Agreement and insurance and bond documents within ten (10) Working Days after Contract award, then Contractor agrees to the deduction of one (1) Working Day from the number of days to complete the Project for every Working Day of delay in the City's receipt of said documents. This right is in addition to and does

not affect the City's right to demand forfeiture of Contractor's Bid Security if Contractor persistently delays in providing the required documentation.

B. Notice to Proceed with Construction. After all preconstruction requirements are met in accordance with the Notice to Proceed to Fulfill Preconstruction Requirements the City shall issue the "Notice to Proceed with Construction," at which time the Contractor shall diligently prosecute the Work, including corrective items of Work, day to day thereafter, within the remaining Contract Time.

6. LIQUIDATED DAMAGES

6.1. Liquidated Damages. The Contractor and City (collectively, the "Parties") have agreed to liquidate damages with respect to Contractor's failure to fulfill the preconstruction requirements, and/or failure to complete the Work within the Contract Time. The Parties intend for the liquidated damages set forth herein to apply to this Contract as set forth in Government Code Section 53069.85. Contractor acknowledges and agrees that the liquidated damages are intended to compensate the City solely for Contractor's failure to meet the deadline for completion of the Work and will not excuse Contractor from liability from any other breach, including any failure of the Work to conform to the requirements of the Contract Documents.

In the event that Contractor fails to fulfill the preconstruction requirements and/or fails to complete the Work within the Contract Time, Contractor agrees to pay the City **\$500.00 per Calendar day** that completion of the Work is delayed beyond the Contract Time, as adjusted by Contract Change Orders. The Contractor will not be assessed liquidated damages for delays occasioned by the failure of the City or of the owner of a utility to provide for the removal or relocation of utility facilities.

The Contractor and City acknowledge and agree that the foregoing liquidated damages have been set based on an evaluation of damages that the City will incur in the event of late completion of the Work. The Contractor and City acknowledge and agree that the amount of such damages are impossible to ascertain as of the date of execution hereof and have agreed to such liquidated damages to fix the City's damages and to avoid later disputes. It is understood and agreed by Contractor that liquidated damages payable pursuant to this Agreement are not a penalty and that such amounts are not manifestly unreasonable under the circumstances existing as of the date of execution of this Agreement.

It is further mutually agreed that the City will have the right to deduct liquidated damages against progress payments or retainage and that the City will issue a Change Order or Construction Change Directive and reduce the Contract Price accordingly. In the event the remaining unpaid Contract Price is insufficient to cover the full amount of liquidated damages, Contractor shall pay the difference to the City.

6.2. Any work completed by the Contractor after the issuance of a Stop Work Notice by the City shall be rejected and/or removed and replaced as specified in Section 2-11 of the Special Provisions.

6.3. Owner is Exempt from Liability for Early Completion Delay Damages. While the Contractor may schedule completion of all of the Work, or portions thereof, earlier than the Contract Time, the Owner is exempt from liability for and the Contractor will not be entitled to an adjustment of the Contract Sum or to any additional costs, damages, including, but not limited to, claims for extended general conditions costs, home office overhead, jobsite overhead, and management or administrative costs, or compensation whatsoever, for use of float time or for Contractor's inability to

complete the Work earlier than the Contract Time for any reason whatsoever, including but not limited to, delay cause by Owner or other Excusable Compensable Delay. See Section 6-6 of the Standard Specifications and City Special Provisions regarding compensation for delays.

7. INSURANCE.

7.1. **General.** The Contractor shall procure and maintain at its sole expense and throughout the term of this Agreement, any extension thereof, Commercial General Liability, Automobile Liability, and Workers' Compensation Insurance with such coverage limits as described herein.

7.2. **Additional Insured Endorsements.** The Contractor shall cause the insurance required by the Contract Document to include the City of Moreno Valley, the City Council and each member thereof, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD), and their respective officials, employees, commission members, officers, directors, agents, employees, volunteers and representatives as an additional insureds. For the Commercial General Liability coverage, said parties shall be named as additional insureds utilizing either:

1. Insurance Services Office ("ISO") Additional Insured endorsement CG 20 10 (11/85); or
2. ISO Additional Insured endorsement CG 20 10 (10/01) and Additional Insured Completed Operations endorsement CG 20 37 (10/01); or
3. substitute endorsements providing equivalent coverage, approved by the City.

The endorsements shall be signed by a person authorized by the insurer to bind coverage on its behalf. The coverage shall contain no special limitations on the scope of protection afforded to such additional insureds. Coverage for such additional insureds does not extend to liability to the extent prohibited by Insurance Code Section 11580.4.

7.3. **Waivers of Subrogation.** All policies of insurance required by the Contract Documents shall include or be endorsed to provide a waiver by the insurers of any rights of recovery or subrogation that the insurers may have at any time against the City of Moreno Valley, the City Council and each member thereof, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD), and their respective officials, employees, commission members, officers, directors, agents, employees, volunteers and representatives.

7.4. **Primary Coverage.** All policies and endorsements shall stipulate that the Contractor's (and the Subcontractors') insurance coverage shall be primary insurance as respects the City of Moreno Valley, the City Council and each member thereof, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD), and their respective officials, employees, commission members, officers, directors, agents, employees, volunteers and representatives, and shall be excess of the Contractor's (and its Subcontractors') insurance and shall not contribute with it.

7.5. **Coverage Applies Separately to Each Insured and Additional Insured.** Coverage shall state that the Contractor's (and its Subcontractors') insurance shall apply separately to each insured or additional insured against whom claim is made or suit is brought, except with respect to

the limits of the insurer's liability. Coverage shall apply to any claim or suit brought by an additional insured against a named insured or other insured.

7.6. **Self-Insurance.** Any self-insurance (including deductibles or self-insured retention in excess of \$50,000) in lieu of liability insurance must be declared by Contractor and approved by the City in writing prior to execution of the Agreement. The City's approval of self-insurance, if any, is within the City's sole discretion and is subject to the following conditions:

1. Contractor must, at all times during the term of the Agreement and for a period of at least **one (1)** year after completion of the Project, and any extension of the one-year correction guarantee period in accordance with Section 6-8.1 of the City Special Provisions, maintain and upon Owner's reasonable request provide evidence of:
 - (a) Contractor's "net worth" (defined as "total assets" [defined as all items of value owned by the Contractor including tangible items such as cash, land, personal property and equipment and intangible items such as copyrights and business goodwill]) minus total outside liabilities must be reflected in a financial statement for the prior fiscal year reflecting sufficient income and budget for Contractor to afford at least one loss in an amount equal to the amount of self-insurance;
 - (b) financial statements showing that Contractor has funds set aside/budgeted to finance the self-insured fund (i.e., Contractor has a program that fulfills functions that a primary insurer would fill; and
 - (c) a claims procedure that identifies how a claim is supposed to be tendered to reach the financing provided by the self-insured fund.
2. If at any time after such self-insurance has been approved Contractor fails to meet the financial thresholds or otherwise fails to comply with the provisions set forth in this Paragraph 7, at the option of the City:
 - (a) the Contractor shall immediately obtain and thereafter maintain the third party insurance required under this Paragraph 7 and otherwise on the terms required above; or
 - (b) the insurer shall reduce or eliminate such deductibles or self-insured retention as respects the City, its officers, officials, employees and volunteers; or
 - (c) the Contractor shall procure a bond guaranteeing payment of losses and related investigation, claim administration, and defense expenses.

7.7. **Insurer Financial Rating.** Insurance companies providing insurance hereunder shall be rated A-VII or better in Best's Insurance Rating Guide and shall be legally licensed and qualified to conduct insurance business in the State of California.

7.8. **Notices to City of Cancellation or Changes.** Each insurance policy described in this Paragraph 7 shall contain a provision or be endorsed to state that coverage will not be cancelled

without **thirty (30) days'** prior written notice by certified or registered mail to the City (this obligation may be satisfied in the alternative by requiring such notice to be provided by Contractor's insurance broker and set forth on its Certificate of Insurance provided to the City), except that cancellation for non-payment of premium shall require (10) days prior written notice by certified or registered mail. If an insurance carrier cancels any policy or elects not to renew any policy required to be maintained by Contractor pursuant to the Contract Documents, Contractor agrees to give written notice to the City at the address indicated on the first page of the Agreement. Contractor agrees to provide the same notice of cancellation and non-renewal to the City that is required by such policy(ies) to be provided to the First Named Insured under such policy(ies). Contractor shall provide confirmation that the required policies have been renewed not less than seven (7) days prior to the expiration of existing coverages and shall deliver renewal or replacement policies, certificates and endorsements to the City Clerk within fourteen (14) days of the expiration of existing coverages. Contractor agrees that upon receipt of any notice of cancellation or alteration of the policies, Contractor shall procure within five (5) days, other policies of insurance similar in all respects to the policy or policies to be cancelled or altered. Contractor shall furnish to the City Clerk copies of any endorsements that are subsequently issued amending coverage or limits within fourteen (14) days of the amendment.

7.9. Commercial General Liability. Coverage shall be written on an ISO Commercial General Liability "occurrence" form CG 00 01 (10/01 or later edition) or equivalent form approved by the City for coverage on an occurrence basis. The insurance shall cover liability, including, but not limited to, that arising from premises operations, stop gap liability, independent contractors, products-completed operations, personal injury, advertising injury, and liability assumed under an insured contract. The policy shall be endorsed to provide the Aggregate Per Project Endorsement ISO form CG 25 03 (11/85). Coverage shall contain no contractors' limitation or other endorsement limiting the scope of coverage for liability arising from pollution, explosion, collapse, or underground (x, c, u) property damage. Contractor shall provide Products/Completed Operations coverage to be maintained continuously for a minimum of **one (1) year** after Final Acceptance of the Work, and any extension of the one-year correction guarantee period in accordance with Section 6-8.1 of the City Special Provisions.

Contractor shall maintain Commercial General Liability insurance with the following minimum limits: \$1,000,000 per occurrence / \$2,000,000 aggregate / \$2,000,000 products-completed operations.

7.10. Business Automobile Liability. Coverage shall be written on ISO form CA 00 01 (12/93 or later edition) or a substitute form providing equivalent coverage for owned, hired, leased and non-owned vehicles, whether scheduled or not, with \$1,000,000 combined single limit per accident for bodily injury and property damage. If necessary, the policy shall be endorsed to provide contractual liability coverage.

7.11. Workers' Compensation. Contractor shall comply with the applicable sections of the California Labor Code concerning workers' compensation for injuries on the job. Compliance is accomplished in one of the following manners:

1. Provide copy of permissive self-insurance certificate approved by the State of California; or
2. Secure and maintain in force a policy of workers' compensation insurance with statutory limits and Employer's Liability Insurance with a minimal limit of **\$1,000,000** per accident; or
3. Provide a "waiver" form certifying that no employees subject to the Labor Code's Workers' Compensation provision will be used in performance of this Contract.

7.12. **Subcontractors' Insurance.** The Contractor shall include all Subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each Subcontractor. All coverages for Subcontractors shall be subject to all of the requirements stated herein.

8. **BONDS.** The Contractor shall furnish a satisfactory Performance Bond meeting all statutory requirements of the State of California on the form provided by the City. The bond shall be furnished as a guarantee of the faithful performance of the requirements of the Contract Documents as may be amended from time to time, including, but not limited to, liability for delays and damages (both direct and consequential) to the City and the City's Separate Contractors and consultants, warranties, guarantees, and indemnity obligations, in an amount that shall remain equal to one hundred percent (100%) of the Contract Price.

The Contractor shall furnish a satisfactory Labor and Materials Payment Bond meeting all statutory requirements of the State of California on the form provided by the City in an amount that shall remain equal to one hundred percent (100%) of the Contract Price to secure payment of all claims, demands, stop notices, or charges of the State of California, of material suppliers, mechanics, or laborers employed by the Contractor or by any Subcontractor, or any person, firm, or entity eligible to file a stop notice with respect to the Work.

All bonds shall be executed by a California-admitted surety insurer. Bonds issued by a California-admitted surety insurer listed on the latest version of the U.S Department of Treasury Circular 570 shall be deemed accepted unless specifically rejected by the City. Bonds issued by sureties not listed in Treasury Circular 570 must be accompanied by all documents enumerated in California Code of Civil Procedure Section 995.660(a). The bonds shall bear the same date as the Contract. The attorney-in-fact who executes the required bonds on behalf of the surety shall affix thereto a certified and current copy of the power of attorney. In the event of changes that increase the Contract Price, the amount of each bond shall be deemed to increase and at all times remain equal to the Contract Price. The signatures shall be acknowledged by a notary public. Every bond must display the surety's bond number and incorporate the Contract for construction of the Work by reference. The terms of the bonds shall provide that the surety agrees that no change, extension of time, alteration, or modification of the Contract Documents or the Work to be performed thereunder shall in any way affect its obligations and shall waive notice of any such change, extension of time, alteration, or modification of the Contract Documents. The surety further agrees that it is obligated under the bonds to any successor, grantee, or assignee of the City.

Upon the request of any person or entity appearing to be a potential beneficiary of bonds covering payment of obligations arising under the Contract, the Contractor shall promptly furnish a copy of the bonds or shall authorize a copy to be furnished.

Should any bond become insufficient, or should any of the sureties, in the opinion of the City, become non-responsible or unacceptable, the Contractor shall, within ten (10) Calendar Days after receiving notice from the City, provide written documentation to the Satisfaction of the City that Contractor has secured new or additional sureties for the bonds; otherwise the Contractor shall be in default of the Contract. No further payments shall be deemed due or will be made under Contract until a new surety(ies) qualifies and is accepted by the City.

Contractor agrees that the Labor and Materials Payment Bond and Faithful Performance Bond attached to this Agreement are for reference purposes only, and shall not be considered a part of this Agreement. Contractor further agrees that said bonds are separate obligations of the

Contractor and its surety, and that any attorney's fee provision contained in any payment bond or performance bond shall not apply to this Agreement. In the event there is any litigation between the parties arising from the breach of this Agreement, each party will bear its own attorneys' fees in the litigation.

9. RECORDS. The Contractor and its Subcontractors shall maintain and keep books, payrolls, invoices of materials, and Project records current, and shall record all transactions pertaining to the Contract in accordance with generally acceptable accounting principles. Said books and records shall be made available to the City of Moreno Valley, Riverside County, the State of California, the Federal Government, and to any authorized representative thereof for purposes of audit and inspection at all reasonable times and places. All such books, payrolls, invoices of materials, and records shall be retained for at least three (3) years after Final Acceptance.

10. INDEMNIFICATION.

10.1. **General.** To the fullest extent permitted by law, the Contractor assumes liability for and agrees, at the Contractor's sole cost and expense, to promptly and fully indemnify, protect, hold harmless and defend (even if the allegations are false, fraudulent, or groundless), the City of Moreno Valley, its City Council, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD), and all of their respective officials, officers, directors, employees, commission members, representatives and agents ("Indemnitees"), from and against any and all claims, allegations, actions, suits, arbitrations, administrative proceedings, regulatory proceedings, or other legal proceeds, causes of action, demands, costs, judgments, liens, stop notices, penalties, liabilities, damages, losses, anticipated losses of revenues, and expenses (including, but not limited to, any fees of accountants, attorneys, experts or other professionals, or investigation expenses), or losses of any kind or nature whatsoever, whether actual, threatened or alleged, arising out of, resulting from, or in any way (either directly or indirectly), related to the Work, the Project or any breach of the Contract by Contractor or any of its officers, agents, employees, Subcontractors, Sub-subcontractors, or any person performing any of the Work, pursuant to a direct or indirect contract with the Contractor ("Indemnity Claims"). Such Indemnity Claims include, but are not limited to, claims for:

- A. Any activity on or use of the City's premises or facilities;
- B. Any liability incurred due to Contractor acting outside the scope of its authority pursuant to the Contract, whether or not caused in part by an Indemnified Party;
- C. The failure of Contractor or the Work to comply with any Applicable Law, permit or orders;
- D. Any misrepresentation, misstatement or omission with respect to any statement made in the Contract Documents or any document furnished by the Contractor in connection therewith;
- E. Any breach of any duty, obligation or requirement under the Contract Documents, including, but not limited to any breach of Contractor's warranties, representations or agreements set forth in the Contract Documents;
- F. Any failure to coordinate the Work with City's Separate Contractors;
- G. Any failure to provide notice to any party as required under the Contract Documents;
- H. Any failure to act in such a manner as to protect the Project from loss, cost, expense or liability;

- I. Bodily or personal injury, emotional injury, sickness or disease, or death at any time to any persons including without limitation employees of Contractor;
- J. Damage or injury to real property or personal property, equipment and materials (including, but without limitation, property under the care and custody of the Contractor or the City) sustained by any person or persons (including, but not limited to, companies, corporations, utility company or property owner, Contractor and its employees or agents, and members of the general public);
- K. Any liability imposed by Applicable Law including, but not limited to criminal or civil fines or penalties;
- L. Any dangerous, hazardous, unsafe or defective condition of, in or on the Site, of any nature whatsoever, which may exist by reason of any act, omission, neglect, or any use or occupation of the Site by Contractor, its officers, agents, employees, or Subcontractors;
- M. Any operation conducted upon or any use or occupation of the Site by Contractor, its officers, agents, employees, or Subcontractors under or pursuant to the provisions of the Contract or otherwise;
- N. Any acts, errors, omission or negligence of Contractor, its officers, agents, employees, or Subcontractors;
- O. Infringement of any patent rights, licenses, copyrights or intellectual property which may be brought against the Contractor or Owner arising out of Contractor's Work, for which the Contractor is responsible; and
- P. Any and all claims against the City seeking compensation for labor performed or materials used or furnished to be used in the Work or alleged to have been furnished on the Project, including all incidental or consequential damages resulting to the City from such claims.

10.2. **Effect of Indemnitees' Active Negligence.** Contractor's obligations to indemnify and hold the Indemnitees harmless exclude only such portion of any Indemnity Claim which is attributable to the active negligence or willful misconduct of the Indemnitee, provided such active negligence or willful misconduct is determined by agreement of the parties or by findings of a court of competent jurisdiction. In instances where an Indemnitee's active negligence accounts for only a percentage of the liability for the Indemnity Claim involved, the obligation of Contractor will be for that entire percentage of liability for the Indemnity Claim not attributable to the active negligence or willful misconduct of the Indemnitee(s). Such obligation shall not be construed to negate, abridge or otherwise reduce any other right or obligation of indemnity which would otherwise exist as to any party or person described in this Paragraph 11. Subject to the limits set forth herein, the Contractor, at its own expense, shall satisfy any resulting judgment that may be rendered against any Indemnitee resulting from an Indemnity Claim. The Indemnitees shall be consulted with regard to any proposed settlement.

10.3. **Independent Defense Obligation.** The duty of the Contractor to indemnify and hold harmless the Indemnitees includes the separate and independent duty to defend the Indemnitees, which duty arises immediately upon receipt by Contractor of the tender of any Indemnity Claim from an Indemnitee. The Contractor's obligation to defend the Indemnitee(s) shall be at Contractor's sole expense, and not be excused because of the Contractor's inability to evaluate liability or because the Contractor evaluates liability and determines that the Contractor is not liable. This duty to defend shall apply whether or not an Indemnity Claim has merit or is meritless, or which involves claims or allegations that any or all of the Indemnitees were actively, passively, or concurrently negligent, or which otherwise asserts that the Indemnitees are responsible, in whole or in part, for any Indemnity Claim. The Contractor shall respond within thirty (30) Calendar Days to the tender of

any Indemnity Claim for defense and/or indemnity by an Indemnitee, unless the Indemnitee agrees in writing to an extension of this time. The defense provided to the Indemnitees by Contractor shall be by well qualified, adequately insured and experienced legal counsel acceptable to the City.

10.4. Intent of Parties Regarding Scope of Indemnity. It is the intent of the parties that the Contractor and its Subcontractors of all tiers shall provide the Indemnitees with the broadest defense and indemnity permitted by Applicable Law. In the event that any of the defense, indemnity or hold harmless provisions in the Contract Documents are found to be ambiguous, or in conflict with one another, it is the parties' intent that the broadest and most expansive interpretation in favor of providing defense and/or indemnity to the Indemnitees be given effect.

10.5. Waiver of Indemnity Rights Against Indemnitees. With respect to third party claims against the Contractor, to the fullest extent permitted by law, the Contractor waives any and all rights to any type of express or implied indemnity against the Indemnitees.

10.6. Subcontractor Requirements. In addition to the requirements set forth hereinabove, Contractor shall ensure, by written subcontract agreement, that each of Contractor's Subcontractors of every tier shall protect, defend, indemnify and hold harmless the Indemnitees with respect to Indemnity Claims arising out of, in connection with, or in any way related to each such Subcontractors' Work on the Project in the same manner in which Contractor is required to protect, defend, indemnify and hold the Indemnitees harmless. In the event Contractor fails to obtain such defense and indemnity obligations from others as required herein, Contractor agrees to be fully responsible to the Indemnitees according to the terms of this Paragraph 11.

10.7. No Limitation or Waiver of Rights. Contractor's obligations under this Paragraph 11 are in addition to any other rights or remedies which the Indemnitees may have under the law or under the Contract Documents. Contractor's indemnification and defense obligations set forth in this Paragraph 11 are separate and independent from the insurance provisions set forth in the Contract Documents, and do not limit, in any way, the applicability, scope, or obligations set forth in such insurance provisions. The purchase of insurance by the Contractor with respect to the obligations required herein shall in no event be construed as fulfillment or discharge of such obligations. In any and all claims against the Indemnitees by any employee of the Contractor, any Subcontractor, any supplier of the Contractor or Subcontractors, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable, the obligations under this Paragraph 11 shall not be limited in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for the Contractor or any Subcontractor or any supplier of either of them, under workers' or workmen's compensation acts, disability benefit acts or other employee benefit acts. Failure of the City to monitor compliance with these requirements imposes no additional obligations on the City and will in no way act as a waiver of any rights hereunder.

10.8. Withholding to Secure Obligations. In the event an Indemnity Claim arises prior to final payment to Contractor, the City may, in its sole discretion, reserve, retain or apply any monies due Contractor for the purpose of resolving such Indemnity Claims; provided, however, the City may release such funds if the Contractor provides the City with reasonable assurances of protection of the Indemnitees' interests. The City shall, in its sole discretion, determine whether such assurances are reasonable.

10.9. Survival of Indemnity Obligations. Contractor's obligations under this Paragraph 11 are binding on Contractor's and its Subcontractors' successors, heirs and assigns and shall survive the completion of the Work or termination of the Contractor's performance of the Work.

11. SUCCESSORS AND ASSIGNS. The Parties bind themselves, their heirs, executors, administrators, successors and assigns the covenants, agreements and obligations contained in the Contract Documents. The Contractor shall not, either voluntarily or by action of law, assign any right or obligation of the Contractor under the Contract Documents without prior written consent of the City.

PROJECT NO. 801 0051 70 77

**DELPHINIUM AVENUE SIDEWALK IMPROVEMENTS
North Side of Delphinium Avenue from 600 feet West to 590 feet East of Perris Boulevard**

KNOW ALL MEN AND WOMEN BY THESE PRESENTS:

THAT WHEREAS, the City Council of the City of Moreno Valley, State of California, known as "City," has awarded to **Mamco, Inc dba Alabbasi Construction**, as Principal hereinafter designated as "Contractor" and have entered into an Agreement whereby the Contractor agrees to construct or install and complete certain designated public improvements, which said Agreement, effective on the date signed by the City of Moreno Valley, and identified as **Project No. 801 0051 70 77**, and all Contract Documents are hereby referred to and made a part hereof; and

WHEREAS, said Contractor under the terms of said Contract Documents is required to furnish a bond guaranteeing the faithful performance of said Agreement;

NOW THEREFORE, we the undersigned Contractor and _____, as Surety, are held and firmly bound unto the City of Moreno Valley, County of Riverside in the penal sum of _____ dollars, (\$ _____), lawful money of the United States, to be paid to the said City or its certain attorney, its successors and assigns; for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally liable (CCP 995.320 (a)(1)), firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that if the above bound Contractor, his or her or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and provisions in said Contract Documents and any alterations thereof made as therein provided, on his or her or their part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless the City of Moreno Valley, its officers, agents and employees, as therein stipulated, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect. In the event suit is brought upon this bond by the City and judgement is recovered, the Surety shall pay all costs incurred by the City in such suit, including a reasonable attorney fee to be fixed by the court.

Contractor and Surety agree that this Faithful Performance Bond shall not be considered a part of the Agreement between Contractor and the City ("Agreement"). Contractor and Surety further agree that this Faithful Performance Bond is a separate obligation of the Contractor and its Surety, and that any attorneys' fee provision contained in this Faithful Performance Bond shall not apply to the Agreement. In the event there is any litigation between the parties arising from the breach of the Agreement, each party will bear its own attorneys' fees in the litigation.

The Surety hereby stipulates and agrees that no change, extension of time, alteration, or addition to the terms of the Contract Documents or to the Work to be performed thereunder, or the Provisions accompanying the same shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract Documents or to the Work or the Provisions.

BUDGET OFFICER	<i>me</i>
CITY ATTORNEY	<i>SMB</i>
CITY MANAGER	<i>d</i>

Report to City Council

TO: Mayor and City Council

FROM: Ahmad R. Ansari, P.E., Public Works Director/City Engineer

AGENDA DATE: August 26, 2014

TITLE: APPROVE THE FIRST AMENDMENT TO AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH PARSONS BRINCKERHOFF, PROJECT NO. 801 0001 70 77

RECOMMENDED ACTION

Recommendations:

1. Approve the "First Amendment to Agreement for Professional Consultant Services" with Parsons Brinckerhoff (PB) to provide temporary project management services to the Capital Projects Division of the Public Works Department.
2. Authorize the City Manager to execute the "First Amendment to Agreement for Professional Consultant Services" with PB.
3. Authorize an increase in the Purchase Order to PB in the amount of \$158,000, when the "First Amendment to Agreement for Professional Consultant Services" has been signed by all parties.

SUMMARY

This report recommends approval of a contract amendment with PB for on-going temporary project management services to supplement the Capital Projects Division staff due to the extended leave of absence of one of the senior level staff engineers. Staff recommends an increase in the Purchase Order with PB in the amount of \$158,000. This amount will afford the City up to 33 additional work weeks of temporary project management services with an effective hourly rate of \$120 per hour.

DISCUSSION

In late March 2014, one of the Capital Projects Division's senior level staff engineers responsible for managing several capital improvement projects went on an extended leave of absence. In order to maintain timely progress of the capital improvement projects under the staff engineer's purview, the Division issued a Request for Proposal to approximately 180 consultants in its database for temporary project management services. Thirteen proposals were received in mid April 2014. After a detail review of the proposals and reference checks, PB was determine to be the top ranking firm to provide the needed project management services. The "Agreement for Professional Consultant Services" with PB was executed by the City Manager on May 6, 2014, for \$98,000.

The affected staff engineer is still on leave of unknown duration at this time. The current agreement will be fully expended by mid-September 2014. Due to the need to maintain the timely progress of the affected projects and in concert with the recent City Council approval of the FY14/15 Capital Improvement Plan budget, the PB contract requires an amendment in the amount of \$158,000 to continue the temporary project management services for an additional 33 work weeks. The amendment to the agreement will extend the contract expiration date to June 2015. As soon as the assigned city staff member is able to resume the normal work duties, PB's contract can be terminated with 10 working days' notice.

PB staff has successfully worked on the Perris Boulevard Improvements, Alessandro Median Improvements, Citywide Pavement Resurfacing and Cycle 3 and 4 Pedestrian Enhancement projects. PB staff will continue to work on these projects and other tasks, as assigned, to facilitate the timely design and construction of budgeted capital improvement projects.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *This alternative will facilitate the timely completion of budgeted capital improvement projects.*
2. Do not approve and authorize the recommended actions as presented in this staff report. *This alternative will delay the completion and closeout of several budgeted capital improvement projects.*

FISCAL IMPACT

The "Agreement for Professional Consultant Services" with PB will be fully expended sometime in mid-September 2014. This first amendment to the agreement will increase the Purchase Order by \$158,000. Sufficient funds are available in the Perris Boulevard / Ironwood Avenue to Manzanita Avenue project budget (GL Account No. 3003-70-77-80001, Project No. 801 0024 70 77-3003) to encumber the increase to the purchase order. As costs for projects other than Perris Boulevard / Ironwood Avenue to

Manzanita Avenue are incurred, the expenditures will be transferred to the capital projects for which services were performed. There is no impact to the General Fund.

BUDGET FOR CONSTRUCTION:

Perris Boulevard Widening (Project No. 801 0024 70 77)	
Measure A/SLPP Grant (Account No. 2001-70-77-80001).....	\$1,000,000

FIRST AMENDMENT TO AGREEMENT
FOR PROFESSIONAL CONSULTANT SERVICES

This First Amendment to Agreement is by and between the City of Moreno Valley, a municipal corporation, hereinafter referred to as "City," and **Parsons Brinckerhoff, Inc.**, a New York corporation, hereinafter referred to as "Consultant." This First Amendment to Agreement is made and entered into effective on the date the City signs this Amendment.

RECITALS:

Whereas, the City and Consultant entered into an Agreement entitled "AGREEMENT for PROFESSIONAL CONSULTANT SERVICES," hereinafter referred to as "Agreement," dated May 6, 2014.

Whereas, the Consultant is providing professional consultant services for capital improvement project management.

Whereas, it is desirable to amend the Agreement to continue the scope of the work to be performed by the Consultant for an extended period of time as is more particularly described in Section 1 of this First Amendment.

SECTION 1 AMENDMENT TO ORIGINAL AGREEMENT

1.1 The Agreement termination of December 30, 2014 is extended by this Amendment to June 30, 2015, unless the termination date is further extended by an Amendment to the agreement.

1.2 Exhibit "B" to the Agreement is hereby amended by continuing the scope of work for an extended period by providing the same Professional Consultant Services for "capital improvement project management full time (per City work schedule and City PM direction)".

**AMENDMENT TO AGREEMENT FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0001 70 77**

1.3 Exhibit "D" to the Agreement is hereby further amended by adding to the cost proposal in the amount of \$158,000.00

1.4 The City agrees to pay the Consultant and the Consultant agrees to receive a "Not-to-Exceed" fee of \$158,000.00 at a lump sum \$4,800 per week in consideration of the Consultant's performance of the work.

1.5 The total "Not to Exceed" fee for this contract is \$256,000.00 (\$98,000.00 for the original Agreement plus \$158,000.00 for the First Amendment to Agreement).

SECTION 2

2.1 Except as otherwise specifically provided in this Amendment, all other terms and conditions of the Agreement shall remain in full force and effect.

**AGREEMENT FOR PROFESSIONAL
CONSULTANT SERVICES
TO
SUPPLEMENT CAPITAL PROJECTS DIVISION STAFFING NEEDS
(PROJECT NUMBER 801 0001 70 77 3411)**

This Agreement is by and between the City of Moreno Valley, California, a municipal corporation, hereinafter described as "City," and Parsons Brinckerhoff a (California corporation, partnership, sole ownership) hereinafter described as "Consultant." This Agreement is made and entered into effective on the date the City signs this Agreement.

RECITALS

WHEREAS, the City has determined it is in the public interest to proceed with the professional work hereinafter described as "Project"; and

WHEREAS, the City has determined the Project involves the performance of professional and technical services of a temporary nature as more specifically described in Exhibit "A" (City's Request for Proposal) and Exhibit "B" (Consultant's Proposal) hereto; and

WHEREAS, the City does not have available employees to perform the services for the Project; and

WHEREAS, the City has requested the Consultant to perform such services for the Project; and

WHEREAS, the Consultant is professionally qualified in California to perform the professional and technical services required for the Project, and hereby represents that it desires to and is professionally and legally capable of performing the services called for by this Agreement;

THEREFORE, the City and the Consultant, for the consideration hereinafter described, mutually agree as follows:

DESCRIPTION OF PROJECT

1. The Project is described as Capital Improvement Project Management.

Project No. 801 0001 70 77 3411.

SCOPE OF SERVICES

2. The Consultant's scope of service is described on Exhibit "B" attached hereto and incorporated herein by this reference. In the event of a conflict, the City's Request for Proposal shall take precedence over the Consultant's Proposal.

3. The City's responsibility is described on Exhibit "C" attached hereto and incorporated herein by this reference.

PAYMENT TERMS

4. The City agrees to pay the Consultant and the Consultant agrees to receive a "Not-to-Exceed" fee of \$98,000 in accordance with the payment terms provided on Exhibit "D" attached hereto and incorporated herein by this reference.

TIME FOR PERFORMANCE

5. The Consultant shall commence services upon receipt of written direction to proceed from the City.

6. The Consultant shall perform the work described on Exhibit "A" in accordance with the schedule as stated in the Notice to Proceed.

7. This Agreement shall be effective from effective date and shall continue in full force and effect date through December 30, 2014, subject to any earlier termination in accordance with this Agreement. The services of Consultant shall be completed in a sequence assuring expeditious completion, but in any event, all such services shall be completed prior to expiration of this Agreement.

8. (a) The Consultant agrees that the personnel, including the principal Project manager, and all subconsultants assigned to the Project by the Consultant, shall be subject to the prior approval of the City.

(b) No change in subconsultants or key personnel shall be made by the Consultant without written prior approval of the City.

SPECIAL PROVISIONS

9. It is understood and agreed that the Consultant is, and at all times shall be, an independent contractor and nothing contained herein shall be construed as making the Consultant or any individual whose compensation for services is paid by the Consultant, an agent or employee of the City, or authorizing the Consultant to create or assume any obligation or liability for or on behalf of the City.

10. The Consultant may also retain or subcontract for the services of other necessary consultants with the prior written approval of the City. Payment for such services shall be the responsibility of the Consultant. Any and all subconsultants employed by the Consultant shall be subject to the terms and conditions of this Agreement, except that the City shall have no obligation to pay any subconsultant for services rendered on the Project.

11. The Consultant and the City agree to use reasonable care and diligence to perform their respective services under this Agreement.

12. The Consultant shall comply with applicable federal, state, and local laws in the performance of work under this Agreement.

13. To the extent required by controlling federal, state and local law, Consultant shall not employ discriminatory practices in the provision of services, employment of personnel, or in any other respect on the basis of race, religious creed, color, national origin, ancestry, physical

disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era. Subject to the foregoing and during the performance of this Agreement, Consultant agrees as follows:

(a) Consultant will comply with all applicable laws and regulations providing that no person shall, on the grounds of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity made possible by or resulting from this Agreement.

(b) Consultant will not discriminate against any employee or applicant for employment because of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era. Consultant shall ensure that applicants are employed, and the employees are treated during employment, without regard to their race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era. Such requirement shall apply to Consultant's employment practices including, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Consultant agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provision of this nondiscrimination clause.

(c) Consultant will, in all solicitations or advertisements for employees placed by or on behalf of Consultant in pursuit hereof, state that all qualified applicants will receive consideration for employment without regard to race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era.

(d) If Consultant should subcontract all or any portion of the services to be performed under this Agreement, Consultant shall cause each subcontractor to also comply with the requirements of this Section 13.

14. To the furthest extent allowed by law (including California Civil Code section 2782.8 if applicable), Consultant shall indemnify, hold harmless and defend the City, the Moreno Valley Community Services District ("CSD"), the Moreno Valley Housing Authority ("Housing Authority") and each of their officers, officials, employees, agents and volunteers from any and all loss, liability, fines, penalties, forfeitures, costs and damages (whether in contract, tort or strict liability, including but not limited to personal injury, death at any time and property damage), and from any and all claims, demands and actions in law or equity (including reasonable attorney's fees and litigation expenses) that arise out of, pertain to, or relate to the negligence, recklessness or willful misconduct of Consultant, its principals, officers, employees, agents or volunteers in the performance of this Agreement.

If Consultant should subcontract all or any portion of the services to be performed under this Agreement, Consultant shall require each subcontractor to indemnify, hold harmless and defend City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers in accordance with the terms of the preceding paragraph.

This section shall survive termination or expiration of this Agreement.

15. Insurance.

(a) Throughout the life of this Agreement, Consultant shall pay for and maintain in full force and effect all insurance as required in **Exhibit E** or as may be authorized in writing by the City Manager or his/her designee at any time and in his/her sole discretion.

(b) If at any time during the life of the Agreement or any extension, Consultant or any of its subcontractors fail to maintain any required insurance in full force and effect, all services and work under this Agreement shall be discontinued immediately, and all payments due or that become due to Consultant shall be withheld until notice is received by City that the required insurance has been restored to full force and effect and that the premiums therefore have been paid for a period satisfactory to City. Any failure to maintain the required insurance shall be sufficient cause for City to terminate this Agreement. No action taken by City pursuant to this section shall in any way relieve Consultant of its responsibilities under this Agreement. The phrase "fail to maintain any required insurance" shall include, without limitation, notification received by City that an insurer has commenced proceedings, or has had proceedings commenced against it, indicating that the insurer is insolvent.

(c) The fact that insurance is obtained by Consultant shall not be deemed to release or diminish the liability of Consultant, including, without limitation, liability under the indemnity provisions of this Agreement. The duty to indemnify City shall apply to all claims and liability regardless of whether any insurance policies are applicable. The policy limits do not act as a limitation upon the amount of indemnification to be provided by Consultant. Approval or purchase of any insurance contracts or policies shall in no way relieve from liability nor limit the liability of Consultant, its principals, officers, agents, employees, persons under the supervision of Consultant, vendors, suppliers, invitees, consultants, sub-consultants,

subcontractors, or anyone employed directly or indirectly by any of them.

(d) Upon request of City, Consultant shall immediately furnish City with a complete copy of any insurance policy required under this Agreement, including all endorsements, with said copy certified by the underwriter to be a true and correct copy of the original policy. This requirement shall survive expiration or termination of this Agreement.

(e) If Consultant should subcontract all or any portion of the services to be performed under this Agreement, Consultant shall require each subcontractor to provide insurance protection in favor of City and each of its officers, officials, employees, agents and volunteers in accordance with the terms of this section, except that any required certificates and applicable endorsements shall be on file with Consultant and City prior to the commencement of any services by the subcontractor.

16. The waiver by either party of a breach by the other of any provision of this Agreement shall not constitute a continuing waiver or a waiver of any subsequent breach of either the same or a different provision of this Agreement. No provisions of this Agreement may be waived unless in writing and signed by all parties to this Agreement. Waiver of any one provision herein shall not be deemed to be a waiver of any other provision herein.

17. Consultant and subconsultants shall pay prevailing wage rates when required by the Labor Laws of the State of California.

18. (a) The Consultant shall deliver to the Deputy Public Works Director/Assistant City Engineer, fully completed and detailed project-related documents which shall become the property of the City. The Consultant may retain, for its files, copies of any and all material, including drawings, documents, and specifications, produced by the Consultant in performance of this Agreement.

(b) The Consultant shall be entitled to copies of all furnished materials for his files and his subconsultants, if any.

(c) The City agrees to hold the Consultant free and harmless from any claim arising from any unauthorized use of computations, maps, and other documents prepared or provided by the Consultant under this Agreement, if used by the City on other work without the permission of the Consultant. Consultant acknowledges that Consultant work product produced under this agreement may be public record under State law.

19. (a) This Agreement shall terminate without any liability of City to Consultant upon the earlier of: (i) Consultant's filing for protection under the federal bankruptcy laws, or any bankruptcy petition or petition for receiver commenced by a third party against Consultant; (ii) 10 calendar days prior written notice with or without cause by City to Consultant; (iii) City's non-appropriation of funds sufficient to meet its obligations hereunder during any City fiscal year of this Agreement, or insufficient funding for the Project; or (iv) expiration of this Agreement. The written notice shall specify the date of termination. Upon receipt of such notice, the Consultant may continue services on the project through the date of termination, provided that no service(s) shall be commenced or continued after receipt of the notice, which is not intended to protect the interest of the City. The City shall pay the Consultant within thirty (30) days after the date of termination for all non-objected to services performed by the Consultant in accordance herewith through the date of termination. Consultant shall not be paid for any work or services performed or costs incurred which reasonably could have been avoided.

(b) In the event of termination due to failure of Consultant to satisfactorily perform in accordance with the terms of this Agreement, City may withhold an amount that would

otherwise be payable as an offset to, but not in excess of, City's damages caused by such failure. In no event shall any payment by City pursuant to this Agreement constitute a waiver by City of any breach of this Agreement which may then exist on the part of Consultant, nor shall such payment impair or prejudice any remedy available to City with respect to the breach.

(c) Upon any breach of this Agreement by Consultant, City may (i) exercise any right, remedy (in contract, law or equity), or privilege which may be available to it under applicable laws of the State of California or any other applicable law; (ii) proceed by appropriate court action to enforce the terms of the Agreement; and/or (iii) recover all direct, indirect, consequential, economic and incidental damages for the breach of the Agreement. If it is determined that City improperly terminated this Agreement for default, such termination shall be deemed a termination for convenience.

(d) Consultant shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of Consultant and without its fault or negligence such as, acts of God or the public enemy, acts of City in its contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. Consultant shall notify City in writing as soon as it is reasonably possible after the commencement of any excusable delay, setting forth the full particulars in connection therewith, and shall remedy such occurrence with all reasonable dispatch, and shall promptly give written notice to Administrator of the cessation of such occurrence.

20. This Agreement is binding upon the City and the Consultant and their successors and assigns. Except as otherwise provided herein, neither the City nor the Consultant shall assign, sublet, or transfer its interest in this Agreement or any part thereof without the prior written consent of the other.

21. A City representative shall be designated by the City and a Consultant representative shall be designated by the Consultant. The City representative and the Consultant representative shall be the primary contact person for each party regarding performance of this Agreement. The City representative shall cooperate with the Consultant, and the Consultant's representative shall cooperate with the City in all matters regarding this Agreement and in such a manner as will result in the performance of the services in a timely and expeditious fashion.

22. This Agreement represents the entire and integrated Agreement between the City and the Consultant, and supersedes all prior negotiations, representations or Agreements, either written or oral. This Agreement may be modified or amended only by a subsequent written Agreement signed by both parties.

23. Where the payment terms provide for compensation on a time and materials basis, the Consultant shall maintain adequate records to permit inspection and audit of the Consultant's time and materials charges under this Agreement. The Consultant shall make such records available to the City at the Consultant's office during normal business hours upon reasonable notice. Nothing herein shall convert such records into public records. Except as may be otherwise required by law, such records will be available only to the City. Such records shall be maintained by the Consultant for three (3) years following completion of the services under this Agreement.

24. The City and the Consultant agree, that to the extent permitted by law, until final approval by the City, all data shall be treated as confidential and will not be released to third parties without the prior written consent of both parties.

25. (a) Consultant shall comply, and require its subcontractors to comply, with all

applicable (i) professional canons and requirements governing avoidance of impermissible client conflicts; and (ii) federal, state and local conflict of interest laws and regulations including, without limitation, California Government Code Section 1090 et. seq., the California Political Reform Act (California Government Code Section 87100 et. seq.) and the regulations of the Fair Political Practices Commission concerning disclosure and disqualification (2 California Code of Regulations Section 18700 et. seq.). At any time, upon written request of City, Consultant shall provide a written opinion of its legal counsel and that of any subcontractor that, after a due diligent inquiry, Consultant and the respective subcontractor(s) are in full compliance with all laws and regulations. Consultant shall take, and require its subcontractors to take, reasonable steps to avoid any appearance of a conflict of interest. Upon discovery of any facts giving rise to the appearance of a conflict of interest, Consultant shall immediately notify City of these facts in writing.

(b) In performing the work or services to be provided hereunder, Consultant shall not employ or retain the services of any person while such person either is employed by City or is a member of any City council, commission, board, committee, or similar City body. This requirement may be waived in writing by the City Manager, if no actual or potential conflict is involved.

(c) Consultant represents and warrants that it has not paid or agreed to pay any compensation, contingent or otherwise, direct or indirect, to solicit or procure this Agreement or any rights/benefits hereunder.

(d) Neither Consultant, nor any of Consultant's subcontractors performing any services on this Project, shall bid for, assist anyone in the preparation of a bid for, or perform any services pursuant to, any other contract in connection with this Project unless fully

disclosed to and approved by the City Manager, in advance and in writing. Consultant and any of its subcontractors shall have no interest, direct or indirect, in any other contract with a third party in connection with this Project unless such interest is in accordance with all applicable law and fully disclosed to and approved by the City Manager, in advance and in writing. Notwithstanding any approval given by the City Manager under this provision, Consultant shall remain responsible for complying with Section 25(a), above.

(e) If Consultant should subcontract all or any portion of the work to be performed or services to be provided under this Agreement, Consultant shall include the provisions of this Section 25 in each subcontract and require its subcontractors to comply therewith.

(f) This Section 25 shall survive expiration or termination of this Agreement.

26. All Plans, drawings, Specifications, reports, logs, and other documents prepared by the Consultant in its performance under this Agreement shall, upon completion of the project, be delivered to and be the property of the City, provided that the Consultant shall be entitled, at its own expense, to make copies thereof for its own use.

27. The laws of the State of California shall govern the rights, obligations, duties, and liabilities of the parties to this Agreement, and shall also govern the interpretation of this Agreement. Venue shall be vested in the Superior Court of the State of California, County of Riverside.

REQUEST FOR PROPOSAL

**PROFESSIONAL CONSULTANT SERVICES
TO
SUPPLEMENT CAPITAL PROJECTS DIVISION STAFFING NEEDS
(PROJECT NUMBER 801 0001 70 77 3411)**

I. INVITATION

You are hereby invited to submit a Proposal for Professional Consultant Services to supplement Capital Projects Division staffing needs. Due to the unanticipated leave of absence by City staff for unknown duration, this service is needed as soon as possible for approximately three to four months and possibly longer. Specifically, the City is looking for an AutoCAD drafter to assist with street improvement plan preparation and a seasoned Project Manager to help manage several active capital improvement projects.

The City anticipates making a decision within one week of the proposal submittal deadline of 1 pm on April 17, 2014. The process of executing the agreement between both parties may take up to an additional three weeks.

II. REFERENCE DOCUMENTATION

Please refer to the City's website (www.moreno-valley.ca.us) for a copy of the City's Capital Improvement Plan budget to obtain a flavor for the types of projects that the City will need assistance from a project management stand point.

III. PROJECT BUDGET

The City of Moreno Valley will fund the services with available funds in the Capital Improvement Project budget.

IV. SCOPE OF SERVICES

A. AutoCAD Drafting Services

The designated drafter under the general direction of City staff shall be responsible for assisting with various drafting needs related to street improvement plans. An engineering technician with knowledge of simple design expertise in laying out street improvement plans would be preferred. The expectation at this time is that this individual would at least spend two full work days per week at City Hall to assist with various drafting needs. A temporary office cubicle will be provided to this individual at City Hall.

B. Project Management Consultant Services

The designated Consultant Project Manager, under the general direction of the Capital Projects Division Manager, shall be responsible for overseeing all aspects of a series of projects from conception to close-out (“cradle to grave” scenario). Typically, a project manager is assigned anywhere from approximately three to ten projects to manage individually depending on the complexity of the projects. Although, the City is considering hiring one project manager at this time to manage street improvement projects (asphalt paving, street construction, sidewalk, traffic signal, retaining wall, bridges, grading, striping, drainage, street lights, water, sewer, miscellaneous landscape, etc.), the Consultant may propose more than one project manager for consideration including those that may be experienced in public building project design and construction. It is preferred that the proposed individual will have extensive City or similar local agency experience as the individual will be expected to work independently with minimum oversight from City staff and be familiar with the details of managing all of the phases described below.

Due to the City’s current work furlough program, the maximum work hours at City Hall are limited to 36 hours per week Monday through Thursday. Priority selection will be given to an experienced project manager that are accessible and available to work at City Hall based on the current workload. During the construction phase of a project, the project manager must be flexible enough to provide as needed project management coverage on Fridays as well as the contractor will likely be working Monday – Friday. The project manager must have the appropriate equipment and vehicle to perform the necessary tasks at all times. A temporary office cubicle will be provided to this individual at City Hall.

B1. Project Management Services during Design Phase

Typical Project Management Services shall include, but not be limited to:

1. Prepare and maintain a project schedule identifying the critical path for expeditious project completion.
2. Conduct and attend design kick-off meeting with all stakeholders.
3. Schedule and conduct Project Development Team (PDT) meetings and other necessary meetings; prepare agendas and minutes; and distribute to all applicable entities (not just attendees) within three (3) working days.
4. Schedule, facilitate, and attend public meetings as necessary.
5. Provide progress reports monthly or as deemed required.
6. Compose all correspondences to keep the project on schedule.
7. Attend and present the project to City Council as required.
8. Check all contract documents to ensure compliance with the Caltrans Local Assistance Procedure Manual (LAPM) and funding requirements, as required.
9. Prepare all submittals to Caltrans Local Assistance in accordance with the

RFP for
**Professional Consultant Services to
Supplement Capital Projects Division
Staffing Needs**

**PARSONS
BRINCKERHOFF**

April 16, 2014

Mr. Prem Kumar, PE,
Deputy Public Works Director/ Assistant City Engineer
City of Moreno Valley
Capital Projects Division
14177 Frederick Street
Moreno Valley, CA 92552

RE: Professional Consultant Services, Capitol Project Division Staffing Needs

Dear Mr. Kumar:

As you know, the City of Moreno Valley (City) is requesting proposals to supplement the Capitol Projects Division's staffing needs for the next few months. The City is looking for an AutoCAD drafter to assist with street improvement plan preparation and a seasoned project manager to help manage several active capital improvement projects (CIP). The City's CIP in place contains your plan for infrastructure improvements to bring lasting benefits and enhance the quality of life for your residents and visitors. Parsons Brinckerhoff submits this proposal with the intent to support the City's efforts and provide staff augmentation services.

We have assembled our best team of local experts in project management and AutoCadd design. Our proposed project managers, **George Harvilla, PE and Ron Sklepko, PE, LEED AP**, are experienced in overseeing all aspects of projects from conception to close-out and are able to handle multiple projects at once. Our proposed AutoCAD drafters, **Dennis Rodriguez, Marge Furiscal, PE and Bowen Yang**, are all knowledgeable in drafting street improvement plans.

All Parsons Brinckerhoff staff proposed are located in our Inland Empire office, just 25 minutes from the City. With a local staff more than 90, we are the largest engineering consultant in the Inland Empire, and have a total strength of 382 technical professionals in Southern California. All proposed staff are available and accessible to focus and perform the tasks described in the request for proposals (RFP). All proposed staff will be present at City Hall, as required, to complete tasks when needed.

Going forward, I will be the City's point of contact during the proposal evaluation process. Feel free to contact me with any questions by phone, (909) 888-1106, or by e-mail, SawyerD@pbworld.com. Our team is excited about the opportunity to continue working with the City, now ranked one of the fastest growing in the nation.

Sincerely,
Parsons Brinckerhoff, Inc.

Douglas B. Sawyer
Senior Vice President/Inland Empire Area

Experience

Parsons Brinckerhoff

For more than a century, **Parsons Brinckerhoff, Inc. (Parsons Brinckerhoff)** - a local and national leader in developing and operating infrastructure - has earned a distinguished reputation for technical expertise in the areas of transportation, environment, energy, power, community development, public works and water. Serving the Inland Empire for more than 55 years, the firm's experience includes a wide range of staff augmentation design and construction management (CM) services, with multiple cities and agencies in Riverside and San Bernardino counties, including the City of Moreno Valley (City) and the cities of Highland, Fontana, Corona, and Chino.

Parsons Brinckerhoff offers the City a trusted advisor and technically proven team that can respond to all of your staffing needs. Our local staff of 90 professionals and Southern California staff totaling 382 include the full spectrum of engineering and project management professionals with on-point experience in the Inland Empire.

Experience

Our team's qualifications include a successful track record in Riverside County and the Inland Empire that spans 55 years, and a portfolio of civil engineering design projects and tasks completed to our clients' satisfaction. We have worked for nearly every major regional public agency, the City, Riverside County Transportation Commission (RCTC), Caltrans and dozens of other cities. Parsons Brinckerhoff's high rate of repeat clients is testimony to the quality of our work, our teaming selections, and our professional and support staff. The following projects included staff augmentation as a part of the contract.

City of Corona On-call Services | Corona, California

Parsons Brinckerhoff is currently providing a variety of project-specific and on-call consulting services to the city of Corona since 2010, **including two full-time staff members working at the city of Corona to augment staffing needs in their public works and development groups. Furthermore, we are providing a half-time engineer for office engineer on a major CM project.** The staff onsite assist with the preparation of bids, prepare reports, updates, notice to proceed (NTPs), requests for information (RIFs) and requests for qualifications (RFQs).

City of Chino Staff Augmentation Services | Chino, California

Parsons Brinckerhoff is currently **providing a project manager to assist the city of Chino** onsite 2-3 days a week to manage land development projects. The project manager is responsible for managing 5-10 projects at a time with minimal oversight from the city of Chino. The project manager is responsible for all aspects of the projects from conception to close-out including preparing the bids, agreements and purchase orders, preparing report updates, funding reports, NTPs, RIFs and RFQs.

Staff Augmentation

Parsons Brinckerhoff is currently providing project management and staff engineers at the following cities.

- City of Corona
- City of Chino

Parsons Brinckerhoff has previously provided staff augmentation for the following cities:

- City of Fontana
- City of Highland

LAPM and other Caltrans requirements, as required.

10. Prepare reimbursement requests and invoices to Caltrans and other funding agencies.
11. Prepare staff reports to City Council for authorization of agreements, amendments, Closed Session action items, etc.
12. Prepare agreements and Purchase Orders.
13. Coordinate with and prepare inter-agency agreements.
14. Coordinate with funding agencies and prepare reports, updates, funding reports, and grant applications as necessary for project funding.
15. Prepare project update write-ups.
16. Prepare annual Capital Improvement Program (CIP) budget update.
17. Prepare annual project estimate and budget for project (City Green Sheet).
18. Issue all necessary Notices to Proceed (NTP).
19. Review and process all invoices (City staff will approve).
20. Compose Requests for Proposals (RFP), Notices Inviting Proposals (NIP), and Scopes of Services to retain other related design services, services of specialty Consultants/Contractors needed during construction, such as Design Review, Surveying, Inspection, Geotechnical, Material Testing, etc.; coordinate and schedule these services; and review proposals as necessary.
21. Maintain all project files in accordance with the City boiler format or as otherwise directed by the City Program Manager.
22. Facilitate, coordinate, and oversee the ongoing daily actions required to completely provide the full level of intended services and ensure that the project meets all applicable Federal, State, and local requirements.
23. Oversee and ensure that all measures of the specific project's scope of services are completed in a timely and professional manner with an emphasis on providing the City with a high quality project.
24. Report directly to the City Program Manager and act as a liaison between the City and all project stakeholders in order to accomplish the full project services intended by the City.
25. Oversee and arrange for an independent and timely plan check review, either through in-house appropriate experienced staff or outside sub-consultant, including, but not limited to Project Report, Project Summary Memorandum, Geotechnical Report, Traffic Study, Environmental Documents, 35% Plans, 65%, 95%, 100% and Final PS&E packages, SWPPP Plan, Appraisal Reports, Legal and Plats, and all documents related to right-of-way acquisition.
26. Ensure that all appropriate communication, correspondence, and reports are completed on an ongoing basis in a timely manner to the satisfaction of the City. The following is a list of some, but not necessarily all, of the

documents that the Consultant shall be responsible to provide in the course of the work:

- a. Various City Council Staff Reports.
 - b. Utility correspondence letters and e-mails.
 - c. Federal, State and local correspondence.
 - d. Federal, State and local documentation required for the project.
 - e. Right-of-way related documents and correspondence.
 - f. Necessary communication and reports to the funding agencies.
27. Arrange and participate in a detailed independent review of the 95% PS&E package, with in-depth field review and bidability, constructability, and claim avoidance emphasis.
 28. Coordinate and ensure that all stakeholders and City Divisions and Departments complete plan check of all appropriate project documents.
 29. Provide plan check summary update at each plan check level and meet with the City Program Manager to review appropriate plan check redlines/comments.
 30. Coordinate and ensure that updates necessary as a result of plan check review are communicated and incorporated.

B2. Project Management Services during Advertising, Bidding and Construction Contract Award Phases

The Project Manager shall be responsible for coordinating the advertising for construction bids, shall provide support during bidding and attend the bid opening of the project according to the California Public Contract Code for applicable municipal agencies. The required Project Management Consultant Services shall include, but not be limited to:

1. Prepare and coordinate to have bid notices advertised and posted at various trade publications and on the City's website.
2. Prepare bid packages.
3. Ensure current information is posted on the City's website regarding the project and bid package for prospective bidders to download.
4. Maintain plan holder's list.
5. Schedule and conduct pre-bid meetings, if held.
6. Conduct pre-bid site visits if needed.
7. Provide responses to bidders' questions.
8. Answer questions regarding the Technical Provisions, the design drawings or conflicts in the design during bidding process. The Consultant shall prepare or assist in the preparation of addenda.
9. Be available to answer questions regarding the Technical Provisions, the design drawings or conflicts in the specifications.

10. Attend the construction bid opening at the City Clerk's Office. Evaluate and check all bids per established contract law.
11. Evaluate and post bid results.
12. Check references and licenses of bidders.
13. Review insurance, bonding, and other required documents.
14. Select lowest, responsive, responsible, and qualified bidder.
15. Draft City Council Staff Report for award of construction contract and process the contract agreement with the lowest responsible bidder.
16. Attend the City Council meeting for award of the contract, available to answer questions, and defend the project.
17. Prepare, coordinate, and process Notice of Award, Agreements, and Purchase Order.

B3. Project Management Services during Construction and Project Close-out Phases

Provide Resident Engineer oversight on local, state and federally funded projects. These activities include, but not limited to the following:

1. Administer the contract (general contract administration and oversight of project)
2. Daily project field review and documentation of construction activities (daily reports and digital photo of significant issues and milestones)
3. Monitor Contractor's daily labor force for compliance with state & federal labor laws
4. Field verification of traffic control procedures and consistency with approved Traffic Control Plan
5. Conduct progress meetings and prepare meeting minutes (gauge project health)
6. Coordinate with agencies and different stake holders to ensure smooth progress of construction activities
7. Monitor project schedule
8. Verify quantities and assuring quality control
9. Field observations of site safety
10. Maintain complete and accurate project records compliant with Caltrans manual

11. Review and recommend approval/disapproval of monthly progress pay estimates
12. Verify NPDES and SWPPP compliance
13. Process submittal of RFI weekly statement of working days, change orders and progress payments
14. Coordinate punchlist and as-builts
15. Ensure that materials and completed work comply with plans, specifications and design criteria
16. Implement security procedures
17. Coordinate survey and material testing
18. Process control documents, submittals, RFI, weekly statement of working days, change orders, work change directives
19. Compliance with Caltrans encroachment permit requirements, if required
20. Coordinate Project closeout activities which include staff report, Notice of Completion, release of retention, warranty walk, archiving documents, GASB 34, etc.

V. CONSULTANT'S PROPOSAL

Three (3) copies (one of the copies will be unbound and paper clipped, with no tabs, holes, perforations, or cardboard inserts, suitable for copying with an automatic-feed copy machine and one copy shall be on compact disk) of your Proposal shall be submitted no later than **1:00 p.m., April 17, 2014**, addressed to Capital Projects Division, 14177 Frederick Street (hand delivery), P.O. Box 88005, Moreno Valley, California 92552-0805 (mail delivery), Attention: Prem Kumar, Deputy Public Works Director/Assistant City Engineer.

The Consultant's Proposal focused on the individuals being proposed for the work described herein should include:

- a. Identify the key staff, qualifications and experience to perform the work described herein.
- b. Identify key staff's availability to conduct the work and ability to perform the applicable work at City Hall.
- c. And shall be no more than 15 pages, excluding a cover letter of up to two pages, dividers, and certificates.

VI. GENERAL COMPLIANCE WITH LAWS AND WAGE RATES

- A. The Consultant shall be required to comply with all federal, state, and local laws and ordinances applicable to the work. This includes compliance with prevailing wage rates and their payment in accordance with California Labor Code, Section 1775.
- B. The Consultant is required to submit certified payrolls weekly. This applies to all applicable field personnel working on the project. In accordance with Section 1771.5 (b) (5) of the California Labor Code, the City will withhold payments when the payroll records are delinquent or inadequate.

VII. FEDERAL EMPLOYEE BENEFIT

No member of, or delegate to, the Congress of the United States, and no Resident Commissioner shall be admitted to any share or part of the Agreement to the said project or to any benefit to arise from the same.

The Consultant shall complete and include the "Certification for Contracts, Grants, Loans, and Cooperative Agreements" and "Disclosure of Lobbying Activities" forms with the Proposal.

VIII. PAYMENT TO CONSULTANT

- A. Consultant services are based on agreed upon hourly rate for a specific individual and an overall "Not-to-Exceed Fixed Fee" will be requested.
- B. Progress payments shall be based on agreed upon hourly rate for the hours of work performed. Monthly invoices will specifically identify job title, person-hours, and costs incurred.
- C. Reimbursement costs such as mileage, printing, telephone, photographs, postage and delivery, are to be included in the "Not-to-Exceed Fixed Fee."
- D. All tasks including labor and reimbursable costs such as mileage, printing, telephone, photographs, postage, and delivery shall have supporting documentation presented at the time payment is requested.
- E. The City will pay the Consultant for all acceptable services rendered in accordance with the "Agreement for Professional Consultant Services." This sample Agreement is attached. The Consultant must be able to execute this Agreement without any requested changes or modification. Please review this

Agreement carefully before providing a proposal for the work described herein.

- F. When the Consultant is performing, or is requested to perform, work beyond the scope of service in the "Agreement for Professional Consultant Services," an "Amendment to the Agreement" will be executed between the City and Consultant.

IX. TERMINATION FOR CONVENIENCE OF THE CITY

The City reserves the right to terminate the "Agreement for Professional Consultant Services" for the "convenience of the City" at any time by giving ten (10) days written notice to the Consultant of such termination and specifying the effective date thereof. All finished or unfinished drawings, maps, documents, field notes and other materials produced and procured by the Consultant under the said aforementioned Agreement is, at the option of the City, City property and shall be delivered to the City by the Consultant within ten (10) working days from the date of such termination. The City will reimburse the Consultant for all acceptable work performed as set forth in the executed Agreement.

X. INDEPENDENT CONTRACTOR

The Consultant's relationship to the City in the performance of the Consultant's services for this project is that of an independent Contractor. The personnel performing said Surveying Services shall at all times be under the Consultant's exclusive direction and control and shall be employees of the Consultant and not employees of the City. The Consultant shall pay all wages, salaries and other amounts due his employees in connection with the performance of said work shall be responsible for all employee reports and obligations, including but not necessarily restricted to, social security, income tax withholding, unemployment compensation, and Workers' Compensation.

XI. CONTRACT

The Consultant must be able to execute the "Agreement for Professional Consultant Services" (sample attached) without any requested changes or modifications. Please review this Agreement carefully before providing a proposal for the work described herein. Once the agreement is executed, the City will issue a Purchase Order and Notice to Proceed.

The Political Reform Act and the City's Conflict of Interest Code require that consultants be considered as potential filers of Statements of Economic Interest. Consultants, as defined by Section 18701, may be required to file an Economic Interest Statement (Form 700) within 30 days of signing a Consultant Agreement with the City, on an annual basis thereafter if the contract is still in place, and within 30 days of completion of the contract.

XII. GENERAL CONDITIONS

- A. Pre-contractual expenses are defined as expenses incurred by the Consultant in: (1) preparing the Proposal; (2) submitting the Proposal to the City; (3) presentation during selection interview; (4) negotiating with the City any matter related to this Proposal; (5) any other expenses incurred by the Consultant prior to an executed Agreement.

The City shall not, in any event, be liable for any pre-contractual expenses incurred by the Consultant.

- B. The City reserves the right to withdraw this RFP at any time without prior notice. Further, the City makes no representations that any Agreement will be awarded to any Consultant responding to this RFP. The City expressly reserves the right to postpone reviewing the Proposal for its own convenience and to reject any and all Proposals responding to this RFP without indicating any reasons for such rejection(s).
- C. The City reserves the right to reject any or all Proposals submitted. Any Contract awarded for these Consultant engagements will be made to the Consultant who, in the opinion of the City, is best qualified.

XIII. SELECTION CRITERIA

The Consultant's key personnel proposed for this work may be invited to a selection interview. The Proposals will be rated/ranked according to the following criteria:

- A. Experience of Key Personnel (60 points) – Clear demonstrated ability to perform the tasks as described in this document, familiarity with state and federal procedures, local municipal project management experience and favorable references preferably with municipal agencies.
- B. Availability and Accessibility (40 points) – The availability of the key personnel to focus and perform the tasks as described herein and be present at City Hall to conduct the applicable tasks when needed.

SR 60/Nason Street Interchange | Moreno Valley, California

Parsons Brinckerhoff was contracted by the City to provide full engineering services on the important SR 60/Nason Street Interchange. The project expanded the capacity of the existing interchange and increased its efficiency by widening Nason Street to four lanes between Fir and Elder streets. Parsons Brinckerhoff initially provided the project approval/ environmental document (PA/ED). Later, we completed full plans, specifications and cost estimates (PS&E), bidding assistance and engineering services during construction.

- Construction of this \$15 million project started in January, 2011 and was completed in October, 2012
- Our team worked closely with the City and Caltrans for the reviews, updates and approvals of the documents through the various phases

Heacock Avenue Widening | Moreno Valley, California

As the design firm for this project, Parsons Brinckerhoff also played an integral role in the right-of-way (ROW) acquisition process for five residential properties for the City. The firm designed driveways, curb and gutters, sidewalks and street widening along 500 feet of roadway, and assisted local property owners on multiple occasions with driveway modifications to accommodate changing roadway conditions during construction.

City of Highland On-call Services | Highland, California

Parsons Brinckerhoff has provided a variety of project-specific and on-call consulting services to the city of Highland since 2003, **including the full-time presence of a staff member (who has been supporting the city for six years) on site.** Engineering design support services have included:

- **Hillview Neighborhood:** 4,000 linear feet (LF) of neighborhood street improvement and storm drain project, including coordination with local utilities and private residences. Civil engineering support included ROW acquisition assistance involving property owner negotiations, agreement preparation, easement plats and legal descriptions, and processing for recording
- **Greenspot Road:** 7,000-LF, six-lane arterial street improvement project from SR 210 to Boulder Avenue, including a raised median, 60-inch storm drain and associated utilities. Multiple agency coordination included Caltrans, East Valley Water District, Southern California Gas Company, Southern California Edison, and Verizon, among others.
- **East Highlands Village;** 3,000 LF of neighborhood street improvements including utility coordination and private residence coordination. Environmental permits were processed through the U.S. Army Corps of Engineers (USACE), the California Department of Fish and Game (CDFG), and the Regional Water Quality Control Board (RWQCB) for storm drain crossing. ROW acquisitions include property owner negotiations, preparation of agreements, easement plats and legal descriptions, and processing for recording.

Parsons Brinckerhoff provided engineering design for new paving and lighting along Greenspot Road.

Key Staff Qualifications

Key Staff

The City is requesting proposals to supplement the Capitol Projects Division's staffing needs for the next few months. The City is looking for an AutoCAD drafter to assist with street improvement plan preparation and a seasoned project manager to help manage several active capital improvement projects.

Parsons Brinckerhoff is proposing two seasoned project managers with experience managing multiple active capital improvement projects, George Harvilla, PE and Ron Sklepko, PE, LEED AP. George Harvilla is an experienced project manager who worked directly for the City of Fontana as an extension of their staff to complete their Robert W. Weddle Capital Improvement Program. Ron Sklepko has more than 36 years of experience in the planning, design, and management of public works improvements and land development projects for government agencies and private developers.

Parsons Brinckerhoff is proposing three different levels of AutoCAD drafters for the City, Dennis Rodriguez, Marge Furiscal, and Bowen Yang. Dennis is an experienced AutoCAD manager with 21 years of experience. Marge is a mid-level AutoCAD drafter with 13 years of experience with Parsons Brinckerhoff. Bowen is a recent graduate with more than a year of AutoCAD experience. All proposed AutoCAD drafters have experience with street improvement plan preparation.

Proposed Project Managers

George Harvilla, PE

- 32 years of experience
- Staff augmentation for the City of Fontana

Ron Sklepko, PE

- 36 years of experience
- Worked on several projects in the City of Moreno Valley, including the World Logistics Center project

Proposed AutoCAD Drafters

Dennis Rodriguez

- AutoCAD manager
- 21 years of experience

Marge Furiscal

- Experienced AutoCAD drafter
- 31 years of experience

Bowen Yang

- AutoCAD drafter
- 1 year of experience

Availability and Accessibility

All staff proposed are based in the San Bernardino office, located just 25 minutes from City Hall. All staff are immediately available to meet the workload and schedule as described in the RFP. Our proposed project managers are local Riverside residents, living within 15 minutes of the City. All Parsons Brinckerhoff's staff are available and accessible for these assignments.

George Harvilla, PE

PROJECT MANAGER

George Harvilla is a civil engineer and senior project manager with more than 32 years of experience in program management, project management, construction management, quality management, and highway/street design. He has managed projects through design, pre-construction, construction and post-construction. He has extensive knowledge of managing street improvement projects including intersection design, freeway design, storm drain design, signing layout, sidewalks, grading, water, sewer and construction sequencing. He has also performed construction management for numerous construction projects and has been responsible for many aspects of contract administration.

Fontana Program Management, Fontana, California: program manager for the Robert W. Weddle Capital Improvement Program, which met the City of Fontana’s most critical infrastructure improvement needs. The program designed and constructed much needed storm drains and sewer mainline projects, major arterial roadway widening and reconstruction projects, freeway interchange reconstruction and new construction projects, and grade separation construction projects. For the I-10/Cypress OC, I-10/Citrus Interchange, and the I-15/Duncan Canyon Interchange, supervised engineering consultants who prepared Project Study Report (PSRs), Project Reports (PRs), and PS&Es. George managed the Summit Avenue Street and Storm Drain project and the South Highland sewer project, which improved the city’s infrastructure to accommodate residential and commercial development. Working as a representative of the City of Fontana, he provided oversight of design engineers, environmental consultants, construction managers, and contractors.

- Prepared bidding schedules, managed the bidding process, awarded contracts, and checked contractors’ schedules
- Conducted PDT meetings and coordinated meetings with the public
- Prepared City Council reports
- Coordinated with Caltrans for interchange projects
- Issued NTPs and written RFPs
- Verified NPDES and SWPPP compliance

Greenspot Road, Highland, California: resident engineer of this \$9 million project which widens Greenspot Road from four lanes to six lanes for over a mile, with a raised median. The project included a 72” storm drain under the SR 210 Freeway. George ran the pre-construction conference and informal partnering session. George worked with the City of Highland, contractor, and designer to solve construction-related problems, track RFIs, responses to RFIs, and submittals, and reviewed and approved the contractor’s change orders and invoices for the client. George also supervised two field inspectors.

Downtown Façade Renovations, Fontana, California: construction manager of two separate phases to renovate the facades of numerous downtown businesses. George ran and documented the weekly project and safety meetings. He worked with the city of Fontana, contractor, and architect to solve construction-related problems, tracks

HIGHLIGHTS

- Locally known for ability to guide projects from conception to close-out
- Expertise in key areas such as project design, public bidding, and construction
- Construction Manager for several local projects including Greenspot Road in the City of Highland

RFIs, responses to RFIs, and submittals, and reviews and approves the contractor's change orders and invoices for the client. George also supervised a field inspector.

SR 30, Segment 5, Rancho Cucamonga, California: project manager of a 1.7 mile long addition to the SR 30 freeway. SR 30 has eight lanes, a diamond interchange at Day Creek Boulevard, and an undercrossing at Rochester Avenue in the city of Rancho Cucamonga. George responded to RFIs from the contractor and oversaw the preparation of the as-built drawings.

SR 125, San Diego County, California: project manager for preliminary engineering of a new 10 mile tollway which is part of the San Diego Regional Outer Loop. This project was one of four privatization projects authorized by the California Assembly. George supervised a staff of five preparing plans, quantities, and exhibits. He coordinated with officials from Caltrans, the County of San Diego, the city of Chula Vista, the city of San Diego, and numerous consultants. He was principle author of the 200-page Project Report. George also wrote a technical report which summarizes the alignment alternatives and performed a value engineering evaluation. He was also responsible for the conceptual design of a five-legged freeway-to-freeway interchange.

Foothill Boulevard, Rancho Cucamonga, California: lead civil engineer for the widening of Foothill Boulevard (a part of historic Route 66) from Grove Avenue to Vineyard Avenue. Wrote the project report and performed preliminary engineering. This project involved widening the roadway from four lanes to six lanes and constructing a new trail overcrossing. Several new signalized intersections will be constructed.

Mid-Coast Corridor Transit Project, San Diego, California: design quality assurance and quality control (QA/QC) manager for this \$1.5B project. George monitors the performance of the design team and verifies compliance with the Design QA/QC Plan, which George edited. He also supervises consultants' quality programs and provides quality training, audits, and performs plan review.

Center Stage Theater Renovation, Fontana, California: construction manager of the renovation of a historic art-deco theater in downtown Fontana. George ran and documented the weekly project and safety meetings. He worked with the city of Fontana, contractor, and architect to solve construction-related problems, track RFIs, response to RFIs, and submittals, and reviewed and approved the contractor's change orders and invoices for the client. George also supervised a field inspector.

Pacific Electric Trail, Fontana, California: construction manager of several trail segments totaling over a mile built on an abandoned railroad corridor. The project included a concrete trail, landscaping, and lighting. Supervised an inspector and tracked the contractor's submittals, RFIs, change orders, and invoices. George led the weekly progress meetings.

Pacific Electric Freight Depot Renovation, Fontana, California: construction manager of the renovation of a historic railroad depot in downtown Fontana. George ran and documented the weekly project and safety meetings. He worked with the city of Fontana, contractor, and architect to solve construction-related problems, track RFIs, responses to RFIs, and submittals, and reviewed and approved the contractor's change orders and invoices for the client. George also supervised a field inspector.

Civic Center Park, Fontana, California: construction manager of a $\frac{3}{4}$ mile-long trail and park built on an abandoned railroad corridor. The project included a concrete trail, three elaborate fountains, walls, utility relocation, and the relocation of two buildings. Supervised an inspector and tracked the contractor's submittals, requests for information, change orders, and invoices. This project won awards from the American Society of Civil Engineers and the California Downtown Association. He prepared the application packets for the awards.

Ron Sklepko, PE, LEED AP

PROJECT MANAGER

Ron Sklepko, PE, LEED AP, has more than 36 years of experience in the planning, design, and management of public works improvements and land development projects for municipalities and private developers. Ron has developed a reputation of excellence in project management by maintaining good control over his projects; being thorough in research and design; and producing a set of plans and specifications that clearly conveys the intent of construction. At Parsons Brinckerhoff, he led the design team for a \$120 million dollar utility and roadway project at Twentynine Palms Marine Corps Air Ground Combat Center to facilitate the expansion of the Base. He is currently working on a traffic impact analysis for the proposed World Logistics Center in Moreno Valley for Highland Fairview. This project consists of 2,600 acres of logistics high-cube warehousing with up to 41.6 million square feet of space. In the past, Ron was the civil engineer and project manager for the Stoneridge Towne Center commercial development at SR 60 and Nason Street and also the Moreno Beach Plaza Phases 1 and 2 at SR 60 and Moreno Beach Drive.

World Logistics Center, Moreno Valley, California: project manager for a proposed 2,600-acre industrial center for logistics distribution warehousing with planned build-out of 41.6 million square feet of space. Parsons Brinckerhoff is providing management, planning, traffic impact analysis and dry utility services to Highland Fairview, the private developer of the site. Ron oversaw the preparation of a major traffic impact analysis as part of the Environmental Impact Report (EIR) to address California Environmental Quality Act (CEQA) requirements. This effort used technical staff resources throughout the western region. The project is scheduled to go before the City Council in spring of 2014 for EIR approval.

East Valley Water District, New Administration Campus, Highland, California: project manager for the \$17M development of a new 29,600 SF administration building and 5,300 SF operations building on 25 acres of land on Greenspot Road in the city of Highland. Parsons Brinckerhoff has teamed up with Balfour Beatty Construction on this design-build project and is providing environmental planning, preliminary engineering, final design engineering, construction staking and construction support services.

San Bernardino International Airport (SBIA) General Aviation Infrastructure, San Bernardino, California: project manager for the development of 32 acres of the San Bernardino International Airport for general aviation uses. Services include the design of streets, drainage, sanitary sewer, water, pavement and site grading. Demolition of existing structures from the prior military uses was required to prepare the site. Construction work to commence in late 2014.

Twenty-nine Palms Marine Corps Air Ground Combat Center - North Mainside Expansion, Twenty-nine Palms, California: deputy project manager for the design of infrastructure and utilities for eight new city blocks in the North Mainside area of Twenty-nine Palms under NAVFAC Southwest. This \$140 million design-build project involves a total of eight plan packages. Responsible for civil engineering design, design coordination, design team meetings, scheduling and contract

HIGHLIGHTS

- Experience planning, designing, and managing public works projects
- Expert at overseeing all aspects of projects from conception to close-out
- Extensive local experience recent projects include World Logistics Center and Stoneridge Towne Centre

Professional Affiliations

American Society of Civil Engineers, Member

management. Improvements include major earthwork, water utilities, sanitary sewer, electrical distribution, gas mains, high temp hot water system, chilled water system, storm drainage and communication infrastructure.

City of Los Angeles, Department of Transportation (LADOT), Los Angeles, California: Ron worked for LADOT as an in-house project manager for one year overseeing the design of projects including Broadway reconstruction and Hill Street conversion from a one-way to a two-way operation over 12 blocks in downtown Los Angeles. Project included street improvements including asphalt paving, street construction, sidewalk design, traffic signals, and bridge design. He was responsible for coordinating the efforts of several city departments in the design phase, conducted meetings, prepared status reports and set timelines with minimal oversight from LADOT staff. Ron managed this project from design through construction. He prepared informational brochures as part of public outreach and directed the city work crews during the changeover of Hill Street.

Stoneridge Towne Centre, Moreno Valley, California: project manager for a 56-acre commercial development for Stoneridge Centre Partners located at the southwest corner of Nason Street and State Highway 60 in the City. This 563,000 SF development is anchored by a 178,000 SF Super Target Store, Kohl's and Best Buy. This project required the design of unique underground sand filters in order to meet the City's stormwater quality objectives. The shopping center opened July, 2007.

Pierce College, Facilities, Maintenance and Operations Building, Woodland Hills, California: civil project manager for this \$20.8 million Design-Build Project for Build-LACCD and lead architect, Gkkworks in Irvine. This 3.3 acre development includes a 38,900 SF Maintenance Shop Building, a 4,900 SF Office Building and a 1,500 SF Central Plant Building, along with an 85,000 SF vehicle parking area with container storage, truck dock, trash, equipment wash down area and fueling station.

Countryside Marketplace, Menifee, California: managed the design of a 69-acre commercial center that opened in October, 2008 with a total of 726,000 SF of building area that is anchored by a Super Target and Lowe's. He worked on the planning, design and construction phases of this \$100 million project. Site civil improvements totaled \$12.5 million and included storm drain, sewer, water, curb, sidewalk and pavement.

Metropolitan Water District Headquarters, Los Angeles, California: lead civil engineer for the design of site civil improvements and traffic elements for a new 12-story Metropolitan Water District (MWD) Headquarters at Union Station in the city of Los Angeles. The project required deep shoring and excavations for an underground parking structure below the building. The work was accomplished with space constraints as this project is located in a highly urban area.

"E" Avenue / Mission Street Storm Drain, Hesperia, California: project manager for the planning phase, design phase and construction phase of this \$2.6 million master planned storm drain project for the city of Hesperia. The design involved preparing a hydrology study, designing a desilting basin and spillway, 3,000 lineal feet of pipeline up to 96" diameter, extensive remedial earthwork, and designing the discharge connection to the Antelope Valley Wash. He was the construction manager for the project including bidding, contract award, approving contractor draws, conducting weekly progress meetings and site observations.

Dennis Rodriguez

SENIOR AUTOCADD DRAFTER

Dennis Rodriguez is a senior supervising computer-aided drafting design (CADD) designer with Parsons Brinckerhoff experienced in multidiscipline engineering design using Microstation and AutoCAD platforms. Dennis is a coordinator of our online project management system, ProjectWise and Project Solve; lead member of the West Geography CADD Managers Group; providing support for several southern California offices; and was on the committee for testing and piloting new versions of CADD software. He provides CADD and information technology (IT) support on engineering projects utilizing a variety of software, including Microstation, AutoCAD, Interplot, Projectwise. He is also familiar with Bentley Inroads, Autodesk Civil 3D and Revit. His experience also includes using Microsoft Office Suite, File Transfer Protocol, PhotoShop, etc.

Dennis's IT responsibilities include CADD workstation and server configurations, .bat programs, managing email accounts and settings, drawing conversions, CADD and plotting software maintenance and configuration, trouble shooting, CADD software upgrades, procurement, coordinating hardware lease returns with vendors, and IT Help Desk support.

RCTD CADD and IT support, Riverside, California: worked with the agency to upgrade the CADD programs. Dennis coordinated with RCTD IT staff to install Bentley Interplot software to the server, then he upgraded a few individual computers with Bentley Microstation V8i, Inroads and Interplot. He created a custom configuration workspace for the new software/office. Once the software was tested and working successfully, the software was installed on all the remaining CADD Stations. He worked closely with the local CADD Manager to ensure he was familiar with the installation and configuration of the software before providing the training to the staff. Since Interplot was new to most of the users, Dennis created a user's Interplot quick guide training manual for easy reference. This support continued for approximately six months.

Mid-Coast Corridor Transit Project, San Diego, California: CADD administration support to maintain client standards through ProjectWise. Assisting the following disciplines with CADD design: track, civil and utility disciplines using Microstation V8i and Inroads. Also assisting the architectural discipline with Autocad and revit. Made a visit to all the architectural subcontractors to ensure and adjust proper workspace setup for output consistency.

Exposition LRT Project, Phase 2, Stages A and B, Los Angeles, California: Dennis created and revised various sheets, masters and exhibits for the project to help meet the stage A deadline and prepare for stage B. During Expo Stage B as the project CADD manager, Dennis finalized the portion of the PB/SRJV CADD Standards Manual and worked to define the start-up management work process. Dennis was responsible for adhering to Metro CADD standards throughout the project and managed all coordination of electronic design files between the design team, outside agencies, and subconsultants. With more than 3,200 drawings in the package, Dennis was always multi-tasking between design, support, troubleshooting, setting up, training, QA/QC, attended all management meetings, etc. He also coordinated design work with discipline managers and other CADD staff, made sure that all standards were adhered to which included Metro, Caltrans, LADOT and Los Angeles Department of Water and Power (LADWP).

HIGHLIGHTS

- More than 21 years of AutoCAD experience
- Extensive local experience recent projects including working with the County of Riverside Transportation Department (RCTD)

Education

A.C., Mechanical CAD and Board Drafting,

Marge Furiscal, PE

AUTOCADD DRAFTER

Marge Furiscal, a senior highway engineer with Parsons Brinckerhoff, has more than 31 years of experience in highway and roadway design, with particular emphasis on geometrics, channelization, signalization, signing and striping, utility coordination, construction staging and traffic calming, estimates and construction support. She is familiar with California Department of Transportation (Caltrans) design standards and specifications, and has experience in project development phasing from conceptual and preliminary design, final design and PS&E, through construction support. She also gained experienced doing structural drafting. She developed knowledge using AutoCadd, Microstation V8i, and Inroads.

SR 60/Nason Interchange Project, Moreno Valley, California: as AutoCADD drafter she worked on the preparation of As Built plans incorporating all the revisions that took place during construction.

San Bernardino International Airport General Aviation Infrastructure Improvements Project, California: a 32-acre expansion of airport infrastructure, assisted the designer in the preparation of various plans for the Client like street plans, rough grading plans, sewer plans, water plans, erosion control plans and drainage plans; prepared typical cross sections of the proposed improvements; and prepared estimate of quantities for the project.

Date Palm Drive Overhead (PS&E), Cathedral City, California: as AutoCADD drafter she worked on the preparation of As Built plans incorporating all the revisions that took place during construction.

Metro Expo Phase 2 Design-Built Project, Los Angeles: assisted the designer in the preparation of structural drawings which includes superstructures of bridges, columns and piers, retaining walls and other structures pertinent to the project

Anaheim Regional Transportation Intermodal Center Infrastructure Improvements, Phase 1, Anaheim, California: assisted the designer in the preparation of structural drawings which includes superstructures of bridges, columns and piers, retaining walls and other structures pertinent to the project

SR 210/Interstate 215 Interchange Final Design (Segment 11), San Bernardino, California: worked on the preparation of As Built plans incorporating all the revisions that took place during construction.

SR 91 Corridor Improvement Project Preliminary Engineering/Environmental Document, Riverside, California: as a civil engineer, worked on the preparation of mandatory and advisory design exhibits for one section of the project, undertook quality assurance/quality control of the drawings submitted by subconsultants, and prepared exhibits needed for public coordination for the project. Also coordinated with other disciplines for the preparation of drawings in accordance with Caltrans standards.

I-15/Nisqualli Road/La Mesa Road Interchange, San Bernardino, California: as a civil engineer, worked on the refinement of the proposed geometrics of the project. Coordinated the preparation of drawings in accordance with Caltrans standards and supervised other disciplines; prepared Right-of-Way maps of the project; assisted the senior engineer in the preparation of exhibits for design clarification; provided support to the contractor and worked on the As Built plans incorporating all the revisions during construction.

HIGHLIGHTS

- More than 31 years of AutoCAD experience
- Extensive local experience recent projects including working on the SR 60/Nason Street Interchange project

Bowen Yang, E.I.T.

AUTOCADD DRAFTER

Bowen Yang has more than a year of experience with project design and AutoCADD drafting. He has responsible for assisting the Parsons Brinckerhoff team with street improvements plans. Bowen is a recent civil engineering graduate who is currently pursuing a masters degree from the California State Polytechnic University in Pomona. He is also an AutoCAD lecturer at the University. He is proficient in civil engineering software including, AutoCAD, Civil 3D, Microstation V8, Microstation InRoads, AutoTURN, Naviswork, PDF Exchange, EnerCal, Synchro 7, SAP-2000, HEC-RAS, and Google Sketch-up.

P688 Djibouti, Africa: AutoCADD drafter assisting the federal designer in the preparation of various plans for the client such as street plans, rough grading plans, signing and striping plans, erosion control plans and drainage plans; prepared typical cross sections of the proposed improvements; and preparing the estimate of quantities for the project.

Mamizu APRA and ACE, Guam: AutoCADD drafter assisting the federal designer worked on the preparation of As Built plans incorporating all the revisions that took place during construction.

P229 Seal Beach, California: AutoCADD drafter assisting the federal designer in the preparation of various plans for building a weapons testing facility. The client such as grading plans, sewer plans, water plans, erosion control plans and drainage plans; prepared typical cross sections of the proposed improvements; and preparing the estimate of quantities for the project.

California State Polytechnic University, Pomona– AutoCAD Lecturer: Bowen is currently teaching a college level AutoCAD class at California State Polytechnic University at Pomona.

- developed entry-level and advanced curricula on a wide range of topics including 2D & 3D, consistently meeting deadlines
- promotes a supportive and professional learning atmosphere that featured teamwork and hands-on practice
- incorporates his field experience and technical knowledge into course content

HIGHLIGHTS

- Knowledge of simple design
- Expertise in laying out street improvement plans

Certification for Contracts, Grants, Loans, and Cooperative Agreements
(Federal Fiscal Year 2013 to current)

Yvonne Quinones, Vice President

I, , hereby certify on behalf
(Name and title of Grantee official)

of The City of Moreno Valley, that
(Name of Grantee)

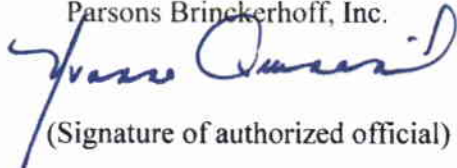

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, of cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying", in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subgrants, and contracts and subcontracts under grants, subgrants, loans, an cooperative agreements) which exceed \$100,000, and that all such subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

Executed this 15th of April, 2014.

EXHIBIT C

CITY - SERVICES TO BE PROVIDED

TO CONSULTANT

1. Furnish the Consultant all in-house data which is pertinent to services to be performed by the Consultant and which is within the custody or control of the City, including, but not limited to, copies of record and off-record maps and other record and off-record property data, right-of-way maps and other right-of-way data, pending or proposed subject property land division and development application data, all newly developed and pertinent design and project specification data, and such other pertinent data which may become available to the City.
2. Provide timely review, processing, and reasonably expeditious approval of all submittals by the Consultant.
3. Provide timely City staff liaison with the Consultant when requested and when reasonably needed.

EXHIBIT D

TERMS OF PAYMENT

1. The Consultant's compensation shall not exceed \$98,000. Present time, the individual assigned from Parsons Brinckerhoff will be George Harvilla, P.E. at \$150.00 per hour. Substitution of personnel and billable rates may only be allowed with the written approval of the City Engineer.
2. The Consultant will obtain, and keep current during the term of this Agreement, the required City of Moreno Valley business license. Proof of a current City of Moreno Valley business license will be required prior to any payments by the City. Any invoice not paid because the proof of a current City of Moreno Valley business license has not been provided will not incur any fees, late charges, or other penalties. Complete instructions for obtaining a City of Moreno Valley business license are located at: http://www.moval.org/do_biz/biz-license.shtml
3. The Consultant will electronically submit an invoice to the City once a month for progress payments along with documentation evidencing services completed to date. The progress payment is based on actual time and materials expended in furnishing authorized professional services during the preceding calendar month. At no time will the City pay for more services than have been satisfactorily completed and the City Engineer's determination of the amount due for any progress payment shall be final. The consultant will submit all original invoices to Accounts Payable staff at AccountsPayable@moval.org
Accounts Payable questions can be directed to (951) 413-3073.
Copies of invoices may be submitted to the Capital Projects Division at TechInfo-CapProj@moval.org or calls directed to (951) 413-3155.
4. The Consultant agrees that City payments will be received via Automated

Clearing House (ACH) Direct Deposit and that the required ACH Authorization form will be completed prior to any payments by the City. Any invoice not paid because the completed ACH Authorization Form has not been provided will not incur any fees, late charges, or other penalties. The ACH Authorization Form is located at:

http://www.moval.org/city_hall/forms.shtml#bf

5. The minimum information required on all invoices is:
 - A. Vendor Name, Mailing Address, and Phone Number
 - B. Invoice Date
 - C. Vendor Invoice Number
 - D. City-provided Reference Number (e.g. Project, Activity)
 - E. Detailed work hours by class title (e.g. Manager, Technician, or Specialist), services performed and rates, explicit portion of a contract amount, or detailed billing information that is sufficient to justify the invoice amount; single, lump amounts without detail are not acceptable.
6. The City shall pay the Consultant for all invoiced, authorized professional services within thirty (30) days of receipt of the invoice for same.

EXHIBIT E

INSURANCE REQUIREMENTS

Minimum Scope of Insurance

Coverage shall be at least as broad as:

1. The most current version of Insurance Services Office (ISO) Commercial General Liability Coverage Form CG 00 01, which shall include insurance for "bodily injury," "property damage" and "personal and advertising injury" with coverage for premises and operations, products and completed operations, and contractual liability.
2. The most current version of Insurance Service Office (ISO) Business Auto Coverage Form CA 00 01, which shall include coverage for all owned, hired, and non-owned automobiles or other licensed vehicles (Code 1- Any Auto).
3. Workers' Compensation insurance as required by the California Labor Code and Employer's Liability Insurance.
4. Professional Liability (Errors and Omissions) insurance appropriate to Consultant's profession.

Minimum Limits of Insurance

Consultant shall maintain limits of liability of not less than:

1. General Liability:
 - \$1,000,000 per occurrence for bodily injury and property damage
 - \$1,000,000 per occurrence for personal and advertising injury
 - \$2,000,000 aggregate for products and completed operations
 - \$2,000,000 general aggregate
2. Automobile Liability:
 - \$1,000,000 per accident for bodily injury and property damage
3. Employer's Liability:
 - \$1,000,000 each accident for bodily injury
 - \$1,000,000 disease each employee
 - \$1,000,000 disease policy limit

4. Professional Liability (Errors and Omissions):

\$1,000,000 per claim/occurrence

\$2,000,000 policy aggregate

Umbrella or Excess Insurance

In the event Consultant purchases an Umbrella or Excess insurance policy(ies) to meet the "Minimum Limits of Insurance," this insurance policy(ies) shall "follow form" and afford no less coverage than the primary insurance policy(ies).

Deductibles and Self-Insured Retentions

Consultant shall be responsible for payment of any deductibles contained in any insurance policy(ies) required hereunder and Consultant shall also be responsible for payment of any self-insured retentions. Any deductibles or self-insured retentions must be declared to, and approved by, the City Manager or his/her designee. At the option of the City Manager or his/her designee, either (i) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers; or (ii) Consultant shall provide a financial guarantee, satisfactory to the City Manager or his/her designee, guaranteeing payment of losses and related investigations, claim administration and defense expenses. At no time shall City be responsible for the payment of any deductibles or self-insured retentions.

Other Insurance Provisions

The General Liability and Automobile Liability insurance policies are to contain, or be endorsed to contain, the following provisions:

1. City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers are to be covered as additional insureds.
2. The coverage shall contain no special limitations on the scope of protection afforded to City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers.
3. Consultant's insurance coverage shall be primary and no contribution shall be required of City.

The Workers' Compensation insurance policy is to contain, or be endorsed to contain, the following provision: Consultant and its insurer shall waive any right of subrogation against City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers.

If the Professional Liability (Errors and Omissions) insurance policy is written on a claims-made form:

1. The retroactive date must be shown, and must be before the effective date of the Agreement or the commencement of work by Consultant.
2. Insurance must be maintained and evidence of insurance must be provided for at least 3 years after any expiration or termination of the Agreement or, in the alternative, the policy shall be endorsed to provide not less than a 3-year discovery period.
3. If coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a retroactive date prior to the effective date of the Agreement or the commencement of work by Consultant, Consultant must purchase extended reporting coverage for a minimum of 3 years following the expiration or termination of the Agreement.
4. A copy of the claims reporting requirements must be submitted to City for review.
5. These requirements shall survive expiration or termination of the Agreement.

All policies of insurance required hereunder shall be endorsed to provide that the coverage shall not be cancelled, non-renewed, reduced in coverage or in limits except after 30 calendar day written notice by certified mail, return receipt requested, has been given to City. Upon issuance by the insurer, broker, or agent of a notice of cancellation, non-renewal, or reduction in coverage or in limits, Consultant shall furnish City with a new certificate and applicable endorsements for such policy(ies). In the event any policy is due to expire during the work to be performed for City, Consultant shall provide a new certificate, and applicable endorsements, evidencing renewal of such policy not less than 15 calendar days prior to the expiration date of the expiring policy.

Acceptability of Insurers

All policies of insurance required hereunder shall be placed with an insurance company(ies) . admitted by the California Insurance Commissioner to do business in the State of California and rated not less than "A-VII" in Best's Insurance Rating Guide; or authorized by the City Manager or his/her designee.

Verification of Coverage

Consultant shall furnish City with all certificate(s) and **applicable endorsements** effecting coverage required hereunder. All certificates and **applicable endorsements** are to be received and approved by the City Manager or his/her designee prior to City's execution of the Agreement and before work commences.

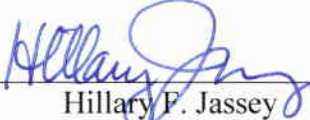

PARSONS BRINCKERHOFF, INC.

ASSISTANT SECRETARY'S CERTIFICATE

I, Hillary F. Jassey, Assistant Secretary of Parsons Brinckerhoff, Inc. (the "Company"), do hereby certify on behalf of the Company and not in my individual capacity that on June 20, 2013 the Board of Directors of the Company adopted the following resolution:

"Resolved, that Douglas B. Sawyer and Cary M. Siegel were hereby elected a Senior Vice President and an Assistant Secretary, respectively, of Parsons Brinckerhoff, Inc., to hold office, subject to the by-laws, until their respective successors are duly elected and qualified."

I further certify that the resolution has not been revoked, that as Senior Vice President and Assistant Secretary of the Company, Douglas B. Sawyer and Cary M. Siegel, respectively, are each authorized to sign Agreement for Professional Consultant Services to Supplement Capital Projects Division Staffing Needs (Project No. 801 0001 70 77 3411 12729), by and between the City of Moreno Valley, California, a municipal corporation and the Company.

Hillary F. Jassey
Assistant Secretary

ADDITIONAL INSURED-OWNERS, LESSEES OR CONTRACTORS-SCHEDULED PERSON OR ORGANIZATION

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Name of Person or Organization:

Any owner, lessee, or contractor for whom you have agreed in writing prior to a loss to provide liability insurance. Where the applicable written agreement requires the insured to provide liability insurance on a primary, excess, contingent, or any basis, this policy will apply solely on the basis required by such agreement and Item 4. Other Insurance of Section IV of this policy will not apply.

Locations(s) of Covered Operations:

(Information required to complete this schedule, if not shown above, will be shown in the Declarations.)

A. Section II-Who is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal & advertising injury" caused in whole or in part, by:

1. Your acts or omissions; or
2. The acts or omissions of those acting on your behalf;

in the performance of your ongoing operations for the additional insured(s) at the location(s) designated above.

B. With respect to the insurance afforded to these additional insureds, the following additional exclusion apply:

This insurance does not apply to "bodily injury" or "property damage" occurring after:

- (1) All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or
- (2) That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

This endorsement was executed by the Liberty Insurance Company.

DESIGNATED INSURED - NONCONTRIBUTING

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM
GARAGE COVERAGE FORM
MOTOR CARRIERS COVERGE FORM
TRUCKERS COVERAGE FORM

With respect to coverage provided by this endorsement, the provisions of the Coverage Form apply unless modified by this endorsement.

This endorsement identifies person(s) or organization(s) who are "insureds" under the Who Is An Insured Provision of the Coverage Form. This endorsement does not alter coverage provided in the Coverage form.

Schedule

Name of Person(s) or Organizations(s):

Any owner, lessee, or contractor for whom you have agreed in writing prior to a loss to provide liability insurance.

Regarding Designated Contract or Project:

Any contract or project, as required by written agreement.

Each person or organization shown in the Schedule of this endorsement is an "insured" for Liability Coverage, but only to the extent that person or organization qualifies as an "insured" under the Who Is An Insured Provision contained in Section II of the Coverage Form.

The following is added to the **Other Insurance Condition:**

If you have agreed in a written agreement that this policy will be primary and without right of contribution from any insurance in force for an Additional Insured for liability arising out of your operations, and the agreement was executed prior to the "bodily injury" or "property damage", then this insurance will be primary and we will not seek contribution from such insurance.

WORKERS COMPENSATION AND EMPLOYERS LIABILITY POLICY

WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

We have the right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against the person or organization named in the Schedule. (This agreement applies only to the extent that you perform work under a written contract that requires you to obtain this agreement from us.)

This agreement shall not operate directly or indirectly to benefit any one not named in the Schedule.

This endorsement has not been approved and does not apply in the state of Pennsylvania.

This endorsement modifies insurance provided under the following:

Architects and Engineers Professional Liability Insurance Policy

In consideration of the premium already charged, we agree with you, subject to all terms, exclusions, and conditions of the policy that:

A. If we cancel this policy by written notice to the first Named Insured for any reason other than nonpayment of premium, we will mail or deliver a copy of such written notice of cancellation:

1. To the name and address corresponding to each person or organization shown in the Schedule provided to us by the first "Named Insured". Such schedule:

- a.** Must be initially provided to us within 15 days:
 - (1) After the beginning of the policy period shown in the Declarations; or
 - (2) After this endorsement has been added to the policy;
- b.** Must contain the names and addresses of only the persons or organizations requiring notification that this Policy has been cancelled:
- c.** Must be in an electronic format that is acceptable to us; and
- d.** Must be accurate.

Such Schedule must be updated and provided to us, by the first "Named Insured", during the policy period. Such updated Schedule must comply with paragraphs b., c., and d. above.

2. At least thirty (30) days prior to the effective date of the cancellation, as advised in our notice to the first Named Insured, or the longer number of days notice if indicated in the Schedule provided to us.

B. Our notification, as described in Paragraph A. of this endorsement, will be based on the most recent Schedule provided to us by the first "Named Insured" as of the date the notice of cancellation is mailed.

C. Proof of mailing will be sufficient proof that we have complied with Paragraph A. of this endorsement.

D. We are not responsible for the accuracy, integrity, timeliness and validity of information contained in the Schedule provide to us as described in Paragraphs A. of this endorsement.

ALL OTHER TERMS AND CONDITIONS OF THIS POLICY REMAIN UNCHANGED.

CITY MANAGER	<i>d</i>

Report to City Council

TO: Mayor and City Council

FROM: Chris Paxton, Administrative Services Director

AGENDA DATE: August 26, 2014

TITLE: A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DELEGATING AUTHORITY OF THE ADMINISTRATIVE SERVICES DIRECTOR TO ACT ON BEHALF OF THE CITY OF MORENO VALLEY IN MATTERS RELATING TO EXCESS INSURANCE AUTHORITY (EIA)

RECOMMENDED ACTION

Recommendation:

1. Adopt Resolution No.70. A Resolution of the City Council of the City of Moreno Valley, California, Delegating Authority of the Administrative Services Director to Act on behalf of the City of Moreno Valley in matters relating to Excess Insurance Authority (EIA).

SUMMARY

This report recommends adoption of a proposed resolution authorizing the Administrative Services Director to act on behalf of the City in matters relating to the City's worker's compensation excess insurance carrier.

DISCUSSION

For many years the City has funded the first \$300,000 of each individual worker's compensation claim costs. For claims that exceed \$300,000 the City purchases excess insurance through the California State Association of Counties – Excess Insurance Authority (CSAC-EIA). As a member of CSAC-EIA, the City is required to designate a

staff member to be the day-to-day point of contact with the Authority. Typically this has been the Human Resources Director or the Administrative Services Director.

ALTERNATIVES

1. Adopt a proposed Resolution of the City Council of the City of Moreno Valley, California, Delegating Authority of the Administrative Services Director to Act on behalf of the City of Moreno Valley in matters relating to Excess Insurance Authority (EIA). *Staff recommends this alternative.*
2. Do not adopt a proposed Resolution of the City Council of the City of Moreno Valley, California, Delegating Authority of the Administrative Services Director to Act on behalf of the City of Moreno Valley in matters relating to Excess Insurance Authority (EIA). *Staff does not recommend this option.*

FISCAL IMPACT

There are no fiscal impacts associated with this action.

ATTACHMENTS

Attachment 1 - Proposed Resolution

Prepared By:
Chris Paxton
Administrative Services Director

Concurred By:
Thomas M. DeSantis
Assistant City Manager

RESOLUTION NO. 2014-70

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DELEGATING AUTHORITY OF THE ADMINISTRATIVE SERVICES DIRECTOR TO ACT ON BEHALF OF THE CITY OF MORENO VALLEY IN MATTERS RELATING TO EXCESS INSURANCE AUTHORITY (EIA)

WHEREAS, THE CSAC Excess Insurance Authority (Authority) has determined that it is necessary for each member of the Authority to delegate to a person(s) or position(s) authority to act on the member's behalf on matters relating to the member and the Authority; and

WHEREAS, except as to those actions that must be approved by the City Council of the City of Moreno Valley, such delegation of authority is necessary in order to carry out the purposes and functions of the Authority with its members; and

WHEREAS, in order to ensure a person(s) or position(s) is delegated with the authority to act on the member's behalf in matters relating to the member and the Authority, action by the member's governing body is necessary; and

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Except as to actions that must be approved by the City Council of the City of Moreno Valley, the Administrative Services Director is hereby appointed to act in all matters relating to the member and the Authority.

Report to City Council

TO: Mayor and City Council

FROM: Abdul R. Ahmad, Fire Chief

AGENDA DATE: August 26, 2014

TITLE: APPROPRIATION OF EQUIPMENT REPLACEMENT RESERVE FUNDS FOR THE PURCHASE OF TWO PARAMEDIC SQUADS

RECOMMENDED ACTION

Recommendations:

1. Authorize a transfer of \$370,000 from Equipment Replacement Reserve Fund (Fund 7510) to the General Fund (1010) for the replacement of Asset #40036 a 1991 Ford Super Duty Squad and Asset #40039 a 1993 Ford Super Duty Squad and their associated equipment.
2. Authorize an appropriation of \$370,000 for the purchase of two paramedic squads and their associated equipment upon approval of the above transfer.
3. Waive the formal bidding process in accordance with Moreno Valley Municipal Code 3.12.260 for the purchase of two (2) Dodge 5500 Crew Cab SLT 4x2 utilizing cooperative purchasing, or "piggybacking", on Riverside County Fire Department's bid awarded to Maintainer Custom Bodies Inc.
4. Authorize the City Manager, or her designee, to execute a purchase order in the amount of \$290,000 to Maintainer Custom Bodies Inc. for two (2) Dodge 5500 Crew Cab SLT 4x2.
5. Authorize the Fire Chief to execute any subsequent related minor change orders to the purchase order, not to exceed \$29,000 during the construction of the vehicle.
6. Reserve remaining equipment funds of \$316,686 within Fund 7510 specifically for future Fire Department vehicle or equipment replacement for eighteen months.

SUMMARY

This report recommends replacing Moreno Beach Squad 58, which is a 1991 Ford Super Duty Squad, and College Park Squad 91, which is a 1993 Ford Super Duty Squad, utilizing equipment replacement reserve funds. Squad 58 is 23 years old and Squad 91 is 21 years. The useful, front line emergency response life of a paramedic squad is considered to be ten years with an additional five to ten years as reserve vehicles. Both of these units require replacement to ensure reliability for emergency responses.

DISCUSSION

The Moreno Valley Fire Department has identified the replacement of Squad 58, a 1991 Ford Super Duty Squad with City Asset #40036, and the replacement of Squad 91, a 1993 Ford Super Duty Squad with City Asset #40039, as high priority projects to ensure reliability for emergency responses. These paramedic squads are utilized daily for a variety of assignments including:

- Responding to emergency calls for service
- Paramedic staffing for special events
- Training
- Operating as additional emergency response apparatus during staffing patterns for wildfires, floods, or other predictable events that will impact the community and cause an influx of 9-1-1 calls
- Operating as an alternative vehicle for emergency response when:
 - ◆ A fire engine goes out of service and a reserve fire apparatus is not immediately available; and
 - ◆ When the Fire Department has to down staff a three person fire engine to a two person advance life support paramedic unit when a third person is temporarily unavailable to staff a fire engine.

In the Moreno Valley Fire Department's Strategic Plan 2012-2022, the Fire Chief identified that supplemental fire emergency response units will need to be added to existing fire stations in order to provide adequate firefighter personnel and equipment for emergency responses as calls for service increase. Specifically, the Strategic Plan called for the addition of paramedic squads in lieu of adding a fire engine at the City's busier stations.

While the Fire Department is not currently proposing to staff these two paramedic squads with full time, paramedic firefighter personnel, it is important to note that over the last five years, the Fire Department has seen a 19% increase in calls for service, while the levels of emergency response equipment has decreased from nine fire apparatus to eight fire apparatus. As over 80% of the Fire Department's emergency calls for service are for medical emergencies, the addition of a fully staffed paramedic squad might be considered in the near future to address the needs of the community. Presently, the squads are staffed with current Moreno Valley Fire Department personnel

or with additional fire personnel from CAL FIRE/Riverside County Fire depending on the emergency incident.

Paramedic squads will allow the Moreno Valley Fire Department the ability to have a tiered level of response for both medical and fire emergencies. The paramedic squads will also provide additional coverage at the busier fire stations for medical responses requiring advance life support and will provide more staffing for fire ground operations.

The Fire Chief has identified an area of need within the central portion of Moreno Valley for a paramedic squad. In 2013, the city had a total of 18,580 responses by all fire apparatus in Moreno Valley with Sunnymead Fire Station 2, Towngate Fire Station 6, and Kennedy Park Fire Engine 65 responding to 60% of those emergency incidents. Fire Station 6 is currently the busiest fire station in Moreno Valley averaging over 11 calls a day and it is the 5th busiest fire station in CAL FIRE/Riverside County Fire which has 92 fire stations.

One of the two new squads would be assigned to assist Fire Stations 2, 6, and 65 with their high call volumes while the second squad would be situated to assist the second busiest area of the city. This second area includes the primary response boundaries for Morrison Park Fire Station 99, College Park Fire Station 91, and Kennedy Park Fire Station 65.

The ability to provide reliable paramedics squads for responding to emergency incidents in a timely manner is critical to affecting a positive outcome for a patient in need of advance life support care and for fire ground safety.

Replacing these two squads is vitally important to fulfilling the mission of our Fire Department. Our mission is to provide quality emergency services to protect and preserve the life and property of our citizens when exposed to fires, medical emergencies, natural or man-made disasters, hazardous materials incidents, and rescue emergencies in a safe, efficient and cost effective manner.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. ***Staff recommends this alternative as it will ensure all emergency response vehicles in Moreno Valley are reliable and it will aid in providing for the safety of the community and firefighters.***
2. Do not approve the recommended actions presented in this staff report. ***Staff does not recommend this alternative due to the potential safety issues that could arise with the current equipment.***

FISCAL IMPACT

Riverside County Fire Department recently completed a request for proposal process for paramedic rescue squads. A contract was awarded through the competitive bid process to Maintainer Custom Bodies Inc. for paramedic squads at a cost of \$145,000

per squad (Attachment 1). The Fire Department is proposing to purchase two paramedic squads through cooperative purchasing, or “piggybacking” per Municipal Code 3.12.260 which states:

Where advantageous for the city and to the extent consistent with state law, the city manager may authorize the financial and administrative services director or the purchasing manager to purchase supplies, materials, equipment or contractual services through legal, competitively awarded contracts with or of other governmental jurisdictions or public agencies, including California Multiple Award Schedules (CMAS) commonly referred to as “piggybacking,” without further contracting, solicitation or formal bidding as described in this chapter. (Ord. 844 § 2, 2012).

The cost to purchase two (2) Dodge 5500 Crew Cab SLT 4 x 2 from Maintainer Custom Bodies, Inc. will total \$290,000. An additional \$40,000 per squad will need to be spent on advance life support equipment in order to place both squads into service. The total cost for two (2) squads and the associated equipment is \$370,000.

Asset #40036, a 1991 Ford Super Duty Squad, has been completely depreciated by the City and has accumulated \$35,403 in equipment replacement money. Asset #400039, a 1993 Ford Super Duty Squad, is also fully depreciated and has accumulated \$40,221 in equipment replacement money.

The City recently sold a 2004 Smeal 75' Aerial Ladder Truck to the County of Riverside for \$230,000. The City had set aside \$611,062 in Equipment Reserve funding to replace this aerial ladder truck and its associate equipment; however, this funding is no longer required as the vehicle has been sold. The Fire Department is proposing to utilize \$294,376 of this equipment replacement funding to assist in purchasing two (2) replacement paramedic squads and the advance life support equipment. The Fire Department is also recommending that the remaining \$316,686 be set aside for the next eighteen months for potential replacement of other vehicles, such as a 1991 ambulance type vehicle, and the potential purchase of new vehicles. Any use of the set aside funds will be brought back to City Council for approval.

The table below summarizes this information:

Description	Accumulated Depreciation
Equipment Replacement for Asset #40036 – 1991 Ford Super Duty Squad	\$35,403
Equipment Replacement for Asset #40039 – 1993 Ford Super Duty Squad	\$40,221
Equipment Replacement for Asset #300075 – 2004 Smeal 75' Aerial Ladder Truck (Equipment)	\$204,479
Equipment Replacement for Asset #300018 – 2004 Smeal 75' Aerial Ladder Truck (Thermal Imaging Camera)	\$27,887
Equipment Replacement for Asset #400042 – 2004 Smeal 75' Aerial	\$378,696

Description	Accumulated Depreciation
Ladder Truck	
Subtotal	\$686,686
Purchase two (2) Dodge 5500 Crew Cab SLT 4 x 2 with Equipment Replacement Reserve Funds	(\$290,000)
Purchase equipment for two (2) paramedic squads with Equipment Replacement Reserve Funds	(\$80,000)
Subtotal	(\$370,000)
Equipment Replacement Reserve Funds to be set aside for Fire Department	\$316,686

If approved, the following transactions will occur in the City's financial system:

Description	Fund	GL Account No.	Type (Rev/Exp)	FY 14/15 Budget	Proposed Adjustments	FY 14/15 Amended Budget
Non Departmental General Fund	General Fund	1010-99-99-91010-807510	Rev	\$57,676	\$370,000	\$427,676
Equipment Replacement Reserve	General Fund	7510-99-97-88190-901010	Exp	\$57,676	\$370,000	\$427,676
General Fund – Fire	General Fund	1010-40-45-30110-660399	Exp	\$17,399	\$80,000	\$97,399
General Fund – Fire	General Fund	1010-40-45-30110-660322	Exp	\$0	\$290,000	\$290,000

Should the construction of the two (2) paramedic squads require minor change orders to meet Riverside County Fire specifications or Moreno Valley Fire Department specifications, the Fire Chief is requesting the authority to issue up to \$29,000 in change orders prior to bringing any action back to City Council. The Fire Department will absorb any costs for the change order by utilizing projected savings within the Fire Department's approved operating budget

CITY COUNCIL GOALS

Public Safety - Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Positive Environment - Create a positive environment for the development of Moreno Valley's future

Report to City Council

TO: Mayor and City Council

FROM: Abdul R. Ahmad, Fire Chief

AGENDA DATE: August 26, 2014

TITLE: APPROPRIATION OF EQUIPMENT REPLACEMENT RESERVE FUNDS FOR THE PURCHASE OF A THERMAL IMAGING CAMERA

RECOMMENDED ACTION

Recommendations:

1. Approve the transfer of \$8,700 from Equipment Replacement Reserve Fund (Fund 7510) to the General Fund (Fund 1010)
2. Authorize an appropriation of \$8,700 for the purchase of a thermal imaging camera upon approval of the above transfer.

SUMMARY

This report recommends the purchase of a replacement thermal imaging camera for Sunnymead Engine 2 utilizing equipment replacement funds.

DISCUSSION

The City's Fire Engines and its Fire Truck are each equipped with a thermal imaging camera. Thermal imaging cameras are specialized cameras that allow firefighters to view heat sources through dense smoke at structure fires in order to locate trapped or injured victims. These cameras essentially enhance bodies or objects by differentiating the temperatures between different objects. The cameras also allow firefighters to quickly locate fires within a building and inside enclosed spaces or walls that tend to hide the fire until it burns through these areas causing more fire damage.

The use of thermal imaging cameras during the initial size-up of a fire and during the search phases of a fire is recommended by the National Institute for Occupational Safety and Health (NIOSH) in order to prevent injuries and fatalities to firefighters. The use of these cameras can assist in locating the source (seat) of the fire from the exterior of the structure. By knowing the location of the fire, a safe approach to searching the building for trapped occupants as well as a plan of action for extinguishing the fire can be determined as it is possible to identify areas that may not be structural sound.

Additionally, thermal imaging cameras are utilized to locate traffic accident victims when there is insufficient lighting to see the vehicle involved in the accident. Thermal imaging cameras can also be used to search for trapped victims in buildings that have collapsed after an earthquake.

The thermal imaging camera in use on Sunnymead Fire Engine 2 is a vital piece of firefighting equipment that was purchased over seven years ago. Due to the cost of repairs, the Fire Department is recommending that the camera be replaced utilizing equipment replacement funds. The camera was fully depreciated over its projected life of five years at the end of Fiscal Year 2011/2012.

ALTERNATIVES

1. Approve and authorize the recommended actions presented in this staff report. *Staff recommends this alternative as it will ensure all fire equipment in Moreno Valley have reliable Thermal Imaging Cameras and it will aid in the prevention of potential injuries and fatalities for firefighters.*
2. Do not approve the recommended actions presented in this staff report. *Staff does not recommend this alternative due to the potential safety issues that could arise with the current equipment.*

FISCAL IMPACT

The thermal imaging camera on Sunnymead Fire Engine 2 with Logos asset number of 300031 was initially purchased for \$8,700 in Fiscal Year 2006/2007. This camera fully depreciated June 30, 2012. The total cost of a new thermal imaging camera is \$9,991. The Fire Department is proposing a transfer of \$8,700 from the Equipment Replacement Fund to the General Fund to provide the funding for the additional appropriation to account 1010-40-45-30110-660399. The remainder of the balance for this purchase (\$1,291) will be absorbed by projected savings within the Fire Department's approved operating budget.

Report to City Council

TO: Mayor and City Council and Mayor and City Council acting in the capacity of Chairperson and Commissioners of the Moreno Valley Housing Authority

FROM: Ahmad R. Ansari, P.E., Public Works Director/City Engineer

AGENDA DATE: August 26, 2014

TITLE: PA13-0045 (TR 36598) – APPROVE FINAL MAP AND ACCEPT THE AGREEMENT AND SECURITY FOR PUBLIC IMPROVEMENTS. DEVELOPER – HABITAT FOR HUMANITY RIVERSIDE, INC., A CALIFORNIA NON-PROFIT PUBLIC BENEFIT CORPORATION, RIVERSIDE, CA, 92507

RECOMMENDED ACTION

Recommendations:

1. Approve Final Map for PA13-0045, authorize the City Clerk to sign the map and transmit said map to the County Recorder’s Office for recordation.
2. Authorize the Executive Director of the Moreno Valley Housing Authority to sign the map.
3. Accept the Agreement and Security for Public Improvements for Habitat for Humanity Riverside, Inc., a California non-profit corporation.
4. Authorize the Mayor to execute the Agreement.
5. Direct the City Clerk to forward the signed Agreement to the County Recorder’s Office for recordation.
6. Authorize the City Engineer to execute any future time extension amendments to the agreement, subject to City Attorney approval, if the required public

improvements are not completed within said timeframe.

SUMMARY

This report recommends approval of the agreement by the City of Moreno Valley and Habitat for Humanity Riverside, Inc., a California non-profit corporation, to construct the required public improvements that are located on the south side of Myers Avenue between Heacock Street and Indian Street. The project is funded by Habitat for Humanity Riverside, Inc.

DISCUSSION

On December 12, 2013, the Planning Commission of the City of Moreno Valley approved Tentative Tract Map No. 36598 (PA13-0045) and Variance (P13-125). The developer proposes to subdivide 1.36-gross acres and construct eight residential single-family lots. The project site is located on the south side of Myers Avenue between Heacock Street and Indian Street.

Habitat for Humanity Riverside, Inc., the developer of this project, has completed an Agreement for Public Improvements. The developer agrees to perform and complete all of the required public improvements within twenty-four (24) months of the date the agreement is executed. The public improvements include, but are not limited to: asphalt, base, curb, gutter, sidewalk, driveway approaches, street lights, striping, signage, water and sewer, and storm drain facilities. The City Engineer may execute any future amendments to the agreement, subject to City Attorney approval, if the required public improvements are not completed within said timeframe.

Tract Map No. 36598 is in substantial conformance with the approved tentative map. The developer has requested that the map be approved for recordation. The Conditions of Approval for this project require that the developer provide surety for the required improvements. Public improvements are to be constructed along the south side of Myers Avenue between Heacock Street and Indian Street.

Accompanying the agreement is a Faithful Performance bond in the amount of \$630,000 and a Material and Labor bond in the amount of \$315,000 issued by SureTec Insurance Company.

The subject property was originally a City of Moreno Valley Redevelopment Agency (RDA) property and was transferred to the Housing Authority as a result of the dissolution of the RDA. The property has been conveyed to Habitat for Humanity for the development of affordable housing. A Deed of Trust was recorded against the property and the Housing Authority remains as a beneficiary of the Deed of Trust. As the holder of beneficial interests, the Housing Authority is required sign the final map pursuant to Government Code 66436.

FISCAL IMPACT

No fiscal impact is anticipated.

CITY COUNCIL GOALS

PUBLIC FACILITIES AND CAPITAL PROJECTS:

Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

CITY OF MORENO VALLEY
PUBLIC WORKS DEPARTMENT - LAND DEVELOPMENT

PA13-0045 (TR 36598)

This page intentionally left blank.

**AGREEMENT FOR PUBLIC IMPROVEMENTS
FOR
PROJECT NO. PA13-0045 (TR 36598)**

This Agreement, made and entered into by and between the City of Moreno Valley, State of California, hereinafter called City, and Habitat for Humanity Riverside, Inc., herein after called Developer, on the date the City signs this agreement.

WITNESSETH:

FIRST: Developer, for and in consideration of the approval by the City of the final map of that certain land division, or that certain other land development project, known as PA13-0045 (TR 36598) agrees, at Developer's own expense, to furnish all labor, equipment and material necessary, and within TWENTY-FOUR (24) months from the date this Agreement is executed, to perform and complete in a good and workmanlike manner, all of the required improvements in accordance with those improvement plans for said project which have been approved by the City Engineer, and are on file in the office of the City Engineer, and to do all work incidental thereto in accordance with the standards set forth in City ordinances and regulations, and pay all costs of engineering necessary in connection therewith, which are expressly made a part of this Agreement. All of the above required work shall be done under the inspection of and to the satisfaction of the City Engineer, and shall not be deemed complete until approved and accepted as complete by the City. Developer further agrees to guarantee the required improvements for a period of one year following acceptance by the City and during this one year period to repair and replace, to the satisfaction of the City Engineer, any defective work or labor done or defective materials furnished. Developer shall complete the improvements described in this paragraph pursuant to Section 66462, Government Code. Developer shall also complete any offsite improvements required as a condition of approval and with plans approved by the City Engineer at such time as the City acquires an interest in the land which will permit the improvements to be made, and the Developer waives the 120 day time limitation set forth in Section 66462.5, Government Code.

Security to guarantee the performance of this agreement shall be in the following amounts:

Faithful Performance security shall be in the sum of SIX HUNDRED THIRTY THOUSAND AND NO/100 Dollars (***\$630,000.00***). The estimated cost of said work and improvements, pursuant to the Preliminary Estimate of Cost labeled Exhibit A attached hereto.

Labor and Material security shall be in the sum of THREE HUNDRED FIFTEEN THOUSAND AND NO/100 Dollars (***\$315,000.00***). The estimated cost securing payment of labor and materials is fifty (50) percent of the total cost estimate of the improvements.

Developer further agrees to guarantee the required improvements for a period of one year following acceptance by the City and during this one year period to repair and replace, to the satisfaction of the City Engineer, any defective work or labor done or defective materials furnished. Upon entering the warranty period, the City shall retain ten percent of the original faithful performance security. Developer reserves the right to substitute the form of security, in accordance with the Moreno Valley Municipal Code, at any time during the term of this agreement, subject to approval of the City Engineer and City Attorney.

SECOND: Developer agrees to file with City, prior to the date this Agreement is executed, a good and sufficient improvement security in an amount not less than the estimated cost of the work and improvements for the faithful performance of the terms and conditions of this Agreement, and good and sufficient security for payment of labor and materials in the amount prescribed by City ordinances and regulations to secure the claims to which reference is made in Title 15 (commencing with Section 3082) of Part 4 of Division 3 of the Civil Code of the State of California. Developer agrees to renew each and every said bond or bonds with good and sufficient sureties or increase the amounts of said bond or bonds, or both, within ten (10) days after being notified by the City Engineer that the sureties or amounts are insufficient. Notwithstanding any other provision herein, if Developer fails to take such action as is necessary to comply with said notice, he shall be in default of this Agreement unless all required improvements are completed within ninety (90) days of the date on which

the City Engineer notified the Developer of the insufficiency of said bonds. Developer reserves the right to substitute the form of security in accordance with the City's Municipal Code at anytime during the term of this agreement, subject to approval by the City Engineer and City Attorney.

THIRD: Developer agrees to pay to the City the actual cost of such inspection of the works and improvements as may be required by the City Engineer. Developer further agrees that, if suit is brought upon this Agreement or any bond guaranteeing the completion of the required improvements, all costs and reasonable expenses and fees incurred by the City in successfully enforcing such obligations shall be paid by Developer and guaranteed by the surety in addition to the face amount of the security, including reasonable attorney's fees, and that, upon entry of judgment, such costs, expenses and fees shall be taxed as costs and included in any judgment rendered.

FOURTH: City shall not, nor shall any officer or employee of City, except for its or their sole negligence, be liable or responsible for any accident, loss or damage happening or occurring to the works specified in this Agreement prior to the completion and approval thereof, nor shall City or any officer or employee thereof, be liable for any persons or property injured by reason of the nature of the work, or by reason of the acts or omissions of Developer, his agents or employees, in the performance of the work, and all of said liabilities are assumed by Developer. Developer agrees to protect, defend and hold harmless City and the officers and employees thereof from all loss, liability or claim because of, or arising out of the acts or omissions of Developer, his agents and employees, in the performance of this Agreement, or arising out of the use of any patent or patented article in the performance of this Agreement.

FIFTH: The Developer hereby grants to the City and/or to any authorized agent or employee of the City, the irrevocable permission to enter upon the lands of the above-referenced land division for the purpose of completing the improvements. This permission shall terminate in the event that the Developer has completed the work within the time specified or any extension thereof granted by the City.

SIXTH: Developer agrees at all times, up to the completion and acceptance of the improvements by the City, to give good and adequate warning to the traveling public of each and every dangerous condition caused by the construction of the improvements, and to protect the traveling public from such defective or dangerous conditions. The Developer shall keep all traveled ways that are a part of, or affected by the construction of this project free and clear of mud, dirt and debris and shall provide twice monthly street sweeping service. A copy of the contract for street sweeping service shall be provided to the City. The Developer's obligation under this provision shall be secured by the bonds securing performance of this Agreement.

SEVENTH: The Developer, his agents and employees, shall give notice to the City Engineer at least 48 hours before beginning any work and shall furnish said City Engineer all reasonable facilities for obtaining full information with respect to the progress and manner of work.

EIGHTH: If the Developer, or his agents or employees, neglects, refuses, or fails to prosecute the work with such diligence as to insure its completion within the specified time, or within such extensions of time as have been granted by the City, or if the Developer violates, neglects, refuses, or fails to perform satisfactorily any of the provisions of the plans and specifications, he shall be in default of this Agreement and notice in writing of such default shall be served upon him. The City Council shall have the power, on recommendation by the City Engineer, to terminate all rights of the Developer because of such default. The determination by the City Engineer of the question as to whether any of the terms of the Agreement or specifications have been violated, or have not been performed satisfactorily, shall be conclusive upon the Developer, and any and all parties who may have any interest in the Agreement or any portion thereof. The foregoing provisions of this section shall be in addition to all other rights and remedies available to the City under law.

NINTH: It is further agreed by and between the parties hereto, including the surety or sureties on the bonds securing this Agreement that, in the event it is deemed necessary to extend the time of completion of the work contemplated to be done under this Agreement, extensions of time **may** be granted by the City from time to time, either at its own option, or upon request of Developer, and such extensions shall in no way affect the validity of this Agreement or release the surety or sureties on said bonds, Developer further agrees to maintain the aforesaid bonds in full force and effect during the terms of this Agreement, including any extensions of time as may be granted therein.

TENTH: It is understood and agreed by the parties hereto that if any part, term or provision of this Agreement is by the courts held to be unlawful and void, the validity of the remaining portions shall not be affected and the rights and obligations of the parties shall be construed and enforced as if the Agreement did not contain the particular part, term or provision held to be invalid.

ELEVENTH: Any notice or notices required or permitted to be given pursuant to this Agreement shall be served on the other party by mail, postage prepaid, at the following addresses:

COUNTERPART NO. 1 OF 4

FAITHFUL PERFORMANCE BOND

ORIGINAL

**City of Moreno Valley
County of Riverside
State of California
(Government Code Section 66499.1)**

Public Improvements	<u>\$630,000</u>	Project No.	<u>PA13-0045 (TR 36598)</u>
Bond No.	<u>4394746</u>	Premium	<u>\$12,450.00</u>
Surety	<u>SureTec Insurance Company</u>	Principal	<u>Habitat for Humanity Riverside, Inc.</u>
Address	<u>3033 Fifth Avenue, Suite 300,</u>	Address	<u>2180 Iowa Avenue</u>
City/Zip	<u>San Diego, CA 92103</u>	City/Zip	<u>Riverside, CA 92507</u>

WHEREAS, the City Council of the City of Moreno Valley, County of Riverside, State of California, and **HABITAT FOR HUMANITY RIVERSIDE, INC.,** (hereinafter designated as "Principal") have entered into, or are about to enter into the attached agreement whereby Principal agrees to install and complete the above-designated public improvements, relating to **PA13-0045 (TR 36598)**, which agreement is hereby referred to and made a part hereof; and,

WHEREAS, said principal is required under the terms of said agreement to furnish bond for the faithful performance of said agreement;

NOW, THEREFORE, we the Principal, and SureTec Insurance Company, as Surety, are held and firmly bound to the City of Moreno Valley in the penal sum of **SIX HUNDRED THIRTY THOUSAND AND NO/100** Dollars (*****\$630,000.00*****), lawful money of the United States, for the payment of which sum will and truly to be made, we bind ourselves, our heirs, successors, executors and administrator, jointly and severally, firmly by these presents.

The condition of this obligation is such that if the above bonded Principal, his or its heirs, executors, administrators, successors, or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and provisions in the said agreement and any alteration thereof made as therein provided, on his or specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless the City of Moreno Valley, its officers, agents and employees, as therein stipulated, then this obligation shall become null and void; otherwise, it shall be and remain in full force and effect.

As part of the obligation secured hereby, and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees, including reasonable attorney's fees, incurred by City in successfully enforcing such obligation, all to be taxed as costs and included in any judgment rendered.

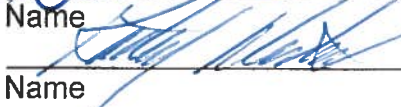

FAITHFUL PERFORMANCE BOND (Page 2 of 2)
PROJECT NO. PA13-0045 (TR 36598)

The surety hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the agreement or to the work to be performed thereunder or the specifications accompanying the same shall in anywise affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the agreement or to the work or to the specifications. Surety further stipulates and agrees that the provisions of Section 2845 of the Civil Code are not a condition precedent to Surety's obligations hereunder and are hereby waived by Surety.

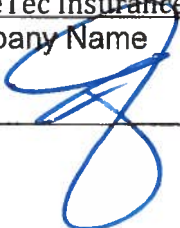

When the work covered by the agreement is complete, the City Council of the City of Moreno Valley will accept the work and thereupon the amount of the obligation of this bond is reduced by 90%, with the remaining 10% held as security for the one-year maintenance period provided for in the agreement(s).

IN WITNESS WHEREOF, this instrument has been duly executed by the Principal and Surety above named on August 13, 2014.

POA #: 510018

SureTec Insurance Company

LIMITED POWER OF ATTORNEY

Know All Men by These Presents, That SURETEC INSURANCE COMPANY (the "Company"), a corporation duly organized and existing under the laws of the State of Texas, and having its principal office in Houston, Harris County, Texas, does by these presents make, constitute and appoint

Kenneth A. Coate, Julia B. Gladding

its true and lawful Attorney-in-fact, with full power and authority hereby conferred in its name, place and stead, to execute, acknowledge and deliver any and all bonds, recognizances, undertakings or other instruments or contracts of suretyship to include waivers to the conditions of contracts and consents of surety for:

Five Million and 00/100 Dollars (\$5,000,000.00)

and to bind the Company thereby as fully and to the same extent as if such bond were signed by the President, sealed with the corporate seal of the Company and duly attested by its Secretary, hereby ratifying and confirming all that the said Attorney-in-Fact may do in the premises. Said appointment shall continue in force until 10/31/2015 and is made under and by authority of the following resolutions of the Board of Directors of the SureTec Insurance Company:

Be it Resolved, that the President, any Vice-President, any Assistant Vice-President, any Secretary or any Assistant Secretary shall be and is hereby vested with full power and authority to appoint any one or more suitable persons as Attorney(s)-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and of behalf of the Company, to execute, acknowledge and deliver, any and all bonds, recognizances, contracts, agreements or indemnity and other conditional or obligatory undertakings and any and all notices and documents canceling or terminating the Company's liability thereunder, and any such instruments so executed by any such Attorney-in-Fact shall be binding upon the Company as if signed by the President and sealed and effected by the Corporate Secretary.

Be it Resolved, that the signature of any authorized officer and seal of the Company heretofore or hereafter affixed to any power of attorney or any certificate relating thereto by facsimile, and any power of attorney or certificate bearing facsimile signature or facsimile seal shall be valid and binding upon the Company with respect to any bond or undertaking to which it is attached. (Adopted at a meeting held on 20th of April, 1999.)

In Witness Whereof, SURETEC INSURANCE COMPANY has caused these presents to be signed by its President, and its corporate seal to be hereto affixed this 21st day of March, A.D. 2013.

SURETEC INSURANCE COMPANY

By: [Signature]
John Knox Jr., President

State of Texas ss:
County of Harris

On this 21st day of March, A.D. 2013 before me personally came John Knox Jr., to me known, who, being by me duly sworn, did depose and say, that he resides in Houston, Texas, that he is President of SURETEC INSURANCE COMPANY, the company described in and which executed the above instrument; that he knows the seal of said Company; that the seal affixed to said instrument is such corporate seal; that it was so affixed by order of the Board of Directors of said Company; and that he signed his name thereto by like order.

[Signature]
Jacquelyn Maldonado, Notary Public
My commission expires May 18, 2017

I, M. Brent Beaty, Assistant Secretary of SURETEC INSURANCE COMPANY, do hereby certify that the above and foregoing is a true and correct copy of a Power of Attorney, executed by said Company, which is still in full force and effect; and furthermore, the resolutions of the Board of Directors, set out in the Power of Attorney are in full force and effect.

AUG 13 2014

Given under my hand and the seal of said Company at Houston, Texas this _____ day of _____, A.D.

[Signature]
M. Brent Beaty, Assistant Secretary

Any instrument issued in excess of the penalty stated above is totally void and without any validity.

SureTec Insurance Company

LIMITED POWER OF ATTORNEY

Know All Men by These Presents, That SURETEC INSURANCE COMPANY (the "Company"), a corporation duly organized and existing under the laws of the State of Texas, and having its principal office in Houston, Harris County, Texas, does by these presents make, constitute and appoint

Kenneth A. Coate, Julia B. Gladding

its true and lawful Attorney-in-fact, with full power and authority hereby conferred in its name, place and stead, to execute, acknowledge and deliver any and all bonds, recognizances, undertakings or other instruments or contracts of suretyship to include waivers to the conditions of contracts and consents of surety for:

Five Million and 00/100 Dollars (\$5,000,000.00)

and to bind the Company thereby as fully and to the same extent as if such bond were signed by the President, sealed with the corporate seal of the Company and duly attested by its Secretary, hereby ratifying and confirming all that the said Attorney-in-Fact may do in the premises. Said appointment shall continue in force until 10/31/2015 and is made under and by authority of the following resolutions of the Board of Directors of the SureTec Insurance Company:

Be it Resolved, that the President, any Vice-President, any Assistant Vice-President, any Secretary or any Assistant Secretary shall be and is hereby vested with full power and authority to appoint any one or more suitable persons as Attorney(s)-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and of behalf of the Company, to execute, acknowledge and deliver, any and all bonds, recognizances, contracts, agreements or indemnity and other conditional or obligatory undertakings and any and all notices and documents canceling or terminating the Company's liability thereunder, and any such instruments so executed by any such Attorney-in-Fact shall be binding upon the Company as if signed by the President and sealed and effected by the Corporate Secretary.

Be it Resolved, that the signature of any authorized officer and seal of the Company heretofore or hereafter affixed to any power of attorney or any certificate relating thereto by facsimile, and any power of attorney or certificate bearing facsimile signature or facsimile seal shall be valid and binding upon the Company with respect to any bond or undertaking to which it is attached. (Adopted at a meeting held on 20th of April, 1999.)

In Witness Whereof, SURETEC INSURANCE COMPANY has caused these presents to be signed by its President, and its corporate seal to be hereto affixed this 21st day of March, A.D. 2013.

Report to City Council

TO: Mayor and City Council

FROM: Richard Teichert, Chief Financial Officer

AGENDA DATE: August 26, 2014

TITLE: RECEIPT OF QUARTERLY INVESTMENT REPORT – QUARTER ENDED JUNE 30, 2014

RECOMMENDED ACTION

Recommendation:

1. Receive and file the Quarterly Investment Report for quarter ended June 30, 2014, in compliance with the City's Investment Policy.

SUMMARY

The attached quarterly investment report presents the City's cash and investments for the quarter that ended June 30, 2014. This report is in compliance with California Government Code Section 53646 regarding the reporting of detailed information on all securities, investments, and monies of the City, as well as the reporting of the market value of the investments held. All of the investments contained within the portfolio are in full compliance with the City's Investment Policy and Government Code Section 53601 as to the types of investments allowed.

DISCUSSION

California Government Code Sections 53601 and 53646 establish the types of investments allowed, the governing restrictions on these investments, the third-party custodian arrangement for certain investments, and the reporting practices related to the portfolio for local agencies. The City's Investment Policy, adopted on May 27, 2014 is in full compliance with the requirements of both of the above-mentioned Code Sections.

The quarterly investment report for the quarter that ended June 30, 2014 is the fourth quarterly report submitted for the 2013-14 fiscal year and is in compliance with California Government Code Section 53646 regarding the reporting of detailed information on all securities, investments, and monies of the City, as well as the reporting of the market value of the investments held. All of the investments contained within the portfolio are in full compliance with the City's Investment Policy and Government Code Section 53601 as to the types of investments allowed. As stated in the report, there is more than adequate liquidity within the portfolio for the City to meet its budgeted expenditures over the next six months.

The City has used Chandler Asset Management (Chandler) as its professional portfolio manager since 2010. Chandler uses an active investment management approach. Utilizing an active approach, securities purchased by Chandler on the City's behalf are not necessarily held to maturity but may be actively traded based on market conditions and the City's investment goals. The City's cash flow requirements are evaluated on an ongoing basis, with short-term needs accommodated through the City's pooled investment funds with the State Local Agency Investment Fund (LAIF). LAIF is a pool of public funds managed by the State Treasurer of California, providing 24-hour liquidity while yielding a rate of return approximately equivalent to a one-year treasury bill. With the combined use of a conservative approach to evaluating cash flow needs and LAIF liquidity, the City will not have to liquidate securities at current market rates that are intended to be held for longer-term investment. This is especially important considering that the average maturity of the general portfolio is 2.2 years.

The investments managed by Chandler totaled \$132,945,464 at par and achieved a Yield to Maturity (YTM) for June 2014 of 1.39%. This compares to a YTM in March 2014 of 1.37% and a YTM in June 2013 of 1.35%. In addition, the City maintained \$28,875,043 in the State Local Agency Investment Fund Pool (LAIF) with a YTM of .23%.

In accordance with California Government Code Section 53646, the City is properly reporting investments of all bond proceeds and Deferred Compensation Plan funds. These funds are not managed by the City Treasurer as part of the pooled investment program and were not included in the City's investment reports prior to the current legislation. Bond proceeds are held and invested by a Trustee; Deferred Compensation Plan funds are held and invested by the respective plan administrators with the funds also placed in a trust separate from City funds.

The City's contract with Chandler expired at the end of June and staff issued a Request for Proposal (RFP) to identify and evaluate firms that are interested in providing this service to the City in the future. Nine firms responded and a select group of three were invited to make a presentation to the Finance Sub-committee in early August. From that select group a recommendation will be made to the full council for approval.

FISCAL IMPACT

Current market rates continue to hover near all-time lows; however, based on comments by the Federal Reserve Board, we expect this could change over the next year. The interest rate environment directly impacts the ability of the portfolio to generate income. During FY 2013-14, the active management of the portfolio added capital gains to the portfolio in the amount of \$519,000. These gains are the result of buying and selling securities in a manner to maximize the total return on the portfolio. As interest rates move upward, the opportunities to sell securities for gains will decline. The budget for FY 2013-14 projected General Fund investment earnings totaling \$2.1 million. At year end these revenues totaled \$2,054,049, which are slightly behind the projections included in the FY 2013-14 budget.

GOALS

Revenue Diversification and Preservation. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

COMPLIANCE WITH INVESTMENT POLICY

Assets managed by Chandler Asset Management are in full compliance with State law and with the City's investment policy.

Category	Standard	Comment
Local Agency Bonds	No Limitation	Complies
Treasury Issues	No Limitation	Complies
Agency Issues	No Limitation	Complies
Banker's Acceptances	40% maximum; <180 days maturity	Complies
Commercial Paper	25% maximum; <270 days maturity; A-1/P-1/F-1 minimum ratings	Complies
Negotiable Certificates of Deposit	30% maximum; 5 years maximum maturity	Complies
Repurchase Agreements	No limitation; 1-year maximum maturity	Complies
Reverse Repurchase Agreements	20% maximum; <92 days maturity	Complies
Medium Term Notes	30% maximum; 5 years maximum maturity; A-rated or better	Complies
Money Market Mutual Funds	20% maximum; AAAf/Aaaf, minimum rating	Complies
Collateralized Certificates of Deposits	5 years maximum maturity	Complies
Time Deposits	5 years maximum maturity	Complies
Mortgage Pass-throughs, CMOs and Asset Backed Securities	20% maximum; AA-rated issue; A-rated issuer	Complies
Local Agency Investment Fund - L.A.I.F.	Maximum program limitation	Complies
Prohibited Securities	Inverse floaters; Ranges notes, Interest-only strips from mortgaged backed securities; Zero interest accrual securities	Complies
Maximum maturity	5 years	Complies
Weighted Average Maturity	3 years	Complies

Holdings Report Glossary

CUSIP (Committee on Uniform Securities Identification Procedures) – A unique identification number assigned to all securities.

Security Description - The issuer name, coupon (periodic interest payment rate) and maturity.

Par Value/Units - The face value or number of units held in the portfolio.

Purchase Date - The settlement date on which the security was purchased.

Book Yield - The YTM that equates the current amortized value of the security to its periodic future cash flows.

Cost Value - The value at which the securities were purchased, excluding purchased interest.

Book Value - The value at which an asset is carried on a balance sheet. To calculate, take the cost of an asset +/- net depreciation/amortization.

Mkt Price - The current fair value market price.

Mkt YTM – The internal rate of return that equates the periodic future cash flows (interest payments and redemption value) to the market price, assuming that all cash flows are invested at the YTM rate.

Market Value - The current fair value of an investment as determined by transactions between willing buyers and sellers.

Accrued Int. - The interest that has accumulated on a bond since the last interest payment up to, but not including, the settlement date.

% of Port. - The % of the portfolio that the security represents based on market value, including accrued interest.

Gain/Loss – The unrealized gain or loss on the security, compared to either cost or amortized value, as of the date of the report.

Moody - The Moody's rating for the security.

Holdings Report Glossary (continued)

P - The Standard and Poor's rating for the security.

m (yrs) - The time, in years, until maturity.

Duration - The weighted average time to maturity of a bond where the weights are the present values of future cash flows. Duration measures the price sensitivity of a bond to changes in interest rates.

Item No. A.12

- otes:
-) Investment portfolio includes the only long term investment pool. Does not include LAIF and cash balances.
-) Yield to Maturity (YTM): The rate of return on an investment or security if it were to be held until maturity. This yield does not reflect changes in the market value of a security
-) Rate of Return represents the gain or loss on an investment or portfolio of investments over a specified period, expressed as a percentage of increase over the initial investment cost. Gains on investments are considered to be any income received from the security or portfolio plus an realized capital gain. This measure of return recognizes the changes in market values of a security or portfolio of securities.
-) The Rate of Return for the investment portfolio reflects the performance of the portfolio since May 2010.
-) The portfolio benchmark is the Bank of America-Merrill Lynch 1 to 5 year Government Index/"A" Rated or better Corp

Domestic Interest Rates

Since 1988, Chandler Asset Management has specialized in the management of fixed income portfolios. Chandler's mission is to provide fully customizable, client-centered portfolio management that preserves principal, manages risk and generates income in our clients' portfolios.

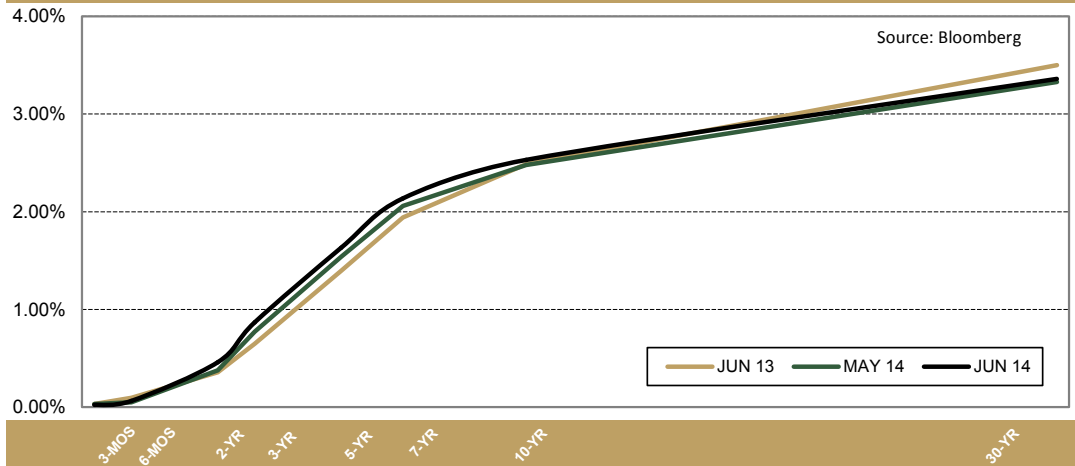

Market Summary

We believe the economy is gaining positive momentum, fueled by ongoing improvement in the labor market. The June employment report was stronger than expected, as nonfarm payrolls grew by 288,000, versus expectations of 215,000. During the second quarter, payrolls grew by an average of 272,000 per month, which compares favorably to the first quarter monthly average of 190,000. Private payrolls grew by 262,000 in June and government jobs rose by 26,000. The unemployment rate declined to 6.1% in June from 6.3% in May, which was a positive surprise. Meanwhile, the manufacturing sector continued to show strength and recent housing data has surprised to the upside.

As expected, the Federal Open Market Committee left policy rates unchanged at its June 17-18 meeting, and announced another \$10 billion reduction in asset purchases (to a level of \$35 billion per month, comprised of \$20 billion in treasuries and \$15 billion in mortgage-backed securities). We expect the process of unwinding quantitative easing will continue at a steady pace with the Federal Reserve (Fed) announcing another \$10 billion reduction in asset purchases at its July 29-30 meeting. The Fed reduced their GDP growth projections for 2014 to 2.1%-2.3% from 2.8%-3.0%, but improved their outlook for unemployment. At Chair Yellen's press conference, she reinforced that the Fed will continue to monitor the economy and does not project raising short term rates for a considerable amount of time after the asset purchases end.

The yield on the two-year Treasury note increased in June. Improving economic data, the unwinding of quantitative easing by the Fed and the anticipation of a potential fed funds rate hike next year have put upward pressure on rates.

THE YIELD CURVE FLATTENED IN JUNE

During the past three months, the yield curve flattened even as the Fed tapered its purchases of long-term Treasury bonds. Market participants reacted to mixed domestic economic data, as well as fears of euro zone deflation, geopolitical tensions, and volatility in emerging markets over the past several months. These concerns have fueled a flight to quality, putting downward pressure on longer yields, although some of this pressure has recently dissipated.

Economic Roundup

Consumer Prices

In May, overall CPI inflation increased to 2.1% on a year-over-year basis from 2.0% in April. The year-over-year Core CPI (CPI less food and energy) also increased to 2.0% in May from 1.8% in April. The core inflation rate is now trending in line with the Fed's long-term goal of 2.0%.

Retail Sales

In May, Retail Sales rose 4.3% on a year-over-year basis versus a gain of 4.6% in April. On a month-over-month basis, Retail Sales edged up just 0.3% in May, which was below expectations, but the April figure was revised up to 0.5%. Overall, Retail Sales were somewhat softer than expected in May, but better than previously believed in April.

Labor Market

The June employment report was better than expected as payrolls rose by 288,000 versus the 215,000 consensus estimate. Net revisions for job growth in April and March were +29,000. Private payrolls increased by 262,000 in June and government jobs increased by 26,000. The unemployment rate declined to 6.1% from 6.3%, and the participation rate was unchanged at 62.8%.

Housing Starts

Single-family housing starts fell 5.9% to 625,000 in May after rising 4.6% in April. Multifamily starts also declined 7.6% in May after rising 29.2% in April.

Global Growth Outlook and Implications for Domestic Interest Rates

The US economy continues to post lackluster growth since the onset of the financial crisis in 2007. The debate amongst economic thought leaders on whether or not the weak growth is structural (long-term) or cyclical is ongoing. The Federal Reserve, which recently updated their quarterly forecasts at the June 18th Federal Open Market Committee (FOMC) meeting, appears to be conflicted on the topic. GDP forecasts from the FOMC for the next two years are 3.0-3.2% and 2.5-3.0% (2015 and 2016, respectively), however, the longer run forecast is only 2.1-2.3%. Also of interest, the FOMC forecasts for the Fed Funds rate, which Federal Reserve Chair Janet Yellen is discounting, show a terminal Fed Funds rate of close to 4.0%. The team at Chandler is having a difficult time reconciling the FOMC's long-run GDP forecast in the low 2.0% area with a terminal Fed Funds rate of close to 4.0% (www.federalreserve.gov). We think global economic factors, as well as trends specific to the US economy, will serve to limit the increase in domestic and global interest rates as the US and Global economies continue to recover, albeit at a slower pace.

Global GDP, particularly in developed markets, has been somewhat synchronized since 2007. The absolute levels in the various regions represented in the table below are different, but the trends in most are down. In 2007, the average real GDP for the group was 5.0% versus the average forecast GDP in 2016 of only 2.8%. Almost every region represented in the table has a lower GDP forecast in 2016 versus the actual reported GDP number in 2007 with the two exceptions being the US and Canada.

The synchronization of global growth is preventing historical counter-cyclical trends from exerting their influence on weaker growth areas.

The synchronization of global growth is preventing historical counter-cyclical trends from exerting their influence on weaker growth areas. It appears the broad economic trend of this decade will be low growth and disinflation as no dominant macro-economic growth oriented theme in a specific region is pushing up the global economy. The majority of developed market central banks have highly stimulative monetary policies in place yet the average GDP growth rate in the table below was only 1.8% in 2013. China is putting policies in place to mitigate their growth rate as the industrialization process continues in a more controlled manner to help dampen some of the imbalances created by the continuous transformation of their economy. In 2007, China posted real GDP of 14.2% while the forecast for 2016 is only 7.2%, a pretty severe downward adjustment. In Europe,

the single currency and unified monetary policy dictated by the European Central Bank (ECB) precludes the weaker European economies from having the ability to gain global competitiveness via currency devaluation. The average forecasted growth rate in 2016 for Germany, France, Spain and Italy is only 1.5%, not much of a recovery from the depths of the financial crisis. The projected growth rate in Japan remains abysmal, forecasted to be 1.2% in 2016, although the Bank of Japan is currently in the midst of very aggressive unconventional monetary policy adjustments to try to change the trajectory of their economy.

Although the forecast for US GDP growth in 2016 looks respectable versus the peer group represented in the table, we are concerned about some of the long-term

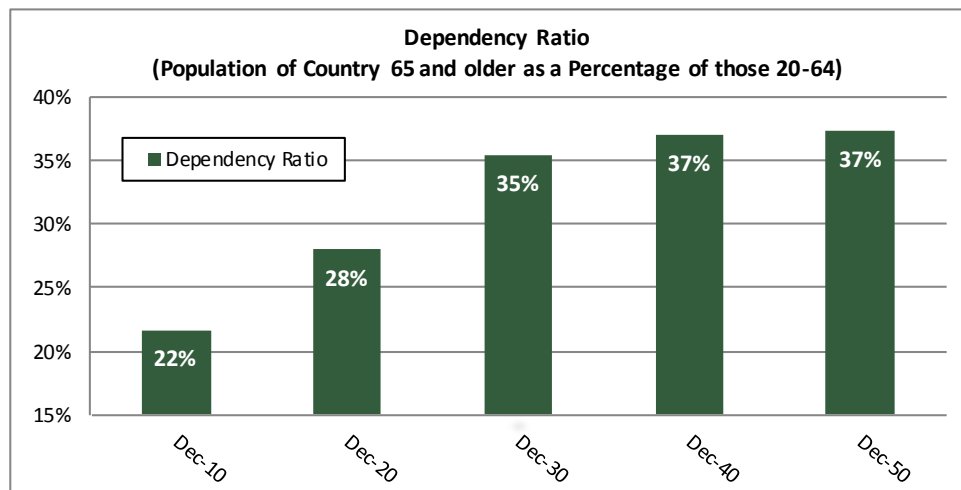

Real GDP Growth Rate

	US	Canada	Germany	France	Spain	Italy	Brazil	Russia	India	China	Australia	Japan	Average

Source: Bloomberg; 2014-2016 italicized to indicate consensus forecasts

secular trends specific to the US economy. The team at Chandler holds the view GDP growth in the next ten years will be lower than the previous twenty years. The primary catalyst for the lower US long-term growth outlook is correlated with unfavorable demographic trends. The US economy is on the precipice of having a 'supply' issue related to the number of available workers as the percentage of the population over the age of 65 expands while the percentage of workers between 20-64 contracts. The Dependency Ratio (Dependency Ratio = Population 65 And Older/Population Ages 20 to 64) is poised to increase from 22.0% at the end of 2010 to 37.0% by 2040, based on population estimates from the US Census Bureau (see table and chart at right). In order for an economy to accelerate at or above the potential growth rate it requires a growing supply of workers. As the growth of workers expands, the impact on the economy is magnified by the consumption habits of the growing work force creating yet more demand for goods, consistent with a multiplier effect. Since the onset of the financial crisis it is well documented that US corporate spending trends related to capital expenditures are soft. Many profitable corporations are using excess earnings to buy back equity shares, instead of investing in their respective businesses, with the goal of improving the share price of the underlying equity. Lack of investment will lead to lower growth over the long-term. We speculate one of the reasons corporations are reluctant to increase their capital expenditures, and have a more proactive outlook to grow their respective companies, is concerns about demographics in the US and the corresponding potential long-run demand for products.

United States	Dec-10	Dec-20	Dec-30	Dec-40	Dec-50
Total Population (in millions)	310,233	341,387	373,504	405,655	439,010
Under 20 years	84,150	90,703	97,682	104,616	112,940
20 to 64 years	185,854	195,880	203,729	219,801	237,523
65 years and older	40,229	54,804	72,092	81,238	88,547
Total Population	100%	100%	100%	100%	100%
Under 20 years	27%	27%	26%	26%	26%
20 to 64 years	60%	57%	55%	54%	54%
65 years and older	13%	16%	19%	20%	20%

The aging of the US population will exert a downward force on the potential growth rate of the country over the coming decade. It appears the lower trend growth the US and global economy is experiencing since the onset of the financial crisis is more structural than cyclical, as the demographic issues highlighted in the US are also evident in most other developed market economies. The lower long-term growth outlook implies interest rates overall will be lower at equilibrium in order to encourage capital investment over the coming decade. We expect the FOMC's forecast for the terminal Fed Funds rate to drift downward in coming quarters as lower global GDP continues to exert its influence across developed market economies.

RISKS AND OTHER IMPORTANT CONSIDERATIONS

This report is provided for informational purposes only and should not be construed as specific investment or legal advice. The information contained herein was obtained from sources believed to be reliable as of the date of publication, but may become outdated or superseded at any time without notice. Any opinions or views expressed are based on current market conditions and are subject to change. This report may contain forecasts and forward-looking statements which are inherently limited and should not be relied upon as an indicator of future results. Past performance is not indicative of future results. This report is not intended to constitute an offer, solicitation, recommendation or advice regarding any securities or investment strategy and should not be regarded by recipients as a substitute for the exercise of their own judgment.

Fixed income investments are subject to interest, credit, and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Report to City Council

TO: Mayor and City Council

FROM: Ahmad R. Ansari, P.E., Public Works Director/City Engineer

AGENDA DATE: August 26, 2014

TITLE: PA09-0043 (PARCEL MAP 36262) – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF THE SOUTHWEST CORNER OF ALESSANDRO BOULEVARD AND MORENO BEACH DRIVE ASSOCIATED WITH THIS PROJECT INTO THE CITY’S MAINTAINED STREET SYSTEM

RECOMMENDED ACTION

Recommendations:

1. Adopt Resolution No. 2014-71. A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the Acceptance of the Public Improvements as Complete within Project PA09-0043 (Parcel Map 36262) and Accepting the Portion of the Southwest Corner of Alessandro Boulevard and Moreno Beach Drive Associated with the Project into the City’s Maintained Street System.
2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

SUMMARY

This report recommends acceptance of the improvements associated with PA09-0043 (Parcel Map 36262) into the City’s maintained street system and to provide a 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the

final 10% warranty portion of the Faithful Performance Bond in one year, subject to completion of any defective work during this period.

DISCUSSION

On March 11, 2010, the Planning Commission of the City of Moreno Valley approved Tentative Parcel Map (TPM) No. 36262 (PA09-0043) along with a plot plan (PA09-0025) for a commercial development. The parcel map was a proposal to subdivide 3.85 gross acres into two (2) parcels and the plot plan was a proposal to construct a gas station with convenience store and car wash on Parcel 1 of the proposed TPM 36262. The project is located at the southwest corner of Alessandro Boulevard and Moreno Beach Drive and was conditionally approved requiring construction of certain public improvements. The public improvements included asphalt concrete, curb, gutter, sidewalk, driveway approaches, street lights, and relocation of overhead utilities. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works Department/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of \$400,000 issued by Suretec Insurance Company. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the public improvements within PA09-0043 (Parcel Map 36262) as complete and accept the portion of the southwest corner of Alessandro Boulevard and Moreno Beach Drive associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*
2. Do not adopt the proposed Resolution authorizing the acceptance of the public improvements within PA09-0043 (Parcel Map 36262) as complete and accept the

portion of southwest corner of Alessandro Boulevard and Moreno Beach Drive associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 2000-Gas Tax, Fund 2001-Measure "A", and Fund 2008-NPDES. Fund 2000 is restricted to the construction and maintenance of streets and roadways. Fund 2001 is restricted for transportation projects only for the purposes of construction, maintenance and operation of streets and roadways. The County Service Area (CSA) 152 and NPDES levies collected from property owners support current NPDES Permit programs and reduce the level of General Fund support necessary to remain in compliance with unfunded federal mandates, as administered by the State. Funds collected from the annual levies are restricted for use only within the Storm Water Management program). Street maintenance costs over a 20 year period are estimated to average almost \$12,000 per 13 foot wide lane mile per year. Based on the current street section being accepted of 0.09 lane miles, the estimated annual costs is \$1,080. The street section also includes two additional street lights with an estimated annual operating cost of \$250 each. Currently no new funding source has been identified to fund these maintenance costs.

RESOLUTION NO. 2014-71

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE WITHIN PROJECT PA09-0043 (PARCEL MAP 36262) AND ACCEPTING THE PORTION OF THE SOUTHWEST CORNER OF ALESSANDRO BOULEVARD AND MORENO BEACH DRIVE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

WHEREAS, the City Engineer has determined that the public improvements constructed by Frank Pozgaj and Maria Pozgaj Family Trust and Moreno Beach Station, LLC on the portion of the southwest corner of Alessandro Boulevard and Moreno Beach Drive associated with the project were constructed according to the approved plans on file with the City of Moreno Valley; and

WHEREAS, the City Engineer has determined that those improvements were inspected during construction and were completed in an acceptable manner; and

WHEREAS, the City Engineer has requested that the City Council authorize the acceptance of said public improvements as complete within project PA09-0043 (Parcel Map 36262) and accept the portion of the southwest corner of Alessandro Boulevard and Moreno Beach Drive associated with the project into the City's maintained street system; and

WHEREAS, it is in accordance with Streets and Highway Code, Section 1806, (a) and (b), for City Council to perform this action by resolution.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS: that the public improvements within PA09-0043 (Parcel Map 36262) are complete, and the portion of southwest corner of Alessandro Boulevard and Moreno Beach Drive associated with the project is accepted into the City's maintained street system.

Report to City Council

TO: Mayor and City Council

FROM: Ahmad R. Ansari, P.E., Public Works Director/City Engineer

AGENDA DATE: August 26, 2014

TITLE: ACCEPTANCE OF THE RIVERSIDE COUNTY TRANSPORTATION COMMISSION'S (RCTC) CONGESTION MANAGEMENT AND AIR QUALITY GRANT; ACCEPTANCE OF THE MOBILE SOURCE AIR POLLUTION REDUCTION REVIEW COMMITTEE GRANT; AND AUTHORIZE EXECUTION OF COOPERATIVE AGREEMENTS FOR THE TRANSPORTATION MANAGEMENT CENTER (TMC) ITS DEPLOYMENT PHASE 1B PROJECT NO. 808 0015 70 76

RECOMMENDED ACTION

Recommendations:

1. Accept the Congestion Management and Air Quality (CMAQ) grant award from the Riverside County Transportation Commission (RCTC) of up to \$1,541,700 for the TMC ITS Deployment Phase 1B Project.
2. Authorize the City Manager to execute a Cooperative Agreement with RCTC for the CMAQ grant, subject to approval by the City Attorney.
3. Accept the Mobile Source Air Pollution Reduction Review Committee (MSRC) grant award from the RCTC of up to \$490,000 for the TMC ITS Deployment Phase 1B Project.
4. Authorize the City Manager to execute a Cooperative Agreement with RCTC for the MSRC grant when it is received, subject to approval by the City Attorney.
5. Approve the transfer of \$368,300 from the DIF Traffic Signal Capital Projects Fund (Fund 3302) to the Capital Projects Grants Fund (Fund 2301).

SUMMARY

This report recommends that the City Council accept \$2,031,700 in CMAQ and MSRC grant awards from RCTC and authorize the execution of the required Cooperative Agreements. The project is funded with a combination of regional transportation funding along with local match, and has been approved in the 2014/2015 Capital Improvement Plan.

DISCUSSION

At its June 2013 meeting, RCTC approved the 2013 Multi-Funding Call for Projects program. On September 10, 2013, City Council approved submittal of grant applications to RCTC and the City's commitment to provide matching funds for projects selected through the program. Fifty-five projects throughout the County were submitted by the September 23, 2013 deadline. The projects were subsequently evaluated based on regional significance, project readiness, safety, air quality benefits, cost/benefit ratio, Regional Transportation Plan/Sustainability Communities Strategy Greenhouse Gas benefits, and local match commitment.

In 2009, the City completed a Master Plan for deployment of an Intelligent Transportation System (ITS) in Moreno Valley to support active traffic management for the purpose of improving mobility. Shortly after completion of the master plan, the City selected Kimley-Horn and Associates to supply the City's new Arterial Traffic Management System (ATMS) software platform. This software has been delivered and is used to manage traffic at eight intersections on Alessandro Boulevard and Cactus Avenue. These arterials were selected for a pilot program due to their proximity to City Hall and the presence of existing traffic signal communication conduit. Having successfully completed the pilot deployment, staff proceeded to design and bid the ITS Deployment Phase 1A Project, which will implement a portion of the master plan's first deployment phase.

Staff has completed the design of a Transportation Management Center (TMC) within City Hall, and the project is currently out to bid. The current location is Conference Room A which is the planned space for the TMC; its placement there is intended to demonstrate the City's commitment to maintaining quality mobility on the arterial network. The TMC is scheduled for completion in the second half of this year. However, the ATMS is capable of being operated from any computer on the City's corporate network, and is currently being operated from staff's desks. Additionally, staff operates a satellite TMC in the traffic maintenance modular building at the Corporate Yard.

On January 8, 2014 the City received notification that RCTC will provide up to \$2,031,700 in grant funding for the TMC ITS Deployment Phase 1B Project. The City match is \$368,300 for a total project cost of \$2,400,000. The proposed work includes the deployment of critical field devices and supporting communications system as a part of the City's traffic management system. Improvements include an Ethernet fiber-optic

backbone system, CCTV cameras at 26 key intersections, and new traffic signal controller cabinets at 43 existing signalized intersections. Improvements will be made along the following corridors:

- Ironwood Avenue from Pigeon Pass Road to Perris Boulevard,
- Alessandro Boulevard from Heacock Street to Perris Boulevard,
- Cactus Avenue from Perris Boulevard to Lasselle Street,
- Perris Boulevard from Ironwood Avenue to Harley Knox Road,
- Lasselle Street from Cactus Avenue to Krameria Avenue, and
- Towngate Boulevard/Eucalyptus Avenue from Frederick Street to Old 215 Frontage Road.

The project was presented at the Traffic Safety Commission (TSC) on August 6, 2014 and at the City Council Study Session on August 19, 2014, and received support at both sessions. Information presented included a description of ITS purpose, functions, and costs.

Staff is requesting City Council accept the CMAQ and MSRC grant awards from RCTC and approve the transfer of matching funds from the DIF Traffic Signal Capital Projects Fund. Furthermore, staff is requesting authorization for the City Manager to execute the RCTC Cooperative Agreements subject to approval by the City Attorney.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *This alternative will allow the City to proceed with the TMC ITS Deployment Phase 1B Project and receive reimbursement from RCTC for the grant amounts.*
2. Do not approve and authorize the recommended actions as presented in this staff report. *This alternative will delay the TMC ITS Deployment Phase 1B Project and the City will lose the grant funds from RCTC.*

FISCAL IMPACT

The CMAQ and MSRC grants will provide for reimbursement of up to \$2,031,700. The grant requires local matching funds of \$368,300 (15%) for the TMC ITS Deployment Phase 1B Project. The local match amount is higher than anticipated when the grant applications were ratified by City Council due to the fact that RCTC only awarded grant money for the construction phase of the project with the City covering all environmental documentation and design costs.

The City has appropriated \$2.4 million in the Capital Projects Grants Fund (Fund 2301) as part of the 2014/2015 Capital Improvement Plan to construct the project. Invoices will

be submitted regularly to RCTC as the project progresses. There is no impact to the General Fund.

PROJECT BUDGET:

Capital Projects Grants
 (Account No. 2301-70-76-80008) (Project No. 808 0015-2301)..... \$2,400,000

ESTIMATED PROJECT COSTS:

PA&ED	\$50,000
Design	\$200,000
Construction	\$2,150,000
Total	\$2,400,000

ANTICIPATED PROJECT SCHEDULE:

Execution of Cooperative Agreements	September 2014
Caltrans Approvals	December 2014
Complete Design	September 2015
Complete Construction	September 2016

The new equipment procured and installed by the project will require an increase to the operating budget primarily to establish an equipment replacement fund. Funding for maintenance activities are also projected, although since no new staff will be needed to maintain the equipment actual increases are expected to be nominal.

The project replaces 43 traffic signal controller cabinets which are 20 to 30 years old and past their useful life. At the time the existing cabinets were installed, the City did not budget for replacement costs in the operating budget, so the cost to replace the cabinets would otherwise be a General Fund liability. The capital cost of these cabinets is estimated to be \$645,000. Therefore, approving the project produces a one-time discretionary budget savings of \$565,000 (after accounting for the local match) compared to undertaking a locally funded traffic signal controller cabinet replacement program. Since the next replacement triggers the need to budget for subsequent replacement, the projected replacement cost would become an operating budget expense regardless of funding source. However, for the purposes of this fiscal analysis, the annual cabinet replacement cost is treated as project-related.

The existing controller cabinets to be replaced generate frequent maintenance calls. Staff estimates two fewer after-hours call-outs per cabinet per year after replacement, a projected savings of \$12,000 annually.

The capital cost of deploying TMC ITS Deployment Phase 1B Project is funded largely by grants. The City's share of capital costs is limited to providing matching funds through the DIF Traffic Signals Fund. The costs to operate and maintain the deployed systems will be funded, in their entirety, by the Transportation Division. No additional General Fund appropriations will be required to operate this system on an ongoing basis. The projected operating budget changes would take effect once the project is completed (2016) and are as follows:

Item	Annual Cost
Fiber optic cable and end equipment	\$ 14,000
Traffic signal controller cabinets*	\$ 21,500
Reduced maintenance calls	(\$ 12,000)
CCTV cameras	\$ 14,000
Total:	\$ 37,500

* Replacement of cabinets using grant monies also produces a one-time savings of \$565,000

Budget/Appropriation Adjustments

Description	Fund	GL Account No. Project Number	Type (Rev/Exp)	FY 14/15 Budget	Proposed Adjustments	FY 14/15 Amended Budget

CITY COUNCIL GOALS

REVENUE DIVERSIFICATION AND PRESERVATION:

Develop a variety of city revenue sources and policies to create a stable revenue base and fiscal policies to support essential city services, regardless of economic climate.

PUBLIC SAFETY:

Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous materials incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

PUBLIC FACILITIES AND CAPITAL PROJECTS:

Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

Ms. Shirley Medina
Riverside County Transportation Commission
4080 Lemon Street, 3rd Floor
Riverside, CA 92502

Subject: Application for 2013 Multi-Funding Call for Projects
Applicant: City of Moreno Valley
Project: Transportation Management Center Phase 1B
Funding Request: \$2,120,000

Dear Ms. Medina:

The City of Moreno Valley is pleased to submit an application for the 2013 Multi-Funding Call for Projects for the Transportation Management Center Phase 1B. The City respectfully requests \$2,120,000 in grant funds for the design and construction of this important Intelligent Transportation System project. As a critical next step in the City's deployment of ITS, it greatly improves mobility and air quality across the City and within the region. The project demonstrates conformance to all the selection criteria: Regional Significance, Project Readiness, Local Match, Safety, Air Quality, Cost Benefit, and Consistency with the Regional Transportation Plan (RTP)/Sustainability Communities Strategy (SCS). The project can adhere to federal funding requirements, including having, or intending to obtain, NEPA/CEQA clearance. The City is also very experienced in using Caltrans Local Assistance procedures.

Specifically the Transportation Management Center Phase 1B Project includes the following improvements:

- An Ethernet fiber-optic backbone system.
- CCTV cameras at 16 key intersections.
- New traffic signal controllers at 45 existing signalized intersections.

The total project cost for the design and construction phase is \$2,400,000, the amount of funds requested is \$2,120,000, and the City match amount is \$280,000 or 11.7 percent.

The City Council approved its commitment to these projects by their action dated September 10, 2013. I am pleased to officially authorize the City's funding application for this project. If you have any questions regarding the application, please do not hesitate to contact Michael Lloyd the Senior Engineer of the project at 951.413.3146.

Letter to Ms. Medina
September 19, 2013
Page 2

Thank you in advance for your time. The City looks forward to your review of our request.

Sincerely,

Michelle Dawson
City Manager

Letter (CM)_TMC Phase 1B.doc

Agreement No. 14-72-123-00

**Riverside County Transportation Commission
FEDERAL FUNDING COOPERATIVE AGREEMENT WITH THE CITY OF MORENO
VALLEY FOR RCTC'S 2013 MULTI-FUNDING CALL FOR PROJECT**

1. Parties and Date. This Agreement is made and entered into this ____ day of _____, 2014, by and between the Riverside County Transportation Commission, hereinafter referred to as "RCTC," and the City of Moreno Valley, hereinafter referred to as "Agency".

2. Recitals.

2.1 In 1991 the United States Congress authorized the Congestion Mitigation and Air Quality Improvement (CMAQ) Program. CMAQ was most recently reauthorized on July 6, 2012, when the President of the United States signed into law P.L. 112-141, the Moving Ahead for Progress in the 21st Century Act (MAP-21). Under MAP-21, CMAQ provides funding to areas in nonattainment or maintenance for ozone, carbon monoxide, and/or particulate matter; and

2.2 MAP-21 also provided continued funding for the Surface Transportation Program (STP). The STP provides funding for state and local government agencies for a range of transportation improvement projects, provided that the projects are identified in the State Transportation Improvement Plan (STIP)/Federal Transportation Improvement Program (FTIP), and meet other funding requirements identified in MAP-21; and

2.3 The California Department of Transportation (hereinafter referred to as "Caltrans") administers the CMAQ and STP programs on behalf of the Federal Highway Administration (hereinafter referred to as "FHWA"); and

2.4 Within Riverside County, RCTC is responsible for directing the programming and allocation of CMAQ and STP funding to projects within Riverside County. To this end, RCTC held a 2013 Multi-funding Call for Projects; and

2.5 Agency prepared a project proposal, attached hereto as Exhibit "A", in accordance with RCTC's Call For Projects; and

2.6 The proposal submitted by Agency describes a priority project which RCTC has determined merits funding, and Agency is eligible to receive CMAQ and/or STP funds. Agency's proposal is referred to herein as the "Project"; and

2.7 Contingent on Caltrans and/or FHWA approval of the Project, funding shall be programmed by RCTC in the form of CMAQ and/or STP funds, as further specified herein; and

CMAQ/STP Cooperative Agreement

2.8 On January 8, 2014, RCTC's Board of Directors approved the programming by RCTC of up to One Million Five Hundred Forty-One Thousand Seven Hundred dollars (\$1,541,700) in CMAQ funds to be matched with Two Hundred Sixty-Eight Thousand Three Hundred dollars (\$268,300) in Agency funds for the Project; and

2.9 Agency shall be the direct recipient of any federal funds provided for the Project, and shall utilize the funding disbursed by Caltrans solely for the Project.

3. Terms.

3.1 Definition; Term of Agreement.

A. Definitions.

1. Days - As used in this Agreement, "days" shall be calendar days.

2. Effective Date – Refers to the date first specified above.

3. Funding Plan – The plan included as part of the attached Exhibit "A" specifying the funding amounts and funding sources for the Project.

4. Project – The project proposed by Agency, as described in Agency's proposal, attached hereto as Exhibit "A", which has been reviewed and approved by RCTC.

B. Term. The term of this Agreement shall commence on the Effective Date and shall continue in effect through December 31, 2018, or until written agreement by the Parties that the Project has been completed, unless earlier terminated as provided herein.

C. Term Contingent on Funding. Notwithstanding the term as defined in subsection B above, the continuation of this Agreement and the programming of the federal funds specified hereunder is contingent on funding availability under MAP-21, on the Project maintaining funding eligibility, and on FHWA and Caltrans approval of the Project, and each Project phase. The parties acknowledge that RCTC is not the funding entity hereunder, and shall have no responsibility or liability to Agency for failure of FHWA or Caltrans to fund the Project, or for any delay, cancellation or reduction of federal funds.

3.2 Use of Funds.

A. Agency Responsibilities. Contingent on Southern California Association of Governments (hereinafter referred to as "SCAG"), Caltrans and FHWA approval of the Project and the funding to be programmed hereunder, Agency shall have the responsibilities set forth in this Agreement, including the following.

1. Agency shall act as the lead agency for the engineering, right-of-way, construction and construction management for the Project, unless the Project is on the state highway system and a cooperative agreement with Caltrans specifies that Caltrans is the lead of a specified project phase.

2. Agency shall submit National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA) environmental documentation to Caltrans for approval.

3. Agency shall prepare and submit all necessary Caltrans-required documentation to Caltrans District 8 including the request for authorization to proceed (hereinafter referred to as "E-76 Request") as indicated on the Project schedule and Funding Plan.

4. Agency shall be the direct recipient of all federal funds to be provided for the Project, and shall invoice Caltrans for Project costs at minimum once every six months, or as otherwise required by Caltrans.

5. Agency shall create any necessary Project records, reports and financial accounts to permit disbursement of allocated funds to Agency, and shall ensure that federal and state reporting requirements are met.

B. Project Changes; Cost Overruns. The federal funds described in Section 3.4 and Exhibit "A" of this Agreement are specifically for the Project and make up the entire amount which RCTC has authorized for the Project. Any subsequent amendments to the Project scope or description are not covered by this Agreement, and the funding for any such amendments or for any Project cost overruns shall be the sole responsibility of Agency, unless otherwise approved in writing by RCTC.

C. Cost Savings. In the event that bids for the Project are lower than anticipated, or there are cost savings for any other reason, the Funding Plan shall be revised to apply such cost savings proportionately to each funding source listed in the Funding Plan. Agency shall inform RCTC of any cost savings and the parties shall amend this Agreement to reflect the revisions to the Funding Plan. RCTC's Executive Director and the Agency Manager shall be authorized to execute any such amendment.

D. Responsibility of Agency for Project Compliance with Federal Rules and Regulations. Agency shall be solely responsible and liable for compliance with all federal and state rules and regulations applicable to the CMAQ and/or STP funds. Approval by RCTC of the Project does not evidence any opinion of or representation by RCTC of the Project's compliance with applicable federal or state rules and regulations regarding use of the CMAQ and/or STP funds. If Caltrans or FHWA determines that any CMAQ and/or STP funds were not spent in accordance with applicable federal or state rules and regulations, Agency shall be solely responsible for reimbursement of all such improperly expended funds and shall make such reimbursement in the manner specified in this Agreement.

E. Funding Reimbursement by Agency. If it is determined pursuant to a Project audit that any funds provided pursuant to this Agreement have been improperly expended, Agency shall, at the direction of the agency performing the audit (e.g. RCTC, Caltrans, FHWA or FTA) reimburse within thirty (30) days the full amount of such improperly expended funds. The funds shall be reimbursed in accordance with the recommendations in the audit, with a notice to RCTC that the reimbursement was accomplished.

3.3 Additional Responsibilities of Agency

A. Indemnification. To the fullest extent permitted by law, Agency shall defend, indemnify and hold RCTC, its directors, officials, officers, employees, agents and/or volunteers free and harmless from any and all liability from loss, damage, or injury to property or persons, including wrongful death, in any manner arising out of or incident to any acts, omissions or willful misconduct of Agency or any of its directors, officials, officers, employees, agents, volunteers, or service providers arising out of or in connection with Agency's performance of this Agreement, or the Project, including, without limitation, the payment of consequential damages and attorneys' fees. Further, Agency shall defend, at its own expense, including the payment of attorneys' fees, RCTC, its officials, officers, employees, agents and/or volunteers in any legal action based upon such acts, omissions or willful misconduct. Agency shall reimburse RCTC, its directors, officials, officers, employees, agents and/or volunteers, for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided.

B. Standard of Care; Performance Standards.

1. Agency shall implement the Project in a skillful and competent manner and in accordance with all applicable local, state, and federal laws, rules and regulations. Agency shall be responsible to RCTC for any errors or omissions in its execution of this Agreement or the implementation of the Project.

2. Agency shall meet or exceed the following performance standards for the Project:

a. Adhere to the timeline set forth in this Agreement or as subsequently approved by RCTC.

b. Expend the funding specified herein entirely on the Project.

c. Implement the Project in a manner consistent with Exhibit "A" and all provisions of this Agreement.

d. Provide Project reporting to RCTC in a manner consistent with this Agreement.

e. Comply with any requirements and restrictions imposed by the authorizing language in MAP-21.

C. Insurance. Agency shall obtain and require its subcontractors or sub-consultants to obtain insurance of the types and in the amounts described below for the entire term of this Agreement.

1. Commercial General Liability Insurance. Agency shall maintain and require its consultants and contractors to maintain sufficient insurance to cover the risks associated with the Project.

a. Name RCTC and its officials, officers, employees, agents, and consultants, as insureds with respect to performance of this Agreement. Such insured status shall contain no special limitations on the scope of its protection to the above-listed insureds.

b. Be primary and noncontributory with respect to any insurance or self insurance programs covering RCTC and its directors, officials, officers, employees, agents, and consultants.

c. Contain standard separation of insureds provisions.

2. Business Automobile Liability Insurance. If Agency hires or owns any vehicle during the term of this Agreement, Agency shall maintain business automobile liability insurance or equivalent form with a combined single limit of not less than \$1,000,000 per occurrence. Such insurance shall include coverage for owned, hired and non-owned automobiles.

3. Workers' Compensation Insurance. Agency shall maintain workers' compensation insurance with statutory limits and employer's liability insurance with limits of not less than \$1,000,000 per accident.

4. Certificates/Insurer Rating/Cancellation Notice. Agency shall, prior to receiving any funding under this Agreement, furnish to RCTC properly executed certificates of insurance, certified copies of endorsements, and policies, if requested by RCTC which shall clearly evidence all insurance required in this Section. Agency shall not allow such insurance to be canceled, allowed to expire or be materially reduced in coverage except on thirty (30) days prior written notice to RCTC.

D. Obligation to Provide Match Funding. Agency must provide funding at least equal to the amounts shown in Exhibit "A", attached hereto and incorporated by reference, as a match to the funds provided for the Project.

3.4 RCTC's Rights and Responsibilities.

A. RCTC shall formally request on behalf of Agency that SCAG amend the FTIP to program up to the amount in accordance with the Funding Plan.

B. RCTC shall provide assistance to Agency, as described in this Agreement, in securing the CMAQ funds in an amount not to exceed \$1,541,700, as further detailed in the Funding Plan.

C. RCTC shall not be obligated to program any amount in excess of the amount identified in subsection B above, or the amount ultimately approved for the Project by Caltrans and FHWA, if less than the amount set forth in subsection B above.

D. RCTC shall process any required FTIP amendments.

E. RCTC may cancel funding for the Project under this Agreement if Agency has not submitted an E-76 Request to Caltrans or has not advanced the Project to the "ready-to-list stage" as required by the Project schedule included in the attached Exhibit "A".

F. RCTC will consider requests for extensions of time if the request if the reason for delay is above and beyond the agencies control.

4. Accounting Records.

4.1 Retention of Records. Agency shall maintain complete and accurate records with respect to costs incurred and other records generated under this Agreement. All such records shall be clearly identifiable. Agency shall allow representatives of RCTC, Caltrans, FHWA, and other designated agencies during normal business hours to examine, audit, and make transcripts or copies of such records. Agency shall maintain all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the expiration of this Agreement and shall allow inspection hereunder during such time.

4.2 Accounting of Funds. When requested by RCTC, Agency shall within fifteen (15) days provide RCTC with a full reporting and accounting of all funds received pursuant to this Agreement during its term.

5. Project Reports.

5.1 Reporting: Agency shall, in a timely manner, provide milestone reports detailing the Project's progress including a financial status report and milestone progress report in a form approved by RCTC, upon RCTC written request.

5.2 Responsibility for Federal Reporting: The responsibility for reporting associated with the CMAQ and/or STP funds shall be exclusively that of the Agency and in no manner the responsibility of RCTC.

6. Annual Audit.

6.1 RCTC shall notify Agency in writing, by the end of the fiscal year, if Agency is required to conduct an annual financial audit of records pertaining to the Project. If an audit is required, it shall be completed and submitted to RCTC by December 31st of the following fiscal year ("Audit Deadline"). In order to ensure compliance with the Audit Deadline, Agency shall respond promptly to the auditor's requests for documentation and records.

6.2 RCTC may, in its sole and absolute discretion, grant an extension of the Audit Deadline upon written request of the Agency, which request shall include an explanation for the delay. No extension of the Audit Deadline shall exceed ninety (90) days.

6.3 Agency shall promptly resolve all audit matters to the satisfaction of RCTC.

6.4 If Agency fails to complete the audit by the Audit Deadline or by the date of any authorized extension, or if Agency fails to promptly resolve all audit matters to the satisfaction of RCTC, RCTC shall have the right to request suspension of Agency's funding by Caltrans.

7. General Provisions.

7.1 Compliance with Federal Procurement Requirements.

A. In addition to the terms specified herein, Agency shall also achieve and maintain full compliance with all federal contracting and procurement requirements applicable to the Project and Agency's organization. It is the responsibility of the Agency to be familiar with and to be in full compliance with all applicable Caltrans and federal requirements.

B. In the event of any failure or alleged failure to comply with federal contracting and procurement requirements on the part of the Agency, Agency shall be solely responsible for any penalties, reimbursement of funds, costs of investigation and remedy of such failures.

7.2 Termination of Agreement.

A. RCTC may, by written notice to Agency terminate the whole or any part of this Agreement at any time, with or without cause, by giving written notice to Agency of such termination, and specifying the effective date thereof. Agency may not terminate this Agreement except for cause. Upon receipt of notice of termination, Agency shall immediately cease expenditure of funds conveyed pursuant to this Agreement and promptly return all unexpended funds to RCTC or as RCTC may direct.

B. In the event this Agreement is terminated in whole or in part as provided in subsection A of this Section, RCTC may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

C. If this Agreement is terminated as provided in subsection A of this Section, RCTC may require Agency, when implementing a Project, to provide to RCTC all finished or unfinished documents, including but not exclusive to, data, studies, drawings, and reports, prepared by Agency in connection with the performance of this Agreement.

7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

To RCTC: Riverside County Transportation Commission
4080 Lemon Street, Third Floor
P. O. Box 12008
Riverside, California 92502-2208
Attn: Anne Mayer, Executive Director
AMayer@rctc.org

To Agency: City of Moreno Valley
14177 Frederick St.
Moreno Valley, CA 92552
Attn: Eric Lewis
E-mail: ericle@moval.org

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. mail, first class postage prepaid and addressed to the party at its applicable address. Notice may also be provided via electronic mail and shall be deemed made the date sent, provided that any notice sent via electronic mail shall also be sent by U.S. mail, per the requirements set forth in the foregoing sentence, within twenty-four (24) hours of the notice via electronic mail. Notice sent via electronic mail that is not followed by notice sent via U.S. mail, as required in this paragraph, shall not be considered notice for purposes of this Agreement.

7.4 Attorneys' Fees. If any party commences an action against the other arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party's reasonable attorneys' fees and costs of suits.

7.5 Entire Agreement. This Agreement contains the entire Agreement of the parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements. This Agreement may only be modified in writing, signed by both parties.

7.6 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in Riverside County.

7.7 Time of Essence. Time is of the essence for each and every provision of this Agreement.

7.8 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties, and shall not be assigned by Agency without the prior written consent of RCTC.

7.9 Administration.

A. RCTC's Executive Director, or his or her designee, shall administer this Agreement on behalf of RCTC.

B. Agency hereby designates _____ or his or her designee, to act as its representative to administer this Agreement on behalf of Agency ("Agency's Representative"). Agency's Representative shall have full authority to represent and act on behalf of Agency for all purposes under this Agreement.

7.10 Severability. If any term, provision, covenant or condition of this Agreement is held to be invalid, void or otherwise unenforceable, to any extent, by any court of competent jurisdiction, the remainder of this Agreement shall not be affected thereby, and each term, provision, covenant or condition of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

7.11 Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which, when executed and delivered shall be deemed an original and all of which together shall constitute the same agreement. Facsimile signatures shall be considered originals.

7.12 Incorporation of Recitals. The Recitals set forth above are true and correct and are incorporated into this Agreement by reference as though fully set forth herein.

7.13 Incorporation of Exhibit. This Agreement contains one (1) exhibit (Exhibit "A") which is attached hereto and incorporated into this Agreement by reference.

7.14 Legal Authority. RCTC and Agency represent and warrant that the persons signing below on behalf of each party is duly authorized to execute this Agreement on behalf of its respective party and that, by so executing, the parties hereto are formally bound to the provisions of this Agreement.

**SCOPE OF WORK, FUNDING
AND TIMETABLE**

SCOPE OF WORK: Design and construction of ITS, including an Ethernet fiber-optic backbone system, CCTV cameras at 16 key intersections, and new traffic signal controllers at existing 45 signalized intersections.

FUNDING:

PHASE	CMAQ Funds	Local Funds	Other Local - MSRC	TOTAL
CONSTRUCTION	\$1,541,700	\$268,300	\$490,000	\$2,300,000
TOTAL	\$1,541,700	\$268,300	\$490,000	\$2,300,000

TIMETABLE:

Phase	Start*	End*	Comments
Environmental	May 2014	October 2014	
Design (PS&E)	November 2014	April 2015	
Right of Way	N/A	N/A	
Construction	May 2015	January 2016	

*Schedule start and end dates revised based on programming of federal funds in 2013 FTIP through Formal Amendment No. 17.

PROJECT OVERVIEW

Project Title: Transportation Management Center Phase 1B

Total Project Cost: \$2,400,000

Funding Request: \$2,120,000

Project Scope of Work: The proposed work includes the deployment of critical field devices and supporting communications system as a part of the City's traffic management system. Improvements include an Ethernet fiber-optic backbone system and wireless communications, CCTV cameras at 26 key intersections, and new traffic signal controllers/cabinets at 43 existing signalized intersections.

Does Project include pedestrian and/or bicycle facilities? Yes ___ No X

If Yes, please describe the cost or percentage of project that includes pedestrian/bike facilities.

N/A

PROJECT EVALUATION CRITERIA

Please respond to the questions below describing how the project meets each criterion.

Regional Significance (Up to 10 points)

Describe the Regional Significance of the project:

The proposed improvements will provide for responsive traffic management along several corridors within the City that are multi-jurisdictional and multi-modal. Improvements to the Alessandro Boulevard corridor from Perris Boulevard to Heacock Street will allow for the smooth flow of traffic across the City and connect with the City of Riverside through an existing communications intertie that crosses I-215. It is worth noting that the Metrolink's Perris Valley Line will have a station on the west side of I-215 just south of Alessandro Boulevard, RTA plans Bus Rapid Transit along the Alessandro corridor (RTA routes 11 and 20 currently utilize the corridor), and Amtrak Thruway has a bus stop on the east side of I-215 along Alessandro (Route 19a from Bakersfield to Hemet with stops in Sun City, Perris, Riverside, San Bernardino, Ontario, Claremont, Pasadena, and La Crescenta). Improvements to Perris Boulevard will provide traffic management capabilities from Ironwood Avenue, across SR-60, to Harley Knox Road in the City

of Perris. RTA routes 11, 18, 19, and 35 utilize portions of the Perris Boulevard corridor. Improvements to Cactus Avenue/Lasselle Street will provide traffic management capabilities from Perris Boulevard (previously listed) to the Moreno Valley College (a critical RTA transfer location within the City). The Cactus Avenue segment between Perris Boulevard and Lasselle Street will fill a gap in the existing Cactus Avenue corridor ITS system. Once this gap is filled, the Cactus corridor will extend from I-215 to Nason Street (location of the Riverside County Regional Medical Center and another RTA transfer location). RTA routes 18, 19, 20, and 41 utilize the Cactus/Lasselle corridor. Improvements to Eucalyptus Avenue/Towngate Boulevard will improve traffic flow from the Moreno Valley Mall (the primary RTA transfer station within Moreno Valley) to I-215. RTA routes 11, 16, 18, 19, 208, and 210 utilize portions of the Eucalyptus/Towngate corridor. The Heacock Street segment from Cactus Avenue to Ironwood Avenue will provide another corridor leading to SR-60. RTA route 11 utilizes a portion of this segment. Ironwood Avenue from Perris Boulevard to Pigeon Pass Road and then down Pigeon Pass Road to SR-60 will provide another corridor to SR-60. RTA routes 11 and 18 utilize portions of the segments. This project would provide controllers/cabinets and field communication that would be virtually plug-and-play compatible with any future BRT deployment by RTA.

What is the Average Daily Traffic (ADT) for the road segment that the project is located on (Indicate source and year of data)?

Alessandro Boulevard: 27,700 vpd (City count 2009)

Perris Boulevard: 29,500 vpd (City count 2009)

Cactus Avenue/Lasselle Street: 15,000 vpd (City count 2009)

Eucalyptus Avenue/Towngate Boulevard: 16,200 vpd (City count 2009)

Heacock Street: 19,600 vpd (City count 2009)

Ironwood Avenue/Pigeon Pass Road: 18,100 vpd (City count 2009)

Please check the transportation system(s) that the project is located on.

CMP _____
 TUMF X
 NHS X
 Master Bike Plan _____
 Multi-jurisdictional X
 Other X (ITS Master Plan)

Project Readiness (Up to 10 points)

Describe the current status of the project. Points will be applied based on the guidance below:

- 10 points = Ready for construction (PA&ED complete, PS&E and R/W certified)
- 8 points = PA&ED Complete, project within 6 months of construction (e.g. 95% PS&E, R/W certification within 6 months of construction)
- 6 points = PA&ED Complete, project within 12 months of construction (e.g. 60% PS&E, R/W certification within 12 months)
- 4 points = PA&ED Complete, at 35% PS&E, and R/W initiated
- 2 points = PA&ED Complete

Project Status:

This project needs to start with the PA/ED phase. However, an aggressive schedule is achievable due to significant in-house ITS expertise. Since this project is not the initial deployment, it will benefit from the carefully reasoned approach arrived at in the pilot projects. Therefore, since this is the second phase of the City's ITS Master Plan, it is reasonably anticipated that PA/ED could be completed within six months and PS&E would require up to another six months. No right of way is required. The project would be ready to go to bid within twelve months once funds are obligated following the Caltrans LAPM that includes all necessary Caltrans and FHWA approvals.

Local Match (Up to 10 points)

A minimum of 11.47% must be committed in the phase that funding is being requested. Points will be applied based on the guidance below.

- 10 points = 55% or more
- 8 points = 45-54%
- 6 points = 35-44%
- 4 points = 25-34%
- 2 points = 15-24%

Total Project Cost	\$2,400,000
Funding Request	\$2,120,000
Local Match Amount	\$280,000
Local Match Percent	<u>11.7%</u>

Safety (Up to 5 points)

Quantitative: Provide accident information and other documentation that justifies project safety benefits. Collision rate calculations from the Federal Highway Administration (FHWA) website or other accident data is to be provided as an attachment to this application (“Local Agency Support Documentation”), if applicable.

Number of red-light running/rear-end collisions in corridors: 680 collisions

Red-light running/Rear-end Collision Rates:

Alessandro Boulevard: 1.76

Perris Boulevard: 1.24

Cactus Avenue/Lasselle Street: 1.97

Eucalyptus Avenue/Towngate Boulevard: 1.59

Heacock Street: 2.65

Ironwood Avenue/Pigeon Pass Road: 0.84

Qualitative: Discuss how the proposed project will benefit/improve safety.

The project contributes to safety by reducing the number of stops within the corridors, thus reducing the frequency of red-light running and rear-end collisions. Based upon the Safety Index Calculation Procedure for the HSIP Program, signal upgrades with interconnection produce a collision reduction factor of 0.15 (a 15% reduction in collisions).

Air Quality (Up to 5 points)

Quantitative: Provide the input data needed for the Air Quality assessment. Refer to the “Air Quality Benefits Assessment Methodologies” (Attachment C).

Before/After ADT:

Alessandro Boulevard: 27,700 vpd

Perris Boulevard: 29,500 vpd

Cactus Avenue/Lasselle Street: 15,000 vpd

Eucalyptus Avenue/Towngate Boulevard: 16,200 vpd

Heacock Street: 19,600 vpd

Ironwood Avenue/Pigeon Pass Road: 18,100 vpd

Before/After LOS:

Alessandro Boulevard: LOS A

Perris Boulevard: LOS C

Cactus Avenue/Lasselle Street: LOS A

Eucalyptus Avenue/Towngate Boulevard: LOS A

Heacock Street: LOS A

Ironwood Avenue/Pigeon Pass Road: LOS A

Before Average Vehicle Speed:

Alessandro Boulevard: 30.5 MPH

Perris Boulevard: 27.8 MPH

Cactus Avenue/Lasselle Street: 33.6 MPH

Eucalyptus Avenue/Towngate Boulevard: 27.5 MPH

Heacock Street: 27.3 MPH

Ironwood Avenue/Pigeon Pass Road: 28.2 MPH

After Average Vehicle Speed:

Alessandro Boulevard: 46.3 MPH

Perris Boulevard: 46.7 MPH

Cactus Avenue/Lasselle Street: 43.9 MPH

Eucalyptus Avenue/Towngate Boulevard: 40.9 MPH

Heacock Street: 46.9 MPH

Ironwood Avenue/Pigeon Pass Road: 36.5 MPH

Average Delay Savings:

Alessandro Boulevard: 1.4 minutes

Perris Boulevard: 5.5 minutes

Cactus Avenue/Lasselle Street: 1.3 minutes

Eucalyptus Avenue/Towngate Boulevard: 1.1 minutes

Heacock Street: 2.3 minutes

Ironwood Avenue/Pigeon Pass Road: 1.2 minutes

NOTE: Average Vehicle Speeds and Average Delay Savings based upon calculations from the State of California Traffic Light Synchronization Program (TLSP) worksheets provided in the Attachment.

Corridor Lengths:

Alessandro Boulevard: 2.0 miles

Perris Boulevard: 6.25 miles

Cactus Avenue/Lasselle Street: 3.0 miles

Eucalyptus Avenue/Towngate Boulevard: 1.6 miles

Heacock Street: 2.5 miles

Ironwood Avenue/Pigeon Pass Road: 2.35 miles

Qualitative: Describe the Air Quality benefits of project.

Signal synchronization benefits to air quality are well documented. Specific to this project, vehicle emissions are anticipated to be significantly reduced due to the reduced number of stops at signalized intersections. The average vehicle speed improvements range from 29% to 68% with significant travel time reductions.

Cost Benefit (Up to 10 points)

Quantitative: Provide the input data needed for the Cal-B/C cost-benefit methodology published by Caltrans. Refer to the "Cost-Benefit Analysis" form (Attachment D).

Cost Data:

Construction/Implementation Duration: 1 year

Construction/Implementation Cost: \$2,220,000

Post-opening Costs: \$50,000/year

Benefit Data:

Number of Red-light running/Rear-end Collisions: 680 corridor-wide

Expected Collision Rate Before: See Safety data above

Expected Collision Rate After:

Alessandro Boulevard: 1.50

Perris Boulevard: 1.05

Cactus Avenue/Lasselle Street: 1.67

Eucalyptus Avenue/Towngate Boulevard: 1.35

Heacock Street: 2.25

Ironwood Avenue/Pigeon Pass Road: 0.71

Vehicle Hours Delay Reduced per Year: 84,773 (calculated based upon the TLSP worksheets (provided in the Attachment) vehicle minute savings are divided by 60 and then multiplied by the peak hour volume and by 250 for number of annual working days)

Qualitative: Describe any cost benefit aspects, methodologies, value analysis that is associated with the project.

The benefits of this project are driven by the reduced number of collisions that is anticipated due to the improved flow of traffic through the corridor intersections. The project will also provide improved travel times with fewer stops, thus improving air quality and lost productivity.

RTP/SCS Consistency (Up to 10 points)

Describe how the project is consistent with the actions and strategies included in the SCAG 2012 Regional Transportation Plan (RTP), Chapter 4: Sustainability Communities Strategy (SCS) (Attachment E). For example, list which specific actions and/or strategies the project will

implement (Table 4.3), identify if the project is part of a local jurisdiction's completed or ongoing Compass Blueprint effort, provide information regarding the jurisdictions efforts to reduce greenhouse gases (GHG) or vehicle miles traveled (VMT) and how the proposed project can help achieve GHG and VMT reductions, etc.

This project achieves the following 2012 RTP/SCS actions and strategies:

- Work with relevant state and local transportation authorities to increase the efficiency of the existing transportation system.
- Collaborate with local jurisdictions and subregional COGs to continually update the ITS inventory.
- Collaborate with CTCs to regularly update the county and regional ITS architecture.

Furthermore, given the number of transit routes served by the project corridors and transfer stations/locations, transit service will realize improvements related to buses arriving on time. Enhanced on-time arrivals can lead to transit being a more attractive transportation alternative, thereby reducing VMT. The project fits the vision established by the Compass Blueprint of the Alessandro Boulevard corridor for transit-oriented development by delivering reliable travel time for all road users (cars, trucks, bicycles, and buses) through the planned high-density commercial/residential nodes at each major intersection.

In summary, this project will increase the efficiency of the existing transportation system by implementing a critical stage of the City's ITS Master Plan that is consistent with the regional ITS architecture. By improving the efficiency of the existing system, vehicle emissions will be reduced due to the reduced number of stops at intersections. The improved traffic flow across the City and into adjacent jurisdictions should improve the RTA's ability to provide on-time arrivals making it a more attractive transportation alternative, especially within the planned TOD along Alessandro Boulevard.

Is the project included in the 2013 Federal Transportation Improvement Program (FTIP)?

Yes No

Report to City Council

TO: Mayor and City Council

FROM: Thomas M. DeSantis, Assistant City Manager

AGENDA DATE: August 26, 2014

TITLE: APPROVE RESOLUTION NO. 2014-74 IN SUPPORT OF SB 69 (ROTH) AND AB 1521 (FOX) VEHICLE LICENSE FEE FUNDING FOR NEWLY INCORPORATED CITIES

RECOMMENDED ACTION

Recommendations:

1. Adopt Resolution No. 2014-74. A Resolution of the City Council of the City of Moreno Valley supporting SB 69 and AB 1521 which advocate for provision of Vehicle License Fee revenues for newly incorporated cities.
2. Authorize the Mayor to sign a letter of support.

SUMMARY

Adoption of the 2011 State Budget significantly altered the funding stream for cities by redirecting Vehicle License Fee revenues previously collected by cities. As an unintended consequence of this change, the State's four newly incorporated cities (all of which are in western Riverside County) saw dramatic reductions in the revenues required to provide key services to their residents.

It is recommended that the Council support SB 69 and AB 1521 which have been crafted to safeguard funding for newly incorporated cities as well as future annexations of unincorporated communities into existing cities.

DISCUSSION

For more than 50 years, the majority portion of Vehicle License Fee (VLF) revenues went to cities to provide for local resident services. Newly incorporated cities and inhabited areas annexed by cities were included in these allocations and received a share of VLF revenues based on population growth. However, after the 2004 VLF-property tax swap agreement, the amount VLF revenues received by cities was significantly cut after the VLF rate was reduced from 2% to 65%. To make up for lost revenues, city budgets were backfilled by additional dollar-for-dollar property tax revenues.

While the VLF-property tax swap solved one problem, it created another in that it contained no provisions recognizing that cities would annex inhabited areas (an activity supported by various state policies) or that future incorporations would occur in a state with continued population growth. As a result, newly incorporated cities or areas annexed by cities after the 2004 tax swap received no backfill property tax dollars in order to compensate for lower VLF revenues.

This problem was further exacerbated following the adoption of SB 89 in 2011, which swept all city VLF revenues to fund law enforcement grants that previously had been funded by the state. As a result, recently incorporated cities were significantly harmed. SB 69 remedies this situation allowing newly incorporated cities to participate in the funding solution that was provided to all cities and counties at the time of the 2004 VLF-property tax swap.

AB 1521 and SB 69 also take into consideration the major state policy challenges presented if future incorporations and annexations of county incorporated territory no longer make sense. Cities are not static and need the ability to grow and meet the needs of California's ever-increasing population. In order to ensure successful city growth, whether new or existing, stable revenue sources must be preserved. AB 1521 and SB 69 achieve this by utilizing existing county Educational Revenue Augmentation Fund (ERAF) dollars. By accessing ERAF funds, cities are guaranteed a stable revenue source with no fiscal impact on schools.

Besides addressing the fiscal harm that occurred to cities with the passage of the 2011 State Budget, this solution also provides long-term policy benefits to the State. State policies for achieving sustainability, greenhouse gas reduction, smart growth, infill and transit-oriented development and preserving farmland and open space rely heavily upon the role and success of cities. The fiscal costs of this solution are minor compared with the policy costs of not supporting city-centered, compact growth.

FISCAL IMPACT

There is no fiscal impact to the City of Moreno Valley associated with supporting these legislative remedies. Proposed legislation (SB 69 and AB 1521) would restore funding to our neighboring cities of Eastvale, Jurupa Valley, Menifee, and Wildomar by utilizing existing county Educational Revenue Augmentation Fund (ERAF) dollars. By accessing

ERAF funds, cities are guaranteed a stable revenue source with no fiscal impact on schools. The proposed measures would remedy the burdensome impacts on the affected cities by allowing them to restore and maintain services to their communities.

CITY COUNCIL GOALS

Advocacy. Develop cooperative intergovernmental relationships and be a forceful advocate of City policies, objectives, and goals to appropriate external governments, agencies, and corporations.

RESOLUTION NO. 2014-74

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, SUPPORTING SB 69 AND AB 1521 WHICH ADVOCATE FOR PROVISION OF – VEHICLE LICENSE FEE REVENUES FOR NEWLY INCORPORATED CITIES

WHEREAS, the Riverside Division of the League of California Cities is supporting both SB 69 and AB 1521 relating to municipal incorporations and property tax allocations; and

WHEREAS, these bills rectify a critical problem affecting several of the State's newest cities of Eastvale, Jurupa Valley, Menifee and Wildomar, and cities that annexed inhabited unincorporated territory to improve service delivery in furtherance of Local Agency Formation Commission (LAFCO) policies; and

WHEREAS, SB 69 and AB 1521 will provide new cities and annexations with revenue by utilizing existing county Educational Revenue Augmentation Fund (ERAF) dollars. By accessing ERAF funds, cities are guaranteed a stable revenue source with no fiscal impact on schools.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. The City Council hereby supports both SB 69 and AB 1521; and
2. The City Council supports these measures to remedy the burdensome impacts on the affected cities by allowing them to restore and maintain services to their communities; and
3. The City Clerk shall communicate this action of the City Council local and state elected representatives.

APPROVED AND ADOPTED this 26th day of August, 2014.

RE: AB 1521 (Fox) and SB 69 (Roth). Local government finance: vehicle license fee adjustment.

Notice of Support

Dear Senator Roth and Assembly Member Fox,

The City of Moreno Valley is pleased to support AB 1521 and SB 69, which together would restore funding stability to recently incorporated cities and cities that annexed inhabited territory, and establish a foundation to support sustainable and compact growth policies.

For more than 50 years, the majority portion of Vehicle License Fee (VLF) revenues went to cities to provide for local resident services. Newly incorporated cities and inhabited areas annexed by cities were included in these allocations and received a share of VLF revenues based on population growth. However, after the 2004 VLF-property tax swap agreement, the amount VLF revenues received by cities was significantly cut after the VLF rate was reduced from 2% to 0.65%. To make up for lost revenues, city budgets were backfilled by additional dollar-for-dollar property tax revenues.

While the VLF-property tax swap solved one problem, it created another in that it contained no provisions recognizing that cities would annex inhabited areas (an activity supported by various state policies) or that future incorporations would occur in a state with continued population growth. As a result, newly incorporated cities or areas annexed by cities after the 2004 tax swap received no backfill property tax dollars in order to compensate for lower VLF revenues.

This problem was further exacerbated following the adoption of SB 89 in 2011, which swept all city VLF revenues to fund law enforcement grants that previously had been funded by the state. As a result, recently incorporated cities were significantly harmed. SB 69 remedies this situation by allowing newly incorporated cities to participate in the funding solution that was provided to all cities and counties at the time of the 2004 VLF-property tax swap.

AB 1521 and SB 69 also take into consideration the major state policy challenges presented if future incorporations and annexations of county incorporated territory no longer make sense. Cities are not static and need the ability to grow and meet the needs of California's ever-increasing population. In order to ensure successful city growth, whether new or existing, stable revenue sources must be preserved. AB 1521 and SB 69 achieve this by utilizing existing county Educational Revenue Augmentation Fund (ERAF) dollars. By accessing ERAF funds, cities are guaranteed a stable revenue source with no fiscal impact on schools.

Besides addressing the fiscal harm that occurred to cities with the passage of SB 89 in 2011, this solution also provides long-term policy benefits to the state. State policies for achieving sustainability, greenhouse gas reduction, smart growth, infill and transit-oriented development and preserving farmland and open space rely heavily on the role and success of cities. The fiscal costs of this solution are minor compared to the policy costs of not supporting city-centered, compact growth.

For these reasons, the City of Moreno Valley supports AB 1521 and SB 69.

Sincerely,

Jesse Molina

CITY MANAGER	<i>d</i>

Report to City Council

TO: Mayor and City Council, acting in their capacity as President and Board of Directors for the Moreno Valley Community Services District

FROM: Betsy Adams, Parks and Community Services Director

AGENDA DATE: August 26, 2014

TITLE: LASSELLE SPORTS PARK - EXECUTION OF EASEMENT DEED FOR STORM DRAIN PURPOSES TO THE RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT (RCFC&WCD)

RECOMMENDED ACTION

Recommendations:

1. Adopt Resolution No. CSD 2014-12. A Resolution of the Board of Directors of the Moreno Valley Community Services District of the City of Moreno Valley, California, Authorizing the Execution of an Easement Deed for Storm Drain Purposes Over Lasselle Sports Park APN 312-130-024 to the Riverside County Flood Control and Water Conservation District.
2. Direct the City Clerk to forward the signed Easement Deed to the Riverside County Flood Control and Water Conservation District (RCFC&WCD) for further processing and recordation.

SUMMARY

Issue an easement deed to Riverside County Flood Control and Water Conservation District for Lasselle Sports Park.

DISCUSSION

The Moreno Valley Ranch Development Agreement required the master developer to provide a sports park on Lasselle Street. However, it was the City's responsibility to

acquire a small parcel from RCFC&WCD to be used as a parking lot for the sports park. In 2006, when RCFC&WCD granted the 2.97 acres to the City for a parking lot, they withheld an easement for access to their drainage channel and contiguous property. RCFC&WCD requires an easement for its storm drain to the channel, west of the park. The Easement Deed will provide RCFC&WCD the legal authorization to use, repair, construct, reconstruct, inspect, operate, and maintain the underground storm drain. The proposed storm drain easement is 26' wide by 444.64' in length.

ALTERNATIVES

1. Authorize the Board to execute the Easement Deed for flood control and drainage purposes over Lasselle Sports Park APN 312-130-024. Direct the City Clerk to forward the signed Easement Deed to RCFC&WCD for further processing and recordation. *This alternative is recommended by staff.*
2. Do not authorize the Board to execute the Easement Deed for flood control and drainage purposes over Lasselle Sports Park APN 312-130-024. Do not direct the City Clerk to forward the signed Easement Deed to RCFC&WCD for further processing and recordation. *This alternative is not recommended by staff.*

FISCAL IMPACT

None.

NOTIFICATION

Publication of the agenda.

RESOLUTION NO. 2014-12

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE EXECUTION OF AN EASEMENT DEED FOR STORM DRAIN PURPOSES OVER LASSELLE SPORTS PARK APN 312-130-024 TO THE RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT

WHEREAS, the Riverside County Flood Control and Water Conservation District has requested that the Board of Directors of the Moreno Valley Community Services District execute an easement deed for storm drain purposes over Lasselle Sports Park APN 312-130-024 to the Riverside County Flood Control and Water Conservation District, and

WHEREAS, it is in accordance with Government Code, Section 27281, for Board of Directors of the Moreno Valley Community Services District to perform this action by resolution.

"NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of the Moreno Valley Community Services District that execution of easement deed for storm drain purposes Lasselle Sports Park APN 312-130-024, attached hereto as Exhibit A to this Resolution, is authorized."

Report to City Council

TO: Mayor and City Council, acting in their capacity as President and Board of Directors of the Moreno Valley Community Services District

FROM: Betsy Adams, Director of Parks and Community Services

AGENDA DATE: August 26, 2014

TITLE: ACCEPTANCE OF GRANT MONIES FROM THE CALIFORNIA DEPARTMENT OF EDUCATION, CHILD DEVELOPMENT SERVICES, FOR CHILD CARE SERVICES AND ADOPTION OF THE RESOLUTION TO CERTIFY THE APPROVAL OF THE GOVERNING BOARD

RECOMMENDED ACTION

Recommendations:

1. Authorize the acceptance of grant monies in the amount of \$561,056 for Fiscal Year (FY) 2014/2015 from the California Department of Education, Child Development Division, for the purpose of providing school age child care and development services.
2. Adopt Resolution No. CSD 2014-13. A Resolution of the Moreno Valley Community Services District of the City of Moreno Valley, California, Certifying the Approval of the Governing Board to enter into a Transaction with the California Department of Education for the Purpose of Providing Child Care and Development Services and to Authorize Designated Personnel to Sign Contract Documents for FY 2014/2015

SUMMARY

This report recommends the acceptance of Child Development Grant Funds to continue "A Child's Place" licensed after school program. This program is supported by grant funds and parent fees.

DISCUSSION

The focus of the grant submitted by the City of Moreno Valley Parks and Community Services Department was based on the high demands assessed by the department within its own programs. This included the need for after school care during the traditional school year and full day care on school vacation days. The program utilizes five elementary schools: Creekside, Sunnymead, Rainbow Ridge, and Armada during the school year and Red Maple during school breaks. A Child's Place is for low-income parents working or going to school and accommodates up to 142 children between the ages of kindergarten through 12 years of age.

A Child's Place is state licensed and operates under the following conditions. The healthy social and emotional development of every child is addressed by providing activities, schedules, materials, and equipment to ensure that children are both challenged and successful. Programming for the students includes a nutritious snack served daily, arts and crafts, indoor and outdoor games, story time, homework time, and social time. The program also includes field trips with bus transportation, parent conferences, and special parenting classes and programs with topics including health issues, substance abuse, nutrition, personal safety, community awareness, literacy, and more. The program works closely with parents and school site staff to incorporate applicable school rules into the program and provide emotional support for children.

A Child's Place operates at schools utilizing the "modified traditional" school schedule between the hours of 2:00 p.m. and 6:00 p.m. on school days and 7:00 a.m. to 6:00 p.m. on school vacation days, Monday through Friday.

As part of the City's policy, the City Council must formally accept this funding from the California Department of Education, Child Development Services and adopt the corresponding resolution.

ALTERNATIVES

1. Authorize the Board to accept grant monies in the amount of \$561,056 for FY 2014/2015 from the California Department of Education, Child Development Division for the purpose of providing school age child care and development services; and approve the proposed resolution to certify the approval of the governing board to enter into this transaction with the California Department of Education for the purpose of providing school age child care and development services.
2. Do not accept grant funding and eliminate the Child Care Grant Program.

FISCAL IMPACT

The proposed grant funds program expenditures are on a cost reimbursement basis. The grant funds as well as food program revenue and program fees are used for providing school age child care and development services and are restricted to this

program. There is no impact to the General Fund. A budget adjustment to increase revenue to grant award amount will be done. Expenditures are budgeted in the FY 2014-2015 Operating Budget (2201-50-58-75011).

Description	Fund	GL Account No.	Type (Rev/Exp)	FY 14/15 Budget	Proposed Adjustments	FY 14/15 Amended Budget
Receipt of Grant	Child Care	2201-50-58-75011-486000	Rev	\$547,461	\$13,595	\$561,056

Report to City Council

TO: Mayor and City Council and Mayor and City Council acting in the capacity of Chairperson and Commissioners of the Moreno Valley Housing Authority

FROM: Ahmad R. Ansari, P.E., Public Works Director/City Engineer

AGENDA DATE: August 26, 2014

TITLE: PA13-0045 (TR 36598) – APPROVE FINAL MAP AND ACCEPT THE AGREEMENT AND SECURITY FOR PUBLIC IMPROVEMENTS. DEVELOPER – HABITAT FOR HUMANITY RIVERSIDE, INC., A CALIFORNIA NON-PROFIT PUBLIC BENEFIT CORPORATION, RIVERSIDE, CA, 92507

RECOMMENDED ACTION

Recommendations:

1. Approve Final Map for PA13-0045, authorize the City Clerk to sign the map and transmit said map to the County Recorder’s Office for recordation.
2. Authorize the Executive Director of the Moreno Valley Housing Authority to sign the map.
3. Accept the Agreement and Security for Public Improvements for Habitat for Humanity Riverside, Inc., a California non-profit corporation.
4. Authorize the Mayor to execute the Agreement.
5. Direct the City Clerk to forward the signed Agreement to the County Recorder’s Office for recordation.
6. Authorize the City Engineer to execute any future time extension amendments to the agreement, subject to City Attorney approval, if the required public

improvements are not completed within said timeframe.

SUMMARY

This report recommends approval of the agreement by the City of Moreno Valley and Habitat for Humanity Riverside, Inc., a California non-profit corporation, to construct the required public improvements that are located on the south side of Myers Avenue between Heacock Street and Indian Street. The project is funded by Habitat for Humanity Riverside, Inc.

DISCUSSION

On December 12, 2013, the Planning Commission of the City of Moreno Valley approved Tentative Tract Map No. 36598 (PA13-0045) and Variance (P13-125). The developer proposes to subdivide 1.36-gross acres and construct eight residential single-family lots. The project site is located on the south side of Myers Avenue between Heacock Street and Indian Street.

Habitat for Humanity Riverside, Inc., the developer of this project, has completed an Agreement for Public Improvements. The developer agrees to perform and complete all of the required public improvements within twenty-four (24) months of the date the agreement is executed. The public improvements include, but are not limited to: asphalt, base, curb, gutter, sidewalk, driveway approaches, street lights, striping, signage, water and sewer, and storm drain facilities. The City Engineer may execute any future amendments to the agreement, subject to City Attorney approval, if the required public improvements are not completed within said timeframe.

Tract Map No. 36598 is in substantial conformance with the approved tentative map. The developer has requested that the map be approved for recordation. The Conditions of Approval for this project require that the developer provide surety for the required improvements. Public improvements are to be constructed along the south side of Myers Avenue between Heacock Street and Indian Street.

Accompanying the agreement is a Faithful Performance bond in the amount of \$630,000 and a Material and Labor bond in the amount of \$315,000 issued by SureTec Insurance Company.

The subject property was originally a City of Moreno Valley Redevelopment Agency (RDA) property and was transferred to the Housing Authority as a result of the dissolution of the RDA. The property has been conveyed to Habitat for Humanity for the development of affordable housing. A Deed of Trust was recorded against the property and the Housing Authority remains as a beneficiary of the Deed of Trust. As the holder of beneficial interests, the Housing Authority is required sign the final map pursuant to Government Code 66436.

FISCAL IMPACT

No fiscal impact is anticipated.

**AGREEMENT FOR PUBLIC IMPROVEMENTS
FOR
PROJECT NO. PA13-0045 (TR 36598)**

This Agreement, made and entered into by and between the City of Moreno Valley, State of California, hereinafter called City, and Habitat for Humanity Riverside, Inc., herein after called Developer, on the date the City signs this agreement.

WITNESSETH:

FIRST: Developer, for and in consideration of the approval by the City of the final map of that certain land division, or that certain other land development project, known as PA13-0045 (TR 36598) agrees, at Developer's own expense, to furnish all labor, equipment and material necessary, and within TWENTY-FOUR (24) months from the date this Agreement is executed, to perform and complete in a good and workmanlike manner, all of the required improvements in accordance with those improvement plans for said project which have been approved by the City Engineer, and are on file in the office of the City Engineer, and to do all work incidental thereto in accordance with the standards set forth in City ordinances and regulations, and pay all costs of engineering necessary in connection therewith, which are expressly made a part of this Agreement. All of the above required work shall be done under the inspection of and to the satisfaction of the City Engineer, and shall not be deemed complete until approved and accepted as complete by the City. Developer further agrees to guarantee the required improvements for a period of one year following acceptance by the City and during this one year period to repair and replace, to the satisfaction of the City Engineer, any defective work or labor done or defective materials furnished. Developer shall complete the improvements described in this paragraph pursuant to Section 66462, Government Code. Developer shall also complete any offsite improvements required as a condition of approval and with plans approved by the City Engineer at such time as the City acquires an interest in the land which will permit the improvements to be made, and the Developer waives the 120 day time limitation set forth in Section 66462.5, Government Code.

Security to guarantee the performance of this agreement shall be in the following amounts:

Faithful Performance security shall be in the sum of SIX HUNDRED THIRTY THOUSAND AND NO/100 Dollars (***\$630,000.00***). The estimated cost of said work and improvements, pursuant to the Preliminary Estimate of Cost labeled Exhibit A attached hereto.

Labor and Material security shall be in the sum of THREE HUNDRED FIFTEEN THOUSAND AND NO/100 Dollars (***\$315,000.00***). The estimated cost securing payment of labor and materials is fifty (50) percent of the total cost estimate of the improvements.

Developer further agrees to guarantee the required improvements for a period of one year following acceptance by the City and during this one year period to repair and replace, to the satisfaction of the City Engineer, any defective work or labor done or defective materials furnished. Upon entering the warranty period, the City shall retain ten percent of the original faithful performance security. Developer reserves the right to substitute the form of security, in accordance with the Moreno Valley Municipal Code, at any time during the term of this agreement, subject to approval of the City Engineer and City Attorney.

SECOND: Developer agrees to file with City, prior to the date this Agreement is executed, a good and sufficient improvement security in an amount not less than the estimated cost of the work and improvements for the faithful performance of the terms and conditions of this Agreement, and good and sufficient security for payment of labor and materials in the amount prescribed by City ordinances and regulations to secure the claims to which reference is made in Title 15 (commencing with Section 3082) of Part 4 of Division 3 of the Civil Code of the State of California. Developer agrees to renew each and every said bond or bonds with good and sufficient sureties or increase the amounts of said bond or bonds, or both, within ten (10) days after being notified by the City Engineer that the sureties or amounts are insufficient. Notwithstanding any other provision herein, if Developer fails to take such action as is necessary to comply with said notice, he shall be in default of this Agreement unless all required improvements are completed within ninety (90) days of the date on which

the City Engineer notified the Developer of the insufficiency of said bonds. Developer reserves the right to substitute the form of security in accordance with the City's Municipal Code at anytime during the term of this agreement, subject to approval by the City Engineer and City Attorney.

THIRD: Developer agrees to pay to the City the actual cost of such inspection of the works and improvements as may be required by the City Engineer. Developer further agrees that, if suit is brought upon this Agreement or any bond guaranteeing the completion of the required improvements, all costs and reasonable expenses and fees incurred by the City in successfully enforcing such obligations shall be paid by Developer and guaranteed by the surety in addition to the face amount of the security, including reasonable attorney's fees, and that, upon entry of judgment, such costs, expenses and fees shall be taxed as costs and included in any judgment rendered.

FOURTH: City shall not, nor shall any officer or employee of City, except for its or their sole negligence, be liable or responsible for any accident, loss or damage happening or occurring to the works specified in this Agreement prior to the completion and approval thereof, nor shall City or any officer or employee thereof, be liable for any persons or property injured by reason of the nature of the work, or by reason of the acts or omissions of Developer, his agents or employees, in the performance of the work, and all of said liabilities are assumed by Developer. Developer agrees to protect, defend and hold harmless City and the officers and employees thereof from all loss, liability or claim because of, or arising out of the acts or omissions of Developer, his agents and employees, in the performance of this Agreement, or arising out of the use of any patent or patented article in the performance of this Agreement.

FIFTH: The Developer hereby grants to the City and/or to any authorized agent or employee of the City, the irrevocable permission to enter upon the lands of the above-referenced land division for the purpose of completing the improvements. This permission shall terminate in the event that the Developer has completed the work within the time specified or any extension thereof granted by the City.

SIXTH: Developer agrees at all times, up to the completion and acceptance of the improvements by the City, to give good and adequate warning to the traveling public of each and every dangerous condition caused by the construction of the improvements, and to protect the traveling public from such defective or dangerous conditions. The Developer shall keep all traveled ways that are a part of, or affected by the construction of this project free and clear of mud, dirt and debris and shall provide twice monthly street sweeping service. A copy of the contract for street sweeping service shall be provided to the City. The Developer's obligation under this provision shall be secured by the bonds securing performance of this Agreement.

SEVENTH: The Developer, his agents and employees, shall give notice to the City Engineer at least 48 hours before beginning any work and shall furnish said City Engineer all reasonable facilities for obtaining full information with respect to the progress and manner of work.

EIGHTH: If the Developer, or his agents or employees, neglects, refuses, or fails to prosecute the work with such diligence as to insure its completion within the specified time, or within such extensions of time as have been granted by the City, or if the Developer violates, neglects, refuses, or fails to perform satisfactorily any of the provisions of the plans and specifications, he shall be in default of this Agreement and notice in writing of such default shall be served upon him. The City Council shall have the power, on recommendation by the City Engineer, to terminate all rights of the Developer because of such default. The determination by the City Engineer of the question as to whether any of the terms of the Agreement or specifications have been violated, or have not been performed satisfactorily, shall be conclusive upon the Developer, and any and all parties who may have any interest in the Agreement or any portion thereof. The foregoing provisions of this section shall be in addition to all other rights and remedies available to the City under law.

NINTH: It is further agreed by and between the parties hereto, including the surety or sureties on the bonds securing this Agreement that, in the event it is deemed necessary to extend the time of completion of the work contemplated to be done under this Agreement, extensions of time **may** be granted by the City from time to time, either at its own option, or upon request of Developer, and such extensions shall in no way affect the validity of this Agreement or release the surety or sureties on said bonds, Developer further agrees to maintain the aforesaid bonds in full force and effect during the terms of this Agreement, including any extensions of time as may be granted therein.

TENTH: It is understood and agreed by the parties hereto that if any part, term or provision of this Agreement is by the courts held to be unlawful and void, the validity of the remaining portions shall not be affected and the rights and obligations of the parties shall be construed and enforced as if the Agreement did not contain the particular part, term or provision held to be invalid.

ELEVENTH: Any notice or notices required or permitted to be given pursuant to this Agreement shall be served on the other party by mail, postage prepaid, at the following addresses:

WHEREAS, the City Council of the City of Moreno Valley, County of Riverside, State of California, and **HABITAT FOR HUMANITY RIVERSIDE, INC.,** (hereinafter designated as "Principal") have entered into, or are about to enter into the attached agreement whereby Principal agrees to install and complete the above-designated public improvements, relating to **PA13-0045 (TR 36598)**, which agreement is hereby referred to and made a part hereof; and,

WHEREAS, said principal is required under the terms of said agreement to furnish bond for the faithful performance of said agreement;

NOW, THEREFORE, we the Principal, and SureTec Insurance Company, as Surety, are held and firmly bound to the City of Moreno Valley in the penal sum of **SIX HUNDRED THIRTY THOUSAND AND NO/100** Dollars (*****\$630,000.00*****), lawful money of the United States, for the payment of which sum will and truly to be made, we bind ourselves, our heirs, successors, executors and administrator, jointly and severally, firmly by these presents.

The condition of this obligation is such that if the above bonded Principal, his or its heirs, executors, administrators, successors, or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and provisions in the said agreement and any alteration thereof made as therein provided, on his or specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless the City of Moreno Valley, its officers, agents and employees, as therein stipulated, then this obligation shall become null and void; otherwise, it shall be and remain in full force and effect.

As part of the obligation secured hereby, and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees, including reasonable attorney's fees, incurred by City in successfully enforcing such obligation, all to be taxed as costs and included in any judgment rendered.

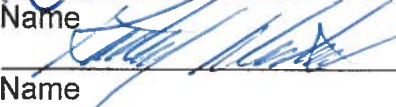

FAITHFUL PERFORMANCE BOND (Page 2 of 2)
PROJECT NO. PA13-0045 (TR 36598)

The surety hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the agreement or to the work to be performed thereunder or the specifications accompanying the same shall in anywise affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the agreement or to the work or to the specifications. Surety further stipulates and agrees that the provisions of Section 2845 of the Civil Code are not a condition precedent to Surety's obligations hereunder and are hereby waived by Surety.

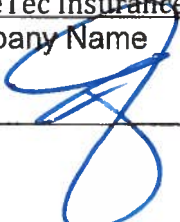

When the work covered by the agreement is complete, the City Council of the City of Moreno Valley will accept the work and thereupon the amount of the obligation of this bond is reduced by 90%, with the remaining 10% held as security for the one-year maintenance period provided for in the agreement(s).

IN WITNESS WHEREOF, this instrument has been duly executed by the Principal and Surety above named on August 13, 2014.

COUNTERPART NO. 1 OF 1

POA #: 510018

SureTec Insurance Company

LIMITED POWER OF ATTORNEY

Know All Men by These Presents, That SURETEC INSURANCE COMPANY (the "Company"), a corporation duly organized and existing under the laws of the State of Texas, and having its principal office in Houston, Harris County, Texas, does by these presents make, constitute and appoint

Kenneth A. Coate, Julia B. Gladding

its true and lawful Attorney-in-fact, with full power and authority hereby conferred in its name, place and stead, to execute, acknowledge and deliver any and all bonds, recognizances, undertakings or other instruments or contracts of suretyship to include waivers to the conditions of contracts and consents of surety for:

Five Million and 00/100 Dollars (\$5,000,000.00)

and to bind the Company thereby as fully and to the same extent as if such bond were signed by the President, sealed with the corporate seal of the Company and duly attested by its Secretary, hereby ratifying and confirming all that the said Attorney-in-Fact may do in the premises. Said appointment shall continue in force until 10/31/2015 and is made under and by authority of the following resolutions of the Board of Directors of the SureTec Insurance Company:

Be it Resolved, that the President, any Vice-President, any Assistant Vice-President, any Secretary or any Assistant Secretary shall be and is hereby vested with full power and authority to appoint any one or more suitable persons as Attorney(s)-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and of behalf of the Company, to execute, acknowledge and deliver, any and all bonds, recognizances, contracts, agreements or indemnity and other conditional or obligatory undertakings and any and all notices and documents canceling or terminating the Company's liability thereunder, and any such instruments so executed by any such Attorney-in-Fact shall be binding upon the Company as if signed by the President and sealed and effected by the Corporate Secretary.

Be it Resolved, that the signature of any authorized officer and seal of the Company heretofore or hereafter affixed to any power of attorney or any certificate relating thereto by facsimile, and any power of attorney or certificate bearing facsimile signature or facsimile seal shall be valid and binding upon the Company with respect to any bond or undertaking to which it is attached. (Adopted at a meeting held on 20th of April, 1999.)

In Witness Whereof, SURETEC INSURANCE COMPANY has caused these presents to be signed by its President, and its corporate seal to be hereto affixed this 21st day of March, A.D. 2013.

WHEREAS, the City Council of the City of Moreno Valley, County of Riverside, State of California, and **HABITAT FOR HUMANITY RIVERSIDE, INC.,** (hereinafter designated as "Principal") have entered into, or are about to enter into the attached agreement whereby Principal agrees to install and complete the above-designated public improvements, relating to **PA13-0045 (TR 36598)**, which agreement is hereby referred to and made a part hereof; and,

WHEREAS, under the terms of said agreement, principal is required before entering upon the performance of the work, to file a good and sufficient payment bond with the City of Moreno Valley to secure the claims to which reference is made in Title 3 (commencing with Section 9000) of Part 6 of Division 4 of the Civil Code of the State of California.

NOW, THEREFORE, we the Principal, and the undersigned as corporate Surety, are held and firmly bound unto the City of Moreno Valley and all contractors, subcontractors, laborers, material persons and other persons employed in the performance of the aforesaid agreement and referred to in the aforesaid Civil Code in the sum of **THREE HUNDRED FIFTEEN THOUSAND AND NO/100** Dollars (*****\$315,000.00*****), lawful money of the United States, for materials furnished or labor thereon of any kind, or for amounts due under the Unemployment Insurance Act with respect to such work or labor, that said Surety will pay the same in an amount not exceeding the amount hereinabove set forth, also in case suit is brought upon this bond, will pay, in addition to the face amount hereof, costs and reasonable expenses and fees, including reasonable attorney's fees, incurred by City in successfully enforcing such obligation, to be awarded and fixed by the court, and to be taxed as costs and to be included in the judgement therein rendered.

It is hereby expressly stipulated and agreed that this bond shall inure to the benefit of any and all persons, companies and corporations entitled to file claims under Title 3 (commencing with Section 9000) of Part 6 of Division 4 of the Civil Code, so as to give a right of action to them or their assigns in any suit brought upon this bond.

MATERIAL AND LABOR BOND (Page 2 of 2)
PROJECT NO. PA13-0045 (TR 36598)

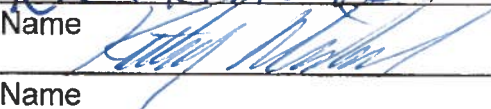

Should the condition of this bond be fully performed, then this obligation shall become null and void, otherwise it shall be and remain in full force and effect.

The Surety hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the agreement or the specifications accompanying the same shall in any manner affect its obligation on this bond, and it does hereby waive notice of any such change, extension, alteration or addition. Surety further stipulates and agrees that the provision of Section 2845 of the Civil Code are not a condition precedent to the Surety's obligations hereunder and hereby waived by the Surety.

In witness whereof, this instrument has been duly executed by the Principal and Surety above named, on August 13, 2014.

**MINUTES – REGULAR MEETING OF JULY 8, 2014
(Report of: City Clerk Department)**

Recommendation: Approve as submitted.

SEE AGENDA ITEM A.2

This page intentionally left blank.

APPROVALS	
BUDGET OFFICER	<i>me</i>
CITY ATTORNEY	<i>SMB</i>
CITY MANAGER	<i>d</i>

Report to City Council

TO: Mayor and City Council

FROM: Rick Teichert, Chief Financial Officer

AGENDA DATE: August 26, 2014

TITLE: PUBLIC HEARING TO ADOPT SUBSTANTIAL AMENDMENT #1 TO THE 2014-15 ANNUAL ACTION PLAN AFFECTING THE HOME PROGRAM AND ADDING THE EMERGENCY SOLUTIONS GRANT (ESG) TO MORENO VALLEY'S CONSOLIDATED PLAN

RECOMMENDED ACTION

Recommendations: That the City Council:

1. Conduct a Public Hearing to allow public comment on the proposed Substantial Amendment, ESG and HOME.
2. Review and adopt the proposed Substantial Amendment to the FY 2014/15 Annual Action Plan.
3. Approve the necessary Revenue and Expense Appropriations and authorize the Chief Financial Officer to process the adjustments.
4. Authorize the City Manager to reallocate grant funds between HUD-approved grant activities and to execute the necessary agreements for approved grant activities.

SUMMARY

This report asks City Council to conduct a Public Hearing and consider staff recommendations to approve an amendment to the 2014/15 Annual Action Plan that would:

- Add an Emergency Solutions Grant (ESG) preliminary program to the City's consolidated planning documents; and

- Increase the budget of one HOME activity in order to better meet upcoming HOME commitment deadlines.

DISCUSSION

As a recipient of federal grant funding, the City of Moreno Valley is mandated to complete a five-year Consolidated Plan and an Annual Action Plan update that details the use of its grant funds. In cases where a Plan needs to be updated because an activity is added, removed, or experiencing a 20% change in scope or budget, cities must notify its citizens of the proposed changes and provide them the opportunity to comment. A Public Hearing must also be held before the amendment is forwarded to the Department of Housing and Urban Development (HUD) for review and final approval.

On May 6, 2014, the Moreno Valley City Council approved the FY 2014/15 Annual Action Plan and within it awarded allocations to thirty-one CDBG projects and three HOME projects and no ESG activities as a proposed program was still under development.

This report proposes a two-part substantial amendment:

1. EMERGENCY SOLUTIONS GRANT (ESG)

The first part of this amendment requests that Council approve the preliminary ESG program for addition into the 2014/15 Annual Action Plan and corresponding consolidated planning documents. The Emergency Solutions Grant (ESG), under the HEARTH Act of 2009, provides for grants to assist, protect, and improve living conditions of the area's homeless. In 2013, changing census demographics caused Moreno Valley to become eligible for this formula grant for the first time in its history.

HUD has allocated a total of \$291,170 to the City of Moreno Valley to establish an ESG program; 2013 award of \$135,581 and 2014 award of \$155,589. This grant must be used to rapidly re-house homeless and/or assists households that are at risk of becoming homeless¹. To officially secure the allocation, HUD has asked the City to adopt a Substantial Amendment, complete the program certifications and specific requirements (Attachment A), and submit it to the HUD office.

ESG funds may be utilized for these program categories: (1) street outreach, (2) emergency shelter, (3) homelessness prevention, (4) rapid re-housing assistance, and (5) toward managing the Homeless Management Information System (HMIS); as well as administrative activities (administrative activities are capped at 7.5% of a recipient's allocation).

¹ Participants must meet the HUD definition of 'homeless' or 'at risk of homelessness' as provided in 24 CFR Part 576.2

The ESG regulation was revised in 2012 to allow the homeless prevention and rapid re-housing activities of the Homelessness Prevention and Rapid Re-housing Program (HPRP) to continue under the new ESG. Because Moreno Valley managed a successful HPRP program from 2009-2012, staff would like to continue that precedence and recommend the most successful activities from the HPRP be repeated under the ESG program. The use of the anticipated \$291,170 of ESG funding is proposed as follows:

- Administration (7.5% limit) - \$21,837
- Homeless Management Information System (HMIS) - \$5,000
- Homeless Prevention and Rapid Re-housing Activities - \$264,333

Administration

A maximum of 7.5% percent of the ESG grant (\$21,837) shall be reserved for grant planning and management of subgrantees. Staff proposes to implement the ESG grant through local social service providers that serve Moreno Valley residents. Appropriate governmental and/or non-profit organizations will be selected to distribute the ESG funds to program participants and track participant progress towards regaining housing stability.

Homeless Management Information System (HMIS)

ESG grantees/subgrantees are required to use this Federal on-line system to register all clients, track services provided, as well as complete reporting. HMIS is maintained by the County of Riverside, Homeless Services Unit as part of their Continuum of Care (CoC) duties. ESG funding is eligible to pay for the costs maintaining this system. Examples of eligible costs are: purchasing software licenses, paying for electricity and high speed data transmission, and HMIS training.

Homeless Prevention and Rapid Re-housing Activities

Based on the high demand experienced under the HPRP program and the high priority placed on these activities both at the City and County level, it is proposed that the Council consider allocating the majority of the ESG funding to the eligible activities under this category. Component services generally consist of short-term and medium-term rental assistance and rental arrears. These forms of assistance were offered under the City HPRP program and again, staff recommends the ESG program be modeled using the most successful HPRP activities.

ESG - Proposed Homeless Prevention and Rapid Re-housing Activities	
Monthly Rental Assistance	Rental assistance will provide participants with a rental subsidy for 1 up to 6 months as determined by a case manager. In general, assisted families will pay no more than 30% of their income toward rent.
Rental Arrears Assistance	Participants may pursue up to \$2,000 in assistance to cover rental arrears. Participants must prove a hardship that prevented them from paying the rent. They must also show the financial resources to continue regular rent payments once assistance is received.

ANTICIPATED ESG PROGRAM SCHEDULE

Submittal of ESG Substantial Amendment to HUD	August 28, 2014
HUD execution of ESG Grant Agreement	September 30, 2014
180-day deadline to obligate funds to subgrantees	March 30, 2015
24-month deadline to expend ESG funds	September 30, 2016

At the time this report was submitted, Staff was in the process of completing the required consultation with the area's Continuum of Care, as well as attaining feedback from Moreno Valley's HUD representative, and the general public. Should the input collected lead staff to modify the recommendations, Council will be updated verbally during the August 26, 2014 City Council meeting.

2. MOBILE HOME GRANT PROGRAM FUNDED BY HOME:

The second part of the Substantial Amendment requests an increase to the budget of an already-approved HOME activity known as the "Brush with Kindness Critical Home Repair" mobile home grant program. The amendment proposes to increase the original budget from \$78,000 to \$120,000 and allow for repair of 8 units at a per-unit subsidy amount of \$15,000. This program is to be administered in partnership with Habitat for Humanity, Riverside. The increase will allow staff to more fully address health, code, safety, and accessibility issues of homes occupied by low-income owners. The change would also allow the City to meet an upcoming HOME commitment deadline.

ALTERNATIVES

1. Adopt Substantial Amendment to the FY 14/15 Annual Action Plan; approve the Revenue and Expense Appropriations and authorize the Chief Financial Officer to process the adjustments; and authorize the City Manager to reallocate grant funds between HUD-approved grant activities and to execute the necessary agreements for approved grant activities. **Staff recommends this action because it complies with HUD's substantial amendment requirements, adheres to the mandatory administrative caps, and would allow for the City to better meet the required expenditure goals for the HOME and ESG grants.**
2. **DO NOT** Adopt Substantial Amendment to the FY 14/15 Annual Action Plan; approve the Revenue and Expense Appropriations and authorize the Chief Financial Officer to process the adjustments; and authorize the City Manager to reallocate grant funds between HUD-approved grant activities and to execute the necessary agreements for approved grant activities. **Staff does not recommend this action because it prevents the City from complying with HUD's substantial amendment requirements and meeting the required expenditure goals for the HOME and ESG grants.**

FISCAL IMPACT

The recommended actions to the ESG and HOME programs pose **NO FISCAL IMPACT TO THE GENERAL FUND**. The proposed HOME project will be funded with past year HOME project savings and ESG with brand new entitlement funding. The Emergency Solution Grant program has a mandatory 100% match requirement that the City shall request its ESG subgrantees to fulfill as a dollar for dollar match or with in-kind services. Per federal law, these funds are to be used solely for designated activities. The Revenue/Expenditure Appropriations and Budget Adjustments are expected to be as follows:

ESG Budget and Revenue/Expenditure Appropriations

Description	Fund	GL Account No.	Type (Rev/Exp)	FY 14/15	Proposed Adjustments	FYs 14/15 Amended Budgets
Receipt of Grant	ESG	2300-30-33-72751-485000	REV	\$0	\$291,170	\$291,170

CITY COUNCIL GOALS

Approval of the proposed substantial amendments will assist to uphold four of the six pre-established City Council Goals.

POSITIVE ENVIRONMENT

Create a positive environment for the development of Moreno Valley's future.

COMMUNITY, IMAGE, NEIGHBORHOOD PRIDE & CLEANLINESS

Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

REVENUE DIVERSIFICATION AND PRESERVATION. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

PUBLIC SAFETY

Activities will directly or indirectly help to provide a secure environment for individuals in the community.

NOTIFICATION

Notice of this meeting and announcement of Public Comment Period was originally posted via the City Clerk's office to various City satellite offices and published in the Press-Enterprise newspaper on July 25, 2014. The official 30-day public review period occurred from July 25, 2014 through August 25, 2014. Respondents were given the opportunity to provide comments via email, telephone, and walk-in.

SECTION 1: GENERAL PROGRAM OVERVIEW

INTRODUCTION

The Department of Housing & Urban Development (HUD) issues Emergency Shelter Grant (ESG) grants to assist, protect, and improve living conditions for the homeless.

Specifically the ESG program provides funding to:

- Rapidly re-house homeless individuals and families;
- Prevent families and individuals from becoming homeless;
- Engage homeless individuals and families living on the street;
- Improve the number and quality of emergency shelters for homeless individuals and families;
- Help operate these shelters; and
- Provide essential services to shelter residents.

ESG funds may be utilized for the following categories:

- § street outreach,
- § emergency shelter,
- § homelessness prevention,
- § rapid re-housing assistance, and
- § toward managing the Homeless Management Information System (HMIS);
- § as well as administrative activities (administrative activities are capped at 7.5% of a recipient's allocation).

In 2013 when HUD announced its allocations of grants to entitlement cities nationwide, the City of Moreno Valley was awarded its first Emergency Shelter Grant (ESG) in its history. HUD awarded the City \$135,581 in funds to provide homeless assistance. The following year HUD announced the City was allotted a second allocation of \$155,589 bringing the City's total ESG allocation for 2013 and 2014 to \$291,170.

The City is tasked with implementing a new, full ESG program focused on homeless prevention services that best meet the needs of its homeless/at-risk population and the programs federal requirements, 24 CFR Part 91 and 576.

SF-424 & CERTIFICATIONS
(BEHIND THIS PAGE)

ESG BACKGROUND

The Emergency Solutions Grant (ESG) started as the Emergency *Shelters* Grant under the Homeless Emergency Assistance and Rapid Transition to Housing (HEARTH) Act of 2009. In 2012, HUD revised regulations based on lessons learned from the Homeless Prevention and Rapid Re-Housing Program (HPRP) funding under Title XII of the American Recovery and Reinvestment Act (ARRA) also of 2009. The revision changed the name of the grant program along with its overall focus from addressing only the needs of the people in emergency or transitional shelters to assisting people to quickly regain stability in permanent housing after experiencing a housing crisis and/or homelessness. It basically allowed the homeless prevention and rapid re-housing activities of HPRP to continue under the new ESG.

Announcement of award of the Moreno Valley's first ESG award came in March 2013. The City was advised that along with its Community Development Block Grant (CDBG) and HOME Investment Partnership (HOME grant), changing census demographics caused MV to become automatically eligible for an ESG entitlement grant. The announcement came as the City was in the process of constructing its 2013 Action Plan. Because the announcement was so new the City did not have sufficient time to create and implement the new program in time to include it in the 2013 Action Plan. The HUD Los Angeles Field Office authorized the City to move forward with its existing Consolidated Planning Programs while it developed its new ESG program. In 2014, along with the announcement of the CDBG and HOME entitlement grants the City was issued a second ESG allocation in the amount of \$155,589 bringing the City's total ESG allocation for 2013 and 2014 to \$291,170. The City is now working with HUD to amend the ESG program into all current City Consolidated Planning documents.

SECTION 2: FORMING MORENO VALLEY'S ESG PROGRAM

DESCRIPTION OF RIVERSIDE COUNTY CONTINUUM OF CARE (COC)

The McKinney-Veto Homeless Assistance Act requires that communities operate a Continuum of Care (CoC) program designed to assist homeless persons with housing and/or services with the ultimate goal of long term stability. Riverside County's Department of Public Social Services (DPSS) has been the lead agency in coordinating the area's CoC including securing membership and ensuring that CoC's various legal responsibilities are met. Current members include the County, various entitlement cities, non-profit/service providers, homeless persons, and members of the public.

As a collaborative, the group must assess the needs of the area's homeless and affordable housing needs then develop a regional plan to address them. They also promote a community-wide commitment to ending homelessness, provide for funding for local efforts to address homelessness, and promote effective use of mainstream programs, including designing and operating a software system called the Homeless Management Information System (HMIS) intended to minimize duplication of services. The CoC has a Board of Governance, an 'All County' Group, and six very active subcommittees who each meet monthly and work toward the common goal.

AREA HOMELESS STATISTICS

The Riverside County Department of Public Social Services (DPSS) serves as the lead agency for the areas Continuum of Care (CoC). Moreno Valley is a very active member of the CoC. As part of the planning process, DPSS conducts a homeless census and survey biannually. The census consists of a one day "point-in-time count" (PIT) of homeless persons countywide. Moreno Valley City staff participate in the PIT counts conducted by the County.

Three years ago, the 2011 PIT homeless count found a total of 6,203 homeless (sheltered and unsheltered) individuals throughout the County. In 2011 there were a total of 237 homeless individuals counted in the City of Moreno Valley. This number is significantly higher than the 2009 count which showed 28 homeless individuals. The 2009 and 2011 counts were conducted utilizing a significantly different count methodology however, and the 2011 Count is not widely accepted as valid.

The most recent census/survey was conducted in 2013¹. The latest PIT data counted a total of 2,978 sheltered and unsheltered homeless individuals (adults and children) Countywide. Of these, 1,888 (63%) were unsheltered. The largest subpopulation of the unsheltered persons

¹ A detailed report, *The Riverside County 2013 Homeless Count and Subpopulation Survey*, can be obtained on the Continuum of Care's website at <http://endhomeless.info/reports.asp>.

counted were single individuals (totaling 1644), followed by chronically homeless persons (totaling 995).

The PIT data reported 50 unsheltered homeless persons in the City of Moreno Valley. Of those, the largest subpopulation were 'single adults' (totaling 48), followed by 'men' (totaling 40).

It is important to note that references found within the report indicate that the "annual estimates" of homeless persons in a jurisdiction are likely to be anywhere from three to six times as high as point-in-time (PIT) estimates.²

AREA HOMELESS PRIORITIES

County Priorities

The County of Riverside's Continuum of Care has established a 10-Year Plan to End Homelessness that provides 11 key recommendations for implementation that would significantly reduce homelessness in Riverside County. The plan focuses on the following activities: Strengthening Homeless Prevention Efforts; Expanding Existing Homeless Services; Ending Chronic Homelessness; and Developing Affordable Housing.

1. Homeless Prevention - each jurisdiction within the County will implement a centralized homeless prevention program. Households at-risk of becoming homeless will be eligible to receive a wide-range of supplemental resources available under "one roof" in order to maintain their housing.
2. Discharge Planning - establish county-wide protocols and procedures to prevent people from being discharged from public and private institutions into homelessness and decrease the number of persons being discharged into homelessness by at least 10% annually.
3. Street Outreach - expand street outreach programs in order to bring social services directly to chronically homeless persons in a more "assertive" way in order decrease the number of chronic homeless individuals each year by at least 10% and help prevent additional persons from living on the streets.
4. Emergency Shelter Beds - create 150 additional shelter beds, spread out throughout the County, for individuals living on the streets and require participation in a case management plan as a condition of admission.
5. Transitional Housing Beds - create 75 additional transitional housing units consisting of 225 beds to serve families who are living on the streets and require participation in a case management plan as a condition of admission.
6. Permanent Supportive Housing - create at least 100 beds or units of permanent supportive housing for chronic homeless persons annually for the next five (5) years for a total of 500 units.

² Based on the publication "Estimating the Need" by the Corporation for Supportive Housing, page 4 of the 2013 PIT report.

7. Permanent Affordable Housing - develop 1,500 units of permanent affordable housing for low-income families and individuals.
8. HMIS - engage full participation from all emergency shelter, transitional housing, permanent supportive housing and related supportive service programs in the County of Riverside Homeless Management Information System.
9. Strengthen Linkages to Mainstream Resources - create a streamlined benefits application system featuring a single application process for multiple programs in order to expedite enrollment and access to available resources for homeless and at-risk homeless individuals and families.
10. A Housing Trust Fund - create a Housing Trust Fund that receives an ongoing dedicated source(s) of public funding to support the production and preservation of affordable housing.
11. Inclusionary Housing Practices - encourage Riverside County and local jurisdictions to explore inclusionary housing practices that promote housing creation with incentives such as zoning bonuses, expedited permits, reduced fees, cash subsidies, or other enticements for developers who build affordable housing for homeless individuals and families.

City Priorities

In line with the HUD requirements and County priorities, the City has developed its own comprehensive Homeless Strategy that involves reaching out to homeless persons, assessing and addressing their individual emergency/ housing needs through a variety of mechanisms including but not limited to the County Mental Health Homeless Intervention Team (HIT) and by way of partnership with various service providers, including local shelters.

The City is providing CDBG funding to organizations to assist the homeless:

- Community Assistance Program (Food Distribution)
- Lutheran Social Services (Transitional Living Program)
- PW Enhancement Center (Emergency Motel Vouchers)
- Operation Safehouse (Emergency Youth Shelter)
- Alternatives to Domestic Violence (Emergency Shelter)
- Path of Life Shelter (Emergency and Transitional Housing).

These public service providers assist homeless persons with food distribution, counseling, or emergency voucher programs are often the primary source for referrals and assistance to homeless persons. Lutheran Social Services and Path of Life provide their participants with long term shelter under their transitional living programs but also assist those threatened with homelessness by providing referrals and coordinating with other agencies to locate assistance for the families or individuals. Alternatives to Domestic Violence provides emergency shelter to persons who flee their homes due to domestic violence situations and Operation Safehouse,

which houses runaway or endangered youth in various circumstances; providing a safe haven for children therefore keeping them off the streets.

The City’s performance goals under the Homeless Strategy for the 5 year Consolidated Planning Cycle 2013-18 are summarized in the table below.

Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Goal/ Performance Indicator
Homeless Strategy	2013	2018	Homeless	City-wide	Homeless	Provide 2250 Homeless Person Overnight Shelter: Provide 250 Persons with Homelessness Prevention

CITIZEN PARTICIPATION

In accordance with City’s Citizen Participation Plan, whenever there is a change to the City’s Consolidated Plan and Action Plans that was not originally included in the version approved by Council, whether an addition, deletion, change in location, or 20% change in scope or budget, a ‘substantial amendment’ must be completed. This process is intended to keep the public informed and able to comment on the projects and activities funded by Federal monies.

The City’s Citizen Participation Plan that there must be reasonable notice of a proposed Substantial Amendment so that residents will have an opportunity to review it and comment on it including notice of a hearing 30 days before one occurs, a written description of the changes need to be made available to the public, and careful consideration must be given to all comments and views expressed by the public, whether given as verbal testimony at the Public Hearing or submitted in writing during the review and comment period.

The City of Moreno Valley published a notice a notice of Substantial Amendment in the *Press Enterprise*, a newspaper of general circulation (see Attachment A). The public notice was also placed on the City of Moreno Valley internet at www.moval.org to inform citizens and other interested parties that the City intended to substantially amend its 2013-2018 Consolidated Plan and Annual Action Plan(s) 2013 and 2014. The public notice also provided information about the following:

1. A brief description of the City’s ESG;
2. Proposed budget allocations;
3. The 30-day comment period and procedure for submitting comments; and
4. The time and location of the City Council meeting where the ESG Substantial Amendment will be considered for approval.

On August 26, 2014, the City of Moreno Valley City Council, at their regular 6:00 P.M. meeting, _____ the Substantial Amendment to receive HUD's ESG program funding.

Comments from attendees including members of the public are included as Attachment B.

CONSULTATION WITH COC

The City of Moreno Valley is a participant in the Riverside County CoC. When the City was first made aware that it was awarded ESG funding it took multiple steps to ensure it became informed of allowable grant uses and requirements. Moreno Valley staff communicated about timelines and technical assistance with HUD staff, heavily researched ESG regulation, formed an internal city group/committee with members of the City Manager's office to discuss the City's homeless issues and needs.

Initially, based on feedback collected during Community Meetings hosted by Mayor Tom Ownings, staff began to explore the possibility of developing a 'Homeless Drop-In Center' in Moreno Valley utilizing the ESG funding. The City reached out to other Continuum of Care members to discuss this concept and to view/tour existing centers. MV staff met with Riverside City and County staff to visit 2 of the buildings within their 'one-stop multi-service campus' located on the cul-de-sac at Hulen Place. On October 22, 2013 MV staff toured 'The Place' which is a safe center that provides supportive services to the chronically homeless such as referrals, food, access to showers, and laundry facilities. On December 17, 2013, staff toured the 'Access Center' which provides a multitude of services to the City's homeless ranging from computer resources, health care, life skills, counseling, referrals, to many other stabilization services.

On November 19, 2013 Moreno Valley met with the Administrative Services Manager II of the Homeless Programs Unit for Riverside County Department of Social Services to consult on the one stop concept and potential funding strategies and challenges. Also, at staff's request, the DPSS Deputy Director for the Department of Mental Health provided Moreno Valley with cost projections based around the operational budget for 'The Place' to help the City further evaluate whether a drop-in center would be feasible for MV.

In early 2014, Moreno Valley staff concluded that the Center would be a positive long-term project, but found that additional funding resources would be needed in addition to the ESG funding in order to leverage a drop-in center. The mandated limits on the amount of ESG funding that can be applied toward shelter operations (60% of an annual allocation) disallow for the use of the full grant toward the center therefore ESG alone would only cover a fraction of the overall costs. The fact that a potential site had/has not been identified posed an additional challenge. The City would be required to take time to locate/identify a suitable site, gain all necessary approvals, and complete the acquisition. This represented a complex set of tasks that

are not conducive to the grant obligation and expenditure deadlines, therefore the City determined it needed to switch focus and explore other options.

The City has now determined a final proposed use for ESG monies and have initiated additional consultation with the CoC. In July, County CoC staff were provided with a copy of the Moreno Valley's Substantial Amendment for review and comment. The City specifically sought feedback on the potential sole source approach, subgrantee recommendations, and HMIS allocation. MV grant administrating staff anticipates the Substantial Amendment will be supported by the CoC.

PROPOSED ACTIVITIES, BUDGET, AND SCHEDULE

The anticipated \$291,170 (2013 award of \$135,581 and 2014 award of \$155,589) shall be used as follows:

- Administration (7.5% limit) - \$21,837
- Homeless Management Information System (HMIS) - \$5,000
- Homeless Prevention and Rapid Re-housing Activities - \$264,333

The City anticipates serving persons who meet the definition of homeless and/or at-risk of homelessness and estimates the ESG homeless prevention and rapid re-housing will serve 100 persons low income families avoid becoming homeless (HP) and help homeless persons transition to permanent housing (RR). The corresponding standard objective and outcome categories is Decent Housing/ Sustainability (DH3)

ANTICIPATED ESG PROGRAM SCHEDULE

ESG FY 2013 and 2014 funding must be fully expended within 24 months from the date HUD signs the ESG Grant Agreement. The City expects to follow the schedule below:

Submittal of ESG Substantial Amendment to HUD	August 28, 2014
HUD execution of ESG Grant Agreement	September 30, 2014
180-day deadline to obligate funds to subgrantees	March 30, 2015
24-month deadline to expend ESG funds	September 30, 2016

REASONS BEHIND ESG RECOMMENDATION

The City of Moreno Valley's recommendation for the ESG proposed set of activities is a result of evaluating community needs, Consolidated Planning strategies, and Continuum of Care long-term recommendations to end homelessness. When determining MV's future ESG activities, the City took into serious consideration that the Riverside County 10-year Strategy to End Homelessness' number one recommendation to counter the homeless issue which is 'homeless prevention.' Also, heavily considered was that fact that the Moreno Valley community has and continues to show a high demand for rental assistance. This was demonstrated by the success of the homelessness prevention and rental rehabilitation activities under the City's HPRP

program (2009-2012). Based on the high demand experienced under the HPRP program and the high priority placed on these activities both at the City and County level, the City is proposing set of ESG activities described in this amendment.

SECTION 3: PROGRAM SPECIFIC REQUIREMENTS

PROCESS FOR MAKING SUBAWARDS

HUD has indicated that it is critical for Moreno Valley to implement the new ESG program as soon as possible; therefore, the City would like to act immediately to contract, sole source, if at all possible with the Riverside County Economic Development Agency, Housing Division (EDA) to administer the Rapid Re-Housing (RR) and Homeless Prevention (HP) service ESG activities. This consideration is based on two main reasons: (1) the City is aware that EDA possesses the staffing capacity, knowledge and experience to effectively implement and administer the Homeless Prevention and Rapid Re-Housing activities; and (2) the selection of one qualified and capable organization is a much more efficient and effective process to implement the homeless prevention services and re-housing activities. The EDA Housing Division has prior experience in servicing homeless individuals and families and is an active member of the Riverside Continuum of Care. The Sole Source process will avoid any additional delay in program implementation in providing homelessness prevention and rapid re-housing activities/services.

Should the City be unable to partner with EDA, the City will maintain interest in entering into a direct sub-grant agreement with one or two agencies with the correct mix of experience and expertise to administer the proposed ESG activities, and is prepared to award funding through a competitive Request for Proposal (RFP) process. The applicants awarded through this RFP process will also be approved by City Council.

The ESG program permits funding for HMIS. The City acknowledges that HMIS is an important component of ESG and would like to allocate funding toward its operations. Because the Riverside County Department of Social Services (DPSS) is the lead agency and sole provider of HMIS services, DPSS is selected to receive funding for the local HMIS.

MATCH

The Emergency Solution Grant program has a mandatory 100% match requirement that can be met as a dollar for dollar match or with in-kind services. The City shall request its ESG subgrantees to provide the match with an equal amount of cash or in-kind services including, Federal, State, and Private Resources.

HOMELESS PARTICIPATION REQUIREMENT

The 'homeless requirement' under 24 CFR 576.405(a) and 91.220 (1)(4) (iv) indicates that the City's policy making entity must have at least one homeless or formerly homeless individual on its panel. The City's decision making entity is its City Council which consists of 5 elected officials. Staff is unable to confirm whether or not they were homeless at any point. The regulations offer that a City can also *specify a plan* for reaching out to homeless and formerly homeless

individuals to hear from their experiences what services would be most helpful in either preventing experiences of homelessness or assisting people who are literally homeless.

The Riverside County Continuum of Care (CoC) board is comprised of public and private agencies along *with community residents including homeless and formally homeless individuals*. The City proposes that the consultation with the CoC serve as the plan to meet the homeless participation requirement. The CoC was designed to assess the need for homeless and affordable housing services in the region and to develop and recommend a plan of action on behalf of at risk and homeless individuals and families.

WRITTEN STANDARDS FOR PROVISIONS OF ESG ASSISTANCE

Activities required under ESG, i.e, homeless prevention and rapid re-housing activities will be focused on housing stabilization, linking program participant to community resources and mainstream benefits, and helping them develop a plan for preventing future house instability. The City of Moreno Valley will work with (a) selected subgrantee(s) partner(s) to establish a clear process for determining the type, level, and duration of assistance for each program participant. The City will require the subgrantee(s) of the ESG allocation to establish and implement written standards for the ESG program prior to executing the grant contract with the City.

The written standards shall include:

1. Standard policies and procedures for evaluating individuals for evaluating individuals and families eligibility for assistance under ESG
2. Policies and procedures for determining and prioritizing which eligible families and individuals will receive homelessness prevention assistance and which eligible families and individuals will receive rapid re-housing assistance
3. Policies and procedures for coordination among emergency shelter providers, essential service providers, homelessness prevention and rapid re-housing assistance providers and mainstream service and housing providers
4. Standards for determining the share of rent and utilities cost that each program participant must pay, if any, while receiving homeless prevention and rapid re-housing assistance
5. Standards for determining how long a particular program participant will be provided with rental assistance and whether the amount of that assistance will adjusted over time
6. Standards for determining the type amount, and duration of housing stabilization and/or relocation services to provide a program participant, including the limits, if any, on the homelessness prevention or rapid re-housing assistance that each program participant may receive, such as the maximum amount of assistance, maximum number

of months the program participant receives assistance, or the maximum number of times the program participant may receive assistance.

PERFORMANCE STANDARDS

Being ESG is a brand new program Moreno Valley fully expects that the performance standards will evolve over time however, for the first year of implementation, the City plans to base its performance standards off lessons learned from the City's Homeless Prevention and Rapid Re-Housing program (HPRP). The City successfully closed out its HPRP program in 2012 and under it offered the same activities the proposed ESG program. The 2 programs are similar and the information is still recent and relevant.

1. Performance Measure for Rapid Re-Housing (RR)

The City would work with the ESG subgrantee(s) to establish targets to individuals and families who are literally homeless, meaning those who qualify under 24 CFR Part 576.2 paragraph (1) of the definition of homeless; To help homeless persons living on the streets , in an emergency shelter, or place not meant for human habitation transition into permanent housing and achieve stability in that housing.

The City is currently estimating that 50 persons will receive RR homeless prevention & rapid rehousing services.

2. Performance Measure for Homeless Prevention (HP)

The City would work with the ESG subgrantee(s) to establish a priority targeting those who are at imminent risk, or at risk, of homelessness, meaning those who qualify under 24 CFR Part 576.2, paragraph (2) and (3) of the homeless definition or those who qualify as at risk of homelessness individuals and families in a shelter or an unsheltered situation; To help such persons regain stability in their current housing or other permanent housing.

The City is currently estimating that 50 persons will receive HP homeless prevention & rapid rehousing services.

3. Performance Measure for HMIS (Homeless Management Information System)

The City will make aim to engage full participation from all ESG subgrantees and is currently estimating that 100 persons receiving homeless prevention & rapid rehousing services to be counted through HMIS.

**CITY OF MORENO VALLEY
FY 2014/15 ANNUAL ACTION PLAN
AMENDMENT NO. 1 AFFECTING ESG & HOME**

The Annual Action Plan addresses the City’s plan for use of CDBG and HOME funds during Fiscal Year 2014/15. The plan is based upon the 5-year, 2013-2018 Consolidated Plan and facilitates the strategies outlined in the (Consolidated) Plan by addressing community needs through various mechanisms.

This amendment to the FY 2014/15 Action Plan requires citizen participation (including public hearing, public notice and 30-day review period) because the issue is considered a “substantial amendment.” A more detailed description of the proposed substantial amendment was made available for public review from July 25, 2014 through August 25, 2014. A public hearing was conducted on August 26, 2014 Moreno Valley City Council Meeting at 6:00 p.m.

The amendment includes the following changes:

1. **Emergency Solutions Grant (ESG) Program** - Adds a preliminary ESG program to the City’s consolidated planning documents and helps secure the ESG allocation from the Department of Housing and Urban Development (HUD). ESG funding would constitute brand new entitlement funding for the City of Moreno Valley.

The total anticipated award of \$291,170 (2013 award of \$135,581 and 2014 award of \$155,589) is proposed toward the following activities:

- Administration (7.5% limit) - \$21,837
- Homeless Management Information System (HMIS) - \$5,000
- Homeless Prevention and Rapid Re-housing Activities - \$264,333

2. **Mobilehome Grant Program (funded under the ‘HOME’ program)** - Amend the 2014-15 Action Plan to allow for additional HOME funding toward a mobile home repair (grant) program to be administered in partnership with Habitat for Humanity, Riverside. This change increases the original \$78,000 allocation to \$120,000 to allow for interior and exterior repair of 8 units (\$15,000 per unit). The increase will allow the City to more fully address health, code, safety, and accessibility issues of homes occupied by low-income owners. The change would also allow the City to meet an upcoming HOME commitment deadline.

CITY OF MORENO VALLEY NOTICE OF PUBLIC COMMENT PERIOD

PROPOSED AMENDMENT TO FY 2014-15 ACTION PLAN

As a recipient of federal grant funding, the City of Moreno Valley is mandated to complete a five-year Consolidated Plan and an Annual Action Plan that details the use of its grant funds. In cases where there are changes to an approved Plan, cities must notify their citizens of the proposed change and provide them the opportunity to comment. A Public Hearing must also be held prior to the 'Substantial Amendment' being forwarded to the Department of Housing and Urban Development (HUD) for review and final approval.

This 'Substantial Amendment' proposes the following changes:

- 1) To add the proposed Emergency Solutions Grant (ESG) activities to the 5-year Consolidated Plan and corresponding Annual Plans. The anticipated \$291,170 (2013 award of \$135,581 and 2014 award of \$155,589) is proposed as follows:
 - Administration (7.5% limit) - \$21,837
 - Homeless Management Information System (HMIS) - \$5,000
 - Homeless Prevention and Rapid Re-housing Activities - \$264,333
- 2) Amend the 2014-15 Action Plan to allow for additional HOME funding toward a mobile home repair (grant) program to be administered in partnership with Habitat for Humanity, Riverside; This change increases the original \$78,000 allocation to \$120,000 to allow for repair of 8 units (\$15,000 per unit) to be assisted with repairs that would address health, code, safety, and accessibility issues of homes occupied by low-income owners.

Anyone interested in providing comments or obtaining additional information may do so by contacting the City of Moreno Valley's Financial Resources Division within the Finance Department, at 14177 Frederick Street, Moreno Valley, CA, 951.413.3450, np@moval.org. The proposed Amendment will be made available for public review from July 25, 2014 through August 25, 2014. Comments must be received no later than 5:30 pm on August 25, 2014 but will also be accepted at the Public Hearing to be held on Tuesday, August 26, 2014 at 6:00 p.m. at the City Council Chambers, Moreno Valley City Hall, 14177 Frederick Street, Moreno Valley, CA.

Report to City Council

TO: Mayor and City Council

FROM: John C. Terell, Community & Economic Development Director

AGENDA DATE: August 26, 2014

TITLE: PUBLIC HEARING FOR THE FOURTH AMENDMENT TO THE DEVELOPMENT AGREEMENT FOR TOWNGATE. THE APPLICANT IS PALM TREE COMMUNITIES CONSULTING INC.

RECOMMENDED ACTION

Recommendations: That the City Council:

1. RECOGNIZE that the Development Agreement will not have the potential for any direct or indirect impacts under the California Environmental Quality Act (CEQA) and is therefore exempt under Section 15061 of the CEQA Guidelines.
2. ADOPT Resolution No. 2014-72. A Resolution of the City Council of the City of Moreno Valley, California, Approving P13-138, the Fourth Amendment to the Annexation and Development Agreement for TownGate to Extend the Life of the Agreement for a Total of Five Years.

SUMMARY

The Planning Commission approved Resolution 2014-19 on June 26th recommending approval of the Development Agreement Amendment for TownGate to the City Council. The modification to the Development Agreement will extend the term of the agreement by five years.

DISCUSSION

The Planning Commission reviewed the proposed Development Agreement Amendment on June 26th, and recommended approval to the City Council. The proposed modification will extend the agreement by five years.

On October 28, 1986, the Moreno Valley City Council enacted an ordinance approving the Annexation and Development Agreement (the Agreement) for the TownGate development project. After the 30 day statutory requirement, the Annexation and Development Agreement went into effect on November 27, 1986. The Agreement was adopted pursuant to State law and the City's established procedures and requirements for development agreements.

The Agreement along with the Specific Plan established the planning and development of the mixed-use development project consistent with the approved Specific Plan. The use of the Agreement codified a Memorandum of Understanding (MOU) between the City, the Redevelopment Agency, and the developer/property owner of TownGate (the Fritz Duda Company and its other related development entities involved in the Town Gate project). The MOU spelled out a means for funding the infrastructure necessary for the development of the TownGate project, as well as the scope of development of the development plan for the mixed-use development project.

The term of the Agreement was for a 20-year term and was established to undertake and build-out the entire TownGate development project consistent with the approved Specific Plan. On September 28, 2006, the City Council approved the second amendment to the Development Agreement which provided a five year extension to November 27, 2011. In November 2011, the City Council approved an additional five year extension to November 27, 2016.

Section 3-D of the Agreement states that "the timing may be tolled during any periods of delay resulting from acts of God, or other causes including but not limited to real estate, economic, financial and market conditions reasonably beyond the control of the property owner."

The representative for TownGate has requested that the City consider extending the term of the Agreement by five years in recognition of the economic downturn of the last few years along with the economic challenges of the 1990's. Moreno Valley has experienced a severe economic downturn in the local economy during these periods which also impacted the TownGate area. In pursuit of the completion of the TownGate Specific Plan and the development governed by the Development Agreement, the applicant believes the five year extension is warranted and appropriate.

The continued development of TownGate is an important component of the City's economic development efforts. The extension of the TownGate Development Agreement will help assist in attracting new development projects to the TownGate area, which in turn will enhance the economic vitality of Moreno Valley.

ALTERNATIVES

1. Approve the proposed Resolution for approval of Fourth Amendment of the Development Agreement. **Staff recommends this alternative.**
2. Do not approve the proposed Resolution for approval of the Fourth Amendment of the Development Agreement. **Staff does not recommend this alternative.**

FISCAL IMPACT

Not applicable.

CITY COUNCIL GOALS

Not applicable.

NOTIFICATION

A public hearing notice for the project (one-eighth page display advertisement) was published in the Press-Enterprise.

NOTICE OF CITY COUNCIL PUBLIC HEARING

FOR AN AMENDMENT TO THE DEVELOPMENT AGREEMENT FOR THE TOWNGATE SPECIFIC PLAN TO EXTEND THE TERM OF THE DEVELOPMENT AGREEMENT BY FIVE YEARS (P13-138)

The amendment would extend the term of the Development Agreement for TownGate by five years. The site includes several parcels controlled by entities related to Fritz Duda Company. The project area is generally located south of Highway 60, east of Day Street, and West of Frederick Avenue on properties designated as Specific Plan 200.

The City Council may consider any appropriate modifications or alternatives to the amendment or the environmental determination. The amendment is proposed to be exempt under California Environmental Quality Act Guidelines Section 15061 as defined by Section 15378.

Any person interested in the proposed project may contact Chris Ormsby, Interim Planning Official at (951) 413-3229 or at the Community & Economic Development Department at 14177 Frederick Street, Moreno Valley, California, during normal business hours (7:30 a.m. to 5:30 p.m., Monday through Thursday and 7:30 a.m. to 4:30 p.m., Friday), or may telephone (951) 413-3206 for further information.

If you challenge any of these items in court, you may be limited to raising only those issues you or someone else raised at the Public Hearing described in this notice, or in written correspondence delivered to the City Council on or before the following meeting date:

**Tuesday, August 26, 2014
6:00 P.M.
City Council Chamber
14177 Frederick Street.

RESOLUTION NO. 2014-72

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING P13-138, THE FOURTH AMENDMENT TO THE ANNEXATION AND DEVELOPMENT AGREEMENT FOR TOWNGATE TO EXTEND THE LIFE OF THE AGREEMENT FOR A TOTAL OF FIVE YEARS.

WHEREAS, the applicant has filed an application for the approval of P13-138, as described in the title of this Resolution; and

WHEREAS, on June 26, 2014, the Planning Commission of the City of Moreno Valley, after conducting a public hearing on the project, approved Planning Commission Resolution No. 2014-19 recommending approval of the Fourth Amendment to the Annexation and Development Agreement for TownGate; and

WHEREAS, on August 26, 2014, the City Council held a public hearing to consider the proposal; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred; and

WHEREAS, the City Council recognizes that the proposed action will not have the potential for direct or indirect impacts under the California Environmental Quality Act (CEQA) is therefore exempt under Section 15061 of the CEQA Guidelines.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

- A. The City Council hereby specifically finds that all of the facts set forth above in this Resolution are true and correct.
- B. Based upon substantial evidence presented to this City Council during the above-referenced meeting, including written and oral staff reports, and the record from the public hearing, this City Council hereby specifically finds as follows:
 1. That the Development Agreement Amendment is consistent with the goals, objectives, policies, general land uses and programs specified in the General Plan.

FACT: The proposed Amendment is consistent with the General Plan, and all remaining development under the Agreement will be consistent with the General Plan.

1
Resolution No. 2014-72
Date Adopted: August 26, 2014

2. The proposed Development Agreement Amendment is compatible with the uses authorized in, and the regulations prescribed for, the land use district in which the real property is located.

FACT: The Development Agreement Amendment is compatible with the uses authorized in, and the regulations prescribed for, the land use district in which the real property is located.

3. The proposed Development Agreement Amendment is in conformity with public convenience, general welfare and good land use practice.

FACT: The Development Agreement Amendment will facilitate the orderly development of the remaining vacant lands consistent with the TownGate Specific Plan (Specific Plan 200).

4. The proposed Development Agreement Amendment will not be detrimental to the public health, safety and general welfare.

FACT: The proposal has been determined to be exempt under Section 15061(b)(3) of the California Environmental Quality Act Guidelines in that the proposed Agreement does not have the potential to result in a direct or indirect physical impact on the environment.

5. The proposed Development Agreement Amendment will not adversely affect the orderly development or the preservation of property values of the subject property or any other property.

FACT: The Development Agreement Amendment extends the term of the Agreement by five years. It would not affect the orderly development or the preservation of property values of the subject property or any other property.

FEES, DEDICATIONS, RESERVATIONS, AND OTHER EXACTIONS

1. Impact, mitigation and other fees are due and payable under currently applicable ordinances and resolutions. These fees may include but are not limited to: Development Impact Fee, Transportation Uniform Mitigation Fee (TUMF), Multi-species Habitat Conservation Plan (MSHCP) Mitigation Fee, Stephens Kangaroo Habitat Conservation fee, Underground Utilities in lieu Fee, Area Drainage Plan fee, Bridge and Thoroughfare Mitigation fee (Future) and Traffic Signal Mitigation fee. The final amount of fees payable is dependent upon information provided by the applicant and will be determined at the time the fees become due and payable.

2
Resolution No. 2014-72
Date Adopted: August 26, 2014

Unless otherwise provided for by this resolution, all impact fees shall be calculated and collected at the time and in the manner provided in Chapter 3.32 of the City of Moreno Valley Municipal Code or as so provided in the applicable ordinances and resolutions. The City expressly reserves the right to amend the fees and the fee calculations consistent with applicable law.

2. The City expressly reserves the right to establish, modify or adjust any fee, dedication, reservation or other exaction to the extent permitted and as authorized by law.

Pursuant to Government Code Section 66020(d)(1), NOTICE IS FURTHER GIVEN that the 90 day period to protest the imposition of any impact fee, dedication, reservation, or other exaction described in this resolution begins on the effective date of this resolution and any such protest must be in a manner that complies with Section 66020(a) and failure to timely follow this procedure will bar any subsequent legal action to attack, review, set aside, void or annul imposition.

The right to protest the fees, dedications, reservations, or other exactions does not apply to planning, zoning, grading, or other similar application processing fees or service fees in connection with this project and it does not apply to any fees, dedication, reservations, or other exactions of which a notice has been given similar to this, nor does it revive challenges to any fees for which the Statute of Limitations has previously expired.

BE IT FURTHER RESOLVED that the City Council of the City of Moreno Valley HEREBY ADOPTS Resolution No. 2014-72 approving the Fourth Amendment to Development Agreement (P13-138) as contained in Exhibit A.

APPROVED AND ADOPTED this 26th day of August, 2014.

**FOURTH AMENDMENT TO ANNEXATION AND DEVELOPMENT AGREEMENT
BETWEEN THE CITY OF MORENO VALLEY, RIR ASSOCIATED AND RYDER
HOMES RELATIVE OF THE DEVELOPMENT KNOWN AS MORENO VALLEY
MIXED USE DEVELOPMENT (TOWNGATE)**

THIS FOURTH AMENDMENT TO ANNEXATION AND DEVELOPMENT AGREEMENT BETWEEN THE CITY OF MORENO VALLEY, RIR ASSOCIATES AND RYDER HOMES RELATIVE OF THE DEVELOPMENT KNOWN AS MORENO VALLEY MIXED USE DEVELOPMENT (TOWNGATE) (the “Fourth Amendment” to the (“Development Agreement”) is made and entered into as of _____, 2014, by and between the City of Moreno Valley (the “City”) and the Gateway Company L.C. (“Gateway”), Dallas Plaza Partners, Brixton-Alto Eastridge, LLC., and Brixton-Alto Shopping Center, LLC, (collectively the “current landowners”) with respect to the following facts:

- A. On October 28, 1986, the City Council enacted Ordinance No. 102 approving the Development Agreement, which was recorded on January 20, 1987, as document number 26860 in the official records of Riverside County.
- B. On October 14, 2006, the City Council enacted Ordinance no. 728 approving an extension to the Development Agreement.
- C. On November 8, 2011, the City Council enacted Ordinance No. 834 approving an extension to the Development Agreement.
- D. The Development Agreement will terminate on November 27, 2016 unless the term is extended.
- E. The current landowners, as successors in interest to RIR Associated and Ryder Homes, have been developing the Project, as that term is defined in Recital 8 of the Development Agreement. Much of the Project is now built out.
- F. Economic conditions which have occurred since the Development Agreement was entered into have prevented the completion of the development foreseen for the Project.
- G. The current landowners are contemplating further development on their land.

6
Resolution No. 2014-XX
Date Adopted: August 26, 2014

- H. In order to provide the necessary certainty that further development of the Project can be built once the approval process is completed, the City and the current landowners agree that it will be mutually beneficial to extend the term of the Development agreement by five years.
- I. The extension for the term shall only apply to the property yet to be developed as part of the Project.

IN LIGHT OF THE FOREGOING, IT IS HEREBY AGREED THAT:

- 1. Paragraph 1.B(1) of the Development Agreement is amended to read:

“The term of this Development Agreement shall extend to November 27, 2021, unless this Development Agreement is terminated, modified or extended by circumstances set forth in this Development Agreement or by mutual consent of the parties hereto”
- 2. The Amendment set forth in paragraph 1 above shall only apply to the land described in Exhibit A to this Fourth Amendment.
- 3. Except as set forth in paragraphs 1 and 2 above, the provisions of the Development Agreement remain unchanged.

ANNEXATION AND DEVELOPMENT BETWEEN
THE CITY OF MORENO VALLEY, RIR ASSOCIATES
AND RYDER HOMES RELATIVE TO THE
DEVELOPMENT KNOWN AS
MORENO VALLEY MIXED USE DEVELOPMENT
(TownGate)

This Annexation and Development Agreement (hereinafter "Development Agreement") is entered into this 28th day of November, 1986, by and between RIR Associates, a California general partnership, Ryder Homes, a California corporation (hereinafter "Property Owners") and the City of Moreno Valley, a municipal corporation (hereinafter "City"), pursuant to the authority of Section 65859 and Sections 65864 through 65869.5 of the California Government Code.

Recitals

1. To provide for orderly planning, the City has the authority pursuant to California Government Code Section 65859 to prezone property outside the City boundaries for the purpose of determining the zoning that will apply to the property in the event of a subsequent annexation of the property to the City.
2. To provide more certainty in the approval of development projects, encourage private participation in comprehensive planning and reduce the economic risk of development, the Legislature of the State of California adopted Section 65864 et seq. of the California Government Code which authorizes the City and an applicant for a development project to enter into a development agreement, establishing certain development rights in the property which is the subject of the project development entitlement application(s).
3. The City has adopted Resolution No. 85-127 on

December 17, 1985, establishing procedures and requirements for considering development agreements. Said Resolution is not, as of the date hereof, subject to any legal action wherein the validity of the Resolution, or any part thereof, is being challenged.

4. The City was incorporated on December 3, 1984. Pursuant to California Government Code Section 65360, the City has thirty (30) months to prepare and adopt a general plan. During this thirty (30) month period, the City may approve development projects and is not subject to the requirements of California state law that its decisions be consistent with the general plan so long as certain provisions as set forth in Section 65360 are met.

5. Pursuant to California Government Code Section 35441, the City Council of City on December 3, 1984, by Ordinance No. 1, which ordinance was affirmed on March 26, 1985, by Ordinance No. 10, adopted the County of Riverside General Plan as an Operating General Plan until the City's General Plan is completed and adopted. The Operating General Plan was modified and readopted on June 17, 1986, by Resolution No. 86-75. The City is currently proceeding in a timely manner with the preparation of a new general plan for the City.

6. RIR Associates is a California general partnership. RIR Associates is the owner in fee of certain real property situated in the unincorporated territory of the County of Riverside, State of California, consisting of approximately 555.7 acres, (hereinafter "RIR Associates Property") more particularly described in Exhibit A attached hereto and incorporated herein by this reference.

7. Ryder Homes, a California corporation, is the owner in fee of certain real property situated in the City of Moreno Valley, County of Riverside, State of California, consisting of approximately 35 acres (hereinafter "Ryder Property"), contiguous to the RIR Associates Property, more

particularly described in Exhibit B attached hereto and incorporated herein by this reference.

8. RIR Associates and Ryder Homes desire to develop their property in conjunction with one another and in accordance with the Moreno Valley Mixed Use Development Specific Plan No. 200 and conditions of approval attached thereto (hereinafter "Specific Plan No. 200") incorporated herein by this reference and on file in the office the Director of Developmental Services. The Moreno Valley Mixed Use Development Project (hereinafter "the Project") consists of a regional center, a neighborhood retail development, mixed use office, hospital-medical uses, town center area, park and school uses, and residential uses to be developed in phases.

9. Since the annexation of the RIR Associates Property described in Exhibit A is a necessary prerequisite to development of the Project implementing Specific Plan No. 200, it is the intent of the parties that if the Annexation is not completed within a reasonable time this Development Agreement and all rights and obligations hereunder will thereupon terminate.

10. City Council of City on October 22, 1986, by Resolution No. 144, has certified as adequate EIR No. 200 relative to Specific Plan No. 200 and subsequent implementation actions including this Development Agreement. EIR No. 200 identified and discussed the environmental impacts of implementation of the Specific Plan No. 200, annexation of the RIR Associates property to the City and the further proposed development of the Project in accordance with Specific Plan No. 200 and this Development Agreement.

11. The City Council of City has, by Ordinance No. 101, adopted on October 28, 1986, approved Specific Plan No. 200 for the Project. The City Council, in furtherance of the development of the Project and in accordance with Specific Plan No. 200 has, by Ordinance

No. 101, adopted on October 28, 1986, approved Change of Zone No. 2010 for the Ryder Property and the rezoning of the RIR Associates Property in accordance with the Specific Plan No. 200.

12. City and the Community Redevelopment Agency of the City of Moreno Valley have entered into a Memorandum Re Agreement For Moreno Valley Mixed Use Development Project - Riverside Raceway, dated March 11, 1986 (hereinafter "MOU"). Said MOU contains, among other provisions, a means for funding infrastructure relating to the Project. A copy of the MOU is attached hereto marked Exhibit C and incorporated herein by this reference.

13. The Planning Commission of City by Resolution No. 17-86 adopted on October 2, 1986, approved this Development Agreement.

14. The City Council of City by Ordinance No. 102 adopted on October 28, 1986, approved this Development Agreement.

15. The City hereby finds and determines that Specific Plan No. 200, the rezoning of the RIR Associates Property, the rezoning of the Ryder Property and this Development Agreement, as approved by the City Council, are consistent with said County of Riverside General Plan (City's "Operating General Plan"). The City Council further finds and determines that (a) the City is proceeding in a timely fashion with the preparation of its General Plan; (b) there is a reasonable probability that this Development Agreement, Specific Plan No. 200, the rezoning and rezoning as herein provided will be consistent with the City's General Plan currently being prepared, studied and considered; (c) there is little or no probability of substantial detriment to or interference with the future adopted City General Plan if the Project is ultimately determined to be inconsistent with the City General Plan; and (d) this Development Agreement, Specific Plan No. 200,

09892
26860

the rezoning and rezoning comply with all other applicable requirements of State law and City ordinances.

16. The execution of this Development Agreement and the performance of and compliance with the terms and conditions set forth herein by the parties hereto is in the best interests of the City; provides for orderly growth and development of the City consistent with the City's proposed new General Plan and the Operating General Plan.

17. In reliance on the covenants of the City contained herein with respect to the annexation of the RIR Associates property to the City, the approval of Specific Plan No. 200 and the rezoning and rezoning as herein provided, Property Owners have and will in the future incur substantial costs in order to comply with the conditions of approval to ensure development of the Project in accordance with said Specific Plan, rezoning and rezoning.

NOW, THEREFORE, in consideration of the above recitals, all of which are expressly incorporated into this Development Agreement, and the mutual promises and covenants of the parties herein contained and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

Section 1. GENERAL PROVISIONS.

A. Property Description and Binding Covenants. The Project shall be developed on the RIR Associates Property and the Ryder Property (hereinafter the "Property") described in Exhibits A and B in accordance with the provisions of Specific Plan No. 200 and this Development Agreement. It is intended and determined that the provisions of this Development Agreement, to the extent permitted by law, shall constitute covenants which shall run with said property and the benefits and burdens hereof, where applicable, shall bind and inure to the parties and to their respective successors in interest, provided however, that all such benefits, burdens and covenants shall

terminate upon the termination of this Development agreement pursuant to Section 1.B. below.

B. Term.

(1) The term of this Development Agreement shall commence on the effective date of the adopting ordinance approving this Development Agreement and shall extend for a period of twenty (20) years thereafter, unless this Development Agreement is terminated, modified or extended by circumstances set forth in this Development Agreement or by mutual consent of the parties hereto.

(2) Except as otherwise expressly provided in this Development Agreement, this Development Agreement shall terminate and be of no further force and effect as to any unperformed and unexecuted provisions if the change of organization or reorganization (hereinafter "Annexation"), of the RIR Associates' property is not approved by the Riverside County Local Agency Formation Commission (hereinafter "LAFCO") and City Council of City and any other appropriate public agencies having jurisdiction thereover. It is further agreed that the adoption of the ordinance rezoning the Ryder Property described in Exhibit B will be repealed unless the Annexation has been completed and is final.

(3) The parties hereto acknowledge that full development of the Project may not be feasible without the public funding contemplated by the terms of this Development Agreement and the MOU. It is understood and agreed that RIR Associates' application for Annexation is requesting LAFCO to condition its resolution of determination approving the Annexation so that said Annexation shall not become effective unless and until all proceedings are held in accordance with State law by the Agency to include the Property within an adopted redevelopment project area and the Property Owners and Agency have entered into and executed an OPA consistent with the terms and conditions of

09892
26860

Specific Plan No. 200, and this Development Agreement. In the event LAFCO does not for any reason so condition its resolution of determination approving the Annexation, the City Council of City shall, as the conducting authority for the Annexation, delay adoption of its resolution ordering the Annexation until the Agency adopts said redevelopment project area including the Property and the parties enter into said OPA. Nothing herein shall be deemed to pre-commit the City or Agency in any manner contrary to the requirements, including but not limited to, all actions necessary for compliance with the legal procedures and public hearings and discretionary decisions necessary for the Annexation of the Property, the formation and adoption of a redevelopment project, approval of an OPA and the formation and financing of the assessment or other special districts. It is understood and agreed that all references herein to any such actions or proceedings shall be qualified by the necessity of compliance with any and all such applicable legal procedures and requirements.

(4) This Development Agreement shall terminate and be of no force and effect upon the occurrence of the entry of a final judgment or issuance of a final order after exhaustion of any appeals directed against the City as a result of any lawsuit filed against the City to set aside, withdraw or abrogate the approval by the City Council of City of this Development Agreement, Specific Plan No. 200, the rezoning, rezoning or the final EIR for the Project or if termination occurs pursuant to the provisions of Resolution No. 85-127 and such termination is so intended thereby.

(5) If not already terminated by reason of any other provision in this Development Agreement, this Development Agreement shall automatically terminate upon total build-out of the Project pursuant to Specific Plan No. 200 and any amendments thereto and the issuance of all

occupancy permits and acceptance by City of all dedications of public rights of way and public improvements.

(6) Following the expiration of said term, this Development Agreement shall be deemed terminated and of no further force and effect.

C. Assignment. Subject to the terms of this Development Agreement, provided Property Owners are not in default hereof, Property Owners shall have the right to sell or transfer the Project in whole or in part, to any person, partnership, joint venture, firm or corporation at any time during the term of this Development Agreement, provided that any such sale or transfer shall include the assignment and assumption of those rights, duties and obligations arising under or from this Development Agreement applicable to the Project or portions thereof being sold or transferred. Upon the express assumption of any or all of the obligations of Property Owners under this Development Agreement by such purchaser or transferee of the Project or any portion thereof, Property Owners shall be relieved of their legal duty to perform said obligations under this Development Agreement at the time of assignment, except to the extent Property Owners are in default of any of the terms of this Development Agreement as to the property sold or transferred. Any and all successors of Property Owners shall have all of the same benefits, rights, duties and obligations of Property Owners hereunder as to the property sold or transferred.

Property Owners shall give written notice to City, within ten (10) days after close of escrow, of any sale or transfer of the whole or any portion of the Project, specifying the name or names of the purchaser or transferee, the purchaser's or transferee's mailing address, the amount and location of the land sold or transferred, and the name and address of a single person or entity to whom any notice relating to this Development

Agreement shall be given.

It is understood and agreed by the parties that the Project will be divided after the effective date of this Development Agreement. One or more of such divided parcels may be sold or transferred to other builder(s) for construction of the various phases of development of the Project by them in accordance with this Development Agreement. Noncompliance by any such builder(s) with the terms and conditions of this Development Agreement or with applicable City ordinances shall be deemed a default by that builder but shall not be deemed to be a default hereunder against other persons then owning or holding any interest in any other portion of the Project and not themselves in default hereunder.

D. Notices.

All notices, demands, requests, elections, approvals, disapprovals, consents or other correspondence and communications between City and Property Owners under this Development Agreement shall be in writing and shall be given by personal delivery, mail or telegram. Notice by personal delivery shall be deemed effective upon the delivery of such notice to the party for which it is intended at the address set forth below. Notice by mail shall be deemed effective two (2) business days after depositing such notice postage prepaid, registered or certified, return receipt requested, properly sealed with the United States Postal Service, addressed as set forth below, regardless of whether or when the notice is actually received. Notice by telegram shall be deemed effective upon the transmission of the telegram, telegraph charges prepaid, to the party to whom it is intended at the address set forth below:

Suite A-1
Moreno Valley, CA 92388
Attention: City Manager and
Director of Developmental
Services

To Property Owners: RIR Associates
c/o Fritz Duda Company
1940 West Orangewood
Suite 207
Orange, CA 92668

Ryder Homes
c/o Fritz Duda Company
1940 West Orangewood
Suite 207
Orange, CA 92668

Such written notices, demands, correspondence and communications may be directed in the same manner to such other persons and addresses as either party may from time to time designate by notice given in accordance with this Section.

E. Amendment of Agreement. This Development Agreement may be amended from time to time by mutual consent of the parties in accordance with the provisions of Government Code Sections 65867 and 65868 and Resolution No. 85-127. Future amendments of all or a portion of the Project would subject that portion or phase of the Project amended or affected by the amendment to any adopted changes in the City's General Plan, specific plan, zoning, and other development standards and policies in effect at the time of amendment and occurring after approval and recordation of this Development Agreement.

F. Environmental Review of Moreno Valley Mixed Use Development Specific Plan No. 200 and Development Agreement. In accordance with the rules, regulations and policies of the City regarding environmental review of projects which are subject to the California Environmental Quality Act ("CEQA") and implementing regulations, the City

Council of City hereby finds and determines as follows:

(1) The Final EIR for the Specific Plan No. 200 is a program EIR which identifies and discusses the environmental impacts of the rezoning, rezoning, annexation of the RIR Associates Property to the City and all other actions designated to implement the future proposed development of the Project in accordance with Specific Plan No. 200 and this Development Agreement. Since the EIR for Specific Plan No. 200 is a program EIR, no further or different impacts are caused by this Development Agreement and therefore no subsequent or supplemental EIR is required in connection with this Development Agreement;

(2) The environmental impacts of the Project have been reviewed and all measures deemed feasible to mitigate adverse impacts thereof have been incorporated into the City approvals for the Project and Specific Plan No. 200. Prior to the approval of Specific Plan No. 200, City Council of City adopted a statement of overriding considerations for the two (2) environmental impacts, noise and air quality, which could not feasibly be mitigated to levels of insignificance;

(3) Other than the mitigation measures set forth in the Final EIR for Specific Plan No. 200 and/or imposed by the City Council as conditions to the approval thereof, no other mitigation measures for environmental impacts created by the Project, as presently approved and as addressed by said Final EIR, shall be required for development of the Project unless mandated by law;

(4) City may pursuant to and in accordance with its rules, regulations and ordinances conduct an environmental review of subsequent discretionary entitlements for the development of the Project contemplated by Specific Plan No. 200 and addressed in EIR No. 200. The City, as a result of such review, may impose additional measures (or conditions) to mitigate as permitted by law the adverse

environmental impacts of such development entitlements which were not considered or mitigated at the time of approval of the Project; and

(5) A Notice of Determination of said decision on the Project will be filed with the County Clerk, County of Riverside and the State Office of Planning and Research in a timely manner after EIR No. 200 is certified by the City Council of City.

Section 2. PREZONING THE RIR ASSOCIATES PROPERTY.

Pursuant to Section 65859 of the California Government Code and Change of Zone No. 2010, City has prezoned the RIR Associates Property. The prezoning is consistent with Specific Plan No. 200. The prezoning designation for the RIR Associates Property shall become effective upon the date of completion of the annexation of the RIR Associates Property to the City.

Section 3. DEVELOPMENT OF THE PROPERTY.

A. Land Use Entitlements.

During the term of this Development Agreement, the permitted uses for the Project, or any portion thereof, the density and intensity of use, zoning, maximum height and size of proposed buildings, building and yard set-back requirements, provisions for reservations or dedications of land for parks, streets and subdivision design and other terms and conditions of development of the Project shall be those set forth in Specific Plan No. 200 and the provisions of this Development Agreement, and implementation of the MOU. Property Owners agree to diligently pursue completion of the Project in a reasonably timely manner.

B. Rules and Regulations. Pursuant to and consistent with California Government Code Section 65866, except as otherwise may be provided in this Development Agreement, the ordinances governing permitted uses of the land,

26860
09892

governing density, intensity and design, improvement and construction standards and specifications applicable to development of the Project under Specific Plan No. 200 and the provisions of this Development Agreement shall be those ordinances of City in force at the time of execution of this Development Agreement, including but not limited to the specific plan zone adopted under said Specific Plan No. 200. City shall not be prevented in subsequent actions applicable to the Project, from applying its ordinances, rules, regulations, policies and general plan provisions then in effect which do not conflict with those ordinances applicable to the Project, nor shall City be prevented from denying or conditionally approving any subsequent discretionary entitlements or projects on the basis of such existing or new ordinances, rules, regulations, policies, and general plan provisions.

C. Future Entitlements. City shall retain its discretionary rights in reviewing future entitlements for development of the Project including, but not limited to, tentative tract and parcel map approvals, conditional use permits, plot plan approvals, rezoning and other discretionary or similar actions. Such discretionary actions shall be subject to the City's ordinances and regulations regarding subdivisions and other land use entitlements in effect at the time of application for those approvals, but only to the extent that any such ordinances and regulations are not in conflict with Specific Plan No. 200 or the terms and provisions of this Development Agreement and do not prevent implementation of said Specific Plan No. 200. The City shall impose only conditions upon any such discretionary entitlements which are consistent with Specific Plan No. 200 and the terms and conditions of this Development Agreement except as specifically required by state or federal law. The provisions of this paragraph shall not be construed to limit the rights of the City as

SUPERSEDED ↓

09892
26860

described in Section 4.1.14 of the MOU.

D. Timing and Phasing of Development. Notwithstanding the provisions contained in the Phasing Schedule of the MOU, the Project shall be developed in three phases in accordance with the commencement and completion schedule set forth below. Property Owners will exercise reasonable due diligence to commence and complete the Project in a timely and reasonably expeditious manner. The timing as hereinafter set forth may be tolled during any periods of delay resulting from acts of God or other causes (including, but not limited to, real estate, economic, financial, and market conditions) reasonably beyond the control of Property Owners and conditions which could not have been reasonably anticipated in advance by Property Owners:

		<u>Approvals Complete for Commencement of Construction</u>	<u>Completion</u>
Phase I	- Community Retail	1987	1991
	Residential	1987	1992
Phase II	- Mixed Use	1988	2005
	Residential	1989	2005
Phase III	- Regional Center/ Mixed Use Commercial	1990-91	2005

It is intended that the OPA to be entered into will further develop and define the required timing and phasing of development including but not limited to the private and public improvements and infrastructure.

E. Dedications. Property Owners agree to dedicate to City subject to acceptance, ownership and operation by City, a recreation center/community swimming pool, parks and other land as described in Specific Plan No. 200 and specified in the conditions of approval attached thereto. The timing for dedication and improvements will be determined in the OPA.

F. Design Handbook. Prior to approval of the first tentative map for the Project, Property Owners shall submit

SUPERSEDED ↑

26860

09892

to the City Council of City for approval by ordinance a detailed design manual containing text and renderings describing and depicting the specific design characteristics, theme(s), site lay-outs pertaining to the general commercial and residential product types to be developed in the Project in accordance with Specific Plan No. 200.

G. City Fees.

(1) Application fees, building permit fees, plan check fees, inspection fees, public facilities fees and all other city-wide development and processing fees shall be in the amounts in effect when actual payment of said fees is due.

(2) This section shall not preclude the application to the development of the Project of changes in City fees, rules, regulations, or ordinances, the terms of which are specifically mandated and required by changes in State or federal laws or regulations.

(3) All Traffic Signal Mitigation Fees associated with the development of the Project shall be waived by City in recognition of the Property Owners' obligation to install all traffic signals within the Project in accordance with Specific Plan No. 200. Installation, funding and timing of the traffic signals shall be determined in the OPA.

(4) The Property Owners shall receive a credit toward the assessed public facilities fees equal to the value of the actual amounts expended based upon verified statements approved by the City Director of Developmental Services of costs for labor and materials, for public recreational improvements within the park (including the swimming pool and appurtenances) and town center areas (Planning Units 13 and 14) or in any other park or open space areas which is imposed as a condition of approval of Specific Plan No. 200 by the City Council of City up to a maximum not to exceed twenty-five percent (25%) of the public facilities fees in effect on the date said fees are to be paid. The specific provisions with regard to public facilities fees credits and

26860

0986

timing for payment of said fees shall be set forth in a separate agreement to be entered into by the City and the Property Owners within a reasonable time after the execution of this Development Agreement and prior to issuance of any building permits for the Project.

H. Cooperation. Property Owners have initiated annexation of the RIR Associates Property to City. City agrees that it will cooperate with Property Owners in the processing and approval of the annexation of the RIR Associates Property and that it will not oppose the pending Annexation before LAFCO or any other governmental bodies or entities having jurisdiction over the Annexation proceedings, provided Property Owners' application and the processing of same conforms with the provisions of the Development Agreement and Specific Plan No. 200.

City and Property Owners shall cooperate in seeking to obtain credit towards or a waiver of any County of Riverside flood control drainage fees in recognition and consideration of Property Owners' obligation to install drainage and flood control facilities as required by Specific Plan No. 200, provided that any credit towards drainage fees shall not duplicate the public facilities fees credits.

City agrees that it shall accept for processing and promptly take action on all applications, provided they are in a proper form and acceptable for required processing, for discretionary permits, tract or parcel maps, or other land use entitlements for development of the Project in accordance with Specific Plan No. 200 and the provisions of this Development Agreement. City shall cooperate with Property Owners in providing expeditious review of any such applications, permits, or land use entitlements and, upon request and payment of any costs and/or extra fees associated therewith by Property Owners, City shall assign to the Project planner(s), building inspector(s), and/or other staff personnel as required to insure the timely processing and

completion of the Project.

I. Public Financing. Property Owners will cooperate with City and not protest or oppose the inclusion of the Project in any community facilities districts or special assessment and maintenance districts as provided in the MOU for construction and ongoing maintenance and operation of municipal services, public improvements and infrastructure relating to the Project.

City and Property Owners will cooperate in seeking to develop a financing plan anticipated to be in the form of an OPA with the Agency in the event the Project is included within a redevelopment area for payment of all or a portion of public infrastructure improvements relating to the Project as set forth in Specific Plan No. 200, the MOU, and this Development Agreement. It is anticipated that said financing plan or OPA will include, among other things, provisions for the reimbursement of initial costs for the construction and installation of public infrastructure improvements paid by Property Owners prior to the formation of special assessment or community facilities districts as contemplated by the MOU. Nothing herein shall be deemed to pre-commit the City or Agency in any manner contrary to the requirements, including but not limited to, all actions necessary for compliance with the legal procedures and public hearings and discretionary decisions necessary for the Annexation of the Property, the formation and adoption of a redevelopment plan, and the formation and financing of the assessment or other special districts. It is understood and agreed that all references herein to any such actions or proceedings shall be qualified by the necessity of compliance with any and all such applicable legal procedures and requirements.

J. Maintenance of Public Improvements. It is the intent of the parties that the maintenance of the public parkways, medians, parks, greenbelts, open space areas, bicycle and pedestrian paths and trailways (hereinafter

"Public Landscape Areas") throughout the Project except for the commercial areas, be provided through the establishment of landscaping and maintenance districts or other special assessment or community facilities districts. To the extent permitted by law, Property Owners, shall be responsible for maintenance of those Public Landscape Areas including the medians along Day Street (northerly of Eastridge Avenue), Frederick Street (northerly of Eucalyptus Street), A Street and C Street (all said streets and avenues are designated as specified in Exhibit C, Circulation Element, to the conditions of approval attached to Specific Plan No. 200) provided they can receive reimbursement from the special maintenance district(s) for the cost of said maintenance.

K. Continued Development. Property Owners reserve the right at their total discretion to continue with development of the Project pursuant to the terms and conditions of Specific Plan No. 200 and this Development Agreement regardless of the inclusion of the Project in a redevelopment project area plan as discussed in the MOU provided that Property Owners proceed in a timely manner.

Section 4. ANNUAL REVIEW.

A. Review Procedure. City shall, at least every twelve (12) months during the term of this Development Agreement, review the extent of good faith substantial compliance by Property Owners with the terms of this Development Agreement. Such periodic review shall determine compliance with the terms of this Development Agreement pursuant to California Government Code Section 65865.1 and Resolution No. 85-127 or other successor laws and regulations. Notice of such annual review shall include the statement that any review may result in amendment or termination of this Development Agreement.

Upon not less than thirty (30) days written notice by the Director of Developmental Services of City, Property

Owners shall provide such information as may be reasonably requested by said Director and deemed by him to be required in order to ascertain compliance with this Development Agreement.

City shall deposit in the mail to Property Owners a copy of all staff reports and, to the extent practical, related exhibits concerning contract performance at least ten (10) calendar days prior to any hearing on such periodic review. Property Owners shall be permitted an opportunity to be heard orally or in writing regarding its performance under this Development Agreement before the City Council of City or if the matter is referred to the Planning Commission of City before said Commission. If the City determines that Property Owners are in default following completion of the normal scheduled periodic review, written notice of proposed termination or modification of this Development Agreement shall be given, pursuant to applicable laws and regulations, specifying in said notice the alleged nature of the default, and suggested or potential actions and timing to cure said default where appropriate.

B. Certificate of Compliance. If Property Owners are found to be in compliance with this Development Agreement after the Annual Review, the City shall, upon request by Property Owners at any time after an Annual Review, issue a Certificate of Compliance to Property Owners (the "Certificate") stating that, after the most recent Annual Review and based upon information known or made known to the City Council and/or the Director of Development Services of the City, (1) this Development Agreement remains in effect and either (2) Property Owners are not in default or (3) Property Owners are in default and specifying the nature of the default. The Certificate shall be in recordable form and shall contain information necessary to communicate constructive record notice of the finding of compliance. Property Owners may record the Certificate in the official records of the County.

Whether or not the Certificate is relied upon by assignees or other transferees of Property Owners, the City shall not be bound by a Certificate if a default existed at the time of the Annual Review, but was concealed from or otherwise not known to the Director of Development Services or the City Council.

Section 5. ENFORCEMENT.

A. Enforceable by Either Party. The City agrees that unless this Development Agreement is amended, terminated or cancelled pursuant to the provisions of this Development Agreement and the adopting ordinance or by applicable law or regulation, this Development Agreement shall be enforceable by any party hereto notwithstanding any change hereafter in any applicable general plan, specific plan, zoning ordinance, subdivision ordinance, building regulation or development moratorium adopted by City which substantially changes, alters or amends the rules, regulations and policies applicable to the development of the Project at the time of approval of this Development Agreement, as provided by California Government Code Section 65866.

B. Cumulative Remedies. In addition to any other rights or remedies, either party may institute legal action to cure, correct or remedy any default (to the extent otherwise permitted by Government Code Section 65864 et seq. and Resolution No. 85-127, or successor laws and regulations), to enforce any covenant or agreement herein, or to enjoin any threatened or attempted violation, including suits for declaratory relief, specific performance, relief in the nature of mandamus and actions for damages. All of the remedies described above shall be cumulative and not exclusive of one another, and the exercise of any one or more of the remedies shall not constitute a waiver or election with respect to any other available remedy. The provisions of this subsection B are not intended to modify other provisions of this

Development Agreement and are not intended to provide additional remedies not otherwise permitted by law.

C. Attorneys' Fees. In any arbitration, quasi-judicial or administrative proceedings or any action in any court of competent jurisdiction, brought by either party to enforce any covenant or any of such party's rights or remedies under this Development Agreement, including any action for declaratory or equitable relief, the prevailing party shall be entitled to reasonable attorneys' fees and all reasonable costs, expenses and disbursements in connection with such action. The Property Owners agree to provide a defense and pay all costs associated therewith for City in any action by a third party challenging the validity of this Development Agreement. Legal counsel retained by Property Owners for this purpose shall be approved by City, which approval shall not unreasonably be withheld.

Section 6. MISCELLANEOUS PROVISIONS.

A. Covenants, Conditions and Restrictions. The terms of this Development Agreement shall be binding upon the parties, their successors and assigns. In addition, Property Owners shall cause to be placed in covenants, conditions and restrictions applicable to the Project, and in any ground lease or conveyance thereof, or any portion thereof, provisions specifically recognizing that the terms of this Development Agreement with regards to the development standards and conditions contained in Specific Plan No. 200 are binding on any successors in interest of Property Owners and that Property Owners, lessees or City, acting separately or jointly, may enforce those standards and conditions and, if prevailing in any actions, to recover attorneys' fees and costs for such enforcement, if necessary.

B. Project as a Private Undertaking. It is specifically understood and agreed by and between the parties hereto that the Project is a private development, that neither party

is acting as the agent of the other in any respect hereunder, and that each party is an independent contracting entity with respect to the terms, covenants and conditions contained in this Development Agreement. No partnership, joint venture or other association of any kind is formed by this Development Agreement. The only relationship between the City and Property Owners is that of a government entity regulating the development of private property and the owner of such private property.

C. Captions. The captions of this Development Agreement are for convenience and reference only and shall in no way define, explain, modify, construe, limit, amplify or aid in the interpretation, construction or meaning of any of the provisions of this Development Agreement.

D. Other Agreements. This Development Agreement is not intended to alter the obligations of the parties under any other contracts existing between them, whether signed before, after, or in conjunction with this Development Agreement.

E. Mortgagee Protection. A breach of this Development Agreement shall not defeat, render invalid, diminish, or impair the lien of any mortgage made in good faith and for value, unless otherwise required by law.

F. Notice of Default to Mortgagee; Right of Mortgagee to Cure. If the City Clerk of the City and the Director of Development Services timely receive notice from a mortgagee requesting a copy of any notice of a default given Property Owners, the City shall provide a copy of that notice to the mortgagee within ten (10) days of sending the notice of default to Property Owners. The mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed Property owners under this Development Agreement.

G. Consent. Where the consent or approval of a party is required in or necessary under this Development Agreement,

such consent or approval shall not be unreasonably withheld.

H. Entire Agreement. This Development Agreement and the documents attached hereto, subject to the proposed Public Facilities Fee Agreement, Financing Plan and Owner Participation Agreement constitute the entire agreement between the parties with respect to the subject matter of this Development Agreement.

I. Further Actions and Instruments. Each of the parties shall cooperate with and provide reasonable assistance to the other to the extent contemplated hereunder in the performance of all obligations under this Development Agreement and the satisfaction of the conditions of this Development Agreement. Upon the request of either party at any time, the other party shall promptly execute, with acknowledgement or affidavit if reasonably required, and file or record such required instruments and writings and take any actions as may be reasonably necessary under the terms of this Development Agreement to carry out the intent and to fulfill the provisions of this Development Agreement or to evidence or consummate the transactions contemplated by this Development Agreement.

J. Governing Law. This Development Agreement, including, without limitation, its existence, validity, construction and operation, and the rights of each of the parties shall be determined in accordance with the laws of the State of California.

K. Recitals. The recitals in this Development Agreement constitute part of this Development Agreement and each party shall be entitled to rely on the truth and accuracy of each recital as an inducement to enter into this Development Agreement.

L. Vesting - Recording. Property Owners shall provide City with a title report showing title to the property described in Exhibits A and B vested in Property Owners prior to execution of this Development Agreement by the City. The

City Clerk shall cause a copy of this Development Agreement to be recorded in the office of the Recorder of Riverside County no later than ten (10) days following execution of this Development Agreement by all parties.

M. Time. Time is of the essence of this Development Agreement and of each and every term and condition hereof.

N. No Third Party Beneficiaries. This Development Agreement is made and entered into for the sole protection and benefit of the parties and their successors and assigns. Except as expressly provided in this Development Agreement, no other person shall have any right of action based upon any provision of this Development Agreement.

O. Waiver. The failure of either party at any time to seek redress for any violation of this Development Agreement or any applicable law or regulation or to insist upon the strict performance of any term or condition shall not prevent any subsequent act or omission of the same or similar nature which would have originally constituted a breach of or default under this Development Agreement from having all the force and effect of an original breach or default, and such subsequent act or omission may be proceeded against to the fullest extent provided by this Development Agreement. No provision of this Development Agreement shall be deemed to have been waived by a party unless the waiver is in writing and signed by such party.

P. Partial Invalidity. If any term, covenant, condition or provision of this Development Agreement is held by a court of competent jurisdiction or by an arbitration proceeding to be invalid, void or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired or invalidated thereby. Notwithstanding the provisions contained herein, each party shall retain discretion to terminate this Development Agreement if the term, covenant, condition or provision challenged and found invalid results in a material frustration of the intent and purpose of this Development Agreement

or would substantially impair the rights of the parties to carry out the Project pursuant to Specific Plan No. 200.

Q. Binding Effect. The covenants and agreements contained in this Development Agreement shall inure to the benefit of, and shall be binding upon each of the parties and their respective heirs, administrators, successors and assigns.

IN WITNESS WHEREOF, the parties have duly executed this Development Agreement as of the day and year first above-written.

CITY OF MORENO VALLEY

RIR ASSOCIATES, a California General Partnership

By: Judith A. Nieburger

LEGAL DESCRIPTION - RIR ASSOCIATES PROPERTY

DESCRIPTION:

IN THE UNINCORPORATED AREA OF THE STATE OF CALIFORNIA, COUNTY OF RIVERSIDE, DESCRIBED AS FOLLOWS:

PARCEL_1:

THAT PORTION OF SECTION 2, TOWNSHIP 3 SOUTH, RANGE 4 WEST, SAN BERNARDINO BASE AND MERIDIAN, IN THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, ACCORDING TO OFFICIAL PLAT THEREOF, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHEAST CORNER OF SAID SECTION 2;
THENCE SOUTH 89 DEGREES 37' 30" WEST, ALONG THE SOUTH LINE OF SAID SECTION, 5280.8 FEET; TO THE SOUTHWEST CORNER THEREOF;
THENCE NORTH 00 DEGREES 35' 00" WEST ALONG THE WEST LINE OF SAID SECTION, 4711.5 FEET;
THENCE NORTH 89 DEGREES 37' 30" EAST, AND PARALLEL WITH THE SOUTH LINE OF SAID SECTION, 5304.12 FEET, TO THE EAST LINE OF SAID SECTION;
THENCE SOUTH 00 DEGREES 18' 00" EAST, ALONG THE EAST LINE OF SAID SECTION, 4711.5 FEET TO THE POINT OF BEGINNING;

EXCEPT A 10-ACRE TRACT DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHWEST CORNER OF SAID SECTION;
THENCE NORTH 00 DEGREES 35' 00" WEST, ALONG THE WEST LINE OF SAID SECTION, 660 FEET;
THENCE NORTH 89 DEGREES 37' 30" EAST, AND PARALLEL WITH THE SOUTH LINE OF SAID SECTION, 660 FEET;
THENCE SOUTH 00 DEGREES 35' 00" EAST, AND PARALLEL WITH THE WEST LINE OF SAID SECTION, 660 FEET TO THE SOUTH LINE OF SAID SECTION;
THENCE SOUTH 89 DEGREES 37' 30" WEST, ALONG THE SOUTH LINE OF SAID SECTION, 660 FEET, TO THE POINT OF BEGINNING;

ALSO EXCEPT THAT PORTION LYING NORTH OF THE SOUTH LINE OF A STRIP OF LAND 100 FEET WIDE AS CONVEYED TO THE STATE OF CALIFORNIA FOR HIGHWAY PURPOSES BY DEED RECORDED JUNE 30, 1936 IN BOOK 285 PAGE 203 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, SAID STRIP LYING 50 FEET ON EACH SIDE OF THE FOLLOWING CENTER LINE:

EXHIBIT A

BEGINNING AT A POINT IN THE WEST LINE OF SAID SECTION, DISTANT SOUTH 00 DEGREES 35' 06' EAST, 1404.43 FEET FROM A STONE MARKING THE NORTHWEST CORNER OF SAID SECTION;
 THENCE SOUTH 78 DEGREES 21' 40" EAST, 5419.21 FEET, TO A POINT IN THE EAST LINE OF SAID SECTION, DISTANT THEREON SOUTH 00 DEGREES 17' 50" EAST, 2506.84 FEET, FROM A STONE MARKING THE NORTHEAST CORNER OF SAID SECTION, THE SIDE LINES OF SAID STRIP OF LAND TO THE PROLONGED OR SHORTENED SO AS TO BEGIN IN THE WEST LINE AND END IN THE EAST LINE OF SAID SECTION;

ALSO EXCEPT THAT PORTION INCLUDED IN THAT CERTAIN PARCEL OF LAND CONVEYED TO THE STATE OF CALIFORNIA, BY DEED RECORDED SEPTEMBER 21, 1954 AS INSTRUMENT NO. 48429 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, DESCRIBED AS FOLLOWS:

BEGINNING ON THE WEST LINE OF SAID SECTION 2, DISTANT ALONG SAID WEST LINE SOUTH 0 DEGREES 35' 06" EAST, 1303.27 FEET FROM A STONE MARKING THE NORTHWEST CORNER OF SAID SECTION 2, SAID WEST LINE BEING ALSO THE CENTER LINE OF DAY STREET, 60 FEET WIDE;

THENCE COURSE "A", SOUTH 78 DEGREES 21' 40" EAST, 30.70 FEET, TO THE EAST LINE OF SAID DAY STREET;

THENCE SOUTH 46 DEGREES 26' 17" EAST, 92.41 FEET;

THENCE SOUTH 82 DEGREES 07' 15" EAST, 350.75 FEET;

THENCE SOUTH 78 DEGREES 21' 40" EAST, 400.00 FEET;

THENCE SOUTH 76 DEGREES 43' 28" EAST, 350.14 FEET;

THENCE SOUTH 78 DEGREES 21' 40" EAST, 1683.17 FEET;

THENCE ALONG A TANGENT CURVE CONCAVE NORTHERLY WITH A RADIUS OF 4900 FEET; THROUGH AN ANGLE OF 12 DEGREES 46' 22", A DISTANCE OF 1092.34 FEET;

THENCE NORTH 88 DEGREES 51' 58" EAST, 1315.38 FEET;

THENCE NORTH 30 DEGREES 50' 53" EAST, 96.61 FEET, TO THE WEST LINE OF FREDERICK STREET, 60 FEET WIDE;

THENCE COURSE "B", NORTH 88 DEGREES 51' 58" EAST, 30.00 FEET, TO THE EAST LINE OF SAID SECTION 2, LAST SAID EAST LINE BEING ALSO THE CENTER LINE OF SAID FREDERICK STREET, DISTANT ALONG LAST SAID EAST LINE SOUTH 0 DEGREES 17' 50" EAST, 1921.20 FEET FROM A GRANITE ROCK MARKING THE NORTHEAST CORNER OF SAID SECTION 2;

THENCE ALONG LAST SAID EAST LINE, SOUTH 0 DEGREES 17' 50" EAST, 534.54 FEET TO THE NORTHERLY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED

TO THE STATE OF CALIFORNIA, FOR HIGHWAY PURPOSES, BY DEED RECORDED JUNE 30, 1936 IN BOOK 285 PAGE 203 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA;

THENCE ALONG SAID NORTHERLY LINE OF THE STATE OF CALIFORNIA PARCEL OF LAND, NORTH 78 DEGREES 21' 40" WEST, 30.67 FEET, TO SAID WEST LINE OF FREDERICK STREET;

THENCE ALONG LAST SAID WEST LINE NORTH 0 DEGREES 17' 50" WEST, 61.59 FEET;

THENCE NORTH 60 DEGREES 17' 50" WEST, 201.81 FEET;

THENCE ALONG A TANGENT CURVE CONCAVE SOUTHERLY WITH A RADIUS OF 500 FEET; THROUGH AN ANGLE OF 30 DEGREES 50' 12", A DISTANCE OF 269.10 FEET;

THENCE SOUTH 88 DEGREES 51' 58" WEST, 930.19 FEET;

THENCE ALONG A TANGENT CURVE CONCAVE NORTHERLY WITH A RADIUS OF 5110 FEET, THROUGH AN ANGLE OF 12 DEGREES 46' 22", A DISTANCE OF 1139.15 FEET;

THENCE NORTH 78 DEGREES 21' 40" WEST, 2758.34 FEET;

THENCE SOUTH 50 DEGREES 31' 37" WEST, 62.78 FEET, TO SAID EAST LINE OF DAY STREET;

THENCE COURSE "C, NORTH 78 DEGREES 21' 40" WEST, 30.70 FEET, TO SAID WEST LINE OF SECTION 2, DISTANT ALONG LAST SAID WEST LINE, SOUTH 0 DEGREES 35' 06" EAST, 301.57 FEET FROM THE POINT OF BEGINNING;

THENCE ALONG LAST SAID WEST LINE, NORTH 00 DEGREES 35' 06" WEST, 301.57 FEET, TO THE POINT OF BEGINNING;

ALSO EXCEPT THOSE PORTIONS OF SAID LAND AS CONVEYED TO THE STATE OF CALIFORNIA BY DEED RECORDED MAY 25, 1962 AS INSTRUMENT NO. 48965 IN BOOK 3147 PAGE 173 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA AND AS QUITCLAIMED BY RIVERSIDE INTERNATIONAL RACEWAY, BY QUITCLAIM DEED RECORDED MAY 25, 1962 AS INSTRUMENT NO. 48964 IN BOOK 3147 PAGE 188 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA;

ALSO EXCEPTING THEREFROM THAT PORTION THEREOF CONVEYED TO THE COUNTY OF RIVERSIDE BY DOCUMENT RECORDED SEPTEMBER 22, 1976 AS INSTRUMENT NO. 141864 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

SAID PROPERTY IS ALSO DESCRIBED AS FOLLOWS:

PARCEL 1 OF RECORD OF SURVEY AS SHOWN BY RECORD OF SURVEY ON FILE IN BOOK 40 PAGE 91 OF RECORDS OF SURVEY, RECORDS OF RIVERSIDE COUNTY, CALIFORNIA;

EXCEPTING THEREFROM THAT PORTION THEREOF CONVEYED TO THE COUNTY OF RIVERSIDE BY DOCUMENT RECORDED SEPTEMBER 22, 1976 AS INSTRUMENT NO. 141864 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

PARCEL 2:

THE NORTHWEST QUARTER OF SECTION 11, TOWNSHIP 3 SOUTH, RANGE 4 WEST, SAN BERNARDINO BASE AND MERIDIAN, OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA;

EXCEPTING THEREFROM THAT PORTION THEREOF CONVEYED TO THE COUNTY OF RIVERSIDE BY DOCUMENT RECORDED SEPTEMBER 22, 1976 AS INSTRUMENT NO. 141864 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

LEGAL DESCRIPTION - RYDER PROPERTY

26860

In the State of California, County of Riverside, City of Moreno Valley, described as follows:

Lot 2 in Block 1 of the Alessandro Tract as shown by map on file in Book 6, Page 13 of Maps, Records of San Bernardino County, California;

Together with those portions of Eucalyptus Avenue and Elsworth Street, within said block, lying northerly of the westerly prolongation of the southerly line of said lot and westerly of the northerly prolongation of the easterly line of said lot.

EXHIBIT B

26860

MEMORANDUM RE AGREEMENT FOR
MORENO VALLEY MIXED USE DEVELOPMENT
PROJECT - RIVERSIDE RACEWAY

This Memorandum sets forth the understanding (hereinafter the "Agreement") reached by and among RIR ASSOCIATES, a California General Partnership (hereinafter referred to as "RIR"), the CITY OF MORENO VALLEY, a municipal corporation of the State of California (hereinafter referred to as the "City"), and the COMMUNITY REDEVELOPMENT AGENCY OF THE CITY OF MORENO VALLEY, a community redevelopment agency existing pursuant to the California Redevelopment Law (Sections 33000 and following of the California Health and Safety Code), (hereinafter referred to as the "Agency"), and in some instances hereinafter collectively referred to as "the Parties," as follows:

1. Recitals.

1.1. The purpose of this Memorandum is to set forth the understanding agreed to by the Parties relative to the herein described facts of the proposed development of the property depicted on Exhibit "A", a portion of which heretofore has been known as the Riverside International Raceway property, (hereinafter referred to respectively as "Property" and the "Project"), which is described in more detail in the proposed Specific Plan therefor, hereinafter referred to as the "Specific Plan", now or hereafter on

EXHIBIT C

file with the City and by this reference herein incorporated.

1.2. The Property consists of approximately 590.7 acres.

1.3. A portion of the Property is presently in the unincorporated area of Riverside County and consists of approximately 555.7 acres, and the remainder of the Property consists of approximately 35 acres, as depicted on Exhibit "A" to this Agreement, which is presently within the City. Both parcels comprising the Property and the various portions and phases of the Project are integrated, and the accomplishment and the performance by the Parties of the provisions of this Agreement are substantial, significant factors in the successful accomplishment of the Project, without which the Parties would not in reliance thereon have entered into this integrated nonseverable Agreement.

1.4. The Parties agree that the development of the Project at the earliest practicable date will result in the generation of revenues, benefits and an enhancement of the quality of the life of the present and future residents of the City which otherwise might not occur to the same degree or which might not occur at all, or which might occur only at a substantially later date. Hence the provisions hereof are acknowledged to be to the mutual benefit of both Parties. The benefits contemplated include, but are not limited to:

(a) The opportunity for the availability of community and regional retail facilities which at the present time would not seem reasonably likely to be established elsewhere in the City and which presently are not found or planned in the City;

(b) Readily available consumer facilities for present and future residents of the City;

(c) Commercial development and office space for business concerns creating local employment opportunities;

(d) Medical and other professional needs;

(e) Community, public, civic and local recreational facilities, public facilities, Town Center Recreation Center and community park;

(f) A Master Plan for Flood Control and Erosion Control Improvements as needed for the western portion of Moreno Valley;

(g) As needed road improvements;

(h) As needed water system improvements;

(i) As needed sewer extensions and enhancements;

(j) Elimination of certain blighted structures, buildings and other improvements associated with operation of the Riverside International Raceway;

(k) A broad range of other area-wide infrastructural and socially desirable benefits.

1.5. The Parties contemplate, subject to the accomplishment of the various matters herein provided in the

sequence herein provided, that the Property shall be annexed to the City and the Agency and developed as described in the Specific Plan, which provides for the Project to be a portion of the City's urban core, to act as the catalyst, and to provide the momentum to assure that the City at an early date will be able to achieve, to the extent adopted by the City, the goals and objectives set forth for the City in the December, 1986 PANEL ADVISORY Study conducted by the Urban Land Institute for the City.

1.6. In addition to this Agreement, the Parties as a supplement to this Agreement are preparing an Owner Participation Agreement which to the extent therein provided may supplement or amend this Agreement and may incorporate:

- (1) An Annexation and Development Agreement
- (2) This Agreement or the provisions hereof
- (3) A Redevelopment Plan

1.7. To the extent permitted by law, City agrees to initiate and diligently pursue for final consideration at the earliest practicable date proceedings for approval of the Specific Plan and subsequent consideration by the Local Agency Formation Commission of Riverside County, hereinafter "LAFCO," in order that the portion of the Property now located outside the City may be annexed to the City and prior to or thereafter may be included within a Project Area of Agency following the conclusion of the statute of

limitations on the approval of the land use entitlements and the Specific Plan. If the Project Area is established prior to annexation of the Property to the City, the City will not implement the Redevelopment Plan therefor prior to successful completion of the annexation proceedings, except with the consent of RIR.

2. Project Development and Schedule.

2.1. Development of the Project shall be phased to allow for orderly financing, development and absorption of the Project as provided in the Specific Plan (which may be delayed by reason of a change in economic conditions), which shall allow RIR or its successor(s), in whole or in part, in its discretion to defer the accomplishment thereof or may allow RIR to accomplish the Project in its discretion at earlier points in time. The City and Agency shall have no obligation under Article 4 of this Agreement until RIR has given the City reasonable assurances that the development to be accomplished under any particular Phase will be sufficient to permit the City and Agency to reasonably anticipate the financial obligations required and will not impair the ability of the City and Agency to satisfy such obligations.

2.2. It is presently proposed subject to approval of the Specific Plan in the manner provided by law that the Project as depicted on Exhibit "B" to this Agreement will

be developed to the extent and as provided in this Agreement for the following three types of Land Use Classifications (hereinafter "LUC"):

- (1) LUC I. Community Retail and residential uses.
- (2) LUC II. Mixed Use Commercial, Office, Community Service, Residential and Research and Development Uses.
- (3) LUC III. Regional Center, Office and/or Mixed Use Commercial Development.

2.3. It is contemplated that the following amounts of acreage will be utilized for the various types of LUCs:

- 90.1 acres for a Regional Center and/or Mixed Use Commercial Development
- 50.7 acres for Community Retail Development
- 95.0 acres for Mixed Use Office
- 28.2 acres for Hospital-Medical Uses
- 8.6 acres for Town Center Area
- 6.6 acres for Park Uses
- 20.4 acres for School Use
- 234.7 acres for Residential Uses
- 54.3 acres for Major Roads
- 2.1 acres for California Aqueduct Easements

As development occurs RIR may request different amounts of acreage to be utilized for such purposes and LUCs for the accomplishment of the Project consistent with the earliest

practical accomplishment of the Project for the benefit of the Parties, including generation of funds for City and Agency to provide infrastructure and services as required for the Project or for debt service requirements.

Upon request of RIR, City and Agency, to the extent permitted by law, agree to initiate and diligently pursue for final consideration at the earliest practicable date all actions and proceedings necessary to accomplish the Project and to provide all contemplated infrastructure as well as services, processing, approvals, permits, inspections and occupancy entitlements, as well as contemplated funds and public financing in order to accomplish the Project as described in this Agreement.

2.4. Subject to the provisions of Art. 2.1, the proposed chronological development of the Project is as follows:

		<u>Approvals Complete for Commencement of Construction</u>	<u>Completion</u>
Phase I.	Community Retail	1986	1991
	Residential	1986	1990
Phase II.	Mixed Use	1998	2005
	Residential	1998	1998
Phase III.	Regional Center/ Mixed Use Commercial	1990-91	1995

As herein provided and subject to Art. 4.1.24, the Parties agree to initiate and diligently pursue for final consideration all actions necessary to accomplish the foregoing including as herein provided annexation and inclusion of

the Project in Agency and a Project Area thereof following final consideration of the Specific Plan for the Project as proposed or modified by mutual agreement of the Parties.

3. The RIR Proposal.

3.1. The RIR Proposal requested that the City and the Agency provide public improvements and infrastructure and fee waivers to a total value of approximately \$24,000,000, exclusive of financing costs.

3.2. The City has retained independent economic advice and analysis from Wedin Enterprises, Inc. Based on such studies and recommendations, the obligation of the City in response to the RIR Proposal described in Section 3.1 hereof is as follows:

3.2.1. City and Agency, to the extent of their herein contemplated obligations and subject to Art. 4.1.5 and Art. 4.1.24, shall provide funding requested by RIR to the extent of the tax increment following inclusion of the Property in Agency and one of its Project Areas (hereinafter the "Debt Service Funds"). The Debt Service Funds shall be used for debt service of financing of the herein described essential function facilities or for the acquisition or construction of such facilities.

3.2.2. The Agency, prior to or following approval of the Specific Plan and annexation of the Property and subject to Art. 4.1.24, shall initiate and diligently pursue for final consideration at the earliest

practicable date inclusion of the Property in a Project Area of Agency and, to the extent permitted, authorize and issue bonds or other securities to finance and fund the obligations of City and Agency provided for in this Agreement. City and Agency mutually agree to consult RIR regarding retention of Bond Counsel.

3.2.3. The City is not able to finance residential infrastructure needs since it has not been done for others and is not proposed to be done for others, and the residential product in the City is able to be effectively marketed without funding such facilities. Accordingly, if the residential portions of the Project are included within a Project Area, the Agency and RIR must mutually agree on a satisfactory method to satisfy any redevelopment requirement applicable to residential development. To the extent that required Project residential developments are different than that contemplated within the Specific Plan, subject to Article 4.1.24, said requirement(s) shall be satisfied in another part of the Project Area and not on the Property.

4. Funding of Project Facilities.

4.1. In consideration of the foregoing, depending upon confirmation (substantiation) of fiscal, appraisal, and engineering data relied upon by the Parties during discussions to date to establish the basis for governmental participation, the Parties agree that facilities and rights

of way costing \$14,800,000 (hereinafter the "Project Funding") must be funded or financed by City and/or Agency for the Project to proceed. Such improvements shall include, but not necessarily be limited to, street improvement costs, water and sewer facilities, as well as landscaping of parks and parkways, the Project's proportionate share of freeway on-ramps at Highway 60, if required by CalTrans, traffic signals, right of way acquisition, and other such essential function public facilities. Relative to the \$14,800,000 of facilities as herein described contemplated to be funded by City and Agency, through RIR, the amount thereof in one Phase may be increased by reducing the amount in one of the other Phases, and the fiscal feasibility and confirmation of need required shall take into consideration the cumulative effect of all contemplated Phases as well as the proposed Phases, including the accomplishment of the facilities proposed to be financed. In the event the commercial or research and development land use within the Project is greater than the Table set forth in Section 2.3 of this Agreement so that a greater land area is designated for such uses (and the residential element reduced), the City and Agency agree to use their best efforts to increase the Project Funding by application of the same standards, measures and methodology provided for herein for non-residential uses.

4.1.1. City and Agency contemplate funding as

requested by RIR approximately \$5,600,000 of the Project Funding for the cost of the hereinabove described public facilities of the Community Retail Development and arterial road improvement for Phase I (exclusive of residential development) referred to in Section 2.4 of this Agreement.

4.1.2. The City and Agency contemplate funding as requested by RIR approximately \$4,400,000 of the Project Funding for the cost of the hereinabove described public facilities or capacity charges of the Office, Mixed Use Commercial Facilities for Phase II (exclusive of residential development) referred to in Section 2.4 of this Agreement. It is also acknowledged that a portion of the City and Agency provision for such public facilities will be required for the subsequent development of the Regional Retail or Mixed Use Development.

4.1.3. The City and Agency contemplate funding approximately \$4,800,000 of the Project Funding for the cost of the hereinabove described facilities or capacity charges of the Regional Center which is provided to insure the ability of RIR to accomplish the Regional Center. The City and Agency acknowledge that adjustments to the amounts of public funding needed to make the Regional Center competitive may be warranted by future conditions. The City and the Agency will use their best efforts to address any such future adjustments.

4.1.4. The infrastructure requirements of each

2 60

Phase of the Project shall be carefully delineated to separate residential, residential-related and nonresidential uses.

4.1.5. The total amount of Project Funding of City and Agency to the Project shall not exceed \$14,800,000 in construction, right of way acquisition and/or development fee costs, exclusive of bond reserve, discount, agreed upon capitalized interest, if any, and issuance costs.

4.1.6. To the extent permitted by law, all the essential function public facilities to be paid for by Project Funding at the election of RIR may be constructed by RIR to be acquired on completion by City and Agency. Payment shall be from the bond or other funds of City and Agency as herein provided.

Step 1. All engineering, right of way acquisition and improvement construction costs shall be verified and based upon pro forma review, with RIR need therefor confirmed. To the extent permitted by law, it is contemplated that any contracts for the construction by RIR of any herein described facilities shall not be public works contracts and may be contracted for by RIR consistent with the accepted practices for the building construction industry in Riverside County.

Step 2. Subject to Article 4.1.24, an Assessment District or Community Facilities District type financing, as encumbrances on the Property to the extent of the fixed lien of an assessment district or the annual lien of a levy of taxes of a community facilities district or both, shall be formulated to finance agreed-upon essential function infrastructure needs. Funds for debt service on bonds issued for Project Funding to facilities for non-residential portions of the Project shall be provided as set forth in this Agreement.

Step 3. Such financing may include a provision for capitalized interest to cover the period between the Assessment District (or Community Facilities District) funding of the improvements and the generation of income for debt service as provided in this Agreement. If funds for debt service as otherwise herein provided are not adequate for debt service, RIR will loan subject to repayment, funds for such interim debt

service requirements subject to subsequent repayment from the sources of debt service funding provided for in this Agreement with interest as herein-after provided, which to the extent permitted by law shall be exempt from state and federal taxes.

Step 4. Annual payments from the herein described funds generated by the Project shall be deposited to the Bond Amortization Fund of any such financing or to pay off bonds (at Agency's option). Any debt amortization obligations beyond that agreed to are the responsibility of the landowner. Should development be insufficient to meet the herein provided obligations for such debt service, any shortfall shall be a loan by the Property Owners to be repaid from future tax receipts from the Project to the extent herein provided, together with interest at the average net effective interest rate on all such bonds outstanding during the period of any such loan.

4.1.7. The City or the Agency will be responsible for highway and/or vehicular traffic circulation improvements necessitated by the Project beyond those the responsibility for which is allocated by this Agreement, including but not limited to:

(a) Freeway widening immediately adjacent to the Project if required by the State of California or other appropriate governmental entities (exclusive of RIR's prorata share of the cost of an on-ramp at Pigeon Pass Westbound, if required);

(b) Improvements on Eucalyptus Street west of Day Street if required;

(c) Improvements on I-215 if required;

(d) Intersection improvements at Frederick Street and Sunnymead Boulevard, if required.

The cost of the foregoing items (a) through (d) inclusive shall not be required of the Project or RIR, but shall be provided by City and Agency or others consistent with the need therefor in relation to the herein provided dates for accomplishment of the Project and shall be provided through prompt funding of City or Agency in order to facilitate the timely development of the Project.

4.1.8. City agrees to adhere to responsible planning practices and to the extent permitted by law shall not enter into agreements which would conflict with the

regional commercial development objectives or implementation of this Agreement.

4.1.9. City agrees to initiate and diligently pursue for final consideration proceedings pursuant to Section 66483 and following of the Government Code to establish and update a Master Plan of Drainage for the entire City, including, but not limited to, the Edgemont area. The proceedings for such a Master Plan of Drainage shall be promptly commenced and completed in a timely manner to facilitate the ultimate elimination of temporary drainage facilities on the Property.

4.1.10. The City and RIR will jointly defend any legal challenges that may be brought regarding entitlements or any other feature of this Memorandum of Understanding, unless any such action is brought as a result of an individual act or omission attributable to one or more of the parties acting outside of the scope of this Memorandum, in which event the defense of such legal challenge shall be the responsibility of the party whose act or omission gave rise to the legal challenge. In no event shall any Party to this Agreement be liable to the other Parties for any damages or costs in excess of an aggregate Twenty Thousand Dollars (\$20,000).

4.1.11. The City will prepare or have prepared, at its expense, any memorandum of understanding needed to supplement this Memorandum.

4.1.12. The term of the Redevelopment Plan will be sufficient to cover the amortization period of bonds issued to cover public improvements for the Project, up to a maximum of 30 years.

4.1.13. RIR agrees to provide development levels, quality descriptions of projects (including a design handbook) and anticipated promotional levels for the Project.

4.1.14. The construction portion of the Redevelopment Plan will be governed by building and related codes in effect at the time of issuance of permits for that activity which unless required by a change in circumstances shall be as presently provided and shall be of uniform applicability in the City.

4.1.15. RIR will dedicate, (subject to acceptance, ownership and operation by the City) at no cost to City, a recreation center/community swimming pool and park, as described in the Specific Plan, at the point in time specified in the Specific Plan. The site cost of the town center and park development shall be borne by RIR.

4.1.16. A pro forma will be provided for each development for which City or Agency support is requested. To the extent permitted by law, such documents will remain confidential to the parties.

4.1.17. The City and RIR will work together to secure support for freeway landscaping and signing from the

California Department of Transportation.

4.1.18. RIR will support having its property annexed to the City and included in the Project Area of Agency as well as an assessment district and a community facilities district as described herein. The right to protest any such proceedings is not waived but may be waived by RIR. Neither does RIR by the terms of this Agreement waive any requirements for any notices or hearings for any proceedings referred to in this Agreement. RIR is amenable to waiving such rights to the extent permitted by law subsequent to the following: (i) the expiration of the applicable statute of limitations subsequent to approval of the Specific Plan and all land use entitlements and approvals for the accomplishment thereof as proposed (timing and phasing); (ii) the statute of limitations applicable to a Notice of Determination relative to such approvals has expired; (iii) the facilities to be financed by any such assessment districts or community facilities district have been agreed upon together with bond sale amounts and inclusion of agreed upon capitalized interest, and the amount and date of the first sale have been agreed upon; and (iv) the Property has been included in Agency and one of its Project Areas. In the event RIR protests any such proceedings, and good faith negotiations between the parties hereto result in a failure to resolve such protests, City and Agency shall thereby be relieved of

all further obligations under this Agreement.

4.1.19. Should significant changes in land use take place during the entitlement process from that which has been considered in this Memorandum, all parties will endeavor in good faith to reach an equitable and different understanding for development of the Project.

4.1.20. The City will prepare appropriate financing documents for Assessment District or Community Facilities District formation and Agency reimbursement mechanisms.

4.1.21. A detailed timing or schedule document will be prepared by the City and RIR to track all major activities involved in the Project and how such activities relate to each other. Moreover, the City will prepare a coordinated financing schedule agreed to by both parties to assure compatibility with funding needs and in compliance with sound underwriting practices for municipal debt financing.

4.1.22. RIR will participate in a local non-profit purchasing corporation to the extent such participation will not increase the cost or impede scheduling of the Project and encourage (and require as possible) others to do so also.

4.1.23. City agrees, subject to applicable legal and discretionary procedures and consistent with sound municipal financing practices, to implement as requested by

21-00

RIR public financing by assessment districts or community facilities districts, or both, to finance facilities for the residential portions of the Project.

4.1.24. The Parties hereto understand and agree that certain actions of the City and Agency contemplated hereunder, including but not limited to such actions as the annexation of the Project to the City, the formation and adoption of a redevelopment plan and the formation and financing through assessment or other special districts, require compliance with legal procedures and requirements and public hearings and discretionary decisions. Nothing herein shall be deemed to pre-commit the City or Agency in any manner contrary to such legal procedures or requirements, it being understood and agreed that all references herein to such actions and proceedings shall be qualified by the necessity of compliance with any such applicable legal procedures and requirements.

4.1.25. This Memorandum is intended to be a valid preannexation agreement as to the Property owned by RIR to be supplemented or replaced subsequently by an Annexation and Development Agreement for the Property. This Agreement shall not be construed to vest in RIR or any other person or entity any zoning or other developmental right or entitlement at this time. Such rights and entitlements must ensue from approvals by the City and the Agency after regular proceedings conducted to consider the

26860

granting or denial thereof. However, to the extent of the approval of the Specific Plan by the City, this Agreement shall be a valid preannexation agreement vesting all such described rights in RIR to the extent that vesting shall have been effectuated by the approval of the Specific Plan by City, and the portion of the Property now within City shall be entitled to all the benefits of the provisions of this Agreement as an integrated portion of the Project.

WHEREFORE, in understanding the foregoing, the parties hereto have executed this Memorandum of Understanding as of the 11th day of March, 1986.

**PLANNING COMMISSION
STAFF REPORT**

Case: P13-138 - Development Agreement
Amendment

Date: June 26, 2014

Applicant: Palm Tree Communities Consulting Inc.

Representative: John Loper

Location: Generally located within the TownGate
Specific Plan area, west of Frederick
Avenue, east of Day Street, and south
of Highway 60.

Proposal: Fourth Amendment to the TownGate
Development Agreement

Recommendation: Approval

SUMMARY

The proposed adoption of the Amendment to the Development Agreement would extend the term of the Agreement for an additional five years. The extension of the Agreement is warranted as spelled out in the provisions of the Agreement to fully carryout the development of the TownGate Project. Amending the Agreement will further assist in the full and complete implementation of the TownGate Specific Plan.

PROJECT DESCRIPTION

Background

On October 28, 1986, the Moreno Valley City Council enacted an ordinance approving the Annexation and Development Agreement (the Agreement) for the TownGate development project. After the 30 day statutory requirement, the Annexation and Development Agreement went into effect on November 27, 1986. The Agreement was adopted pursuant to State law and the City's established procedures and requirements for development agreements.

The Agreement along with the Specific Plan established the planning and development of the mixed-use development project consistent with the approved Specific Plan. The use of the Agreement codified a Memorandum of Understanding (MOU) between the City, the Redevelopment Agency, and the developer/property owner of Towngate (the Fritz Duda Company and its other related development entities involved in the Town Gate project). The MOU spelled out a means for funding the infrastructure necessary for the development of the TownGate project, as well as the scope of development of the development plan for the mixed-use development project.

The term of the Agreement was for a 20-year term and was established to undertake and build-out the entire TownGate development project consistent with the approved Specific Plan. On September 28, 2006, the City Council approved the second amendment to the Development Agreement which provided a five year extension to November 27, 2011. In November 2011, the City Council approved an additional five year extension to November 27, 2016.

Section 3-D of the Agreement states that "the timing may be tolled during any periods of delay resulting from acts of God, or other causes including but not limited to real estate, economic, financial and market conditions reasonably beyond the control of the property owner."

The representative for TownGate has requested that the City consider extending the term of the Agreement by five years in recognition of the economic downturn of the last few years along with the economic challenges of the 1990's. Moreno Valley has experienced a severe economic downturn in the local economy during these periods which also impacted the TownGate area. In pursuit of the completion of the TownGate Specific Plan and the development governed by the Development Agreement, the applicant believes the five year extension is warranted and appropriate with the terms and conditions of the original Agreement.

The continued development of TownGate is an important component of the City's economic development efforts. The extension of the TownGate Development Agreement will help assist in attracting new development projects to the TownGate area, which in turn will enhance the economic vitality of Moreno Valley.

REVIEW PROCESS

ENVIRONMENTAL

The proposed modification to the Agreement involves only a change to the term of the agreement. Based on review of the project, staff determined that the project qualifies as an exemption under California Environmental Quality Act (CEQA) Guidelines Section 15061(b)(3) in that the proposal does not have the potential for a physical impact to the environment.

NOTIFICATION

A public hearing notice for the project (one-eighth page display advertisement) was published in the Press-Enterprise.

STAFF RECOMMENDATION

Staff recommends that the Planning Commission **APPROVE** Resolution 2014-19 and thereby **RECOMMEND** that the City Council:

1. **RECOGNIZE** that the Development Agreement Amendment will not have the potential for any direct or indirect impacts under CEQA and is therefore exempt under Section 15061 of the CEQA Guidelines; and,
2. **APPROVE** Amendment 4 to the Development Agreement (P13-138) based on the Findings contained in the attached Resolution (Attachment 2).

Prepared and Approved by:

Chris Ormsby, AICP
Interim Planning Official

1 **6. Case Description: P13-138 Development Agreement Amendment**
2 **Case Planner: Chris Ormsby**

3
4 **CHAIR GIBA** – Alright case description P13-138, Development Agreement
5 Amendment, Palm Trees Consulting Incorporated. Is the applicant here?
6

7 **INTERIM PLANNING OFFICIAL ORMSBY** – Yes
8

9 **CHAIR GIBA** – Okay, you don't have to get up yet. It's alright, I just wanted to
10 make sure you are here. We've had that happen before where the applicant
11 didn't show, so I was just curious, and so who is the case planner on this one?
12

13 **INTERIM PLANNING OFFICIAL ORMSBY** – I am the Case Planner on this.
14

15 **CHAIR GIBA** – Hi Chris. Chris is it.
16

17 **INTERIM PLANNING OFFICIAL ORMSBY** – Members of the Planning
18 Commission, the item before you is the fourth amendment to the Town Gate
19 Development Agreement. The proposed amendment to the agreement would
20 extend the term of the agreement for an additional five years. For the record, the
21 Town Gate area is generally located east of Day Street, west of Frederick and
22 southerly of State Highway 60 in the Specific Plan area known as Specific Plan
23 200. In November of 2011 the City Council approved an extension to the term of
24 the agreement by five years. There is still a little more than two years remaining
25 on the term of the agreement. The purpose of the request at this time is to
26 provide more certainty for securing future development within Town Gate
27 because phase development can take several years for projects to develop and if
28 there are questions in that regard, the applicant or the developer's representative
29 can elaborate on that and John Loper of Palm Trees Communities Consulting is
30 the applicant's representative and he is here tonight to answer any questions in
31 that regard and with that Staff would recommend that the Planning Commission
32 approve Resolution No. 2014-19 as provided for in the Staff Report and I'll open
33 it for questions of Staff.
34

35 **CHAIR GIBA** – Questions?
36

37 **COMMISSIONER LOWELL** – Could you enlighten us a little more about what
38 the intent of the agreement was. I noticed all the streets are built, the utilities are
39 in and we just have a hodge podge of development here and there. I mean if we
40 extend this another five years, what's the ultimate five years from now?
41

42 **INTERIM PLANNING OFFICIAL ORMSBY** – The applicant can I think elaborate
43 on the details of the agreement but there are some benefits for extending it. The
44 benefits however wouldn't have a fiscal impact to the City because for example
45 impact fees are not governed in this case by this particular agreement, but I think

1 the applicant could elaborate on that. Perhaps John has some additional
2 comments.

3
4 **COMMUNITY & ECONOMIC DEVELOPMENT DIRECTOR TERELL** – Well I
5 think one of the major provisions of really every development agreement that I've
6 worked on is protection related to changes in land use and that while a
7 development agreement is in place, those have to be mutually agreed upon
8 between the owner of the property and the City and so that provides more
9 certainty if we feel at this point in time that these are the appropriate uses for that
10 portion of the community that they won't and I'll use this term loosely, applies to
11 nobody currently working for the City or in City government, arbitrarily changing it
12 in the future. That's really most development agreements, that's the main benefit
13 is that there is orderly development because there won't be some sudden
14 change in land use. Is that clear? I'm sorry. That's the main reason why a
15 development agreement is of benefit because a large investment has been made
16 by this developer and other developers have done the same, so that large
17 investment is precedent on being able to develop according to the approved plan
18 and if there is some chance that that could be changed wholly by the City to
19 some other land use, that is a development risk that makes the investment less
20 valuable.

21
22 **CHAIR GIBA** – Questions?

23
24 **COMMISSIONER VAN NATTA** – So we just keep extending it five years at a
25 time until they finish their development, right?

26
27 **INTERIM PLANNING OFFICIAL ORMSBY** – The applicant will elaborate on that
28 but I think they believe this will be the last extension that will be needed to build
29 out the remaining parcels, but I'll let John Loper discuss that.

30
31 **CHAIR GIBA** – Any more questions for Staff?

32
33 **COMMISSIONER BARNES** – You had said that there are two years left
34 currently. They are just being proactive in guaranteeing the three subsequent?

35
36 **INTERIM PLANNING OFFICIAL ORMSBY** – That's correct. It would then
37 basically give them seven years total to finish off what remains to be done.

38
39 **COMMISSIONER BARNES** – Okay

40
41 **CHAIR GIBA** – Well if there are no more questions of Staff can we bring the
42 applicant up? Were you here back in 2011? Was that you that came?

43
44 **APPLICANT LOPER** – Yes I've been working on this project since about this
45 time in 2001. My name is John Loper and thank you for allowing me to speak
46 tonight. I have been involved in Town Gate since 2001 and been involved in

1 finishing out the residential units and building basically everything other the
2 Costco on Day Street and rehabbing and re-tenanting the Frederick properties
3 after we lost almost all of our major tenants there. The development agreement
4 was originally done in conjunction with the Specific Plan and some other
5 documents with the City regarding us building a bunch of infrastructure which has
6 been completed and we are asking for an extension of the development
7 agreement for a couple of reasons.

8
9 One of the things the development agreement includes is that if an extension can
10 be granted if there is an economic downturn and we've basically had a six year
11 economic downturn since 2008 and we are still recovering from it. We had to
12 backfill a lot of spaces instead of building new spaces and backfill some
13 restaurants, which we still have an empty restaurant on Day Street and so we're
14 requesting a five year extension as a result of the six years of so far of economic
15 problems. Things are a little better but not great, especially in the retail industry.
16 So that is one of the reasons why we are doing this.

17
18 Another thing is we have of the product the land that we have left, we have
19 approximately ten restaurant or pads and we have six office pads or areas that
20 can be used for office, hotel or senior housing projects. Those are the Winco
21 sites, Town Gate Square and the ten pads are surrounding all the shopping
22 centers that are vacant pads and we believe that it's going to take another six or
23 more years to fill these properties and some of these properties such as an office
24 development that maybe had two or three buildings or a senior housing
25 development, under the current development lending practices, they only let you
26 build very small phases one at a time and fill up a building, or fill up senior
27 housing or fill up an office building before they let you build the next one. We
28 don't build... when I worked on Stonegate Apartments which is 500 units, they
29 built it all in one phase and now we would have to build that in four or five phases
30 because banks won't lend.

31
32 So one of the things we need is certainty to bring in the office developer or senior
33 housing developer to know if they were to buy property for three buildings, that
34 they would have this development agreement intact for four or five years which it
35 may take to get three buildings up, filled up and then be able to build the next
36 one and the next one and the process also takes a little while to even build your
37 first building, so we're running now at a little over two, about two and half years to
38 the end and this is the point where it makes it very difficult to market land to office
39 experts and also we know for example restaurants... I would love to bring in
40 another six or seven major restaurants to Moreno Valley as we have done in the
41 past 10 or 12 years. With ten pads, we know we can't do that in the next two and
42 half years, so we're requesting an extension of the development agreement to
43 allow us to try to finish out the project in an orderly manner and bring in the
44 quality tenants that we have in the past. So I'm available for any questions.

45

1 **COMMISSIONER LOWELL** – If you had to guess, about what percent of the
2 land is yet to be developed?

3
4 **APPLICANT LOPER** – I don't have that statistic right in front of me. Over half of
5 Town Gate Square, which is the property where the Winco is located at Day and
6 Eucalyptus, is yet to be developed. The original phase when I did the Winco I
7 think in 2005 or 2006 was I think about 40 percent and we still have three vacant
8 retail pads and we have eight office pads there; seven or eight that are on that
9 property and then we have several pads in the back of Town Gate Center where
10 the TJ Maxx and Home Goods is now. There is at least three pads that are
11 available there. We have the pad on the corner, so I would say of the properties
12 that we asking on the extension it is probably less than 20 percent, but on two
13 properties it is significant number of the Town Gate Center and Town Gate
14 Square.

15
16 **COMMISSIONER LOWELL** – Just for my own inquiry, next to Mimi's Café there
17 is a building that looks that it used to be or intended to be a Red Lobster. Is
18 there anything going into that facility in the near future?

19
20 **APPLICANT LOPER** – That was actually... I had a Red Lobster signed up. I
21 actually have them twice in Moreno Valley signed up and they backed out on me.
22 That particular building was a Johnny Carino's and that was a pad that was sold
23 to the franchisee that owned many restaurants in Southern California. He went
24 bankrupt. It was subsequently transferred to the bank and the last I heard, the
25 bank still owns that. We have attempted in conjunction with the City's Economic
26 Development people for the last five years or six years to try to get someone to
27 come in there and we've talked to a bunch of tenants, just as facilitated, even
28 though we have... there is no economic interest from any of my clients in that
29 piece of property because that was sold off. It's just an eyesore.

30
31 **COMMUNITY AND ECONOMIC DEVELOPMENT DIRECTOR TERELL** – If I
32 could add on... that's property was actually eventually sold by the bank to a
33 restaurateur and he had been working with Staff for several months on a plan.
34 I'm not sure the status of it, but I did notice there was a for sale sign on it
35 recently, so I asked one of my staff to contact them and see what their current
36 intentions are, but they were working on opening a new restaurant in there; the
37 new owner.

38
39 **COMMISSIONER VAN NATTA** – Maybe we can get a nightclub to go in there

40
41 **CHAIR GIBA** – No I wanted Joe's Crab Shack

42
43 **COMMISSIONER BARNES** - I have a question. Do you manage any of the
44 properties or do you guys find a tenant and sell and they build or what is the
45 arrangement in the property within the development agreement?

1 **APPLICANT LOPER** – There are two main entities that can control the
2 properties within the agreement; I'm a consultant. I used to work for one of the
3 owners; the Fritz Duda Company was the original developer and the Fritz Duda
4 Company still is involved in the properties on Day Street. They don't own all the
5 parcels; for example Costco and Winco and Lowe's all own their parcels, but they
6 manage the parking lots for those properties. Brickston is a company... actually
7 Fritz Duda also has the BJ's, Outback Steakhouse at the Town Gate Plaza.
8 Brickston owns the Town Gate Center project and they manage that with Home
9 Goods, TJ Maxx and all the way towards Burlington, but they also don't own 100
10 percent of their centers, but they manage the entire parking lot.

11
12 **COMMISSIONER BARNES** – I was just curious because everything that is within
13 the development agreement property is very well maintained and is in great
14 shape so somebody is being very good neighbors.

15
16 **APPLICANT LOPER** - Both of those companies have great reputations for
17 maintaining their assets. The Fritz Duda Company who was my former employer
18 has had that property since it was a race track and there a pride in taking care of
19 their properties, no matter how low the income is with the recession.

20
21 **COMMISSIONER BARNES** – I have to say they've earned some consideration.

22
23 **CHAIR GIBA** – Your current one... we voted on that, I was here that year in
24 November 2011 and I was curious then why it took you twenty years and every
25 time I turn around it's another downturn and another downturn and we've got a
26 bad economy. We are pushing 30 years now in finishing that. I think you just
27 told Mr. Lowell there is like 50 percent that is... is that what you said 50?

28
29 **APPLICANT LOPER** – 50 at Town Gate Square

30
31 **CHAIR GIBA** – 50 at Town Gate Square; that's still has not been done. This
32 particular agreement expires in 2016. Now maybe you guys can help me out
33 with this at the same time. Why would you want to put the extension in now?
34 Are you tacking it on at the end of 2016, so you are not waiting until 2016 or wait
35 for another year or so? You want to get that relief now.

36
37 **APPLICANT LOPER** – We want to extend it now. When we are marketing,
38 neither of the clients that I work for are office developers and a big portion of the
39 land is zoned for office, hotel and senior housing, none of which three they build
40 and when you are marketing to a developer to build those and it is a multi-phase
41 project, they want to know that their development agreement if they were to buy
42 something now, that the development agreement would extend through the
43 period of time they think it is going take to build out. So that is one of the
44 reasons. It puts us at a disadvantage if the agreement is going to expire and we
45 go to a potential developer of office space or potential developer of senior
46 housing and they say well we can't build it out in two years and five months.

1 **CHAIR GIBA** – Okay so in 2011 we approved a five year extension. Could you
2 just enlighten me a little bit because I don't keep track, what have we
3 accomplished from 2011 till now so far?
4

5 **APPLICANT LOPER** – Well in terms of new development since 2011...
6

7 **CHAIR GIBA** - I want to see some movement here
8

9 **APPLICANT LOPER** – No, no I understand. I mean 24 Hour Fitness is being
10 built right now. It is not open yet. Miguel's Jr. was brought in to develop. We re-
11 tenanted the vacant Ralph's into a Home Goods and TJ Maxx. We re-tenanted
12 the vacant movie theater which was Ultra Star into Regency and we were very hit
13 when the mall's theater opened. We re-tenanted the old Staples which moved to
14 Riverside over to the other side of Day Street to Ulta and Bev Mo. We re-
15 tenanted the Circuit City... we've actually re-tenanted two Circuit City's. One of
16 them was a Circuit City over in (?). I think that was done right around 08 when
17 they went bankrupt and it went to 99 Cent only. The Circuit City owned that
18 building so we didn't control that, but that was done on the property and then the
19 new Fitness Center; Planet Fitness is opened in the old Circuit City in Town Gate
20 Center. So all of those things have been done since 2008.
21

22 **CHAIR GIBA** – You've been busy trying to re-fill what left rather than put in new
23 pads or anything on the existing pads of any kind.
24

25 **APPLICANT LOPER** – Well yes, yeah. Miguel's and the 24 Hour Fitness are the
26 two new deals. We've had several restaurant deals that we've tried to do that
27 have fallen apart. There is the one in the Farmer's Merchants Bank Building; the
28 old Johnny Carino's. We were not expecting to have to re-tenant an entire
29 shopping center and we were hoping that there would be enough demand for
30 new construction and when there is a recession, rents go way down and rents
31 haven't come back up really well to afford new construction of a lot of new large
32 box retail. Office rents; all of the Inland Empire are not very good. You can't
33 afford to build a building that office rents now because office vacancies in the
34 Inland Empire are very high.
35

36 **CHAIR GIBA** – Any more questions ladies and gentlemen? Okay then thank you
37 very much, I appreciate that. We'll open this up to public testimony. Do we have
38 anybody on that? Nobody there; no speakers, so it's open and closed. Alright so
39 any discussion?
40

41 **COMMISSIONER LOWELL** – On a point of clarity, all we're doing is just tacking
42 on another five years onto the expiration day. We're not changing anything.
43 We're just giving another five years past 2016.
44

45 **INTERIM PLANNING OFFICIAL ORMSBY** – That's correct
46

1 **CHAIR GIBA** – What would happen to their... I've always been curious about it.
2 I think I even asked this question three years ago. What would happen if we said
3 no? In other words you're telling me there is no we in that question. What do
4 you mean "we"? But out of personal curiosity what would happen to your
5 property; your development agreement; the future of what you doing up in that
6 area if for instance this Commission was to say nah, we've given you enough
7 time to get to 2016, solve it or walk. No I'm just trying to be honest here, kind of
8 straight forward about it. I mean we've been at this almost 30 years and you may
9 be bit off more than you can chew or something. I don't know what the problem
10 was but...no don't move anything yet. I was talking to you. You can come back
11 up. I'm curious and I'm sure there is probably more than one or two people who
12 are curious.

13
14 **APPLICANT LOPER** – Well the development agreement does several things. It
15 provides certainly. If there is uncertainty and we can't find another developer to
16 build an office project because they realize the development agreement isn't
17 going to extend and they don't know what's going to happen, they might not want
18 to invest in the first building because they don't know if the second and third
19 phase the zoning is going to change or the Specific Plan would change or
20 something and anytime you have uncertainty as an investor, an investor makes a
21 decision to go into a hundred different communities in Southern California and if
22 they can go to a community where there is certainty, then they won't invest in the
23 City of Moreno Valley.

24
25 **CHAIR GIBA** – So what you are telling us then is as long as there is certainty,
26 Moreno Valley has hope for you continuing to build this area out.

27
28 **APPLICANT LOPER** – It is one of the factors. There are lots of different factors
29 that come into the equation, but investors have lots of choices in this current
30 market to invest in.

31
32 **VICE CHAIR SIMS** – And I guess my only other two cents is when a project of
33 this magnitude as development agreement in place gives the certainty for the
34 investors. If this is to go away then it is going to be a burden on the City because
35 there is less certainty for development, so the property will probably lay fallow
36 longer and then as properties do come in the absence of a development
37 agreement, then they will have to be on a case by case basis, which will make it
38 a... you'll have greater uncertainty for the consistency and the development
39 because then it will be a case by case rather than under a full development
40 agreement.

41
42 **CHAIR GIBA** – I got it. I get it. I just hope that those who are watching at times.
43 We have people who say you know sit on the other side of the coin and you want
44 to answer those questions to make them comfortable. Did you have a question?
45 I'm sorry. So, thank you very much. I appreciate it. I wasn't trying to be mean or

1 rude, I was just trying to make my case solid. Yes, Tom, I'll let you speak one
2 more time before we move, because we've got one other thing to get to.

3
4 **SPEAKER JERELE** – Thank you again Chair Giba and Commissioners and Staff
5 and the public. The reason I raised my hand was you know we had a big boom
6 cycle from 84 to 90 and it cut off sharp in 90 and you know it really crashed and it
7 was right about the time when the mall came on line and Town Gate came on
8 line and a lot of this commercial... We had a Council in the early days which was
9 give us all the commercial, but they made it so hard on some of them and John
10 can probably testify to this, he remembers. I call it the bad old days. I mean it
11 was so hard to get projects through. I remember a man walking out of the
12 Planning Department with a roll of plans that big and it was for a housing project
13 and that was no unusual in those days. You see it in industrial and stuff, but it I
14 mean in those days an average tract would be about that big around or three or
15 four inches and he just threw them in the trash can and said I'm out of here. I
16 don't even want to deal with this City anymore and that was coming from the top
17 down and I remember one of the Council people saying make it so hard on them
18 till they scream. Well okay they screamed and they left. I still run into people in
19 Orange County this day and they say are you guys still doing you know the nutsy
20 stuff that was going and I said it has smoothed out a lot, but those reputations
21 linger and it wasn't until Paul Gill came in and he had the nerve to go up to the
22 Council and he said look you approved all this commercial, who do you think is
23 going to shop in there without the rooftops and so we got so far behind at that
24 time and you know our 1990's recession lasted into 2000. It was ten years out
25 here, meanwhile Temecula, Riverside and Corona, they all picked up. We were
26 the last one in the game, so we had a very, very long lag time and it retarded the
27 whole cycle here for everybody, so I just wanted to add that and how important
28 decisions are and the image that gets out to the business community, because
29 that stigma will stay for a long time; you know decades.

30
31 **CHAIR GIBA** – Thank you Tom. I appreciate it very much. A motion?

32
33 **COMMISSIONER LOWELL** – Oh it's our turn?

34
35 **CHAIR GIBA** – I haven't talked that much this evening.

36
37 **COMMISSIONER LOWELL** – I motion to **APPROVE** Resolution No. 2014-19
38 and thereby **RECOMMEND** that the City Council;

- 39
40 1. **RECOGNIZE** that the Development Agreement Amendment will not have
41 the potential for any direct or indirect impacts under CEQA and is
42 therefore exempt under Section 15061 of the CEQA Guidelines; and,
43
44 2. **APPROVE** Amendment 4 of the Development Agreement (P13-138)
45 based on the findings contained in the attached resolution, attachment 2.
46

1 **COMMISSIONER BAKER** – Second
2
3 **CHAIR GIBA** – A motion and second. Let’s do a roll
4
5 **COMMISSIONER RAMIREZ** – Aye
6
7 **COMMISSIONER BARNES** – Yes
8
9 **COMMISSIONER BAKER** - Yes
10
11 **COMMISSIONER LOWELL** – Yes
12
13 **COMMISSIONER VAN NATTA** – Yes
14
15 **VICE CHAIR SIMS** – Yes
16
17 **CHAIR GIBA** – Yes
18
19 **CHAIR GIBA** – Alright that was seven yes and no no’s and staff wrap up on that
20 one.
21
22 **INTERIM PLANNING OFFICIAL ORMSBY** – The item will be forwarded to the
23 City Council for review and consideration.

Report to City Council

TO: Mayor and City Council

FROM: John C. Terell, Community and Economic Development Director

AGENDA DATE: August 26, 2014

TITLE: A PUBLIC HEARING FOR THE PROLOGIS EUCALYPTUS INDUSTRIAL PARK PROJECT AND RELATED ENVIRONMENTAL IMPACT REPORT. THE PROJECT PROPOSES A GENERAL PLAN AMENDMENT AND A ZONE CHANGE FOR 122 ACRES. THE LAND USE CHANGES ARE REQUIRED FOR DEVELOPMENT OF SIX WAREHOUSE DISTRIBUTION FACILITIES TOTALING 2,244,419 SQUARE FEET. THE DEVELOPER ALSO PROPOSES TENTATIVE PARCEL MAP NO. 35679 TO SUBDIVIDE THE PROJECT SITE INTO SIX PARCELS. A GENERAL PLAN AMENDMENT IS ALSO REQUIRED FOR PROPOSED CHANGES TO THE CITY'S GENERAL PLAN CIRCULATION ELEMENT AND THE MASTER PLAN OF TRAILS. THE SITE IS LOCATED SOUTH OF STATE ROUTE 60 AND EAST OF THE MORENO VALLEY AUTO MALL, AT FIR AVENUE (FUTURE EUCALYPTUS AVENUE) AND BETWEEN PETTIT STREET AND THE QUINCY CHANNEL. THE APPLICANT IS PROLOGIS

RECOMMENDED ACTION

Recommendations: That the City Council:

1. Consider the applicant's request for a continuance of this item to the City Council's October 14, 2014 public hearing agenda to allow for time to modify the project documents for consistency with the reduced intensity alternative.

SUMMARY

A public hearing was held for this item on July 8, 2014. After taking comments from the applicant regarding their request for a continuance, the item was continued to the City

Council's August 26, 2014 agenda. In a letter dated August 5, 2014, the applicant requested that the City Council review and then provide input and direction on a modified plan that is consistent with the project Final Environmental Impact Report (FEIR)'s reduced intensity alternative. The letter also requests a continuance to the October 14, 2014 public hearing agenda if the City Council is supportive of the modified plan.

DISCUSSION

In a letter dated August 5, 2014, the applicant has requested a continuance of this item to the Council's October 14, 2014 agenda (see Attachment 1) to consider a modified version of the project.

The applicant stated in the August 5th letter that in an attempt to be responsive to concerns raised by the City Council, the Planning Commission, and the public during the various public hearings, Prologis has decided to prepare a modified version of the project that would be consistent with the reduced intensity alternative referenced in the project EIR. Staff agrees that the reduced intensity alternative addresses concerns raised during prior hearings on the project. Prologis is requesting that the City Council not take action on the original project but instead continue the item to consider the "Less Intensive Modified Plan."

Prologis indicates that it is prepared to work with City staff to update the FEIR and other project documents as needed to reflect the reduced intensity alternative and re-circulate the FEIR prior to a final vote by the City Council. The preparation of the plans consistent with the reduced intensity alternative will require the expenditure of additional money to prepare updated plans and studies. Prologis has stated their willingness to undertake the additional time and cost.

A City Council public hearing for this project was held on June 24, 2014. At the meeting, information about the project and the related FEIR was presented to the City Council by Planning Division staff and representatives from LSA Associates, Inc., the consulting firm that prepared the environmental documentation. Following the staff report, comments were taken from the applicant and interested parties and residents. At the public hearing, a majority of the fifteen speakers expressed concerns with the project.

After taking comments from the applicant and the public, the public hearing was closed and the item was continued to the City Council's July 8, 2014 agenda.

The applicant submitted letters to the City on June 30, 2014 and July 3, 2014, requesting a continuance of their item from the July 8, 2014 meeting to the August 26, 2014 meeting to allow for more time to review comment letters received at the Planning Commission hearing and to consider modifications to the project.

Copies of the previous City Council staff reports, the project EIR and plans are available at the City's website at the following link: http://www.moval.org/city_council/agendas-sire.shtml

ALTERNATIVES

1. Consider the applicant's request for a continuance of this item to the City Council's October 14, 2014 public hearing agenda to allow for time to modify the project for consistency with the reduced intensity alternative. **Staff recommends this alternative.**
2. Certify the Environmental Impact Report and approve the applications for the Prologis Eucalyptus Industrial Park project.
3. Do not Certify the Environmental Impact Report and Deny the applications for the Prologis Eucalyptus Industrial Park Project.

FISCAL IMPACT

Not applicable.

CITY COUNCIL GOALS

Not applicable.

NOTIFICATION

A notice of the August 26, 2014 public hearing was not necessary since this item was continued to a date specific at the July 8, 2014 public hearing.

EXHIBITS

THE SITE IS LOCATED SOUTH OF STATE ROUTE 60 AND EAST OF THE MORENO VALLEY AUTO MALL, AT FIR AVENUE (FUTURE EUCALYPTUS AVENUE) AND BETWEEN PETTIT STREET AND THE QUINCY CHANNEL. THE APPLICANT IS PROLOGIS

RECOMMENDED ACTION

Recommendations: That the City Council:

1. Conduct a public hearing for Prologis Eucalyptus Industrial Park Project and subsequent to the public hearing:
2. Approve Resolution No. 2014-56. A Resolution of the City Council of the City of Moreno Valley, California, Certifying the Final Environmental Impact Report (P07-186) and Adopting the Findings and Statement of Overriding Considerations and Approving the Mitigation Monitoring Program for the Prologis Eucalyptus Industrial Park Project, included as Exhibits A and B.

3. Approve Resolution No. 2014-57. A Resolution of the City Council of the City of Moreno Valley, California, Approving a General Plan Amendment (PA07-0082) from R15, R5, and RA-2 land use designations to Business Park for approximately 71 acres for development of a 2,244,419 square foot industrial park located within Assessor's Parcel Numbers 4880330-011, -012, -013, -017, -018, -019, -020 and -021, as shown on the General Plan Amendment Map included as Exhibit A.
4. Introduce Ordinance No. 880. An Ordinance of the City Council of the City of Moreno Valley, California, Approving a Zone Change (PA07-0081) from Business Park, Business Park Mixed-use, R15, R5, and RA-2 to Light Industrial for approximately 122 acres for development of a 2,244,419 square foot industrial park located within Assessor's Parcel Numbers 488-330-011, 012, -013, -017, -018, -019, -020, and -021, as shown on the Zone Change Map included as Exhibit A.
5. Approve Resolution No. 2014-58. A Resolution of the City Council of the City of Moreno Valley, California, Approving Master Plot Plan application PA07-0083 and Plot Plan applications PA07-0158 through PA07-0162 for development of the 2,244,419 square foot Prologis Eucalyptus Industrial Park Project within the 122 acres of Assessor's Parcel Numbers 488-330-011, 012, -013, -017, -018, -019, -020, and -021, subject to the conditions of approval included as Exhibit A.
6. Approve Resolution No. 2014-59. A Resolution of the City Council of the City of Moreno Valley, California, Approving Tentative Parcel Map 35679 (PA07-0084) for development of the 2,244,419 square foot Prologis Eucalyptus Industrial Park Project within the 122 acres of Assessor's Parcel Numbers 488-330-011, 012, -013, -017, -018, -019, -020, and -021, subject to the conditions of approval included as Exhibit A.

SUMMARY

This report recommends that the City Council conduct a Public Hearing and consider staff's recommendation to approve the Prologis Eucalyptus Industrial Park project and related Environmental Impact Report. Following the Planning Commission Public Hearing on April 24, 2014, the Planning Commission approved a resolution recommending that the City Council approve this project.

DISCUSSION

Background

A Planning Commission Public Hearing for this project was held on March 13, 2014. At the meeting information about the project and the related Final Environmental Impact Report (FEIR) was presented to the Planning Commission by Planning Division staff and representatives from LSA Associates, Inc. who prepared the FEIR. Following the staff report, comments were taken from the applicant and interested parties and residents.

At the public hearing, one speaker identified a letter that had not been addressed in the FEIR. The project was continued to the April 24, 2014 meeting to allow for time to update the FEIR to include the August 31, 2012 letter and responses to the letter.

Planning worked with LSA Associates, Inc. to update the FEIR to address the concerns raised in the letter. The FEIR was redistributed to all agencies and interested parties and published on the City's webpage. Notice of the status of the FEIR and the Planning Commission's April 24, 2014 meeting was published in the newspaper, posted at the project site and sent to all property owners within 300 feet and all interested parties.

A second Planning Commission Public Hearing was held on April 24, 2014. At the meeting updated information about the project and the related FEIR was presented to the Planning Commission by Planning Division staff and representatives from LSA Associates, Inc. Following the staff report, public comments were provided by the applicant, interested parties and residents.

The Planning Commission supported staff's recommendation to restrict development of the two parcels located immediately adjacent to the Auto Mall. Planning condition of approval P3 states that, "No building permits shall be issued for the warehouse distribution buildings approved for Plot Plan PA07-0158 and Plot Plan PA07-0159 during the initial 18 months of this approval."

The Planning Commission voted 4-3 to recommend that the City Council certify the project Environmental Impact Report and approve the Prologis Eucalyptus Industrial Park project subject to expanding the findings in the Statement of Overriding Considerations (SOC) before it was taken to the City Council. The SOC is required by the California Environmental Quality Act (CEQA) when an agency approves a project with potential significant environmental impacts.

Project

The applicant, Prologis, has submitted ten applications for development of the Prologis Eucalyptus Industrial Park Project, which include a General Plan Amendment, Zone Change, Master Plot Plan, related Plot Plans, a Tentative Parcel Map, and an Environmental Impact Report, in order to develop a 2,244,419 square foot industrial park on a 122 acre site (Assessor's Parcel Numbers 488-330-011, 012, -013, -017, -018, -019, -020, and -021) located South of State Route 60 and east of Moreno Valley Auto Mall, at Fir Avenue (Future Eucalyptus Avenue) and between Pettit Street and the Quincy Channel.

General Plan Amendment

The project site has current General Plan land use designations that include approximately 50 acres of Business Park, 36 acres of R15 (Residential – up to 15 units per acre), 23 acres of R5 (Residential – up to 5 units per acre), and 12 acres of RA-2 (Residential/Agriculture – up to 2 units per acre). The applicant proposes to change the land use designation for the entire project site to BP (Business Park).

Land uses to the north include the adjacent freeway with OC (Office Commercial), R2 (Residential – up to 2 units per acre) and RA-2 zoned land north of the freeway. Land uses to the east include a mix of BP and CC (Community Commercial) zoned land and RA-2 zoned land with an approved warehouse facility located immediately to the east and a developed warehouse facility further to the east between Redlands Boulevard and Theodore Street. Land uses to the south include RA-2 with developed tract homes to the southeast. Land uses to the west include CC (Auto Mall, Moreno Beach Plaza and Stoneridge Towne Centre).

The General Plan Amendment also proposes a change to the Circulation Element to eliminate the connection from Fir Avenue/Future Eucalyptus Avenue to Eucalyptus Avenue/Future Encilia Avenue to the south. The change ensures that traffic generated by existing and proposed non-residential uses would be kept separate from residential areas along Eucalyptus Avenue/Future Encilia Avenue to the south and southeast.

Additionally, the General Plan Amendment proposes changes to the Master Plan of Trails. The proposed change would remove an existing trail segment that runs north/south along the west side of the Quincy Channel between Fir Avenue/Future Eucalyptus Avenue to State Route 60. This trail segment was originally intended to cross the freeway on an overpass at Quincy Street. This overpass is no longer on the City's General Plan Circulation element. Without the overpass, trail would end in a cul-de-sac at State Route 60.

The City's Recreational Trails Board met in February 2012 to discuss replacement of the dead end segment of the trail with a new segment of trail on the north side of Fir Avenue/Eucalyptus Avenue that would run from the Quincy Channel west to the site's western boundary ending at the Fire Station #58. The Board was supportive of the change. The General Plan Amendment would add the new trail segment.

Zone Change

The project site has current zoning designations that include 49.5 acres of BP, 0.5 acre of BPX (Business Park Mixed-use), 36 acres of R15, 23 acres of R5, and 12 acres of RA-2. The applicant proposes to change the zoning for the entire project site to LI (Light Industrial). The proposal would also result in the removal of a portion of the site from the PAKO (Primary Animal Keeping Overlay).

Zoning to the north includes OC, R2 and RA-2 land north of the freeway. Zoning to the east includes LI, CC and RA-2 land. Zoning to the south include vacant and developed RA-2 land. Zoning to the west is C (Commercial) under Specific Plan 209 and CC.

Warehouse distribution uses are permitted in both the BP and LI zones, but the size of the buildings proposed by the project requires a Zone Change to Light Industrial to allow for the warehouse facilities over 50,000 square feet.

Plot Plans

Master Plot Plan PA07-0083 proposes the development of an industrial park with 2,244,419 square feet of warehouse facilities on 122 acres. This application also

includes Building #2 on Parcel 2 of TPM 35679 for development of an 862,035 square foot warehouse distribution building on 39.32 acres with 311 required employee parking spaces and 135 required truck parking spaces.

Plot Plan PA07-0158 for Building #1 on Parcel 1 of TPM 35679 proposes development of a 168,342 square foot warehouse distribution building on 8.84 acres with 100 required employee parking spaces and 21 required truck parking spaces.

Plot Plan PA07-0159 for Building #3 on Parcel 3 of TPM 35679 proposes development of a 160,106 square foot warehouse distribution building on 8.5 acres with 98 required employee parking spaces and 20 required truck parking spaces.

Plot Plan PA07-0160 for Building #4 on Parcel 4 of TPM 35679 proposes development of a 339,015 square foot warehouse distribution building on 15.66 acres with 180 required employee parking spaces and 36 required truck parking spaces.

Plot Plan PA07-0161 for Building #5 on Parcel 5 of TPM 35679 proposes development of a 390,102 square foot warehouse distribution building on 19.29 acres with 173 required employee parking spaces and 53 required truck parking spaces.

Plot Plan PA07-0162 for Building #6 on Parcel 6 of TPM 35679 proposes development of a 325,038 square foot warehouse distribution building on 17.55 acres with 176 required employee parking spaces and 53 required truck parking spaces.

The loading and truck parking areas have been oriented away from adjacent residential zoned parcels and meet or exceed the Municipal Codes minimum buffer distance of 250 feet provided for in the Municipal Code.

All truck courts are screened by perimeter concrete tilt-up walls with a citrus tree row required along the State Route 60 frontage as an extension of the tree plantings along the rear of Fire Station #58. A tree row is also required along the Quincy Channel and southern property lines to soften the visual impact of the project and reflect back on the citrus groves previously on the site.

The project has been conditioned to provide standard parking lot and setback landscape to include ground cover shrubs and trees. Detention/water quality basins will be extensively landscaped. The project's Fir Avenue/Future Eucalyptus Avenue frontage will be developed with curb, gutter, parkway, sidewalk and a segment of multi-use trail. A segment of multi-use trail will also be installed on the west side of the Quincy Channel from Fir Avenue/Future Eucalyptus Avenue south to Eucalyptus Avenue/Future Encilia Avenue.

Tentative Parcel Map

Tentative Parcel Map No. 35679 proposes to re-configure the eight parcels located within the project site into six parcels with lettered lots to convey property to Caltrans for future development and to the City for public streets.

Site

The project site is comprised of vacant land that is mostly level and at grade with Fir Avenue/Future Eucalyptus Avenue and at or below grade of adjacent State Route 60. There are no trees, rock outcroppings or existing structures located within the limits of the project site. The project site includes a portion of the Quincy Channel which includes some riparian vegetation.

Surrounding Area

The project is located in an area that includes a mix of business park, office, commercial, residential and agricultural uses.

Developed land within proximity to the project site includes the Moreno Valley Auto Mall and Moreno Beach Plaza (Walmart) center to the west at Moreno Beach Drive, the 800,430 square foot regional headquarters for ALDI Foods (under construction) to the immediate east, and the 1.8 million square foot Highland Fairview Business Park (Skechers) warehouse facility further to the east between Redlands and Theodore and large lot subdivisions in the RA-2 zone across the channel from the project site.

Access/Parking

The project site will be accessed directly from Fir Avenue/Future Eucalyptus Avenue via Moreno Beach Boulevard or Redlands Boulevard and State Route 60. This portion of Fir Avenue/Future Eucalyptus Avenue, including the bridge crossing at the Quincy Channel would be constructed by the applicant/developer as a condition of the project.

The driveways and interior drive aisles associated with the project have been approved by the Fire Prevention Bureau for fire truck access and turnaround. The site has also been designed for adequate truck maneuvering and turnaround within the designated loading zones. The project as designed satisfies all parking requirements of the City's Municipal Code.

Design/Landscaping

Site design of the proposed warehouse distribution facility is consistent with requirements of the City's Municipal Code.

The architectural design of the buildings is concrete tilt-up construction. Building and wall colors include earthtones, with varying amounts of accent colors and vertical features to break up the architecture of building. Roof top equipment will be screened from public view by parapet walls.

Staff worked with the applicant to ensure that all sides of the buildings include architectural treatment. The loading bays and trailer storage areas have been screened from view. The screen walls are of concrete tilt-up construction which will match the building designs and colors.

Landscaping for the project as proposed is at around 18% of the site area including the water quality/detention basins. The City's Municipal Code does not require a minimum percentage of landscape on a site. Instead, there are requirements for landscape setback areas along perimeter streets, parking lot landscape, street trees and landscape treatments around the perimeter of the buildings where visible from the public right-of-way. The project as designed meets the City's current landscape criteria.

Signs are not a part of this approval and would be reviewed and approved under separate administrative permit.

This project design conforms to all development standards of the Light Industrial zone and the design guidelines for industrial uses as required within the City's Municipal Code.

REVIEW PROCESS

The project was originally reviewed by the Project Review Staff Committee (PRSC) in September 2007. Modifications were required to the plot plan exhibits and preliminary grading plan.

Revised plans were submitted in January and August 2008 and again in July and November 2011 and July and October 2012. Upon review of a final draft of the site plan and completion of the Final Environmental Impact Report in early 2014, a determination was made to schedule this project for a Planning Commission public hearing.

Community outreach efforts by the applicant in 2012 included mail distribution of project brochures to area residents, neighborhood walks to pass out brochures and open house invitations for an open house held in August 2012 at the Moreno Valley Ranch Golf Club.

ENVIRONMENTAL

Initial Study/Notice of Preparation

An Initial Study was completed after all discretionary applications were deemed complete. Based on the information within the Initial Study, an Environmental Impact Report (EIR) was recommended to be prepared. A Notice of Preparation for the EIR was issued on February 4, 2008, with the public comment period beginning on February 4, 2008 and ending on March 4, 2008. A public meeting to receive input on the issues to be covered by the EIR was held at City Hall on February 13, 2008.

Draft Environmental Impact Report

Subsequent to that meeting, draft environmental documents were prepared by the applicant's consultant LSA Associates, Inc. and submitted to the City.

City staff and the City's peer consultant reviewed the draft environmental documents for compliance with the California Environmental Quality Act (CEQA) Guidelines and required revisions to address identified questions and concerns. After revisions were

incorporated into the document, the Draft EIR was circulated for a 45-day public review period, starting on July 18, 2012, and ending on September 4, 2012.

The Draft EIR was sent to all required State and local agencies and interested parties on July 17, 2012, as well as to the City's Environmental and Historical Preservation Board. Thirteen comment letters were provided during the 45-day review period.

Final Environmental Impact Report

Responses to the thirteen comments received during the 45 day review period are included in the Response to Comments. The Response to Comments and related documents were mailed to all interested parties and responsible agencies on February 26, 2014, to allow for their review prior to the Planning Commission hearing, within the minimum notice period of 10 days required by CEQA. As was the case with the Draft Environmental Impact Report (DEIR), the draft Final Environmental Impact Report (FEIR) was provided for public review at City Hall, the City Library and posted on the City's website.

As discussed previously, a comment letter and appropriate responses were added to the FEIR following the March 13, 2014 Planning Commission hearing. The FEIR was re-distributed to all commenting agencies and interested parties in advance of the April 24, 2014 public hearing.

Additional questions were raised at the March 13, 2014 Planning Commission hearing about the City's documentation of the SB 18 Tribal Consultation process as referenced in Appendix B. The status of the City's interaction with some of the listed tribal groups has been updated in Appendix B to more accurately describe the City's efforts to satisfy consultation as prescribed by State law.

Significant and Unavoidable Impacts

Analysis presented in the FEIR indicates that the proposed project will have a number of potentially significant impacts. The FEIR includes a number of proposed mitigation measures to reduce or eliminate potential significant impacts. Even with proposed mitigation, a number of potential impacts cannot be reduced to a less than significant level. As identified in the FEIR document, these impacts are considered to be significant and unavoidable.

Where a project's impacts cannot be reduced to less than significant levels, CEQA allows a decision making body to consider a statement of overriding considerations and findings. CEQA requires the decision making agency to balance the economic, legal, social, technological or other benefits of a proposed project against its unavoidable environmental impacts when determining whether to approve the proposed project. This would include project benefits such as the creation of jobs or other beneficial project features versus project impacts that cannot be mitigated to less than significant levels. If the decision making body determines that the benefits of a proposed project outweigh the unavoidable adverse environmental effects, it may approve a statement of overriding considerations and approve the project.

The Planning Commission recommended Certification of the FEIR on April 24, 2014 subject to expanding the CEQA findings in the Statement of Overriding Considerations. Planning staff worked with LSA Associates, Inc. to provide more detailed facts in support of the findings in the in the statement of overriding considerations. The expanded language is attached to the staff report as Exhibit A to Attachment 2. A strikeout/underline version of the revised findings is included for reference as Attachment 15.

Mitigation Measures

The EIR includes mitigation measures intended to reduce project-specific and cumulative impacts for Air Quality, Biological Resources, Cultural Resources, Hydrology and Water Quality, Noise, Transportation, and Greenhouse Gases and Global Climate Change. All other environmental effects evaluated in the FEIR are considered to be less than significant, or can be adequately mitigated below significant thresholds.

Mitigation measures are included to reduce the environmental impacts where possible, even where the impacts could not be reduced to less than significant levels. All mitigation measures have also been included as conditions of approval for the project.

Approval and Certification

The City Council will take public testimony on the FEIR and project. Before the proposed project can be acted upon, the City Council will need to review the final environmental document before making a decision to either certify or reject the FEIR and project Mitigation Monitoring Program.

ALTERNATIVES

1. Certify the Environmental Impact Report and approve the applications for the Prologis Eucalyptus Industrial Park project. **Staff recommends this alternative.**
2. Do not Certify the Environmental Impact Report and Deny the applications for the Prologis Eucalyptus Industrial Park Project. **Staff does not recommend this alternative.**

FISCAL IMPACT

Not applicable.

CITY COUNCIL GOALS

Not applicable.

NOTIFICATION

A notice of the public hearing was published in the newspaper, posted at required City locations and at the project site, and mailed to property owners within 300 feet of the proposed project. Notice was also provided to all interested parties that requested a notice.

As of the date of report preparation, staff had received no public inquiries in response to the noticing for the City Council public hearing for this project.

Moreno Valley, CA

RE: Prologis Park Eucalyptus

Dear Mayor Molina:

Thank you for taking the time to meet with me to discuss our proposed Prologis Park Eucalyptus. In addition to meeting with you, we have now met with each of the other Council members and had the opportunity to discuss the modifications to the project. Based on the favorable feedback we have received to the proposed modifications, we are planning on moving forward with the changes discussed.

Although the proposed project was approved at the Planning Commission Meeting with a 4-3 margin, we recognize that there were 3 no votes, each with various concerns about the project. We also have listened to the comments coming from the public at the Planning Commission meeting as well as the City Council meeting.

In an attempt to be responsive to these concerns, Prologis has revisited our proposed plan and decided to request that the City Council, rather than voting on the Proposed Project on August 26th, consider instead what we are referring to as the "Less Intensive Modified Plan" that we outlined for you in our meeting. We are requesting that Council review these modifications by Prologis and provide input and direction in our efforts to resolve as many of the stated concerns that we have heard. Prologis is prepared to formalize the "Less Intensive Modified Plan", by updating and revising the EIR document as needed and resubmitting to Council for a vote. We have met with Planning Staff and they are familiar with this change in direction and have provided us with guidance in the process. With your approval, we will target getting back to Council on the Tuesday, October 14th scheduled meeting.

The "Less Intensive Modified Plan" will require considerable expense to redo the various studies in the EIR and we are prepared to undertake this based on the positive feedback we have received from Council. I have attached a site plan showing the original "Proposed Project" that has been presented to you at the City Council Meeting and a revised site plan showing the "Less Intensive Modified Plan". Additionally, I have enclosed an exhibit labeled "Comparison of Average Daily Vehicle Trips" to demonstrate how much traffic is generated from the two alternatives as well as the traffic counts based on the current General Plan.

I wanted to restate some of the benefits to the "Less Intensive Modified Plan" are:

- A 32% reduction in the overall project square footage, eliminating 718,655 square feet in the 2 buildings (No. 5 & 6) that are located in the SEC, nearest the residential community to the south.
- Although the total traffic is only slightly reduced, there would be a 32% reduction in truck traffic and related air quality and noise generated by trucks.
- A buffer of 250' will be created from the nearest truck court to future residential
- A distance of 1,636 feet from the nearby existing neighborhood at the SEC of the project area to the closest truck court.
- Preserves the auto mall expansion parcels (bldg. 1 & 3), a condition previously provided.
- Even with the reduction in square feet, the project would still represent and estimated 4-500 new full time permanent jobs and approximately 1,000 construction jobs over the build out period for just the industrial portion of the project.
- The ultimate build-out of industrial and residential would still represent significant fees, infrastructure improvements and incremental tax revenue to the City.

We appreciate your time and input on this project. This modification is a significant change to our original plan but we feel that it will soften a great deal of the concerns that have been raised. We can't do anything to satisfy the concerns the community has about Highland Fairview's plans, but we do feel that the changes we are prepared to make will improve those concerns raised regarding proximity to residential, truck traffic, air quality and preservation of residential that will eventually support the nearby retail centers.

I would welcome your comments and am more than willing to meet with you if you have additional questions.

Best Regards,

Pat Cavanagh

Notice of PUBLIC HEARING

This may affect your property. Please read.

Notice is hereby given that a Public Hearing will be held by the City Council of the City of Moreno Valley on the following item(s):

CASE: PA07-0081 - Zone Change
 PA07-0082 - General Plan Amendment
 PA07-0083 - Master Plot Plan including Building 2
 PA07-0084 - Tentative Parcel Map 35679
 PA07-0158 - Plot Plan for Building 1
 PA07-0159 - Plot Plan for Building 3
 PA07-0160 - Plot Plan for Building 4
 PA07-0161 - Plot Plan for Building 5
 PA07-0162 - Plot Plan for Building 6
 P07-186 - Environmental Impact Report

APPLICANT: Prologis

OWNER: Prologis

REPRESENTATIVE: Prologis

LOCATION: South of State Route 60 and east of Moreno Valley Auto Mall, at Fir Avenue (Future Eucalyptus Avenue) and between Pettit Street and the Quincy Channel.

PROPOSAL: General Plan Amendment for portion of site from R15, R5 and R2 to Business Park and Zone Change from existing Business Park, Business Park Mixed-use, R15, R5, and RA-2 zoning to Light Industrial for 122 acres. The land use changes are required for development of six distribution warehouse facilities totaling 2,244,419 square feet with building sizes that range from 160,106 square feet to 862,035 square feet. The applicant also proposes Tentative Parcel Map No. 35679 to subdivide the project site into six parcels. A General Plan Amendment is also required for proposed changes to the City's circulation element and the Master Plan of Trails. Approval of this project will require certification of an EIR.

ENVIRONMENTAL DETERMINATION: Environmental Impact Report

COUNCIL DISTRICT: 3

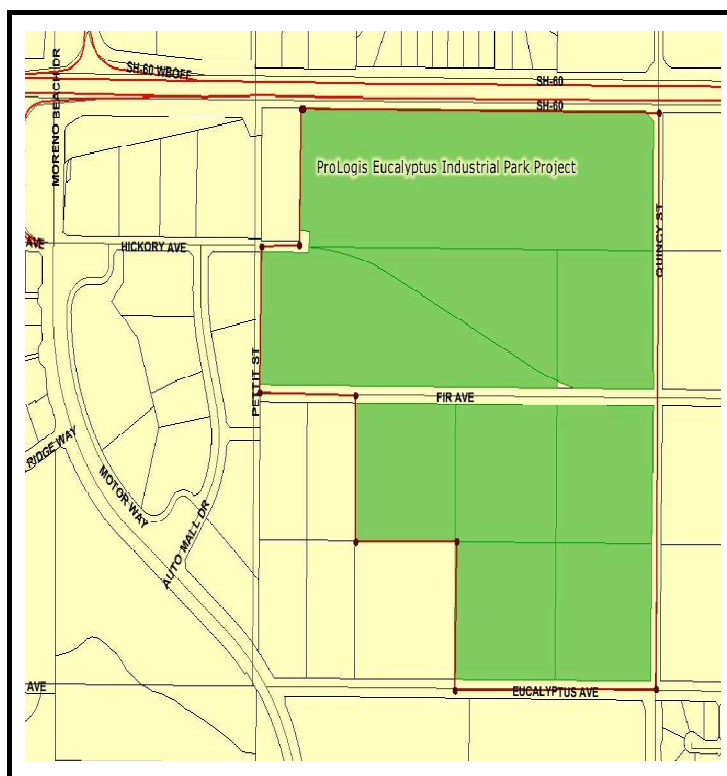

Any person interested in any listed proposal can contact the Community & Economic Development Department, Planning Division, at 14177 Frederick St., Moreno Valley, California, during normal business hours (7:30 a.m. to 6:00 p.m., Monday through Thursday and 2nd and 4th Fridays from 7:30 a.m. to 1:30 p.m.), or may telephone (951) 413-3206 for further information. The associated documents will be available for public inspection at the above address.

In the case of Public Hearing items, any person may also appear and be heard in support of or opposition to the project or recommendation of adoption of the Environmental Determination at the time of the Hearing.

The City Council, at the Hearing or during deliberations, could

approve changes or alternatives to the proposal.

If you challenge any of these items in court, you may be limited to raising only those items you or someone else raised at the Public Hearing described in this notice, or in written correspondence delivered to the City Council at, or prior to, the Public Hearing.

RESOLUTION NO. 2014-56

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, CERTIFYING THE FINAL ENVIRONMENTAL IMPACT REPORT (P07-186) AND ADOPTING THE FINDINGS AND STATEMENT OF OVERRIDING CONSIDERATIONS AND APPROVING THE MITIGATION MONITORING PROGRAM FOR THE PROLOGIS EUCALYPTUS INDUSTRIAL PARK PROJECT, INCLUDED AS EXHIBITS A AND B

Section 1:

WHEREAS, the applicant, Prologis, submitted applications for the Prologis Eucalyptus Industrial Park which include an Environmental Impact Report (P07-186), a General Plan Amendment (PA07-0082), a Zone Change (PA07-0081), Master Plot Plan PA07-0083 and related Plot Plans for a total of six buildings. The development of the industrial park include a total of 2,244,419 square feet of warehouse distribution space on 122 acres (this application also includes an 862,035 square foot warehouse facility on 39.32 acres), Plot Plan PA07-0158 for a 168,342 square foot warehouse distribution building on 8.84 acres, Plot Plan PA07-0159 for a 160,106 square foot warehouse distribution building on 8.5 acres, Plot Plan PA07-0160 for a 339,015 square foot warehouse distribution building on 15.66 acres, Plot Plan PA07-0161 for a 390,102 square foot warehouse distribution building on 19.29 acres, Plot Plan PA07-0162 for a 325,038 square foot warehouse distribution building on 17.55 acres, and Tentative Parcel Map 35679 (PA07-00084). A General Plan Amendment is also required for proposed changes to the City's Circulation Element and the Master Plan of Trails. The above applications shall not be approved unless the Final Environmental Impact Report (P07-186) is certified and approved; and

WHEREAS, the applicant, Prologis, and the environmental consultant, LSA Associates, worked with the City in the preparation of an Initial Study checklist and a Notice of Preparation (NOP). A Notice of Completion and Environmental Document Transmittal was filed with the State Clearinghouse on February 4, 2008 for the Notice of Preparation (NOP) of a Draft EIR for the project. The public review period of the NOP was February 4, 2008 through March 4, 2008. A public scoping meeting was held in connection with the NOP on February 13, 2008 in the Council Chamber at City Hall; and

WHEREAS, the applicant, Prologis, and the environmental consultant, LSA, worked with the City in the review of NOP response comments for the preparation of a Draft Environmental Impact Report (EIR) for this project. The Draft EIR was circulated to the public and to responsible agencies for comments for a 45 day period beginning on July 18, 2012 and ending on September 4, 2012; and

1
Resolution No. 2014-56
Date Adopted: June 24, 2014

WHEREAS, the City has prepared responses to comments on the Draft EIR received during the 45 day comment period, which have been included in the Final EIR;

WHEREAS, on March 1, 2014 and April 12, 2014, the City published a notice in the local newspaper (Press Enterprise) and distributed copies of the draft Final EIR to the State Clearinghouse, local agencies and other interested parties; and

WHEREAS, the draft and final EIR concerning the proposed Prologis Eucalyptus Industrial Park Project were prepared in sufficient detail and duly circulated in compliance with the California Environmental Quality Act (CEQA), the State CEQA Guidelines and the City of Moreno Valley Rules and Procedures to Implement CEQA; and

WHEREAS, since July 18, 2012, copies of the draft EIR have been made available to the public at the City's offices, on the City's website and at the City's public library; and

WHEREAS, the Final EIR includes a review of potential impacts associated with the implementation of the Prologis Eucalyptus Industrial Park Project, including, but not limited to Aesthetics, Agricultural Resources, Air Quality, Land Use and Planning, and Transportation; and

WHEREAS, a Mitigation Monitoring Program has been completed to ensure that all of the mitigation measures outlined in the final EIR are implemented; and

WHEREAS, A Final EIR, (including the Draft EIR, and responses to comments), has been completed and is being recommended for certification, prior to the approval of discretionary permits related to the project; and

WHEREAS, on March 13, 2014, the Planning Commission conducted a public hearing to consider the Final EIR for the proposed project and continued the item to their April 24, 2014 agenda; and

WHEREAS, on April 24, 2014, the Planning Commission conducted a public hearing to consider the Final EIR for the proposed project and recommended City Council approval; and

WHEREAS, on June 24, 2014, the City Council conducted a public hearing to consider the Final EIR for the proposed project; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, BE IT RESOLVED, it is hereby found, determined and resolved by the City Council of the City of Moreno Valley as follows:

2
Resolution No. 2014-56
Date Adopted: June 24, 2014

A. This City Council hereby specifically finds that all of the facts set forth above in this Resolution are true and correct.

B. Based upon substantial evidence presented to this City Council during the above-referenced meeting on June 24, 2014, including written and oral staff reports, and the record from the public hearing, this City Council hereby specifically finds as follows:

1. Independent Judgment and Analysis – The Final Environmental Impact Report represents the City’s independent judgment and analysis.

FACT: A public hearing was conducted by the City Council on June 24, 2014, during which opportunity was given to address the adequacy of the Final Environmental Impact Report. All comments on the Final EIR raised during the public and agency comment period and at the Public Hearing(s) on the project were considered by the City Council.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. CERTIFYS that the Final Environmental Impact Report (EIR) for the Prologis Eucalyptus Industrial park Project on file with the Community & Economic Development Department, incorporated herein by this reference, has been completed in compliance with the California Environmental Quality Act, that the City Council reviewed and considered the information contained in the Final EIR and that the Final EIR reflects the City’s independent judgment and analysis; and
2. ADOPTS the Findings and Statement of Overriding Considerations regarding the Final EIR for the Prologis Eucalyptus Industrial Park Project, attached hereto as Exhibit A; and
3. APPROVES the Mitigation Monitoring Program for the Final EIR for the proposed Prologis Eucalyptus Industrial Park Project, attached hereto as Exhibit B.

3
Resolution No. 2014-56
Date Adopted: June 24, 2014

APPROVED AND ADOPTED this 24th day of June, 2014.

**Facts, Findings and Statement of Overriding Considerations
Regarding the Environmental Effects and the Approval of the
ProLogis Eucalyptus Industrial Park
(State Clearinghouse No. 2008021002)**

I. INTRODUCTION

The City Council of the City of Moreno Valley (this “Council”), in certifying the EIR for the Prologis Eucalyptus Industrial Park and approving Tentative Parcel Map 35679 and a Site Plan authorizing the construction of up to approximately 2,244,638 square feet of distribution warehouse space (the “Project”), makes the Findings described below and adopts the Statement of Overriding Considerations presented at the end of the Findings. The Environmental Impact Report (“EIR”) was prepared by the City of Moreno Valley (“City”) acting as lead agency pursuant to the California Environmental Quality Act (“CEQA”). Hereafter, unless specifically identified, the Notice of Preparation (“NOP”), Notice of Availability & Completion (“NOA/NOC”), Draft EIR (“DEIR”), Technical Studies, Final EIR containing Responses to Comments and textual revisions to the Draft EIR (“FEIR”), and the Mitigation Monitoring and Reporting Program (“MMRP”) will be referred to collectively herein as the “EIR.” These Findings are based on the entire record before this Council, including the EIR. This Council adopts the facts and analyses in the EIR, which are summarized below for convenience. The omission of some detail or aspect of the EIR does not mean that it has been rejected by this Council.

II. PROJECT SUMMARY

A. PROJECT DESCRIPTION

1. Site Location

The Project is located in the eastern portion of the City of Moreno Valley. The Project site consists of ten parcels totaling approximately 122.8 net acres located south of and adjacent to SR-60, east of Moreno Valley Auto Mall, and adjacent to and west of the Quincy Channel.

The Project site is vacant and supports mainly weedy vegetation. The major road that provides access to the Project site is Eucalyptus Avenue. Land adjacent to the Project site includes vacant land east and south of the proposed Project site, SR-60 to the north, and the Moreno Valley Auto Mall and the City

of Moreno Valley Fire Station No. 58 northwest of the Project site. Existing single-family residential uses are located approximately 50 feet southeast of the southeastern corner of the Project site.

2. Project Description

The Project site is approximately 122.8 acres in size. The proposed Project includes the construction and operation of a warehouse facility comprising six buildings consisting of a total of approximately 2,244,638 square feet. The Project site is divided into northern and southern areas. The northern area, north of the future Eucalyptus Avenue, would contain approximately 1,030,377 square feet of warehouse uses divided between two buildings (No. 1 and 2). Development in the southern area, south of the future Eucalyptus Avenue, would consist of approximately 1,214,261 square feet of warehouse uses divided among four separate buildings (No. 3 through 6). The master and individual building plans, including grading, landscaping, elevations, and selected line of sight plans. The proposed Project includes the construction of asphalt/concrete surfaces in parking and driving areas, and landscaping along the perimeter and roadway frontages.

The Project site is currently designated Residential in the City's General Plan. The site is zoned as Business Park (BP), Business Park/Mixed Use (BPX), Residential 15 District (R15), Residential 5 District (R5), and Residential Agriculture 2 (RA-2). The zoning is not consistent with the existing General Plan land use and the Project is not consistent with the General Plan and zoning. Therefore the Project will require a General Plan Amendment which would change the designation to Business Park and a Zone Change that would change the zoning of the site to Light Industrial (LI).

3. Actions Covered by the EIR

The EIR will support the following discretionary and non-discretionary approvals:

- General Plan Amendment to amend the Land Use Element resulting in a change of land use designations for the southern portion of the project site (approximately 71.3 acres) from Residential 15, Residential 5, and Residential Agriculture to Business Park.
- General Plan Amendment to amend the Circulation Element including (1) elimination of undeveloped Quincy Street from Eucalyptus Avenue to Encilia Avenue; and (2) realignment of Encilia Avenue from its current alignment such that its westerly terminus is located at Moreno Beach Drive instead of the current General

Plan westerly terminus at Eucalyptus Avenue. The segment between Quincy Channel and Moreno Beach Drive would be classified as a Collector.

- Change of Zone resulting in a change from Business Park (BP), Business Park Mixed-Use (BPX), Residential 15 (R15), Residential 5 (R5), and Residential Agriculture (RA-2) to Light Industrial (LI) on the project site.
- Modification of the Primary Animal Keeping Overlay (PAKO) zone district per the recommended change of zone.
- Modification of the Master Plan of Trails to eliminate trail segment along the west side of the Quincy Channel north of the future Eucalyptus Avenue and add a segment along the north side of Eucalyptus Avenue from the Quincy Channel to the west boundary of the project site.
- Approval of a Master Plot Plan and five related Plot Plans.
- Tentative Parcel Map approval.
- Certification of the Environmental Impact Report.
- Final Parcel Map, public improvement agreement, and related securities approval.
- Issuance of an encroachment permit for any construction work done in any City-controlled ROW. Encroachment permit issuance requires approval of improvement plans, public improvement agreement execution with securities posted, and satisfying those conditions of approval required prior to grading.
- Approval of a Storm Water Pollution Prevention Plan (SWPPP) to accommodate site runoff during construction.
- Approval of a Preliminary Water Quality Management Plan (P-WQMP) and Final Water Quality Management Plan (F-WQMP) to mitigate for post-construction runoff flows (non-discretionary).
- Issuance of a Grading Permit that requires approval of a grading plan, approval of the final drainage study, approval of the F-WQMP, obtaining an Notice of Intent and Water Discharge Identification Number, obtaining a WQMP#, and satisfying those conditions of approval required prior to grading (non-discretionary).

- Issuance of a Building permit. The comprehensive building permit includes building, plumbing, mechanical, and electrical permits (non-discretionary).

Approvals and permits required by other agencies include:

- Approval from the City and Riverside County Flood Control and Water Conservation District (RCFCWCD) to ensure that construction site drainage velocities are equal to or less than the pre-construction conditions and downstream water quality is not worsened
- Approval of Quincy Channel improvements from the RCFCWCD
- A Section 404 Permit from the U.S. Army Corps of Engineers (USACE)
- A Section 401 Water Quality Certification from the Regional Water Quality Control Board (RWQCB)
- A Section 1602 Streambed Alteration Agreement from the California Department of Fish and Wildlife (CDFW)
- Encroachment permits from Caltrans for any construction work done in any State-controlled right of way(i.e., SR-60)

B. PROJECT OBJECTIVES

The Project Objectives include the following:

- Provide industrial warehouse facilities that meet the substantial and unmet demands of businesses located in the City and County;
- Provide new industrial development that is attractive and minimizes conflicts with the surrounding existing uses;
- Provide a variety of new employment opportunities for the citizens of Moreno Valley and surrounding communities;
- Encourage warehouse distribution services that take advantage of the area's close proximity to various freeways and transportation corridors;
- Encourage new development consistent with the capacity and municipal service capabilities;

- Provide infrastructure improvements to meet phased Project needs in an efficient and cost-effective manner;
- Cluster industrial warehouse uses near access points to the state highway system to reduce traffic congestion on surface streets and to reduce air pollutant emissions from vehicle sources;
- Develop land uses that provide the City with a positive revenue/cost ratio and provide needed infrastructure in a timely fashion;
- Address community circulation, both vehicular and pedestrian, utilizing available capacity within the existing circulation system, and provide fair share improvements to various future-year deficient intersection or road segments; and
- Reduce peak hour vehicle trips, energy and water consumption compared to existing General Plan land uses.

III. ENVIRONMENTAL REVIEW AND PUBLIC PARTICIPATION

The City has conducted an extensive review of this Project which included the DEIR, FEIR and supporting technical studies, along with a public review and comment period first during the circulation of the Notice of Preparation/Initial Study and then through the circulation of the DEIR. The following is a summary of the environmental review of this Project:

- On February 4, 2008, the City circulated a Notice of Preparation (“NOP”) and the Initial Study that identified the environmental issues that the City anticipated would be analyzed in the Project’s DEIR to the State Clearinghouse, responsible agencies, and other interested parties.
- On February 13, 2008, the City conducted a public scoping meeting to allow members of the public to provide comments and input regarding the scope and content of the DEIR.
- The NOP public review period ran for 30 days, from February 4 to March 4, 2008. Written comments on the NOP were received from 22 different agencies, organizations, and individuals. The scope of the issues identified in the comments expressing concern included potential impacts associated with:

- Change in use from established General Plan and zoning designations. This issue was discussed in Section 4.1, Aesthetics, and Section 4.8, Land Use, of the DEIR;
 - Short-term and long-term air pollutant emissions including dust and diesel particulates from truck exhaust that could negatively affect nearby residential uses. This issue was discussed in Section 4.3, Air Quality, of the DEIR;
 - Short-term and long-term noise impacts that could affect nearby residential uses. These issues were discussed in Section 4.9, Noise, of the DEIR;
 - Potential impacts to future planned school sites were addressed in Section 4.8, Land Use, of the DEIR;
 - Potential water-related impacts (drainage, water quality of runoff from the project) were addressed in Section 4.7, Hydrology and Water Quality, in the DEIR;
 - Project truck traffic causing congestion on local roads, intersections, and freeway ramps, primarily on Redlands Boulevard, and impacts to vehicular, bicycle, and pedestrian safety. These issues were discussed in Section 4.11, Transportation, of the DEIR;
 - Impacts to aesthetics from loss of views, loss of neighborhood character, and increased night lighting as this area transitions from previously planned residential and business park uses to industrial uses along the south side of SR-60. These issues were discussed in Section 4.1, Aesthetics, and 4.8, Land Use, of the DEIR; and
 - Potential loss of biological or cultural (archaeological) resources by grading and development of the site, and suggestions to consult with local Native American tribes per SB 18. These issues were discussed in Section 4.4, Biological Resources, and 4.5, Cultural Resources, of the DEIR.
- Based on the Initial Study, included in the DEIR in Appendix A, and comments received pursuant to the NOP, it was determined that some issues need not be addressed in depth in the DEIR because previous studies of other analyses provided sufficient information,

analysis, and mitigation to conclude that there was little or no potential for significant impacts. These environmental topics included: (1) Geology and Soils; (2) Mineral Resources; (3) Public Services; (4) Recreation; and, (5) Forest Resources.

- As required by the California Environmental Quality Act (CEQA) Guidelines Section 15087, a Notice of Completion (NOC) of the Draft EIR State Clearinghouse No. 2008021002 for the Eucalyptus Industrial Park project was filed with the State Clearinghouse on July 17, 2012, and the Notice of Availability (NOA) of the Draft EIR was filed with the Riverside County Clerk on July 18, 2012.
- The Draft EIR was circulated for public review for a period of 48 days, from July 18, 2012 to September 4, 2012. Copies of the Draft EIR were distributed to all Responsible Agencies and to the State Clearinghouse in addition to various public agencies, citizen groups, and interested individuals. Copies of the Draft EIR were also made available for public review at the City Planning Department, at one area library, and on the internet. A total of thirteen (13) comment letters were received on the DEIR. Ten of the comment letters received were from Federal, State, regional, or local agencies. Three comment letters were received from private organizations or conservation groups – no letters were received from individuals. The City prepared specific responses to all comments. The responses to comments are included in Section 2.0 of the FEIR.
- On April 12, 2014 in accordance with *Public Resources Code* Section 21092.5, the City provided written responses to public agencies that commented on the DEIR.
- On June 13, 2014, Notice of the City Council hearing to consider the Project was provided in the following newspaper(s) of general and/or regional circulation: Press Enterprise.
- On June 24, 2014, this Council held a public hearing to consider the Project and staff recommendations. The City, after considering written comments and oral testimony on the EIR, determined that no new information was presented that would require recirculation of the EIR. Following public testimony, submission of additional written comments, and staff recommendations, this Council certified the EIR, adopted these Facts, Findings and the Statement of Overriding Considerations, and the further recommendations in the Staff Report, and approved the Project (collectively the “Approvals”).

IV. INDEPENDENT JUDGMENT FINDING

The Applicant retained the independent consulting firm of LSA Associates, Inc. (“LSA”) to prepare the EIR for the Project. LSA has prepared the EIR under the supervision, direction and review of the City with the assistance of an independent peer review (Willdan Engineering). The City of Moreno Valley is the Lead Agency for the preparation of the EIR, as defined by CEQA CPRC Section 21067 as amended. The City Council has received and reviewed the EIR prior to certifying the EIR and prior to making any decision to approve or disapprove the Project.

Finding: The EIR for the Project reflects the City’s independent judgment. The City has exercised independent judgment in accordance with *Public Resources Code* Section 21082.1(c) (3) in directing the consultant in the preparation of the EIR, as well as reviewing, analyzing, and revising material prepared by the consultant.

A. GENERAL FINDING ON MITIGATION MEASURES

In preparing the Approvals for this Project, City staff incorporated the mitigation measures recommended in the EIR as applicable to the Project. In the event that the Approvals do not use the exact wording of the mitigation measures recommended in the EIR, in each such instance, the adopted Approvals are intended to be identical or substantially similar to the recommended mitigation measure. Any minor revisions were made for the purpose of improving clarity or to better define the intended purpose.

Finding: Unless specifically stated to the contrary in these findings, it is this Council’s intent to adopt all mitigation measures recommended by the EIR which are applicable to the Project. If a measure has, through error, been omitted from the Approvals or from these Findings, and that measure is not specifically reflected in these Findings, that measure shall be deemed to be adopted pursuant to this paragraph. In addition, unless specifically stated to the contrary in these Findings, all Approvals repeating or rewording mitigation measures recommended in the EIR are intended to be substantially similar to the mitigation measures recommended in the EIR and are found to be equally effective in avoiding or lessening the identified environmental impact. In each instance, the Approvals contain the final wording for the mitigation measures.

V. ENVIRONMENTAL IMPACTS AND FINDINGS

City staff reports, the EIR, written and oral testimony at public meetings or hearings, these facts, findings, and statement of overriding considerations, and other information in the administrative record, serve as the basis for the City's environmental determination.

The detailed analysis of potentially significant environmental impacts and proposed mitigation measures for the Project is presented in Section 4.0 of the DEIR and Section 3.0 of the FEIR. Responses to comments on the DEIR, along with copies of the comments, are provided in Chapter 2.0 of the FEIR.

The EIR evaluated thirteen major environmental categories for potential impacts including Aesthetics, Agricultural Resources, Air Quality, Biological Resources, Cultural Resources, Hazards and Hazardous Materials, Hydrology and Water Quality, Land Use, Noise, Population and Housing, Transportation, Utilities and Service Systems, and Greenhouse Gases and Global Climate Change. Both Project-specific and cumulative impacts were evaluated. Of these thirteen major environmental categories, this Council concurs with the conclusions in the EIR that the issues and sub issues discussed in Sections V.A and V. B below either are less-than-significant without mitigation or can be mitigated below a level of significance. For the remaining potential environmental impacts that cannot feasibly be mitigated below a level of significance discussed in Section V.C, overriding considerations exist which make these potential impacts acceptable to this Council.

A. LESS-THAN-SIGNIFICANT ENVIRONMENTAL IMPACTS NOT REQUIRING MITIGATION

The Moreno Valley City Council hereby finds that the following potential environmental impacts of the Project are less-than-significant and therefore do not require the imposition of mitigation measures.

1. Aesthetics

a. Light and Glare

Potential Significant Impact: Whether the Project would create a new source of substantial light or glare that would adversely affect day or nighttime views in the area.

Findings: Potential impacts of the Project related to light and glare are discussed in detail in Section 4.1 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will

not result in significant impacts related to light and glare with the adherence to established City ordinances and development guidelines, therefore, no mitigation is required.

Facts in Support of the Findings: Section 4.1 identifies no sources of light or glare on the Project site. Development of the Project site would introduce new sources of light and glare into the area in the form of street lighting, parking lot lighting, and security lighting for the buildings. Lighting within loading areas (areas within the public view include the loading areas of Buildings 1, 2, and 3) will be directed downward so as to not Project lighting into the sky. The overall increase in ambient light in the area is expected to be incremental with compliance with the City’s development standards for lighting. The proposed Project will incrementally increase the amount of daytime glare in the Project area from introducing windows and metal fixtures into the area. All development in the City, which includes light generated from warehouse buildings and parking lots, is required to adhere to lighting requirements contained in the City’s Municipal Code. The Project is consistent with General Plan policies and Municipal Code requirements regarding light and glare, therefore, no impacts associated with this issue would occur and no mitigation is required (DEIR, pgs. 4.1-8 to 4.1-9).

b. Light and Glare

Potential Significant Impact: Whether the Project would create a new source of substantial light or glare that would adversely affect day or nighttime views in the area.

Findings: Potential impacts of the Project related to light and glare are discussed in detail in Section 4.1 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to light and glare with the adherence to established City ordinances and development guidelines, therefore, no mitigation is required.

Facts in Support of the Findings: Section 4.1 identifies no sources of light or glare on the Project site. Development of the Project site would introduce new sources of light and glare into the area in the form of street lighting, parking lot lighting, and security lighting for the buildings. Lighting within loading areas (areas within the public view include the loading areas of Buildings 1, 2, and 3) will be directed downward so as to not Project lighting into the sky. The overall increase in ambient light in the area is expected to be incremental with compliance with the City’s development standards for lighting. The proposed Project will incrementally increase the amount of daytime glare in the Project area from introducing windows and metal fixtures into the area. All development in the City, which includes light generated from warehouse buildings and parking lots, is required to adhere to lighting requirements contained in the City’s Municipal Code. The Project is consistent with General Plan policies and

Municipal Code requirements regarding light and glare, therefore, no impacts associated with this issue would occur and no mitigation is required (DEIR, pgs. 4.1-8 to 4.1-9).

2. Air Quality

a. Construction-Chronic Health Risk Impacts

Potential Significant Impact: Whether the Project would expose sensitive receptors to substantial pollutant concentrations.

For Maximum Individual Cancer Risk (MICR), the applicable thresholds are:

- An increased cancer risk greater than 10 in 1 million (1.0×10^{-5}) at any receptor location; or
- A cancer burden greater than 0.5.

For non-cancer chronic Hazard Index (HI); the applicable threshold is:

- A cumulative increase for any target organ system exceeding 1.0 at any receptor location.

Findings: Potential impacts of the Project related to construction-chronic health risks are discussed in detail in Section 4.3 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to sensitive receptor health risks and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.3 of the DEIR, the only toxic air pollution emissions in any significant quantity associated with the construction of the Project occur from diesel-powered equipment exhaust. A screening health risk assessment was performed according to the published Office of Environmental Health Hazard Assessment (OEHHA) health risk techniques.¹ According to the health risk assessment, the cancer risk due to construction of the Project is less than the threshold of 10 in 1 million. Therefore, health risks would be less than significant and no mitigation is required. (DEIR, pgs. 4.3-13 to 4.3-14)

b. Operational-Acute Health Risk Emission Impacts

Potential Significant Impact: Whether the Project would expose sensitive receptors to substantial pollutant concentrations.

For MICR, the applicable thresholds are:

¹ OEHHA, *Air Toxics Hot Spots Program Risk Assessment Guidelines*, August 2003, Appendix D, *Risk Assessment Procedures to Evaluate Particulate Emissions from Diesel-Fueled Vehicles*.

- An increased cancer risk greater than 10 in 1 million (1.0×10^{-5}) at any receptor location; or

For non-cancer chronic and acute HI; the applicable threshold is:

- A cumulative increase for any target organ system exceeding 1.0 at any receptor location.

Findings: Potential impacts of the Project related to operational-acute health risks are discussed in detail in Section 4.3 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to operational-acute health risks and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.3 of the DEIR, a screening level health risk assessment was performed for the operational emissions associated with the proposed Project based on the SCAQMD's *Health Risk Assessment Guidance for Analyzing Cancer Risk from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis* guidance. The operations expected to occur at this facility will not emit any toxic chemicals in any significant quantity other than vehicle exhaust. According to the health risk assessment the nearest residences would experience a cancer risk of 4.33 in 1 million, which is below the 10 in 1 million threshold. The nearest residences would also experience a chronic HI of 0.0016 and an acute HI of 0.0000088. Both the chronic and acute HI would be below the chronic and acute HI threshold of 1.0. Since the operational phase of the proposed Project would not exceed any of the long-term acute health risk assessment thresholds, a less than significant impact would occur. No mitigation is required. (DEIR, pgs. 4.3-14 to 4.3-18)

c. Operational-Carcinogenic and Chronic Health Risk Emission Impacts

Potential Significant Impact: Whether the proposed Project would expose sensitive receptors to substantial pollutant concentrations.

For MICR, the applicable thresholds are:

- An increased cancer risk greater than 10 in 1 million (1.0×10^{-5}) at any receptor location; or

For non-cancer health risk HI; the applicable threshold is:

- A cumulative increase for any target organ system exceeding 1.0 at any receptor location.

Findings: Potential impacts of the Project related to operational-carcinogenic and chronic health risk emission impacts are discussed in detail in Section 4.3 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to health risks related to operational emissions and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.3 of the DEIR, the closest residences to the Project would be exposed to a lifetime inhalation cancer risk of no more than 4.33 in 1 million, a 30-year inhalation cancer risk of no more than 3.88 in 1 million, and nearby workers a 40-year career inhalation cancer risk of no more than 1.5 in 1 million. The chronic health risk index is significantly less than the threshold of 1.0, in this case 0.0016 for residents and workers. No significant carcinogenic or chronic health risks would occur from Project-related traffic. No significant health risk would occur from Project-related truck traffic, and no mitigation is necessary. (DEIR, pg. 4.3-18)

d. Air Quality Impacts to Adjacent Future Development

Potential Significant Impact: Whether the proposed Project would expose sensitive receptors to substantial pollutant concentrations.

Findings: Potential impacts of the Project related to air quality impacts to adjacent future developments are discussed in detail in Section 4.3 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to air quality impacts to adjacent future development and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.3 of the DEIR, based on the land use assumptions for the future L-Aquila D’Pietra (LADP) Project, residential development would be located along the southern Project boundary between the proposed Project and the proposed LADP. It is anticipated that the proposed Project site would be fully developed prior to the occupation of any dwelling units in LADP; therefore, no construction-related air quality impacts to adjacent sensitive receptors would result from development of the proposed Project.

The primary health risk is from heavy-duty truck emissions is diesel particulate exhaust. According to the screening-level assessment, the future residential units south of the Project site would be exposed to an unmitigated inhalation cancer risk of approximately 4.3 in 1 million, which is less than the threshold of 10 in 1 million. The corresponding chronic and acute hazard indices would be approximately 0.0016 and 0.000088, which is less than the threshold of 1.0 for the chronic hazard index and acute hazard index. Since the screening-level analysis overall Project health risks are below established thresholds, any

detailed assessment would also produce less than significant health risk levels. Therefore, a less than significant impact associated with future uses that may occupy adjacent properties subsequent to development of the proposed Project would occur. No mitigation is required. (DEIR, pgs. 4.3-18 to 4.3-19)

e. Long-Term Microscale (CO Hotspot) Impacts

Potential Significant Impact: Whether the proposed Project would violate any air quality standard or contribute substantially to an existing or projected air quality violation. For CO, the applicable thresholds are:

- California State one-hour CO standard of 20.0 ppm; and
- California State eight-hour CO standard of 9.0 ppm.

Findings: Potential impacts of the Project related to long-term microscale emissions are discussed in detail in Section 4.3 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to long-term microscale emissions and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.3 of the DEIR, the highest one-hour CO concentration experienced at any of the intersections in the Project vicinity would not exceed the one hour CO State standard of 20 ppm. Based on the *Air Quality Analysis* prepared for the proposed Project, the proposed Project would contribute, at most, a 0.1 ppm increase to the one-hour CO concentrations for all scenarios. This is below the 1.0 ppm increase threshold. Also the highest eight-hour CO concentration experienced at any of the intersections in the Project vicinity would not exceed the eight-hour CO state standard of 35 ppm. Based on the *Air Quality Analysis* prepared for the proposed Project, the proposed Project would contribute, at most, a 0.1 ppm increase to the eight-hour CO concentrations for all scenarios. This is below the 0.45 ppm increase threshold. Since the proposed Project would not exceed the one-hour or eight-hour CO concentration standards, it is reasonable to conclude that no CO hot spots would occur. Therefore, the proposed Project would not have a significant impact on local air quality for CO and no mitigation measures would be required. (DEIR, pgs. 4.3-19 to 4.3-20)

f. Odors

Potential Significant Impact: Whether the Project would create objectionable odors affecting a substantial number of people.

Findings: Potential impacts of the Project related to objectionable odors are discussed in detail in Section 4.3 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts due to objectionable odors and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.3 of the DEIR, the Project does not propose land uses typically associated with emitting objectionable odors. Potential odors during Project construction may result from heavy equipment exhaust and the application of asphalt and architectural coatings. Standard construction requirements would minimize odor impacts from construction. The construction odor emissions would be temporary, short-term, and intermittent in nature and would cease upon completion of the respective phase of construction and is thus considered less-than-significant. Project-related operational odor sources such as vehicle exhaust and routine painting/ maintenance activities are typical of industrial/commercial activities and would be localized to the immediate Project vicinity, with little or no off-site effects. Accordingly, impacts related to objectionable odors will be less-than-significant and no mitigation is required. (DEIR, pg. 4.3-20)

3. Biological Resources

a. Habitat Fragmentation/Wildlife Movement

Potential Significant Impact: Whether the Project would interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites.

Findings: Potential impacts of the Project related to habitat fragmentation and wildlife movement are discussed in detail in Section 4.4 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts to habitat and wildlife movement and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.4 of the DEIR, the proposed Project site is isolated from regional wildlife corridors by existing barriers including urban development, agricultural uses, and roadways. Land uses adjacent to the Project site include fallow agricultural land to the south and east, commercial uses to the west, and residential uses to the north across SR-60. Due to the nature of development occurring in the Project area and the current condition of the Project site, it is highly unlikely that the Project site is utilized as a wildlife movement corridor, with the exception of the Quincy Channel. The proposed Project will not affect the majority of Quincy Channel, thus allowing wildlife to continue using the existing channel to traverse the site. The quality of on-site habitat has been diminished

due to the previous and frequent ground disturbance and past agricultural activities. In addition, the existing roadways and infrastructure features further isolate the Project site from natural areas. Due to the disturbed condition of the Project site, the nature of development to the southeast and west, the intervening presence of roadways and infrastructure, and adherence to City development standards identified in the Municipal Code, development of the proposed Project will not result in significant habitat fragmentation or substantially affect established wildlife corridors or wildlife movement. A less than significant impact would result and no mitigation is required. (DEIR, pg. 4.4-23)

b. Adopted Policies and Ordinances

Potential Significant Impact: Whether the Project would conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.

Findings: Potential impacts of the Project related to adopted policies and ordinances are discussed in detail in Section 4.4 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in conflict with local policies or ordinances and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.4 of the DEIR, city policies or ordinances identified in the General Plan protecting biological resources include: mitigation of impacts to riparian areas or other natural sensitive communities (Policy 7.4.1), preservation of natural drainage courses in their natural hydrological state (Policy 7.4.3), and City fulfillment of obligations set forth within any agreements and permits related to the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP) implementation (Policy 7.4.5).

The Quincy Channel, located adjacent and to the east of the proposed Project site, is considered a sensitive natural habitat due to the value it provides as nesting sites and foraging sites for migratory birds. The proposed Project would be designed to minimize encroachment into this natural area through setback requirements established in Sections 9.16.120 and 9.05.040 of the City's Municipal Code, thus preserving this habitat area in its natural state pursuant to the City's General Plan. At the northeast corner of Building 2, the development plans call for a minimum setback from Quincy Channel due to the topography and alignment of the creek. From that point, the plan provides a setback and landscaped buffer area between the drainage area and the structures proposed on the site that widens and varies from 25 to 50 feet (including the flood control access road). Therefore, the proposed Project would not conflict with local policies or ordinances protecting biological resources and a less than significant impact would occur. No mitigation is required. (DEIR, pg. 4.4-24)

c. Adopted Habitat Conservation Plans

Potential Significant Impact: Whether the Project would conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.

Findings: Potential impacts of the Project related to adopted habitat conservation plans are discussed in detail in Section 4.4 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in conflicts with local habitat conservation plans and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.4 of the DEIR, the Project site is located within the Western Riverside County MSHCP, however, the Project site is not within any MSHCP criteria cell or habitat linkage. Furthermore, the Project site is not located within an MSHCP mammal or amphibian survey area; a Narrow Endemic Plant Species Survey Area or Criteria Area Plant Species Survey Area; or a riparian, wetland, or vernal pool habitat/species survey area. A habitat assessment for the burrowing owl is required under the MSHCP. While the Project site is not within any MSHCP conservation areas, the Project is still subject to provisions of the MSHCP. In particular, the Project applicant will be required to provide payment of mitigation fees and adhere to the requirements established in the MSHCP. Pursuant to agreements with the USFWS and the CDFG, the payment of the mitigation fee prior to the issuance of a building permit by the City, and compliance with applicable provisions of the MSHCP provides full mitigation under CEQA, FESA, and CESA for impacts to the species and habitats covered by the MSHCP. Therefore, development of the proposed Project will not conflict with the provisions of the MSHCP. A less than significant impact would occur and no mitigation is required.

In addition to the MSHCP, the Project site is within the boundaries of the Stephens Kangaroo Rat Habitat Conservation Plan (SKR HCP) established by the County of Riverside. Development of the proposed Project will not conflict with the provisions of the SKR HCP. The payment of a local mitigation fee prior to issuance of a grading permit by the City will be required. There are no other requirements for the Project under the SKR HCP and a less than significant impact would occur with payment of the fee and no further mitigation is required. (DEIR, pg. 4.4-24)

d. Endangered and Threatened Species

Potential Significant Impact: Whether the Project would have a substantial adverse effect, either directly or through habitat modifications, on any species identified as endangered or threatened in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife (CDFW) or U.S. Fish and Wildlife Service (USFWS).

Findings: Potential impacts of the Project related to endangered and threatened species are discussed in detail in Section 4.4 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts to endangered or threatened species and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.4 of the DEIR, no species listed by the State and/or Federal Government as Endangered or Threatened was identified on site during the field surveys; however, Swainson's hawk, a State-listed species, and Stephens' kangaroo rat, a federally and State-listed species, have a low potential to occur on the site.

The Project site is not located within any USFWS designated critical habitat . Swainson's hawk would be expected to occur on the site, if at all, only during migration as foraging individuals. Swainson's hawk is covered by the MSHCP. Mitigation for covered species consists of participation in the MSHCP.

The Project site is also within the SKR HCP Fee Area. The proposed Project site is not within an SKR Core Area. The SKR HCP provides Take Authorization for the SKR within its boundaries, and no surveys or additional measures are required other than paying a development fee prior to issuance of a grading permit by the City. In the absence of a significant impact, no mitigation is warranted. (DEIR, pg. 4.4-25)

e. Cumulative Biological Impacts

Potential Significant Impact: Whether the Project in connection with past, current, and probably future projects would incrementally effect biological resources.

Findings: Potential impacts of the Project related to cumulative biological impacts are discussed in detail in Section 4.4 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant cumulative impacts to biological resources and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.4 of the DEIR, the proposed Project would not make a cumulatively considerable contribution to impacts on endangered or threatened species, riparian

habitat or natural plant communities, jurisdictional waters, habitat fragmentation, wildlife movement, local policies and ordinances, or habitat conservation plans. There are no projects that would, in combination with the proposed Project, produce a significant impact to non-listed sensitive species. Therefore, there are no significant cumulative impacts anticipated to occur that are associated with biological resources. With implementation of Project-level Mitigation Measures 4.4.6.1 through 4.4.6.3, the Project's contribution to cumulative biological impacts will not be cumulatively considerable and no additional mitigation is required. (DEIR, pgs 4.4-30 to 4.4-31)

4. Cultural Resources

a. Historical Structures and Features

Potential Significant Impact: Whether the Project would cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5.

Findings: Potential impacts of the Project related to historical structures and features are discussed in detail in Section 4.5 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts to historical structures and features and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.5 of the DEIR, no structures or unique features are currently located within the Project limits. An online title search was conducted and historic maps were reviewed to determine the potential for structures and/or the remains of former sites of buildings or resources within the Project limits. No evidence of past structures or historic features was identified, nor was evidence of such structures identified during the on-site cultural resource survey or the records search. As no evidence has been identified to suggest the presence of past or current structures on site, no impacts related to historic structures or features will occur. In the absence of a significant impact, no mitigation is warranted. (DEIR, pg.4.5-5)

b. Human Remains

Potential Significant Impact: Whether the Project would disturb any human remains, including those interred outside of formal cemeteries.

Findings: Potential impacts of the Project related to human remains are discussed in detail in Section 4.5 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts to human remains and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.5 of the DEIR, the Project site was utilized for agricultural production. No evidence suggesting the Project site has been utilized in the past for human burials has been identified.² In the unlikely event human remains are discovered during grading or construction activities, State law (Health and Safety Code §7050.5) requires that no further disturbance shall occur until the County Coroner has made determination of the origin and disposition pursuant to Public Resources Code 5097.98. Because adherence to provisions of Health and Safety Code §7050.5 is required of all development projects, and because adherence to the requirements in State law sufficiently mitigates for potential impacts to human remains, no significant impact related to this issue will occur. Because potential impacts associated with this issue are less than significant, no mitigation is required. (DEIR, pg. 4.5-5)

c. Cumulative Cultural Resources

Potential Significant Impact: Whether the Project in connection with past, current, and probable future projects would have a cumulative significant impact on cultural resources.

Findings: Potential impacts of the Project related to cumulative cultural resources are discussed in detail in Section 4.5 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant cumulative impacts to cultural resources and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.5 of the DEIR, on-site sediments and cumulative archaeological and paleontological discoveries elevate the potential for the on-site presence of archaeological and paleontological resources. The proposed Project includes measures to identify, recover, and/or record any archaeological or paleontological resource that may occur within the Project limits. Although unlikely to occur, potential impacts associated with human remains would be reduced to a less than significant level through adherence to existing State law. There are no projects that would, in combination with the proposed Project, result in any significant cumulative impacts on historical, archaeological, or paleontological resources, or cumulative impacts to human remains. Therefore, the Project will not make a significant contribution to any cumulatively considerable impacts associated with cultural resources, and no mitigation is required. (DEIR, pg. 4.5-8)

5. Hazards and Hazardous Materials

² Chapter 5.10 Cultural Resources, City of Moreno Valley General Plan Final EIR, July 2006.

a. Routine Transport, Use, or Disposal of Hazardous Materials and Reasonable Foreseeable Upset and Accident Conditions

Potential Significant Impact: Whether the Project would create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment. Also, whether the Project would create a significant hazard to the public through the routine transport, use, or disposal of hazardous materials.

Findings: Potential impacts of the Project related to routine transport, use or disposal of hazardous materials and/or the risk of upset or accidental release of hazardous materials into the environment are discussed in detail in Section 4.6 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to routine transport, use or disposal of hazardous materials and, therefore, no mitigation is required.

Facts in Support of the Findings: Two *Phase I Environmental Site Assessments* (ESAs) were prepared for the proposed Project site. During the on-site inspection, no hazardous materials handling, storage, or disposal areas were observed. Additionally, no evidence of stressed vegetation, discolored water, or pools of liquid was observed during the on-site reconnaissance. However, because the Project site has been historically utilized for agricultural production and because of the close proximity to SR-60, soil samples were taken in various parts of the Project site to further evaluate the potential contamination on the site. Laboratory results indicated no detectable concentrations of hydrocarbon compounds in the samples collected. However, there were detectable concentrations of organochlorine pesticides and PCBs in samples collected from possible drainage accumulation and pesticide usage on site. These concentrations were within the allowable Preliminary Remedial Goals (PRGs) for the Project.

During the Project's construction and operation, it is likely that materials such as fuels, lubricants, solvents, cleansers, and paints will be transported to and from the site. The use and transport of these materials and all potentially hazardous materials would be handled according to the appropriate State and Federal regulations. Adherence to existing regulations as they relate to the handling and transport of potentially hazardous materials during construction would reduce impacts associated with this issue to a less than significant level and no mitigation is required. (DEIR, pgs. 4.6-6 through 4.6-11)

b. Hazardous Material Sites

Potential Significant Impact: Whether the Project would be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment.

Findings: Potential impacts of the Project related to hazardous material sites are discussed in detail in Section 4.6 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts due to hazardous material sites and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.6 of the DEIR, a database review was conducted for both of the Phase 1 ESAs conducted for the Project site. Based on the database review, the Project site is not included on the State of California Hazardous Waste and Substances Site List (Cortese list) pursuant to the California Code (Section 65962.5). The Project site is not listed in the NPL; Corrective Action Order Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) list; Emergency Response Notification System (ERNS) list; Resource Conservation and Recovery Act System; Toxic Release Inventory System (TRIS); CAL-SITES Database for Annual Work Plan; California Department of Toxic Substances Control (DTSC); Regional Water Quality Control Board (RWQCB); California Waste Management Board (CWMB); Solid Waste Information System (SWIS); Waste Management Units Database System (WMUDS); California Border Zone Properties (Deed Restriction Properties); DTSC Hazardous Waste and Substances Site List (Cortese list); or any Leaking Underground Storage Tank (LUST) database.

Because the Project site is not identified on a list of hazardous materials sites, the potential that the development of the site would create a significant hazard to the public or environment is less than significant. In addition, the results of the site investigations performed by RM Environmental indicate that no significant amount of any hazardous material exists on site. Therefore, impacts associated with this issue are less than significant and no mitigation would be required. (DEIR, pgs. 4.6-11 through 4.6-12)

c. Existing or Proposed Schools

Potential Significant Impact: Whether the Project would create hazardous emissions or handle acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.

Findings: Potential impacts of the Project related to existing or proposed schools are discussed in detail in Section 4.6 of the DEIR. Based on the entire record before us, this Council finds that development of

the Project will not result in significant impacts related to existing or proposed schools and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.6 of the DEIR, at the time the NOP for the proposed Project was released, the Moreno Valley Unified School District (MVUSD) had identified three potential school sites within the Project vicinity. Of these potential school sites, High School #5 was the closest planned school to the Project site as it was to be located on the adjacent parcel east of the Project site. Due to MVUSD concerns regarding the placement of schools in areas that may be rezoned with warehousing uses, MVUSD has made a decision to abandon the development of these school facility projects on the identified sites.³ Therefore, no planned school facilities would be located adjacent to or within 0.25 mile of the Project site. Since there are no schools planned, proposed, or operating within 0.25 mile of the Project site, no impacts associated with this issue would occur and no mitigation is required. (DEIR, pgs. 4.6-12 through 4.6-13)

³ *Resolution No. 2007-08-8*, Board of Education of the Moreno Valley Unified School District, April 15, 2008.

d. Emergency Response Plan

Potential Significant Impact: Whether the Project would impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan.

Findings: Potential impacts of the Project related to emergency response plans are discussed in detail in Section 4.6 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to emergency response plans and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.6 of the DEIR, in February 2006, the County of Riverside, in cooperation with the cities and special districts, completed its Emergency Operations Plan (EOP). The EOP establishes the emergency organization, assigns tasks, specifies general procedures, and provides for coordination of planning efforts of the various emergency staff and resources.

Construction activities that may temporarily restrict vehicular traffic would be required to implement adequate measures to facilitate the passage of people and vehicles through/around any required road closures. During the operational phase of the proposed Project, on-site access for fire and emergency vehicles would be required to comply with standards established by the City Public Works Department. The size and location of fire suppression facilities (e.g., hydrants) and fire access routes would be required to conform to Fire Department standards. As required of all development in the City, the operation of the proposed Project would be required to conform to applicable Uniform Fire Code standards. The submittal of such plans would be considered a condition of approval, which would be part of the permitting process initiated by the applicant and approved by the City in accordance with City standards. As with any development, access to and through the Project would be required to comply with the required street widths, as determined in the General Plan Circulation Element, and the Uniform Fire Code. Therefore, implementation of the proposed Project would not impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan. No significant impact would occur and no mitigation is required. (DEIR, pg. 4.6-13)

e. Wildland Fires

Potential Significant Impact: Whether the Project would expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildland.

Findings: Potential impacts of the Project related to wildland fires are discussed in detail in Section 4.6 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to wildland fires and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.6 of the DEIR, the Project site is not located within a “High Fire Hazard Area” or within an area susceptible to wildfires identified by the City of Moreno Valley. Areas surrounding the Project site consist of urban, built, and open space. Because of lack of abundant vegetation and the extensive amount of development within the vicinity of the Project site, on-site and adjacent areas do not have the capability to support a wildfire. The proposed uses on site do not typically create a fire hazards nor are they subject to wildland fire hazards due to the type of construction materials used. The Project will be designed and constructed to comply with adopted standards and guidelines for fire protection. Irrigated landscaping will surround Project buildings, and are required to include fire suppression features by law. Due to the location of the fire station adjacent to the Project in the northwest corner and the low probability that the Project site would be subject or susceptible to wildland fires, no significant impact related to this issue would occur. No mitigation is required. (DEIR, pgs. 4.6-13 through 4.6-14)

f. Cumulative Impacts from Hazards and Hazardous Materials

Potential Significant Impact: Whether the Project in connection with past, current, and probable future projects would cumulatively increase the risk of hazardous materials and exposure to hazardous materials.

Findings: Potential impacts of the Project related to cumulative hazardous materials impacts are discussed in detail in Section 4.6 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to cumulative hazardous materials and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.6 of the DEIR, the proposed Project would not result in significant cumulative impacts associated with the routine transport, use, and disposal of hazardous materials; or the emission or handling of hazardous substances. As areas of the eastern portion of Moreno Valley continue to develop, the amount of truck traffic is expected to increase in proportion to the amount of industrial or commercial development that take place in the area. The trucks traveling in the area of the Project and the surrounding areas may contain hazardous materials as well as contribute to emission in the cumulative area. Accidental spills and leaks are unplanned occurrences. It is impossible to predict the occurrences of such events and the likelihood of such events occurring in close proximity to

each other at the same time is very small; therefore, such events cannot be considered cumulatively significant.

As anticipated in the City's General Plan, demographic increases, continued retail and service demands, and the availability of vacant property will lead to the new residential, commercial, and industrial development in the City and surrounding area. While the project-specific hazardous material impacts of individual development projects will be addressed separately in future CEQA documents, anticipated future development will contribute, through increases in the number of locations that sell, store, transport, or dispose of hazardous materials, to a cumulative increase in risk for hazardous material incidents. As with the proposed Project, it is anticipated that future development projects will be required to adhere to applicable local, State, and Federal requirements that regulate the use, release, storage, sale, and transport of hazardous materials. Such compliance would ensure that the proposed Project will not make a significant contribution to a cumulatively considerable impact in this regard, and no mitigation measures for cumulative impacts are required. (DEIR, pg. 4.6-14)

6. Hydrology, Drainage, and Water Quality

a. Groundwater

Potential Significant Impact: Whether the Project would substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level

Findings: Potential impacts of the Project related to groundwater are discussed in detail in Section 4.7 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to groundwater and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.7 of the DEIR, the proposed Project would obtain water service from the EMWD. It is anticipated that the proposed Project would primarily utilize imported water purchased from Metropolitan. In the event that imported water is not available, this imported water would be supplemented by local groundwater sources.

The implementation of the existing West San Jacinto Groundwater Basin Management Plan would ensure that local groundwater resources are conserved and groundwater overdraft does not occur. If the use of groundwater supplies was necessary, the proposed Project would be required to comply with any future water use restricting regulations further minimizing impacts to groundwater supply.

As identified in the City's General Plan, the proposed Project would not interfere with groundwater recharge as the Project site is not identified as a groundwater recharge area.⁴ Therefore, the proposed Project would not interfere with groundwater recharge activities. Impacts associated with this issue are less than significant and no mitigation measure is required. (DEIR, pg. 4.7-14)

b. Flooding-Related Impacts

Potential Significant Impact: Whether the Project would place within a 100-year flood hazard area structures that would impede or redirect flood flows.

Findings: Potential impacts of the Project related to flooding are discussed in detail in Section 4.7 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to flooding and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.7 of the DEIR, flooding in the City of Moreno Valley could result from intense storms resulting in rapid runoff. The Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRMs) identify areas subject to flooding during the 100-year storm.⁵ Based on these FIRMs and the Project site does not fall within a 100-year flood zone.⁶ The proposed Project is industrial in nature and the implementation of the proposed Project would not result in the placement of housing within a 100-year floodplain. Because the Project site does not lie within a 100-year floodplain and does not include housing, impacts related to this issue are less than significant. No further discussion or mitigation is required. (DEIR, pgs. 4.7-14 through 4.7-17)

c. Drainage Pattern-Related Impacts

Potential Significant Impact: Whether the Project would substantially alter the existing local drainage patterns of the site and substantially increase the rate or amount of surface runoff in a manner which would result in substantial erosion, siltation, or flooding on or off site.

Findings: Potential impacts of the Project related to drainage patterns are discussed in detail in Section 4.7 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts related to drainage patterns and, therefore, no mitigation is required.

⁴ Section 5.7 Hydrology/Water Quality, City of Moreno Valley General Plan Final Program EIR, City of Moreno Valley, July 2006.
⁵ The term "100-year" is a measure of the size of the flood, not how often it occurs. The "100-year flood" is a flooding event that has a one percent chance of occurring in any given year.
⁶ FEMA DFIRM Data, 2008.

Facts in Support of the Findings: According to Section 4.7 of the DEIR, the proposed Project would alter the existing drainage patterns and affect surface runoff; however, several BMPs would be designed and installed on site to minimize these alterations, resulting in a less than significant impact. Development of the Project site would result in increased impervious surfaces in the form of roadways, parking lots, and industrial warehouse buildings. The proposed Project incorporates six detention/sedimentation basins for both water quality and quantity control purposes. The Project would also include vegetated swales, detention/sedimentation basins, and sand filters.

Under post-development conditions, all on-site flows would be routed to Quincy Channel. This drainage pattern would mimic the existing drainage pattern, which has flows draining to the Quincy Channel and the unnamed dry wash to the south. Since the unnamed dry wash connects to Quincy Channel farther south of the Project, all flows under existing conditions drain into Quincy Channel. Flows in Quincy Channel are routed to the Perris Valley Storm Drain where flows continue onto the San Jacinto River and eventually reach Lake Elsinore.

Increased runoff from the site could result in substantial erosion of local drainage ways and siltation of downstream receiving waters. However, with the proposed drainage system installed on site, the proposed Project would not produce any post-development peak flow leaving the site larger than the pre-development peak flows leaving the site for the analyzed storms. In addition, because the implementation of various BMPs will reduce off-site flow velocity and volume, erosional runoff and silt volumes would be minimized to the greatest extent practical. Because the proposed Project would maintain existing drainage patterns on site and implement BMPs that would minimize erosion and generation of silt on site, impacts associated with this issue are less than significant and no mitigation measures are required. (DEIR, pg. 4.7-17)

d. Hydrology and Water Quality Cumulative Impacts

Potential Significant Impact: Whether the Project in connection with past, current, and probable future projects would have significant cumulative impacts on hydrology and water quality.

Findings: Potential impacts of the Project related to cumulative hydrology and water quality impacts are discussed in detail in Section 4.7 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant cumulative impacts to hydrology and water quality and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.7 of the DEIR, increases in the amount and extent of development in the City and surrounding areas will increase the potential for pollutants in runoff, which in turn would affect water quality. The Project's water quality impacts will be mitigated through on-site detention/sedimentation basins and other water pollution control mechanisms such as vegetated swales, sand filters, and storm drain inlet filters. Similar requirements will be placed on all other development in the Project vicinity by the City and the RWQCB, further reducing the potential for cumulative impacts. Since all development within the City is required to account and mitigate for their individual water quality impacts before runoff leaves each individual site, it is reasonable to conclude that water quality would be maintained throughout the cumulative area. Adherence to NPDES, SWPPP, and WQMP requirements will reduce any such cumulative water quality impact to a less than significant level.

Groundwater recharge policies and practices implemented by the RWQCB and local agencies will ensure groundwater supplies are maintained at appropriate levels. As such, no significant cumulative groundwater supply impacts are anticipated to occur with the development of the proposed Project.

The drainage system for the proposed Project would be designed so that runoff from the Project site after Project development is directed to on-site treatment BMPs and flow volumes would be equal to or less than historic conditions at any given discharge location. This same requirement will be placed on all other development in the vicinity of the Project site by the City of Moreno Valley. Therefore, the proposed Project will not make a significant contribution to any cumulatively considerable impacts related to drainage or water quality and no mitigation is required. (DEIR, pgs. 4.7-28 through 4.7-29)

8. Land Use and Planning

a. Physically Divide an Established Community

Potential Significant Impact: Whether the Project would physically divide an established community.

Findings: Potential impacts of the Project related to the physically dividing an established community are discussed in detail in Section 4.8 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts due to a physical divide of an established community and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.8 of the DEIR, land uses adjacent to the Project site include residential uses to the southeast, vacant land to the south, commercial uses to the west, SR-60 and residential uses to the north, and active hay/alfalfa production uses to the east. The Project site

does not contain any existing housing, nor does the site complement or constitute part of a community or neighborhood. Based on this information, the proposed Project will physically divide an existing established community. No impact related to this issue would occur; therefore, no mitigation is required. (DEIR, pgs. 4.8-4 through 4.8-5)

b. Conflict with Any Applicable Habitat or Natural Community Conservation Plan

Potential Significant Impact: Whether the Project would conflict with any applicable habitat conservation plan or natural community conservation plan.

Findings: Potential impacts of the Project related to the conflict with any applicable habitat conservation plan are discussed in detail in Section 4.8 of the DEIR. Based on the entire record before us, this Council finds that development of the Project will not result in significant impacts due to a conflict with any applicable habitat or natural community conservation plan and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.8 in the DEIR, the Project site is located within the MSHCP area.⁷ The Project site is not within an MSHCP criteria cell or habitat linkage. Furthermore, the Project site is not located within an MSHCP mammal or amphibian survey area, Narrow Endemic Plant Species Survey Area (NEPSSA), Criteria Area Plant Species Survey Area (CAPSSA), or a riparian, wetland, or vernal pool habitat/species survey area.⁸

While the Project site is not within any conservation area delineated in the MSHCP, the Project is still subject to provisions of the MSHCP. In particular, the Project proponent will be required to provide payment of mitigation fees and adhere to the requirements established in the MSHCP. Pursuant to agreements with the USFWS and the CDFW, the payment of the mitigation fees and compliance provisions of the MSHCP provides full mitigation under the CEQA, FESA, and CESA for impacts to the species and habitats covered by the MSHCP. Since the City has adopted the MSHCP and its requirements and provisions, and since the Project is within the City, the proposed Project would be required to adhere to applicable MSHCP requirements and fees. Therefore, the proposed Project would not conflict with any applicable HCP and no significant impact associated with this issue would occur. No mitigation would be required. (DEIR, pg. 4.8-4)

c. Cumulative Land Use Impacts

Potential Significant Impact: Whether the Project in connection with past, current, and foreseeable future projects would incrementally affect biological resources.

Findings: Potential impacts of the Project related to cumulative land use impacts are discussed in detail in Section 4.8 of the DEIR. Based on the entire record before us, this Council finds that development of

⁷ City of Moreno Valley General Plan Final Program EIR, Figure 5.9-4 Reche Canyon/Badlands Area.

⁸ <http://www.rctlma.org/gis/rciprepgen.html>, site accessed December 4, 2007.

the Project will not result in significant cumulative impacts related to land uses and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.8 of the DEIR, implementation of the proposed Project represents establishment of new land uses within the currently undeveloped Project site that would result in an intensification of permitted land uses associated with a land use change from Business Park and Residential to Light Industrial uses, changes to the General Plan Circulation Element, and the loss of the Primary Animal Keeping Overlay (PAKO) associated with the RA-2 zone. However, the proposed Project is generally consistent with regional plans and planning efforts, although it is not fully consistent with the SCAG's RTP and Compass Blueprint Plan because it eliminates some housing in favor of industrial employment uses. It will incrementally improve the City's long-standing jobs/housing ratio, which is also a regional goal of the various SCAG plans. It is also not consistent with existing General Plan land use designations, objectives and policies, nor is it consistent with existing zoning designations on the site. For these reasons, a General Plan Amendment and Zone Change are proposed for consideration by the City.

The proposed changes in land use will also result in a loss of up to 584 (R-15) multi-family residential units, many of which could have contributed to the City's affordable housing supply at some point in the future. However, this was determined to be a less than significant Project impact on local housing because the City's Housing Element identifies over twice as much potential affordable housing as the City's RHNA allocation, so it will not make a significant contribution to a cumulatively considerable impact on regional housing.

The Project would also not make a similar cumulatively considerable land use impact relative to dividing an established community or conflicting with an approved habitat conservation plan and no mitigation is required. (DEIR, pgs. 4.8-17 to 4.8-18)

8. Noise

a. **Airport Noise**

Potential Significant Impacts: Whether a Project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would result in exposure of people residing or working in the Project area to excessive noise levels. Or if a Project within the vicinity of a private airstrip, would expose people residing or working in the Project area to excessive noise levels.

Findings: Potential impacts of the Project relating to airport noise are discussed in detail in Section 4.9 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to airport noise will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.9 of the DEIR, the proposed Project site is located approximately 5 miles northeast of the March Air Reserve Base. Aircraft operations from the airport currently contribute intermittent single-event noise. However, the proposed Project is not identified as being within the noise or safety contours delineated for the MARB Airport. The proposed Project is not located within two miles of a public or private airport; therefore, the proposed Project would not have the potential to expose people to excessive noise levels from airport operations and no impact regarding this issue would occur with implementation of the proposed Project. No mitigation is required. (DEIR, pg. 4.9-10)

b. Ground-Borne Vibrations

Potential Significant Impact: Whether the Project would result in exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels.

Findings: Potential impacts of the Project relating groundborne vibration and groundborne noise are discussed in detail in Section 4.9 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to ground-borne vibration and groundborne noise will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.9 of the DEIR, the Project site is not located near steel-wheeled trains. Additionally, roadways in the Project area are either paved or would be paved and would not result in traffic driving over rough roads. Construction activities for the Project site do not include blasting or pile driving. The primary vibratory source during the construction of the proposed Project would be large bulldozers. Based on published data, typical bulldozer activities generate an approximate vibration level of 0.089 in/sec at a distance of 25 feet. At the distance of the nearest residence to the Project boundary (about 50 feet) the estimated vibration level will be 0.0415 in/sec. While heavy-duty earthmoving equipment would be used during the construction phase of the Project, the level of vibration would not be excessive or permanent, nor would it exceed the level at which building damage typically occurs. Therefore, impacts from construction-related groundborne vibration construction would be less than significant and no mitigation is required. (DEIR, pg. 4.-11)

c. Long-Term Traffic Noise

Potential Significant Impact: Whether the Project would result in a substantial temporary, periodic, and/or permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project.

Findings: Potential impacts of the Project related to long-term noise are discussed in detail in Section 4.9 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to long-term noise will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.9 of the DEIR, the *Noise Impact Analysis* (Appendix H) indicates that implementation of the proposed Project would result in relatively minor changes in traffic noise levels except along Eucalyptus Avenue between Moreno Beach Drive and Driveway A. The largest Project-related increase in traffic noise would be along Eucalyptus Avenue/Fir Avenue between Auto Mall Drive and Redlands Boulevard. This segment would experience a 13.6 dBA increase over the baseline (with the Project) scenario and a 13.3 dBA increase over the baseline (with the Project) scenario in opening year (2012). In addition, the roadway segment along Eucalyptus Avenue between Moreno Beach Drive and Auto Mall Drive would experience a 4.5 dBA increase over the baseline scenario in 2012. However, no noise-sensitive uses exist or are planned near either roadway segment.

For the Project build out year (2035) analysis, the greatest increase in noise levels is along Eucalyptus Avenue between Auto Mall Drive and Redlands Boulevard, where an increase of up to 1.3 dBA is predicted, with the ambient noise level predicted to be 71.6 dBA at 50 feet from the centerline of the street. In addition, the greatest increases in noise levels associated with the General Plan Build Out Year is along Eucalyptus Avenue between Auto Mall Drive and Redlands Boulevard, where an increase of up to 0.9 dBA is predicted, with the ambient noise level predicted to be 73.0 dBA at 50 feet from the centerline of the street. However, no noise-sensitive uses exist or are planned near the roadway segment. Therefore, noise impacts at the roadway segments where an increase of more than 3.0 dBA would occur are considered less than significant because there are no sensitive receptors located along the roadway segments that would be affected. All other roadway segments would have an increase in noise of less than 3.0 dBA, which would not be perceptible to the human ear in an outdoor environment. Therefore, impacts would be less than significant and no mitigation measures would be required for off-site areas. (DEIR, pgs. 4.9-11 to 4.9-19)

d. Long-Term Operational Noise

Potential Significant Impact: Whether the Project would cause exposure of persons to or generation of noise levels in excess of standards established in the City of Moreno Valley General Plan, Moreno Valley Municipal Code, or applicable standards of other agencies.

Findings: Potential impacts of the Project related to long-term operational noise are discussed in detail in Section 4.9 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to long-term operational noise will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.9 of the DEIR, potential long-term stationary noise impacts would primarily be associated with operations at the proposed warehouse and the light industrial uses. The proposed on-site uses would generate noise from truck delivery, loading/unloading activities at the loading areas, and other noise-producing activities within the parking lot. Through distance divergence, attenuation, and building shielding these sources of noise would be reduced to less than significant levels; and no mitigation is required. (DEIR, pgs. 4.9-20 to 4.9-22)

e. Noise Impacts to Adjacent Future Development

Potential Significant Impact: Whether the Project would result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project.

Findings: Potential impacts of the Project related to noise impacts to adjacent future development are discussed in detail in Section 4.9 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to noise impacts to adjacent future development and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.9 of the DEIR, based on the land use assumptions for the future LADP Project, residential development would be located along the southern Project boundary between the proposed Project and the proposed LADP. It is anticipated that the proposed Project site would be fully developed prior to the occupation of any dwelling units in LADP; therefore, no construction-related noise impacts to future adjacent sensitive receptors would result from development of the proposed Project. Also, the proposed on-site uses would generate noise from truck delivery, loading/unloading activities at the loading areas, and other noise-producing activities within the parking lot. Through distance divergence, attenuation, and building shielding these sources of noise

would be reduced to less than significant levels. Therefore, a less than significant impact would occur to adjacent future development and no mitigation is required. (DEIR, pgs. 4.9-23 to 4.9-24)

f. Cumulative Noise Impacts

Potential Significant Impact: Whether the Project in connection with past, current, and probable future Project would cause cumulative noise impacts within the City of Moreno Valley.

Findings: Potential impacts of the Project related to cumulative noise are discussed in detail in Section 4.9 of the DEIR. Based on the entire record before us, this Council finds that no significant cumulative impacts related to noise will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: Construction crew commutes and the transport of construction equipment, materials, and fill to the site for the proposed Project would incrementally increase noise levels on access roads leading to the site. Secondary sources of noise would include noise generated during excavation, grading, and building erection on the Project site. Although it is unlikely that adjacent properties will be developed at the same time as the proposed Project, if adjacent properties are developed at the same time as the proposed Project, implementation of the stated mitigation measures in Section 4.9 of the DEIR would render the cumulative impacts of the proposed Project to less than significant levels.

Section 4.9 of the DEIR compared cumulative noise levels that would occur both with and without the Project. According to the analysis the proposed Project would not expose sensitive uses located adjacent to area roadways to excessive noise levels. The future roadway noise assessment concludes that there will be no significant roadway noise impacts associated with cumulative and cumulative plus Project conditions. Therefore, there are no projects that would, in combination with the proposed Project, produce significant noise impacts to sensitive land uses from on-site operational noise. Thus, no cumulatively considerable noise impacts are expected to occur in this area, and the proposed Project will not make a significant contribution to cumulative noise impacts, so no mitigation measures are required. (DEIR, pg. 4.9-27)

9. Population and Housing

a. Population Growth

Potential Significant Impact: Whether the Project would induce substantial population growth in an area, either directly (e.g., new homes and businesses) or indirectly (e.g., extension of roads and infrastructure).

Findings: Potential impacts of the Project related to population growth are discussed in detail in Section 4.10 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to population growth will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.10 of the DEIR, the development of the proposed on-site warehouse distribution uses would create new jobs in the local economy. The proposed Project would generate up to 1,532 job opportunities.⁹ The new employment opportunities resulting from development of the proposed warehouse uses would improve the City's current jobs-to-housing ratio by providing jobs to local residents. While the places of residence of the persons accepting employment provided by the proposed uses is uncertain, due to the City's projected jobs-to-housing ratio, it is reasonable that a large percentage of these jobs would be filled by persons already living within the City or Project area; therefore, no significant increase in population of the City would result from the development or operation of the proposed on-site uses. In the absence of a significant impact, no mitigation is required. (DEIR, pgs. 4.10-3 to 4.10-5)

b. Displace Substantial Housing/People

Potential Significant Impact: Whether the Project would displace substantial numbers of people or existing housing, necessitating the construction of replacement housing elsewhere.

Findings: Potential impacts of the Project related to displacement of housing or people are discussed in detail in Section 4.10 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to displacement of housing or people will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.10 of the DEIR, the Project site has not been historically utilized for residential uses, and no residential structures are currently located within the Project limits. The construction and operation of the proposed on-site uses would neither displace existing housing or residents nor require the construction of replacement housing elsewhere in the City. However, the areas currently zoned for residential uses on the site could support up to 681 units. Approximately 80

⁹ 1 employee/1,465 square feet of warehouse use × 2,244,419 square feet of warehouse uses = 1,532 employees.

percent of that potential new housing was in the R15 category, which is considered high enough density to support affordable housing programs. In addition, a portion of the Project site is shown in the latest Housing Element for the City (2008–2014) as a potential location for affordable housing in the future (2011 Housing Element, Vacant Properties Inventory). Development of the site as proposed could eliminate as many as 681 housing units from the site, with 80 percent of those units (548) at a density that is generally accepted as helping to promote housing affordability (15 units per acre) on a regional level. These changes may incrementally hinder the City’s ability to achieve its affordable housing goals in the future. However, the proposed Project would not reduce the City’s potential pool of affordable housing to below its RHNA number; therefore, it would not create a significant impact related to the City’s Housing Element, and no mitigation is required. (DEIR, pg. 4.10-6)

c. Cumulative Population and Housing Impacts

Potential Significant Impact: Whether the Project could cause an increase in population that is substantial in relation to the past, current, and probable future projects.

Findings: Potential impacts of the Project related to cumulative impacts of the proposed Project on housing or population are discussed in detail in Section 4.10 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to cumulative impacts on housing or population will occur as a result of development of the Project and, therefore, no mitigation is required.

Fact Supporting the Findings: The project includes development of 2.2 million square feet of new industrial uses, but would eliminate the potential for up to 681 new residential units, most of which would be in the R15 category, which can support affordable housing programs. The proposed industrial uses would provide additional employment opportunities for City and area residents. The proposed project, together with the other developments identified in Chapter 3, will serve existing and future cumulative demands for both housing and employment within the City. The proposed uses would not induce significant population or housing growth in areas where growth was not previously anticipated.

10. Transportation

a. Air Traffic Patterns

Potential Significant Impact: Whether the Project would result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks.

Findings: Potential impacts of the Project related to air traffic patterns are discussed in detail in Section 4.11 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to air traffic patterns will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.11 of the DEIR, the proposed Project site is located approximately 5.5 miles northwest of the March Air Reserve Base and is not within the designated safety zones or the flight paths established for this facility.¹⁰ The proposed Project does not consist of any uses that would cause changes to air traffic volumes or otherwise affect air traffic patterns. Additionally, the proposed Project does not include any visual, electronic, or physical hazards to aircraft in flight and is not anticipated to disrupt or alter air traffic patterns, including either an increase in traffic levels or a change in location. As such, no impacts associated with this issue would occur and no mitigation is required. (DEIR, pg. 4.11-16)

b. Design Features or Incompatible Uses

Potential Significant Impact: Whether the proposed Project would substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment).

Findings: Potential impacts of the Project related to design features or incompatible uses are discussed in detail in Section 4.11 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to design features or incompatible uses will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.11 of the DEIR, roadway improvements in and around the Project site would be designed and constructed to satisfy all City requirements for street widths, corner radii, intersection control as well as incorporate design standards tailored specifically to site access requirements.

The final design of all roadways and intersections within the Project site access would be reviewed by a licensed professional civil engineer to ensure adequate safety when traveling to and from the Project site. The proposed Project does not include any sharp curves or dangerous intersections in its design. Adherence to applicable existing requirements of the City of Moreno Valley consistent with the City's

¹⁰ March Air Reserve Compatibility Plan, December 29, 2004. [http://www.rcaluc.org/filemanager/plan/old//March%20Air%20Reserve%20Base%20\(MARB\).pdf](http://www.rcaluc.org/filemanager/plan/old//March%20Air%20Reserve%20Base%20(MARB).pdf). Accessed June 3, 2008.

Circulation Element Objectives 5.1 (create a safe, efficient, and neighborhood-friendly street system), 5.5 (maximize efficiency of the local circulation system by using appropriate policies and standards to design, locate, and size roadways), and 5.11 (eliminate obstructions that impede safe movement of vehicles, bicyclists, and pedestrians) and other agencies would reduce impacts associated with this issue to a less than significant level and no mitigation is required. (DEIR, pgs. 4-17)

c. Inadequate Emergency Access

Potential Significant Impact: Whether the Project would result in inadequate emergency access.

Findings: Potential impacts of the Project related to emergency access are discussed in detail in Section 4.11 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to emergency access will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.11 of the DEIR, the developers of the proposed Project would be required to design, construct, and maintain structures, roadways, and facilities to provide for adequate emergency access and evacuation. Construction activities, which may temporarily restrict vehicular traffic, would be required to implement adequate and appropriate measures to facilitate the passage of persons and vehicles through/around any required road closures. The proposed Project design would be submitted to and approved by the City's Fire and Police Departments prior the issuance of building permits. Adherence to applicable existing requirements of the City of Moreno Valley and other agencies would reduce impacts associated with this issue to a less than significant level and no further discussion is required. (DEIR, pgs. 4.11-17 to 4.11-18)

d. Inadequate Parking Capacity

Potential Significant Impact: Whether the Project would result in inadequate parking capacity.

Findings: Potential impacts of the Project related to parking capacity are discussed in detail in Section 4.11 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to parking capacity will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.11 of the DEIR, the preliminary site plan indicates that 1,091 automobile parking spaces are provided, which includes spaces for employees, drivers, and handicap spaces, and is well above the minimum requirement of 562 spaces. The design of

the proposed Project would be required to comply with parking standards prior to final site plan approval. Adherence to parking standards contained in the Zoning Code would ensure that the proposed Project would not result in inadequate parking capacity. Impacts associated with parking capacity are less than significant and no mitigation is required. (DEIR, pg. 4.11-18)

e. Alternative Transportation

Potential Significant Impact: Whether the proposed Project would conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities.

Findings: Potential impacts of the Project related to alternative transportation are discussed in detail in Section 4.11 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to alternative transportation will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.11 of the DEIR, the design of the Project would be required to adhere to applicable City of Moreno Valley standards that support and/or facilitate alternative modes of transportation, including but not limited to pedestrian pathways and sidewalks consistent with the City's Circulation Element Objective 5.8. Through the City's Project review process, policies, plans, and/or programs supporting alternative transportation would be reviewed and incorporated as applicable. Consequently, a less than significant impact would occur as a result of the proposed Project and no mitigation is required. (DEIR, pg. 4.11-18)

11. Utilities and Service Systems

a. Solid Waste Facilities

Potential Significant Impact: Whether the Project would be served by a landfill with insufficient permitted capacity to accommodate the Project's solid waste disposal needs.

Findings: Potential impacts of the Project related to solid waste facilities are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to solid waste facilities will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, based on a solid waste generation of 0.006 pound per square foot per day for industrial uses, the proposed Project is anticipated

to generate approximately 6.73 tons of solid waste per day (2,456 tons/year). Solid waste from the proposed Project would be hauled by Waste Management of Inland Valley and transferred to the Badlands Sanitary Landfill, located in Moreno Valley, northeast of the Project site. The volume of solid waste generated by the proposed Project per day represents 0.17 percent of the current permitted throughput and 0.29 percent of the current surplus capacity at the Badlands Sanitary Landfill. As adequate daily surplus capacity exists at the receiving landfill, development of the proposed Project would not significantly affect current operations or the expected lifetime of the landfill serving the Project area. No significant solid waste disposal impact would occur and no mitigation is required. (DEIR, pgs. 4.12-3 to 4.12-4)

b. Solid Waste Reduction

Potential Significant Impact: Whether the Project would fail to comply with applicable Federal, State, and local statutes and regulations related to solid waste.

Findings: Potential impacts of the Project related to solid waste reduction are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to solid waste reduction will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the proposed Project would be required to coordinate with the waste hauler to develop collection of recyclable materials for the Project on a common schedule as set forth in applicable local, regional, and State programs. Recyclable materials that would be recycled by the Project include paper products, glass, aluminum, and plastic.

Additionally, the proposed Project would be required to comply with applicable elements of AB 1327, Chapter 18 (California Solid Waste Reuse and Recycling Access Act of 1991) and other applicable local, State, and Federal solid waste disposal standards, thereby ensuring that the solid waste stream to the Badlands Sanitary Landfill is reduced in accordance with existing regulations. Impacts are considered less than significant and require no mitigation. (DEIR, pg. 4.12-4)

c. Solid Waste Cumulative Impacts

Potential Significant Impact: Whether the Project in connection with past, current, and probable future projects would have an incremental impact on solid waste.

Findings: Potential impacts of the Project related to cumulative solid waste are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant cumulative impacts related to solid waste will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the Badlands Sanitary Landfill has an estimated closure date of 2016, the City's waste hauler will also use other County landfills in the area (e.g., Lamb Canyon Landfill and El Sobrante Landfill). The estimated closure date of the Lamb Canyon Landfill is 2023 and the estimated closure date of the El Sobrante Landfill is 2030. With planned expansion activities of landfills in the Project vicinity and projected growth rates contained

within the City's General Plan EIR, sufficient landfill capacity would exist to accommodate future disposal needs through City build out in 2030. Therefore, build out of the City General Plan would not create demands for solid waste services that would exceed the capabilities of the County's waste management system. Consequently, cumulative impacts associated with solid waste within the City would be considered less than significant and no mitigation is required. (DEIR, pg. 4.12-5)

d. Construction or Expansion of Water Treatment Facility

Potential Significant Impact: Whether the Project would require the construction of new water treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects.

Findings: Potential impacts of the Project related to construction or expansion of water treatment facilities are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts that would cause the construction or expansion of water treatment facilities will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the water demand required for the proposed Project totals 0.04 and 0.03 percent of the 2015 and 2035 projected Eastern Municipal Water District (EMWD) supplies. The amount of water demand would be within the existing available supply even with a reduction in deliveries from the State Water Project (SWP). Imported sources of water will be supplemented by an increase in desalination of brackish groundwater, recycled water use, and water use efficiency, and implementation of aggressive conservation measures by the EMWD. The proposed Project would not require the construction of new water treatment facilities or expansion of existing facilities, which could cause significant environmental effects. Impacts related to this issue would be less than significant and no mitigation is required. (DEIR, pgs. 4.12-15 to 4.12-16)

e. Adequate Water Supply

Potential Significant Impact: Whether the Project would have sufficient water supplies available to serve the Project from existing entitlements and resources, or are new or expanded entitlements needed.

Findings: Potential impacts of the Project related to adequate water supply are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to adequate water supply will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the anticipated water demand for the proposed Project is substantially less than what is identified for the General Plan land uses and what was used in the formulation of the 2010 Urban Water Management Plan. The water demand required for the proposed Project would total 0.05 and 0.04 percent of the EMWD's 2015 and 2035 supplies. The Project's water consumption represents substantially less than 1 percent of the consumption yearly capacity and because the EMWD indicates that water to service the Project's proposed industrial uses is available, no significant water supply impacts would occur with implementation of the industrial use, and no mitigation would be necessary. (DEIR, pg. 4.12-17 to 4.12-22)

f. Cumulative Impacts to Water Supply Services

Potential Significant Impact: Whether the Project in connection with past, current, and probable future projects would have a cumulative impact to water supply services.

Findings: Potential impacts of the Project related to cumulative water supply services are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant cumulative impacts related to water supply services will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the projected demand for the EMWD service area for the year 2015 is 213,900 acre-feet per year (AFY). The cumulative projects including the proposed Project would make up approximately 0.11 percent of the projected demand for 2015. For the year 2035, the EMWD service area projected demand is 302,200 AFY. The proposed Project would consist of 0.63 percent of the Project water demand. As the cumulative projects including the proposed Project constitute less than one percent of the projected water demand in both 2015 and 2025, the cumulative impact of the proposed Project would be less than significant.

Metropolitan Water District (Metropolitan) will continue to rely on the plans and policies outlined in its Regional Urban Water Master Plan (RUWMP) and Integrated Regional Water Plan (IRP) to address water supply shortages and interruptions (including potential shut downs of SWP pumps) to meet water demands. Metropolitan has also analyzed the reliability of water delivery through the SWP and the Colorado River Aqueduct. Metropolitan's IRP and RUWMP conclude that, with the storage and transfer programs developed by Metropolitan, there will be a reliable source of water to serve its member agencies' needs through 2035. The EWMD is a member agency of Metropolitan and would have water supplies for projected growth through 2035 in wet, dry, and multiple-dry years, so cumulative impacts to water supply would be less than significant. The proposed Project would connect to existing conveyance

infrastructure and adequate treatment capacity is available, so the proposed Project would not make a significant contribution to any cumulatively considerable impacts on water supply or infrastructure and no mitigation is required. (DEIR, pg 4.12-22)

g. Wastewater Treatment Requirements

Potential Significant Impact: Whether the Project would exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board (RWQCB).

Findings: Potential impacts of the Project related to wastewater treatment requirements are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to wastewater treatment requirements will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the proposed Project would result in a connection to the sewer line underlying the future Eucalyptus Avenue. The EMWD expects this sewer to be in service once it is necessary for demand expected from the proposed Project. It is anticipated that all wastewater generated by the proposed Project would be routed to and treated by the Moreno Valley Regional Water Reclamation Facility (MVRWRF). The MVRWRF is a Publically Owned Treatment Works (POTW), so operational discharge flows treated at the MVRWRF would be required to comply with the Waste Discharge Requirements (WDRs) for that facility. Compliance with condition or permit requirements established by the City and WDRs at the MVRWRF would ensure that discharges into the wastewater treatment facility system from the operation of the proposed Project would not exceed applicable Santa Ana RWQCB wastewater treatment requirements. Expected wastewater flows from the proposed Project will not exceed the capabilities of the serving treatment plant, so no significant impact related to this issue would occur and no mitigation would be required. (DEIR, pg. 4.12-24)

h. Wastewater Treatment Capacity and/or New or expanded Wastewater Treatment Facilities

Potential Significant Impact: Whether the Project would result in a determination by the wastewater treatment provider, which serves or may serve the Project, that it lacks adequate capacity to serve the Project's projected demand in addition to the provider's existing commitments.

Also, whether the proposed Project would require the construction of new wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects.

Findings: Potential impacts of the Project related to wastewater capacity are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related to wastewater capacity will occur as a result of development of the Project and no new wastewater treatment facilities or expansion of existing facilities would be required, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the proposed Project would result in a connection to the sewer line underlying the future Eucalyptus Avenue. The EMWD expects this sewer to be in service once it is necessary for demand expected from the proposed Project. It is anticipated that all wastewater generated by the proposed Project would be routed to and treated by the MVRWRF. The MVRWRF is a POTW, so operational discharge flows treated at the MVRWRF would be required to comply with the WDRs for that facility. Compliance with condition or permit requirements established by the City and WDRs at the MVRWRF would ensure that discharges into the wastewater treatment facility system from the operation of the proposed Project would not exceed applicable Santa Ana RWQCB wastewater treatment requirements. Expected wastewater flows from the proposed Project will not exceed the capabilities of the serving treatment plant, so no significant impact related to wastewater would occur and no mitigation would be required. (DEIR, pg. 4.12-25)

i. Cumulative Impacts to Wastewater Facilities

Potential Significant Impact: Whether the Project in connection with past, current, and probable future projects would result in cumulative impacts to wastewater facilities.

Findings: Potential impacts of the Project related to cumulative wastewater facilities are discussed in detail in Section 4.12 of the DEIR. Based on the entire record before us, this Council finds that no significant cumulative impacts related to wastewater facilities will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the proposed Project would not have a cumulatively significant impact on wastewater infrastructure because the proposed Project would not require the expansion of existing infrastructure; only connections to existing infrastructure would be required by the Project. By adhering to the wastewater treatment requirements established by the Santa Ana RWQCB through the NPDES permit, wastewater from the Project site that is processed through the MVRWRF would meet established standards. As the wastewater from all development within the service area of the MVRWRF would be similarly treated under the NPDES, no cumulatively significant exceedance of Santa Ana RWQCB wastewater treatment requirements would occur.

The proposed Project would not result in significant impacts to wastewater treatment or wastewater treatment facilities. The MVRWRF also plans expand the capacity of the wastewater facility. The ultimate expansion of the MVRWRF will allow it to process 41 mgd of wastewater. The wastewater generation of the listed cumulative projects represents 4.8 percent of the future capacity of the 2013 expansion and 2.5 percent of the ultimate expansion of the MVRWRF. The projected wastewater generation of the cumulative projects represents a small percentage of the average wastewater capacity and, because there are no projects that would, in combination with the proposed industrial uses, result in any significant impact related to wastewater treatment or cause significant environmental effects, the Project will not make a significant contribution to any cumulatively considerable impacts associated with wastewater and no mitigation is required. (DEIR, pg. 4.12-26)

11. Global Climate Change

a. **Greenhouse Gas Plan, Policy, Regulation Consistency**

Potential Significant Impact: Whether the Project would conflict with any applicable plan, policy, or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases.

Findings: Potential impacts of the Project related to greenhouse gas plans, policies, or regulation consistency are discussed in detail in Section 4.13 of the DEIR. Based on the entire record before us, this Council finds that no significant impacts related greenhouse gas plans, policies or regulations will occur as a result of development of the Project and, therefore, no mitigation is required.

Facts in Support of the Findings: According to Section 4.13 of the DEIR, the proposed Project includes a variety of physical attributes and operational programs that would generally contribute to a reduction in operational-source pollutant emissions including GHG emissions. Future development that would occur under the proposed Project would be consistent with state and local greenhouse gas emission reduction strategies and policies. The Project would implement appropriate GHG reduction strategies and would ensure that it does not conflict with or impede implementation of reduction goals identified in AB 32, Governor's Executive Order S-3-05, and other strategies to help reduce GHGs to the level proposed by the Governor. In addition, the Project would also be subject to all applicable regulatory requirements, which would also reduce the GHG emissions of the Project. Therefore, the proposed Project would not conflict with any applicable plan, program, policy, or regulation related to the reduction of GHG emissions. Impacts are considered less than significant and no mitigation is required. (DEIR, pgs. 4.13-10 to 4.13-17)

B. ENVIRONMENTAL IMPACTS MITIGATED TO A LEVEL OF LESS-THAN-SIGNIFICANT

Public Resources Code Section 21081 states that no public agency shall approve or carry out a project for which an EIR has been completed which identifies one or more significant effects unless the public agency makes one or more of the following findings:

- I. Changes or alterations have been required in, or incorporated into, the Project which mitigate or avoid the significant effects on the environment.
- II. Those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.
- III. Specific economic, legal, social, technological, or other considerations make infeasible the mitigation measures or alternatives identified in the EIR, and overriding economic, legal, social, technological, or other benefits of the Project outweigh the significant effects on the environment.

Certain of the following issues from the environmental categories analyzed in the EIR, including biological resources, cultural and paleontological resources, hydrology, drainage, and water quality, noise (short-term construction), transportation (local intersections), utilities, and global climate change (individually and cumulatively) were found to be potentially significant, but can be mitigated to a less-than-significant level with the imposition of mitigation measures. This Council hereby finds pursuant to *Public Resources Code* Section 21081 that all potentially significant impacts listed below can and will be mitigated to below a level of significance by imposition of the mitigation measures in the EIR; and that these mitigation measures are included as Conditions of Approval and set forth in the Mitigation Monitoring and Reporting Program (MMRP) adopted by this Council. Specific findings of this Council for each category of such impacts are set forth in detail below.

1. Air Quality

a. Localized Construction Equipment Exhaust Emissions Impacts

Potentially Significant Impact: The EIR evaluated and concluded that the Project has the potential to exceed short-term construction thresholds.

Finding: Implementation of the following mitigation measures will reduce the potential adverse impacts to sensitive or special status species to less than significant:

4.3.6.3A *Prior to the issuance of grading permits, the project applicant shall require by contract specifications that all trucks hauling dirt, sand, soil, or other loose materials are to be covered or shall maintain at least 2 feet of freeboard in accordance with the requirements of California Vehicle Code (CVC) Section 23114 (freeboard means vertical space between the top of the load and top of the trailer).*

4.3.6.3B *Prior to the issuance of grading permits, the project applicant shall provide evidence to the City that construction access roads shall be paved at least 100 feet onto the site from the main road.*

4.3.6.3C *Prior to the issuance of grading permits, the project applicant shall require by contract specifications that all streets within the construction site shall be swept once per day if visible soil materials are carried to adjacent streets.*

Facts in Support of the Finding: SCAQMD has developed LST methodology that can be used to determine whether or not a project may generate significant adverse localized air quality impacts. LSTs represent the maximum emissions from a project that would not cause or contribute to an exceedance of the most stringent applicable Federal or State ambient air quality standard and are developed based on the ambient concentrations of that pollutant for each source receptor area. The emissions of concern from construction activities are NOX, CO, PM₁₀, and PM_{2.5} resulting from on-site combustion emissions from construction equipment and on-site fugitive PM₁₀ dust from construction site preparation activities.

According to Section 4.3 of the DEIR, the air pollutant emission rates for the proposed construction activities are below the localized construction thresholds at the nearest sensitive receptor for CO, NO_x, PM₁₀, and PM_{2.5}. Thus, no mitigation is required. However, implementation of **Mitigation Measures 4.3.6.2A through 4.3.6.2M** and the incorporation of these additional requirements as **Mitigation Measures 4.3.6.3A through 4.3.6.3C** are designed to track both standard requirements and mitigation measures as part of the project's Mitigation Monitoring and Reporting Program (MMRP). Therefore, impacts related to construction exhaust emissions are less than significant. (DEIR, pgs. 4.3-29 to 4.3-30)

2. Biological Resources

a. Candidate, Non-listed Sensitive, or Other Special Status Species

Potential Significant Impact: The EIR evaluated and concluded that the Project has the potential to affect migratory bird species and 15 non-listed special status species, including burrowing owl.

Finding: Implementation of the following mitigation measures will reduce the potential adverse impacts to sensitive or special status species to less than significant:

4.4.6.1A *If tree removal or clearing and grubbing activities must take place during the general nesting season (February 1 through August 31), a nesting bird survey shall be conducted within seven (7) days prior to any vegetation disturbance activities. If passerine birds are found to be nesting or there is evidence of nesting behavior inside the impact area, an exclusion buffer, to be determined by the appropriate agency (e.g. the City, County, and/or CDFG), shall be set in place around the nest where no vegetation disturbance will be permitted. For raptor species, such as hawks and owls, this buffer may be as large as 500 feet. A qualified biologist shall closely monitor nests until it is determined that they are no longer active, at which time construction activity in the vicinity of nests may continue.*

4.4.6.1B *Prior to site grading, a pre-construction survey shall be required for the burrowing owl to confirm the presence/absence of this species from the site. The survey shall be conducted by a qualified biologist within 30 days prior to ground disturbance, and in accordance with MSHCP survey requirements, to avoid direct take of burrowing owls. If burrowing owls are determined to occupy the project site or immediate vicinity, the City of Moreno Valley Planning Department shall be notified and avoidance measures as identified in Mitigation Measure 4.4.6.1C shall be implemented. Implementation of avoidance measures shall be executed pursuant to the MSHCP, the California Fish and Game Code, and the MBTA, and according the Burrowing Owl Survey Protocol and Mitigation Guidelines (CBOC 1993) and reviewed the City of Moreno Valley, the County of Riverside, and/or by the CDFG.*

4.4.6.1C *As recommended in the BUOW Survey and Mitigation Guidelines prepared by the CBOC, no disturbance to an occupied burrow shall occur within approximately 160 feet*

of an occupied burrow during the non-breeding season (September 1 through January 31), or within approximately 250 feet of an occupied burrow during the breeding season (February 1 through August 31). For unavoidable impacts, passive relocation of burrowing owls shall be implemented. Passive relocation shall be conducted by a qualified biologist in accordance with procedures set forth by the MSHCP and California Burrowing Owl Consortium. Passive relocation of occupied burrows supporting a breeding pair of burrowing owls shall be conducted outside of the breeding season pursuant to the California Fish and Game Code and the MBTA.

Facts in Support of the Finding: According to Section 4.4 of the DEIR, one non-listed special status species, grasshopper sparrow, was observed on the site during the burrowing owl survey. Fourteen other non-listed special status species, including burrowing owl, have a low to moderate potential to occur on the site based on existing habitat quality. None of these species is listed as Threatened or Endangered under State or Federal law, all are relatively widespread, and the site does not contain high quality habitat for any of them. Therefore, any impacts to these species by the Project would not be considered significant. Neither additional surveys nor additional conservation measures for these species will be required for the proposed Project, with the exception of burrowing owl.

The planning area may support habitat for bird species protected under the California Fish and Game Code and Migratory Bird Treaty Act (MBTA). If clearing and grubbing activities take place during the general bird nesting season (February 1 through August 31), potential impacts to bird species protected under the California Fish and Game Code and MBTA may occur, therefore **Mitigation Measure 4.4.6.1A** is required.

The Project site also contains habitat suitable to support the burrowing owl. Although burrowing owl was not found on the site during the focused survey, the species is highly mobile, so there is a potential that at some future date prior to Project development, this species may occupy the site. This is a potentially significant impact requiring **Mitigation Measures 4.4.6.1B and 4.4.6.1C**. Implementation of the above-listed mitigation measures would reduce impacts to migratory bird species and non-listed sensitive species to a less than significant level. (DEIR, pgs. 4.4-25 to 4.4-27).

b. Riparian Habitat or Other Sensitive Natural Communities

Potential Significant Impact: The EIR evaluated and concluded that the Project has the potential to permanently affect 0.36 acre of riparian/riverine habitat and to temporarily affect 0.35 acre of riparian/riverine habitat.

Finding: Implementation of the following mitigation measures will reduce the potential adverse impacts to riparian habitat or other sensitive natural communities to less than significant:

4.4.6.2A *As outlined in the project's Determination of a Biologically Equivalent or Superior Preservation (DBESP) report, the project applicant shall compensate for the temporary and permanent impact on and loss of jurisdictional waters and streambeds by providing a minimum 2:1 off-site replacement of equivalent riverine/riparian habitat prior to project construction. Offsite restoration, enhancement, and/or land purchase mitigation for the drainage impacts will occur at an offsite location through one or more of the following: an USACE approved mitigation bank, through an in lieu fee mitigation program, and/or land purchase and conservation. CDFW and USFWS will need to provide concurrence that this mitigation is equivalent or superior to that proposed for impact through their review and acceptance of the DBESP.*

4.4.6.2B *Riparian/riverine resources that are temporarily impacted by project construction shall be returned to their preconstruction contours and hydroseeded, as outlined in the DBESP.*

Facts in Support of the Findings: According to Section 4.4 of the DEIR, the Project site consists of highly disturbed land from which most natural vegetation has been removed by regular disking for weed abatement and historical citrus cultivation. No special status species plants were recorded on site within the southern and western drainages due to the site's long-standing disturbances and the fact that on-site soils may not be capable of supporting most sensitive plant species.

However, implementation of the proposed Project would result in permanent impacts on 0.36 acre of riparian/riverine areas as a result of the construction of the detention basins, and drain outlets. In addition to permanent impacts, the proposed Project would result in temporary impacts on 0.35 acre of riparian/riverine areas associated with construction activities. Minimal intrusion into the drainages would be necessary and no construction is anticipated in the drainages themselves.

Following construction, temporary impact areas would be restored to their pre-construction contours and revegetated per a Habitat Mitigation and Monitoring Plan (HMMP) to be written for the Project site. The HMMP would be developed to address temporary impacts on riverine/riparian areas subject to jurisdiction under the MSHCP, waters of the United States subject to jurisdiction under Section 404 of the Clean Water Act (CWA), waters of the state subject to jurisdiction under Section 401 of the CWA, and

jurisdictional streambeds subject to jurisdiction under Sections 1600–1616 of the California Fish and Game Code. Therefore, the proposed mitigation design is directed at providing adequate mitigation based on impacts on the largest jurisdictional area (namely, CDFW jurisdictional streambeds). Because implementation of the proposed Project would have impacts on riparian/riverine areas on site, mitigation would be required. Implementation of the **Mitigation Measures 4.4.6.2A and 4.4.6.2B** would reduce impacts to riparian habitat to a less than significant level. (DEIR, pgs. 4.4-29 to 4.4-27)

c. Jurisdictional Waters/Wetlands

Potential Significant Impact: The EIR evaluated and concluded that the Project has the potential to permanently affect 0.051 non-wetland waters of the United States (US) and 0.362 acre of CDFW jurisdictional area, and to temporarily affect 0.054 acre of non-wetland waters of the U.S. and 0.33 acre of CDFW jurisdictional area.

Findings: Implementation of the following mitigation measures will reduce the potential adverse impacts to jurisdictional waters and wetlands to less than significant:

4.4.6.3A *The project applicant shall obtain a Section 404 Nationwide or Individual Permit, as appropriate, from the USACE, a Section 401/Porter-Cologne Water Quality Certification from the RWQCB, and a Section 1602 Streambed Alteration Agreement from the CDFW. Offsite restoration, enhancement, and/or land purchase mitigation of jurisdictional drainage impacts will occur at an off-site location through one or more of the following: an USACE approved mitigation bank, through an in-lieu fee mitigation program, and/or land purchase and conservation.*

Facts in Support of the Findings: According to Section 4.4 of the DEIR, there is a clear connection to drainages associated with the San Jacinto watershed, and all three drainages (western, southern, and eastern) located on or adjacent to the Project site are determined to be jurisdictional waters of the United States. Implementation of the proposed Project would result in permanent impacts to 0.051 acre (354 linear feet) of non-wetland waters of the US and waters of the State and 0.362 acre (440 linear feet) of state streambed associated with the eastern, southern, and western drainages. In addition to permanent impacts, the proposed Project would result in temporary impacts to 0.054 acre (332 linear feet) of non-wetland waters of the US and waters of the State and 0.33 acre (547 linear feet) of State streambed associated with construction activities. This is a significant impact requiring mitigation.

The proposed on-site restoration of temporary impact areas and the long-term enhancement of off-site riparian/riverine habitat managed by Santa Ana Water Authority provides adequate mitigation for identified impacts to on-site jurisdictional areas. Implementation of the recommended **Mitigation Measure 4.4.6.3A** would reduce impacts to jurisdictional waters to less than significant levels. (DEIR, pgs. 4.4-29 to 4.4-30)

3. Cultural Resources

a. Prehistoric Cultural Resources

Potential Significant Impact: The EIR evaluated and concluded that the Project could have an adverse effect on significant archaeological resource pursuant to Section 15064.5.

Finding: Implementation of the following mitigation measures will reduce the impact to unique archaeological resources to less than significant:

4.5.6.1A *Prior to the issuance of a grading permit, the Project Applicant shall provide evidence to the City of Moreno Valley that a Cultural Resources Monitoring Agreement has been secured for qualified Tribal representatives, and that a professional archaeological monitor meeting Secretary of Interior standards has been retained by the Applicant to conduct monitoring of all mass grading and trenching activities and has the authority to temporarily halt and redirect earthmoving activities in the event that suspected archaeological resources are unearthed during Project construction. The Project Archaeologist and Tribal representatives shall attend the pre-grading meeting with the City and contractors to explain and coordinate the requirements of the monitoring program.*

4.5.6.1B *Prior to the issuance of a grading permit, the Applicant shall provide evidence to the City of Moreno Valley that appropriate Native American representative(s), Project Archaeologist, and the Tribal representative(s) shall be allowed to monitor and have received a minimum of 30 days advance notice of all mass grading and trenching activities. During grading and trenching operations, the Tribal representatives and the project archaeological monitor shall observe all mass grading and trenching activities per the Cultural Resources Monitoring Agreement. If the Tribal representatives suspect that an archaeological resource may have been unearthed, the archaeologist, in consultation with the tribal representative, shall immediately halt and redirect grading operations in a 100-foot radius around the find to allow identification and evaluation of the suspected resource. In consultation with the appropriate Native American Tribe(s), the archaeological monitor shall evaluate the suspected resource and make a*

determination of significance pursuant to California Public Resources Code Section 21083.2.

4.5.6.1C *If a significant archaeological resource(s) is discovered on the property, ground disturbing activities shall be suspended 100 feet around the resource(s). The archaeological monitor and representatives of the appropriate Native American Tribe(s), the Project Applicant, and the City Planning Division shall confer regarding mitigation of the discovered resource(s). A treatment plan and/or preservation plan shall be prepared and by the archaeological monitor and reviewed by representatives of the appropriate Native American Tribe(s), the Project Applicant, and the City Planning Division and implemented by the archaeologist to protect the identified archaeological resource(s) from damage and destruction. The landowner shall relinquish ownership of all archaeological artifacts that are of Native American origin found on the Project site to the culturally affiliated Native American tribe(s) for proper treatment and disposition. A final report containing the significance and treatment findings shall be prepared by the archaeologist and submitted to the City Planning Division, the appropriate Native American tribe(s), and the Eastern Information Center at the University of California, Riverside. All cultural material, excluding sacred, ceremonial, grave goods and human remains, collected during the grading monitoring program and from any previous archaeological studies or excavations on the project site shall be curated, as determined by the treatment plan, according to the current professional repository standards and may include the Pechanga Bands curatorial facility.*

4.5.6.1D *Prior to grading permit issuance, the City shall verify that the following note is included on the Grading Plan:*

“If any suspected archaeological resources are discovered during ground-disturbing activities and the archaeological monitor or Tribal representatives are not present, the construction supervisor is obligated to halt work in a 100-foot radius around the find and call the project archaeologist and the Tribal representatives to the site to assess the significance of the find.”

4.5.6.1E *If human remains are encountered, California Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the Riverside County Coroner has made the necessary findings as to origin. Further, pursuant to California Public*

Resources Code Section 5097.98(b), remains shall be left in place and free from disturbance until a final decision as to the treatment and disposition has been made by the Coroner. If the Riverside County Coroner determines the remains to be Native American, the California Native American Heritage Commission must be contacted within 24 hours. The Native American Heritage Commission must then immediately notify the “most likely descendant(s)” of receiving notification of the discovery. The most likely descendant(s) shall then make recommendations within 48 hours, and engage in consultations concerning the treatment of the remains as provided in Public Resources Code §5097.98.

Facts in Support of the Finding: Based on Section 4.5 of the DEIR, a reconnaissance pedestrian-survey for the Project site was conducted in November 2007. Although the Project site is located within the Moreno Hills Complex, no archaeological resources were identified on the Project site during the field survey, and the cultural resource assessment concluded the Project would have no significant impacts; however, there is a potential for Project grading to disturb previously undiscovered cultural resources. While there is no recorded or surface evidence that archaeological resources are present on site, the Project is located in an area with a high potential of containing prehistoric archaeological resources. Therefore, a potential exists that excavation and construction activities may uncover previously undetected prehistoric or historic cultural resources. This is a potentially significant impact under CEQA and requires mitigation. Adherence to the above **Mitigation Measures 4.5.6.1A** through **4.5.6.1E** would reduce potential impacts to archaeological resources to a less than significant level. (DEIR, pgs. 4.5-6 to 4.5-7)

b. Paleontological Resources

Potential Significant Impact: The EIR evaluated and concluded that the Project could have an adverse effect on significant paleontological resource or site or unique geologic feature.

Findings: Implementation of the following mitigation measures will reduce the impact to unique paleontological resource or unique geologic feature to less than significant:

4.5.6.2A *Prior to the issuance of grading permits, the project applicant shall submit to and receive approval from the City, a Paleontological Resource Impact Mitigation Program (PRIMP). The PRIMP shall include the provision of a trained paleontological monitor during on-site soil disturbance activities. The monitoring for paleontological resources shall be conducted during the rough-grading phase of the project. In the event that*

paleontological resources are unearthed or discovered during excavation, Mitigation Measure 4.5.6.2C shall apply. Conversely, if no paleontological resources are unearthed or discovered on site during excavation, no additional action is required.

4.5.6.2B *The paleontological monitor shall be equipped to rapidly remove any large fossil specimens encountered during excavation. During monitoring, samples of soil shall be collected and processed to recover microvertebrate fossils. Processing shall include wet screen washing and microscopic examination of the residual materials to identify small vertebrate remains.*

4.5.6.2C *If paleontological resources are unearthed or discovered during excavation of the project site, the monitoring for paleontological resources shall be conducted on a full-time basis for the duration of the rough-grading of the project site. The following recovery processes shall apply:*

- *Upon encountering a large deposit of bone, salvage of all bone in the area shall be conducted with additional field staff and in accordance with modern paleontological techniques.*
- *All fossils collected during the project shall be prepared to a reasonable point of identification. Excess sediment or matrix shall be removed from the specimens to reduce the bulk and cost of storage. Itemized catalogs of all material collected and identified shall be provided to the museum repository along with the specimens.*
- *A report documenting the results of the monitoring and salvage activities and the significance of the fossils shall be prepared.*
- *All fossils collected during this work, along with the itemized inventory of these specimens, shall be deposited in a museum repository for permanent curation and storage.*

4.5.6.2D *Prior to grading permit issuance, the City shall verify that the following note is included on the Grading Plan:*

“If any suspected paleontological resources are discovered during ground-disturbing activities, the construction supervisor is obligated to halt work in a 100-foot radius

around the find and call a qualified paleontologist to the site to assess the significance of the find. A qualified paleontologist shall evaluate the suspected resource. If the paleontologist determines that the find is not unique, construction shall be permitted to proceed. However, if the paleontologist determines that further information is needed to evaluate significance, the City of Moreno Valley shall be notified and a treatment plan shall be prepared and implemented in consultation with the City to protect the identified paleontological resource(s) from damage and destruction.”

Facts in Support of the Findings: According to Section 4.5 of the DEIR, the proposed Project site is located within an area that has a high potential to contain near-surface Pleistocene fossils.¹¹ The paleontological literature search indicated that there is potential for significant, nonrenewable resources that to encountered during onsite construction activities. Therefore, a paleontological resources impact mitigation program (PRIMP), including excavation monitoring by a qualified paleontologist, is recommended for earthmoving activities in Pleistocene sediments on the Project site with potential to contain significant, nonrenewable paleontological resources. Although no paleontological resources were identified on site during the field survey, because of the location of the Project site and associated sensitivity for paleontological resources, the potential exists that paleontological resources maybe uncovered during construction. Adherence to the **Mitigation Measures 4.5.6.2A through 4.5.6.2D** will reduce potential impacts to paleontological resources to a less than significant level. (DEIR, pgs. 4.5-7 to 4.5-8)

4. Hydrology, Drainage, and Water Quality

a. Construction-Related Water Quality Impacts

Potential Significant Impact: The EIR evaluated and concluded that the Project could violate water quality standards or waste discharge requirements during construction phases of the Project in form of increased soil erosion, sedimentation, or storm water discharges.

Findings: Implementation of the following mitigation measures will reduce the impact to construction-related water quality to less than significant:

4.7.6.1A *Prior to grading plan approval and the first issuance of a grading permit by the City, the project applicant shall provide evidence to the City that a Notice of Intent (NOI) has been filed with the Regional Water Quality Control Board for coverage under the State*

¹¹ Ibid.

NPDES General Construction Permit for discharge of storm water associated with construction activities.

4.7.6.1B

Prior to grading plan approval and the first issuance of a grading permit by the City, the project applicant shall submit to the City of Moreno Valley a Storm Water Pollution Prevention Plan (SWPPP). The SWPPP shall include a surface water control plan and erosion control plan citing specific measures to control on-site and off-site erosion during the entire grading and construction period. Additionally, the SWPPP shall identify structural and nonstructural BMPs to control sediment and nonvisible discharges from the site. BMPs to be implemented in the SWPPP may include (but shall not be limited to) the following:

- *Sediment discharges from the site may be controlled by the following: sandbags, silt fences, straw wattles and temporary debris basins (if deemed necessary), and other discharge control devices. The construction and condition of the BMPs will be periodically inspected during construction, and repairs will be made when necessary as required by the SWPPP.*
- *No materials of any kind shall be placed in drainage ways.*
- *Materials that could contribute nonvisible pollutants to storm water must be contained, elevated, and placed in temporary storage containment areas.*
- *All loose piles of soil, silt, clay, sand, debris, and other earthen material shall be protected per RWQCB standards to eliminate any discharge from the site. Stockpiles will be surrounded by silt fences.*
- *The SWPPP will include inspection forms for routine monitoring of the site during the construction phase to ensure NPDES compliance.*
- *Additional BMPs and erosion control measures will be documented in the SWPPP and utilized if necessary.*
- *The SWPPP will be kept on site for the entire duration of project construction and will also be available to the local RWQCB for inspection at any time.*

In the event that it is not feasible to implement the above BMPs, the City of Moreno Valley can make a determination that other BMPs will provide equivalent or superior treatment either on or off site.

4.7.6.1C *Prior to the issuance of grading permits, the project applicant shall provide evidence to the City that the following provisions have been added to construction contracts for the project:*

- *The Construction Contractor shall be responsible for performing and documenting the application of BMPs identified in the SWPPP. Weekly inspections shall be performed on sediment control measures called for in the SWPPP. Monthly reports shall be maintained by the Contractor and submitted to the City for inspection. In addition, the Contractor will also be required to maintain an inspection log and have the log on site to be reviewed by the City of Moreno Valley and the representatives of the Regional Water Quality Control Board.*

Facts in Support of the Findings: According to Section 4.7 of the DEIR, the construction and grading phases of the project site would require the disturbance of surface soils and removal of existing orange groves and vegetative cover. During the construction period, grading and excavation activities would result in exposure of soil to storm runoff, potentially causing erosion and sediment in runoff. If not managed through Best Management Practices (BMPs), the runoff could cause erosion and increased sedimentation in local drainage ways such as the Quincy Channel. The potential for chemical releases is present at most construction sites in the form of fuels, solvents, glues, paints, and other building construction materials. However, implementation of construction practices and adherence to existing water quality regulations and **Mitigation Measures 4.7.6.1A** through **4.7.6.1C** would reduce these impacts to a less than significant level. (DEIR, pgs. 4.7-21 to 4.7-23)

b. Operational-Related Water Quality Impacts

Potential Significant Impact: The EIR evaluated and concluded that the Project could violate water quality standards or waste discharge requirements during the operational phases of the project in the form of increased soil erosion, sedimentation, or urban runoff.

Findings: Implementation of the following mitigation measure will reduce the impact to operational-related water quality to less than significant:

4.7.6.2A *Prior to grading plan approval and the first issuance of a grading permit by the City, the project applicant shall receive approval from the City of Moreno Valley for a Final Water Quality Management Plan (F-WQMP). The F-WQMP shall specifically identify*

pollution prevention, site design, source control, and treatment control BMPs that shall be used on site to control predictable pollutant runoff in order to reduce impacts to water quality to the maximum extent practicable. BMPs to be implemented in the F-WQMP may include (but shall not be limited to) the following:

- *Required landscaped areas shall not use decorative concrete or impervious surfaces.*
- *Landscape plans shall incorporate native and drought-tolerant plants, trees, and shrubs. Landscaping shall be maintained weekly and maintenance contractor will properly dispose of all landscape wastes.*
- *Irrigation systems shall be inspected monthly by the landscape contractor to check for overwatering, leaks, or excessive runoff to paved areas. Timers will be used to prevent overwatering.*
- *Signage will be inspected and maintained twice a year for legibility.*
- *Outdoor Loading/Unloading truck docks shall be kept in a clean and orderly condition with weekly inspections, continuous monitoring and immediate cleanup of spills.*
- *Parking area maintenance shall be swept or vacuumed at least quarterly, if there is any trash or debris in between the routine sweeping, it shall be swept or vacuumed immediately.*
- *Trash enclosures will be inspected and maintained weekly or as needed by maintenance contractor.*
- *On-site extended detention/sedimentation basins and sand filters will treat all of the site's runoff via vegetated swales and will be maintained and inspected at least twice a year and prior to October 1.*
- *Additional BMPs will be documented in the WQMP and utilized if necessary.*

In the event that it is not feasible to implement the above BMPs, the City of Moreno Valley can make a determination that other BMPs will provide equivalent or superior treatment either on or off site.

Facts in Support of the Findings: According to Section 4.7 of the DEIR, the proposed Project would result in the conversion of existing on-site permeable surfaces to impermeable surfaces, thereby altering the current drainage pattern. Upon development of the proposed on-site uses, storm runoff from the roadways, parking lots, and buildings may carry a variety of pollutants such as sediment, pathogens, petroleum products, commonly utilized construction materials, landscaping chemicals, and (to a lesser extent) trace metals such as zinc, copper, lead, cadmium, and iron, which may lead to the degradation of storm water in downstream channels. These impacts to water quality are considered significant impacts that require mitigation. **Mitigation Measure 4.7.6.2A** has been identified to reduce impacts to water quality to less than significant.

The proposed Project would also incorporate on-site drainage that would have hydrodynamic infrastructure components that would meet City and County water quality requirements. Through the use of site design BMPs, source control BMPs, and treatment control BMPs, the resulting pollutant loads coming from the proposed Project would be reduced thereby ultimately reducing pollutants discharged from urban storm water runoff to surface water bodies. Because adherence to the requirements of the NPDES permit, which include implementation of the BMPs outlined in the WQMP, would be required by the City during the operation of the proposed Project, potential water quality impacts resulting from storm water and urban runoff would be reduced to a less than significant level. (DEIR, pgs. 4.7-23 to 4.7-26)

c. Drainage Capacity-Related Impacts

Potential Significant Impact: The EIR evaluated and concluded that the Project could create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff.

Findings: Implementation of the following mitigation measure will reduce the impact to drainage to less than significant:

4.7.6.3A *Prior to the approval of a rough grading plan, the project proponent shall receive approval on a project-specific Final Hydrology Study, with supporting engineering calculations, from the City Engineer. The Final Hydrology Study shall incorporate relevant requirements identified by the City, and/or site-specific geotechnical investigations.*

Facts in Support of the Findings: According to Section 4.7 of the DEIR, development and operation of the proposed Project would result in the generation of the additional storm water flows that would be

above those generated in existing site conditions. With the construction and maintenance of adequate storm water drainage systems, through the adherence of **Mitigation Measure 4.7.6.3A**, impacts would be less than significant. In addition, the design and installation of the proposed drainage improvements will be required to adhere to applicable City and County standards. (DEIR, pgs. 4.7-26 to 4.7-28)

5. Noise

a. Short-Term Construction Noise

Potential Significant Impact: The EIR evaluated and concluded that noise levels from grading and other construction activities for the proposed Project may range up to 91 dBA at the closest residences southeast of the Project site for very limited times when construction occurs near the Project's boundary. Construction-related noise impacts from the proposed Project would be potentially significant.

Finding: Implementation of the following mitigation measures will reduce potential short-term construction noise impacts to less than significant:

4.9.6.1A *During all project site excavation and grading on site, the project contractor shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers consistent with manufacturers' standards.*

4.9.6.1B *The project contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest to the project site.*

4.9.6.1C *The construction contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and noise-sensitive receptors nearest to the project site during all project construction.*

4.9.6.1D *During all project site construction activities at Building 6 (i.e., closest to existing residences), the construction contractor shall limit all construction-related activities that would result in high noise levels to between the hours of 6:00 a.m. and 8:00 p.m. on weekdays and between the hours of 7:00 a.m. to 8:00 p.m. on weekends and holidays, unless written approval is obtained from the City Building Official or City Engineer for specific construction activities that must be conducted outside of the permitted time periods.*

Facts in Support of the Finding: According to Section 4.9 of the DEIR, two types of short-term noise impacts could occur during the construction of the Project. First, construction crew commutes and the

transport of construction equipment and materials to the site for the proposed Project would incrementally increase noise levels on access roads leading to the site. The second type of short-term noise impact is related to noise generated during excavation, grading, and building erection on the Project site. Construction of the proposed Project is expected to require the use of scrapers, bulldozers, and water and pickup trucks. The site preparation phase, which includes excavation and grading of the site, tends to generate the highest noise levels, because the noisiest construction equipment is earthmoving equipment. Earthmoving equipment includes excavating machinery such as backfillers, bulldozers, draglines, and front loaders. Earthmoving and compacting equipment includes compactors, scrapers, and graders. Typical operating cycles for these types of construction equipment may involve one or two minutes of full-power operation followed by three to four minutes at lower power settings. The maximum noise level generated by each scraper on the proposed Project site is assumed to be approximately 87 dBA L_{max} at 50 feet from the scraper. Each bulldozer would generate approximately 85 dBA L_{max} at 50 feet. The maximum noise level generated by water and pickup trucks is approximately 86 dBA L_{max} at 50 feet from these vehicles. Each doubling of the sound sources with equal strength increases the noise level by three (3) dBA. Assuming that each piece of construction equipment operates at some distance from the other equipment, the worst-case composite noise level during this phase of construction would be 91 dBA L_{max} at a distance of 50 feet from the active construction area.

The nearest noise-sensitive receptor locations to the Project site are existing residences approximately 50 feet to the southeast. These nearest residents may be subject to short-term, intermittent, maximum noise reaching 91 dBA L_{max} , generated by construction activities on the Project site. This noise level would exceed the City's exterior noise standard of 60 dBA¹² CNEL for residential uses. However, no significant construction noise impacts would occur if construction of the proposed Project would occur within the permitted hours of 6:00 a.m. to 8:00 p.m. of any working day, and within the permitted hours of 7:00 a.m. and 8:00 p.m. on Sundays and Federal holidays. Compliance with the construction hours specified in the City's Municipal Code would result in construction noise impacts that are less than significant. While impacts would be considered less than significant as long as construction activities occur within the designated hours identified in the City's Municipal Code, mitigation measures have been identified to reduce the noise levels that would expose nearby sensitive receptors to noise levels in excess of the City's noise standards.

¹² Chapter 11.80.030 Table 11.80.030-2, City of Moreno Valley Municipal Code, City of Moreno Valley.

With adherence to the City's designated construction hours and with implementation of the proposed **Mitigation Measures 4.9.6.1A through 4.9.6.1D**, potential short-term construction noise impacts would be reduced below the level of significance. (DEIR, pgs. 4.9-25 to 4.9-27)

6. Transportation

a. Future Year 2035 with Project Conditions (Intersection) Traffic and Level of Service

Potential Significant Impact: The EIR evaluated and concluded that the Project could cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system.

Findings: Implementation of the following mitigation measures will reduce the impact related to future traffic LOS to less than significant:

4.11.6.4A. *Prior to issuance of a Certificate of Occupancy the project applicant shall construct the following traffic improvements:*

- *Redlands Boulevard/SR-60 Westbound Ramps. Install a traffic signal. This improvement is currently approved, and permitted by Caltrans. If not otherwise completed prior to project opening, the required traffic signal shall be constructed by the Applicant prior to issuance of the first Certificate of Occupancy.*
- *Redlands Boulevard/Fir Avenue/Eucalyptus Avenue. If not otherwise completed prior to project opening, prior to issuance of the first Certificate of Occupancy, the Applicant shall construct the following improvements: Install a traffic signal and add a northbound left-turn lane and a southbound left-turn lane.*

If the improvements are constructed by others prior to the Certificate of Occupancy, the applicant shall pay its fair share towards the improvements through the City's DIF program.

4.11.6.4B *Prior to issuance of building permits, the project applicant shall pay the fair-share contribution toward the following traffic improvements through fees paid to the City of Moreno Valley based on the City's DIF system and the County's TUMF program:*

- **Moreno Beach Drive/SR-60 Eastbound Ramps.** *The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the*

design phase. Therefore, payment of the TUMF would mitigate the significant impact at this location. This project is scheduled to go into construction by the end of this year and completed by the end of 2013.

- ***Redlands Boulevard/SR-60 Westbound Ramps.** Install a traffic signal. This improvement is currently approved, and permitted by Caltrans. If not otherwise completed prior to project opening, the required traffic signal shall be constructed by the Applicant prior to issuance of the first Certificate of Occupancy.*
- ***Redlands Boulevard/Fir Avenue/Eucalyptus Avenue.** If not otherwise completed prior to project opening, prior to issuance of the first Certificate of Occupancy, the Applicant shall construct the following improvements: Install a traffic signal. This improvement is listed in the City's DIF program. Add a northbound left-turn lane and a southbound left-turn lane.*

4.11.6.4C *Prior to issuance of building permits, the project applicant shall pay the fair-share contribution toward the following traffic improvements through fees paid to the City of Moreno Valley based on the City's DIF system and the County's TUMF program:*

- ***Moreno Beach Drive/SR-60 Eastbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF would mitigate the significant impact at this location.*
- ***Moreno Beach Drive/Cottonwood Avenue.** Add a southbound through lane. This improvement is listed in the City's DIF program. Therefore, payment of the DIF would mitigate the significant impact at this location.*
- ***Moreno Beach Drive/Alessandro Boulevard.** Add a southbound through lane. This improvement is listed in the City's DIF program. Therefore, payment of the DIF would mitigate the significant impact at this location.*
- ***Redlands Boulevard/SR-60 Westbound Ramps.** Install a traffic signal. This improvement is listed in the City's DIF program and will be installed before building occupancy since it was identified as a direct project impact. Add a northbound through lane. The Redlands Boulevard/SR-60 Interchange reconstruction would implement the*

northbound through lane. The interchange reconstruction project is programmed in the TUMF. Therefore, payment of the DIF and TUMF would mitigate the significant impact at this location.

- **Redlands Boulevard/SR-60 Eastbound Ramps.** The Redlands Boulevard/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF. Therefore, payment of the TUMF would mitigate the significant impact at this location.
- **Redlands Boulevard/Fir Avenue/Eucalyptus Avenue.** Install a traffic signal. Add a westbound right-turn lane and provide overlap phasing for the westbound right turns. Add a westbound left-turn lane and an eastbound left-turn lane. These improvements are programmed in the City's DIF program. Add a northbound left-turn lane a southbound through lane and a southbound left-turn lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF would mitigate the significant impact at this location.
- **Redlands Boulevard/Eucalyptus Avenue.** Add a southbound right-turn lane. This improvement is programmed in the TUMF. Therefore, payment of the TUMFs would mitigate the significant impact at this location.
- **Redlands Boulevard/Alessandro Boulevard.** Add a southbound left-turn lane. This improvement is programmed in the TUMF. Therefore, payment of the TUMFs would mitigate the significant impact at this location.

4.11.6.4D Prior to issuance of building permits, the project applicant shall pay the fair-share contribution toward the following traffic improvements through fees paid to the City of Moreno Valley based on the City's DIF system and the County's TUMF program. At some locations, the DIF and TUMFs would not fully mitigate the projects impact. For these locations, additional improvements shall be implemented by the project applicant prior to the issuance of a certificate of occupancy for the project:

- **Nason Street/Eucalyptus Avenue.** Add a northbound right-turn lane. This improvement is programmed in the City's DIF; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, the project shall contribute a fair

share (calculated to be 1.76%) toward restriping the westbound approach to provide dual left-turn lanes

- **Nason Street/Alessandro Boulevard.** Add an eastbound through lane and a westbound through lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, the project shall contribute a fair share (calculated to be 1.4%) toward modification of the traffic signal to provide overlap phasing for the eastbound right-turn lane.
- **Moreno Beach Drive/SR-60 Westbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF would mitigate the significant impact at this location.
- **Moreno Beach Drive/SR-60 Eastbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF would mitigate the significant impact at this location.
- **Moreno Beach Drive/Eucalyptus Avenue.** Convert the existing eastbound through lane to a left-turn lane and the eastbound right-turn lane to a shared through/right-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, the project shall contribute a fair share (calculated to be 8.63%) toward modification of the traffic signal to provide right-turn overlap phasing for the westbound right turn.
- **Moreno Beach Drive/Cottonwood Avenue.** Add a southbound through lane. This improvement is programmed in the City's DIF program. Therefore, payment of the DIF would mitigate the significant impact at this location.
- **Moreno Beach Drive/Alessandro Boulevard.** Add 2 southbound through lanes, 2 northbound through lanes, an eastbound through lane, and a westbound through lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would mitigate the significant impact at this location.

- **Redlands Boulevard/SR-60 Westbound Ramps.** Install a traffic signal. This improvement is programmed in the City's DIF program and will be installed before building occupancy since it was identified as a direct project impact.
- **Redlands Boulevard/SR-60 Eastbound Ramps.** The Redlands Boulevard/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF. Therefore, payment of the TUMF would mitigate the significant impact at this location.
- **Redlands Boulevard/Fir Avenue-Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane, eastbound through lane, eastbound left-turn lane, and a westbound right-turn lane with overlap phasing. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, add a southbound through lane, southbound left-turn lane, northbound through lane, northbound left-turn lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF would mitigate the significant impact at this location.
- **Redlands Boulevard/Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, add a northbound left-turn lane and a southbound left-turn lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF would mitigate the significant impact at this location.
- **Redlands Boulevard/Alessandro Boulevard.** Install a traffic signal. This improvement is programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, add a southbound left-turn lane, a northbound left-turn lane, a westbound left-turn lane, an eastbound left-turn lane, a westbound right-turn lane, and a southbound through lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF would mitigate the significant impact at this location.

4.11.6.4E Prior to issuance of building permits, the project applicant shall implement the following improvements, either through fees paid to the City of Moreno Valley based on the City's DIF

system and the County's TUMF program, or through a fair-share contribution to the City of Moreno Valley as noted below:

- **Nason Street/Eucalyptus Avenue.** Add a northbound right-turn lane and an eastbound right-turn lane. These improvements are programmed in the City's DIF; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. Implementation of the improvements identified for this intersection in **Mitigation Measure 4.11.6.4D** would also partially mitigate the significant impact at this intersection. In addition, the project shall pay a fair share (calculated to be 1.6%) toward modification of the traffic signal to provide right-turn overlap phasing for the eastbound and northbound right turns.
- **Nason Street/Alessandro Boulevard.** Add an eastbound through lane and westbound through lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. Implementation of the improvements identified for this intersection in **Mitigation Measure 4.11.6.4D** would also partially mitigate the significant impact at this intersection. In addition, the project shall pay a fair share (calculated to be 1.35%) toward the addition of an eastbound left-turn lane and modification of the traffic signal to provide overlap phasing for the westbound right-turn lane.
- **Moreno Beach Drive/SR-60 Westbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF would mitigate the significant impact at this location.
- **Moreno Beach Drive/SR-60 Eastbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF would mitigate the significant impact at this location.
- **Moreno Beach Drive/Eucalyptus Avenue.** Restripe eastbound approach to dual left-turn lanes and add a northbound through lane, a westbound through lane, and a southbound right-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this

*intersection. Implementation of the improvements identified for this intersection in **Mitigation Measure 4.11.6.4D** would also partially mitigate the significant impact at this intersection. In addition, the project shall pay a fair share (calculated to be 5.17%) toward modification of the traffic signal to provide right-turn overlap phasing for the southbound right-turn lane.*

- **Moreno Beach Drive/Cottonwood Avenue.** *Add a southbound through lane, a northbound through lane, an eastbound left-turn lane, an eastbound through lane, a westbound through lane, and a westbound left-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would mitigate the significant impact at this location.*
- **Moreno Beach Drive/Alessandro Boulevard.** *Add 2 southbound through lanes, add 2 northbound through lanes, an eastbound through lane, and a westbound through lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would mitigate the significant impact at this location.*
- **Auto Mall Drive/Eucalyptus Avenue.** *Install a traffic signal. This improvement is programmed in the City's DIF program; therefore, payment of the DIF would mitigate the significant impact at this location.*
- **Redlands Boulevard/SR-60 Westbound Ramps.** *Install a traffic signal. This improvement is programmed in the City's DIF program and will be installed before building occupancy since it was identified as a direct project impact. Therefore, payment of the DIF would mitigate the significant impact at this location.*
- **Redlands Boulevard/SR-60 Eastbound Ramps.** *The Redlands Boulevard/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF. Therefore, payment of the TUMF would mitigate the significant impact at this location.*
- **Redlands Boulevard/Fir Avenue-Eucalyptus Avenue.** *Install a traffic signal and add a westbound left-turn lane, eastbound through lane, eastbound left-turn lane, a westbound right-turn lane with overlap phasing, and a southbound right-turn lane with overlap phasing. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, add a southbound through lane, a southbound left-turn lane, a northbound*

through lane, a northbound left-turn lane, and a northbound right-turn lane. These improvements are programmed in the TUMF. Therefore, payment of the TUMF would also partially mitigate the significant impact at this location. In addition, the project shall pay a fair share (calculated to be 10.44%) of the cost of adding a southbound left-turn lane.

- **Redlands Boulevard/Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, add a northbound left-turn lane, a northbound through lane, a southbound left-turn lane, and a southbound through lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF would mitigate the significant impact at this location.
- **Redlands Boulevard/Cottonwood Avenue.** Add an eastbound through lane and westbound through lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, add a northbound through lane, and a southbound through lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF would mitigate the significant impact at this location.
- **Redlands Boulevard/Alessandro Boulevard.** Install a traffic signal. This improvement is programmed in the City's DIF program; therefore, payment of the DIF would partially mitigate the significant impact at this intersection. In addition, add a southbound left-turn lane, a northbound left-turn lane, a westbound left-turn lane, an eastbound left-turn lane, a westbound right-turn lane, a southbound through lane, a westbound through lane, and an eastbound through lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF would mitigate the significant impact at this location.

4.11.6.4F *If the Encilia Avenue and Quincy Street Connection plan is implemented as part of the proposed project, then prior to issuance of building permits, the project applicant shall implement the following improvements: In addition to those identified in **Mitigation Measure 4.11.6.4E**, either through fees paid to the City of Moreno Valley based on the City's DIF*

system and the County's TUMF program, or through a fair-share contribution to the City of Moreno Valley as noted below:

- **Moreno Beach Drive/Eucalyptus Avenue.** Restripe the southbound shared through/right-turn lane to a southbound through lane. This improvement is programmed in the City's DIF program; therefore, payment of the DIF would mitigate the impacts of the project at this intersection.
- **Redlands Boulevard/Fir Avenue-Eucalyptus Avenue.** Pay the fair share (calculated to be 10.84%) to add a southbound right-turn lane.
- **Redlands Boulevard/Encilia Avenue-Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane. These improvements are programmed in the City's DIF program. In addition, add a northbound left-turn lane, northbound through lane, southbound left-turn lane, and a southbound through lane. These improvements are programmed in the TUMF program. Therefore, payment of the DIF and TUMF would fully mitigate the impact of the project at this intersection.
- **Moreno Beach Drive/Encilia Avenue.** Install a traffic signal, add a northbound through lane, southbound left-turn lane, and a southbound through lane. This improvement is programmed in the City's DIF program; therefore, payment of the DIF would mitigate the impacts of the project at this intersection.

Facts in Support of the Findings: Future Year (2035) with Project conditions considers the addition of traffic generated by the proposed project to Future Year (2035) Baseline conditions. The addition of project traffic to the Future Year (2035) scenario would result in conditions exceeding City and Caltrans LOS standards at twelve intersections.

All of the intersections that are forecast to experience a deficient LOS with the proposed project would also operate with a deficient LOS without the proposed project. Although the proposed project does not cause these intersections to operate at an unsatisfactory LOS, it does contribute to the worsening of the intersections' LOS and therefore mitigation would be required to offset the cumulative impact of the project.

Freeway mainline and ramp junctions were evaluated in the Future Year 2035 plus Project condition. Nine segments are forecast to operate at an unsatisfactory level of service in the Future Year 2035 Cumulative plus Project condition. The Traffic Study for the proposed Project also analyzes the Future

Year 2035 plus Project conditions a.m. and p.m. peak hour ramp merge-diverge volumes and levels of service for the freeway segments on SR-60. Nine ramp junctions are forecast to operate at an unacceptable level of service in the future Year 2035 plus Project condition. (DEIR pgs. 4.11-25 to 4.11-27)

According to Section 4.11 in the DEIR, with the implementation of the recommended improvements, the minimum level of service standards would be maintained for the Future Year (2035) with Project scenario and impacts would be reduced to a less than significant level for all identified intersections. In addition, reconstruction of the interchanges at the location of the deficient freeway ramp intersections identified in **Mitigation Measure 4.11.6.2D** are already programmed into the TUMF program. It is anticipated that by future year (2035) improvement to the identified freeway ramps and intersections would be built through the TUMF process and coordination by Caltrans, WRCOG, and the City of Moreno Valley. Because the project would pay its fair-share cost associated with these improvements and because such improvements are anticipated to be constructed by the future year (2035), impacts associated with this issue are less than significant after the identified mitigation measures have been implemented. (DEIR, pg. 4.11-35)

**b. General Plan Build Out With Project Conditions (Intersection)
Traffic and Level of Service Impacts**

Potential Significant Impact: The EIR evaluated and concluded that the Project could cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system.

Findings: Implementation of **Mitigation Measure 4.11.6.4E** will reduce the impact related to General Plan buildout to less than significant.

Facts in Support of the Findings: General Plan Build Out with project conditions considers the addition of traffic generated by the proposed project to General Plan Build Out baseline conditions. An intersection LOS analysis was conducted to determine General Plan Build Out intersection performance. The addition of project traffic to the General Plan Build Out scenario would result in conditions exceeding City and Caltrans LOS standards at 13 intersections.

All of the intersections that are forecast to experience a deficient LOS with the proposed project would also operate with a deficient LOS without the proposed project. Although the proposed project does not cause these intersections to operate at an unsatisfactory LOS, it does contribute to the worsening of the intersections' LOS and therefore mitigation would be required to offset the cumulative impact of the project. (DEIR, pg. 4.11-28)

According to Section 4.11 of the DEIR, with the implementation of the recommended improvements, the minimum level of service standards would be maintained for the General Plan Build Out with Project scenario and impacts would be reduced to a less than significant level for all identified intersections. However, as noted previously, improvements to the freeway intersections and infrastructure are under the authority of Caltrans. In addition, the deficient freeway ramp intersections identified in **Mitigation Measure 4.11.6.2E** are already programmed into the TUMF program. It is anticipated that by the General Plan Build Out, improvements to the identified freeway ramps and intersections would be built through the TUMF process and coordination by Caltrans, WRCOG, and the City of Moreno Valley. Because the project would pay its fair-share cost associated with these improvements and because such improvements are anticipated to be constructed by the future year (2035), impacts associated with this issue are less than significant after the identified mitigation measures have been implemented. (DEIR, pg. 4.11-37)

7. Utilities and Service Systems

a. Storm Water Drainage Requirements

Potential Significant Impact: The EIR evaluated and concluded that the Project could result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects.

Findings: Implementation of the following mitigation measures will reduce the impact to storm water drainage to less than significant:

4.7.6.3A *Prior to the approval of associated project rough grading plan, the project proponent shall receive approval on a project-specific Final Hydrology Study, with supporting engineering calculations, from the City Engineer. The Final Hydrology Study shall incorporate relevant requirements identified by the City, and/or site-specific geotechnical investigations.*

Facts in Support of the Findings: According to Section 4.12 of the DEIR, the proposed Project would route storm water flows from the Project site into Quincy Channel after flows are routed through a combination of water quality basins and sand filters. Due to the installation of impervious surfaces on the Project site, the post-development flows would be higher than the pre-development flows. To avoid a significant impact to the existing drainage capacity, the post-development flows coming from the

proposed Project site are required to be equal to or less than pre-development flows.¹³ To reduce flows to below or equal to pre-development conditions, the on-site storm water flows would be routed to the on-site detention basins¹⁴ before flows are routed off site. While the increase in impervious surfaces attributable to the proposed Project would contribute to a greater volume and higher velocity of storm water flows, the proposed Project's water quality basins would accept and accommodate runoff that would result from project construction at pre-project conditions.

As identified in the Preliminary Hydrology Calculations¹⁵ prepared for the Project, to adequately contain and store the greatest volume that would be generated, the Project site would require a minimum storage volume of 13.6 acre-feet. The proposed amount of storage area (20.3 acre-feet) is greater than the required amount of storage area. Based on this, it appears there is excess capacity of 6.7 acre-feet (20.3 acre-feet – 13.6 acre-feet = 6.7 acre-feet) of storage area available from the on-site detention basins; therefore, the proposed Project appears to have adequate drainage capacity that would result in post-development flows being reduced to pre-development flows before leaving the Project site. However, to ensure that impacts associated with on-site drainage capacity are reduced to a less significant level, the **Mitigation Measure 4.7.6.3A** has been identified to reduce potential impacts to less than significant levels. (DEIR, pgs. 4.12-16 to 4.12-17)

8 Global Climate Change

a. Greenhouse Gas Emissions

Potential Significant Impact: The EIR evaluated and concluded that the Project could have an adverse effect due to the generation of greenhouse gas emissions (GHGs).

Findings: Implementation of the following mitigation measures will reduce the impact related to greenhouse gas emissions to less than significant:

4.13.6.1A *Prior to the issuance of building permits, the project applicant shall provide evidence to the City of Moreno Valley that building features have been incorporated in building*

¹³ As part of the MS4 Permit issuance requirements, projects must identify any Hydrologic Conditions of Concern and demonstrate that changes to hydrology are minimized to ensure that post-development runoff rates and velocities from a site do not adversely affect downstream erosion, sedimentation, or stream habitat.

¹⁴ A detention basin is an area where excess storm water is stored or held temporarily and then slowly drains when water levels in the receiving channel recede. In essence, the water in a detention basin is temporarily detained until additional room becomes available in the receiving channel.

¹⁵ *Preliminary Hydrology Calculations for ProLogis Park Moreno Valley-Eucalyptus TPM 35679*, Thienes Engineering, November 4, 2008.

plans as required by Title 24 of the California Code of Regulations. These features include but are not limited to the following:

- *Exterior windows shall utilize window treatments for efficient energy conservation.*
- *Per CALGreen Code requirements, water-efficient fixtures and appliances, including but not limited to low-flow faucets, dual-flush toilets minimizing water consumption by 20 percent from the Building Standards Code baseline water consumption shall be used.*
- *Per CALGreen Code requirements, a Commissioning Plan shall be prepared and all building systems (e.g., heating, ventilation, and air-conditioning [HVAC], irrigation systems, lighting, and water heating) shall be commissioned by the Commissioning Authority.*
- *Per CALGreen Code, restrict watering methods (e.g., prohibit systems that apply water to non-vegetated surfaces) and control runoff.*

4.13.6.1B *Prior to the issuance of building permits, the project applicant shall provide evidence to the City of Moreno Valley that the following measures have been incorporated into the design and construction of the project:*

- *Use of locally produced and/or manufactured building materials for at least 10 percent of the construction materials used for the project.*
- *Use of “Green Building Materials,” such as those materials that are resource efficient, and recycled and manufactured in an environmentally friendly way, for at least 10 percent of the project.*
- *Limit unnecessary idling of construction equipment. A reduction in equipment idling would reduce fuel consumption, and therefore, GHG emissions.*
- *Maximize the use of electricity from the power grid by replacing diesel- or gasoline-powered equipment. This would reduce GHG emissions because electricity can be produced more efficiently at centralized power plants.*
- *Design the project building to exceed the California Building Code’s (CBC) Title 24 energy standard, including, but not limited to, any combination of the following:*

- *Increase insulation such that heat transfer and thermal bridging is minimized.*
- *Limit air leakage through the structure or within the heating and cooling distribution system to minimize energy consumption.*
- *Incorporate ENERGY STAR or better rated windows, space heating and cooling equipment, light fixtures, appliances, or other applicable electrical equipment.*
- *Provide a landscape and development plan for the project that takes advantage of shade, prevailing winds, and landscaping.*
- *Install efficient lighting and lighting control systems. Use daylight as an integral part of the lighting systems in buildings.*
- *Install light-colored “cool” roof and cool pavements.*
- *Install energy-efficient heating and cooling systems, appliances and equipment, and control systems.*
- *Install solar or light-emitting diodes (LEDs) for outdoor lighting for auto parking areas.*

4.13.6.1C *Prior to the issuance of occupancy permits, the project applicant shall provide evidence to the City of Moreno Valley that the following measures have been be incorporated into the operation of the project:*

- *The project applicant shall use less than 3,900 Global Warming Potential (GWP) hydrofluorocarbon (HCF) refrigerants or natural refrigerants (ammonia, propane, carbon dioxide [CO₂]) for refrigeration and fire suppression equipment.*
- *Provide vegetative or man-made exterior wall shading devices for east-, south-, and west facing walls with windows.*
- *Devise a comprehensive water conservation strategy appropriate for the project and its location. The strategy may include the following, plus other innovative measures that may be appropriate:*
 - *Install drought-tolerant plants for landscaping.*

- *Use reclaimed water for landscape irrigation within the project. Install the infrastructure to deliver and use reclaimed water.*
- *Install water-efficient irrigations systems, such as weather-based and soil-moisture-based irrigation controllers and sensors for landscaping according to the California Department of Water Resources Model Efficient Landscape Ordinance.*
- *Provide employee education about reducing waste and available recycling services.*

Facts in Support of the Findings: Future development that could occur on the proposed Project site could generate GHG emissions during construction and operation activities. It is anticipated that the majority of energy consumption (and associated generation of GHG emissions) would occur during the project’s operation (as opposed to its construction). The total GHG emissions over the entire construction process are expected to be 2,700 metric tons. Based on a comparison of the proposed Project to the South Coast Air Quality Management District tiered interim GHG significance criteria, the most applicable screening threshold listed is the Industrial at 10,000 ton per year (tpy) CO₂e. The long-term project operational GHG emissions for the proposed Project are 79,000 tpy CO₂e and exceed this threshold; therefore, the project operational GHG emissions are significant. In order to ensure that the proposed Project complies with and would not conflict with or impede the implementation of reduction goals identified in AB 32, the Governor’s EO S-3-05, and other strategies to help reduce GHGs to the level proposed by the Governor, **Mitigation Measures 4.13.6.1A through 4.13.6.1C** shall be implemented. The mitigation measure would contribute to a reduction in GHG emissions from energy, mobile, and water usage sources. With implementation of the identified mitigation measures, the proposed Project’s GHG emissions would be reduced to less than significant levels.

C. ENVIRONMENTAL IMPACTS NOT FULLY MITIGATED TO A LEVEL OF LESS-THAN-SIGNIFICANT

The Moreno Valley City Council finds the following environmental impacts identified in the EIR remain significant even after application of all feasible mitigation measures: aesthetics (individually and cumulative), agricultural resources (individually and cumulative), air quality (individually and cumulative), cumulative population and housing, and transportation. In accordance with CEQA Guidelines Section 15092(b)(2), the City Council of the City of Moreno Valley cannot approve the Project unless it first finds (1) under *Public Resources Code* Section 21081(a)(3), and CEQA Guidelines Section 15091(a)(3), that specific economic, legal, social technological, or other

considerations, including provisions of employment opportunities to highly trained workers, make infeasible the mitigation measures or Project alternatives identified in the EIR; and (2) under CEQA Guidelines section 15092(b), that the remaining significant effects are acceptable due to overriding concerns described in the CEQA Guidelines Section 15093 and, therefore, a statement of overriding considerations is included herein.

1. Aesthetics (Individual and Cumulative Impacts)

a. Scenic Vistas

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could have adverse effects on one or more scenic vistas, notably views of the Box Springs Mountains, the Badlands, Moreno Peak, and the Russell Mountains.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this impact to a level of less than significant. Accordingly, Project-related impacts to scenic vistas will remain significant and unavoidable.

Facts in Support of the Finding: According to Section 4.1 of the DEIR, the nearest sensitive permanent visual receptor to the Project would be the existing single-family residences to the southeast across future Encilia Avenue. In general, views for the residences southeast of the site will change from vacant land to industrial buildings with extensive landscaping including rows of citrus trees to help provide a visual buffer. Permanent views for residences north of SR-60 and transient views for travelers on SR-60 will change as the tops of the proposed industrial buildings will partially block views of the mountains to the south. Despite the provision of ornamental landscaping and citrus trees along the northern, western, and southern boundaries, implementation of the proposed Project would obstruct background views of the distant Box Springs Mountains for residences southeast of the Project, foreground and midground views of travelers on SR-60, and background views of the Mount Russell Range for residences north of SR-60 and along Pettit Street. This obstruction of views is a significant visual impact of the proposed Project. The sizes, heights, and general locations of buildings on the site are limited by the types of uses being proposed as part of this Project. Therefore, there is no feasible mitigation available to reduce impacts related to the loss of this viewshed. Since there is no feasible mitigation available to reduce adverse effects on scenic vistas, impacts associated with this issue would remain significant and unavoidable. (DEIR, pgs. 4.1-9 to 4.1-17)

b. Scenic Resources and Scenic Highways

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could have adverse effects on one or more scenic vistas, including views of the Box Springs Mountains and the Badlands for both residents and travelers on SR-60.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this impact to a level of less than significant. Accordingly, Project-related impacts to scenic vistas and scenic highways will remain significant and unavoidable.

Facts in Support of the Finding: According to Section 4.1 of the DEIR, the City of Moreno Valley identifies SR-60 as a local scenic road.¹⁶ According to the City's General Plan, the man-made environment is equally important as natural landforms in terms of scenic values (e.g., buildings, landscaping and signs). Agricultural uses, such as citrus groves, are one example of a man-made environment that constitutes a visually pleasing feature.

Existing views for motorists traveling eastbound and westbound on SR-60 consist of noise attenuation walls, commercial and residential development, landscaping, parking lots, open space, and orange groves in addition to the mountains and badlands in the distance. Development of the proposed Project would alter the existing view by introducing large industrial buildings adjacent to the freeway. Existing eastbound views on SR-60 would be altered with the development of the proposed Project. Motorists would still view noise attenuation walls, urban development, landscaping, and scattered trees as they look to the south, although these views would be of short duration for motorists traveling at normal freeway speeds.

The proposed Project would have highly reflective surfaces at the taller (43 feet) glass veneered office towers, but would not result in development along ridge lines. The proposed Project would result in an increased number of large bulk structures, but would include colors and materials that are compatible with the existing environment. The proposed ornamental landscaping and citrus trees would provide some visual screening. However, the proposed Project would result in the obstruction of most of the Mount Russell Range for motorists traveling on SR-60, so the proposed buildings would obstruct the view of a scenic feature. The proposed Project meets criteria in both the moderate and major visual intrusion categories. In an overabundance of caution, the worst-case scenario is utilized. Therefore, it is anticipated that based on Project design features, the proposed Project would have a major visual intrusion (i.e., significant impact) for motorists traveling on SR-60. Incorporation of the proposed building façades and

¹⁶ *Conservation Element, Figure 7-2 Major Scenic Resources*, City of Moreno Valley General Plan, adopted July 11, 2006.

ornamental landscaping design features will soften the visual appearance of the buildings from SR-60; however, the obstruction of local views will still be significant, and there are no feasible mitigation measures available that would reduce these impacts to less than significant levels. Therefore, impacts associated with this issue would remain significant and unavoidable. (DEIR, pgs. 4.1-17 to 4.1-19)

c. Existing Visual Character or Quality of Site and its Surroundings

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could have adverse effects that change the general character of the Project site (e.g., loss of open area), the components of the visual settings (e.g., landscaping and architectural elements), and the visual compatibility between proposed site uses and adjacent land uses.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this impact to a level of less than significant. Accordingly, Project-related impacts to the existing visual character of the site will remain significant and unavoidable.

Facts in Support of the Finding: The significance of visual impacts is inherently subjective as individuals respond differently to changes in the visual characteristics of an area. Development of the proposed Project would change the existing character of the Project site from open space to a more urbanized setting with large industrial buildings. The change in the character of the site would constitute a significant alteration of the existing visual character of the Project site.

According to Section 4.1 of the DEIR, the proposed Project features a variety of architectural elements including façade accents such as corner treatments and roof trim. The Project also provides variation in wall planes that serve to avoid an institutional appearance and break up the bulk of the buildings. This variation would create shadow lines at various times of the day. The proposed ornamental landscaping would replace the scattered weedy vegetation. Landscaping on the site would be provided in accordance with City Municipal Code Chapter 9.17, which requires the installation of landscaping on site and the planting of one tree for every 30 linear feet of building dimension that is visible from the parking lot or public right-of-way. As part of conditions of approval for the proposed Project, orange trees would be planted on the northern portion of the Project site adjacent to SR-60 and along the perimeter of the proposed Project site adjacent to the public right-of-way or residential zoning.

Since the Project site is currently vacant, suburban development of any type would cause a fundamental change in the visual characteristics of the Project site. In addition, the site is currently planned for industrial, business park, single-family, and multifamily uses, which would be different in appearance from the proposed industrial warehouse buildings. Of these uses, the lower density housing (R2) is currently designated adjacent to the existing residences southeast of the Project site.

The proposed Project would replace the existing vacant parcel and citrus groves with development that is visually compatible with the existing commercial development to the west and the existing and the approved Ridge industrial development to the east, but it will not be compatible with the residential uses to the southeast or farther to the north across SR-60.

Incorporation of the proposed building façades and landscaping design features will soften the visual appearance of the buildings from both SR-60 and nearby residences; however, the fundamental change in visual character of the area will still be significant. Even with compliance with the City’s General Plan and Municipal Code development guidelines for industrial development, including the 250-foot buffer between industrial and residential land uses, the anticipated fundamental change in views expected in this area will be significant. Due to the heights and masses of buildings needed to accommodate the proposed land uses, no feasible mitigation is available that would reduce these potential impacts to less than significant levels. Therefore, impacts associated with this issue would remain significant and unavoidable. (DEIR, pgs. 4.1-19 to 4.1-21)

d. Cumulative Aesthetics Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could in connection with past, present, and probable future projects adversely affect one or more scenic vistas.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this cumulative impact to a level of less than significant. Accordingly, Project-related cumulative impacts to scenic vistas will remain significant and unavoidable.

Facts in Support of the Finding: The development of the proposed Project would partially obstruct views of surrounding mountain ranges from current vantage points near the Project structures. However, vistas would not be completely obstructed from viewpoints through parking circulation areas, openings between rows of buildings or trees, or at the end of vehicular rights-of-way. Development of lands within the City, particularly along SR-60, would result in the cumulative conversion from open space to a more urbanized land use. The proposed Project would continue a recent development trend in the City to expand industrial uses along the south side of SR-60 east of the City’s Auto Center. This development trend has not yet been incorporated into the City’s General Plan. The proposed Project, in conjunction with other cumulative projects, would be developed in a manner consistent with existing development trends in the City. Since other cumulative projects in the area would include similar distribution uses, it can be anticipated that such uses would have a similar design and massing as the proposed Project. Since

the proposed Project would obstruct views of the surrounding mountains, it can be reasonable to conclude that similar warehouse distribution uses would also obstruct views of the surrounding mountains. In addition, General Plan Policy 7.7.4 in the Conservation Element requires the designation of SR-60 as a local scenic roadway. Therefore, the proposed Project, in combination with other cumulative projects in the eastern portion of the City and along SR-60 would have a cumulatively significant and unavoidable impact on aesthetics (i.e., views and scenic resources) in this portion of the City. (DEIR, pgs. 4.1-21 to 4.1-22)

2. **Agricultural Resources (Individual and Cumulative Impacts)**

a. **Conversion of State Designated Farmland**

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could impact 82.5 acres of Prime Farmland.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this impact to a level of less than significant. Accordingly, Project-related impacts to state designated farmland will remain significant and unavoidable.

Facts in Support of the Finding: Section 4.2 of the DEIR identifies several potential agricultural conservation measures contained in the City's General Plan that include: enrolling productive agricultural land into a Williamson Act Contract; providing protection to ongoing agricultural operations from complaints and nuisance complaints from adjacent new development; protecting productive agricultural land subject to conversion through the purchase of or transfer of its development rights; purchasing conservation easements on existing agricultural land to ensure that the land is never converted to urban uses; and donating funds to a regional or statewide program that promotes and implements the use of agricultural land conservation easements.

The potential agricultural conservation measures identified in the DEIR are not considered to be feasible by the City for the following reasons:

Williamson Act Contracts: Williamson Act contracts are entered into voluntarily by property owners and the City cannot force owners to participate in this program. In addition, Williamson Act contracts will result only in temporary preservation of agricultural land since property owners have the option of non-renewal of these contracts at any time after the ten-year contract period ends.

Protecting Existing Agricultural Operations: Providing protection for ongoing agricultural activities from new developments, such as buffers between agricultural operations and new development or requiring the notification and disclosure of agricultural activities to the purchasers adjacent properties, will not permanently protect agricultural land.

Transfer of Development Rights, Conservation Easements, or Agricultural Conservation Bank: The purchase or transfer of development rights, purchase of conservation easements, or donation of funds to assist in the conservation of agricultural land would need to be implemented to ensure the preservation of agricultural land. As stated previously, the City anticipates the conversion of agricultural land within the City and does not set aside land for permanent preservation. The current General Plan does not include any agricultural designations. The City allows agricultural uses in all land use designations as an interim use until such time as the land is developed per the vision identified in the General Plan. One of the goals stated in the City’s recent General Plan is the “...orderly conversion of agricultural lands.” For this reason, the City expects that the majority of the land within the City will be converted to urban uses, although some agriculture will continue as interim uses, as allowed by the City’s Development Code for all zoning categories. The existing and continued reduction in productive agricultural operations within the City is produced by several factors including; urbanization in the City and Inland Empire resulting in dramatically increasing land prices; high water and labor costs; environmental regulation (e.g., insects, odors, groundwater contamination, and solid waste removal); and competition from Kern County and the Central Valley with lower land costs and reduced regulations. (DEIR, pgs. 4.1-10 to 4.1-14)

The City has determined that these measures are economically infeasible and that they are contrary to the City’s vision (as stated in its General Plan) for the Project site and alternative mitigation has not been identified, and impacts related to this issue remain significant and unavoidable. (DEIR, pgs. 4.2-6 to 4.2-9)

b. Conversion of Farmland to a Non-Agricultural Use

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project would result in the development of industrial uses on land that has historically been utilized for citrus production.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this impact to a level of less than significant. Accordingly, Project-related impacts from the conversion of farmland to a non-agricultural use will remain significant and unavoidable.

Facts in Support of the Finding: According to Section 4.2 of the DEIR, the Project site has historically been in agricultural production and was most recently used to grow citrus. The conversion of the Project site to a non-agricultural use is a result of various economic and demographic factors. Increased cost for water and a continuing demand for housing and other development in the City and region are the primary reasons for this agricultural land conversion. A LESA model was also used to evaluate the site. It was determined that the Project LESA score is 85.3, which is considered significant. The Project does not include design features that would prevent the existing agricultural operations in the area from continuing. The Project would convert land that was previously used for agriculture and the development of the proposed Project may contribute to the conversion of adjacent lands. However, the Project is a logical extension of development in the City and does not create leapfrog development or islands of agricultural land that would be difficult to farm. The City recognizes development pressures within the City, and that these pressures will increase as the City continues to build out. Additionally, while the Project would not directly cause the conversion of adjacent agricultural land to non-agricultural uses because it has lain fallow for several years, it would contribute to development pressure within the City that could potentially lead to the conversion of agricultural land off site. However, as stated in the previous discussion of these Findings regarding the conversion of state designated farmland, the City has determined the agricultural conservation measures identified by the City are economically infeasible and that they are contrary to the City's vision (as stated in its General Plan) for the Project site and alternative mitigation has not been identified. Therefore, impacts associated with this issue remain significant and unavoidable. (DEIR, pgs. 4.1-9 to 4.1-10)

c. Cumulative Agricultural Resource Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project would have a significant cumulative impact on agricultural resources in Riverside County.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this impact to a level of less than significant. Accordingly, Project-related impacts to cumulative state designated farmland will remain significant and unavoidable.

Facts in Support of the Finding: According to Section 4.2 of the DEIR, the Project-related impacts to Prime Farmland and the conversion of agricultural land to a non-agricultural use cannot be mitigated through a local or regional program to mitigate impacts to agricultural resources. As stated previously, the City does not maintain a General Plan or zoning designation for agricultural uses and there are no Project-

level feasible mitigation measures that would help reduce cumulative impacts. The cumulative effect of development in the region will continue to result in the conversion of agricultural lands to non-agricultural uses. Because agricultural land, including Prime Farmland, Farmland of Statewide Importance, and Farmland of Local Importance are finite resource, the conversion of approximately 122.8 acres of farmland to industrial uses, combined with planned and future development in the City and region, represents a significant cumulative impact to agricultural operations and resources. As stated in the previous discussion of these Findings regarding the conversion of state designated farmland and conversion of agricultural land to a non-agricultural land use, the City has determined the agricultural conservation measures identified by the City are economically infeasible and that they are contrary to the City's vision (as stated in its General Plan) for the Project site and alternative mitigation has not been identified. Therefore, cumulative impacts to agricultural resources are considered significant and unavoidable. (DEIR, pg. 4.1-11)

2. Air Quality (Project-Specific and Cumulative Impact)

a. Air Quality Management Plan Consistency

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project has the potential to conflict with implementation of regional Air Quality Management Plan and the SIP.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that **Mitigation Measures 4.3.6.2A through 4.3.6.2M and 4.3.6.3A through 4.3.6.3C** are incorporated into the MMRP for the Project, and will be implemented as specified therein. However, the Council finds that even with application of these mitigation measures, the proposed Project will not be consistent with AQMP and the SIP and therefore impacts are considered significant and unavoidable.

Facts in Support of the Finding: An Air Quality Management Plan (AQMP) describes air pollution control strategies to be taken by counties or regions classified as nonattainment areas. The AQMP's main purpose is to bring the area into compliance with the requirements of Federal and State air quality standards. The AQMP uses the assumptions and projections by local planning agencies to determine control strategies for regional compliance status. Therefore, any projects causing a significant impact on air quality would impede the progress of the AQMP. CEQA requires that projects resulting in a General Plan Amendment be analyzed for consistency with the AQMP.

For a Project in the Basin to be consistent with the AQMP, the pollutants emitted from the Project must not exceed the South Coast AQMD significant threshold or cause a significant impact on air quality. One measurement tool in determining consistency with the AQMP is to determine how a Project accommodates the expected increase in population or employment. The proposed Project site is located in an urbanizing area of the City of Moreno Valley along SR-60, which accommodates traffic in the area. In addition, the proposed warehouse uses would be within walking distance of existing homes and commercial areas in the local vicinity. The proposed Project would add jobs resulting from the development of the warehouse uses to the City, with the potential to minimize the VMT traveled within the Project site and community.

The SCAQMD also has the following consistency criteria: the proposed Project cannot result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations, or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP; and the proposed Project cannot exceed the assumptions in the AQMP in 2010 or increments based on the year of Project build-out phase.

Implementation of the proposed Project would require a zone change from Business Park (BP), Business Park Mixed Use (BPX), Multi-Family Residential (R-15), Suburban Residential (R-5), and Residential Agriculture (RA-2) to Light Industrial for the entire 122.8 acres. Since the proposed Project will require a General Plan Amendment, the Project has not been considered in preparation of the General Plan and therefore it is uncertain if it is consistent with the AQMP.

Because the Project site is located in a nonattainment air basin for ozone, PM₁₀ and PM_{2.5}, the proposed Project's emission of ozone precursors (CO, ROG, and NO_x), PM₁₀ and PM_{2.5} would contribute to the existing nonattainment status in the Basin. Thus, according to the SCAQMD Consistency Criterion No. 1, the proposed Project is not consistent with the AQMP.

The proposed Project would have significant impacts. **Mitigation Measures 4.3.6.2A** through **4.3.6.2M** and **Mitigation Measures 4.3.6.3A** through **4.3.6.3C** shall be implemented as part of the proposed Project. The proposed Project would be considered to be consistent only after the City of Moreno Valley General Plan Amendment is approved. Once the City's General Plan Amendment and the required zoning changes are approved, the proposed Project would be included in the next SCAG and SCAQMD AQMP projections. When that occurs, the proposed Project would be consistent with the regional AQMP and the SIP. However, until that occurs, the Project is inconsistent with the regional AQMP and the impacts are considered significant and unavoidable. (DEIR, pgs. 4.3-21 to 4.3-22)

b. Equipment Exhaust from Construction-Related Activities

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project has the potential to exceed applicable daily thresholds that may affect sensitive receptors.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that Mitigation Measures 4.3.6.2A through 4.3.6.2M are incorporated into the MMRP for the Project, and will be implemented as specified therein. However, the Council finds that even with application of these mitigation measures, the proposed Project will have a significant impact due to equipment exhaust from construction related activities and therefore impacts are considered significant and unavoidable.

4.3.6.2A *Prior to the issuance of a grading permit, the Project developer shall require by contract specifications that contractors shall place construction equipment staging areas at least 200 feet away from sensitive receptors. Contract specifications shall be included in the proposed Project construction documents, which shall be reviewed by the City.*

4.3.6.2B *Prior to the issuance of a grading permit, the Project developer shall require by contract specifications that contractors shall utilize power sources (e.g., power poles) or clean-fuel generators. Contract specifications shall be included in the proposed Project construction documents, which shall be reviewed by the City.*

4.3.6.2C *Prior to the issuance of a grading permit, the Project developer shall require by contract specifications that contractors shall utilize California Air Resources Board (CARB) Tier II Certified equipment or better during the rough/mass grading phase for the following pieces of equipment: rubber-tired dozers and scrapers. Contract specifications shall be included in the proposed Project construction documents, which shall be reviewed by the City.*

Project start to December 31, 2014: All off-road diesel-powered construction equipment greater than 50 horsepower shall meet Tier 3 off-road emission standards. In addition, all construction equipment shall be outfitted with Best Available Control Technology (BACT) devices certified by CARB. Any emission control devices used by the contractor shall achieve emission reductions that are no less than what would be achieved by a Level 3 diesel emission control strategy for a similarly sized engine as defined by CARB regulations.

Post January 1, 2015: All off-road diesel-powered construction equipment greater than 50 horsepower shall meet Tier 4 emission standards, where available. In addition, all construction equipment shall be outfitted with Best Available Control Technology (BACT) devices certified by CARB. Any emission control devices used by the contractor shall achieve emission reductions that are no less than what would be achieved by a Level 3 diesel emission control strategy for a similarly sized engine as defined by CARB regulations.

A copy of each unit's certified tier specifications, BACT documentation, and CARB or SCAQMD operating permit shall be provided at the time of mobilization of each applicable unit of equipment.

4.3.6.2D *All clearing, grading, earthmoving, or excavation activities shall cease when winds (as instantaneous gusts) exceed 25 mph per SCAQMD guidelines in order to limit fugitive dust emissions.*

4.3.6.2E *The contractor shall ensure that all disturbed unpaved roads and disturbed areas within the Project are watered at least three times daily during dry weather. Watering, with complete coverage of disturbed areas, shall occur at least three times a day, preferably in the mid-morning, afternoon, and after work is done for the day.*

4.3.6.2F *The contractor shall ensure that traffic speeds on unpaved roads and Project site areas are reduced to 15 miles per hour or less to reduce PM₁₀ and PM_{2.5} fugitive dust haul road emissions. Speed limit signs (15 mph maximum) shall be posted at entry points to the Project site, and along any unpaved roads providing access to or within the Project site and/or any unpaved designated on-site travel routes.*

4.3.6.2G *Groundcover shall be replaced, and/or non-toxic soil stabilizers shall be applied (according to manufacturers' specifications) to any inactive construction areas (previously graded areas inactive for ten days or more).*

4.3.6.2H *The contractor shall minimize pollutant emissions by maintaining equipment engines in good condition and in proper tune according to manufacturer's specifications and by not allowing construction equipment to be left idling for more than five minutes (per California law).*

4.3.6.2I *The contractor shall ensure use of low-sulfur diesel fuel in construction equipment as required by the California Air Resources Board (CARB) (diesel fuel with sulfur content of 15 ppm by weight or less).*

4.3.6.2J *Grading plans, construction specifications and bid documents shall also include the following requirements:*

- *Off-road construction equipment shall utilize alternative fuels where feasible e.g., biodiesel fuel (a minimum of B20), natural gas (CNG), liquefied natural gas (LNG), propane, except for equipment where use of such fuels would void the equipment warranty;*
- *Gravel pads shall be provided at all access points to prevent tracking of mud onto public roads;*
- *Install and maintain trackout control devices at all access points where paved and unpaved access or travel routes intersect;*
- *The contractor or builder shall designate a person or person(s) to monitor the dust control program and to order increased watering, as necessary, to prevent transport of dust off site;*
- *The contractor or builder shall post a publicly visible sign with the telephone number and person to contact regarding dust complaints. The contact person shall take corrective action within 24 hours;*
- *High-pressure injectors shall be provided on diesel construction equipment if feasible;*
- *Engine size of construction equipment shall be limited to the minimum practical size;*
- *Substitute gasoline-powered for diesel powered construction equipment where gasoline powered equipment is available;*
- *Use electric construction equipment where it is practical to use such equipment;*
- *Install catalytic converters on gasoline-powered equipment where this type of equipment is available;*

- *Ride-sharing program for the construction crew shall be supported by contractor(s) via incentives or other inducement;*
- *Documentation shall be provided to the City of Moreno Valley indicating that construction workers have been encouraged to carpool or otherwise reduce VMT to the greatest extent practical, including providing information on available park and ride programs;*
- *Lunch vendor services shall be allowed on site during construction to minimize the need for off-site vehicle trips; and*
- *All forklifts used during construction and in subsequent operation of the Project shall be electric or natural gas powered.*

4.3.6.2K *Throughout Project construction, a construction relations officer/community liaison, appointed by the Applicant, shall be retained on site. In coordination and cooperation with the City, the construction relations officer/community liaison shall respond to any concerns related to PM₁₀ (fugitive dust) generation or other construction-related air quality issues.*

4.3.6.2L *All Project entrances shall be posted with signs which state:*

- *Truck drivers shall turn off engines when not in use;*
- *Diesel delivery trucks servicing the Project shall not idle for more than three (3) minutes; and*
- *Telephone numbers of the building facilities manager and CARB, to report violations.*

These measures shall be enforced by the on-site facilities manager (or equivalent).

4.3.6.2M *During Project grading and construction, the various Project contractors shall adhere to the control measures listed in Tables 1 and 2.*

CVC = California Vehicle Code

USEPA = United States Environmental Protection Agency

Facts in Support of the Finding: Grading and other construction activities produce combustion emissions from various sources such as site grading, utility engines, on-site heavy-duty construction vehicles, equipment hauling materials to and from the site, asphalt paving, and motor vehicles transporting the construction crew. The use of construction equipment on site would result in localized exhaust emissions. Activity during peak grading days typically generates a greater amount of air pollutants than other Project construction activities.

Section 4.3 of the DEIR indicates construction equipment/vehicle emissions during proposed on-site grading periods would exceed the SCAQMD daily thresholds for ROG and NO_x. Although construction of the structures uses different types of equipment on site than during grading periods, similarities do exist in terms of equipment exhaust emissions and fugitive dust emissions. While it is anticipated that total emissions during construction would be below the peak grading day emissions, construction emissions of ROG and NO_x would still exceed the SCAQMD daily threshold. This is a significant impact requiring **Mitigation Measures 4.3.6.2A through 4.3.6.2M**. The use of low-NO_x diesel fuel in construction equipment typically reduces NO_x emissions by 16 percent.¹⁷ Use of this fuel would reduce NO_x emissions but not below SCAQMD thresholds. However, there is no reasonable way to ensure that retrofitted diesel-powered equipment, low- NO_x diesel fuel, and alternative fuel sources would be available during the construction period; therefore, it is not possible to quantify reductions in NO_x emissions that would result from **Mitigation Measures 4.3.6.2A through 4.3.6.2M**. Because no additional feasible mitigation is available to reduce construction-related NO_x emissions, this impact remains significant and unavoidable. Furthermore, there is no feasible mitigation to reduce the ROG

¹⁷ <http://www.aqmd.gov/ceqa/igr/2006/feb/10-01.pdf>, site accessed December 30, 2011.

emissions during architectural coating phase to less than the daily threshold. Thus, the emissions during construction of NO_x and ROG will remain significant. (DEIR, pgs. 4.3-22 to 4.3-29)

c. Architectural Coating Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could potentially exceed applicable daily thresholds for VOC.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that Mitigation Measure 4.2.6.4A is incorporated into the MMRP for the Project, and will be implemented as specified therein. However, the Council finds that even with application of this mitigation measures, impacts related to architectural coatings are considered significant and unavoidable.

4.3.6.4A *The Project applicant shall use “Low-Volatile Organic Compounds” paints, coatings, and solvents with a VOC content lower than required under Rule 1113 (not to exceed 150 grams/liter; 1.25 pounds/gallon). High Pressure Low Volume (HPLV) applications of paints, coatings, and solvents shall be consistent with South Coast Air Quality Management District Rule 1113. Alternatively, the Project applicant shall use materials that do not require painting or are pre-painted.*

Facts in Support of the Finding: Architectural coatings contain volatile organic compounds (VOC) that are similar to ROG and are part of the O₃ precursors. Rule 1113 is applicable to any person who applies or solicits the application of any architectural coating within the Basin. Rule 1113 sets limits on the amount of VOC emissions allowed for all types of architectural coatings, along with a time table for tightening the emissions standards in the future.

According to Section 4.3 of the DEIR, approximately 344 pounds of ROG would be generated during the architectural coating phase of the Project. Manual applications such as paintbrush, hand roller, trowel, spatula, dauber, rag, or sponge have 100 percent transfer efficiency. Construction of the Project using the required HVLP spray method reduces the daily VOC emissions to 224 pounds per day during the architectural coatings application period. The amount of VOC generated per day from the application of architectural coating even with the use of the required HVLP spray method (224 pounds) during the application of architectural coatings would exceed the SCAQMD VOC threshold of 75 lbs/day. Emissions associated with architectural coatings can be reduced by using pre-coated/natural-colored building materials, water-based or low VOC coating or by using coating transfer or spray equipment with

high transfer efficiency. Adherence to SCAQMD Rule 1113 and **Mitigation Measure 4.3.6.4A** would reduce the Project's architectural coatings emissions impact. However, even with adherence to SCAQMD Rule 1113, the SQAQMD VOC threshold would still be exceeded. Therefore, impacts associated with this issue would remain significant and unavoidable. (DEIR, pg. 4.3-31)

d. Long-Term Project-Related Emissions Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could potentially exceed applicable daily thresholds for operational activities.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that Mitigation Measures 4.3.6.5A and 4.3.6.5B are incorporated into the MMRP for the Project, and will be implemented as specified therein. However, the Council finds that even with application of these mitigation measures, long term construction emissions-related air quality impacts are considered significant and unavoidable.

4.3.6.5A *Prior to issuance of building permits, the Project applicant shall provide evidence to the City that applicable (as determined by the City) Transportation Demand Management (TDM)/Transportation Control Measure (TCM) strategies such as preferential parking for employee vanpooling/carpooling, bicycle parking facilities (such as bicycle lockers and racks), bus turnouts, and other strategies are incorporated into the design of the proposed Project.*

4.3.6.5B *Prior to issuance of building permits, the Project applicant shall provide evidence to the City that energy-efficient and low-emission methods and features of building construction shall be incorporated into the Project design. These methods and features may include (but are not limited to) the following:*

- *Construction of buildings that exceed statewide energy requirements beyond 2010 percent of that identified in Title 24, Part 6 Energy Efficiency Standards:*
 - *Use of low-emissions water heaters;*
 - *Use of central water-heating systems;*
 - *Use of energy-efficient appliances;*

- *Use of increase insulation;*
- *Use of automated controls for air conditioners;*
- *Use of energy-efficient parking lot lighting; and*
- *Use of lighting controls and energy-efficient lighting.*
- *Utilize low-VOC interior and exterior coatings during Project repainting.*
- *Provide on-site improvements such as sidewalks or pedestrian walkways to promote pedestrian activity and reduce the amount of vehicle trips.*
- *Installation of skylights and energy-efficient lighting that exceeds California Title 24 standards where feasible, including electronic dimming ballasts and computer-controlled daylight sensors in the buildings.*
- *Shade-producing trees, particularly those that shade paved surfaces such as streets and parking lots and building shall be planted at the proposed Project site. These strategies will minimize the heat island effect and thereby reduce the amount of air conditioning required.*
- *Strategies to be considered include fans to assist natural ventilation, centralized water and space conditioning systems, high efficiency individual heating and cooling units, and automatic setback thermostats.*
- *Reduction of energy demand associated with potable water conveyance through the following methods:*
 - *Incorporating drought-tolerant plants into the landscaping palette; and*
 - *Use of water-efficient irrigation techniques.*
- *Energy-efficient low-pressure sodium parking lot lights or lighting equivalent as determined by the City, shall be used;*
- *Buildings shall be oriented north-south where feasible;*
- *Implement an on-site circulation plan in parking lots to reduce vehicle queuing;*

- *Develop a trip reduction plan to achieve 1.5 average vehicle ridership (AVR) for businesses with fewer than 250 employees or multitenant worksites;*
- *Include bicycle parking facilities such as bicycle lockers and racks;*
- *Include showers for bicycling employees use; and*
- *Construct on-site pedestrian facility improvements such as building access that is physically separated from street and parking lot traffic and walk paths.*

Facts in Support of the Finding: Although implementation of **Mitigation Measures 4.3.6.5A** through **4.3.6.5B** may reduce vehicle trips associated with the proposed Project, it is not possible to quantify the reduction in the amount of emissions that may occur. Considering the volume of emissions generated and current commuter habits, it is unlikely the implementation of TDMs/TCMs will result in a reduction of operational Project emissions to below existing SCAQMD thresholds. Application of Leadership in Energy and Environmental Design (LEED) standards and green building design principles could reduce emissions from building operations such as heating and cooling; however, such standards and principles would not reduce emissions of CO, ROG, NO_x, PM₁₀, and PM_{2.5} to below SCAQMD thresholds. No other feasible mitigation measures have been identified to reduce the operational emissions of CO, ROG, NO_x, PM₁₀, and PM_{2.5} to a less than significant level. Because the Project site is located in a nonattainment air basin for criteria pollutants, the addition of air pollutants resulting from operation of the proposed Project would contribute to the continuation of nonattainment status in the Basin. In the absence of mitigation to reduce the proposed Project's emission of contribution of CO, ROG, NO_x, PM₁₀, and PM_{2.5} to below SCAQMD thresholds, long-term air quality impacts resulting from the operation of the proposed Project would remain significant and unavoidable. (DEIR, pgs. 4.2-26 to 4.2.28)

e. Project-Related Localized Operational Emissions Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could potentially exceed applicable long-term operational daily thresholds.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that **Mitigation Measures 4.3.6.6A** and **4.3.6.6B** are incorporated into the MMRP for the Project, and will be implemented as specified therein. However, the Council finds that even with application of these mitigation measures, long term operational-related emission impacts are considered significant and unavoidable.

4.3.6.6A *Prior to issuance of the first building permit, building and site plan designs shall ensure that the Project's energy efficiencies surpass applicable 2008 California Title 24, Part 6 Energy Efficiency Standards by a minimum of 10 percent until January 1, 2014. For building permits issued after that date, new state energy standards require a 20 percent reduction from 2008 Title 24, Part 6 Energy Efficiency Standards. Verification of increased energy efficiencies shall be documented in Title 24 Compliance Reports provided by the Applicant, and reviewed and approved by the City. The following design features shall be used to fulfill this requirement:*

- *Buildings shall exceed California Title 24 Energy Efficiency performance standards for water heating and space heating and cooling, as deemed acceptable by the City.*
- *Increase in insulation such that heat transfer and thermal bridging is minimized.*
- *Limit air leakage through the structure or within the heating and cooling distribution system to minimize energy consumption.*
- *Incorporate dual-paned or other energy efficient windows.*
- *Incorporate energy efficient space heating and cooling equipment.*
- *Interior and exterior energy efficient lighting which exceeds the California Title 24 Energy Efficiency performance standards shall be installed, as deemed acceptable by the City. Automatic devices to turn off lights when they are not needed shall be implemented.*
- *To the extent that they are compatible with landscaping guidelines established by the City, shade-producing trees, particularly those that shade paved surfaces such as streets and parking lots and buildings shall be planted at the Project site.*
- *Paint and surface color palette for the Project shall emphasize light and off-white colors which reflect heat away from the buildings.*
- *All buildings shall be designed to accommodate renewable energy sources, such as photovoltaic solar electricity systems, appropriate to their architectural design.*
- *To reduce energy demand associated with potable water conveyance, the Project shall implement the following:*
 - *Landscaping palette emphasizing drought-tolerant plants;*
 - *Use of water-efficient irrigation techniques; and,*

- *U.S. EPA Certified WaterSense labeled for equivalent faucets, high-efficiency toilets (HETs), and water-conserving shower heads.*
- *The Project shall provide secure, weather-protected, on-site bicycle storage/parking.*
- *The Project shall provide on-site showers (one for males and one for females). Lockers for employees shall be provided.*
- *The Project will establish a Transportation Management Association (TMA). The TMA will coordinate with other TMAs within the City to encourage and coordinate carpooling among building occupants. The TMA will advertise its services to building occupants, and offer transit and/or other incentives to reduce greenhouse gas (GHG) emissions. A plan will be submitted by the TMA to the City within two months of Project completion that outlines the measures implemented by the TMA, as well as contact information.*
- *The Project shall provide preferential parking for carpools and vanpools. Locations and configurations of proposed preferential parking for carpools and vanpools are subject to review and approval by the City. Prior to final site plan approval, preferential parking for carpools and vanpools shall be delineated on the Project site plan.*
- *The Project shall provide at least two electric vehicle charging stations. Locations and configurations of proposed charging stations are subject to review and approval by the City. Prior to issuance of the first building permit, stub outs for charging stations shall be indicated on the Project building plans.*
- *Lease/purchase documents shall identify that tenants are encouraged to promote the following:*
 - *Implementation of compressed workweek schedules.*
 - *SmartWay partnership;*
 - *Achievement of at least 20 percent per year (as a percentage of previous percentage, not total trips) increase in percentage of consolidated trips carried by SmartWay carriers until it reaches a minimum of 90 percent of all long-haul trips carried by SmartWay 1.0 or greater carriers.*
 - *Achievement of at least 15 percent per year (as a percentage of previous percentage, not total trips) increase in percentage of long-haul trips carried by SmartWay carriers until it reaches a minimum of 85 percent of all consolidator trips carried by*

SmartWay 1.0 or greater carriers.

- *Use of fleet vehicles conforming to 2010 air quality standards or better.*
- *Installation of catalytic converters on gasoline-powered equipment.*
- *Inclusion of electric powered and/or compressed natural gas fueled trucks and/or vehicles in fleets.*
- *Establishment and use of carpool/vanpool programs, complemented by parking fees for single-occupancy vehicles.*
- *Provision of preferential parking for EV and CNG vehicles.*
- *Use of electrical equipment (instead of gasoline-powered equipment) for landscape maintenance.*
- *Use of electric (instead of diesel or gasoline-powered) yard trucks.*
- *Use of SmartWay 1.25 rated trucks.*
- *Each facility operator shall provide regular sweeping of onsite parking and drive areas using street sweepers that comply with applicable SCAQMD Rules.*
- *Each facility operator shall maintain a log of all trucks entering the facility to ensure that, on average, the daily truck fleet meets applicable air quality emission standards. This log shall be available for inspection by City staff at any time.*
- *Each facility operator shall prohibit all vehicles from idling in excess of five minutes in all onsite areas.*
- *Each facility operator shall ensure that onsite staff in charge of keeping the daily log and monitoring for excess idling will be trained and certified in diesel health effects and technologies, such as by requiring attendance at CARB-approved courses.*
- *Each facility operator which upon occupancy does not already operate 2077 and newer trucks shall in good faith be required to apply for funding to replace or retrofit their trucks such as Carl Moyer, VIP, Prop 1B or similar funds. Should funds be awarded, the tenant shall be required to accept and use them.*

4.3.6.6B *The Project shall be designed to facilitate the reduction of waste generated by building occupants that is hauled to and disposed of in landfills by providing easily accessible areas that are dedicated to the collection and storage of recyclable materials including*

paper, cardboard, glass, plastics, and metals. Locations of proposed recyclable materials collection areas are subject to review and approval by the City. Prior to Final Site Plan approval, locations of proposed recyclable materials collection areas shall be delineated on the Project site plan.

f. Cumulative Air Quality Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project could potentially result in a cumulatively considerable net increase of criteria pollutants for which the Project region is in non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors).

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this impact to a level of less than significant. Accordingly, Project-related impacts cumulative air quality impacts will remain significant and unavoidable.

Facts in Support of the Finding: Included in Section 4.3 of the DEIR, the Project would contribute criteria pollutants to the area during Project construction. A number of individual projects in the area may be under construction simultaneously with the proposed Project. Depending on construction schedules and actual implementation of projects in the area, generation of fugitive dust and pollutant emissions during construction would result in substantial short-term increases in air pollutants. This would be a contribution to short-term cumulative air quality impacts.

The traffic study included vehicular trips from all present and future projects in the Project vicinity; therefore, the CO hot spot concentrations calculated at these intersections include the cumulative traffic effect. Based on this, no significant cumulative CO impacts would occur.

Long-term operation of the Project would exceed the standards for CO, ROC, NO_x, PM₁₀, and PM_{2.5}. The Basin is in nonattainment for PM₁₀ and ozone at the present time; therefore, the construction and operation of the proposed Project would exacerbate nonattainment of air quality standards for PM₁₀ and ozone within the Basin and contribute to cumulative air quality impacts. Therefore, long-term cumulative air quality impacts are considered to be significant and unavoidable.

The Health Risk Assessment (HRA) conducted for the proposed Project identified the increase in health risks to the nearby sensitive receptors from the proposed Project's air pollutant emissions. This HRA identified that the Project's incremental increase is only a very small fraction of the ambient condition.

Therefore, the concentration of diesel particulates at the Project site is below the established risk threshold. Individuals living and working in southern California may be exposed to levels of diesel emissions that are cumulatively significant; however, that circumstance is not created by the Project.

It is reasonable to anticipate that advancements in truck/transportation technology would reduce the amount of particulate matter in future years. However, a determination of the amount and extent of that reduction in diesel particulate matter from these types of activities is not available at this time. Therefore, in an overabundance of caution, because other cumulative projects in the area would also contribute diesel particulates in the area and because the Riverside area has a level of particulate matter that is above the SCAQMD's recommended cancer risk threshold of 10 in one million, regional impacts associated with diesel particulate matter are considered cumulatively considerable and the proposed Project will make a significant contribution to that cumulative impact. (DEIR, pgs. 4.3-37 to 4.3-38)

4. Land Use and Planning (Individual and Cumulative)

b. Conflict with Applicable Land Use Plans, Policies, or Regulations

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project would potentially conflict with various land use plans, policies, or regulations.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce bring the Project into compliance with all land use plans. Accordingly, Project-related conflicts with land use plans will remain significant and unavoidable.

Facts in Support of the Finding: According to Section 4.8 of the DEIR, a discussion of the proposed Project's consistency with the 2007 AQMP has been analyzed in Section 4.3 (Air Quality) of this EIR. "Since the proposed Project will require a General Plan Amendment, the Project has not been considered in preparation of the City's General Plan and therefore is inconsistent with the AQMP. Amendments to the City of Moreno Valley General Plan, zoning reclassification, and plan approval are required before the affected portion of the proposed Project can be implemented. This is a significant impact requiring mitigation." That section of this EIR concluded that, despite the recommended mitigation, Project air quality impacts related to the AQMP would remain significant.

The Project proposes the development of warehouse uses, which would result in an inconsistency with the existing residential zoning on the southern portion of the site, and the BP zone on the northern portion of the site. The development that would occur with the zone change has the potential to create indirect

environmental impacts since the zone change would permit more intense and larger industrial/warehousing uses on the Project site, requiring a discretionary action based on an environmental determination of the Project. These environmental impacts are analyzed through this EIR for each of the environmental topics. The baseline for comparative analysis of environmental impacts would be the existing condition of the Project site. Currently, there is no existing development on the Project site, which represents the worst-case scenario on which the EIR analysis is based. With implementation of the zone change, the proposed Project would be consistent with zoning requirements identified by the City.

According to the latest development plans, the closest loading and unloading operations of the proposed Project (e.g., truck courts) would be located 395 feet northwest of the nearest single-family residence (see plans in Appendix K). In addition, the reconfigured roadways surrounding the Project site would discourage industrial traffic through the residential areas to the southeast. Despite these design characteristics, the fundamental change from residential/business park uses to industrial adjacent to residential represents an incremental adverse effect on the “quality of life” of existing residents in this area, which represents a potentially significant land use compatibility impact. This impact requires the City Council to approve a Zone Change to bring the proposed zoning designations into consistency with the Zoning Map and Municipal Code.

The Compass Growth Vision plan provides a framework for local and regional decision-making regarding growth, transportation, land use, and economic development. The main objective of the Compass Growth Vision is to manage the forecast growth while improving future living conditions for all people within the SCAG area, including live, work, and play activities.

The proposed Project may not be fully consistent with the growth principles of the Compass Growth Vision plan. The nature of the proposed Project allows the transport of commodities from a single area rather than multiple areas, minimizing vehicle trip generation. Conversely, trucks from the proposed Project may increase localized and freeway congestion. The Project eliminates a planned transition of land uses that may incrementally reduce livability in this portion of the City. The proposed Project does support increased prosperity by providing additional (mainly “blue collar”) employment opportunities close to existing housing within the City of Moreno Valley. The proposed Project is located in an area where existing infrastructure (freeway, sewer, electrical, water, etc.) is present. The development of the proposed Project will augment existing services available in the City and region. In these ways, the Project is only partially consistent with the principles of the Compass Growth Vision. (DEIR, pgs. 4.8-5 to 4.8-17)

a. Cumulative Land Use and Planning

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project would have a cumulative impact to land use and planning issues.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant as there are no known feasible mitigation measures that could reduce this impact to a level of less than significant. Accordingly, Project-related cumulative impacts to land use and planning will remain significant and unavoidable.

Facts in Support of the Finding: Implementation of the proposed Project represents establishment of new land uses within the currently undeveloped Project site that would result in an intensification of permitted land uses associated with a land use change from Business Park and Residential to Light Industrial uses, changes to the General Plan Circulation Element, and the loss of the Primary Animal Keeping Overlay (PAKO) associated with the RA-2 zone. The proposed Project is generally consistent with regional plans and planning efforts, although it is not fully consistent with the SCAG's RTP and Compass Blueprint Plan because it eliminates some housing in favor of industrial employment uses. However, it will incrementally improve the City's long-standing jobs/housing ratio, which is also a regional goal of the various SCAG plans. It is also not consistent with existing General Plan land use designations, objectives and policies, nor is it consistent with existing zoning designations on the site. For these reasons, a General Plan Amendment and Zone Change are proposed for consideration by the City.

In addition, the proposed Project represents a fundamental change in community character for this portion of the City (i.e., mixed residential and business park to industrial warehouse buildings), which can represent an incremental adverse change in terms of public perception. This change would be particularly acute if both the proposed Project and the approved West Ridge Commerce Centre (an industrial Project just east of the proposed Project) were built within a relatively short period of time, as they would both follow relatively closely the completion of the Sketchers Logistics Center (another warehouse Project) east of both the proposed Project and the West Ridge Project, on the east side of Redlands Boulevard. Furthermore, the addition of industrial space from the proposed Project and the adjacent West Ridge (industrial) Project may create an over-supply of warehousing space in the City, based on current economic conditions.

The proposed changes in land use will also result in a loss of up to 584 (R-15) multi-family residential units. However, this was determined to be a less than significant Project impact on local housing because the City's Housing Element identifies over twice as much potential affordable housing as the City's

RHNA allocation, so it will not make a significant contribution to a cumulatively considerable impact on regional housing.

Similar to the proposed Project, some of the cumulative projects within the Project vicinity would also require amendments to the existing General Plan and zoning, which may in turn cause additional cumulative impacts. Therefore, planned industrial development in the City may contribute to a cumulatively considerable impact or change in the overall character of the surrounding area, and the proposed Project would make a significant contribution to that change in terms of consistency with adopted land use plans. No feasible mitigation is available to reduce this significant contribution. However, the Project would not make a similar cumulatively considerable land use impact relative to dividing an established community or conflicting with an approved habitat conservation plan. (DEIR, pgs. 4.8-17 to 4.8-18)

5. Transportation

a. Existing (2011) With Project Conditions (Intersection) Traffic and Level of Service Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project would cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that **Mitigation Measure 4.11.6.4A** is incorporated into the MMRP for the Project, and will be implemented as specified therein. However, the Council finds that even with application of these mitigation measures, existing (2011) with Project LOS impacts are considered significant and unavoidable.

Facts in Support of the Finding: As indicated in Section 4.11 of the DEIR, with the addition of Project traffic, the following intersections are forecast to operate at unsatisfactory levels of service: Redlands Boulevard/SR-60 Westbound Ramps (a.m. and p.m. peak hours); and Redlands Boulevard/Eucalyptus Avenue-Fir Avenue (p.m. peak hour).

The Project would contribute to the worsening of the already unsatisfactory LOS at the intersection of Redlands Boulevard/SR-60 Westbound Ramps and would create a significant impact at the intersection of Redlands Boulevard/Eucalyptus Avenue-Fir Avenue. Therefore, mitigation is required at both intersections.

Also, the following segments are forecast to operate at an unsatisfactory level of service in the Existing plus Project condition: SR-60 Eastbound: Pigeon Pass Road to Heacock Street (a.m. and p.m. peak hours); SR-60 Westbound: Heacock Street to Perris Boulevard (a.m. peak hour); and SR-60 Westbound: Perris Boulevard to Nason Street (a.m. peak hour).

The Project would add to the existing unsatisfactory LOS on these three freeway segments; therefore, the addition of Project traffic would be considered a cumulative impact. Neither the Project applicant nor the City has jurisdiction over Caltrans facilities; therefore, implementation of improvements to the freeway mainline cannot be guaranteed. Review of the SCAG Regional Transportation Improvement Plan (RTIP) indicates that there are no projects programmed on SR-60 within the study area. Furthermore, Caltrans does not have a mechanism for development projects to contribute to improvements on State Highways. Therefore, the cumulative impact to these three segments of SR-60 would be significant and unavoidable. (DEIR, pgs. 4.11-19)

b. Opening Year 2016 With Project Conditions (Intersection) Traffic and Level of Service Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project would cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that **Mitigation Measure 4.11.6.4B** is incorporated into the MMRP for the Project, and will be implemented as specified therein. However, the Council finds that even with application of these mitigation measures, existing (2016) with Project LOS impacts are considered significant and unavoidable.

Facts in Support of the Finding: Opening Year (2016) with Project conditions considers the addition of traffic generated by the proposed Project to Opening Year (2016) without Project conditions. Section 4.11 of the DEIR indicates that the following intersections would operate at unsatisfactory LOS: Moreno Beach Drive/SR-60 Westbound Ramps (p.m. peak hour); Redlands Boulevard/SR-60 Westbound Ramps (a.m. and p.m. peak hours); and Redlands Boulevard/Eucalyptus Avenue-Fir Avenue (p.m. peak hour). The Project would have a significant impact at all three intersections, and therefore mitigation would be required.

Freeway mainline and ramp junctions were evaluated in the Opening Year (2016) plus Project condition. The following segments are forecast to operate at an unsatisfactory level of service in the Opening Year (2016) plus Project condition: SR-60 Eastbound: Pigeon Pass Road to Heacock Street (a.m. and p.m. peak hours); SR-60 Eastbound: Heacock Street to Perris Boulevard (p.m. peak hour); SR-60 Westbound: Heacock Street to Perris Boulevard (a.m. peak hour); and SR-60 Westbound: Perris Boulevard to Nason Street (a.m. peak hour).

The Project would add to the existing unsatisfactory LOS on these four freeway segments; therefore, the addition of Project traffic would be considered a cumulative impact. Neither the Project applicant nor the City has jurisdiction over Caltrans facilities; therefore, implementation of improvements to the freeway mainline cannot be guaranteed. Review of the RTIP indicates that there are no projects programmed on SR-60 within the study area. Furthermore, Caltrans does not have a mechanism for development projects to contribute to improvements on State Highways. Therefore, the cumulative impact to these three segments of SR-60 would be significant and unavoidable.

**c. Opening Year 2016 Cumulative With Project Conditions
(Intersection) Traffic and Level of Service Impacts**

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project would cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that **Mitigation Measure 4.11.6.4C** is incorporated into the MMRP for the Project, and will be implemented as specified therein. However, the Council finds that even with application of these mitigation measures, existing (2016) cumulative with Project LOS impacts are considered significant and unavoidable.

Facts in Support of the Finding: According to Section 4.11 of the DEIR, an intersection LOS analysis was conducted to determine Opening Year (2016) Cumulative intersection performance. The addition of Project traffic to the Opening Year (2016) Cumulative scenario would result in conditions exceeding the established LOS standard at the following intersections: Moreno Beach Drive/SR-60 Eastbound Ramps (p.m. peak hour); Moreno Beach Drive/Cottonwood Avenue (p.m. peak hour); Moreno Beach Drive/Alessandro Avenue (p.m. peak hour); Redlands Boulevard/SR-60 Westbound Ramps (a.m. and p.m. peak hours); Redlands Boulevard/SR-60 Eastbound Ramps (a.m. and p.m. peak hours); Redlands Boulevard/Fir Avenue-Eucalyptus Avenue (a.m. and p.m. peak hours); Redlands Boulevard/Encilia

Avenue-Eucalyptus Avenue (p.m. peak hour); and Redlands Boulevard/Alessandro Boulevard (p.m. peak hour).

While these intersections are forecast to exceed satisfactory levels of service in Opening Year (2016) Cumulative with Project conditions, with the exception of the intersection of Redlands Boulevard/Eucalyptus Avenue-Fir Avenue and Redlands Boulevard/Encilia Avenue-Eucalyptus Avenue, these intersections already exceeded established LOS standards in the Opening Year (2016) Cumulative without-Project condition. Because the proposed Project would contribute to and would cause intersections to operate at unsatisfactory levels, mitigation is required.

Freeway mainline and ramp junctions were evaluated in the Opening Year 2016 Cumulative plus Project condition. The following segments are forecast to operate at an unsatisfactory level of service in the Opening Year 2016 Cumulative plus Project condition: SR-60 Eastbound: Pigeon Pass Road to Heacock Street (a.m. and p.m. peak hours); SR-60 Eastbound: Heacock Street to Perris Boulevard (a.m. and p.m. peak hours); SR-60 Eastbound: Perris Boulevard to Nason Street (a.m. and p.m. peak hours); SR-60 Westbound: Heacock Street to Perris Boulevard (a.m. and p.m. peak hours); SR-60 Westbound: Perris Boulevard to Nason Street (a.m. and p.m. peak hours); and SR-60 Westbound: Nason Street to Moreno Beach Drive (a.m. peak hour).

The Project would add to the existing unsatisfactory LOS on these six freeway segments; therefore, the addition of Project traffic would be considered a cumulative impact. Review of the RTIP indicates that there are no projects programmed on SR-60 within the study area. Furthermore, neither the Project applicant nor the City has jurisdiction over Caltrans facilities; therefore, implementation of improvements to the freeway mainline cannot be guaranteed. Furthermore, Caltrans does not have a mechanism for development projects to contribute to improvements on State Highways. Therefore, the cumulative impact to these segments of SR-60 would be significant and unavoidable.

d. Cumulative Transportation Impacts

Significant Unavoidable Impact: The EIR evaluated and concluded that the Project would have a cumulative significant impact to transportation.

Finding: Based on the entire record before us, this Council finds that this impact is potentially significant but will be reduced to the extent feasible through mitigation measures. The Council finds that Mitigation Measure 4.11.6.4C is incorporated into the MMRP for the Project, and will be implemented as specified

therein. However, the Council finds that even with application of these mitigation measures, cumulative transportation impacts are considered significant and unavoidable.

Facts in Support of the Finding: Cumulative impacts associated with traffic volumes are determined based the addition of traffic volumes from approved and pending projects in the area and projected traffic growth to existing traffic volumes. The cumulative analysis forecasts that, with the development of the proposed Project and the cumulative projects, eight intersections would require improvements in order to maintain the City's LOS standard of D.

Those intersections are as follows: Moreno Beach Drive/SR-60 Eastbound Ramps (p.m. peak hour); Moreno Beach Drive/Cottonwood Avenue (p.m. peak hour); Moreno Beach Drive/Alessandro Avenue (p.m. peak hour); Redlands Boulevard/SR-60 Westbound Ramps (a.m. and p.m. peak hours); Redlands Boulevard/SR-60 Eastbound Ramps (a.m. and p.m. peak hours); Redlands Boulevard/Fir Avenue-Eucalyptus Avenue (a.m. and p.m. peak hours); Redlands Boulevard/Encilia Avenue-Eucalyptus Avenue (p.m. peak hour); and Redlands Boulevard/Alessandro Boulevard (p.m. peak hour).

Although the suggested improvements are consistent with the City's General Plan, the Project will be responsible for contributing its fair share toward the funding of the future improvements via payment of the City's DIF. Of these eight affected intersections, five intersections are under the jurisdiction of the City of Moreno Valley.

Three intersections are under the jurisdiction of Caltrans. The improvements identified in **Mitigation Measure 4.11.6.4C** would reduce impacts at these intersections to a less than significant level. However, since the affected freeway ramp intersections are under the jurisdiction of Caltrans, neither the Project proponent nor the City has control over the specific timing of when the improvements would be constructed. It is anticipated that by opening year (2016), improvements at these intersections would not be constructed, as they are not currently planned for near-term construction. Therefore, this cumulative impact in opening year (2016) remains significant and unavoidable until such time as the improvements to this interchange are constructed by Caltrans, WRCOG, and the City of Moreno Valley through the TUMF process.

Because TUMF provides a mechanism for collecting fees from all development projects in the area that would contribute traffic to the existing roadway network, fees for the improvements to the affected freeway intersections would be collected. Therefore, it is anticipated that since these freeway intersection improvements are programmed into the TUMF program, such improvements would be constructed by

future year (2035) and would be able to accommodate future year (2035) traffic levels, resulting in a less than significant cumulative impact.

D. ADEQUACY OF THE RANGE OF PROJECT ALTERNATIVES

The EIR analyzed four alternatives to the Project as proposed, and evaluated these alternatives for their ability to meet the Project’s objectives as described in Section II.B above. CEQA requires the evaluation of a “No Project Alternative” to assess a maximum net change in the environment as a result of implementation of the Project. The No Project Alternative, referred to as the No Project/Existing Zoning Alternative, makes a reasoned assessment as to the future development of the subject site should the Project under consideration not be developed yet the site would be developed in a similar manner to the proposed Project and consistent with existing zoning for the site. A Reduced Intensity Alternative, a Commercial Center (mixed retail/office) Alternative, and an Off-site Alternative were also selected for analysis. CEQA requires the evaluation of alternatives that can reduce the significance of identified impacts and “feasibly attain most of the basic objectives of the proposed Project.” Thus, in order to develop a range of reasonable alternatives, the Project Objectives must be considered when this Council is evaluating the alternatives.

1. Alternative 1 – No Project/Existing Zoning Alternative

Description: The No Project/Existing Zoning Alternative (hereinafter referenced as the “No Project” Alternative), considers the environmental conditions that would occur if the subject site were developed consistent with its existing Specific Plan 208 zoning designation, consisting of an underlying land use of Business Park/Industrial. To allow for quantified comparison of potential impacts, the No Project Alternative was assumed to result in the development of approximately 1,420,000 square feet of industrial warehouse uses on approximately 63 acres and approximately 180,000 square feet of commercial service uses on approximately 8 acres as would be allowed under the existing zoning and land use designations. The commercial service component of this alternative would be located along the frontage of Perris Boulevard while the industrial warehouse uses would occupy the remaining portion of the site. (DEIR, pg. 6-12)

Impacts: The No Build Alternative, as referenced in Section 6.0 of the DEIR, would result in similar impacts when compared to the proposed Project. Similar to the Project, the No Build Alternative would result in less than significant impacts in the following areas: Aesthetics; Williamson Act Contracts/Agricultural Zoning and Forestry Resources; Biological Resources; Cultural Resources; Geology and Soils; Hazards and Hazardous Materials; Hydrology and Water Quality; Land Use; Mineral Resources; Noise; Population and Housing; Public Services; Recreation and Parks; and Utilities and Service Systems. The Project’s significant and unavoidable agricultural impacts, air quality impacts,

climate change and GHG impacts, and transportation impacts would also occur in the same manner as the proposed Project. However, under the No Build Alternative, potential air quality, climate change, and traffic/transportation impacts would be greater than the proposed Project because of the higher trip generation potential of the commercial uses.

Objectives: Under the No Build Alternative, the subject site would develop in a similar manner as the proposed Project, and most of the Project Objectives would be achieved. However, the objectives specifically oriented towards warehouse and industrial uses would be met at a reduced level due to the commercial component included in this Alternative.

Finding: Under the No Build Alternative, the Project site would be developed with approximately 1,420,000 square feet of industrial warehouse uses on approximately 63 acres and approximately 180,000 square feet of commercial service uses on approximately 8 acres. This Alternative would result in the same significant and unavoidable impacts associated with agricultural resources, air quality, climate change and greenhouse gases, and traffic that have been identified within the DEIR. However, potential air quality, climate change, and traffic/transportation impacts would be greater than the proposed Project because of the higher trip generation potential of the commercial uses. Because the No Build Alternative results in an increase in potential significant and unavoidable impacts in comparison to the proposed Project, the City Council hereby rejects the No Build Alternative.

2. Alternative 2 – Reduced Intensity Alternative

Description: The Reduced Intensity Alternative assumes the same general land use type as the Project, but at a development intensity scoped to reduce the extent of regional threshold exceedances for air pollution and greenhouse gas emissions that would otherwise result from the Project. In that the same type of development is proposed, most if not all the Project Objectives would be achieved to a certain extent but at a reduced level. Implementation of the Reduced Intensity Alternative would yield approximately 1,212,100 square feet of development, a reduction of approximately 25 percent or approximately 434,033 square feet, when compared to the approximately 1,616,133 square-foot Project analyzed in the EIR.

Impacts: Under the Reduced Intensity Alternative, impacts related to agricultural resources would be similar to the proposed Project as the same amount of land would be disturbed. Similarly, impacts related to short-term construction-related air quality would be similar to the proposed Project as the same amount of land would be disturbed and the same mix of equipment would be utilized. Because of the decrease in vehicle trips achieved under this alternative, impacts to the operation of local roadways and intersections

would be proportionally reduced from what was identified for the proposed Project; however, long-term traffic impacts to state freeway segments and merge/diverge areas would remain significant and unavoidable. Long-term operational-related air quality impacts would be reduced in magnitude when compared to the Project but would remain significant and unavoidable. Impacts associated with the generation of greenhouse gas emissions would also be reduced proportionate to the reduction in building area in comparison to the proposed Project, but would remain significant and unavoidable.

Objectives: The Reduced Intensity Alternative would, to some degree, realize the Project Objectives. However, because the scale of the development would be diminished under this Alternative, the resulting generation of sales tax, the number of jobs created, and potential second tier economic benefits to the City and region (e.g. wholesale/retail support sales; temporary and long-term construction jobs, and facilities maintenance employment opportunities) would likely be reduced when compared to the Project.

Finding: Under the Reduced Intensity Alternative, a light industrial warehouse/ distribution facility reduced by approximately 25 percent (or 434,033 square feet) would be realized as compared to the Project. The City Council hereby finds that the Reduced Intensity Alternative will not avoid or substantially reduce the significant and unavoidable agricultural resources impacts, construction and operational air quality impacts, and cumulative greenhouse gas impacts identified in the EIR. This Alternative would not meet Project Objectives to the same extent as the Project. Furthermore, the scale of the reduction in intensity would not maximize or realize the economic potential of the site. Based on the reduced scope of development, the Reduced Intensity Alternative would diminish capacities and capabilities to satisfy existing and projected unmet market demands within the trade area. The Reduced Intensity Alternative would also result in comparatively fewer opportunities to provide jobs, as compared to the Project. Therefore, the City Council rejects the Reduced Intensity Alternative on the basis that it fails to avoid or substantially reduce the significant and unavoidable impacts of the Project and does not meet the Project Objectives as well as the Project. The City Council also finds that each of these considerations constitutes a ground for rejecting this alternative that is independently sufficient to support the City Council's rejection of this alternative.

3. Alternative 3 - Commercial Center (Mixed Commercial/Office)

Description: As identified in Section 6.0 of the DEIR, the Commercial Center Alternative would result in the development of commercial service and office uses on the Project site. Although business and professional offices, financial institutions, and medical clinics are permitted in SP208, they are permitted only in the industrial support areas while commercial service-oriented uses are permitted throughout the

SP208 Industrial designation. For this reason, the General Plan and zoning designations for the site would need to be amended to accommodate the business and professional offices. Permitted commercial service uses include, but are not limited to, Automotive Sales/Rental/Leasing & Accessories, Automotive/Truck Repair, Business Supply/Equipment Sales/Rental & Services, and Repair Services. Approximately 760,000 square feet of commercial service uses would be developed on approximately 35 acres. The balance of the site (35 acres) would be developed with up to approximately 760,000 square feet of office uses.

Impacts: As identified in Section 6.0 of the DEIR, the Commercial Center Alternative would result in similar impacts for the following eight environmental issues: Agriculture and Forestry Resources; Biological Resources; Cultural Resources; Geology and Soils; Hazards and Hazardous Materials; Hydrology and Water Quality; Land Use and Planning; and Mineral Resources. Because of the increase in vehicle trips under this alternative, impacts to the operation of local roadways and intersections would be proportionally greater than what was identified for the proposed Project. Long-term traffic impacts to state freeway mainline segments and merge/diverge areas would remain significant and unavoidable. Under the Commercial Center Alternative, impacts related to short-term construction emissions would be similar to the proposed Project as the same amount of land would be disturbed and the same mix of equipment would be utilized. Long-term operational-related air quality emissions would be increased in magnitude because of the increase in vehicle trips when compared to the Project and would remain significant and unavoidable. Traffic-related noise would be increased in magnitude but would be similarly mitigated like the proposed Project and would remain less than significant.

Objectives: Under this alternative, some of the proposed Project objectives are not met as warehouse uses would not be built. However, development of this alternative would provide new employment opportunities for residents of Moreno Valley, but not within the industrial employment sector.

Findings: Under the Commercial Center Alternative, development of commercial service and office uses would occur. This Alternative would have similar impacts that have been identified within the DEIR. However, the Commercial Center Alternative would result in an increase in trip generation in comparison to the proposed Project, and would result in an increase in the severity of the significant and unavoidable impacts to construction and operational air pollution emissions, climate change and greenhouse gas emission, and traffic. The City Council finds that the Commercial Center Alternative would fulfill some but not all of the Project Objectives. Moreno Valley residents would have more opportunities for employment but a warehouse would not be built. Because the Commercial Center Alternative will not fulfill the primary objective of the Project and the severity of significant and unavoidable impacts would

be increased in comparison to the proposed Project, the Council hereby rejects the Commercial Center Alternative.

4. Alternative 4 - Off-Site Location

Description: As identified in Section 6.0 of the DEIR, this alternative would result in the same intensity of development of approximately 1,616,133 square feet of warehouse uses on approximately 70.3 acres. The alternative Project site identified by the City is bounded by Krameria Street (extended) to the north, vacant and partially developed property and March Air Reserve Base to the west, Indian Street to the east, and the Perris Valley Storm Drain and vacant land to the south. The off-site location is approximately 1.0 miles northwest of the Project site and is within the same Industrial Area Specific Plan as the proposed Project. This alternative off-site property is not owned or under the control of the applicant. The off-site location is currently zoned SP 208 I and is designated Business Park in the City's General Plan, identical to the proposed Project development of this site would not require soil import, inherently reducing impacts from air pollution emissions during construction.

Impacts: Section 6.0 of the DEIR, identifies nine environmental issues that would have similar impacts as the proposed Project. These issues are: Cultural Resources; Geology and Soils; Hydrology and Water Quality; Land Use and Planning; Mineral Resources; Population and Housing; Public Services; Recreation; and Utilities and Service Systems. With the Off-Site Location Alternative, impacts related to air quality and traffic impacts would be similar to those identified with the proposed Project. Short-term construction and long-term air quality operational and climate change/greenhouse gas emissions impacts under this alternative would remain significant and unavoidable and would result in similar conditions as identified for the proposed Project. Additionally, due to adjacent sensitive receptors, potential impacts to these receptors would be greater in magnitude when compared to the proposed Project. Similarly, noise impacts would be greater in magnitude due to the adjacent sensitive receptors. Operational traffic would result in increased traffic on vanity roadways and may impact different intersection and roadways in comparison to the proposed Project. Under this Alternative, impacts to agricultural resources would be eliminated.

Objectives: The Off-Site Alternative would meet most of the Project objectives. The location of the Off-Site Alternative further north of Harley Knox Boulevard would not meet the Project objectives of locating distribution services near transportation corridors and clustering such uses near the state highway system.

Finding: Under the Off-Site Alternative, development of the warehouse would occur in a different location. This Alternative would have similar impacts that have been identified within the DEIR. And most of the objectives of the proposed Project would be met, would not meet the Project objectives of locating distribution services near transportation corridors and clustering such uses near the state highway

system. The Council finds that the Off-Site Alternative would have similar impacts to all environmental issues except for agriculture because this Alternative would eliminate the significant and unavoidable impacts to agricultural resources.. Because the Off-Site Alternative will not substantially reduce the environmental impact of the Project and it would not meet the Project objectives of locating distribution services near transportation corridors and clustering such uses near the state highway system, the Council hereby rejects the Off-Site Alternative.

5. Alternatives Considered and Rejected

A variety of additional alternatives were considered as part of the DEIR's Alternatives Analysis. (DEIR, pgs. 6-3 through 6-5) Three possible alternatives were considered and rejected because they could not accomplish the basic objectives of the Project or they were considered infeasible. Per the *CEQA Guidelines* (Section 15126.6(c)), factors that may be considered when addressing the feasibility of alternatives include failure to meet most of the stated Project objectives, infeasibility, or inability to avoid significant environmental effects. The purpose of the proposed Project is to provide for and expand employment and revenue opportunities within the City of Moreno Valley. The proposed Project would expand employment options in a location that is convenient to existing transportation corridors, convenient to existing and future City residents and would augment the City's economic base. The following provides and discussion of the three development scenarios that were considered and rejected as potential alternatives to implementation of the proposed Project based on Section 15126.6 of the *CEQA Guidelines* because they did not feasibly attaining most of the basic objectives of the Project while reducing or avoiding any of the significant effects of the proposed Project:

- No Build Alternative: No development would take place within the Project limits and no impacts would occur. However, disallowing development of the site, as suggested by this alternative, would not fulfill the primary objectives of the proposed Project and the site would likely be developed in accordance with existing zoning should the Project not move forward. Retention of the Project site in its current condition would not expand employment opportunities to residents of the City. Retaining the site in its current undeveloped condition would not generate the revenue (e.g., property tax) that could augment the City's current revenue stream. Therefore, the No Build Alternative was rejected from further consideration in the EIR.
- Residential Alternative: The Residential Alternative would develop the 71-acre Project site with approximately 355 single-family units based on the City's R5 zone. The R5 zone was utilized as this is the zoning designation of the nearest residential uses to the north along Perris Boulevard

and north of the Perris Valley Storm Drain channel. A zone change, General Plan Amendment, and Specific Plan Amendment would be required for this alternative to change the Project site from its existing Business Park/Light Industrial (BP) General Plan designation and Industrial Area Plan (SP208 I) zoning designation to a residential R5 designation. Furthermore, a Specific Plan Amendment would be required to remove the Project site from the underlying Industrial Specific Plan 208. Since the Residential Alternative consists only of residential uses, employment-generating opportunities would not occur aside from temporary construction work, which would be filled predominantly by those already residing in the area. The residential uses would produce demand for public services that would exceed the amount of municipal revenues it would generate. The Project's full potential to utilize the area's close proximity to various freeways and transportation corridors would not be realized as only residential uses would occur under the Residential Alternative. Additionally, the development of the entire 71-acre Project site under this alternative would result in the placement of the residential uses within an area planned for industrial uses which could result in additional adverse impacts such as exposure to air pollutants, noise, and land use incompatibilities. This alternative has been rejected because it would result in greater impacts and would not satisfy the basic City employment generating objectives for development of the Project site.

- Mixed Commercial/Residential Alternative: The Mixed Commercial/Residential Alternative would develop the 71-acre Project site with approximately 690,000 square feet of Community Commercial uses and 532 multiple-family units. A zone change, General Plan Amendment, and Specific Plan Amendment would be required for this alternative to change the Project site from its existing Business Park/Light Industrial (BP) General Plan designation and SP208 I zoning designation to a residential designation and commercial designation. Additionally, a Specific Plan Amendment would be required to remove the Project site from the underlying Industrial Specific Plan 208. While the commercial component of this Alternative would utilize the Project site's close proximity to nearby transportation corridors, the development of the remainder of the site with residential uses would not provide the varied employment and service uses and revenue associated with the proposed Project. The development of approximately half of the Project site under this alternative with residential uses would result in the placement of the residential uses adjacent to SP208 I industrial/business park uses which could potentially result in additional adverse impacts such as exposure to air pollutants, noise, and land use incompatibilities. The residential component of this alternative would produce demand for public services that would exceed the amount of municipal revenues it would generate, and there would be little to no

employment opportunities created. Therefore, the mixed commercial/residential alternative would not meet the Project objectives of providing new employment and revenue generation options in close proximity to local consumers to the same degree as the proposed Project. The employment opportunities and economic benefits derived from the proposed Project are superior to the Mixed Commercial/Residential Alternative. This alternative has been rejected because it would result in greater impacts and would not satisfy the basic City employment generating objectives for development of the Project site.

6. Environmentally Superior Alternative

As explained by Section 6.0 in the DEIR, Alternative 2 (Reduced Intensity Alternative) reduces the severity of Project related air quality impacts. However, long-term air quality impacts, would remain significant after mitigation for this alternative for ROG, NO_x, PM₁₀ and PM_{2.5}. In a similar manner, Alternative 2 would reduce the volume of daily traffic trips when compared to the proposed Project; however, such impacts to state freeway mainline segments and merge/diverge areas would remain significant and unavoidable until freeway improvements are completed by the state. Alternative 2 would also reduce the quantity of greenhouse gas emission when compared to the proposed Project; however, impacts to Climate Change would remain significant and unavoidable. The remaining environmental issues would ultimately be similar to the proposed Project through adherence to existing standards and mitigation measures. Based on the analysis in Section 6.0 and the summary contained in Table 6.K, Alternative 2, the Reduced Intensity Alternative, is the environmentally superior alternative. The amount of development under this alternative would be reduced when compared to the proposed Project; however, the Alternative 2 would not satisfy several of the Project objectives because it would reduce the level at which it meets the employment generating Project objectives. Because the Reduced Intensity Alternative allows the development of warehouse uses and the provision of new employment opportunities, it meets many of the City's stated Project objectives, while at the same time reduces the impacts associated with the proposed Project. However, because of the lower industrial density, the Alternative fails to meet several key employment generating objectives related to density efficiencies in the same manner as the proposed Project.

E. GROWTH-INDUCING IMPACTS

CEQA requires a discussion of ways in which the proposed Project could be growth inducing. Specifically, CEQA Guidelines Section 1512602(d) states that an EIR must describe the ways

in which the proposed Project could foster economic or population growth, or the construction of additional housing, either directly or indirectly, in the surrounding environment.

Section 5.0 of the DEIR identifies the extent to which the new jobs created by a Project are filled by existing residents is a factor that tends to reduce the growth inducing effect of a Project. Construction of the proposed Project will create short-term construction jobs. Due to the existing high unemployment levels that exist in the City, the potential exists for these short-term positions to be filled by workers who, for the most part, reside in the City or neighboring communities to the Project area. Therefore, construction of the proposed Project will not generate a permanent increase in population within the Project area.

As previously identified, the proposed Project is expected to employ 646 people. These full-time positions are also anticipated to be filled by workers who, for the most part, reside in the Project area due to high unemployment levels that exist in the City. Operations of the proposed Project will not generate a permanent increase in population within the Project area.

The area surrounding the Project site is governed by the City of Moreno Valley General Plan and the area is guided by Specific Plan 208. Specific Plan 208 guides land use within the Project area to ensure that new development and redevelopment is implemented consistent with the land use policies, controls, and standards contained in Specific Plan 208. Any development of remaining undeveloped land adjacent to the Project site would require its own discretionary approvals and is not reliant on the proposed Project. However, development of the Project site may lead to indirect growth in the Specific Plan area by making available the extension of infrastructure such as water, sewer, drainage, etc. This growth has been planned for and is guided by Specific Plan 208.

The proposed Project would occur within an area currently designated for industrial uses. The proposed Project would not require a General Plan Amendment nor does it require a change in the underlying zoning designation. In addition, the Project reflects the City of Moreno Valley's vision for the area and is consistent with Specific Plan 208. Land uses surrounding the Project site would be in conformance with the City's General Plan and Specific Plan 208. Impacts to population and housing are less than significant; see Section 13 Population and Housing of the Initial Study (Appendix A of the DEIR).

The proposed Project would not eliminate a constraint for development of an approved Project within the City of Moreno Valley. There are no projects in the City of Moreno Valley or surrounding cities that have been approved but are conditioned or dependent on additional improvements

at the Project site. Specific Plan 208 guides land uses surrounding the Project site to ensure compatibility between existing operations and adjacent surrounding development. Additionally, the proposed Project would not add capacity to urban services or infrastructure that would be utilized by other Project proponents in the surrounding area.

The proposed Project would not result in any significant pressure to redevelop the area around the Project site at a higher density. As previously stated, the development of remaining undeveloped land adjacent to the Project site is independent and not reliant on the proposed Project. Therefore, implementation of the proposed Project would not result in redevelopment of adjacent lands at a higher intensity than already prescribed in the City of Moreno Valley's General Plan and Specific Plan 208.

F. SIGNIFICANT IRREVERSIBLE ENVIRONMENTAL CHANGES

Public Resources Code Section 21100(b)(2)(B) and CEQA Guidelines Sections 15126(c), 15126.2(c), and 15127, require that for certain types or categories of projects, an EIR must address significant irreversible environmental changes that would occur should the Project be implemented. As presented at CEQA Guidelines Section 15127, the topic of Significant Irreversible Environmental Changes needs to be addressed in EIRs prepared in connection with any of the following activities:

- (a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency;
- (b) The adoption by a local agency formation commission of a resolution making determinations; or
- (c) A Project which will be subject to the requirements for preparing of an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969, 42 U.S.C. Sections 4321-4347.

The Project does not trigger any of the conditions cited in Guidelines §15127. Nonetheless, this EIR analysis addresses any significant irreversible environmental changes which would be involved in the proposed action should it be implemented [Guidelines, Sections 15126(e) and 15127]. An impact would fall into this category if:

- The Project would involve a large commitment of nonrenewable resources;

- The primary and secondary impacts of the Project would generally commit future generations of people to similar uses;
- The Project involves uses in which irreversible damage could result from any potential environmental incidents associated with the Project; and/or
- The proposed consumption of resources is not justified (e.g., the Project could waste energy).

Determining whether the proposed Project may result in significant irreversible effects requires a determination of whether key resources would be degraded or destroyed in such a way that there would be little possibility of restoring them. The Project site is generally fallow agricultural land with the site historically used for sod farming operations. However, as identified within the City's General Plan, the City anticipates the eventual conversion of agricultural uses to urban uses and the proposed Project would permanently alter the site by converting predominantly agricultural uses to urban uses. This is a significant irreversible environmental change that would occur as a result of Project implementation. Because no significant mineral resources were identified within the Project limits, no significant impacts related to these issues would result from development of the Project site. Natural resources in the form of construction materials would be utilized in the construction of the proposed Project and energy resources in the form of electricity and natural gas would be used during the long-term operation of the Project; however, their use is justified in supporting the City's planned use of the site and is not expected to negatively impact the availability of these resources.

In addition, this industrial warehouse Project, in concert with the other built or approved industrial warehouse projects, will fundamentally change the character and land use pattern of this portion of the City. Many of the Project-specific impacts are addressed, as outlined above, but the change in the use of the land from agricultural to industrial represents a substantial irreversible change for this area. However, this is an intended change as verified by the City's General Plan land use designations and zoning for the area. (DEIR pgs. 5-2 and 5-3)

VI. STATEMENT OF OVERRIDING CONSIDERATIONS

The Moreno Valley City Council adopts this Statement of Overriding Considerations with respect to the significant unavoidable impacts associated with adoption of the Project as addressed in the EIR, specifically:

1. Aesthetics - Scenic Vistas;
2. Aesthetics - Scenic Resources and Scenic Highways;
3. Aesthetics - Existing Visual Character or Quality of Site and its Surroundings;
4. Aesthetics – Cumulative;
5. Agricultural Impacts - Conversion of State Designated Farmland;
6. Agricultural Impacts - Conversion of Farmland to a Non-Agricultural Use;
7. Agricultural Impacts - Cumulative;
8. Air Quality Impact - Air Quality Management Plan Consistency;
9. Air Quality Impact - Equipment Exhaust from Construction-Related Activities;
10. Air Quality Impact - Architectural Coatings;
11. Air Quality Impact - Long-Term Project-Related Emissions;
12. Air Quality Impact - Project-Related Localized Operational Emissions;
13. Air Quality Impact - Cumulative;
14. Land Use and Planning Impact - Conflict with Applicable Land Use Plans, Policies, or Regulations;
15. Land Use and Planning - Impact Cumulative;
16. Transportation Impact - Existing With Project Conditions (Intersection) Traffic and Level of Service;

17. Transportation Impact - Opening Year With Project Conditions (Intersection) Traffic and Level of Service;
18. Transportation Impact - Opening Year 2016 Cumulative With Project Conditions (Intersection) Traffic and Level of Service; and
19. Transportation Impact – Cumulative.

The Moreno Valley City Council hereby declares that, pursuant to CEQA Guidelines Section 15093, the City Council has balanced the benefits of the proposed Project against any significant and unavoidable environmental impacts in determining whether to approve the proposed Project. If the benefits of the proposed Project outweigh the unavoidable adverse environmental impacts, those impacts are considered “acceptable.”

The City Council hereby declares that the EIR has identified and discussed significant effects that may occur as a result of the Project. With the implementation of the mitigation measures discussed in the EIR, these impacts can be mitigated to a level of less than significant except for the unavoidable and significant impacts discussed in Section V(C) herein.

The City Council hereby declares that it has made a reasonable and good faith effort to eliminate or substantially mitigate the potential impacts resulting from the Project.

The City Council hereby declares that to the extent any mitigation measures recommended to the City are not incorporated, such mitigation measures are infeasible because they would impose restrictions on the Project that would prohibit the realization of specific economic, social, and other benefits that this City Council finds outweigh the unmitigated impacts.

The City Council further finds that except for the Project, all other alternatives set forth in the EIR are infeasible because they would prohibit the realization of the Project objectives and/or specific economic, social or other benefits that this City Council finds outweigh any environmental benefits of the alternatives or the other alternatives do not substantively reduce the severity of unavoidable and significant impacts.

The City Council hereby declares that, having reduced the adverse significant environmental effects of the Project, to the extent feasible by adopting the proposed mitigation measures, having considered the entire administrative record on the Project and having weighed the benefits of the Project against its unavoidable significant impact after mitigation, the City Council has determined that the social,

economic and environmental benefits of the Project outweigh the potential unavoidable significant impacts and render those potential significant impacts acceptable based on the following considerations:

- The Project will provide development consistent municipal standards, codes and policies;
- The Project provides development that improves and maximizes economic viability of a vacant site by transitioning the Project site into a productive light industrial use;
- The Project creates additional employment-generating opportunities for the City of Moreno Valley and surrounding communities; and
- The Project provides adequate infrastructure and public amenities, including upgrading and widened streets, signal upgrades and utility improvements.

As the CEQA Lead Agency for the proposed action, the City of Moreno Valley has reviewed the Project description and the alternatives presented in the EIR, and fully understands the Project and Project alternatives proposed for development. Further, this Council finds that all potential adverse environmental impacts and all feasible mitigation measures to reduce the impacts from the Project have been identified in the Draft EIR, the Final EIR and public testimony. This Council also finds that a reasonable range of alternatives was considered in the EIR and this document, Section V(E) above, and finds that approval of the Project is appropriate.

This Council has identified economic and social benefits and important policy objectives, Section V above, which result from implementing the Project. The Council has balanced these substantial social and economic benefits against the unavoidable significant adverse effects of the Project. Given the substantial social and economic benefits that will accrue from the Project, this Council finds that the benefits identified herein override the unavoidable environmental effects.

California Public Resource Code 21002 provides: “In the event specific economic, social and other conditions make infeasible such Project alternatives or such mitigation measures, individual projects can be approved in spite of one or more significant effects thereof.” Section 21002.1(c) provides: “In the event that economic, social, or other conditions make it infeasible to mitigate one or more significant effects of a Project on the environment, the Project may nonetheless be approved or carried out at the discretion of a public agency...” Finally, California Administrative Code, Title 4, 15093 (a) states: “If the benefits of a proposed Project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered „acceptable.””

The City Council hereby declares that the foregoing benefits provided to the public through approval and implementation of the Project outweighs the identified significant adverse environmental impacts of the Project that cannot be mitigated. The City Council finds that each of the Project benefits outweighs the unavoidable adverse environmental impacts identified in the EIR and, therefore, finds those impacts to be acceptable.

Facts in Support of the Finding (Overriding Considerations). The ProLogis project has four overriding considerations: (1) development consistent with City standards; (2) economic viability; (3) employment generation; and (4) infrastructure improvements.

(1) Consistency with City Goals. The City's Development Review process will assure the proposed development is consistent with the City's General Plan, zoning, and Municipal Code upon approval of the requested General Plan Amendment, Zone Change, and other development applications. The analysis in the DEIR indicates the ProLogis project is generally consistent with the following development goals of the City's General Plan and the requirements of the City zoning code and municipal code for the five environmental issues that were determined to be significant even after implementation of proposed mitigation:

- **DEIR Section 4.1 Aesthetics - Consistency with General Plan Policies.** The project is consistent with Objective 2.5 and Policy 2.5.1 by providing industrial uses near SR-60 and within the FAR limits outlined. The project does not appear to be fully consistent with Policies 2.5.2 and 2.5.3 because it places industrial uses adjacent to lower density residential uses without the typical buffering land uses (e.g., higher density residential or business park). The project is consistent with Policy 2.5.4 as it precludes industrial traffic through residential areas by eliminating Quincy Street south of the new Eucalyptus Avenue road alignment and eliminating the new Encilia Avenue (old Eucalyptus Avenue) west of the Quincy Channel. The project is generally consistent with Objective 2.10 and Policies 2.10.1 through 2.10.5 by providing detailed architectural and landscaping themes for the proposed buildings and grounds, including adjacent to SR-60. The project is consistent with Policies 2.10.7 and 2.10.8 relative to lighting, although the tower accent features at the corners of the buildings may produce new off-site glare. The project appears to be consistent with Policy 2.10.9 as its fences and walls will incorporate landscaping and materials designed to reduce graffiti (see design details in DEIR Appendix K). The project may not be fully consistent with Policy 2.10.11 in terms of buffering for nearby residential uses, although it does comply with the new Municipal Code requirement of a 250-foot

buffer between industrial and residential uses. Policies 2.10.12 and 2.10.13 require screening for parking areas and the project is consistent with that policy.

- **DEIR Section 4.1 Aesthetics -Consistency with Municipal Code Requirements.** The previous analysis indicates the project is not consistent with Objective 7.7 and Policies 7.7.4 and 7.7.5 as it does not fully preserve significant views and vistas, including those along SR-60. Signage will be consistent with Municipal Code requirements so it is consistent with Policy 7.7.3. Finally, the project appears to be consistent with the various Municipal Code requirements for the proposed land uses outlined in Section 4.1.2 related to landscaping, setbacks, parking, storage, etc.
- **DEIR Section 4.2 Agriculture – Consistency with General Plan Policies -** The Moreno Valley General Plan policies and zoning designations support agriculture only as an interim use, and no land in the City is designated solely for agricultural use or for agricultural preservation. Despite this, the proposed zone change would conflict with the existing zone and Primary Animal Keeping Overlay (PAKO) designation for this portion of the project site; however, this change would remove less than one percent of the PAKO-designated land and would not represent a significant loss of land under this overlay designation. Based on the recent trends of urban development in the City, development pressures will eventually lead to the conversion of agricultural land in the City to suburban uses.

The City’s General Plan recognizes that these conversions will eventually occur, and the proposed project is a demonstration of that trend. The proposed project would result in the conversion of Prime Farmland, development of this site and the surrounding area is consistent with the long-term vision of the City as outlined in the General Plan. The Moreno Valley General Plan policies support agriculture as an interim use, and no land in the City is designated for agricultural preservation.

- **DEIR Section 4.3 Air Quality – Consistency with General Plan Policies –** Chapter 9 of the City’s General Plan defines goals and policies related to air quality within the City of Moreno Valley. The specific policies of the General Plan that are relevant to the proposed project are as follows:
 - *Objective 6.7: Reduce mobile and stationary source air pollutant emissions.*

- **Policy 6.7.1:** *Cooperate with regional efforts to establish and implement regional air quality strategies and tactics.*
- **Policy 6.7.5:** *Require grading activities to comply with South Coast Air Quality Management District's Rule 403 regarding the control of fugitive dust.*
- **Policy 6.7.6:** *Require building construction to comply with the energy conservation requirements of Title 24 of the California Administrative Code.*

The proposed project site is located in an urbanizing area of the City along SR-60 which accommodates traffic in the area. In addition, the proposed warehouse uses would be within walking distance of existing homes and commercial areas in the local vicinity. The proposed project will incrementally reduce overall vehicle miles traveled (VMT) in the region by introducing employment into an area (i.e., the City of Moreno Valley) with a low jobs/housing ratio as monitored by the Southern California Association of Governments (SCAG). This reduction in VMT will consequently reduce air pollutant emissions so the project is consistent with City General Plan Objective 6.7 and Policies 6.7.1. Mitigation Measures 4.3.6.2A through 2M to control dust, and Mitigation Measure 4.3.6.5B requires the project to exceed Title 24 energy conservation requirements, so the project is consistent with General Plan Policies 6.7.5 and 6.7.6.

- **DEIR Section 4.8 Land Use and Planning – Consistency with General Plan Policies –** Section 9.2.2 Community Development of the General Plan contains the following goals and objectives:
 - *Goal 2.1: A pattern of land uses which organizes future growth, minimizes conflicts between land uses, and which promotes the rational utilization of presently underdeveloped and undeveloped parcels.*
 - *Goal 2.2: An organized, well-designed, high quality, and functional balance of urban and rural land uses that will meet the needs of a diverse population, and promote the optimum degree of health, safety, well-being, and beauty for all areas of the community, while maintaining a sound economic base.*
 - *Objective 2.1: Balance the provision of urban and rural lands within Moreno Valley by providing adequate land for present and future urban and economic development needs, while retaining the significant natural features and the rural character and lifestyle of the northeastern portion of the community.*

- *Objective 2.5: Promote a mix of industrial uses which provide a sound and diversified economic base and ample employment opportunities for the citizens of Moreno Valley with the establishment of industrial activities that have good access to the regional transportation system, accommodate the personal needs of workers and business visitors; and which meets the service needs of local businesses.*
- *Policy 2.5.1: The primary purpose of areas designated Business Park/Light Industrial is to provide for manufacturing, research and development, warehousing and distribution, as well as office and support commercial activities. The zoning regulations shall identify the particular uses permitted on each parcel of land. Development intensity should not exceed a Floor Area Ratio of 1.00 and the average floor area ratio should be significantly less.*
- *Policy 2.5.2: Locate manufacturing and industrial uses to avoid adverse impacts on surrounding land uses.*
- *Policy 2.5.3: Screen manufacturing and industrial uses where necessary to reduce glare, noise, dust, vibrations and unsightly views.*
- *Policy 2.5.4: Design industrial development to discourage access through residential areas.*

In addition, General Plan Section 9.6.2 Safety Element contains the following applicable objective:

- *Objective 6.6: Promote land use patterns that reduce daily automotive trips and reduce trip distance for work, shopping, school, and recreation.*

The City's adopted General Plan Land Use Map designations for the existing project area largely reflect the existing land use pattern. The northern portion of the proposed project site is designated Business Park/Light Industrial, while the southern area, south of proposed Eucalyptus Avenue, is designated Residential in the City's General Plan. The primary purpose of areas designated Business Park/Light Industrial is to provide for manufacturing, research and development, warehousing and distribution, as well as office and support commercial activities.¹⁸ The proposed project is not consistent with the current General Plan and zoning, and includes a General Plan Amendment (and related Zone Change) so the project will be consistent with the General Plan. Impacts relative to the City's Primary Animal Keeping Overlay (PAKO) are addressed in the discussion of DEIR Section 4.2 Agriculture.

¹⁸ Moreno Valley General Plan. *Chapter 9 Goals and Objectives. Policy 2.5.1.* Pg. 9-7.

General Plan Objective 2.1 and Policy 2.5.1 require a transition of buffer of land uses between residential and industrial uses. In this area, the R5 and R15 zone areas in the southern portion of the site act as a buffer from the BP uses near the freeway and the RA2 residential uses. It should be noted that, while there is an existing transition of land uses from BP to R2 in the vicinity of the project site, it is not the function of either the R-5 or R-15 zones to act as a buffer between non-residential land uses and low density residential uses.

The project provides light industrial uses close to freeway access that will generate short- and long-term employment for the City while minimizing conflicts with existing residential land uses to the southeast through planned changes in the circulation network, so it is consistent with Land Use Goals 2.1 and 2.2, Objectives 2.1 and 2.5, Policies 2.5.1 through 2.5.4, and Safety Objective 6.6. In addition, the proposed project is generally consistent with SR-60 East Corridor Study and can accommodate limited expansions of the Moreno Valley Auto Mall if necessary in the next two years.

- Relative to the City's Housing Element, the proposed project would result in the loss of potential housing units as the General Plan Amendment (GPA) and Zone Change (ZC) request a change to industrial uses. Development of the site as proposed could eliminate as many as 681 housing units from the site, with 80 percent of those units (548) at a density that is generally accepted as helping to promote housing affordability (15 units per acre) on a regional level. The loss of the (max) potential 548 units (R-15 land) from the proposed project would reduce the total potential affordable units from 20,894 to 20,346 or still 2.7 times the RHNA number. The proposed project would not reduce the City's potential pool of affordable housing to below its RHNA number; therefore, it would not create a significant impact related to the City's Housing Element.
- **DEIR Section 4.8 Land Use and Planning – Consistency with the Municipal Code.** Section 9.05, Industrial Districts, of the City Municipal Code requires a minimum 250-foot buffer between residential uses and truck activity areas of industrial uses. The site plan of the proposed project provides a buffer of almost 400 feet from the closest residence to the southeast, so the project is consistent with this adopted land use buffer requirement.

- **DEIR Section 4.11 Transportation – Consistency with General Plan Policies** – The project is consistent with Community Development Policy 2.2.17 because the proposed amendment to the Circulation Element will prevent industrial traffic from traveling through existing residential areas southeast of the site. The project is also consistent with most of the relevant policies of the Circulation Element, including: providing adequate emergency access (Policy 5.1.1); minimizing traffic conflicts (Policies 5.1.2, 5.5.3, and 5.5.4); providing adequate off-street parking (Policy 5.1.3), ADA and Title 24 consistency (Policy 5.1.5); promoting through access (Policies 5.1.6, 5.2.2, 5.3.1, and Objective 5.5); mitigating project-related traffic impacts (Policy 5.5.8); allow for bicycle, pedestrian, and non-vehicular access options (Objective 5.8 and Policy 5.8.4, Objective 5.10 and Policy 5.10.1, Objective 5.11 and Policies 5.11.1 and 5.11.2); and using safe project design procedures (Policies 5.5.5, 5.5.9, and 5.5.10) plus applicable Municipal Code requirements.

The project is not fully consistent with Objective 5.2 which requires Level of Service C or roadways or Level of Service D on local freeway segments, but will make improvements, pay City Development Impact Fees, and make contributions to the County’s Traffic Uniform Mitigation Fee (TUMF) program to offset project impacts, which is consistent with City Policies 5.3.5, 5.3.6, and 5.3.7).

(2) Economic Viability. ProLogis estimates the project would result in a property tax increase from \$282,058 in 2013 to \$1.4 million at project buildout, representing an increase of \$1.2 million. Although a fiscal/economic study was not prepared for the ProLogis project, a comprehensive fiscal study was recently prepared by David Taussig and Associates (DTA¹⁹) for 41 million square feet of logistics warehousing proposed east of the ProLogis project site. This study indicated that logistics warehousing in Moreno Valley generates a surplus of City revenues versus costs. Since the ProLogis project is also logistics warehousing, it is reasonable to assume similar ratios of revenues and costs as outlined in the DTA study. Based on data in the DTA study, the ProLogis project could be expected to generate a surplus of approximately \$330,000 per year to the City at buildout.²⁰ This estimate is supported by data from a

¹⁹ “Fiscal and Economic Impact Study for the World Logistics Center Specific Plan.” David Taussig and Associates, Inc. January 15, 2013. See Appendix C.

²⁰ The DTA 2013 study estimated a surplus of \$6 million for 41 million square feet of logistics warehousing in the City, so the ProLogis project (2.25 million square feet) would generate a surplus of approximately \$330,000 using similar data and assumptions. See Appendix A.

similar fiscal study prepared for a recent warehouse project in the City of Perris²¹. That study estimated 1.7 million square feet of warehousing would generate an annual surplus of \$216,500 which would equal \$331,000 if a similar cost/revenue ratio was applied to the proposed ProLogis project²².

(3) Employment Generation. ProLogis estimates the project would generate a need for approximately 1,400 temporary construction—related workers²³ and approximately 600 permanent full-time employee positions at buildout of the proposed warehousing.

(4) Traffic and Infrastructure Improvements. The DEIR²⁴ indicated that the ProLogis project would produce an estimated 4,408 or 37 percent fewer Passenger Car Equivalent or PCE trips per day compared to the site as presently zoned (7,527 trips for ProLogis compared to 11,935 trips under current zoning). Note the PCE calculation takes into account large trucks in the vehicle mix.

ProLogis estimates the proposed project would pay approximately \$4.5 million for onsite road improvements including mainly Eucalyptus Avenue as an arterial street. In addition, ProLogis will provide \$9.2 million in Development Impact Fees (DIFs) to the City and other agencies in the following categories:

- * Moreno Valley Unified School District school impact fees
- * Arterial Streets
- * Traffic Signals
- * Interchange Improvements
- * Fire Facilities
- * Police Facilities
- * City Hall
- * Corporate Yard
- * Maintenance Equipment
- * Transportation Uniform Mitigation Fee (TUMF-separate from DIF)(see below)
- * Multi-Species Habitat Conservation Plan (MSHCP-County)
- * Riverside County Area Drainage Fee
- * Stephen’s Kangaroo Rat Habitat Conservation Plan Fee (SKR HCP)
- * SR-60/Moreno Beach Drive/Redlands Blvd. Improvement Fee

²¹ Andrew Chang and Company, LLC. Stratford Ranch Industrial Development, Fiscal and Economic Impacts, City of Perris. September 2012. See Appendix D.

²² \$216,500 for 1.7 million square feet (Stratford Ranch) is equal to \$331,000 for 2.6 million square feet (ProLogis).

²³ Estimate of construction-related employees generated by the ProLogis Ontario project, May 2014. See Appendix B.

²⁴ ProLogis trip generation on DEIR Table 4.11.E, page 4.11-15, and existing zoning trip generation outlined on Table 6.B, page 6-9.

- * Fair Share for DIF and TUMF improvements per project traffic study
- * Santa Ana Watershed Authority (SAWA) mitigation for Quincy Channel impacts
- * Eastern Municipal Water District (various – water, sewer, landscaping, etc.)

The ProLogis project will also make a variety of improvements (e.g., utilities, streets) both onsite and in the surrounding area, and offsite improvements, or contributions to needed roadway and intersection improvements, are shown below as summarized from the project Traffic Impact Assessment²⁵ and as outlined in Mitigation Measures 4.11.6.4A-4F:

Make Improvements or Fully Fund Before Project Opening

- Redlands Boulevard/SR-60 Westbound Ramps – Install traffic signal.
- Redlands Boulevard/Fir Avenue/Eucalyptus Avenue – Install a traffic signal, add a northbound left-turn lane, and add a southbound left-turn lane.
- Moreno Beach Drive/SR-60 Eastbound Ramps – TUMF fee includes interchange.

Make a Fair Share Contribution (Year 2016 Impacts)

- Moreno Beach Drive/SR-60 Eastbound Ramps – TUMF fee contributes to a planned interchange upgrade.
- Moreno Beach Drive/Cottonwood Avenue – DIF fee contributes to the addition of a southbound through lane.
- Moreno Beach Drive/Alessandro Blvd. – DIF fee contributes to the addition of a southbound through lane.
- Redlands Blvd./SR-60 Westbound Ramps – DIF and TUMF fees contribute to installation of a traffic signal and add a northbound through lane.
- Redlands Blvd./SR-60 Eastbound Ramps – TUMF fee contributes to improvement costs.
- Redlands Blvd./Fir Avenue/Eucalyptus Avenue – DIF fee contributes to installation of a traffic signal, adding a westbound right-turn lane, and adding an eastbound left-turn lane. TUMF fee will cover installation of a northbound left-turn lane and a southbound through lane.
- Redlands Blvd./Eucalyptus Avenue – TUMF fee contributes to the addition of a southbound right-turn lane.
- Redlands Blvd./Alessandro Blvd. – TUMF fee contributes to the addition of a southbound left-turn lane.

²⁵ LSA Associates, Inc. April 24, 2012 as summarized in the ProLogis Draft EIR Section 4.15, Transportation and Traffic.

Make a Fair Share Contribution (Year 2035 Impacts)

- Nason Street/Eucalyptus Avenue – DIF fee will contribute to installation of a northbound right-turn lane and restriping the westbound approach to provide dual left-turn lanes.
 - Nason Street/Alessandro Blvd. – DIF fee will contribute to installation of an eastbound through lane, westbound through lane, and overlap phasing for the eastbound right-turn lane.
 - Moreno Beach Drive/SR-60 Westbound Ramps – TUMF fee contributes to improvements.
 - Moreno Beach Drive/SR-60 Eastbound Ramps – TUMF fee contributes to improvements.
 - Moreno Beach Drive/Eucalyptus Avenue – DIF fee contributes to traffic signal and various lane improvements/restriping.
 - Moreno Beach Drive/Cottonwood Avenue – DIF fee contributes to addition of a southbound lane.
 - Moreno Beach Drive/Alessandro Blvd. – DIF fee contributes to various lane improvements and restriping.
 - Redlands Blvd./SR-60 Westbound Ramps – DIF fee contributes to installation of a traffic signal.
 - Redlands Blvd./SR-60 Eastbound Ramps – TUMF fee contributes to various interchange improvements at this location.
 - Redlands Blvd./Fir Avenue/Eucalyptus Avenue – DIF and TUMF fees contribute to installation of a traffic signal and various lane improvements.
 - Redlands Blvd./Eucalyptus Avenue – DIF and TUMF fees contribute to installation of a traffic signal and various lane improvements.
 - Redlands Blvd./Alessandro Blvd. - DIF and TUMF fees contribute to installation of a traffic signal and various lane improvements.
- **Make a Fair Share Contribution (General Plan Buildout Impacts)(In addition to 2035)**
 - Nason Street/Eucalyptus Avenue – DIF fee will contribute to installation of a northbound right-turn lane and eastbound right-turn lane.
 - Nason Street/Alessandro Blvd. – DIF fee will contribute to installation of an eastbound left-turn lane and traffic signal improvements,
 - Moreno Beach Drive/Eucalyptus Avenue – DIF fee contributes to various lane improvements/restriping.

- Moreno Beach Drive/Cottonwood Avenue – DIF fee contributes to addition of a southbound lane.
- Moreno Beach Drive/Alessandro Blvd. – DIF fee contributes to various lane improvements and restriping.
- Auto Mall Drive/Eucalyptus Avenue – DIF fee contributes to installation of a traffic signal.
- Redlands Blvd./Alessandro Blvd. - DIF and TUMF fees contribute to installation of various lane improvements.

If the Encilia Avenue/Quincy Street Connection is Approved, the project will make the following improvements:

- Moreno Beach Drive/Eucalyptus Avenue – DIF fee will contribute to installation of various lane improvements and restriping.
- Redlands Blvd./Fir Avenue/Eucalyptus Avenue – Fair share contribution toward the addition of a southbound right-turn lane.
- Redlands Blvd./Encilia Avenue/Eucalyptus Avenue – DIF and TUMF fees contribute to installation of a traffic signal and various lane improvements.
- Moreno Beach Drive/Encilia Avenue - DIF fee contributes to installation of a traffic signal and various lane improvements.

VII. CERTIFICATION OF THE FINAL ENVIRONMENTAL IMPACT REPORT

The Moreno Valley City Council finds that it has reviewed and considered the FEIR in evaluating the Project, that the FEIR is an accurate and objective statement that fully complies with CEQA and the CEQA Guidelines, and that the FEIR reflects the independent judgment of the City Council.

The City Council declares that no new significant information as defined by CEQA Guidelines Section 15088.5 has been received by the City Council after the circulation of the DEIR that would require recirculation. All of the information added to the FEIR merely clarifies, amplifies or makes insignificant modifications to an already adequate DEIR pursuant to CEQA Guidelines Section 15088.5(b).

The City Council hereby certifies the EIR based on the following findings and conclusions:

A. Findings

1. CEQA Compliance

As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the Findings and supporting documentation. The City Council determines that the Findings contain a complete and accurate reporting of the environmental impacts and mitigation measures associated with the Project, as well as complete and accurate reporting of the unavoidable impacts and benefits of the Proposed Project as detailed in the Statement of Overriding Considerations. The City Council finds that the EIR was prepared in compliance with CEQA and that the City Council complied with CEQA's procedural and substantive requirements.

2. Significant Unavoidable Impacts/Statement of Overriding Considerations

The Project will have significant adverse impacts even following adoption of all feasible mitigation measures which are required by the City Council. The following significant environmental impacts have been identified in the FEIR and will require mitigation but cannot be mitigated to a level of insignificance as set forth in Section V(C) of these Findings:

- *Aesthetics Impacts (Scenic Vistas; Scenic Resources and Scenic Highways; Existing Visual Character or Quality of Site and its Surroundings; and Cumulative Impacts)* as a result of substantial change in visual characteristics of the proposed project compared to the existing site and the fact that the site was planned for Business Park and Residential uses and no feasible mitigation measures are available.
- *Agricultural Impacts (Conversion of State Designated Farmland; Conversion of Farmland to a Non-Agricultural Use; and Cumulative Impacts)* due to loss of 82.5 of Prime Farmland and Former Agriculture Activities and there is not an established regional mitigation program available.
- *Air Quality Impacts (Air Quality Management Plan Consistency; Equipment Exhaust from Construction-Related Activities; Architectural Coatings; Long-Term Project-Related Emissions; Project-Related Localized Operational Emissions; and Cumulative Impacts;)* due to the size and

type of project, the proposed project would exceed SCAQMD thresholds and available mitigation would not reduce impacts to less than significant levels.

- *Land Use and Planning Impacts (Conflicts with Applicable Land Use Plans, Policies, or Regulations; and Cumulative Impacts)* due to the proposed project not being consistent with current General Plan land use and zoning designation

- *Transportation Impacts (Existing With Project Conditions (Intersection) Traffic and Level of Service; Opening Year With Project Conditions (Intersection) Traffic and Level of Service; Opening Year Cumulative With Project Conditions (Intersection) Traffic and Level of Service; and Cumulative Impacts.)* due to various mitigation measures being under the jurisdiction of Caltrans and so implementation cannot be guaranteed by the Lead Agency (City).

The City Council has eliminated or substantially reduced environmental impacts where feasible as described in the Findings, and the City Council determines that the remaining unavoidable significant adverse impacts are acceptable due to the reasons set forth in the preceding Statement of Overriding Considerations.

3. Conclusions

- a. All potentially significant environmental impacts from implementation of the proposed Project have been identified in the EIR and, with the implementation of the mitigation measures defined herein and set forth in the MMRP, will be mitigated to a less-than-significant level, except for the impacts identified in Section V(C) above.

- b. Other reasonable alternatives to the proposed Project that could feasibly achieve the basic objectives of the proposed Project have been considered and rejected in favor of the proposed Project.

- c. Environmental, economic, social and other considerations and benefits derived from the development of the proposed Project override and make infeasible any alternatives to the proposed Project or further mitigation measures beyond those incorporated into the proposed Project.

VII. ADOPTION OF MITIGATION MONITORING AND REPORTING PROGRAM

Pursuant to *Public Resources Code* Section 21081.6, the City Council hereby adopts, as conditions of approval of the Project, the Mitigation Monitoring and Reporting Plan (MMRP) set forth in Section 4.0 of the Final EIR. In the event of any inconsistencies between the mitigation measures as set forth herein and the MMRP, the MMRP shall control, except to the extent that a mitigation measure contained herein is inadvertently omitted from the MMRP, in which case such mitigation measure shall be deemed as if it were included in the MMRP.

EXECUTIVE SUMMARY

I. PURPOSE OF STUDY

The objective of this Fiscal and Economic Impact Study (the "Study") is to analyze the fiscal and economic impacts of the proposed development of the World Logistics Center (the "Center") on the City of Moreno Valley ("City") and the County of Riverside ("County"). The Center is comprised of 41.4 million building square feet of high-cube industrial land use, 200,000 building square feet of general warehouse space, and 3,000 building square feet of light retail space for the sale of fuel, food, and convenience items. The Study analyzes the recurring fiscal impacts of the Center's development on the City General Fund, and also identifies the general economic impacts on the City in terms of employment, gross receipts, and earnings creation for City residents and workers.

II. TYPES OF FISCAL AND ECONOMIC IMPACTS TO CITY OF MORENO VALLEY EVALUATED IN THE STUDY

A. FISCAL IMPACTS ON CITY OF MORENO VALLEY GENERAL FUND

The purpose of the fiscal analysis component of this Study is to estimate the net fiscal impacts of the Center's proposed development and construction on the City General Fund. The fiscal impacts identified in this Study include recurring municipal revenues and costs to the City General Fund that result from the land use scenario analyzed. City General Fund revenues are generated from a variety of revenue sources, including property taxes, sales taxes, fees, and fines. Costs to the City General Fund are associated with a variety of services, such as police protection, fire protection, public works maintenance, and general government services.

B. ECONOMIC IMPACTS ON CITY OF MORENO VALLEY

The Study also identifies the general economic impacts on the City that would occur and quantifies these impacts wherever possible. General economic impacts include additions to the City's employment (number of average annual full- & part-time jobs), economic output (e.g., gross receipts), and earnings (the sum of wages, salaries and benefits, other labor income, and employer and employee contributions to social security). The Study also distinguishes between one-time impacts and permanent impacts. One-time impacts include benefits to the City that occur on a non-recurring basis as a result of construction activity, while permanent impacts refer to benefits that occur on a continuing basis, year after year.

III. DESCRIPTION OF WORLD LOGISTICS CENTER

The World Logistics Center (the "Center") is located in the County of Riverside and is comprised of approximately 41.6 million building square feet of industrial land use. The specific land uses are broken down into three categories: Logistics Development ("LD"), Light Logistics ("LL"), and Logistics Support ("LS"). The LD category covers 2,636 acres and is designated for high-cube logistics uses. Traffic analyses presume that buildings in this area will be a minimum of 500,000 square feet in size. The Center includes up to 41.4 million square feet of logistics uses in the LD category.

Correspondingly, the LL category covers 29 acres and is designated for general warehouse uses. There is no minimum building size in this category. The Center’s Specific Plan (“Specific Plan”) permits up to 200,000 square feet of general warehouse space in the LL category. The LS category will be allocated 3,000 square feet of building area and will be a “floating site” in the Specific Plan; the final site will be determined when development plans/tentative maps are designed. LS will accommodate fueling facilities, fast food, and convenience retail.

The Center is located in Rancho Belago, California, at the eastern edge of the City of Moreno Valley (the “City”). The Center will require the construction of significant new infrastructure, financed through public and/or private funds, to be ultimately owned by the City and maintained by the City’s General Fund. At this time, it is estimated that these public infrastructure improvements will consist of 54 lane miles of roadways, 75 acres of landscaped parkways and medians, 4 signalized intersections, 699 streetlights, 18.1 linear miles of storm drains, and 17.2 linear miles of sidewalks/trails. Please refer to **Table 2E** for further information on these public improvements.

IV. CONCLUSIONS OF ANALYSIS RELATED TO CENTER

Following are the major conclusions related to the fiscal and economic impacts of the Center:

A. FISCAL IMPACTS

As reflected in **Table A** and **Figure A** below, the positive Net Fiscal Impact is estimated to be \$5,999,678 annually, based on \$11,560,771 in fiscal revenues and \$5,561,094 in fiscal costs. The fiscal surplus results primarily from property tax in lieu of VLF revenues (40.1% of total) and property tax revenues (secured and unsecured) (31.9%), together constituting approximately 72.0% of total recurring revenues to the City General Fund. The Annual Revenue/Cost Ratio of 2.08 is especially impressive, and demonstrates, inter alia, that the Center will have a very positive impact on the City’s General Fund. In comparison, the City’s General Fund currently runs a Revenue/Cost Ratio of ~0.94. Notably, the City’s costs are limited due to the fact that the Center will not create any new residents, i.e., it is a purely industrial development.

TABLE A
NET FISCAL IMPACT (CITY GENERAL FUND)

Category	Amount
Total Recurring Revenues	\$11,560,771
Total Recurring Costs	(\$5,561,094)
Annual Recurring Surplus/(Deficit)	\$5,999,678
<i>Total Annual Revenue/Cost Ratio</i>	<i>2.08</i>

FIGURE A
NET FISCAL IMPACT (CITY GENERAL FUND)

B. ECONOMIC IMPACTS

As noted previously, the economic impacts of the Center that are analyzed within the Study are (1) Permanent Employment – direct-on-site and indirect/induced (which supplies or supports direct employment); (2) Permanent Output (Gross Receipts) – total direct output *plus* output produced by suppliers and employee spending; and (3) One-Time Construction Impacts. As reflected in **Tables B and C** below, the City’s Permanent Employees and Permanent Gross Receipts, as well as its One-Time Construction Employees, Gross Receipts, and Gross Earnings are all substantially higher following Center development.

1. PERMANENT (RECURRING) EMPLOYMENT, WAGES, AND GROSS RECEIPTS

TABLE B
 (ALL NUMBERS SUBJECT TO ROUNDING)

Recurring Impact	Direct	Indirect/Induced	Total
<u>Employees</u>			
Countywide	20,808	7,569	28,377
Within City	20,808	3,785	24,593
<u>Employee Wages</u>			
Countywide	\$881 Million	\$307 Million	\$1.2 Billion
Within City	\$881 Million	\$154 Million	\$1.0 Billion
<u>Overall Output</u>			
Countywide	\$1.5 Billion	\$891 Million	\$2.4 Billion
Within City	\$1.5 Billion	\$446 Million	\$2.0 Billion

2. CONSTRUCTION (ONE-TIME) EMPLOYMENT, WAGES, AND GROSS RECEIPTS

TABLE C
(ALL NUMBERS SUBJECT TO ROUNDING)

Recurring Impact	Direct	Indirect/Induced	Total
<u>Construction Employees</u>			
Countywide	13,123	7,610	20,733
Within City	13,123	3,805	16,928
<u>Construction Wages</u>			
Countywide	\$641 Million	\$309 Million	\$950 Million
Within City	\$641 Million	\$154 Million	\$795 Million
<u>Construction Output</u>			
Countywide	\$1.7 Billion	\$955 Million	\$2.7 Billion
Within City	\$1.7 Billion	\$477 Million	\$2.2 Billion

Given a buildout period of approximately 10 years, with projected even absorption, the construction of the Center will create approximately 1,300 full-time equivalent (“FTE”) direct annual construction/one-time jobs in the City.

3. OTHER IMPACT CONCLUSIONS

TABLE D

Jobs-Housing Balance	Balance with Center	% Increase / (Decrease)
Countywide	0.74	5.15%
Within City	0.92	97.90%

Although the Center is expected to demand a high level of public infrastructure, the Center is also expected to generate sizeable revenues to the City of Moreno Valley. As Tables A, B, C, and D illustrate, the Center’s logistics component is expected to generate sizeable, substantial, and lasting employment, wage, output, and revenue impacts. Accordingly, it is critical that the Center’s high property and sales tax generating logistics uses be entirely built out to ensure that the Center generates the benefits as forecasted in this Study.

SECTION 1 INTRODUCTION

David Taussig and Associates, Inc. (“DTA”) has been engaged by Highland Fairview to prepare a Fiscal and Economic Impact Study (the “Study”) that evaluates the likely fiscal and economic impacts of the proposed development and construction of the Center on the City of Moreno Valley (the “City”). The impact of the Center on the City’s General Fund was thoroughly analyzed, although City enterprise and special funds were not explicitly considered within the Study.

I. SCOPE AND METHODOLOGY

A. RECURRING FISCAL IMPACTS

Fiscal impacts arising from a land development plan can be broadly categorized as one of two types: one-time impacts or recurring impacts. Each of these broad types may, in turn, be divided into a revenue component and a cost component. For purposes of this Study, it has been assumed that one-time revenues would directly offset one-time costs; thus, the fiscal impacts considered in this Study focus on ongoing, or recurring, fiscal impacts of the Center on the City General Fund. To the extent that revenues are generated outside of the City’s General Fund (e.g., special district revenues) or costs are incurred by the City outside of the General Fund (e.g., costs financed through a special district), they are not included within this fiscal analysis.

As previously mentioned, the fiscal impacts projected for the Study are based generally on the *Multiplier Methodology*. The primary *Multiplier Methodology* used to project the fiscal impacts in this Study was the *Per Capita-Employee (“Persons Served”) Methodology*. The Persons Served Methodology considers the fact that the exact relationship of service demands and revenue-generating potential between residents and employees is difficult to measure. Thus, utilizing a service population, or Persons Served population, comprised of all residents and 50% of employees is common fiscal practice, and suggests that a resident generally has twice the fiscal impact of an employee. This methodology involves calculating the *average City-wide* revenues/costs per Persons Served, utilizing the fiscal year 2012-2013 City budget, and applying these revenue/cost factors to the specific number of Persons Served projected for the Center.

DTA also used a *Per Employee Methodology* in the Study to project recurring fiscal factors based on employment only, such as business license tax revenues. Similar to the Persons Served Methodology discussed above, the Per Employee Methodology involves calculating the *average City-wide* revenues/costs per employee, utilizing the fiscal year 2012-2013 City budget, and applying these factors to the specific number of employees projected under the given scenario.

While most recurring revenues analyzed in the Study are projected using the *Multiplier Methodology*, some major revenue sources, including property taxes and sales taxes, are calculated using a *Case Study Methodology* that involves calculating the *marginal revenues* to be specifically generated by a particular land use, instead of applying an *average City-wide* revenue factor. For purposes of the Study, all recurring revenues and costs are stated in constant (un-inflated) 2012 dollars, based on the assumption that the relative impacts of inflation in future years will be the same for both of these fiscal impact categories.

B. GENERAL ECONOMIC IMPACTS

The Study also identifies the general economic impacts on the City that would occur due to the Center, and quantifies these impacts wherever possible. General economic impacts include additions to the City's employment (number of average annual full- & part-time jobs), economic output (e.g., gross receipts), and earnings (the sum of wages, salaries and benefits, other labor income, and employer and employee contributions to social security). The Study also distinguishes between one-time economic impacts and permanent economic impacts. One-time impacts include benefits to the community that occur on a non-recurring basis as a result of construction and development activity, while permanent, recurring impacts refer to benefits that occur on a continuing basis, year after year. Additionally, for purposes of the Study, all economic impacts are stated in constant (un-inflated) 2012 dollars, based on the assumption that the relative impacts of inflation in future years may be difficult to gauge.

In evaluating economic impacts, the Study quantifies both direct and indirect/induced economic impacts on the City. Direct economic impacts reflect the initial or first-round increases in jobs, earnings, and output, all of which occur directly on-site. Indirect/induced economic impacts are the secondary and other additional rounds of economic activity that occur as a consequence of the direct impacts, and can occur elsewhere within the City. The **indirect** impacts represent the economic activity – buying and selling of goods and services – of *suppliers* to the land use types analyzed. In this Study, suppliers to the Center consist primarily of maintenance and repair professionals, utilities' providers, wholesale trade companies, and business support services; while suppliers to retail/office developments consist mainly of real estate firms, computer and other technology firms, accounting and bookkeeping professionals, and utilities' providers. Furthermore, the suppliers representing the indirect one-time impacts are mainly heavy industrial and construction suppliers for the actual development of buildings and facilities. The **induced** impacts represent the economic activity that results from household spending by *employees* of all companies directly and indirectly affected by the construction and operation of the land uses analyzed in this Study. Indirect and induced impacts can occur throughout all industries of the economy, and have been categorized using the North American Industry Classification System (NAICS). Adopted by the Office of Management and Budget (OMB) in 1997 to replace the Standard Industrial Classification System (SIC), NAICS is a widely-used system to classify business establishments for the collection, analysis, and publication of statistical data in Canada, Mexico, and the United States. NAICS industries are identified using a six-digit coding system to classify all economic activity into twenty broad sectors, five of which are mainly goods-producing sectors and fifteen of which are services-producing sectors. This six-digit hierarchical structure allows for the identification of nearly 1,170 industries. The broad NAICS sectors include the Construction, Retail Trade, and Administrative and Support Services classifications, which are the focal NAICS categories analyzed within this Study to determine the indirect and induced economic impacts generated under the analysis.

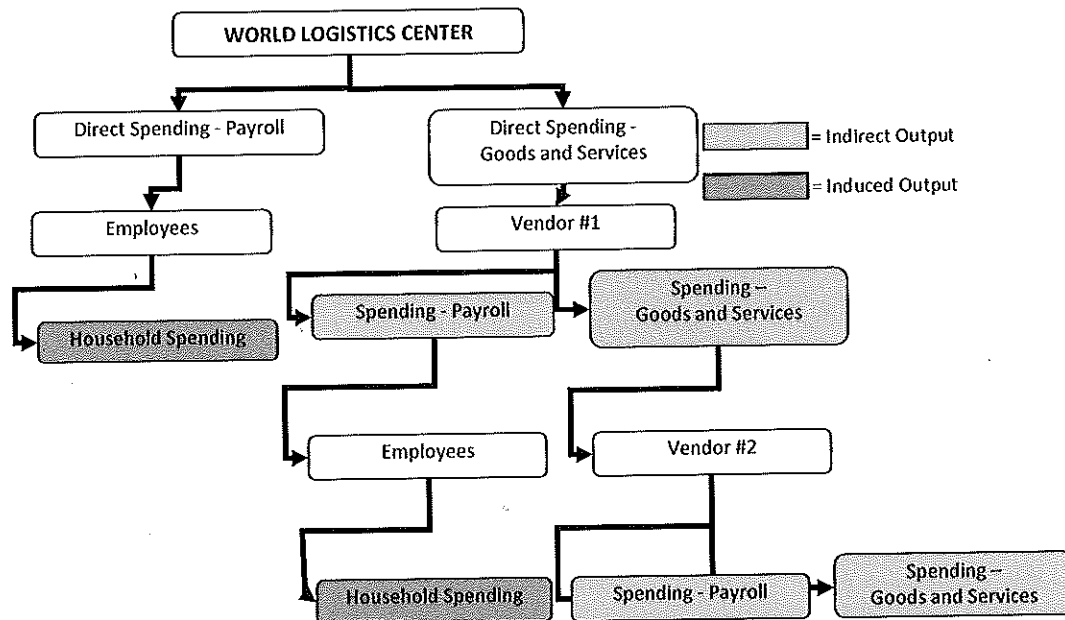

(i) IMPLAN MULTIPLIER METHOD

Although most economists agree that indirect and induced, or "multiplier" effects exist, most economists also agree that such effects are difficult to measure. Patterns on spending and employment among suppliers and employee households often vary over

time and from one region to another. Nevertheless, there are certain input-output models that can be used to estimate indirect and induced effects.

In quantifying the indirect and induced economic impacts for the Study, DTA utilized the Impact Analysis for Planning (“IMPLAN”) Input/Output Modeling System, a type of quantitative economic model that provides an approximate measure of the “multiplier effect” of a firm’s spending on payroll and the purchasing of goods and services. Like similar econometric models, IMPLAN helps to calculate the flow of payments for goods and services across different industry sectors, and between households and industries. The IMPLAN model can be envisioned simply as a large spreadsheet with hundreds of industries (plus the household sector) arrayed across the top as producers, and the same industries and households listed down the side as consumers. Each million dollars (output) in spending by any one consumer (i.e. the Center) is allocated across the producing industries from which it buys goods and services. These producing industries, in turn, spend money buying goods and services from their own distinct sets of suppliers. Thus, the IMPLAN multiplier model allows one to gauge the effect on each dollar an industry spends as it diffuses through a regional economy. Furthermore, it allows one to translate the overall regional impact of spending into jobs and employee compensation. Please refer to Table 1 for a diagram of the multiplier effect.

TABLE 1
EXAMPLE OF THE MULTIPLIER EFFECT (INDIRECT AND INDUCED OUTPUT)

The multiplier factors available to determine indirect/induced impacts are intended to reflect impacts for entire areas within a zip code. Therefore, the indirect/induced impacts identified in this Study to occur within the City boundaries are based on assumptions established by DTA and are subject to change. Please refer to **Appendix B** for further information.

II. LIMITATIONS

A. ACCURACY OF INFORMATION

The fiscal and economic models in the Study contain an analysis of revenues, costs, and impacts to the City resulting from the Center. These models are based on both (i) information provided to DTA by Highland Fairview staff and (ii) certain DTA assumptions taken from DTA's municipal cost database, as compiled by DTA from previous fiscal impact studies prepared by the firm. The sources of information and basis of the estimates calculated in the Study are stated herein. While DTA is confident that the sources of information are reliable, DTA does not express an opinion or any other form of assurance on the accuracy of such information. The analysis of fiscal impacts contained in this report is not considered to be a "financial forecast" or a "financial projection" as technically defined by the American Institute of Certified Public Accountants. The word "projection" used within this report relates to broad expectations of future events or market conditions. Since the analyses contained herein are based on estimates and assumptions that are inherently subject to uncertainty and variation depending on evolving events, DTA cannot represent that such estimates will definitely be achieved. Some assumptions inevitably will not materialize, and unanticipated events and circumstances may occur; therefore, the actual results achieved may vary from these projections stated throughout the Study.

SECTION 2 DESCRIPTION OF RECURRING FISCAL REVENUES/COSTS

The following section presents the recurring revenue and cost impacts to the City General Fund and the methodology and assumptions utilized in the Study to project these impacts. Detailed numerical analyses of the revenue and cost impacts subsequently discussed in this section are contained in **Appendix A**.

I. ANALYSIS OF RECURRING REVENUES

CASE STUDY METHOD:

A. PROPERTY TAXES – SECURED AND UNSECURED

Property tax revenues are conservatively projected based on the City's estimated share of the general 1% property tax levy. Total secured property tax revenues received by the City from the land uses will equal approximately 8.97% of the basic 1% property tax levy from the Tax Rate Areas ("TRAs") encompassing the Center. Please note that the gross tax increment, as calculated by the Riverside County (the "County") Auditor-Controller, has been reduced to account for the projected Education Revenue Augmentation Fund ("ERAF") property tax shifts. Please refer to **Table 2A** below and **Exhibit 4** of **Appendix A** for details regarding the secured and unsecured property tax assumptions utilized in the fiscal impact analysis.

Unsecured property taxes are levied on tangible personal property that is not secured by real estate. Examples of unsecured property includes trade fixtures (e.g., manufacturing equipment and computers), as well as airplanes, boats, and mobile homes on leased land. In generating the fiscal impact models for this Study, DTA has assumed that unsecured property values average 10.00% of the secured value for non-residential land uses.

(I). ANNEXATION

According to the Riverside County Local Agency Formation Commission ("Riverside County LAFCO"), the Master Property Tax Transfer Agreement for the County of Riverside and the City of Moreno Valley (the "Property Tax Agreement") will determine the tax apportionment factors for the proposed annexation of elements of the Center to the City. Only one (1) parcel is to be annexed per the Specific Plan, however, this analysis still assumes that the annexation of this parcel will be carried out according to the terms of that agreement. Please refer to **Appendix C** for further information regarding that parcel. As the vast majority of elements of the Center are currently within the City, the overall TRA breakdown described above is weighted both by TRA, subject to the Property Tax Agreement, and acreage.

Of the property tax apportionment that is currently dedicated to the County's General Fund, 25% will be allocated to the City's General Fund upon annexation of the Center to the City, while the remaining 75% will be remitted to the County to pay for services that the County provides to City residents. For a detailed breakdown of the tax sharing assumptions, please refer to **Exhibit 4** of **Appendix A**.

B. PROPERTY TRANSFER TAX

Per California Revenue & Taxation Code §11901, *et seq.* and the Moreno Valley Municipal Code §3.22.020, sales of real property are taxed by the County at a rate of \$1.10 per \$1,000 of property value, whereas for property located in the City, the property transfer tax is divided equally between the City and the County, with the City receiving \$0.55 per \$1,000 of transferred property sale or resale value, excluding assumed liens or encumbrances. Per typical baseline assumptions, DTA assumes that non-residential development changes ownership at an average rate of 5% per year, and that continuing liens and encumbrances are insignificant.

C. PROPERTY TAX IN-LIEU OF VEHICLE LICENSE FEE

The passage of Proposition 1A in California in 2004 enacted a constitutional amendment that introduced a new methodology to calculate property taxes in-lieu of VLF. Per California Revenue and Taxation Code §97.70, the property tax in-lieu of VLF amount now grows in proportion to the growth rate of gross assessed valuation in a city or county. Property taxes in-lieu of VLF revenues are projected to grow with the change in the City-wide gross assessed valuation of taxable property from the prior fiscal year. Property tax in-lieu of VLF revenues constitute an addition to other property tax apportionments and were calculated for purposes of this Study at \$1.26 per \$1,000 increase in assessed valuation on a City-wide basis. Please refer to **Table 2A** below and **Exhibit 4** of **Appendix A** for details regarding the property tax assumptions utilized in the fiscal impact analysis.

TABLE 2A – PROPERTY TAX ASSUMPTIONS

Property Tax Assumptions	
<u>Property Tax</u>	
Industrial Sales Price / Square Foot	\$90.00
Retail Sales Price / Square Foot	\$200.00
Secured Property Tax – Net Apportionment Factor to the City of Moreno Valley as a Fraction of 1.0% Property Tax Rate (Net of ERAF)	8.97%
Unsecured Property Tax – Unsecured Taxes as a % of Secured Property Value	10.00%
<u>Property Transfer Tax</u>	
Non-Residential Property Turnover Rate	5.00%
Transfer Tax as a % of Price	0.11%
Property Transfer Tax Passed Through to City	50.00%
<u>Property Tax In-Lieu of VLF</u>	
City of MV – Total Assessed Value (FY 2011-2012)	\$10,445,118,397
City of MV – VLF Prop. Tax In-Lieu Revenues (FY 2012-2013)	\$13,195,000
VLF Property Tax In-Lieu per \$1,000 Assessed Value	\$1.26

D. MOTOR VEHICLE LICENSE FEES

(I). BACKGROUND

Prior to June 1, 2004, the Motor Vehicle License Fee (“VLF”) tax rate was equal to 2.00% of the value of a vehicle, with 0.65% paid by the vehicle owner and an additional 1.35% supplemented with a backfill from the State General Fund. A large portion of those funds was allocated to cities (42.50%) and counties (42.50%) based on population, while newly-incorporated cities received an additional population subvention based on three (3) times the number of registered voters for the first seven (7) years after incorporation.

As discussed earlier, in 2004, the VLF allocation was altered. The California Legislature implemented the “VLF Swap” in which the VLF was lowered to 0.65%. The resultant loss of city revenue was swapped with an augmentation of property tax, termed property tax in-lieu of VLF. These amounts grow annually based on the annual increase in assessed value within each respective jurisdiction (see above).

(II). SUPPLEMENTAL LAW ENFORCEMENT FUNDING (“SLESF”) AND OTHER STATE LAW ENFORCEMENT GRANTS

As a part of the 2009 state budget agreement, a number of law enforcement grant programs previously funded by the state general fund were instead funded in fiscal year (“FY”) 2009-10 and FY 2010-11 by a temporary 0.15% state VLF increase, which ended on June 30, 2011. The additional 0.15% VLF rate was intended to generate around \$500 million annually – the tax generated \$414 million in FY 2009-10 and \$442 million in FY 2010-11.

(III). SENATE BILL (SB) 89 - FEES SHIFTED TO FUND STATE LAW ENFORCEMENT GRANTS

SB89, signed in 2010 by Governor Brown, effectively eliminates the 0.65% VLF revenue that was being allocated as a general fund revenue source to California cities. Provisions in SB89 shift hundreds of millions of VLF revenues to fund the state law enforcement grants beginning FY 2011-12. The SB89 plan operates as follows:

- The “Vehicle License Registration Fee” is increased by \$12 to produce approximately \$300 million in FY 2011-12. This fee will fund state DMV vehicle license registration operations, thereby “freeing up” \$300 million of VLF revenue that had been used to fund DMV operations. This money will be transferred to a new Local Law Enforcement Services Account (“LLESA”) to fund the law enforcement grants.
- In addition, beginning July 1, 2011, SB89 transfers the remaining VLF revenue (after the Local Revenue Fund allocation for county health and welfare programs) previously allocated to cities and the County of Riverside to the LLESA.

SB89 takes \$130 million of city general revenue and shifts it to save state law enforcement grant programs. Less than \$100 million of these grant funds will come back to cities, earmarked for police services. But these funds will likely be offset by the loss of city VLF. Therefore, VLF (as

opposed to property tax in-lieu of VLF) revenue was not analyzed as a Center revenue source in this Study.

E. SALES AND USE TAXES

Direct sales tax revenues are generated by retail sales from businesses within City limits, with 1% of taxable sales receipts passed through to the City. **Exhibit 5 of Appendix A** reflects taxable sales receipts per square foot for each on-site non-residential land use type, based on data from the *Urban Land Institute's Dollars & Cents of Shopping Centers (2008)* publication and total taxable sales receipts for the Center, based on information provided by Highland Fairview and the City.

Indirect sales tax revenues, as summarized in **Exhibit 5 of Appendix A**, are generated by the purchases made by the Center's employees within the City. Based on studies outlined in the *International Council of Shopping Centers' Office Worker Local Retail Spending Patterns*, DTA assumed that each on-site employee spends nearly \$4,168 annually within the City.

TABLE 2B – SALES TAX ASSUMPTIONS

Sales Tax Assumptions	
% Sales Tax Passed Through to City of MV	1%
Local Employee Spending (Annual)	\$4,168
<i>Capture Rate of Employee Spending (within City of MV)</i>	50%
<i>Displacement Rate (of existing taxable sales within City)</i>	20%
Taxable Sales per Square Foot – Retail	\$250

F. INVESTMENT INCOME REVENUES

Investment Income revenues are generated by the increase in General Fund Revenues resulting from the Center. This increase reflects growth in the following revenue categories: property taxes, sales taxes, and multiplier revenues (as discussed below).

Revenues from this source are estimated by multiplying the Projected Recurring General Fund Revenues Available for Investment of \$11,537,696 by the Local Agency Investment Fund ("LAIF") investment fund rate of return of 0.40% by the LAIF Percentage of Earnings Cost factor of 50%. This calculation results in estimated Investment Income (less Earnings Cost) of \$23,075 (which when added to \$11,537,696 equals \$11,560,771). LAIF factors are determined quarterly by the California State Treasurer whose office governs the investment of revenues by municipalities.

Please refer to **Table 2C** below and **Exhibit 6 of Appendix A** for details regarding the investment income assumptions utilized in the fiscal impact analysis.

TABLE 2C – INVESTMENT INCOME ASSUMPTIONS

Investment Income Assumptions	
Investment Period for Recurring Non-Interest General Fund Revenues	12 Months
Local Agency Investment Fund (LAIF) Rate of Return	0.40%
Local Agency Investment Fund (LAIF) Percentage of Earnings	50%
Projected Recurring General Fund Revenues Available for Investment	\$11,537,696

MULTIPLIER METHOD:

G. OTHER TAX REVENUES

The Utility Users Tax (“UUT”) and the Transient Occupancy Tax (“TOT”) were forecasted at \$59.85 per Persons Served using the *Per Capita-Employee Multiplier Method*. Please note that this revenue multiplier has been reduced by 25% to account for only the portion of the UUT and TOT revenues that are expected to be variable with population and employee growth in the City. Historically, UUT is one of the General Fund’s largest revenue sources, as well as one of the most stable due to trends in the natural gas, wireless telephone, and cable industries.

H. BUSINESS RECEIPTS TAX & LICENSES

Business Receipts Tax and Business Licenses revenues to the City General Fund are anticipated to grow due to employment growth only. Therefore, Business Receipts Tax and Business Licenses revenues were projected at \$59.63 per Employee using the *Per Employee Multiplier Method*. However, the future addition of new retail businesses will have a particularly positive effect on the Business Receipts Tax.

I. FRANCHISE TAXES

Franchise Taxes, including Cable TV, Sewer, etc., were forecasted at \$24.81 per Persons Served using the *Per Capita-Employee Multiplier Method*.

J. LICENSES AND PERMITS

Licenses and Permits are based on the City’s collection of fees for various types of permits and community programs. Revenues are forecasted using a *Per Capita-Employee Multiplier Method* that results in a total multiplier of \$5.69 per Persons Served.

K. INTERGOVERNMENTAL REVENUES

Intergovernmental Revenues are forecasted using a *Per Capita-Employee Multiplier Method* that results in a total multiplier of \$6.00 per Persons Served.

L. CHARGES FOR CURRENT SERVICES

Current Services, including parking control fees, plan check fees, and inspections fees, were projected at \$38.12 per Persons Served, based on the *Per Capita-Employee Multiplier Method*.

M. USE OF MONEY AND PROPERTY (NON-INTEREST REVENUES)

Use of Money and Property Revenues, including Park and Community Building Rentals, were forecasted at \$0.25 per Persons Served using the *Per Capita-Employee Multiplier Method*.

N. FINES AND FORFEITURES

This revenue category represents fines and penalties collected by the City for various infractions, including Vehicle, Code, and certain Parking Fines. Fines and Forfeitures were forecasted at \$0.64 per Persons Served using the *Per Capita-Employee Multiplier Method*.

O. TRANSFERS IN

Direct cost of development related services and all development services revenue are budgeted in special funds, and the portion of the fee revenues that are attributable to overhead costs are shown as a transfer into the General Fund to reimburse the City for general support. Transfers In revenue is forecasted at \$0.37 per Persons Served, using the *Per Capita-Employee Multiplier Method*.

P. OTHER REVENUE

Other Revenues, including Miscellaneous Revenues, Donations, and Mandated Cost Reimbursements, were projected at \$1.21 per Persons Served utilizing the *Per Capita-Employee Multiplier Method*.

TABLE 2D – OTHER GENERAL FUND REVENUES (MULTIPLIER METHOD)

Category	Amount	Methodology
Other Tax Revenues	\$59.85	Persons Served plus 25% Discount
Business Receipts Tax & Licenses	\$59.63	Per Employee
Franchise Taxes	\$24.81	Persons Served
Licenses and Permits	\$5.69	Persons Served
Intergovernmental Revenues	\$6.00	Persons Served
Charges for Current Services	\$38.12	Persons Served
Use of Money and Property (Non-Interest Revenues)	\$0.25	Persons Served
Fines and Forfeitures	\$0.64	Persons Served

Category	Amount	Methodology
Transfers In	\$0.37	Persons Served
Other Revenues	\$1.21	Persons Served

Please refer to **Exhibit 7 of Appendix A** for more details on the case study assumptions and revenue multipliers utilized in the Study.

II. ANALYSIS OF RECURRING COSTS

CASE STUDY METHOD:

A. INFRASTRUCTURE AND PARKS MAINTENANCE

The Center will require the construction of new infrastructure to be ultimately owned by the City and maintained by the City's General Fund. At this time, it is estimated that these public infrastructure improvements will consist of 54 lane miles of roadways, 75 acres of landscaped parkways and medians, 4 signalized intersections, 699 streetlights, 18.1 linear miles of storm drains, and 17.2 linear miles of sidewalks/trails. Notably, other improvements to be maintained by other City Funds, i.e., Enterprise Funds, Special Funds, etc., were disregarded for purposes of this Study.

These improvements were multiplied by estimated annual cost figures for each category derived from the DTA Public Works Database, resulting in annual Infrastructure and Parks Maintenance costs of \$1,839,878.

Finally, Measure A funding – a half-cent sales tax for roadway funding administered by the Riverside County Transportation Commission – was incorporated, based on the percentage of total Measure A funds allocated to the City of Moreno Valley. Following a \$21,997 Measure A set-off, the annual Infrastructure and Parks Maintenance forecast is \$1,817,881.

TABLE 2E – INFRASTRUCTURE/PARKS REQUIREMENTS (CASE STUDY METHOD)

Infrastructure/Parks to be Maintained by City General Fund	Quantity	Cost/Unit
Roadways (Lane Miles)	54	\$7,834
Signalized Intersections	4	\$4,938
Street Lights	699	\$126
Parkways/Medians (Acres)	75	\$14,953
Storm Drains (Lineal Miles)	18.1	\$1,177
Sidewalks/Trails (Lineal Miles)	17.2	\$3,497

B. GENERAL GOVERNMENT COSTS

General Government costs are projected at a marginal rate of 7.58% of the City General Fund recurring costs, based on the assumption that the FY 2012-2003 General Government expenditures, equaling \$7.1 million, will remain at the same relative proportion of the FY 2012-2013 City General Fund non-governmental expenditures of approximately \$70.0 million in future years. The current percentage of General Government expenditures to City General Fund non-governmental expenditures is approximately 10.1%; however, these General Government costs are not expected to increase on a one-for-one basis as a result of the land use development depicted in this Study. Therefore, this Study assumes that General Government costs increase at an estimated marginal rate of 75%, or 7.58%, of the existing General Government cost overhead rate. This approach results in annual General Government costs of \$391,956.

MULTIPLIER METHOD:

C. POLICE AND FIRE PROTECTION

Police services include those costs associated with Law Enforcement and Patrol, Administration, Traffic Enforcement, Crime Prevention, Volunteer Programs, and Community-Based Policing. Police Services costs are forecasted at \$196.20 per Persons Served using the *Per Capita-Employee Multiplier Method*. Fire services include those costs associated with Fire Suppression, Fire Prevention, Equipment and Vehicles, Outreach, and Training. Fire Services costs are forecasted at \$72.84 per Persons Served using the *Per Capita-Employee Multiplier Method*.

D. ANIMAL SERVICES

Animal Control Services costs were projected at \$4.70 per Persons Served using the *Per Capita-Employee Multiplier Method*. Please note that this cost multiplier has been reduced by 50% to account for only the portion of Animal Services costs that are expected to be variable with population and employee growth in the City.

E. DEVELOPMENT SERVICES

Development Services costs, including elements of the Planning and Building Divisions, Land Development services, and certain Public Works (non-overhead/department) services related to new growth, were forecasted at \$20.87 per Employee using the *Per Capita-Employee-Multiplier Method*.

F. OTHER USES

Other Uses costs, including Records Management, Sign Programs, and the Office of Emergency Management and Volunteers, were forecasted at \$6.27 per Persons Served based on the *Per Capita-Employee Multiplier Method*. Please note that this cost multiplier has been reduced by 50% to account for only the portion of Other Uses costs that are expected to be variable with population and employee growth in the City.

G. COMMUNITY DEVELOPMENT

Community Development costs, including certain costs associated with existing City Planning and Building Safety, were forecasted at \$4.17 per Persons Served based on the *Per Capita-Employee Multiplier Method*. Please note that this cost multiplier has been reduced by 50% to account for only the portion of Community Development costs that are expected to be variable with population and employee growth in the City.

H. PUBLIC WORKS – OVERHEAD/DEPARTMENT COSTS

Public Works costs, including Administration, Engineering, and Operations and Maintenance expenses, were projected at \$10.79 per Persons Served using the *Per Capita-Employee Multiplier Method*. This category includes those Public Works costs not directly associated with Center-related roadway maintenance, signalized intersections, park rehabilitation, and other infrastructure (i.e. 54 lane miles of roadways, 75 acres of landscaped parkways and medians, 4 signalized intersections, 699 streetlights, 18.1 linear miles of storm drains, and 17.2 linear miles of sidewalks/trails).

I. TRANSFERS OUT

Transfers Out costs were forecasted at \$6.28 per Persons Served using the *Per Capita-Employee-Multiplier Method*.

TABLE 2F – OTHER GENERAL FUND COSTS (MULTIPLIER METHOD)

Category	Amount	Methodology
Police Services	\$196.20	Persons Served
Fire Services	\$72.84	Persons Served
Animal Services	\$4.70	Persons Served plus 50% Discount
Development Services	\$20.87	Persons Served
Other Uses	\$6.27	Persons Served plus 50% Discount
Community Development	\$4.17	Persons Served plus 50% Discount
Public Works	\$10.79	Persons Served
Transfers Out	\$6.28	Persons Served

SECTION 3 FISCAL IMPACTS

I. TOTAL RECURRING REVENUES: CITY OF MORENO VALLEY

Total recurring revenues to the City equal approximately \$11,560,771 per year. As illustrated in Table 3A below, the largest percentage of revenue is attributed to the property tax in lieu of VLF revenues (40.1% of total) and property tax revenues (secured and unsecured) (31.9%), together constituting approximately 72.0% of total recurring revenues to the City General Fund. Exhibits 1-6 of Appendix A provide additional details about all recurring revenues and the assumptions used in their derivation.

**TABLE 3A
RECURRING FISCAL REVENUES (CITY GENERAL FUND)**

Category	Amount	Percent*
Property Tax In-Lieu of Vehicle License Fee	\$4,636,853	40.1%
Secured Property Tax	\$3,357,120	29.0%
Business Receipts Tax & Licenses	\$1,240,751	10.7%
Tax Revenues (UUT & TOT)	\$622,664	5.4%
Indirect Sales Tax	\$433,594	3.8%
Charges for Services	\$396,591	3.4%
Unsecured Property Tax	\$335,712	2.9%
Franchises	\$258,117	2.2%
Property Transfer Tax	\$102,977	0.9%
Intergovernmental Revenues	\$62,423	0.5%
Licenses/Permits	\$59,197	0.5%
Investment Income	\$23,075	0.2%
Other Revenues	\$12,589	0.1%
Fines and Forfeitures	\$6,658	0.1%
Direct Sales Tax	\$6,000	0.1%
Transfers In	\$3,849	0.0%
Use of Money & Property	\$2,601	0.0%
Motor Vehicle Licensing Fees	\$0	0.0%
Total Revenues	\$11,560,771	100.0%

*Numbers may not sum due to rounding

II. TOTAL RECURRING SERVICES COSTS: CITY OF MORENO VALLEY

As illustrated in Table 3B below, total annual recurring costs to the City are estimated at \$5,561,094 per year. A majority of the costs are estimated to result from police services, fire

services, and Center-specific infrastructure and parks maintenance costs. Exhibits 2 and 7-10 of Appendix A provide additional details about all recurring costs and the assumptions used in their derivation.

TABLE 3B
RECURRING FISCAL COSTS (CITY GENERAL FUND)

Category	Amount	Percent*
Police	\$2,041,216	36.7%
Infrastructure & Parks Maintenance Costs	\$1,817,881	32.7%
Fire Services	\$757,809	13.6%
General Government	\$391,956	7.0%
Development Services	\$217,126	3.9%
Public Works	\$112,256	2.0%
Transfers Out	\$65,336	1.2%
Other Uses	\$65,232	1.2%
Animal Services	\$48,898	0.9%
Community Development	\$43,384	0.8%
Total Costs	\$5,561,094	100.00%

*Numbers may not sum due to rounding

III. OVERALL NET FISCAL IMPACT TO THE CITY OF MORENO VALLEY

As shown in Table 3C below, the overall fiscal impact to the City as a result of revenues generated by the Center is a recurring annual fiscal surplus of \$5,999,678 based on the generation of \$11,560,771 in recurring annual revenues and \$5,561,094 in recurring annual costs. Annual revenues are projected to equal 2.08 times the associated City General Fund costs. A summary of the overall fiscal impacts to the City is provided in Exhibit 11 of Appendix A.

TABLE 3C
NET FISCAL IMPACT (CITY GENERAL FUND)

Category	Amount
Total Recurring Revenues	\$11,560,771
Total Recurring Costs	(\$5,561,094)
Annual Recurring Surplus/(Deficit)	\$5,999,678
<i>Total Annual Revenue/Cost Ratio</i>	<i>2.08</i>
Surplus per 1,000 SF Industrial	\$144

SECTION 4 ECONOMIC IMPACTS

The Study also identifies the general economic impacts on the City that would occur due to the Center, and quantifies these impacts wherever possible. General economic impacts include additions to the City's employment (number of average annual full- & part-time jobs), economic output (e.g., gross receipts), and earnings (the sum of wages, salaries and benefits, other labor income, and employer and employee contributions to social security). The Study also distinguishes between one-time economic impacts and permanent economic impacts. One-time impacts include benefits to the community that occur on a non-recurring time basis as a result of construction and development activity, while permanent, recurring impacts refer to benefits that occur on a continuing basis, year after year.

I. RECURRING ECONOMIC IMPACTS

A. ASSUMPTIONS

In evaluating economic impacts, the Study quantifies both direct and indirect/induced economic impacts on the City. Direct economic impacts reflect the initial or first-round increases in jobs, earnings, and output, all of which occur directly on-site. Indirect/induced economic impacts are the secondary and other additional rounds of economic activity that occur as a consequence of the direct impacts, and can occur elsewhere within the City. The **indirect** impacts represent the economic activity – buying and selling of goods and services – of suppliers to the land use types analyzed. In this Study, suppliers to the Center consist primarily of maintenance and repair professionals, utilities' providers, wholesale trade companies, and business support services; while suppliers to retail/office developments consist mainly of real estate firms, computer and other technology firms, accounting and bookkeeping professionals, and utilities' providers. Furthermore, the suppliers representing the indirect one-time impacts are mainly heavy industrial and construction suppliers for the actual development of buildings and facilities. The **induced** impacts represent the economic activity that results from household spending by employees of all companies directly and indirectly affected by the construction and operation of the land uses analyzed in this Study. Indirect and induced impacts can occur throughout all industries of the economy, and have been categorized using the North American Industry Classification System (NAICS). Adopted by the Office of Management and Budget (OMB) in 1997 to replace the Standard Industrial Classification System (SIC), NAICS is a widely-used system to classify business establishments for the collection, analysis, and publication of statistical data in Canada, Mexico, and the United States. NAICS industries are identified using a six-digit coding system to classify all economic activity into twenty broad sectors, five of which are mainly goods-producing sectors and fifteen of which are services-producing sectors. This six-digit hierarchical structure allows for the identification of nearly 1,170 industries. The broad NAICS sectors include the Construction, Retail Trade, and Administrative and Support Services classifications, which are the focal NAICS categories analyzed within this Study to determine the indirect and induced economic impacts generated under the analysis.

Based on information provided by Highland Fairview, the Center is comprised of 41.4 million building square feet of high-cube industrial land use, 200,000 building square feet of general warehouse space, and 3,000 building square feet of light retail. DTA estimated the number of direct employees in the proposed development based upon an average employee per SF ratio for

similar land uses in the region. Other assumptions used to analyze the economic impact of the Center are summarized in Table 4A below.

**TABLE 4A
ASSUMPTIONS**

Assumptions	
Land Use Assumptions	<i>Sq. Ft.</i>
Logistics Development ("LD")	41,400,000
Light Logistics ("LL")	200,000
Logistics Support ("LS")	3,000
Employment Assumptions [1]	<i>per 1,000</i>
Logistics (LD/LL)	0.50
Retail (LS)	2.50
Wage Assumptions [2]	<i>Annual \$</i>
Warehousing/Transportation (Logistics) [3]	\$42,341
Construction	\$48,825
Retail [4]	\$22,885
Riverside County Average (2010)	\$40,602
<p>[1] Source: DTA Public Works Database; confirmed by "Employment Density Study," SCAG (2001), and "Logistics Trends and Specific Industries," NAIOP Research Foundation (March 2010).</p> <p>➤ Identical to metric utilized in fiscal impact analysis, please see Exhibit 3 of Appendix A (0.50 Employees/KSF = 2,000 SF per Employee).</p> <p>[2] Source: U.S. Census Bureau, Longitudinal Employer-Household Dynamics Reports (California, 2010) for Riverside-San Bernardino-Ontario Metropolitan Area and Riverside County; confirmed by Bureau of Labor Statistics (May 2010).</p> <p>[3] Standard Warehousing/Transportation Salary (~\$41,229) plus a small salary bump for 10% of employees (~\$52,346) to account for presence of high-level management and related office personnel.</p> <p>[4] Reflects a blended average, by employee count, of local "Retail" and "Food Service/Accommodation" salary codes.</p>	

B. JOB CREATION & EMPLOYEE WAGES

Development will contribute to the creation of new jobs in the City and County. As shown below in Table 4B, development of the Center is projected to generate approximately 20,808 estimated new on-site jobs within the City. Since the analyses contained herein are based on estimates and assumptions that are inherently subject to uncertainty and variation depending on evolving events, DTA cannot represent that such estimates will definitely be achieved. Some assumptions inevitably will not materialize, and unanticipated events and circumstances may

occur; therefore, the actual results achieved may vary from these projections stated throughout the Study.

In addition to these employment opportunities, DTA estimates that the Center will generate new off-site jobs in all industries of the economy, which constitute the indirect/induced employment impacts of the project. Seven thousand five hundred sixty nine (7,569) indirect/induced jobs are expected to be created in the County, of which 3,785 are projected to be within the City, as a result of the development of the Center. This estimate was derived utilizing the Impact Analysis for Planning (“IMPLAN”) Input/Output Modeling System, a type of quantitative economic model that provides an approximate measure of the “multiplier effect” of a firm’s spending on payroll and the purchasing of goods and services. Like similar econometric models, IMPLAN helps to calculate the flow of payments for goods and services across different industry sectors, and between households and industries. Unlike similar econometric models, e.g., the Regional Input-Output Modeling System (“RIMS II”), IMPLAN is the industry standard. RIMS II and IMPLAN both include induced effects, but RIMS II differs from IMPLAN in two ways: (i) RIMS II uses a single household type for induced personal consumption while IMPLAN uses nine (9) household types; and (ii) RIMS II uses the traditional single row/column Type II formulation whereas IMPLAN uses a more robust mapping of factor income to household consumption using several sub-matrices. RIMS II uses location quotients to regionalize the national technical coefficients, a method which underestimates inter-regional trade and overestimates regional multipliers when cross-hauling is present.

The IMPLAN model can be envisioned simply as a large spreadsheet with hundreds of industries (plus the household sector) arrayed across the top as producers, and the same industries and households listed down the side as consumers. Each million dollars (output) in spending by any one consumer (i.e. the Center) is allocated across the producing industries from which it buys goods and services. These producing industries, in turn, spend money buying goods and services from their own distinct sets of suppliers. Thus, the IMPLAN multiplier model allows one to gauge the effect on each dollar an industry spends as it diffuses through a regional economy. Furthermore, it allows one to translate the overall regional impact of spending into jobs and employee compensation.

While the specific location of the additional indirect jobs created within the County cannot be specifically determined, experience and modeling indicate that a large percentage of these jobs will be support service jobs, and are likely to be located close to the Center, and therefore within the City itself. For purposes of this Study, it is conservatively modeled that one-half of these indirect jobs will be located within the City. Table 4B shown below, and Exhibits 1 and 3 of Appendix B summarize the direct and indirect employment impacts of the Center.

TABLE 4B
RECURRING EMPLOYMENT AND WAGES
 (ALL NUMBERS SUBJECT TO ROUNDING)

Recurring Impact	Direct	Indirect	Induced	Total
<u>Employees</u>				
Countywide	20,808	3,349	4,219	28,377
Within City	20,808	1,675	2,110	24,593
<u>Employee Wages</u>				
Countywide	\$881 Million	\$136 Million	\$171 Million	\$1.2 Billion
Within City	\$881 Million	\$68 Million	\$86 Million	\$1.0 Billion

Overall, the creation of new jobs will provide many benefits to the City. More jobs will lead to more consumer spending by employees in existing retail establishments within the City, as well as new retail development that will be attracted to the City as a result of this spending. Job creation also results in increased tax revenues to the City through increased property taxes and sales taxes related to this new development.

However, because of the difference in timing of the various Center developments, the number of employees summarized above will not be realized at the same time. It is estimated the build-out of the Center will occur over many years, as many individual elements have not yet begun and the demand for such elements may fluctuate.

C. OVERALL ECONOMIC OUTPUT

Total Output (i.e., total expenditures including sales or gross receipts, or other operating income) within the City will increase substantially with development. Total output is estimated based on the different types of development projected to occur. As stated in Section I, this Study analyzes direct and indirect/induced impacts. Regarding gross receipts, the direct impact reflects the initial or first-round increases in output (total spending/gross receipts, including payroll), all of which occur directly on the Center site. Indirect/induced economic impacts are the secondary and other additional rounds of economic activity that occur as a consequence of the direct output impacts, and can occur outside of the Center. The indirect impacts represent the economic activity – buying and selling of goods and services – of suppliers and/or supporting businesses. The induced impacts represent the economic activity that results from household spending by employees of all companies directly and indirectly affected by the Center (please see Table 1 on Page 3 for a graphical representation of the indirect and induced effects). Table 4C shown below and Exhibit 2 of Appendix B summarize the Total Output projections anticipated.

Based again on IMPLAN multipliers and other assumptions utilized in the fiscal impact model, DTA estimated that the direct and indirect/induced effects total \$2.4 billion for the County, of which \$2.0 billion is attributable to the City.

TABLE 4C
RECURRING TOTAL OUTPUT
(ALL NUMBERS SUBJECT TO ROUNDING)

Recurring Impact	Direct	Indirect	Induced	Total
<u>Overall Output</u>				
Countywide	\$1.5 Billion	\$386 Million	\$506 Million	\$2.4 billion
Within City	\$1.5 Billion	\$193 Million	\$253 Million	\$2.0 billion

However, similar to the effect that Center absorption will have on employment, it will have a similar effect on the generation of total output, specifically due to the difference in timing of the various Center developments. As a result, the overall output summarized above will not be realized at the same time.

II. ONE-TIME EMPLOYMENT, WAGES, AND OUTPUT IMPACTS (CONSTRUCTION)

According to IMPLAN, development of the Center is also projected to create 16,928 estimated construction-related full-time equivalent (“FTE”) jobs within the City. Therefore, given a buildout period of approximately 10 years, with projected even absorption, the construction of the Center will create approximately 1,700 FTE total annual construction/one-time jobs in the City. One-time construction and development costs will also have multiplier effects on the economy, generating one-time increases in output and wages from construction of the non-residential buildings and all related site improvements.

As with recurring economic impacts, experience and modeling indicate that a large percentage of these jobs will be support service jobs, and are likely to be located close to the Center, and therefore within the City itself. For purposes of this Study, it is conservatively modeled that one-half of these indirect jobs will be located within the City. Table 4D and Table 4E below and Exhibit 5 of Appendix B summarize the projected increases in employment, wages, and output that are generated directly from construction of the Center land uses, based on DTA wage and construction cost assumptions.

TABLE 4D
ONE-TIME INCREASES IN EMPLOYMENT AND WAGES
(ALL NUMBERS SUBJECT TO ROUNDING)

One-Time Impact	Direct	Indirect	Induced	Total
<u>Employees</u>				
Countywide	13,123	3,367	4,243	20,733
Within City	13,123	1,683	2,122	16,928
<u>Employee Wages</u>				
Countywide	\$641 Million	\$137 Million	\$172 Million	\$950 Million
Within City	\$641 Million	\$68 Million	\$86 Million	\$795 Million

TABLE 4E
ONE-TIME TOTAL OUTPUT
 (ALL NUMBERS SUBJECT TO ROUNDING)

One-Time Impact	Direct	Indirect	Induced	Total
<u>Overall Output</u>				
Countywide	\$1.7 billion	\$446 million	\$509 million	\$2.7 Billion
Within City	\$1.7 billion	\$223 million	\$254 million	\$2.2 Billion

III. OTHER IMPACTS (JOBS-HOUSING BALANCE)

As stated earlier, the Center is estimated to create approximately 20,808 new on-site jobs, and DTA estimates that an additional 7,569 new off-site jobs will be created County-wide (of which 3,785 will be located within the City). As depicted in **Table 4F** and **Figure B** below, as well as in **Exhibit 4** of **Appendix B**, because the Center does not involve a residential component, the jobs generated by the Center do not need to support new households as a result of direct employment or indirect employment. This results in a Jobs-Housing balance calculation wherein the numerator increases (as described above), while the denominator remains constant.

The Jobs-Housing balance is an indicator of the balance between employment and housing opportunities. Defining what constitutes a balance between jobs and housing is not an easy task. Assuming a simple ratio of one job to one household is inappropriate today when so many households include more than one person in the workforce. A study prepared by the Southern California Association of Governments (“SCAG”) suggests that if an area has a Jobs-Household balance that significantly diverges from a regional standard of 1.0–1.29, it can be considered out of balance.

At build-out, the Center will significantly affect the Jobs-Housing balance. As described in **Exhibit 4** of **Appendix B**, moving forward with the Center will increase total employment in the City from 25,120 (current, per California Employment Development Department, Labor Market Information Division) to 49,713 (projected), increasing the City Jobs-Housing balance from 0.47 to 0.92, a metric now largely in line with the SCAG standard. The 28,377 new County employees from the Center will increase total County employment to 579,869 (projected) from 551,492 (current), resulting in an increase in the County Jobs-Housing balance as well, up to 0.74 from 0.70. **Table 4F** and **Figure B** below, and **Exhibit 4** of **Appendix B** summarize the pre- and post-Center Jobs-Housing Balance.

TABLE 4F

Jobs-Housing Balance	Balance without Center	Balance with Center	% Increase / (Decrease)
Countywide	0.70	0.74	5.15%
Within City	0.47	0.92	97.90%

However, as development of the Center is expected to occur over many years, the Jobs-Housing balance will not be significantly changed in the earlier years due to the Center. As the City's current Jobs-Housing balance is exceptionally low according to SCAG standards, the need for employment is immediate. A balance between jobs and housing has a positive impact on the City by decreasing costs associated with commuting and traffic congestion. A balanced Jobs-Housing ratio provides, inter alia, reduced commute times, improved social and cultural involvement, a more attractive work/life balance to residents, and savings to local public agencies in terms of the need to construct and maintain new road improvements and other facilities. For example, the lower transportation facility costs experienced by local public agencies will enable these agencies to invest their tax proceeds in other facilities that can improve the quality of life within the City, such as libraries, recreational centers, and other community amenities.

EXHIBIT A-9
RANCHO BELAGO, CALIFORNIA: WORLD LOGISTICS CENTER
CASE STUDY EXPENDITURES ANALYSIS

Infrastructure & Parks Maintenance Costs

I.	Estimated Additional Infrastructure Requirements [1]	54.0
	Estimated Lane Miles of Roadway	4
	Estimated Number of Signalized Intersections	699
	Estimated Number of Streetlights	75.0
	Estimated Acres of Parkways and Medians	18.1
	Estimated Mileage of Storm Drains	17.2
	Estimated Mileage of Sidewalks/Trails	
II.	Estimated Annual Costs [2]	\$7,834
	Roadway Maintenance Costs per Lane Mile	\$4,938
	Traffic Signal Maintenance per Intersection	\$126
	Street Light Maintenance per Light	\$14,953
	Parkway/Median Maintenance Costs per Acre	\$1,177
	Storm Drain Maintenance Per Mile	\$3,497
	Sidewalk/Trail Mileage per Lineal Mile	
III.	Estimated Annual Infrastructure & Parks Maintenance Calculation	\$423,029
	Roadways	\$19,752
	Signalized Intersections	\$87,759
	Street Lights	\$1,121,505
	Parkway/Median	\$106,399
	Open Space	\$60,149
	Sidewalks/Trails	
IV.	Measure A Set-Off [3]	
	Measure A Sales Tax	0.50%
	Measure A Sales Tax Passed Through to the City	10.15%
	(Measure A Set-Off resulting from World Logistics Center)	(\$21,997)
	Total Infrastructure & Parks Maintenance Costs	\$1,817,881

NOTES:

- [1] Source: Highland Fairview, reflects only those improvements to be operated and maintained by the City's General Fund. Subject to change.
- [2] Based on data obtained from the DTA Public Works database, in concert with research from the Engineering News-Record.
- [3] Half cent sales tax of which ~10% goes to the City of Moreno Valley based on percentage of total Measure A funds allocated to Moreno Valley with respect to the County total. Subject to change. Source: Riverside County Transportation Commission (RCTC) Annual Budget, Fiscal Year 2011-2012.
- * All figures subject to rounding

**EXHIBIT A-10
RANCHO BELAGO, CALIFORNIA: WORLD LOGISTICS CENTER
GENERAL GOVERNMENT EXPENDITURES ANALYSIS**

ASSUMPTIONS

Total Recurring General Fund Expenditures (excluding General Government Overhead) [1]	\$70,075,883
Recurring General Government Overhead Expenditures (as a % of Total Recurring General Fund Expenditures) [2]	10%
Marginal Increase in General Government Costs [3]	75%

FISCAL IMPACT CALCULATION

I. Fiscal Impact Category	Fiscal Impact Amount
Total Multiplier Expenditures (Exhibit 8)	\$3,351,257
Total Case Study Expenditures (Exhibit 9)	\$1,817,881
Projected Recurring General Fund Expenditures	\$5,169,138
Plus: General Government Costs	\$391,956
Total Recurring Expenditures	\$5,561,094

NOTES:

- [1] Based on City of Moreno Valley Operating Budget, Fiscal Year 2012-2013.
- [2] General Government Overhead Expenditures defined as costs for City Council, City Manager, City Clerk, Administrative Services, City Treasurer, etc.
- [3] Estimate, subject to change. Current City staffing numbers are likely artificially low and are thus not suitable for serving new development.
- * All figures subject to rounding

**EXHIBIT A-11
RANCHO BELAGO, CALIFORNIA: WORLD LOGISTICS CENTER
NET FISCAL IMPACT SUMMARY**

RECURRING GENERAL FUND REVENUES [1]	AMOUNT	PERCENT OF TOTAL
Secured Property Tax	\$3,357,120	29.0%
Unsecured Property Tax	\$335,712	2.9%
Property Transfer Tax	\$102,977	0.9%
Motor Vehicle Licensing Fees	\$0	0.0%
Property Tax In-Lieu of Vehicle License Fee	\$4,636,853	40.1%
Direct Sales Tax	\$6,000	0.1%
Indirect Sales Tax	\$433,594	3.8%
Tax Revenue	\$622,664	5.4%
Business Receipts Tax & Licenses	\$1,240,751	10.7%
Franchises	\$258,117	2.2%
Licenses/Permits	\$59,197	0.5%
Intergovernmental Revenues	\$62,423	0.5%
Charges for Services	\$396,591	3.4%
Use of Money & Property	\$2,601	0.0%
Fines and Forfeitures	\$6,658	0.1%
Transfers In	\$3,849	0.0%
Other Revenues	\$12,589	0.1%
Investment Income	\$23,075	0.2%
Total Recurring General Fund Revenues	\$11,560,771	100.0%

RECURRING GENERAL FUND EXPENDITURES [2]	AMOUNT	PERCENT OF TOTAL
Community Development	\$43,384	0.8%
Public Works	\$112,256	2.0%
Police	\$2,041,216	36.7%
Animal Services	\$48,898	0.9%
Other Uses	\$65,232	1.2%
Development Services	\$217,126	3.9%
Fire Services	\$757,809	13.6%
Transfers Out	\$65,336	1.2%
General Government	\$391,956	7.0%
Infrastructure & Parks Maintenance Costs	\$1,817,881	32.7%
Total Recurring General Fund Expenditures	\$5,561,094	100.0%

NET FISCAL IMPACT		
Total Annual Recurring General Fund Surplus/(Deficit)	\$5,999,678	
Total Annual Revenue/Expenditure Ratio	2.08	
Total Fiscal Surplus/(Deficit) per 1,000 SF Logistics	\$144	

NOTES:

The Logistics Industry of Inland Empire: A Fiscal and Economic Impact Study

The Logistics Industry of the Inland Empire: A Fiscal and Economic Impact Study

PURPOSE:

The purpose of the Fiscal and Economic Impact Study is to provide (i) a general review of the impact of the Logistics Industry on the Inland Empire region of California and (ii) a detailed summary of the projected fiscal and economic impacts to four cities (Jurupa Valley, Chino, Moreno Valley, and Fontana, collectively the "Cities") as a result of the hypothetical development of a 500,000 sq. ft. "high cube" logistics facility in each jurisdiction. The hypothetical facilities in Moreno Valley and Fontana were assumed to be highly automated, while the facilities in Jurupa Valley and Chino were assumed to be not as automated, and staffed by more employees.

METHODOLOGY:

The Study analyzes both the recurring fiscal impacts of the facilities' development on the General Funds of the Cities. Importantly, because one-time revenues typically offset one time impacts, the Study does not address one time revenues (except for estimating development impact fees) and focuses primarily on recurring revenues. The Study also identifies the general economic impacts on the Cities in terms of employment, gross receipts, and earnings creation for residents and workers of the Cities.

Fiscal Impacts:

The fiscal impacts projected are based generally on the *Multiplier Methodology* and in particular the *Per Capita-Employee ("Persons Served") Methodology*. To project most recurring fiscal factors, the Study employed the *Per Capita-Employee ("Persons Served") Methodology* and for major revenue sources, e.g. property tax and sales tax, the Study employed the *Case Study Methodology*. In order to provide conservative results, the Study does not assume that any of the facilities would generate "point of sale" sales tax revenues.

Economic Impacts:

Beacon Economic's economic impact analysis incorporates three stages of the development process: construction, tenant improvements, and operations. To conduct the economic impact analysis, the Study used Version 3 of the IMPLAN economic modeling system and operated under the assumption that each phase has three economic effects:

1. Direct: Caused by the additional output of goods and services from a logistics facility.
2. Indirect: Ripple effect among all of the industries whose outputs are used by the logistics center and its overall supply chain
3. Induced: Arise when employment increases in a region and stimulates greater household spending.

RESULTS:

Recurring Fiscal Impact:

The model reflects the estimated recurring surplus to the general fund of each of the Cities that will result from the development of a 500,000 sq. ft. logistics facility. Results are summarized below:

Fiscal Impact	Moreno Valley	Fontana	Jurupa Valley	Chino
	High-Tech	High-Tech	Low-Tech	Low-Tech
Total Annual Recurring Fund Revenues	\$113,532	\$100,510	\$45,537	\$111,411
Total Annual Recurring Fund Costs	(\$62,171)	(\$55,881)	(\$22,909)	(\$81,017)
Total Annual Recurring Surplus/(Deficit)	\$51,361	\$44,629	\$22,628	\$30,394
Total Annual Revenue/Cost Ratio	1.83	1.80	1.99	1.38

Each jurisdiction will enjoy a positive fiscal impact as a result of new development of a 500,000 sq. ft. logistics facility. As an example, in the case of Jurupa Valley, for every one dollar incurred by the City in providing City services to the facility, the City will get \$1.99 back in new facility revenues.

Development Impact Fees:

Development fees are one-time revenues to the City. New development is generally required to pay these fees prior to the construction of a project. Although non-recurring and not technically a part of the fiscal or economic impacts presented by the Study, they are substantial as indicated in the table below:

Impact Fees	Moreno Valley	Fontana	Jurupa Valley	Chino
	High-Tech	High-Tech	Low-Tech	Low-Tech
Capital Facilities Fees	\$1,671,440	\$1,920,560	\$1,152,898	\$3,094,800
Schools Fees	\$255,000	\$255,000	\$255,000	\$255,000
Sewer/Water Connection Fees	\$234,838	\$452,090	\$329,169	\$467,725
Other/Misc. Fees	\$537,194	\$298,813	\$426,545	N/A
Total Development Impact Fees	\$2,698,472	\$2,926,463	\$2,163,612	\$3,817,525

Recurring Economic Impact:

Each of the tenants for the logistics facility will have ongoing operating expenses. These annual operating costs drive additional spending in the economy. The spending creates recurring economic impacts that once again have direct, indirect, and induced expenses. The results of the economic phase of Study are summarized below:

Recurring Economic Impact	Moreno Valley	Fontana	Jurupa Valley	Chino
	High-Tech	High-Tech	Low-Tech	Low-Tech
Direct Number of Employees within the City	192	192	305	305
Indirect/Induced Number of Employees within the City	71	65	63	76
Total Recurring Number of Employees within the City	263	257	368	381
Additional Jobs Outside City within the Inland Empire	40	46	42	29
Total Recurring Number of Employees	303	303	410	410
Direct Economic Impact	\$19,162,236	\$19,162,236	\$18,161,890	\$18,161,890
Indirect/Induced Economic Impact	\$8,129,476	\$8,635,107	\$7,412,746	\$9,767,757
Total Recurring Economic Impact within the City	\$27,291,712	\$27,797,343	\$25,574,636	\$27,919,647
Additional Impact Outside City within the Inland Empire	\$4,380,235	\$3,874,604	\$4,443,906	\$2,098,895
Total Recurring Economic Impact	\$31,671,947	\$31,671,947	\$30,018,542	\$30,018,542

One-Time/Construction Economic Impact:

Each of the tenants for the logistics facility will also have substantial construction, development, and tenant improvement expenses. Again, the spending creates economic impacts that have direct, indirect, and induced expenses. The results of the economic phase of the Study are summarized below:

Total One-Time Economic Impact	Moreno Valley	Fontana	Jurupa Valley	Chino
	High-Tech	High-Tech	Low-Tech	Low-Tech
Direct Number of Employees within the City	403	403	304	305
Indirect/Induced Number of Employees within the City	138	133	112	139
Total One-Time Number of Employees within the City	541	536	416	444
Additional Jobs Outside City within the Inland Empire	93	98	63	35
Total One-Time Number of Employees	634	634	479	479
Direct Economic Impact	\$50,000,000	\$50,000,000	\$37,500,000	\$37,500,000
Indirect/Induced Economic Impact	\$16,457,246	\$18,750,303	\$14,366,256	\$18,335,554
Total One-Time Economic Impact within the City	\$66,457,246	\$68,750,303	\$51,866,256	\$55,835,554
Additional Impact Outside City within the Inland Empire	\$10,717,683	\$8,424,626	\$6,045,116	\$2,075,819
Total One-Time Economic Impact	\$77,174,929	\$77,174,929	\$57,911,372	\$57,911,372

Simply put, the logistics industry serves as an invaluable anchor for the Inland Empire economy. The increase in the volume of trade in the Southern California customs districts has created stronger demand for logistics services. As a result, the logistics industry in the Inland Empire has expanded over the past few decades and significantly enhanced the regional economy through improved productivity and higher wages. As can be seen by the results of this Study, individual developments alone provide a large, long term economic benefit for the Cities where they are located as well as their surrounding area.

About Andrew Chang & Company, LLC:

The professionals at Andrew Chang & Company work with our clients to achieve tangible results by combining best-in-class research and analyses with unique insights into public policy and government operations and business strategy. Using advanced economic, statistical and business administration techniques, we provide strategy and operations consulting to Fortune 1000 firms and provide policy, economic, fiscal and operations consulting to public sector agencies and non-profit organizations. We are a California State Department of General Services certified small business and CMAS vendor. Andrew Chang & Company are recognized experts in State and local government revenue projection modeling and have performed revenue projection modeling for cities and State government agencies throughout California. The professional qualifications of the staff who worked on this report are set forth as Exhibit A.

**Proposed Stratford Ranch Industrial Development in the City of Perris:
Fiscal & Economic Impacts
(Key Findings)**

- The Stratford Ranch Industrial Development will increase City revenues by approximately \$216,500 or 0.4% annually. Over a 5-year period after construction, City revenues will increase by \$1.1 million cumulatively. The new revenue from the development will be driven by: property tax, business license fees, and indirect sales tax.
- During the construction phase, 486 direct jobs will be created that will support 595 indirect jobs in the City and 933 indirect jobs in the economic region. Additionally, over a two-year period, construction spending will add an additional \$74.8 million to local output and \$306.2 million to regional output. Construction spending will also increase local earnings by \$21.4 million and regional earnings by \$87.6 million.
- After construction, the development will create 685 new on-site jobs and have estimated annual revenue of \$19.2 million. The 685 new jobs will support 841 indirect jobs within the City and 1066 jobs within the economic region. The revenue generated from the development will add an additional \$27.1 million to the local economy and \$34.3 million to the regional economy. Additionally, local earnings will increase by \$9 million and regional earnings will increase by \$11.4 million

**Proposed Stratford Ranch Industrial Development in the City of Perris:
Fiscal & Economic Impacts**

1. Scope

The proposed Stratford Ranch Industrial project is located in the northern portion of the City of Perris and totals approximately 133.3 gross acres (Figure 1.1). The project involves development of approximately 79.23 net acres for two high-cube logistics warehouse buildings totaling up to 1,712,880 square feet, improvements to the adjacent Perris Valley Storm Channel (PVSC) including utility roads covering approximately 45.7 acres and construction of the Lateral D Channel. In summary, the project site will be developed with high-cube logistics warehouse uses; street, water, drainage, and sewer infrastructure to accommodate the logistics warehouse project; widening and associated improvements to the PVSC; and Lateral D Channel from Redlands Avenue to the PVSC.

**Figure 1.1
Location of Development Site**

Source: AirPhotoUSA, 2008; Albert A Webb, Assoc., 2011; County of Riverside, 2011

The project vicinity is characterized as a mix of developed and undeveloped properties. Developed properties in the vicinity include an industrial/warehouse building in Moreno Valley to the northwest, agricultural irrigation ponds in Moreno Valley to the north, residential subdivisions to the northeast, an RV and trailer camping facility to the southwest, and a residential subdivision to the southeast. The nearest residences to the warehouse component of the project are located to the northeast at approximately 400 feet, to the east at approximately 1,720 feet, and to the southeast at approximately 1,700 feet.¹

In order to inform the decision making process, Andrew Chang and Company, LLC has been retained to determine the fiscal and economic impacts for the city and the region, resulting from the proposed development.

Importantly, the fiscal and economic benefits of the proposed Project as set forth in this report are independent of the payment of any host or franchise fee. In other words, this economic benefits analysis does not include any host or franchise fee payment.

¹ LSA Associates, Inc., "Stratford Ranch Industrial – City of Perris/Draft Environmental Impact Report," July 2012

3. Fiscal Impact

The fiscal impact of the proposed Stratford Ranch Industrial Development on the City of Perris will occur over two phases. The first phase will be temporary and occur during the projected two-year construction and development phase. The second phase will be indefinite and will begin once construction and development of the site is complete.

3.1 Construction and Development Phase

This analysis assumes that the construction and development of the project site will take two years to complete. It is projected that construction will begin at the start of 2013 and finish at the end of 2014. The fiscal impact of the construction and development period was measured by the increased revenues that the project would generate for the City. The increased revenue is driven by indirect sales tax, property tax and one-time development fees. Figure 3.1 outlines the respective annual revenue increases for each driver.

Figure 3.1
Construction Revenue Drivers

Source: United States Bureau of Economic Analysis, RIMS II Multipliers, 2008; Andrew Chang & Company Analysis

During the construction and development phase the largest revenue driver will be the one-time development fees. These fees include city fees, school fees, sewer and water fees and permits. Distributing these fees over the two-year construction period will increase City

revenues by \$5.2 million annually. Additionally, the City will receive \$65,100 each year in indirect sales tax resulting from the economic activity occurring during construction and \$21,700 each year from property taxes. Overall, City revenues will increase by \$11.2 million during the construction phase.

3.2 Post Build Out

After the development and construction of the site is completed, the two high-cubed warehouses will be fully functional and will continue to bring in additional revenues for the City. Figure 3.2 outlines the revenue drivers that will increase the City's revenues on an annual basis. As with the construction phase, additional City revenues will result from an increase in indirect sales tax and property taxes in addition to an annual business license fee.

Figure 3.2
Stratford Ranch Industrial Revenue Drivers

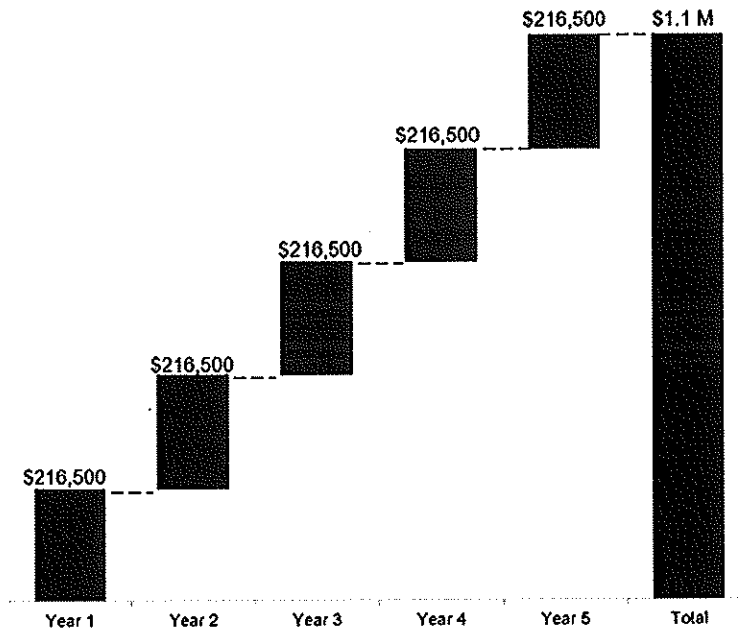

The largest revenue driver is the property tax. Currently the property tax for the proposed site totals approximately \$21,700. After the site is developed, it is estimated that the property tax will increase to \$178,500. After apportioning this increase to reflect the amount the City of Perris will actually receive, it is estimated that the increased property tax

will annually add \$156,800 to City revenues. Indirect sales tax is the second largest revenue driver. After taking the estimated earnings growth the City will get from the development and multiplying it by the effective sales tax rate, it is estimated that the development will generate an additional \$54,800 in indirect sales tax for the City. Lastly, increased City revenue from business license fees will total \$4,800 annually.

Figure 3.3 shows that after totaling up all the revenue drivers, it is estimated that the development will increase City revenues by approximately \$216,500 annually after the initial construction and development phase. In the City's 2011 Comprehensive Annual Financial Report, City revenues totaled \$54.2 million. A revenue increase of \$216,500 in FY 2013-14 (construction completion estimated to be end of 2013) will expand Perris revenues by 0.4%.

Figure 3.3
Yearly Revenue Added From Stratford Ranch Industrial

Source: United States Bureau of Economic Analysis, RIMS II Multipliers, 2008; Andrew Chang & Company Analysis

It is estimated that the additional revenue created by the development will remain stable on an annual basis. Therefore, over a five-year period after construction, City net revenues will increase by an estimated total of approximately \$1.1 million. Over a ten year period after construction, City net revenues will increase by approximately \$2.2 million.

4. Economic Impact

4.1 One-Time Construction & Development Impacts

Construction and development of the site will produce a temporary (2 year) economic stimulus as a result of one-time construction related spending. Construction and development costs are estimated to be approximately \$160 million and the number of on-site construction jobs is estimated to be 486. To assess the economic impact of the temporary construction and development spending, RIMS II construction multipliers adjusted for both the City of Perris and the region were used. As seen in Figure 4.1, the approximate 486 on-site construction jobs will support 595 indirect jobs in the local economy (City of Perris) and 933 indirect jobs in the region (Riverside, San Bernardino and Ontario Metropolitan Statistical Area (MSA)).

Figure 4.1
Jobs Created by Construction of Transfer Station

Source: United States Bureau of Economic Analysis, RIMS II Multipliers, 2008; Andrew Chang & Company Analysis

The construction spending generated at the site will ripple through both the local and regional economy and create a one-time increase in output and earnings. Figure 4.2 shows the indirect increase in output (GDP) and earnings that the construction and development will create. Each year during the two-year phase, construction will create an additional \$37.4 million in the local (City) economy and an additional \$153.1 million in the regional economy.

Furthermore, annual City personal earnings will increase by approximately \$10.7 million and regional personal earning will increase by approximately \$43.8 million. In total, over the two-year period the construction and development will increase City output by \$74.8 million and regional output by \$306.2 million as well as increase City personal earnings by \$21.4 million and regional earnings by \$87.6 million.

Figure 4.2
Annual Indirect GDP and Earnings from Transfer Station

	GDP	Earnings
City of Perris	\$37,400,000	\$10,700,000
Region	\$153,100,000	\$43,800,000

Source: United States Bureau of Economic Analysis, RIMS II Multipliers, 2008; Andrew Chang & Company Analysis

4.2 Economic Impacts of Stratford Ranch Industrial

Estimated annual revenue for the transfer station is approximately \$19.2 million annually. Additionally, approximately 685 permanent on-site jobs will be created. These 685 jobs will support 841 indirect jobs in the City of Perris and 1066 indirect jobs in the Riverside, San Bernardino and Ontario region (Figure 4.3).

Figure 4.3
Jobs Created by Transfer Station

Source: United States Bureau of Economic Analysis, RIMS II Multipliers, 2008; Andrew Chang & Company Analysis

As with the one-time construction spending, the new revenue generated by development will ripple through both the local and regional economy and create additional output and earnings. However, unlike the temporary construction impact, the impact from the development will be reoccurring as long as the warehouses are in operation. As seen in Figure 4.4, the development will create an additional \$27.1 million in local output and an additional \$34.3 million in regional output. Furthermore, the development will increase local earnings by \$9 million and regional earnings by \$11.4 million.

Figure 4.4

Source: United States Bureau of Economic Analysis, RIMS II Multipliers, 2008; Andrew Chang & Company Analysis

**Proposed Stratford Ranch Industrial Development in the City of Perris:
Fiscal & Economic Impacts
(Conclusion)**

- Development and construction of the site will create both temporary on-site jobs as well as indirectly support local and regional jobs. Additionally, construction spending will create a one-time stimulus to the local and regional economies.
- Once construction is completed, the facility will annually generate \$216,500 in additional City revenue. This increased revenue from the development will be driven by indirect sales tax, property tax, and business license fees. After ten years the Project will create approximately \$2.2 million in additional City revenue.
- The development will create approximately 685 new on-site jobs.
- The development will also indirectly support 841 local and 1066 regional jobs and add an additional \$27.1 million to the local economy and \$34.3 million to the regional economy. Additionally, local earnings will increase by \$9 million and regional earnings will increase by \$11.4 million.
- The development will ultimately spur the creation of both local and regional jobs, and there will be additional output and earnings to the local and regional economies.

Appendix A: Methodology

Local multiplier adjustment:

We used RIMS II economic multipliers to determine the impacts on employment, wages and economic productivity for the surrounding region, defined as the Riverside, San Bernardino and Ontario Metropolitan Statistical Area (MSA). To apportion the added economic activity, we used regional and local employment data to determine whether the City of Perris is a net 'importer' or 'exporter' for each economic segment. In segments where the ratio of Perris Employment / Regional Employment is greater than one, we assume the City is a net exporter and, thus, can fulfill the additional demands locally. In segments where the ration is less than one, the surrounding communities will need to fulfill the demand. In these segments, we use the ratio to deflate the multipliers appropriately for the local economic activity.

Effective Sales Tax & Indirect Sales Tax:

In order to determine the impact additional economic activity will have on local sales tax revenue, we calculated an effective sales tax. This accounts for the portion of the statutory sales tax that is captured by other government entities and the portion of activity that is spent in surrounding communities or elsewhere and, thus, not applicable to the local sales tax. To determine the effective sales tax, we divide the 2010 sales tax revenue collected by the City of Perris by its 2010 GDP. Indirect sales tax was calculated by taking the estimated City GDP growth and multiplying it by the effective sales tax rate.

Property Tax:

First the present day property value was estimated by the purchase price of \$22 million. Then the property value after build out was estimated by adding up the purchase price of \$20 million, the development cost of \$22 million, and the construction/building value of \$140 million. Second, we calculated the estimated property tax of both the current day value and the after build out value. The after build out value resulted in an increase property tax of \$156,800. We then took this estimate and apportioned it for the City of Perris based on the City's effective property tax rate.

Business License Fee:

To determine the business license fee for the warehouses the business license fee schedule of \$0.25 per \$1000 gross receipts was applied to the estimated facility annual revenue of \$19.2 million.

EXHIBIT A
ANDREW J. CHANG
Managing Director

PROFILE: Seventeen years of experience working with both high-level executives and operations staff on sensitive issues under tight deadlines in both the private and public sectors. Eight years strategy and operations consulting experience with emphasis on customer analysis and market entry strategies. Twelve years public policy development and implementation experience in California State government. Extensive experience working with a broad array of stakeholders to design, implement and monitor organizational initiatives.

PROFESSIONAL EXPERIENCE:

10/11 – present **Andrew Chang & Co, LLC** Sacramento, CA
Managing Director

- Provide market entry and strategy consulting to Fortune 1000 companies with an emphasis on private sector interaction with government. Private sector specialization in assessing and identifying new market opportunities and developing strategies to enter new markets. Public sector emphasis on public policy, economic and public finance analysis and operations management consulting.

07/09 – 10/11 **Chang & Adams Consulting** Sacramento, CA
Managing Director

- Provide market entry and strategy consulting to Fortune 1000 companies with an emphasis on private sector interaction with government. Private sector specialization in assessing and identifying new market opportunities and developing strategies to enter new markets. Public sector emphasis on public policy, economic and public finance analysis and operations management consulting.

04/07 – 07/09 **Forward Observer, Inc.** Sacramento, CA
Vice President

- Provide business intelligence and strategy consulting to Fortune 1000 companies to support market entry initiatives. Provide business-political risk and due diligence assessment for investment companies. Conduct fiscal, economic and public policy assessments.

08/04 – 04/07 **California Department of General Services** Sacramento, CA
Chief Deputy Director

- Chief Financial and Operations Officer of a state department with \$1 billion annual operating budget, thirteen business units and 4,000 employees. Oversaw the state's procurement and real estate operations. Also responsible for the state's telecommunications, automobile fleet, printing, warehousing, insurance and school construction operations.
- Special assignment to the Governor's Office to serve as chief staff economist for the Governor's Council of Economic Advisors. Facilitated Council meetings, prepared written briefings for the Governor on policy issues for consideration and assisted Council members with original research to present at the Council meetings.
- Special assignment to the California Department of Corrections and Rehabilitation to assess the agencies procurement operations and develop recommendations to improve procedures and operations.

06/00 – 08/04 **A.T. Kearney, Inc.** San Francisco, CA
Senior/Engagement Manager (06/02 – 08/04)

- Lead teams to develop strategies for new lines of business for a Fortune 1000 technology company, a national consumer products consortium and an international consumer products retail company.
- Lead teams to develop strategies to both acquire and sell technology services, R&D and manufacturing business units.
- Analytic and modeling methods subject matter expert. Finance and Accounting business processes subject matter expert.

Associate Management Consultant (06/00 – 06/02)

- Conduct research and develop recommendations for various clients in the high technology and consumer products industries.

- 08/03 – 10/03 **Californians for Schwarzenegger** (Temporary leave from A.T. Kearney, Inc.) Santa Monica, CA
Chief Economist/Deputy Policy Director
 ▪ Principal economic, tax, energy and budget staff advisor for Arnold Schwarzenegger's gubernatorial campaign.
- 12/98 – 02/00 **MGT of America, Inc.** Sacramento, CA
Senior Management Consultant
 ▪ Implemented studies to improve finances and operations for Cleveland Unified School District, Florida State University and the California Resources Agency.
- 10/95 – 12/98 **California State and Consumer Services Agency** Sacramento, CA
Assistant Secretary for Policy and Operations
 ▪ Executive of a government agency with an annual operating budget of \$1.3 billion, twelve departments and over 14,000 employees.
 ▪ Under supervision of the Secretary, guided agency and department policies, budgets and strategic plans.
- 05/95 – 10/95 **Personal Staff of Governor Pete Wilson** Sacramento, CA
Chief Economist/Deputy Issues Director
 ▪ Managed the development of national tax, trade, environment, agriculture and crime policies for Governor Pete Wilson's presidential campaign.
- 09/93 – 05/95 **California Office of the Governor** Sacramento, CA
Deputy Chief Economist
 ▪ Lead research teams to assess the economic and fiscal impact of tax, economic development, health care and immigration policies.
- EDUCATION:** **University of Michigan** Ann Arbor, MI
Master of Business Administration Essentials (1 of 30 A.T. Kearney consultants selected globally to participate in a tailored executive MBA program.)
- Georgetown University** Washington, DC
Master of Public Policy
- University of California** Berkeley, CA
Bachelor of Arts

<p>4.5.6.2B. The paleontological monitor shall be equipped to rapidly remove any large fossil specimens encountered during excavation. During monitoring, samples of soil shall be collected and processed to recover microvertebrate fossils. Processing shall include wet screen washing and microscopic examination of the residual materials to identify small vertebrate remains.</p>	<p>City of Moreno Valley Planning Division</p>	<p>Prior to grading and on-going during ground disturbing activities.</p>	<p>Prior to Issuance of Grading Permit</p>	<p>A qualified paleontologist(s) shall be retained by the applicant to monitor during rough grading.</p> <p>A report of findings shall be submitted to the City after the finalization of construction.</p>		<p>Withhold Grading Permit/ Issuance of a Stop Work Order</p>
<p>4.5.6.2C. If paleontological resources are unearthed or discovered during excavation of the project site, the monitoring for paleontological resources shall be conducted on a full-time basis for the duration of the rough-grading of the project site. The following recovery processes shall apply:</p> <ul style="list-style-type: none"> • Upon encountering a large deposit of bone, salvage of all bone in the area shall be conducted with additional field staff and in accordance with modern paleontological techniques. • All fossils collected during the project shall be prepared to a reasonable point of identification. Excess sediment or matrix shall be removed from the specimens to reduce the bulk and cost of storage. Itemized catalogs of all material collected and identified shall be provided to the museum repository along with the specimens. • A report documenting the results of the monitoring and salvage activities 	<p>City of Moreno Valley Planning Division</p>	<p>Ongoing during ground disturbing activities.</p>	<p>When paleontological resources are unearthed or discovered</p>	<p>A qualified paleontologist(s) shall be retained by the applicant to monitor full time during the duration of ground disturbing activities.</p> <p>A report of findings shall be submitted to the City after the finalization of construction.</p>		<p>Issuance of a Stop Work Order</p>

Mitigation Measure No. / Implementing Action	Responsible for Monitoring	Monitoring Frequency	Timing of Verification	Method of Verification	Verified Date/ Initials	Sanctions for Non-Compliance
<p>and the significance of the fossils shall be prepared.</p> <ul style="list-style-type: none"> All fossils collected during this work, along with the itemized inventory of these specimens, shall be deposited in a museum repository for permanent curation and storage. 						
<p>4.5.6.2D Prior to grading permit issuance, the City shall verify that the following note is included on the Grading Plan:</p> <p>“If any suspected paleontological resources are discovered during ground-disturbing activities, the construction supervisor is obligated to halt work in a 100-foot radius around the find and call a qualified paleontologist to the site to assess the significance of the find. A qualified paleontologist shall evaluate the suspected resource. If the paleontologist determines that the find is not unique, construction shall be permitted to proceed. However, if the paleontologist determines that further information is needed to evaluate significance, the City of Moreno Valley shall be notified and a treatment plan shall be prepared and implemented in consultation with the City to protect the identified paleontological resource(s) from damage and destruction.”</p>	<p>City of Moreno Valley Planning Division</p>	<p>Once before issuing grading permit.</p>	<p>Prior to Issuance of Grading Permit</p>	<p>Verify plans contain specified language.</p>		<p>Withhold Grading Permit</p>

HAZARDS AND HAZARDOUS MATERIALS						
4.6.6.1A Prior to issuance of a grading permit for the project, a qualified contractor shall test onsite soils for contamination by agricultural chemicals. If present in concentrations above established actionable levels or thresholds, these materials shall be removed and transported to an appropriate landfill by a licensed contractor. This measure shall be implemented to the satisfaction of the Building Division including written documentation of the disposal of any agricultural chemical residue in conformance with all applicable regulations.	City of Moreno Valley Planning Division	Prior to grading	Prior to Issuance of Grading Permit and receipt of supplemental Phase II soil testing	Applicant shall provide written results of subsequent soil testing for pesticides		Withhold Grading Permit
HYDROLOGY AND WATER QUALITY						
4.7.6.1A. Prior to grading plan approval and the issuance of a grading permit by the City, the project applicant shall provide evidence to the City that a Notice of Intent (NOI) has been filed with the Regional Water Quality Control Board for coverage under the State NPDES General Construction Permit for discharge of storm water associated with construction activities.	City of Moreno Valley Planning Division Building and Safety Engineering	Prior to grading	Prior to Issuance of Grading Permit and review of grading plan documents	Applicant shall provide written evidence that an NOI has been filed with the Regional Water Quality Control Board.		Withhold Grading Permit
4.7.6.1B. Prior to grading plan approval and the issuance of a grading permit by the City, the project applicant shall submit to the State Water Quality Control Board a Storm Water Pollution Prevention Plan (SWPPP). The SWPPP shall include a surface water control plan and erosion control plan citing specific measures to control on-site and off-site erosion during the entire grading and construction	City of Moreno Valley Planning Division Building and Safety Engineering	Prior to grading and onsite inspection during construction	Prior to Issuance of Grading Permit	Review of grading and construction documents and on-site inspection. Applicant shall provide written evidence that a SWPPP has been filed with the Regional Water		Withhold Grading Permit and/or Issuance of Stop Work Order

Mitigation Measure No. / Implementing Action	Responsible for Monitoring	Monitoring Frequency	Timing of Verification	Method of Verification	Verified Date/ Initials	Sanctions for Non-Compliance
<p>period. Additionally, the SWPPP shall identify structural and nonstructural BMPs to control sediment and nonvisible discharges from the site. BMPs to be implemented in the SWPPP may include, but shall not be limited to, the following:</p> <ul style="list-style-type: none"> Sediment discharges from the site may be controlled by the following: gravel bags, silt fences, straw wattles and temporary debris basins (if deemed necessary), and other discharge control devices. The construction and condition of the BMPs will be periodically inspected during construction, and repairs will be made when necessary as required by the SWPPP. No materials of any kind shall be placed in drainage ways. Materials that could contribute non-visible pollutants to storm water must be contained, elevated, and placed in temporary storage containment areas. All loose piles of soil, silt, clay, sand, debris, and other earthen material shall be protected per RWQCB standards to eliminate any discharge from the site. Stockpiles will be surrounded by silt fences. <p>The SWPPP will include inspection forms for routine monitoring of the site during the construction phase to ensure NPDES compliance.</p> <ul style="list-style-type: none"> Additional BMPs and erosion control measures will be documented in the 				Quality Control Board.		

Mitigation Measure No. / Implementing Action	Responsible for Monitoring	Monitoring Frequency	Timing of Verification	Method of Verification	Verified Date/ Initials	Sanctions for Non- Compliance
<p>SWPPP and utilized if necessary.</p> <ul style="list-style-type: none"> The SWPPP will be kept on site for the entire duration of project construction and will also be available to the local RWQCB for inspection at any time. <p>In the event that it is not feasible to implement the above BMPs, the City of Moreno Valley can make a determination that other BMPs will provide equivalent or superior treatment either on or off site.</p>						
<p>4.7.6.1C. Prior to the issuance of grading permits, the project applicant shall provide evidence to the City that the following provisions have been added to construction contracts for the project:</p> <ul style="list-style-type: none"> The Construction Contractor shall be responsible for performing and documenting the application of BMPs identified in the SWPPP. Weekly inspections shall be performed on sediment control measures called for in the SWPPP. Monthly reports shall be maintained by the Contractor and submitted to the City for inspection. In addition, the Contractor will also be required to maintain an inspection log and have the log on site to be reviewed by the City of Moreno Valley and the representatives of the Regional Water Quality Control Board. 	<p>City of Moreno Valley Planning Division</p> <p>Engineering</p>	<p>Once prior to grading</p>	<p>Prior to issuance of Grading Permit</p>	<p>City review and approval of grading plans.</p>		<p>Withhold Grading Permit</p>
<p>4.7.6.2A. Prior to grading plan approval and the issuance of a grading permit by the City, the project applicant shall receive approval from the City of Moreno Valley for a Final Water Quality Management Plan (F-WQMP). The F-</p>	<p>City of Moreno Valley Planning Division</p> <p>Engineering</p>	<p>Once prior to grading</p>	<p>Prior to issuance of Grading Permit</p>	<p>City review and approval of Final Water Quality Management Plan</p>		<p>Withhold Grading Permit</p>

Mitigation Measure No. / Implementing Action	Responsible for Monitoring	Monitoring Frequency	Timing of Verification	Method of Verification	Verified Date/ Initials	Sanctions for Non- Compliance
<p>WQMP shall specifically identify pollution prevention, site design, source control, and treatment control BMPs that shall be used on site to control predictable pollutant runoff in order to reduce impacts to water quality to the maximum extent practicable. BMPs to be implemented in the F-WQMP may include (but shall not be limited to) the following:</p> <ul style="list-style-type: none"> • Required landscaped areas shall not use decorative concrete or impervious surfaces. • Landscape plans shall incorporate native and drought-tolerant plants, trees, and shrubs. Landscaping shall be maintained weekly and maintenance contractor will properly dispose of all landscape wastes. • Irrigation systems shall be inspected monthly by the landscape contractor to check for over-watering, leaks, or excessive runoff to paved areas. Timers will be used to prevent over-watering. • Signage will be inspected and maintained twice a year for legibility. • Outdoor Loading/Unloading truck docks shall be kept in a clean and orderly condition with weekly inspections, continuous monitoring, and immediate clean up of spills. • Parking area maintenance shall be swept or vacuumed at least quarterly, if there is any trash or debris in between the routine sweeping, it shall be swept or 						

Mitigation Measure No. / Implementing Action	Responsible for Monitoring	Monitoring Frequency	Timing of Verification	Method of Verification	Verified Date/ Initials	Sanctions for Non-Compliance
<p>vacuumed immediately.</p> <ul style="list-style-type: none"> Trash enclosures will be inspected and maintained weekly or as needed by maintenance contractor. On-site extended detention/sedimentation basins and sand filters will treat all of the site's runoff via vegetated swales and will be maintained and inspected at least twice a year and prior to October 1. Additional BMPs will be documented in the WQMP and utilized if necessary. <p>In the event that it is not feasible to implement the above BMPs, the City of Moreno Valley can make a determination that other BMPs will provide equivalent or superior treatment either on or off site.</p>						
<p>4.7.6.3A. Prior to grading plan approval, the project proponent shall receive approval on a project-specific Final Hydrology Study, with supporting engineering calculations, from the City Engineer. The Final Hydrology Study shall incorporate relevant requirements identified by the City, and/or site-specific geotechnical investigations. A Preliminary Hydrology Study will be required prior to approval of the associated project tentative tract map.</p>	<p>City of Moreno Valley Planning Division</p> <p>Engineering</p>	<p>Once prior to tentative tract map approval</p> <p>Once prior to grading</p>	<p>Prior to tentative tract map approval</p> <p>Prior to issuance of Grading Permit</p>	<p>City review and approval of Preliminary Hydrology Study</p> <p>City review and approval of Final Hydrology Study</p>		<p>Withhold hearing to approve the tentative tract map.</p> <p>Withhold Grading Permit</p>

<p>buildings.</p> <ul style="list-style-type: none"> Install reflective roof material (SRI >45) and cool pavements. Install energy-efficient heating and cooling systems, appliances and equipment, and control systems. Install solar or light-emitting diodes (LEDs) for outdoor lighting for auto parking areas. 						
<p>4.13.6.1C. Prior to the issuance of occupancy permits, the project applicant shall provide evidence to the City of Moreno Valley that the following measures have been be incorporated into the operation of the project:</p> <ul style="list-style-type: none"> The project applicant shall use less than 3,900 Global Warming Potential (GWP) hydrofluorocarbon (HCF) refrigerants or natural refrigerants (ammonia, propane, carbon dioxide [CO₂]) for refrigeration and fire suppression equipment. Provide vegetative or man-made exterior wall shading devices for east-, south-, and west facing windows. Devise a comprehensive water conservation strategy appropriate for the project and its location. The strategy may include the following, plus other innovative measures that may be appropriate: <ul style="list-style-type: none"> Install drought-tolerant plants for landscaping. 	<p>City of Moreno Valley Building and Safety Planning Division</p>	<p>Once Prior to construction</p> <p>Once during on-site inspection</p>	<p>Prior to issuance of occupancy permit</p>	<p>Review of construction documents and on-site inspection</p>		<p>Withhold Occupancy Permit</p>

Mitigation Measure No. / Implementing Action	Responsible for Monitoring	Monitoring Frequency	Timing of Verification	Method of Verification	Verified Date/ Initials	Sanctions for Non- Compliance
<ul style="list-style-type: none"> ○ Use reclaimed water for landscape irrigation within the project. Install the infrastructure to deliver and use reclaimed water. ○ Install water-efficient irrigation systems, such as weather-based and soil-moisture-based irrigation controllers and sensors for landscaping according to the California Department of Water Resources Model Efficient Landscape Ordinance. ● Provide employee education about reducing waste and available recycling services. 						

RESOLUTION NO. 2014-57

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING A GENERAL PLAN AMENDMENT (PA07-0082) FROM R15, R5, AND RA-2 LAND USE DESIGNATIONS TO BUSINESS PARK FOR APPROXIMATELY 71 ACRES FOR DEVELOPMENT OF A 2,244,419 SQUARE FOOT INDUSTRIAL PARK LOCATED WITHIN ASSESSOR'S PARCEL NUMBERS 4880330-011, -012, -013, -017, -018, -019, -020 AND -021, AS SHOWN ON THE GENERAL PLAN AMENDMENT MAP INCLUDED AS EXHIBIT A

WHEREAS, the applicant, Prologis, filed Application No. PA07-0082, requesting a General Plan Amendment for approximately 71 acres from R15, R5, and RA-2 land use designations to Business Park for certain property, as described in the title of this resolution and the attached Exhibit A. A General Plan Amendment is also required for proposed changes to the City's Circulation Element and the Master Plan of Trails; and

WHEREAS, the Planning Commission of the City of Moreno Valley held public hearings on March 13, 2014 and April 24, 2014 to consider the subject application and all of the environmental documentation prepared for the project and recommended City Council approval on April 24th; and

WHEREAS, on June 24, 2014, the City Council of the City of Moreno Valley held a public hearing to consider the subject application and all of the environmental documentation prepared for the project; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred; and

WHEREAS, the City Council considered the Final Environmental Impact Report prepared for the project for the purpose of compliance with the California Environmental Quality Act (CEQA). The above application shall not be approved unless the Final Environmental Impact Report (P07-186) is certified and approved; and

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

A. This City Council hereby specifically finds that all of the facts set forth above in this Resolution are true and correct.

B. Based upon substantial evidence presented to this City Council during the above-referenced meeting on June 24, 2014, including written and oral staff reports, and the record from the public hearing, this City Council hereby specifically finds as follows:

1. Conformance with General Plan Policies – The proposed general plan amendment is consistent with the goals, objectives, policies and programs of the General Plan.

FACT: The project proposes a General Plan Amendment for approximately 71 acres from R15, R5, and RA-2 land use designations to Business Park for development of 2,244,419 square foot industrial park. Potential impacts to traffic and air quality have been examined through the preparation of a Final Environmental Impact Report. The expansion of the Business Park land use designation as proposed by the General Plan amendment would provide employment opportunities for residents of Moreno Valley with the establishment of industrial activities that have good access to the regional transportation system, and is consistent with the goals, objectives, policies and program of the Community Development Element of the General Plan.

The changes to the City's Circulation Element and Master Plan of Trails have also been reviewed for conformance with the goals, objectives, policies and programs of the Circulation Element and the Parks, Recreation and Open Space Element of the General Plan.

2. Health, Safety and Welfare – The proposed general plan amendment will not be detrimental to the public health, safety or welfare.

FACT: The proposed General Plan Amendment will not adversely affect the public health, safety or general welfare. A Final EIR has been prepared to address the potential environmental impacts of the General Plan Amendment in accordance with the provisions of the California Environmental Quality Act (CEQA). Subject to approval of the Final EIR, the proposed General Plan Amendment will not have a significant affect on public health or be materially injurious to surrounding properties or the environment as a whole.

APPROVED AND ADOPTED this 24th day of June, 2014.

ORDINANCE NO. 880

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING A ZONE CHANGE (PA07-0081) FROM BUSINESS PARK, BUSINESS PARK MIXED-USE, R15, R5, AND RA-2 TO LIGHT INDUSTRIAL FOR APPROXIMATELY 122 ACRES FOR DEVELOPMENT OF A 2,244,419 SQUARE FOOT INDUSTRIAL PARK LOCATED WITHIN ASSESSOR'S PARCEL NUMBERS 488-330-011, 012, -013, -017, -018, -019, -020, AND -021, AS SHOWN ON THE ZONE CHANGE MAP INCLUDED AS EXHIBIT A

The City Council of the City of Moreno Valley does ordain as follows:

SECTION 1 GENERAL:

1.1 The applicant, Prologis, has filed application PA07-0081, requesting an amendment requesting an Amendment to Pages 61 and 74 of the Official Zoning Atlas, and proposes a Zone Change from existing Business Park, Business Park Mixed-use, R15, R5, and RA-2 land use designations to Light Industrial for certain property as described in this ordinance.

1.2 Pursuant to the provisions of the law, a public hearing was held before the City Council on June 24, 2014, for deliberations and decision.

1.3 The matter was fully discussed, and the public and other agencies presented testimony and documentation.

1.4 An Environmental Impact Report is proposed for the project under California Environmental Quality Act (CEQA) guidelines.

SECTION 2 FINDINGS:

2.1 Based upon substantial evidence presented to this City Council during the above-referenced meeting on June 24, 2014, including written and oral staff reports, and the record from the public hearing, this Planning Commission hereby specifically finds as follows:

1. Conformance with General Plan Policies – The proposed amendment is consistent with the General Plan, and its goals, objectives, policies and programs.

FACT: The project proposes a change to the Zoning Atlas for properties located within Assessor's Parcel Numbers 488-330-011, 012, -013, -017, -

1

Ordinance No. 880

Date Adopted: July 8, 2014

018, -019, -020, and -021 from Business Park, Business Park Mixed-use, R15, R5, and RA-2 land use designations to Light Industrial for development of 2,244,419 square foot industrial park on approximately 122 acres. A Final EIR has been prepared to address the potential environmental impacts of the Zone Change in accordance with the provisions of the California Environmental Quality Act (CEQA). Subject to approval of the General Plan Amendment and Final Environmental Impact Report, the proposed Zone Change is consistent with and does not conflict with the goals, objective, policies or programs of the General Plan.

2. Health, Safety and Welfare – The proposed amendment will not adversely affect the public health, safety or general welfare.

FACT: The proposed Zone Change will not adversely affect the public health, safety or general welfare. A Final EIR has been prepared to address the potential environmental impacts of the Zone Change in accordance with the provisions of the California Environmental Quality Act (CEQA). Subject to approval of the Final EIR, the proposed Zone Change will not have a significant affect on public health or be materially injurious to surrounding properties or the environment as a whole.

3. Conformance with the Zoning Regulations – The proposed pre-zoning is consistent with the purposes and intent of Title 9 of the City of Moreno Valley Municipal Code.

FACT: The Zone Change application has satisfied the City’s Municipal Code and other regulations to change the zone. As proposed, the zone change from Business Park, Business Park Mixed-use, R15, R5, and RA-2 land use designations to Light Industrial for the 122 acre project site is consistent with the purposes and intent of Title 9.

SECTION 3 AMENDMENT OF THE OFFICIAL ZONING ATLAS:

3.1 The City of Moreno Valley Official Zoning Atlas, as adopted by Ordinance No. 359, on April 14, 1992, of the City of Moreno Valley, and as amended thereafter from time to time by the City Council of the City of Moreno Valley, is further amended by placing in effect the zone or zone classification as shown on the attached map (marked "Exhibit A" and included herein by reference and on file in the office of the City Clerk).

SECTION 4 EFFECT OF ENACTMENT:

4.1 Except as specifically provided herein, nothing contained in this ordinance shall be deemed to modify or supersede any prior enactment of the City Council which addresses the same subject addressed herein.

SECTION 5 NOTICE OF ADOPTION:

5.1 Within fifteen days after the date of adoption hereof, the City Clerk shall certify to the adoption of this ordinance and cause it to be posted in three public places within the city.

SECTION 6 EFFECTIVE DATE:

6.1 This ordinance shall take effect thirty days after the date of its adoption.

APPROVED AND ADOPTED this 8th day of July, 2014.

RESOLUTION NO. 2014-58

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING MASTER PLOT PLAN APPLICATION PA07-0083 AND PLOT PLAN APPLICATIONS PA07-0158 THROUGH PA07-0162 FOR DEVELOPMENT OF THE 2,244,419 SQUARE FOOT PROLOGIS EUCALYPTUS INDUSTRIAL PARK PROJECT WITHIN THE 122 ACRES OF ASSESSOR'S PARCEL NUMBERS 488-330-011, 012, -013, -017, -018, -019, -020, AND -021, SUBJECT TO THE CONDITIONS OF APPROVAL INCLUDED AS EXHIBIT A

Section 1:

WHEREAS, Prologis, has filed an application for the approval of Master Plot Plan PA07-0083 for development of an industrial park to include a total of 2,244,419 square feet of warehouse distribution space on 122 acres. This application also includes Building #2 on Parcel 2 of TPM 35679 for development of 862,035 square feet on 39.32. Related applications include Plot Plan PA07-0158 for Building #1 on Parcel 1 of TPM 35679 for development of a 168,342 square foot warehouse distribution building on 8.84 acres; Plot Plan PA07-0159 for Building #3 on Parcel 3 of TPM 35679 for development of a 160,106 square foot warehouse distribution building on 8.5 acres; Plot Plan PA07-0160 for Building #4 on Parcel 4 of TPM 35679 for development of a 339,015 square foot warehouse distribution building on 15.66 acres; Plot Plan PA07-0161 for Building #5 on Parcel 5 of TPM 35679 for development of a 390,102 square foot warehouse distribution building on 19.29 acres; and Plot Plan PA07-0162 for Building #6 on Parcel 6 of TPM 35679 for development of a 325,038 square foot warehouse distribution building on 17.55 acres, as described in the title of this Resolution; and

WHEREAS, on June 24, 2014, the City Council held a public hearing to consider the project; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred; and

WHEREAS, there is hereby imposed on the subject development project certain fees, dedications, reservations and other exactions pursuant to state law and City ordinances; and

WHEREAS, pursuant to Government Code Section 66020(d)(1), NOTICE IS HEREBY GIVEN that this project is subject to certain fees, dedications, reservations and other exactions as provided herein.

1
Resolution No. 2014-58
Date Adopted: June 24, 2014

NOW, THEREFORE, BE IT RESOLVED, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

A. This City Council hereby specifically finds that all of the facts set forth above in this Resolution are true and correct.

B. Based upon substantial evidence presented to this City Council during the above-referenced meeting on June 24, 2014, including written and oral staff reports, and the record from the public hearing, this City Council hereby specifically finds as follows:

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Conformance with General Plan Policies – The proposed use is consistent with the General Plan, and its goals, objectives, policies and programs.

FACT: Subject to approval of the General Plan Amendment (PA07-0082), the proposed applications would be consistent with the General Plan. The General Plan encourages a mix of industrial uses to provide a diversified economic base and ample employment opportunities. Stated policies require the avoidance of adverse impacts on surrounding properties and the screening of industrial uses to reduce glare, noise, dust, vibrations and unsightly views. The project as designed and conditioned would achieve the objectives of the City of Moreno Valley's General Plan. The proposed project is consistent with the General Plan and does not conflict with the goals, objectives, policies, and programs established within the Plan.

2. Conformance with Zoning Regulations – The proposed use complies with all applicable zoning and other regulations.

FACT: The project site is currently zoned Business Park, Business Park Mixed-Use, R15, R5 and RA-2. The project proposes a Zone Change to LI to allow for buildings larger than 50,000 square feet. Subject to approval of the related General Plan Amendment (PA07-0082) and Zone Change application (PA07-0081) the proposed use will comply with all applicable zoning other regulations. The project is designed in accordance with the provisions of Chapter 9.05 Industrial Districts of the City's Municipal Code.

3. Health, Safety and Welfare – The proposed use will not be detrimental to the public health, safety or welfare or materially injurious to properties or improvements in the vicinity.

FACT: The proposed 2,244,419 square foot warehouse facility as designed and conditioned will not adversely affect the public health, safety or general welfare. The project has been designed consistent with the

2
Resolution No. 2014-58
Date Adopted: June 24, 2014

City's Municipal Code. A Final EIR has been prepared to address the potential environmental impacts of the project in accordance with the provisions of the California Environmental Quality Act (CEQA).

4. Location, Design and Operation – The location, design and operation of the proposed project will be compatible with existing and planned land uses in the vicinity.

FACT: The project is located on the south side of State Route 60 and east of the Moreno Valley Auto Mall. Land uses to the north include the freeway with Business Park and commercial zoned land within the Auto Mall to the west and Light Industrial and RA-2 zoned land to the east. South of the project site on the other side of Eucalyptus Avenue/Future Encilia Avenue is vacant RA-2 zoned land with tract homes in the RA-2 zone across the channel from the project site. The proposed warehouse distribution use is a permitted use in both the BP and LI zones, but the size of the buildings proposed by the project requires a Zone Change to LI for the warehouse facilities over 50,000 square feet. The project as designed and conditioned and subject to approval of the above mentioned Zone Change, is compatible with existing and proposed land uses in the vicinity.

Section 2:

A. FEES, DEDICATIONS, RESERVATIONS, AND OTHER EXACTIONS

1. FEES

Impact, mitigation and other fees are due and payable under currently applicable ordinances and resolutions. These fees may include but are not limited to: Development Impact Fee, Transportation Uniform Mitigation Fee (TUMF), Multi-species Habitat Conservation Plan (MSHCP) Mitigation Fee, Stephens Kangaroo Habitat Conservation fee, Underground Utilities in lieu Fee, Area Drainage Plan fee, Bridge and Thoroughfare Mitigation fee (Future) and Traffic Signal Mitigation fee. The final amount of fees payable is dependent upon information provided by the applicant and will be determined at the time the fees become due and payable.

Unless otherwise provided for by this resolution, all impact fees shall be calculated and collected at the time and in the manner provided in Chapter 3.32 of the City of Moreno Valley Municipal Code or as so provided in the applicable ordinances and

3
Resolution No. 2014-58
Date Adopted: June 24, 2014

resolutions. The City expressly reserves the right to amend the fees and the fee calculations consistent with applicable law.

2. DEDICATIONS, RESERVATIONS, AND OTHER EXACTIONS

The adopted Conditions of Approval for PA07-0083 and PA07-0158 through PA07-0162, incorporated herein by reference, may include dedications, reservations, and exactions pursuant to Government Code Section 66020 (d) (1).

3. CITY RIGHT TO MODIFY/ADJUST; PROTEST LIMITATIONS

The City expressly reserves the right to establish, modify or adjust any fee, dedication, reservation or other exaction to the extent permitted and as authorized by law.

Pursuant to Government Code Section 66020(d)(1), NOTICE IS FURTHER GIVEN that the 90 day period to protest the imposition of any impact fee, dedication, reservation, or other exaction described in this resolution begins on the effective date of this resolution and any such protest must be in a manner that complies with Section 66020(a) and failure to timely follow this procedure will bar any subsequent legal action to attack, review, set aside, void or annul imposition.

The right to protest the fees, dedications, reservations, or other exactions does not apply to planning, zoning, grading, or other similar application processing fees or service fees in connection with this project and it does not apply to any fees, dedication, reservations, or other exactions of which a notice has been given similar to this, nor does it revive challenges to any fees for which the Statute of Limitations has previously expired.

BE IT FURTHER RESOLVED that the City Council HEREBY APPROVES Resolution No. 2014-58

APPROVING Master Plot Plan application PA07-0083 and Plot Plan applications PA07-0158 through PA07-0162, subject to the attached conditions of approval included as Exhibit A.

- Plot Plan PA07-0158 for Building #1 on Parcel 1 of TPM 35679 for development of a 168,342 square foot warehouse distribution building on 8.84 acres with 100 required employee parking spaces and 21 required truck parking spaces;
- Plot Plan PA07-0159 for Building #3 on Parcel 3 of TPM 35679 for development of a 160,106 square foot warehouse distribution building on 8.5 acres with 98 required employee parking spaces and 20 required truck parking spaces;
- Plot Plan PA07-0160 for Building #4 on Parcel 4 of TPM 35679 for development of a 339,015 square foot warehouse distribution building on 15.66 acres with 180 required employee parking spaces and 36 required truck parking spaces;
- Plot Plan PA07-0161 for Building #5 on Parcel 5 of TPM 35679 for development of a 390,102 square foot warehouse distribution building on 19.29 acres with 173 required employee parking spaces and 53 required truck parking spaces; and
- Plot Plan PA07-0162 for Building #6 on Parcel 6 of TPM 35679 for development of a 325,038 square foot warehouse distribution building on 17.55 acres with 176 required employee parking spaces and 53 required truck parking spaces.

- P3. No building permits shall be issued for the warehouse distribution buildings approved for Plot Plan PA07-0158 and Plot Plan PA07-0159 during the initial 18 months of this approval.
- P4. A mitigation monitoring fee, as provided by City ordinance, shall be paid by the applicant within 30 days of project approval. No City permit or approval shall be issued until such fee is paid. (CEQA)
- P5. The design of all swales and basins that are visible from the public right-of-way shall be integrated with the surrounding landscape areas.
- P6. A double row of citrus trees shall be planted along the sites State Route 60 frontage. Citrus trees shall also be planted along the Quincy Channel, and in other areas throughout the industrial park.

PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 9 OF 67

- P7. Development of the industrial park is subject to approval of Tentative Parcel Map No. 35679 and the subsequent recordation of this map.
- P8. Bicycle racks shall be provided at a minimum of five (5) percent of the required vehicular parking and shall be located near the office area(s). Eight percent of required parking shall be designated for any combination of low-emitting, fuel efficient and carpool/vanpool vehicles for all new nonresidential development.
- P9. The gates into truck loading and parking areas that are within view of a public street shall be of solid metal construction or wrought iron with mesh to screen the interior of the loading area.
- P10. This project shall comply with South Coast Air Quality Management District (SCAQMD) rules related to dust generation (Rule 403) and the use of architectural coatings (Rule 1113).
- P11. Screening walls of decorative block or concrete tilt-up construction shall be provided to fully screen the truck loading and parking area for from view from Fir/Eucalyptus Avenue and State Route 60.
- P12. Enhanced landscape shall be provided in the planter areas near each driveway and near the office portions of the facilities.
- P13. All loudspeakers, bells, gongs, buzzers or other noise attention devices installed on the project site shall be designed to ensure that the noise level at all property lines will be at or below 55 dBA for consistency with the Municipal Code.
- P14. Loading or unloading activities shall be conducted from the truck bays or designated loading areas only. (MC 9.10.140, CEQA)
- P15. No outdoor storage is permitted on the project site, except for truck and trailer storage in designated areas within the screened truck courts.
- P16. If the proposed project requires blasting, it shall be used only as a last resort. In such cases, it shall be approved by the Fire Marshall, and the developer shall comply with the current City ordinance governing blasting. (Ord)
- P17. (CO) Prior to issuance of a Certificate of Occupancy, the developer shall install a segment of multi-use trail on the north side of Fir

Avenue/Eucalyptus Avenue from Quincy Channel to Fire Station #58.

General Conditions

- P18. This approval shall expire three years after the approval date of this project unless used or extended as provided for by the City of Moreno Valley Municipal Code; otherwise it shall become null and void and of no effect whatsoever. Use means the beginning of substantial construction contemplated by this approval within the three-year period, which is thereafter pursued to completion, or the beginning of substantial utilization contemplated by this approval. (MC 9.02.230)
- P19. The project shall be developed in accordance with the approved plans on file in the Community & Economic Development Department - Planning Division, the Municipal Code regulations, General Plan, and the conditions contained herein. Prior to any use of the project site or business activity being commenced thereon, all Conditions of Approval shall be completed to the satisfaction of the Planning Official. (MC 9.14.020)
- P20. The developer, or the developer's successor-in-interest, shall be responsible for maintaining any undeveloped portion of the site in a manner that provides for the control of weeds, erosion and dust. (MC 9.02.030)
- P21. A drought tolerant, low water using landscape palette shall be utilized throughout the project to the extent feasible.
- P22. All landscaped areas shall be maintained in a healthy and thriving condition, free from weeds, trash and debris. (MC 9.02.030)
- P23. Any signs indicated on the submitted plans are not included with this approval. Any signs, whether permanent (e.g. wall, monument) or temporary (e.g. banner, flag), proposed for this development shall be designed in conformance with the sign provisions of the Development Code or approved sign program, if applicable, and shall require separate application and approval by the Planning Division. **No signs are permitted in the public right of way.** (MC 9.12)

Prior to Issuance of Grading Permits

- P24. (GP) All site plans, grading plans, landscape and irrigation plans, fence/wall plans, lighting plans and street improvement plans shall be coordinated for consistency with this approval.
- P25. (GP) If potential historic, archaeological, or paleontological resources are uncovered during excavation or construction activities at the project site, work in the affected area will cease immediately and a qualified person (meeting the

PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 11 OF 67

Secretary of the Interior's standards (36CFR61)) shall be consulted by the applicant to evaluate the find, and as appropriate recommend alternative measures to avoid, minimize or mitigate negative effects on the historic, prehistoric, or paleontological resource. Determinations and recommendations by the consultant shall be implemented as deemed appropriate by the Community & Economic Development Director, in consultation with the State Historic Preservation Officer (SHPO) and any and all affected Native American Tribes before any further work commences in the affected area.

If human remains are discovered, **no further disturbance shall occur until the County Coroner has made necessary findings as to origin.** If the **County Coroner** determines that the remains are potentially Native American, the California Native American Heritage Commission **shall be contacted within a reasonable timeframe to identify the "most likely descendant."** The **"most likely descendant"** shall then make recommendations, and engage in consultations concerning the treatment of the remains (California Public Resources Code 5097.98). (GP Objective 23.3, CEQA).

- P26. (GP) Prior to issuance of grading permits, the developer shall pay the applicable Stephens' Kangaroo Rat (SKR) Habitat Conservation Plan mitigation fee. (Ord)
- P27. (GP) Prior to approval of any grading permit, local and master-planned multi-use trail easements shall be shown in accordance with the City's Master Trail Plan.
- P28. (GP) For projects abutting State Highway 60, a sixteen foot reservation for future right-of-way shall be provided.**
- P29. (GP) Prior to approval of any grading permits, plans for any security gate system shall be submitted to the Planning Division for review and approval.**
- P30. (GP) Prior to issuance of any grading permits, mitigation measures contained in the Mitigation Monitoring Program approved with this project shall be implemented as provided therein.**
- P31. (GP) Prior to the issuance of grading permits, the grading plan shall show decorative concrete paving for all driveway ingress/egress locations of the project. Accessible pedestrian pathways interior to the site cannot be painted. If delineation is necessary, then an alternative material is required.**
- P32. (GP) Prior to the issuance of a grading permit, all required planter areas, curbs, including twelve-inch concrete step outs, and required parking space striping shall be shown on the precise grading plan.**
- P33. (GP) Prior to the issuance of grading permits, the following burrowing owl**

survey requirements shall be incorporated into the grading plans in accordance with the Riverside County Multi-species Habitat Conservation Plan: Within 30 days of and prior to disturbance, a burrowing owl focused survey shall be conducted by a qualified biologist using accepted protocols. The survey shall be submitted to the Planning Division for review and approval.

- P34. (GP) Prior to any physical disturbance of any natural drainage course, or any wetland determined to contain riparian vegetation, the applicant shall obtain a stream bed alteration agreement or permit, or a written waiver of the requirement for such an agreement or permit, from both the California Department of Fish and Game and the U.S. Army Corps of Engineers. Written verification of such a permit or waiver shall be provided to both the Planning Division and the Public Works Department - Land Development Division. (CEQA, State and Federal codes)
- P35. (GP) Prior to issuance of grading permits, landscape plans (trees, shrubs and groundcover) for basins maintained by an POA or other private entity shall be submitted to the Planning Division for review and approval for the sides and/or slopes. A hydroseed mix with irrigation is acceptable for the bottom of all the basin areas. All detention basins shall include trees, shrubs and groundcover up to the concreted portion of the basin. A solid decorative wall with pilasters, tubular steel fence with pilasters or other fence or wall approved by the Community Development Director is required to secure all water quality and detention basins more than 18 inches in depth.
- P36. (GP) Prior to issuance of grading permits, the developer shall submit wall/fence plans to the Planning Division for review and approval as follows:
- A. A maximum 3 foot high decorative wall in lieu of a hedge or berm may be placed in setback areas adjacent to a parking lot facing a public right-of-way.
 - B. Any proposed retaining walls shall also be decorative in nature, while the combination of retaining and other walls on top shall not exceed the height requirement per the Municipal Code.
 - C. A 14 foot tall solid wall of decorative block with pilasters and a cap or concrete tilt-up construction shall be provided to screen the trucks, parked trailers and the loading areas and loading docks.
 - D. A four foot tall three rail fence per Parks and Community Services standards is required adjacent the multi-use trail.
 - E. If fencing is required around basins, then fence shall be wrought iron with pilasters or a four foot three rail fence to match the trail

fencing.

- P37. (GP) Prior to approval of any grading permits, water well(s) on the site shall be closed or maintained in accordance with requirements of the Riverside County Environmental Health Department. (CEQA)**

Prior to Issuance of Building Permits

- P38. (BP) Prior to issuance of building permits, the Planning Division shall review and approve the location and method of enclosure or screening of transformer cabinets, commercial gas meters and back flow preventers as shown on the final working drawings. Location and screening shall comply with the following criteria: transformer cabinets and commercial gas meters shall not be located within required setbacks and shall be screened from public view either by architectural treatment or landscaping; multiple electrical meters shall be fully enclosed and incorporated into the overall architectural design of the building(s); back-flow preventers shall be screened by landscaping. (GP Objective 43.30, DG)
- P39. (BP) Prior to issuance of building permits, screening details shall be addressed on plans for roof top equipment and trash enclosures submitted for Planning Division review and approval. All equipment shall be completely screened so as not to be visible from public view, and the screening shall be an integral part of the building. For trash enclosures, landscaping shall be included on at least three sides. The trash enclosure, including any roofing, shall be compatible with the architecture for the building(s). (GP Objective 43.6, DG)
- P40. (BP) Prior to issuance of building permits, two copies of a detailed, on-site, computer generated, point-by-point comparison lighting plan, including exterior building, parking lot, and landscaping lighting, shall be submitted to the Planning Division for review and approval. The lighting plan shall be generated on the plot plan and shall be integrated with the final landscape plan. The plan shall indicate the manufacturer's specifications for light fixtures used and shall include style, illumination, location, height and method of shielding. The lighting shall be designed in such a manner so that it does not exceed one-quarter foot-candle minimum maintained lighting measured from within five feet of any property line. The lighting level for all parking lots or structures shall be a minimum coverage of one foot-candle of light with a maximum of eight foot-candles. After the third plan check review for lighting plans, an additional plan check fee will apply. (MC 9.08.100, DG)

**PLANNING DIVISION
CONDITIONS OF APPROVAL

- P41. (BP) Prior to issuance of building permits, the developer or developer's successor-in-interest shall pay all applicable impact fees, including but not limited to Transportation Uniform Mitigation fees (TUMF), Multi-species Habitat Conservation Plan (MSHCP) mitigation fees, and the City's adopted Development Impact Fees. (Ord)
- P42. (BP) Prior to issuance of building permits, a phasing plan shall be submitted to the Planning Division for approval, if development is proposed to be phased.
- P43. (BP) Prior to issuance of any building permits, final landscaping and irrigation plans shall be submitted for review and approval by the Planning Division. After the third plan check review for landscape plans, an additional plan check fee shall apply. The plans shall be prepared in accordance with the City's Landscape Standards and shall include:
- A. A three (3) foot high decorative wall, solid hedge or berm shall be placed in any setback areas between a public right of way and a parking lot for screening.
 - B. All finger and end planters shall be included at an interval of one per 12 parking stalls, be a minimum 5' x 16', and include additional 12" concrete step-outs and 6" curbing. (MC9.08.230, City's Landscape Standards)
 - C. Diamond planters shall be provided every 3 parking stalls.
 - D. Drought tolerant landscape shall be provided. Sod shall be limited to public gathering areas only and not be included along the perimeter of the project site.
 - E. Street trees shall be provided every 40 feet on center in the right of way. Minimum 24 inch box Eucalyptus Nicholii shall be used for the street trees along the Fir Avenue/Eucalyptus Avenue frontage.
 - F. On-site trees shall be planted at an equivalent of one (1) tree per thirty (30) linear feet of the perimeter of a parking lot and per thirty linear feet of a building dimension for the portions of the building visible from a parking lot or right of way. Trees may be massed for pleasing aesthetic effects.
 - G. The design of all swales and basins that are visible from the public right-of-way shall be integrated with the surrounding landscape areas.
 - H. Minimum container size for required trees planted along the SR-60 frontage shall be 24 inch box.
 - I. Enhanced landscaping shall be included at all driveway and corner locations as well as along Highway 60.
 - J. The review of all utility boxes, transformers etc. shall be coordinated to provide adequate screening from public view.

- K. Landscaping on three sides of any trash enclosure.**
 - L. All site perimeter and parking lot landscape and irrigation shall be installed prior to the release of certificate of any occupancy permits.**
- P44. (BP) Prior to the issuance of building permits, the landscape plans shall include landscape treatment for trash enclosures located outside of a truck court, to include landscape on three sides, and trash enclosures shall include decorative enhancements such as an enclosed roof and other decorative features that are consistent with the architecture of the proposed commercial buildings on the site, subject to the approval of the Community & Economic Development Director.**
- P45. (BP) Prior to the issuance of building permits, all fences and walls required or proposed on site, shall be approved by the Community & Economic Development Director. (MC 9.08.070)
- P46. (BP) Prior to the issuance of building permits, downspouts will be interior to the building, or if exterior, integrated into the architecture of the building to include compatible colors and materials to the satisfaction of the Community & Economic Development Director.
- P47. (BP) Prior to the issuance of building permits the building site plan shall include decorative concrete or paving for all driveway ingress/egress locations for the project.**
- P48. (BP) Prior to issuance of any building permits, mitigation measures contained in the Mitigation Monitoring Program approved with this project shall be implemented as provided therein. (CEQA)**

Prior to Issuance of a Certificate of Occupancy

- P49. (CO) Prior to the issuance of Certificates of Occupancy or building final, all required and proposed fences and walls shall be constructed according to the approved plans on file in the Community & Economic Development Department – Planning Division. (MC 9.080.070).
- P50. (CO) Prior to issuance of Certificate of Occupancy or building final, all required landscape and irrigation shall be installed in accordance with the City's Landscape Standards and the approved landscape plans.
- P51. (CO) Prior to issuance of Certificate of Occupancy or building final, all rooftop equipment shall be appropriately screened from Highway 60 or the Eucalyptus/Fir Avenue rights-of-way.**

P52. (CO) Prior to issuance of any Certificates of Occupancy or building final, mitigation measures contained in the Mitigation Monitoring Program approved with this project shall be implemented as provided therein.

MITIGATION MEASURES

Air Quality

P53. 4.3.6.2A. Prior to the issuance of a grading permit, the project developer shall require by contract specifications that contractors shall place construction equipment staging areas at least 200 feet away from sensitive receptors. Contract specifications shall be included in the proposed project construction documents, which shall be reviewed by the City.

P54. 4.3.6.2B Prior to the issuance of a grading permit, the project developer shall require by contract specifications that contractors shall utilize power sources (e.g., power poles) or clean-fuel (e.g., fuel other than diesel or gasoline) generators where feasible. Contract specifications shall be included in the proposed project construction documents, which shall be reviewed by the City.

P55. 4.3.6.2C Prior to the issuance of a grading permit, the project developer shall require by contract specifications that contractors shall utilize California Air Resources Board (CARB) Tier III Certified equipment or better during the rough/mass grading phase for the following pieces of equipment: rubber-tired dozers and scrapers. Contract specifications shall be included in the proposed project construction documents, which shall be reviewed by the City. Project start to December 31, 2014: All off-road diesel-powered construction equipment greater than 50 horsepower shall meet Tier 3 off-road emission standards. In addition, all construction equipment shall be outfitted with Best Available Control Technology (BACT) devices certified by CARB. Any emission control devices used by the contractor shall achieve emission reductions that are no less than what would be achieved by a Level 3 diesel emission control strategy for a similarly sized engine as defined by CARB regulations. Post January 1, 2015: All off-road diesel-powered construction equipment greater than 50 horsepower shall meet Tier 4 emission standards, where available. In addition, all construction equipment shall be outfitted with Best Available Control Technology (BACT) devices certified by CARB. Any emission control devices used by the contractor shall achieve emission reductions that are no less than what would be achieved by a Level 3 diesel emission control strategy for a similarly sized engine as defined by CARB regulations. A copy of each unit's certified tier specifications, BACT documentation, and CARB or SCAQMD operating permit shall be provided at the time of mobilization of each applicable unit of equipment.

**PLANNING DIVISION
CONDITIONS OF APPROVAL

PAGE 17 OF 67**

- P56. 4.3.6.2D** All clearing, grading, earthmoving, or excavation activities shall cease when winds (as instantaneous gusts) exceed 25 mph per SCAQMD guidelines in order to limit fugitive dust emissions. On-site truck idling shall be prohibited in excess of five minutes.
- P57. 4.3.6.2E** The contractor shall ensure that all disturbed unpaved roads and disturbed areas within the project are watered at least three times daily during dry weather. Watering, with complete coverage of disturbed areas, shall occur at least three times a day, preferably in the midmorning, afternoon, and after work is done for the day.
- P58. 4.3.6.2F** The contractor shall ensure that traffic speeds on unpaved roads and project site areas are reduced to 15 miles per hour or less to reduce PM10 and PM2.5 fugitive dust haul road emissions. Speed limit signs (15 mph maximum) shall be posted at entry points to the project site, and along any unpaved roads providing access to or within the project site and/or any unpaved designated on-site travel routes.
- P59. 4.3.6.2G** Groundcover shall be replaced, and/or non-toxic soil stabilizers shall be applied (according to manufacturers' specifications) to any inactive construction areas (previously graded areas inactive for ten days or more).
- P60. 4.3.6.2H** The contractor shall minimize pollutant emissions by maintaining equipment engines in good condition and in proper tune according to manufacturer's specifications and by not allowing construction equipment to be left idling for more than five minutes (per California law).
- P61. 4.3.6.2I** The contractor shall ensure use of low-sulfur diesel fuel in construction equipment as required by the California Air Resources Board (CARB) (diesel fuel with sulfur content of 15 ppm by weight or less).
- P62. 4.3.6.2J.** Grading plans, construction specifications and bid documents shall also include the following requirements:
- Off-road construction equipment shall utilize alternative fuels where feasible e.g., biodiesel fuel (a minimum of B20), natural gas (CNG), liquefied natural gas (LNG), propane, except for equipment where use of such fuels would void the equipment warranty;
 - Gravel pads shall be provided at all access points to prevent tracking of mud onto public roads;
 - Install and maintain trackout control devices at all access points where paved and unpaved access or travel routes intersect;
 - The contractor or builder shall designate a person or person(s) to monitor the dust control program and to order increased watering, as necessary, to prevent transport of dust off site;

**PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 18 OF 67**

- The contractor or builder shall post a publicly visible sign with the telephone number and person to contact regarding dust complaints. The contact person shall take corrective action within 24 hours;
- High-pressure injectors shall be provided on diesel construction equipment if available;
- Engine size of construction equipment shall be limited to the minimum practical size;
- Substitute gasoline-powered for diesel powered construction equipment where gasoline powered equipment is available;
- Use electric construction equipment where it is practical to use such equipment;
- Install catalytic converters on gasoline-powered equipment where this type of equipment is available;
- Ride-sharing program for the construction crew shall be supported by contractor(s) via incentives or other inducement;
- Documentation shall be provided to the City of Moreno Valley indicating that construction workers have been encouraged to carpool or otherwise reduce VMT to the greatest extent practical, including providing information on available park and ride programs;
- Lunch vendor services shall be allowed on site during construction to minimize the need for off-site vehicle trips; and
- All forklifts used during construction and in subsequent operation of the project shall be electric or natural gas powered.

P63. 4.3.6.2K. Throughout project construction, a construction relations officer/community liaison, appointed by the Applicant, shall be retained on site. In coordination and cooperation with the City, the construction relations officer/community liaison shall respond to any concerns related to PM10 (fugitive dust) generation or other construction related air quality issues within 24 hours.

P64. 4.3.6.2L. All project entrances shall be posted with signs which state:

- Truck drivers shall turn off engines when not in use;
- Diesel delivery trucks servicing the project shall not idle for more than three (3) minutes; and
- Telephone numbers of the building facilities manager and CARB, to report violations. These measures shall be enforced by the on-site facilities manager (or equivalent).

P65. 4.3.6.2M. During project grading and construction, the various project contractors shall adhere to the control measures listed in Tables 1.D and 1.E (attached to the MMRP).

P66. 4.3.6.3A Prior to the issuance of grading permits, the project applicant shall require by contract specifications that all trucks hauling dirt, sand, soil, or other loose materials are to be covered or shall maintain at least 2 feet of freeboard in

**PLANNING DIVISION

accordance with the requirements of California Vehicle Code (CVC) Section 23114 (freeboard means vertical space between the top of the load and the top of the trailer).

- P67. 4.3.6.3B.** Prior to the issuance of grading permits, the project applicant shall provide evidence to the City that construction access roads shall be paved at least 100 feet onto the site from the main road.
- P68. 4.3.6.3C.** Prior to the issuance of grading permits, the project applicant shall require by contract specifications that all streets within the construction site shall be swept once per day if visible soil materials are carried to adjacent streets.
- P69. 4.3.6.4A.** The project applicant shall use “Low-Volatile Organic Compounds” paints, coatings, and solvents with a VOC content lower than required under Rule 1113 (not to exceed 150 grams/liter; 1.25 pounds/gallon). High Pressure Low Volume (HPLV) applications of paints, coatings, and solvents shall be consistent with South Coast Air Quality Management District Rule 1113. Alternatively, the project applicant shall use materials that do not require painting or are pre-painted.
- P70. 4.3.6.5B.** Prior to issuance of building permits, the project applicant shall provide evidence to the City that energy efficient and low-emission methods and features of building construction shall be incorporated into the project design. These methods and features may include (but are not limited to) the following:
- Construction of buildings that exceed statewide energy requirements beyond 10 percent of that identified in Title 24, Part 6 Energy Efficiency Standards:
 - Use of low-emissions water heaters;
 - Use of central water-heating systems;
 - Use of energy-efficient appliances;
 - Use of increased insulation;
 - Use of automated controls for air conditioners;
 - Use of energy-efficient parking lot lighting; and
 - Use of lighting controls and energy efficient lighting.
 - Utilize low-VOC interior and exterior coatings during project repainting.
 - Provide on-site improvements such as sidewalks or pedestrian walkways to promote pedestrian activity and reduce the number of vehicle trips.
 - Installation of skylights and energy efficient lighting that exceeds California Title 24 standards where feasible, including electronic dimming ballasts and computer-controlled daylight sensors in the buildings.
 - Shade-producing trees, particularly those that shade paved surfaces such as streets and parking lots and building shall be planted at the proposed project site. These strategies will minimize the heat island effect and thereby reduce the amount of air conditioning required.

**PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 20 OF 67**

- Strategies to be considered include fans to assist natural ventilation, centralized water and space conditioning systems, high efficiency individual heating and cooling units, and automatic setback thermostats.
- Reduction of energy demand associated with potable water conveyance through the following methods:
 - Incorporating drought-tolerant plants into the landscaping palette; and
 - Use of water-efficient irrigation techniques.
- Energy-efficient low-pressure sodium parking lot lights or equivalent as determined by the City shall be used;
- Buildings shall be oriented north-south where feasible;
- Implement an on-site circulation plan in parking lots to reduce vehicle queuing;
- Develop a trip reduction plan to achieve 1.5 average vehicle ridership (AVR) for businesses with fewer than 250 employees or multi-tenant worksites;
- Include bicycle parking facilities such as bicycle lockers and racks;
- Include showers for bicycling employees use; and
- Construct on-site pedestrian facility improvements such as building access that is physically separated from street and parking lot traffic and walk paths.

- P71. 4.3.6.6A** Prior to issuance of the first building permit, building and site plan designs shall ensure that the project's energy efficiencies surpass applicable 2008 California Title 24, Part 6 Energy Efficiency Standards by a minimum of 10 percent until January 1, 2014. For building permits issued after that date, new state energy standards require a 20 percent reduction from 2008 Title 24, Part 6 Energy Efficiency Standards. Verification of increased energy efficiencies shall be documented in Title 24 Compliance Reports provided by the Applicant, and reviewed and approved by the City. The following design features shall be used to fulfill this requirement:
- Buildings shall exceed California Title 24 Energy Efficiency performance standards for water heating and space heating and cooling, as deemed acceptable by the City.
 - Increase in insulation such that heat transfer and thermal bridging is minimized.
 - Limit air leakage through the structure or within the heating and cooling distribution system to minimize energy consumption.
 - Incorporate dual-paned or other energy efficient windows.
 - Incorporate energy efficient space heating and cooling equipment.
 - Interior and exterior energy efficient lighting which exceeds the California Title 24 Energy Efficiency performance standards shall be installed, as deemed acceptable by the City. Automatic devices to turn off lights when they are not needed shall be implemented.
 - To the extent that they are compatible with landscaping guidelines established by the City, shade-producing trees, particularly those that shade paved surfaces such as streets and parking lots and buildings shall be planted at the project site.
 - Paint and surface color palette for the project shall emphasize light and offwhite colors which reflect heat away from the buildings.

PAGE 21 OF 67**

- All buildings shall be designed to accommodate renewable energy sources, such as photovoltaic solar electricity systems, appropriate to their architectural design.
- To reduce energy demand associated with potable water conveyance, the project shall implement the following:
 - Landscaping palette emphasizing drought-tolerant plants;
 - Use of water-efficient irrigation techniques; and,
 - U.S. EPA Certified WaterSense labeled for equivalent faucets, high-efficiency toilets (HETs), and water-conserving shower heads.
- The project shall provide secure, weather-protected, on-site bicycle storage/parking.
- The project shall provide on-site showers (one for males and one for females). Lockers for employees shall be provided.
- The project will establish a Transportation Management Association (TMA). The TMA will coordinate with other TMAs within the City to encourage and coordinate carpooling among building occupants. The TMA will advertise its services to building occupants, and offer transit and/or other incentives to reduce greenhouse gas (GHG) emissions. A plan will be submitted by the TMA to the City within two months of project completion that outlines the measures implemented by the TMA, as well as contact information.
- The project shall provide preferential parking for carpools and vanpools. Locations and configurations of proposed preferential parking for carpools and vanpools are subject to review and approval by the City. Prior to final site plan approval, preferential parking for carpools and vanpools shall be delineated on the project site plan.
- The project shall provide at least two electric vehicle charging stations. Locations and configurations of proposed charging stations are subject to review and approval by the City. Prior to issuance of the first building permit, stub outs for stations shall be indicated on the project building plan.
- Lease/purchase documents shall identify that tenants are encouraged to promote the following:
 - Implementation of compressed workweek schedules.
 - SmartWay partnership;
 - Achievement of at least 20 percent per year (as a percentage of previous percentage, not total trips) increase in percentage of consolidated trips carried by SmartWay carriers until it reaches a minimum of 90 percent of all long-haul trips carried by SmartWay 1.0 or greater carriers.
 - Achievement of at least 15 percent per year (as a percentage of previous percentage, not total trips) increase in percentage of longhaul trips carried by SmartWay carriers until it reaches a minimum of 85 percent of all consolidator trips carried by SmartWay 1.0 or greater carriers.
 - Use of fleet vehicles conforming to 2010 air quality standards or better.
 - Installation of catalytic converters on gasoline-powered equipment.

- Inclusion of electric powered and/or compressed natural gas fueled trucks and/or vehicles in fleets.
- Establishment and use of carpool/vanpool programs, complemented by parking fees for single-occupancy vehicles.
- Provision of preferential parking for EV and CNG vehicles.
- Use of electrical equipment (instead of gasoline-powered equipment) for landscape maintenance.
- Use of electric (instead of diesel or gasoline-powered) yard trucks.
- Use of SmartWay 1.25 rated trucks.
- Each facility operator shall provide regular sweeping of onsite parking and drive areas.
- Each facility operator shall maintain a log of all trucks entering the facility to ensure that, on average, the daily truck fleet meets the quantities and emissions standards listed in the Draft EIR. This log shall be available for inspection by City staff at any time.
- Each facility operator shall prohibit all vehicles from idling in excess of five minutes in all onsite areas.
- Each facility operator shall ensure that onsite staff in charge of keeping the daily log and monitoring for excess idling will be trained and certified in diesel health effects and technologies, such as by requiring attendance at CARB-approved courses.
- Each facility operator upon occupancy that do not already operate 2007 and newer trucks shall in good faith apply for funding to replace or retrofit their trucks such as Carl Moyer, VIP, Prop 1B or similar funds. Should funds be awarded, the tenant shall be required to accept and use them.

Biological Resources

- P72. 4.4.6.1A.** If tree removal or clearing and grubbing activities must take place during the general nesting season (February 1 through August 31), a nesting bird survey shall be conducted within seven (7) days prior to any vegetation disturbance activities. If passerine birds are found to be nesting or there is evidence of nesting behavior inside the impact area, an exclusion buffer, to be determined by the appropriate agency (e.g. the City, County, and/or CDFG), shall be set in place around the nest where no vegetation disturbance will be permitted. For raptor species, such as hawks and owls, this buffer may be as large as 500 feet. A qualified biologist shall closely monitor nests until it is determined that they are no longer active, at which time construction activity in the vicinity of nests may continue.
- P73. 4.4.6.1B.** Prior to site grading, a preconstruction survey shall be required for the burrowing owl to confirm the presence/absence of this species from the site. The survey shall be conducted by a qualified biologist within 30 days prior to ground disturbance, and in accordance with MSHCP survey requirements, to avoid direct

PAGE 23 OF 67**

take of burrowing owls. If burrowing owls are determined to occupy the project site or immediate vicinity, the City of Moreno Valley Planning Department shall be notified and avoidance measures as identified in **Mitigation Measure 4.4.6.1C**, shall be implemented. Implementation of avoidance measures shall be executed pursuant to the MSHCP, the California Fish and Game Code, and the MBTA, and according the Burrowing Owl Survey Protocol and Mitigation Guidelines (California Burrowing Owl Consortium 1993) and reviewed the City of Moreno Valley, the Riverside Conservation Authority, and/or by the CDFG.

- P74. 4.4.6.1C.** As recommended in the BUOW Survey and Mitigation Guidelines prepared by the California BUOW Consortium, no disturbance to an occupied burrow shall occur within approximately 160 feet of an occupied burrow during the non-breeding season (September 1 through January 31), or within approximately 250 feet of an occupied burrow during the breeding season (February 1 through August 31). For unavoidable impacts, passive relocation of burrowing owls shall be implemented. Passive relocation shall be conducted by a qualified biologist in accordance with procedures set forth by the MSHCP and California Burrowing Owl Consortium. Passive relocation of occupied burrows supporting a breeding pair of burrowing owls shall be conducted outside of the breeding season pursuant to the California Fish and Game Code and the MBTA.
- P75. 4.4.6.2A.** As outlined in the project's Determination of a Biologically Equivalent or Superior Preservation (DBESP) report, the project applicant shall compensate for the temporary and permanent impact on and loss of jurisdictional waters and streambeds by providing a minimum 2:1 off-site replacement of equivalent riverine/riparian habitat prior to project construction. Offsite restoration, enhancement, and/or land purchase mitigation for the drainage impacts will occur at an offsite location through one or more of the following: an USACE approved mitigation bank, through an in lieu fee mitigation program, and/or landpurchase and conservation. DFG and USFWS will need to provide concurrence that this mitigation is equivalent or superior to that proposed for impact through their review and acceptance of the DBESP.
- P76. 4.4.6.2B.** Riparian/riverine resources that are temporarily impacted by project construction shall be returned to their preconstruction contours and hydroseeded, as outlined in the DBESP.
- P77. 4.4.6.3A.** The project applicant shall obtain a Section 404 Nationwide or Individual Permit, as appropriate, from the USACE, a Section 401/Porter-Cologne Water Quality Certification from the RWQCB, and a Section 1602 Streambed Alteration Agreement from the CDFG. Offsite restoration, enhancement, and/or land purchase mitigation of jurisdictional drainage impacts will occur at an off-site location through one or more of the following: an USACE approved mitigation bank, through an in-lieu fee mitigation program, and/or land purchase and conservation.

Cultural Resources

- P78. 4.5.6.1A** Prior to the issuance of a grading permit, the Project Applicant shall provide evidence to the City of Moreno Valley that a Cultural Resources Monitoring Agreement has been secured for qualified Tribal representatives, and that a professional archaeological monitor meeting Secretary of Interior standards has been retained by the Applicant to conduct monitoring of all mass grading and trenching activities and has the authority to temporarily halt and redirect earthmoving activities in the event that suspected archaeological resources are unearthed during Project construction. The Project Archaeologist and Tribal representatives shall attend the pregrading meeting with the City and contractors to explain and coordinate the requirements of the monitoring program.
- P79. 4.5.6.1B** Prior to the issuance of a grading permit, the Applicant shall provide evidence to the City of Moreno Valley that appropriate Native American representative(s), Project Archaeologist, and the Tribal representative(s) shall be allowed to monitor and have received a minimum of 30 days advance notice of all mass grading and trenching activities. During grading and trenching operations, the Tribal representatives and the project archaeological monitor shall observe all mass grading and trenching activities per the Cultural Resources Monitoring Agreement. If the Tribal representatives suspect that an archaeological resource may have been unearthed, the archaeologist, in consultation with the tribal representative, shall immediately halt and redirect grading operations in a 100-foot radius around the find to allow identification and evaluation of the suspected resource. In consultation with the appropriate Native American Tribe(s), the archaeological monitor shall evaluate the suspected resource and make a determination of significance pursuant to California Public Resources Code Section 21083.2.
- P80. 4.5.6.1C** If a significant archaeological resource(s) is discovered on the property, ground disturbing activities shall be suspended 100 feet around the resource(s). The archaeological monitor and representatives of the appropriate Native American Tribe(s), the Project Applicant, and the City Planning Division shall confer regarding mitigation of the discovered resource(s). A treatment plan and/or preservation plan shall be prepared and by the archaeological monitor and reviewed by representatives of the appropriate Native American Tribe(s), the Project Applicant, and the City Planning Division and implemented by the archaeologist to protect the identified archaeological resource(s) from damage and destruction. The landowner shall relinquish ownership of all archaeological artifacts that are of Native American origin found on the Project site to the culturally affiliated Native American tribe(s) for proper treatment and disposition. A final report containing the significance and treatment findings shall be prepared by the archaeologist and submitted to the City Planning Division, the appropriate

PAGE 25 OF 67**

Native American tribe(s), and the Eastern Information Center at the University of California, Riverside. All cultural material, excluding sacred, ceremonial, grave goods and human remains, collected during the grading monitoring program and from any previous archaeological studies or excavations on the project site shall be curated, as determined by the treatment plan, according to the current professional repository standards and may include the Pechanga Bands curatorial facility.

- P81. 4.5.6.1D** Prior to grading permit issuance, the City shall verify that the following note is included on the Grading Plan: "If any suspected archaeological resources are discovered during ground disturbing activities and the archaeological monitor or Tribal representatives are not present, the construction supervisor is obligated to halt work in a 100-foot radius around the find and call the project archaeologist and the Tribal representatives to the site to assess the significance of the find."
- P82. 4.5.6.1E** If human remains are encountered, California Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the Riverside County Coroner has made the necessary findings as to origin. Further, pursuant to California Public Resources Code Section 5097.98(b), remains shall be left in place and free from disturbance until a final decision as to the treatment and disposition has been made by the Coroner. If the Riverside County Coroner determines the remains to be Native American, the California Native American Heritage Commission must be contacted within 24 hours. The Native American Heritage Commission must then immediately notify the "most likely descendant(s)" of receiving notification of the discovery. The most likely descendant(s) shall then make recommendations within 48 hours, and engage in consultations concerning the treatment of the remains as provided in Public Resources Code §5097.98.
- P83. 4.5.6.2A.** Prior to the issuance of grading permits, the project applicant shall submit to and receive approval from the City, a Paleontological Resource Impact Mitigation Program (PRIMP). The PRIMP shall include the provision of a trained paleontological monitor during on-site soil disturbance activities. The monitoring for paleontological resources shall be conducted during the rough-grading phase of the project. In the event that paleontological resources are unearthed or discovered during excavation, **Mitigation Measure 4.5.6.2C** shall apply. Conversely, if no paleontological resources are unearthed or discovered on site during excavation, no additional action is required.
- P84. 4.5.6.2B.** The paleontological monitor shall be equipped to rapidly remove any large fossil specimens encountered during excavation. During monitoring, samples of soil shall be collected and processed to recover microvertebrate fossils. Processing shall include wet screen washing and microscopic examination of the residual materials to identify small vertebrate remains.

- P85. 4.5.6.2C.** If paleontological resources are unearthed or discovered during excavation of the project site, the monitoring for paleontological resources shall be conducted on a full-time basis for the duration of the rough-grading of the project site. The following recovery processes shall apply:
- Upon encountering a large deposit of bone, salvage of all bone in the area shall be conducted with additional field staff and in accordance with modern paleontological techniques.
 - All fossils collected during the project shall be prepared to a reasonable point of identification. Excess sediment or matrix shall be removed from the specimens to reduce the bulk and cost of storage. Itemized catalogs of all material collected and identified shall be provided to the museum repository along with the specimens.
 - A report documenting the results of the monitoring and salvage activities and the significance of the fossils shall be prepared.
 - All fossils collected during this work, along with the itemized inventory of these specimens, shall be deposited in a museum repository for permanent curation and storage.
- P86. 4.5.6.2D** Prior to grading permit issuance, the City shall verify that the following note is included on the Grading Plan: "If any suspected paleontological resources are discovered during ground disturbing activities, the construction supervisor is obligated to halt work in a 100-foot radius around the find and call a qualified paleontologist to the site to assess the significance of the find. A qualified paleontologist shall evaluate the suspected resource. If the paleontologist determines that the find is not unique, construction shall be permitted to proceed. However, if the paleontologist determines that further information is needed to evaluate significance, the City of Moreno Valley shall be notified and a treatment plan shall be prepared and implemented in consultation with the City to protect the identified paleontological resource(s) from damage and destruction."

Hydrology and Water Quality

- P87. 4.7.6.1A.** Prior to grading plan approval and the issuance of a grading permit by the City, the project applicant shall provide evidence to the City that a Notice of Intent (NOI) has been filed with the Regional Water Quality Control Board for coverage under the State NPDES General Construction Permit for discharge of storm water associated with construction activities.
- P88. 4.7.6.1B.** Prior to grading plan approval and the issuance of a grading permit by the City, the project applicant shall submit to the State Water Quality Control Board a Storm Water Pollution Prevention Plan (SWPPP). The SWPPP shall include a surface water control plan and erosion control plan citing specific measures to control on-site and off-site erosion during the entire grading and construction period. Additionally, the SWPPP shall identify structural and

**PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 27 OF 67**

nonstructural BMPs to control sediment and nonvisible discharges from the site. BMPs to be implemented in the SWPPP may include, but shall not be limited to, the following:

- Sediment discharges from the site may be controlled by the following: gravel bags, silt fences, straw wattles and temporary debris basins (if deemed necessary), and other discharge control devices. The construction and condition of the BMPs will be periodically inspected during construction, and repairs will be made when necessary as required by the SWPPP.
 - No materials of any kind shall be placed in drainage ways.
 - Materials that could contribute nonvisible pollutants to storm water must be contained, elevated, and placed in temporary storage containment areas.
 - All loose piles of soil, silt, clay, sand, debris, and other earthen material shall be protected per RWQCB standards to eliminate any discharge from the site. Stockpiles will be surrounded by silt fences. The SWPPP will include inspection forms for routine monitoring of the site during the construction phase to ensure NPDES compliance.
 - Additional BMPs and erosion control measures will be documented in the SWPPP and utilized if necessary.
 - The SWPPP will be kept on site for the entire duration of project construction and will also be available to the local RWQCB for inspection at any time.
- In the event that it is not feasible to implement the above BMPs, the City of Moreno Valley can make a determination that other BMPs will provide equivalent or superior treatment either on or off site.

P89. 4.7.6.1C. Prior to the issuance of grading permits, the project applicant shall provide evidence to the City that the following provisions have been added to construction contracts for the project:

- The Construction Contractor shall be responsible for performing and documenting the application of BMPs identified in the SWPPP. Weekly inspections shall be performed on sediment control measures called for in the SWPPP. Monthly reports shall be maintained by the Contractor and submitted to the City for inspection. In addition, the Contractor will also be required to maintain an inspection log and have the log on site to be reviewed by the City of Moreno Valley and the representatives of the Regional Water Quality Control Board.

P90. 4.7.6.2A. Prior to grading plan approval and the issuance of a grading permit by the City, the project applicant shall receive approval from the City of Moreno Valley for a Final Water Quality Management Plan (F-WQMP). The FWQMP shall specifically identify pollution prevention, site design, source control, and treatment control BMPs that shall be used on site to control predictable pollutant runoff in order to reduce impacts to water quality to the maximum extent practicable. BMPs to be implemented in the F-WQMP may include (but shall not be limited to) the following:

**PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 28 OF 67**

- Required landscaped areas shall not use decorative concrete or impervious surfaces.
- Landscape plans shall incorporate native and drought-tolerant plants, trees, and shrubs. Landscaping shall be maintained weekly and maintenance contractor will properly dispose of all landscape wastes.
- Irrigation systems shall be inspected monthly by the landscape contractor to check for over-watering, leaks, or excessive runoff to paved areas. Timers will be used to prevent overwatering.
- Signage will be inspected and maintained twice a year for legibility.
- Outdoor Loading/Unloading truck docks shall be kept in a clean and orderly condition with weekly inspections, continuous monitoring, and immediate cleanup of spills.
- Parking area maintenance shall be swept or vacuumed at least quarterly, if there is any trash or debris in between the routine sweeping, it shall be swept or vacuumed immediately.
- Trash enclosures will be inspected and maintained weekly or as needed by maintenance contractor.
- On-site extended detention/sedimentation basins and sand filters will treat all of the site's runoff via vegetated swales and will be maintained and inspected at least twice a year and prior to October 1.
- Additional BMPs will be documented in the WQMP and utilized if necessary. In the event that it is not feasible to implement the above BMPs, the City of Moreno Valley can make a determination that other BMPs will provide equivalent or superior treatment either on or off site.

P91. 4.7.6.3A. Prior to grading plan approval, the project proponent shall receive approval on a project-specific Final Hydrology Study, with supporting engineering calculations, from the City Engineer. The Final Hydrology Study shall incorporate relevant requirements identified by the City, and/or site-specific geotechnical investigations. A Preliminary Hydrology Study will be required prior to approval of the associated project tentative tract map.

Noise

P92. 4.9.6.1A. During all project site excavation and grading on site, the project contractor shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers consistent with manufacturers' standards.

P93. 4.9.6.1B. The project contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest to the project site.

P94. 4.9.6.1C. The construction contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and

noise-sensitive receptors nearest to the project site during all project construction.

- P95. 4.9.6.1D.** During project site construction activities at Building 6 (i.e., closest to existing residences), the construction contractor shall limit all construction related activities to between the hours of 6:00 a.m. and 8:00 p.m. on weekdays and between the hours of 7:00 a.m. to 8:00 p.m. on weekends and holidays, unless written approval is obtained from the City Building Official or City Engineer.

Transportation

- P96. 4.11.6.4A.** Prior to issuance of a Certificate of Occupancy the project applicant shall construct the following traffic improvements:
- **Redlands Boulevard/SR-60 Westbound Ramps.** Install a traffic signal. This improvement is currently approved, and permitted by Caltrans. If not otherwise completed prior to project opening, the required traffic signal shall be constructed by the Applicant prior to issuance of the first Certificate of Occupancy.
 - **Redlands Boulevard/Fir Avenue/Eucalyptus Avenue.** If not otherwise completed prior to project opening, prior to issuance of the first Certificate of Occupancy, the Applicant shall construct the following improvements: Install a traffic signal and add a northbound left-turn lane and a southbound leftturn lane. If the improvements are constructed by others prior to the Certificate of Occupancy, the applicant shall pay its fair share towards the improvements through the City's DIF program.
- P97. 4.11.6.4B.** Prior to issuance of building permits, the project applicant shall pay the fair-share contribution toward the following traffic improvements through fees paid to the City of Moreno Valley based on the City's DIF system and the County's TUMF program:
- **Moreno Beach Drive/SR-60 Eastbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.
 - **Redlands Boulevard/SR-60 Westbound Ramps.** Install a traffic signal. This improvement is listed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the significant impact at this location.
 - **Redlands Boulevard/Fir Avenue/Eucalyptus Avenue.** Install a traffic signal. This improvement is listed in the City's DIF program. Add a northbound left-turn lane and a southbound left-turn lane. These improvements are listed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.

- P98. **4.11.6.4C.** Prior to issuance of building permits, the project applicant shall pay the fair-share contribution toward the following traffic improvements through fees paid to the City of Moreno Valley based on the City's DIF system and the County's TUMF program:
- **Moreno Beach Drive/SR-60 Eastbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.
 - **Moreno Beach Drive/Cottonwood Avenue.** Add a southbound through lane. This improvement is listed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the significant impact at this location.
 - **Moreno Beach Drive/Alessandro Boulevard.** Add a southbound through lane. This improvement is listed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the significant impact at this location.
 - **Redlands Boulevard/SR-60 Westbound Ramps.** Install a traffic signal. This improvement is listed in the City's DIF program. Add a northbound through lane. The Redlands Boulevard/SR-60 Interchange reconstruction would implement the northbound through lane. The interchange reconstruction project is programmed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.
 - **Redlands Boulevard/SR-60 Eastbound Ramps.** The Redlands Boulevard/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.
 - **Redlands Boulevard/Fir Avenue/Eucalyptus Avenue.** Install a traffic signal. Add a westbound right-turn lane and provide overlap phasing for the westbound right turns. Add a westbound left-turn lane and an eastbound left-turn lane. These improvements are programmed in the City's DIF program. Add a northbound left-turn lane, a southbound through lane, and a southbound left-turn lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.
 - **Redlands Boulevard/Eucalyptus Avenue.** Add a southbound right-turn lane. This improvement is programmed in the TUMF. Therefore, payment of the TUMF fees would mitigate the significant impact at this location.
 - **Redlands Boulevard/Alessandro Boulevard.** Add a southbound leftturn lane. This improvement is programmed in the TUMF. Therefore, payment of the TUMF fees would mitigate the significant impact at this location.
- P99. **4.11.6.4D.** Prior to issuance of building permits, the project applicant shall pay the fair-share contribution toward the following traffic improvements through fees paid to the City of Moreno Valley based on the City's DIF system and the County's TUMF program. At some locations, the DIF and TUMF fees would not

fully mitigate the project's impact. For these locations, additional improvements shall be implemented by the project applicant prior to the issuance of a certificate of occupancy for the project:

- **Nason Street/Eucalyptus Avenue.** Add a northbound right turn lane. This improvement is programmed in the City's DIF; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, the project shall contribute a fair share (calculated to be 1.76%) toward restriping the westbound approach to provide dual left-turn lanes.
- **Nason Street/Alessandro Boulevard.** Add an eastbound through lane and a westbound through lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, the project shall contribute a fair share (calculated to be 1.4%) toward modification of the traffic signal to provide overlap phasing for the eastbound right-turn lane.
- **Moreno Beach Drive/SR-60 Westbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.
- **Moreno Beach Drive/SR-60 Eastbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.
- **Moreno Beach Drive/Eucalyptus Avenue.** Convert the existing eastbound through lane to a left-turn lane and the eastbound right-turn lane to a shared through/right-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, the project shall contribute a fair share (calculated to be 8.63%) toward modification of the traffic signal to provide right-turn overlap phasing for the westbound right-turn lane.
- **Moreno Beach Drive/Cottonwood Avenue.** Add a southbound through lane. This improvement is programmed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the significant impact at this location.
- **Moreno Beach Drive/Alessandro Boulevard.** Add 2 southbound through lanes, 2 northbound through lanes, an eastbound through lane, and a westbound through lane. These improvements are programmed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the significant impact at this location.
- **Redlands Boulevard/SR-60 Westbound Ramps.** Install a traffic signal. This improvement is programmed in the City's DIF program and will be installed before building occupancy since it was identified as a direct project impact.
- **Redlands Boulevard/SR-60 Eastbound Ramps.** The Redlands Boulevard/SR-60 Interchange reconstruction would fully mitigate the project

impact at this location. The interchange reconstruction project is programmed in the TUMF. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.

- **Redlands Boulevard/Fir Avenue- Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane, eastbound through lane, eastbound left-turn lane, and a westbound right-turn lane with overlap phasing. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, add a southbound through lane, southbound left-turn lane, northbound through lane, and northbound left-turn lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.

- **Redlands Boulevard/Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, add a northbound left-turn lane and a southbound left-turn lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.

- **Redlands Boulevard/Alessandro Boulevard.** Install a traffic signal. This improvement is programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, add a southbound left-turn lane, a northbound left-turn lane, a westbound left-turn lane, an eastbound left-turn lane, a westbound right-turn lane, and a southbound through lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.

P100. 4.11.6.4E. Prior to issuance of building permits, the project applicant shall pay the fair-share contribution toward the following traffic improvements through fees paid to the City of Moreno Valley based on the City's DIF system and the County's TUMF program, or through a fair-share contribution to the City of Moreno Valley as noted below:

- **Nason Street/Eucalyptus Avenue.** Add a northbound right-turn lane and an eastbound right-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. Implementation of the improvements identified for this intersection in **Mitigation Measure 4.11.6.4D** would also partially mitigate the significant impact at this intersection. In addition, the project shall pay a fair share (calculated to be 1.6%) toward modification of the traffic signal to provide right-turn overlap phasing for the eastbound and northbound right turns.

- **Nason Street/Alessandro Boulevard.** Add an eastbound through lane and westbound through lane. These improvements are programmed in the City's DIF

program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. Implementation of the improvements identified for this intersection in **Mitigation Measure 4.11.6.4D** would also partially mitigate the significant impact at this intersection. In addition, the project shall pay a fair share (calculated to be 1.35%) toward the addition of an eastbound left-turn lane and modification of the traffic signal to provide overlap phasing for the westbound right-turn lane.

- **Moreno Beach Drive/SR-60 Westbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.

- **Moreno Beach Drive/SR-60 Eastbound Ramps.** The Moreno Beach Drive/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF and is currently in the design phase. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.

- **Moreno Beach Drive/Eucalyptus Avenue.** Restripe eastbound approach to dual left-turn lanes and add a northbound through lane, a westbound through lane, and a southbound right-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. Implementation of the improvements identified for this intersection in **Mitigation Measure 4.11.6.4D** would also partially mitigate the significant impact at this intersection. In addition, the project shall pay a fair share (calculated to be 5.17%) toward modification of the traffic signal to provide right-turn overlap phasing for the southbound right-turn lane.

- **Moreno Beach Drive/Cottonwood Avenue.** Add a southbound through lane, a northbound through lane, an eastbound left-turn lane, an eastbound through lane, a westbound through lane, and a westbound left-turn lane. These improvements are programmed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the significant impact at this location.

- **Moreno Beach Drive/Alessandro Boulevard.** Add 2 southbound through lanes, 2 northbound through lanes, an eastbound through lane, and a westbound through lane. These improvements are programmed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the significant impact at this location.

- **Auto Mall Drive/Eucalyptus Avenue.** Install a traffic signal. This improvement is programmed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the significant impact at this location.

- **Redlands Boulevard/SR-60 Westbound Ramps.** Install a traffic signal. This improvement is programmed in the City's DIF program and will be installed before building occupancy since it was identified as a direct project impact. Therefore, payment of the DIF fee would mitigate the significant impact at this location.

- **Redlands Boulevard/SR-60 Eastbound Ramps.** The Redlands Boulevard/SR-60 Interchange reconstruction would fully mitigate the project impact at this location. The interchange reconstruction project is programmed in the TUMF. Therefore, payment of the TUMF fee would mitigate the significant impact at this location.
- **Redlands Boulevard/Fir Avenue-Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane, eastbound through lane, eastbound left-turn lane, a westbound right-turn lane with overlap phasing, and a southbound right-turn lane with overlap phasing. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, add a southbound through lane, a southbound left-turn lane, a northbound through lane, a northbound left-turn lane, and a northbound right-turn lane. These improvements are programmed in the TUMF. Therefore, payment of the TUMF fee would also partially mitigate the significant impact at this location. In addition, the project shall pay a fair share (calculated to be 10.44%) of the cost of adding a southbound left-turn lane.
- **Redlands Boulevard/Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, add a northbound leftturn lane, a northbound through lane, a southbound left-turn lane, and southbound through lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.
- **Redlands Boulevard/Cottonwood Avenue.** Add an eastbound through lane and westbound through lane. These improvements are programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, add a northbound through lane and a southbound through lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.
- **Redlands Boulevard/Alessandro Boulevard.** Install a traffic signal. This improvement is programmed in the City's DIF program; therefore, payment of the DIF fee would partially mitigate the significant impact at this intersection. In addition, and add a southbound leftturn lane, a northbound left-turn lane, a westbound left-turn lane, an eastbound left-turn lane, a westbound right-turn lane, a southbound through lane, a westbound through lane, and an eastbound through lane. These improvements are programmed in the TUMF. Therefore, payment of the DIF and TUMF fees would mitigate the significant impact at this location.

P101. 4.11.6.4F. If the Encilia Avenue and Quincy Street Connection plan is implemented as part of the proposed project, then prior to issuance of building permits, the project applicant shall implement the following improvements, in addition to those identified in **Mitigation Measure 4.11.6.4.E**, either through fees

paid to the City of Moreno Valley based on the City's DIF system and the County's TUMF program:

- **Moreno Beach Drive/Eucalyptus Avenue.** Restripe the southbound shared through/right-turn lane to a southbound through lane. This improvement is programmed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the impacts of the project at this intersection.

- **Redlands Boulevard/Fir Avenue- Eucalyptus Avenue.** Pay the fair share (calculated to be 10.84%) to add a southbound right-turn lane.
- **Redlands Boulevard/Encilia Avenue-Eucalyptus Avenue.** Install a traffic signal and add a westbound left-turn lane. These improvements are programmed in the City's DIF program. In addition, add a northbound left-turn lane, northbound through lane, southbound left-turn lane, and a southbound through lane. These improvements are programmed in the TUMF program. Therefore, payment of the DIF and TUMF fees would fully mitigate the impact of the project at this intersection.

- **Moreno Beach Drive/Encilia Avenue.** Install a traffic signal and add a northbound through lane, southbound left-turn lane, and a southbound through lane. This improvement is programmed in the City's DIF program. Therefore, payment of the DIF fee would mitigate the impacts of the project at this intersection.

Greenhouse Gases and Global Climate Change

P102. 4.13.6.1A. Prior to the issuance of building permits, the project applicant shall provide evidence to the City of Moreno Valley that building features have been incorporated in building plans as required by Title 24 of the California Code of Regulations. These features include but are not limited to the following:

- Exterior windows shall utilize window treatments for efficient energy conservation.
- Per CALGreen Code requirements, water-efficient fixtures and appliances, including but not limited to low-flow faucets, dual-flush toilets minimizing water consumption by 20 percent from the Building Standards Code baseline water consumption shall be used.
- Per CALGreen Code requirements, a Commissioning Plan shall be prepared and all building systems (e.g., heating, ventilation, and air-conditioning [HVAC], irrigation systems, lighting, and water heating) shall be commissioned by the Commissioning Authority.
- Per CALGreen Code, restrict watering methods (e.g., prohibit systems that apply water to nonvegetated surfaces) and control runoff.

P103. 4.13.6.1B. Prior to the issuance of building permits, the project applicant shall provide evidence to the City of Moreno Valley that the following measures have been incorporated into the design and construction of the project:

**PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 36 OF 67**

- Use of locally produced and/or manufactured building materials for at least 10 percent of the construction materials used for the project.
- Use of “Green Building Materials,” such as those materials that are resource efficient, and recycled and manufactured in an environmentally friendly way, for at least 10 percent of the project.
- Limit unnecessary idling of construction equipment. A reduction in equipment idling would reduce fuel consumption, and therefore, GHG emissions.
- Maximize the use of electricity from the power grid by replacing diesel- or gasoline-powered equipment. This would reduce GHG emissions because electricity can be produced more efficiently at centralized power plants.
- Design the project building to exceed the California Building Code’s (CBC) Title 24 energy standard, including, but not limited to, any combination of the following:
 - Increase insulation such that heat transfer and thermal bridging is minimized.
 - Limit air leakage through the structure or within the heating and cooling distribution system to minimize energy consumption.
 - Incorporate ENERGY STAR or better rated windows, space heating and cooling equipment, light fixtures, appliances, or other applicable electrical equipment.
- Provide a landscape and development plan for the project that takes advantage of shade, prevailing winds, and landscaping.
- Install efficient lighting and lighting control systems. Use daylight as an integral part of the lighting systems in buildings.
- Install reflective roof material (SRI >45) and cool pavements.
- Install energy-efficient heating and cooling systems, appliances and equipment, and control systems.
- Install solar or light-emitting diodes (LEDs) for outdoor lighting for auto parking areas.

P104. 4.13.6.1C. Prior to the issuance of occupancy permits, the project applicant shall provide evidence to the City of Moreno Valley that the following measures have been be incorporated into the operation of the project:

- The project applicant shall use less than 3,900 Global Warming Potential (GWP) hydrofluorocarbon (HCF) refrigerants or natural refrigerants (ammonia, propane, carbon dioxide [CO₂]) for refrigeration and fire suppression equipment.
- Provide vegetative or man-made exterior wall shading devices for east-, south-, and west facing windows.
- Devise a comprehensive water conservation strategy appropriate for the project and its location. The strategy may include the following, plus other innovative measures that may be appropriate:
 - Install drought-tolerant plants for landscaping.
 - Use reclaimed water for landscape irrigation within the project. Install the infrastructure to deliver and use reclaimed water.

-Install water-efficient irrigation systems, such as weather-based and soil-moisture-based irrigation controllers and sensors for landscaping according to the California Department of Water Resources Model Efficient Landscape Ordinance.

- Provide employee education about reducing waste and available recycling services.

Hazards and Hazardous Materials

P105. 4.6.6.1A Prior to issuance of a grading permit for the project, a qualified contractor shall test onsite soils for contamination by agricultural chemicals. If present in concentrations above established actionable levels or thresholds, these materials shall be removed and transported to an appropriate landfill by a licensed contractor. This measure shall be implemented to the satisfaction of the Building Division including written documentation of the disposal of any agricultural chemical residue in conformance with all applicable regulations.

Building and Safety Division

- B1. The above project shall comply with the current California Codes (CBC, CEC, CMC, CPC and Green Building Standards) as well as City ordinances. All new projects shall provide a soils report as well. Plans shall be submitted to the Building Division as a separate submittal. Building permit applications (plan review) made on or after January 1, 2014, will be subject to the 2013 Edition of the California Building Standards Code.
- B2. Prior to final inspection, all plans will be placed on a CD Rom for reference and verification. Plans will include “as built” plans, revisions and changes. The CD will also include Title 24 energy calculations, structural calculations and all other pertinent information. It will be the responsibility of the developer and or the building or property owner(s) to bear all costs required for this process. The CD will be presented to the Building and Safety Division for review prior to final inspection and building occupancy. The CD will become the property of the Moreno Valley Building and Safety Division at that time. In addition, a site plan showing the path of travel from public right of way and building to building access with elevations will be required.
- B3. (BP) Prior to the issuance of a building permit, the applicant shall submit a properly completed “Waste Management Plan” (WMP), as required, to the Compliance Official (Building Official) as a portion of the building or demolition permit process.
- B4. (BP) Prior to the issuance of a building permit, show on the plans that all exterior doors comply with the requirements of CBC 1133B.1.1.1 for accessible path of

**PLANNING DIVISION

PAGE 38 OF 67**

travel from every exit door, especially in consideration of doors that may be designated as exits due to interior obstructions to path of travel due to racks, equipment and other interior obstruction to the exit path of travel.

- B5. (BP) Prior to the issuance of a building permit, show on the plans that no gutter, drainage feature, swale or other deviation in the flat level surface at the accessible parking spaces exists within and for a minimum four foot extension beyond the outer dimensions of the parking space, loading zone and path of travel.
- B6. (BP) Plans shall be prepared, stamped and signed by a licensed Architect or Registered Civil Engineer for submission for plan check review.
- B7. (BP) Plumbing plans shall be prepared, including isometrics, for required plumbing fixtures based on California Plumbing Code, Chapter 4 and Table 4-1.

SCHOOL DISTRICT

- S1. (BP) Prior to issuance of building permits, the developer shall provide to the Community Development Director a written certification by the affected school district that either: (1) the project has complied with the fee or other exaction levied on the project by the governing board of the district, pursuant to Government Code Section 65996; or (2) the fee or other requirement does not apply to the project.

UNITED STATES POSTAL SERVICE

- PO1. (BP) Prior to the issuance of building permits, the developer shall contact the U.S. Postal Service to determine the appropriate type and location of mailboxes.

FIRE PREVENTION BUREAU

- 1. Hydrant spacing shall be addressed in plan check.**
- 2. The following Standard Conditions shall apply.**

With respect to the conditions of approval, the following fire protection measures shall be provided in accordance with Moreno Valley City Ordinances and/or recognized fire protection standards:

- F1. Final fire and life safety conditions will be addressed when the Fire Prevention Bureau reviews building plans. These conditions will be based on occupancy,

PLANNING DIVISION
CONDITIONS OF APPROVAL

PAGE 39 OF 67

use, California Building Code (CBC), California Fire Code (CFC), and related codes, which are in force at the time of building plan submittal.

- F2. The Fire Prevention Bureau is required to set a minimum fire flow for the remodel or construction of all commercial buildings per CFC Appendix B and Table B105.1. The applicant/developer shall provide documentation to show there exists a water system capable of delivering 4000 GPM for 4 hour(s) duration at 20-PSI residual operating pressure. The required fire flow may be adjusted during the approval process to reflect changes in design, construction type, or automatic fire protection measures as approved by the Fire Prevention Bureau. Specific requirements for the project will be determined at time of submittal. (CFC 508.3, Appendix B and MVMC 8.36.100 Section D).
- F3. Industrial, Commercial, Multi-family, Apartment, Condominium, Townhouse or Mobile Home Parks. A combination of on-site and off-site super fire hydrants (6" x 4" x 2 1/2") and super enhanced fire hydrants (6" x 4" x 4" x 2 1/2") shall not be closer than 40 feet and more than 150 feet from any portion of the building as measured along approved emergency vehicular travel ways. The required fire flow shall be available from any adjacent fire hydrant(s) in the system. Where new water mains are extended along streets where hydrants are not needed for protection of structures or similar fire problems, super or enhanced fire hydrants as determined by the fire code official shall be provided at spacing not to exceed 500 feet of frontage for transportation hazards. (CFC 508.5.7 & MVMC 8.36.050 Section O and 8.36.100 Section E)
- F4. Maximum cul-de-sac or dead end road length shall not exceed 660 feet. The Fire Chief, based on City street standards, shall determine minimum turning radius for fire apparatus based upon fire apparatus manufacture specifications. (CFC 503.1)
- F5. Prior to construction, all roads, driveways and private roads shall not exceed 12 percent grade. (CFC 503.2.7 and MVMC 8.36.050)
- F6. During phased construction, dead end roadways and streets which have not been completed shall have a turn-around capable of accommodating fire apparatus. (CFC 503.1 and 503.2.5)
- F7. Prior to issuance of Building Permits, the applicant/developer shall provide the Fire Prevention Bureau with an approved site plan for Fire Lanes and signage. (MVMC 8.36.050 and CFC 501.3)
- F8. Prior to construction and issuance of building permits, all locations where structures are to be built shall have an approved Fire Department emergency vehicular access road (all weather surface) capable of sustaining an imposed

load of 80,000 lbs. GVW, based on street standards approved by the Public Works Director and the Fire Prevention Bureau. (CFC 501.4 and MVMC 8.36.050 Section A)

- F9. Prior to construction and issuance of Building Permits, fire lanes and fire apparatus access roads shall have an unobstructed width of not less the twenty-four (24) or thirty (30) feet as approved by the Fire Prevention Bureau and an unobstructed vertical clearance of not less the thirteen (13) feet six (6) inches. (CFC 503.2.1.1 and MVMC 8.36.050)
- F10. If construction is phased, each phase shall provide an approved emergency vehicular access way for fire protection prior to any building construction. (CFC 501.4 and MVMC 8.36.050 Section A)
- F11. Prior to construction, all locations where structures are to be built shall have an approved Fire Department access based on street standards approved by the Public Works Director and the Fire Prevention Bureau. (CFC 501.3 and MVMC 8.36.050)
- F12. Prior to building construction, dead end roadways and streets which have not been completed shall have a turnaround capable of accommodating fire apparatus. (CFC 503.2.5 and MVMC 8.36.050)
- F13. Prior to issuance of Building Permits, the applicant/developer shall participate in the Fire Impact Mitigation Program. (Fee Resolution as adopted by City Council)
- F14. Prior to issuance of Building Permits, the applicant/developer shall furnish one copy of the water system plans to the Fire Prevention Bureau for review. Plans shall:
 - a) Be signed by a registered civil engineer or a certified fire protection engineer;
 - b) Contain a Fire Prevention Bureau approval signature block; and
 - c) Conform to hydrant type, location, spacing of new and existing hydrants and minimum fire flow required as determined by the Fire Prevention Bureau.

After the local water company signs the plans, the originals shall be presented to the Fire Prevention Bureau for signatures. The required water system, including fire hydrants, shall be installed, made serviceable, and be accepted by the Moreno Valley Fire Department prior to beginning construction. They shall be maintained accessible.

Existing fire hydrants on public streets are allowed to be considered available.

**PLANNING DIVISION

- Existing fire hydrants on adjacent properties shall not be considered available unless fire apparatus access roads extend between properties and easements are established to prevent obstruction of such roads. (CFC 508.1 and MVMC 8.36.100)
- F15. Prior to issuance of Certificate of Occupancy or Building Final, “Blue Reflective Markers” shall be installed to identify fire hydrant locations in accordance with City specifications. (CFC 510.1)
- F16. Prior to issuance of Certificate of Occupancy or Building Final, all commercial buildings shall display street numbers in a prominent location on the street side and rear access locations. The numerals shall be a minimum of twelve (12) inches in height for buildings and six (6) inches in height for suite identification on a contrasting background. Unobstructed lighting of the address(s) shall be by means approved by the Fire Prevention Bureau and Police Department. In multiple suite centers (strip malls), businesses shall post the name of the business on the rear door(s). (CFC 505.1)
- F17. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire sprinkler system based on square footage and type of construction, occupancy or use. Fire sprinkler plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9)
- F18. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire alarm system monitored by an approved Underwriters Laboratory listed central station based on a requirement for monitoring the sprinkler system, occupancy or use. Fire alarm panel shall be accessible from exterior of building in an approved location. Plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9 and MVMC 8.36.070)
- F19. Prior to issuance of a Certificate of Occupancy or Building Final, a “Knox Box Rapid Entry System” shall be provided. The Knox-Box shall be installed in an accessible location approved by the Fire Chief. The Knox-Box shall be supervised by the alarm system and all exterior security emergency access gates shall be electronically operated and be provided with Knox key switches for access by emergency personnel. (CFC 506.1)
- F20. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall be responsible for obtaining underground and/or above ground tank permits for the storage of combustible liquids, flammable liquids, or any other hazardous materials from both the County of Riverside Community Health Agency Department of Environmental Health and the Fire Prevention Bureau. (CFC 3401.4 and 2701.5)

**PLANNING DIVISION

- F21. Prior to issuance of Certificate of Occupancy, approval shall be required from the County of Riverside Community Health Agency (Department of Environmental Health) and Moreno Valley Fire Prevention Bureau to maintain, store, use, handle materials, or conduct processes which produce conditions hazardous to life or property, and to install equipment used in connection with such activities. (CFC 2701.5)
- F22. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer must submit a simple plot plan, a simple floor plan, and other plans as requested, each as an electronic file in .dwg format, to the Fire Prevention Bureau. Alternate file formats may be acceptable with approval by the Fire Chief.
- F23. The angle of approach and departure for any means of Fire Department access shall not exceed 1 ft drop in 20 ft (0.3 m drop in 6 m), and the design limitations of the fire apparatus of the Fire Department shall be subject to approval by the AHJ. (CFC 503.2.7 and MVMC 8.36.050 Section I)
- F24. Prior to issuance of the building permit for development, independent paved access to the nearest paved road, maintained by the City shall be designed and constructed by the developer within the public right of way in accordance with City Standards. (MVMC 8.36.050)
- F25. Prior to construction, "private" driveways over 150 feet in length shall have a turn-around as determined by the Fire Prevention Bureau capable of accommodating fire apparatus. Driveway grades shall not exceed 12 percent. (CFC 503 and MVMC 8.36.050)
- F26. Complete plans and specifications for fire alarm systems, fire-extinguishing systems (including automatic sprinklers or standpipe systems), clean agent systems (or other special types of automatic fire-extinguishing systems), as well as other fire-protection systems and appurtenances thereto shall be submitted to the Moreno Valley Fire Prevention Bureau for review and approval prior to system installation. Submittals shall be in accordance with CFC Chapter 9 and associated accepted national standards.
- F27. A permit is required to maintain, store, use or handle materials, or to conduct processes which produce conditions hazardous to life or property, or to install equipment used in connection with such activities. Such permits shall not be construed as authority to violate, cancel or set aside any of the provisions of this code. Such permit shall not take the place of any license required by law. Applications for permits shall be made to the Fire Prevention Bureau in such form and detail as prescribed by the Bureau. Applications for permits shall be

accompanied by such plans as required by the Bureau. Permits shall be kept on the premises designated therein at all times and shall be posted in a conspicuous location on the premises or shall be kept on the premises in a location designated by the Fire Chief. Permits shall be subject to inspection at all times by an officer of the fire department or other persons authorized by the Fire Chief in accordance with Appendix Chapter 1 and MVMC 8.36.100.

- F28. Approval of the safety precautions required for buildings being constructed, altered or demolished shall be required by the Fire Chief in addition to other approvals required for specific operations or processes associated with such construction, alteration or demolition. (CFC Chapter 14)
- F29. Prior to issuance of Certificate of Occupancy, permits are required to store, dispense, use or handle hazardous material. Each application for a permit shall include a hazardous materials management plan (HMMP). The location of the HMMP shall be posted adjacent to (other) permits when an HMMP is provided. The HMMP shall include a facility site plan designating the following:
- a) Storage and use areas;
 - b) Maximum amount of each material stored or used in each area;
 - c) Range of container sizes;
 - d) Locations of emergency isolation and mitigation valves and devices;
 - e) Product conveying piping containing liquids or gases, other than utility-owned fuel gas lines and low-pressure fuel gas lines;
 - f) On and off positions of valves for valves which are of the self-indicating type;
 - g) Storage plan showing the intended storage arrangement, including the location and dimensions of aisles. The plans shall be legible and approximately to scale. Separate distribution systems are allowed to be shown on separate pages; and
 - h) Site plan showing all adjacent/neighboring structures and use.

NOTE: Each application for a permit shall include a hazardous materials inventory statement (HMIS).

- F30. Before a Hazardous Materials permit is issued, the Fire Chief shall inspect and approve the receptacles, vehicles, buildings, devices, premises, storage spaces or areas to be used. In instances where laws or regulations are enforceable by departments other than the Fire Prevention Bureau, joint approval shall be obtained from all departments concerned. (CFC Appendix H)
- F31. Construction or work for which the Fire Prevention Bureau's approval is required shall be subject to inspection by the Fire Chief and such construction or work

**PLANNING DIVISION

shall remain accessible and exposed for inspection purposes until approved.
(CFC Section 106)

- F32. The Fire Prevention Bureau shall maintain the authority to inspect, as often as necessary, buildings and premises, including such other hazards or appliances designated by the Fire Chief for the purpose of ascertaining and causing to be corrected any conditions which would reasonably tend to cause fire or contribute to its spread, or any violation of the purpose or provisions of this code and of any other law or standard affecting fire safety. (CFC Section 106)
- F33. Permit requirements issued, which designate specific occupancy requirements for a particular dwelling, occupancy, or use, shall remain in effect until such time as amended by the Fire Chief. (CFC Section 104)
- F34. In accordance with the California Fire Code Appendix Chapter 1, where no applicable standards or requirements are set forth in this code, or contained within other laws, codes, regulations, ordinances or bylaws adopted by the jurisdiction, compliance with applicable standards of the National Fire Protection Association or other nationally recognized fire safety standards as are approved shall be deemed as prima facie evidence of compliance with the intent of this code as approved by the Fire Chief. (CFC Section 102.7)
- F35. Any alterations, demolitions, or change in design, occupancy and use of buildings or site will require plan submittal to the Fire Prevention Bureau with review and approval prior to installation. (CFC Appendix Chapter 1)
- F36. Emergency and Fire Protection Plans shall be provided when required by the Fire Prevention Bureau. (CFC Section 105)
- F37. Prior to Certificate of Occupancy all locations where medians are constructed and prohibit vehicular ingress/egress into or away from the site, provisions must be made to construct a median-crossover at all locations determined by the Fire Marshal and the City Engineer. Prior to the construction, design plans will be submitted for review and approval by the City Engineer and all applicable inspections conducted by Land Development Division.
- F38. Prior to construction, all traffic calming designs/devices must be approved by the Fire Marshal and City Engineer.

PUBLIC WORKS DEPARTMENT – LAND DEVELOPMENT DIVISION

The following are the Public Works Department – Land Development Division Conditions of Approval for this project and shall be completed at no cost to any

**PLANNING DIVISION
CONDITIONS OF APPROVAL

PAGE 45 OF 67**

government agency. All questions regarding the intent of the following conditions shall be referred to the Public Works Department – Land Development Division.

General Conditions

- LD1. (G) The developer shall comply with all applicable City ordinances and resolutions including the City's Municipal Code (MC) and if subdividing land, the Government Code (GC) of the State of California, specifically Sections 66410 through 66499.58, said sections also referred to as the Subdivision Map Act (SMA). (MC 9.14.010)
- LD2. (G) If the project involves the subdivision of land, maps may be developed in phases with the approval of the City Engineer. Financial security shall be provided for all improvements associated with each phase of the map. The boundaries of any multiple map increment shall be subject to the approval of the City Engineer. The City Engineer may require the dedication and construction of necessary utilities, streets or other improvements outside the area of any particular map, if the improvements are needed for circulation, parking, access, or for the welfare or safety of the public. (MC 9.14.080, GC 66412 and 66462.5).
- LD3. (G) It is understood that the tentative map correctly shows all existing easements, traveled ways, and drainage courses, and that their omission may require the map or plans associated with this application to be resubmitted for further consideration. (MC 9.14.040)
- LD4. (G) In the event right-of-way or offsite easements are required to construct offsite improvements necessary for the orderly development of the surrounding area to meet the public health and safety needs, the developer shall make a good faith effort to acquire the needed right-of-way in accordance with the Land Development Division's administrative policy. In the event that the developer is unsuccessful, he shall enter into an agreement with the City to acquire the necessary right-of-way or offsite easements and complete the improvements at such time the City acquires the right-of-way or offsite easements which will permit the improvements to be made. The developer shall be responsible for all costs associated with the right-of-way or easement acquisition. (GC 66462.5)
- LD5. (G) If improvements associated with this project are not initiated within two years of the date of approval of the Public Improvement Agreement, the City Engineer may require that the improvement cost estimate associated with the project be modified to reflect current City construction costs in effect at the time of request for an extension of time for the Public Improvement Agreement or issuance of a permit.

**PLANNING DIVISION

PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 46 OF 67**

- LD6. (G) The developer shall monitor, supervise and control all construction and construction supportive activities, so as to prevent these activities from causing a public nuisance, including but not limited to, insuring strict adherence to the following:
- (a) Removal of dirt, debris, or other construction material deposited on any public street no later than the end of each working day.
 - (b) Observance of working hours as stipulated on permits issued by the Public Works Department.
 - (c) The construction site shall accommodate the parking of all motor vehicles used by persons working at or providing deliveries to the site.
 - (d) All dust control measures per South Coast Air Quality Management District (SCAQMD) requirements shall be adhered to during the grading operations.

Violation of any condition or restriction or prohibition set forth in these conditions shall subject the owner, applicant, developer or contractor(s) to remedies as noted in the City Municipal Code 8.14.090. In addition, the City Engineer or Building Official may suspend all construction related activities for violation of any condition, restriction or prohibition set forth in these conditions until such time as it has been determined that all operations and activities are in conformance with these conditions.

- LD7. (G) The developer shall protect downstream properties from damage caused by alteration of drainage patterns, i.e., concentration or diversion of flow. Protection shall be provided by constructing adequate drainage facilities, including, but not limited to, modifying existing facilities or by securing a drainage easement. (MC 9.14.110)
- LD8. (G) Public drainage easements, when required, shall be a minimum of 25 feet wide and shall be shown on the map and plan, and noted as follows: "Drainage Easement – no structures, obstructions, or encroachments by landfills are allowed." In addition, the grade within the easement area shall not exceed a 3:1 (H:V) slope, unless approved by the City Engineer.
- LD9. (G) A detailed drainage study shall be submitted to the City Engineer for review and approval at the time of any improvement or grading plan submittal. The study shall be prepared by a registered civil engineer and shall include existing and proposed hydrologic conditions. Hydraulic calculations are required for all drainage control devices and storm drain lines. (MC 9.14.110). Prior to approval of the related improvement or grading plans, the developer shall submit the

approved drainage study, on compact disk, in (.pdf) digital format to the Land Development Division of the Public Works Department.

LD10. (G) Prior to final map approval, commencing applicable street improvements, or obtaining the first building permit, the developer shall enter into a Development Impact Fee (DIF) Improvement Credit Agreement to secure credit and reimbursement for the construction of applicable arterial street, traffic signal, and/or interchange improvements. If the developer fails to complete this agreement prior to the timing as specified above, no credits or reimbursements will be given. The applicant shall pay Arterial Streets, Traffic Signals, and Interchange Improvements development impact fees adopted by the City Council by resolution. (Ord. 695 § 1.1 (part), 2005) (MC 3.38.030, .040, .050)

LD11. (G) The final conditions of approval issued by the Planning Division subsequent to Planning Commission approval shall be photographically or electronically placed on mylar sheets and included in the Grading and Street Improvement plan sets on twenty-four (24) inch by thirty-six (36) inch mylar and submitted with the plans for plan check. These conditions of approval shall become part of these plan sets and the approved plans shall be available in the field during grading and construction.

Prior to Grading Plan Approval or Grading Permit

LD12. (GPA) Prior to approval of the grading plans, plans shall be drawn on twenty-four (24) inch by thirty-six (36) inch mylar and signed by a registered civil engineer and other registered/licensed professional as required.

LD13. (GPA) Prior to approval of grading plans, the developer shall ensure compliance with the City Grading ordinance, these Conditions of Approval and the following criteria:

- (a) The project street and lot grading shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage area and outlet points. Unless otherwise approved by the City Engineer, lot lines shall be located at the top of slopes.
- (b) Any grading that creates cut or fill slopes adjacent to the street shall provide erosion control, sight distance control, and slope easements as approved by the City Engineer.
- (c) A grading permit shall be obtained from the Public Works Department Land Development Division prior to commencement of any grading outside of the City maintained road right-of-way.

**PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 48 OF 67**

- (d) All improvement plans are substantially complete and appropriate clearance and at-risk letters are provided to the City. (MC 9.14.030)
- (e) The developer shall submit a soils and geologic report to the Public Works Department – Land Development Division. The report shall address the soil’s stability and geological conditions of the site.

LD14. (GPA) Prior to grading plan approval, the developer shall select and implement treatment control best management practices (BMPs) that are medium to highly effective for treating Pollutants of Concern (POC) for the project. Projects where National Pollution Discharge Elimination System (NPDES) mandates water quality treatment control best management practices (BMPs) shall be designed per the City of Moreno Valley guidelines or as approved by the City Engineer.

LD15. (GPA) Prior to approval of the grading plans for projects that will result in discharges of storm water associated with construction with a soil disturbance of one or more acres of land, the developer shall submit a Notice of Intent (NOI) and obtain a Waste Discharger’s Identification number (WDID#) from the State Water Quality Control Board (SWQCB). The WDID# shall be noted on the grading plans prior to issuance of the first grading permit.

LD16. (GPA) Prior to the grading plan approval, or issuance of a building permit, if a grading permit is not required, the Developer shall submit two (2) copies of the final project-specific Water Quality Management Plan (WQMP) for review by the City Engineer that :

- (a) Addresses Site Design Best Management Practices (BMPs) such as minimizing impervious areas, maximizing permeability, minimizes directly connected impervious areas to the City’s street and storm drain systems, and conserves natural areas;
- (b) Incorporates Source Control BMPs and provides a detailed description of their implementation;
- (c) Incorporates Treatment Control BMPs and provides information regarding design considerations;
- (d) Describes the long-term operation and maintenance requirements for BMPs requiring maintenance; and
- (e) Describes the mechanism for funding the long-term operation and maintenance of the BMPs.

PAGE 49 OF 67**

A copy of the final WQMP template can be obtained on the City's Website or by contacting the Land Development Division of the Public Works Department.

LD17. (GPA) Prior to the grading plan approval, or issuance of a building permit, if a grading permit is not required, the Developer shall record a "Stormwater Treatment Device and Control Measure Access and Maintenance Covenant," to provide public notice of the requirement to implement the approved final project-specific WQMP and the maintenance requirements associated with the WQMP.

A boilerplate copy of the "Stormwater Treatment Device and Control Measure Access and Maintenance Covenant," can be obtained by contacting the Land Development Division of the Public Works Department.

LD18. (GPA) Prior to the grading plan approval, or issuance of a building permit, if a grading permit is not required, the Developer shall secure approval of the final project-specific WQMP from the City Engineer. The final project-specific WQMP shall be submitted at the same time of grading plan submittal. The approved final WQMP shall be submitted to the Storm Water Program Manager on compact disk(s) in Microsoft Word format prior to grading plan approval.

LD19. (GPA) Prior to the grading plan approval, or issuance of a building permit as determined by the City Engineer, the approved final project-specific WQMP shall be incorporated by reference or attached to the project's Storm Water Pollution Prevention Plan as the Post-Construction Management Plan.

LD20. (GPA) Prior to grading plan approval, the developer shall prepare a Storm Water Pollution Prevention Plan (SWPPP) in conformance with the state's Construction Activities Storm Water General Permit. A copy of the current SWPPP shall be kept at the project site and be available for review upon request. The SWPPP shall be submitted to the Storm Water Program Manager on compact disk(s) in Microsoft Word format.

LD21. (GPA) Prior to the approval of the grading plans, the developer shall pay applicable remaining grading plan check fees.

LD22. (GP) Prior to issuance of a grading permit, or building permit when a grading permit is not required, for projects that require a project-specific Water Quality Management Plan (WQMP), a project-specific final WQMP (F-WQMP) shall be approved. Upon approval, a WQMP Identification Number is issued by the Storm Water Management Section and shall be noted on the rough grading plans as confirmation that a project-specific F-WQMP approval has been obtained.

PAGE 50 OF 67**

- LD23. (GP) Prior to issuance of a grading permit, if the fee has not already been paid prior to map approval or prior to issuance of a building permit if a grading permit is not required, the developer shall pay Area Drainage Plan (ADP) fees. The developer shall provide a receipt to the City showing that ADP fees have been paid to Riverside County Flood Control and Water Conservation District. (MC 9.14.100)
- LD24. (GP) Prior to issuance of a grading permit, security, in the form of a cash deposit (preferable), letter of credit, or performance bond shall be required to be submitted as a guarantee of the completion of the grading required as a condition of approval of the project.
- LD25. (GP) Prior to issuance of a grading permit, the developer shall pay the applicable grading inspection fees.

Prior to Map Approval or Recordation

- LD26. (MA) Prior to approval of the map, the developer shall submit a copy of the Covenants, Conditions and Restrictions (CC&Rs) to the Land Development Division for review and approval. The CC&Rs shall include, but not be limited to, access easements, reciprocal access, private and/or public utility easements as may be relevant to the project.
- LD27. (MA) Prior to approval of the map, all street dedications shall be irrevocably offered to the public and shall continue in force until the City accepts or abandons such offers, unless otherwise approved by the City Engineer. All dedications shall be free of all encumbrances as approved by the City Engineer.
- LD28. (MA) Prior to approval of the map, security shall be required to be submitted as a guarantee of the completion of the improvements required as a condition of approval of the project. A public improvement agreement will be required to be executed.
- LD29. (MR) Prior to recordation of the map, the developer shall submit the map, on compact disks, in (.dxf) digital format to the Land Development Division of the Public Works Department.

Prior to Improvement Plan Approval or Construction Permit

- LD30. (IPA) Prior to approval of the improvement plans, the improvement plans shall be drawn on twenty-four (24) inch by thirty-six (36) inch mylar and signed by a registered civil engineer and other registered/licensed professional as required.

PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 51 OF 67

- LD31. (IPA) Prior to approval of the improvement plans, the developer shall submit clearances from all applicable agencies, and pay all outstanding plan check fees. (MC 9.14.210)
- LD32. (IPA) All public improvement plans prepared and signed by a registered civil engineer in accordance with City standards, policies and requirements shall be approved by the City Engineer in order for the Public Improvement Agreement and accompanying security to be executed.
- LD33. (IPA) Prior to approval of the improvement plans, securities and a public improvement agreement shall be required to be submitted and executed as a guarantee of the completion of the improvements required as a condition of approval of the project.
- LD34. (IPA) The street improvement plans shall comply with all applicable City standards and the following design standards throughout this project:
- (a) Corner cutbacks in conformance with City Standard 208 shall be shown on the final map or, if no map is to be recorded, offered for dedication by separate instrument.
 - (b) Lot access to major thoroughfares shall be restricted except at intersections and approved entrances and shall be so noted on the final map. (MC 9.14.100)
 - (c) The minimum centerline and flow line grades shall be one percent unless otherwise approved by the City Engineer. (MC 9.14.020)
 - (d) All street intersections shall be at ninety (90) degrees plus or minus five (5) degrees per City Standard No. 706A, or as approved by the City Engineer. (MC 9.14.020)
 - (e) All reverse curves shall include a minimum tangent of one hundred (100) feet in length.
- LD35. (IPA) Prior to approval of the improvement plans, the plans shall be based upon a centerline profile, extending beyond the project boundaries a minimum distance of 300 feet at a grade and alignment approved by the City Engineer. Design plan and profile information shall include the minimum 300 feet beyond the project boundaries.
- LD36. (IPA) Prior to approval of the improvement plans, the plans shall indicate any restrictions on trench repair pavement cuts to reflect the City's moratorium on disturbing newly-constructed pavement less than three years old and recently slurry sealed streets less than one year old. Pavement cuts for trench repairs

may be allowed for emergency repairs or as specifically approved in writing by the City Engineer.

- LD37. (IPA) Prior to approval of the improvement plans, the developer shall pothole to determine the exact location of existing underground utilities. The improvement plans shall be designed based on the pothole field investigation results. The developer shall coordinate with all affected utility companies and bear all costs of utility relocations.
- LD38. (IPA) Prior to approval of the improvement plans, all dry and wet utility crossings shall be potholed to determine actual elevations. Any conflicting utilities shall be identified and addressed on the plans. The pothole survey data shall be submitted with the street improvement plans for reference purposes.
- LD39. (IPA) Prior to approval of the improvement plans, drainage facilities with sump conditions shall be designed to convey the tributary 100-year storm flows. Secondary emergency escape shall also be provided. (MC 9.14.110)
- LD40. (IPA) Prior to the approval of the improvement plans, the hydrology study shall show that the 10-year storm flow will be contained within the curb and the 100-year storm flow shall be contained within the street right-of-way. In addition, one lane in each direction shall not be used to carry surface flows during any storm event for street sections equal to or larger than a minor arterial. When any of these criteria is exceeded, additional drainage facilities shall be installed. (MC 9.14.110 A.2)
- LD41. (IPA) The project shall be designed to accept and properly convey all off-site drainage flowing onto or through the site. All storm drain design and improvements shall be subject to review and approval of the City Engineer. In the event that the City Engineer permits the use of streets for drainage purposes, the provisions of the Development Code will apply. Should the quantities exceed the street capacity or the use of streets be prohibited for drainage purposes, as in the case where one travel lane in each direction shall not be used for drainage conveyance for emergency vehicle access on streets classified as minor arterials and greater, the developer shall provide adequate facilities as approved by the Public Works Department – Land Development Division. (MC 9.14.110)
- LD42. (CP) All work performed within the City right-of-way requires a construction permit. As determined by the City Engineer, security may be required for work within the right-of-way. Security shall be in the form of a cash deposit or other approved means. The City Engineer may require the execution of a public improvement agreement as a condition of the issuance of the construction permit. All inspection fees shall be paid prior to issuance of construction permit. (MC 9.14.100)

**PLANNING DIVISION

PAGE 53 OF 67**

LD43. (CP) Prior to issuance of a construction permit, all public improvement plans prepared and signed by a registered civil engineer in accordance with City standards, policies and requirements shall be approved by the City Engineer.

LD44. (CP) Prior to issuance of construction permits, the developer shall submit all improvement plans on compact disks, in (.dxf) digital format to the Land Development Division of the Public Works Department.

LD45. (CP) Prior to issuance of construction permits, the developer shall pay all applicable inspection fees.

Prior to Building Permit

LD46. (BP) Prior to issuance of a building permit, all pads shall meet pad elevations per approved plans as noted by the setting of "Blue-top" markers installed by a registered land surveyor or licensed engineer.

Prior to Certificate of Occupancy

LD47. (CO) Prior to issuance of a certificate of occupancy, if the project involves a non-residential subdivision, the map shall be recorded.

LD48. (CO) Prior to issuance of the last certificate of occupancy or building final, the developer shall pay all outstanding fees.

LD49. (CO) Prior to issuance of a certificate of occupancy, this project is subject to requirements under the current permit for storm water activities required as part of the National Pollutant Discharge Elimination System (**NPDES**) as mandated by the Federal Clean Water Act. In compliance with Proposition 218, the developer shall agree to approve the City of Moreno Valley NPDES Regulatory Rate Schedule that is in place at the time of certificate of occupancy issuance. Following are the requirements:

- a. Select one of the following options to meet the financial responsibility to provide storm water utilities services for the required continuous operation, maintenance, monitoring system evaluations and enhancements, remediation and/or replacement, all in accordance with Resolution No. 2002-46.
 - i. Participate in the mail ballot proceeding in compliance with Proposition 218, for the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule and pay all associated costs with the ballot process; or

PAGE 54 OF 67**

- ii. Establish an endowment to cover future City costs as specified in the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule.
 - b. Notify the Special Districts Division of the intent to request building permits 90 days prior to their issuance and the financial option selected. The financial option selected shall be in place prior to the issuance of certificate of occupancy. (California Government Code & Municipal Code)
- LD50. (CO) The City of Moreno Valley has an adopted Development Impact Fee (DIF) nexus study. All projects unless otherwise exempted shall be subject to the payment of the DIF prior to issuance of occupancy. The fees are subject to the provisions of the enabling ordinance and the fee schedule in effect at the time of occupancy.
- LD51. (CO) The City of Moreno Valley has an adopted area wide Transportation Uniform Mitigation Fee (TUMF). All projects unless otherwise exempted shall be subject to the payment of the TUMF prior to issuance of occupancy. The fees are subject to the provisions of the enabling ordinance and the fee schedule in effect at the time of occupancy.
- LD52. (CO) Prior to issuance of a certificate of occupancy or building final, the developer shall construct all public improvements in conformance with applicable City standards, except as noted in the Special Conditions, including but not limited to the following applicable improvements:
- (a) Street improvements including, but not limited to: pavement, base, curb, gutter, cross gutter, spandrel, sidewalks, drive approaches, pedestrian ramps, street lights, signing, striping, landscaping and irrigation, pavement tapers/transitions and traffic control devices as appropriate.
 - (b) Storm drain facilities including, but not limited to: storm drain pipe, storm drain laterals, open channels, catch basins and local depressions.
 - (c) City-owned utilities.
 - (d) Sewer and water systems including, but not limited to: sanitary sewer, potable water and recycled water.
 - (e) Under grounding of existing and proposed utility lines less than 115,000 volts.
 - (f) Relocation of overhead electrical utility lines including, but not limited to: electrical, cable and telephone.

**PLANNING DIVISION
CONDITIONS OF APPROVAL
PA07-0083, PA07-0158, PA07-0159, PA07-0160, PA07-0161 AND PA07-0162
PAGE 55 OF 67**

- LD53. (CO) Prior to issuance of a certificate of occupancy or building final, all existing and new utilities adjacent to and on-site shall be placed underground in accordance with City of Moreno Valley ordinances. (MC 9.14.130)
- LD54. (CO) Prior to issuance of a certificate of occupancy or building final for any Commercial/Industrial facility, whichever occurs first, the owner may have to secure coverage under the State's General Industrial Activities Storm Water Permit as issued by the State Water Resources Control Board.
- LD55. (CO) Prior to issuance of a certificate of occupancy or building final, the applicant shall ensure the following, pursuant to Section XII. I. of the 2010 NPDES Permit:
- (a) Field verification that structural Site Design, Source Control and Treatment Control BMPs are designed, constructed and functional in accordance with the approved Final Water Quality Management Plan (WQMP)
 - (b) Certification of best management practices (BMPs) from a state licensed civil engineer. An original WQMP BMP Certification shall be submitted to the City for review and approval.

Prior to Acceptance of Streets into the City Maintained Road System

- LD56. (AOS) Aggregate slurry, as defined in Section 203-5 of Standard Specifications for Public Works Construction, may be required just prior to the end of the one-year warranty period of the public streets at the discretion of the City Engineer. If slurry is required, the developer/contractor must provide a slurry mix design submittal for City Engineer approval. The latex additive shall be Ultra Pave 70 (for anionic – per project geotechnical report) or Ultra Pave 65 K (for cationic – per project geotechnical report) or an approved equal. The latex shall be added at the emulsion plant after weighing the asphalt and before the addition of mixing water. The latex shall be added at a rate of two to two-and-one-half (2 to 2½) parts to one-hundred (100) parts of emulsion by volume. Any existing striping shall be removed prior to slurry application and replaced per City standards.

SPECIAL CONDITIONS

- LD57. **The following project engineering design plans (24"x36" sheet size) shall be submitted for review and approval as well as additional plans deemed necessary by the City during the plan review process. As-Built Plans of these plans are also required:**
- (a) **Rough Grading Plan**
 - (b) **Precise Grading Plan**

- (c) **Street Improvement Plan**
- (d) **Storm Drain Plan**
- (e) **Signing and Striping Plan**
- (f) **Traffic Control Plan**
- (g) **Final Drainage Study**
- (h) **Final Water Quality Management Plan**

LD58. Prior to rough grading plan approval, this project shall demonstrate, via a final drainage study, that the increased runoff resulting from the development of this site is mitigated. During no storm event shall the flow leaving the site in the developed condition be larger than that of the pre-developed condition. The drainage study shall analyze the following events: 1, 3, 6 and 24-hour durations for the 2, 5, 10 and 100-year storm events. The applicant understands that additional detention measures, beyond those shown on the tentative map and preliminary drainage study, may be required.

LD59. Prior to rough and precise grading plan approval, the plans shall clearly show the extents of all existing easements on the property. All building structures shall be constructed outside of existing easements. All on-site and off-site easements shall be shown on the grading plan.

LD60. Prior to rough and precise grading plan approval, the plans shall clearly show that any slope near the public right-of-way has a minimum set-back area at 2% maximum of 2 feet before the start of the top or toe of slope. If the vertical height of the slope exceeds 10 feet, this set-back area shall be 3 feet minimum.

LD61. Prior to precise grading plan approval, the grading plans shall show any proposed trash enclosure as dual bin; one bin for trash and one bin for recyclables. The trash enclosure shall be per City Standard Plan 627.

LD62. Prior to precise grading plan approval, the grading plans shall clearly show that the parking lot conforms to City standards. The parking lot shall be 5% maximum, 1% minimum, 2% maximum at or near any disabled parking stall and travel way. Ramps, curb openings and travel paths shall all conform to current ADA standards as outlined in Department of Justice's "ADA Standards for Accessible Design", Excerpt from 28 CFR Part 36.

(www.usdoj.gov) and as approved by the City's Building and Safety Division.

LD63. Prior to parcel map approval, either reciprocal access easement(s) shall be shown on the map or a separate recorded copy of a reciprocal access agreement between parcels shall be submitted to the City for review and approval.

LD64. Prior to parcel map approval, the map shall show the following:

- (a) A 100-foot right-of-way dedication for the construction of Eucalyptus Avenue.
- (b) A 60-foot right-of-way dedication for the construction of Street "A".
- (c) A 44-foot right-of-way dedication for the future construction of Encilia Street along the south boundary of Parcel 6 and Lot C Quincy Channel.
- (d) A 4-foot right-of-way dedication for the future construction of Encilia Street along the south boundary of Parcel 5.
- (e) An 80-foot street right-of-way vacation for the old alignment of Fir Avenue traversing Buildings 4 and 5 as well as parking lot areas of Buildings 3 and 6.
- (f) A 40-foot street right-of-way vacation for the old alignment of Fir Avenue traversing and along the south boundary of Parcel 3.
- (g) A 30-foot street right-of-way vacation for the west half of Quincy Street.
- (h) A 16-foot right-of-way dedication along the north property line, excepting area already acquired by the City, for the future use by Caltrans.
- (i) A drainage and access easement dedication to the City at the north boundary line at Quincy Channel for culvert maintenance and also at the north and south ends of proposed culverts at its crossing with Eucalyptus Avenue.
- (j) A 4-foot minimum pedestrian right-of-way dedication behind any driveway approach per City Standard 118C.

- (k) A 2-foot and varying width public access easement for the portions of sidewalk which are outside of the public right-of-way, along Eucalyptus Avenue necessary to accommodate curb separated sidewalk.
- (l) A 6-foot wide trail easement on the north side of Eucalyptus Avenue at its proposed bridge culvert crossing over Quincy Channel.
- (m) A varying wide trail easement 8.5-foot wide to 13.5-foot wide trail easement on the north side of Eucalyptus Avenue.
- (n) An 18.5-foot wide multi-purpose trail easement along the west side of Quincy Channel.
- (o) An easement along the west project boundary between SR-60 and Eucalyptus Avenue for proposed water line improvements required to relocate an existing 12-inch EMWD water line from along the north project boundary to within Eucalyptus Avenue.
- (p) A reciprocal access easement between Parcels 4 and 5 and between Parcels 5 and 6.
- (q) Corner cutback right-of-way dedications per City Standard 208.
- (r) Retention of open space lots designated as Lot C and Lot D on the tentative map to be retained and maintained by the developer.

LD65. Prior to parcel map approval, the Developer shall guarantee the construction of the following improvements by entering into a public improvement agreement and posting security. The improvements shall be completed prior to occupancy of the first building or as otherwise determined by the City Engineer.

- (a) Eucalyptus Avenue, Arterial, City Standard 104A (100-foot RW / 76-foot CC) shall be constructed to full-width, within the project's frontage and 32-feet wide (12-foot lanes and 4-foot shoulders) on center from the east map boundary at Quincy Channel easterly to Redlands Boulevard, including any transitions required at the intersection with Redlands Boulevard. Improvements shall consist of, but not be limited to, pavement, base, curb, gutter, sidewalk, driveway approaches, drainage structures, bridge culvert crossing, culvert structures, rip rap, offsite improvement transition/joins to existing, streetlights, pedestrian ramps, undergrounding of any

power poles with overhead utility lines less than 115,000 volts, signing, striping, and dry and wet utilities.

- (b) Street "A", Local Street, City Standard 108A Modified (60-foot RW / 40-foot CC) shall be constructed full-width within the project's boundaries using a Traffic Index (TI) of 10. Improvements shall consist of, but not be limited to, pavement, base, eight-inch curb, gutter, sidewalk, driveway approaches, drainage structures, streetlights, pedestrian ramps, and dry and wet utilities.
- (c) Quincy Channel improvements shall consist of, but not be limited to bridge culvert crossing including headwall, rip rap, access ramp from street to bottom of channel, multi-purpose trail and access road, buried concrete channel side slope, buried concrete channel vertical wall, storm drain outlet structures (headwall and cut-off walls, sewer line crossing beneath the channel.
- (d) Driveway approaches shall be constructed per City Standard No. 118C. The parcel map shall show an additional 4-foot right-of-way dedication behind driveway approaches. No decorative pavers shall be placed within the public right-of-way.
- (e) Relocation of an existing water line along the north property boundary adjacent to State Route 60 to within Eucalyptus Avenue.
- (f) Removal or relocation, as determined by SCE, of existing overhead power lines along the north property boundary adjacent to State Route 60.

LD66. Prior to building permit issuance, the precise grading plan for that building shall be approved by the City and Parcel Map 35679 shall record.

LD67. Prior to building permit issuance, this project shall cause the vacation of all existing easements, especially those easements underneath proposed building footprints. This shall include, but not be limited to, the 12-foot wide EMWD access easement, 20-foot wide EMWD water line easement, and easements for utilities and incidental purposes granted to Southern Sierras Power Company. All utilities shall be relocated, as necessary, prior to vacation of easements. All new easements shall be granted prior to utility relocations and vacation of existing easements. All utilities shall be relocated into the proposed public right-of-way or to a location as agreed upon by the developer, the easement holder and the City Engineer, as necessary, prior to vacation of easements. All new easements shall be granted prior to utility relocations and vacation of existing easements

and/or street vacations. All utility locations shall be done at no expense to the City.

LD68. Prior to occupancy permit issuance, all overhead utility lines less than 115,000 volts fronting or within the entire project site boundary shall be placed underground per Section 9.14.130C of the City Municipal Code.

LD69. In accordance with the County of Riverside – Low Impact Development BMP Design Handbook (BMP Handbook) Appendix A – Infiltration Testing requirements, perform the required number of in-situ infiltration testing within the footprints of the proposed LID BMPs and provide the results in the first submittal of the Final-WQMP. Conceptually, the Engineer’s proposed infiltration feasibility is acceptable for this Preliminary WQMP. Based on the field measured results of the additional infiltration tests, the Applicant acknowledges that infiltration infeasibility may be presented which would require substantially more area than currently shown on the plans to retain the proposed design capture volumes (DCV) as required. Maximum required dedicated LID BMP area shall be in compliance with the County’s WQMP Guidance document’s effective area requirements indicated in Table 2-5, page 41.

LD70. All proposed LID BMP’s shall be designed in accordance with the BMP Handbook. This includes, but is not limited to, forebay design and volumes, basin landscaping, retaining wall designs, soil media depths, etc. Tributary areas to all LID BMPs shall be in conformance with the BMP Handbook and/or at the discretion of the City’s Land Development Division.

LD71. The Applicant shall prepare and submit for approval a final, project-specific water quality management plan (F-WQMP) for PA07-0084 – Prologis Inc. The F-WQMP shall be consistent with the approved P-WQMP and in full conformance with the document; “Water Quality Management Plan, A Guidance Document for the Santa Ana Region of Riverside County,” with an approval date of October 22, 2012 (WQMP Guidance). The F-WQMP shall be submitted and approved prior to application for and issuance of grading permits or building permits. At a minimum, the F-WQMP shall include the following: Site design principles; Source control BMPs; LID BMPs; Operation and Maintenance requirements for BMPs; and sources of funding for BMP implementation.

LD72. Overall, the proposed LID BMP concept is accepted as the conceptual LID BMP implementation for the proposed site. The Applicant has proposed to incorporate the use of infiltration basins. Final design details of these basins must be provided in the first submittal of the F-WQMP. The sizes of all LID BMPs are to be determined using the current procedures set forth

the Riverside County Flood Control and Water Conservation District's Design Handbook for Low Impact Development Best Management Practices. The Applicant acknowledges that more area than currently shown on the plans may be required to treat site runoff as required by the WQMP guidance.

LD73. The Applicant shall substantiate all applicable Hydrologic Condition of Concern (HCOC) issues in the first submittal of the F-WQMP.

LD74. The Applicant shall, prior to building or grading permit closeout or the issuance of a certificate of occupancy, demonstrate:

- (a) That all structural BMPs have been constructed and installed in conformance with the approved plans and specifications;
- (b) That all structural BMPs described in the F-WQMP have been implemented in accordance with approved plans and specifications;
- (c) That the applicant is prepared to implement all non-structural BMPs included in the F-WQMP, conditions of approval, and building/grading permit conditions; and
- (d) That an adequate number of copies of the approved F-WQMP are available for the future owners/occupants of the project.

PUBLIC WORKS DEPARTMENT – TRANSPORTATION ENGINEERING DIVISION

Based on the information contained in our standard review process we recommend the following conditions of approval be placed on this project:

GENERAL CONDITIONS

TE1. Future Eucalyptus Avenue is classified as an Arterial (100'RW/76'CC) per City Standard Plan No. 104A. Any modifications or improvements undertaken by this project shall be consistent with the City's standards for this facility. Sidewalk shall be curb separated. The project shall construct pavement improvements from the eastern property boundary to Redlands Boulevard consistent with Land Development conditions.

TE2. Future "A" Street is classified as a Modified Local Street (60'RW/40'CC) per City Standard Plan No. 108A. The T.I. shall be per Land Development's conditions. The southerly terminus of the roadway shall include an end of roadway treatment satisfactory to the City Engineer. The street shall be signed for no parking/no stopping. Any modifications or improvements

undertaken by this project shall be consistent with the City's standards for this facility.

PRIOR TO IMPROVEMENT PLAN APPROVAL OR CONSTRUCTION PERMIT

- TE3. The driveways less than or equal to 40 feet in width shall conform to Section 9.11.080, and Table 9.11.080-14 of the City's Development Code - Design Guidelines, and City Standard Plan No. 118C. Driveways wider than 40' shall be designed as intersections with pedestrian access ramps per City standards.
- TE4. Prior to the final approval of the street improvement plans, a signing and striping plan shall be prepared per City of Moreno Valley Standard Plans - Section 4 for all streets with a cross section of 66'/44' and wider.
- TE5. Prior to issuance of a construction permit, construction traffic control plans prepared by a qualified, Registered Civil or Traffic engineer shall be required.
- TE6. Sight distance at driveways and on streets shall conform to City Standard Plan No. 125 A, B, and C at the time of preparation of final grading, landscape, and street improvements.
- TE7. Prior to final approval of the street improvement plans, interim and ultimate alignment studies shall be approved by the City Traffic Engineer.
- TE8. Prior to the final approval of the street improvement plans, the project applicant shall prepare traffic signal design plans for the following intersections:**
- **Redlands Boulevard/SR-60 Westbound Ramp**
 - **Redlands Boulevard/Future Eucalyptus Avenue**
- TE9. **Prior to the final approval of the street improvement plans, the project applicant shall design the intersection of Redlands Boulevard and Eucalyptus Avenue to provide the following geometrics:**
- Northbound: One left turn lane, one through lane**
Southbound: One through lane, one right turn lane
Eastbound: One left turn lane, one right turn lane
Westbound: N/A

NOTE: All curb return radii shall be 50 feet.

TE10. Prior to final approval of the street improvement plans, the project applicant shall design the intersection of Redlands Boulevard and SR-60 Westbound Ramp to provide the following geometrics:

**Northbound: One left turn lane, one through lane, one right turn lane
Southbound: One left turn lane, one shared through/right turn lane
Eastbound: One shared left turn/through/right turn lane
Westbound: One shared left turn/through/right turn lane**

TE11. Prior to issuance of a construction permit, the project applicant shall pay to the City all applicable “Fair Share” impact fees per the findings of the Environmental Impact Report.

PRIOR TO CERTIFICATE OF OCCUPANCY OR BUILDING FINAL

TE12. (CO) Prior to issuance of a certificate of occupancy, all approved signing and striping shall be installed per current City Standards and the approved plans.

TE13. (CO) Each gated entrance from a public street will be provided with the following, or as approved by the City Engineer:

- A. A storage lane with length sufficient to support the queuing predicted by the traffic study (minimum of 75 feet).**
- B. Signing and striping at the gate, including no parking signs.**
- C. A separate pedestrian entry, if pedestrian access is necessary.**
- D. Presence loop detectors (or another device) within 1 or 2 feet of the gates that ensures that the gates remain open while any vehicle is in the queue.**

All of these features must be kept in working order.

TE14. (CO) Prior to issuance of a certificate of occupancy, the project applicant shall construct the intersection/roadway improvements identified in TE8, TE9, and TE10 per the approved plans.

TE15. (CO) Prior to issuance of the final certificate of occupancy, the project applicant shall submit a traffic calming study for Eucalyptus Avenue located between Moreno Beach Drive and the western property boundary (Specific Plan 209) for City review and approval. Any recommendations made in the study shall be implemented by the project applicant to the satisfaction of the City Traffic Engineer prior to issuance of the final certificate of occupancy.

PRIOR TO ACCEPTANCE OF STREETS INTO THE CITY-MAINTAINED ROAD SYSTEM

TE16. Prior to the acceptance of streets into the City-maintained road system, all approved traffic control and signing and striping shall be installed per current City Standards and the approved plans.

FINANCIAL & MANAGEMENT SERVICES DEPARTMENT

Special Districts Division

Note: All Special Conditions, Modified Conditions, or Clarification of Conditions are in bold lettering. All other conditions are standard to all or most development projects.

Acknowledgement of Conditions

The following items are Special Districts' Conditions of Approval for project **PA07-0083**; this project shall be completed at no cost to any Government Agency. All questions regarding Special Districts' Conditions including but not limited to, intent, requests for change/modification, variance and/or request for extension of time shall be sought from the Special Districts Division of the Financial & Management Services Department 951.413.3480 or by emailing specialdistricts@moval.org.

General Conditions

- SD1. The parcel(s) associated with this project have been incorporated into the Moreno Valley Community Services Districts Zones A (Parks & Community Services) and C (Arterial Street Lighting). All assessable parcels therein shall be subject to annual parcel taxes for Zone A and Zone C for operations and capital improvements.
- SD2. Any damage to existing landscape areas maintained by the City of Moreno Valley due to project construction shall be repaired/replaced by the Developer, or Developer's successors in interest, at no cost to the City of Moreno Valley.
- SD3. The ongoing maintenance of any landscaping required to be installed behind the curb on **Fir Avenue, Quincy Street, and Eucalyptus Avenue** shall be the responsibility of the property owner.
- SD4. Street light Authorization forms, for all street lights that are conditioned to be installed as part of this project, must be submitted to the Special Districts Division for approval, **prior to** street light installation. The Street light Authorization form

can be obtained from the utility company providing electric service to the project, either Moreno Valley Utility or Southern California Edison.

Prior to Building Permit Issuance

- SD5. (BP) This project has been identified to be included in the formation of a Map Act Area of Benefit Special District for the construction of **major thoroughfares and/or freeway** improvements. The property owner(s) shall participate in such District, and pay any special tax, assessment, or fee levied upon the project property for such District. At the time of the public hearing to consider formation of the district, the property owner(s) will not protest the formation, but the property owners(s) will retain the right to object if any eventual assessment is not equitable, that is, if the financial burden of the assessment is not reasonably proportionate to the benefit which the affected property obtains from the improvements which are to be installed. The Developer must notify Special Districts of intent to request building permits 90 days prior to their issuance. (Street & Highway Code, GP Objective 2.14.2, MC 9.14.100)
- SD6. (BP) This project has been identified to be included in the formation of a Community Facilities District (Mello-Roos) for **Public Safety** services, including but not limited to Police, Fire Protection, Paramedic Services, Park Rangers, and Animal Control services. The property owner(s) shall not protest the formation; however, they retain the right to object to the rate and method of maximum special tax. In compliance with Proposition 218, the Developer shall agree to approve the mail ballot proceeding (special election) for either formation of the CFD or annexation into an existing district that may already be established. The Developer must notify Special Districts of intent to request building permits 90 days prior to their issuance. (California Government Code)
- SD7. *Commercial* (BP) If Land Development, a Division of the Public Works Department, requires this project to supply a funding source necessary to provide, but not limited to, stormwater utilities services for the monitoring of on-site facilities and performing annual inspections of the affected areas to ensure compliance with state mandated stormwater regulations, the Developer must notify Special Districts 90 days prior to the City's issuance of a building permit and the financial option selected to fund the continued maintenance. (California Government Code)
- SD8. (BP) Prior to the issuance of the first building permit for this project, the Developer shall pay Advanced Energy fees for all applicable Zone B (Residential Street Lighting) and/or Zone C (Arterial Street Lighting and Intersection Lighting) street lights required for this development. Payment shall be made to the City of Moreno Valley, as collected by the Land Development Division, based upon the

**PLANNING DIVISION

Advanced Energy fee rate in place at the time of payment, as set forth in the current Listing of City Fees, Charges and Rates, as adopted by City Council.

The Developer shall provide a receipt to the Special Districts Division showing that the Advanced Energy fees have been paid in full for the number of street lights to be accepted into the CSD Zone B and/or Zone C programs. Any change in the project which may increase the number of street lights to be installed will require payment of additional Advanced Energy fees at the then current fee.

- SD9. (BP) Prior to release of building permit, the Developer, or the Developer's successors or assignees, shall record with the County Recorder's Office a **Covenant of Assessments** for each assessable parcel therein, whereby the Developer covenants the existence of the Moreno Valley Community Services District), its established benefit zones, and that said parcel(s) is (are) liable for payment of annual benefit zone charges and the appropriate National Pollutant Discharge Elimination System (NPDES) maximum regulatory rate schedule when due. A copy of the recorded Covenant of Assessments shall be submitted to the Special Districts Division. For a copy of the Covenant of Assessments form, please contact Special Districts, phone 951.413.3480.

PUBLIC WORKS DEPARTMENT – MORENO VALLEY UTILITY

Note: All Special Conditions, Modified Conditions, or Clarification of Conditions are in bold lettering. All other conditions are standard to all or most development projects.

Acknowledgement of Conditions

The following items are Moreno Valley Utilities' Conditions of Approval for project(s) PA07-0081, PA07-0082, PA04-0083, PA07-0084, PA07-0158, PA07-0159, PA07-0160, PA07-0161, and PA07-0162; this project shall be completed at no cost to any Government Agency. All questions regarding Moreno Valley Utilities' Conditions including but not limited to, intent, requests for change/modification, variance and/or request for extension of time shall be sought from Moreno Valley Utilities (the Electric Utility Division) of the Public Works Department 951.413.3500. The applicant is fully responsible for communicating with Moreno Valley Utilities staff regarding their conditions. Listed after each individual condition is a contact name of who can be reached for specific questions.

PRIOR TO RECORDATION OF FINAL MAP

- MVU1. For single family subdivisions, a three foot easement along each side yard property line shall be shown on the final map and offered for dedication to the City of Moreno Valley for public utility purposes, unless otherwise approved by

the City Engineer. If the project is a multi-family development, townhome, condominium, apartment, commercial or industrial project, and it requires the installation of electric distribution facilities within common areas, a non-exclusive easement shall be provided to Moreno Valley Utilities to include all such common areas. All easements shall include the rights of ingress and egress for the purpose of operation, maintenance, facility repair, and meter reading.

PRIOR TO ENERGIZING MVU ELECTRIC UTILITY SYSTEM AND CERTIFICATE OF OCCUPANCY

MVU2. **City of Moreno Valley Municipal Utility Service – Electrical Distribution:** Prior to issuance of building permit, the developer shall submit a detailed engineering plan showing design, location and schematics for the utility system to be approved by the City Engineer. In accordance with Government Code Section 66462, the Developer **shall** execute an agreement with the City providing for the installation, construction, improvement and dedication of the utility system following recordation of final map and concurrent with trenching operations and other subdivision improvements so long as said agreement incorporates the approved engineering plan and provides financial security to guarantee completion and dedication of the utility system.

The Developer **shall** coordinate and receive approval from the City Engineer to install, construct, improve, and dedicate to the City, or the City’s designee, all utility infrastructure (including but not limited to conduit, equipment, vaults, ducts, wires, switches, conductors, transformers, resistors, amplifiers, and “bring-up” facilities including electrical capacity to serve the identified development and other adjoining/abutting/ or benefiting projects as determined by Moreno Valley Utilities) – collectively referred to as “utility system” (to and through the development), along with any appurtenant real property easements, as determined by the City Engineer to be necessary for the distribution and /or delivery of any and all “utility services” to each lot and unit within the Tentative Map. For purposes of this condition, “utility services” shall mean electric, cable television, telecommunication (including video, voice, and data) and other similar services designated by the City Engineer. “Utility services” shall not include sewer, water, and natural gas services, which are addressed by other conditions of approval.

The City, or the City’s designee, shall utilize dedicated utility facilities to ensure safe, reliable, sustainable and cost effective delivery of utility services and maintain the integrity of streets and other public infrastructure. Developer shall, at developer’s sole expense, install or cause the installation of such interconnection facilities as may be necessary to connect the electrical

distribution infrastructure within the project to the Moreno Valley Utilities owned and controlled electric distribution system.

- MVU3. This project may be subject to a Reimbursement Agreement. The project may be responsible for a proportionate share of costs associated with electrical distribution infrastructure previously installed that directly benefits the project. The project may be subject to a system wide capacity charge in addition to the referenced reimbursement agreement. Payment(s) shall be required prior to issuance of building permit(s).
- MVU4. For all new projects, existing Moreno Valley Utility electrical infrastructure shall be preserved in place. The developer will be responsible, at developer expense, for any and all costs associated with the relocation of any of Moreno Valley Utility's underground electrical distribution facilities, as determined by Moreno Valley Utility, which may be in conflict with any developer planned construction on the project site.

PARKS AND COMMUNITY SERVICES DEPARTMENT

Note: All Special Conditions, Modified Conditions, or Clarification of Conditions are in bold lettering. All other conditions are standard to all or most development projects.

Acknowledgement of Conditions

The following items are Parks and Community Services Department Conditions of Approval for project **PA07-0084, TTM 35679**; this project shall be completed at no cost to any Government Agency. All questions regarding Parks and Community Services Department Conditions including but not limited to, intent, requests for change/modification, variance and/or request for extension of time shall be sought from the Parks and Community Services Department 951.413.3280. The applicant is fully responsible for communicating with the Parks and Community Services Department project manager regarding the conditions.

SPECIFIC CONDITIONS OF APPROVAL

PCS1.A multi-use trail shall be located along the west side of Quincy Channel and east side of Quincy Street (or its alignment). Additionally, the trail is to be located over the Quincy Channel, on the south side of Fir Avenue, connecting to the Quincy trail. The trail shall be 14' in width, with a 2' stamped colored concrete section between curb and trail. The trail shall be dedicated as an easement to the City from a lettered lot owned by Riverside County Flood Control and Water Conservation District.

PCS2.Parks and Community Services Department – Standard Trail Conditions:

- a. Trail construction shall adhere to: The City’s Standard Plans, ‘The Greenbook Standard Specifications for Public Works Construction’, ‘California Code of Regulations Title 24’ (where applicable), and the Park and Community Services Specification Guide.
- b. The General Contractor shall be a State of California Class ‘A’ General Engineering Contractor, per the Business and Professions Code Section 7056, or a combination of State of California Class ‘C’ licenses for which the work is being performed. Licenses must be current and in good standing, for the duration of the project.
- c. All utility easements shall not interfere with the trail or its fencing. A map of all easements and the corresponding easement rights shall be presented to Parks and Community Services prior to scheduling the Tentative Map for approval.
- d. (R) A restriction shall be placed on lots that are adjacent to the trail, preventing openings or gates accessing the trail. This shall be done through Covenants, Conditions, and Restrictions (CC&R’s). A copy of the CC&R’s with this/her restriction noted shall be submitted and approved by the Director of Parks and Community Services or his/her designee prior to the recordation of the Final Map.
- e. Trails shall not be shared with any above ground utilities, blocking total width access.
- f. The following plans require Parks and Community Services written approval: Tentative tract/parcel maps; rough grading plans (including all Delta changes); Final Map; precise grading plans; street improvement plans; traffic signal plans; fence and wall plans; landscape plans for areas adjacent to trails; trail improvement plans.
- g. (GP) A detailed rough grading plan with profile for the trail shall be submitted and approved by the Director of Parks and Community Services or his/her designee prior to the issuance of grading permits.
- h. Grading certification and compaction tests are required, prior to any improvements being installed.
- i. A minimum two-foot graded bench is required where trails adjoin landscaped or open space areas.
- j. (R) Prior to the approval of the Final Map, a detailed map of the trail and areas adjacent to the trail shall be submitted to the Director of Parks and Community Services or his/her designee prior for review and written approval.
- k. (R) All necessary documents to convey to the City and/or the Community Services District any required dedications for parks or open space, as specified on the tentative map or in these Conditions of Approval shall be submitted by the developer to Parks and Community Services, prior to the recordation of the final map.

**PLANNING DIVISION

PAGE 70 OF 67**

- i. (R) Prior to recordation of the Final Map, the developer shall post security (bonds) to guarantee construction of the trail to the City's standards. Copies of the bonds shall be provided to Parks and Community Services, prior to the approval of the Final Map.
- m. (BP) Prior to the issuance of the first Building Permit, final improvement plans (mylars and AutoCAD & PDF file on a CD-ROM) shall be reviewed and approved by the Community Development Department – Planning Division; the Public Works Department – Land Development and Transportation Division; Fire Prevention; and Parks and Community Services Department. Landscaped areas adjacent to the park shall be designed to prevent water on the park.
- n. Eight sets of complete trail improvement plans shall be submitted to Parks and Community Services for routing. Adjacent landscaping and walls shall be shown on the plans. Final construction plans and details require wet stamped and signed Mylars, eight sets of bond copies and one Mylar copy from the City signed mylars, the AutoCAD file on CD, and a PDF file on CD. As-builts for the trails have the same requirements as final plan submittals.
- o. All street crossings shall be signed with approved 'STOP' signs, trail signs, and posts. All improved equestrian trail crossings at signalized intersections that are constructed at their ultimate locations shall have high mounted push buttons. These shall be coordinated through the Transportation Division.
- p. CSD Zone 'A' plan check fees shall be paid prior to the second plan check.
- q. CSD Zone 'A' inspection fees shall be paid prior to signing of Mylars.
- r. (BP) The trail shall be surveyed and staked by the developer. The trail shall be inspected and approved by the Director of Parks and Community Services or his/her designee prior to the issuance of any building permits for production units.
- s. Any damage to trails or fencing during construction shall be repaired by the developer and inspected by the Director of Parks and Community Services or his/her designee; prior to the last phase of building permit issuance.
- t. A minimum 38' radius shall be incorporated on all trails where a change of direction occurs (minor or major). Additionally, widening of the trail is necessary in most situations.
- u. Drive approaches shall adhere to City Std. Plan #118C.
- v. Concrete access areas to trails with decomposed granite surfaces shall be rough finished concrete (typically raked finish). The access shall extend to the main trail flat surface.
- w. (BP) In order to prevent the delay of building permit issuance, any deviation from trail fencing materials or trail surface materials shall be submitted to Director of Parks and Community Services or his/her designee and approved in writing 60-days prior to the commencement of trail construction.

**PLANNING DIVISION

- x. Any unauthorized deviation from the approved plan, specifications, City Standard Plans, or Conditions of Approval may result in the delay of building permit issuance and/or building Finals/ Certificate of Occupancy of the project conditioned for improvements.
 - y. Where required, decorative solid-grouted block wall (no precision block, stucco, veneer finishes, PVC, or wood fencing) with a minimum height of 72” on the trailside shall be installed along lots that adjoin the trail. Block walls shall be located solely on private property. If landscaping is to be utilized between the block wall and the trail, a PVC fence shall be installed along the trail separating the landscaping from the trail (where required). All block walls that have public view shall have an anti-graffiti coating per Parks and Community Services specifications. Combination block/tubular steel fences shall only be utilized where approved by Parks and Community Services. Tubular steel shall comply with Parks and Community Services standards. Coating for tubular steel shall be anti-graffiti coating for metal per Parks and Community Services specifications. If alternate products are requested, the requested material(s) shall be presented to the Director of Parks and Community Services or his/her designee for review and approval. Under no circumstances can alternate products be utilized without prior written authorization from the Director of Parks and Community Services or his/her designee.
 - z. Any damage to existing landscape or hardscape areas due to project construction shall be repaired/replaced by the developer, or developer’s successors in interest, at no cost to the City or Community Services District.
 - aa. All inspections shall be requested two (2) working days in advance from the Parks and Community Services Department at the time of rough and precise grading; fence and gate installation; curb and drainage; flatwork; D.G. installation; graffiti coating; and final inspection.
 - bb. (BP) Trail construction in single family developments shall commence prior to 30% of total building permit issuance. Trail completion and acceptance (single family developments) for maintenance shall be completed prior to 70% of total building permit issuance.
 - cc. (CO) Trail construction in multi-family or commercial developments shall commence with the rough grading. Trail completion and acceptance for maintenance shall be completed prior to the issuance of 50% of the total certificates-of-occupancy (for multi-family and/or commercial developments).
- PCS3.** (R) If Special Districts, a Division of the Public Works Department, requires this project to supply a funding source for the continued maintenance, enhancement, and or retrofit of neighborhood parks, open spaces, linear parks, and/or trails systems, the Developer must notify Special Districts of intent to record the final map 70 days prior to recordation of the final map and the financial option selected to fund the continued maintenance. (California Government Code, GP Chapter 2.7)

- PCS3b.** (BP) If Special Districts, a Division of the Public Works Department, requires this project to supply a funding source for the continued maintenance, enhancement, and or retrofit of neighborhood parks, open spaces, linear parks, and/or trails systems, the Developer must notify Special Districts of intent to request building permits 70 days prior to their issuance and the financial option selected to fund the continued maintenance. (California Government Code, GP Chapter 2.7)
- PCS4.** The parcel(s) associated with this project have been incorporated into the Moreno Valley Community Services Districts Zones A (Parks and Community Services). All assessable parcels therein shall be subject to the annual Zone A charge for operations and capital improvements.
- PCS5.** (R) Prior to recordation of the final map, the developer, or the developer's successors or assignees, shall supply a copy of the recorded Declaration of Covenant and Acknowledgement of Assessments to the Parks and Community Services Department.
- PCS6.** (BP) Prior to release of building permit, the developer, or the developer's successors or assignees shall supply a copy of the recorded Declaration of Covenant and Acknowledgement of Assessments to the Parks and Community Services Department.
- PCS7.** (BP) This project is subject to current Development Impact Fees at time of building permit issuance.
- PCS8.** Any modified or newly created agreements shall be reviewed and approved by the Board of the Moreno Valley Community Services District.

POLICE DEPARTMENT

Note: All Special conditions are in bold lettering. All other conditions are standard to all or most development projects

Standard Conditions

- PD1. Prior to the start of any construction, temporary security fencing shall be erected. The fencing shall be a minimum of six (6) feet high with locking, gated access and shall remain through the duration of construction. Security fencing is required if there is: construction, unsecured structures, unenclosed storage of materials and/or equipment, and/or the condition of the site constitutes a public hazard as determined by the Public Works Department. If security fencing is required, it shall remain in place until the project is completed or the above

RESOLUTION NO. 2014-59

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING TENTATIVE PARCEL MAP 35679 (PA07-0084) FOR DEVELOPMENT OF THE 2,244,419 SQUARE FOOT PROLOGIS EUCALYPTUS INDUSTRIAL PARK PROJECT WITHIN THE 122 ACRES OF ASSESSOR'S PARCEL NUMBERS 488-330-011, 012, -013, -017, -018, -019, -020, AND -021, SUBJECT TO THE CONDITIONS OF APPROVAL INCLUDED AS EXHIBIT A

Section 1:

WHEREAS, the applicant, Prologis, has filed an application for the approval of PA07-0084 or Tentative Parcel Map No. 35679 to re-configure the existing eight parcels located within the project site into six parcels; and

WHEREAS, on June 24, 2014, the City Council of the City of Moreno Valley held a public hearing to consider the subject applications and the environmental documentation prepared for the project; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred; and

WHEREAS, there is hereby imposed on the subject development project certain fees, dedications, reservations and other exactions pursuant to state law and City ordinances; and

WHEREAS, pursuant to Government Code Section 66020(d)(1), NOTICE IS HEREBY GIVEN that this project is subject to certain fees, dedications, reservations and other exactions as provided herein.

NOW, THEREFORE, BE IT RESOLVED, it is hereby found, determined and resolved by the City Council of the City of Moreno Valley as follows:

A. This City Council hereby specifically finds that all of the facts set forth above in this Resolution are true and correct.

B. Based upon substantial evidence presented to this City Council during the above-referenced meeting on June 24, 2014, including written and oral staff reports, and the record from the public hearing, this City Council hereby specifically finds as follows:

1. Conformance with General and Specific Plans – That the proposed land division is consistent with applicable general and specific plans.

FACT: The proposed tentative parcel map is consistent with the existing General Plan designations (BP, BPX, R15, R5 and RA-2) of the project site as well as the proposed change to Light Industrial. The proposed parcel map will re-configure the existing eight parcels located within the project site into six parcels. The proposed land division is consistent with existing goals, objectives, policies and programs of the general plan.

2. Design Conformance with General and Specific Plans – That the design or improvement of the proposed land division is consistent with applicable general and specific plans.

FACT: The tentative parcel map as designed and conditioned will provide improvements that are consistent with the requirements of the project site's existing General Plan land use designations (BP, BPX, R15, R5 and RA-2) as well as the proposed change to Light Industrial.

3. Physically Suitable for Proposed Development – That the site of the proposed land division is physically suitable for the type of development.

FACT: The project site is comprised of multiple vacant rectangular shaped parcels that are mostly flat with seasonal washes along the sites eastern and southern boundaries. The project is located on the south side of State Route 60 and east of the Moreno Valley Auto Mall. Land uses to the north include the adjacent freeway with Office Commercial, R2 and RA-2 zoned land north of the freeway. Land uses to the east include a mix of Light Industrial and Community Commercial zoned land and RA-2 zoned land with a developed warehouse facility further to the east. Land uses to the south include vacant RA-2 zone with developed tract homes across the channel from the project site. Overall, the project site is well suited for the proposed subdivision.

4. Physically Suitable for Proposed Density – That the site of the proposed land division is physically suitable for the proposed density of the development.

FACT: The project site is mostly flat with seasonal washes along the sites eastern and southern boundaries. The parcel map is designed in accordance with the provisions of the City's Municipal Code. The project site is physically suitable for the subdivision.

5. Protection of Fish or Wildlife Habitat – That the design of the proposed land division or the proposed improvements are not likely to cause substantial environmental damage or substantially and unavoidably injure fish or wildlife or their habitat.

FACT: A Final EIR has been prepared in accordance with the provisions of the California Environmental Quality Act (CEQA), concluding that with mitigation and as conditioned and designed, the proposed subdivision would result in less than significant impacts to Fish and Wildlife resources. The project has also been determined to be consistent with the Multiple Species Habitat Conservation Plan (MSHCP).

6. Health, Safety and Welfare – That the design of the proposed land division or the type of improvements are unlikely to cause serious public health problems.

FACT: As conditioned, the proposed parcel map would not cause serious public health problems. The Eastern Municipal Water District will provide water and sewer services to the project site. There are no known hazardous conditions associated with the property, the design of the land division or the type of improvements.

7. Easements – That the design of the land division or the type of improvements will not conflict with easements acquired by the public at large for access through or use of property within the proposed subdivision.

FACT: The tentative parcel map has been designed to accommodate and not conflict with existing easements on the subject site including utility and storm drain easements.

8. Consistent with Applicable City Ordinances – That the proposed land division and the associated design and improvements are consistent with applicable ordinances of the city.

FACT: The tentative parcel map is designed in accordance with the provisions of the City's Municipal Code.

9. Passive or Natural Heating and Cooling – That the design of the land division provides, to the extent feasible, for future passive or natural heating and cooling opportunities in the subdivision.

FACT: The design of this parcel map, to the extent feasible, allows solar access for passive heating and opportunities for placement of shade trees and other vegetation for cooling.

10. Regional Housing – That the effect of the proposed land division on the housing needs of the region were considered and balanced against the public service needs of the residents of Moreno Valley and available fiscal and environmental resources.

FACT: The project does not exceed the planned density, the associated public service demand, or the demand for environmental resources envisioned by the Moreno Valley General Plan. The project will supplement the City's fiscal resources by paying impact fees for public facilities.

Section 2:

FEES, DEDICATIONS, RESERVATIONS, AND OTHER EXACTIONS

1. FEES

Impact, mitigation and other fees are due and payable under currently applicable ordinances and resolutions. These fees may include but are not limited to: Development Impact Fee, Transportation Uniform Mitigation Fee (TUMF), Multi-species Habitat Conservation Plan (MSHCP) Mitigation Fee, Stephens Kangaroo Habitat Conservation fee, Underground Utilities in lieu Fee, Area Drainage Plan fee, Bridge and Thoroughfare Mitigation fee (Future) and Traffic Signal Mitigation fee. The final amount of fees payable is dependent upon information provided by the applicant and will be determined at the time the fees become due and payable.

Unless otherwise provided for by this resolution, all impact fees shall be calculated and collected at the time and in the manner provided in Chapter 3.32 of the City of Moreno Valley Municipal Code or as so provided in the applicable ordinances and resolutions. The City expressly reserves the right to amend the fees and the fee calculations consistent with applicable law.

2. DEDICATIONS, RESERVATIONS, AND OTHER EXACTIONS

The adopted Conditions of Approval for PA07-0083, PA07-0158 to PA07-0162 and PA07-0084, incorporated herein by reference, may include dedications, reservations, and exactions pursuant to Government Code Section 66020 (d) (1).

3. CITY RIGHT TO MODIFY/ADJUST; PROTEST LIMITATIONS

The City expressly reserves the right to establish, modify or adjust any fee, dedication, reservation or other exaction to the extent permitted and as authorized by law.

Pursuant to Government Code Section 66020(d)(1), NOTICE IS FURTHER GIVEN that the 90 day period to protest the imposition of any impact fee, dedication, reservation, or other exaction described in this resolution begins on the effective date of this resolution and any such protest must be in a manner that complies with Section 66020(a) and failure to timely follow this procedure will bar any subsequent legal action to attack, review, set aside, void or annul imposition.

The right to protest the fees, dedications, reservations, or other exactions does not apply to planning, zoning, grading, or other similar application processing fees or service fees in connection with this project and it does not apply to any fees, dedication, reservations, or other exactions of which a notice has been given similar to this, nor does it revive challenges to any fees for which the Statute of Limitations has previously expired.

BE IT FURTHER RESOLVED that the City Council HEREBY APPROVES Resolution No. 2014-59

APPROVING Tentative Parcel Map No. 35679 (PA07-0084), subject to the attached conditions of approval included as Exhibit A.

APPROVED AND ADOPTED this 24th day of June, 2014.

Mayor of the City of Moreno Valley

ATTEST:

City Clerk

APPROVED AS TO FORM:

City Attorney

5
Resolution No. 2014-59
Date Adopted: June 24, 2014

RESOLUTION JURAT

STATE OF CALIFORNIA)
COUNTY OF RIVERSIDE) ss.
CITY OF MORENO VALLEY)

I, Jane Halstead, City Clerk of the City of Moreno Valley, California, do hereby certify that Resolution No. 2014-59 was duly and regularly adopted by the City Council of the City of Moreno Valley at a regular meeting thereof held on the 24th day of June, 2014 by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

(Council Members, Mayor Pro Tem and Mayor)

CITY CLERK

(SEAL)

Note: All Special conditions are in bold lettering. All other conditions are standard to all or most development projects.

COMMUNITY & ECONOMIC DEVELOPMENT DEPARTMENT

Planning Division

- P1. Tentative Parcel Map No. 35679 is approved for the purposes of re-configuring the 116.99 acres of Assessor's Parcel Numbers 488-330-011, 012, -013, -017, -018, -019, -020, and -021 and creating a six parcels.**
- P2. Development within Tentative Parcel Map No. 35679 shall be subject to the requirements of the City's Municipal Code.**
- P3. This approval shall comply with all applicable requirements of the City of Moreno Valley Municipal Code.

Timing Mechanisms for Conditions (see abbreviation at beginning of affected condition):

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 8 OF 40**

- P4. The site shall be developed in accordance with the approved tentative map on file in the Community & Economic Development Department -Planning Division, the Municipal Code regulations, General Plan, the Moreno Valley Industrial Area Plan and the conditions contained herein. (MC 9.14.020)
- P5. This tentative map shall expire three years after the approval date of this tentative map unless extended as provided by the City of Moreno Valley Municipal Code; otherwise it shall become null and void and of no effect whatsoever in the event the applicant or any successor in interest fails to properly file a final map before the date of expiration. (MC 9.02.230, 9.14.050, 080)
- P6. All undeveloped portions of the site shall be maintained in a manner that provides for the control of weeds, erosion and dust. (MC 9.02.030)
- P7. All landscaped areas shall be maintained in a healthy and thriving condition, free from weeds, trash and debris. (MC 9.02.030)

Prior to Issuance of Grading Permits

- P8. (GP) Prior to issuance of grading permits, the developer shall pay the applicable Stephen's' Kangaroo Rat (SKR) Habitat Conservation Plan mitigation fee. (Ord)
- P9. (GP) All site plans, grading plans, landscape and irrigation plans, fence/wall plans, lighting plans and street improvement plans shall be coordinated for consistency with this approval.
- P10. (GP) If potential historic, archaeological, or paleontological resources are uncovered during excavation or construction activities at the project site, work in the affected area will cease immediately and a qualified person (meeting the Secretary of the Interior's standards (36CFR61)) shall be consulted by the applicant to evaluate the find, and as appropriate recommend alternative measures to avoid, minimize or mitigate negative effects on the historic, prehistoric, or paleontological resource. Determinations and recommendations by the consultant shall be implemented as deemed appropriate by the Community Development Director, in consultation with the State Historic Preservation Officer (SHPO) and any and all affected Native American Tribes before any further work commences in the affected area.

If human remains are discovered, work in the affected area shall cease immediately and the County Coroner shall be notified. If it is determined that the remains are potentially Native American, the California Native American Heritage Commission and any and all affected Native American Indians tribes such as the Morongo Band of Mission Indians or the Pechanga Band of Luiseno Indians shall be notified and appropriate measures provided by State law shall be

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 9 OF 40**

implemented. (GP Objective 23.3, DG, CEQA)

- P11. (GP) Prior to the issuance of grading permits, final erosion control landscape and irrigation plans for all cut or fill slopes over 3 feet in height shall be submitted to the Planning Division for review and approval for the phase in process. This shall include slopes associated with swales and basins. The plans shall be designed in accordance with the slope erosion plan as required by the City Engineer for that phase. Man-made slopes greater than 10 feet in height shall be "land formed" to conform to the natural terrain and shall be landscaped and stabilized to minimize visual scarring. Graded slopes shall have variations that do not exceed 2:1 (GP Objective 1.5, MC 9.08.080, DG)
- P12. (GP) Prior to the issuance of a precise grading permit, the plan shall show decorative concrete paving for all driveway ingress/egress locations of the project. Accessible pedestrian pathways interior to the site cannot be painted. If delineation is necessary, then an alternative material is required.**
- P13. (GP) Prior to the issuance of a precise grading permit, all required planter areas, curbs, including twelve-inch concrete step outs, and required parking space striping shall be shown on the precise grading plan.**
- P14. (GP) Prior to the issuance of any grading permits, the following burrowing owl survey requirements shall be incorporated into the grading plans in accordance with the Riverside County Multi-Species Habitat Conservation Plan: Within 30 days of and prior to disturbance, a burrowing owl focused survey shall be conducted by a qualified biologist using accepted protocols. The survey shall be submitted to the Planning Division for review and approval.**

Prior to Recordation of Final Map

- P15. (R) Prior to final map recordation, subdivision phasing (including any proposed common open space or improvement phasing, if applicable), shall be subject to the Planning Division approval. Any proposed phasing shall provide for adequate vehicular access to all lots in each phase as determined by the City Transportation Engineer or designee and shall substantially conform to all intent and purpose of the subdivision approval. (MC 9.14.080)

Building and Safety Division

- B1. The above project shall comply with the current California Codes (CBC, CEC, CMC, CPC and Green Building Standards) as well as City ordinances. All new projects shall provide a soils report as well. Plans shall be submitted to the Building Division as a separate submittal. Building permit applications (plan review) made on or after January 1, 2014, will be subject to the 2013 Edition of the California Building Standards Code.
- B2. Prior to final inspection, all plans will be placed on a CD Rom for reference and verification. Plans will include “as built” plans, revisions and changes. The CD will also include Title 24 energy calculations, structural calculations and all other pertinent information. It will be the responsibility of the developer and or the building or property owner(s) to bear all costs required for this process. The CD will be presented to the Building and Safety Division for review prior to final inspection and building occupancy. The CD will become the property of the Moreno Valley Building and Safety Division at that time. In addition, a site plan showing the path of travel from public right of way and building to building access with elevations will be required.
- B3. (BP) Prior to the issuance of a building permit, the applicant shall submit a properly completed “Waste Management Plan” (WMP), as required, to the Compliance Official (Building Official) as a portion of the building or demolition permit process.
- B4. (BP) Prior to the issuance of a building permit, show on the plans that all exterior doors comply with the requirements of CBC 1133B.1.1.1 for accessible path of travel from every exit door, especially in consideration of doors that may be designated as exits due to interior obstructions to path of travel due to racks, equipment and other interior obstruction to the exit path of travel.
- B5. (BP) Prior to the issuance of a building permit, show on the plans that no gutter, drainage feature, swale or other deviation in the flat level surface at the accessible parking spaces exists within and for a minimum four foot extension beyond the outer dimensions of the parking space, loading zone and path of travel.
- B6. (BP) Plans shall be prepared, stamped and signed by a licensed Architect or Registered Civil Engineer for submission for plan check review.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 11 OF 40**

B7. (BP) Plumbing plans shall be prepared, including isometrics, for required plumbing fixtures based on California Plumbing Code, Chapter 4 and Table 4-1.

SCHOOL DISTRICT

S1. (BP) Prior to issuance of building permits, the developer shall provide to the Community Development Director a written certification by the affected school district that either: (1) the project has complied with the fee or other exaction levied on the project by the governing board of the district, pursuant to Government Code Section 65996; or (2) the fee or other requirement does not apply to the project.

UNITED STATES POSTAL SERVICE

PO1. (BP) Prior to the issuance of building permits, the developer shall contact the U.S. Postal Service to determine the appropriate type and location of mailboxes.

FIRE PREVENTION BUREAU

- 1. Hydrant spacing shall be addressed in plan check.**
- 2. The following Standard Conditions shall apply.**

With respect to the conditions of approval, the following fire protection measures shall be provided in accordance with Moreno Valley City Ordinances and/or recognized fire protection standards:

- F1. Final fire and life safety conditions will be addressed when the Fire Prevention Bureau reviews building plans. These conditions will be based on occupancy, use, California Building Code (CBC), California Fire Code (CFC), and related codes, which are in force at the time of building plan submittal.
- F2. The Fire Prevention Bureau is required to set a minimum fire flow for the remodel or construction of all commercial buildings per CFC Appendix B and Table B105.1. The applicant/developer shall provide documentation to show there exists a water system capable of delivering 4000 GPM for 4 hour(s) duration at 20-PSI residual operating pressure. The required fire flow may be adjusted during the approval process to reflect changes in design, construction type, or automatic fire protection measures as approved by the Fire Prevention Bureau. Specific requirements for the project will be determined at time of submittal. (CFC 508.3, Appendix B and MVMC 8.36.100 Section D).

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 12 OF 40**

- F3. Industrial, Commercial, Multi-family, Apartment, Condominium, Townhouse or Mobile Home Parks. A combination of on-site and off-site super fire hydrants (6" x 4" x 2 1/2") and super enhanced fire hydrants (6" x 4" x 4" x 2 1/2") shall not be closer than 40 feet and more than 150 feet from any portion of the building as measured along approved emergency vehicular travel ways. The required fire flow shall be available from any adjacent fire hydrant(s) in the system. Where new water mains are extended along streets where hydrants are not needed for protection of structures or similar fire problems, super or enhanced fire hydrants as determined by the fire code official shall be provided at spacing not to exceed 500 feet of frontage for transportation hazards. (CFC 508.5.7 & MVMC 8.36.050 Section O and 8.36.100 Section E)
- F4. Maximum cul-de-sac or dead end road length shall not exceed 660 feet. The Fire Chief, based on City street standards, shall determine minimum turning radius for fire apparatus based upon fire apparatus manufacture specifications. (CFC 503.1)
- F5. Prior to construction, all roads, driveways and private roads shall not exceed 12 percent grade. (CFC 503.2.7 and MVMC 8.36.050)
- F6. During phased construction, dead end roadways and streets which have not been completed shall have a turn-around capable of accommodating fire apparatus. (CFC 503.1 and 503.2.5)
- F7. Prior to issuance of Building Permits, the applicant/developer shall provide the Fire Prevention Bureau with an approved site plan for Fire Lanes and signage. (MVMC 8.36.050 and CFC 501.3)
- F8. Prior to construction and issuance of building permits, all locations where structures are to be built shall have an approved Fire Department emergency vehicular access road (all weather surface) capable of sustaining an imposed load of 80,000 lbs. GVW, based on street standards approved by the Public Works Director and the Fire Prevention Bureau. (CFC 501.4 and MVMC 8.36.050 Section A)
- F9. Prior to construction and issuance of Building Permits, fire lanes and fire apparatus access roads shall have an unobstructed width of not less the twenty-four (24) or thirty (30) feet as approved by the Fire Prevention Bureau and an unobstructed vertical clearance of not less the thirteen (13) feet six (6) inches. (CFC 503.2.1.1 and MVMC 8.36.050)
- F10. If construction is phased, each phase shall provide an approved emergency vehicular access way for fire protection prior to any building construction. (CFC 501.4 and MVMC 8.36.050 Section A)

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 13 OF 40**

- F11. Prior to construction, all locations where structures are to be built shall have an approved Fire Department access based on street standards approved by the Public Works Director and the Fire Prevention Bureau. (CFC 501.3 and MVMC 8.36.050)
- F12. Prior to building construction, dead end roadways and streets which have not been completed shall have a turnaround capable of accommodating fire apparatus. (CFC 503.2.5 and MVMC 8.36.050)
- F13. Prior to issuance of Building Permits, the applicant/developer shall participate in the Fire Impact Mitigation Program. (Fee Resolution as adopted by City Council)
- F14. Prior to issuance of Building Permits, the applicant/developer shall furnish one copy of the water system plans to the Fire Prevention Bureau for review. Plans shall:
- a) Be signed by a registered civil engineer or a certified fire protection engineer;
 - b) Contain a Fire Prevention Bureau approval signature block; and
 - c) Conform to hydrant type, location, spacing of new and existing hydrants and minimum fire flow required as determined by the Fire Prevention Bureau.

After the local water company signs the plans, the originals shall be presented to the Fire Prevention Bureau for signatures. The required water system, including fire hydrants, shall be installed, made serviceable, and be accepted by the Moreno Valley Fire Department prior to beginning construction. They shall be maintained accessible.

Existing fire hydrants on public streets are allowed to be considered available. Existing fire hydrants on adjacent properties shall not be considered available unless fire apparatus access roads extend between properties and easements are established to prevent obstruction of such roads. (CFC 508.1 and MVMC 8.36.100)

- F15. Prior to issuance of Certificate of Occupancy or Building Final, "Blue Reflective Markers" shall be installed to identify fire hydrant locations in accordance with City specifications. (CFC 510.1)
- F16. Prior to issuance of Certificate of Occupancy or Building Final, all commercial buildings shall display street numbers in a prominent location on the street side and rear access locations. The numerals shall be a minimum of twelve (12) inches in height for buildings and six (6) inches in height for suite identification on

**CONDITIONS OF APPROVAL FOR PA07-0084

PAGE 14 OF 40**

a contrasting background. Unobstructed lighting of the address(s) shall be by means approved by the Fire Prevention Bureau and Police Department. In multiple suite centers (strip malls), businesses shall post the name of the business on the rear door(s). (CFC 505.1)

- F17. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire sprinkler system based on square footage and type of construction, occupancy or use. Fire sprinkler plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9)
- F18. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire alarm system monitored by an approved Underwriters Laboratory listed central station based on a requirement for monitoring the sprinkler system, occupancy or use. Fire alarm panel shall be accessible from exterior of building in an approved location. Plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9 and MVMC 8.36.070)
- F19. Prior to issuance of a Certificate of Occupancy or Building Final, a "Knox Box Rapid Entry System" shall be provided. The Knox-Box shall be installed in an accessible location approved by the Fire Chief. The Knox-Box shall be supervised by the alarm system and all exterior security emergency access gates shall be electronically operated and be provided with Knox key switches for access by emergency personnel. (CFC 506.1)
- F20. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall be responsible for obtaining underground and/or above ground tank permits for the storage of combustible liquids, flammable liquids, or any other hazardous materials from both the County of Riverside Community Health Agency Department of Environmental Health and the Fire Prevention Bureau. (CFC 3401.4 and 2701.5)
- F21. Prior to issuance of Certificate of Occupancy, approval shall be required from the County of Riverside Community Health Agency (Department of Environmental Health) and Moreno Valley Fire Prevention Bureau to maintain, store, use, handle materials, or conduct processes which produce conditions hazardous to life or property, and to install equipment used in connection with such activities. (CFC 2701.5)
- F22. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer must submit a simple plot plan, a simple floor plan, and other plans as requested, each as an electronic file in .dwg format, to the Fire Prevention Bureau. Alternate file formats may be acceptable with approval by the Fire Chief.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 15 OF 40**

- F23. The angle of approach and departure for any means of Fire Department access shall not exceed 1 ft drop in 20 ft (0.3 m drop in 6 m), and the design limitations of the fire apparatus of the Fire Department shall be subject to approval by the AHJ. (CFC 503.2.7 and MVMC 8.36.050 Section I)
- F24. Prior to issuance of the building permit for development, independent paved access to the nearest paved road, maintained by the City shall be designed and constructed by the developer within the public right of way in accordance with City Standards. (MVMC 8.36.050)
- F25. Prior to construction, "private" driveways over 150 feet in length shall have a turn-around as determined by the Fire Prevention Bureau capable of accommodating fire apparatus. Driveway grades shall not exceed 12 percent. (CFC 503 and MVMC 8.36.050)
- F26. Complete plans and specifications for fire alarm systems, fire-extinguishing systems (including automatic sprinklers or standpipe systems), clean agent systems (or other special types of automatic fire-extinguishing systems), as well as other fire-protection systems and appurtenances thereto shall be submitted to the Moreno Valley Fire Prevention Bureau for review and approval prior to system installation. Submittals shall be in accordance with CFC Chapter 9 and associated accepted national standards.
- F27. A permit is required to maintain, store, use or handle materials, or to conduct processes which produce conditions hazardous to life or property, or to install equipment used in connection with such activities. Such permits shall not be construed as authority to violate, cancel or set aside any of the provisions of this code. Such permit shall not take the place of any license required by law. Applications for permits shall be made to the Fire Prevention Bureau in such form and detail as prescribed by the Bureau. Applications for permits shall be accompanied by such plans as required by the Bureau. Permits shall be kept on the premises designated therein at all times and shall be posted in a conspicuous location on the premises or shall be kept on the premises in a location designated by the Fire Chief. Permits shall be subject to inspection at all times by an officer of the fire department or other persons authorized by the Fire Chief in accordance with Appendix Chapter 1 and MVMC 8.36.100.
- F28. Approval of the safety precautions required for buildings being constructed, altered or demolished shall be required by the Fire Chief in addition to other approvals required for specific operations or processes associated with such construction, alteration or demolition. (CFC Chapter 14)
- F29. Prior to issuance of Certificate of Occupancy, permits are required to store, dispense, use or handle hazardous material. Each application for a permit shall

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 16 OF 40**

include a hazardous materials management plan (HMMP). The location of the HMMP shall be posted adjacent to (other) permits when an HMMP is provided. The HMMP shall include a facility site plan designating the following:

- a) Storage and use areas;
- b) Maximum amount of each material stored or used in each area;
- c) Range of container sizes;
- d) Locations of emergency isolation and mitigation valves and devices;
- e) Product conveying piping containing liquids or gases, other than utility-owned fuel gas lines and low-pressure fuel gas lines;
- f) On and off positions of valves for valves which are of the self-indicating type;
- g) Storage plan showing the intended storage arrangement, including the location and dimensions of aisles. The plans shall be legible and approximately to scale. Separate distribution systems are allowed to be shown on separate pages; and
- h) Site plan showing all adjacent/neighboring structures and use.

NOTE: Each application for a permit shall include a hazardous materials inventory statement (HMIS).

- F30. Before a Hazardous Materials permit is issued, the Fire Chief shall inspect and approve the receptacles, vehicles, buildings, devices, premises, storage spaces or areas to be used. In instances where laws or regulations are enforceable by departments other than the Fire Prevention Bureau, joint approval shall be obtained from all departments concerned. (CFC Appendix H)
- F31. Construction or work for which the Fire Prevention Bureau's approval is required shall be subject to inspection by the Fire Chief and such construction or work shall remain accessible and exposed for inspection purposes until approved. (CFC Section 106)
- F32. The Fire Prevention Bureau shall maintain the authority to inspect, as often as necessary, buildings and premises, including such other hazards or appliances designated by the Fire Chief for the purpose of ascertaining and causing to be corrected any conditions which would reasonably tend to cause fire or contribute to its spread, or any violation of the purpose or provisions of this code and of any other law or standard affecting fire safety. (CFC Section 106)
- F33. Permit requirements issued, which designate specific occupancy requirements for a particular dwelling, occupancy, or use, shall remain in effect until such time as amended by the Fire Chief. (CFC Section 104)

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 17 OF 40**

- F34. In accordance with the California Fire Code Appendix Chapter 1, where no applicable standards or requirements are set forth in this code, or contained within other laws, codes, regulations, ordinances or bylaws adopted by the jurisdiction, compliance with applicable standards of the National Fire Protection Association or other nationally recognized fire safety standards as are approved shall be deemed as prima facie evidence of compliance with the intent of this code as approved by the Fire Chief. (CFC Section 102.7)
- F35. Any alterations, demolitions, or change in design, occupancy and use of buildings or site will require plan submittal to the Fire Prevention Bureau with review and approval prior to installation. (CFC Appendix Chapter 1)
- F36. Emergency and Fire Protection Plans shall be provided when required by the Fire Prevention Bureau. (CFC Section 105)
- F37. Prior to Certificate of Occupancy all locations where medians are constructed and prohibit vehicular ingress/egress into or away from the site, provisions must be made to construct a median-crossover at all locations determined by the Fire Marshal and the City Engineer. Prior to the construction, design plans will be submitted for review and approval by the City Engineer and all applicable inspections conducted by Land Development Division.
- F38. Prior to construction, all traffic calming designs/devices must be approved by the Fire Marshal and City Engineer.

PUBLIC WORKS DEPARTMENT – LAND DEVELOPMENT DIVISION

The following are the Public Works Department – Land Development Division Conditions of Approval for this project and shall be completed at no cost to any government agency. All questions regarding the intent of the following conditions shall be referred to the Public Works Department – Land Development Division.

General Conditions

- LD1. (G) The developer shall comply with all applicable City ordinances and resolutions including the City's Municipal Code (MC) and if subdividing land, the Government Code (GC) of the State of California, specifically Sections 66410 through 66499.58, said sections also referred to as the Subdivision Map Act (SMA). (MC 9.14.010)
- LD2. (G) If the project involves the subdivision of land, maps may be developed in phases with the approval of the City Engineer. Financial security shall be provided for all improvements associated with each phase of the map. The

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 18 OF 40**

boundaries of any multiple map increment shall be subject to the approval of the City Engineer. The City Engineer may require the dedication and construction of necessary utilities, streets or other improvements outside the area of any particular map, if the improvements are needed for circulation, parking, access, or for the welfare or safety of the public. (MC 9.14.080, GC 66412 and 66462.5).

- LD3. (G) It is understood that the tentative map correctly shows all existing easements, traveled ways, and drainage courses, and that their omission may require the map or plans associated with this application to be resubmitted for further consideration. (MC 9.14.040)
- LD4. (G) In the event right-of-way or offsite easements are required to construct offsite improvements necessary for the orderly development of the surrounding area to meet the public health and safety needs, the developer shall make a good faith effort to acquire the needed right-of-way in accordance with the Land Development Division's administrative policy. In the event that the developer is unsuccessful, he shall enter into an agreement with the City to acquire the necessary right-of-way or offsite easements and complete the improvements at such time the City acquires the right-of-way or offsite easements which will permit the improvements to be made. The developer shall be responsible for all costs associated with the right-of-way or easement acquisition. (GC 66462.5)
- LD5. (G) If improvements associated with this project are not initiated within two years of the date of approval of the Public Improvement Agreement, the City Engineer may require that the improvement cost estimate associated with the project be modified to reflect current City construction costs in effect at the time of request for an extension of time for the Public Improvement Agreement or issuance of a permit.
- LD6. (G) The developer shall monitor, supervise and control all construction and construction supportive activities, so as to prevent these activities from causing a public nuisance, including but not limited to, insuring strict adherence to the following:
- (a) Removal of dirt, debris, or other construction material deposited on any public street no later than the end of each working day.
 - (b) Observance of working hours as stipulated on permits issued by the Public Works Department.
 - (c) The construction site shall accommodate the parking of all motor vehicles used by persons working at or providing deliveries to the site.

TENTATIVE PARCEL MAP NO. 35679
PAGE 19 OF 40**

- (d) All dust control measures per South Coast Air Quality Management District (SCAQMD) requirements shall be adhered to during the grading operations.

Violation of any condition or restriction or prohibition set forth in these conditions shall subject the owner, applicant, developer or contractor(s) to remedies as noted in the City Municipal Code 8.14.090. In addition, the City Engineer or Building Official may suspend all construction related activities for violation of any condition, restriction or prohibition set forth in these conditions until such time as it has been determined that all operations and activities are in conformance with these conditions.

- LD7. (G) The developer shall protect downstream properties from damage caused by alteration of drainage patterns, i.e., concentration or diversion of flow. Protection shall be provided by constructing adequate drainage facilities, including, but not limited to, modifying existing facilities or by securing a drainage easement. (MC 9.14.110)
- LD8. (G) Public drainage easements, when required, shall be a minimum of 25 feet wide and shall be shown on the map and plan, and noted as follows: "Drainage Easement – no structures, obstructions, or encroachments by landfills are allowed." In addition, the grade within the easement area shall not exceed a 3:1 (H:V) slope, unless approved by the City Engineer.
- LD9. (G) A detailed drainage study shall be submitted to the City Engineer for review and approval at the time of any improvement or grading plan submittal. The study shall be prepared by a registered civil engineer and shall include existing and proposed hydrologic conditions. Hydraulic calculations are required for all drainage control devices and storm drain lines. (MC 9.14.110). Prior to approval of the related improvement or grading plans, the developer shall submit the approved drainage study, on compact disk, in (.pdf) digital format to the Land Development Division of the Public Works Department.
- LD10. (G) Prior to final map approval, commencing applicable street improvements, or obtaining the first building permit, the developer shall enter into a Development Impact Fee (DIF) Improvement Credit Agreement to secure credit and reimbursement for the construction of applicable arterial street, traffic signal, and/or interchange improvements. If the developer fails to complete this agreement prior to the timing as specified above, no credits or reimbursements will be given. The applicant shall pay Arterial Streets, Traffic Signals, and Interchange Improvements development impact fees adopted by the City Council by resolution. (Ord. 695 § 1.1 (part), 2005) (MC 3.38.030, .040, .050)
- LD11. (G) The final conditions of approval issued by the Planning Division subsequent to Planning Commission approval shall be photographically or electronically

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 20 OF 40**

placed on mylar sheets and included in the Grading and Street Improvement plan sets on twenty-four (24) inch by thirty-six (36) inch mylar and submitted with the plans for plan check. These conditions of approval shall become part of these plan sets and the approved plans shall be available in the field during grading and construction.

Prior to Grading Plan Approval or Grading Permit

LD12. (GPA) Prior to approval of the grading plans, plans shall be drawn on twenty-four (24) inch by thirty-six (36) inch mylar and signed by a registered civil engineer and other registered/licensed professional as required.

LD13. (GPA) Prior to approval of grading plans, the developer shall ensure compliance with the City Grading ordinance, these Conditions of Approval and the following criteria:

- (a) The project street and lot grading shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage area and outlet points. Unless otherwise approved by the City Engineer, lot lines shall be located at the top of slopes.
- (b) Any grading that creates cut or fill slopes adjacent to the street shall provide erosion control, sight distance control, and slope easements as approved by the City Engineer.
- (c) A grading permit shall be obtained from the Public Works Department Land Development Division prior to commencement of any grading outside of the City maintained road right-of-way.
- (d) All improvement plans are substantially complete and appropriate clearance and at-risk letters are provided to the City. (MC 9.14.030)
- (e) The developer shall submit a soils and geologic report to the Public Works Department – Land Development Division. The report shall address the soil's stability and geological conditions of the site.

LD14. (GPA) Prior to grading plan approval, the developer shall select and implement treatment control best management practices (BMPs) that are medium to highly effective for treating Pollutants of Concern (POC) for the project. Projects where National Pollution Discharge Elimination System (NPDES) mandates water quality treatment control best management practices (BMPs) shall be designed per the City of Moreno Valley guidelines or as approved by the City Engineer.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 21 OF 40**

LD15. (GPA) Prior to approval of the grading plans for projects that will result in discharges of storm water associated with construction with a soil disturbance of one or more acres of land, the developer shall submit a Notice of Intent (NOI) and obtain a Waste Discharger's Identification number (WDID#) from the State Water Quality Control Board (SWQCB). The WDID# shall be noted on the grading plans prior to issuance of the first grading permit.

LD16. (GPA) Prior to the grading plan approval, or issuance of a building permit, if a grading permit is not required, the Developer shall submit two (2) copies of the final project-specific Water Quality Management Plan (WQMP) for review by the City Engineer that :

- (a) Addresses Site Design Best Management Practices (BMPs) such as minimizing impervious areas, maximizing permeability, minimizes directly connected impervious areas to the City's street and storm drain systems, and conserves natural areas;
- (b) Incorporates Source Control BMPs and provides a detailed description of their implementation;
- (c) Incorporates Treatment Control BMPs and provides information regarding design considerations;
- (d) Describes the long-term operation and maintenance requirements for BMPs requiring maintenance; and
- (e) Describes the mechanism for funding the long-term operation and maintenance of the BMPs.

A copy of the final WQMP template can be obtained on the City's Website or by contacting the Land Development Division of the Public Works Department.

LD17. (GPA) Prior to the grading plan approval, or issuance of a building permit, if a grading permit is not required, the Developer shall record a "Stormwater Treatment Device and Control Measure Access and Maintenance Covenant," to provide public notice of the requirement to implement the approved final project-specific WQMP and the maintenance requirements associated with the WQMP.

A boilerplate copy of the "Stormwater Treatment Device and Control Measure Access and Maintenance Covenant," can be obtained by contacting the Land Development Division of the Public Works Department.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 22 OF 40**

- LD18. (GPA) Prior to the grading plan approval, or issuance of a building permit, if a grading permit is not required, the Developer shall secure approval of the final project-specific WQMP from the City Engineer. The final project-specific WQMP shall be submitted at the same time of grading plan submittal. The approved final WQMP shall be submitted to the Storm Water Program Manager on compact disk(s) in Microsoft Word format prior to grading plan approval.
- LD19. (GPA) Prior to the grading plan approval, or issuance of a building permit as determined by the City Engineer, the approved final project-specific WQMP shall be incorporated by reference or attached to the project's Storm Water Pollution Prevention Plan as the Post-Construction Management Plan.
- LD20. (GPA) Prior to grading plan approval, the developer shall prepare a Storm Water Pollution Prevention Plan (SWPPP) in conformance with the state's Construction Activities Storm Water General Permit. A copy of the current SWPPP shall be kept at the project site and be available for review upon request. The SWPPP shall be submitted to the Storm Water Program Manager on compact disk(s) in Microsoft Word format.
- LD21. (GPA) Prior to the approval of the grading plans, the developer shall pay applicable remaining grading plan check fees.
- LD22. (GP) Prior to issuance of a grading permit, or building permit when a grading permit is not required, for projects that require a project-specific Water Quality Management Plan (WQMP), a project-specific final WQMP (F-WQMP) shall be approved. Upon approval, a WQMP Identification Number is issued by the Storm Water Management Section and shall be noted on the rough grading plans as confirmation that a project-specific F-WQMP approval has been obtained.
- LD23. (GP) Prior to issuance of a grading permit, if the fee has not already been paid prior to map approval or prior to issuance of a building permit if a grading permit is not required, the developer shall pay Area Drainage Plan (ADP) fees. The developer shall provide a receipt to the City showing that ADP fees have been paid to Riverside County Flood Control and Water Conservation District. (MC 9.14.100)
- LD24. (GP) Prior to issuance of a grading permit, security, in the form of a cash deposit (preferable), letter of credit, or performance bond shall be required to be submitted as a guarantee of the completion of the grading required as a condition of approval of the project.
- LD25. (GP) Prior to issuance of a grading permit, the developer shall pay the applicable grading inspection fees.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 23 OF 40**

Prior to Map Approval or Recordation

- LD26. (MA) Prior to approval of the map, the developer shall submit a copy of the Covenants, Conditions and Restrictions (CC&Rs) to the Land Development Division for review and approval. The CC&Rs shall include, but not be limited to, access easements, reciprocal access, private and/or public utility easements as may be relevant to the project.
- LD27. (MA) Prior to approval of the map, all street dedications shall be irrevocably offered to the public and shall continue in force until the City accepts or abandons such offers, unless otherwise approved by the City Engineer. All dedications shall be free of all encumbrances as approved by the City Engineer.
- LD28. (MA) Prior to approval of the map, security shall be required to be submitted as a guarantee of the completion of the improvements required as a condition of approval of the project. A public improvement agreement will be required to be executed.
- LD29. (MR) Prior to recordation of the map, the developer shall submit the map, on compact disks, in (.dxf) digital format to the Land Development Division of the Public Works Department.

Prior to Improvement Plan Approval or Construction Permit

- LD30. (IPA) Prior to approval of the improvement plans, the improvement plans shall be drawn on twenty-four (24) inch by thirty-six (36) inch mylar and signed by a registered civil engineer and other registered/licensed professional as required.
- LD31. (IPA) Prior to approval of the improvement plans, the developer shall submit clearances from all applicable agencies, and pay all outstanding plan check fees. (MC 9.14.210)
- LD32. (IPA) All public improvement plans prepared and signed by a registered civil engineer in accordance with City standards, policies and requirements shall be approved by the City Engineer in order for the Public Improvement Agreement and accompanying security to be executed.
- LD33. (IPA) Prior to approval of the improvement plans, securities and a public improvement agreement shall be required to be submitted and executed as a guarantee of the completion of the improvements required as a condition of approval of the project.
- LD34. (IPA) The street improvement plans shall comply with all applicable City standards and the following design standards throughout this project:

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 24 OF 40**

- (a) Corner cutbacks in conformance with City Standard 208 shall be shown on the final map or, if no map is to be recorded, offered for dedication by separate instrument.
- (b) Lot access to major thoroughfares shall be restricted except at intersections and approved entrances and shall be so noted on the final map. (MC 9.14.100)
- (c) The minimum centerline and flow line grades shall be one percent unless otherwise approved by the City Engineer. (MC 9.14.020)
- (d) All street intersections shall be at ninety (90) degrees plus or minus five (5) degrees per City Standard No. 706A, or as approved by the City Engineer. (MC 9.14.020)
- (e) All reverse curves shall include a minimum tangent of one hundred (100) feet in length.

LD35. (IPA) Prior to approval of the improvement plans, the plans shall be based upon a centerline profile, extending beyond the project boundaries a minimum distance of 300 feet at a grade and alignment approved by the City Engineer. Design plan and profile information shall include the minimum 300 feet beyond the project boundaries.

LD36. (IPA) Prior to approval of the improvement plans, the plans shall indicate any restrictions on trench repair pavement cuts to reflect the City's moratorium on disturbing newly-constructed pavement less than three years old and recently slurry sealed streets less than one year old. Pavement cuts for trench repairs may be allowed for emergency repairs or as specifically approved in writing by the City Engineer.

LD37. (IPA) Prior to approval of the improvement plans, the developer shall pothole to determine the exact location of existing underground utilities. The improvement plans shall be designed based on the pothole field investigation results. The developer shall coordinate with all affected utility companies and bear all costs of utility relocations.

LD38. (IPA) Prior to approval of the improvement plans, all dry and wet utility crossings shall be potholed to determine actual elevations. Any conflicting utilities shall be identified and addressed on the plans. The pothole survey data shall be submitted with the street improvement plans for reference purposes.

LD39. (IPA) Prior to approval of the improvement plans, drainage facilities with sump conditions shall be designed to convey the tributary 100-year storm flows. Secondary emergency escape shall also be provided. (MC 9.14.110)

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 25 OF 40**

- LD40. (IPA) Prior to the approval of the improvement plans, the hydrology study shall show that the 10-year storm flow will be contained within the curb and the 100-year storm flow shall be contained within the street right-of-way. In addition, one lane in each direction shall not be used to carry surface flows during any storm event for street sections equal to or larger than a minor arterial. When any of these criteria is exceeded, additional drainage facilities shall be installed. (MC 9.14.110 A.2)
- LD41. (IPA) The project shall be designed to accept and properly convey all off-site drainage flowing onto or through the site. All storm drain design and improvements shall be subject to review and approval of the City Engineer. In the event that the City Engineer permits the use of streets for drainage purposes, the provisions of the Development Code will apply. Should the quantities exceed the street capacity or the use of streets be prohibited for drainage purposes, as in the case where one travel lane in each direction shall not be used for drainage conveyance for emergency vehicle access on streets classified as minor arterials and greater, the developer shall provide adequate facilities as approved by the Public Works Department – Land Development Division. (MC 9.14.110)
- LD42. (CP) All work performed within the City right-of-way requires a construction permit. As determined by the City Engineer, security may be required for work within the right-of-way. Security shall be in the form of a cash deposit or other approved means. The City Engineer may require the execution of a public improvement agreement as a condition of the issuance of the construction permit. All inspection fees shall be paid prior to issuance of construction permit. (MC 9.14.100)
- LD43. (CP) Prior to issuance of a construction permit, all public improvement plans prepared and signed by a registered civil engineer in accordance with City standards, policies and requirements shall be approved by the City Engineer.
- LD44. (CP) Prior to issuance of construction permits, the developer shall submit all improvement plans on compact disks, in (.dxf) digital format to the Land Development Division of the Public Works Department.
- LD45. (CP) Prior to issuance of construction permits, the developer shall pay all applicable inspection fees.
Prior to Building Permit
- LD46. (BP) Prior to issuance of a building permit, all pads shall meet pad elevations per approved plans as noted by the setting of “Blue-top” markers installed by a registered land surveyor or licensed engineer.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 26 OF 40**

Prior to Certificate of Occupancy

LD47. (CO) Prior to issuance of a certificate of occupancy, if the project involves a non-residential subdivision, the map shall be recorded.

LD48. (CO) Prior to issuance of the last certificate of occupancy or building final, the developer shall pay all outstanding fees.

LD49. (CO) Prior to issuance of a certificate of occupancy, this project is subject to requirements under the current permit for storm water activities required as part of the National Pollutant Discharge Elimination System (**NPDES**) as mandated by the Federal Clean Water Act. In compliance with Proposition 218, the developer shall agree to approve the City of Moreno Valley NPDES Regulatory Rate Schedule that is in place at the time of certificate of occupancy issuance. Following are the requirements:

- a. Select one of the following options to meet the financial responsibility to provide storm water utilities services for the required continuous operation, maintenance, monitoring system evaluations and enhancements, remediation and/or replacement, all in accordance with Resolution No. 2002-46.
 - i. Participate in the mail ballot proceeding in compliance with Proposition 218, for the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule and pay all associated costs with the ballot process; or
 - ii. Establish an endowment to cover future City costs as specified in the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule.
- b. Notify the Special Districts Division of the intent to request building permits 90 days prior to their issuance and the financial option selected. The financial option selected shall be in place prior to the issuance of certificate of occupancy. (California Government Code & Municipal Code)

LD50. (CO) The City of Moreno Valley has an adopted Development Impact Fee (DIF) nexus study. All projects unless otherwise exempted shall be subject to the payment of the DIF prior to issuance of occupancy. The fees are subject to the provisions of the enabling ordinance and the fee schedule in effect at the time of occupancy.

LD51. (CO) The City of Moreno Valley has an adopted area wide Transportation Uniform Mitigation Fee (TUMF). All projects unless otherwise exempted shall be subject to the payment of the TUMF prior to issuance of occupancy. The fees

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 27 OF 40**

are subject to the provisions of the enabling ordinance and the fee schedule in effect at the time of occupancy.

LD52. (CO) Prior to issuance of a certificate of occupancy or building final, the developer shall construct all public improvements in conformance with applicable City standards, except as noted in the Special Conditions, including but not limited to the following applicable improvements:

- (a) Street improvements including, but not limited to: pavement, base, curb, gutter, cross gutter, spandrel, sidewalks, drive approaches, pedestrian ramps, street lights, signing, striping, landscaping and irrigation, pavement tapers/transitions and traffic control devices as appropriate.
- (b) Storm drain facilities including, but not limited to: storm drain pipe, storm drain laterals, open channels, catch basins and local depressions.
- (c) City-owned utilities.
- (d) Sewer and water systems including, but not limited to: sanitary sewer, potable water and recycled water.
- (e) Under grounding of existing and proposed utility lines less than 115,000 volts.
- (f) Relocation of overhead electrical utility lines including, but not limited to: electrical, cable and telephone.

LD53. (CO) Prior to issuance of a certificate of occupancy or building final, all existing and new utilities adjacent to and on-site shall be placed underground in accordance with City of Moreno Valley ordinances. (MC 9.14.130)

LD54. (CO) Prior to issuance of a certificate of occupancy or building final for any Commercial/Industrial facility, whichever occurs first, the owner may have to secure coverage under the State's General Industrial Activities Storm Water Permit as issued by the State Water Resources Control Board.

LD55. (CO) Prior to issuance of a certificate of occupancy or building final, the applicant shall ensure the following, pursuant to Section XII. I. of the 2010 NPDES Permit:

- (a) Field verification that structural Site Design, Source Control and Treatment Control BMPs are designed, constructed and functional in accordance with the approved Final Water Quality Management Plan (WQMP)

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 28 OF 40**

- (b) Certification of best management practices (BMPs) from a state licensed civil engineer. An original WQMP BMP Certification shall be submitted to the City for review and approval.

Prior to Acceptance of Streets into the City Maintained Road System

LD56. (AOS) Aggregate slurry, as defined in Section 203-5 of Standard Specifications for Public Works Construction, may be required just prior to the end of the one-year warranty period of the public streets at the discretion of the City Engineer. If slurry is required, the developer/contractor must provide a slurry mix design submittal for City Engineer approval. The latex additive shall be Ultra Pave 70 (for anionic – per project geotechnical report) or Ultra Pave 65 K (for cationic – per project geotechnical report) or an approved equal. The latex shall be added at the emulsion plant after weighing the asphalt and before the addition of mixing water. The latex shall be added at a rate of two to two-and-one-half (2 to 2½) parts to one-hundred (100) parts of emulsion by volume. Any existing striping shall be removed prior to slurry application and replaced per City standards.

SPECIAL CONDITIONS

LD57. The following project engineering design plans (24"x36" sheet size) shall be submitted for review and approval as well as additional plans deemed necessary by the City during the plan review process. As-Built Plans of these plans are also required:

- (a) **Rough Grading Plan**
- (b) **Precise Grading Plan**
- (c) **Street Improvement Plan**
- (d) **Storm Drain Plan**
- (e) **Signing and Striping Plan**
- (f) **Traffic Control Plan**
- (g) **Final Drainage Study**
- (h) **Final Water Quality Management Plan**

- LD58.** Prior to rough grading plan approval, this project shall demonstrate, via a final drainage study, that the increased runoff resulting from the development of this site is mitigated. During no storm event shall the flow leaving the site in the developed condition be larger than that of the pre-developed condition. The drainage study shall analyze the following events: 1, 3, 6 and 24-hour durations for the 2, 5, 10 and 100-year storm events. The applicant understands that additional detention measures, beyond those shown on the tentative map and preliminary drainage study, may be required.
- LD59.** Prior to rough and precise grading plan approval, the plans shall clearly show the extents of all existing easements on the property. All building structures shall be constructed outside of existing easements. All on-site and off-site easements shall be shown on the grading plan.
- LD60.** Prior to rough and precise grading plan approval, the plans shall clearly show that any slope near the public right-of-way has a minimum set-back area at 2% maximum of 2 feet before the start of the top or toe of slope. If the vertical height of the slope exceeds 10 feet, this set-back area shall be 3 feet minimum.
- LD61.** Prior to precise grading plan approval, the grading plans shall show any proposed trash enclosure as dual bin; one bin for trash and one bin for recyclables. The trash enclosure shall be per City Standard Plan 627.
- LD62.** Prior to precise grading plan approval, the grading plans shall clearly show that the parking lot conforms to City standards. The parking lot shall be 5% maximum, 1% minimum, 2% maximum at or near any disabled parking stall and travel way. Ramps, curb openings and travel paths shall all conform to current ADA standards as outlined in Department of Justice's "ADA Standards for Accessible Design", Excerpt from 28 CFR Part 36. (www.usdoj.gov) and as approved by the City's Building and Safety Division.
- LD63.** Prior to parcel map approval, either reciprocal access easement(s) shall be shown on the map or a separate recorded copy of a reciprocal access agreement between parcels shall be submitted to the City for review and approval.
- LD64.** Prior to parcel map approval, the map shall show the following:
- (a)** A 100-foot right-of-way dedication for the construction of Eucalyptus Avenue.

- (b) A 60-foot right-of-way dedication for the construction of Street “A”.**
- (c) A 44-foot right-of-way dedication for the future construction of Encilia Street along the south boundary of Parcel 6 and Lot C Quincy Channel.**
- (d) A 4-foot right-of-way dedication for the future construction of Encilia Street along the south boundary of Parcel 5.**
- (e) An 80-foot street right-of-way vacation for the old alignment of Fir Avenue traversing Buildings 4 and 5 as well as parking lot areas of Buildings 3 and 6.**
- (f) A 40-foot street right-of-way vacation for the old alignment of Fir Avenue traversing and along the south boundary of Parcel 3.**
- (g) A 30-foot street right-of-way vacation for the west half of Quincy Street.**
- (h) A 16-foot right-of-way dedication along the north property line, excepting area already acquired by the City, for the future use by Caltrans.**
- (i) A drainage and access easement dedication to the City at the north boundary line at Quincy Channel for culvert maintenance and also at the north and south ends of proposed culverts at its crossing with Eucalyptus Avenue.**
- (j) A 4-foot minimum pedestrian right-of-way dedication behind any driveway approach per City Standard 118C.**
- (k) A 2-foot and varying width public access easement for the portions of sidewalk which are outside of the public right-of-way, along Eucalyptus Avenue necessary to accommodate curb separated sidewalk.**
- (l) A 6-foot wide trail easement on the north side of Eucalyptus Avenue at its proposed bridge culvert crossing over Quincy Channel.**
- (m) A varying wide trail easement 8.5-foot wide to 13.5-foot wide trail easement on the north side of Eucalyptus Avenue.**
- (n) An 18.5-foot wide multi-purpose trail easement along the west side of Quincy Channel.**

- (o) An easement along the west project boundary between SR-60 and Eucalyptus Avenue for proposed water line improvements required to relocate an existing 12-inch EMWD water line from along the north project boundary to within Eucalyptus Avenue.
- (p) A reciprocal access easement between Parcels 4 and 5 and between Parcels 5 and 6.
- (q) Corner cutback right-of-way dedications per City Standard 208.
- (r) Retention of open space lots designated as Lot C and Lot D on the tentative map to be retained and maintained by the developer.

LD65. Prior to parcel map approval, the Developer shall guarantee the construction of the following improvements by entering into a public improvement agreement and posting security. The improvements shall be completed prior to occupancy of the first building or as otherwise determined by the City Engineer.

- (a) Eucalyptus Avenue, Arterial, City Standard 104A (100-foot RW / 76-foot CC) shall be constructed to full-width, within the project's frontage and 32-feet wide (12-foot lanes and 4-foot shoulders) on center from the east map boundary at Quincy Channel easterly to Redlands Boulevard, including any transitions required at the intersection with Redlands Boulevard. Improvements shall consist of, but not be limited to, pavement, base, curb, gutter, sidewalk, driveway approaches, drainage structures, bridge culvert crossing, culvert structures, rip rap, offsite improvement transition/joins to existing, streetlights, pedestrian ramps, undergrounding of any power poles with overhead utility lines less than 115,000 volts, signing, striping, and dry and wet utilities.
- (b) Street "A", Local Street, City Standard 108A Modified (60-foot RW / 40-foot CC) shall be constructed full-width within the project's boundaries using a Traffic Index (TI) of 10. Improvements shall consist of, but not be limited to, pavement, base, eight-inch curb, gutter, sidewalk, driveway approaches, drainage structures, streetlights, pedestrian ramps, and dry and wet utilities.
- (c) Quincy Channel improvements shall consist of, but not be limited to bridge culvert crossing including headwall, rip rap, access ramp from street to bottom of channel, multi-purpose trail and access road, buried concrete channel side slope, buried concrete channel

vertical wall, storm drain outlet structures (headwall and cut-off walls, sewer line crossing beneath the channel.

- (d) Driveway approaches shall be constructed per City Standard No. 118C. The parcel map shall show an additional 4-foot right-of-way dedication behind driveway approaches. No decorative pavers shall be placed within the public right-of-way.
- (e) Relocation of an existing water line along the north property boundary adjacent to State Route 60 to within Eucalyptus Avenue.
- (f) Removal or relocation, as determined by SCE, of existing overhead power lines along the north property boundary adjacent to State Route 60.

LD66. Prior to building permit issuance, the precise grading plan for that building shall be approved by the City and Parcel Map 35679 shall record.

LD67. Prior to building permit issuance, this project shall cause the vacation of all existing easements, especially those easements underneath proposed building footprints. This shall include, but not be limited to, the 12-foot wide EMWD access easement, 20-foot wide EMWD water line easement, and easements for utilities and incidental purposes granted to Southern Sierras Power Company. All utilities shall be relocated, as necessary, prior to vacation of easements. All new easements shall be granted prior to utility relocations and vacation of existing easements. All utilities shall be relocated into the proposed public right-of-way or to a location as agreed upon by the developer, the easement holder and the City Engineer, as necessary, prior to vacation of easements. All new easements shall be granted prior to utility relocations and vacation of existing easements and/or street vacations. All utility locations shall be done at no expense to the City.

LD68. Prior to occupancy permit issuance, all overhead utility lines less than 115,000 volts fronting or within the entire project site boundary shall be placed underground per Section 9.14.130C of the City Municipal Code.

LD69. In accordance with the County of Riverside – Low Impact Development BMP Design Handbook (BMP Handbook) Appendix A – Infiltration Testing requirements, perform the required number of in-situ infiltration testing within the footprints of the proposed LID BMPs and provide the results in the first submittal of the Final-WQMP. Conceptually, the Engineer’s proposed infiltration feasibility is acceptable for this Preliminary WQMP. Based on the field measured results of the additional infiltration tests, the

Applicant acknowledges that infiltration infeasibility may be presented which would require substantially more area than currently shown on the plans to retain the proposed design capture volumes (DCV) as required. Maximum required dedicated LID BMP area shall be in compliance with the County's WQMP Guidance document's effective area requirements indicated in Table 2-5, page 41.

LD70. All proposed LID BMP's shall be designed in accordance with the BMP Handbook. This includes, but is not limited to, forebay design and volumes, basin landscaping, retaining wall designs, soil media depths, etc. Tributary areas to all LID BMPs shall be in conformance with the BMP Handbook and/or at the discretion of the City's Land Development Division.

LD71. The Applicant shall prepare and submit for approval a final, project-specific water quality management plan (F-WQMP) for PA07-0084 – Prologis Inc. The F-WQMP shall be consistent with the approved P-WQMP and in full conformance with the document; "Water Quality Management Plan, A Guidance Document for the Santa Ana Region of Riverside County," with an approval date of October 22, 2012 (WQMP Guidance). The F-WQMP shall be submitted and approved prior to application for and issuance of grading permits or building permits. At a minimum, the F-WQMP shall include the following: Site design principles; Source control BMPs; LID BMPs; Operation and Maintenance requirements for BMPs; and sources of funding for BMP implementation.

LD72. Overall, the proposed LID BMP concept is accepted as the conceptual LID BMP implementation for the proposed site. The Applicant has proposed to incorporate the use of infiltration basins. Final design details of these basins must be provided in the first submittal of the F-WQMP. The sizes of all LID BMPs are to be determined using the current procedures set forth the Riverside County Flood Control and Water Conservation District's Design Handbook for Low Impact Development Best Management Practices. The Applicant acknowledges that more area than currently shown on the plans may be required to treat site runoff as required by the WQMP guidance.

LD73. The Applicant shall substantiate all applicable Hydrologic Condition of Concern (HCOC) issues in the first submittal of the F-WQMP.

LD74. The Applicant shall, prior to building or grading permit closeout or the issuance of a certificate of occupancy, demonstrate:

- (a) That all structural BMPs have been constructed and installed in conformance with the approved plans and specifications;

- (b) That all structural BMPs described in the F-WQMP have been implemented in accordance with approved plans and specifications;
- (c) That the applicant is prepared to implement all non-structural BMPs included in the F-WQMP, conditions of approval, and building/grading permit conditions; and
- (d) That an adequate number of copies of the approved F-WQMP are available for the future owners/occupants of the project.

PUBLIC WORKS DEPARTMENT – TRANSPORTATION ENGINEERING DIVISION

Based on the information contained in our standard review process we recommend the following conditions of approval be placed on this project:

GENERAL CONDITIONS

- TE1. Future Eucalyptus Avenue is classified as an Arterial (100'RW/76'CC) per City Standard Plan No. 104A. Any modifications or improvements undertaken by this project shall be consistent with the City's standards for this facility. Sidewalk shall be curb separated. The project shall construct pavement improvements from the eastern property boundary to Redlands Boulevard consistent with Land Development conditions.
- TE2. Future "A" Street is classified as a Modified Local Street (60'RW/40'CC) per City Standard Plan No. 108A. The T.I. shall be per Land Development's conditions. The southerly terminus of the roadway shall include an end of roadway treatment satisfactory to the City Engineer. The street shall be signed for no parking/no stopping. Any modifications or improvements undertaken by this project shall be consistent with the City's standards for this facility.

PRIOR TO IMPROVEMENT PLAN APPROVAL OR CONSTRUCTION PERMIT

- TE3. The driveways less than or equal to 40 feet in width shall conform to Section 9.11.080, and Table 9.11.080-14 of the City's Development Code - Design Guidelines, and City Standard Plan No. 118C. Driveways wider than 40' shall be designed as intersections with pedestrian access ramps per City standards.
- TE4. Prior to the final approval of the street improvement plans, a signing and striping plan shall be prepared per City of Moreno Valley Standard Plans - Section 4 for all streets with a cross section of 66'/44' and wider.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 35 OF 40**

TE5. Prior to issuance of a construction permit, construction traffic control plans prepared by a qualified, Registered Civil or Traffic engineer shall be required.

TE6. Sight distance at driveways and on streets shall conform to City Standard Plan No. 125 A, B, and C at the time of preparation of final grading, landscape, and street improvements.

TE7. Prior to final approval of the street improvement plans, interim and ultimate alignment studies shall be approved by the City Traffic Engineer.

TE8. Prior to the final approval of the street improvement plans, the project applicant shall prepare traffic signal design plans for the following intersections:

- **Redlands Boulevard/SR-60 Westbound Ramp**
- **Redlands Boulevard/Future Eucalyptus Avenue**

TE9. Prior to the final approval of the street improvement plans, the project applicant shall design the intersection of Redlands Boulevard and Eucalyptus Avenue to provide the following geometrics:

**Northbound: One left turn lane, one through lane
Southbound: One through lane, one right turn lane
Eastbound: One left turn lane, one right turn lane
Westbound: N/A**

NOTE: All curb return radii shall be 50 feet.

TE10. Prior to final approval of the street improvement plans, the project applicant shall design the intersection of Redlands Boulevard and SR-60 Westbound Ramp to provide the following geometrics:

**Northbound: One left turn lane, one through lane, one right turn lane
Southbound: One left turn lane, one shared through/right turn lane
Eastbound: One shared left turn/through/right turn lane
Westbound: One shared left turn/through/right turn lane**

TE11. Prior to issuance of a construction permit, the project applicant shall pay to the City all applicable "Fair Share" impact fees per the findings of the Environmental Impact Report.

PRIOR TO CERTIFICATE OF OCCUPANCY OR BUILDING FINAL

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 36 OF 40**

TE12. (CO) Prior to issuance of a certificate of occupancy, all approved signing and striping shall be installed per current City Standards and the approved plans.

TE13. (CO) Each gated entrance from a public street will be provided with the following, or as approved by the City Engineer:

- A. A storage lane with length sufficient to support the queuing predicted by the traffic study (minimum of 75 feet).
- B. Signing and striping at the gate, including no parking signs.
- C. A separate pedestrian entry, if pedestrian access is necessary.
- D. Presence loop detectors (or another device) within 1 or 2 feet of the gates that ensures that the gates remain open while any vehicle is in the queue.

All of these features must be kept in working order.

TE14. (CO) Prior to issuance of a certificate of occupancy, the project applicant shall construct the intersection/roadway improvements identified in TE8, TE9, and TE10 per the approved plans.

TE15. (CO) Prior to issuance of the final certificate of occupancy, the project applicant shall submit a traffic calming study for Eucalyptus Avenue located between Moreno Beach Drive and the western property boundary (Specific Plan 209) for City review and approval. Any recommendations made in the study shall be implemented by the project applicant to the satisfaction of the City Traffic Engineer prior to issuance of the final certificate of occupancy.

PRIOR TO ACCEPTANCE OF STREETS INTO THE CITY-MAINTAINED ROAD SYSTEM

TE16. Prior to the acceptance of streets into the City-maintained road system, all approved traffic control and signing and striping shall be installed per current City Standards and the approved plans.

FINANCIAL & MANAGEMENT SERVICES DEPARTMENT

Special Districts Division

Note: All Special Conditions, Modified Conditions, or Clarification of Conditions are in bold lettering. All other conditions are standard to all or most development projects.

Acknowledgement of Conditions

The following items are Special Districts' Conditions of Approval for project **PA07-0084**; this project shall be completed at no cost to any Government Agency. All questions regarding Special Districts' Conditions including but not limited to, intent, requests for change/modification, variance and/or request for extension of time shall be sought from the Special Districts Division of the Financial & Management Services Department 951.413.3480 or by emailing specialdistricts@moval.org.

General Conditions

- SD1. The parcel(s) associated with this project have been incorporated into the Moreno Valley Community Services Districts Zones A (Parks & Community Services) and C (Arterial Street Lighting). All assessable parcels therein shall be subject to annual parcel taxes for Zone A and Zone C for operations and capital improvements.
- SD2. Any damage to existing landscape areas maintained by the City of Moreno Valley due to project construction shall be repaired/replaced by the Developer, or Developer's successors in interest, at no cost to the City of Moreno Valley.
- SD3. The ongoing maintenance of any landscaping required to be installed behind the curb on **Fir Avenue, Quincy Street, and Eucalyptus Avenue** shall be the responsibility of the property owner.
- SD4. Street light Authorization forms, for all street lights that are conditioned to be installed as part of this project, must be submitted to the Special Districts Division for approval, **prior to** street light installation. The Street light Authorization form can be obtained from the utility company providing electric service to the project, either Moreno Valley Utility or Southern California Edison.

Prior to Recordation of Final Map

- SD5. (R) This project has been identified to be included in the formation of a Community Facilities District (Mello-Roos) for **Public Safety** services, including but not limited to Police, Fire Protection, Paramedic Services, Park Rangers, and

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 38 OF 40**

Animal Control services. The property owner(s) shall not protest the formation; however, they retain the right to object to the rate and method of maximum special tax. In compliance with Proposition 218, the Developer shall agree to approve the mail ballot proceeding (special election) for either formation of the CFD or annexation into an existing district that may already be established. The Developer must notify Special Districts of intent to record final map 90 days prior to City Council action authorizing recordation of the map. (California Government Code)

- SD6. *Commercial* (R) If Land Development, a Division of the Public Works Department, requires this project to supply a funding source necessary to provide, but not limited to, stormwater utilities services for the monitoring of on site facilities and performing annual inspections of the affected areas to ensure compliance with state mandated stormwater regulations, the developer must notify Special Districts of intent to record final map 90 days prior to City Council action authorizing recordation of the map and the financial option selected to fund the continued maintenance. (California Government Code)
- SD7. (R) Prior to recordation of the final map, the Developer, or the Developer's successors or assignees, shall record with the County Recorder's Office a **Covenant of Assessments** for each assessable parcel therein, whereby the Developer covenants the existence of the City of Moreno Valley established benefit zones, and that said parcel(s) is (are) liable for payment of annual benefit zone charges and the appropriate National Pollutant Discharge Elimination System (NPDES) maximum regulatory rate schedule when due. A copy of the recorded Covenant of Assessments shall be submitted to the Special Districts Division. For a copy of the Covenant of Assessments form, please contact Special Districts, phone 951.413.3480.

Prior to Building Permit Issuance

- SD8. (BP) This project has been identified to be included in the formation of a Map Act Area of Benefit Special District for the construction of **major thoroughfares and/or freeway** improvements. The property owner(s) shall participate in such District, and pay any special tax, assessment, or fee levied upon the project property for such District. At the time of the public hearing to consider formation of the district, the property owner(s) will not protest the formation, but the property owners(s) will retain the right to object if any eventual assessment is not equitable, that is, if the financial burden of the assessment is not reasonably proportionate to the benefit which the affected property obtains from the improvements which are to be installed. The Developer must notify Special Districts of intent to request building permits 90 days prior to their issuance. (Street & Highway Code, GP Objective 2.14.2, MC 9.14.100)

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 39 OF 40**

SD9. (BP) Prior to the issuance of the first building permit for this project, the Developer shall pay Advanced Energy fees for all applicable Zone B (Residential Street Lighting) and/or Zone C (Arterial Street Lighting and Intersection Lighting) street lights required for this development. Payment shall be made to the City of Moreno Valley, as collected by the Land Development Division, based upon the Advanced Energy fee rate in place at the time of payment, as set forth in the current Listing of City Fees, Charges and Rates, as adopted by City Council.

The Developer shall provide a receipt to the Special Districts Division showing that the Advanced Energy fees have been paid in full for the number of street lights to be accepted into the CSD Zone B and/or Zone C programs. Any change in the project which may increase the number of street lights to be installed will require payment of additional Advanced Energy fees at the then current fee.

PUBLIC WORKS DEPARTMENT – MORENO VALLEY UTILITY

Note: All Special Conditions, Modified Conditions, or Clarification of Conditions are in bold lettering. All other conditions are standard to all or most development projects.

Acknowledgement of Conditions

The following items are Moreno Valley Utilities' Conditions of Approval for project(s) PA07-0081, PA07-0082, PA04-0083, PA07-0084, PA07-0158, PA07-0159, PA07-0160, PA07-0161, and PA07-0162; this project shall be completed at no cost to any Government Agency. All questions regarding Moreno Valley Utilities' Conditions including but not limited to, intent, requests for change/modification, variance and/or request for extension of time shall be sought from Moreno Valley Utilities (the Electric Utility Division) of the Public Works Department 951.413.3500. The applicant is fully responsible for communicating with Moreno Valley Utilities staff regarding their conditions. Listed after each individual condition is a contact name of who can be reached for specific questions.

PRIOR TO RECORDATION OF FINAL MAP

MVU1. For single family subdivisions, a three foot easement along each side yard property line shall be shown on the final map and offered for dedication to the City of Moreno Valley for public utility purposes, unless otherwise approved by the City Engineer. If the project is a multi-family development, townhome, condominium, apartment, commercial or industrial project, and it requires the installation of electric distribution facilities within common areas, a non-exclusive easement shall be provided to Moreno Valley Utilities to include all such common areas. All easements shall include the rights of ingress and

egress for the purpose of operation, maintenance, facility repair, and meter reading.

PRIOR TO ENERGIZING MVU ELECTRIC UTILITY SYSTEM AND CERTIFICATE OF OCCUPANCY

MVU2. **City of Moreno Valley Municipal Utility Service – Electrical Distribution:** Prior to issuance of building permit, the developer shall submit a detailed engineering plan showing design, location and schematics for the utility system to be approved by the City Engineer. In accordance with Government Code Section 66462, the Developer **shall** execute an agreement with the City providing for the installation, construction, improvement and dedication of the utility system following recordation of final map and concurrent with trenching operations and other subdivision improvements so long as said agreement incorporates the approved engineering plan and provides financial security to guarantee completion and dedication of the utility system.

The Developer **shall** coordinate and receive approval from the City Engineer to install, construct, improve, and dedicate to the City, or the City’s designee, all utility infrastructure (including but not limited to conduit, equipment, vaults, ducts, wires, switches, conductors, transformers, resistors, amplifiers, and “bring-up” facilities including electrical capacity to serve the identified development and other adjoining/abutting/ or benefiting projects as determined by Moreno Valley Utilities) – collectively referred to as “utility system” (to and through the development), along with any appurtenant real property easements, as determined by the City Engineer to be necessary for the distribution and /or delivery of any and all “utility services” to each lot and unit within the Tentative Map. For purposes of this condition, “utility services” shall mean electric, cable television, telecommunication (including video, voice, and data) and other similar services designated by the City Engineer. “Utility services” shall not include sewer, water, and natural gas services, which are addressed by other conditions of approval.

The City, or the City’s designee, shall utilize dedicated utility facilities to ensure safe, reliable, sustainable and cost effective delivery of utility services and maintain the integrity of streets and other public infrastructure. Developer shall, at developer’s sole expense, install or cause the installation of such interconnection facilities as may be necessary to connect the electrical distribution infrastructure within the project to the Moreno Valley Utilities owned and controlled electric distribution system.

MVU3. This project may be subject to a Reimbursement Agreement. The project may be responsible for a proportionate share of costs associated with electrical distribution infrastructure previously installed that directly benefits the project.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 41 OF 40**

The project may be subject to a system wide capacity charge in addition to the referenced reimbursement agreement. Payment(s) shall be required prior to issuance of building permit(s).

- MVU4. For all new projects, existing Moreno Valley Utility electrical infrastructure shall be preserved in place. The developer will be responsible, at developer expense, for any and all costs associated with the relocation of any of Moreno Valley Utility's underground electrical distribution facilities, as determined by Moreno Valley Utility, which may be in conflict with any developer planned construction on the project site.

PARKS AND COMMUNITY SERVICES DEPARTMENT

Note: All Special Conditions, Modified Conditions, or Clarification of Conditions are in bold lettering. All other conditions are standard to all or most development projects.

Acknowledgement of Conditions

The following items are Parks and Community Services Department Conditions of Approval for project **PA07-0084, TTM 35679**; this project shall be completed at no cost to any Government Agency. All questions regarding Parks and Community Services Department Conditions including but not limited to, intent, requests for change/modification, variance and/or request for extension of time shall be sought from the Parks and Community Services Department 951.413.3280. The applicant is fully responsible for communicating with the Parks and Community Services Department project manager regarding the conditions.

SPECIFIC CONDITIONS OF APPROVAL

PCS1.A multi-use trail shall be located along the west side of Quincy Channel and east side of Quincy Street (or its alignment). Additionally, the trail is to be located over the Quincy Channel, on the south side of Fir Avenue, connecting to the Quincy trail. The trail shall be 14' in width, with a 2' stamped colored concrete section between curb and trail. The trail shall be dedicated as an easement to the City from a lettered lot owned by Riverside County Flood Control and Water Conservation District.

PCS2. Parks and Community Services Department – Standard Trail Conditions:

- a. Trail construction shall adhere to: The City's Standard Plans, 'The Greenbook Standard Specifications for Public Works Construction', 'California Code of Regulations Title 24' (where applicable), and the Park and Community Services Specification Guide.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 42 OF 40**

- b. The General Contractor shall be a State of California Class 'A' General Engineering Contractor, per the Business and Professions Code Section 7056, or a combination of State of California Class 'C' licenses for which the work is being performed. Licenses must be current and in good standing, for the duration of the project.
- c. All utility easements shall not interfere with the trail or its fencing. A map of all easements and the corresponding easement rights shall be presented to Parks and Community Services prior to scheduling the Tentative Map for approval.
- d. (R) A restriction shall be placed on lots that are adjacent to the trail, preventing openings or gates accessing the trail. This shall be done through Covenants, Conditions, and Restrictions (CC&R's). A copy of the CC&R's with this/her restriction noted shall be submitted and approved by the Director of Parks and Community Services or his/her designee prior to the recordation of the Final Map.
- e. Trails shall not be shared with any above ground utilities, blocking total width access.
- f. The following plans require Parks and Community Services written approval: Tentative tract/parcel maps; rough grading plans (including all Delta changes); Final Map; precise grading plans; street improvement plans; traffic signal plans; fence and wall plans; landscape plans for areas adjacent to trails; trail improvement plans.
- g. (GP) A detailed rough grading plan with profile for the trail shall be submitted and approved by the Director of Parks and Community Services or his/her designee prior to the issuance of grading permits.
- h. Grading certification and compaction tests are required, prior to any improvements being installed.
- i. A minimum two-foot graded bench is required where trails adjoin landscaped or open space areas.
- j. (R) Prior to the approval of the Final Map, a detailed map of the trail and areas adjacent to the trail shall be submitted to the Director of Parks and Community Services or his/her designee prior for review and written approval.
- k. (R) All necessary documents to convey to the City and/or the Community Services District any required dedications for parks or open space, as specified on the tentative map or in these Conditions of Approval shall be submitted by the developer to Parks and Community Services, prior to the recordation of the final map.
- l. (R) Prior to recordation of the Final Map, the developer shall post security (bonds) to guarantee construction of the trail to the City's standards. Copies of the bonds shall be provided to Parks and Community Services, prior to the approval of the Final Map.

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 43 OF 40**

- m. (BP) Prior to the issuance of the first Building Permit, final improvement plans (mylars and AutoCAD & PDF file on a CD-ROM) shall be reviewed and approved by the Community Development Department – Planning Division; the Public Works Department – Land Development and Transportation Division; Fire Prevention; and Parks and Community Services Department. Landscaped areas adjacent to the park shall be designed to prevent water on the park.
- n. Eight sets of complete trail improvement plans shall be submitted to Parks and Community Services for routing. Adjacent landscaping and walls shall be shown on the plans. Final construction plans and details require wet stamped and signed Mylars, eight sets of bond copies and one Mylar copy from the City signed mylars, the AutoCAD file on CD, and a PDF file on CD. As-builts for the trails have the same requirements as final plan submittals.
- o. All street crossings shall be signed with approved ‘STOP’ signs, trail signs, and posts. All improved equestrian trail crossings at signalized intersections that are constructed at their ultimate locations shall have high mounted push buttons. These shall be coordinated through the Transportation Division.
- p. CSD Zone ‘A’ plan check fees shall be paid prior to the second plan check.
- q. CSD Zone ‘A’ inspection fees shall be paid prior to signing of Mylars.
- r. (BP) The trail shall be surveyed and staked by the developer. The trail shall be inspected and approved by the Director of Parks and Community Services or his/her designee prior to the issuance of any building permits for production units.
- s. Any damage to trails or fencing during construction shall be repaired by the developer and inspected by the Director of Parks and Community Services or his/her designee; prior to the last phase of building permit issuance.
- t. A minimum 38’ radius shall be incorporated on all trails where a change of direction occurs (minor or major). Additionally, widening of the trail is necessary in most situations.
- u. Drive approaches shall adhere to City Std. Plan #118C.
- v. Concrete access areas to trails with decomposed granite surfaces shall be rough finished concrete (typically raked finish). The access shall extend to the main trail flat surface.
- w. (BP) In order to prevent the delay of building permit issuance, any deviation from trail fencing materials or trail surface materials shall be submitted to Director of Parks and Community Services or his/her designee and approved in writing 60-days prior to the commencement of trail construction.
- x. Any unauthorized deviation from the approved plan, specifications, City Standard Plans, or Conditions of Approval may result in the delay of building permit issuance and/or building Finals/ Certificate of Occupancy of the project conditioned for improvements.
- y. Where required, decorative solid-grouted block wall (no precision block, stucco, veneer finishes, PVC, or wood fencing) with a minimum height of 72” on the trailside shall be installed along lots that adjoin the trail. Block walls

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 44 OF 40**

shall be located solely on private property. If landscaping is to be utilized between the block wall and the trail, a PVC fence shall be installed along the trail separating the landscaping from the trail (where required). All block walls that have public view shall have an anti-graffiti coating per Parks and Community Services specifications. Combination block/tubular steel fences shall only be utilized where approved by Parks and Community Services. Tubular steel shall comply with Parks and Community Services standards. Coating for tubular steel shall be anti-graffiti coating for metal per Parks and Community Services specifications. If alternate products are requested, the requested material(s) shall be presented to the Director of Parks and Community Services or his/her designee for review and approval. Under no circumstances can alternate products be utilized without prior written authorization from the Director of Parks and Community Services or his/her designee.

- z.** Any damage to existing landscape or hardscape areas due to project construction shall be repaired/replaced by the developer, or developer's successors in interest, at no cost to the City or Community Services District.
- aa.** All inspections shall be requested two (2) working days in advance from the Parks and Community Services Department at the time of rough and precise grading; fence and gate installation; curb and drainage; flatwork; D.G. installation; graffiti coating; and final inspection.
- bb.** (BP) Trail construction in single family developments shall commence prior to 30% of total building permit issuance. Trail completion and acceptance (single family developments) for maintenance shall be completed prior to 70% of total building permit issuance.
- cc.** (CO) Trail construction in multi-family or commercial developments shall commence with the rough grading. Trail completion and acceptance for maintenance shall be completed prior to the issuance of 50% of the total certificates-of-occupancy (for multi-family and/or commercial developments).

PCS3. (R) If Special Districts, a Division of the Public Works Department, requires this project to supply a funding source for the continued maintenance, enhancement, and or retrofit of neighborhood parks, open spaces, linear parks, and/or trails systems, the Developer must notify Special Districts of intent to record the final map 70 days prior to recordation of the final map and the financial option selected to fund the continued maintenance. (California Government Code, GP Chapter 2.7)

PCS3b. (BP) If Special Districts, a Division of the Public Works Department, requires this project to supply a funding source for the continued maintenance, enhancement, and or retrofit of neighborhood parks, open spaces, linear parks, and/or trails systems, the Developer must notify Special Districts of intent to request building permits 70 days prior to their issuance and the financial option selected to fund the continued maintenance. (California

**CONDITIONS OF APPROVAL FOR PA07-0084

Government Code, GP Chapter 2.7)

- PCS4.** The parcel(s) associated with this project have been incorporated into the Moreno Valley Community Services Districts Zones A (Parks and Community Services). All assessable parcels therein shall be subject to the annual Zone A charge for operations and capital improvements.
- PCS5.** (R) Prior to recordation of the final map, the developer, or the developer's successors or assignees, shall supply a copy of the recorded Declaration of Covenant and Acknowledgement of Assessments to the Parks and Community Services Department.
- PCS6.** (BP) Prior to release of building permit, the developer, or the developer's successors or assignees shall supply a copy of the recorded Declaration of Covenant and Acknowledgement of Assessments to the Parks and Community Services Department.
- PCS7.** (BP) This project is subject to current Development Impact Fees at time of building permit issuance.
- PCS8.** Any modified or newly created agreements shall be reviewed and approved by the Board of the Moreno Valley Community Services District.

POLICE DEPARTMENT

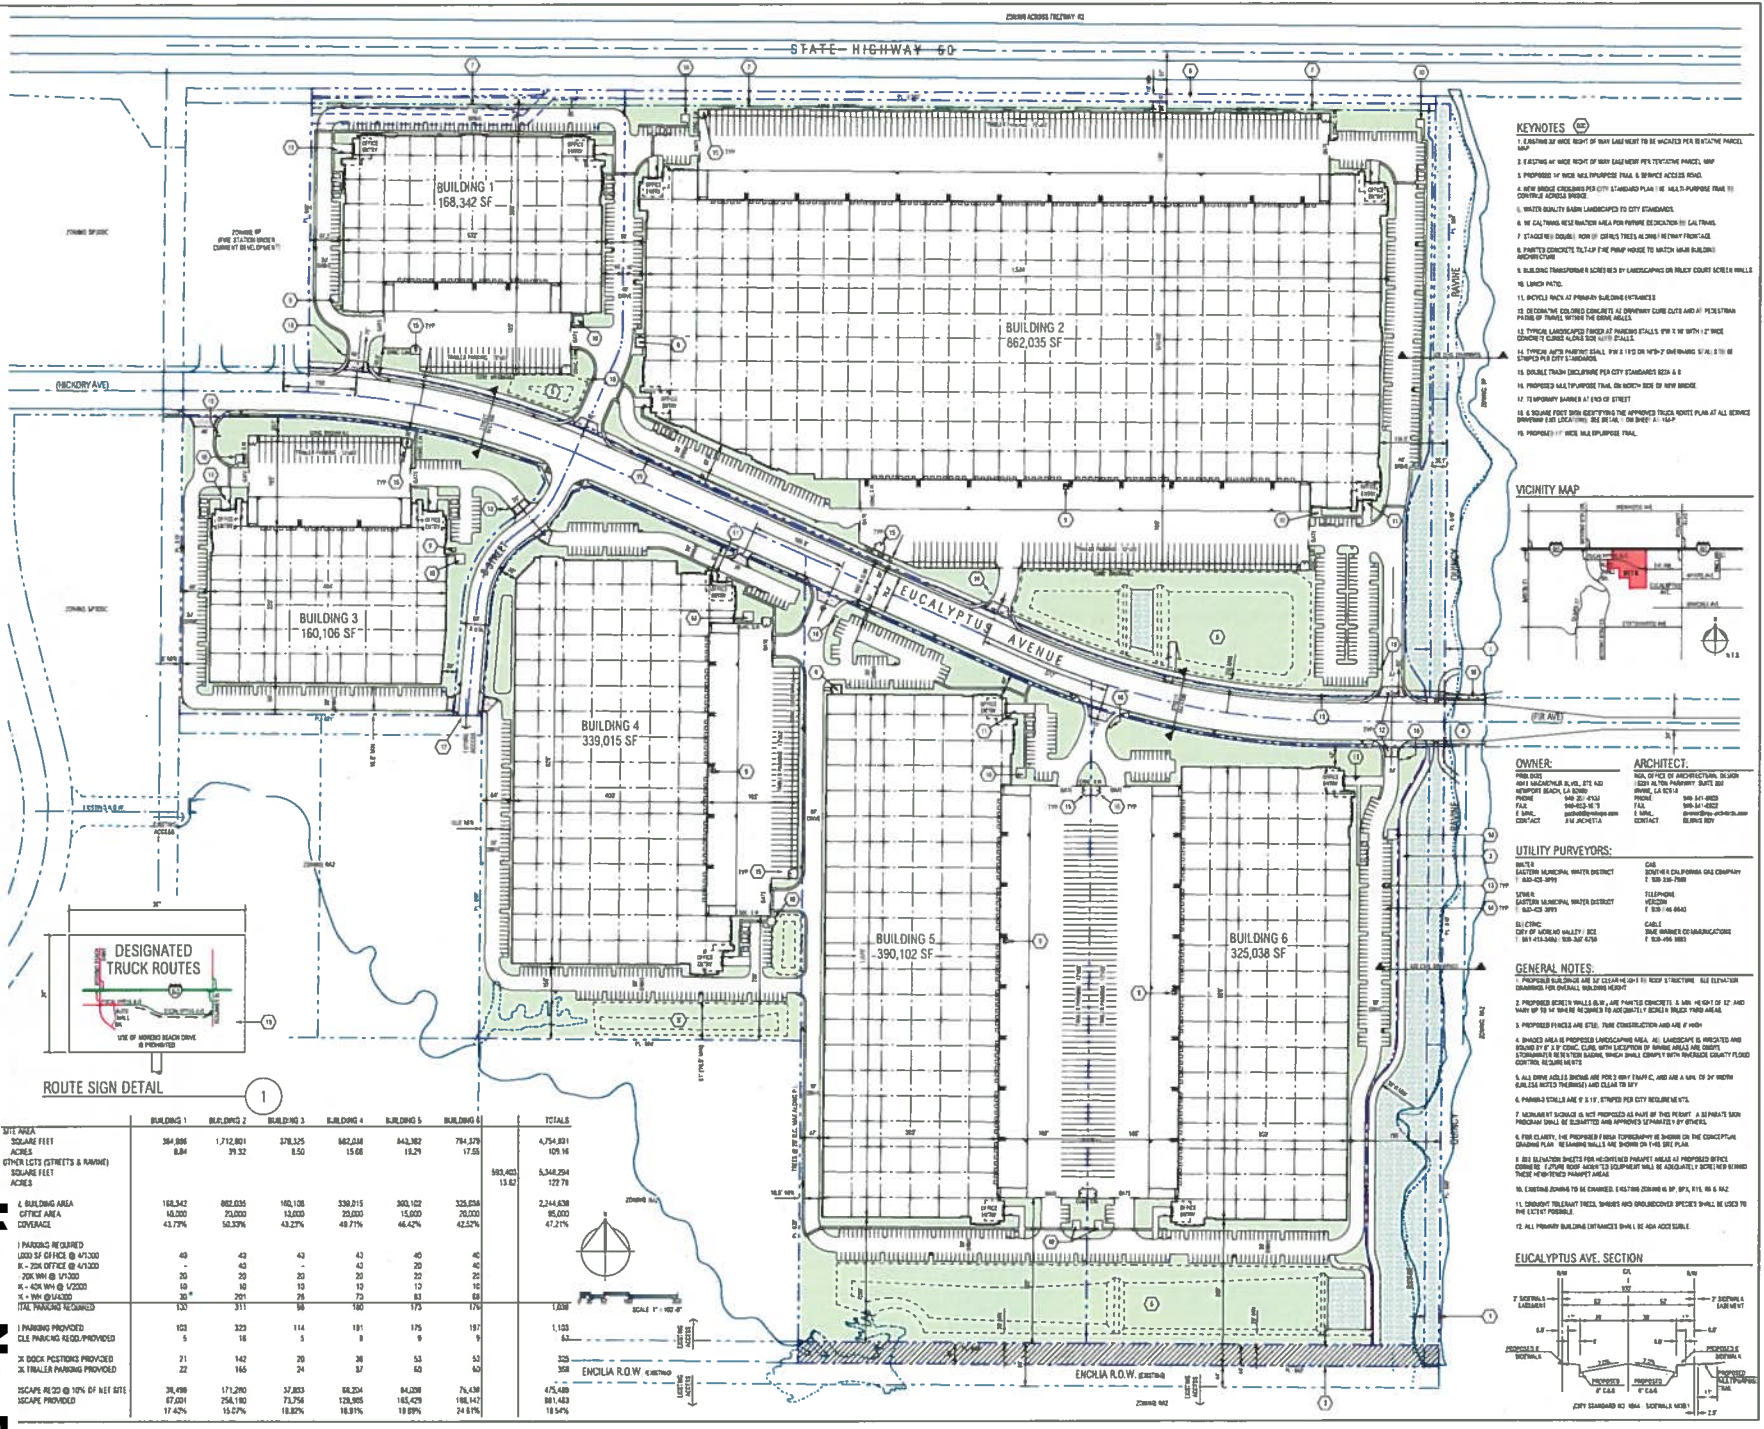

Note: All Special conditions are in bold lettering. All other conditions are standard to all or most development projects

Standard Conditions

- PD1.** Prior to the start of any construction, temporary security fencing shall be erected. The fencing shall be a minimum of six (6) feet high with locking, gated access and shall remain through the duration of construction. Security fencing is required if there is: construction, unsecured structures, unenclosed storage of materials and/or equipment, and/or the condition of the site constitutes a public hazard as determined by the Public Works Department. If security fencing is required, it shall remain in place until the project is completed or the above conditions no longer exist. (MC 9.08.080)
- PD2.** (GP) Prior to the issuance of grading permits, a temporary project identification sign shall be erected on the site in a secure and visible manner. The sign shall be conspicuously posted at the site and remain in place until occupancy of the project. The sign shall include the following:

**CONDITIONS OF APPROVAL FOR PA07-0084
TENTATIVE PARCEL MAP NO. 35679
PAGE 46 OF 40**

- a. The name (if applicable) and address of the development.
 - b. The developer's name, address, and a 24-hour emergency telephone number. (MC 9.08.080)
- PD3. (CO) Prior to the issuance of a Certificate of Occupancy, an Emergency Contact Information Form for the project shall be completed at the permit counter of the Community & Economic Development Department - Building Division for routing to the Police Department. (MC 9.08.080)

 PARCEL D:
 PARCELS 1 AS SHOWN ON THE "LOT LINE ADJUSTMENT NO. 878" AND CERTIFICATE OF COMPLIANCE AS EVIDENCED BY THE DOCUMENT RECORDED ON JANUARY 3, 2007 AS INSTRUMENT NO. 2007-0012081 OF OFFICIAL RECORDS MORE PARTICULARLY DESCRIBED AS FOLLOWS:
 PORTIONS OF LOTS 5 THROUGH 8, INCLUSIVE, OF BLOCK 36 OF BEAR VALLEY AND ALESSANDRO DEVELOPMENT COMPANY, AS SHOWN BY MAP ON FILE IN BOOK 11, PAGE 10, OF MAPS, RECORDS OF SAN BERNARDINO COUNTY, CALIFORNIA, LIES IN THE CITY OF MORENO VALLEY, COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, MORE PARTICULARLY DESCRIBED AS FOLLOWS:
 BEGINNING AT THE INTERSECTION OF THE EAST LINE OF SECTION 3, TOWNSHIP 3 SOUTH, RANGE 3 WEST SAN BERNARDINO BASE AND MERIDIAN AND THE NORTH LINE OF SAID LOT 5;
 THENCE SOUTH 89°32'58" EAST, ALONG THE NORTH LINE OF SAID LOT 5, A DISTANCE OF 232.36 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE TO THE SOUTH AND HAVING A RADIUS OF 1600.00 FEET, SAID POINT ALSO BEING THE TRUE POINT OF BEGINNING;
 THENCE SAID CURVE THROUGH A CENTRAL ANGLE OF 23°37'34", A DISTANCE OF 659.89 FEET;
 THENCE SOUTH 85°55'16" EAST, A DISTANCE OF 978.05 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE TO THE NORTH AND HAVING A RADIUS OF 1600.00 FEET;
 THENCE SAID CURVE THROUGH A CENTRAL ANGLE OF 23°37'34", A DISTANCE OF 659.84 FEET TO A POINT LYING ON THE SOUTH LINE OF SAID LOT 8;
 THENCE SOUTH 89°32'58" EAST, ALONG SAID SOUTH LINE, A DISTANCE OF 181.78 FEET TO THE EASTMOST CORNER OF SAID LOT 8;
 THENCE SOUTH 82°26'15" EAST, ALONG THE EAST LINE OF SAID LOT 8, A DISTANCE OF 662.05 FEET TO THE NORTHEAST CORNER OF SAID LOT 8;
 THENCE NORTH 89°32'58" WEST, ALONG THE NORTH LINE OF SAID LOTS 8, 7, 6 AND 5, A DISTANCE OF 238.12 FEET TO THE POINT OF BEGINNING AND THE END OF THIS DESCRIPTION.
 THE ABOVE DESCRIBED PARCEL CONTAINS 19.35 ACRES PLUS OR MINUS.
 PARCEL E:
 PARCEL 2 AS SHOWN ON THE "LOT LINE ADJUSTMENT NO. 878" AND CERTIFICATE OF COMPLIANCE AS EVIDENCED BY THE DOCUMENT RECORDED ON JANUARY 3, 2007 AS INSTRUMENT NO. 2007-0012081 OF OFFICIAL RECORDS, MORE PARTICULARLY DESCRIBED AS FOLLOWS:
 PORTIONS OF LOTS 9 THROUGH 16, INCLUSIVE, OF BLOCK 36 OF BEAR VALLEY AND ALESSANDRO DEVELOPMENT COMPANY, AS SHOWN BY MAP ON FILE IN BOOK 11, PAGE 10, OF MAPS, RECORDS OF SAN BERNARDINO COUNTY, CALIFORNIA, LIES IN THE CITY OF MORENO VALLEY, COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, MORE PARTICULARLY DESCRIBED AS FOLLOWS:
 BEGINNING AT THE INTERSECTION OF THE EAST LINE OF SECTION 3, TOWNSHIP 3 SOUTH, RANGE 3 WEST SAN BERNARDINO BASE AND MERIDIAN AND THE NORTH LINE OF SAID LOT 5;
 THENCE SOUTH 89°32'58" EAST, ALONG THE NORTH LINE OF SAID LOT 5, A DISTANCE OF 232.36 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE TO THE SOUTH AND HAVING A RADIUS OF 1600.00 FEET;
 THENCE SAID CURVE THROUGH A CENTRAL ANGLE OF 23°37'34", A DISTANCE OF 659.89 FEET;
 THENCE SOUTH 85°55'16" EAST, A DISTANCE OF 978.05 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE TO THE NORTH AND HAVING A RADIUS OF 1600.00 FEET;
 THENCE SAID CURVE THROUGH A CENTRAL ANGLE OF 23°37'34", A DISTANCE OF 659.84 FEET TO A POINT LYING ON THE SOUTH LINE OF SAID LOT 8;
 THENCE NORTH 89°32'58" WEST, ALONG THE SOUTH LINE OF SAID LOTS 8, 7, 6 AND 5, A DISTANCE OF 242.89 FEET TO THE INTERSECTION OF SAID EAST LINE OF SECTION 3 AND THE SOUTH LINE OF SAID LOT 5;
 THENCE NORTH 00°32'27" EAST, ALONG THE EAST LINE OF SAID SECTION 3, A DISTANCE OF 862.71 FEET TO THE POINT OF BEGINNING AND THE END OF THIS DESCRIPTION.
 THE ABOVE DESCRIBED PARCEL CONTAINS 20.06 ACRES PLUS OR MINUS.

10' PROPOSED DEDICATION BY OTHERS
PROPOSED PAVEMENT TRANSITION & JOIN
PROPOSED BRIDGE CROSSING

EXISTING LEGAL DESCRIPTION
REAL PROPERTY IN THE CITY OF MORENO VALLEY, COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:
SECTION 1:
LOTS 1 THROUGH 4, INCLUDING IN BLOCK 36 AS SHOWN BY MAP NO. 1 OF BEAR VALLEY AND ACCORDING TO THE RECORDS OF THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, RECORDED IN BOOK 11, PAGE 10 OF MAPS, SAN BERNARDINO COUNTY RECORDS.

SECTION 2:
PARCELS 2, 3 AND 7 OF BLOCK 36 OF BEAR VALLEY AND ACCORDING TO THE RECORDS OF THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, RECORDED IN BOOK 11, PAGE 10 OF MAPS, SAN BERNARDINO COUNTY RECORDS.

SECTION 3:
PARCELS 5, 6 AND 7 OF BLOCK 36 OF BEAR VALLEY AND ACCORDING TO THE RECORDS OF THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, RECORDED IN BOOK 11, PAGE 10 OF MAPS, SAN BERNARDINO COUNTY RECORDS.

SECTION 4:
LOT 1, BLOCK 36 AS SHOWN BY MAP NO. 1 OF BEAR VALLEY AND ACCORDING TO THE RECORDS OF THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, RECORDED IN BOOK 11, PAGE 10 OF MAPS, SAN BERNARDINO COUNTY RECORDS.

SECTION 5:
PARCELS 1 AS SHOWN ON THE 1/2" LINE ADJUSTMENT NO. 8787 AND CERTIFICATE OF COMPLIANCE AS ORDERED BY THE COUNTY SUPERVISORS ON JANUARY 5, 2007 AS INSTRUMENT NO. 2007-001081 OF OFFICIAL RECORDS HAVE PARTIALLY DESCRIBED AS FOLLOWS:
PORTIONS OF LOTS 3 THROUGH 6 INCLUDING IN BLOCK 36 OF BEAR VALLEY AND ACCORDING TO THE RECORDS OF THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, RECORDED IN BOOK 11, PAGE 10 OF MAPS, SAN BERNARDINO COUNTY RECORDS.

SECTION 6:
PARCELS 2 AS SHOWN ON THE 1/2" LINE ADJUSTMENT NO. 8787 AND CERTIFICATE OF COMPLIANCE AS ORDERED BY THE COUNTY SUPERVISORS ON JANUARY 5, 2007 AS INSTRUMENT NO. 2007-001081 OF OFFICIAL RECORDS HAVE PARTIALLY DESCRIBED AS FOLLOWS:
PORTIONS OF LOTS 3 THROUGH 6 INCLUDING IN BLOCK 36 OF BEAR VALLEY AND ACCORDING TO THE RECORDS OF THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, RECORDED IN BOOK 11, PAGE 10 OF MAPS, SAN BERNARDINO COUNTY RECORDS.

SECTION 7:
RECORDING AT THE INTERSECTION OF THE EAST LINE OF SECTION 2, TOWNSHIP 2 SOUTH, RANGE 7 WEST AND BERNARDINO BASE AND MERIDIAN AND THE NORTH LINE OF SAID LOT 2:
INDUCE SOUTH 89°27'30" EAST, ALONG THE NORTH LINE OF SAID LOT 2, A DISTANCE OF 344.84 FEET TO THE POINT OF BEGINNING AND HAVING A BEARING OF 180.00 FEET.

SECTION 8:
INDUCE SOUTH 89°27'30" EAST, ALONG THE NORTH LINE OF SAID LOT 2, A DISTANCE OF 344.84 FEET TO THE POINT OF BEGINNING AND HAVING A BEARING OF 180.00 FEET.

SECTION 9:
INDUCE SOUTH 89°27'30" EAST, ALONG THE NORTH LINE OF SAID LOT 2, A DISTANCE OF 344.84 FEET TO THE POINT OF BEGINNING AND HAVING A BEARING OF 180.00 FEET.

SECTION 10:
INDUCE SOUTH 89°27'30" EAST, ALONG THE NORTH LINE OF SAID LOT 2, A DISTANCE OF 344.84 FEET TO THE POINT OF BEGINNING AND HAVING A BEARING OF 180.00 FEET.

**RE: Comment on Draft Environmental Impact Report for ProLogis
Eucalyptus Industrial Park (State Clearinghouse No. 2008021002)**

Dear Mr. Bradshaw:

I am writing on behalf of Laborers International Union of North America, Local Union No. 1184 and its members living in Riverside County (collectively "LIUNA Local Union No. 1184" or "LIUNA" or "Commenters") regarding the Draft Environmental Impact Report ("DEIR") prepared for the ProLogis Eucalyptus Industrial Park, State Clearinghouse No. 2008021002 ("Project").

We have reviewed the DEIR with the assistance of:

1. Atmospheric Scientist, Dr. James Clark, Ph.D.
2. Hydrogeologist, Matthew Hagemann, C.Hg., MS.

These experts have prepared written comments that are attached hereto, and which are incorporated in their entirety. The City of Moreno Valley ("City") should respond to the expert comments separately. These experts and our own independent review demonstrate that the DEIR is woefully inadequate and that a new supplemental EIR is required to be prepared and recirculated for public comment. In particular, the EIR suffers from the following significant errors and omissions, among others:

- **SEGMENTATION OF PROJECT:** The DEIR improperly segments the Project by failing to include the infrastructure (e.g., roads, water, and sewer) as part of the Project.
- **LOSS OF FARMLAND:** The DEIR acknowledges that the Project's conversion of Prime Farmland is a significant impact, but the DEIR fails to adequately mitigate for the loss of farmland. The conclusion that mitigation measures are infeasible is unsupported.
- **HAZARDOUS MATERIALS:** The baseline of the physical environmental conditions in the vicinity of the Project is erroneous because the DEIR does not provide any details on the types of pesticides used on the Project site, relies on two outdated Phase I Environmental Site Assessments ("ESAs") that do not cover the entire Project site, and fails to disclose the status of an underground storage tank.
- **GREENHOUSE GAS:** The DEIR fails to provide support for the conclusion that greenhouse gas emissions after mitigation will be less than significant.
- **AIR QUALITY:** The DEIR fails to adequately analyze impacts to air quality because: (1) the DEIR underestimates the potential particulate emissions for the construction phase of the Project, (2) fails to accurately compare construction emissions to daily construction significance thresholds, (3) fails to consider health risks from contaminated dust, (4) fails to properly identify and address the Project's operational air quality impacts, (5) fails to disclose impacts to offsite receptors, and (6) fails to adequately analyze cumulative impacts.

Commenters urge the City to revise the EIR to adequately describe, analyze, and mitigate the Project and its impacts.¹ The revised EIR should be recirculated to allow public review and comment.

I. PROJECT DESCRIPTION

The Project site encompasses 122.8 acres of land located within the City of Moreno Valley, south of and adjacent to SR-60, east of Moreno Valley Auto Mall, and adjacent to and west of the Quincy Channel in Riverside County. (DEIR, p. 3-1). Single-family residential uses are located approximately 50 feet southeast of the southeastern corner of the Project site. (DEIR, p. 3-1). The Assessor's Parcel Numbers ("APNs") for this site are 488-330-011, 488-330-012, 488-330-013, 488-330-017, 488-330-018, 488-330-019, 488-330-022, 488-330-023, 488-330-024, and 488-330-025. (DEIR, p. 3-1).

¹ We reserve the right to supplement these comments at later hearings and proceedings for this Project. See, *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal. App. 4th 1109.

The Project would include the construction of a warehouse facility comprising six buildings consisting of a total of approximately 2,244,638 square feet. (DEIR, p. 3-2). The Project site is divided into 2 areas: (1) the northern area (north of future Eucalyptus Avenue) would contain approximately 1,030,377 square feet of warehouse uses divided between two buildings and (2) the southern area (south of the future Eucalyptus Avenue) would consist of approximately 1,214,261 square feet of warehouse uses divided among four separate buildings. (DEIR, p. 3-2). The specific uses/users are not known at this time. (DEIR, p. 3-11).

The Project site currently consists of 57 acres used to grow grapefruit, 36 acres used for hay and alfalfa production, as well as portions that are vacant. (DEIR p. 4.2-1). Approximately 82.5 acres of the Project site is designated as Prime Farmland. (DEIR, p. 4.2-6).

The Project would require significant changes to the General Plan and local zoning ordinances including:

- **General Plan Amendment.** The proposed project includes an amendment to the Land Use Element to change the General Plan designations for a portion of the project site from Residential 15, Residential 5 and Residential 2 to Business Park. (DEIR, p. 1-2). The project also proposes an amendment to the Circulation Element by making changes to the alignment of Encilia Street and the removal of Quincy Street from within the project boundaries. (DEIR, p. 1-2).
- **Change of Zone.** The proposed project includes a change to the project site zoning from Business Park (BP), Business Park Mixed-use (BPX), Residential Agriculture 2 (RA2), Residential 5 (R5), and Residential 15 (R15) to Light Industrial (LI). (DEIR, p. 1-2).
- **Municipal Code Amendment.** The project includes a Municipal Code Amendment to establish a minimum clearance of 250 feet between adjacent residential zoning districts and any truck court or primary truck circulation driveway in lieu of the buffer established by the Business Park zone. (DEIR, p. 1-2).

II. Standing

Members of Local Union No. 1184 live, work, and recreate in the immediate vicinity of the Project site. These members will suffer the impacts of a poorly executed or inadequately mitigated Project, just as would the members of any nearby homeowners association, community group, or environmental group. Hundreds of LIUNA Local Union No. 1184 members live and work in areas that will be affected by traffic, air pollution, and water pollution generated by the Project.

In addition, construction workers will suffer many of the most significant impacts from the Project as currently proposed, such as from air pollution emissions from poorly maintained or controlled construction equipment, possible risks related to hazardous materials on the Project site, and other impacts. Therefore, LIUNA Local Union No. 1184 and its members have a direct interest in ensuring that the Project is adequately analyzed and that its environmental and public health impacts are mitigated to the fullest extent feasible.

III. LEGAL STANDARDS

A. EIR

CEQA requires that an agency analyze the potential environmental impacts of its proposed actions in an environmental impact report (“EIR”) (except in certain limited circumstances). (See, e.g., Pub. Res. Code § 21100). The EIR is the very heart of CEQA. (*Dunn-Edwards v. BAAQMD* (1992) 9 Cal.App.4th 644, 652). “The ‘foremost principle’ in interpreting CEQA is that the Legislature intended the act to be read so as to afford the fullest possible protection to the environment within the reasonable scope of the statutory language.” (*Communities for a Better Environment v. Calif. Resources Agency* (2002) 103 Cal. App. 4th 98, 109).

CEQA has two primary purposes. First, CEQA is designed to inform decision makers and the public about the potential, significant environmental effects of a project. (14 Cal. Code Regs. (“CEQA Guidelines”) § 15002(a)(1)). “Its purpose is to inform the public and its responsible officials of the environmental consequences of their decisions before they are made. Thus, the EIR ‘protects not only the environment but also informed self-government.’” (*Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal. 3d 553, 564). The EIR has been described as “an environmental ‘alarm bell’ whose purpose it is to alert the public and its responsible officials to environmental changes before they have reached ecological points of no return.” (*Berkeley Keep Jets Over the Bay v. Bd. of Port Comm’rs.* (2001) 91 Cal. App. 4th 1344, 1354 (“*Berkeley Jets*”); *County of Inyo v. Yorty* (1973) 32 Cal.App.3d 795, 810).

Second, CEQA requires public agencies to avoid or reduce environmental damage when “feasible” by requiring “environmentally superior” alternatives and all feasible mitigation measures. (CEQA Guidelines § 15002(a)(2) and (3); See also, *Berkeley Jets*, 91 Cal. App. 4th 1344, 1354; *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564). The EIR serves to provide agencies and the public with information about the environmental impacts of a proposed project and to “identify ways that environmental damage can be avoided or significantly reduced.” (Guidelines §15002(a)(2)). If the project will have a significant effect on the environment, the agency may approve the project only if it finds that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that

any unavoidable significant effects on the environment are “acceptable due to overriding concerns.” (Pub.Res.Code § 21081; 14 Cal.Code Regs. § 15092(b)(2)(A) & (B)).

While the courts review an EIR using an “abuse of discretion” standard, “the reviewing court is not to ‘uncritically rely on every study or analysis presented by a project proponent in support of its position. A ‘clearly inadequate or unsupported study is entitled to no judicial deference.’” (*Berkeley Jets*, 91 Cal. App. 4th 1344, 1355 (emphasis added), quoting, *Laurel Heights Improvement Assn. v. Regents of University of California*, 47 Cal. 3d 376, 391 409, fn. 12 (1988)). As the court stated in *Berkeley Jets*, 91 Cal. App. 4th at 1355:

A prejudicial abuse of discretion occurs “if the failure to include relevant information precludes informed decisionmaking and informed public participation, thereby thwarting the statutory goals of the EIR process.” (*San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus* (1994) 27 Cal. App. 4th 713, 722; *Galante Vineyards v. Monterey Peninsula Water Management Dist.* (1997) 60 Cal. App. 4th 1109, 1117; *County of Amador v. El Dorado County Water Agency* (1999) 76 Cal. App. 4th 931, 946).

B. Supplemental EIR

Recirculation of an EIR prior to certification is required “when the new information added to an EIR discloses: (1) a new substantial environmental impact resulting from the project or from a new mitigation measure proposed to be implemented (cf. Guidelines, § 15162, subd. (a)(1), (3)(B)(1)); (2) a substantial increase in the severity of an environmental impact unless mitigation measures are adopted that reduce the impact to a level of insignificance (cf. Guidelines, § 15162, subd. (a)(3)(B)(2)); (3) a feasible project alternative or mitigation measure that clearly would lessen the environmental impacts of the project, but which the project’s proponents decline to adopt (cf. Guidelines, § 15162, subd. (a)(3)(B)(3), (4)); or (4) that the draft EIR was so fundamentally and basically inadequate and conclusory in nature that public comment on the draft was in effect meaningless.” *Laurel Heights Improvement Assn. v. Regents of University of California* (1993) 6 Cal. 4th 1112, 1130, citing *Mountain Lion Coalition v. Fish & Game Comm’n* (1989) 214 Cal.App.3d 1043.

Significant new information requiring recirculation can include:

- (1) A new significant environmental impact would result from the project or from a new mitigation measure proposed to be implemented.
- (2) A substantial increase in the severity of an environmental impact would result unless mitigation measures are adopted that reduce the impact to a level of insignificance.

(3) A feasible project alternative or mitigation measure considerably different from others previously analyzed would clearly lessen the significant environmental impacts of the project, but the project's proponents decline to adopt it.

(4) The draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded.

(14 Cal. Code Regs. § 15088.5(a)).

The DEIR fails to analyze significant environmental impacts pertaining to the Project and to fully consider available mitigation measures to address those impacts. A revised EIR is required to be prepared and recirculated to address these deficiencies.

IV. THE DEIR IMPROPERLY SEGMENTS THE PROJECT

A. Legal Standard

The courts have repeatedly held that “an accurate, stable and finite project description is the *sine qua non* of an informative and legally sufficient [CEQA document].” *County of Inyo v. City of Los Angeles*, 71 Cal.App.3d 185, 193 (1977). Thus, CEQA mandates “that environmental considerations do not become submerged by chopping a large project into many little ones -- each with a minimal potential impact on the environment -- which cumulatively may have disastrous consequences.” *Bozung v. LAFCO*, 13 Cal.3d 263, 283-84 (1975); *City of Santee v. County of San Diego*, 214 Cal.App.3d 1438, 1452 (1989). Before undertaking a project, the lead agency must assess the environmental impacts of all reasonably foreseeable phases of a project and a public agency may not segment a large project into two or more smaller projects in order to mask serious environmental consequences. As the Court of Appeal stated:

The CEQA process is intended to be a careful examination, fully open to the public, of the environmental consequences of a given project, **covering the entire project, from start to finish**...the purpose of CEQA is not to generate paper, but to compel government at all levels to make decisions with environmental consequences in mind.

Natural Resources Defense Council v. City of Los Angeles, 103 Cal.App.4th 268 (2002) (emphasis added).

In *County of Amador v. City of Plymouth*, 149 Cal. App. 4th 1089, 1095 (2007) an Indian tribe intended to build a large gaming development comprised of a hotel, restaurants, and bars, on land located in or adjacent to the city. The Court held that the

construction of public works, including a city road to the casino hotel, constituted a project within the scope of CEQA. *Id.* at 1100. The Court cited to the CEQA Guideline § 15378(a)(1) which states that the following is included in the term “project”: “public works construction and related activities, clearing or grading of land [and] improvements to existing public structures...” *Id.* at 1100.

B. The DEIR Improperly Segments the Project By Failing to Include the Infrastructure as Part of the Project

The DEIR states:

If the proposed project is constructed prior to the West Ridge project, ProLogis will install the infrastructure necessary to serve its project (e.g., roads, water, and sewer) and will be reimbursed by the City from the West Ridge developer at the time that project is constructed. If the West Ridge project is constructed first, ProLogis will contribute an appropriate amount to the City for a reimbursement account to help off-site improvement costs installed by the West Ridge project that serve the ProLogis project. The timing of improvements shall be coordinated by the City in cooperation with ProLogis and the West Ridge.

(DEIR, p. 3-11). Instead of including the roads, water, and sewer lines required to serve the ProLogis Project as part of the Project, the DEIR treats these infrastructure improvements as a separate project included in the cumulative projects list provided in Table 3.C: Cumulative Projects. (DEIR, p. 3-16). The City is improperly chopping the ProLogis Project into different segments, which is prohibited by CEQA because proper analysis of the whole project is thwarted. Like the casino road in *County of Amador v. City of Plymouth*, the roads, water, and sewer lines that will serve the ProLogis Project must be included as part of the Project and properly analyzed as part of the whole Project.

V. THE DEIR FAILS TO ANALYZE AND MITIGATE ALL POTENTIALLY SIGNIFICANT IMPACTS

An EIR must disclose all potentially significant adverse environmental impacts of a project. (Pub. Res. Code § 21100(b)(1); 14 Cal.Code Regs. § 15126(a); *Berkeley Jets*, 91 Cal. App. 4th 1344, 1354). CEQA requires that an EIR must not only identify the impacts, but must also provide “information about how adverse the impacts will be.” (*Santiago County Water Dist. v. County of Orange* (1981) 118 Cal.App.3d 818, 831). The lead agency may deem a particular impact to be insignificant only if it produces rigorous analysis and concrete substantial evidence justifying the finding. (*Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692).

CEQA requires public agencies to avoid or reduce environmental damage when “feasible” by requiring mitigation measures. (CEQA Guidelines § 15002(a)(2) and (3); See also, *Berkeley Jets*, 91 Cal. App. 4th 1344, 1354; *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564). The EIR serves to provide agencies and the public with information about the environmental impacts of a proposed project and to “identify ways that environmental damage can be avoided or significantly reduced.” (Guidelines §15002(a)(2)). If the project will have a significant effect on the environment, the agency may approve the project only if it finds that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns.” (Pub.Res.Code § 21081; 14 Cal.Code Regs. § 15092(b)(2)(A) & (B)).

In general, mitigation measures must be designed to minimize, reduce, or avoid an identified environmental impact or to rectify or compensate for that impact. (CEQA Guidelines § 15370). Where several mitigation measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified. (*Id.* at § 15126.4(a)(1)(B)). A lead agency may not make the required CEQA findings unless the administrative record clearly shows that all uncertainties regarding the mitigation of significant environmental impacts have been resolved.

CEQA requires the lead agency to adopt feasible mitigation measures that will substantially lessen or avoid the Project’s potentially significant environmental impacts (Pub. Res. Code §§ 21002, 21081(a)), and describe those mitigation measures in the CEQA document. (Pub. Res. Code § 21100(b)(3); CEQA Guidelines § 15126.4). A public agency may not rely on mitigation measures of uncertain efficacy or feasibility. (*Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692, 727 (finding groundwater purchase agreement inadequate mitigation measure because no record evidence existed that replacement water was available)). “Feasible” means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, legal, social and technological factors. (CEQA Guidelines § 15364). To demonstrate economic infeasibility, “evidence must show that the additional costs or lost profitability are sufficiently severe as to render it impractical to proceed with the project.” (*Citizens of Goleta Valley v. Board of Supervisors* (1988) 197 Cal.App.3d 1167, 1181). The EIR must provide evidence and analysis to show project cannot be economically implemented. (*Kings County, supra*, 221 Cal.App.3d at 734-737). This requires not just cost data, but also data showing insufficient income and profitability. (*See Burger v. County of Mendocino* (1975) 45 Cal.App.3d 322, 327 (infeasibility claim unfounded absent data on income and expenditures showing project unprofitable); *San Franciscans Upholding the Downtown Plan v. City and County of San Francisco* (2002) 102 Cal.App.4th 656, 694 (upholding infeasibility finding based on analysis of costs, projected revenues, and investment requirements)). Mitigation measures must be fully enforceable through permit conditions, agreements, or other legally binding instruments. (*Id.* at § 15126.4(a)(2)).

A lead agency may not conclude that an impact is significant and unavoidable without requiring the implementation of all feasible mitigation measures to reduce the impacts of a project to less than significant levels. (CEQA Guidelines §§ 15126.4, 15091).

A. The DEIR Fails to Adequately Mitigate for the Loss of Farmland

1. Preservation Is an Appropriate Mitigation Measure for the Loss of Agricultural Resources

Preservation can be used as a tool to mitigate impacts of urbanizing land and it is encouraged and supported by legislative pronouncements and case law. For example,

[s]ee the following legislative pronouncements to the effect that conversion of agricultural land is of significant concern, and that the preservation of agricultural land is significant goal of the state. Gov. Code, § 51220 (Williamson Act findings that agricultural preservation is valuable and necessary); Civ. Code, § 815 (legislative declaration that preservation of agricultural lands “is among the most important environmental assets of California”); Pub. Resources Code, § 10200 *et seq.* (California Farmland Conservancy Program Act (formerly the Agricultural Land Stewardship Program of 1995), promoting the establishment of agricultural easements as a means to preserve agricultural land); Pub. Resources Code, §§ 21031.1, 21061.2, 21095 (CEQA provisions requiring the Resources Agency to take steps it to ensure that the environmental effects of agricultural land conversion are quantitatively and consistently considered in the environmental review process); Stats. 1993, ch. 812, § 1, subd. (d) (declaring a legislative intent that CEQA should play an important role in the preservation of agricultural lands).

In *Mira Mar [Mobile Community v. City of Oceanside]* (4th Dist. 2004) 119 Cal. App. 4th 477 [14 Cal. Rptr. 3d 176]], the court heard a challenge to the City of Oceanside’s approval of a condominium project on 7.5 acres of private property. The project would cause the loss of about .86 acres of coastal sage scrub, which was identified as a significant impact to a sensitive resource. The EIR required the applicant to mitigate for this loss at a ratio of 3 to 1 (or 2.58 acres of mitigation for .86 acres of lost habitat). In implementing this mitigation measure, the city required the preservation of .65 acres of undisturbed coastal sage scrub, the restoration and preservation of 2.3 acres of disturbed coastal sage scrub, and the creation of .63 acres of new coastal sage scrub on site. Petitioners argued that this mitigation was inadequate because *preservation* of coastal sage scrub does not mitigate for lost habitat, making the measure “illusory and

inadequate.” 119 Cal. App. 4th 477, 495. The Court of Appeal disagreed, citing CEQA Guidelines section 15370, as well as the opinions of various resource agencies, for the proposition that preservation can be a feasible means of reducing or eliminating the impact of lost habitat.

While the *Mira Mar* case deals specifically with biological and habitat resources, the reasoning of this case seems to have more general applicability to mitigation for lost resources, including agricultural resources.

(Guide to CEQA, Michael H. Remy, et. al., eleventh edition, p. 549-550).

2. The DEIR Fails to Adopt Appropriate Mitigation Measures for the Loss of Farmland

Approximately 82.5 acres of the Project site is designated as Prime Farmland. (DEIR, p. 4.2-6). The DEIR states that “[b]ecause Prime Farmland is a finite resource, its conversion to a non-agricultural use is significant.” (DEIR, p. 4.2-6). The DEIR identifies several mitigation measures including mitigation measures discussed in the City General Plan EIR:

- Enrolling productive agricultural land, not presently under contract, under a Williamson Act Contract;
- Providing protection to ongoing agricultural operations from complaints and nuisance complaints from adjacent new development;
- Protecting productive agricultural land subject to conversion through the purchase of or transfer of its development rights;
- Purchasing conservation easements on existing agricultural land to ensure that the land is never converted to urban uses; and
- Donating funds to a regional or statewide program that promotes and implements the use of agricultural land conservation easements.

(DEIR, p. 4.2-7 - 4.2-8). However, the DEIR states that

[t]he potential mitigation measures identified by the City’s General Plan have been deemed infeasible by the property owner under current economic conditions. In addition, supplementary analysis of the project

site and local economic conditions indicates that continued citrus production and/or the raising of row crops would not be economically feasible on the project site (see Appendix L).

(DEIR, p. 4.2-8) (emphasis added).

The conclusion that the mitigation measures are infeasible is completely unsupported. The DEIR states the City General Plan EIR mitigation measure of enrolling productive land under Williamson Act contracts is infeasible because the “contracts are entered into voluntarily by property owners” and these contracts would “result only in temporary contracts at any time after the ten-year contract period ends.” (DEIR, p. 4.2-8). Mitigation measures are designed to minimize significant environmental impacts, not necessarily to eliminate them. (Pub. Res. Code § 21100(b)(3); 14 Cal. Code Regs. § 15126.4(a)(1)). The minimum term for a Williamson Act contract is 10 years, however jurisdictions have the option of making them longer. (*Williamson Act Program - Basic Contract Provisions*, State of California Department of Conservation, available at http://www.conservation.ca.gov/dlrp/lca/basic_contract_provisions/Pages/index.aspx#what is a williamson act contract). Enrolling land into Williamson Act contracts would minimize the environmental impacts of converting Prime Farmland to warehouses.

In evaluating the feasibility of the mitigation measures: (1) purchasing conservation easements and (2) donating funds to a regional or statewide program, the DEIR states

The purchase or transfer of development rights, purchase of conservation easements, or donation of funds to assist in the conservation of agricultural land would need to be implemented to ensure the preservation of agricultural land. As stated previously, the City anticipates the conversion of agricultural land within the City and does not set aside land for permanent preservation. The City expects that the majority of the land within the City will be converted to urban uses, although some agriculture will continue as interim uses, as allowed by the City’s Development Code for all zoning categories.

(DEIR, p. 4.2-8 - 4.2-9). These “reasons” are flawed because the identified mitigation measure was to donate funds to regional or statewide programs that promote and implement the use of agricultural land conservation easements. The “reasons” do not address why donating funds to regional or statewide programs is infeasible.

A supplemental EIR is required to analyze and require implementation of these feasible mitigation measures to reduce the Project’s impacts on agricultural land. The fact that the measures are set forth in the City’s own General Plan itself makes a prima facie case that the measures are feasible and should be implemented. If the City

concludes that the measures are infeasible, then it must provide substantial evidence to demonstrate infeasibility. The EIR must provide evidence and analysis to show project cannot be economically implemented. (*Kings County, supra*, 221 Cal.App.3d at 734-737). This requires not just cost data, but also data showing insufficient income and profitability. (*See Burger v. County of Mendocino* (1975) 45 Cal.App.3d 322, 327 (infeasibility claim unfounded absent data on income and expenditures showing project unprofitable); *San Franciscans Upholding the Downtown Plan v. City and County of San Francisco* (2002) 102 Cal.App.4th 656, 694 (upholding infeasibility finding based on analysis of costs, projected revenues, and investment requirements)). The EIR is devoid of any such evidence and is therefore legally inadequate.

B. The DEIR Fails to Adequately Analyze Hazards and Hazardous Materials and Establishes an Erroneous Baseline

1. CEQA Baseline Standard

Every CEQA document must start from a “baseline” assumption. The CEQA “baseline” is the set of environmental conditions against which to compare a project’s anticipated impacts. *Communities for a Better Environment v. So Coast Air Qual. Mgmt. Dist.* (2010) 48 Cal. 4th 310, 321. Section 15125(a) of the CEQA Guidelines (14 C.C.R., § 15125(a)) states in pertinent part that a lead agency’s environmental review under CEQA:

...must include a description of the physical environmental conditions in the vicinity of the project, as they exist at the time [environmental analysis] is commenced, from both a local and regional perspective. This environmental setting will normally constitute the baseline physical conditions by which a Lead Agency determines whether an impact is significant.

(See, *Save Our Peninsula Committee v. County of Monterey* (2001) 87 Cal.App.4th 99, 124-125 (“*Save Our Peninsula*”). As the court of appeal has explained, “the impacts of the project must be measured against the ‘real conditions on the ground,’” and not against hypothetical permitted levels. (*Save Our Peninsula*, 87 Cal.App.4th 99, 121-123). As the court has explained, using such a skewed baseline “mislead(s) the public” and “draws a red herring across the path of public input.” (*San Joaquin Raptor Rescue Center v. County of Merced* (2007) 149 Cal.App.4th 645, 656; *Woodward Park Homeowners v. City of Fresno* (2007) 150 Cal.App.4th 683, 708-711).

2. Residual Pesticides in the Soil May Pose Health Risks to Workers and Nearby Residents

According to the DEIR, 57 acres of the Project site are used to grow grapefruit and 36 acres of the Project site are used for hay and alfalfa production. (DEIR, p. 4.2-1).

The DEIR and supporting documents fail to provide any specific details on the types of pesticides that have been used on the Project site in association with these agricultural operations and therefore the DEIR fails to adequately describe the environmental setting for the Project. According to Mr. Hagemann,

[o]ur review has shown known and potential pesticide use at the Project site as follows:

- Data available online from the California Department of Pesticide Regulation show that 2,4-D, 2-Ethylhexyl Ester was used on the Project site.^{2,3} Occupational exposure to 2,4-D, 2-Ethylhexyl Ester can occur via inhalation or dermal contact and can result in skin irritation, respiratory failure, hyperventilation, and pulmonary enemas.⁴
- Organochlorine pesticides DDE and DDT were detected in soil samples collected at the Project site⁵, indicating past use. Use of organochlorine pesticides in the area is common: review of the Department of Toxic Substances Control's (DTSC) Envirostor database shows that the surrounding lands have been surveyed for organochlorine pesticides, DDE and DDT.⁶ These pesticides can persist in soil for hundreds of years despite being banned in the 1970s.⁷ Exposure to DDT can result in headaches, nausea, and convulsions.⁸ The U.S. EPA identifies DDT and DDE as probable human carcinogens.⁹
- The EPA states that soils at fruit orchards, such as the grapefruit orchard on the Project site, may contain high levels of arsenic from application as a pesticide.¹⁰ Another chemical used on fruit orchards is lead arsenate, a very persistent pesticide.¹¹ Arsenic is a known human carcinogen and even short-term inhalation of arsenic

¹¹ <http://www.ncbi.nlm.nih.gov/pmc/articles/PMC1551991/>

dust can cause gastrointestinal effects¹² while lead is known to cause neurotoxicological effects.¹³

Pesticide use at the Project site was not disclosed in the DEIR and the detection of pesticide residuals in soil were not described in the Hazards and Hazardous Materials section.

Failure to disclose the presence of pesticide residuals in Project site soils may pose significant health risks to construction workers. Construction of the Project requires grading and the disturbance of subsurface soils and removal of citrus groves (DEIR, p. 4.7-21). During earthmoving activities, construction workers will be exposed, via inhalation of dust and dermal contact, to Project site soils which may contain harmful levels of pesticide residuals associated with agricultural activities on the site. To protect worker safety, Project site soils must be sampled for pesticides. Sampling results should be compared to health-protective regulatory screening levels such as U.S. EPA Regional Screening Levels¹⁴ and California Human Health Screening Levels.¹⁵

Soil sampling results should also be evaluated for the protection of nearby residents, located 50 feet from the southern boundary and 200 feet from the northern boundary of the Project site (DEIR, p. 4.3-6). Inhalation of pesticides has been linked to asthma in recent research.^{16,17} A report prepared by the California Department of Health identifies pesticides as an asthma trigger.¹⁸ Offsite receptors, including any children living in the neighboring residences, may be exposed to pesticide residuals via dust generated during Project construction.

Construction activities, such as grading and excavation of soils, may generate dust that contains pesticides in concentrations that are harmful to the health of workers and nearby residents and which may act as an asthma trigger. Project site soils should be sampled and results should be compared to human health screening levels. A revised DEIR should be prepared to disclose the results of sampling and include any necessary mitigation to reduce impacts to the health of construction workers and nearby residents.

3. The Phase I Environmental Site Assessments Completed for the Project Site are Outdated and Inadequate

According to Mr. Hagemann,

The DEIR relies on the findings from two Phase I Environmental Site Assessments (ESAs) that were completed in October and November 2003, nearly nine years ago. The Phase I ESAs surveyed 121 acres of the 123-acre Project site. The Applicant purchased the Project site more than five years ago.¹⁹ A Phase I ESA, according to the U.S. EPA, must be conducted within one year of the acquisition of the property and on-site visual inspections must be completed within 180 days prior to acquiring ownership of the property.²⁰

Because the Phase I ESAs are dated and omit two acres of the Project site, they cannot be used to evaluate conditions that are potentially hazardous to construction workers and future site personnel. Therefore, the DEIR's analysis of the Project site based on these Phase I ESAs is inadequate.

Review of Google Earth images shows that the Project site has been used for ongoing agricultural operations since the Phase I ESAs were completed in 2003. Limited pesticide sampling was conducted during the Phase I ESAs (a total of 8 soil samples for a 123-acre Project site) but because the samples were collected nine years ago and because they do not reflect continued agricultural use, the results are reflective of current site conditions.

The Phase I ESAs cover 121 acres of the 123-acre Project site. We have created a map to show the areas of the Project site surveyed by the two 2003 Phase I ESAs and the boundaries for the current Project site (Attachment A). As the map shows, not all areas of the current Project site were included in the 2003 Phase I ESAs' site assessments.

The DEIR fails to establish an adequate environmental setting for the Project site because it relies on Phase I ESAs that are outdated and do not cover the entire Project site. A revised DEIR is required, including a new Phase I ESA, to evaluate the Project site's current environmental conditions.

¹⁹ <http://www.pe.com/local-news/riverside-county/moreno-valley/moreno-valley-headlines-index/20120726-moreno-valley-officials-seek-comments-on-prologis-project.ece>

²⁰ <http://www.epa.gov/brownfields/aai/aicerclafs.pdf>

4. The DEIR Fails to Disclose the Status of an Underground Storage Tank

According to Mr. Hagemann,

A 13,400 gallon underground storage tank (UST), abandoned in the 1950s, was removed from the Project site in 2004 (Appendix F, p. 3/191). The Phase I ESA recommended an additional investigation to be conducted in the area of the former UST (Appendix F, p. 10/191). Accordingly, a permit for removal of the UST was submitted to the Riverside County's Department of Environmental Health in December 2003 and soil samples around the area of the UST were analyzed in 2004. However, the DEIR and supporting documents did not include any documentation that the UST was properly closed by the Riverside County Department of Environmental Health. If the UST removal was not approved, an Underground Storage Tank Closure Application and Permit²¹, per the Riverside County Department of Environmental Health Guidelines,²² must be submitted.

The DEIR fails to establish an adequate baseline because it does not provide the status of a 13,400 gallon UST. A revised DEIR is required to disclose this important information (i.e., whether closure was granted by the Riverside County Department of Environmental Health).

C. The DEIR Fails to Adequately Analyze Greenhouse Gas Emissions

The DEIR states that the Project's operational greenhouse gas (GHG) emissions, before mitigation, are estimated to be 79,000 metric tons of CO₂e/year (MT CO₂e/yr) which exceed the SCAQMD threshold of 10,000 MT CO₂e/yr and are therefore considered significant. (DEIR, p. 4.13-19). The Project's GHG emissions exceed the SCAQMD threshold by nearly eight times. After mitigation, the DEIR states that GHG emissions will be less than significant. (DEIR, p. 4.13-21). This conclusion is completely unsupported. The DEIR fails calculate what the Project's GHG emissions will be after the mitigation measures are implemented. In fact, the DEIR and supporting documents, including a GHG Study (Appendix B), fail to provide any evidence that the proposed mitigation measures will reduce GHG emissions by a factor of eight.

According to Mr. Hagemann,

²¹ http://www.rivcoeh.org/opencms/system/galleries/download/Environmental-Health/HMM/UST_Closure_App.pdf

²² http://www.rivcoeh.org/opencms/system/galleries/download/Environmental-Health/HMM/Closure_by_removal_UST.pdf

A revised DEIR should be prepared to show the efficiency of the Project's proposed mitigation measures in reducing greenhouse gases. If these measures do not account for an eight-fold reduction in the Project's estimated GHG levels, additional mitigation measures (listed below) that are routinely considered in other CEQA projects should be implemented:

- Require preparation of a traffic control plan;
- Demonstrate proper inspection and maintenance of construction equipment;
- Implement a carpool program for construction workers;
- Employ a construction site manager to verify that engines are properly maintained and keep a maintenance log;
- Configure construction parking to minimize traffic interference;
- Consolidate truck deliveries when possible;
- Provide dedicated turn lanes for movement of construction trucks and equipment on and off site;
- Suspend use of all construction equipment operations during second stage smog alerts;
- Establish a staging zone for trucks that are waiting to load or unload material at the work zone in a location where diesel emissions from the trucks will have minimum impact on abutters and the general public;
- Locate construction equipment away from sensitive receptors such as fresh air intakes to buildings, air conditioners and operable windows;
- Require all diesel trucks used by construction contractor(s) at the site, or for on-road hauling of construction material, to be post-1996 models; Diesel portable generators less than 50 hp shall not be allowed at the construction site;
- Use of hybrid and fuel efficient construction equipment and support vehicles (e.g., pick-up trucks);
- Use of grid electricity for smaller equipment such as saws, pumps, and welders;²³
- Reduction in vehicle miles travelled in construction crew commutes through trip carpooling, trip reduction, providing bus service for crews from work sites to carpool parking areas, and in providing incentives to carpool; and
- Use of a Heavy-Duty Off-Road Vehicle Plan to ensure compliances with construction mitigation measures (e.g., hourly meters on equipment, documenting the serial number, horsepower,

²³ <http://www.capcoa.org/wp-content/uploads/2010/11/CAPCOA-Quantification-Report-9-14-Final.pdf>, p.

manufacture age, fuel, etc. of all onsite equipment and daily logging of the operating hours of the equipment).²⁴

A supplemental EIR should be prepared that calculates the Project's GHG emissions after implementation of all feasible mitigation measures. The supplemental EIR should analyze all mitigation measures set forth in the GHG Guidance Document published by the California Attorney General, Addressing Climate Change at the Project Level (see attached exhibit, also available at http://ag.ca.gov/globalwarming/pdf/GW_mitigation_measures.pdf). If GHG impacts remain significant after implementation of all feasible mitigation measures, then the EIR must acknowledge that the impacts are significant and unavoidable, and the City must adopt a statement of overriding considerations.

D. The DEIR Fails to Adequately Analyze Impacts to Air Quality

1. The DEIR Underestimates the Potential Particulate Emissions for the Construction Phase of the Project

Computer modeling (e.g., the California Air Resource Board's ("CARB's") Urban Emission ("URBEMIS") and the California Emissions Estimator Model ("CalEEMod")) is used to estimate emissions of criteria pollutants during construction and operational phases of projects. The South Coast Air Quality Management District ("SCAQMD") permits the use of the outputs from both the URBEMIS and CalEEMOD in air quality analyses. According to Dr. Clark, there are significant differences between these two models that "must be highlighted in the DEIR." In pertinent part, Dr. Clark states:

The changes in the method used to estimate construction impacts from the proposed project by using the CalEEMod model instead of the URBEMIS model include:

- Failure to account for wind-blown fugitive dust²⁵. According to the July, 2011 CalEEMod Technical Paper, wind-blown fugitive dust is not calculated in CalEEMod. For sites as large as the proposed project site, this can result in significant quantities of particulate matter being released.
- SCAQMD's surveys of construction sites were limited to sites of 35 acres or less. For projects larger than 35 acres the data was extrapolated by increasing the number of construction days but not increasing the number of construction equipment pieces used on a

²⁴ Ibid., p. 431

²⁵ CalEEMod. Technical Paper: Methodology Reasoning and Policy Development of the California Emission Estimator Model. July, 2011. Pg 4.

given day. The impact is to reduce the construction PM estimates for the site as compared to URBEMIS²⁶.

- The acreage to be based upon Walker's Building Estimator's Reference Book. Grading in URBEMIS is based upon 25% of total project acreage in one day. The impact of this change is to decrease PM emissions from grading in the CalEEMod²⁷.

A revised DEIR should be prepared to highlight the differences between the two models so that the potential impacts are adequately analyzed.

2. The DEIR Fails to Accurately Compare Construction Emissions to Daily Construction Significant Thresholds

According to Dr. Clark, the CalEEMod results were not presented properly. The model shows CEQA significance levels were exceeded as well as South Coast Air Quality Management District Localized Significance Thresholds were exceeded. In pertinent part, Dr. Clark states:

Unlike the operational emissions from most projects, which are typically more or less continuous, emissions from construction sites are highly variable depending on the type of construction that is being performed. For example, grading results in large quantities of fugitive dust and combustion emissions from diesel-powered equipment. Short-term emissions during the various construction phases can be considerable and may result in degradation of local and regional air quality and severe health effects.

To determine whether short-term emissions may result in degradation of local and regional air quality and severe health effects, it is common practice for lead agencies to compare project emissions to quantitative significance thresholds developed by local air districts as a screening tool for CEQA review. Thresholds of significance for construction emissions are typically expressed on a short-term basis, *i.e.* daily or hourly basis to adequately capture impacts due to the high variability of emissions during different construction stages.

Table 1 presents a summary of short-term emissions thresholds developed by SCAQMD and other air districts for assessing impacts on air quality from construction projects.

²⁶ CalEEMod. Technical Paper: Methodology Reasoning and Policy Development of the California Emission Estimator Model. July, 2011. Pg 5.

²⁷ CalEEMod. Technical Paper: Methodology Reasoning and Policy Development of the California Emission Estimator Model. July, 2011. Pg 5.

**Table 1:
 CEQA significance thresholds for construction emissions from various air districts**

Air district construction thresholds*	NOx (lbs/day)	ROG (lbs/day)	PM₁₀ (lbs/day)	DPM (lbs/day)	PM_{2.5} (lbs/day)	CO (lbs/day)

 SLOCAPCD = San Louis Obispo County Air Pollution Control District, CEQA Air Quality Handbook, December 2009.
 MBUAPCD = Monterey Bay Unified Air Pollution Control District, CEQA Air Quality Guidelines, June 2004,
 FRAQMD = Feather River Air Quality Management District,
http://www.fraqmd.org/CEQA_Thresholds.htm;
 SMAQMD Sacramento Metropolitan Air Quality Management District, Guide to Air Quality Assessment, July 2004;
 YSAQMD, Yolo-Solano Air Quality Management District, Air Quality Handbook, Guidelines for Determining Air Quality Thresholds of Significance and Mitigation Measures for Proposed Development Projects that Generate Emissions from Motor Vehicles, revised 2002

A review of the CalEEMod analysis for the project shows that the mitigated construction emissions of ROG and PM_{2.5} exhaust (a surrogate for diesel particulate emissions) are in excess of the CEQA significance thresholds listed above. During Year 2013, ROG and PM_{2.5} exhaust emissions are estimated to be 368.03 lbs/day and 7.95 lbs/day, respectively.

In addition to the Significant Thresholds above, SCAQMD recommends the use of Localized Significance Thresholds (LSTs) to determine potential impacts to receptors near projects. According to the Air Quality Analysis prepared by the proponent, Table I of the Air Quality Analysis shows that the emissions of the pollutants on the peak day of construction are below the SCAQMD LST. In this table the proponent uses the emission estimates from the grading phase of the construction. The proponent inaccurately asserts that the emission levels will be below the LST values.

**Table 2:
 Construction LST Impacts from Air Quality Analysis**

Emission Sources	Pollutant Emissions, lbs/day			
	NOx	CO	PM ₁₀	PM _{2.5}
On-Site (grading) Emissions	104	55	8.4	6.3
LST Threshold	270	1,577	13	8
Significant Emissions?	No	No	No	No

A review of the CalEEMod analysis shows that the highest emission values are not associated with the grading phase. In Section 2.0 Emission Summary of the CalEEMod analysis presented in the Air Quality Analysis the construction impacts are listed as:

**Table 3:
 Construction LST Impacts from CalEEMod Output**

Emission Sources	Pollutant Emissions, lbs/day			
	NOx	CO	PM ₁₀	PM _{2.5}
Mitigated Construction Emissions	139.84	166.77	29.2	8.28
LST Threshold	270	1,577	13	8
Significant Emissions?	No	No	Yes	Yes

The Proponent's analysis of air quality impacts clearly fails to accurately describe the impacts of the emissions on the receptors closest to the project site. Based on my expert opinion, applicable significance thresholds, and the CalEEMod analysis performed by the proponent, I conclude that the Project will have significant adverse impacts from construction air emissions of fugitive dust, ROG, and diesel emissions. The lead agency must re-evaluate the construction emissions and incorporate a phased approach to estimate the true impacts of construction activities on air quality, and propose all feasible mitigation measures to reduce these significant emissions, in a RDEIR.

3. The DEIR Fails to Consider Health Risks From Contaminated Dust

According to Dr. Clark:

Residual contaminants in soils at the site may be entrained in dust generated during construction activities. The release of residual contamination is a potentially significant impact, given the past use of the site for agricultural production. According to the California Department of Toxic Substances Control August 2002 Interim Guidance for Sampling Agricultural Fields for School Sites (known sensitive receptors), “the most commonly detected pesticides have been DDT and its derivatives DDD and DDE, toxaphene, dieldrin, and aldrin. Of these pesticides, toxaphene has been the major pesticide driving unacceptable levels of risk requiring remediation by soil removal.” Given the volume of soils to be graded at each of the sites it is imperative to understand whether particulate matter generated at the sites will pose a potential health risk to sensitive receptors in the vicinity of each site.

According to DTSC, “the guidance is applicable to agricultural land that is currently under cultivation with row, fiber or food crops, orchards, or pasture. It is also applicable to fallow and former agricultural land that is no longer in production and has not been disturbed beyond normal disking and plowing practices. Each field of the same crop is assumed to have been watered, fertilized, and treated with agricultural chemicals to the same degree across the field. Because of this homogeneous application, contaminant levels are expected to be similar at any given location within the field.”

There is no indication of a sampling and analysis plan in the DEIR, or the Project documents provided by the lead agency, a serious deficiency in the documents. Prior to issuing a DEIR for the project, the Proponent should be required to complete a sampling and analysis plan to confirm or rule out the possibility of the presence of residual contaminants at the site. Identifying residual pesticides or other contaminants in soils at the site prior to construction activities will provide an opportunity for the Proponent to remove/mitigate the potential exposure of sensitive receptors within the vicinity of the sites. In the absence of any sampling or analysis, and given the past use of the Project site, I conclude that there is at least a fair argument that the Project may have significant impacts related to residual contaminants at the site.

4. The DEIR Fails to Properly Identify and Address the Project's Operational Air Quality Impacts

The DEIR states, without any evidentiary support, that the project's emissions of criteria pollutants will not result in a considerable net increase of any criteria pollutant for which the project region is in non-attainment under an applicable federal or state ambient air quality standard. According to Dr. Clark,

During the operational phase of the project the project will have the potential to generate significant quantities of criteria pollutants (NO_x, SO_x, Ozone precursors, PM). According to Table 3-1 of the most recent BAAQMD CEQA guidance, a construction of a 259,000 square foot light industrial or warehouse operation will typically violate NO_x construction thresholds and GHG operational thresholds. The proposed Project's 2,000,000 square feet plus of warehouse and manufacturing buildings are nearly 8 times the size of the screening threshold, ensuring a violation of local air quality thresholds. I therefore conclude that the Project will have significant NO_x and GHG emissions during Project operations.

The air quality impacts from the traffic associated with a 2,000,000 square foot facility are significant. Typically the impacts are quantified by the number of vehicle trips per day. In the case of the proposed project, the primary concern will be the number of truck trips per day. A truck trip is one round trip (one trip segment to a site and one trip segment away from a site).

According to one source, Bluffstone and Ouderkirk²⁸, a 500,000 square feet facility on 50 acres, will on average have 350 truck trips per day (or 700 trip segments) associated with its development. This figure is proportionate to estimates for an AMB Property Corporation center in Redlands (1,000 truck trips for a 1.3 million square feet structure); Wal-Mart distribution centers in Pueblo, Colorado (700 truck trips per day for an 880,000 square feet facility), Connecticut, and Delaware (both 1,000 truck trips per day for 1.2 million square feet structures); and a grocery distribution center in New York (Boas, 2002; Gasiewski, 2004; Hernandez, 2005; Pueblo Chieftain, 2004; Sholl, 2004).

Estimates from other sources indicate approximately 1 truck per 1,000 square feet of the building, which means that the proposed project would require 1,000 trucks per day (or 1,000 trip segments per day) for the warehouse segment of the Project. The number of truck trips could be

²⁸Bluffstone and Ouderkirk. 2007. Warehouses, trucks, and [PM.sub.2.5]: human health and logistics industry growth in the eastern Inland Empire. Contemporary Economic Policy 25(1):

higher at a new, more efficient facility where more inventory is moved per day. Without proper modeling of the emissions from these additional vehicles the impacts on the environment and the citizens of Moreno Valley is unknown. It is clear that the size of the Project will have significant NOx and GHG emissions during Project operations.

A proper cumulative impact analysis is vital for an environmental analysis because the full environmental impact of a proposed project cannot be gauged in a vacuum. One of the most important environmental lessons that has been learned is that the environmental damage often occurs incrementally from a variety of small sources with which they interact. The increase in PM in the region, even for short periods of time, will only exacerbate the already serious air quality issues in the region.

5. The DEIR Fails to Disclose Impacts to Offsite Receptors

The Project is located in the South Coast Air Basin and Riverside County,²⁹ both of which are designated non-attainment for PM10 and ozone. (DEIR, p. 4.3-6). According to Mr. Hagemann,

[s]ignificant emissions of PM10 and ozone and contributing factors such as NOx and ROG will lead to a worsening of regional air quality. The Project's estimates of construction emissions need to be properly disclosed and mitigated to ensure that the Project has a less than significant impact on regional air quality.

Estimates and impacts of project's construction and operational emissions
Project construction and operation will result in significant emissions of ROG, NOx, and PM10 even after mitigation (DEIR, pp. 4.3-29, 4.3-34).

Construction emissions

The DEIR estimates that the Project's construction emissions of NOx and ROG will be significant as they exceed the SCAQMD thresholds of 100 lbs/day and 75 lbs/day, respectively (DEIR, p. 4.3-23) and identifies mitigation measures to reduce the Project's emissions (DEIR, pp. 4.3-23 – 4.3-29). Even with mitigation, the Project's emissions of NOx and ROG will still exceed SCAQMD thresholds and therefore are considered significant (DEIR, p. 4.3-29).

Operational emissions

The DEIR estimates that the Project's emissions of ROG, NOx, and PM10 from operational activities will be significant as they exceed the SCAQMD

²⁹ <http://www.epa.gov/oaqps001/greenbk/ancl.html>

thresholds of 55 lbs/day, 55 lbs/day, and 150 lbs/day, respectively (DEIR, p. 4.3-33). The DEIR proposes mitigation measures to reduce the Project's emissions (DEIR, pp. 4.3-33 – 4.3-34) but, even with mitigation, the Project's emissions will still exceed SCAQMD thresholds and therefore are considered significant (DEIR, p. 4.3-34).

Gaseous particles such as NOx can react in the atmosphere to form PM10.^{30,31} Because Riverside County and the South Coast Air Basin are both designated non-attainment for PM10, significant emissions of NOx can lead to a further degradation of regional air quality. NOx emissions can also react to produce ground-level ozone.³² Exposure to NOx emissions and its products (ozone and PM10) can lead to the airway inflammation and can cause or exacerbate conditions such as emphysema and bronchitis.³³

ROG can react to form ozone and contributes to smog formation.^{34,35} Exposure to ozone can result in coughing, throat irritation, and chest pain, burning, and discomfort.³⁶ Smog exposure can lead to sneezing, nausea, coughing, headaches, and chest constriction.³⁷ A study published in the New England Journal of Medicine concluded that the risk of dying from respiratory diseases is three times higher in areas of concentrated ozone.³⁸

Exposure to PM10 can cause bronchitis, increase the number and severity of asthma attacks, damage to lung tissue, and even premature death.³⁹ Research identifies that dust from construction is a major contributor to PM10 and that PM10 exposure is associated with asthma.⁴⁰ Inhalation of PM10 can exacerbate asthma especially in children who are susceptible to higher risks from PM10 exposure.⁴¹

⁴¹ <http://www.co.imperial.ca.us/airpollution/attainment%20plans/final%20ic%202009%20pm10%20sip%20document.pdf>

The Project will have significant emissions of ROG, NO_x, and PM₁₀. Because Riverside County and the South Coast Air Basin are designated non-attainment areas for ozone and PM₁₀, Project construction and operation will further degrade regional air quality. Exposure to ROG, NO_x, and PM₁₀ has adverse health effects and can impact offsite receptors, especially children in the nearby residences – a significant and undisclosed public health impact that the DEIR does not consider.

A revised DEIR should be prepared to disclose impacts to offsite receptors from Project construction and operation. Additional mitigation measures must be implemented to ensure that Project emissions of ROG, NO_x, and PM₁₀ are reduced to the maximum extent feasible.

6. The DEIR Fails to Adequately Analyze Cumulative Impacts

1. Legal Standard

An EIR must discuss significant cumulative impacts. CEQA Guidelines section 15130(a). This requirement flows from CEQA section 21083, which requires a finding that a project may have a significant effect on the environment if “the possible effects of a project are individually limited but cumulatively considerable... ‘Cumulatively considerable’ means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.” “Cumulative impacts” are defined as “two or more individual effects which, when considered together, are considerable or which compound or increase other environmental impacts.” CEQA Guidelines section 15355(a). “[I]ndividual effects may be changes resulting from a single project or a number of separate projects.” (CEQA Guidelines section 15355(a)).

“The cumulative impact from several projects is the change in the environment which results from the incremental impact of the project when added to other closely related past, present, and reasonably foreseeable probable future projects. Cumulative impacts can result from individually minor but collectively significant projects taking place over a period of time.” (*Communities for a Better Environment v. Cal. Resources Agency* (“*CBE v. CRA*”), (2002) 103 Cal.App.4th 98, 117). A legally adequate cumulative impacts analysis views a particular project over time and in conjunction with other related past, present, and reasonably foreseeable probable future projects whose impacts might compound or interrelate with those of the project at hand. “Cumulative impacts can result from individually minor but collectively significant projects taking place over a period of time.” (CEQA Guidelines § 15355(b)).

As the court stated in *CBE v. CRA*, 103 Cal. App. 4th at 114:

Cumulative impact analysis is necessary because the full environmental impact of a proposed project cannot be gauged in a vacuum. One of the most important environmental lessons that has been learned is that environmental damage often occurs incrementally from a variety of small sources. These sources appear insignificant when considered individually, but assume threatening dimensions when considered collectively with other sources with which they interact.

(Citations omitted).

In *Kings County Farm Bureau v. City of Hanford*, 221 Cal.App.3d at 718, the court concluded that an EIR inadequately considered an air pollution (ozone) cumulative impact. The court said: "The EIR concludes the project's contributions to ozone levels in the area would be immeasurable and, therefore, insignificant because the [cogeneration] plant would emit relatively minor amounts of [ozone] precursors compared to the total volume of [ozone] precursors emitted in Kings County. The EIR's analysis uses the magnitude of the current ozone problem in the air basin in order to trivialize the project's impact." The court concluded: "[t]he relevant question to be addressed in the EIR is not the relative amount of precursors emitted by the project when compared with preexisting emissions, but whether any additional amount of precursor emissions should be considered significant in light of the serious nature of the ozone problems in this air basin."⁴² The *Kings County* case was reaffirmed in *CBE v. CRA*, 103 Cal.App.4th at 116, where the court rejected cases with a narrower construction of "cumulative impacts."

Similarly, in *Friends of Eel River v. Sonoma County Water Agency*, (2003) 108 Cal. App. 4th 859, the court held that the EIR for a project that would divert water from the Eel River had to consider the cumulative impacts of the project together with other past, present and reasonably foreseeable future projects that also divert water from the same river system. The court held that the EIR even had to disclose and analyze projects that were merely proposed, but not yet approved. The court stated, CEQA requires "the Agency to consider 'past, present, and probable future projects producing related or cumulative impacts . . .'" (Guidelines, § 15130, subd. (b)(1)(A)). The Agency must interpret this requirement in such a way as to 'afford the fullest possible protection of the environment.'" (*Id.*, at 867, 869). The court held that the failure of the EIR to

⁴² *Los Angeles Unified v. City of Los Angeles*, 58 Cal.App.4th at 1024-1026 found an EIR inadequate for concluding that a project's additional increase in noise level of another 2.8 to 3.3 dBA was insignificant given that the existing noise level of 72 dBA already exceeded the regulatory recommended maximum of 70 dBA. The court concluded that this "ratio theory" trivialized the project's noise impact by focusing on individual inputs rather than their collective significance. The relevant issue was not the relative amount of traffic noise resulting from the project when compared to existing traffic noise, but whether any additional amount of traffic noise should be considered significant given the nature of the existing traffic noise problem.

analyze the impacts of the project together with other proposed projects rendered the document invalid. “The absence of this analysis makes the EIR an inadequate informational document.” (*Id.*, at 872).

The Court in *Citizens to Preserve the Ojai v. Bd. of Supervisors*, 176 Cal.App.3d 421 (1985), held that an EIR prepared to consider the expansion and modification of an oil refinery was inadequate because it failed to consider the cumulative air quality impacts of other oil refining and extraction activities combined with the project. The court held that the EIR’s use of an Air District Air Emissions Inventory did not constitute an adequate cumulative impacts analysis. The court ordered the agency to prepare a new EIR analyzing the combined impacts of the proposed refinery expansion together with the other oil extraction projects.

2. The DEIR Fails to Adequately Analyze Cumulative Construction Impacts

As part of its cumulative impact analysis, the DEIR identifies 13 proposed projects encompassing approximately 7.3 million square feet of space within five miles of the Project site (DEIR, p. 3-16). However, the DEIR does not identify the construction schedule of these projects except to state that “a number of individual projects may be under construction simultaneously with the proposed project.” (DEIR, p. 4.3-37). The WestRidge Commerce Center Project (which will be built adjacent to the proposed Project) is scheduled to be constructed in 2012, a schedule similar to the proposed Project. According to Mr. Hagemann,

[s]imultaneous construction of these projects, along with other potential projects, is likely to result in PM10, NOx, and ROG emissions that will have a cumulatively significant impact. The construction timetables of all projects within the vicinity of the Project site should be identified. Any cumulatively significant emissions should be disclosed and impacts to workers and nearby residents should be addressed in a revised DEIR.

VI. CONCLUSION

For the foregoing reasons, LIUNA Local Union No. 1184 urge the City to continue the matter for future consideration pending completion of a supplemental EIR addressing the Project's significant impacts and mitigation measures. Thank you for your attention to these comments. Please include this letter and all attachments hereto in the record of proceedings for this project.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Drury', with a large, stylized flourish extending to the right.

Addressing Climate Change at the Project Level California Attorney General's Office

Addressing Climate Change at the Project Level California Attorney General's Office

Under the California Environmental Quality Act (CEQA), local agencies have a very important role to play in California's fight against global warming – one of the most serious environmental effects facing the State today. Local agencies can lead by example in undertaking their own projects, insuring that sustainability is considered at the earliest stages. Moreover, they can help shape private development. Where a project as proposed will have significant global warming related effects, local agencies can require feasible changes or alternatives, and impose enforceable, verifiable, feasible mitigation to substantially lessen those effects. By the sum of their actions and decisions, local agencies will help to move the State away from “business as usual” and toward a low-carbon future.

Included in this document are various measures that may reduce the global warming related impacts at the individual project level. (For more information on actions that local governments can take at the program and general plan level, please visit the Attorney General's webpage, “CEQA, Global Warming, and General Plans” at <http://ag.ca.gov/globalwarming/ceqa/generalplans.php>.)

As appropriate, the measures can be included as design features of a project, required as changes to the project, or imposed as mitigation (whether undertaken directly by the project proponent or funded by mitigation fees). The measures set forth in this package are examples; the list is not intended to be exhaustive. Moreover, the measures cited may not be appropriate for every project. The decision of whether to approve a project – as proposed or with required changes or mitigation – is for the local agency, exercising its informed judgment in compliance with the law and balancing a variety of public objectives.

Mitigation Measures by Category

Energy Efficiency

Incorporate green building practices and design elements.	The California Department of Housing and Community Development's Green Building & Sustainability Resources handbook provides extensive links to green building resources. The handbook is available at http://www.hcd.ca.gov/hpd/green_build.pdf . The American Institute of Architects (AIA) has compiled fifty readily available strategies for reducing fossil fuel use in buildings by fifty percent. AIA “50 to 50” plan is presented in both guidebook and wiki format at http://wiki.aia.org/Wiki%20Pages/Home.aspx .
---	--

<p>Meet recognized green building and energy efficiency benchmarks.</p>	<p>For example, an ENERGY STAR-qualified building uses less energy, is less expensive to operate, and causes fewer greenhouse gas emissions than comparable, conventional buildings. http://www.energystar.gov/index.cfm?c=business.bus_index.</p> <p>California has over 1600 ENERGY STAR-qualified school, commercial and industrial buildings. View U.S. EPA's list of Energy Star non-residential buildings at http://www.energystar.gov/index.cfm?fuseaction=labeled_buildings_locator. Los Angeles and San Francisco top the list of U.S. cities with the most ENERGY STAR non-residential buildings. http://www.energystar.gov/ia/business/downloads/2008_Top_25_cities_chart.pdf.</p> <p>Qualified ENERGY STAR homes must surpass the state's Title 24 energy efficiency building code by at least 15%. Los Angeles, Sacramento, San Diego, and San Francisco-Oakland are among the top 20 markets for ENERGY STAR homes nationwide. http://www.energystar.gov/ia/new_homes/mil_homes/top_20_markets.html. Builders of ENERGY STAR homes can be more competitive in a tight market by providing a higher quality, more desirable product. See http://www.energystar.gov/ia/partners/manuf_res/Horton.pdf.</p> <p>There are a variety of private and non-profit green building certification programs in use in the U.S. See U.S. EPA's Green Building / Frequently Asked Questions website, http://www.epa.gov/greenbuilding/pubs/faqs.htm.</p> <p>Public-Private Partnership for Advancing Housing Technology maintains a list of national and state Green Building Certification Programs for housing. See http://www.pathnet.org/sp.asp?id=20978. These include the national Leadership in Energy and Environmental Design (LEED) program, and, at the state level, Build it Green's GreenPoint Rated system and the California Green Builder program.</p> <p>Other organizations may provide other relevant benchmarks.</p>
<p>Install energy efficient lighting (e.g., light emitting diodes (LEDs)), heating and cooling systems, appliances, equipment, and control systems.</p>	<p>Information about ENERGY STAR-certified products in over 60 categories is available at http://www.energystar.gov/index.cfm?fuseaction=find_a_product.</p> <p>The California Energy Commission maintains a database of all appliances meeting either federal efficiency standards or, where there are no federal efficiency standards, California's appliance efficiency standards. See http://www.appliances.energy.ca.gov/.</p> <p>The Electronic Product Environmental Assessment Tool (EPEAT) ranks computer products based on a set of environmental criteria, including energy efficiency. See http://www.epeat.net/AboutEPEAT.aspx.</p> <p>The nonprofit American Council for an Energy Efficient Economy maintains an Online Guide to Energy Efficient Commercial Equipment, available at http://www.aceee.org/ogeece/ch1_index.htm.</p> <p>Utilities offer many incentives for efficient appliances, lighting, heating and cooling. To search for available residential and commercial incentives, visit Flex Your Power's website at http://www.fypower.org/.</p>

<p>Use passive solar design, e.g., orient buildings and incorporate landscaping to maximize passive solar heating during cool seasons, minimize solar heat gain during hot seasons, and enhance natural ventilation. Design buildings to take advantage of sunlight.</p>	<p>See U.S. Department of Energy, Passive Solar Design (website) http://www.energysavers.gov/your_home/designing_remodeling/index.cfm/mytopic=10250.</p> <p>See also California Energy Commission, Consumer Energy Center, Passive Solar Design (website) http://www.consumerenergycenter.org/home/construction/solardesign/index.html.</p> <p>Lawrence Berkeley National Laboratories' Building Technologies Department is working to develop innovative building construction and design techniques. Information and publications on energy efficient buildings, including lighting, windows, and daylighting strategies, are available at the Department's website at http://btech.lbl.gov.</p>
<p>Install light colored "cool" roofs and cool pavements.</p>	<p>A white or light colored roof can reduce surface temperatures by up to 100 degrees Fahrenheit, which also reduces the heat transferred into the building below. This can reduce the building's cooling costs, save energy and reduce associated greenhouse gas emissions, and extend the life of the roof. Cool roofs can also reduce the temperature of surrounding areas, which can improve local air quality. See California Energy Commission, Consumer Energy Center, Cool Roofs (webpage) at http://www.consumerenergycenter.org/coolroof/.</p> <p>See also Lawrence Berkeley National Laboratories, Heat Island Group (webpage) at http://eetd.lbl.gov/HeatIsland/.</p>
<p>Install efficient lighting, (including LEDs) for traffic, street and other outdoor lighting.</p>	<p>LED lighting is substantially more energy efficient than conventional lighting and can save money. See http://www.energy.ca.gov/efficiency/partnership/case_studies/TechAsstCity.pdf (noting that installing LED traffic signals saved the City of Westlake about \$34,000 per year).</p> <p>As of 2005, only about a quarter of California's cities and counties were using 100% LEDs in traffic signals. See California Energy Commission (CEC), Light Emitting Diode Traffic Signal Survey (2005) at p. 15, available at http://www.energy.ca.gov/2005publications/CEC_400_2005_003/CEC_400_2005_003.PDF.</p> <p>The California Energy Commission's Energy Partnership Program can help local governments take advantage of energy saving technology, including, but not limited to, LED traffic signals. See http://www.energy.ca.gov/efficiency/partnership/.</p>
<p>Reduce unnecessary outdoor lighting.</p>	<p>See California Energy Commission, Reduction of Outdoor Lighting (webpage) at http://www.energy.ca.gov/efficiency/lighting/outdoor_reduction.html.</p>

<p>Use automatic covers, efficient pumps and motors, and solar heating for pools and spas.</p>	<p>During the summer, a traditional backyard California pool can use enough energy to power an entire home for three months. Efficiency measures can substantially reduce this waste of energy and money. See California Energy Commission, Consumer Energy Center, Pools and Spas (webpage) at http://www.consumerenergycenter.org/home/outside/pools_spas.html.</p> <p>See also Sacramento Municipal Utilities District, Pool and Spa Efficiency Program (webpage) at http://www.smud.org/en/residential/saving-energy/Pages/poolspa.aspx.</p>
<p>Provide education on energy efficiency to residents, customers and/or tenants.</p>	<p>Many cities and counties provide energy efficiency education. See, for example, the City of Stockton's Energy Efficiency website at http://www.stocktongov.com/energysaving/index.cfm. See also "Green County San Bernardino," http://www.greencountysb.com at pp. 4-6.</p> <p>Businesses and development projects may also provide education. For example, a homeowners' association (HOA) could provide information to residents on energy-efficient mortgages and energy saving measures. See The Villas of Calvera Hills, Easy Energy Saving Tips to Help Save Electricity at http://www.thevillashoa.org/green/energy/. An HOA might also consider providing energy audits to its residents on a regular basis.</p>

Renewable Energy and Energy Storage

<p>Meet "reach" goals for building energy efficiency and renewable energy use.</p>	<p>A "zero net energy" building combines building energy efficiency and renewable energy generation so that, on an annual basis, any purchases of electricity or natural gas are offset by clean, renewable energy generation, either on-site or nearby. Both the California Energy Commission (CEC) and the California Public Utilities Commission (CPUC) have stated that residential buildings should be zero net energy by 2020, and commercial buildings by 2030. See CEC, 2009 Integrated Energy Policy Report (Dec. 2009) at p. 226, available at http://www.energy.ca.gov/2009publications/CEC-100-2009-003/CEC-100-2009-003-CMF.PDF; CPUC, Long Term Energy Efficiency Strategic Plan (Sept. 2008), available at http://www.cpuc.ca.gov/PUC/blueprint/Energy+Efficiency/eesp/.</p>
<p>Install solar, wind, and geothermal power systems and solar hot water heaters.</p>	<p>The California Public Utilities Commission (CPUC) approved the California Solar Initiative on January 12, 2006. The initiative creates a \$3.3 billion, ten-year program to install solar panels on one million roofs in the State. Visit the one-stop GoSolar website at http://www.gosolarcalifornia.org/. As mitigation, a developer could, for example, agree to participate in the New Solar Homes program. See http://www.gosolarcalifornia.org/builders/index.html.</p> <p>The CPUC is in the process of establishing a program to provide solar water heating incentives under the California Solar Initiative. For more information, visit the CPUC's website at http://www.cpuc.ca.gov/puc/energy/solar/swh.htm.</p> <p>To search for available residential and commercial renewable energy incentives, visit Flex Your Power's website at http://www.fypower.org/.</p>

<p>Install solar panels on unused roof and ground space and over carports and parking areas.</p>	<p>In 2008 Southern California Edison (SCE) launched the nation's largest installation of photovoltaic power generation modules. The utility plans to cover 65 million square feet of unused commercial rooftops with 250 megawatts of solar technology – generating enough energy to meet the needs of approximately 162,000 homes. Learn more about SCE's Solar Rooftop Program at http://www.sce.com/solarleadership/solar-rooftop-program/general-faq.htm.</p> <p>In 2009, Walmart announced its commitment to expand the company's solar power program in California. The company plans to add solar panels on 10 to 20 additional Walmart facilities in the near term. These new systems will be in addition to the 18 solar arrays currently installed at Walmart facilities in California. See http://walmartstores.com/FactsNews/NewsRoom/9091.aspx.</p> <p>Alameda County has installed two solar tracking carports, each generating 250 kilowatts. By 2005, the County had installed eight photovoltaic systems totaling over 2.3 megawatts. The County is able to meet 6 percent of its electricity needs through solar power. See http://www.acgov.org/gsa/Alameda%20County%20-%20Solar%20Case%20Study.pdf.</p> <p>In 2007, California State University, Fresno installed a 1.1-megawatt photovoltaic (PV)-paneled parking installation. The University expects to save more than \$13 million in avoided utility costs over the project's 30-year lifespan. http://www.fresnostatenews.com/2007/11/solarwrapup2.htm.</p>
<p>Where solar systems cannot feasibly be incorporated into the project at the outset, build "solar ready" structures.</p>	<p>U.S. Department of Energy, A Homebuilder's Guide to Going Solar (brochure) (2008), available at http://www.eere.energy.gov/solar/pdfs/43076.pdf.</p>
<p>Incorporate wind and solar energy systems into agricultural projects where appropriate.</p>	<p>Wind energy can be a valuable crop for farmers and ranchers. Wind turbines can generate energy to be used on-site, reducing electricity bills, or they can yield lease revenues (as much as \$4000 per turbine per year). Wind turbines generally are compatible with rural land uses, since crops can be grown and livestock can be grazed up to the base of the turbine. See National Renewable Energy Laboratory, Wind Powering America Fact Sheet Series, Wind Energy Benefits, available at http://www.nrel.gov/docs/fy05osti/37602.pdf.</p> <p>Solar PV is not just for urban rooftops. For example, the Scott Brothers' dairy in San Jacinto, California, has installed a 55-kilowatt solar array on its commodity barn, with plans to do more in the coming years. See http://www.dairyherd.com/directories.asp?pgID=724&ed_id=8409 (additional California examples are included in article.)</p>

<p>Include energy storage where appropriate to optimize renewable energy generation systems and avoid peak energy use.</p>	<p>See National Renewable Energy Laboratory, Energy Storage Basics (webpage) at http://www.nrel.gov/learning/eds_energy_storage.html.</p> <p>California Energy Storage Alliance (webpage) at http://storagealliance.org/about.html.</p> <p>Storage is not just for large, utility scale projects, but can be part of smaller industrial, commercial and residential projects. For example, Ice Storage Air Conditioning (ISAC) systems, designed for residential and nonresidential buildings, produce ice at night and use it during peak periods for cooling. See California Energy Commission, Staff Report, Ice Storage Air Conditioners, Compliance Options Application (May 2006), available at http://www.energy.ca.gov/2006publications/CEC-400-2006-006/CEC-400-2006-006-SF.PDF.</p>
<p>Use on-site generated biogas, including methane, in appropriate applications.</p>	<p>At the Hilarides Dairy in Lindsay, California, an anaerobic-lagoon digester processes the run-off of nearly 10,000 cows, generating 226,000 cubic feet of biogas per day and enough fuel to run two heavy duty trucks. This has reduced the dairy's diesel consumption by 650 gallons a day, saving the dairy money and improving local air quality. See http://www.arb.ca.gov/newsrel/nr021109b.htm; see also Public Interest Energy Research Program, Dairy Power Production Program, Dairy Methane Digester System, 90-Day Evaluation Report, Eden Vale Dairy (Dec. 2006) at http://www.energy.ca.gov/2006publications/CEC_500_2006_083/CEC_500_2006_083.PDF.</p> <p>Landfill gas is a current and potential source of substantial energy in California. See Tom Frankiewicz, Program Manager, U.S. EPA Landfill Methane Outreach Program, Landfill Gas Energy Potential in California, available at http://www.energy.ca.gov/2009_energy/policy/documents/2009-04-21_workshop/presentations/05-SCS_Engineers_Presentation.pdf.</p> <p>There are many current and emerging technologies for converting landfill methane that would otherwise be released as a greenhouse gas into clean energy. See California Integrated Waste Management Board, Emerging Technologies, Landfill Gas-to-Energy (webpage) at http://www.ciwmb.ca.gov/LEACentral/TechServices/EmergingTech/default.htm.</p>

<p>Use combined heat and power (CHP) in appropriate applications.</p>	<p>Many commercial, industrial, and campus-type facilities (such as hospitals, universities and prisons) use fuel to produce steam and heat for their own operations and processes. Unless captured, much of this heat is wasted. CHP captures waste heat and re-uses it, e.g., for residential or commercial space heating or to generate electricity. See U.S. EPA, Catalog of CHP Technologies at http://www.epa.gov/chp/documents/catalog_of_%20chp_tech_entire.pdf and California Energy Commission, Distributed Energy Resource Guide, Combined Heat and Power (webpage) at http://www.energy.ca.gov/distgen/equipment/chp/chp.html.</p> <p>The average efficiency of fossil-fueled power plants in the United States is 33 percent. By using waste heat recovery technology, CHP systems typically achieve total system efficiencies of 60 to 80 percent. CHP can also substantially reduce emissions of carbon dioxide. http://www.epa.gov/chp/basic/efficiency.html.</p> <p>Currently, CHP in California has a capacity of over 9 million kilowatts. See list of California CHP facilities at http://www.eea-inc.com/chpdata/States/CA.html.</p> <p>The Waste Heat and Carbon Emissions Reduction Act (Assembly Bill 1613 (2007), amended by Assembly Bill 2791 (2008)) is designed to encourage the development of new CHP systems in California with a generating capacity of not more than 20 megawatts. Among other things, the Act requires the California Public Utilities Commission to establish (1) a standard tariff allowing CHP generators to sell electricity for delivery to the grid and (2) a "pay as you save" pilot program requiring electricity corporations to finance the installation of qualifying CHP systems by nonprofit and government entities. For more information, see http://www.energy.ca.gov/wasteheat/.</p>
---	--

Water Conservation and Efficiency

<p>Incorporate water-reducing features into building and landscape design.</p>	<p>According to the California Energy Commission, water-related energy use – which includes conveyance, storage, treatment, distribution, wastewater collection, treatment, and discharge – consumes about 19 percent of the State's electricity, 30 percent of its natural gas, and 88 billion gallons of diesel fuel every year. See http://www.energy.ca.gov/2007publications/CEC_999_2007_008/CEC_999_2007_008.PDF. Reducing water use and improving water efficiency can help reduce energy use and greenhouse gas emissions.</p>
<p>Create water-efficient landscapes.</p>	<p>The California Department of Water Resources' updated Model Water Efficient Landscape Ordinance (Sept. 2009) is available at http://www.water.ca.gov/wateruseefficiency/landscapeordinance/technical.cfm.</p> <p>A landscape can be designed from the beginning to use little or no water, and to generate little or no waste. See California Integrated Waste Management Board, Xeriscaping (webpage) at http://www.ciwmb.ca.gov/organics/Xeriscaping/.</p>

<p>Install water-efficient irrigation systems and devices, such as soil moisture-based irrigation controls and use water-efficient irrigation methods.</p>	<p>U.S. Department of Energy, Best Management Practice: Water-Efficient Irrigation (webpage) at http://www1.eere.energy.gov/femp/program/waterefficiency_bmp5.html.</p> <p>California Department of Water Resources, Landscape Water Use Efficiency (webpage) at http://www.water.ca.gov/wateruseefficiency/landscape/.</p> <p>Pacific Institute, More with Less: Agricultural Water Conservation and Efficiency in California (2008), available at http://www.pacinst.org/reports/more_with_less_delta/index.htm.</p>
<p>Make effective use of graywater. (Graywater is untreated household waste water from bathtubs, showers, bathroom wash basins, and water from clothes washing machines. Graywater to be used for landscape irrigation.)</p>	<p>California Building Standards Commission, 2008 California Green Building Standards Code, Section 604, pp. 31-32, available at http://www.documents.dgs.ca.gov/bsc/2009/part11_2008_calgreen_code.pdf.</p> <p>California Department of Water Resources, Dual Plumbing Code (webpage) at http://www.water.ca.gov/recycling/DualPlumbingCode/.</p> <p>See also Ahwahnee Water Principles, Principle 6, at http://www.lgc.org/ahwahnee/h2o_principles.html. The Ahwahnee Water Principles have been adopted by City of Willits, Town of Windsor, Menlo Park, Morgan Hill, Palo Alto, Petaluma, Port Hueneme, Richmond, Rohnert Park, Rolling Hills Estates, San Luis Obispo, Santa Paula, Santa Rosa, City of Sunnyvale, City of Ukiah, Ventura, Marin County, Marin Municipal Water District, and Ventura County.</p>
<p>Implement low-impact development practices that maintain the existing hydrology of the site to manage storm water and protect the environment.</p>	<p>Retaining storm water runoff on-site can drastically reduce the need for energy-intensive imported water at the site. See U.S. EPA, Low Impact Development (webpage) at http://www.epa.gov/nps/lid/.</p> <p>Office of Environmental Health Hazard Assessment and the California Water and Land Use Partnership, Low Impact Development at http://www.coastal.ca.gov/nps/lid-factsheet.pdf.</p>
<p>Devise a comprehensive water conservation strategy appropriate for the project and location.</p>	<p>The strategy may include many of the specific items listed above, plus other innovative measures that are appropriate to the specific project.</p>
<p>Design buildings to be water-efficient. Install water-efficient fixtures and appliances.</p>	<p>Department of General Services, Best Practices Manual, Water-Efficient Fixtures and Appliances (website) at http://www.green.ca.gov/EPP/building/SaveH2O.htm.</p> <p>Many ENERGY STAR products have achieved their certification because of water efficiency. See California Energy Commission's database, available at http://www.appliances.energy.ca.gov/.</p>

<p>Offset water demand from new projects so that there is no net increase in water use.</p>	<p>For example, the City of Lompoc has a policy requiring new development to offset new water demand with savings from existing water users. See http://www.cityoflompoc.com/utilities/pdf/2005_uwmp_final.pdf at p. 29.</p>
<p>Provide education about water conservation and available programs and incentives.</p>	<p>See, for example, the City of Santa Cruz, Water Conservation Office at http://www.ci.santa-cruz.ca.us/index.aspx?page=395; Santa Clara Valley Water District, Water Conservation at http://www.valleywater.org/conservation/index.shtm; and Metropolitan Water District and the Family of Southern California Water Agencies, Be Water Wise at http://www.bewaterwise.com. Private projects may provide or fund similar education.</p>

Solid Waste Measures

<p>Reuse and recycle construction and demolition waste (including, but not limited to, soil, vegetation, concrete, lumber, metal, and cardboard).</p>	<p>Construction and demolition materials account for almost 22 percent of the waste stream in California. Reusing and recycling these materials not only conserves natural resources and energy, but can also save money. For a list of best practices and other resources, see California Integrated Waste Management Board, Construction and Demolition Debris Recycling (webpage) at http://www.ciwmb.ca.gov/condemo/.</p>
<p>Integrate reuse and recycling into residential industrial, institutional and commercial projects.</p>	<p>Tips on developing a successful recycling program, and opportunities for cost-effective recycling, are available on the California Integrated Waste Management Board's Zero Waste California website. See http://zerowaste.ca.gov/.</p> <p>The Institute for Local Government's Waste Reduction & Recycling webpage contains examples of "best practices" for reducing greenhouse gas emissions, organized around waste reduction and recycling goals and additional examples and resources. See http://www.ca-ilg.org/wastereduction.</p>
<p>Provide easy and convenient recycling opportunities for residents, the public, and tenant businesses.</p>	<p>Tips on developing a successful recycling program, and opportunities for cost effective recycling, are available on the California Integrated Waste Management Board's Zero Waste California website. See http://zerowaste.ca.gov/.</p>
<p>Provide education and publicity about reducing waste and available recycling services.</p>	<p>Many cities and counties provide information on waste reduction and recycling. See, for example, the Butte County Guide to Recycling at http://www.recyclebutte.net.</p> <p>The California Integrated Waste Management Board's website contains numerous publications on recycling and waste reduction that may be helpful in devising an education project. See http://www.ciwmb.ca.gov/Publications/default.asp?cat=13. Private projects may also provide waste and recycling education directly, or fund education.</p>

Land Use Measures

<p>Ensure consistency with “smart growth” principles – mixed-use, infill, and higher density projects that provide alternatives to individual vehicle travel and promote the efficient delivery of services and goods.</p>	<p>U.S. EPA maintains an extensive Smart Growth webpage with links to examples, literature and technical assistance, and financial resources. See http://www.epa.gov/smartgrowth/index.htm.</p> <p>The National Oceanic and Atmospheric Administration’s webpage provides smart growth recommendations for communities located near water. See Coastal & Waterfront Smart Growth (webpage) at http://coastalsmartgrowth.noaa.gov/. The webpage includes case studies from California.</p> <p>The California Energy Commission has recognized the important role that land use can play in meeting our greenhouse gas and energy efficiency goals. The agency’s website, Smart Growth & Land Use Planning, contains useful information and links to relevant studies, reports, and other resources. See http://www.energy.ca.gov/landuse/.</p> <p>The Metropolitan Transportation Commission’s webpage, Smart Growth / Transportation for Livable Communities, includes resources that may be useful to communities in the San Francisco Bay Area and beyond. See http://www.mtc.ca.gov/planning/smart_growth/.</p> <p>The Sacramento Area Council of Governments (SACOG) has published examples of smart growth in action in its region. See Examples from the Sacramento Region of the Seven Principles of Smart Growth / Better Ways to Grow, available at http://www.sacog.org/regionalfunding/betterways.pdf.</p>
<p>Meet recognized “smart growth” benchmarks.</p>	<p>For example, the LEED for Neighborhood Development (LEED-ND) rating system integrates the principles of smart growth, urbanism and green building into the first national system for neighborhood design. LEED-ND is a collaboration among the U.S. Green Building Council, Congress for the New Urbanism, and the Natural Resources Defense Council. For more information, see http://www.usgbc.org/DisplayPage.aspx?CMSPageID=148.</p>
<p>Educate the public about the many benefits of well-designed, higher density development.</p>	<p>See, for example, U.S. EPA, Growing Smarter, Living Healthier: A Guide to Smart Growth and Active Aging (webpage), discussing how compact, walkable communities can provide benefits to seniors. See http://www.epa.gov/aging/bhc/guide/index.html.</p> <p>U.S. EPA, Environmental Benefits of Smart Growth (webpage) at http://www.epa.gov/dced/topics/eb.htm (noting local air and water quality improvements).</p> <p>Centers for Disease Control and Prevention (CDC), Designing and Building Healthy Places (webpage), at http://www.cdc.gov/healthyplaces/. The CDC’s website discusses the links between walkable communities and public health and includes numerous links to educational materials.</p> <p>California Department of Housing and Community Development, Myths and Facts About Affordable and High Density Housing (2002), available at http://www.hcd.ca.gov/hpd/mythsnfacts.pdf.</p>

<p>Incorporate public transit into the project's design.</p>	<p>Federal Transit Administration, Transit-Oriented Development (TOD) (webpage) at http://www.fta.dot.gov/planning/planning_environment_6932.html (describing the benefits of TOD as “social, environmental, and fiscal.”)</p> <p>California Department of Transportation (Caltrans), Statewide Transit-Oriented Development Study: Factors for Success in California (2002), available at http://transitorienteddevelopment.dot.ca.gov/miscellaneous/StatewideTOD.htm</p> <p>Caltrans, California Transit-Oriented Development Searchable Database (includes detailed information on numerous TODs), available at http://transitorienteddevelopment.dot.ca.gov/miscellaneous/NewHome.jsp.</p> <p>California Department of Housing and Community Development, Transit Oriented Development (TOD) Resources (Aug. 2009), available at http://www.hcd.ca.gov/hpd/tod.pdf.</p>
<p>Preserve and create open space and parks. Preserve existing trees, and plant replacement trees at a set ratio.</p>	<p>U.S. EPA, Smart Growth and Open Space Conservation (webpage) at http://www.epa.gov/dced/openspace.htm.</p>
<p>Develop “brownfields” and other underused or defunct properties near existing public transportation and jobs.</p>	<p>U.S. EPA, Smart Growth and Brownfields (webpage) at http://www.epa.gov/dced/brownfields.htm.</p> <p>For example, as set forth in the Local Government Commission’s case study, the Town of Hercules, California reclaimed a 426-acre brownfield site, transforming it into a transit-friendly, walkable neighborhood. See http://www.lgc.org/freepub/docs/community_design/fact_sheets/er_case_studies.pdf.</p> <p>For financial resources that can assist in brownfield development, see Center for Creative Land Recycling, Financial Resources for California Brownfields (July 2008), available at http://www.cclr.org/media/publications/8-Financial_Resources_2008.pdf.</p>
<p>Include pedestrian and bicycle facilities within projects and ensure that existing non-motorized routes are maintained and enhanced.</p>	<p>See U.S. Department of Transportation, Federal Highway Administration, Bicycle and Pedestrian Program (webpage) at http://www.fhwa.dot.gov/environment/bikeped/.</p> <p>Caltrans, Pedestrian and Bicycle Facilities in California / A Technical Reference and Technology Transfer Synthesis for Caltrans Planners and Engineers (July 2005), available at http://www.dot.ca.gov/hq/traffops/survey/pedestrian/TR_MAY0405.pdf. This reference includes standard and innovative practices for pedestrian facilities and traffic calming.</p>

Transportation and Motor Vehicles

<p>Meet an identified transportation-related benchmark.</p>	<p>A logical benchmark might be related to vehicles miles traveled (VMT), e.g., average VMT per capita, per household, or per employee. As the California Energy Commission has noted, VMT by California residents increased “a rate of more than 3 percent a year between 1975 and 2004, markedly faster than the population growth rate over the same period, which was less than 2 percent. This increase in VMT correlates to an increase in petroleum use and GHG production and has led to the transportation sector being responsible for 41 percent of the state’s GHG emissions in 2004.” CEC, <i>The Role of Land Use in Meeting California’s Energy and Climate Change Goals</i> (Aug. 2007) at p. 9, available at http://www.energy.ca.gov/2007publications/CEC-600-2007-008/CEC-600-2007-008-SF.PDF.</p> <p>Even with regulations designed to increase vehicle efficiency and lower the carbon content of fuel, “reduced VMT growth will be required to meet GHG reductions goals.” <i>Id.</i> at p. 18.</p>
<p>Adopt a comprehensive parking policy that discourages private vehicle use and encourages the use of alternative transportation.</p>	<p>For example, reduce parking for private vehicles while increasing options for alternative transportation; eliminate minimum parking requirements for new buildings; “unbundle” parking (require that parking is paid for separately and is not included in rent for residential or commercial space); and set appropriate pricing for parking.</p> <p>See U.S. EPA, <i>Parking Spaces / Community Places, Finding the Balance Through Smart Growth Solutions</i> (Jan. 2006), available at http://www.epa.gov/dced/pdf/EPAParkingSpaces06.pdf.</p> <p>Reforming Parking Policies to Support Smart Growth, Metropolitan Transportation Commission (June 2007) at http://www.mtc.ca.gov/planning/smart_growth/parking_seminar/ToolboxHandbook.pdf.</p> <p>See also the City of Ventura’s Downtown Parking and Mobility Plan, available at http://www.cityofventura.net/community_development/resources/mobility_parking_plan.pdf, and Ventura’s Downtown Parking Management Program, available at http://www.ci.ventura.ca.us/depts/comm_dev/downtownplan/chapters.asp.</p>
<p>Build or fund a major transit stop within or near the development.</p>	<p>“Major transit stop’ means a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.” (Pub. Res. Code, § 21064.3.)</p> <p>Transit Oriented Development (TOD) is a moderate to higher density development located within an easy walk of a major transit stop. http://transitorienteddevelopment.dot.ca.gov/miscellaneous/NewWhatisTOD.htm.</p> <p>By building or funding a major transit stop, an otherwise ordinary development can become a TOD.</p>

<p>Provide public transit incentives such as free or low-cost monthly transit passes to employees, or free ride areas to residents and customers.</p>	<p>See U.S. Department of Transportation and U.S. EPA, Commuter Choice Primer / An Employer's Guide to Implementing Effective Commuter Choice Programs, available at http://www.its.dot.gov/JPODOCS/REPTS_PR/13669.html.</p> <p>The Emery Go Round shuttle is a private transportation service funded by commercial property owners in the citywide transportation business improvement district. The shuttle links a local shopping district to a Bay Area Rapid Transit stop. See http://www.emerygoround.com/.</p> <p>Seattle, Washington maintains a public transportation "ride free" zone in its downtown from 6:00 a.m. to 7:00 p.m. daily. See http://transit.metrokc.gov/tops/accessible/paccessible_map.html#fare.</p>
<p>Promote "least polluting" ways to connect people and goods to their destinations.</p>	<p>Promoting "least polluting" methods of moving people and goods is part of a larger, integrated "sustainable streets" strategy now being explored at U.C. Davis's Sustainable Transportation Center. Resources and links are available at the Center's website, http://stc.ucdavis.edu/outreach/ssp.php.</p>
<p>Incorporate bicycle lanes, routes and facilities into street systems, new subdivisions, and large developments.</p>	<p>Bicycling can have a profound impact on transportation choices and air pollution reduction. The City of Davis has the highest rate of bicycling in the nation. Among its 64,000 residents, 17 percent travel to work by bicycle and 41 percent consider the bicycle their primary mode of transportation. See Air Resources Board, Bicycle Awareness Program, Bicycle Fact Sheet, available at http://www.arb.ca.gov/planning/tsaq/bicycle/factsht.htm.</p> <p>For recommendations on best practices, see the many resources listed at the U.S. Department of Transportation, Federal Highway Administration's Bicycle and Pedestrian website at http://www.fhwa.dot.gov/environment/bikeped/publications.htm.</p> <p>See also Caltrans Division of Research and Innovation, Designing Highway Facilities To Encourage Walking, Biking and Transit (Preliminary Investigation) (March 2009), available at http://www.dot.ca.gov/research/researchreports/preliminary_investigations/docs/pi-design_for_walking_%20biking_and_transit%20final.pdf.</p>
<p>Require amenities for non-motorized transportation, such as secure and convenient bicycle parking.</p>	<p>According to local and national surveys of potential bicycle commuters, secure bicycle parking and workplace changing facilities are important complements to safe and convenient routes of travel. See Air Resources Board, Bicycle Awareness Program, Bicycle Fact Sheet, available at http://www.arb.ca.gov/planning/tsaq/bicycle/factsht.htm.</p>

<p>Ensure that the project enhances, and does not disrupt or create barriers to, non-motorized transportation.</p>	<p>See, e.g., U.S. EPA's list of transit-related "smart growth" publications at http://www.epa.gov/dced/publications.htm#air, including Pedestrian and Transit-Friendly Design: A Primer for Smart Growth (1999), available at www.epa.gov/dced/pdf/ptfd_primer.pdf.</p> <p>See also Toolkit for Improving Walkability in Alameda County, available at http://www.acta2002.com/ped_toolkit/ped_toolkit_print.pdf.</p> <p>Pursuant to the California Complete Streets Act of 2008 (AB 1358, Gov. Code, §§ 65040.2 and 65302), commencing January 1, 2011, upon any substantive revision of the circulation element of the general plan, a city or county will be required to modify the circulation element to plan for a balanced, multimodal transportation network that meets the needs of all users.</p>
<p>Connect parks and open space through shared pedestrian/bike paths and trails to encourage walking and bicycling. Create bicycle lanes and walking paths directed to the location of schools, parks and other destination points.</p>	<p>Walk Score ranks the "walkability" of neighborhoods in the largest 40 U.S. cities, including seven California cities. Scores are based on the distance to nearby amenities. Explore Walk Score at http://www.walkscore.com/.</p> <p>In many markets, homes in walkable neighborhoods are worth more than similar properties where walking is more difficult. See Hoak, <i>Walk appeal / Homes in walkable neighborhoods sell for more: study</i>, Wall Street Journal (Aug. 18, 2009), available at http://www.marketwatch.com/story/homes-in-walkable-neighborhoods-sell-for-more-2009-08-18.</p> <p>By creating walkable neighborhoods with more transportation choices, Californians could save \$31 million and cut greenhouse gas emissions by 34 percent, according to a study released by Transform, a coalition of unions and nonprofits. See <i>Windfall for All / How Connected, Convenient Neighborhoods Can Protect Our Climate and Safeguard California's Economy</i> (Nov. 2009), available at http://transformca.org/windfall-for-all#download-report.</p>
<p>Work with the school districts to improve pedestrian and bike access to schools and to restore or expand school bus service using lower-emitting vehicles.</p>	<p>In some communities, twenty to twenty-five percent of morning traffic is due to parents driving their children to school. Increased traffic congestion around schools in turn prompts even more parents to drive their children to school. Programs to create safe routes to schools can break this harmful cycle. See California Department of Public Health, <i>Safe Routes to School</i> (webpage) and associated links at http://www.cdph.ca.gov/HealthInfo/injviosaf/Pages/SafeRoutestoSchool.aspx.</p> <p>See also U.S. EPA, <i>Smart Growth and Schools</i> (webpage), available at http://www.epa.gov/dced/schools.htm.</p> <p>California Center for Physical Activity, <i>California Walk to School</i> (website) at http://www.cawalktoschool.com</p> <p>Regular school bus service (using lower-emitting buses) for children who cannot bike or walk to school could substantially reduce private vehicle congestion and air pollution around schools. See Air Resources Board, <i>Lower Emissions School Bus Program</i> (webpage) at http://www.arb.ca.gov/msprog/schoolbus/schoolbus.htm.</p>

<p>Institute teleconferencing, telecommute and/or flexible work hour programs to reduce unnecessary employee transportation.</p>	<p>There are numerous sites on the web with resources for employers seeking to establish telework or flexible work programs. These include U.S. EPA's Mobility Management Strategies: Commuter Programs website at http://www.epa.gov/otaq/stateresources/rellinks/mms_commprograms.htm; and Telework, the federal government's telework website, at http://www.telework.gov/.</p> <p>Through a continuing FlexWork Implementation Program, the Traffic Solutions division of the Santa Barbara County Association of Governments sponsors flexwork consulting, training and implementation services to a limited number of Santa Barbara County organizations that want to create or expand flexwork programs for the benefit of their organizations, employees and the community. See http://www.flexworks.com/read_more_about_the_fSBp.html. Other local government entities provide similar services.</p>
<p>Provide information on alternative transportation options for consumers, residents, tenants and employees to reduce transportation-related emissions.</p>	<p>Many types of projects may provide opportunities for delivering more tailored transportation information. For example, a homeowner's association could provide information on its website, or an employer might create a Transportation Coordinator position as part of a larger Employee Commute Reduction Program. See, e.g., South Coast Air Quality Management District, Transportation Coordinator training, at http://www.aqmd.gov/trans/training.html.</p>
<p>Educate consumers, residents, tenants and the public about options for reducing motor vehicle-related greenhouse gas emissions. Include information on trip reduction; trip linking; vehicle performance and efficiency (e.g., keeping tires inflated); and low or zero-emission vehicles.</p>	<p>See, for example U.S. EPA, SmartWay Transport Partnership: Innovative Carrier Strategies (webpage) at http://www.epa.gov/smartway/transport/what-smartway/carrier-strategies.htm. This webpage includes recommendations for actions that truck and rail fleets can take to make ground freight more efficient and cleaner.</p> <p>The Air Resources Board's Drive Clean website is a resource for car buyers to find clean and efficient vehicles. The web site is designed to educate Californians that pollution levels range greatly between vehicles. See http://www.driveclean.ca.gov/.</p> <p>The Oregon Department of Transportation and other public and private partners launched the Drive Less/Save More campaign. The comprehensive website contains fact sheets and educational materials to help people drive more efficiently. See http://www.driveless.savemore.com/.</p>
<p>Purchase, or create incentives for purchasing, low or zero-emission vehicles.</p>	<p>See Air Resources Board, Low-Emission Vehicle Program (webpage) at http://www.arb.ca.gov/msprog/levprog/levprog.htm.</p> <p>Air Resource Board, Zero Emission Vehicle Program (webpage) at http://www.arb.ca.gov/msprog/zevprog/zevprog.htm.</p> <p>All new cars sold in California are now required to display an Environmental Performance (EP) Label, which scores a vehicle's global warming and smog emissions from 1 (dirtiest) to 10 (cleanest). To search and compare vehicle EP Labels, visit www.DriveClean.ca.gov.</p>

<p>Create a ride sharing program. Promote existing ride sharing programs e.g., by designating a certain percentage of parking spaces for ride sharing vehicles, designating adequate passenger loading and unloading for ride sharing vehicles, and providing a web site or message board for coordinating rides.</p>	<p>For example, the 511 Regional Rideshare Program is operated by the Metropolitan Transportation Commission (MTC) and is funded by grants from the Federal Highway Administration, U.S. Department of Transportation, the Metropolitan Transportation Commission, the Bay Area Air Quality Management District and county congestion management agencies. For more information, see http://rideshare.511.org/.</p> <p>As another example, San Bernardino Associated Governments works directly with large and small employers, as well as providing support to commuters who wish to share rides or use alternative forms of transportation. See http://www.sanbag.ca.gov/commuter/rideshare.html.</p> <p>Valleyrides.com is a ridesharing resource available to anyone commuting to and from Fresno and Tulare Counties and surrounding communities. See http://www.valleyrides.com/. There are many other similar websites throughout the state.</p>
<p>Create or accommodate car sharing programs, e.g., provide parking spaces for car share vehicles at convenient locations accessible by public transportation.</p>	<p>There are many existing car sharing companies in California. These include City CarShare (San Francisco Bay Area), see http://www.citycarshare.org/; and Zipcar, see http://www.zipcar.com/. Car sharing programs are being successfully used on many California campuses.</p>
<p>Provide a vanpool for employees.</p>	<p>Many local Transportation Management Agencies can assist in forming vanpools. See, for example, Sacramento Transportation Management Association, Check out Vanpooling (webpage) at http://www.sacramento-tma.org/vanpool.html.</p>
<p>Create local "light vehicle" networks, such as neighborhood electric vehicle systems.</p>	<p>See California Energy Commission, Consumer Energy Center, Urban Options - Neighborhood Electric Vehicles (NEVs) (webpage) at http://www.consumerenergycenter.org/transportation/urban_options/nev.html.</p> <p>The City of Lincoln has an innovative NEV program. See http://www.lincolnev.com/index.html.</p>
<p>Enforce and follow limits idling time for commercial vehicles, including delivery and construction vehicles.</p>	<p>Under existing law, diesel-fueled motor vehicles with a gross vehicle weight rating greater than 10,000 pounds are prohibited from idling for more than 5 minutes at any location. The minimum penalty for an idling violation is now \$300 per violation. See http://www.arb.ca.gov/enf/complaints/idling_cv.htm.</p>
<p>Provide the necessary facilities and infrastructure to encourage the use of low or zero-emission vehicles.</p>	<p>For a list of existing alternative fuel stations in California, visit http://www.cleancarmaps.com/.</p> <p>See, e.g., Baker, <i>Charging-station network built along 101</i>, S.F. Chron. (9/23/09), available at http://articles.sfgate.com/2009-09-23/news/17207424_1_recharging-solar-array-tesla-motors.</p>

Agriculture and Forestry (additional strategies noted above)

<p>Require best management practices in agriculture and animal operations to reduce emissions, conserve energy and water, and utilize alternative energy sources, including biogas, wind and solar.</p>	<p>Air Resources Board (ARB), Economic Sectors Portal, Agriculture (webpage) at http://www.arb.ca.gov/cc/ghgsectors/ghgsectors.htm. ARB's webpage includes information on emissions from manure management, nitrogen fertilizer, agricultural offroad equipment, and agricultural engines.</p> <p>"A full 90% of an agricultural business' electricity bill is likely associated with water use. In addition, the 8 million acres in California devoted to crops consume 80% of the total water pumped in the state." See Flex Your Power, Agricultural Sector (webpage) at http://www.fypower.org/agri/.</p> <p>Flex Your Power, Best Practice Guide / Food and Beverage Growers and Processors, available at http://www.fypower.org/bpg/index.html?b=food_and_bev.</p> <p>Antle et al., Pew Center on Global Climate Change, Agriculture's Role in Greenhouse Gas Mitigation (2006), available at http://www.pewclimate.org/docUploads/Agriculture's%20Role%20in%20GHG%20Mitigation.pdf.</p>
<p>Preserve forested areas, agricultural lands, wildlife habitat and corridors, wetlands, watersheds, groundwater recharge areas and other open space that provide carbon sequestration benefits.</p>	<p>"There are three general means by which agricultural and forestry practices can reduce greenhouse gases: (1) avoiding emissions by maintaining existing carbon storage in trees and soils; (2) increasing carbon storage by, e.g., tree planting, conversion from conventional to conservation tillage practices on agricultural lands; (3) substituting bio-based fuels and products for fossil fuels, such as coal and oil, and energy-intensive products that generate greater quantities of CO₂ when used." U.S. EPA, Carbon Sequestration in Agriculture and Forestry, Frequently Asked Questions (webpage) at http://www.epa.gov/sequestration/faq.html.</p> <p>Air Resources Board, Economic Sectors Portal, Forestry (webpage) at http://www.arb.ca.gov/cc/ghgsectors/ghgsectors.htm.</p>
<p>Protect existing trees and encourage the planting of new trees. Adopt a tree protection and replacement ordinance.</p>	<p>Tree preservation and planting is not just for rural areas of the state; suburban and urban forests can also serve as carbon sinks. See Cal Fire, Urban and Community Forestry (webpage) at http://www.fire.ca.gov/resource_mgt/resource_mgt_urbanforestry.php.</p>

Off-Site Mitigation

If, after analyzing and requiring all reasonable and feasible on-site mitigation measures for avoiding or reducing greenhouse gas-related impacts, the lead agency determines that additional mitigation is required, the agency may consider additional off-site mitigation. The project proponent could, for example, fund off-site mitigation projects that will reduce carbon emissions, conduct an audit of its other existing operations and agree to retrofit, or purchase verifiable carbon "credits" from another entity that will undertake mitigation.

The topic of off-site mitigation can be complicated. A full discussion is outside the scope of this summary document. Issues that the lead agency should consider include:

- The location of the off-site mitigation. (If the off-site mitigation is far from the project, any additional, non-climate related co-benefits of the mitigation may be lost to the local community.)
- Whether the emissions reductions from off-site mitigation can be quantified and verified. (The California Registry has developed a number of protocols for calculating, reporting and verifying greenhouse gas emissions. Currently, industry-specific protocols are available for the cement sector, power/utility sector, forest sector and local government operations. For more information, visit the California Registry's website at <http://www.climateregistry.org/>.)
- Whether the mitigation ratio should be greater than 1:1 to reflect any uncertainty about the effectiveness of the off-site mitigation.

Offsite mitigation measures that could be funded through mitigation fees include, but are not limited to, the following:

- Energy efficiency audits of existing buildings.
- Energy efficiency upgrades to existing buildings not otherwise required by law, including heating, ventilation, air conditioning, lighting, water heating equipment, insulation and weatherization (perhaps targeted to specific communities, such as low-income or senior residents).
- Programs to encourage the purchase and use of energy efficient vehicles, appliances, equipment and lighting.
- Programs that create incentives to replace or retire polluting vehicles and engines.
- Programs to expand the use of renewable energy and energy storage.
- Preservation and/or enhancement of existing natural areas (e.g., forested areas, agricultural lands, wildlife habitat and corridors, wetlands, watersheds, and groundwater recharge areas) that provide carbon sequestration benefits.
- Improvement and expansion of public transit and low- and zero-carbon transportation alternatives.

Subject: Comments on the Prologis Eucalyptus Industrial Park Project, Riverside County, California

Dear Ms. O'Hanley:

We have reviewed the July 2012 Draft Environmental Impact Report (DEIR) for Prologis Eucalyptus Industrial Park Project ("Project"). The Project would construct six buildings encompassing approximately 2.3 million square feet (or 53 acres) of warehouse space. The Project site would be located on a 123-acre lot in the eastern portion of the City of Moreno Valley in Riverside County, California.

We have reviewed the DEIR for issues associated with hazards and hazardous materials, greenhouse gases, air quality, and cumulative impacts. Project construction will result in potentially significant impacts to construction workers and nearby residents that are not adequately disclosed in the DEIR. A revised DEIR needs to be prepared to fully disclose, evaluate, and mitigate these impacts.

Hazards and Hazardous Materials:

Construction workers and nearby residents may be at risk during construction from failure to disclose baseline soil conditions at the Project site.

Residual pesticides in soil may pose health risks to workers and nearby residents

Currently, 57 acres of the Project site are used to grow grapefruit and 36 acres of the Project site are used for hay and alfalfa production (DEIR, p. 4.2-1). The DEIR and supporting documents do not provide any specific details on the types of pesticides that have been used on the Project site in association with

these agricultural operations. Our review has shown known and potential pesticide use at the Project site as follows:

- Data available online from the California Department of Pesticide Regulation show that 2,4-D, 2-Ethylhexyl Ester was used on the Project site.^{1,2} Occupational exposure to 2,4-D, 2-Ethylhexyl Ester can occur via inhalation or dermal contact and can result in skin irritation, respiratory failure, hyperventilation, and pulmonary enemas.³
- Organochlorine pesticides DDE and DDT were detected in soil samples collected at the Project site⁴, indicating past use. Use of organochlorine pesticides in the area is common: review of the Department of Toxic Substances Control's (DTSC) Envirostor database shows that the surrounding lands have been surveyed for organochlorine pesticides, DDE and DDT.⁵ These pesticides can persist in soil for hundreds of years despite being banned in the 1970s.⁶ Exposure to DDT can result in headaches, nausea, and convulsions.⁷ The U.S. EPA identifies DDT and DDE as probable human carcinogens.⁸
