CALL TO ORDER

Joint Meeting of the City Council, Community Services District, City as Successor Agency for the Community Redevelopment Agency, Housing Authority and the Board of Library Trustees - actions taken at the Joint Meeting are those of the Agency indicated on each Agenda item.

ROLL CALL

INTRODUCTIONS

SPECIAL ORDER OF BUSINESS

CALRECYCLE PRESENTATION

PUBLIC COMMENTS ON ANY SUBJECT ON THE AGENDA AND NOT ON THE AGENDA UNDER THE JURISDICTION OF THE CITY COUNCIL

Any person wishing to address the Mayor and City Council on any matter, either under the Public Comments section of the Agenda or scheduled items or public hearings, must follow the procedures set forth above and wait to be identified to speak by the Mayor. Members of the public may be limited to three minutes per person or the allowed time set by the Mayor, except for the applicant. The Mayor may establish an overall time limit for comments on a particular Agenda item. Members of the public must direct their questions to the Mayor and not to other members of the City Council, the applicant, the Staff, or the audience.

JOINT CONSENT CALENDARS (SECTIONS A-E)

All items listed under the Consent Calendars, Sections A, B, C, D, and E are considered to be routine and non-controversial, and may be enacted by one motion unless a member of the City Council, Community Services District, City as Successor Agency for the Community Redevelopment Agency, Housing Authority or the Board of Library Trustees requests that an item be removed for separate action. The motion to adopt the Consent Calendars is deemed to be a separate motion by each Agency and shall be so recorded by the City Clerk. Items withdrawn for report or discussion will be heard after public hearing items.

A. CONSENT CALENDAR-CITY COUNCIL

A.1. ORDINANCES - READING BY TITLE ONLY - THE MOTION TO ADOPT AN ORDINANCE LISTED ON THE CONSENT CALENDAR INCLUDES WAIVER OF FULL READING OF THE ORDINANCE.

Recommendation: Waive reading of all Ordinances.

A.2. MINUTES - CITY COUNCIL - CLOSED SESSION - JAN 19, 2021 5:00 PM

Recommendation: Approve as submitted.

A.3. MINUTES - CITY COUNCIL - REGULAR MEETING - JAN 19, 2021 6:00 PM

Recommendation: Approve as submitted.

A.4. COUNCIL DISCRETIONARY EXPENDITURE REPORTS FOR FISCAL YEAR 2020/2021 FROM JULY 1, 2020 THROUGH DECEMBER 31, 2020 (Report of: City Clerk)

Recommendation:

1. Receive and file the Fiscal Year 2020/2021 Council Discretionary Expenditure Report for July 1, 2020 through December 31, 2020.

A.5. RECEIPT OF QUARTERLY INVESTMENT REPORT FOR THE QUARTER ENDED DECEMBER 31, 2020 (Report of: Financial & Management Services)

Recommendation:

1. Receive and file the Quarterly Investment Report for quarter ended December 31, 2020, in compliance with the City's Investment Policy.

A.6. COVID-19 PANDEMIC RESOLUTIONS EXTENDING THE LOCAL STATE OF EMERGENCY AND CERTAIN EMERGENCY MEASURES (Report of: Financial & Management Services)

Recommendations:

1. That the City Council adopt a Resolution Extending the Local State of Emergency and Certain Emergency Measures related to the Local, State and National Declarations of a State of Emergency related to the COVID-19 Pandemic.

2. Authorize the City Manager to amend any agreements as necessary to continue the operation of the State of California's Great Plates Delivered program, locally known as Senior Eats.

A.7. PURSUANT TO LANDOWNER PETITION, ANNEX CERTAIN PARCELS INTO COMMUNITY FACILITIES DISTRICT NO. 2014-01 (MAINTENANCE SERVICES) - AMENDMENT NO. 54 (Report of: Financial & Management Services)

Recommendation:

1. Acting as the legislative body of Community Facilities District No. 2014-01 (Maintenance Services), adopt Resolution No. 2021-__, a Resolution of the City Council of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2014-01 (Maintenance Services) and approving the amended map for said District. (Amendment No. 54). (PEDROHYPJVC, LLC, located on the north side of Kalmia Ave., west of Lasselle St.).

A.8. AUTHORIZATION TO AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO TKE ENGINEERING, INC. FOR CONSTRUCTION MANAGEMENT OF THE CIVIC CENTER ELECTRONIC MARQUEE SIGN, PROJECT NO. 803 0044 AND THE CIVIC CENTER DEMONSTRATION GARDEN PROJECT NO. 807 0049 (Report of: Public Works)

Recommendations:

1. Award an Agreement for Professional Consultant Services to TKE Engineering, Inc. to provide construction management, construction support, and inspection for the Civic Center Electronic Marquee Sign and the Civic Center Demonstration Garden project construction;

2. Authorize the issuance of a Purchase Order to TKE Engineering, Inc. in the amount of $191,048 ($173,680 proposed amount plus a 10% contingency) when the agreement has been signed by all parties. The Projects are fully funded by Park and Community Services (PCS) Capital Project Funds (3015) and Facility Construction Capital Funds (3000);

3. Authorize the City Manager to execute the contract, in substantial conformance with the attached template, with TKE Engineering, Inc., subject to minor modifications and approval by the City Attorney; and

4. Authorize the Parks & Community Services (PCS) Director to execute any subsequent related amendments to the Agreement for Professional Consultant Services with TKE Engineering, Inc., not to exceed the Purchase Order amount, subject to the approval by the City Attorney.

A.9. DECLARATION OF EXEMPT SURPLUS LAND AND APPROVAL OF PURCHASE AGREEMENT WITH EASTERN MUNICIPAL WATER DISTRICT INVOLVING THE EXCHANGE OF SURPLUS LAND BETWEEN THE CITY AND DISTRICT (Report of: Public Works)

Recommendations:

1. Adopt Resolution No. 2021-___ declaring portions of three parcels of land comprising 0.551 acres of land, which are owned in fee by the City of Moreno Valley, as “Exempt Surplus Lands” for purpose of selling portions of said parcels to the Eastern Municipal Water District for remediation and treatment of groundwater in and around the City of Moreno Valley to produce more potable water for consumer use;

2. Approve the sale of the subject Exempt Surplus Lands to the Eastern Municipal Water District for the development of a public well site as part of the District’s Perris North Groundwater Program project; and

3. Authorize the City Manager to execute the Purchase Agreement and Joint Escrow Instructions by and between the City of Moreno Valley and the Eastern Municipal Water District, which includes the exchange of land between the District and the City.

A.10. ADOPT RESOLUTION NO. 2021-XX, A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING AN UPDATED WILDFIRE MITIGATION PLAN FOR MORENO VALLEY UTILITY (Report of: Public Works)

Recommendation:

1. Adopt Resolution No. 2021-XX, a Resolution of the City Council of the City of Moreno Valley, California, approving an updated Wildfire Mitigation Plan for Moreno Valley Utility.

A.11. AUTHORIZATION TO AWARD A CONSTRUCTION CONTRACT TO O'DUFFY BROTHERS, INC. FOR SUNNYMEAD - FLAMING ARROW DRIVE STORM DRAIN (SUNNYMEAD MDP LINE M-11 EXTENSION) – PROJECT NO. 804 0014 (Report of: Public Works)

Recommendations:

1. Award a construction contract to O'Duffy Brothers, Inc. for the Sunnymead - Flaming Arrow Drive Storm Drain (Sunnymead MDP Line M-11 Extension) project and authorize the City Manager to execute a contract with O'Duffy Brothers, Inc. in substantial conformance with the attached contract in the amount of $540,040 for the construction of the project, funded by Community Development Block Grant (CDBG) (Fund 2512), Riverside County Flood Control and Water Conservation District (RCFC&WCD) (Fund 3002), Measure A (Fund 2001), and Reimbursement Agreement with Eastern Municipal Water District (EMWD) (Fund 3002);

2. Authorize the issuance of a Purchase Order for O'Duffy Brothers, Inc. in the amount of $594,044 ($540,040 bid amount plus a 10% contingency) when the contract has been signed by all parties; and

3. Authorize the Public Works Director/City Engineer to execute any subsequent change orders to the contract, but not exceeding the total contingency of $54,004, subject to the approval of the City Attorney.

B. CONSENT CALENDAR-COMMUNITY SERVICES DISTRICT

B.1. ORDINANCES - READING BY TITLE ONLY - THE MOTION TO ADOPT AN ORDINANCE LISTED ON THE CONSENT CALENDAR INCLUDES WAIVER OF FULL READING OF THE ORDINANCE.

Recommendation: Waive reading of all Ordinances.

B.2. MINUTES - CITY COUNCIL - CLOSED SESSION - JAN 19, 2021 5:00 PM (See A.2)

Recommendation: Approve as submitted.

B.3. MINUTES - CITY COUNCIL - REGULAR MEETING - JAN 19, 2021 6:00 PM (See A.3)

Recommendation: Approve as submitted.

B.4. PURSUANT TO LANDOWNER PETITIONS, ANNEX CERTAIN PARCELS INTO COMMUNITY FACILITIES DISTRICT NO. 1 (PARK MAINTENANCE) - AS ANNEXATION NO. 2021-62 AND ANNEXATION NO. 2021-64 (Report of: Financial & Management Services)

Recommendations:

1. Acting as the legislative body of Community Facilities District No. 1 (Park Maintenance) adopt Resolution No. CSD 2021-__, a Resolution of the Board of Directors of the Moreno Valley Community Services District, California, ordering the annexation of territory for Annexation No. 2021-62 to its Community Facilities District No. 1 and approving the amended map for said District. (PEDROHYPJVC, LLC, located on the north side of Kalmia Ave., west of Lasselle St.).

2. Acting as the legislative body of Community Facilities District No. 1 (Park Maintenance) adopt Resolution No. CSD 2021-____, a Resolution of the Board of Directors of the Moreno Valley Community Services District, California, ordering the annexation of territory for Annexation No. 2021-64 to its Community Facilities District No. 1 and approving the amended map for said District. (ROC III CA Belago, located at the south side of John F. Kennedy Dr., east of Moreno Beach Dr.).

B.5. APPROVE AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH KIMLEY-HORN AND ASSOCIATES, INC., FOR DESIGN AND CONSTRUCTION SERVICES FOR MORENO VALLEY BARK PARK PROJECT NO. 807 0054 (FUNDED WITH PARK DIF FUNDS) (Report of: Parks & Community Services)

Recommendations:

1. Award an Agreement for Professional Consultant Services with Kimley-Horn and Associates, Inc., for the Moreno Valley Bark Park project.

2. Authorize the issuance of a purchase order in the amount of $171,560 upon execution of the Agreement for Professional Consultant Services with Kimley-Horn and Associates, Inc. Funds are available in the Parks and Community Services (PCS) Capital Projects Fund (3015);

3. Authorize the City Manager to execute the contract with Kimley-Horn subject to minor modifications; and

4. Authorize the Parks and Community Services Director to execute subsequent Amendments to the Agreement within Council approved annual budgeted amounts, including the authority to authorize the associated purchase orders in accordance with the terms of the Agreement, subject to the approval of the City Attorney.

2. Authorize the City Manager to execute the Agreement as well as any subsequent amendments to the Agreement, including the authority to approve purchase orders in accordance with the terms of the Agreement, provided sufficient funding appropriations have been approved by the City Council.

A.7. PAYMENT REGISTER- NOVEMBER 2020 (Report of: Financial & Management Services)

Recommendation:

1. Receive and file the Payment Register.

A.8. PEN16-0129 (PM 37189) – APPROVE PARCEL MAP 37189 LOCATED AT THE SOUTHEAST CORNER OF JOHN F. KENNEDY DRIVE AND MORENO BEACH DRIVE. DEVELOPER: ROC III CA BELAGO, LLC (Report of: Public Works)

Recommendations:

1. Approve Parcel Map 37189.

2. Authorize the City Clerk to sign the map and transmit said map to the County Recorder's Office for recordation.

A.9. AWARD TO CDW, INC., DELL EMC, AND AMAZON, INC., FOR THE PURCHASE OF VARIOUS ELECTRONIC HARDWARE UTILIZED IN ELECTRONIC PLAN REVIEW (Report of: Community Development)

Recommendation:

1. Award to CDW, Inc., Dell EMC, and Amazon, Inc., for purchases of various electronic hardware with a cost of approximately $117,161.00 (including 5% contingency) as outlined in the attached Exhibit "A", and authorize the Purchasing Manager, or her designee, to approve the purchase order(s) as needed to complete these purchases as outlined using funds from the SB 2 Planning Grant and Equipment Replacement Funds.

A.10. AUTHORIZATION TO AWARD A CONSTRUCTION CONTRACT TO SIGN DESIGNS, INC. FOR THE CIVIC CENTER ELECTRONIC MARQUEE SIGN, PROJECT NO 803 004 (FUNDED BY CITY HALL DIF FUNDS) (AGMT. NO. 2021-06) (Report of: Parks & Community Services)

Council Member Marquez requested that the vendor's addresses for item numbers A.10 and A.11 be confirmed.

Assistant City Manager Eyerman responded that the address for Sign Designs, Inc. is 204 Campus Way Modesto California and for Golden Gate Steel, which was previously erroneously recorded, is 14709 Carmenita Road Norwalk California.

Council Member Cabrera commented on the importance of educating and empowering Moreno Valley businesses.

Recommendations:

1. Award a construction contract to Sign Design, Inc., 204 Campus Way, Modesto, CA 95350, for the Civic Center Electronic Marquee Sign project and authorize the City Manager to execute a contract with Sign Designs, Inc. in the amount of $287,161.00;

2. Authorize the issuance of a Purchase Order to Sign Designs, Inc., in the amount of $330,235.15 ($287,161 bid amount plus a 15% contingency) when the contract has been signed by all parties;

3. Authorize the Parks & Community Services (PCS) Director to execute any subsequent change orders to Sign Designs, Inc. contract, but not exceeding the total contingency of $43,074.15, subject to the approval of the City Attorney; and

4. Authorize a budget adjustment as set forth in the Fiscal Impact section of this report to provide sufficient budget to complete the project. Funding for this project has been transferred from Parkland DIF to City Hall DIF and has changed from Parks Capital Project Funds (3016) to Facility Construction Capital Funds (3000).

A.11. AUTHORIZATION TO AWARD A CONSTRUCTION CONTRACT TO GOLDEN GATE STEEL, INC. FOR THE CIVIC CENTER DEMONSTRATION GARDEN PROJECT NO. 807 0049 (FUNDED BY PARK IMPROVEMENTS DIF AND GRANT FUNDS) (AGMT. NO. 2021-07) (Report of: Parks & Community Services)

Recommendations:

1. Award a construction contract to Golden Gate Steel, Inc., 204 Campus Way, Modesto, CA 95350, for the Civic Center

Demonstration project and authorize the City Manager to execute a contract with Golden Gate Steel, Inc. in the amount of $458,232.00;

2. Authorize the issuance of a Purchase Order to Golden Gate Steel, Inc., in the amount of $526,966.80 ($458,232 bid amount plus a 15% contingency) when the contract has been signed by all parties;

3. Authorize the Parks & Community Services (PCS) Director to execute any subsequent change orders to Golden Gate Steel, Inc. contract, but not exceeding the total contingency of $68,734.80, subject to the approval of the City Attorney; and

4. Authorize a budget adjustment as set forth in the Fiscal Impact section of this report to provide sufficient budget to complete the project funded by PCS Capital Project Funds (3015).

G. GENERAL BUSINESS

G.1. Budget Development Fiscal Years 2021/22 - 2022/23 (Report of: Financial & Management Services)

Assistant City Manager Eyerman provided the report.

Mayor Gutierrez encouraged residents to attend upcoming Study Sessions or Finance Subcommittee meetings to offer input and stressed the importance of infrastructure investment.

Council Member Cabrera commended Assistant City Manager Eyerman and his team for their effort in ensuring the City has a balanced budget. He provided several funding source alternatives to finance roadway improvements.

Council Member Marquez thanked Assistant City Manager Eyerman for his diligence. He explained the restraints the City has on spending and boasted that the City has one of the lowest sales tax rates in Southern California. He urged residents to practice patience as the roads will eventually be repaired.

Mayor Pro Tem Baca commended staff for keeping the City financially solvent. She reminded residents that revenues have decreased due to Covid-19.

Recommendation:

1. Receive and file the Budget Development Fiscal Years 2021/22 - 2022/23 presentation.

G.2. RECOMMENDED UPDATES - PAVEMENT MANAGEMENT PROGRAM FIVE-YEAR LOOK-AHEAD (Report of: Public Works)

Assistant City Manager/Director of Public Works/City Engineer Wolfe provided the report.

Council Member Marquez asked about the frequency of the SB-1 payments.

Assistant City Manager/Director of Public Works/City Engineer Wolfe remarked that the installments are collected monthly.

Council Member Cabrera questioned if the City is anticipating any SB-1 funding for the next fiscal year and if so how much.

Assistant City Manager/Director of Public Works/City Engineer Wolfe replied that the City is on pace to receive approximately $3.6 million dollars.

Recommendation:

1. Concur with the updated Pavement Management Program Five-year Look-ahead Plan.

I. REPORTS

I.1. CITY COUNCIL REPORTS

(Informational Oral Presentation - not for Council action)

March Joint Powers Commission (JPC) - Mayor Pro Tem Baca

Mayor Pro Tem Baca reported the following:

Tonight, I'm providing an update from the March Joint Powers Commission meeting held on January 13th.

The JPA approved the Veterans Industrial Park 215 Specific Plan for a 2 million sq. ft. industrial building south of the March Field Air Museum, west of the runways, and north of Perris.

The Commission also voted to maintain last year's representatives on various JPA Subcommittees. Dr. Carla Thornton continues to represent Moreno Valley on the March Business Center Implementation Committee, the Development Community Ad Hoc Committee for the area east of I-215, and the Compatibility Use Study Committee. I will continue to serve on the Ad Hoc Parks Subcommittee.

Riverside County Habitat Conservation Agency (RCHCA) - None

Riverside County Transportation Commission (RCTC) - None

Riverside Transit Agency (RTA) - None

Western Riverside Council of Governments (WRCOG) - None

Western Riverside County Regional Conservation Authority (RCA) - None

School District/City Joint Task Force - None

I.2. CITY MANAGER'S REPORT

(Informational Oral Presentation - not for Council action)

City Manager Lee reminded residents that masks and hand sanitizer are available at no cost at the City's libraries and at the Employment Resource Center. He urged residents to sign up online at curative.com for Covid-19 testing in the Conference and Recreation Center parking lot. Assistant City Manager/Director of Public Works/City Engineer Wolfe provided an update on Momentum MoVal.

CLOSING COMMENTS AND/OR REPORTS OF THE CITY COUNCIL, COMMUNITY SERVICES DISTRICT, CITY AS SUCCESSOR AGENCY FOR THE COMMUNITY REDEVELOPMENT AGENCY, HOUSING AUTHORITY, PUBLIC FINANCING AUTHORITY, AND THE BOARD OF LIBRARY TRUSTEES.

Council Member Marquez
1. Signed up to sponsor a cleanup of Morrison Park.
2. Asked residents in need to contact him for masks or hand sanitizer.
3. Urged everyone to be safe if they are heading out during the inclement weather.

Council Member Cabrera
1. Expressed his pride of the Parks Department for the Beautify MoVal plan.
2. Adopted a section of Iris Boulevard in District 4.
3. Urged residents to stay safe during the severe winds.
4. Mentioned the Inauguration.
5. Remarked on the Covid-19 vaccine roll out.
6. Announced his run for Mayor in 2022.

Mayor Pro Tem Baca
1. Reminded everyone to continue to follow safety precautions regarding Covid-19 and directed them to the libraries or the Employment Resource Center for free masks and sanitizer.
2. Commended staff on the projects that have been completed thus far.
3. Is eagerly anticipating the District project.

Mayor Gutierrez
1. Thanked the three Mayor's Award of Valor recipients.
2. Praised staff for maintaining a balanced budget as well as the Pavement Management Program.
3. Commended staff for their work on Momentum MoVal.
4. Remarked that he will continue to focus on community cleanups and addressing homelessness throughout his current term and would do so for future terms if he runs for Mayor again.
5. Noted the difficulty in obtaining a Covid-19 vaccination.

6. While at Heritage High School, where he accompanied seniors who were obtaining their Covid-19 vaccine, he was impressed with the compassion shown by the firefighters and emergency medical response staff.
7. Escorted seniors to the San Gorgonio Middle School to receive the Covid-19 vaccine.
8. Praised the County, AMR, firefighters, and nurses for coordinating the vaccine roll out.
9. Explained that he is working with County and State officials to obtain more vaccine doses.
10. Reported that scientists have determined that the Covid-19 vaccine does protect against some variants.
11. Informed residents that the vaccine does not absolve them of continuing to follow the safety precautions.
12. Welcomed the new Administration.

ADJOURNMENT

There being no further business to come before the City Council, Mayor Gutierrez adjourned the meeting at 7:15 p.m.

Report to City Council

TO:	Mayor and City Council
FROM:	Pat Jacquez-Nares, City Clerk
AGENDA DATE:	February 2, 2021
TITLE:	COUNCIL DISCRETIONARY EXPENDITURE REPORTS FOR FISCAL YEAR 2020/2021 FROM JULY 1, 2020 THROUGH DECEMBER 31, 2020

RECOMMENDED ACTION

Recommendation:

1. Receive and file the Fiscal Year 2020/2021 Council Discretionary Expenditure Report for July 1, 2020 through December 31, 2020.

SUMMARY

This staff report is prepared at the request of the City Council to provide transparency with respect to the expenditure of City funds from City Council Discretionary Expenditure Accounts. These reports are for each Council Member's year to date expenditures for Fiscal Year 2020/2021, for July 1, 2020 through December 31, 2020. Each Council District receives an annual budget allocation of $3,000 and the Mayor receives an annual budget allocation of $6,000.

With the adoption of the current fiscal year budget and pursuant to Resolution No. 2019-27, unused monies from Fiscal Year 2019/2020 have been carried over to the current Fiscal Year as approved by the City Manager. The Discretionary Expenditure Reports now reflect the amended budget amount.

The expenditure reports are included routinely in the City Council agenda as an additional means of distributing reports on activities to the Council and public. The reports are to be posted to the City's website following Council approval. The monthly reports provide unaudited information and are reconciled to the City's general ledger. Following the end of the Fiscal Year, the financial information shall be reviewed as part of the City's independent financial audit.

NOTIFICATION

Posting of the agenda as required by the Brown Act.

Updated as of: 01/19/2021

Report to City Council

TO:	Mayor and City Council
FROM:	Marshall Eyerman, Assistant City Manager
AGENDA DATE:	February 2, 2021
TITLE:	RECEIPT OF QUARTERLY INVESTMENT REPORT FOR THE QUARTER ENDED DECEMBER 31, 2020

RECOMMENDED ACTION

Recommendations:

1. Receive and file the Quarterly Investment Report for quarter ended December 31, 2020, in compliance with the City's Investment Policy.

SUMMARY

The attached Quarterly Investment Report presents the City's cash and investments for the quarter that ended December 31, 2020. This report is in compliance with California Government Code Section 53646 regarding the reporting of detailed information on all securities, investments, and monies of the City, as well as the reporting of the market value of the investments held. All of the investments contained within the portfolio are in full compliance with the City's Investment Policy and Government Code Section 53601 as to the types of investments allowed. It is recommended that the City Council receive and file the attached Quarterly Investment Report.

DISCUSSION

The City maintains a portfolio of investments in order to earn interest on cash balances that are not currently required to fund operations. California Government Code Sections 53601 and 53646 establish the types of investments allowed, the governing restrictions on these investments, the third-party custodian arrangement for certain investments, and the reporting practices related to the portfolios of local agencies. In keeping with best practices the City has implemented an Investment Policy, which was last reviewed by the City Council on April 7, 2020. The policy is in full compliance with the requirements of both of the above-mentioned Code Sections.

The attached Quarterly Investment Report presents the City's cash and investments for the quarter that ended December 31, 2020. The report complies with California Government Code Section 53646 regarding the reporting of detailed information on all securities, investments, and monies of the City, as well as the reporting of the market value of the investments held. All of the investments contained within the portfolio are in full compliance with the City's Investment Policy and Government Code Section 53601 as to the types of investments allowed. As stated in the attached report, there is more than adequate liquidity within the portfolio for the City to meet its budgeted expenditures over the next six months.

The City's investment policy has set the primary goals of the portfolio management as Safety and Liquidity followed by Yield. The City's cash flow requirements are evaluated on an ongoing basis, with short-term needs accommodated through the City's pooled investment funds with the Local Agency Investment Fund (LAIF). LAIF is a pool of public funds managed by the State Treasurer of California, providing 24-hour liquidity while yielding a rate of return approximately equivalent to a one-year treasury bill. With the combined use of a conservative approach to evaluating cash flow needs and LAIF liquidity, the City will not have to liquidate securities at current market rates that are intended to be held for longer-term investment.

The table shows some of the key portfolio measures for the month.

	Portfolio	Avg. Yield to Maturity Trends		
	Balance	Dec 2020	Nov 2020	Dec 2019
Investments	$162,067,058	1.75%	1.79%	2.12 %
LAIF	$56,542,648	0.540%	0.576%	2.043%

Bond proceeds are held and invested by a Trustee. The investment of these funds is governed by an investment policy approved by the City Council as a part of the governing documents for each specific bond issue. Deferred Compensation Plan funds are not included in the report since these funds are held and invested by the respective plan administrators based on the direction of the participating employees. These funds are placed in a trust separate from City funds.

ALTERNATIVES

1. Receive and file the Quarterly Investment Report for December 31, 2020. ***Staff recommends this alternative as it accomplishes timely investment reporting.***

2. Do not accept and file the Quarterly Investment Report and provide staff with additional direction. ***Staff does not recommend this alternative as it will not accomplish timely investment reporting.***

FISCAL IMPACT

For additional information regarding the bond market, please see the attached Bond Market Review provided by Chandler Asset Management.

Notes:

(1) Total General Portfolio includes all assets that comprise the City's Investment Portfolio which is LAIF as well as assets managed by Chandler Asset Management.

(2) Yield to Maturity (YTM): The rate of return on an investment or security if it were to be held until maturity. This yield does not reflect changes in the market value of a security

(3) Rate of Return represents the gain or loss on an investment or portfolio of investments over a specified period, expressed as a percentage of increase over the initial investment cost. Gains on investments are considered to be any income received from the security or portfolio plus any realized capital gain. This measure of return recognizes the changes in market values of a security or portfolio of securities.

(4) The Rate of Return for the investment portfolio reflects the performance of the portfolio during the past twelve months.

(5) The portfolio benchmark is the ICE Bank of America-Merrill Lynch 1 to 5 year Government Index

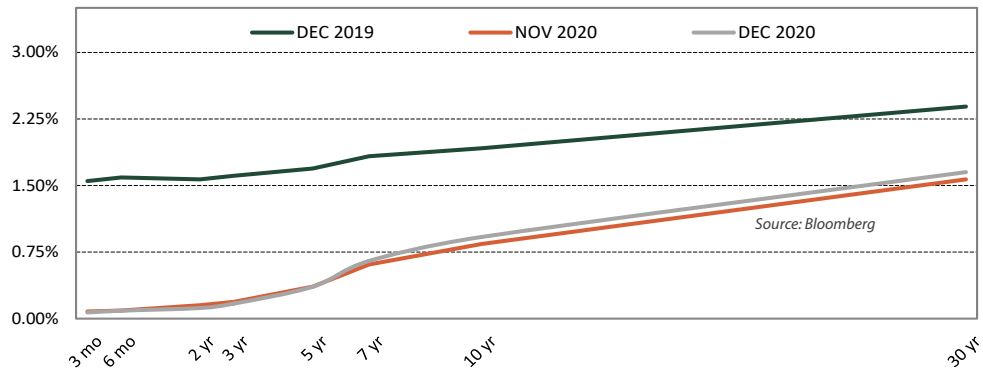
Market Summary

While we remain optimistic about the longer-term outlook, recent economic data suggests tha the economy has lost momentum as virus cases have risen. We believe the near-term will remai challenging as the labor market remains under pressure and many regions have renewed busines restrictions due to the virus. However, the passage of a new $900 billion COVID-19 fiscal relie bill should help cushion the economy over the next few months, and we believe the incomin Presidential administration will have a keen focus on accelerating vaccine distribution and gettin the economy back on track. While the vaccine rollout has gotten off to a slow start, we expect mor widespread distribution of vaccines in the second and third quarter of 2021. We also expect the Fed highly accommodative monetary policy framework will continue to provide support for the financia markets.

The Federal Open Market Committee (FOMC) kept monetary policy unchanged at their Decembe meeting as expected, with the fed funds target rate in a range of 0.0% to 0.25%. The Fed intend to remain highly accommodative until their goals of maximum employment and higher inflatio are achieved. The Fed's summary of economic projections continues to signal that the target fe funds rate will remain unchanged until at least 2023, as policymakers do not expect inflation t exceed 2.0% during that timeframe. Until the Fed has made substantial progress toward achievin their dual mandate of maximum employment and price stability, they have set a floor for monthl asset purchases of at least $80 billion per month of Treasuries and $40 billion per month of agenc mortgage-backed securities. Notably, the Fed's outlook for GDP over the next few years was revise higher and the outlook for unemployment was revised lower compared with their previous forecast in September, which suggests increased optimism. Nevertheless, the outlook remains uncertain an Fed Chair Powell indicated that the Fed would increase policy accommodation further if progres toward their dual mandate slows.

The Treasury yield curve steepened in December, due at least in part by favorable development on the vaccine front and anticipation of improving economic activity in 2021. The yield on 2-yea Treasuries was down slightly to 0.12% while the yield on 10-year Treasuries was up nearly eight basi point to 0.92%.

RATES REMAIN LOW BUT THE TREASURY YIELD CURVE HAS STEEPENED



In 2020, Treasury yields declined but the curve steepened as short-term rates declined more than long term rates. The 3-month T-bill yield was down 149 basis points, the 2-year Treasury yield was down 14 basis points, and the 10-Year Treasury yield was down 100 basis points, year-over-year.

TREASURY YIELDS	Trend (▲/▼)	12/31/2020	11/30/2020	Change
3-Month	▼	0.07	0.08	-0.01

Economic Roundup

Consumer Prices

The Consumer Price Index (CPI) was up 1.2% year-over-year in November, unchanged from October. Core CPI (CPI less food and energy) was up 1.6% yea over-year in November, also unchanged from October. The Personal Consumption Expenditures (PCE) index was up 1.1% year-over-year in Novembe versus up 1.2% year-over-year in October. Core PCE, which is the Fed's primary inflation gauge, was up 1.4% year-over-year in November, unchanged fror October. Inflation remains below the Fed's target.

Retail Sales

Consumer spending trends softened in November. On a year-over-year basis, retail sales were up 4.1% in November versus 5.5% in October. On a montl over-month basis, retail sales declined 1.1% in November, with broad-based declines in many categories on a seasonally adjusted basis. Excluding vehicle and gas, retail sales fell 0.8% in November, following a 0.1% decline in October. Notably, retail sales make up roughly one third of the personal consumptio expenditures component of US gross domestic product (GDP), while services revenue comprises roughly two thirds. Spending on services has been h particularly hard by the pandemic and lagged the pick-up in overall third quarter GDP. While retail sales remain higher on a year-over-year basis, we believ this has been partially boosted by the contraction in spending on services.

Labor Market

U.S. nonfarm payrolls declined by 140,000 in December. It was the first monthly decline in nonfarm payrolls since April of last year and came in we below expectations for a 50,000 gain. The monthly decline was led by the leisure and hospitality sector which experienced a 498,000 net decline i payrolls in December, along with modest declines in government jobs and education and health services. The unemployment rate was unchanged i December at 6.7% and has improved significantly from the peak of 14.8% last April. Nevertheless, more than 10.7 million people remain unemployec Workers who classified themselves as employed but absent from work in December continued to understate the unemployment rate by about 0.6%. Th U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons, remaine high but declined to 11.7% in December from 12.0% in November. The labor participation rate was unchanged at 61.5% in December and remains we below pre-pandemic levels.

Housing Starts

Total housing starts increased 1.2% in November to an annual pace of 1,547,000. Single family starts inched up 0.4% to a very strong annualized rat of 1,186,000, while multi-family starts increased 4.0% to an annualized rate of 361,000. On a year-over-year basis, total housing starts were up 12.8% i November, driven by growth in single-family starts. Meanwhile, permits were up 6.2% on a month-over-month basis in November, to an annualized rate c 1,639,000 (the strongest rate since 2006).

World Stock Market Index Descriptions

S&P 500– The S&P 500 is a market value weighted index of 500 large-capitalization stocks. The 500 companies included in the index capture approximately 80% of available US market capitalization. NASDAQ–The NASDAQ Composi Index is the market capitalization-weighted index of over 3,300 common stocks listed on the NASDAQ stock exchange. Dow Jones–The Dow Jones Industrial Average is an index that tracks 30 large, publicly-owned companies tradi on the New York Stock Exchange and the NASDAQ. The Financial Times Stock Exchange Group (FTSE)– The FTSE is a share index of the 100 companies listed on the London Stock Exchange with the highest market capitalization. DAX–Tl Deutscher Aktienindex (DAX) is a blue chip stock market index consisting of the 30 major German companies trading on the Frankfurt Stock Exchange. Hang Seng–The Hang Seng Index is a freefloat-adjusted market-capitalizatio weighted stock market index in Hong Kong. It is used to record and monitor daily changes of the largest companies of the Hong Kong stock market and is the main indicator of overall market performance in Hong Kong. Nikkei–Japar Nikkei 225 Stock Average is a price-weighted index composed of Japan's top 225 blue-chip companies traded on the Tokyo Stock Exchange.

Report to City Council

TO:	Mayor and City Council
FROM:	Marshall Eyerman, Assistant City Manager Steve Quintanilla, Interim City Attorney
AGENDA DATE:	February 2, 2021
TITLE:	COVID-19 PANDEMIC RESOLUTIONS EXTENDING THE LOCAL STATE OF EMERGENCY AND CERTAIN EMERGENCY MEASURES

RECOMMENDED ACTION

Recommendations:

1. That the City Council adopt a Resolution Extending the Local State of Emergency and Certain Emergency Measures related to the Local, State and National Declarations of a State of Emergency related to the COVID-19 Pandemic.

2. Authorize the City Manager to amend any agreements as necessary to continue the operation of the State of California's Great Plates Delivered program, locally known as Senior Eats.

SUMMARY

The Disaster Council recommends that the City Council adopt a Resolution Extending the Local State of Emergency and Certain Emergency Measures related to the Local, State and National Declarations of a State of Emergency related to the COVID-19 Pandemic.

The City Council initially declared a Local State of Emergency at its March 17, 2020 meeting and closed all City facilities to the public to minimize and mitigate the spread of the coronavirus.

DISCUSSION

On March 17, 2020, the City Council declared a Local State of Emergency in response to the COVID-19 Pandemic, which prompted the Disaster Council to convene. The Disaster Council consists of the Mayor, City Manager/Director of Emergency Services and the Fire Chief. The Disaster Council's purpose is to develop and recommend for adoption by the City Council emergency plans, mutual aid plans, agreements, ordinances, resolutions and any necessary rules and regulations to implement the aforementioned.

Since the commencement of the Local State of Emergency, the City Council adopted via various resolutions and/or orders ("emergency measures") related to the following:

- Declaring and subsequently extending the Existence of a Local State of Emergency due to the COVID-19 Pandemic;
- Approving the Pandemic Influenza Preparedness Plan;
- Ratifying, Adopting and Approving the Amended Closure Plan Regarding its Termination Date;
- Directing the City Disaster Council and/or City Manager/Emergency Services Director to Seek, Apply for and Accept any Financial Assistance, Grants, Reimbursements the City is Eligible to Receive Under any State or Federal Programs, Agencies or Offices including but not limited to the Governor's Office of Emergency Services, the United States Department of Health and Human Services; Centers for Disease Control and Prevention and/or the Federal Emergency Management Agency;
- Authorizing the City Manager/Emergency Services Director to Obtain Vital Supplies, Equipment and Property Found Lacking and Needed for the Protection of Life and Property During the Local State of Emergency;
- Temporarily Waiving the City Manager's/Emergency Services Director's Level of Procurement Signature Authority to Mitigate or Prevent the Spread and Transmission of COVID-19;
- Authorizing the City Manager/Emergency Services Director to Suspend the Purchasing Procedures Set Forth in Chapter 3.12 of the Municipal Code Related to the COVID-19 Virus Pandemic Emergency;
- Authorizing the City Manager/Emergency Director to Take any Directly Related and Immediate Action Required by the COVID-19 Virus Pandemic Emergency and Procure the Necessary Public Works Construction Contracts for those Purposes, Without Giving Notice for Bids to Let Contracts;
- Granting Qualified Immunity to Certain Medical Professionals and Veterinarians or Registered Veterinary Technicians Who Render Services During the City's Local State of Emergency at the Express or Implied Request of the City Disaster Council, City Manager/Emergency Services Director and/or City Council;
- Imposing a Moratorium on Late Fees Related to the Nonpayment of Rent Due to Inability to Pay Related to COVID-19;
- Granting provisions for expanded restaurant outdoor seating and streamlined Temporary Use Permit (TUP) process and fee waiver to temporarily allow

existing restaurants within the City to expand outdoor seating capacity on private property in order to implement social distancing measures;

- Authorizing the operation of the State of California's Great Plates Delivered program, locally known as Senior Eats, which pays local restaurants for the delivery of hot meals to seniors.
- Granting provisions for the Temporary Outdoor Business operations and streamlined Temporary Use Permit (TUP) process and fee waiver to temporarily allow existing businesses within the City to conduct outdoor use on private property in order to implement social distancing measures; and
- Adopting a Declaration of a fiscal emergency.

It is important to note that all the emergency measures are temporary. Each were set to terminate at such time that the Governor's State of Emergency is terminated by a subsequent proclamation of the Governor or a concurrent resolution of the State Legislature, unless the emergency measures are terminated earlier by the City Council. Notwithstanding the foregoing, and in order to prevent inconsistencies, the Disaster Council or the City Council may suspend the effectiveness of any of the emergency measures in the event that the President of the United States, the United States Congress, the Governor of the State of California, the California State Legislature or the Public Health Officer of the County of Riverside adopts legislation, a law, a regulation or order that supersedes any given emergency measure.

Notwithstanding the above, under the California Emergency Services Act, the City Council must review the need for continuing the existence of the Local State of Emergency at least once every 60 days until the City Council terminates the Local State of Emergency. Pursuant to the California Emergency Services Act, the City Council must terminate the Local State of Emergency at the earliest possible day that the conditions warrant.

RESOLUTION EXTENDING LOCAL EMERGENCY AND EMERGENCY MEASURES

In light of the foregoing, the Disaster Council recommends that the City Council adopt the attached Resolution that:

1. Extends the Existence of a Local State of Emergency due to the COVID-19 Pandemic;
2. Extends the Direction to the City Disaster Council and/or City Manager/Emergency Services Director to Seek, apply for and accept any Financial Assistance, Grants, Reimbursements the City is Eligible to Receive Under any State or Federal Programs, Agencies or Offices including but not limited to the Governor's Office of Emergency Services, the United States Department of Health and Human Services, Centers for Disease Control and Prevention and/or the Federal Emergency Management Agency;
3. Extends the Authorization of the City Manager/Emergency Services Director to Obtain Vital Supplies, Equipment and Property Found Lacking and Needed for the Protection of Life and Property During the Local State of Emergency;

4. Extends the Temporary Waiver Granted to the City Manager's/Emergency Services Director's Level of Procurement Signature Authority to Mitigate or Prevent the Spread and Transmission of COVID-19;
5. Extends the Authorization of the City Manager/Emergency Services Director to Suspend the Purchasing Procedures Set Forth in Chapter 3.12 of The Municipal Code Related to the COVID-19 Virus Pandemic Emergency;
6. Extends the Authorization of the City Manager/Emergency Director to Take any Directly Related and Immediate Action Required by the COVID-19 Virus Pandemic Emergency and Procure the Necessary Public Works Construction Contracts for Those Purposes, Without Giving Notice for Bids to Let Contracts;
7. Extends the Grant of Qualified Immunity to Certain Medical Professionals and Veterinarians or Registered Veterinary Technicians Who Render Services During the City's Local State of Emergency at the Express or Implied Request of the Disaster Council, City Manager/Emergency Services Director and/or City Council;
8. Extends the Moratorium on Late Fees Related to the Nonpayment of Rent Due to Inability to Pay Related to COVID-19;
9. Extends the Provisions for Expanded Restaurant Outdoor Seating and a Streamlined Temporary Use Permit (TUP) Process and Fee Waiver to Temporarily Allow Existing Restaurants Within the City to Expand Outdoor Seating Capacity on Private Property in Order to Implement Social Distancing Measures;
10. Extends the provisions for the Temporary Outdoor Business operations and streamlined Temporary Use Permit (TUP) process and fee waiver to temporarily allow existing businesses within the City to conduct outdoor use on private property in order to implement social distancing measures; and
11. Continues the Declaration of a Fiscal Emergency.

Upon adoption of the attached Resolution, all of the above emergency measures will remain in full force and effect until such time that the Governor's State of Emergency is lifted either by the Governor or a joint resolution of the State Legislature, unless terminated earlier by the City Council, which pursuant to the California Services Act, the City Council is obligated to terminate at the earliest possible day that the conditions warrant.

Extending the Existence of a Local Emergency due to the COVID-19 Pandemic

Under a prior order of the City Council, the City Manager/Emergency Services Director was directed to provide an update to the City Council every 60 days to determine whether the Local State of Emergency needs to remain in effect.

The Disaster Council has determined there remains a need to continue (extend) the City Council's proclamation of the existence of a Local State of Emergency due to the ongoing nature of the COVID-19 Virus Pandemic, which continues to endanger the health and welfare of the residents and visitors of the City of Moreno Valley, as reflected in the guidance and related findings published by Riverside County Public Health

Officer, the Governor's Office, the California Department of Public Health, the Centers of Disease Control and Prevention and the World Health Organization.

Pandemic Influenza Preparedness Plan

The Pandemic Influenza Preparedness Plan which was prepared under the direction and oversight of the Disaster Council, serves as the City's "Emergency Operations Plan." Pursuant to the Municipal Code, the Disaster Council is responsible for the development and maintenance of the City's Emergency Operations Plan, which must provide for the effective mobilization of all of the resources of the City, both public and private, to meet any conditions which may arise during the Local State of Emergency. It also provides for the organization, powers and duties and services of certain City employees, who all became "Disaster Workers" upon the adoption the Declaration of the Local State of Emergency. As Disaster Workers, some City employees may be assigned duties outside the scope of their regular job duties. The Plan also addresses issues such as telecommuting and financial tracking of emergency expenditures for purposes of qualifying for emergency assistance from Governor's Operations of Emergency Services and/or FEMA.

Closure Plan

Under the direction and oversight of the Disaster Council, a "Closure Plan" was developed which identifies which City facilities would either be closed during certain times and on certain days. The Closure Plan also identifies any adjustment in the hours of operation related to providing certain services to the public, such as those provided through the City's Libraries, Parks & Community Services, Employment Resource Center, Animal Services, etc.

Waiving Limitation on City Manager's Purchasing Authority

Currently, the City Manager/Emergency Services Director has the discretion to purchase and procure certain materials, equipment, supplies and services, provided that no single transaction exceeds $50,000 or $75,000 for public works contracts. This emergency measure waives these dollar limitations only for those purchases and procurement of materials, equipment, supplies and services which are related to mitigating or preventing the spread and transmission of COVID-19. This emergency measure also ratified any and all purchases of equipment, supplies and other materials in response to the arrival of 195 individuals who may have been exposed to COVID-19 at March Air Reserve Base on or about January 29, 2020, and who were subjected to a mandatory 14-Day federal COVID-19 quarantine at the Base, without prior sufficient notice being provided to the City first

Suspending Purchasing Procedures

This emergency measure authorizes the City Manager/Emergency Services Director to suspend the purchasing procedures set forth in Chapter 3.12 "Purchasing" of the Municipal Code to procure the necessary equipment, services, and supplies in order to

respond immediately and effectively to the COVID-19 Virus Pandemic Emergency. Suspension of the purchasing procedures essentially authorizes the City Manager/Emergency Services Director to approve the direct purchase of any supplies, materials, equipment or contractual services where immediate procurement is essential to prevent delays which may otherwise hinder the City's efforts to implement programs and provide services intended to prevent or mitigate the risk of spreading and transmitting COVID-19. This also allows the City Manager/Emergency Services Director to suspend any requirements for preparing and publishing "Notices Inviting Bids," soliciting prospective vendors and consultants via "Requests for Proposals" (RFPs) or "Request for Quotes," awarding a contract or purchase to the "Lowest Responsible Bidder," requiring "Bidder's Security," and implementing "Protest Procedures."

Suspending Public Contract Bidding Requirements

This emergency measure allows for a temporary suspension of the competitive bidding process associated with public works contracts. Under the State's Public Contract Code, such a temporary suspension is permitted during a State of Emergency. Basically, this authorizes the City Manager/Emergency Services Director to cause the repair or replacement of any public facility directly related to the COVID-19 Virus Pandemic Emergency, which requires immediate action without having to give notice for bids to let contracts as otherwise required under the Public Contract Code.

Obtaining Vital Supplies, Equipment and Property

This emergency measure authorizes the City Manager/Emergency Services Director or designee, for the duration of the Local State Emergency, to obtain vital supplies, equipment and property identified as lacking and necessary for the protection of life and property and to bind the City for the fair value thereof.

Application & Acceptance of State & Federal Emergency Aid

FEMA has announced that certain emergency protective measures taken by cities to respond to the COVID-19 emergency may be eligible for reimbursement. In addition, there may also be some emergency funding made available by the Health and Human Services or the Centers for Disease Control and Prevention for certain emergency protective measures, the City may implement. Such funding may be made available for costs associated with management, control and reduction of immediate threats to public health and safety, such as Emergency Operation Center costs, training specific to the declared event and disinfection of eligible public facilities, medical facility services and supplies, temporary medical facilities and/or enhanced medical/hospital capacity, use of specialized medical equipment, medical waste disposal, emergency medical transport, medical sheltering, etc. Moreover, it is expected that under the California Disaster Assistance Act, the State may be providing financial assistance for local costs such as, but not limited to, personnel costs, equipment costs, and the cost of supplies and materials used during disaster response activities; matching fund assistance for cost sharing required under federal disaster assistance programs; and indirect administrative

costs and any other assistance deemed necessary by the Director of the Office of Emergency Services.

Moratorium on Late Fees Related to the Nonpayment of Rent

This emergency measure prevents a landlord from evicting a tenant for nonpayment of rent if the tenant demonstrates that the tenant is unable to pay rent due to financial impacts related to COVID-19. In addition, a landlord may not charge or collect any interest or any late fee for rent that is delayed due to the nonpayment of rent caused by the COVID-19 Pandemic. This shall not, however, relieve a tenant of liability for the unpaid rent, and no other legal remedies available to the landlord are affected by this emergency measure. This emergency measure also does not prevent a landlord from evicting a tenant who failed to pay rent when due prior to the Governor's Proclamation of a State of Emergency on March 4, 2020 or for any other lease violation not related or caused by the COVID-19 pandemic.

Granting Qualified Immunity to Medical Professionals and Veterinarians

This emergency measure authorizes the City Manager/Emergency Services Director, for the duration of the Local State of Emergency, to request, expressly or impliedly, the services of certain medical professionals and facilities for purposes related to the Local State of Emergency. This applies to the services provided by any physician or surgeon (whether licensed in California or any other state), hospital, pharmacist, respiratory care practitioner, nurse, or dentist for purposes related to the COVID-19. Pursuant to the California Emergency Services Act, any physician or surgeon (whether licensed in California or any other state), hospital, pharmacist, respiratory care practitioner, nurse, or dentist who renders services during the Local State of Emergency at the express or implied request of the City Disaster Council, City Manager/Emergency Services Director and/or City Council shall have no liability for any injury sustained by any person by reason of such services, regardless of how or under what circumstances or by what cause those injuries are sustained; provided, however, that the immunity herein granted shall not apply in the event of a willful act or omission.

This emergency measure also applies to any veterinarian or registered veterinary technician who renders services during the Local State of Emergency at the express or implied request of the City Disaster Council, City Manager/Emergency Services Director and/or City Council. They too shall have no liability for any injury sustained by any animal by reason of those services, regardless of how or under what circumstances or by what cause those injuries are sustained; provided, however, that the immunity herein granted shall not apply in the event of a willful act or omission.

Providing For Expanded Restaurant Outdoor Seating

This Resolution authorizes the City Manager or designee to set forth a streamlined Temporary Use Permit (TUP) process and fee waiver to temporarily allow existing restaurants within the City to expand outdoor seating capacity on private property in order to implement social distancing measures. In association with this plan to facilitate

operations for existing City restaurant businesses, staff has developed a checklist that provides applicants with a clear and simple understanding of the associated requirements. An over-the-counter approval process has also been made available.

Providing For Temporary Outdoor Business Operations

This Resolution ratified the City Manager's actions on July 22, 2020, to set forth a streamlined Temporary Use Permit (TUP) process and fee waiver to temporarily allow existing businesses to conduct outdoor operations within the City on private property in order to implement social distancing measures and in accordance with applicable State guidelines. In association with this plan to facilitate operations for existing City businesses, staff developed a checklist that provides applicants a clear and simple understanding of the associated requirements. An over-the-counter approval process is also available.

Continuing the Declaration of a Fiscal Emergency

It is difficult to predict with certainty the ultimate reduction in General Fund revenues caused by the COVID-19 Pandemic but the impact has been and likely will continue to be significant. Although the City has taken immediate actions to balance the budget for the best case scenario of a $9.9 million shortfall in FY 2020/21, due to the ongoing impacts of the Governor's Executive Orders and the potential for additional State takeaways from local government in future State budget revisions or other actions, along with not receiving any financial support from either the State or the Federal Government, this situation may continue to create a severe economic crisis at the federal, state and local levels.

Continuing the Declaration of a Fiscal Emergency as a result of COVID-19 provides, in part, for the City Manager/Emergency Services Director to investigate and recommend further actions to mitigate the fiscal impact to the City's 2020/21 and 2021/22 Fiscal Year Budgets, including such measures relating to personnel costs, operations, reduction in service levels, or other measures deemed necessary and reasonable to minimize the accelerated and significant reduction to the General Fund budget and reserves.

The decision to declare a Fiscal Emergency was not made lightly. The City's immediate and significant loss of revenue due to COVID-19 is unprecedented and represents a sudden change of circumstances beyond the City's control and will ultimately draw down its General Fund reserves beyond a traditionally recommended level. Unlike the Great Recession of 2008-2011, where the City had an opportunity to implement cost saving measures over a longer period of time, the COVID-19 Local State of Emergency is immediate, severe and is highly likely going to extend through the next few fiscal years.

The State now has a blueprint for reducing COVID-19 in the State with revised criteria for loosening and tightening restrictions on activities, which includes categories identified as "Minimal" (most indoor business operations are open with modifications),

"Moderate" (some indoor business operations are open with modifications), "Substantial" (some non-essential indoor business operations are closed), and "Widespread" (many non-essential indoor business operations are closed), which are applied on a county by county basis throughout the State based on a 7-day average of daily COVID-19 cases per 100,000 and a 7-day average of all COVID-19 tests performed that are positive. In addition, the County of Riverside now aligns itself with the State's Orders as they now exist or may be issued or amended in the future.

Providing For Seniors Eats, a California Great Plates Delivered Program

Meal delivery for the Senior Eats program began in Moreno Valley on Monday, May 18, 2020. The program has been extended several times with the State submitting a request for approval to FEMA in 30 day increments, based on need. The program allows for the delivery of lunch and dinner for 150 seniors, Monday through Friday at $50 per day ($17 for lunch, $28 for dinner, $5 for incidentals) for 150 seniors at approximately $37,500 per week. The program was adopted with an anticipated reimbursement from the California Office of Emergency Services at 18.75%, FEMA at 75% and a 6.25% final contribution from the City as the local administrator. Continuation of this program will coincide with 30-day FEMA's approval process, however the City reserves the right to end participation at any time.

Based on current emergency resolutions, the City Manager has been previously authorized to amend the current contracts with the restaurants for the continuation of the program within the State's guidance and direction. The current restaurant participation agreements through the end of the calendar year are set at an amount not to exceed $120,000, based on the number of meals delivered. Continuation of the program may require a $40,000 amendment for each 30 day extension.

ALTERNATIVES

1. Adopt the recommended actions set forth within the staff report. This would allow the City Manager/Emergency Services Director to respond in a timely manner in time sensitive situations where delays may frustrate or impede the City's emergency efforts to abate or mitigate the spread and transmission of COVID-19.
2. Reject the recommended actions set forth within the staff report, which would impact the City's ability to respond in a timely manner in time sensitive situations where delays may frustrate or impede on the City's emergency efforts to abate or mitigate the spread and transmission of COVID-19 in a timely manner.

FISCAL IMPACT

See above discussion regarding Resolution Declaring Fiscal Emergency and the Senior Eats Program.

CITY COUNCIL GOALS

Revenue Diversification and Preservation. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

RESOLUTION NO. 2021-___

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, EXTENDING THE LOCAL STATE OF EMERGENCY AND CERTAIN EMERGENCY MEASURES RELATED TO THE LOCAL, STATE AND NATIONAL DECLARATIONS OF EMERGENCY RELATED TO THE COVID-19 PANDEMIC AND EXTENDING THE DECLARATION OF A FISCAL EMERGENCY

WHEREAS, on March 4, 2020, the Governor of the State of California proclaimed a State of Emergency to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19; and

WHEREAS, on March 7, 2020, Riverside County Public Health Officer Dr. Cameron Kaiser declared a Local Health Emergency; and

WHEREAS, on March 10, 2020, the Riverside County Board of Supervisors ratified the Local Health Emergency and activated the Medical Health Department Operations Center to better coordinate public messaging and planning among community partners as Riverside County officials prepare for the spread of COVID-19; and

WHEREAS, on March 11, 2020, the California Department of Public Health issued guidance that in order to protect public health and slow the rate of transmission of COVID-19, by recommending placing restrictions on gatherings of people and minimum social distancing of six feet; and

WHEREAS, on March 12, 2020, the Governor of the State of California issued Executive Order N-25-20 providing that all residents are to heed any orders and guidance of state and local public health officials, including but not limited to the imposition of social distancing measures, to control the spread of COVID-19 and that authorized local legislative bodies to hold public meetings via teleconferencing and to make public meetings accessible telephonically or otherwise electronically to all members of the public seeking to attend and to address the local legislative body, during the period in which local public officials impose or recommend measures to promote social distancing, including but not limited to limitations on public events; and

WHEREAS, on March 13, 2020, the President of the United States of America proclaimed and declared a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak and announced that the federal government would make emergency funding available to assist state and local governments in preventing the spread of and addressing the effects of COVID-19; and

WHEREAS, on March 17, 2020, the Governor issued Executive Order N-33-20 ordering that to protect public health, that all individuals living in the State of California stay home or at their place of residence ("Shelter in Place") except as needed to maintain continuity of operations of the federal critical infrastructure sectors, as outlined at https://www.cisa.gov/critical-infrastructure-sectors; and

WHEREAS, on March 17, 2020, the City Council declared a Local State of Emergency in response to the COVID-19 Pandemic, which prompted the Disaster Council to convene; and

WHEREAS, the Disaster Council consists of the Mayor, City Manager/Director of Emergency Services and the Fire Chief; and

WHEREAS, the Disaster Council's purpose is to develop and recommend for adoption by the City Council emergency plans, mutual aid plans, agreements, ordinances, resolutions and any necessary rules and regulations to implement the aforementioned; and

WHEREAS, since the commencement of the Local State of Emergency, the City Council adopted various temporary emergency measures related to the Local State of Emergency; and

WHEREAS, each of the temporary emergency measures were set to terminate at such time that the Governor's State of Emergency is terminated by a subsequent proclamation of the Governor or a concurrent resolution of the State Legislature, unless the emergency measures are terminated earlier by the City Council, but notwithstanding the foregoing, and in order to prevent inconsistencies, the Disaster Council or the City Council may suspend the effectiveness of any of the emergency measures in the event that the President of the United States, the United States Congress, the Governor of the State of California, the California State Legislature or the Public Health Officer of the County of Riverside adopts legislation, a law, a regulation or order that supersedes any given emergency measure; and

WHEREAS, notwithstanding the above, under the California Emergency Services Act, the City Council must review the need for continuing the existence of the Local State of Emergency at least once every 60 days until the City Council terminates the Local State of Emergency, and pursuant to the California Emergency Services Act, the City Council must terminate the Local State of Emergency at the earliest possible day that the conditions warrant; and

WHEREAS, the Disaster Council has determined there remains a need to continue (extend) the City Council's proclamation of the existence of a Local State of Emergency due to the COVID-19 Virus Pandemic, which continues to endanger the health and welfare of the residents and visitors of the City of Moreno Valley, as reflected in the guidance and related findings published by Riverside County Public Health Officer, the Governor's Office, the California Department of Public Health, the Centers of Disease Control and Prevention and the World Health Organization; and

WHEREAS, on June 2, 2020, at a duly noticed regular meeting of the City Council, the City Council adopted Resolution No. 2020-41 extending the following emergency measures, as described in their respective adopting resolutions, until such time that the Governor's State of Emergency is lifted either by the Governor or a joint resolution of the State Legislature, unless terminated earlier by the City Council, which pursuant to the California Services Act, the City Council is obligated to terminate at the earliest possible day that the conditions warrant:

a. The Existence of a Local State of Emergency due to the COVID-19 Pandemic
b. Direction to the City Disaster Council and/or City Manager/Emergency Services Director to Seek, Apply For and Accept any Financial Assistance, Grants, Reimbursements the City is Eligible to Receive Under any State or Federal Programs, Agencies or Offices including but not limited to the Governor's Office of Emergency Services; the United States Department of Health and Human Services; Centers for Disease Control and Prevention and/or the Federal Emergency Management Agency;

c. Authorization of the City Manager/Emergency Services Director to Obtain Vital Supplies, Equipment and Property Found Lacking and Needed for the Protection of Life and Property During the Local State of Emergency;
d. Temporary Waiver Granted to the City Manager's/Emergency Services Director's Level of Procurement Signature Authority to Mitigate or Prevent the Spread and Transmission of COVID-19;
e. Authorization of the City Manager/Emergency Services Director to Suspend the Purchasing Procedures Set Forth in Chapter 3.12 of The Municipal Code Related to the COVID-19 Virus Pandemic Emergency;
f. Authorization of the City Manager/Emergency Director to Take any Directly Related and Immediate Action Required by the COVID-19 Virus Pandemic Emergency and Procure the Necessary Public Works Construction Contracts for Those Purposes, Without Giving Notice for Bids to Let Contracts;
g. Grant of Qualified Immunity to Certain Medical Professionals and Veterinarians or Registered Veterinary Technicians Who Render Services During the City's Local State of Emergency at the Express or Implied Request of the Disaster Council, City Manager/Emergency Services Director and/or City Council; and
h. Moratorium on Late Fees Related to the Nonpayment of Rent Due to Inability to Pay Related to COVID-19; and

WHEREAS, on June 2, 2020, at a duly noticed regular meeting of the City Council, the City Council adopted Resolution No. 2020-42, an emergency measure authorizing the City Manager/Emergency Director to set forth a streamlined Temporary Use Permit Process and fee waiver to temporarily allow existing restaurants to expand outdoor seating capacity in order to provide social distancing measures during the COVID-19 Pandemic; and

WHEREAS, on June 2, 2020, at a duly noticed regular meeting of the City Council, the City Council adopted Resolution No. 2020-43, unanimously determining and declaring the existence of a Fiscal Emergency within the City of Moreno Valley for the purpose of providing the City with the rights and authorities granted to the City Council, without limitation, under Article XIIIC, section 2(b) of the California Constitution and Government Code section 3504.5, to ensure that the City has the resources and opportunities available to it that are necessary to preserve and protect public health, safety and welfare for the benefit of the City's residents, business owners, and visiting public; and

WHEREAS, on September 1, 2020, at a duly noticed regular meeting of the City Council, the City Council adopted Resolution No. 2020-61, an emergency measure authorizing the City Manager/Emergency Director to set forth a streamlined Temporary Use Permit Process and fee waiver to temporarily allow existing business operations to conduct outdoor use on private property in order to implement social distancing measures during the COVID-19 Pandemic; and

WHEREAS in light of the foregoing, the Disaster Council recommends that the City Council adopt the attached Resolution that extends the existence of a Local State of Emergency due to the COVID-19 Pandemic and extends certain emergency measures, and affirms the need to maintain the state of a Fiscal Emergency, previously adopted by the City Council pursuant to the findings set forth in the recitals contained and set forth in the resolutions adopting said emergency measures; and

WHEREAS, the State has a blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities, which includes categories identified as "Minimal" (most indoor business operations are open with modifications), "Moderate" (some

indoor business operations are open with modifications), “Substantial” (some non-essential indoor business operations are closed), and “Widespread” (many non-essential indoor business operations are closed), which are applied on a county by county basis throughout the State based on a 7-day average of daily COVID-19 cases per 100,000 and a 7-day average of all COVID-19 tests performed that are positive; and

WHEREAS, the County of Riverside now aligns itself with the State’s Orders as they now exist or may be issued or amended in the future.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY HERBY FINDS, ORDERS AND RESOLVES:

1. THAT following emergency measures shall be extended and remain in full force and effect, as described in their respective adopting resolutions, until such time that the Governor’s State of Emergency is lifted either by the Governor or a joint resolution of the State Legislature, unless terminated earlier by the City Council, which pursuant to the California Services Act, the City Council is obligated to terminate at the earliest possible day that the conditions warrant:
    a. The Existence of a Local State of Emergency due to the COVID-19 Pandemic; Direction to the City Disaster Council and/or City Manager/Emergency Services Director to Seek, Apply For and Accept any Financial Assistance, Grants, Reimbursements the City is Eligible to Receive Under any State or Federal Programs, Agencies or Offices including but not limited to the Governor’s Office of Emergency Services; the United States Department of Health and Human Services; Centers for Disease Control and Prevention; and/or the Federal Emergency Management Agency;
    b. Authorization of the City Manager/Emergency Services Director to Obtain Vital Supplies, Equipment and Property Found Lacking and Needed for the Protection of Life and Property During the Local State of Emergency;
    c. Temporary Waiver Granted to the City Manager’s/Emergency Services Director’s Level of Procurement Signature Authority to Mitigate or Prevent the Spread and Transmission of COVID-19;
    d. Authorization of the City Manager/Emergency Services Director to Suspend the Purchasing Procedures Set Forth in Chapter 3.12 of the Municipal Code Related to the COVID-19 Virus Pandemic Emergency;
    e. Authorization of the City Manager/Emergency Director to Take any Directly Related and Immediate Action Required by the COVID-19 Virus Pandemic Emergency and Procure the Necessary Public Works Construction Contracts for Those Purposes, Without Giving Notice for Bids to Let Contracts;
    f. Grant of Qualified Immunity to Certain Medical Professionals and Veterinarians or Registered Veterinary Technicians Who Render Services During the City’s Local State of Emergency at the Express or Implied Request of the Disaster Council, City Manager/Emergency Services Director and/or City Council;
    g. Moratorium on Late Fees Related to the Nonpayment of Rent Due to Inability to Pay Related to COVID-19;

h. Order authorizing the City Manager/Emergency Director to set forth a streamlined Temporary Use Permit Process and fee waiver to temporarily allow existing restaurants to expand outdoor seating capacity in order to provide social distancing measures during the COVID-19 Pandemic; and
i. Order authorizing the City Manager/Emergency Director to set forth a streamlined Temporary Use Permit Process and fee waiver to temporarily allow existing business operations to conduct outdoor use on private property in order to implement social distancing measures during the COVID-19 Pandemic; and

2. THAT the economic downturn due to the impact of COVID-19 continues to create an unforeseen situation that poses a threat to the public health, safety and welfare which continues the need for immediate action since there continues to be substantial uncertainty as to whether the City's revenues in the next two years will be sufficient to cover the expenditures necessary to provide a service level consistent with public health and safety demands and expectations of the residents and businesses of the City of Moreno Valley, for the reasons set forth in Resolution No. 2020 - 43; and
3. THAT in light of the foregoing and the fact that the City's need for additional revenue is immediate and will likely continue for the remainder of this Fiscal Year 2020 and well into Fiscal Year 2021 and the extension of the declaration of fiscal emergency in necessary to ensure the City has the resources and opportunities necessary to preserve and protect public health, safety and welfare, the City Council also hereby extends the declaration of a fiscal emergency; and
4. THAT the City Council has determined that the purpose of adopting and implementing protective measures to mitigate and/or abate the transmission of COVID-19, is to prevent harm to those who may violate any protective measure since any such violations may result in exposure to the COVID-19 which may lead to illness and death to the violator and those in the presence of the violator since there is no effective cure or vaccine available; and
5. THAT the City Council has determined that the purpose of adopting and implementing and extending the aforementioned emergency measures, including extending the declaration of fiscal emergency, is to mitigate and/or abate the spread and transmission of COVID-19.; and
6. THAT a violation of any of the aforementioned emergency orders by any member of the pubic shall be subject to any and all other remedies, civil, equitable or criminal, afforded to the City under any City, County, State and Federal laws or regulations; and
7. THAT any section, subdivision, subsection, sentence, clause, or phrase in this Resolution or its application to any person or circumstances, is for any reason held invalid, the validity of the remainder of this Resolution, or the application of such provision contained therein to other persons or circumstances, shall not be affected thereby; and
8. THAT the City Council hereby declares that it would have adopted this Resolution and each section, subdivision, subsection, sentence, clause, or phrase thereof, irrespective of the fact that one or more sections, subdivisions, subsections, sentences, clauses, or phrases, or the application thereof to any person or circumstance, be held invalid; and

9. THAT notwithstanding the foregoing, and in order to prevent inconsistencies, the City Council, Disaster Council or City Manager/Emergency Services Director may suspend the effectiveness of this Resolution in the event that the President of the United States, the United States Congress, the Governor of the State of California, the California State Legislature or the Public Health Officer of the County of Riverside adopts legislation, a law, a regulation or order that supersedes this Resolution.

Resolution No. 2021-
Date Adopted: February __, 2021

Report to City Council

TO:	Mayor and City Council
FROM:	Marshall Eyerman, Assistant City Manager
AGENDA DATE:	February 2, 2021
TITLE:	PURSUANT TO LANDOWNER PETITION, ANNEX CERTAIN PARCELS INTO COMMUNITY FACILITIES DISTRICT NO. 2014-01 (MAINTENANCE SERVICES) - AMENDMENT NO. 54

RECOMMENDED ACTION

Recommendation:

Acting as the legislative body of Community Facilities District No. 2014-01 (Maintenance Services), adopt Resolution No. 2021-__, a Resolution of the City Council of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2014-01 (Maintenance Services) and approving the amended map for said District. (Amendment No. 54). (PEDROHYPJVC, LLC, located on the north side of Kalmia Ave., west of Lasselle St.).

SUMMARY

Approval of the proposed resolution will certify annexation of two parcels into Community Facilities District (CFD) No. 2014-01 (Maintenance Services) ("District"). This action impacts only the property owner identified below, not the general citizens or taxpayers of the City.

The City requires property owners of new development projects to mitigate the cost of certain impacts created by the proposed development (e.g., the cost of operation and maintenance of street lighting and/or public landscaping). The City created CFD No. 2014-01 to provide the development community with a funding mechanism to assist in satisfying the requirement. After a property owner elects to annex their property into the District and the City Council approves the annexation, a special tax can be levied on the annual property tax bill of the annexed parcel to fund the costs.

As a condition of approval for development of their project, the Property Owner, as

defined below, is required to provide a funding source for the operation and maintenance of certain public improvements (i.e., street lighting) and has elected to annex the parcels of their project into the District to satisfy the condition. The Property Owner has submitted the Landowner Petition approving the annexation and the City Clerk has confirmed the petition is valid.

DISCUSSION

The District was formed by adoption of Resolution No. 2014-25 to provide an alternative funding tool for the development community. It provides a mechanism to fund the operation and maintenance of street lighting services and public landscaping. After a landowner approves annexation of their property into the District and the City Council approves the annexation, the City is authorized to levy a special tax onto the annual property tax bill.

The Rate and Method of Apportionment of Special Tax ("RMA") for the District describes the different special tax rate areas, services provided, and formula to calculate the special tax rate for each of the tax rate areas. Several special tax rate areas were created to accommodate a variety of scenarios to ensure costs are fairly shared between property owners. For example, there is a tax rate area for "single-family residential street lighting" and one for "street lighting for property other than single-family residential" (e.g., commercial, industrial, or multi-family projects). Different tax rate areas are needed for street lighting because the spacing and size/type of lights differ based on the type of development. Likewise, there are several tax rate areas for maintenance of public landscaping. A property owner's proportionate share of landscape maintenance costs will vary depending upon the total square footage of landscaping to be maintained and the number of properties sharing in the cost for that development.

On February 10, 2015, the City Council adopted Ordinance No. 889, which designated the entire territory of the City as a future annexation area for the District. With the future annexation area designated, annexations can occur without an additional public hearing as long as the annexing landowner provides unanimous consent. Once annexed, parcels are subject to the annual special tax to fund the service they are receiving.

As a condition of approval for the project identified below, the Property Owner is required to provide an ongoing funding source for the operation and maintenance services of street lighting, which is required to be installed on public streets as part of the development project. The table below provides information for the property under development.

Property Owner/ Project ACP Record #	APNs	Location	Amendment No.
PEDROHYPJVC, LLC 83 single-family residential development PEN19-0217/SCP20-0025	474-110-004 & 474-110-014	North side of Kalmia Ave., west of Lasselle St.	54

A property owner has two options to satisfy the condition of approval:

1. Submit a Landowner Petition unanimously approving annexation of the property into the District. Approval of the petition and special tax rate allows the City to annually levy the special tax on the property tax bill of the property. This option is only available if there are fewer than 12 registered voters living within the proposed annexation area; or

2. Establish a homeowner or property owner association to provide the ongoing operation and maintenance of the improvements.

The Property Owner elected to annex their property into CFD No. 2014-01 and have the special tax applied to the annual property tax bill. The Office of the Riverside County Registrar of Voters confirmed there were no registered voters residing at the property, allowing a special election of the landowner. Adoption of the attached resolution (Attachment 1) adds the property to the tax rate areas identified in the Fiscal Impact section of this report and directs the recordation of the boundary map (Attachment 2) and amended notice of special tax lien for Amendment No. 54. The City Clerk received and reviewed the Landowner Petition and confirmed the Property Owner unanimously approved the annexation of their property into the District (Attachment 3).

Successful completion of the annexation process satisfies the project's condition of approval to provide a funding source for the operation and maintenance of street lighting on public streets.

ALTERNATIVES

1. Adopt the proposed resolution. *Staff recommends this alternative as it will annex the property into CFD No. 2014-01 at the request of the Property Owner and satisfy the condition of approval for the proposed development.*

2. Do not adopt the proposed resolution. *Staff does not recommend this alternative as it is contrary to the request of the Property Owner, will not satisfy the condition of approval, and may delay development of the project.*

3. Do not adopt the proposed resolution but rather continue the item to a future regularly scheduled City Council meeting. *Staff does not recommend this alternative as it will delay the Property Owner from satisfying the condition of approval and may delay development of the project.*

FISCAL IMPACT

Revenue received from the special tax is restricted and can only be used to fund the services for each tax rate area within the District. If the projected revenue from the

maximum special tax exceeds what is necessary to fund the services within each tax rate area, a lower amount will be applied to the property tax bill for all the properties within the affected tax rate area. The special tax can only be applied to a property tax bill of a parcel wherein the qualified electors (i.e., landowners or registered voters, depending upon the number of registered voters) have previously provided approval. The estimated maximum special tax revenue that can be generated from the project is detailed below.

Property Owner/ Project ACP Record #	Tax Rate Area[1]	# of Parcels[2]	FY 2020/21 Maximum Special Tax Rate[3]	FY 2020/21 Maximum Special Tax for the Project[2]
PEDROHYPJVC, LLC[4] 83 single-family residential development PEN19-0217/SCP20-0025	SL-01	83	$264.49	$21,952.67

[1]SL-01 is for Street Lighting for Single-Family Residential Property and is calculated based on a per parcel basis.
[2]Estimated based on proposed parcel configuration. The special tax calculation will be based on final development of the project.
[3]The special tax applied to the property tax bill will be based on the needs of the tax rate area within the District. The applied special tax rate cannot exceed the maximum special tax rate. The FY 2020/21 applied rate for SL-01 is $64.10/parcel.
[4]Thirty-seven street lights are planned to be installed along Kalmia Ave., Slawson Ave. and Streets "A" through "F".

The maximum special tax rates are subject to an annual inflation adjustment based on the change in the Consumer Price Index (CPI) or five percent (5%), whichever is greater. However, the annual adjustment cannot be applied unless the City Council annually authorizes such adjustment. The increase to the maximum special tax rate cannot exceed the annual inflationary adjustment without a two-thirds approval of the qualified electors within the affected tax rate area.

NOTIFICATION

The annexation materials were mailed to the Property Owner on December 17, 2020. A cover letter, Landowner Petition, RMA, and an envelope to return the completed petition were included.

CITY COUNCIL GOALS

Revenue Diversification and Preservation. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 4.2: Develop and maintain a comprehensive Infrastructure Plan to invest in and deliver City infrastructure.

Objective 5.2: Promote the installation and maintenance of cost effective, low maintenance landscape, hardscape and other improvements which create a clean, inviting community.

RESOLUTION NO. 2021-___

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, ORDERING THE ANNEXATION OF TERRITORY TO CITY OF MORENO VALLEY COMMUNITY FACILITIES DISTRICT NO. 2014-01 (MAINTENANCE SERVICES) AND APPROVING THE AMENDED MAP FOR SAID DISTRICT

WHEREAS, by its Resolution No. 2014-25, the City Council established the City of Moreno Valley Community Facilities District No. 2014-01 (Maintenance Services) (the "CFD"), a citywide district, pursuant to the Mello-Roos Community Facilities Act of 1982 (Government Code Section 53311 *et seq*.) (the "Act"); and

WHEREAS, by its Ordinance No. 874, the City Council authorized an annual special tax to be levied against all non-exempt parcels of real property within the CFD (the "Special Tax") to fund street lighting services and landscape maintenance services; and

WHEREAS, in order to permit landowners to efficiently annex developing parcels to the CFD, the City Council, by its Ordinance No. 889 designated the entire territory of the City as a future annexation area for the CFD and approved the second amended and restated rate and method of apportionment for the Special Tax; and

WHEREAS, the landowner of the parcel(s) listed on Exhibit A to this Resolution, which is attached hereto and incorporated herein by reference, has submitted to the City a petition requesting and approving annexation of the listed parcel(s) (the "Annexation Parcel(s)") to the CFD; and

WHEREAS, the Annexation Parcel(s) are comprised of the territory shown on the boundary map (the "Boundary Map") "Amendment No. 54 to Boundaries of City of Moreno Valley Community Facilities District No. 2014-01 (Maintenance Services), City of Moreno Valley, County of Riverside, State of California" which is included as Exhibit B to this Resolution, and incorporated herein by this reference; and

WHEREAS, the City Council desires to annex the Annexation Parcel(s) to the CFD.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Recitals. The above recitals are all true and correct and are herein incorporated.

2. Annexation Approved. The Annexation Parcel(s) are hereby added to and part of the CFD with full legal effect. The Annexation Parcel(s) are subject to the

Special Tax associated with the Tax Rate Area(s) indicated on Exhibit A to this Resolution.

3. Description of Services. The following is a general description of all services (the "Services") provided in the CFD:

A. Landscape Maintenance Services: Maintaining, servicing, and operating landscape improvements and associated appurtenances located within the public right-of-way and within dedicated landscape easements for the CFD. These improvements may include but are not limited to parkways, medians, open space landscaping, fencing, monuments, ornamental lighting, drainage, turf, ground cover, shrubs, vines and trees, irrigation systems, and appurtenant facilities and structures. Fundable costs may include, but are not limited to: (i) contracting costs for landscape maintenance services, including litter removal, (ii) salaries and benefits of City staff, (iii) expenses related to equipment, apparatus, and supplies related to these services, (iv) City administrative and overhead costs associated with providing such services within the CFD, and (v) lifecycle costs associated with the repair and replacement of facilities.

B. Street Lighting Services: Maintaining, servicing, and operating street lights and appurtenant improvements. Fundable costs may include, but are not limited to: (i) contracting costs for street light maintenance, (ii) salaries and benefits of City staff, if the City directly provides street light maintenance services, (iii) utility expenses and the expense related to equipment, apparatus, and supplies related to these services and authorized by the Act, (iv) City administrative and overhead costs associated with providing such services for the CFD, and (v) lifecycle costs associated with the repair and replacement of facilities.

The Annexation Parcel(s) will only be provided with the services indicated on Exhibit A.

4. Amended Boundary Map. The Boundary Map attached hereto as Exhibit B is hereby approved. This map amends, and does not supersede, the existing maps of the CFD. The City Council directs that said map be filed with the Riverside County Recorder pursuant to Section 3113 of the Streets and Highways Code.

5. Notice of Special Tax Lien. The City Council directs that an amended notice of special tax lien be recorded pursuant to Section 3117.5 of the Streets and Highways Code with respect to the Annexation Parcel(s) associated with the Boundary Map.

6. This Resolution shall be effective immediately upon adoption.

7. The City Clerk shall certify to the adoption of this Resolution, and shall maintain on file as a public record this Resolution.

8. Severability. That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

9. Repeal of Conflicting Provisions. That all the provisions heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

APPROVED AND ADOPTED this 2nd day of February 2021.

Amendment No. 54	474-110-004 474-110-014	Street Lighting	SL-01

Based on current development plans, it is anticipated that the Annexation Group will be in the Maintenance Category listed above; however all taxes will be calculated as set forth in the Rate and Method of Apportionment.

The parcels associated with a given development constitute a separate Annexation Group for purpose of calculating the applicable Maintenance Category (where applicable) for each Tax Rate Area. The anticipated Maintenance Category (where applicable) is shown in parenthesis following the Tax Rate Area. All capitalized terms in this paragraph have the meanings set forth in the Rate and Method of Apportionment.

CERTIFICATE OF ELECTION OFFICIAL
AND CONFIRMATION OF LANDOWNER PETITION

STATE OF CALIFORNIA)
COUNTY OF RIVERSIDE) ss.
CITY OF MORENO VALLEY)

The undersigned, Election Official of the City of Moreno Valley, County of Riverside, State of California, Does Hereby Certify that on **January 13, 2021**, I did verify the completeness of the Landowner Petition for the annexation of property into

CITY OF MORENO VALLEY COMMUNITY FACILITIES DISTRICT NO. 2014-01
(MAINTENANCE SERVICES) – AMENDMENT NO. **54**

WITNESS my hand this 13th day of January, 2021.

Regina Flores

ELECTION OFFICIAL
CITY OF MORENO VALLEY
STATE OF CALIFORNIA

Report to City Council

TO:	Mayor and City Council
FROM:	Michael L. Wolfe P.E., Assistant City Manager Patti Solano, Parks & Community Services Director
AGENDA DATE:	February 2, 2021
TITLE:	AUTHORIZATION TO AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO TKE ENGINEERING, INC. FOR CONSTRUCTION MANAGEMENT OF THE CIVIC CENTER ELECTRONIC MARQUEE SIGN, PROJECT NO. 803 0044 AND THE CIVIC CENTER DEMONSTRATION GARDEN PROJECT NO. 807 0049

RECOMMENDED ACTION

Recommendations:

1. Award an Agreement for Professional Consultant Services to TKE Engineering, Inc. to provide construction management, construction support, and inspection for the Civic Center Electronic Marquee Sign and the Civic Center Demonstration Garden project construction;

2. Authorize the issuance of a Purchase Order to TKE Engineering, Inc. in the amount of $191,048 ($173,680 proposed amount plus a 10% contingency) when the agreement has been signed by all parties. The Projects are fully funded by Park and Community Services (PCS) Capital Project Funds (3015) and Facility Construction Capital Funds (3000);

3. Authorize the City Manager to execute the contract, in substantial conformance with the attached template, with TKE Engineering, Inc., subject to minor modifications and approval by the City Attorney; and

4. Authorize the Parks & Community Services (PCS) Director to execute any subsequent related amendments to the Agreement for Professional Consultant Services with TKE Engineering, Inc., not to exceed the Purchase Order amount, subject to the approval by the City Attorney.

SUMMARY

This report recommends approval of an agreement for Professional Consultant Services with TKE Engineering, Inc. to provide Construction Management, construction support, and inspection for the Civic Center Electronic Marquee Sign and the Civic Center Demonstration Garden projects.

DISCUSSION

The Civic Center Electronic Marquee Sign project includes construction of a new Monument Sign with a 6MM Electronic Marquee LED Message Board at the southwest corner of Alessandro Boulevard and Frederick Street.

The Civic Center Community Demonstration Garden supports the Healthy MoVal initiative to expand health and wellness opportunities for Moreno Valley residents of all ages. The garden is adjacent to the Conference & Recreation Center and Civic Center Amphitheater, reflecting the spirit of the City's Civic Center design as a hub for Citywide activities and programs. The project includes elements such as raised garden beds, composting, seedling racks, outdoor classroom, vertical planters, hydroponic vegetable towers, fruit trees, pollinator's perennial garden, fruit trellises and more.

On January 19, 2021, City Council approved separate construction contracts for the Civic Center Electronic Marquee Sign project and the Civic Center Demonstration Garden project. As outlined in the January 19th staff reports, funding was identified for both projects for construction management and construction support services. Staff is recommending to obtain a professional consultant team to provide construction management, construction supports, and inspection to balance workload and project delivery.

Requests for Proposals (RFP) for Professional Consultant Services were sent to four current On-call consultant firms with Construction Management expertise. The City received two (2) proposals from TKE Engineering and PPM Group, Inc. in response to the RFP. Following a competitive selection process, TKE Engineering, Inc., was selected as the most qualified consultant to perform the work consisting of construction management, geotechnical and surveying construction support, and inspection. The selection process was pursuant to the City's Municipal Code requirements for professional services procurement.

Staff recommends the award of the Professional Consultant Services with TKE Engineering, Inc. to provide Construction Management, construction support, and inspection for the Civic Center Electronic Marquee Sign and the Civic Center Demonstration Garden projects.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff

report. *This alternative, as recommended by staff, allows the timely construction of the Civic Center Electronic Marquee Sign and the Civic Center Demonstration Garden projects.*

2. Do not approve and authorize the recommended actions as presented in this staff report. *Staff does not recommend this alternative as it will delay the construction of the Civic Center Electronic Marquee Sign and the Civic Center Demonstration Garden projects.*

FISCAL IMPACT

The projects are funded by the PCS Capital Project Funds (3015) and Facility Construction Capital Funds (3000). There is no impact to the General Fund.

AVAILABLE PROJECT FUNDS:

Facility Construction Capital Fund …….....	$480,000
Parks & Community Services Capital Projects Fund.....	$155,553
California Department of Parks & Recreation Per Capita Grant ……	$177,952
Kaiser Permanente Grants…….	$25,000
DIF Park Improvements Fund ……	$316,495
Total Available Project Funds……...	**$1,155,000**

ESTIMATED PROJECT COSTS:

Construction Marquee Sign (including 15% contingency)…….....	$330,235
Construction Demonstration Garden (including 15% contingency)…..……....	$526,970
CM, Construction Support & Inspection Services for TKE (10% contingency) ..	**$191,048**
Project Administration...	$60,000
Total…….…….	$1,108,253

ANTICIPATED PROJECT SCHEDULE:

Construction is anticipated to begin in spring 2021 once all pre-construction documentation and information is provided by the contractor and approved by the City. The project is anticipated to be completed in the summer 2021, barring any weather or unforeseen site condition delays.

NOTIFICATION

Prior to construction, all utilities, adjacent property owners, business owners, law enforcement, fire department, and other emergency services responders in the area will be notified in a timely manner of the proposed construction.

PROJECT SPECIFIC AGREEMENT FOR ON-CALL PROFESSIONAL CONSULTANT SERVICES
PROJECT NAME
PROJECT NO.

This Agreement is made and entered into as of the date signed by the City of Moreno Valley, by and between the City of Moreno Valley, California, a municipal corporation, hereinafter described as “City,” and XYZ a California corporation, hereinafter described as “Consultant.”

RECITALS

WHEREAS, the City has pre-qualified Consultant for On-call Consultant work in an Agreement (“On-Call Agreement”) executed on Month Day, Year for Consultant Specific Services hereinafter described as "Project"; and

WHEREAS, the City wishes to engage the services of Consultant for the Project set forth in Exhibit “A”.

THEREFORE, the City and the Consultant, for the consideration hereinafter described, mutually agree as follows:

1. The previously executed On-Call Agreement and subsequent Amendments between City and Consultant are incorporated herein by reference and made a part of this Agreement as if set forth in full and available for review in the City Engineer’s office. Notwithstanding any expiration or termination of the On-Call Agreement or Amendment, all terms and provisions of the aforementioned On-Call Agreement and Amendments incorporated herein shall survive the expiration or termination of such Agreement or Amendment for the duration of this Project Specific Agreement. In the event of a conflict between this Agreement and the On-Call Agreement, the most current amendment shall prevail.

2. The City’s scope of service is for Project Name and is described in detail in Exhibit “A” attached hereto and incorporated herein by this reference.

3. The Consultant's scope of service is described in detail in Exhibit "B" attached hereto and incorporated herein by this reference.

4. The City's responsibility is described in Exhibit "C" attached hereto and incorporated herein by this reference.

5. The City agrees to pay the Consultant and the Consultant agrees to receive a "Not-to-Exceed" fee of **$Amount** in accordance with the payment terms provided in Exhibit "D", attached hereto and incorporated herein by this reference.

6. The Consultant shall commence services upon receipt of written direction to proceed from the City.

7. This agreement will terminate on **December 31, Year** unless the termination date is extended by an amendment to the agreement.

8. Consultant shall provide updated insurance documentation, certificates or endorsements unless specifically waived by the City Attorney.

Report to City Council

TO:	Mayor and City Council
FROM:	Michael L. Wolfe P.E., Assistant City Manager
AGENDA DATE:	February 2, 2021
TITLE:	DECLARATION OF EXEMPT SURPLUS LAND AND APPROVAL OF PURCHASE AGREEMENT WITH EASTERN MUNICIPAL WATER DISTRICT INVOLVING THE EXCHANGE OF SURPLUS LAND BETWEEN THE CITY AND DISTRICT

RECOMMENDED ACTION

1. Adopt Resolution No. 2021-___ declaring portions of three parcels of land comprising 0.551 acres of land, which are owned in fee by the City of Moreno Valley, as "Exempt Surplus Lands" for purpose of selling portions of said parcels to the Eastern Municipal Water District for remediation and treatment of groundwater in and around the City of Moreno Valley to produce more potable water for consumer use;
2. Approve the sale of the subject Exempt Surplus Lands to the Eastern Municipal Water District for the development of a public well site as part of the District's Perris North Groundwater Program project; and
3. Authorize the City Manager to execute the Purchase Agreement and Joint Escrow Instructions by and between the City of Moreno Valley and the Eastern Municipal Water District, which includes the exchange of land between the District and the City.

SUMMARY

Staff recommends that the City Council declare portions of three parcels of land as "Exempt Surplus Lands" to allow the sale of a portion of those three parcels to the Eastern Municipal Water District ("District") for the development of a public well site. In addition, staff recommends granting an access easement to the District as outlined in the attached agreement. This new public well site will be an essential component of the District's Perris North Groundwater Contamination and Remediation Program, which will produce potable groundwater in and around the City of Moreno Valley for consumer use. The fee title acquisition by the District includes portions of three parcels which

include 0.551 acres for a well site, and an access easement of approximately 0.279 acres (see Vicinity Map, attached hereto). All subject parcels are a part of the City's Corporate Yard, located at the northeast corner of Perris Boulevard and Santiago Drive. However, the sale of the 0.551-acre area to the District for the new public well site and the 0.279-acre access easement area to the District for the well site will not have any detrimental effects on the current and future operations and administration of the City's Corporate Yard. Furthermore, neither of these areas are necessary for the City's use now or in the foreseeable future, albeit the City and its residents and businesses will benefit from the production of additional potable groundwater by the District.

DISCUSSION

The District received grant funds from the State Water Resources Control Board to address groundwater contamination in the Perris North Groundwater Basin, which includes portions of the City of Moreno Valley. The primary purpose of the grant is to facilitate the District's ability to efficiently and effectively pump groundwater from the groundwater basin for storage, remediation and treatment for purposes of converting the groundwater to "potable water" for general consumer use.

Since the grant was awarded, the District has been in discussion with City staff about the possibility of locating a needed well site on a portion of the City's Corporate Yard located at the northeast corner of Perris Boulevard and Santiago Drive. After extended discussions, District and City staff concluded that the optimal location for the new well site, that would have the least impact on the current and future operations and administration of the Corporate Yard, is on a 0.551-acre portion of the Corporate Yard located just east of the Corporate Yard's administration building which is located along Santiago Drive. In addition, the 0.279-acre portion the District needs as a Public Access Easement is in an area that will not detrimentally impact the Corporate Yard's ingress and egress.

As expressed by District staff, in general, the proposed well site will include the new well, pumps, electrical equipment, pipes, fencing, gates, and an access driveway. The groundwater, however, will not be processed (treated) at the well site; rather, the groundwater will be conveyed via newly installed subsurface pipes to another site/facility owned and operated by the District where the groundwater will be treated.

Incidentally, in addition to the specific and general environmental benefits associated with treating contaminated groundwater within the City, the treated water will be part of the District's retail water production. The District is also willing to pay fair market value for each parcel. The fair market value of each parcel was determined by professionally prepared appraisals reviewed by the City. The fair market value of the 0.551-acre area is $43,200.00, and the 0.279-acre area is $21,589.00. Moreover, as part of this transaction, the District has agreed to compensate the City for any retrofit improvements to the existing water quality basin located at the Corporate Yard. The District has agreed to compensate the City up to $98,500.00 or fifty percent of the actual construction cost, whichever is less. This is in addition to the District agreeing to pay the City the fair market value for the parcels.

Summary of the terms of the Purchase and Sale Agreement (See Attachment 3) are as follows:

- The City will sell the 0.279-acre area of land that is part of APN 486-170-024, which is one of the parcels upon which the Corporate Yard is situated, to the District for the fair market value of $21,859.00, as a Public Access Easement to service the new well site.

- The City will sell the 0.551-acre area of land that is part of APNs 486-170-023, 486-170-024, and 486-170-027, which are some of the parcels upon which the Corporate Yard is situated, to the District for the fair market value of $43,200.00, for the construction and operation of the new public well site that will be owned and operated by the District.

- The District shall compensate the City for any retrofit improvements to the existing water quality basin located at the Corporate Yard, up to $98,500 or fifty percent of the actual construction cost, whichever is less.

- The District will also grant the City a Road Public Utility Easement across a portion of APN 479-690-031, which is valued at $50,000.00.

It is important to note that this transaction will be accomplished via “credits” that shall be applied via an existing Memorandum of Understanding (“MOU”) between the District and the City that the parties entered into on or about August 2, 2011. Under the MOU, the City owes the District certain sums of money associated with the former relocation of a Booster Station at the northwest corner of Nason Street and Dracaea Avenue in exchange for District-owned land that the City has been using (and needs) for various sidewalk and street improvements. (See Attachment 4.)

Prior to approving the proposed transaction, it is necessary that the City Council declare the parcels of land as “surplus lands,” which can be accomplished upon the City Council declaring at a regular public meeting that the subject lands are not necessary for the “agency’s use.” The term "agency's use" includes land that is being used, is planned to be used under a written plan adopted by the local agency's governing body (city council), or is disposed of to support the agency's (city’s) work. In this case, there is no evidence that the subject parcels are necessary for the City’s use, in that there are no official written plans adopted by the City that indicate that the subject lands are planned to be used or that they are currently being used for any of the following: (a) utility sites, (b) watershed property, (c) for conservation purposes, (d) for demonstration, exhibition, or educational purposes related to greenhouse gas emissions, or (e) buffer sites near sensitive governmental uses, including, but not limited to, wastewater treatment plants. As discussed above, the conveyance of both areas will not have any detrimental impacts on the operation or maintenance of the existing water quality basin located at the Corporate Yard. In fact, if this transaction is approved, the existing water quality basin may be subject to certain improvements which the District has agreed to pay for up to certain amounts.

In addition to declaring the subject lands “surplus lands,” the City Attorney recommends that the City Council also determine that the subject lands be declared “exempt” surplus lands. Pursuant to Government Code section 544220 (f), “exempt surplus land” includes surplus land that a local agency is exchanging for another property necessary for the agency’s use or surplus land that a local agency is transferring to another local, state, or federal agency for the agency’s use. In this case, the subject lands will be transferred to the District in order to facilitate the District’s ability to efficiently and effectively pump groundwater from the groundwater basin for remediation and treatment purposes, which will produce “potable” water for use by the City and its residents and businesses. Moreover, the proposed transaction will include an exchange of land between the City and District, since the District has agreed to granting the City a Road Public Utility Easement across a portion of property owned by the District in addition to compensating the City for any retrofit improvements to the existing water quality basin located at the Corporate Yard, up to $98,500 or fifty percent of the actual construction cost, whichever is less. Finally, this transaction is directly related to the terms and conditions of the 2011 MOU, which involved the transfer of land between the two agencies for purposes allowing the District to relocate a Booster Station on a 0.41 acre parcel of land formerly owned by the City and obtain a related Public Access Easement from the City to service and operate the relocated Booster Station. This was done in exchange for District land that allowed the City to maintain certain street and sidewalk improvements and widen a portion of Nason Street consistent with the City's General Plan Circulation Element. In summary, by declaring the subject lands “exempt surplus lands,” it is not necessary that the City (before disposing of the surplus lands) send a written notice of availability of the property to certain entities, as described in Government Code section 54222.

ALTERNATIVES

- Declare the subject areas “Exempt Surplus Lands,” and approve the Purchase Agreement. This alternative supports the District’s Perris North Groundwater Program resulting in the District’s ability to remediate and treat more groundwater in and around the City of Moreno Valley and making more potable water available to the City and its residents and businesses. **Staff recommends this alternative.**

- Decline to declare the subject areas surplus lands and do not approve the Purchase Agreement. This alternative will result in delay to the District’s Perris North Groundwater Program and hinder the District’s ability to increase its capacity to remediate and treat groundwater in and around the City of Moreno Valley to produce potable water for consumers. **Staff does not recommend this alternative.**

FISCAL IMPACT

Approval of staff’s recommendations will reduce the outstanding amount owed by the City to EMWD per the terms of the August 2, 2011 MOU for the relocation of the Booster Station at the northwest corner of Nason Street and Dracaea Avenue. The

amount owed is approximately $1.9 million. Per the terms of the MOU, repayment is earmarked from City DIF Arterial Street funds.

NOTIFICATION

RESOLUTION NO. 2021-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DECLARING THAT CERTAIN AREAS WITHIN THE PARCELS DEPICTED IN EXHIBIT "A" ARE "EXEMPT SURPLUS LANDS" BASED ON THE FINDINGS SET FORTH IN THE RECITALS OF THIS RESOLUTION.

WHEREAS, the City of Moreno Valley ("City") is a General Law city organized pursuant to Article XI of the California Constitution; and

WHEREAS, in 2011, the City and the Eastern Municipal Water District ("District") entered into a Memorandum of Understanding ("MOU") to relocate a potable water booster station ("Booster Station") to a parcel of land on approximately 0.41 acres that was formerly owned by the City, which parcel is located on the south side of Cottonwood Avenue at Letterman Street; and

WHEREAS, the relocation of the Booster Station onto the City's parcel benefited the City in that the site where the Booster Station was formerly located (which was owned by District) allowed the City to widen Nason Street, consistent with the City's General Plan Circulation Element which designates Nason Street as a four-lane "Divided Arterial" roadway and to maintain certain street and sidewalk improvements; and

WHEREAS, the MOU provided a mechanism for the City and District to exchange properties in the future to resolve disputes the parties had with respect to value of the exchanged lands described in the MOU; and

WHEREAS, in an effort consistent the terms and conditions of the MOU, City staff recommended that the City Council declare portions of three parcels of land owned in fee by the City as "Exempt Surplus Lands" to allow the sale of portions of those three parcels to the District for the development of a public well site consisting of 0.551 acres and an access easement consisting of approximately 0.279 acres; and

WHEREAS, the new public well site will be an essential component of the District's Perris North Groundwater Contamination and Remediation Program which produces potable groundwater in and around the City of Moreno Valley for consumer use; and

WHEREAS, although all the subject areas are a part of the City's Corporate Yard, located at the northeast corner of Perris Boulevard and Santiago Drive, the sale of the subject areas to the District will not have any detrimental effects on the current and future operations and administration of the City's Corporate Yard, nor are these areas necessary for the City's use now or in the foreseeable future, albeit the City and its residents and businesses will benefit from the production of additional potable groundwater by the District; and

WHEREAS, the District received grant funds from the State Water Resources Control Board to address groundwater in the Perris North Groundwater Basin, which includes portions of the City of Moreno Valley, for the purpose of producing more "potable water" for general consumer use; and

WHEREAS, the District is also willing to pay fair market value for each area of land, which was determined by professionally prepared appraisals reviewed by the City, and the District has agreed to compensate the City for any retrofit improvements to the existing water quality basin located at the Corporate Yard up to certain amounts; and

WHEREAS, in summary, (a) the City will sell the 0.279-acre area of land that is part of one of the parcels upon which the Corporate Yard is partially situated, to the District for the fair market value of $21,859.00, as a Public Access Easement to service the new well site; (b) the City will sell the 0.551-acre area of land that is part of three parcels upon which the Corporate Yard is partially situated, to the District for the fair market value of $43,200.00, for the construction and operation of the new public well site that will be owned and operated by the District; (c) the District shall compensate the City for any retrofit improvements to the existing water quality basin located at the Corporate Yard, up to $98,500 or fifty percent of the actual construction cost, whichever is less; and (d) the District will also grant the City a Road Public Utility Easement across a portion of APN 479-690-031, which is valued at $50,000.00; and

WHEREAS, the proposed transaction will be accomplished via "credits" that shall be applied via the terms and conditions of the MOU; and

WHEREAS, prior to approving the proposed transaction, it is necessary that the City Council declare the subject areas of land as "surplus lands," which can be accomplished upon the City Council declaring at a regular public meeting that the subject lands are not necessary for the "agency's use"; and

WHEREAS, the term "agency's use" includes land that is being used, is planned to be used under a written plan adopted by the local agency's governing body (city council), or is disposed of to support the agency's (city's) work; and

WHEREAS, there is no evidence that the subject areas are necessary for the City's use, in that there are no official written plans adopted by the City that indicate that the subject areas are planned to be used or that they are currently being used for any of the following: (a) utility sites, (b) watershed property, (c) for conservation purposes, (d) for demonstration, exhibition, or educational purposes related to greenhouse gas emissions, or (e) buffer sites near sensitive governmental uses, including, but not limited to, wastewater treatment plants; and

WHEREAS, the City Attorney recommended that the City Council also determine that the subject areas be declared "exempt" surplus lands; and

WHEREAS, pursuant to Government Code section 544220 (f), "exempt surplus land" includes surplus land that a local agency is exchanging for another property necessary for the agency's use or surplus land that a local agency is transferring to another local, state, or federal agency for the agency's use; and

WHEREAS, the subject areas of land will be transferred to the District in order to facilitate the District's ability to efficiently and effectively pump contaminated groundwater from the Perris North Groundwater Basin for remediation and treatment purposes, which will produce "potable" water for use by the City and its residents and businesses; and

WHEREAS, the proposed transaction will also include an exchange of land between the City and District, since the District has agreed to granting the City a Road Public Utility Easement across a portion of property owned by the District in addition to compensating the City for any retrofit improvements to the existing water quality basin located at the Corporate Yard, up to $98,500 or fifty percent of the actual construction cost, whichever is less; and

WHEREAS, the proposed transaction is directly related to the terms and conditions of the 2011 MOU, which involved the transfer of land between the two agencies for purposes allowing the District to relocate a Booster Station on a 0.41 acre parcel of land formerly owned by the City and obtain a related Public Access Easement from the City to service and operate the relocated Booster Station, which was done in exchange for District land that allowed the City to maintain certain street and sidewalk improvements and widen a portion of Nason Street consistent with the City's General Plan Circulation Element; and

WHEREAS, in light of the foregoing, by declaring the subject lands "exempt surplus lands," it is not necessary that the City (before disposing of the surplus lands) send a written notice of availability of the property to certain entities, as described in Government Code section 54222.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. RECITALS AND FINDINGS

That the above recitals are true and correct and are incorporated herein as the necessary findings to support a declaration that the subject areas as depicted in Exhibit A, attached hereto and incorporated herein by this reference, are "Exempt Surplus Lands."

Section 2. EXEMPT SURPLUS LANDS DECLARATION

That the subject areas depicted in Exhibit A, attached hereto and incorporated herein by this reference, are hereby declared to be "Exempt Surplus Lands" based on the findings set forth in the Recitals set forth above in this Resolution.

Section 3. GENERAL PLAN CONFORMITY

That Section 65402 of the Government Code is not applicable to this proposed transaction in that the only reference made to the City's "Corporate Yard" in the General Plan is where it is located; it is not discussed as part of any of the Elements of the General Plan, nor is it referenced in any of the General Plan's Elements' objectives, goals, policies or programs.

Section 4. CEQA EXEMPTION

That this proposed transaction is exempt from review under the California Environmental Quality Act (CEQA) pursuant to the exemption for the sale of surplus government property as set forth in 14 Cal Code Regs §15312 in that the subject areas are not located in an area of critical statewide or areawide environmental sensitivity identified in 14 Cal Code Regs §15206(b)(4), nor do the subject areas have any significant values for wildlife habitat or other environmental purposes as described in 14 Cal Code Regs §15312(a) and none of the subject areas are capable of independent development or use because of physical constraints.

Section 5. SEVERABILITY

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 6. REPEAL OF CONFLICTING PROVISIONS

That all the provisions heretofore adopted by the City Council that are in conflict with the provisions of this Resolution, are hereby repealed.

Section 7. EFFECTIVE DATE

That this Resolution shall take effect immediately upon its adoption.

Section 8. CERTIFICATION

That the City Clerk shall certify to the passage and adoption of this Resolution, enter the same in the book for original resolutions of the City, and make a minute of passage and adoption thereof in the records of the proceedings of the City Council, in the minutes of the meeting at which this Resolution is passed and adopted.

APPROVED AND ADOPTED this 2nd day of February 2021.

AGREEMENT FOR PURCHASE OF REAL PROPERTY WITH JOINT ESCROW INSTRUCTIONS

A Portion of Assessor Parcel Number(s) 486-170-23; 024 and 027, City of Moreno Valley, California

By and Between

EASTERN MUNICIPAL WATER DISTRICT,
a public agency organized and existing under and by virtue of the Municipal Water District Law of 1911

and

CITY OF MORENO VALLEY, a municipal corporation

This **AGREEMENT FOR PURCHASE OF REAL PROPERTY WITH JOINT ESCROW INSTRUCTIONS** ("Agreement"), is entered into as of _____, 2020 (the "Effective Date" to be inserted by Escrow) by and between **EASTERN MUNICIPAL WATER DISTRICT**, a public agency organized and existing under and by virtue of the Municipal Water District Law of 1911 ("District"), and the **CITY OF MORENO VALLEY,** a municipal corporation ("City").

RECITALS

The following recitals are a substantive part of this Agreement:

A. City is the owner of that certain real property located on the north side of Santiago Drive, east of Perris Boulevard in the City of Moreno Valley, County of Riverside, State of California, described as Assessor Parcel Number(s) 486-170-023, 486-170-024 and 486-170-027 (collectively "City Property").

B. District is the owner of certain real property located at the southeast corner of Perris Boulevard and Ironwood Avenue in the City of Moreno Valley, County of Riverside, State of California, described as Assessor Parcel Number 479-690-031 ("District Property").

C. On August 2, 2011, District and City entered into that certain Memorandum of Understanding for the Relocation of the Eastern Municipal Water District Booster Station located at the northwest corner of Nason Street and Dracaea in the City of Moreno Valley ("MOU"), which is kept on file and available upon request from District.

D. Section 5.5 of the MOU provides that in the event that, by mutual agreement of both parties, a City-owned property were to become available for the District's use, and if the City has not fully reimbursed the District at that time, such property may be considered as a credit towards the City's reimbursement for their portion of the Nason Street Booster Station relocation costs.

E. As part of the City's Capital Improvement Plan to widen Ironwood Avenue from Perris Boulevard to Nason Street, it constructed intersection improvements at the southeast corner of the District Property consisting of (1) a concrete sidewalk and ramp, (2) a traffic signal poles, (3) traffic conduits, (4) curb and gutter, (("City Improvements").

F. On July 25, 2013, a Record of Survey was recorded as Instrument Number 2013-0358880 of the Official Records of the County of Riverside, State of California ("ROS"). The ROS identified that the City's Improvements were constructed within the District Property.

G. On October 8, 2013 and November 19, 2013, District and City staff met to discuss the City's Improvements and the relocation of the District's Peris and Ironwood Booster Pumping Station ("Perris/Ironwood BPS").

H. It was agreed by the City and District that the City Improvements and the Perris/Ironwood BPS nearing the end of its useful life, necessitated the relocation of the Perris/Ironwood BPS.

I. Without admission of fault or wrongdoing, the Parties agreed that City will pay District the sum of Fifty Thousand Dollars ($50,000) in exchange for District granting an Irrevocable Offer of Dedication ("IOD") to City as more particularly described in Exhibits "A" and "B" of the IOD attached hereto as Attachment "1" ("Perris/Ironwood Settlement").

J. City and District agree that a portion of the City Property as more particularly described in Exhibits "A" and "B" of the Grant Deed attached hereto as Attachment "2" ("Fee Property") and Exhibits "A" and "B" of the Easement Deed attached hereto as Attachment "3" ("Easement"), both of which are incorporated herein by reference, shall be granted to the District on the terms and conditions set forth below.

K. The City and District met to discuss the District's intended use of the City Property. The District's intended use of the site was discussed and presented in a form of a draft site layout. The existing City water quality features at the City property were discussed. City staff was informed that certain State regulations exist with respect to the District's intended use of the City Property (e.g. minimum distances from open bodies of water, minimum distances from infiltration areas, etc.).

L. In order to meet certain State regulations, the City's existing water quality features present a problem for the District's intended use of the City Property. City staff investigated improvements for the water quality features to facilitate the District's intended use of the City Property ("Water Quality Feature Improvements"). Said improvements to be made by the City is estimated to cost $197,000, which City intends to construct using City funds.

M. City shall receive a MOU credit not to exceed $98,500 or fifty percent of the actual cost of the Water Quality Feature Improvements, whichever is less. The credit shall be realized by District no later than thirty (30) days after City has provided District with the invoice showing the actual cost of the Water Quality Feature Improvements.

NOW, THEREFORE, FOR AND IN CONSIDERATION OF THE MUTUAL PROMISES, COVENANTS AND CONDITIONS CONTAINED HEREIN, DISTRICT AND CITY AGREE AS FOLLOWS:

SECTION 1
PURCHASE PRICE AND GENERAL RELEASE

1.1 Fair Market Value. The Parties agree that the appraisal prepared on behalf of the District for the Fee Property and Easement established a fair market value of Forty-Three

Thousand Two Hundred Dollars ($43,200) for the Fee Property and Twenty-One Thousand Eight Hundred and Fifty-Nine Dollars ($21,859) for the Easement.

1.2 Purchase Price. City agrees to grant to District the Fee Property and Easement for Sixty-Five Thousand Fifty-Nine Dollars ($65,059) ("Purchase Price").

1.3 Credits to District.

a. Perris/Ironwood Settlement. Upon District depositing into escrow a fully executed IOD, Escrow shall provide District with a buyer credit of $50,000 towards the Purchase Price.

b. MOU Credit. After applying the Perris and Ironwood Settlement credit, Escrow shall provide District a buyer credit of $15,059 towards the Purchase Price.

1.4 Full Compensation and Mutual Releases. Excepting the duties and obligations imposed by this Agreement and the MOU, each Party does hereby and for its elected officials, directors, officers, shareholders, employees, agents, attorneys, accountants, expert witnesses, representatives, successors, and assigns, release and forever discharge each other Party and its elected officials, directors, officers, shareholders, employees, agents, attorneys, accountants, expert witnesses, representatives, successors, and assigns from any and all claims, actions, causes of action, demands, rights, damages, fees, costs, expenses, and compensation whatsoever, including without limitation, severance damages, if any, pre-condemnation damages, if any, loss of business goodwill, if any, costs, interest, attorneys' fees, relocation assistance or benefits and moving expense due or compensable under the relocation laws, and any claim for compensation or other legal remedy of whatever kind or nature, tangible or intangible, direct or consequential relating to the acquisition of the Fee Property and Easement and the City Improvements.

Except as expressly provided herein, the Parties, by signing this Agreement, agree and warrant that they have read, understand, and expressly release and waive the provisions of California Civil Code Section 1542, which reads as follows:

> **"A general release does not extend to claims that the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release and that, if known by him or her, would have materially affected his or her settlement with the debtor or released party."**

(City's Initial) _____ ***(District's Initial)*** _____

SECTION 2
DUE DILIGENCE AND CONDITION OF TITLE

2.1 Right to Inspect Property. District and its agents, contractors, consultants, employees, representatives, engineers, and designees (collectively, "Districts Agents") shall have reasonable access to the Fee Property at all reasonable times from the Effective Date until the Close of Escrow (or earlier termination of this Agreement), during normal business hours, for the purpose of conducting tests and inspections of the Fee Property, including surveys and architectural, engineering, geotechnical and environmental inspections and tests, or conducting any pre-construction or actual construction activities in connection with this Agreement. As a condition of any such entry, inspection or testing, District shall comply with the following: (a) comply with all applicable laws and governmental regulations; (b) keep the Fee Property free and clear of all mechanic's liens and material men's liens, lis pendens and other liens arising out of the entry and work performed by or on behalf of District; (c) shall notify the City a minimum of 48 hours of District's intent to enter Fee Property and/or Easement.

District shall immediately indemnify, defend and hold harmless City from and against any damages, liability or expense (including reasonable attorney's fees) arising from the entries of District and District Agents upon the Fee Property and Easement; provided, however, the indemnity shall not extend to protect City from any pre-existing liabilities for matters merely discovered by the District (e.g., latent environmental contamination).

2.2 Property Information. Within five (5) days of the Effective Date of this Agreement, City shall deliver or make available to District each of the following documents and information in the City's possession, or under the control of City, regarding the Fee Property and Easement (the "Property Information"):

a. All licenses, leases, and permits affecting or relating to the ownership, subdivision, possession or development of the Fee Property and Easement or the construction of improvements thereon, and all amendments and modifications thereto;

b. applications and correspondence or other written communications to or from any governmental entity, department or agency other than the District regarding any permit, approval, consent or authorization with respect to the development of the Fee Property and Easement or the construction of improvements thereon;

c. the most recent survey, if any, pertaining to the Fee Property and Easement or any portion thereof; and

d. soils reports, engineering data, environmental reports, and other data or studies pertaining to the Fee Property and Easement, or any portion thereof, that have not been previously delivered to District or its consultants.

2.3 Environmental Inspections. The inspections under this Article 2 may include a Phase I environmental assessment of the Fee Property and Easement, and if recommended by the Phase I environmental assessment, a Phase II environmental assessment. District shall give City a copy of all Environmental Assessments prepared on behalf of District for the Fee Property and Easement.

2.4 Title Review. Within fifteen (15) days of the Effective Date, District shall cause Title Company to deliver to District and City a Preliminary Title Report for the Fee Property and Easement, along with all exceptions and a color-coded map depicting each exception.

a. District shall review title to the Fee Property and Easement as disclosed in the Preliminary Title Report and may deliver to City any objections District has to the Title and City shall, within ten (10) days following such notice, advise District of City's intent to remedy any such objections. In the event City advises District that City is not willing to remedy any of the objections, then District may (i) terminate this Agreement by giving written notice to City and Escrow Agent prior to expiration of the Due Diligence Period; or (ii) proceed to Closing and in such case, said objections shall become part of the Permitted Exceptions (as herein defined).

b. Notwithstanding any language herein to the contrary, if any monetary lien (including, but not limited to, mechanic's liens or liens for delinquent unpaid taxes and assessments) is not released by City prior to Closing, then a portion of the Purchase Price shall be applied by Escrow Agent as necessary to release the monetary lien to District's reasonable satisfaction, and the Purchase Price proceeds payable to City shall be reduced accordingly. The term "Permitted Exceptions" means (i) standard exceptions contained in the title insurance policy form, (ii) the specific title exceptions contained in the title insurance policy form that the Title Company has not agreed to insure over or remove from the Title Commitment and that City is unwilling to remove as provided above; (iii) items which would be disclosed by an accurate ALTA survey of the Property; and (iv) real estate taxes not yet due and payable.

c. In the event the Title Company amends or updates the Title Commitment after expiration of the Due Diligence Period but before the Closing Date, (each, a "Title Report Update") and such Title Report Update discloses a new title exception not previously known to District and which was not created or

permitted by District, then District may either (i) terminate this Agreement by giving written notice to City within ten (10) business days after its receipt of such Title Report Update (the "Title Update Due Diligence Period"), or (ii) require City to remove the exception prior to Closing, or (iii) waive the exception and proceed to Closing.

d. From the Effective Date until the earlier of termination of this Agreement or Close of Escrow, City shall not encumber the Fee Property and Easement with any additional monetary liens. Additionally, City shall not take any affirmative action from the Effective Date until Close of Escrow which results in the imposition of any additional exceptions to title to the Fee Property and Easement, without first obtaining Districts written consent.

2.5 Due Diligence Contingency. District may disapprove its due diligence investigation of the Fee Property and Easement in District's sole and absolute discretion. In the event District disapproves of the condition of the Fee Property and/or Easement, for any reason, then District may terminate this Agreement at any time prior to expiration of the Due Diligence Period by giving written notice to City, in which event this Agreement shall terminate and the escrow deposit, if any, and any accrued interest shall be immediately returned by Escrow Agent to District, without any further instructions or direction from any party hereto.

SECTION 3
ESCROW INSTRUCTIONS

3.1 Escrow Agent/Title Company. First American Title Company in its Riverside Office located at 3400 Central Avenue, Ste. 100, Riverside, CA 92506 shall act as the Title Company and Escrow Agent for this transaction.

3.2 Escrow Instructions. This Agreement, together with any standard instructions of Escrow Agent, shall constitute the joint escrow instructions of District and City to Escrow Agent, as well as an agreement between District and City. In the event of any conflict between the provisions of this Agreement and Escrow Agent's standard instructions, this Agreement shall prevail.

3.3 Close of Escrow. The closing of the escrow shall occur on or before **February 28, 2021 or a date for which the parties agree by written amendment**, prepared by Escrow Agent and signed by both City and District ("Close of Escrow").

3.4 Payment of Costs. District shall pay 100% of normal and customary escrow fees/charges and for the ALTA Standard title policy premium.

3.5 Commission. City and the District each represent and warrant to the other that no broker or finder is entitled to any commission or finder's fee in connection with this

transaction, and each agrees to defend and hold harmless the other from any claim to any such commission or fee resulting from any action on its part.

3.6 Proration of Real Property Taxes. Both District and City are public entities and not required to pay property taxes. If any property taxes and/or assessments are charged by the County Assessor during the period of City's ownership of the Fee Property, City shall be responsible for the payment. City may apply for a refund for any portion of taxes and assessments paid by City and allocated to any period after the Closing Date, in accordance with the applicable provisions of the Revenue and Taxation Code.

3.7 Nature Hazard Disclosure. The Parties hereby instruct Escrow Agent to obtain and deliver to District within three (3) days after the Effective Date a Natural Disclosure Statement disclosing whether the Fee Property and/or Easement is located within any of the following: (a) a special flood hazard area designated by the Federal Emergency Management Agency; (b) an area of potential flooding; (c) a very high fire hazard severity zone; (d) an earthquake fault or special studies zone; or (e) a seismic hazard zone.

3.8 General Provisions Applicable to Escrow Agent. The following general provisions shall be applicable to the Escrow Agent.

a. All disbursements shall be made by check or bank wire of the Escrow Agent. All funds received in the Escrow shall be deposited in a separate interest-earning escrow account with any bank doing business in the State of California and approved by District.

b. The Parties to the Escrow jointly and severally agree to pay all costs, damages, judgments and expenses, including reasonable attorneys' fees, suffered or incurred by the Escrow Agent in connection with, or arising out of the Escrow, including, but without limiting the generality of the foregoing, a suit in interpleader brought by the Escrow Agent. In the event that the Escrow Agent files a suit in interpleader, the Escrow Agent shall be fully released and discharged from all obligations imposed upon the Escrow Agent in the Escrow.

c. All proration's and/or adjustments called for in the Escrow shall be made on the basis of a thirty (30) day month unless the Escrow Agent is otherwise instructed in writing.

3.9 Authority of Escrow Agent. The Escrow Agent is authorized to, and shall:

a. If applicable, pay and charge District for any Escrow Costs, charge District for the cost of drawing the Grant Deed, recording fees, notary fees and any state, county or local documentary transfer fees;

b. pay and charge the District for the premium of the Title Policy and, if applicable, pay and charge the District for any upgrade of the Title Policy or Additional Endorsements to the Title Policy which are requested by District;

c. disburse funds and record and deliver to District the Grant Deed when both District's Conditions and the City's Closing Conditions to the Closing are satisfied or waived in writing by the Party for whom the condition was established, provided, however, that funds deposited as part of the Purchase Price shall not be disbursed by the Escrow Agent unless and until the Escrow Agent has recorded the Grant Deed and delivered the Title Policy to District;

d. insert the Effective Date in the introductory paragraph of this Agreement and the appropriate amounts and date of the Closing in documents deposited by the Parties in Escrow;

e. do such other actions as necessary to fulfill the Escrow Agent's obligations under this Agreement, including, if applicable, obtaining the Title Policy and recording any instrument delivered through Escrow if necessary and proper in the issuance of the Title Policy;

f. within the discretion of the Escrow Agent, direct District and City to execute and deliver any instrument, affidavit or statement, and to perform any act reasonably necessary and/or applicable to comply with the provisions of FIRPTA and any similar state act or regulation promulgated thereunder. City agrees to execute a Certificate of Non-Foreign Status by individual transferor, a Certificate of Compliance with Real Estate Reporting Requirement of the 1986 Tax Reform Act and/or a California Franchise Tax Board Form 590 or similar form, if applicable, to assure District that there exist no withholding requirements imposed by application of law as may be required by the Escrow Agent, on forms supplied by the Escrow Agent;

g. prepare and file with all appropriate governmental or taxing authorities a uniform settlement statement, closing statement, tax withholding forms, including an IRS 1099-S form, and be responsible for withholding taxes, if any such forms and/or withholding are provided for or required by law; and

h. prepare and deliver to District and City for their review and approval prior to the Closing an estimated settlement statement.

3.10 Submittals into Escrow. The Parties shall submit documents and funds into Escrow as set forth in this Section.

a. Submittals by City.

i. At least two (2) days prior to the Closing, City shall submit into Escrow the original Certificate of Acceptance of the IOD duly executed by City.

ii. At least two (2) days prior to the Closing, City shall submit into Escrow the original Grant Deed duly executed by City and acknowledged substantially in the form attached hereto as Attachment "2".

iii. At least two (2) days prior to the Closing, City shall submit into Escrow the original Easement Deed duly executed by City and acknowledged substantially in the form attached hereto as Attachment "3"

iv. At least two (2) days prior to the Closing, funds to cover all closing costs to be paid by City, if any.

v. A non-foreign transferor affidavit in a form acceptable to Escrow Agent, if applicable.

vi. An executed Internal Revenue Form W-9 or 1099-S form, if applicable.

b. Submittals by District.

i. At least two (2) days prior to the Closing, District shall submit into Escrow the original IOD duly executed by District and acknowledged, substantially in the form attached hereto as Attachment "1".

ii. At least two (2) days prior to the Closing, District shall submit into Escrow the original Certificate of Acceptance of the Grant Deed duly executed by District.

iii. At least two (2) days prior to the Closing, District shall submit into Escrow the original Certificate of Acceptance of the Easement Deed duly executed by District.

iv. At least two (2) days prior to the Closing, funds equal to the Purchase Price, along with sufficient funds to cover all closing costs to be paid by District, if any.

3.11 Closing Procedure. The Escrow Agent shall close the Escrow as follows:

a. Record the Grant Deed, Easement Deed and Irrevocable Offer of Dedication with the Riverside County Recorder's Office;

b. deliver the Title Policy issued by the Title Company to the District;

c. file any informational reports required by Internal Revenue Code Section 6045(e), as amended and any other applicable requirements;

d. deliver the FIRPTA Certification, if required;

e. forward to District and City a separate accounting of all funds received and disbursed for each Party and copies of all executed, recorded or filed documents deposited into Escrow, with such recording and filing date and information endorsed thereon.

SECTION 4
REPRESENTATIONS AND WARRANTIES

4.1 City's Representations. City hereby makes the following representations, covenants and warranties and acknowledges that the execution of this Agreement by District has been made and the acquisition by District of the Fee Property and Easement will have been made in material reliance by District on such covenants, representations and warranties.

a. Authority. City has full right, power and lawful authority to undertake all obligations as provided herein and the execution, performance and delivery of this Agreement by City has been fully authorized by all requisite actions on the part of the City.

b. Execution of Agreement/Conflicts. This Agreement and all other documents to be executed by City hereunder will, upon execution and delivery thereof, have been duly executed by City and will constitute legal, valid and binding obligations of City, and neither the execution of this Agreement nor the performance of City's obligations hereunder will result in a default by City under any agreement or contract to which City is a party.

c. No Conflict. To the best of the City's knowledge, the City's execution, delivery and performance of its obligations under this Agreement will not constitute a

default or a breach under any contract, agreement or order to which the City is a party or by which it is bound.

d. Existing Agreements. City has not entered into any agreements with any other party to sell or convey the Fee Property or any portion thereof and the Fee Property is not subject to any options or rights of first refusal.

e. No Bankruptcy. The City is not the subject of a bankruptcy, insolvency or receivership proceeding of any kind, whether voluntary or involuntary.

f. Possession. There are no leases or other agreement relating to the right of possession or occupancy of the Fee Property.

g. Title. The City holds a fee title interest in the Fee Property and Easement.

h. Hazardous Substances Disclosure. To City's knowledge, and except as otherwise set forth in the Property Documents or Title Report, the Fee Property and Easement have not at any time been used for the purposes of storing, manufacturing, releasing or dumping Hazardous Materials or Substances. City warrants and represents to District that City is not aware of any Hazardous or Toxic Material or substance located on or beneath the Fee Property and Easement conveyed hereunder. If City becomes aware of any hazardous or toxic material or substance located on or beneath the Fee Property and Easement conveyed hereunder prior to the Closing, City shall, in writing, within ten (10) days, notify District.

"Hazardous Materials" or "Substances" means any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "acutely hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as a "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely

hazardous" pursuant to Article 11 of Title 22 of the California Code of Regulations, Chapter 20, (ix) designated as "hazardous substances" pursuant to Section 311 of the Clean Water Act (33 U.S.C. Section 1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. Section 6901 et seq. (42 U.S.C. Section 6903), (xi) defined as "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. Section 9601 et seq., (xii) methyl-tert butyl ether, or (xiii) any other substance, whether in the form of a solid, liquid, gas or any other form whatsoever, which by any Governmental Requirements either requires special handling in its use, transportation, generation, collection, storage, handling, treatment or disposal, or is defined as "hazardous" or harmful to the environment.

4.2 Governmental Compliance. To the best of the City's knowledge, the City has not received any notice from any governmental agency or authority alleging that the Fee Property is currently in violation of any law, ordinance, rule, regulation or requirement applicable to its use and operation. If any such notice or notices are received by the City, City shall, in writing, within ten (10) days of receipt of such notice, notify District.

All representations and warranties contained herein shall be true and correct on the date hereof and on the Close of Escrow and City's liability from misrepresentation of or breach of warranty, representation or covenant, wherever contained in this Agreement, shall survive the execution and delivery of this Agreement and the Close of Escrow for a period of two (2) years.

If City becomes aware of any act or circumstance which would change or render incorrect, in whole or in part, any representation or warranty by City under this Agreement, whether as of the date given or any time thereafter through the Close of Escrow and whether or not such representation or warranty was based upon City's knowledge and/or belief as of a certain date, then City will give immediate written notice of such changed fact or circumstance to District. City shall not take or authorize, directly or indirectly, any action which would prevent City from representing and warranting as to the truth and accuracy of the statements in Section 4.0 as of the Close of Escrow.

4.3 District's Representations. District represents and warrants to City as of the Effective Date as follows:

a. Authority. District is a public agency organized and existing under and by virtue of the Municipal Water District Law of 1911 and in good standing under the laws of the State of California. District has full right, power and lawful authority to undertake all obligations as provided herein and the execution, performance and delivery of this Agreement by District have been fully authorized by all requisite actions on the part of the District.

b. Execution of Agreement/Conflicts. This Agreement and all other documents to be executed by District hereunder will, upon execution and delivery thereof, have been duly executed by District and will constitute legal, valid and binding obligations of District, and neither the execution of this Agreement nor the performance of District's obligations hereunder will result in a default by District under any agreement or contract to which District is a party.

c. No Conflict. To the best of the District's knowledge, the District's execution, delivery and performance of its obligations under this Agreement will not constitute a default or a breach under any contract, agreement or order to which the District is a party or by which it is bound.

d. Existing Agreements. District has not entered into any agreements with any other party to sell or convey the District Property being conveyed hereunder, or any portion thereof, and the District Property being conveyed hereunder is not subject to any options or rights of first refusal.

e. No Bankruptcy. The District is not the subject of a bankruptcy, insolvency or receivership proceeding of any kind, whether voluntary or involuntary.

f. Possession. There are no leases or other agreement relating to the right of possession or occupancy of the District Property being conveyed hereunder.

g. Title. The District holds a fee title interest in the District Property.

h. Hazardous Substances Disclosure. To District's knowledge, and except as otherwise set forth in the Property Documents or Title Report, the District Property being conveyed hereunder to City has not at any time been used for the purposes of storing, manufacturing, releasing or dumping Hazardous Materials or Substances. District warrants and represents to City that District is not aware of any Hazardous or Toxic Material or substance located on or beneath the District Property being conveyed hereunder. If District becomes aware of any hazardous or toxic material or substance located on or beneath the District Property being conveyed hereunder prior to the Closing, District shall, in writing, within ten (10) days, notify City.

"Hazardous Materials" or "Substances" means any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "acutely hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant

to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as a "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Code of Regulations, Chapter 20, (ix) designated as "hazardous substances" pursuant to Section 311 of the Clean Water Act (33 U.S.C. Section 1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. Section 6901 et seq. (42 U.S.C. Section 6903), (xi) defined as "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. Section 9601 et seq., (xii) methyl-tert butyl ether, or (xiii) any other substance, whether in the form of a solid, liquid, gas or any other form whatsoever, which by any Governmental Requirements either requires special handling in its use, transportation, generation, collection, storage, handling, treatment or disposal, or is defined as "hazardous" or harmful to the environment.

4.4 Governmental Compliance. To the best of the District's knowledge, the District has not received any notice from any governmental agency or authority alleging that the District Property being conveyed hereunder is currently in violation of any law, ordinance, rule, regulation or requirement applicable to its use and operation. If any such notice or notices are received by the District, District shall, in writing, within ten (10) days of receipt of such notice, notify City.

All representations and warranties contained herein shall be true and correct on the date hereof and on the Close of Escrow and District's liability from misrepresentation of or breach of warranty, representation or covenant, wherever contained in this Agreement, shall survive the execution and delivery of this Agreement and the Close of Escrow for a period of two (2) years.

If District becomes aware of any act or circumstance which would change or render incorrect, in whole or in part, any representation or warranty by District under this Agreement, whether as of the date given or any time thereafter through the Close of Escrow and whether or not such representation or warranty was based upon District's knowledge and/or belief as of a certain date, then District will give immediate written notice of such

changed fact or circumstance to City. District shall not take or authorize, directly or indirectly, any action which would prevent District from representing and warranting as to the truth and accuracy of the statements in this section as of the Close of Escrow.

SECTION 5
CLOSING CONDITIONS

5.1 District's Conditions to Closing. In addition to any other condition set forth in this Agreement in favor of District, District shall have the right to condition its obligation to purchase the Fee Property and Easement Deed and close the escrow upon the satisfaction, or written waiver by District, of each of the following conditions precedent on the Closing Date or such earlier time as provided for herein (collectively, "City Closing Conditions"):

a. City's Due Performance. All of the representations and warranties of City set forth in this Agreement shall be true, correct and complete in all material respects as of the Closing, and City, on or prior to the Closing, shall have complied with and/or performed all of the material obligations, covenants and agreements required on the part of City to be complied with or performed pursuant to the terms of this Agreement, including the execution and delivery by City of all closing documents required under this Agreement.

b. Delivery of Title Policy at Closing. The Title Company is unconditionally and irrevocably committed to issue to District at Closing a CLTA standard coverage owner's title policy, or, upon District's request, an ALTA extended coverage owner's policy of title insurance, insuring District's title to the Fee Property and Easement in the amount of the Purchase Price, subject only to the standard exceptions and exclusions from coverage contained in such form of the policy and title exceptions that District approved.

c. Property Condition. No material adverse change shall have occurred to the condition of the Fee Property from and after the expiration of the Due Diligence Period. The District acknowledges that the Easement crosses a water quality feature, and that the City intends to make improvements to the water quality features on the City Property.

d. No Rights to Use or Possess Property. The Fee Property and Easement shall be free from any tenant leases, tenancies, licenses, or other agreements, allowing any person or entity the right to use or possess the Fee Property and Easement.

e. Bankruptcy. There shall not have occurred at any time on or before the Closing Date the making by City of any general assignment for the benefit of creditors, or the filing against City of a petition to have City adjudged a bankrupt or a

petition for reorganization or arrangement under any law relating to bankruptcy, or the appointment of a trustee or receiver to take possession of substantially all of the interest of City in the Property, or the attachment, execution or judicial seizure of substantially all the assets of City or the interests of City in the Fee Property and Easement or any legal proceeding in which City is adjudicated as being, or stipulates to being, insolvent or unable to pay City's debts as they come due.

f. Deposit of Funds. City shall have deposited all funds and shall have made all payments required to be deposited and made by City, if any, for the Closing pursuant to this Agreement.

g. No Litigation. No litigation shall be pending or threatened by any third parties which seek to enjoin the transactions contemplated herein.

5.2 City's Closing Conditions. In addition to any other condition set forth in this Agreement in favor of City, City shall have the right to condition its obligation to convey the Fee Property and Easement and close the escrow upon the satisfaction, or written waiver by City, of each of the following conditions precedent on the Closing Date or such earlier time as provided for herein (collectively, "City Closing Conditions"):

a. District's Due Performance. All of the representations and warranties of District set forth in this Agreement shall be true, correct and complete in all material respects as of the Closing, and District, on or prior to the Closing, shall have complied with and/or performed all of the material obligations, covenants and agreements required on the part of District to be complied with or performed pursuant to the terms of this Agreement, including the execution and delivery by District of all closing documents required under this Agreement.

b. Property Condition. No material adverse change shall have occurred to the condition of the District Property being conveyed hereunder from and after the expiration of the Due Diligence Period.

c. Bankruptcy. There shall not have occurred at any time on or before the Closing Date the making by District of any general assignment for the benefit of creditors, or the filing against District of a petition to have District adjudged a bankrupt or a petition for reorganization or arrangement under any law relating to bankruptcy, or the appointment of a trustee or receiver to take possession of substantially all of the interest of District in the District Property being conveyed hereunder, or the attachment, execution or judicial seizure of substantially all the assets of District or the interests of District in the District Property being conveyed hereunder or any legal proceeding in which District

is adjudicated as being, or stipulates to being, insolvent or unable to pay District's debts as they come due.

d. Deposit of Funds. District shall have deposited all funds and shall have made all payments required to be deposited and made by District, if any, for the Closing pursuant to this Agreement.

e. No Litigation. No litigation shall be pending or threatened by any third parties which seek to enjoin the transactions contemplated herein.

5.3 Satisfaction of Conditions. Where satisfaction of any of the foregoing conditions requires action by District or City, each party shall use their diligent efforts, in good faith, and at its own cost, to satisfy such condition.

5.4 Waiver of Conditions to Closing. Each of the Parties may at any time or time, at its election, waive any of the conditions set forth in in Section 5 to its obligations hereunder, but any such waiver shall be effective only if contained in a writing signed by both Parties and delivered to Escrow Agent.

5.5 Termination. In the event each of the Closing Conditions set forth in Section 5 are not fulfilled prior to the Close of Escrow, or such earlier time period as provided for herein or waived by either of the Parties, and provided that the terminating party is not in Default of this Agreement, the party may at its option terminate this Agreement and the escrow opened hereunder.

No termination under this Agreement shall release any party then in default from liability for such default. In the event of such termination or any other termination hereunder, the parties agree neither this Agreement, nor any of the negotiations leading up to it, shall constitute nor serves as evidence of any unreasonable delay or other unreasonable pre-condemnation conduct.

SECTION 6
DEFAULTS AND REMEDIES

6.1 Default. In the event of a default by any party under this Agreement, the non-defaulting party shall provide written notice to the defaulting party of the existence of such default, and the defaulting party shall have a period ten (10) days after receipt of such written notice to cure such default; provided, however, if such default cannot reasonably be cured within ten (10) days, the defaulting party shall not be in default if such party commences to cure the default within such ten (10) day period and diligently and in good faith continues to cure the same thereafter. As used in this Agreement, the term "Default" shall refer to a default by a party that is not timely cured as set forth above. In the event of a Default by any party under this Agreement, the non-defaulting party shall have all right and remedies for such breach available at law or in equity, including without limitation the remedy of specific performance.

6.2 Inaction Not a Waiver of Default. Any failures or delays by either Party in asserting any of its rights and remedies as to any Default shall not operate as a waiver of any Default or of any such rights or remedies, or deprive either such Party of its right to institute and maintain any actions or proceedings which it may deem necessary to protect, assert or enforce any such rights or remedies.

6.3 Applicable Law. The laws of the State of California shall govern the interpretation and enforcement of this Agreement. Any legal actions must be instituted in the Superior Court of the County of Riverside, State of California, in an appropriate municipal court in Riverside County, or in the United States District Court for District of California in which Riverside County is located.

SECTION 7
GENERAL PROVISIONS

7.1 Rights and Remedies Are Cumulative. Except as otherwise expressly stated in this Agreement, the rights and remedies of the Parties are cumulative, and the exercise by either Party of one or more of such rights or remedies shall not preclude the exercise by it, at the same or different times, of any other rights or remedies for the same Default or any other Default by the other Party.

7.2 No Third Party Rights. The Parties intend that no rights or remedies be granted to any third party as a beneficiary of this Agreement or of any covenant, duty, obligation or undertaking established herein.

7.3 Counterparts. This Agreement may be signed in multiple counterparts which, when signed by all Parties, shall constitute a binding agreement.

7.4 Integration. This Agreement contains the entire understanding between the Parties relating to the transaction contemplated by this Agreement. All prior or contemporaneous agreements, understandings, representations and statements, oral or written, are merged in this Agreement and shall be of no further force or effect. Each Party is entering this Agreement based solely upon the representations set forth herein and upon each Party's own independent investigation of any and all facts such party deems material. This Agreement and Attachments 1, 2 and 3 hereto constitute the entire understanding and agreement of the Parties, notwithstanding any previous negotiations or agreements between the Parties or their predecessors in interest with respect to all or any part of the subject matter hereof.

7.5 Enforced Delay; Extension of Times of Performance. In addition to specific provisions of this Agreement, performance by either Party hereunder shall not be deemed to be in Default, and all performance and other dates specified in this Agreement shall be extended, where delays or Defaults are due to: war; insurrection; strikes; lockouts; riots; civil disturbances;

floods; earthquakes; fires; casualties; acts of God; acts of the public enemy; epidemics; quarantine; restrictions; freight embargoes; lack of transportation; governmental restrictions or priority; litigation; unusually severe weather; inability to secure or delays in securing necessary labor, materials or tools; delays of any contractor, subcontractor or supplier; delays due to the existence or remediation of Hazardous Materials (other than as provided in this Agreement); acts or omissions of the other Party; acts or failures to act of the District, acting in its governmental capacity, or any other public or governmental entity (other than the acts or failures to act of District hereunder which shall not excuse performance by District); or any other inability or cause beyond the control or without the fault of the Party claiming an extension of time to perform. Notwithstanding anything to the contrary in this Agreement, an extension of time for any such cause shall be for the period of the enforced delay and shall commence to run from the time of the commencement of the cause, if notice by the Party claiming such extension is sent to the other Party within thirty (30) days of the commencement of the cause. If such notice is delivered after such thirty (30) day period, the extension period shall commence to run from the date of such notice. Times of performance under this Agreement may also be extended in writing by the mutual agreement of City and District. The Parties agree to consider requests for such extensions in good faith and with intent to cooperate toward the implementation of the activities contemplated by this Agreement.

7.6 Attorneys' Fees. In any action between the Parties to interpret, enforce, reform, modify, rescind, or otherwise in connection, with any of the terms or provisions of this Agreement, the prevailing Party in the action shall be entitled, in addition to damages, injunctive relief, or any other relief to which it might be entitled, reasonable costs and expenses including, without limitation, litigation costs and reasonable attorneys' fees.

7.7 Notices, Demands and Communications Between the Parties. Any notices, requests, demands, documents, approvals or disapprovals given or sent under this Agreement from one Party to another (collectively, "Notices") may be personally delivered or deposited with the United States Postal Service for mailing, postage prepaid, to the address of the other Party as stated in this Section, and shall be deemed to have been given or sent at the time of personal delivery or, if mailed, on the third day following the date of deposit in the course of transmission with the United States Postal Service. Notices shall be sent as follows:

If to City:
City of Moreno Valley
14177 Frederick Street
Moreno Valley, CA 92553
Attention: Engineering Division Manager/Assistant City Engineer

If to District:
Eastern Municipal Water District
2270 Trumble Road
Perris, CA 92572-8300
Attention: Real Property Manager

7.8 Severability. To the best knowledge and belief of the Parties to this Agreement, this Agreement contains no provision that is contrary to any federal, state or local law or to any regulatory requirement or other ruling or regulation of a federal, state or local agency that would be in breach of the obligations of either or both of the Parties under the terms and provisions of any legally binding agreement. However, if any provision of this Agreement or any part thereof, shall at any time be held to be invalid, in whole or in part, under any applicable federal, state or local law by a court of competent jurisdiction, or by arbitrators or an administrative agency of the federal, state or local government with proper jurisdiction, then such provision or a portion thereof, as appropriate, shall be curtailed and limited only to the extent necessary to bring it within the requirements of the law; in such event, the validity and enforceability of the remaining provisions of this Agreement shall remain in effect and shall in no way be affected, impaired or invalidated, unless the invalidated provision(s) shall uniquely, materially and adversely affect the rights and obligations of a Party to this Agreement.

7.9 Legal Advice. Each Party represents and warrants to the other the following: they have carefully read this Agreement, and in signing this Agreement, they do so with full knowledge of any right which they may have; they have received independent legal advice from their respective legal counsel as to the matter set forth in this Agreement, or have knowingly chosen not to consult legal counsel as to the matters set forth in this Agreement; and, they have freely signed this Agreement without any reliance upon any agreement, promise, statement or representation by or on behalf of the other Party, or their respective agents, employees, or attorneys, except as specifically set forth in this Agreement, and without duress or coercion, whether economic or otherwise.

7.10 Authority. Each individual executing this Agreement individually or on behalf of a corporation, nonprofit corporation, trust, partnership or other entity or organization, represents and warrants that he or she is duly authorized to execute and deliver this Agreement and that this Agreement is binding upon the same in accordance with its terms.

7.11 Titles and Captions. Titles and captions are for convenience of reference only and do not define, describe or limit the scope or the intent of this Agreement or of any of its terms. Reference to section numbers is to sections in this Agreement, unless expressly stated otherwise.

7.12 Interpretation. As used in this Agreement, masculine, feminine or neuter gender and the singular or plural number shall each be deemed to include the others where and when the context so dictates. The word "including" shall be construed as if followed by the words "without limitation." This Agreement shall be interpreted as though prepared jointly by both Parties.

7.13 No Waiver. A waiver by either Party of a breach of any of the covenants, conditions or agreements under this Agreement to be performed by the other Party shall not be construed as a waiver of any succeeding breach of the same or other covenants, agreements, restrictions or conditions of this Agreement.

7.14 Modifications. Any alteration, change or modification of or to this Agreement, in order to become effective, shall be made in writing and in each instance signed on behalf of each Party. The District and City agree to mutually consider reasonable requests for amendments to this Agreement that may be made by any of the Parties hereto, provided such requests are consistent with this Agreement and would not substantially alter the basic terms included herein.

7.15 City MOU Credit. Upon the Closing of Escrow, District shall credit City the amount of $15,059, plus the credit as identified in RECITAL M, towards City's reimbursement for their portion of the Nason Street Booster Station relocation costs under the MOU.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the respective dates set forth below:

IRREVOCABLE OFFER OF DEDICATION

FOR VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, **EASTERN MUNICIPAL WATER DISTRICT,** a public agency organized and existing under and by virtue of the Municipal Water District Law of 1911 ("Grantor") does hereby grant to the **CITY OF MORENO VALLEY**, a municipal corporation, ("Grantee") an irrevocable offer of dedication of an easement for road and public utilities purposes for public use in, on, over, under, upon, above, along and across the land in the City of City of Moreno, County of Riverside, State of California, described and depicted in Exhibits "A" and "B" attached hereto and incorporated by reference herein ("Easement Area").

Grantee, by the acceptance of this offer of dedication, hereby agrees that Grantor may have facilities located within the Easement Area pursuant to rights superior to those of the Grantee. If Grantee requires the relocation/adjustment of Grantor's facilities to accommodate

any future projects by Grantee, Grantor's facilities shall be relocated/adjusted at the Grantee's sole expense.

EASEMENT DEED

FOR VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, the **CITY OF MORENO VALLEY,** a municipal corporation (hereinafter referred to as "Grantor"), does hereby grant to **EASTERN MUNICIPAL WATER DISTRICT,** a public agency organized and existing under and by virtue of the Municipal Water District Law of 1911, its successors and assigns (hereinafter referred to as "Grantee"), a non-exclusive public service easement in, on, over, under, upon, above, along and across the land in the City of Moreno Valley, County of Riverside, State of California, described and depicted in Exhibits "A" and "B" attached hereto and incorporated by reference herein ("Easement Area"), together with all rights of ingress and egress thereto, including the right to enter onto the Easement Area with such vehicles, machinery, and equipment as may be necessary or convenient to the construction, reconstruction, installation, replacement, reconfiguration, operation, maintenance, repair, relocation, removal, inspection, observation, and study of said facilities, pipelines, equipment, structures and/or appurtenances.

Except as otherwise provided herein, Grantee has the right to prevent any activity on or use of the Easement Area that (a) is inconsistent with the purposes of this Easement Deed; (b) interferes with or is harmful to Grantee's rights herein; or (c) interferes with or is harmful to Grantee's facilities, pipelines, equipment and/or appurtenances. Grantor agrees not to use or allow the use of the Easement Area in such a way as to impede, harm, or interfere with the Grantee's rights as defined herein or Grantee's facilities, pipelines, equipment, structures and/or appurtenances.

Each Party represents and warrants that they have carefully read this Easement Deed, and in signing this Easement Deed, they do so with full knowledge of any right which they may have; they have received independent legal advice from their respective legal counsel as to the matters set forth in this Easement Deed, or have knowingly chosen not to consult legal counsel as to the matters set forth in this Easement Deed; and, they have freely signed this Easement Deed without any reliance upon any agreement, promise, statement or representation by or on behalf of the other Party, or their respective agents, employees, or attorneys, except as specifically set forth in this Easement Deed, and without duress or coercion, whether economic or otherwise.

General Manager
Eastern Municipal Water District
P.O. Box 8300
Perris, CA 92572-8300

Subject: Memorandum of Understanding for the Relocation of the Eastern Municipal Water District Booster Station

Dear General Manager:

At its special meeting of July 26, 2011, the Moreno Valley City Council authorized the execution of the above-subject agreement. Enclosed is the original, fully-executed agreement.

If you have any questions regarding these documents, please do not hesitate to contact Clement Jimenez, Senior Engineer, at 951. 413.3121. Thank you for your cooperation.

Sincerely,

Jane Halstead
City Clerk

Enclosure

MEMORANDUM OF UNDERSTANDING FOR THE RELOCATION OF THE EASTERN MUNICIPAL WATER DISTRICT BOOSTER STATION

THIS MEMORANDUM OF UNDERSTANDING ("Agreement") is made by and between EASTERN MUNICIPAL WATER DISTRICT ("**District**"), a public agency, and the CITY OF MORENO VALLEY ("**City**"), an incorporated municipality. District and City are sometimes referred to individually as "**Party**" or collectively as "**Parties.**" This Agreement is made and entered into as of the last date that any Party signs this Agreement.

A. District is a municipal water district organized and operating pursuant to the Municipal Water District Act of 1911 (Water Code § 70000 *et seq.*).

B. City is a general law city organized and existing within the State of California.

C. District owns and operates a potable water booster station ("**Booster Station**") on approximately 0.25 acres located at the northwest corner of Nason Street and Dracaea Avenue in the City of Moreno Valley, legally described as "Parcel 1" and depicted on Exhibit "**A**" attached hereto and by this reference incorporated herein ("**Existing Site**"). The Existing Site is fenced around its perimeter with an access gate on Nason Street and Dracaea Avenue.

D. District desires to relocate the Booster Station in order to reconfigure some of the pressure zones and upgrade the booster station capacity to support the area's growth.

E. City desires to facilitate the ultimate intersection and street improvements on Nason Street. The City's General Plan Circulation Element designates Nason Street as a four-lane Divided Arterial which requires 55 feet of half-width right-of-way. The ultimate right-of-way improvements require that the Booster Station be relocated. Only 30 feet of half-street right-of-way for Nason Street was established on the Bear Valley and Alessandro Development Company Map, recorded on November 3, 1890, as Map Book 11, Page 10, records of San Bernardino County. City requires 25 feet of additional right-of-way to meet the Divided Arterial street designation standard for Nason Street in accordance with the City's General Plan Circulation Element. Additional right-of-way beyond the 25 feet may be required to accommodate turning movements at the intersection of Nason Street and Dracaea Avenue.

F. The Existing Site owned by District is located on land City desires to acquire to facilitate the widening of Nason Street. Said land is located outside of the 30-foot half-width right-of-way, but within the additional right-of-way needed to accomplish the widening. District has prior rights and therefore, City intends to compensate District for the Booster Station relocation as the additional right-of-way required and proposed improvements to Nason Street would conflict with the Booster Station and its operation.

G. District desires to acquire and to relocate the Booster Station ("**Relocated Booster Station**") to approximately 0.41 acres currently owned by City on the south side of Cottonwood Avenue at Letterman Street, as legally described and/or depicted on Exhibit "**B**" attached hereto and by this reference incorporated herein ("**Relocation Site**").

H. The purposes of this Agreement are to describe the steps required to execute the relocation and to describe the process to reimburse District for the relocation.

I. The acquisition of the Existing Site and relocation of the Booster Station is included in the City's current Development Impact Fee (DIF) Update Study in Appendix D "Arterial Street Improvements" and, therefore applicable costs may be reimbursed using DIF Arterial Street Funds, subject to fund availability, up to the amount in the DIF Update Study and in accordance with current City policies and procedures.

J. The City collects Development Impact Fees from developers and through this Agreement desires to reimburse the District for the applicable relocation costs of the Booster Station which is necessary to facilitate ultimate intersection improvements at the northwest corner of Nason Street and Dracaea Avenue in order to protect the safety, health, and welfare of residential and non-residential users.

K. The City and District now desire to enter into this Agreement to provide a means by which the District receives reimbursement for the relocation of the Booster Station subject to the terms and limitations set forth in this Agreement.

NOW, THEREFORE, THE PARTIES AGREE AS FOLLOWS:

1. **Preliminary Steps / Design Process / Approvals**

1.1 District and City have coordinated to develop a site layout that is acceptable to both Parties. The approved site layout is shown in Exhibit "**C**" attached hereto and by this reference incorporated herein.

1.2 District will submit rough and precise grading plans, plans for off-site improvements pertaining to Cottonwood Avenue and Letterman Street improvements, and, as may be required by the City's Planning Division, landscape and/or fence/wall plans to City for review and comment.

1.3 District will prepare contract documents (plans and specifications) and a detailed total project cost estimate for the Relocated Booster Station and submit same to City. The detailed total project cost estimate shall identify separately design costs, contract management and administration costs, and all related project costs for the Relocated Booster Station consistent with current District standards. The detailed total project cost estimate will identify the ratio of the existing capacity replacement costs to the proposed expanded capacity costs ("**Relocation Cost Ratio.**")

1.3.1 Public Improvements shall consist of all necessary street improvements on Cottonwood Avenue along project frontage including pavement transitions and on proposed Letterman Street, as shown in the shaded area in Exhibit "C", in accordance with the City of Moreno Valley design Standards. Improvements along project frontage shall consist of pavement, base, curb, gutter, sidewalk, driveway approach, undersidewalk drain, as necessary, street parkway landscaping and irrigation, dry and wet utilities, as shown on Exhibit "C". Soft costs will include any design costs as well as City-related costs including plan review, project coordination efforts, inspection of public improvements within the right-of-way and encroachment permit processing. City-related costs will be tracked as actual time and material costs and shall be credited against the project as part of the City's payment towards the relocation costs. The value of the time for City staff shall be at the fully burdened hourly rate, including operational overhead as determined by the City's Finance Department, and will be charged at 15-minute increments.

1.3.2 A minimum 30-foot wide public access easement along the project site's east boundary coinciding with the future extension of Letterman Street will be required to provide access to the booster station. The easement, granted by the City to the District, shall be maintained by the District. The access road improvement shall be designed to a general local street pavement section, half-width of 20 feet. The intersection with Cottonwood Avenue shall be designed as a commercial driveway approach per City Standard No. 118C.

1.3.3 A Slope and/or Drainage Easement along the project site's south boundary may be required provided the site's grading plan is designed to drain to Cottonwood Avenue. Alternatively, a Drainage Easement coinciding with the point of discharge along the south boundary will be required if the site is graded to follow existing contours. The determination for the need of an easement will be made during final design.

1.3.4 The District shall identify the type(s) of trees located on the south side of Cottonwood Avenue along the proposed project frontage and recommend the trees be protected, relocated, or replaced. If the trees are to be replaced, they shall be done so at a minimum ratio of 3:1 for 24-inch (24") boxed trees or a ratio of 1:1 for 36-inch (36") boxed trees, which is consistent with the City's Municipal Code Section 9.17.030. The District shall coordinate with the City Planning Division staff on the species, size and location of any trees proposed to be planted along the project frontage. Landscape plans for the project, including the type and size of proposed street trees, shall be reviewed by the City's Planning Division during the plan review stage.

1.4 District shall prepare bid documents and solicit bids for the Relocated Booster Station consistent with the plans and specifications furnished to City. The average of the bids received shall be multiplied by the Relocation Cost Ratio to determine the "**Estimated Relocation Costs.**"

1.5 The Parties agree that the fair market value of the Relocation Site at the southwest corner of Cottonwood Avenue and Letterman Street is $95,500.00 and the fair

market value of the Existing Site at the northwest corner of Nason Street and Dracaea is $76,800.00, based on the appraisals dated July 1, 2009 and May 1, 2007, attached as Exhibits "**D**" and "**E**" hereto and by this reference incorporated herein. The fair market value of the Existing Site, less the fair market value of the Relocation Site will be factored into the reimbursement as described in Section 5.1.

1.6 The Parties agree that the District will conduct a Phase I Environmental Site Assessment Report for the Relocation Site at Cottonwood and Letterman and the City will conduct a Phase I Environmental Site Assessment for the Existing Site at Nason and Dracaea, each at its sole cost and expense. If there are issues, each agency will, at its sole cost and expense, conduct an Extended Phase I Environmental Site Assessment Report to adequately determine the issues related to the respective sites, and remediate any hazards determined in the assessment prior to the transfer of the property to the other agency.

2. Transfer of Relocation Site to District

2.1 Prior to circulation of bid documents for construction of the Relocated Booster Station, City shall convey to District good and marketable fee simple title to the Relocation Site, free of any and all encumbrances. Title to the Relocation Site shall be conveyed by way of a grant deed acceptable to District, substantially similar in form and substance to Exhibit "F" attached hereto and by this reference incorporated herein.

2.2 The parties expressly agree that District shall have the same priority of rights in the Relocation Site as the District currently enjoys in the Existing Site.

3. Construction of the Relocated Booster Station

3.1 District shall construct the Relocated Booster Station on the Relocation Site substantially in accordance with the plans and specifications submitted to City. District shall schedule a walk through with a City Public Works Inspector upon completion of improvements. All punch list items must be addressed prior to acceptance of the public street improvements on Cottonwood Avenue. Acceptance of public improvements is one of the requirements the District must comply with in order to receive Reimbursement.

4. Transfer of Existing Site to City

4.1 Within 180 days of the Notice of Acceptance of the Relocated Booster Station, District shall convey to City good and marketable fee simple title to the Existing Site. Title to the Existing Site shall be conveyed by way of a grant deed acceptable to City, substantially similar in form and substance to Exhibit "G" attached hereto and by this reference incorporated herein. District shall terminate all existing utility service feeds to the Existing Booster Station and require the utility agencies to remove their applicable facilities from the site prior to conveyance of property to the City. District is required to remove all facilities within the Existing Site a minimum of three (3) feet below the ultimate Nason Street pavement surface, at a fixed elevation of 1667.80 as depicted in Exhibit "**H**" attached hereto and by this reference incorporated herein.

4.2 City hereby represents and warrants that (i) prior to the transfer of the Existing Site, City will have had the opportunity to investigate all physical and economic aspects of the Existing Site and to make all inspections and investigations of the Existing Site which City deems necessary or desirable to protect its interests in acquiring the Existing Site, including without limitation environmental audits and assessments, toxic reports, surveys, investigation of land use and development rights, development restrictions and conditions that may be imposed by governmental agencies, soils and geological reports, engineering and structural tests, insurance contracts, contracts for work in progress, marketing studies, governmental agreements and approvals, architectural plans, and site plans, and (ii) except as otherwise expressly set forth in this Agreement, neither District nor anyone acting for or on behalf of District has made any representation, warranty, promise, or statement, express or implied, to City or to anyone acting for or on behalf of City, concerning the Existing Site or the development thereof. Except as otherwise provided herein, City shall receive the Existing Site on City's own prior investigation and examination of the Existing Site (or City's election not to do so); and City is receiving the transfer of the Existing Site in an "AS IS" PHYSICAL CONDITION AND IN AN "AS IS" STATE OF REPAIR after demolition. Notwithstanding anything to the contrary herein, City and District acknowledge that any written disclosure made by District prior to the transfer of the Existing Site to City shall constitute notice to City of the matter disclosed, and District shall have no further liability thereafter if City thereafter consummates the transfer contemplated hereby.

4.3 City represents and warrants that, as specified herein, City has, or shall inspect and conduct tests and studies of the Existing Site and that City is familiar with the general conditions of the Existing Site. City understands and acknowledges that the Existing Site may be subject to earthquake, fire, floods, erosion, high water table, dangerous underground soil conditions, hazardous materials, and similar occurrences that may alter its condition or affect its suitability for any proposed use, and that District shall have no responsibility or liability with respect to any such occurrence. City represents and warrants that City is acting, and will act, only upon information obtained by City directly from City's own inspection of the Existing Site. Notwithstanding anything to the contrary contained in this AGREEMENT, the suitability or lack of suitability of the Existing Site for any proposed or intended use, or availability or lack of availability of (i) permits or approvals of governmental or regulatory authorities, or (ii) rights with respect to any such proposed or intended use of Existing Site shall not affect the rights or obligations of City hereunder.

5.0 Reimbursement

5.1 **Actual and Maximum Amounts of Reimbursement.** Subject to fund availability, the City has allocated in its Development Impact Fee (DIF) Fee Update Study (Appendix D Arterial Streets), a maximum of Two Million Dollars ($2,000,000.00) ("**Maximum Reimbursement**") for the site acquisition and relocation of the Booster Station including all soft costs. The actual amount of reimbursement ("Actual Reimbursement") shall be calculated as the Estimated Relocation Costs determined in Section 1.4 above, plus the fair market value of the Existing Site including all applicable soft costs, as determined by the appraisal obtained pursuant to Section 1.5

above, less the fair market value of the Relocation Site including all applicable soft costs, as determined by the appraisal obtained pursuant to Section 1.5 above, not to exceed the Maximum Reimbursement as defined above.

5.2 **Timing of Reimbursement.** Upon Notice of Acceptance of the Relocated Booster Station, District shall be entitled to reimbursement subject to the procedures and limitations contained in this Agreement and subject to available funds in the DIF Arterial Streets Fund. Actual DIF Reimbursement is subject to available funding from the Arterial Streets Fund of the DIF Program per the applicable sections of the City's DIF Policy No. 3.24 approved by City Council on August 26, 2008, subject to the terms and conditions of this Agreement. District will be placed in line on a DIF Reimbursement List. District's priority on the DIF Reimbursement List shall not be lowered and no other entity shall be moved or placed on the DIF Reimbursement List ahead of District. District's eligibility for reimbursement shall not expire.

5.3 **DIF Reimbursement Eligibility**. Reimbursement shall be paid only from the DIF Arterial Streets Fund and only when funds are available. Any Reimbursement shall be in accordance with applicable sections of City Policy No. 3.24, approved by City Council on August 26, 2008, subject to the terms and conditions of this Agreement, except as may arise under Section 5.5 below. District shall have no right to Reimbursement from any other funds of the City or any of its related entities.

5.4 **Term of Agreement.** For purposes of Reimbursement Eligibility, this Agreement shall remain in effect until such time as the District has received the full amount of the reimbursement as calculated in Section 5.1 above.

5.5 **Future Reimbursement Opportunities**. In the event that, by mutual agreement of both parties, another parcel of City-owned property ("**Additional Property**") were to become available for District use sometime in the future, and if the City has not fully reimbursed the District at that time, such Additional Property may be made a part of this Agreement and considered as a credit towards the City's reimbursement for their portion of the Nason Street booster station relocation costs. As with the Relocation Site, the fair market value of the Additional Property will be based on an appraisal by a licensed appraiser, to be selected and retained by District from a list of not less than five (5) qualified appraisers furnished by City, and City shall convey to District good and marketable fee simple title to the Additional Property, free of any and all encumbrances. District may, at its sole cost and expense, conduct a Phase I Environmental Site Assessment Report for the Additional Property. If there are issues, District may, at its sole cost and expense, conduct an Extended Phase I Environmental Site assessment Report to adequately determine the issues related to the Additional Property, and remediate any hazards determined in the assessment prior to the transfer of the property to District. Title to the Additional Property shall be conveyed by way of a grant deed acceptable to District, substantially similar in form and substance to Exhibit "B" attached hereto and by this reference incorporated herein.

6. General Provisions

6.1. This Agreement shall inure to the benefit of and be binding on each of the Parties and their successors and assigns.

6.2. All work to be performed shall conform with all applicable laws regarding prevailing wage rates.

6.3. District shall indemnify, defend, and hold harmless City and its officers, directors, and Representatives (as defined below) (collectively, "**City Indemnitees**") from and against any and all claims, costs, liabilities, debts, demands, suits, actions, causes of action, proceedings, damages, judgments, liens, expenses or obligations of whatever kind or nature, including attorneys' fees and charges and the costs of all other professional and court or arbitration or other dispute resolution costs (collectively, "**Costs**") which may be made against the City Indemnitees arising out of or in connection with this Agreement. The foregoing indemnity shall not apply to the extent any such Costs are ultimately established by a court of competent jurisdiction to have been caused by the gross negligence or willful misconduct of the City Indemnitees or any of them. City shall make all decisions with respect to its representation in any legal proceeding concerning this section. If District fails to do so, City shall have the right, but not the obligation, to defend the same and charge all of the direct or incidental Costs of such defense, including fees and costs, to District and to recover the same from District. The term "**Representative**" shall mean employees, representatives, agents, contractors, subcontractors, or any other person directly or indirectly employed by any of the foregoing or reasonably under the control of any of the foregoing or for whose acts any of the foregoing may be liable.

6.4. City shall indemnify, defend, and hold harmless District and its officers, officials, and Representatives (collectively, "**District Indemnitees**") from and against any and all Costs which may be made against the District Indemnitees arising out of or in connection with this Agreement. The foregoing indemnity shall not apply to the extent any such Costs are ultimately established by a court of competent jurisdiction to have been caused by the gross negligence or willful misconduct of the District Indemnitees or any of them. District shall make all decisions with respect to its representation in any legal proceeding concerning this section. If City fails to do so, District shall have the right, but not the obligation, to defend the same and charge all of the direct or incidental Costs of such defense, including fees and costs, to City and to recover the same from City.

6.5. This Agreement contains the full and complete agreement between the Parties with respect to the matters herein discussed and supersedes all previous communications and agreements between them, either oral or written.

6.6. This Agreement may be modified only by another written instrument duly authorized, executed, acknowledged, and recorded, by both Parties.

6.7. All notices shall be in writing and shall be considered given and received: (i) when delivered in person to the recipient named below; or (ii) three (3) days after depositing in the United States mail, postage prepaid, addressed to the recipient named below; or (iii) on the date of delivery shown in the records of an express courier such as Federal Express or DHL. All notices shall be addressed as follows:

If to District:

General Manager
Eastern Municipal Water District
P.O. Box 8300
Perris, CA 92572-8300

If to City:

City Engineer
City of Moreno Valley
P.O. Box 88005
14177 Frederick Street
Moreno Valley, CA 92552-0805
Attn: Mark W. Sambito, P.E., Engineering Division Manager

Any Party may, by notice given at any time, require subsequent notices to be given to another person or entity, whether a Party or an officer or representative of a Party, or to a different address, or both. Notices given before actual receipt of notices of change shall not be invalidated by the change.

6.8. This Agreement and all of its provisions shall in all respects be interpreted, construed, enforced, and governed by and under the laws of the State of California, without regard to its conflict of laws principles.

6.9. Any action or proceeding brought respecting this Agreement shall be exclusively instituted and maintained in the Riverside Superior Court, California, and the Parties hereto consent to the exercise of the personal jurisdiction over them by any such courts for purposes of any such action or proceeding.

6.10. The language in all parts of this Agreement shall in all respects be construed as a whole according to its fair meaning, and not strictly for or against any other Party. This Agreement is the product of mutual negotiation and drafting efforts. Accordingly, the judicial rule of construction that ambiguities in a document are to be construed against the drafter of that document shall have no application to the interpretation or enforcement of this Agreement.

6.11. This Agreement may be executed in one or more counterparts, each of which shall be an original and all such counterparts together shall constitute the entire agreement of the Parties hereto.

6.12. Each individual executing this Agreement hereby represents and warrants that he or she has the full power and authority to execute this Agreement on behalf of the Party identified.

IN WITNESS THEREOF, the parties hereto have executed this Agreement as of the date indicated above.

FOR A VALUABLE CONSIDERATION, receipt of which is hereby acknowledged,
SOUTHERN CALIFORNIA FINANCIAL CORPORATION

a corporation organized under the laws of the state of California
hereby GRANTS to

EASTERN MUNICIPAL WATER DISTRICT,
a Municipal Corporation

the following described real property in the
County of Riverside, State of California:

LEGAL DESCRIPTION ATTACHED HERETO AND MADE A PART HEREOF.

UNINCORPORATED AREA

SUBJECT TO:
(1) Second half taxes for the fiscal year 1969-1970, a lien not yet payable.
(2) Covenants, conditions, restrictions and public utility easements of record.
(3) Lis Pendens of record.

In Witness Whereof, said corporation has caused its corporate name and seal to be affixed hereto and this instrument to be executed by its Vice President and Secretary thereunto duly authorized.

Dated: October 10, 1969

SOUTHERN CALIFORNIA FINANCIAL CORPORATION

By [signature]

STATE OF CALIFORNIA)

PARCEL 1: Nason Street Plant site

That certain parcel of land situated in the County of Riverside, State of California, which is particularly described as follows:

The Easterly 120.00 feet (measured from the center line of Nason Street) of the Southerly 160.00 feet (measured from the center line of Dracaea Avenue) of Lot 8 of Block 65, as said lot, block, street and avenue are shown on Map No. 1 BEAR VALLEY AND ALESSANDRO DEVELOPMENT CO., on file in Book 11, page 10, of Maps, Records of San Bernardino County, California;

EXCEPT FROM the above-described parcel of land any portion thereof lying within Nason Street, a county road, as said Nason Street currently exists.

PARCEL 2: Pettit Tract Site

That certain parcel of land situated in the County of Riverside, State of California, which is particularly described as follows:

That particular portion of the Northeast quarter of Section 10, Township 3 South, Range 3 West, San Bernardino Meridian, which is more particularly described as follows:

Beginning at the intersection of the center line of Bay Avenue with the center line of Pettit Street, as said intersection is shown on Map No. 1 BEAR VALLEY AND ALESSANDRO DEVELOPMENT CO., on file in Book 11, page 10, of Maps, Records of San Bernardino County, California; thence Northerly along said center line of Pettit Street to its intersection with the center line of Cottonwood Avenue also as shown on said Map No. 1 BEAR VALLEY AND ALESSANDRO DEVELOPMENT CO.; thence continuing Northerly along a Northerly prolongation of said center line of Pettit Street a distance of 835.00 feet; thence Westerly at right angles to said Northerly prolongation of the center line of Pettit Street a distance of 30.00 feet to the True Point of Beginning for this parcel description; thence Northerly parallel with and 30.00 feet Westerly of, measured at right angles, said Northerly prolongation of the center line of Pattit Street a distance of 220.00 feet; thence Westerly at right angles to said last mentioned course a distance of 270.00 feet; thence Southerly at right angles to said last mentioned course a distance of 220.00 feet; thence Easterly at right angles to said last mentioned course a distance of 270.00 feet to the True Point of Beginning.

Parcel 3:

A right of way easement over, under and along the property described below for the construction, installation, replacement, repair and maintenance of a water pipe line or pipe lines for the transmission of water with right of ingress and egress for such purposes, situated in the County of Riverside, State of California, which is particularly described as follows:

A strip of land 25.00 feet in width lying over, under, through, along and across a portion of the Northeast quarter of Section 10, Township 3 South, Range 3 West, San Bernardino Meridian, which 25.00 foot wide strip of land is more particularly described as follows:

A strip of land 25.00 feet in width lying 12.50 feet, measured at right angles on each side of the following described center line:

Beginning at the intersection of the center line of Pettit Street with the center line of Cottonwood Avenue as said intersection is shown on Map No. 1 BEAR VALLEY AND ALESSANDRO DEVELOPMENT CO. on file in book 11, page 10 of Maps, records of San Bernardino County, California; thence Westerly along said center line of Cottonwood Avenue a distance of 42.50 feet to the true point of beginning for this description; thence Northerly parallel with and 42.50 feet Westerly of the Northerly prolongation of that particular portion of the center line of said Pettit Street which extends from the center line of Bay Avenue to said center line of Cottonwood Avenue as shown on said Map No. BEAR VALLEY AND ALESSANDRO DEVELOPMENT CO. a distance of 1,055.00 feet;

EXCEPT from the above described 25.00 foot wide strip of land any portion thereof which lies within Cottonwood, a county road, as said Cottonwood Avenue presently exists.

APPRAISAL SUMMARY

PROJECT:	*Disposition of Nason & Dracaea Booster Site; Acquisition of Letterman Booster Site*
DATE OF VALUATION:	*July 1, 2009*
OWNERSHIP:	*City of Moreno Valley, California*
PROPERTY LOCATION:	*S/s Cottonwood Avenue at Letterman Street; City of Moreno Valley, CA Thomas Guide: 688 A4*
ASSESSOR'S PARCEL NO.:	*487-470-013*
ZONING/GENERAL PLAN:	*"Public Facilities" in neighborhood of primarily "R2" and "R5, Residential" up to a maximum 5 du/ac*
ACCESS/UTILITIES:	*Unrestricted legal access along Cottonwood frontage; Connecting to area public rights-of-way; utilities all available in the public ROW*
HAZARDS/LIMITATIONS:	*Not within ½-mile of a fault zone; not a high fire area, nor flood zones; not located within an WRCMSHCP area plan, cellgroup or cell; not located within an RCA acquisitions/gains area or an RCA agricultural operations area. No title report was provided; site inspection did not disclose any impairments to use.*
PRESENT USE:	*Vacant, unimproved land*
HIGHEST AND BEST USE:	*Public facilities use, examples include schools, parks, and utilities.*
INTEREST TO BE ACQUIRED:	*(1) Fee simple interest in booster site, 0.41± ac; (2) Permanent access & utility easement, 0.25± ac.*
LARGER PARCEL SIZE:	*23.08 ± acres gross*

SUMMARY OF MARKET VALUE:

Parcel 1, booster site:	$90,000
Parcel 2, utility and access easement:	$ 5,500
Damages:	0
Benefits:	N/A

ESTIMATE OF TOTAL CURRENT MARKET VALUE: ***$95,500.00***

Exhibit "D"

NOTE: *The current market value estimated for the property to be acquired is derived from a thorough market valuation study conducted in accordance with uniform appraisal standards and the laws of the State of California. The valuation of the property has in part been based upon an analysis of a range of market information including recent sales of "atf" vacant land. The appraiser has given full and careful consideration to the highest and best use for the subject property, to the terms and provisions of the described easement interest, and to all features inherent in the property affecting its market value. The Market Data which follows the subject photographs provides specific details of the most comparable market transactions.*

Report to City Council

TO:	Mayor and City Council
FROM:	Michael L. Wolfe P.E., Assistant City Manager
AGENDA DATE:	February 2, 2021
TITLE:	ADOPT RESOLUTION NO. 2021-XX, A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING AN UPDATED WILDFIRE MITIGATION PLAN FOR MORENO VALLEY UTILITY

RECOMMENDED ACTION

Recommendation:

1. Adopt Resolution No. 2021-XX, a Resolution of the City Council of the City of Moreno Valley, California, approving an updated Wildfire Mitigation Plan for Moreno Valley Utility.

SUMMARY

Staff recommends City Council approve the Moreno Valley Utility (MVU) Wildfire Mitigation Plan Version 2.0. The Plan conforms to the requirements of Senate Bill 901 (SB 901) and Assembly Bill 1054 (AB 1054) which were signed into law in September 2018, and July 2019 respectively. This update incorporates recommended additions and changes outlined in the Guidance Advisory Opinion issued by the California Wildfire Safety Advisory Board on December 15, 2020.

Moreno Valley Utility's (MVU) entire electric distribution system is located underground in conduit and vaults. The undergrounding of electrical infrastructure is an effective mitigation measure to reduce the cause of power-line ignited wildfires. Despite this low risk, MVU takes appropriate actions to help prevent and respond to increasing risk of devastating wildfires. MVU follows all applicable design, construction, operation, and maintenance requirements reducing safety risks associated with its system. The Wildfire Mitigation Plan describes the measures MVU follows to reduce its risk of causing wildfires. This Wildfire Mitigation Plan helps meet MVU's overarching goal to provide safe, reliable, and economical electric service to the community.

DISCUSSION

In 2016, Governor Brown signed Senate Bill ("SB") 1028 (stats. 2016), which required publicly owned utilities ("POUs") to identify additional wildfire mitigation measures that the POU could take if the POU governing board first found that its overhead electric lines and equipment posed a significant risk of causing a catastrophic wildfire. SB 1028 required that the POU governing board (City Council) must base this determination on "historical fires and local conditions," and must consult with local fire departments and other entities with responsibilities for the control of wildfires within the relevant area. These requirements were specified in the newly added Public Utilities Code Section 8387.

In 2018, the California Public Utilities Commission (CPUC) completed the development of the statewide Fire Threat Map that designates areas of the state at an elevated risk of electric line-ignited wildfires.[1] This updated map incorporated historical fire data, fire-behavior modeling, assessments of fuel, weather modeling, and a host of other factors. The map development and approval process involved detailed review by the relevant utility staff and local fire officials, a peer review process, and ultimate approval by a team of technical experts led by the California Department of Forestry and Fire Protection ("CAL FIRE"). The CPUC's Fire Threat Map includes three Tiers/Levels of fire threat risk. Tier 1 consists of areas that have the lowest hazards and risks. Tier 2 consists of areas where there is an *elevated risk* for destructive electric line-ignited wildfires. Finally, Tier 3 consists of areas where there is an *extreme risk* for destructive electric line-ignited wildfires.

Governor Brown signed SB 901 (stats. 2018), which addressed a wide range of issues relating to wildfire prevention, response, and recovery. SB 901 substantially revised the Public Utilities Code Section 8387, eliminating the prior process established by SB 1028 and instead making it mandatory for all POUs (regardless of size or wildfire risk) to develop a wildfire mitigation plan. Pursuant to the amended Section 8387, all POUs must present a wildfire mitigation plan to its governing board prior to January 1, 2020, and annually thereafter. Section 8387(b)(2) specifies the topics that must be addressed in the POU wildfire mitigation plans, which includes: (a) the responsibilities of the persons tasked with executing the plan; (b) a description of the POU's wildfire mitigation preventative strategies and programs; (c) a description of the metrics the POU will use to evaluate the wildfire mitigation plan's performance and discussion of how those metrics informed the current wildfire mitigation plan; (d) protocols for disabling reclosers and deenergizing portions of the electrical system; and (e) identification, description, and prioritization of all wildfire risks within the POU's service territory.

SB 901 requires that POUs must present their wildfire mitigation plan at an

[1] PG&E Advice Letter 5211-E/3172-E, "Joint Filing – Adoption of Final California Public Utilities Commission Fire-Threat Map," Jan. 5, 2018, *available at* https://www.pge.com/tariffs/assets/pdf/adviceletter/ELEC_5211-E.pdf; SED Disposition Letter Approving Advice Letter 5211-E/3172-E, January 19, 2018, *available at* https://www.pge.com/tariffs/assets/pdf/adviceletter/ELEC_5211-E.pdf.

appropriately noticed public meeting and receive public comment. The POU must also verify that the wildfire mitigation plan complies with all applicable rules, regulations, and standards. POUs must also have their plan reviewed by a qualified independent evaluator to assess the comprehensiveness of the plan every three years, which occurred last year.

In 2019, two new bills (SB 1054 and SB 111) made additional major reforms relating to wildfires. As part of these reforms, SB 111 created a new state agency called the California Wildfire Safety Advisory Board ("Board"). The members of the board must be selected from industry experts, academics, and people with labor and workforce safety experience. At least three members must be experienced in the safe operation, design, and engineering of electrical infrastructure. SB 1054 requires that all POUs must submit their wildfire mitigation plans to the Board by July 1 of each year, starting in 2020. The Board will then review the POU plans and will provide comments and advisory opinions on the content and sufficiency of the plans. If additional Board requirements are received this year, further revisions of the adopted updated MVU Wildfire Mitigation Plan may be required. Any substantive changes will be brought to the City Council for consideration.

Pursuant to Public Utilities Code, Section 8387, MVU has prepared the required update to the wildfire mitigation plan. Staff has reviewed MVU's wildfire mitigation plan and concluded that the plan meets all the required criteria as provided in Section 8387. Staff recommends adopting MVU's updated Wildfire Mitigation Plan.

MVU will submit its adopted updated wildfire mitigation plan to the California Wildfire Safety Advisory Board prior to July 1, 2021.

ALTERNATIVES

1. Approve the updated MVU Wildfire Mitigation Plan. *The plan provides baseline procedure and practice of safe and effective operation of the MVU electric system while minimizing risks of wildfires. Adoption of the plan will keep MVU in compliance with state mandates. This update incorporates current recommended additions and changes outlined in the Guidance Advisory Opinion issued by the California Wildfire Safety Advisory Board.* Staff recommends this alternative.

2. Do not approve the MVU Wildfire Mitigation Plan. *This action would delay the submission of an adopted Wildfire Mitigation Plan and MVU will not be in compliance with state mandates.* Staff does not recommend this action.

FISCAL IMPACT

There is no cost associated with the approval of the MVU Wildfire Mitigation Plan.

NOTIFICATION

Publication of the Agenda.

CITY COUNCIL GOALS

Advocacy. Develop cooperative intergovernmental relationships and be a forceful advocate of City policies, objectives, and goals to appropriate external governments, agencies and corporations.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 4.1: Develop a Moreno Valley Utility Strategic Plan to prepare for the 2022 expiration of the ENCO Utility Systems agreement.

RESOLUTION NO. 2021-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, TO ADOPT THE ANNUAL WILDFIRE MITIGATION PLAN

WHEREAS, the City of Moreno Valley (the "City"), a municipal corporation, is authorized pursuant to Article XI, Section 9(a) of the California Constitution to establish, purchase, and operate public works to furnish its inhabitants with light, water, power, heat, transportation, or means of communication; and

WHEREAS, on June 26, 2001, the City Council of the City of Moreno Valley approved Resolution No. 2001-33 and, as amended by Resolution 2002-46, authorized the formation of a municipally owned utility for the purpose of providing electrical power, storm water, telephone telecommunications, cable TV, water, natural gas, and sanitary sewer; and

WHEREAS, Moreno Valley Utility is generally subject to the legislative and regulatory requirements applicable to local publicly owned electric utilities ("POUs"); and

WHEREAS, Senate Bill ("SB") 1028 (stats. 2016), adding California Public Utilities Code, Section 8387, requires each POU to construct, maintain, and operate its electrical lines and equipment in a manner that will minimize the risk of wildfire posed by those electrical lines and equipment; and

WHEREAS, SB 901 (stats. 2018), amending California Public Utilities Code Section 8387, requires all POUs to prepare a wildfire mitigation plan before January 1, 2020, and annually thereafter; and

WHEREAS, California Public Utilities Code Section 8387(b)(2) specifies the content that must be included in each POU's wildfire mitigation plan; and

WHEREAS, California Public Utilities Code Section 8387(c) requires each POU to have a qualified independent evaluator review its wildfire mitigation plan to assess the comprehensiveness of its plan and to issue a report that is made available on the POU's website and presented at a public meeting; and

WHEREAS, California Public Utilities Code Section 8387(b)(3) requires each POU to present its wildfire mitigation plan at an appropriately noticed public meeting and to verify that its plan complies with all applicable rules, regulations, and standards, as appropriate; and

WHEREAS, SB 111 (stats. 2019), adding California Public Utilities Code Section 326.1, established the California Wildfire Safety Advisory Board; and

WHEREAS, SB 1054 (stats. 2019), amending California Public Utilities Code Section 8387, requires each POU to submit its wildfire mitigation plan to the California Wildfire Safety Advisory Board by July 1 of each year, starting in the year 2020; and

WHEREAS, pursuant to California Public Utilities Code Section 326.2, the California Wildfire Safety Advisory Board will review each POU's wildfire mitigation plan and will provide comments and advisory opinions on the content and sufficiency of each plan; and

WHEREAS, Moreno Valley Utility staff prepared a wildfire mitigation plan for calendar year 2021, addressing all statutory criteria; and

WHEREAS, Moreno Valley Utility staff verified that the wildfire mitigation plan complies with all applicable rules, regulations, and standards; and

WHEREAS, Moreno Valley Utility staff will submit its wildfire mitigation plan, adopted today by the City Council of the City of Moreno Valley, California, to the California Wildfire Safety Advisory Board before July 1, 2021.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. The City Council, pursuant to California Public Utilities Code Section 8387, hereby adopts Moreno Valley Utility's Wildfire Mitigation Plan, attached hereto as Exhibit A (incorporated herein by reference).

APPROVED AND ADOPTED this 2nd day of February 2021.

_____
Mayor of the City of Moreno Valley

Wildfire Mitigation Plan

Version 2.0

February 02, 2021

Table of Contents

I. Utility Context Summary

Utility Name	Utility Name
Size in Square Miles	*33.48 square miles*
Assets	☐ Transmission ☑ Distribution ☑ Generation
Number of Customers Served	*6,524 as of December 2020*
Customer Classes	☑ Residential ☑ Government ☐ Agricultural ☑ Small/Medium Business ☑ Commercial/Industrial
Location/Topography	☑ Urban ☐ Wildland Urban Interface ☐ Rural/Forest ☐ Rural/Desert ☐ Rural/Agriculture
Percent Territory in CPUC High Fire Threat Districts	☑ Includes maps 0% in Tier 2 0% in Tier 3
CAL FIRE FRAP Map Fire Threat Zones	☑ Includes maps 0% Extreme 0% Very High 0% High
Existing Grid Hardening Measures	☑ Describes hardened & non-hardened infrastructure
Utility Fire Threat Risk Level	☐ High ☑ Low ☐ Mixed
Impacted by another utility's PSPS?	☑ Yes ☐ No
Mitigates impact of another utility's PSPS?	☑ Yes ☐ No
Expects to initiate its own PSPS?	☐ Yes ☑ No
Prevailing wind directions & speeds by season	☐ Includes maps ☐ Includes a description

II. Overview

A. Policy Statement

Moreno Valley Utility's overarching goal is to provide safe, reliable, and economic electric service to its local community. In order to meet this goal, Moreno Valley Utility constructs, maintains, and operates its electrical lines and equipment in a manner that minimizes the risk of catastrophic wildfire posed by its electrical lines and equipment.

B. Purpose of the Wildfire Mitigation Plan

Moreno Valley Utility's (MVU) entire electric supply system is located underground in conduit and vaults. Historically, undergrounded electric lines have not been associated with catastrophic wildfires. The undergrounding of electric lines serves as an effective mitigation measure to reduce the potential of power-line ignited wildfires. Based on a review of local conditions and historical fires, MVU has determined that its electrical lines and equipment do not pose a significant risk of catastrophic wildfire.

Despite this low risk, MVU takes appropriate actions to help its region prevent and respond to the increasing risk of devastating wildfires. In its role as a public agency, MVU closely coordinates with other local safety and emergency officials to help protect against fires and respond to emergencies. In its role as a utility, MVU follows all applicable design, construction, operation, and maintenance requirements that reduce safety risks associated with its system. This Wildfire Mitigation Plan describes the safety-related measures that MVU follows to reduce its risk of causing wildfires.

C. Organization of the Wildfire Mitigation Plan

This Wildfire Mitigation Plan included the following elements:

- Objectives of the plan;
- Roles and responsibilities for carrying out the plan;
- Identification of key wildfire risks and risk drivers;

- Description of wildfire prevention, mitigation, and response strategies and programs;
- Metrics for evaluating the performance of the plan and identifying areas for improvement;
- Review and validation of the plan; and
- Timelines.

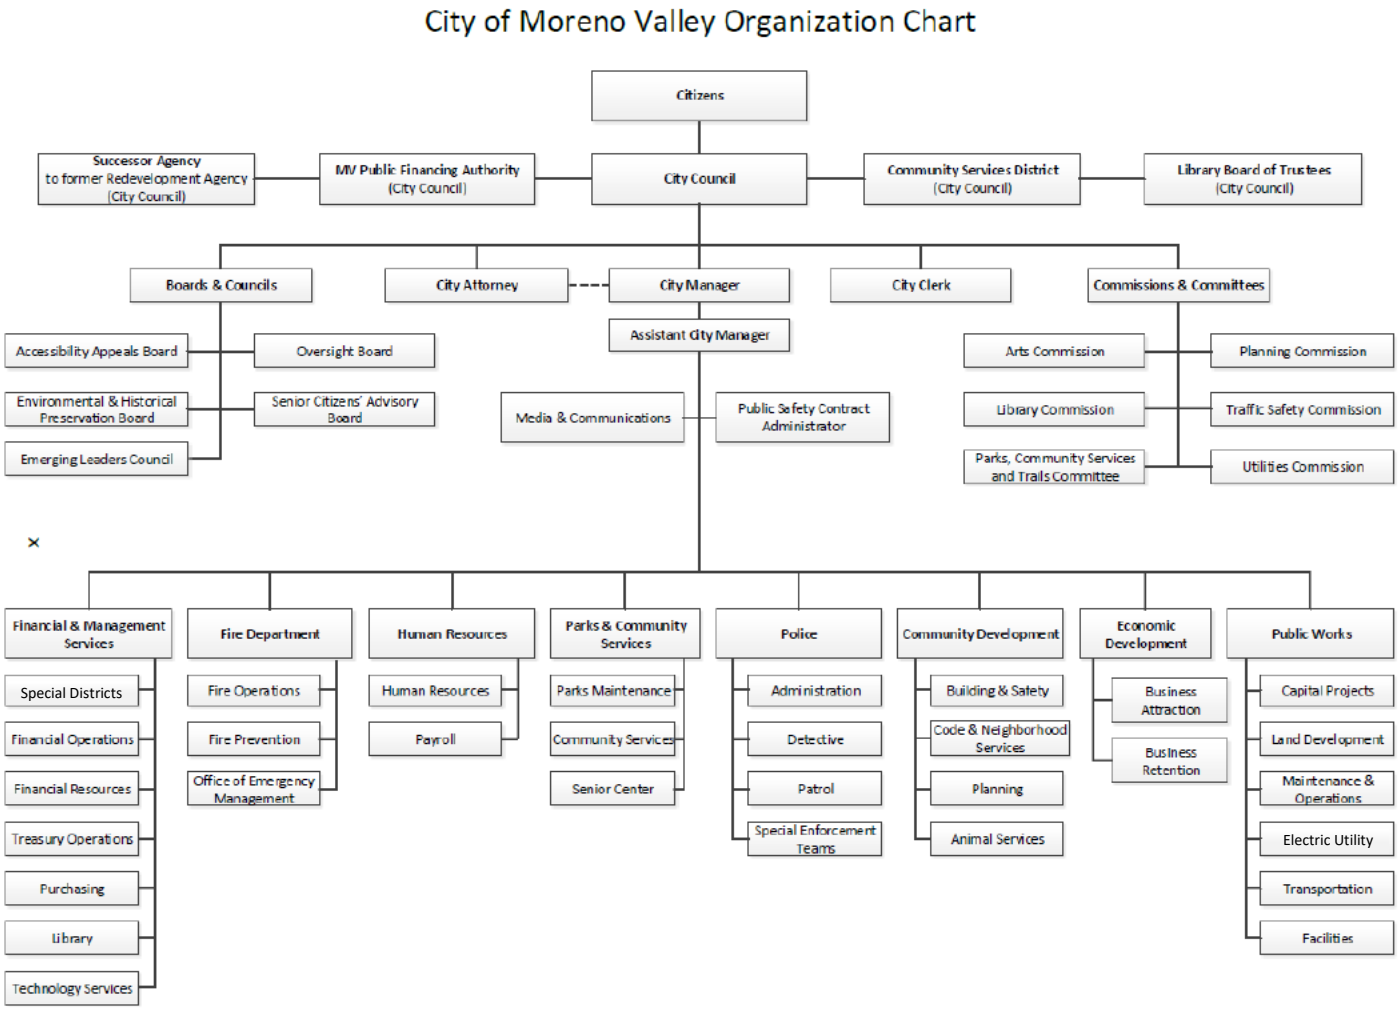
III. Objectives of the Wildfire Mitigation Plan

The primary goal of this Wildfire Mitigation Plan is to describe MVU's existing programs, practices, and measures that effectively reduce the probability that MVU's electric supply system could be the origin or contributing source for the ignition of a wildfire. To support this goal, MVU regularly evaluates the prudent and cost-effective improvements to its physical assets, operations, and training that can help reduce the risk of equipment-related fires.

The secondary goal of this Wildfire Mitigation Plan is to improve the resiliency of the electric grid. As part of the development of this plan, MVU assesses new industry practices and technologies that will reduce the likelihood of an interruption (frequency) in service and improve the restoration (duration) of service.

IV. Roles and Responsibilities

A. Utility Governance Structure



The City of Moreno Valley is a general law city that operates under a Council-Manager form of government. MVU is governed by a five-member City Council. Four Council Members are elected by district to staggered, four-year terms, while the Mayor is directly elected. The council appoints the City Manager, who oversees the daily operations of the City. Volunteer Commissions and Boards, as well as several Citizen Advisory Committees help guide the Council in its decisions. The City Council formed a five-member Utilities Commission, whose purpose is to provide additional review for all matters pertaining to MVU. Commissioners are citizen volunteers, appointed by the City Council for three-year terms.

MVU's Wildfire Mitigation Plan is developed by staff and then reviewed by the Division Manager, Public Works Director, Assistant City Manager, City Manager, Utilities Commission, and the five-member City Council. City Council votes on approval and the plan is approved with a majority vote.

MVU funds wildfire mitigation activities through current rate payer revenues. These funds are augmented by grant awards. Mitigation projects typically take the form of revised equipment design standards and system hardening Capital Improvement Projects.

B. Wildfire Prevention

MVU staff, in partnership with its maintenance and operations provider, is responsible for electric facility design, maintenance, and inspection, including vegetation management. Although MVU's electrical distribution system is 100% underground, MVU follows best practices to prevent ignition of wildfires from its equipment. These items include:

- MVU performs routine maintenance of all distribution facilities.
- MVU adheres to a seasonal weed abatement and vegetation management schedule to maintain at-risk sites.
- MVU contracts for seasonal weed abatement services. Standard clearances as defined by General Orders 95, 128, 165, and 174, are maintained as part of routine maintenance cycles. All electric distribution facility equipment requiring repair and maintenance are addressed and corrected as they are identified. Annual inspections and maintenances of MVU substation facilities identified no deficiencies for 2020.
- MVU abides by Municipal Code 6.40 to abate trees, shrubs, weeds, and grass at all MVU facilities. Including Landscaping, vegetation, or improved or unimproved property in any of the following conditions: containing weeds, dry grasses, dead trees, dead shrubs, or any other material which bears seeds of a wingy or downy nature or which by reason of their size, manner of growth or location, constitute a fire hazard or a threat to public health, or containing weeds, vegetation, grasses, trees or shrubs, including, but not limited to sagebrush, chaparral, and Russian Thistle (tumbleweed) which, when dry, will in reasonable probability constitute a fire hazard or be blown onto adjoining property by prevailing winds; trees and shrubs containing dead or fallen limbs or branches that may present a safety hazard; trees or shrubs which are overgrown or contain limbs or branches that restrict, impede or obstruct the use of or obscure the visibility of pedestrians or drivers using the public rights-of-way, easements, sidewalks or roadways; overgrown vegetation likely to harbor vermin, insects or rodents of any kind.
- Electric system operates in a manner that will minimize potential wildfire risks.
- Take all reasonable and practicable actions to minimize the risk of a catastrophic wildfire caused by MVU electric facilities.
- Coordinate with federal, state, and local fire management personnel as necessary or appropriate to implement MVU's Wildfire Mitigation Plan.
- Immediately report fires to local fire department, Emergency Management Program Manager, MVU administration, and other City Officials, pursuant to existing MVU practices and the requirements of this Wildfire Mitigation Plan.

- Coordinate with City Emergency Operations Center to disseminate safety warnings, emergency public information, and evacuation notices to local residents.
- MVU adheres to City of Moreno Valley personnel policy 5.11 for Employee Disaster Notification and Reporting.
- Take corrective action when the staff witnesses or is notified that fire protection measures have not been properly installed and maintained.
- Comply with relevant federal, state, and industry standard requirements, including the industry standards established by the California Public Utilities Commission.

C. Wildfire Response and Recovery

Internally, MVU's distribution system is controllable remotely through a Supervisory Control and Data Acquisition (SCADA) system networked to all substations and circuits. MVU field staff utilize hard line telephones, cellular telephones, and portable radios to communicate with internal and external stakeholders during an outage or emergency. MVU's Outage Management System, Utility Maintenance Management System, and Dispatching System all auto-generate notifications to field, office, and administrative staff. MVU is enrolled in several mutual aid networks (APPA, CA Disaster & Civil Defense, CA Utilities Emergency Association) to facilitate expedited response and recovery from severe storms, natural disasters, or mass outages.

The City of Moreno Valley maintains a two-way (LF, HF, VHF, and UHF) mobile and base stations for communications enhanced by repeater system to extend the coverage area. This includes three repeater channels and three unit-to-unit/talk-around channels in the 800 MHz Public Safety band. The City of Moreno Valley owns ten iridium satellite phones that are issued to key personnel in the city during an emergency. Mobile radio communications are available utilizing the Moreno Valley Police Mobile Command Center (MCC). The command center has the capability of patching Sheriff, California Highway Patrol (CHP), Riverside Police, CALFIRE, March Air Reserve Base and Moreno Valley Park Rangers all on the same frequency at the same time. Moreno Valley has an Amateur Civil Emergency Services/Radio Amateur Civil Emergency Services (MV ACES/RACES) group, which operates on ham radio frequencies in support of governmental emergency communications. MV ACES/RACES can augment existing systems and establish communication links with otherwise inaccessible areas. They are also capable of sending live video and audio from an incident site to our City's emergency operations center via the ham radio.

At the county level, a Riverside County Emergency Operations Center (EOC) talk group is programmed into the Omniquest radio and is used to communicate with EOCs within Riverside County during a disaster or emergency. The City of Moreno Valley also has low-band disaster net radios to communicate with all EOCs within Riverside County during a disaster or emergency. This system uses low frequency bands and has several back up channels in case of an outage. Additionally, the City has a portable disaster case radio system. This system allows communications with other agencies such as County Emergency Services, County Fire, County Police, Hospitals, Cities within Riverside County, Moreno Valley Unified School District and Valley View Unified School District.

MVU adheres to California Public Utility Commission GO 95, 128, 165, and 174 for all system infrastructure inspection, maintenance, and reporting.

City of Moreno Valley Office of Emergency Management maintains a city-wide Hazard Mitigation Plan identifying potential fire hazards and mitigation strategies.

City of Moreno Valley also maintains a reporting hotline for all employees to properly notify the city for code violations, hazards, safety concerns, and overgrown landscaping and weeds.

MVU is impacted by Southern California Edison (SCE) Public Safety Power Shutoff (PSPS) events. MVU receives advanced notification from SCE when impacted circuits are being monitored against weather projections for a potential PSPS

event. SCE provides the names of circuits being monitored as well as the impacted City accounts, along with the projected period of concern for the PSPS event. As the situation develops, MVU receives updated data from SCE on weather, circuits and accounts being monitored, and if a PSPS is triggered. MVU monitors the SCE status reports and stages mitigation assets appropriately in advance of a SCE triggered PSPS event. If the PSPS event affects any MVU facilities, MVU customers are notified as early as possible of pending power shutoffs.

When a SCE PSPS event is triggered that impacts MVU facilities, MVU notifies its customers of potential service interruption in a variety of ways. Alert notices are pushed out to customers via the MyMVU mobile application, email blasts, direct telephone communication with critical customers, as well as public messaging available on the MVU web site and through MVU's 24/7 call center. PSPS and outage notices will be translated into Spanish for non-English speakers in the future.

With all of MVU's distribution lines undergrounded, the utility does not de-energize its system during severe weather events. In the event MVU is impacted by an SCE PSPS, MVU does have backup generation assets to keep critical infrastructure operational, including a portable back-up generator that can be distributed to impacted MVU customers.

D. Standardized Emergency Management System

As a local governmental agency,[1] MVU has planning, communication, and coordination obligations pursuant to the California Office of Emergency Services' Standardized Emergency Management System ("SEMS") Regulations,[2] adopted in accordance with Government Code section 8607. The SEMS Regulations specify roles, responsibilities, and structures of communications at five different levels: field response, local government, operational area, regional, and state.[3] Pursuant to this structure, MVU annually coordinates and communicates with the relevant safety agencies as well as other relevant local and state agencies. When activated, MVU serves as the Utilities Unit Leader under the Operations Section Chief as part of the City of Moreno Valley's Emergency Operations Center. In the event that the incident centered on MVU facilities, MVU would serve as the Operations Section Chief.

Under the SEMS structure, a significant amount of preparation is done through advanced planning at the county level, including the coordination of effort of public, private, and nonprofit organizations. Riverside County serves as the Operational Area and is guided by the California Office of Emergency Services, Southern Region. The Operational Area includes local and regional organizations that bring relevant expertise to the wildfire prevention and recovery planning process. These participants include:

[1] As defined in Cal. Gov. Code § 8680.2.
[2] 19 CCR § 2407.
[3] Cal. Gov. Code § 2403(b):

1) "Field response level" commands emergency response personnel and resources to carry out tactical decisions and activities in direct response to an incident or threat.
2) "Local government level" manages and coordinates the overall emergency response and recovery activities within their jurisdiction.
3) "Operational area level" manages and/or coordinates information, resources, and priorities among local governments within the operational area and serves as the coordination and communication link between the local government level and the regional level.
4) "Regional level" manages and coordinates information and resources among operational areas within the mutual aid region designated pursuant to Government Code §8600 and between the operational areas and the state level. This level along with the state level coordinates overall state agency support for emergency response activities.
5) "State level" manages state resources in response to the emergency needs of the other levels, manages and coordinates mutual aid among the mutual aid regions and between the regional level and state level, and serves as the coordination and communication link with the federal disaster response system.

Pursuant to the SEMS structure, MVU participates in annual training exercises. Training exercises include workshops, tabletop exercises, and field drills. A sample of topics covered include; earthquake safety, disaster response & management, active shooter, crisis leadership, and NIMS/SEMS/ICS compliance.

MVU is a member of the California Utility Emergency Association, which plays a key role in ensuring communications between utilities during emergencies and provides mutual aid. MVU also participates in the American Public Power Association Mutual Assistance Agreement, which covers public utilities across the United States. The City of Moreno Valley is a participant in the California Disaster and Civil Defense Mutual Aid Agreement which allocates state resources to cope with any type of disaster.

V. Wildfire Risks and Drivers Associated with Design, Construction, Operation, and Maintenance

A. Particular Risks and Risk Drivers Associated with Topographic and Climatological Risk Factors

Due to MVU's distribution system being 100% underground, there is limited risk specific to wildfires. As an undergrounded utility, MVU does not monitor prevailing wind speed or direction. Weather intelligence monitoring assets have not been installed on the MVU distribution system due to the associated costs and limited benefit the utility would gain from collecting such data.

B. Enterprise-wide Safety Risks

The safety risks discussed below apply to the City of Moreno Valley as a municipal jurisdiction and include both Moreno Valley Utility and Southern California Edison service territories.

Earthquake profile - There are three major faults/fault zones that directly affect Moreno Valley. They are the southern section of the San Andreas Fault, the San Jacinto Fault Zone, and the Elsinore Fault Zone. The San Jacinto Fault Zone is considered to be the most active fault in Southern California. It is the closest fault to Moreno Valley and runs through the eastern portion of the city, followed by the Elsinore Fault Zone which is located approximately 12-18 miles south of Moreno Valley. The San Andreas Fault Zone is located approximately 15-20 miles north of Moreno Valley The largest earthquake to occur within 100 miles of Moreno Valley was the 7.4 magnitude Hector Mine earthquake in 1999.

The City of Moreno Valley could be affected by large earthquakes occurring in many parts of the Southern California region. However, the degree to which the earthquakes are felt, and the damages associated with them may vary. At risk from earthquake damage are critical facilities, buildings, bridges, highways and roads; hazardous materials facilities; sewer, water, and natural gas pipelines; earth dams; petroleum pipelines; and private property located in the city. The relative or secondary earthquake hazards, which are liquefaction, ground shaking, amplification, and earthquake-induced landslides, can be just as devastating as the earthquake. The USGS estimates that there is a greater than 99% chance of a major earthquake occurring within 31 miles of Moreno Valley within the next 50 years.

Flooding profile - There are four types flooding conditions that exist within the Moreno Valley area: flooding in defined watercourses; ponding; sheet flow; and dam inundation. Flooding within defined watercourses occurs within drainage channels and immediately adjacent floodplains. Ponding occurs when water flow is obstructed due to manmade obstacles such as the embankments of SR-60 and other roadways, where they cross-defined watercourses. Sheet flow occurs when capacities of defined watercourses are exceeded and water flows over broad areas.

Known flood-prone areas as noted in the General Plan as well as recorded in city maintenance files, include:

- Along the Quincy Channel between Cottonwood Avenue and Cactus Avenue.
- An extensive floodplain that extends along the Oliver Street alignment from a point north of Alessandro Boulevard to John F. Kennedy Drive and extending in a southwesterly direction as far as the northeast corner of Morrison Street and Filaree Avenue and the northeast corner of Nason Street and Iris Avenue.

- Along Heacock Street and Lateral A of the Perris Valley Channel between Cactus Avenue and a point north of the intersection of Lateral A and Indian Street (next to March Air Reserve Base).
- Along Sunnymead Boulevard between Frederick Street and Graham Street.
- Along Pigeon Pass Road, between Sunnymead Ranch Parkway and Lawless Road.
- Along Moreno Beach Boulevard, between Juniper Avenue and Locust Avenue.
- Along Highland Avenue, between Redlands Boulevard and Alessandro Boulevard.
- Along Locust Avenue, between Moreno Beach Boulevard and northerly city limits.
- Along Heacock Street, between Lake Summit Drive and Reche Vista Drive.
- Along Hubbard Street, between Skyland Drive and Ironwood Avenue.
- Along Cottonwood Avenue, between Nason St and Martha Crawford Street.
- Alessandro Boulevard, between Gilman Springs Road and Theodore Street.
- Neighborhood bounded by Alessandro Boulevard, Brodiaea Avenue, Redlands Boulevard, and Merwin Street.
- Miramontes Court, north of Via Solana Court.
- Easterly side of neighborhood east of Perris Boulevard, between Covey Road and Manzanita Avenue.

VI. Wildfire Preventative Strategies

A. High Fire Threat District

MVU directly participated in the development of the CPUC's Fire-Threat Map,[4] which designates a High-Fire Threat District. In the map development process, MVU coordinated with Southern California Edison Company (SCE) and determined that because MVU's system is entirely undergrounded, that SCE would serve as territory lead for the region served by MVU. MVU has incorporated the High Fire Threat District into its construction, inspection, maintenance, repair, and clearance practices, where applicable.

B. Design and Construction Standards

MVU's electric facilities are designed and constructed to meet or exceed the relevant federal, state, or industry standard. MVU treats CPUC General Orders (GO) 95 and 128 as a key industry standard for design and construction standards for underground electrical facilities. MVU meets or exceeds all standards in GO 95 and 128. Additionally, MVU monitors and follows, as appropriate, the National Electric Safety Code.

C. Vegetation Management

MVU meets or exceeds the minimum industry standard vegetation management practices. For transmission-level facilities, MVU complies with NERC FAC-003-4, where applicable. For both transmission and distribution level facilities, MVU meets: (1) Public Resources Code section 4292; (2) Public Resources Code section 4293; (3) CPUC GO 95, 128, 165, and 174.

D. Inspections

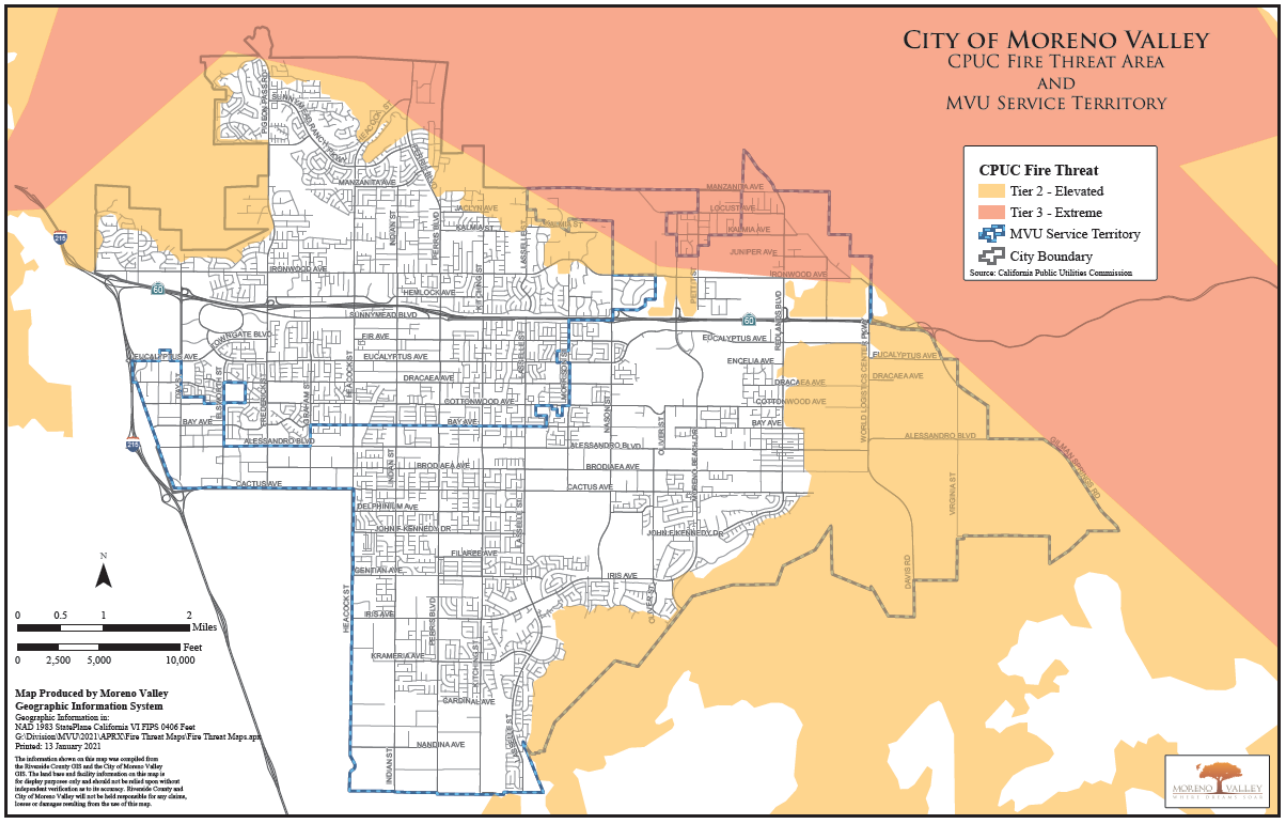
MVU meets or exceeds the minimum inspection requirements provided in CPUC GO 165 and 174. Pursuant to these rules, utilities inspect electric facilities in the High Fire Threat District more frequently than the other areas of its service territory. As described above, MVU currently does not have any overhead power lines located within or near the High-Fire Threat District within the CPUC's Fire Threat Map. However, MVU staff uses their knowledge of the specific environmental and geographical conditions of MVU's service territory to determine if any particular areas require more frequent inspections.

[4] Adopted by CPUC Decision 17-12-024.

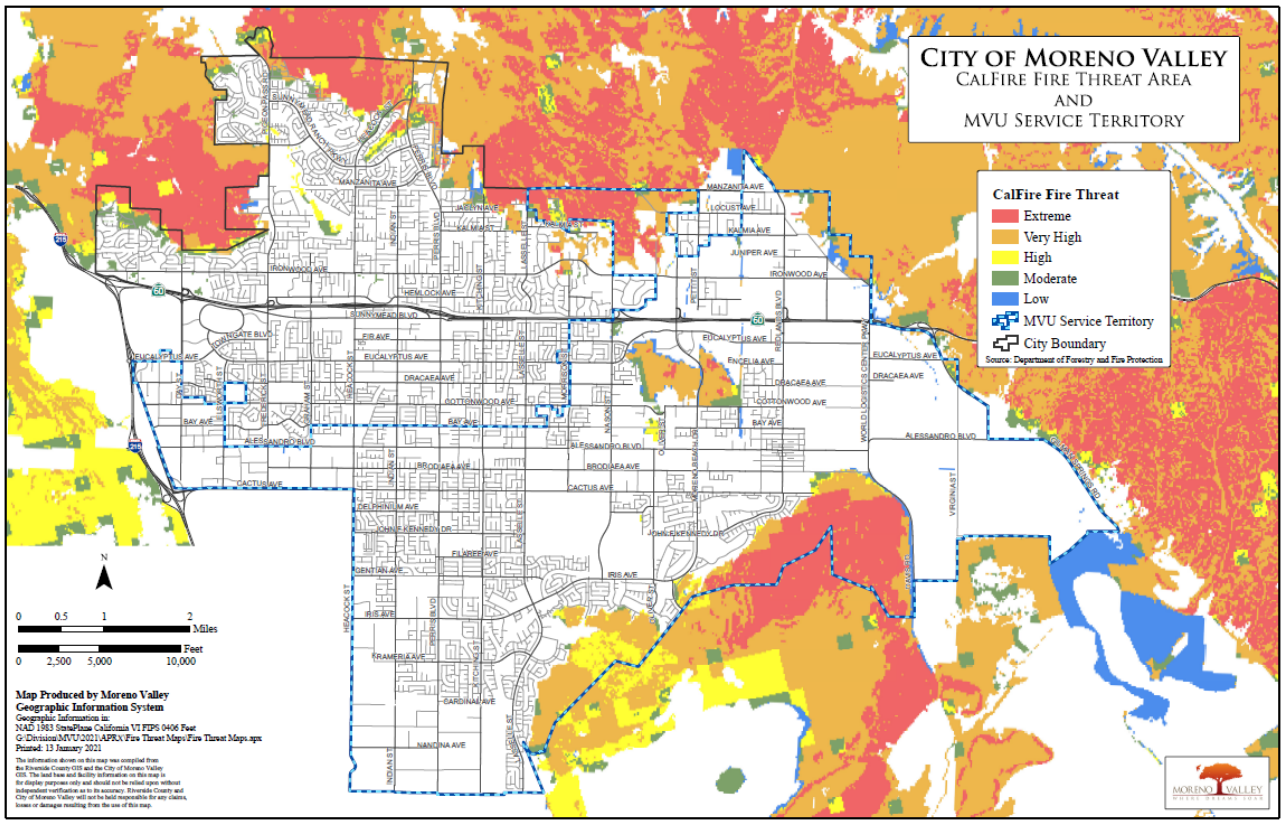
If MVU staff discovers a facility in need of repair that is owned by an entity other than MVU, MVU will issue a notice to repair to the facility owner and work to ensure that necessary repairs are completed promptly.

MVU has conducted an analysis of all circuits to identify essential facilities and prioritize the deployment of back-up power facilities. Grant funding is also being sought to install back-up generation at additional strategic facilities throughout the service territory. MVU is fully capable of sectionalizing any outage to mitigate the number of customers impacted. This mitigation technique will also be employed during PSPS events to reduce any service interruptions to MVU customers. MVU will explore the possibility of back feeding the distribution system with customer owned battery storage systems.

E. California Public Utility Commission Wildfire Threat Map



F. CalFire Fire Threat Map



G. Reclosing Policy

MVU's system is 100% underground. Reclosers are not installed on underground circuits. MVU does not change substation relay settings.

H. De-energization

MVU has the authority to preemptively shut off power due to fire-threat conditions, however, this option will only be used in extraordinary circumstances. Due to the minimal risk of MVU's electrical supply facilities causing a power-line ignited wildfire, MVU is not adopting specific protocols for de-energizing any portions of its electric distribution system. MVU will re-evaluate this determination in future updates to this Wildfire Mitigation Plan.

VII. Restoration of Service

MVU's electric distribution system is completely underground. However, MVU is interconnected with SCE's transmission and distribution systems, much of which is overhead and exposed to wind, rain and lightning. This is MVU's primary source of vulnerability to potential electrical service interruptions during rain and wind storms such as the ones that can be precipitated by El Nino.

MVU's underground electric distribution system is designed, and has be constructed, with redundant sources of feed. These do not guarantee the elimination of outages but can facilitate service restoration and reduce the duration of such outages.

Preparation in advance of predicted storms: Since, as discussed in the introduction, the primary trouble source during storms is outages on SCE's transmission and distribution lines, many of which are overhead, MVU will patrol, to the extent practical, SCE's primary interconnect lines for any potential trouble spots including but not limited to broken tree

limbs or other vulnerabilities. MVU will also double check the loading conditions of our underground lines to satisfy ourselves that alternate sources have the capacity to serve the electric load (customers) in the event that it is necessary.

MVU's underground system will be patrolled in advance of storms for any open trenches or excavations at construction sites to minimize water intrusion into the underground system. Although the underground system is designed to operate under such conditions, small pinholes in splices or cable can cause problems, including possible electrical shorts/faults, that can interrupt service to customers. Likewise, after the storm, each underground vault, manhole or other structure will be inspected for water intrusion and pumped, when necessary, in accordance proper utility practice and environmental guidelines.

All vehicular equipment, man-lifts, tools and appurtenances will be thoroughly inspected for proper operation. All operating personnel will be placed on standby in the event of weather-related problems.

The MVU Operations and Call Center will be appropriately staffed for handling of trouble calls from customers and dispatching to field personnel.

Call Center support includes:

- Outage Management System (OMS)
- Field Dispatching
- Customer Callbacks

Response Prioritization:

- First Priority: Response to imminent threats to life and/or public property
- Second Priority: Removals of immediate hazards (fallen trees, power poles, etc.)
- Third Priority: Clearing of arterial roadway
- Fourth Priority: Maintenance of traffic control/closures to prevent potential accidents
- Fifth Priority (Post Storm Activity): Follow-up work such as addressing storm-related potholes and residual clean-up of all streets that have remained in a "passable and drivable" state

Referral Protocol:

- Flooding of structures on private property- Residents will be advised to call 911 for Fire Department assistance
- Facilities associated with other government agencies (RCFCD) or private utilities will be referred to appropriate agencies/company
- All storm related issues involving streets, curbs and gutters, sidewalks, residential trees in the right of way, catch basins, and miscellaneous drainage facilities will be referred to the City's Maintenance and Operations Division.

During EOC activation period, all routine maintenance programs and requests will be suspended and deferred.

VIII. Evaluation of the Plan

A. Metrics and Assumptions for Measuring Plan Performance

MVU will track the following metric to measure the performance of this Wildfire Mitigation Plan: (1) number of fire ignitions caused by utility equipment.

Metric 1: Fire Ignitions

For purposes of this metric, a fire ignition is defined as follows:

- MVU facility was associated with the fire;
- The fire was self-propagating and of a material other than electrical and/or communication facilities;
- The resulting fire traveled greater than one linear meter from the ignition point; and
- MVU has knowledge that the fire occurred.

In future Wildfire Mitigation Plans, MVU will provide the number of fires that occurred that were less than 10 acres in size. Any fires greater than 10 acres will be individually described.

Reporting Year	Fire Ignitions
2020	0
2019	0

B. Impact of Metrics on Plan

In the initial years, MVU anticipates that there will be relatively limited data gathered through the metric. However, as the data collection history becomes more robust, MVU will be able to identify areas of its operations and service territory that are disproportionately impacted. MVU will then evaluate potential improvements to the plan.

C. Monitoring and Auditing the Plan

This Wildfire Mitigation Plan will be presented to the MVU Utilities Commission and the Moreno Valley City Council. MVU will present updates to this plan to the MVU Utilities Commission and the City Council on an annual basis.

D. Identifying and Correcting Deficiencies in the Plan

Based on the recommendations of the MVU Utilities Commission and the Moreno Valley City Council, MVU will correct any identified deficiencies.

E. Monitoring the Effectiveness of Inspections

MVU reviews and evaluates its reliability indices regularly to monitor inspection and maintenance procedures. SAIDI, SAIFI, CAIDI, and MAIFI statistics show that MVU maintains an electric system that operates well below the State and National averages for outage incidents per the American Public Power Association's eReliability Tracker program. MVU's Utility Maintenance Management System (UMMS) is used to collect all data subject to GO165. The UMMS prepares monthly inspection and maintenance reports for all electric distribution facilities. Maintenance history for each piece of equipment is archived in the UMMS. Additionally, MVU's substation inspection and maintenance program complies with GO 174 guidelines as well as manufacturer specifications, standards, and recommendations. MVU performs monthly inspections of all substation components including recording and analysis of all alarms, fluid levels, meters, and Load Tap Changer settings.

Although MVU does not fall under the jurisdiction of the California Public Utilities Commission (CPUC), MVU has cooperated with the CPUC's Utilities Safety and Reliability Branch and their requests for periodic audits. The audit in October 2008 noted no GO 95 infractions, and identified two GO 128 infractions to MVU Pad Mounted Electric structures. Repairs were made to correct the violation the day they were identified by the CPUC. Again, in March of 2013 the CPUC audit identified three vegetation obstructions that were immediately corrected in the field as they were identified. No additional infractions have been identified by the CPUC.

Report to City Council

TO:	Mayor and City Council
FROM:	Michael L. Wolfe P.E., Assistant City Manager
AGENDA DATE:	February 2, 2021
TITLE:	AUTHORIZATION TO AWARD A CONSTRUCTION CONTRACT TO O'DUFFY BROTHERS, INC. FOR SUNNYMEAD - FLAMING ARROW DRIVE STORM DRAIN (SUNNYMEAD MDP LINE M-11 EXTENSION) – PROJECT NO. 804 0014

RECOMMENDED ACTION

Recommendations:

1. Award a construction contract to O'Duffy Brothers, Inc. for the Sunnymead - Flaming Arrow Drive Storm Drain (Sunnymead MDP Line M-11 Extension) project and authorize the City Manager to execute a contract with O'Duffy Brothers, Inc. in substantial conformance with the attached contract in the amount of $540,040 for the construction of the project, funded by Community Development Block Grant (CDBG) (Fund 2512), Riverside County Flood Control and Water Conservation District (RCFC&WCD) (Fund 3002), Measure A (Fund 2001), and Reimbursement Agreement with Eastern Municipal Water District (EMWD) (Fund 3002);

2. Authorize the issuance of a Purchase Order for O'Duffy Brothers, Inc. in the amount of $594,044 ($540,040 bid amount plus a 10% contingency) when the contract has been signed by all parties; and

3. Authorize the Public Works Director/City Engineer to execute any subsequent change orders to the contract, but not exceeding the total contingency of $54,004, subject to the approval of the City Attorney.

SUMMARY

This report recommends approval of a contract with O'Duffy Brothers, Inc. for the construction of the Sunnymead - Flaming Arrow Drive Storm Drain (Sunnymead MDP

Line M-11 Extension) project.

DISCUSSION

This project involves the construction of an approximately 1,200-foot long, 24-inch storm drain pipe connecting to the existing 42-inch reinforced concrete pipe (RCP) Sunnymead Master Drainage Plan (MDP) Line M-11 within Flaming Arrow Drive, just north of Bay Avenue. A 48-inch corrugated metal pipe (CMP) riser with openings and a grate will be constructed at the upstream end of the proposed storm drain where it will collect storm water from the eastern terminus of Saint Christopher Lane and adjoining properties in order to convey flows and mitigate flooding. The project design and bidding documents were completed jointly by the City and Riverside County Flood Control and Water Conservation District (RCFC&WCD).

The project was first advertised for construction bids in Spring 2020. The one bid received was considerably higher than the Engineer's estimate and the budgeted amount for construction. On July 7, 2020, City Council approved the rejection of all bids.

City staff worked closely with RCFC&WCD to analyze and repackage the project to include alternative items that might produce bids within budget. The project was re-advertised for construction bids on November 10, 2020 and formal bidding procedures were followed in conformance with the Public Contract Code. Five (5) bids were received via the electronic bid management system, PlanetBids, on January 11, 2021 as follows:

CONTRACTORS	Base Bid + Additive Alternate Bid
1. O'Duffy Brothers, Inc.	**$819,010**
2. Wright Construction Engineering Corporation	**$858,292**
3. H&H General Contractors, Inc.	**$961,696**
4. Ferreira Coastal Construction Company	**$1,019,841**
5. G. Hurtado Construction, Inc.	**$1,299,600**

The lowest responsible bidder was determined by comparing the cumulative total for all base bid items plus Additive Alternate No.1 as stipulated in the bidding documents. Staff has reviewed the bid by O'Duffy Brothers, Inc. and finds it to be the lowest responsible bidder in possession of a valid license and bid bond. No outstanding issues were identified through review of the references submitted by O'Duffy Brothers, Inc. in their bid. Additive Alternate Bid No. 1, Items 21 & 22 are Polypropylene Pipe which was included as an acceptable replacement for RCP (Base Bids Items 4 & 5) to the City and RCFC&WCD. Staff recommends to award a total contract amount of $540,040, which includes Additive Alternate Bid Items 21 & 22.

A contingency of 10% of the bid amount ($54,004) is recommended to account for any changed field condition, underground utility issue, or unforeseen circumstances that arise during construction. The contingency will allow for rapid resolution of any construction issues that may arise, mitigating any potential delay costs to the City.

The project includes relocation of existing EMWD facilities during the time that the storm drain trench is open in order to minimize inconvenience to the residents. The City and EMWD have a Council-approved Reimbursement Agreement allowing the City's contractor to perform any relocations and EMWD will reimburse the City for the cost of the work.

On June 18, 2019, the City Council certified the Mitigated Negative Declaration and the Mitigation Monitoring and Reporting Program for the project in compliance with the provisions of the California Environmental Quality Act (CEQA). Various mitigation measures were identified and have been incorporated into the project specifications for reducing all potential environmental impacts to an acceptable level.

Approval of the recommended actions would support Objective 4 of the Momentum MoVal Strategic Plan: "Manage and maximize Moreno Valley's public infrastructure to ensure an excellent quality of life, develop and implement innovative, cost effective infrastructure maintenance programs, public facilities management strategies, and capital improvement programming and project delivery."

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *This alternative will provide for the timely construction of the Sunnymead - Flaming Arrow Drive Storm Drain (Sunnymead MDP Line M-11 Extension) project.*

2. Do not approve and authorize the recommended actions as presented in this staff report. *Staff does not recommend this alternative as it will delay completion of the Sunnymead - Flaming Arrow Drive Storm Drain (Sunnymead MDP Line M-11 Extension) project and may result in losing funding from RCFC&WCD and CDBG.*

FISCAL IMPACT

This project is funded by Community Development Block Grant (Fund 2512), Riverside County Flood Control and Water Conservation District (Public Works Capital Projects Fund 3002), and Measure A (Fund 2001). As stated in the discussion section, the City entered into a Reimbursement Agreement with Eastern Municipal Water District (EMWD) and their relocation costs will be recovered. The actual EMWD amount will be based on the final contractor invoice when the applicable items are completed, which may require a future adjustment to the agreement.

PROJECT BUDGET:
Community Development Block Grant
(2512-70-77-80004-720199) (Project No. 804 0014-2512-99)……..……$250,000
Public Works Capital Projects – RCFC&WCD
(3002-70-77-80004-720199) (Project No. 804 0014-3002-99) $355,510

Public Works Capital Projects – RCFC&WCD*
(3002-70-77-80004-720199) (Project No. 804 0014-3002-99) $65,375
**Project savings from 804 0014*
Measure A
(2001-70-77-80004-720199) (Project No. 804 0014-2001-99)……..……$136,882
Public Works Capital Projects – EMWD**
(3002-70-77-80004-720199) (Project No. 804 0014-3002-99)……..……$140,050
***Estimated*
Total $926,642

ESTIMATED PROJECT COSTS:
Environmental …… $74,000
Right of Way and Utility……...$17,000
Miscellaneous Fees…… ..$3,000
Filing and Permit Fees……...$9,000
Construction Contract (including contingency and EMWD relocations)..... $594,044
Survey Services……..……..$20,000
Geotechnical and Materials Testing $20,000
Tribal Monitoring during Construction..... $15,000
Construction Management and Inspection $45,000
Staff Salaries*…….. .$115,000
Total $922,044
**Project administration and inspection will be provided by City staff*

PROJECT SCHEDULE:
Construction ..... Spring 2021 – Fall 2021

NOTIFICATION

Prior to construction, utilities, adjacent property owners, business owners, law enforcement, fire department, churches, public transportation, and other emergency service responders in the area will be notified in a timely manner of the proposed construction.

PREPARATION OF STAFF REPORT

Prepared By:
Margery Lazarus
Senior Engineer, PE

Department Head Approval:
Michael L. Wolfe, PE
Public Works Director/City Engineer

Concurred By:
Henry Ngo, PE
Capital Projects Division Manager

CITY COUNCIL GOALS

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

SUNNYMEAD - FLAMING ARROW DRIVE STORM DRAIN

PROJECT No 804 0014

Attachment: Location Map (4258 : AUTHORIZATION TO AWARD A CONSTRUCTION CONTRACT TO O'DUFFY BROTHERS, INC. FOR

Agreement No._____

AGREEMENT

PROJECT No. 804 0014
Sunnymead - Flaming Arrow Drive Storm Drain

THIS Agreement, effective as of the date signed by the City of Moreno Valley by and between the City of Moreno Valley, a municipal corporation, County of Riverside, State of California, hereinafter called the "City" and **O'Duffy Brothers, Inc.**, hereinafter called the "Contractor."

That the City and the Contractor for the consideration hereinafter named, agree as follows:

1. CONTRACT DOCUMENTS. The Contract Documents consist of the following, which are incorporated herein by this reference:

A. This Agreement
B. Any and all Contract Change Orders and Construction Change Directives issued after execution of this Agreement
C. Addenda Nos. **0** inclusive, issued prior to the Bid Deadline
D. Federal Provisions and Requirements
E. Any Federal Certifications, documentation, and reports, as required, including, but not limited to, Contractor's Certification on Federal Contract Requirements, Certification of Nonsegregated Facilities, Certification of Equal Employment Opportunity, Certification on Good Faith Efforts Regarding Minority Based Enterprise (MBE) and Women Based Enterprise (WBE), and Race and Ethnic Data Reporting Form
F. City of Moreno Valley Supplementary General Conditions, if any
G. The bound Contract Documents that includes City Special Provisions, General Provisions, and Technical Provisions
H. Standard Specifications for Public Works Construction ("Greenbook") – latest edition in effect at the Bid Deadline, as modified by the City Special Provisions
I. Reference Specifications/Reference Documents other than those listed in paragraph 2, below
J. Project Plans
K. City Standard Plans
L. Caltrans Standard Plans
M. RCFC&WCD Standard Plans
N. EMWD Standard Plans
O. EMWD 8" Water Line Relocation Plan
P. EMWD 8" Water Line Relocation Specifications
Q. SCE Electrical Relocation Plans
R. Governmental approvals, including, but not limited to, permits required for the Work
S. Contractor's Labor and Materials Payment Bond (for reference only)
T. Contractor's Faithful Performance Bond (for reference only)
U. Contractor's Certificates of Insurance and Additional Insured Endorsements
V. Contractor's Bid Schedule, Bidder's Proposal, Subcontractor List, and Material Supplier Listing

In the event of conflict between any of the Contract Documents, the provisions placing a more stringent requirement on the Contractor shall prevail. The Contractor shall provide the better quality or greater quantity of Work and/or materials unless otherwise directed by City in writing. In the event none of the Contract Documents place a more stringent requirement or greater burden on the Contractor, the controlling provision shall be that which is found in the document with higher precedence in accordance with the above order of precedence.

2. REFERENCE DOCUMENTS. The following Reference Documents are not considered Contract Documents and are made available to the Contractor for informational purposes:

A. None

3. SCOPE OF WORK. The Contractor shall perform and provide all materials, tools, equipment, labor, and services necessary to complete the Work described in the Contract Documents, except as otherwise provided in the Plans, Standard Specifications, or City Special Provisions to be the responsibility of others.

4. PAYMENT.

4.1. **Contract Price and Basis for Payment**. In consideration for the Contractor's full, complete, timely, and faithful performance of the Work required by the Contract Documents, the City shall pay Contractor for the actual quantity of Work required under the Bid Items awarded by the City performed in accordance with the lump sum prices and unit prices for Bid Items set forth the Bid Schedule submitted with the Bid. The sum of the unit prices and lump sum prices for the Base Bid Items (excluding Base Bid Items 4 & 5), and Additive Alternate Bid No.1 Items awarded by the City is Five Hundred Forty Thousand Forty and 00/100 Dollars ($540,040.00) ("Contract Price"). The Additive Alternate Bid Items selected by the City and included in the Contract are Bid Items: 21 and 22. It is understood and agreed that the quantities set forth in the Bid Schedule for which unit prices are fixed are estimates only and that City will pay and Contractor will accept, as full payment for these items of Work, the unit prices set forth in the Bid Schedule multiplied by the actual number of units performed, constructed, or completed as directed and measured by the City Engineer.

4.2. **Payment Procedures**. Based upon applications for payment submitted by the Contractor to the City, the City shall make payments to the Contractor in accordance with Section 7 of the Standard Specifications, as modified by Section 7 of the City Special Provisions.

5. CONTRACT TIME.

A. Contract Time. The Contract Time shall be determined in accordance with the following:

Base Bid with Additive Alternate Bid No. 1	110 Working Days

B. Initial Notice to Proceed. After the Agreement has been fully executed by the Contractor and the City, the City shall issue the "Notice to Proceed to Fulfill Preconstruction Requirements and Notice to Proceed to Pothole." The date specified in the Notice to Proceed to Fulfill Preconstruction Requirements and Notice to Proceed to Pothole constitutes the date of

commencement of the Contract Time of **One Hundred Ten (110) days to complete the work for the Base Bid, or the Base Bid with Additive Alternate No. 1. This Contract Time includes 100 working days and 10 additional days for relocating conflicting utilities.** The Contract Time includes the time necessary to fulfill preconstruction requirements and to complete construction of the Project (except as adjusted by subsequent Change Orders).

The Notice to Proceed to Fulfill Preconstruction Requirements and Notice to Proceed to Pothole shall further specify that Contractor must complete the preconstruction requirements and proceed with Potholing within **Ten (10) Working Days** after the date of commencement of the Contract Time; this duration is part of the Contract Time.

Preconstruction requirements include, but are not limited to, the following:

- Submitting and obtaining approval of any Traffic Control Plans
- Submitting and obtaining approval of the Stormwater Pollution Prevention Plan (SWPPP)/Water Pollution Control Plan (WPCP)
- Submitting and obtaining approval of critical required submittals
- Installation of the approved Project Identification Signs
- Obtaining an approved no fee Encroachment Permit
- Obtaining a Temporary Use Permit for a construction yard
- Notifying all agencies, utilities, residents, etc., as outlined in the Contract Documents

If the City's issuance of a Notice to Proceed to Fulfill Preconstruction Requirements and Notice to Proceed to Pothole is delayed due to Contractor's failure to return the fully executed Agreement and insurance and bond documents within ten (10) Working Days after Contract award, then Contractor agrees to the deduction of one (1) Working Day from the number of days to complete the Project for every Working Day of delay in the City's receipt of said documents. This right is in addition to and does not affect the City's right to demand forfeiture of Contractor's Bid Security if Contractor persistently delays in providing the required documentation.

C. Notice to Proceed with Construction. After all preconstruction requirements are met and materials have been ordered in accordance with the Notice to Proceed to Fulfill Preconstruction Requirements and Notice to Proceed to Pothole, the City shall issue the "Notice to Proceed with Construction," at which time the Contractor shall diligently prosecute the Work, including corrective items of Work, day to day thereafter, within the remaining Contract Time.

6. LIQUIDATED DAMAGES AND CONTROL OF WORK.

6.1. **Liquidated Damages.** The Contractor and City (collectively, the "Parties") have agreed to liquidate damages with respect to Contractor's failure to complete the Work within the Contract Time, which includes the time necessary to fulfill preconstruction requirements, place the order of materials, proceed with potholing, and to complete construction of the Project (except as adjusted by subsequent Change Orders) in accordance with **Article 5** above. The Parties intend for the liquidated damages set forth herein to apply to this Contract as set forth in Government Code Section 53069.85 and in Public Contract Code Section 7203. Contractor acknowledges and agrees that the liquidated damages are intended to compensate the City solely for Contractor's failure to meet the deadlines for completion of the Work and will not excuse

Contractor from liability from any other breach, including any failure of the Work to conform to the requirements of the Contract Documents.

In the event that Contractor fails to complete the Work within the Contract Time, Contractor agrees to pay the City **$615.00 per Calendar Day** that completion of the each such portion of the Work is delayed beyond the Contract Time. The Contractor will not be assessed liquidated damages for delays occasioned by the failure of the City or of the owner of a utility to provide for the removal or relocation of utility facilities.

The Contractor and City acknowledge and agree that the foregoing liquidated damages have been set based on an evaluation of damages that the City will incur in the event of late completion of portions of the Work. The Contractor and City acknowledge and agree that the amount of such damages are impossible to ascertain as of the date of execution hereof and have agreed to such liquidated damages to fix the City's damages and to avoid later disputes. It is understood and agreed by Contractor that liquidated damages payable pursuant to this Agreement are not a penalty and that such amounts are not manifestly unreasonable under the circumstances existing as of the date of execution of this Agreement.

It is further mutually agreed that the City will have the right to deduct liquidated damages against progress payments or retainage and that the City will issue a Change Order or Construction Change Directive and reduce the Contract Price accordingly. In the event the remaining unpaid Contract Price is insufficient to cover the full amount of liquidated damages, Contractor shall pay the difference to the City.

Liquidated damages are owed automatically and without notice of any kind upon the accrual of each day of delay. City may at any time deduct liquidated damages as are payable hereunder from money due or to become due to Contractor, or pursue any other legal remedy to collect such liquidated damages from Contractor and/or its Surety. Neither the City's failure or delay in deducting liquidated damages from payments otherwise due Contractor, nor City's failure or delay in notifying Contractor of the accrual of liquidated damages, shall be deemed a waiver of City's right to liquidated damages.

City's rights under this Section shall not be interpreted as precluding or limiting: (1) any right or remedy of City arising from an event of Contractor default other than a failure to complete the Work within the Contract Time; or (2) City's right to order an acceleration, at Contractor's expense, of performance of the Work to overcome delay, including, without limitation, a delay for which City has the right to assess and/or accrue liquidated damages. The availability of liquidated damages shall not limit City's right to terminate the Contractor's performance and accrual and/or assessment of liquidated damages does not constitute a waiver of such rights.

6.2. **Owner is Exempt from Liability for Early Completion Delay Damages**. While the Contractor may schedule completion of all of the Work, or portions thereof, earlier than the Contract Time, the Owner is exempt from liability for and the Contractor will not be entitled to an adjustment of the Contract Sum or to any additional costs, damages, including, but not limited to, claims for extended general conditions costs, home office overhead, jobsite overhead, and management or administrative costs, or compensation whatsoever, for use of float time or for Contractor's inability to complete the Work earlier than the Contract Time for any reason whatsoever, including but not limited to, delay cause by Owner or other Excusable Compensable

Delay. See Section 6-4 of the Standard Specifications and City Special Provisions regarding compensation for delays.

6.3. Any work completed by the Contractor after the issuance of a Stop Work Notice by the City shall be rejected and/or removed and replaced as specified in Section **3-5** of the City Special Provisions.

7. INSURANCE.

7.1. **General**. The Contractor shall procure and maintain at its sole expense and throughout the term of this Agreement, any extension thereof, Commercial General Liability, Automobile Liability, and Workers' Compensation Insurance with such coverage limits as described herein.

7.2. **Additional Insured Endorsements**. The Contractor shall cause the insurance required by the Contract Document to include the City of Moreno Valley, the City Council and each member thereof, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD) and their respective officials, employees, commission members, officers, directors, agents, employees, volunteers and representatives as an additional insureds. For the Commercial General Liability coverage, said parties shall be named as additional insureds utilizing either:

1. Insurance Services Office ("ISO") Additional Insured endorsement CG 20 10 (11/85); or

2. ISO Additional Insured endorsement CG 20 10 (10/01) and Additional Insured Completed Operations endorsement CG 20 37 (10/01); or

3. Substitute endorsements providing equivalent coverage, approved by the City.

The endorsements shall be signed by a person authorized by the insurer to bind coverage on its behalf. The coverage shall contain no special limitations on the scope of protection afforded to such additional insureds. Coverage for such additional insureds does not extend to liability to the extent prohibited by Insurance Code Section 11580.4.

7.3. **Waivers of Subrogation**. All policies of insurance required by the Contract Documents shall include or be endorsed to provide a waiver by the insurers of any rights of recovery or subrogation that the insurers may have at any time against the City of Moreno Valley, the City Council and each member thereof, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD) and their respective officials, employees, commission members, officers, directors, agents, employees, volunteers, and representatives.

7.4. **Primary Coverage**. All policies and endorsements shall stipulate that the Contractor's (and the Subcontractors') insurance coverage shall be primary insurance as respects the City of Moreno Valley, the City Council and each member thereof, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD) and their respective officials, employees, commission members, officers, directors, agents, employees, volunteers, and representatives, and shall be excess of the Contractor's (and its Subcontractors') insurance and shall not contribute with it.

7.5. **Coverage Applies Separately to Each Insured and Additional Insured**. Coverage shall state that the Contractor's (and its Subcontractors') insurance shall apply separately to each insured or additional insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability. Coverage shall apply to any claim or suit brought by an additional insured against a named insured or other insured.

7.6. **Self-Insurance**. Any self-insurance (including deductibles or self-insured retention in excess of $50,000) in lieu of liability insurance must be declared by Contractor and approved by the City in writing prior to execution of the Agreement. The City's approval of self-insurance, if any, is within the City's sole discretion and is subject to the following conditions:

1. Contractor must, at all times during the term of the Agreement and for a period of at least **one (1)** year after completion of the Project and any extension of the one-year correction guarantee period in accordance with Section 3-13.3 of the City Special Provisions, maintain and upon Owner's reasonable request provide evidence of:

   (a) Contractor's "net worth" (defined as "total assets" [defined as all items of value owned by the Contractor including tangible items such as cash, land, personal property, and equipment, and intangible items such as copyrights and business goodwill]) minus total outside liabilities must be reflected in a financial statement for the prior fiscal year reflecting sufficient income and budget for Contractor to afford at least one loss in an amount equal to the amount of self-insurance;

   (b) Financial statements showing that Contractor has funds set aside/budgeted to finance the self-insured fund (i.e., Contractor has a program that fulfills functions that a primary insurer would fill); and

   (c) A claims procedure that identifies how a claim is supposed to be tendered to reach the financing provided by the self-insured fund.

2. If at any time after such self-insurance has been approved, the Contractor fails to meet the financial thresholds or otherwise fails to comply with the provisions set forth in this Paragraph 7, at the option of the City:

   (a) The Contractor shall immediately obtain and thereafter maintain the third party insurance required under this Paragraph 7 and otherwise on the terms required above; or

   (b) The insurer shall reduce or eliminate such deductibles or self-insured retention as respects the City, its officers, officials, employees, and volunteers; or

   (c) The Contractor shall procure a bond guaranteeing payment of losses and related investigation, claim administration, and defense expenses.

7.7. **Insurer Financial Rating**. Insurance companies providing insurance hereunder shall be rated A-VII or better in Best's Insurance Rating Guide and shall be legally licensed and qualified to conduct insurance business in the State of California.

7.8. **Notices to City of Cancellation or Changes**. Each insurance policy described in this Paragraph 7 shall contain a provision or be endorsed to state that coverage will not be cancelled without **thirty (30) days'** prior written notice by certified or registered mail to the City (this obligation may be satisfied in the alternative by requiring such notice to be provided by Contractor's insurance broker and set forth on its Certificate of Insurance provided to the City), except that cancellation for non-payment of premium shall require (10) days prior written notice by certified or registered mail. If an insurance carrier cancels any policy or elects not to renew any policy required to be maintained by Contractor pursuant to the Contract Documents, Contractor agrees to give written notice to the City at the address indicated on the first page of the Agreement. Contractor agrees to provide the same notice of cancellation and non-renewal to the City that is required by such policy(ies) to be provided to the First Named Insured under such policy(ies). Contractor shall provide confirmation that the required policies have been renewed not less than seven (7) days prior to the expiration of existing coverages and shall deliver renewal or replacement policies, certificates and endorsements to the City Clerk within fourteen (14) days of the expiration of existing coverages. Contractor agrees that upon receipt of any notice of cancellation or alteration of the policies, Contractor shall procure within five (5) days, other policies of insurance similar in all respects to the policy or policies to be cancelled or altered. Contractor shall furnish to the City Clerk copies of any endorsements that are subsequently issued amending coverage or limits within fourteen (14) days of the amendment.

7.9. **Commercial General Liability**. Coverage shall be written on an ISO Commercial General Liability "occurrence" form CG 00 01 (10/01 or later edition) or equivalent form approved by the City for coverage on an occurrence basis. The insurance shall cover liability, including, but not limited to, that arising from premises operations, stop gap liability, independent contractors, products-completed operations, personal injury, advertising injury, and liability assumed under an insured contract. The policy shall be endorsed to provide the Aggregate Per Project Endorsement ISO form CG 25 03 (11/85). Coverage shall contain no contractors' limitation or other endorsement limiting the scope of coverage for liability arising from pollution, explosion, collapse, or underground (x, c, u) property damage. Contractor shall provide Products/Completed Operations coverage to be maintained continuously for a minimum of **one (1) year** after Final Acceptance of the Work, and any extension of the one-year correction guarantee period in accordance with Section 3-13.3 of the City Special Provisions.

Contractor shall maintain Commercial General Liability insurance with the following minimum limits: $1,000,000 per occurrence / $2,000,000 aggregate / $2,000,000 products-completed operations.

7.10. **Business Automobile Liability**. Coverage shall be written on ISO form CA 00 01 (12/93 or later edition) or a substitute form providing equivalent coverage for owned, hired, leased and non-owned vehicles, whether scheduled or not, with $1,000,000 combined single limit per accident for bodily injury and property damage. If necessary, the policy shall be endorsed to provide contractual liability coverage.

7.11. **Workers' Compensation**. Contractor shall comply with the applicable sections of the California Labor Code concerning workers' compensation for injuries on the job. Compliance is accomplished in one of the following manners:

1. Provide copy of permissive self-insurance certificate approved by the State of California; or

2. Secure and maintain in force a policy of workers' compensation insurance with statutory limits and Employer's Liability Insurance with a minimal limit of **$1,000,000** per accident; or

3. Provide a "waiver" form certifying that no employees subject to the Labor Code's Workers' Compensation provision will be used in performance of this Contract.

7.12. **Subcontractors' Insurance**. The Contractor shall include all Subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each Subcontractor. All coverages for Subcontractors shall be subject to all of the requirements stated herein.

8. BONDS. The Contractor shall provide two surety bonds. The Contractor shall furnish a satisfactory Performance Bond meeting all statutory requirements of the State of California on the form provided by the City. The bond shall be furnished as a guarantee of the faithful performance of the requirements of the Contract Documents as may be amended from time to time, including, but not limited to, liability for delays and damages (both direct and consequential) to the City and the City's Separate Contractors and consultants, warranties, guarantees, and indemnity obligations, in an amount that shall remain equal to one hundred percent (100%) of the Contract Price.

The Contractor shall furnish a separate satisfactory Labor and Materials Payment Bond meeting all statutory requirements of the State of California on the form provided by the City in an amount that shall remain equal to one hundred percent (100%) of the Contract Price to secure payment of all claims, demands, stop payment notices, or charges of the State of California, of material suppliers, mechanics, or laborers employed by the Contractor or by any Subcontractor, or any person, form, or entity eligible to file a stop payment notice with respect to the Work.

All bonds shall be executed by a California-admitted surety insurer. Bonds issued by a California-admitted surety insurer listed on the latest version of the U.S Department of Treasury Circular 570 shall be deemed accepted unless specifically rejected by the City. Bonds issued by sureties not listed in Treasury Circular 570 must be accompanied by all documents enumerated in California Code of Civil Procedure Section 995.660(a). The bonds shall bear the same date as the Contract. The attorney-in-fact who executes the required bonds on behalf of the surety shall affix thereto a certified and current copy of the power of attorney. In the event of changes that increase the Contract Price, the amount of each bond shall be deemed to increase and at all times remain equal to the Contract Price. The signatures shall be acknowledged by a notary public. Every bond must display the surety's bond number and incorporate the Contract for construction of the Work by reference. The terms of the bonds shall provide that the surety agrees that no change, extension of time, alteration, or modification of the Contract Documents or the Work to be performed thereunder shall in any way affect its obligations and shall waive notice of any such

change, extension of time, alteration, or modification of the Contract Documents. The surety further agrees that it is obligated under the bonds to any successor, grantee, or assignee of the City.

Upon the request of any person or entity appearing to be a potential beneficiary of bonds covering payment of obligations arising under the Contract, the Contractor shall promptly furnish a copy of the bonds or shall authorize a copy to be furnished.

Should any bond become insufficient, or should any of the sureties, in the opinion of the City, become non-responsible or unacceptable, the Contractor shall, within ten (10) Calendar Days after receiving notice from the City, provide written documentation to the Satisfaction of the City that Contractor has secured new or additional sureties for the bonds; otherwise the Contractor shall be in default of the Contract. No further payments shall be deemed due or will be made under Contract until a new surety(ies) qualifies and is accepted by the City.

Contractor agrees that the Labor and Materials Payment Bond and Faithful Performance Bond attached to this Agreement are for reference purposes only, and shall not be considered a part of this Agreement. Contractor further agrees that said bonds are separate obligations of the Contractor and its Surety, and that any attorney's fee provision contained in any payment bond or performance bond shall not apply to this Agreement. In the event there is any litigation between the parties arising from the breach of this Agreement, each party will bear its own attorneys' fees in the litigation.

9. RECORDS. The Contractor and its Subcontractors shall maintain and keep books, payrolls, invoices of materials, and Project records current, and shall record all transactions pertaining to the Contract in accordance with generally acceptable accounting principles. Said books and records shall be made available to the City of Moreno Valley, Riverside County, the State of California, the Federal Government, and to any authorized representative thereof for purposes of audit and inspection at all reasonable times and places. All such books, payrolls, invoices of materials, and records shall be retained for at least five (5) years after Final Acceptance.

10. INDEMNIFICATION.

10.1. **General**. To the fullest extent permitted by law, the Contractor assumes liability for and agrees, at the Contractor's sole cost and expense, to promptly and fully indemnify, protect, hold harmless and defend (even if the allegations are false, fraudulent, or groundless), the City of Moreno Valley, its City Council, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD), and all of their respective officials, officers, directors, employees, commission members, representatives and agents ("Indemnitees"), from and against any and all claims, allegations, actions, suits, arbitrations, administrative proceedings, regulatory proceedings, or other legal proceeds, causes of action, demands, costs, judgments, liens, stop payment notices, penalties, liabilities, damages, losses, anticipated losses of revenues, and expenses (including, but not limited to, any fees of accountants, attorneys, experts or other professionals, or investigation expenses), or losses of any kind or nature whatsoever, whether actual, threatened or alleged, arising out of, resulting from, or in any way (either directly or indirectly), related to the Work, the Project or any breach of the Contract by Contractor or any of its officers, agents, employees, Subcontractors, Sub-subcontractors, or any person performing

any of the Work, pursuant to a direct or indirect contract with the Contractor ("Indemnity Claims"). Such Indemnity Claims include, but are not limited to, claims for:

A. Any activity on or use of the City's premises or facilities;
B. Any liability incurred due to Contractor acting outside the scope of its authority pursuant to the Contract, whether or not caused in part by an Indemnified Party;
C. The failure of Contractor or the Work to comply with any Applicable Law, permit or orders;
D. Any misrepresentation, misstatement or omission with respect to any statement made in the Contract Documents or any document furnished by the Contractor in connection therewith;
E. Any breach of any duty, obligation or requirement under the Contract Documents, including, but not limited to any breach of Contractor's warranties, representations or agreements set forth in the Contract Documents;
F. Any failure to coordinate the Work with City's Separate Contractors;
G. Any failure to provide notice to any party as required under the Contract Documents;
H. Any failure to act in such a manner as to protect the Project from loss, cost, expense or liability;
I. Bodily or personal injury, emotional injury, sickness or disease, or death at any time to any persons including without limitation employees of Contractor;
J. Damage or injury to real property or personal property, equipment and materials (including, but without limitation, property under the care and custody of the Contractor or the City) sustained by any person or persons (including, but not limited to, companies, corporations, utility company or property owner, Contractor and its employees or agents, and members of the general public);
K. Any liability imposed by Applicable Law including, but not limited to criminal or civil fines or penalties;
L. Any dangerous, hazardous, unsafe or defective condition of, in or on the Site, of any nature whatsoever, which may exist by reason of any act, omission, neglect, or any use or occupation of the Site by Contractor, its officers, agents, employees, or Subcontractors;
M. Any operation conducted upon or any use or occupation of the Site by the Contractor, its officers, agents, employees, or Subcontractors under or pursuant to the provisions of the Contract or otherwise;
N. Any acts, errors, omission or negligence of Contractor, its officers, agents, employees, or Subcontractors;
O. Infringement of any patent rights, licenses, copyrights, or intellectual property which may be brought against the Contractor or Owner arising out of Contractor's Work, for which the Contractor is responsible; and
P. Any and all claims against the City seeking compensation for labor performed or materials used or furnished to be used in the Work or alleged to have been furnished on the Project, including all incidental or consequential damages resulting to the City from such claims.

10.2. **Effect of Indemnitees' Active Negligence**. Contractor's obligations to indemnify and hold the Indemnitees harmless **exclude** only such portion of any Indemnity Claim which is attributable to the active negligence or willful misconduct of the Indemnitee, provided such active negligence or willful misconduct is determined by agreement of the parties or by findings of a court of competent jurisdiction. In instances where an Indemnitee's active negligence accounts for only a percentage of the liability for the Indemnity Claim involved, the obligation of Contractor will be for that entire percentage of liability for the Indemnity Claim not attributable to the active negligence or willful misconduct of the Indemnitee(s). Such obligation shall not be construed to negate, abridge or otherwise reduce any other right or obligation of indemnity which would otherwise exist as to any party or person described in this Paragraph 10. Subject to the limits set forth herein, the Contractor, at its own expense, shall satisfy any resulting judgment that may be rendered against any Indemnitee resulting from an Indemnity Claim. The Indemnitees shall be consulted with regard to any proposed settlement.

10.3. **Independent Defense Obligation.** The duty of the Contractor to indemnify and hold harmless the Indemnitees includes the separate and independent duty to defend the Indemnitees, which duty arises immediately upon receipt by Contractor of the tender of any Indemnity Claim from an Indemnitee. The Contractor's obligation to defend the Indemnitee(s) shall be at Contractor's sole expense, and not be excused because of the Contractor's inability to evaluate liability or because the Contractor evaluates liability and determines that the Contractor is not liable. This duty to defend shall apply whether or not an Indemnity Claim has merit or is meritless, or which involves claims or allegations that any or all of the Indemnitees were actively, passively, or concurrently negligent, or which otherwise asserts that the Indemnitees are responsible, in whole or in part, for any Indemnity Claim. The Contractor shall respond within thirty (30) Calendar Days to the tender of any Indemnity Claim for defense and/or indemnity by an Indemnitee, unless the Indemnitee agrees in writing to an extension of this time. The defense provided to the Indemnitees by Contractor shall be by well qualified, adequately insured and experienced legal counsel acceptable to the City.

10.4. **Intent of Parties Regarding Scope of Indemnity.** It is the intent of the parties that the Contractor and its Subcontractors of all tiers shall provide the Indemnitees with the broadest defense and indemnity permitted by Applicable Law. In the event that any of the defense, indemnity, or hold harmless provisions in the Contract Documents are found to be ambiguous or in conflict with one another, it is the parties' intent that the broadest and most expansive interpretation in favor of providing defense and/or indemnity to the Indemnitees be given effect.

10.5. **Waiver of Indemnity Rights Against Indemnitees.** With respect to third party claims against the Contractor, to the fullest extent permitted by law, the Contractor waives any and all rights to any type of express or implied indemnity against the Indemnitees.

10.6. **Subcontractor Requirements.** In addition to the requirements set forth hereinabove, Contractor shall ensure, by written subcontract agreement, that each of Contractor's Subcontractors of every tier shall protect, defend, indemnify and hold harmless the Indemnitees with respect to Indemnity Claims arising out of, in connection with, or in any way related to each such Subcontractors' Work on the Project in the same manner in which Contractor is required to protect, defend, indemnify and hold the Indemnitees harmless. In the event Contractor fails to obtain such defense and indemnity obligations from others as required herein, Contractor agrees to be fully responsible to the Indemnitees according to the terms of this Paragraph 10.

10.7. **No Limitation or Waiver of Rights.** Contractor's obligations under this Paragraph 10 are in addition to any other rights or remedies which the Indemnitees may have under the law or under the Contract Documents. Contractor's indemnification and defense obligations set forth in this Paragraph 10 are separate and independent from the insurance provisions set forth in the Contract Documents, and do not limit, in any way, the applicability, scope, or obligations set forth in such insurance provisions. The purchase of insurance by the Contractor with respect to the obligations required herein shall in no event be construed as fulfillment or discharge of such obligations. In any and all claims against the Indemnitees by any employee of the Contractor, any Subcontractor, any supplier of the Contractor or Subcontractors, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable, the obligations under this Paragraph 10 shall not be limited in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for the Contractor or any Subcontractor or any supplier of either of them, under workers' or workmen's compensation acts, disability benefit acts or other employee benefit acts. Failure of the City to monitor compliance with these requirements imposes no additional obligations on the City and will in no way act as a waiver of any rights hereunder.

10.8. **Withholding to Secure Obligations.** In the event an Indemnity Claim arises prior to final payment to Contractor, the City may, in its sole discretion, reserve, retain or apply any monies due Contractor for the purpose of resolving such Indemnity Claims; provided, however, the City may release such funds if the Contractor provides the City with reasonable assurances of protection of the Indemnitees' interests. The City shall, in its sole discretion, determine whether such assurances are reasonable.

10.9. **Survival of Indemnity Obligations.** Contractor's obligations under this Paragraph 10 are binding on Contractor's and its Subcontractors' successors, heirs, and assigns and shall survive the completion of the Work or termination of the Contractor's performance of the Work.

11. FEDERAL REQUIREMENTS. If the Contractor or Subcontractor is performing work on Section 3, Housing and Urban Development Act of 1968, projects for which the amount of the assistance exceeds $200,000 and the contract or subcontract exceeds $100,000:

11.1 The work to be performed under this contract is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. 1701u (Section 3). The purpose of Section 3 is to ensure that employment and other economic opportunities generated by HUD assistance or HUD-assisted projects covered by Section 3, shall, to the greatest extent feasible, be directed to low- and very low-income persons, particularly persons who are recipients of HUD assistance for housing.

11.2 The parties to this contract agree to comply with HUD's regulations in 24 CFR part 135, which implements Section 3. As evidenced by their execution of this contract, the parties to this contract certify that they are under no contractual or other impediment that would prevent them from complying with the part 135 regulations.

11.3 The contractor agrees to send to each labor organization or representative of workers with which the contractor has a collective bargaining agreement or other understanding, if any, a notice advising the labor organization or workers' representative of the contractor's

commitments under this Section 3 clause, and will post copies of the notice in conspicuous places at the work site where both employees and applicants for training and employment positions can see the notice. The notice shall describe the Section 3 preference, shall set forth minimum number and job titles subject to hire, availability of apprenticeship and training positions, the qualifications for each; and the name and location of the person(s) taking applications for each of the positions; and the anticipated date the work shall begin.

11.4 The contractor agrees to include this Section 3 Clause in every subcontract subject to compliance with regulations in 24 CFR part 135, and agrees to take appropriate action, as provided in an applicable provision of the subcontract or in this Section 3 Clause, upon a finding that the subcontractor is in violation of the regulations in 24 CFR part 135. The contractor will not subcontract with any subcontractor where the contractor has notice or knowledge that the subcontractor has been found in violation of the regulations in 24 CFR part 135.

11.5 The contractor will certify that any vacant employment positions, including training positions, that are filled (1) after the contractor is selected but before the contract is executed, and (2) with persons other than those to whom the regulations of 24 CFR part 135 require employment opportunities to be directed, were not filled to circumvent the contractor's obligations under 24 CFR part 135.

11.6 Noncompliance with HUD's regulations in 24 CFR part 135 may result in sanctions, termination of this contract for default, and debarment or suspension from future HUD assisted contracts.

11.7 With respect to work performed in connection with Section 3 covered Indian housing assistance, Section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e) also applies to the work to be performed under this contract. Section 7(b) requires that to the greatest extent feasible (i) preference and opportunities for training and employment shall be given to Indians, and (ii) preference in the award of contracts and subcontracts shall be given to Indian organizations and Indian-owned Economic Enterprises. Parties to this contract that are subject to the provisions of Section 3 and Section 7(b) agree to comply with Section 3 to the maximum extent feasible, but not in derogation of compliance with Section 7(b).

12. SUCCESSORS AND ASSIGNS. The Parties bind themselves, their heirs, executors, administrators, successors and assigns the covenants, agreements and obligations contained in the Contract Documents. The Contractor shall not, either voluntarily or by action of law, assign any right or obligation of the Contractor under the Contract Documents without prior written consent of the City.

INSTRUCTIONS FOR COMPLETING THIS FORM

Any acknowledgment completed in California must contain verbiage exactly appears above in the notary section or a separate acknowledgment form must property completed and attached to that document. The only exception is if a document is recorded outside of California. In such instances, any alternative acknowledgment verbiage as may be printed on such a document so long as the verbiage does not require the notary to do something that is illegal for a notary in California (i.e. certifying the authorized capacity of the signer). Please check the document carefully for proper notarial wording and attach this form if required.

- State and County information must be the State and County where the document signer(s) personally appeared before the notary public for acknowledgment.
- Date of notarization must be the date that the signer(s) personally appeared which must also be the same date the acknowledgment is completed.
- The notary public must print his or her name as it appears within his or her commission followed by a comma and then your title (notary public).
- Print the name(s) of document signer(s) who personally appear at the time of notarization.
- Indicate the correct singular or plural forms by crossing off incorrect forms (i.e. ~~he~~/she/~~they~~, is/~~are~~) or circling the correct forms. Failure to correctly indicate this information may lead to rejection of document recording.
- The notary seal impression must be clear and photographically reproducible. Impression must not cover text or lines. If seal impression smudges, re-seal if a sufficient area permits, otherwise complete a different acknowledgment form.
- Signature of the notary public must match the signature on file with the office of the county clerk.
- Additional information is not required but could help to ensure this acknowledgment is not misused or attached to a different document.
- Indicate title or type of attached document, number of pages and date.
- Indicate the capacity claimed by the signer. If the claimed capacity is a corporate officer, indicate the title (i.e. CEO, CFO, Secretary).
- Securely attach this document to the signed document.

CONTRACTOR'S BONDS

A.11.b

BOND No. _____

PREMIUM $_____

FAITHFUL PERFORMANCE BOND
(100% of Total Contract Price)

PROJECT No. 804 0014
Sunnymead - Flaming Arrow Drive Storm Drain

KNOW ALL MEN AND WOMEN BY THESE PRESENTS:

THAT WHEREAS, the City Council of the City of Moreno Valley, State of California, known as "City," has awarded to **O'Duffy Brothers, Inc.,** as Principal hereinafter designated as "Contractor" and have entered into an Agreement whereby the Contractor agrees to construct or install and complete certain designated public improvements, which said Agreement, effective on the date signed by the City of Moreno Valley, and identified as **Project No. 804 0014**, and all Contract Documents are hereby referred to and made a part hereof; and

WHEREAS, said Contractor under the terms of said Contract Documents is required to furnish a bond guaranteeing the faithful performance of said Agreement;

NOW THEREFORE, we the undersigned Contractor and _____, as Surety, are held and firmly bound unto the City of Moreno Valley, County of Riverside in the penal sum of _____ dollars, ($_____), lawful money of the United States, to be paid to the said City or its certain attorney, its successors and assigns; for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors, and assigns, jointly and severally liable (CCP 995.320 (a)(1)), firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that if the above bound Contractor, his or her or its heirs, executors, administrators, successors, or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions, and provisions in said Contract Documents and any alterations thereof made as therein provided, on his or her or their part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless the City of Moreno Valley, its officers, agents, and employees, as therein stipulated, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect. In the event suit is brought upon this bond by the City and judgement is recovered, the Surety shall pay all costs incurred by the City in such suit, including a reasonable attorney fee to be fixed by the court.

Contractor and Surety agree that this Faithful Performance Bond shall not be considered a part of this Agreement between Contractor and the City ("Agreement"). Contractor and Surety further agree that this Faithful Performance Bond is a separate obligation of the Contractor and its Surety, and that any attorney's fee provision contained in this Faithful Performance Bond shall not apply to the Agreement. In the event there is any litigation between the parties arising from the breach of the Agreement, each party will bear its own attorneys' fees in the litigation.

The Surety hereby stipulates and agrees that no change, extension of time, alteration, or addition to the terms of the Contract Documents or to the Work to be performed thereunder, or the Provisions accompanying the same shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration, or addition to the terms of the Contract Documents or to the Work or the Provisions.

KNOW ALL MEN AND WOMEN BY THESE PRESENTS:

THAT WHEREAS, the City Council of the City of Moreno Valley, State of California, known as "City", has awarded to **O'Duffy Brothers, Inc.,** as Principal hereinafter designated as "Contractor" and have entered into an Agreement whereby the Contractor agrees to construct or install and complete certain designated public improvements, which said Agreement, effective on the date signed by the City of Moreno Valley, and identified as **Project No. 804 0014**, and Contract Documents are hereby referred to and made a part hereof; and

WHEREAS, said Contractor under the terms of said Contract Documents is required to furnish a bond to secure the payment of claims of laborers, mechanics, materialmen, and other persons, as provided by law;

NOW, THEREFORE, we the undersigned Contractor and _____, as Surety are held and firmly bound unto the City of Moreno Valley, County of Riverside, in the penal sum of _____dollars, ($_____), lawful money of the United States, for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors, and assigns, jointly and severally liable (CCP 995.320 (a)(1)), firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that if said Contractor, his or her or its heirs, executors, administrator, successors, or assigns, or subcontractors, shall fail to pay any of the persons described in the State of California Civil Code, Section 9100, or amounts due under the Unemployment Insurance Code with respect to work or labor performed by any such claimant, or any amounts required to be deducted, withheld, and paid over to the Franchise Tax Board from the wages of employees of the Contractor and his or her subcontractors, pursuant to Section 13020, of the Unemployment Insurance Code, with respect to such work and labor, that the Surety or Sureties herein will pay for the same in an amount not exceeding the sum specified in this bond, otherwise the above obligation shall be void. In the event suit is brought upon this bond by the City or other person entitled to bring such an action and judgement is recovered, the Surety shall pay all costs incurred by the City in such suit, including a reasonable attorney fee to be fixed by the court.

Contractor and Surety agree that this Labor and Materials Payment Bond shall not be considered a part of this Agreement between Contractor and the City ("Agreement"). Contractor and Surety further agree that this Labor and Materials Payment Bond is a separate obligation of the Contractor and its Surety, and that any attorney's fee provision contained in this Labor and Materials Payment Bond shall not apply to the Agreement. In the event there is any litigation between the parties arising from the breach of the Agreement, each party will bear its own attorneys' fees in the litigation.

This bond shall inure to the benefit of any of the persons described in the State of California Civil Code Section9100, to give a right of action to such persons or their assigns in any suit brought upon this bond.

INSTRUCTIONS FOR COMPLETING THIS FORM

Any acknowledgment completed in California must contain verbiage exactly appears above in the notary section or a separate acknowledgment form must property completed and attached to that document. The only exception is if a document is recorded outside of California. In such instances, any alternative acknowledgment verbiage as may be printed on such a document so long as the verbiage does not require the notary to do something that is illegal for a notary in California (i.e. certifying the authorized capacity of the signer). Please check the document carefully for proper notarial wording and attach this form if required.

- State and County information must be the State and County where the document signer(s) personally appeared before the notary public for acknowledgment.
- Date of notarization must be the date that the signer(s) personally appeared which must also be the same date the acknowledgment is completed.
- The notary public must print his or her name as it appears within his or her commission followed by a comma and then your title (notary public).
- Print the name(s) of document signer(s) who personally appear at the time of notarization.
- Indicate the correct singular or plural forms by crossing off incorrect forms (i.e. ~~he~~/she/~~they~~, is/~~are~~) or circling the correct forms. Failure to correctly indicate this information may lead to rejection of document recording.
- The notary seal impression must be clear and photographically reproducible. Impression must not cover text or lines. If seal impression smudges, re-seal if a sufficient area permits, otherwise complete a different acknowledgment form.
- Signature of the notary public must match the signature on file with the office of the county clerk.
- Additional information is not required but could help to ensure this acknowledgment is not misused or attached to a different document.
- Indicate title or type of attached document, number of pages and date.
- Indicate the capacity claimed by the signer. If the claimed capacity is a corporate officer, indicate the title (i.e. CEO, CFO, Secretary).
- Securely attach this document to the signed document.

CITY OF MORENO VALLEY
SUPPLEMENTARY GENERAL CONDITIONS

The following provisions, pursuant to 44 Code of Federal Regulations, Part 13, Subpart C, Section 13.36, as it may be amended from time to time, are included in the Agreement and are required to be included in all subcontracts entered into by CONTRACTOR for work pursuant to the Agreement, unless otherwise expressly provided herein. These provisions supersede any conflicting provisions in the General Conditions and shall take precedence over the General Conditions for purposes of interpretation of the General Conditions. These provisions do not otherwise modify or replace General Conditions not in direct conflict with these provisions. Definitions used in these provisions are as contained in the General Conditions.

(1) CONTRACTOR shall be subject to the administrative, contractual, and legal remedies provided in the General Conditions in the event CONTRACTOR violates or breaches terms of the Agreement.

(2) CITY may terminate the Agreement for cause or for convenience, and CONTRACTOR may terminate the Agreement, as provided the General Conditions.

(3) CONTRACTOR shall comply with Executive Order 11246 of September 24, 1965, entitled Equal Employment Opportunity, as amended by Executive Order 11375 of October 13, 1967, and as supplemented in Department of Labor regulations (41 CFR chapter 60). (All construction contracts awarded in excess of $10,000 by CITY and/or subcontracts in excess of $10,000 entered into by CONTRACTOR.)

(4) CONTRACTOR shall comply with the Copeland Anti-Kickback Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3) (All contracts and subcontracts for construction or repair.)

(5) CONTRACTOR shall comply with the Davis-Bacon Act (40 U.S.C. 276a to 276a7) as supplemented by Department of Labor regulations (29 CFR Part 5).

(6) CONTRACTOR shall comply with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. *327330*) as supplemented by Department of Labor regulations (29 CFR Part 5).

(7) CONTRACTOR shall observe CITY requirements and regulations pertaining to reporting included in the General Conditions.

(8) Patent rights with respect to any discovery or invention which arises or is developed in the course of or under the Agreement shall be retained by the CITY.

(9) Copyrights and rights in data developed in the course of or under the Agreement shall be the property of the CITY. FEMA/CalOES reserve a royalty-free, nonexclusive, irrevocable license to reproduce, publish or otherwise use or authorize to others to use for federal purposes a

copyright in any work developed under the Agreement and/or subcontracts for work pursuant to the Agreement.

(10) CONTRACTOR shall provide access by the City, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives to any books, documents, papers, and records of the contractor which are directly pertinent to that specific contract for the purpose of making audit, examination, excerpts, and transcriptions.

(11) CONTRACTOR shall retain all required records for three years after CITY makes final payments and all other pending matters relating to the Agreement are closed.

(12) CONTRACTOR shall comply with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. *1857*(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15). (This provision applies to contracts exceeding $100,000 and to subcontracts entered into pursuant to such contracts.)

(13) CONTRACTOR shall comply with mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94163, 89 Stat. 871).

Report to City Council

TO: Mayor and City Council Acting in its Capacity as President and Members of the Board of Directors of the Moreno Valley Community Services District (CSD)

FROM: Marshall Eyerman, Assistant City Manager

AGENDA DATE: February 2, 2021

TITLE: PURSUANT TO LANDOWNER PETITIONS, ANNEX CERTAIN PARCELS INTO COMMUNITY FACILITIES DISTRICT NO. 1 (PARK MAINTENANCE) - AS ANNEXATION NO. 2021-62 AND ANNEXATION NO. 2021-64

RECOMMENDED ACTION

Recommendations:

1. Acting as the legislative body of Community Facilities District No. 1 (Park Maintenance) adopt Resolution No. CSD 2021-__, a Resolution of the Board of Directors of the Moreno Valley Community Services District, California, ordering the annexation of territory for Annexation No. 2021-62 to its Community Facilities District No. 1 and approving the amended map for said District. (PEDROHYPJVC, LLC, located on the north side of Kalmia Ave., west of Lasselle St.).

2. Acting as the legislative body of Community Facilities District No. 1 (Park Maintenance) adopt Resolution No. CSD 2021-____, a Resolution of the Board of Directors of the Moreno Valley Community Services District, California, ordering the annexation of territory for Annexation No. 2021-64 to its Community Facilities District No. 1 and approving the amended map for said District. (ROC III CA Belago, located at the south side of John F. Kennedy Dr., east of Moreno Beach Dr.).

SUMMARY

Approval of the proposed resolutions will certify the annexation of three parcels into Community Facilities District (CFD) No. 1 (Park Maintenance) ("District"). This action impacts only the property owners identified below, not the general citizens or taxpayers of the City or the CSD.

The City requires property owners of new development projects to mitigate the cost of certain impacts created by the proposed development (e.g., the increase in demand on parks created by residential development). The CSD Board created CFD No. 1 to provide the development community with a funding mechanism to assist in satisfying the requirement. After a property owner elects to annex their property into the District and the CSD Board approves the annexation, a special tax can be levied on the annual property tax bills of the annexed parcels to fund the cost of increased demands on parks.

As a condition of approval for development of their projects, the Property Owners, as defined below, are required to provide a funding source to maintain parks and have elected to annex the parcels of their projects into the District to satisfy the condition. The Property Owners submitted Landowner Petitions approving the annexations and the City Clerk, acting in the capacity of Secretary of the CSD, has confirmed the petitions are valid.

DISCUSSION

The District was formed on July 8, 2003, to provide an alternative funding tool for the development community. It provides a mechanism to fund the continued maintenance, enhancement, and/or retrofit of parks, open spaces, linear parks, and/or trail systems included within the District.

At the time CFD No. 1 was formed, the CSD Board designated a future annexation area for the District. With the future annexation area designated, annexations can occur without an additional public hearing as long as the annexing landowner provides unanimous consent. Once annexed, parcels are subject to the annual special tax to fund the park maintenance services of the District.

As a condition of approval for the projects identified below, the Property Owners are required to provide an ongoing funding source for park maintenance. The table below provides information for the parcels under development ("Subject Property").

Property Owner/ Project ACP Record #	APNs	Location	Annexation #
PEDROHYPJVC, LLC 83 single-family residential development PEN19-0217/SCP20-0024	474-110-004 & 474-110-014	North side of Kalmia Ave., west of Lasselle St.	2021-62
ROC III CA Belago 417-unit multi-family housing PEN16-0130/SCP20-0032	304-100-007	South side of John F. Kennedy Dr., east of Moreno Beach Dr.	2021-64

A property owner has two options to satisfy the condition of approval:

1) Submit a Landowner Petition unanimously approving annexation of their property into the District. Approval of the petition and special tax rate allows the CSD to levy the special tax on the annual property tax bill for their property. This option is only available if there are fewer than 12 registered voters living within the proposed annexation area; or

2) Fund an endowment to satisfy the annual requirement.

The Property Owners elected to annex the Subject Property into CFD No. 1, which authorizes the CSD to apply the special tax to the annual property tax bill. The Office of the Riverside County Registrar of Voters confirmed there were no registered voters residing at the Subject Property, allowing for a special election of the landowner. Adoption of the attached resolutions (Attachments 1-2) adds the Subject Property to the District and directs the recordation of the boundary maps (Attachments 3-4) and amended notice of special tax liens for Annexation No. 2021-62 and 2021-64. The Secretary of the CSD received and reviewed the Landowner Petitions and confirmed the Property Owners unanimously approved annexation of the Subject Property into the District (Attachments 5-6).

Successful completion of the annexation process satisfies each project's condition of approval to provide an ongoing funding source for park maintenance.

ALTERNATIVES

1. Adopt the proposed resolutions. *Staff recommends this alternative as it will annex the Subject Property into CFD No. 1 at the request of the Property Owners and satisfy the condition of approval for the proposed developments.*

2. Do not adopt the proposed resolutions. *Staff does not recommend this alternative as it is contrary to each Property Owner's request, will not satisfy the condition of approval, and may delay development of the projects.*

3. Do not adopt the proposed resolutions but rather continue the item to a future regularly scheduled CSD Board meeting. *Staff does not recommend this alternative as it will delay the Property Owners from satisfying the condition of approval and may delay development of their projects.*

FISCAL IMPACT

Revenue received from the special tax is restricted and can only be used to fund the maintenance and operation of CFD No. 1 park facilities and services. The special tax can be applied only to the property tax bill of a parcel wherein the qualified electors (i.e.,

landowners or registered voters, depending on the number of registered voters) have previously provided approval. The estimated maximum special tax revenue that can be generated from each project is detailed below:

Property Owner/ Project ACP Record #	Proposed DUs[1,2]	FY 2020/21 Maximum Special Tax[3]	FY 2020/21 Maximum Special Tax for the Project[2]
PEDROHYPJVC, LLC 83 single-family residential development PEN19-0217/SCP20-0024	83	$181.59/DU	$15,071.97
ROC III CA Belago 417-unit multi-family housing PEN16-0130/SCP20-0032	417	$181.59/DU	$75,723.03

[1] DU = Dwelling Unit (single-family residential lot or dwelling unit for multi-family).
[2] Based on the current project description. The special tax will be calculated based on the final development of the project.
[3] The special tax applied to the property tax bill will be based on the needs of the District. The applied special tax rate cannot exceed the maximum special tax rate. The FY 2020/21 applied rate is $146.32 per DU.

The maximum special tax rate is subject to an annual inflation adjustment based on the change in Consumer Price Index (CPI) or by two percent (2%), whichever is greater. However, the annual adjustment cannot be applied unless the CSD Board annually authorizes such adjustment. The increase to the maximum special tax rate cannot exceed the annual inflationary adjustment without a two-thirds approval of the qualified electors within the District.

NOTIFICATION

On December 17, 2020, the annexation materials were mailed to the Property Owners. A cover letter, Landowner Petition, Rates and Method of Apportionment of Special Tax, and an envelope to return the completed petition were included.

CITY COUNCIL GOALS

Revenue Diversification and Preservation. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 5.2: Promote the installation and maintenance of cost effective, low maintenance landscape, hardscape and other improvements which create a clean, inviting community.

RESOLUTION NO. CSD 2021-___

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE MORENO VALLEY COMMUNITY SERVICES DISTRICT, CALIFORNIA, ORDERING THE ANNEXATION OF TERRITORY FOR ANNEXATION NO. 2021-62 TO ITS COMMUNITY FACILITIES DISTRICT NO. 1 AND APPROVING THE AMENDED MAP FOR SAID DISTRICT

WHEREAS, by its Resolution No. CSD 2003-23, the Board of Directors of the Moreno Valley Community Services District (the "CSD") established the CSD's Community Facilities District No. 1 (the "CFD"), a citywide district, pursuant to the Mello-Roos Community Facilities Act of 1982 (Government Code Section 53311 *et seq*.) (the "Act"); and

WHEREAS, by its Ordinance No. 41, the Board of Directors levied an annual special tax against all non-exempt parcels of real property within the CFD (the "Special Tax") to fund parks and park improvements; and

WHEREAS, by its Resolution No. CSD 2003-26, the Board of Directors designated all territory within the City of Moreno Valley to be a Future Annexation Area for the CFD; and

WHEREAS, pursuant to Resolution No. CSD 2003-26 territory located within the Future Annexation Area may be annexed to the CFD upon the unanimous approval of the owner or owners of each parcel or parcels at the time that the parcel or parcels are annexed, without additional hearings; and

WHEREAS, the landowners of the parcels listed on Exhibit A to this Resolution, which is attached hereto and incorporated herein by reference, have submitted a petition requesting and approving annexation of the listed parcels (the "Annexation Parcels") to the CFD; and

WHEREAS, the boundary map entitled "Annexation Map No. 2021-62 of Community Facilities District No. 1 of the Moreno Valley Community Services District City of Moreno Valley, County of Riverside, State of California," showing the extent of the proposed annexation is included as Exhibit B to this Resolution and incorporated herein by reference (the "Boundary Map"); and

WHEREAS, the Board of Directors desires to annex the Annexation Parcels to the CFD.

NOW, THEREFORE, THE BOARD OF DIRECTORS OF THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Recitals. The above recitals are all true and correct and are herein incorporated.

2. Annexation Ordered. The Annexation Parcels are hereby added to and part of the CFD with full legal effect. The Annexation Parcels are subject to the Special Tax levied in connection with the CFD.

3. Description of Services. The following is a general description of the services provided in the CFD:

The maintenance and/or repair of Parks and Park Improvements including, but not limited to, the planting, replanting, mowing, trimming, irrigation and fertilization of grass, trees, shrubs, and other ornamental plants and vegetation, the operation, maintenance, repair, and replacement of irrigation systems associated with Parks and Park Improvements, and all the effort by Park Rangers that is devoted to the maintenance of the Parks and Park Improvements and public safety. "Parks and Park Improvement" means parks and park improvements which are to be developed, constructed, installed, and maintained within and in the area of the CSD and which will be owned and operated by the CSD for the benefit of the residents of the CFD.

Such maintenance shall include, but not be limited to, the provision of all labor, material, administration, personnel, equipment and utilities necessary to maintain such Parks and Park Improvements.

It is the intention of the Board of Directors to fund all direct, administrative and incidental annual costs and expenses necessary to provide the authorized maintenance and services.

4. Amended Boundary Map. The Boundary Map attached hereto as Exhibit B is hereby approved. This map amends, and does not supersede, the existing map of the CFD. The City Council directs that said map be filed with the Riverside County Recorder pursuant to Section 3113 of the Streets and Highways Code.

5. Notice of Special Tax Lien. The City Council directs that an amended notice of special tax lien be recorded pursuant to Section 3117.5 of the Streets and Highways Code with respect to the Annexation Parcel associated with the Boundary Map.

6. Severability. That should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this resolution as hereby adopted shall remain in full force and effect.

7. This Resolution shall be effective immediately upon adoption.

8. The City Clerk shall certify to the adoption of this Resolution, and shall maintain on file

as a public record this Resolution.

APPROVED AND ADOPTED this 2nd day of February 2021.

WHEREAS, by its Resolution No. CSD 2003-26, the Board of Directors designated all territory within the City of Moreno Valley to be a Future Annexation Area for the CFD; and

WHEREAS, pursuant to Resolution No. CSD 2003-26 territory located within the Future Annexation Area may be annexed to the CFD upon the unanimous approval of the owner or owners of each parcel or parcels at the time that the parcel or parcels are annexed, without additional hearings; and

WHEREAS, the landowners of the parcels listed on Exhibit A to this Resolution, which is attached hereto and incorporated herein by reference, have submitted a petition requesting and approving annexation of the listed parcels (the "Annexation Parcels") to the CFD; and

WHEREAS, the boundary map entitled "Annexation Map No. 2021-64 of Community Facilities District No. 1 of the Moreno Valley Community Services District City of Moreno Valley, County of Riverside, State of California," showing the extent of the proposed annexation is included as Exhibit B to this Resolution and incorporated herein by reference (the "Boundary Map"); and

WHEREAS, the Board of Directors desires to annex the Annexation Parcels to the CFD.

NOW, THEREFORE, THE BOARD OF DIRECTORS OF THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Recitals. The above recitals are all true and correct and are herein incorporated.

2. Annexation Ordered. The Annexation Parcels are hereby added to and part of the CFD with full legal effect. The Annexation Parcels are subject to the Special Tax levied in connection with the CFD.

3. Description of Services. The following is a general description of the services provided in the CFD:

The maintenance and/or repair of Parks and Park Improvements including, but not limited to, the planting, replanting, mowing, trimming, irrigation and fertilization of grass, trees, shrubs, and other ornamental plants and vegetation, the operation, maintenance, repair, and replacement of irrigation systems associated with Parks and Park Improvements, and all the effort by Park Rangers that is devoted to the maintenance of the Parks and Park Improvements and public safety. "Parks and Park Improvement" means parks and park improvements which are to be developed, constructed, installed, and maintained within and in the area of the CSD and which will be owned and operated by the CSD for the benefit of the residents of the CFD.

Such maintenance shall include, but not be limited to, the provision of all labor, material, administration, personnel, equipment and utilities necessary to maintain such Parks and Park Improvements.

It is the intention of the Board of Directors to fund all direct, administrative and incidental annual costs and expenses necessary to provide the authorized maintenance and services.

4. Amended Boundary Map. The Boundary Map attached hereto as Exhibit B is hereby approved. This map amends, and does not supersede, the existing map of the CFD. The City Council directs that said map be filed with the Riverside County Recorder pursuant to Section 3113 of the Streets and Highways Code.

5. Notice of Special Tax Lien. The City Council directs that an amended notice of special tax lien be recorded pursuant to Section 3117.5 of the Streets and Highways Code with respect to the Annexation Parcel associated with the Boundary Map.

6. Severability. Report to City Council

TO:	Mayor and City Council Acting in its Capacity as President and Members of the Board of Directors of the Moreno Valley Community Services District (CSD)
FROM:	Patti Solano, Parks & Community Services Director
AGENDA DATE:	February 2, 2021
TITLE:	APPROVE AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH KIMLEY-HORN AND ASSOCIATES, INC., FOR DESIGN AND CONSTRUCTION SERVICES FOR MORENO VALLEY BARK PARK PROJECT NO. 807 0054 (FUNDED WITH PARK DIF FUNDS)

RECOMMENDED ACTION

Recommendations:

1. Award an Agreement for Professional Consultant Services with Kimley-Horn and Associates, Inc., for the Moreno Valley Bark Park project.

2. Authorize the issuance of a purchase order in the amount of $171,560 upon execution of the Agreement for Professional Consultant Services with Kimley-Horn and Associates, Inc. Funds are available in the Parks and Community Services (PCS) Capital Projects Fund (3015);

3. Authorize the City Manager to execute the contract with Kimley-Horn subject to minor modifications; and

4. Authorize the Parks and Community Services Director to execute subsequent Amendments to the Agreement within Council approved annual budgeted amounts, including the authority to authorize the associated purchase orders in accordance with the terms of the Agreement, subject to the approval of the City Attorney.

SUMMARY

This report recommends approval of the Agreement for Professional Consultant Services with Kimley-Horn and Associates, Inc., for design services and construction support services for the Moreno Valley Bark Park project. The funding for design services is currently available through development impact fees (DIF) and is eligible for reimbursement from Statewide Park Development and Community Revitalization Program (SPP) grant funds, if awarded. Construction support services will be performed contingent upon award of SPP grant funds.

DISCUSSION

On June 5, 2018, California voters approved the Parks and Water Bond Act of 2018 (Proposition 68), which authorized $4 billion in general obligation bonds for state and local parks, environmental protection projects, water infrastructure projects, and flood protection projects.

The California Department of Parks and Recreation is accepting competitive applications for the $395.3 million Round Four Statewide Park Program (SPP). This is the final round of funding for SPP grant funds. The goal of SPP competitive grants is to create new parks and new recreation opportunities in critically underserved communities across California.

On November 17, 2020, the City Council authorized the Parks and Community Services Department to submit an application for SPP grant funds. The department is developing a project application to develop the vacant lot west of the Moreno Valley Animal Shelter into a dog park. This project will provide recreation opportunities for dog owners and Animal Shelter visitors and personnel to socialize and exercise their dogs in a safe environment. The application deadline was extended by the California Department of Parks and Recreation to March 12, 2021.

The consultant's scope of work consists of three (3) tasks. The first task is conceptual plan development, the second task is preparation of construction documents and related reports, and the third task is construction support services. The first task is required for completion and submittal of the grant application. If grant funds are awarded, the costs associated with conceptual plan development are eligible for reimbursement. Tasks two and three will be performed contingent upon award of grant funds.

Requests for Proposal (RFP) for professional landscape architect design services were sent by invitation only to the three design firms on the City's On-Call List for Landscape and Irrigation Design Consultants. The City received two (2) proposals in response to the RFP, from Architerra Design Group and Kimley-Horn and Associates, Inc.

A selection committee, comprised of City staff from the Parks and Community Services and Public Works Departments, independently reviewed and rated the proposals, based on qualifications-based selection criteria. All members of the selection committee rated the same proposal as the top qualified. Kimley-Horn and Associates, Inc., was selected as a result of a competitive selection process as the most qualified consultant for this

project. The firm demonstrated a very thorough understanding of the work, had strong previous history with similar projects, and demonstrated excellent technical ability in critical areas. City staff and Kimley-Horn and Associates, Inc., agreed to Kimley-Horn's final fee proposal. The final proposal includes $32,920 for conceptual plan development, $79,650 for construction documents and reports, and $58,990 for construction phase services.

ALTERNATIVES

1. Approve the recommended actions as presented in this staff report. **Staff recommends this alternative.**

2. Do not approve the recommended actions as presented in this staff report. **Staff does not recommend this alternative.**

FISCAL IMPACT

There is no impact to the General Fund. Professional consultant services will be funded from Park Improvements DIF (Fund 2905). These costs are eligible for reimbursement if SPP Grant funds are awarded. Construction services will be provided contingent upon award of SPP Grant funds.

Description	Fund	GL Account No. Project No.	Type (Rev/Exp)	FY 20/21 Budget	Proposed Adjustments	FY 20/21 Amended Budget
Transfer Out	DIF – Park Improvements	2905-99-95-92905-903015	Exp	$380,000	$171,560	$551,560

PREPARATION OF STAFF REPORT

Prepared By:
Lee Withers
Senior Management Analyst

Department Head Approval:
Patti Solano
Parks & Community Services Director

CITY COUNCIL GOALS

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

Positive Environment. Create a positive environment for the development of Moreno Valley's future.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 5.2: Promote the installation and maintenance of cost effective, low maintenance landscape, hardscape and other improvements which create a clean, inviting community.

Objective 5.5: Promote a healthy community and lifestyle.

REQUEST FOR PROPOSAL
FOR LANDSCAPE ARCHITECTURE DESIGN SERVICES
FOR MORENO VALLEY BARK PARK PROJECT
FOR THE CITY OF MORENO VALLEY
PARKS AND COMMUNITY SERVICES DEPARTMENT

I. INVITATION

You are hereby invited to submit a Proposal for Landscape Architecture Design Services for Moreno Valley Bark Park Project, to be located at the open lot immediately west of the Moreno Valley Animal Shelter, located at 14041 Elsworth Street.

The work will be in accordance with the On-Call Agreement for Professional Consultant Services including subsequent Amendments to the Agreement.

This Request for Proposals (RFP) is limited to the City's On-Call consultants in the Landscape Architecture Design Services category, and proposals will only be accepted from those invited to propose. Interested consultants may download copies of the RFP by visiting the City's web site, www.moval.org, selecting "City Bids and RFP's" under the "City Hall" Resources link at the home page and selecting the "Online Bidding System" link. **To download proposal packages and submit proposals, vendors will be required to pay an online usage download fee of $10.00.** All documents associated with this RFP will be downloadable after the fee has been paid**.** Once the prospective Offeror downloads any documents relative to a solicitation, that Offeror's name will appear on the Prospective Bidders List.

Online Q&A will be accepted until 2:00pm on Thursday, October 22, 2020.

Proposals will be accepted until 2:00pm on Wednesday, 28, 2020.

Proposals shall be submitted electronically (in PDF format via the City's vendor portal website, located at http://www.planetbids.com/portal/portal.cfm?CompanyID=24660.

Proposals shall include, but not be limited to, the following items:

1. Proposer should describe in detail their approach and understanding of all necessary tasks and steps involved in the project;
2. Related experience including relevant experience date, name of agency, and Reference name/contact information;
3. Cost proposal; and
4. Completed forms as required.

The proposer is solely responsible for "on time" submission of their electronic proposals. The City will only consider proposals that have been transmitted successfully and have been issued an ebid confirmation number with a time stamp from the Bid Management System indicating that bid was submitted successfully. Transmission of proposals by any other means will not be accepted. Proposer shall be solely responsible for informing itself with respect to the proper utilization of the proposal management system, for ensuring the capability of their computer system to upload the required documents, and for the stability of their internet service. Proposers are advised to allow sufficient time to submit electronically. Failure of the proposer to successfully submit an electronic proposal shall be at the proposer's sole risk and no relief will be given for late and/or improperly submitted proposals. Proposers experiencing any technical difficulties with the proposal

submission process may contact PlanetBids at (818) 992-1771. Questions of an operational nature may be directed to the City's Parks and Community Services Department at (951) 413-3163. Neither the City, nor PlanetBids, makes any guarantee as to the timely availability of assistance, or assurance that any given problem will be resolved by the proposal submission deadline.

All questions regarding this RFP must be submitted through the vendor portal noted above and must be submitted no later than the date and time listed above.

II. PROJECT DESCRIPTION

The project includes but is not limited to the preparation of color renderings and conceptual drawings, plans, specifications and estimates, utility research, and all necessary permitting and coordination with City as required for preparation of public bidding documents to construct a bark park on the open lot west of the Moreno Valley Animal Shelter located at 14041 Elsworth Street.

The bark park project will be submitted to the California Department of Parks and Recreation for consideration in Round Four of the Statewide Park Development and Community Revitalization Program grant funds. Project application deadline is December 14, 2020.

All work shall be in accordance with the requirements of the City of Moreno Valley standards, California Building Code, Standard Specifications for Public Works Construction (Greenbook), Americans with Disabilities Act (ADA) standards, the California Manual on Uniform Traffic Control Devices (latest version), and the Riverside County Flood Control and Water Conservation District (RCFC & WCD) (latest version), as applicable.

III. PROJECT BUDGET AND SCHEDULE

The City of Moreno Valley will fund the design with local funding only. The construction phase is contingent upon award of grant funding, and may include State and Federal funding sources. Total project costs, including architectural design services, are estimated at $1 million.

The California State Department of Parks and Recreation anticipates grant award announcements in summer of 2021. If funded, the City anticipates construction in fall/winter of 2021 with completion in spring of 2022.

IV. GENERAL TASKS

Typical Landscape Architecture Design Services shall include, but not be limited to:

1. Complete and thorough Bark Park design, including all necessary disciplines, and including revisions resulting from plan review and plan check processes, until approved plans are achieved.
2. Attend and present the project to City Council as required.
3. Prepare construction documents and related project specifications and bidding documents.
4. Assist with bidding process including attend pre-bid meeting, answer RFIs, prepare addenda, review bid results.
5. Oversee and ensure that all measures of the specific project's scope of services are completed in a timely and professional manner with an emphasis on providing the City with a high quality project, including submittal review, shop drawing review, and construction observations.

6. In order to receive maximum points in the project application selection process, the design must provide efficient use of water and other natural resources as described in the Round Four Final Application Guide (Selection Criterion #7 – Environmental Design, pages 27-29).

7. The design shall incorporate input from residents on amenities, location of amenities within the park, and ideas for safe public use and beautification (Selection Criterion #4 – Community Based Planning). Community-based planning sessions are tentatively scheduled for 5:30 pm on October 27, 9:00 am on October 31, 5:30 pm on November 5, and 9:00 am on November 7. A virtual meeting is tentatively scheduled for noon on November 10.

8. Prepare a conceptual drawing for submittal with the project application by December 14, 2020.

9. Assist with preparing design-related project application responses as needed.

10. Assist with development of final project budget for grant application submittals.

VIII. CONSULTANT'S PROPOSAL AND COMPENSATION

At a minimum, the Proposal shall include the following sections:

A. Project Understanding: This section should clearly convey clear understanding of the nature of the work, identification of major project issues, and proposed solutions thereof, from both the Consultant and sub-consultants.

B. Qualifications and Experience: Provide qualifications and experience of the team for this project. Emphasize the specific qualifications and experience from projects similar to this project for the key team members including references. Identify and provide in-depth information for the proposed project manager's qualifications, track record and relevant experience.

C. Additional Relevant Information: Provide additional relevant information that may be helpful in the selection process (not to exceed two pages).

The Consultant's Proposal shall include the following statements:

a. A statement that this Request for Proposal (RFP) shall be incorporated in its entirety as a part of the Consultant's Proposal.

b. A statement that this RFP and the Consultant's Proposal will jointly become part of the Agreement for Professional Consultant Services for this project when said Agreement is fully executed by the Consultant and the Mayor or City Manager of Moreno Valley.

c. A statement that the Consultant's Services to be provided, and fees therefore, will be in accordance with the City's RFP except as otherwise specified in the Consultant's Proposal under the heading "ADDITIONS OR EXCEPTIONS TO THE CITY'S REQUEST FOR PROPOSAL."

d. A single and separate section with the heading "ADDITIONS OR EXCEPTIONS TO THE CITY'S REQUEST FOR PROPOSAL" containing a complete and detailed description of all of the exceptions to the provisions and conditions of this Request for Proposal upon

which the Consultant's Proposal is contingent and which shall take precedent over this RFP for Professional Consultant Services. **EXCEPTIONS TO THE INDEMNIFICATION/ LIABILITIES/ TERMINATION FOR CONVENIENCE OF THE CITY CLAUSES OF "THE CITY'S STANDARD CONTRACT AGREEMENT" SHALL NOT BE ACCEPTABLE. AN EXCEPTION TO THIS CLAUSE SHALL DISQUALIFY THE CONSULTANT PROPOSAL FROM FURTHER CONSIDERATION.**
A Sample Agreement is attached for your reference. Exceptions/ Changes to the Agreement are not acceptable.

e. A statement of qualifications applicable to this project including the names, qualifications and proposed duties of the Consultant's Staff to be assigned to this project; a listing of recent similar projects completed including the names, titles, addresses and telephone numbers of the appropriate persons whom the City could contact. If one or more of the Consultant's staff should become unavailable, the Consultant may substitute other staff of at least equal competence only after prior written approval by the City.

f. A detailed Cost Proposal, including a statement that all charges for Consultant services is a "Not-to-Exceed Fee" which must include conservatively estimated reimbursable expenses, as submitted with and made a part of said Consultant's Proposal.

g. A statement that the Consultant will document and provide the results of the work to the satisfaction of the City. This may include preparation of final reports, or similar evidence of attainment of the Agreement objectives.

h. A statement that the Consultant will immediately document and notify the City of any defects or hazardous conditions observed in the vicinity of the project site prior, during, or after the construction work.

i. All extra work will require prior approval from the City.

j. A statement that the Consultant will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.

k. A statement that all federal laws and regulations shall be adhered to notwithstanding any state or local laws and regulations. In a case of conflict between federal, state or local laws or regulations the strictest shall be adhered to.

l. A statement that the Consultant shall allow all authorized federal, state, county, and City officials access to place of work, books, documents, papers, fiscal, payroll, materials, and other relevant contract records pertinent to this special project. All relevant records shall be retained for at least three years.

m. A statement that the Consultant shall comply with the Davis-Bacon Fair Labor Standards Act (40 USC 276-a through a-7), and the implementation regulations issued pursuant thereto (29 CFR Section 1, 5), any amendments thereof and the California Labor Code. Pursuant to the said regulations, entitled "Federal Labor Standards Provisions," Federal Prevailing Wage Decision" and State of California prevailing wage rates, respectively.

n. A statement that the Consultant shall comply with the Copeland Anti-Kickback Act (18 USC 874) and the Implementation Regulation (29 CFR 3) issued pursuant thereto, and any amendments thereof.

o. A statement that the Consultant offers and agrees to assign to the City all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 USC Sec. 15) or under the Cartwright Act (Chapter 2 [commencing with Section 16700] of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works or the subcontract. This assignment shall be made and become effective at the time the City tenders final payment to the Consultant, without further acknowledgment by the parties.

IX. GENERAL COMPLIANCE WITH LAWS AND WAGE RATES

a. The Consultant shall be required to comply with all federal, state, and local laws and ordinances applicable to the work. This includes compliance with prevailing wage rates and their payment in accordance with California Labor Code, Section 1775.

X. FEDERAL EMPLOYEE BENEFIT

No member of, or delegate to, the Congress of the United States, and no Resident Commissioner shall be admitted to any share or part of the Agreement to the said project or to any benefit to arise from the same.

XI. PAYMENT TO CONSULTANT

a. This work is to be performed for a “Not-to-Exceed Fee.”

b. The Consultant shall provide a Cost Proposal indicating the fee for individual tasks with a “Not-to-Exceed Fee” which shall be the sum of all tasks by part, phase, and milestone.

c. Tasks shall include, but not be limited to, all Professional Consultant Services necessary to complete the work covered by this Proposal.

d. Reimbursement costs such as mileage, printing, telephone, photographs, postage and delivery, are to be included in the “Not-to-Exceed Fee.”

e. All tasks including labor and reimbursable costs such as printing, postage, and delivery shall have supporting documentation presented at the time payment is requested.

f. The City will pay the Consultant for all acceptable services rendered in accordance with the “Agreement for Professional Consultant Services.”

g. When the Consultant is performing, or is requested to perform, work beyond the scope of service in the “Agreement for Professional Consultant Services,” an “Amendment to the Agreement” will be executed between the City and Consultant.

h. The Consultant shall receive no compensation for any re-work necessary as result of the Consultant’s errors or oversight.

XII. INSURANCE

a. The Contractor will comply with the following insurance requirements at its sole expense. Insurance companies shall be rated (A Minus: VII—Admitted) or better in Best’s Insurance Rating Guide and shall be legally licensed and qualified to conduct business in the State of California:

The Contractor shall procure and maintain, at its sole expense, Workers' Compensation Insurance in such amounts as will fully comply with the laws of the State of California and which shall indemnify, insure and provide legal defense for the Contractor and the City, the Housing Authority and CSD against any loss, claim, or damage arising from any injuries or occupational diseases happening to any worker employed by the Contractor in the course of carrying out the Agreement. This coverage may be waived if the Contractor is determined to be functioning as a sole proprietor and the city provided form "Exception to Worker's Compensation Coverage" is signed, notarized and attached to this Agreement

☑ General Liability Insurance—to protect against loss from liability imposed by law for damages on account of bodily injury, including death, and/or property damage suffered or alleged to be suffered by any person or persons whomever, resulting directly or indirectly from any act or activities of the Contractor, sub-Contractor, or any person acting for the Contractor or under its control or direction. Such insurance shall be maintained in full force and effect throughout the terms of the Agreement and any extension thereof in the minimum amounts provided below:

Bodily Injury	$1,000,000 per occurrence/ $2,000,000 aggregate
Property Damage	$500,000 per occurrence/ $500,000 aggregate

☑ Professional Errors and Omission Insurance—such coverage shall not be less than $1,000,000 per claim and aggregate.

☑ Liability and Property Damage Insurance coverage for owned and non-owned automotive equipment operated on City/CSD/Housing Authority premises. Such coverage limits shall not be less than $1,000,000 combined single limit.

† A Certificate of Insurance and appropriate additional insured endorsement evidencing the above applicable insurance coverage shall be submitted to the City prior to the execution of this Agreement. The Certificate of Insurance or an appropriate binder shall bear an endorsement containing the following provisions:

Solely as respect to services done by or on behalf of the named insured for the City of Moreno Valley, it is agreed that the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, their officers, employees and agents are included as additional insured under this policy and the coverage(s) provided shall be primary insurance and not contributing with any other insurance available to the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, its officers, employees and agents, under any third party liability policy

The terms of the insurance policy or policies issued to provide the above coverage shall neither be amended to reduce the required insurance limits and coverages nor shall such policies be canceled by the carrier without thirty (30) days prior written notice by certified or registered mail of amendment or cancellation to the City, except that cancellation for non-payment of premium shall require ten (10) days prior written notice by certified or registered mail. In the event the insurance is canceled, the Contractor shall, prior to the cancellation date, submit new evidence of insurance in the amounts established.

b. It is the consultant's responsibility to ensure that all subconsultants comply with the following: Each subconsultant that encroaches within the City's right-of-way **and** affects

(i.e., damages or impacts) City infrastructure must comply with the liability insurance requirements of the Parks and Community Services Department. Examples of such subconsultant work include soil sample borings, utility potholing, etc.

The "Application for Encroachment Permit" form (five pages) and the "Application for Encroachment Permit Liability Insurance Requirements," is available from the City's Project Manager and must be completed and submitted in full to the City Project Manager. It is the Consultant's responsibility to ensure that all subconsultants submit the appropriate encroachment permit and insurance documentation at the same time that the Consultant's insurance documentation is submitted.

XIII. INDEMNIFICATION

a. Consultant Indemnification. Consultant shall indemnify, defend and hold the City, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District (CSD), their officers, agents and employees harmless from any and all claims, damages, losses, causes of action and demands, including, without limitation, the payment of all consequential damages, expert witness fees, reasonable attorney's fees and other related costs and expenses, incurred in connection with or in any manner arising out of Consultant's performance of the work contemplated by this Agreement and this Agreement. Acceptance of this Agreement signifies that the Consultant is not covered under the City's general liability insurance, employee benefits, or worker's compensation. It further establishes that the Consultant shall be fully responsible for such coverage. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees.

b. Additional Indemnity Obligations. Consultant shall defend, with counsel of City's choosing and at Consultant's own cost, expense and risk, any and all claims, suits, actions or other proceedings of every kind covered by Section "a" that may be brought or instituted against City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees. Consultant shall pay and satisfy any judgment, award or decree that may be rendered against City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees as part of any such claim, suit, action or other proceeding. Consultant shall also reimburse City for the cost of any settlement paid by City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees as part of any such claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Consultant shall reimburse City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided.

XIV. TERMINATION FOR CONVENIENCE OF THE CITY

The City reserves the right to terminate the "Agreement for Professional Consultant Services" for the "convenience of the City" at any time by giving ten (10) days written notice to the Consultant of such termination and specifying the effective date thereof. All finished or unfinished drawings, maps, documents, field notes and other materials produced and procured by the Consultant under the said aforementioned Agreement is, at the option of the City, City property and shall be delivered to the City by the Consultant within ten (10) working days from the date of such termination. The City will reimburse the Consultant for all acceptable work performed as set forth in the executed Agreement.

XV. INDEPENDENT CONTRACTOR

The Consultant's relationship to the City in the performance of the Consultant's services for this project is that of an independent Contractor. The personnel performing said Surveying Services shall at all times be under the Consultant's exclusive direction and control and shall be employees of the Consultant and not employees of the City. The Consultant shall pay all wages, salaries and other amounts due his employees in connection with the performance of said work shall be responsible for all employee reports and obligations, including but not necessarily restricted to, social security, income tax withholding, unemployment compensation, and Workers' Compensation.

XVI. CONTRACT

The Contract includes the Agreement for Professional Consultant Services, City's Request for Proposal, Consultant's Proposal, and Exhibits.

The Political Reform Act and the City's Conflict of Interest Code require that consultants be considered as potential filers of Statements of Economic Interest. Consultants, as defined by Section 18701, may be required to file an Economic Interest Statement (Form 700) within 30 days of signing a Consultant Agreement with the City, on an annual basis thereafter if the contract is still in place, and within 30 days of completion of the contract.

XVII. GENERAL CONDITIONS

a. Pre-contractual expenses are defined as expenses incurred by the Consultant in: (1) preparing the Proposal; (2) submitting the Proposal to the City; (3) presentation during selection interview; (4) negotiating with the City any matter related to this Proposal; (5) any other expenses incurred by the Consultant prior to an executed Agreement.

   The City shall not, in any event, be liable for any pre-contractual expenses incurred by the Consultant.

b. The Consultant is responsible for notifying Underground Service Alert and providing proper traffic control, at no additional expense to the City.

c. The City reserves the right to withdraw this RFP at any time without prior notice. Further, the City makes no representations that any Agreement will be awarded to any Consultant responding to this RFP. The City expressly reserves the right to postpone reviewing the Proposal for its own convenience and to reject any and all Proposals responding to this RFP without indicating any reasons for such rejection(s).

d. The City reserves the right to reject any or all Proposals submitted. Any Contract awarded for these Consultant engagements will be made to the Consultant who, in the opinion of the City, is best qualified.

XVIII. SELECTION CRITERIA

The Consultant may be invited to a selection interview. The Proposals will be rated/ranked according to the following criteria:

a. The Firm's General Experience and Qualification Information (35 points) – Information about the company (and all sub-consultants) including professional licenses held; ability to furnish required insurance and meet stipulations of the City's "boiler plate" agreement; details about comparable projects completed by the firm, as well as local experience; and its ability to provide the required services.

b. Project Approach/Understanding (45 points) – Discussion of major issues identified on the project and how the consultant team plans to address them; the management approach and organization necessary to complete the specific project; and outline quality control measures to ensure delivery of a quality product on time and within budget. Includes ability to comply with grant-required design elements.

c. Cost (20 points)

RE: Proposal for Landscape Architecture Design Services for Moreno Valley Bark Park Project

Dear Members of the Selection Committee:

The American Veterinary Medical Association found that 66 percent of dog owners consider their pets to be family members. Dogs provide love and companionship and break down social barriers. Recognizing the demand for places where people can exercise their dogs off leash, the City of Moreno Valley Parks and Community Services Department has recognized this and made it a goal to utilize Statewide Park Development and Community Revitalization Program grant funds to develop another dog park for the City. The location and popularity of the existing Hound Town Dog Park on the City's north side has clearly driven the need for another dog park on the opposite side of Moreno Valley. This approximately 1.5-acre dog park will not only alleviate overuse and augment the amenities offered at Hound Town, but has the opportunity to become a special oasis that will capture and celebrate the unique bond between dogs and humans, serving multiple community needs.

The **Kimley-Horn** team was developed to help the City achieve their vision and goals for this project. Our team specializes in parks and recreation projects, offering particular knowledge in and familiarity with master planning, design, and phased implementation of parks of various scale with diverse programming. Our team offers the City a combination of proven local and national experience combined with a collaborative approach that will lead to the realization of your goals. **The Kimley-Horn team is positioned to provide the City with a legacy project, one that you and Moreno Valley residents can be proud of and appreciate.** As you select your consultant for this exciting project, please consider the following benefits the Kimley-Horn team offers:

Multidisciplinary Prime Consultant. Our team is unique and provides the full complement of technical know-how that allows us to draw from the best examples of successful parks and recreation projects in the U.S. With a local office in Riverside and the resources of a national firm, we provide the full range of multidisciplinary services required for this project. Through our partnership with our subconsultants, **Cabrinha, Hearn & Associates** (CH&A) for survey, and **Leighton Consulting, Inc.** for geotechnical, our team provides best-in-class experience for all elements of this project. We are confident our team is the best qualified to complete this project due to our collective depth of project experience, portfolios brimming with cutting-edge design and award-winning park projects, and a track record of similar project success.

Expertise in Parks and Master Planning. Kimley-Horn has completed over 350 parks projects over the last seven years across the country, including 18 dog parks. We are highly experienced at master planning, consensus building, placemaking, and designing parks that have been successfully implemented for communities to enjoy. Kimley-Horn, together with our outstanding subconsultants, brings you a team with the highest caliber of relevant experience in this type of recreation facility—a team that provides creative and realistic ideas that are grounded in sustainability, constructability, maintainability, and safety.

Excellent Local Experience and Knowledge. In addition to our team's extensive parks and recreation experience, we also offer significant civil engineering and landscape architecture experience in the greater Inland Empire area. With a local office in Riverside, we have the knowledge and familiarity of the region coupled with excellent working relationships to make this project successful. The City can take comfort in knowing your project will be under the management and quality control of a firm with national resources and local roots in municipal services. **Project manager Randall A. Kopff, PLA, a 19-year dry climate parks and recreation design specialist (and dog owner), understands the needs of the community and has a personal investment in this project.**

The Kimley-Horn team is ready and excited to help the City create this landmark space with the ability to draw the community together around its residents' mutual connection to their dogs. We are the team with the knowledge and technical understanding you need to deliver a quality project on time and within budget. We sincerely appreciate the opportunity to present our qualifications. **Randall A. Kopff, PLA** is our project manager and your primary point of contact. He can be reached by phone at **602.906.1154** or by email at **randall.kopff@kimley-horn.com**. We look forward to working with the City on this exciting project.

Sincerely,

KIMLEY-HORN AND ASSOCIATES, INC.

Randall A. Kopff, PLA (CA# 6633)
Project Manager

TABLE OF CONTENTS

A. Project Understanding

It is our understanding that the City is seeking a design team to complete an overall conceptual plan, design, and construction phase services for a 1.50-acre dog park in the southwest portion of Moreno Valley, directly adjacent to the Moreno Valley Animal Shelter. The City of Moreno Valley Parks and Community Services Department has made a commitment to pursuing Statewide Park Development and Community Revitalization Program grant funds to develop this new dog park. The location and popularity of the existing Hound Town Dog Park on the City's north side has clearly driven the need for another dog park on the opposite side of Moreno Valley. This approximately 1.5-acre dog park will not only alleviate overuse and augment the amenities offered at Hound Town, but has the opportunity to become a special oasis that will capture and celebrate the unique bond between dogs and humans, serving multiple community needs.

We understand that the City of Moreno Valley will fund the design with local funding and that the construction phase is contingent upon award of grant funding, and may include state and federal funding sources. The total project costs, including design services, are estimated at $1 million. The City anticipates grant award announcements this summer and if awarded, construction is anticipated to begin in the fall of 2021 with a targeted completion date of spring 2022.

The dog park design will incorporate input from residents and stakeholders on amenities, location of amenities within the park, and ideas for safe public use and beautification. The City already has scheduled community-based planning sessions on October 27, October 31, November 5, November 7, and November 10 to gather public comments and consensus. Our design team will utilize the information gathered as a part of these community meetings, along with staff direction to develop the program and preliminary dog park concept to present to the grant agency.

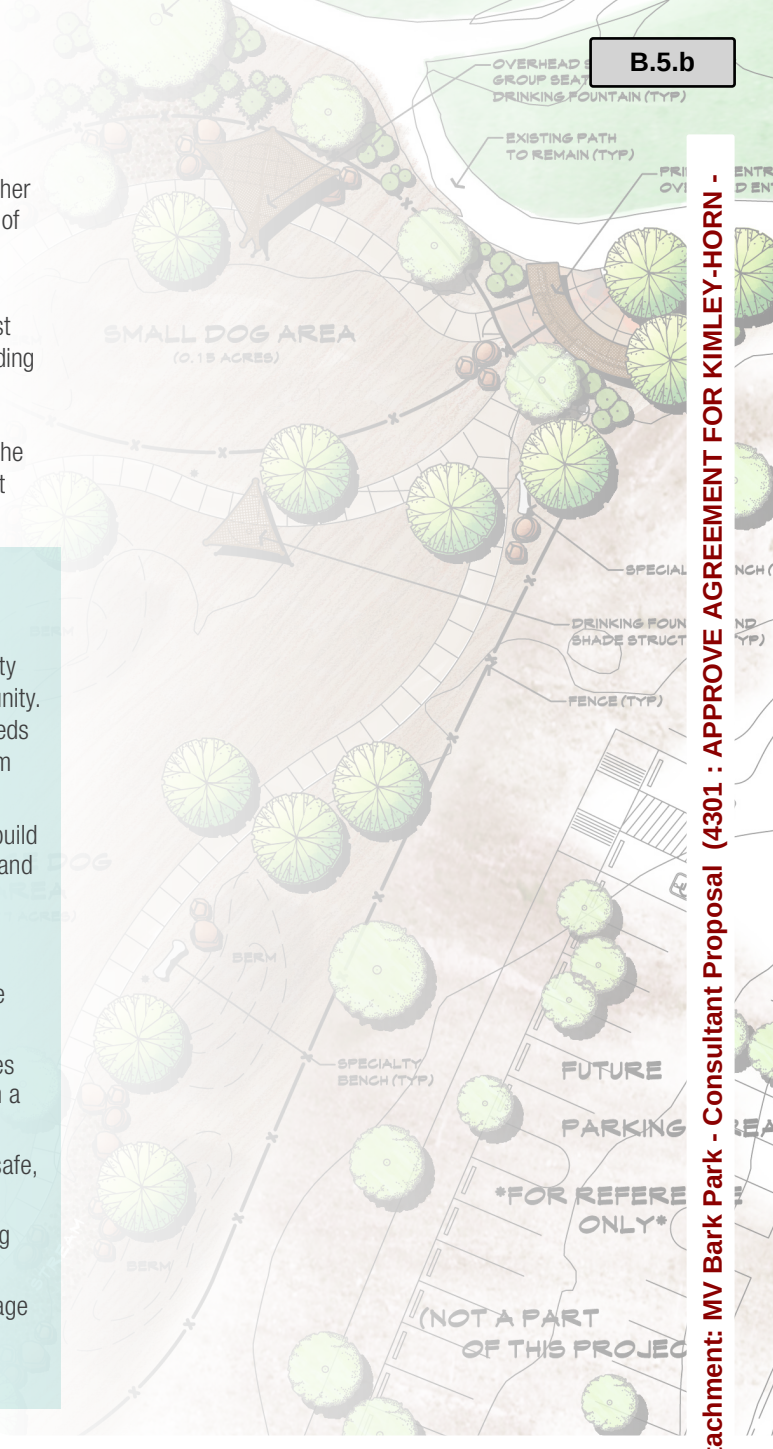
Our team has worked with multiple agencies to secure grant funding through Prop 68, so we understand the scoring nuances and will assist staff in interpreting and balancing the community input gathered with proven methods which will maximize grant scoring and the City's opportunity to secure funding. We can assist staff with carbon sequestration calculations and ensuring that the proposed design provides efficient use of water and other natural resources, while meeting an application submittal date of December 14, 2020.

All design work on the project from concept to construction drawings will be in accordance with the requirements and latest versions of the City of Moreno Valley standards, California Building Code, Standard Specifications for Public Works Construction (Greenbook), Americans with Disabilities Act (ADA) standards, the California Manual on Uniform Traffic Control Devices, and the Riverside County Flood Control and Water Conservation District (RCFC & WCD), as applicable.

Project Goals

The master site plan, based on input from the community, stakeholders, and staff, will identify park and recreational facility improvements and amenities that are supported by the community. It is critical to create a plan that balances specific dog park needs with the overall community recreational needs. Our design team will assist the City to:

- Engage stakeholders, inspire community participation, build consensus, and develop support within the Community and City Council
- Define a conceptual plan and estimate of probable construction costs to a level that will provide detailed information for subsequent design phases and maximize grant funding opportunities
- Provide design solutions which bring creative approaches to problem solving and generate unique placemaking on a community and regional level
- Provide an aesthetically pleasing dog park design with safe, enjoyable, and usable spaces
- Design park elements to foster social interactions among humans while maintaining safety for animals
- Emphasize long-term maintainability and minimize damage due to overuse through creative rotational management techniques and thoughtful surface material selection



Identification of Project Issues and Key Considerations

Creating a Community Asset

Successful project implementation will include achieving a balance between a destination dog park and a unique recreation amenity. This can be achieved through a mix of shared programming, successful site circulation, multi-use connectivity, and shared amenity areas. This can be done by incorporating multi-use paths, traditional recreation amenities, or even through a memorial for residents who have lost their pets.

Separation, Rotation Techniques, and Maintenance

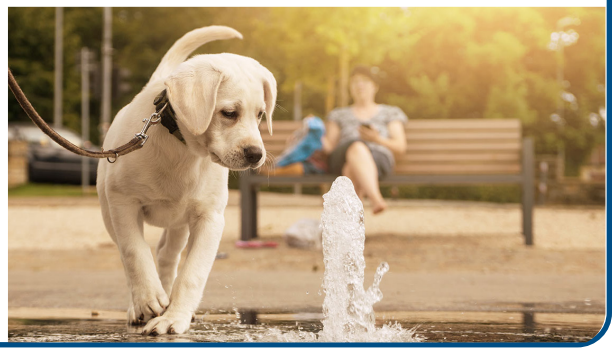
It is vital to have the versatility to close off-leash areas to allow turf to recover or to maintain other surface materials. Strategically separating off-leash areas into categories such as passive play for small dogs, active play for large dogs, an area for senior dogs or more child-safe areas, and sizing these areas appropriately is key to the long-term viability and maintainability of these off-leash environments. Providing multiple fenced areas solely for the purposes of rotation is often utilized to allow an area or areas to recover and be maintained on a regular basis without having to close the entire park for a day or restricting user groups.

Stormwater Quality

Given the existing soil types in the project area, infiltration may not be feasible. Without storm drains for BMP connections, our design goal will be to remain under 10,000 square feet of impervious area and to create and use low impact design measures for stormwater quality. Confirming that all impervious areas drain to pervious ones, while keeping sheet flow drainage as close to existing conditions will be critical to ensure that stormwater quality measures are properly met and impacts to the project budget are minimized.

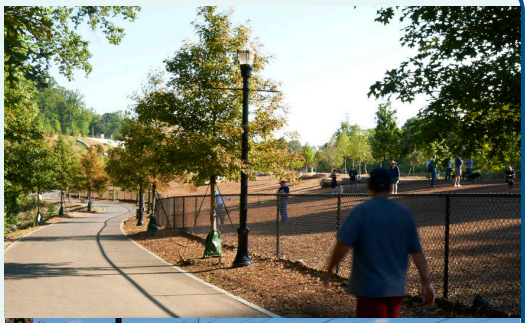
Irrigation and Efficient Water Use

A key to the success of any park project, particularly those in dry or desert climates, is a clear understanding and effective strategy for providing and sustaining healthy plant growth while posing no health threats to the animals and humans who will be using the park. Additionally, calculating the anticipated seasonal and annual water demands for the irrigation system will need to be addressed during the master planning and design phases. Understanding the irrigation maintenance practices (including peak-season water window parameters, control system programming parameters, seasonal adjustment and winterization strategies, drought mitigation or response strategies, etc.) and equipment standards that are currently being used by the Moreno Valley Parks and Community Services Department maintenance staff, so that the irrigation system can be designed to meet those parameters.



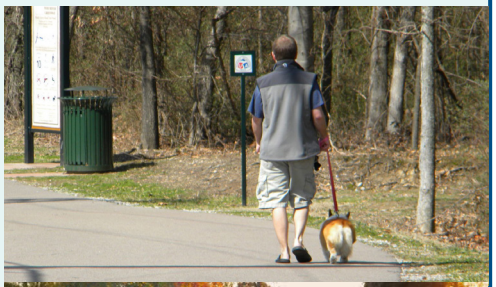
Lighting

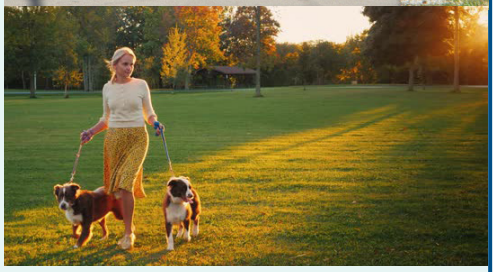
Creating a lighted park for night use is desired to maximize park hours and safety. In our experience, the use of large format lighting can result in resident concerns over quality of life impacts; however, this site's proximity to industrial and commercial uses should alleviate that concern. The understanding, support, and acceptance of surrounding land uses will be essential to the success of the lighting design.



Pedestrian Access and Circulation

Providing multi-use path loops of different lengths around the park can also help encourage activity and use of the park by people and dogs with different levels of mobility. Off-leash areas should utilize dual-entry gates on concrete pads and keep any turf areas as far away as possible from the entry/exit areas. Separate maintenance access to these areas should also be provided. Maintaining a usable and accessible surface with positive drainage is also critical. Whether concrete, turf, mulch, decomposed granite, artificial turf, or a combination is utilized, no standing water can be present after a rain event to keep these areas highly functional and to maintain pet safety.





Shade and Social Spaces

The inclusion of shade opportunities around the park through trees and ramadas is critical to the success of a dog park. It also assists in creating social spaces for users to gather and socialize. Dog parks should improve the quality of life of the owners by increasing interactions between owners while maintaining a positive design aesthetic and providing a safe and functional outdoor space for both owners and dogs.

The Kimley-Horn team is poised to provide our planning and design experience to assist the City in developing this exciting new dog park. The team brings a proven consensus-building approach to engage and unify the community and project stakeholders to reach a successful shared vision.

Kimley-Horn has the parks and recreation experience to provide the City with unique and creative problem-solving approaches built on proven parks and recreation, and specifically dog parks.

Project Process

1 Project Initiation and Kick-off

The Kimley-Horn team will facilitate a project kick-off meeting and site tour with City staff and project stakeholders to discuss the project schedule, master planning and design intent, budget, and deliverables. The City shall provide direction on key design intent, site constraints, and issues prior to starting the master planning design process.

- The project lines of communication will be established between the Kimley-Horn team, City, and others as necessary. The level of involvement and roles for each phase and task will also be identified.
- Our team will develop the project schedule as detailed in the scope to deliver the project, achieve project goals and objectives, and clarify any assumptions.
- The outlined process will be organized and mapped to show the relationship between tasks to allow effective and timely planning of tasks and designate key project milestones and deliverable dates for each phase. The project schedule will evaluate and incorporate the time relationships between design, procurement, permitting, construction, and delivery.

2 Staff Progress Meetings

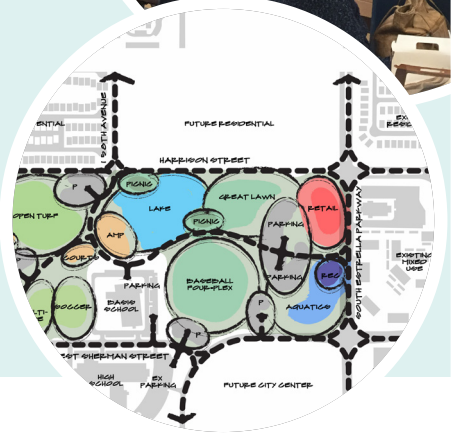
The project team will hold periodic progress meetings to engage City staff and key stakeholders in the development of the conceptual plan and construction documents. Meeting topics will include soliciting design feedback, notice of schedule updates, and coordination related to the design process.

3 Inventory/Analysis

Responding to the understanding gained from the kick-off meeting and site visit, our team will carefully review the existing site conditions to generate a preliminary inventory and analysis of the site. Adjacent parcels will be included in this review to make sure viewsheds, drainage patterns, traffic flows, and other important elements are included in the project context. Understanding the strengths and weaknesses of the entire site is important to make sure the appropriate programming elements are sited in the best locations. Based on the review of the project data, the team will create initial project assessments that summarize findings, outline agency requirements, and present design considerations and options.

4 Concept Development

The team will take a sequence approach to concept development based on staff, stakeholder, and community inputs to refine into one overall site master plan. Concept development will include programming diagrams and a concept plan.



5 Opinion of Probable Cost

To develop the cost model, we will utilize previous project experience, bid tabulations, and relationships with local contractors and site furnishing and material manufacturers. This cost model responds dynamically to provide the City with an understanding of the cost relationships and cost escalation.

6 Construction Bid Documents

Upon completion of the conceptual master plan for the park site and grant award, we will focus on your available funding and customize a detailed plan to maximize it with thoughtful design. Proceeding with final design plans and specifications for the entire park will allow you the flexibility to build the full site, to create bid alternates as needed, or to initially construct as much of the park as possible and strategically plan for future phasing, including providing adequate irrigation and electrical infrastructure and stub-outs to serve the site in the future at its full build-out.

From the final master plan, we will quickly transfer that concept into the 60% construction document set for review. From there, we will further the design into the 90% plan set, and review with City staff before heading into the final stretch of 100% plan set for final review and comment to prepare final stamped/sealed construction documents. At each plan set phase, the cost model will continuously be updated as a living document with revisions as well as further refined with each additional design detail that is developed. Once complete, Kimley-Horn will submit the construction plans as well as any required project manuals to the City for bidding.

7 Implementation Plan

The implementation plan will include updated cost estimating with construction escalation, construction sequencing, and schedules for anticipated project completion.

8 Construction Phase Services

Kimley-Horn will provide construction phase services as requested in addition to design. The key Kimley-Horn team staff who completed the design phase will be the personnel assigned to construction phase tasks. Once the notice to proceed has been issued to the contractor, Kimley-Horn will:

- Attend a pre-construction meeting
- Review shop drawings
- Review material submissions
- Review the contractor's compliance of permit requirements
- Process Requests for Information (RFI) from the contractor, and
- Attend construction progress meetings

Once the work has reached substantial completion, Kimley-Horn will attend a site visit with all disciplines to compile a punch list of items not in compliance with the contract documents. The punch list will be provided to the contractor and City Project Manager. Once the contractor has completed all items on the punch list, a final visit to verify that all items have been completed in an acceptable manner will be performed. Kimley-Horn will coordinate the completion of the project closeout that will include a set of "as-built" plans.

Cost Control Ability

Design Cost Control

Controlling design costs begins by ensuring that all stakeholders are actively engaged in the initial scoping process when the contract is being developed. We will provide a task item list with identified deliverables developed from the approved project scope of work to be utilized by the City's project manager to chart design progress and evaluate pay applications.

Another key to design cost control is ensuring that the proposed improvements have been reviewed and approved by key staff and stakeholders during the first few months of the design phase. It will be critical to define the required utility infrastructure improvements as several will require close coordination with multiple City departments. This will need to be clearly defined at the project onset and scoping stage and should involve the City and necessary stakeholders to clearly understand the demand and approach to bringing utilities to the site. This will be the same in terms any necessary offsite/right-of-way and traffic access improvements. It will be important to have City staff approve the proposed design direction before investing significant effort in final design.

Construction Cost Control

Construction costs are where the most substantial cost impacts can occur. Monitoring the cost model from the master plan phase and through each phase of the design phase is very important. This will allow for pricing input at the project onset instead of making large project cuts at the end of the design process. The Kimley-Horn approach is to provide detailed submittals that allow for accurate cost model development and updates at each milestone.

Scope of Services

Kimley-Horn will provide the following services for each independent task:

Task 1: Conceptual Master Plan Development

Task 1.1 Project Kick-off Meeting/Site Visit:

The Kimley-Horn team will attend a project kick-off meeting at the City of Moreno Valley offices with City staff and stakeholders to discuss the project schedule and submittals; establish the team organization and communication procedures; discuss the design intent and project goals; and discuss budget control procedures. The City shall provide direction on key design intent, site constraints, and issues prior to starting the schematic design process. At the end of the kick-off meeting, the Kimley-Horn team and City Staff will walk the park site with all relevant background data to confirm the site conditions and key issues to be addressed during the design process.

Task 1.2 Data Collection:

The Kimley-Horn team will develop an understanding of the physical conditions within the project limits through data collection efforts. The Kimley-Horn team will conduct utility research to obtain readily available records for existing sewer, water, and storm drain. The detailed background information gathered for the project will be confirmed through the site visit performed by the Kimley-Horn team including subconsultants. Results of the investigations will be integrated into an existing utility CAD base map that will be used by the project team to develop the final design plans.

Task 1.3 Community Based Planning Sessions:

The Kimley-Horn team project manager will attend the Community Based Planning Sessions led by City staff. We assume virtual attendance at up to three (3) of the five (5) currently scheduled meetings, as well as time to assist staff in interpreting input received. If additional meetings or attendance is required for this task, additional budget will be requested.

Task 1.4 Draft Conceptual Master Plan:

The Kimley-Horn team will develop a conceptual design plan based on input from the community-based planning sessions which incorporates the specific program elements identified and requested by staff. The concept plan will illustrate the proposed improvements within the park (i.e., amenities, lighting, parking improvements, paths, and shade structures), existing conditions, existing and proposed utilities, stormwater quality options as well as character imagery of the proposed project.

Task 1.5 Conceptual Design Comment Resolution Meeting and Final Conceptual Plan:

The Kimley-Horn team will coordinate with City Staff to compile all comments received on the draft master plan and schedule a meeting to review comments and determine the final comment resolution. It is assumed that this meeting will coincide with one of the scheduled monthly progress meetings. The design team will respond to one (1) round of consolidated comments from the City and project stakeholders on the conceptual design plans and will prepare revisions accordingly and submit as the final conceptual master plan.

Task 1.6 Preliminary Opinion of Probable Construction Costs (OPCC):

The Kimley-Horn team will prepare a preliminary OPCC based on the final conceptual master plan, that will identify the proposed improvements, unit prices, contingencies, and an overall cost for each proposed element in the project.

Task 1.7 City Council Presentation:

The Kimley-Horn team project manager will present the final conceptual master plan to City Council. A PowerPoint presentation, pamphlets, and up to two (2) color exhibits will be prepared for the presentations. This task assumes up to one (1) in person, presentation. The design team will make up to one (1) round of additional revisions to the final conceptual design plans based on feedback from the City Council presentations.

Task 1.0B Topographical Survey

The Kimley-Horn team will conduct a topographical survey including locating property lines, right-of-way, and above ground utility appurtenances that will be utilized for project base mapping. The Kimley-Horn team will field collect existing survey monuments, curb & gutter, sidewalk, fences, grade breaks and visible utility appurtenances within the limits of work to verify existing utility facilities within the project area. Coordination meetings with the utility companies will be required to update project information and verify project submittal, approval, and permitting requirements. Project topographic base mapping will be produced in AutoCAD format.

Task 2: Construction Documents and Reports

Kimley-Horn assumes that the conceptual master plan will provide sufficient information to proceed directly to 60% level construction plans. We will prepare 60%, 90%, and Final (100%) construction documents and reports for City review and comment. All design work will be in accordance with the requirements and latest versions of the City of Moreno Valley standards, California Building Code, Standard Specifications for Public Works Construction (Greenbook), Americans with Disabilities Act (ADA) standards, the California Manual on Uniform Traffic Control Devices, and the Riverside County Flood Control and Water Conservation District (RCFC & WCD), as applicable. It is assumed that the City will provide one set of consolidated client comments and that these comments will not require major design changes. After each submittal, a two-hour review meeting will be held between the City, the project's construction manager, and up to two (2) Kimley-Horn staff to review the consolidated comments and determine final comment resolution. It is assumed that this meeting will coincide with one of the in-person, monthly progress meetings. All comments and revisions will be addressed as part of the 90% and Final submittal, respectively. The plans will be prepared for a single phase of construction in a format and scale deemed appropriate by Kimley-Horn. If the City desires to phase the project, Kimley-Horn can provide a detailed phasing plan and separate design packages for an additional service fee.

Task 2.1 Construction Documents:

The construction documents will consist of the following discipline sheets:

Cover Sheet – Kimley-Horn will prepare a cover sheet that includes: vicinity map, location map, City general notes, project description, legend, abbreviations, and limits of work that summarizes the overall project plan set.

General Notes – Kimley-Horn will prepare a sheet that includes general notes, abbreviations, and site specific notes as needed.

Existing Conditions/Demolition Plans - Kimley-Horn will prepare plan view sheets showing existing facilities to be removed, relocated, and protected in place. The plan view sheets shall reflect existing topography, existing right-of-way, and existing utilities.

Site Plan – Kimley-Horn will prepare plan view sheets showing horizontal control and proposed improvements. The plan view sheets will reflect existing topography, existing right-of-way, and existing utilities.

Utility Plans – Kimley-Horn will prepare plan view sheets with existing and proposed utility locations including: water, sewer, storm drain, and dry utilities. Existing as-built information will be reviewed and coordinated with City staff for utility location. Two points of connection are assumed: one for irrigation water and one for domestic water. If potholing (by others/City) is required, the Kimley-Horn team will provide a pothole exhibit and work with the City on including the results of the potholing effort into the plans and design. The storm drain layout will include storm drain sizing and treatment requirements for this project. The 60% submittal will show findings of existing locations, and proposed utilities will be included during 90% and Final submittal.

Improvement Plan and Details – Kimley-Horn will prepare plan view sheets showing proposed improvements on site including curb, curb and gutter, walkways (DG and PCC), pavement structural section, parking layout, and ADA enlargement details.

Horizontal and Vertical Control Plans – Kimley-Horn will prepare plan view sheets illustrating the proposed grading condition with data tables and elevations to control all hardscape features such as curb, walkways, and parking. The 60% plans will include contours and spot elevation information only; the 90% plans will include data tables and additional enlargements, as required, to control ADA facilities on site.

Erosion Control Plans and Details (Submitted at 90% and Final) – Kimley-Horn will prepare plans and details for temporary erosion control facilities for the project. Design of these facilities will include current Best Management Practices and will conform to the requirements of the City.

Hardscape Plans and Details – Kimley-Horn will prepare hardscape plans based on the input provided by the City and amenities identified on conceptual design plans. The hardscape plans will provide various colors, finishes, and limits for different types of flatwork throughout the site.

Landscape Plans and Details – Kimley-Horn will prepare landscape plans and work with the City to develop the initial plant palette.

Irrigation Plans and Details – Kimley-Horn will prepare landscape irrigation plans indicating the anticipated point of connection, controller locations, and proposed irrigation mainline routing with anticipated pipe sizing.

Lighting and Electrical Plans and Details (Site) – Kimley-Horn will prepare electrical and lighting engineering design plans including all equipment and lighting locations, preliminary conduit routing locations, lighting and equipment installation details, and preliminary calculations.

Traffic Control Plans – Kimley-Horn will prepare traffic control plans for the work associated with the proposed parking lot improvements on Business Center Drive. Up to two (2) review cycles are anticipated for the approval of the traffic control plans.

Task 2.2 Project Management, Schedule and Quality Assurances and Control:

The Kimley-Horn team project manager will provide coordination between the design team and the City and monitor project progress and the project schedule on a regular basis. The project manager will attend monthly progress meetings with the City and project stakeholders. The project manager will coordinate all monthly project invoicing. The Kimley-Horn team will provide an extensive in-house quality control review to reduce plan error sothat proper coordination has taken place between the City, affected utilities, and the Kimley-Horn team.

Task 2.3 Specifications, Reports and Estimates

Task 2.3.1 Special Provisions

Kimley-Horn will prepare technical specifications to accompany the construction plans. The technical specifications will be prepared utilizing City standards and the 2018 APWA standard specifications ("Green Book") for onsite construction. Specifications will be submitted at 90% and Final submittals.

Task 2.3.2 Opinion of Probable Construction Costs

Kimley-Horn will prepare the Engineer's Opinion of Probable Construction Cost (OPCC), based on the latest design quantity takeoffs and current unit prices. The OPCC will provide a bid item description, bid unit, bid quantity, unit price, and total price for each bid item. The item description will correspond with the Bid Schedule item description to be used when advertising the project for construction bids.

Task 2.3.3 Drainage Technical Memorandum

The Kimley-Horn team will prepare a drainage technical memorandum for the final park design. The drainage memorandum will be done using AES HydroWin (Riverside County Module) for the 1 hour, 3 hour, 6 hour, and 24 hour durations.

The increase in peak flow as a result of development is assumed to be nominal and acceptable to the approving agency (City of Moreno Valley). Based on the surrounding developments, it is assumed that there is no storm drain infrastructure in the adjacent roadway and the goal of the site will be to utilize the existing condition sheet flow for runoff to Business Center Drive. No detention basin design or other mitigation features are assumed warranted, and therefore not included. Offset hydrology and/or offsite hydraulic analysis is considered unwarranted and not included. No floodplain mapping or similar analysis is included or considered warranted. A preliminary drainage technical memorandum will be included with the 60% design submittal for review and comment by the City. A final drainage technical memorandum will be submitted addressing one round of consolidated City review comments with the final submittal.

Task 2.3.4 Water Quality Management Plan (WQMP)

The Kimley-Horn team will prepare a WQMP using the City's standard template. The Team will work with City Staff during the conceptual site plan phase to understand how the site configuration impacts locations for stormwater treatment (project will not be a PDP). The amount of impervious area proposed on site will dictate the type of stormwater treatment required for the project. The Kimley-Horn team assumes that the project will be kept below the 10,000 sq-ft threshold for new development projects, which would eliminate the need for post-construction structural BMPs. Reducing the impervious area proposed on site will be a goal throughout the design process as it is linked to project cost and long-term maintenance parameters.

Task 2.3.5 Geotechnical Investigation

The Kimley-Horn team will provide geotechnical investigation services that will consist of a subsurface field investigation and recommendations for retaining wall and shade structure footings, flatwork and roadway pavement sections, and infiltration testing and results. Additionally, background information including readily available geotechnical reports, geologic maps, groundwater data, and aerial photographs will be researched. The Kimley-Horn team will develop a geotechnical evaluation report by compiling the analysis of the data obtained and discussing the findings, conclusions, and recommendations. As part of this task it is assumed that one (1) shallow exploratory boring will be completed as well as one (1) infiltration test will be conducted.

Web Soil Survey suggests hydrologic soil type C which typically does provide high infiltration opportunities for storm water.

Task 3: Construction Phase Services

The Kimley-Horn team will prepare final bid document plans, specifications, bid form, and OPCC for use by the City in project bidding. Kimley-Horn will incorporate consolidated comments from final submittal into the package before submitting to the City. Bid documents will be prepared from the final signed plans, specifications, bid form, OPCC, and other technical documents reviewed and approved.

Task 3.1 Bid Phase Services

Kimley-Horn will provide bid phase support services as requested by the City of Moreno Valley project manager. Bid phase service may include: pre-bid meeting attendance, answering RFIs, preparing addenda, and preparing conform documents. A total of twenty-four (24) hours is assumed for this task. Any additional effort will be considered additional services.

Task 3.2 Construction Phase Services

Kimley-Horn will provide Construction Phase Services as requested by the City's project manager. Up to eighty (80) hours are assumed for the following:

a. Preparing supplementary sketches required to resolve design-related items within the above outlined Scope of Services due to field conditions.

b. Attendance at up to four (4) construction meeting at the site within this Scope of Services.

c. Review of design-related submittal packages within the above outlined Scope of Services.

d. Attendance at one (1) preliminary punch walk list meeting.

e. Attendance at one (1) final punch walk list meeting.

Additional site visits not outlined in the scope of services and directed by the City will be considered an additional service.

Task 3.3 Record Documents

Kimley-Horn will revise the approved final design plans for the project based upon field changes and revisions as provided in the plan redlines/markups by the contractor's field superintendent and approved by the City. These plans will be provided to the City's project manager in Adobe PDF format.

ASSUMPTIONS/EXCLUSIONS

Any services not specifically provided for in our scope of services as well as any changes in scope made at the City's request, will be considered additional services and will be performed at our then current hourly rates. This will require approval in writing before any work will continue. Additional services Kimley-Horn can provide include, but are not limited to, the following:

1. Hours noted for tasks are estimates only. If more time is required for the scope of work, additional budget will be requested
2. This proposal assumes that the standards and practices in effect at the City of Moreno Valley, at the time of this proposal, will remain in effect throughout the course of development.
3. Meetings beyond those identified in this Scope and Fee Proposal
4. Water Pressure readings and/or pump station design
5. Value Engineering or Phased Construction Plans
6. All submittals and deliverables are assumed to be digital and in Adobe PDF format
7. Submittal and/or Permitting Fees
8. Environmental Services
9. Existing Plant Inventory or Landscape Preservation Plans
10. Water Features and/or fountains
11. Structural Review and Certification
12. Storm Water Pollution Prevention Plan (SWPPP) and SWPPP inspections
13. Notice of Intent (NOI) and Notice of Termination (NOT) to the Regional Water Board
14. Warranty and/or Maintenance Administration
15. A soils consultant and soil analysis will be coordinated/ prepared by the contractor upon the completion of mass grading. The existing soil nutrient information will be compared against the proposed plant palette to determine the appropriate amendment recommendations
16. Any continuous simulation modeling and/or the design of structural BMPs, if needed, would be considered additional services

B. Qualifications and Experience

Kimley-Horn Firm Background

Kimley-Horn is a full-service engineering, planning, and consulting corporation providing services to both public and private sector clients nationwide. Founded in 1967, Kimley-Horn has grown from a small group of traffic engineers and transportation planners to a firm of more than 4,500 employees with 95 offices nationwide, including 11 in California. Our well-established Riverside, San Diego, and Orange locations staffed with engineers, planners, designers, and technicians has worked with public agencies throughout the region, thus giving them broad local project experience.

Kimley-Horn's growth over the last 53 years is the result of our commitment to integrity and our dedication to providing quality services. We offer clients the local knowledge and responsiveness of a small organization, backed by the depth of resources only a national firm can offer.

Kimley-Horn's team specializes in:

- Park, Trail, and Greenway Planning and Design
- Athletic Fields and Pool Design
- Urban Planning and Design
- Land Use and Master Planning
- Community Centers and Public Libraries
- Streetscape Planning and Design
- Signage and Wayfinding Planning and Design
- Water Harvesting and Conservation Solutions
- Landscape and Irrigation Design
- Development Design Guidelines and Standards
- Site Feasibility Studies, Inventory, and Analysis
- 3D Modeling and Visualizations
- Visual Analysis and Impact Assessment
- Site Programming
- Public Outreach and Community Engagement

Kimley-Horn's project managers are backed by the resources and talents of a nationally-ranked organization comprised of creative and result-oriented landscape architects, engineers, planners, economists, environmental specialists, and technicians. With offices located throughout the nation, our staff utilizes the latest technology and information to achieve successful results for our clients. Our project managers serve as the primary liaison to clients, and with the support of our technical and administrative staff, meet the needs and expectations of the client.

Subconsultants

We have included the following subconsultants on our team specifically for this project. These firms are known as specialists in their field and we have a history of successful past projects working together.

Cabrinha, Hearn & Associates - Survey

Over the past 43 years, **Cabrinha, Hearn & Associates** (CH&A) has successfully provided land surveying and mapping services on five- and six-figure work orders on hundreds of projects throughout Southern California. Their quality surveying and mapping services are provided to their clients in a timely and economic fashion, they anticipate and solve potential problems before they arise by ensuring hands-on project participation by the principals, they maintain consistent and clear communication with their clients, and use the latest technology in surveying equipment and methods.

Leighton Consulting – Geotechnical

Leighton Consulting, Inc. (Leighton) is an experienced team of consulting geotechnical engineers, geologists, technicians, and special inspectors providing solutions to geologic impacts for municipalities across Southern California. Having successfully completed a myriad of projects, Leighton is familiar with the local geotechnical and geological conditions, and the opportunities and constraints that result from those conditions. Their proactive approach and experience with various public agencies allows them to respond quickly to unexpected construction related issues and provide efficient testing procedures. Their services will be primarily provided out of their local San Diego office and laboratory with additional resources available to the City should the need arise. This includes additional California registered professionals, technicians, inspectors, and laboratories in Irvine and Temecula, ready and able to serve their clients.

Leighton has served on numerous geotechnical and engineering geologist on-call contracts, completing thousands of public works, water infrastructure, and transportation projects. Leighton's project team has successfully managed and/or worked on projects adhering to the requirements of local and state regulatory agencies.

Team Organization

Kimley-Horn's team organizational chart identifying roles and responsibilities of key personnel is provided below. Our team of experienced professionals are ready and enthusiastic to serve the City of Moreno Valley's Bark Park Project. Project manager **Randall A. Kopff, Jr., PLA** will serve as the primary point of contact.

Project Manager
Randall Kopff, PLA, CLARB

QC/QA; Constructability
Kirk Ammerman, P.E.

KEY DISCIPLINES

Landscape Architecture
Corey Cameron, PLA

Civil Engineering
Megan Ulery, P.E., LEED AP

Drainage/Stormwater
Rich Lucera, P.E., QSD/P, CFM

Electrical Engineering
Brian Herting, P.E.

ADDITIONAL DISCIPLINES

Survey[1]

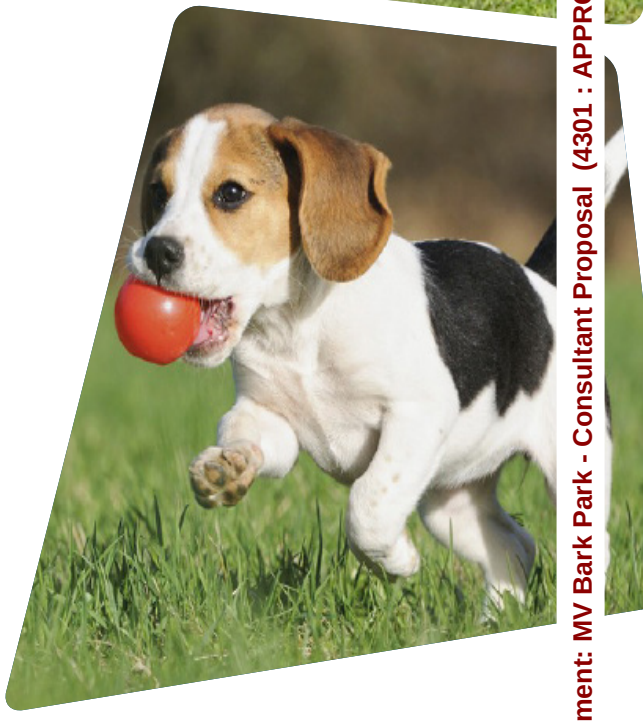
Geotechnical[2]

In-House Support Services

- Traffic
- Structures
- Geographic Information Systems (GIS)
- Graphics/3D Visualization
- Environmental
- Grant Writing

Subconsultants

1. Cabrinha, Hearn & Associates
2. Leighton Consulting, Inc.



Randall Kopff, PLA, CLARB

Project Manager

With more than 19 years of professional experience, Randall's skills have encompassed a wide variety of landscape architectural, planning, and graphic services on parks and recreation projects throughout the U.S. His skills include site inventory/analysis, master planning, design development, graphic presentations, 3D modeling, project management, and detailed technical drawings. Randall utilizes his diverse project background to work closely with individual clients to interpret public input and ensure that the proper vision has been achieved throughout the planning and design implementation processes.

Professional Credentials

- Bachelor of Science, Landscape Architecture, Ohio State University
- Professional Landscape Architect in California #6633, Arizona, Nevada, and Oregon
- The Council of Landscape Architectural Registration Boards, Member #40708

Relevant Experience

- **City of El Centro, Plank Park, El Centro, CA** – Project Manager
- **City of Tucson Dog Park Standards, Tucson, AZ** – Project Planner
- **City of Chula Vista, Millennia Park, Chula Vista, CA** – Landscape Architect
- **City of El Centro, El Centro Aquatic Center, El Centro, CA** – Project Manager
- **City of San Diego, Kindred Rooftop Dog Park, San Diego, CA** – Landscape Architect
- **City of Tucson, Ivan's Spot Dog Park, Tucson, AZ** – Landscape Architect
- **City of National City, Kimball Park, National City, CA** – Landscape Architect
- **City of Fountain Hills, Desert Vista Dog Park, Fountain Hills, AZ** – Landscape Architect
- **City of Fountain Hills, Desert Vista Park, Fountain Hills, AZ** – Landscape Architect
- **Thompson Peak Park, Scottsdale, AZ** – Landscape Architect
- **Egger/South Bay Community Park ADA Improvements, San Diego, CA** – Landscape Architect
- **Friendship Dog Park, Avondale, AZ** – Landscape Architect
- **Roscoe Dog Park, Goodyear, AZ** – Landscape Architect
- **Bates Park Master Plan, Seeley, CA** – Project Manager

Kirk Ammerman, P.E.

QC/QA; Constructability

Kirk has 34 years of civil engineering, managerial, and supervisory experience. He has knowledge and experience over a broad range of civil engineering topics, including project management; contract management and administration; civil engineering processes; budget processes; and pertinent local, State, and Federal rules, regulations, and laws. His expertise involves design and construction of public works projects, construction management/resident engineer, and administration. Kirk has performed design, numerous constructability reviews, value analyses, and quality reviews on a variety of construction projects, including parks, roadway widening projects, green streets, and channel revegetation projects.

Professional Credentials

- Bachelor of Science, Civil Engineering, San Diego State University
- Professional Engineer in California #C46482

Relevant Experience

- **City of National City, Kimball Park and A Avenue Green Street, National City, CA** – QC/QA Reviewer

- **City of National City, Community Corridors, National City, CA** – Project Engineer
- **City of Chula Vista, South Bay Bus Rapid Transit, Chula Vista, CA** – Project Manager/Project Engineer

Corey Cameron, PLA, CLARB

Landscape Architecture

Corey has five years of experience practicing landscape architecture with extensive work in various fields of construction and design. He has experience providing solutions to both private and public-sector work, with more notably emphasis on school campus design. His graphic abilities to illustrate the vision and his understanding of the constructability provides practical designs and brings the vision to reality. His fascination with the built environment and a respect for the natural systems we inhabit drives Corey to search for ways to design and develop spaces that focus on the users experience and draws attention to a symbiotic relationship between human and nature. He also strives to improve and learn innovative approaches to design and development, gaining excitement from a new challenge, and ambitiously searching for the right solution.

Professional Credentials

- Bachelor of Arts, Landscape Architecture, California State Polytechnic University, Pomona
- Associate of Arts, General Education, Mira Costa College
- Professional Landscape Architect in California #6625

Relevant Experience

- **City of El Centro, Plank Park, El Centro, CA** – Landscape Analyst
- **City of Chula Vista, Millennia Park, Chula Vista, CA** – Landscape Analyst
- **Affirmed Housing Group, Zephyr Affordable Housing, San Diego, CA** – Landscape Analyst
- **City of El Monte, Ramona Boulevard at Valley Boulevard Intersection Improvement Project, El Monte, CA** – Landscape Analyst
- **City of Monterey, North Fremont Street Bike and Pedestrian Access, and Safety Improvements, Monterey, CA** – Landscape Analyst
- **Ocean View School District, College View Elementary School STEM Campus Improvements, Huntington Beach, CA** – Landscape Architect
- **Ocean View School District, Westmont Elementary School Modernization, Westminster, CA** – Landscape Architect
- **Beaumont Unified School District, Beaumont High School Modernization, Beaumont, CA** – Landscape Analyst
- **Town of Bethany Beach, Central Park Master Plan, Bethany Beach, DE** – Landscape Analyst/Irrigation Designer

Megan Ulery, P.E., LEED AP

Civil Engineering

Megan has over 16 years of land development and capital improvement project experience. She routinely provides project management and civil engineering services for both municipalities and private developers. Megan is well-versed in park design, mass grading, rough grading, precise grading, street improvements, bikeway design, ADA compliance, sewer and water design, storm drain system design, hydrology, and hydraulics.

Professional Credentials

- Bachelor of Science, Civil and Environmental Engineering, University of Iowa
- Professional Engineer in California #73385
- LEED Accredited Professional

Relevant Experience

- **City of San Diego, Torrey Highlands Neighborhood Park and Dog Park Improvements, San Diego, CA** – Project Engineer

Rich Lucera, P.E., QSD/P, CFM

Drainage/Stormwater

Rich is a recognized industry leader with 29 years of experience in the fields of stormwater design and water quality analysis, his work includes hydrology/hydraulics, BMP siting and construction, drainage improvements, stormwater permit compliance, feasibility studies, plan checking, and third-party review for cities, counties, schools, Caltrans, private developers, and the U.S. Navy. He was an active participant in the creation of the recently published County of San Diego Low Impact Development Handbook and he also served as a member of the San Diego County Technical Advisory Committee, contributing to the creation of the local hydromodification management plan.

Professional Credentials

- Master of Science, Environmental Engineering, Pennsylvania State University
- Bachelor of Science, Civil Engineering, University of Delaware
- Professional Engineer in California #C58089
- Qualified SWPPP Developer/Practitioner
- Certified Floodplain Manager #06-02109
- California Stormwater Quality Association (CASQA) BMP Sub Committee

Relevant Experience

- **City of San Clemente, East Avenida Cordoba Drainage Improvements, San Clemente, CA** – Project Manager
- **County of Orange, State Route 57 Northbound Widening Final PS&E, Orange County, CA** – Discipline Lead for Stormwater Design

- **Jamul Indian Village, SR 94 Improvements - NEPA, EIR, PA/ED, and PS&E, Jamul, CA** – Project Engineer

Camden Cabrinha, PLS

Survey

CABRINHA, HEARN & ASSOCIATES surveying & mapping

Camden began his surveying career in 1981, from chainman to operating a survey company, Camden has worked in every survey position, and has been chief of parties/project manager since 1993. He has experience in field and office surveying work. His field and office experience includes plane table, control (GPS and conventional), construction layout, topographic, ALTA, boundary, right-of-way, and map processing projects. He has had extensive training and considerable experience in deformation surveys and computer aided mapping and electronic gathering and transferring of GIS survey data.

Professional Credentials

- Surveying, Pasadena City College
- Surveying, Rancho Santiago College
- Professional Licensed Surveyor in California #6755

Professional Affiliations

- CSLA State Representative LA County
- ACEC California - Professional Surveyors Committee Member

Simon Saiid, P.E., G.E.

Geotechnical Engineering

Leighton Consulting, Inc.
SOLUTIONS YOU CAN BUILD ON

Simon has over 30 years of geotechnical engineering and materials testing experience involving public work projects, including street rehabilitation, public buildings, pipelines, and water facilities in Riverside County. He is experienced in geotechnical site investigations, foundation design, buttress and structural landslide mitigation, seismic hazard evaluations and mitigation design, grading control, ground improvement, pipelines, pavement, and forensic evaluations. Further, Simon contributes to the success of construction projects by interacting with the project team during the planning and design phase, and providing cost-effective solutions for unexpected/ challenging geologic conditions during construction.

Professional Credentials

- Master of Science, Civil Engineering, Rensselaer Polytechnic Institute, Troy, NY

Similar Projects Designed by the Team

Knowledge of the Project/Unique Features Specific to Dog Parks

Kimley-Horn has a history of success with projects similar to the City of Moreno Valley Bark Park project. By selecting Kimley-Horn, the City and its stakeholders will benefit from our team's extensive knowledge of dog parks and the skills of our national professionals. We understand that designing a dog park requires a unique understanding of the needs of those who will use the park. Small dogs and large dogs should be separated, adequate shade and seating needs to be provided, and plenty of open space should be available for dogs to exercise. Great care needs to be taken in deciding what plants can be maintained in the area to keep animals safe. Unlike other parks, water features in dog parks are not just for looks. They serve a very important function to provide important play time for the dogs while also keeping them cool. Our team is well-equipped to analyze and design the City's dog park while addressing your community's specific needs and desires. The projects on the following pages demonstrate the wide range of project experience we have in dog parks.

Torrey Highlands Neighborhood Park and Dog Park

San Diego, CA

The Torrey Highlands Neighborhood Park and Dog Park renovations project includes demolition and construction to provide 50 new parking spaces along Torrey Highlands Park Road, provide accessibility upgrades for sidewalk, walkways and parking onsite, and provide accessible upgrades and a shade structure within the dog park. Plans and design include demolition plans, improvement plans, horizontal and vertical control plans, ADA enlargements, construction details, a BMP Map and a Storm Water Quality Management Plan (SWQMP) for the City of San Diego. Kimley-Horn provided civil and drainage/stormwater engineering for this project. This project is currently in the bid phase and ready for construction.

Unique Characteristics/Innovative Approaches

- Expanded parking for users
- Creative grading solutions to ensure ADA accessibility

Ivan's Spot Dog Park
Tucson, AZ

Prior to joining Kimley-Horn, key members of our project team designed this one-acre dog park inside the City's Purple Heart Park. The park is a tribute to Ivan, a two-year-old Belgian Malinois K-9 killed in the line of duty with the Tucson Police Department. The site consists of separate fenced-in areas encompassing concrete walking paths and dog-friendly drinking fountains. The design includes boulders for sitting and climbing along with environmentally-friendly and cost-efficient solar lighting and drought-tolerant landscaping.

Unique Characteristics/Innovative Approaches

- Separate small and large dog areas
- Low water use plant materials
- Custom gateways
- Shaded seating nodes

julie.parizek@pima.gov

Awesome!

"We're currently on a cross country road trip and this has to be the best dog park so far. There are two separate fenced in areas for small dogs (under 30lbs) and large dogs.

There are benches, picnic tables, multiple trash cans with scoops/ brooms, loads of tennis balls, rope toys, pretty much everything you could want in a dog park."

-Arlo, bringfido.com

Kindred Rooftop Dog Park
San Diego, CA

Kimley-Horn is partnering with BRIDGE Housing on the Kindred project in downtown San Diego, which combines affordable and senior living. The residential project will be divided into two separate structures above level 4. Family housing is located in the North structure and senior housing in the South structure. Areas involving landscape architectural consideration include: Level 1 for ROW planting and sidewalk design per the City of San Diego's design guidelines, large outdoor spaces on the Level 4 podium including play areas with equipment, dedicated dog walks, and dedicated garden spaces catering to families and seniors, and Level 6 that includes a senior amenity deck. Grills and outdoor cooking areas will be provided in these developments per discussions with the design team.

Unique Characteristics/Innovative Approaches

- Maximization of available space
- Unique rooftop application
- Low water use plant materials

Desert Vista Park
Fountain Hills, AZ

Desert Vista Park is situated on an elevated plane surrounded by the picturesque views of the McDowell Mountains. The 12-acre park also offers views of the much-renowned fountain of Fountain Hills, AZ. Prior to joining Kimley-Horn, key members of our project team provided master planning, design, and construction documents for improvements to Desert Vista Park. Improvements to the park included a dog park, sports fields and site lighting, a concession/ restroom building, multi-use pathways, parking, and overall upgrades for pedestrian circulation and accessibility throughout the site, complying with standards of the Americans with Disabilities Act (ADA). The dog park area provided two cells, one for larger, active dogs and a second for smaller, passive dogs. Dog park amenities include over three acres of turf, three large shade ramadas with picnic tables and benches, drinking fountains with pet fountains, irrigation, and lighting for safe night use. The project team provided experience in landscape architecture, civil engineering, traffic engineering, electrical engineering, and surveying, as well as construction administration and observation services during the construction phase, which included 12 acres of improvements.

Unique Characteristics/Innovative Approaches

- Connectivity with the adjacent neighborhood park amenities
- Large dog areas that provide rotation opportunities to maintain natural turfgrass health
- Landscape screening between large and small dog areas to minimize potential conflicts
- Double-gate access control
- Dog waste bag dispenser

Roscoe Dog Park
Goodyear, AZ

Roscoe Dog Park is situated in Goodyear, AZ and provides 6.5 acres of area for both passive and active dog areas with shade ramadas with picnic tables and benches and lighting for safe night use. The park utilizes a perimeter band of decomposed granite with concrete header to provide a walking path with large open turf areas for off-leash opportunities for the dogs. Prior to joining Kimley-Horn, key members of our project team provided master planning, design, and construction documents for improvements to Roscoe Dog Park. The project team provided experience in landscape architecture, civil engineering, electrical engineering, and surveying.

Unique Characteristics/Innovative Approaches

- Large dog areas that provide rotation opportunities to maintain natural turfgrass health
- Double-gate access control
- Water Fountains for dogs and people

D. Required Statements

a. This Request for Proposal (RFP) shall be incorporated in its entirety as a part of Kimley-Horn's Proposal.

b. This RFP and Kimley-Horn's Proposal will jointly become part of the Agreement for Professional Consultant Services for this project when said Agreement is fully executed by Kimley-Horn and the Mayor or City Manager of Moreno Valley.

c. Kimley-Horn's services to be provided, and fees therefore, will be in accordance with the City's RFP except as otherwise specified in Kimley-Horn's Proposal under the heading "ADDITIONS OR EXCEPTIONS TO THE CITY'S REQUEST FOR PROPOSAL.

d. The contract terms as stated in the Sample Agreement are acceptable. Kimley-Horn does not have any exceptions. Kimley-Horn also has the ability to furnish the required insurance.

e. Kimley-Horn's statement of qualifications is provided in Section B of our proposal.

f. Kimley-Horn's Cost Proposal is provided in Section C. All charges for Kimley-Horn's services is a "Not-to-Exceed Fee" which include a conservatively estimated reimbursable expenses, as submitted with and made a part of Kimley-Horn's Proposal.

g. Kimley-Horn will document and provide the results of the work to the satisfaction of the City. This may include preparation of final reports, or similar evidence of attainment of the Agreement objectives.

h. Kimley-Horn will immediately document and notify the City of any defects or hazardous conditions observed in the vicinity of the project site prior, during, or after the construction work.

i. Kimley-Horn acknowledges that all extra work will require prior approval from the City.

j. Kimley-Horn will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.

k. All federal laws and regulations shall be adhered to notwithstanding any state or local laws and regulations. In a case of conflict between federal, state or local laws or regulations the strictest shall be adhered to.

l. Kimley-Horn shall allow all authorized federal, state, county, and City officials access to place of work, books, documents, papers, fiscal, payroll, materials, and other relevant contract records pertinent to this special project. All relevant records shall be retained for at least three years.

m. Kimley-Horn shall comply with the Davis-Bacon Fair Labor Standards Act (40 USC 276-a through a-7), and the implementation regulations issued pursuant thereto (29 CFR Section 1, 5), any amendments thereof and the California Labor Code. Pursuant to the said regulations, entitled "Federal Labor Standards Provisions," Federal Prevailing Wage Decision" and State of California prevailing wage rates, respectively.

n. Kimley-Horn shall comply with the Copeland Anti-Kickback Act (18 USC 874) and the Implementation Regulation (29 CFR 3) issued pursuant thereto, and any amendments thereof.

o. Kimley-Horn offers and agrees to assign to the City all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 USC Sec. 15) or under the Cartwright Act (Chapter 2 [commencing with Section 16700] of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works or the subcontract. This assignment shall be made and become effective at the time the City tenders final payment to Kimley-Horn, without further acknowledgment by the parties.

PROJECT UNDERSTANDING

The City is seeking a design team to complete an overall conceptual plan, design, and construction phase services for an approximately 1.50-acre dog park in the southwest portion of Moreno Valley, directly adjacent to the Moreno Valley Animal Shelter.

The City of Moreno Valley Parks and Community Services Department plans to pursue Statewide Park Development and Community Revitalization Program grant funds to develop this new dog park. The location and popularity of the existing Hound Town Dog Park on the City's north side has driven the need for another dog park on the opposite side of Moreno Valley. The City plans for this dog park to alleviate overuse and augment the amenities offered at Hound Town, and also has the opportunity to become a special oasis that will capture and celebrate the unique bond between dogs and humans, serving multiple community needs.

We understand that the City of Moreno Valley will fund the design with local funding and that the construction phase is contingent upon award of grant funding. The total project costs, including design services, are estimated at $1 million. The City anticipates grant submittal on March 16, 2021 and award announcements this summer.

All design work on the project from concept to construction drawings will be in accordance with the requirements and latest versions of the City of Moreno Valley standards, California Building Code, Standard Specifications for Public Works Construction (Greenbook), Americans with Disabilities Act (ADA) standards, the California Manual on Uniform Traffic Control Devices, and the Riverside County Flood Control and Water Conservation District (RCFC & WCD), as applicable.

Due to the everchanging circumstances surrounding the COVID-19 Virus, situations may arise during the performance of this Agreement that affect availability of resources and staff of Kimley-Horn, the client, other consultants, and public agencies. There could be changes in anticipated delivery times, jurisdictional approvals, and project costs. Kimley-Horn will exercise reasonable efforts to overcome the challenges presented by current circumstances, but Kimley-Horn will not be liable to Client for any delays, expenses, losses, or damages of any kind arising out of the impact of the COVID-19 Virus.

SCOPE OF SERVICES

Kimley-Horn will provide the following services for each independent task:

Task 1: Conceptual Master Plan Development

Task 1.1 Project Kick-off Meeting/Site Visit:
The Kimley-Horn team will attend a project kick-off meeting at the City of Moreno Valley offices with City staff and stakeholders to discuss the project schedule and submittals; establish the team organization and communication procedures; discuss the design intent and project goals; and discuss budget control procedures. The City shall provide direction on key design intent, site constraints, and issues prior to starting the schematic design process. At the end of the kick-off meeting, the Kimley-Horn team and City Staff will walk the park site with all relevant background data to confirm the site conditions and key issues to be addressed during the design process.

Task 1.2 Data Collection:
The Kimley-Horn team will develop an understanding of the physical conditions within the project limits through data collection efforts. The Kimley-Horn team will review the available as-built records for existing sewer, water, and storm drain provided by the City. The detailed background information gathered for the project will be confirmed through the site visit performed by the Kimley-Horn team. Results of the investigations will be integrated into an existing utility CAD base map that will be used by the project team to develop the final design plans.

Task 1.3 Topographical Survey
The Kimley-Horn team will conduct a topographical survey including locating property lines, right-of-way, and above ground utility appurtenances that will be utilized for project base mapping. The Kimley-Horn team will field collect existing survey monuments, curb & gutter, sidewalk, fences, grade breaks and visible utility appurtenances within the limits of work to verify existing utility facilities within the project area. Project topographic base mapping will be produced in AutoCAD format.

Task 1.4 Community Based Planning Session Data Review:
The Kimley-Horn team will review the results of the Community Based Planning Sessions provided by City staff, summarize the results and formulate a one-page written design program which will be the basis of the conceptual master plan.

Task 1.5 Preliminary Master Plan Concept Bubble/ Relationship Diagrams:
The Kimley-Horn team will develop, up to three (3), preliminary master plan concept bubble diagrams which illustrate the horizontal relationships of the programming elements proposed. Comments received and selection of the preferred concept will be consolidated and used to develop the Draft Conceptual Master Plan (Task 1.6).

Task 1.6 Draft Conceptual Master Plan:
The Kimley-Horn team will develop a conceptual design plan based on input from the community-based planning sessions which incorporates the specific program elements identified and requested by staff. The concept plan will illustrate the location of proposed improvements within the park (i.e., amenities, lighting, parking improvements, paths, and shade structures), existing conditions, existing and proposed utilities, stormwater quality options as well as character imagery of the proposed project.

Task 1.7 Conceptual Design Comment Resolution Meeting and Final Conceptual Plan:
The Kimley-Horn team will utilize the consolidated comments received from City Staff on the draft master plan to schedule a meeting in which final comment resolution will be decided. It is assumed that this meeting will coincide with one of the scheduled monthly virtual progress meetings (task 1.9). The design team will respond to one (1) round of consolidated comments from the City and project stakeholders on the conceptual design plan and will prepare revisions accordingly and submit as the Final Conceptual Master Plan (pdf).

Task 1.8 Preliminary Opinion of Probable Construction Costs (OPCC):
The Kimley-Horn team will prepare a preliminary OPCC (pdf) based on the Final Conceptual Master Plan, that will identify the proposed improvements, unit prices, contingencies, and an overall cost for each proposed element in the project.

Task 1.9 City Council Presentation:
The Kimley-Horn team project manager will present the final conceptual master plan to City Council. A PowerPoint presentation will be prepared which outlines the conceptual design process. This task assumes up to one (1) in person, presentation. The design team will make up to one (1) round of additional revisions to the final conceptual design plans based on feedback from the City Council presentation.

Task 1.10 Project Management, Schedule and Quality Assurances and Control:
The Kimley-Horn team project manager will provide coordination between the design team and the City and monitor project progress and the project schedule on a regular basis. The project manager will virtually attend up to three (3) progress meetings with the City and project stakeholders. The project manager will coordinate all monthly project invoicing. The Kimley-Horn team will provide an in-house quality control review.

Task 2: Construction Documents and Reports
Kimley-Horn assumes that the conceptual master plan will provide sufficient information to proceed directly to 60% level construction plans. We will prepare 60%, 90%, and Final (100%) construction documents and reports for City review and comment. All design work will be in accordance with the requirements and latest versions of the City of Moreno Valley standards, California Building Code, Standard Specifications for Public Works Construction (Greenbook), Americans with Disabilities Act (ADA) standards, the California Manual on Uniform Traffic Control Devices, and the Riverside County Flood Control and Water Conservation District (RCFC & WCD), as applicable. It is assumed that the City will provide one set of consolidated client comments and that these comments will not require major design changes. After each submittal, a two-hour virtual review meeting will be held between the City, the project's construction manager, and up to two (2) Kimley-Horn staff to review the consolidated comments and determine final comment resolution. It is assumed that this meeting will coincide with one of the scheduled progress meetings (Task 2.2). All comments and revisions will be addressed as part of the 90% and Final submittal, respectively. The plans will be prepared for a single phase of construction in a format and scale deemed appropriate by Kimley-Horn. If the City desires to phase the project, Kimley-Horn can provide a detailed phasing plan and separate design packages for an additional service fee.

Task 2.1 Construction Documents:
The construction documents will consist of the following discipline sheets:

Cover Sheet (1 Sheet) – Kimley-Horn will prepare a cover sheet that includes: vicinity map, location map, City general notes, project description, legend, abbreviations, and limits of work that summarizes the overall project plan set.

General Notes (2 Sheets) – Kimley-Horn will prepare sheets that include general notes, abbreviations, and site-specific notes as needed.

Existing Conditions/Demolition Plans (1 Sheet) - Kimley-Horn will prepare plan view sheets showing existing facilities to be removed, relocated, and protected in place. The plan view sheets shall reflect existing topography, existing right-of-way, and existing utilities.

Site Plan (1 Sheet) – Kimley-Horn will prepare plan view sheets showing horizontal control and proposed improvements. The plan view sheets will reflect existing topography, existing right-of-way, and existing utilities.

Utility Plans (1 Sheet) – Kimley-Horn will prepare plan view sheets with existing and proposed utility locations illustrating: water, sewer, storm drain, and dry utilities. Existing as-built information is assumed to be provided by the City for the site and adjacent roadway and will be reviewed and coordinated with City staff. Three utility connections are assumed for this project, two for water and one for electrical/lighting. Two water points of connection are assumed: one for irrigation water and one for domestic water. No sewer connections are proposed for this project. If potholing (by others/City) is required, the Kimley-Horn team will provide a pothole exhibit and work with the City on including the results of the potholing effort into the plans and design. The storm drain layout will illustrate storm drain sizing and treatment requirements for this project. The 60% submittal will show findings of existing locations, and proposed utilities will be included during 90% and Final submittal. A bioswale is anticipated for stormwater quality onsite to convey runoff to the existing condition outlet in the southwest corner of the site. We assume there is no offsite stormwater run-on to the project site and any traffic control required for offsite utility connections in the public right-of-way will be provided by the Contractor.

Improvement Plan and Details (2 Sheets) – Kimley-Horn will prepare plan view sheets showing proposed improvements on site including curb, curb and gutter, walkways (DG and PCC), pavement structural section, parking layout, decorative flatwork and ADA enlargement details. We assume the site will utilize the existing driveway and a new driveway will not be required.

Horizontal and Vertical Control Plans (1 Sheet) – Kimley-Horn will prepare plan view sheets illustrating the proposed grading condition with data tables and elevations to control all hardscape features such as curb, walkways, and parking. The 60% plans will illustrate contours and spot elevation information only; the 90% plans will include data tables and additional enlargements, as required, to control ADA facilities on-site.

Site Furnishings Plans and Details (4 Sheets) – Kimley-Horn will prepare site furnishings plans and details based on the input provided by the City and amenities identified on conceptual design plans. The plans and details will provide various colors, finishes, locations and limits for different types of amenities proposed throughout the site such as shade structures, benches, trash receptacles, fences and signage. The details will provide the design intent for color, size and general fabrication parameters. For any signage or site wayfinding elements, it is assumed that the City will provide all images and logos (300 dpi or greater) and all final approved copy (text, quotes, names, etc.) for each proposed sign in digital format.

Landscape Plans and Details (3 Sheets) – Kimley-Horn will prepare landscape plans, work with the City to develop the initial plant palette and comply with California's Water Use Classification of Landscape Species (WUCOLS) information

Irrigation Plans and Details (3 Sheets) – Kimley-Horn will prepare landscape irrigation plans which comply with California's Water Efficient Ordinance and indicate the anticipated point of connection, controller locations, and proposed irrigation mainline routing with anticipated pipe sizing.

Lighting and Electrical Plans and Details (3 Sheets) – Kimley-Horn will prepare electrical and lighting engineering design plans including all equipment and lighting locations, conduit routing locations, lighting and equipment installation details, and calculations.

Task 2.2 Project Management, Schedule and Quality Assurances and Control:
The Kimley-Horn team project manager will provide coordination between the design team and the City and monitor project progress and the project schedule on a regular basis. The project manager will virtually attend up to six (6) progress meetings with the City and project stakeholders. The project manager will coordinate all monthly project invoicing. The Kimley-Horn team will provide an in-house quality control review.

Task 2.3 Specifications, Reports and Estimates

Task 2.3.1 Special Provisions
Kimley-Horn will prepare technical specifications to accompany the construction plans. The technical specifications will be prepared utilizing City standards and the 2018 APWA standard specifications ("Green Book") for onsite construction. Specifications will be submitted at 90% and Final submittals. It is assumed that the City will provide the volume one specifications.

Task 2.3.2 Opinion of Probable Construction Costs
Kimley-Horn will prepare the Engineer's Opinion of Probable Construction Cost (OPCC), based on the latest design quantity takeoffs and current unit prices. The OPCC will provide a bid item description, bid unit, bid quantity, unit price, and total price for each bid item. The item description will correspond with the Bid Schedule item description to be used when advertising the project for construction bids.

Task 2.3.3 Drainage Technical Memorandum
The Kimley-Horn team will prepare a drainage technical memorandum for the final park design. The drainage memorandum will be done using AES HydroWin (Riverside County Module) for the 1 hour, 3 hour, 6 hour, and 24 hour durations.

The increase in peak flow as a result of development is assumed to be nominal and acceptable to the approving agency (City of Moreno Valley). Based on the surrounding developments, it is assumed that there is no storm drain infrastructure in the adjacent roadway and the goal of the site will be to utilize the existing condition sheet flow for runoff to Business Center Drive. No detention basin design or other mitigation features are assumed warranted, and therefore not included. Offset hydrology and/or offsite hydraulic analysis is considered unwarranted and not included. No floodplain mapping or similar analysis is included or considered warranted. A preliminary drainage technical memorandum will be included with the 60% design submittal for review and comment by the City. A final drainage technical memorandum will be submitted addressing one round of consolidated City review comments with the final submittal.

Task 2.3.4 Water Quality Management Plan (WQMP)
The Kimley-Horn team will prepare a WQMP using the City's standard template. The Team will work with City Staff during the conceptual site plan phase to understand how the site configuration impacts locations for stormwater treatment (project will not be a PDP). The amount of impervious area proposed on site will dictate the type of stormwater treatment required for the project. The Kimley-Horn team assumes that the project will be kept below the 10,000 sq-ft threshold for new development projects, which would eliminate the need for post-construction structural BMPs. Reducing the impervious area proposed on site will be a goal throughout the design process as it is linked to project cost and long-term maintenance parameters.

Task 2.3.5 Geotechnical Investigation
The Kimley-Horn team will provide geotechnical investigation services that will consist of a subsurface field investigation and recommendations for retaining wall and shade structure footings, flatwork and roadway pavement sections, and infiltration testing and results. Additionally, background information including readily available geotechnical reports, geologic maps, groundwater data, and aerial photographs will be researched. The Kimley-Horn team will develop a geotechnical evaluation report by compiling the analysis of the data obtained and discussing the findings, conclusions, and recommendations. As part of this task it is assumed that one (1) shallow exploratory boring will be completed as well as one (1) infiltration test will be conducted. Web Soil Survey suggests hydrologic soil type C which typically does provide high infiltration opportunities for storm water.

Task 3: Construction Phase Services
The Kimley-Horn team will prepare final bid document plans, specifications, bid form, and OPCC for use by the City in project bidding. Kimley-Horn will incorporate consolidated comments from final submittal into the package before submitting to the City. Bid documents will be prepared from the final signed plans, specifications, bid form, OPCC, and other technical documents reviewed and approved. The Kimley-Horn Team assumes a construction period of no more than six (6) months.

Task 3.1 Bid Phase Services
Kimley-Horn will provide bid phase support services as requested by the City of Moreno Valley project manager. Bid phase service may include: pre-bid meeting attendance, answering RFIs, preparing addenda, and preparing conform documents. A total of twenty-four (24) hours is assumed for this task. Any additional effort will be considered additional services.

Task 3.2 Construction Phase Services
Kimley-Horn will provide Construction Phase Services as requested by the City's project manager. Up to eighty (80) hours are assumed for the following:

a. Preparing supplementary sketches required to resolve design-related items within the above outlined Scope of Services due to field conditions.
b. Attendance at up to four (4) construction meeting at the site within this Scope of Services.
c. Review of design-related submittal packages within the above outlined Scope of Services.
d. Attendance at one (1) preliminary punch walk list meeting.
e. Attendance at one (1) final punch walk list meeting.

Additional site visits not outlined in the scope of services and directed by the City or Contractor will be considered an additional service.

Task 3.3 Record Documents
Kimley-Horn will revise the approved final design plans for the project based upon field changes and revisions as provided in the plan redlines/markups by the contractor's field superintendent and approved by the City. These plans will be provided to the City's project manager in Adobe PDF format.

Task 4: Optional Tasks and Services

Optional Task 4.1: 3D Character Sketches for Grant Proposal - The Kimley-Horn team shall prepare two (2) three-dimensional digital character sketches (still/ static images) based on the Final Conceptual Plan (Task 1.7) which will realistically convey what the proposed dog park will look like when constructed. The images will be intended to further convey the design elements proposed and complement the Concept Plan included in the Grant Proposal. The design team assumes one (1) round of revisions to character sketches based on consolidated comments from the City and project stakeholders.

Optional Task 4.2: Additional Construction Phase Services – In addition to Task 3 above, Kimley-Horn will assist the City of Moreno Valley's Resident Engineer with logging and coordinating submittals/ RFI's, reviewing invoices, reviewing change orders, and construction oversight. Prepare for, attend, and summarize issues and decisions for the following meetings: a pre-construction meeting, up to 16 virtual weekly construction meetings, and up to 4 site meetings (as needed). The Kimley-Horn Team assumes a construction period of no more than six (6) months.

Kimley»Horn

ASSUMPTIONS/EXCLUSIONS

Any services not specifically provided for in our scope of services as well as any changes in scope made at the City's request, will be considered additional services and will be performed at our then current hourly rates. This will require approval in writing before any work will continue. Additional services Kimley-Horn can provide include, but are not limited to, the following:

1. Hours noted for tasks are estimates only. If more time is required for the scope of work, additional budget will be requested
2. This proposal assumes that the standards and practices in effect at the City of Moreno Valley, at the time of this proposal, will remain in effect throughout the course of development.
3. Meetings beyond those identified in this Scope and Fee Proposal
4. Meetings are assumed to be virtual, unless specifically noted above
5. Water Pressure readings and/or pump station design
6. GIS Services
7. Value Engineering or Phased Construction Plans
8. Submittals at 60%,90%,100% and Final shall include 6 bond copies of the plan documents and 2 bond copies of the specifications. All other submittals and deliverables, unless noted above, are assumed to be digital and in Adobe PDF format only.
9. Submittal and/or Permitting Fees
10. Grant Writing, Review and/or Carbon Sequestration Calculations
11. Environmental Services
12. Adjacent Property Owner Coordination
13. City to Provide Drainage Reports for Adjacent Properties/ Developments
14. Construction Staking
15. Inspections and Materials Testing
16. As-built Survey
17. Construction Noise and Vibration, Operational Vibration and Traffic Noise Generation studies
18. Erosion Control Plans and Details
19. Traffic Control Plans and Details
20. Existing Plant Inventory or Landscape Preservation Plans
21. Water Features and/or Fountains
22. Structural Review, Calculations and/or Certification
23. Storm Water Pollution Prevention Plan (SWPPP) and SWPPP inspections
24. Notice of Intent (NOI) and Notice of Termination (NOT) to the Regional Water Board
25. Warranty and/or Maintenance Administration
26. A soils consultant and soil analysis will be coordinated/ prepared by the contractor upon the completion of mass grading. The existing soil nutrient information will be compared against the proposed plant palette to determine the appropriate amendment recommendations
27. Any continuous simulation modeling and/or the design of structural BMPs, if needed, would be considered additional services

FEE

TASK	DESCRIPTION	TOTAL
1.0	**Conceptual Master Plan Development**	**$26,320**
1.1	Project Kick-off Meeting/ Site Visit	$2,060
1.2	Data Collection	$1,460
1.3	Topographical Survey	$10,140
1.4	Community Based Planning Sessions Data Review	$560
1.5	Prelim Master Plan Bubble Diagrams	$1,800
1.6	Draft Conceptual Master Plan	$3,820
1.7	Conceptual Design Comment Resolution Meeting and Final Conceptual Plan	$2,790
1.8	Preliminary Opinion of Probable Construction Costs (OPCC)	$1,120
1.9	City Council Presentation	$780
1.10	Project Management, Schedule and Quality Assurances and Control	$1,290

4.1	3D Character Sketches for Grant Proposal	$6,600
4.2	Additional Construction Phase Services	$27,420

PROJECT SPECIFIC AGREEMENT FOR ON-CALL PROFESSIONAL CONSULTANT SERVICES FOR MORENO VALLEY BARK PARK PROJECT NO. 807 0054

This Agreement is made and entered into as of the date signed by the City of Moreno Valley, by and between the City of Moreno Valley, California, a municipal corporation, hereinafter described as "City," and Kimley-Horn and Associates, Inc., a California corporation, hereinafter described as "Consultant."

RECITALS

WHEREAS, the City has pre-qualified Consultant for On-call Consultant work in an Agreement ("On-Call Agreement") executed on March 25, 2020 for Landscape and Irrigation Design Services hereinafter described as "Project;" and

WHEREAS, the City wishes to engage the services of Consultant for the Project set forth in Exhibit "A".

THEREFORE, the City and the Consultant, for the consideration hereinafter described, mutually agree as follows:

1. The previously executed On-Call Agreement and subsequent Amendments between City and Consultant are incorporated herein by reference and made a part of this Agreement as if set forth in full and available for review in the City Engineer's office. Notwithstanding any expiration or termination of the On-Call Agreement or Amendment, all terms and provisions of the aforementioned On-Call Agreement and Amendments incorporated herein shall survive the expiration or termination of such Agreement or Amendment for the duration of this Project Specific Agreement. In the event of a conflict between this Agreement and the On-Call Agreement, the most current amendment shall prevail.

2. The City's Request for Proposal is for Landscape Architecture Design Services and is described in detail in Exhibit "A" attached hereto and incorporated herein by this reference.

3. The Consultant's scope of service is described in detail in Exhibit "B" attached hereto and incorporated herein by this reference.

4. The City agrees to pay the Consultant and the Consultant agrees to receive a "Not-to-Exceed" fee of **$171,560.00** in accordance with the payment terms provided in Exhibit "C", attached hereto and incorporated herein by this reference.

5. The Consultant shall commence services upon receipt of written direction to proceed from the City.

6. This agreement will terminate on **June 30, 2025** unless the termination date is extended by an amendment to the agreement.

7. Consultant shall provide updated insurance documentation, certificates or endorsements unless specifically waived by the City Attorney.

REQUEST FOR PROPOSAL
FOR LANDSCAPE ARCHITECTURE DESIGN SERVICES
FOR MORENO VALLEY BARK PARK PROJECT
FOR THE CITY OF MORENO VALLEY
PARKS AND COMMUNITY SERVICES DEPARTMENT

I. INVITATION

You are hereby invited to submit a Proposal for Landscape Architecture Design Services for Moreno Valley Bark Park Project, to be located at the open lot immediately west of the Moreno Valley Animal Shelter, located at 14041 Elsworth Street.

The work will be in accordance with the On-Call Agreement for Professional Consultant Services including subsequent Amendments to the Agreement.

This Request for Proposals (RFP) is limited to the City's On-Call consultants in the Landscape Architecture Design Services category, and proposals will only be accepted from those invited to propose. Interested consultants may download copies of the RFP by visiting the City's web site, www.moval.org, selecting "City Bids and RFP's" under the "City Hall" Resources link at the home page and selecting the "Online Bidding System" link. **To download proposal packages and submit proposals, vendors will be required to pay an online usage download fee of $10.00.** All documents associated with this RFP will be downloadable after the fee has been paid. Once the prospective Offeror downloads any documents relative to a solicitation, that Offeror's name will appear on the Prospective Bidders List.

Online Q&A will be accepted until 2:00pm on Thursday, October 22, 2020.

Proposals will be accepted until 4:00pm on Wednesday, 28, 2020.

Proposals shall be submitted electronically (in PDF format via the City's vendor portal website, located at http://www.planetbids.com/portal/portal.cfm?CompanyID=24660.

Proposals shall include, but not be limited to, the following items:

1. Proposer should describe in detail their approach and understanding of all necessary tasks and steps involved in the project;
2. Related experience including relevant experience date, name of agency, and Reference name/contact information;
3. Cost proposal; and
4. Completed forms as required.

The proposer is solely responsible for "on time" submission of their electronic proposals. The City will only consider proposals that have been transmitted successfully and have been issued an ebid confirmation number with a time stamp from the Bid Management System indicating that bid was submitted successfully. Transmission of proposals by any other means will not be accepted. Proposer shall be solely responsible for informing itself with respect to the proper utilization of the proposal management system, for ensuring the capability of their computer system to upload the required documents, and for the stability of their internet service. Proposers are advised to allow sufficient time to submit electronically. Failure of the proposer to successfully submit an electronic proposal shall be at the proposer's sole risk and no relief will be given for late and/or improperly submitted proposals. Proposers experiencing any technical difficulties with the proposal submission process may contact PlanetBids at (818) 992-1771. Questions of an operational nature may be directed to the City's Parks and Community Services Department at (951) 413-

3163. Neither the City, nor PlanetBids, makes any guarantee as to the timely availability of assistance, or assurance that any given problem will be resolved by the proposal submission deadline.

All questions regarding this RFP must be submitted through the vendor portal noted above and must be submitted no later than the date and time listed above.

II. PROJECT DESCRIPTION

The project includes but is not limited to the preparation of color renderings and conceptual drawings, plans, specifications and estimates, utility research, and all necessary permitting and coordination with City as required for preparation of public bidding documents to construct a bark park on the open lot west of the Moreno Valley Animal Shelter located at 14041 Elsworth Street.

The bark park project will be submitted to the California Department of Parks and Recreation for consideration in Round Four of the Statewide Park Development and Community Revitalization Program grant funds. Project application deadline is December 14, 2020.

All work shall be in accordance with the requirements of the City of Moreno Valley standards, California Building Code, Standard Specifications for Public Works Construction (Greenbook), Americans with Disabilities Act (ADA) standards, the California Manual on Uniform Traffic Control Devices (latest version), and the Riverside County Flood Control and Water Conservation District (RCFC & WCD) (latest version), as applicable.

III. PROJECT BUDGET AND SCHEDULE

The City of Moreno Valley will fund the design with local funding only. The construction phase is contingent upon award of grant funding, and may include State and Federal funding sources. Total project costs, including architectural design services, are estimated at $1 million.

The California State Department of Parks and Recreation anticipates grant award announcements in summer of 2021. If funded, the City anticipates construction in fall/winter of 2021 with completion in spring of 2022.

IV. GENERAL TASKS

Typical Landscape Architecture Design Services shall include, but not be limited to:

1. Complete and thorough Bark Park design, including all necessary disciplines, and including revisions resulting from plan review and plan check processes, until approved plans are achieved.
2. Attend and present the project to City Council as required.
3. Prepare construction documents and related project specifications and bidding documents.
4. Assist with bidding process including attend pre-bid meeting, answer RFIs, prepare addenda, review bid results.
5. Oversee and ensure that all measures of the specific project's scope of services are completed in a timely and professional manner with an emphasis on providing the City with a high quality project, including submittal review, shop drawing review, and construction observations.
6. In order to receive maximum points in the project application selection process, the design

must provide efficient use of water and other natural resources as described in the Round Four Final Application Guide (Selection Criterion #7 – Environmental Design, pages 27-29).

7. The design shall incorporate input from residents on amenities, location of amenities within the park, and ideas for safe public use and beautification (Selection Criterion #4 – Community Based Planning). Community-based planning sessions are tentatively scheduled for 5:30 pm on October 27, 9:00 am on October 31, 5:30 pm on November 5, and 9:00 am on November 7. A virtual meeting is tentatively scheduled for noon on November 10.

8. Prepare a conceptual drawing for submittal with the project application by December 14, 2020.

9. Assist with preparing design-related project application responses as needed.

10. Assist with development of final project budget for grant application submittals.

VIII. CONSULTANT'S PROPOSAL AND COMPENSATION

At a minimum, the Proposal shall include the following sections:

A. Project Understanding: This section should clearly convey clear understanding of the nature of the work, identification of major project issues, and proposed solutions thereof, from both the Consultant and sub-consultants.

B. Qualifications and Experience: Provide qualifications and experience of the team for this project. Emphasize the specific qualifications and experience from projects similar to this project for the key team members including references. Identify and provide in-depth information for the proposed project manager's qualifications, track record and relevant experience.

C. Additional Relevant Information: Provide additional relevant information that may be helpful in the selection process (not to exceed two pages).

The Consultant's Proposal shall include the following statements:

a. A statement that this Request for Proposal (RFP) shall be incorporated in its entirety as a part of the Consultant's Proposal.

b. A statement that this RFP and the Consultant's Proposal will jointly become part of the Agreement for Professional Consultant Services for this project when said Agreement is fully executed by the Consultant and the Mayor or City Manager of Moreno Valley.

c. A statement that the Consultant's Services to be provided, and fees therefore, will be in accordance with the City's RFP except as otherwise specified in the Consultant's Proposal under the heading "ADDITIONS OR EXCEPTIONS TO THE CITY'S REQUEST FOR PROPOSAL."

d. A single and separate section with the heading "ADDITIONS OR EXCEPTIONS TO THE CITY'S REQUEST FOR PROPOSAL" containing a complete and detailed description of all of the exceptions to the provisions and conditions of this Request for Proposal upon which the Consultant's Proposal is contingent and which shall take precedent over this

RFP for Professional Consultant Services. **EXCEPTIONS TO THE INDEMNIFICATION/ LIABILITIES/ TERMINATION FOR CONVENIENCE OF THE CITY CLAUSES OF "THE CITY'S STANDARD CONTRACT AGREEMENT" SHALL NOT BE ACCEPTABLE. AN EXCEPTION TO THIS CLAUSE SHALL DISQUALIFY THE CONSULTANT PROPOSAL FROM FURTHER CONSIDERATION.**
A Sample Agreement is attached for your reference. Exceptions/ Changes to the Agreement are not acceptable.

e. A statement of qualifications applicable to this project including the names, qualifications and proposed duties of the Consultant's Staff to be assigned to this project; a listing of recent similar projects completed including the names, titles, addresses and telephone numbers of the appropriate persons whom the City could contact. If one or more of the Consultant's staff should become unavailable, the Consultant may substitute other staff of at least equal competence only after prior written approval by the City.

f. A detailed Cost Proposal, including a statement that all charges for Consultant services is a "Not-to-Exceed Fee" which must include conservatively estimated reimbursable expenses, as submitted with and made a part of said Consultant's Proposal.

g. A statement that the Consultant will document and provide the results of the work to the satisfaction of the City. This may include preparation of final reports, or similar evidence of attainment of the Agreement objectives.

h. A statement that the Consultant will immediately document and notify the City of any defects or hazardous conditions observed in the vicinity of the project site prior, during, or after the construction work.

i. All extra work will require prior approval from the City.

j. A statement that the Consultant will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.

k. A statement that all federal laws and regulations shall be adhered to notwithstanding any state or local laws and regulations. In a case of conflict between federal, state or local laws or regulations the strictest shall be adhered to.

l. A statement that the Consultant shall allow all authorized federal, state, county, and City officials access to place of work, books, documents, papers, fiscal, payroll, materials, and other relevant contract records pertinent to this special project. All relevant records shall be retained for at least three years.

m. A statement that the Consultant shall comply with the Davis-Bacon Fair Labor Standards Act (40 USC 276-a through a-7), and the implementation regulations issued pursuant thereto (29 CFR Section 1, 5), any amendments thereof and the California Labor Code. Pursuant to the said regulations, entitled "Federal Labor Standards Provisions," Federal Prevailing Wage Decision" and State of California prevailing wage rates, respectively.

n. A statement that the Consultant shall comply with the Copeland Anti-Kickback Act (18 USC 874) and the Implementation Regulation (29 CFR 3) issued pursuant thereto, and any amendments thereof.

o. A statement that the Consultant offers and agrees to assign to the City all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 USC Sec. 15) or under the Cartwright Act (Chapter 2 [commencing with Section 16700] of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works or the subcontract. This assignment shall be made and become effective at the time the City tenders final payment to the Consultant, without further acknowledgment by the parties.

IX. GENERAL COMPLIANCE WITH LAWS AND WAGE RATES

a. The Consultant shall be required to comply with all federal, state, and local laws and ordinances applicable to the work. This includes compliance with prevailing wage rates and their payment in accordance with California Labor Code, Section 1775.

X. FEDERAL EMPLOYEE BENEFIT

No member of, or delegate to, the Congress of the United States, and no Resident Commissioner shall be admitted to any share or part of the Agreement to the said project or to any benefit to arise from the same.

XI. PAYMENT TO CONSULTANT

a. This work is to be performed for a "Not-to-Exceed Fee."

b. The Consultant shall provide a Cost Proposal indicating the fee for individual tasks with a "Not-to-Exceed Fee" which shall be the sum of all tasks by part, phase, and milestone.

c. Tasks shall include, but not be limited to, all Professional Consultant Services necessary to complete the work covered by this Proposal.

d. Reimbursement costs such as mileage, printing, telephone, photographs, postage and delivery, are to be included in the "Not-to-Exceed Fee."

e. All tasks including labor and reimbursable costs such as printing, postage, and delivery shall have supporting documentation presented at the time payment is requested.

f. The City will pay the Consultant for all acceptable services rendered in accordance with the "Agreement for Professional Consultant Services."

g. When the Consultant is performing, or is requested to perform, work beyond the scope of service in the "Agreement for Professional Consultant Services," an "Amendment to the Agreement" will be executed between the City and Consultant.

h. The Consultant shall receive no compensation for any re-work necessary as result of the Consultant's errors or oversight.

XII. INSURANCE

a. The Contractor will comply with the following insurance requirements at its sole expense. Insurance companies shall be rated (A Minus: VII—Admitted) or better in Best's Insurance Rating Guide and shall be legally licensed and qualified to conduct business in the State of California:

The Contractor shall procure and maintain, at its sole expense, Workers' Compensation Insurance in such amounts as will fully comply with the laws of the State

of California and which shall indemnify, insure and provide legal defense for the Contractor and the City, the Housing Authority and CSD against any loss, claim, or damage arising from any injuries or occupational diseases happening to any worker employed by the Contractor in the course of carrying out the Agreement. This coverage may be waived if the Contractor is determined to be functioning as a sole proprietor and the city provided form "Exception to Worker's Compensation Coverage" is signed, notarized and attached to this Agreement

☑ General Liability Insurance—to protect against loss from liability imposed by law for damages on account of bodily injury, including death, and/or property damage suffered or alleged to be suffered by any person or persons whomever, resulting directly or indirectly from any act or activities of the Contractor, sub-Contractor, or any person acting for the Contractor or under its control or direction. Such insurance shall be maintained in full force and effect throughout the terms of the Agreement and any extension thereof in the minimum amounts provided below:

Bodily Injury	$1,000,000 per occurrence/ $2,000,000 aggregate
Property Damage	$500,000 per occurrence/ $500,000 aggregate

☑ Professional Errors and Omission Insurance—such coverage shall not be less than $1,000,000 per claim and aggregate.

☑ Liability and Property Damage Insurance coverage for owned and non-owned automotive equipment operated on City/CSD/Housing Authority premises. Such coverage limits shall not be less than $1,000,000 combined single limit.

☐ A Certificate of Insurance and appropriate additional insured endorsement evidencing the above applicable insurance coverage shall be submitted to the City prior to the execution of this Agreement. The Certificate of Insurance or an appropriate binder shall bear an endorsement containing the following provisions:

Solely as respect to services done by or on behalf of the named insured for the City of Moreno Valley, it is agreed that the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, their officers, employees and agents are included as additional insured under this policy and the coverage(s) provided shall be primary insurance and not contributing with any other insurance available to the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, its officers, employees and agents, under any third party liability policy

The terms of the insurance policy or policies issued to provide the above coverage shall neither be amended to reduce the required insurance limits and coverages nor shall such policies be canceled by the carrier without thirty (30) days prior written notice by certified or registered mail of amendment or cancellation to the City, except that cancellation for non-payment of premium shall require ten (10) days prior written notice by certified or registered mail. In the event the insurance is canceled, the Contractor shall, prior to the cancellation date, submit new evidence of insurance in the amounts established.

b. It is the consultant's responsibility to ensure that all subconsultants comply with the following: Each subconsultant that encroaches within the City's right-of-way **and** affects (i.e., damages or impacts) City infrastructure must comply with the liability insurance requirements of the Parks and Community Services Department. Examples of such

subconsultant work include soil sample borings, utility potholing, etc.

The "Application for Encroachment Permit" form (five pages) and the "Application for Encroachment Permit Liability Insurance Requirements," is available from the City's Project Manager and must be completed and submitted in full to the City Project Manager. It is the Consultant's responsibility to ensure that all subconsultants submit the appropriate encroachment permit and insurance documentation at the same time that the Consultant's insurance documentation is submitted.

XIII. INDEMNIFICATION – shall be in accordance with the Agreement.

XIV. TERMINATION FOR CONVENIENCE OF THE CITY

The City reserves the right to terminate the "Agreement for Professional Consultant Services" for the "convenience of the City" at any time by giving ten (10) days written notice to the Consultant of such termination and specifying the effective date thereof. All finished or unfinished drawings, maps, documents, field notes and other materials produced and procured by the Consultant under the said aforementioned Agreement is, at the option of the City, City property and shall be delivered to the City by the Consultant within ten (10) working days from the date of such termination. The City will reimburse the Consultant for all acceptable work performed as set forth in the executed Agreement.

XV. INDEPENDENT CONTRACTOR

The Consultant's relationship to the City in the performance of the Consultant's services for this project is that of an independent Contractor. The personnel performing said Surveying Services shall at all times be under the Consultant's exclusive direction and control and shall be employees of the Consultant and not employees of the City. The Consultant shall pay all wages, salaries and other amounts due his employees in connection with the performance of said work shall be responsible for all employee reports and obligations, including but not necessarily restricted to, social security, income tax withholding, unemployment compensation, and Workers' Compensation.

XVI. CONTRACT

The Contract includes the Agreement for Professional Consultant Services, City's Request for Proposal, Consultant's Proposal, and Exhibits.

The Political Reform Act and the City's Conflict of Interest Code require that consultants be considered as potential filers of Statements of Economic Interest. Consultants, as defined by Section 18701, may be required to file an Economic Interest Statement (Form 700) within 30 days of signing a Consultant Agreement with the City, on an annual basis thereafter if the contract is still in place, and within 30 days of completion of the contract.

XVII. GENERAL CONDITIONS

a. Pre-contractual expenses are defined as expenses incurred by the Consultant in: (1) preparing the Proposal; (2) submitting the Proposal to the City; (3) presentation during selection interview; (4) negotiating with the City any matter related to this Proposal; (5) any other expenses incurred by the Consultant prior to an executed Agreement.

The City shall not, in any event, be liable for any pre-contractual expenses incurred by the Consultant.

b. The Contractor is responsible for notifying Underground Service Alert and providing proper

traffic control, at no additional expense to the City.

c. The City reserves the right to withdraw this RFP at any time without prior notice. Further, the City makes no representations that any Agreement will be awarded to any Consultant responding to this RFP. The City expressly reserves the right to postpone reviewing the Proposal for its own convenience and to reject any and all Proposals responding to this RFP without indicating any reasons for such rejection(s).

d. The City reserves the right to reject any or all Proposals submitted. Any Contract awarded for these Consultant engagements will be made to the Consultant who, in the opinion of the City, is best qualified.

EXHIBIT “B”

Kimley»Horn

PROJECT UNDERSTANDING

The City is seeking a design team to complete an overall conceptual plan, design, and construction phase services for an approximately 1.50-acre dog park in the southwest portion of Moreno Valley, directly adjacent to the Moreno Valley Animal Shelter.

The City of Moreno Valley Parks and Community Services Department plans to pursue Statewide Park Development and Community Revitalization Program grant funds to develop this new dog park. The location and popularity of the existing Hound Town Dog Park on the City's north side has driven the need for another dog park on the opposite side of Moreno Valley. The City plans for this dog park to alleviate overuse and augment the amenities offered at Hound Town, and also has the opportunity to become a special oasis that will capture and celebrate the unique bond between dogs and humans, serving multiple community needs.

We understand that the City of Moreno Valley will fund the design with local funding and that the construction phase is contingent upon award of grant funding. The total project costs, including design services, are estimated at $1 million. The City anticipates grant submittal on March 16, 2021 and award announcements this summer.

All design work on the project from concept to construction drawings will be in accordance with the requirements and latest versions of the City of Moreno Valley standards, California Building Code, Standard Specifications for Public Works Construction (Greenbook), Americans with Disabilities Act (ADA) standards, the California Manual on Uniform Traffic Control Devices, and the Riverside County Flood Control and Water Conservation District (RCFC & WCD), as applicable.

Due to the everchanging circumstances surrounding the COVID-19 Virus, situations may arise during the performance of this Agreement that affect availability of resources and staff of Kimley-Horn, the client, other consultants, and public agencies. There could be changes in anticipated delivery times, jurisdictional approvals, and project costs. Kimley-Horn will exercise reasonable efforts to overcome the challenges presented by current circumstances, but Kimley-Horn will not be liable to Client for any delays, expenses, losses, or damages of any kind arising out of the impact of the COVID-19 Virus.

SCOPE OF SERVICES

Kimley-Horn will provide the following services for each independent task:

Task 1: Conceptual Master Plan Development

Task 1.1 Project Kick-off Meeting/Site Visit:
The Kimley-Horn team will attend a project kick-off meeting at the City of Moreno Valley offices with City staff and stakeholders to discuss the project schedule and submittals; establish the team organization and communication procedures; discuss the design intent and project goals; and discuss budget control procedures. The City shall provide direction on key design intent, site constraints, and issues prior to starting the schematic design process. At the end of the kick-off meeting, the Kimley-Horn team and City Staff will walk the park site with all relevant background data to confirm the site conditions and key issues to be addressed during the design process.

Task 1.2 Data Collection:
The Kimley-Horn team will develop an understanding of the physical conditions within the project limits through data collection efforts. The Kimley-Horn team will review the available as-built records for existing sewer, water, and storm drain provided by the City. The detailed background information gathered for the project will be confirmed through the site visit performed by the Kimley-Horn team. Results of the investigations will be integrated into an existing utility CAD base map that will be used by the project team to develop the final design plans.

Task 1.3 Topographical Survey
The Kimley-Horn team will conduct a topographical survey including locating property lines, right-of-way, and above ground utility appurtenances that will be utilized for project base mapping. The Kimley-Horn team will field collect existing survey monuments, curb & gutter, sidewalk, fences, grade breaks and visible utility appurtenances within the limits of work to verify existing utility facilities within the project area. Project topographic base mapping will be produced in AutoCAD format.

Task 1.4 Community Based Planning Session Data Review:
The Kimley-Horn team will review the results of the Community Based Planning Sessions provided by City staff, summarize the results and formulate a one-page written design program which will be the basis of the conceptual master plan.

Task 1.5 Preliminary Master Plan Concept Bubble/ Relationship Diagrams:
The Kimley-Horn team will develop, up to three (3), preliminary master plan concept bubble diagrams which illustrate the horizontal relationships of the programming elements proposed. Comments received and selection of the preferred concept will be consolidated and used to develop the Draft Conceptual Master Plan (Task 1.6).

Task 1.6 Draft Conceptual Master Plan:
The Kimley-Horn team will develop a conceptual design plan based on input from the community-based planning sessions which incorporates the specific program elements identified and requested by staff. The concept plan will illustrate the location of proposed improvements within the park (i.e., amenities, lighting, parking improvements, paths, and shade structures), existing conditions, existing and proposed utilities, stormwater quality options as well as character imagery of the proposed project.

Task 1.7 Conceptual Design Comment Resolution Meeting and Final Conceptual Plan:
The Kimley-Horn team will utilize the consolidated comments received from City Staff on the draft master plan to schedule a meeting in which final comment resolution will be decided. It is assumed that this meeting will coincide with one of the scheduled monthly virtual progress meetings (task 1.9). The design team will respond to one (1) round of consolidated comments from the City and project stakeholders on the conceptual design plan and will prepare revisions accordingly and submit as the Final Conceptual Master Plan (pdf).

Task 1.8 Preliminary Opinion of Probable Construction Costs (OPCC):
The Kimley-Horn team will prepare a preliminary OPCC (pdf) based on the Final Conceptual Master Plan, that will identify the proposed improvements, unit prices, contingencies, and an overall cost for each proposed element in the project.

Task 1.9 City Council Presentation:
The Kimley-Horn team project manager will present the final conceptual master plan to City Council. A PowerPoint presentation will be prepared which outlines the conceptual design process. This task assumes up to one (1) in person, presentation. The design team will make up to one (1) round of additional revisions to the final conceptual design plans based on feedback from the City Council presentation.

Task 1.10 Project Management, Schedule and Quality Assurances and Control:
The Kimley-Horn team project manager will provide coordination between the design team and the City and monitor project progress and the project schedule on a regular basis. The project manager will virtually attend up to three (3) progress meetings with the City and project stakeholders. The project manager will coordinate all monthly project invoicing. The Kimley-Horn team will provide an in-house quality control review.

Task 2: Construction Documents and Reports
Kimley-Horn assumes that the conceptual master plan will provide sufficient information to proceed directly to 60% level construction plans. We will prepare 60%, 90%, and Final (100%) construction documents and reports for City review and comment. All design work will be in accordance with the requirements and latest versions of the City of Moreno Valley standards, California Building Code, Standard Specifications for Public Works Construction (Greenbook), Americans with Disabilities Act (ADA) standards, the California Manual on Uniform Traffic Control Devices, and the Riverside County Flood Control and Water Conservation District (RCFC & WCD), as applicable. It is assumed that the City will provide one set of consolidated client comments and that these comments will not require major design changes. After each submittal, a two-hour virtual review meeting will be held between the City, the project's construction manager, and up to two (2) Kimley-Horn staff to review the consolidated comments and determine final comment resolution. It is assumed that this meeting will coincide with one of the scheduled progress meetings (Task 2.2). All comments and revisions will be addressed as part of the 90% and Final submittal, respectively. The plans will be prepared for a single phase of construction in a format and scale deemed appropriate by Kimley-Horn. If the City desires to phase the project, Kimley-Horn can provide a detailed phasing plan and separate design packages for an additional service fee.

Task 2.1 Construction Documents:
The construction documents will consist of the following discipline sheets:

Cover Sheet (1 Sheet) – Kimley-Horn will prepare a cover sheet that includes: vicinity map, location map, City general notes, project description, legend, abbreviations, and limits of work that summarizes the overall project plan set.

General Notes (2 Sheets) – Kimley-Horn will prepare sheets that include general notes, abbreviations, and site-specific notes as needed.

Existing Conditions/Demolition Plans (1 Sheet) - Kimley-Horn will prepare plan view sheets showing existing facilities to be removed, relocated, and protected in place. The plan view sheets shall reflect existing topography, existing right-of-way, and existing utilities.

Site Plan (1 Sheet) – Kimley-Horn will prepare plan view sheets showing horizontal control and proposed improvements. The plan view sheets will reflect existing topography, existing right-of-way, and existing utilities.

Utility Plans (1 Sheet) – Kimley-Horn will prepare plan view sheets with existing and proposed utility locations illustrating: water, sewer, storm drain, and dry utilities. Existing as-built information is assumed to be provided by the City for the site and adjacent roadway and will be reviewed and coordinated with City staff. Three utility connections are assumed for this project, two for water and one for electrical/lighting. Two water points of connection are assumed: one for irrigation water and one for domestic water. No sewer connections are proposed for this project. If potholing (by others/City) is required, the Kimley-Horn team will provide a pothole exhibit and work with the City on including the results of the potholing effort into the plans and design. The storm drain layout will illustrate storm drain sizing and treatment requirements for this project. The 60% submittal will show findings of existing locations, and proposed utilities will be included during 90% and Final submittal. A bioswale is anticipated for stormwater quality onsite to convey runoff to the existing condition outlet in the southwest corner of the site. We assume there is no offsite stormwater run-on to the project site and any traffic control required for offsite utility connections in the public right-of-way will be provided by the Contractor.

Improvement Plan and Details (2 Sheets) – Kimley-Horn will prepare plan view sheets showing proposed improvements on site including curb, curb and gutter, walkways (DG and PCC), pavement structural section, parking layout, decorative flatwork and ADA enlargement details. We assume the site will utilize the existing driveway and a new driveway will not be required.

Horizontal and Vertical Control Plans (1 Sheet) – Kimley-Horn will prepare plan view sheets illustrating the proposed grading condition with data tables and elevations to control all hardscape features such as curb, walkways, and parking. The 60% plans will illustrate contours and spot elevation information only; the 90% plans will include data tables and additional enlargements, as required, to control ADA facilities on-site.

Site Furnishings Plans and Details (4 Sheets) – Kimley-Horn will prepare site furnishings plans and details based on the input provided by the City and amenities identified on conceptual design plans. The plans and details will provide various colors, finishes, locations and limits for different types of amenities proposed throughout the site such as shade structures, benches, trash receptacles, fences and signage. The details will provide the design intent for color, size and general fabrication parameters. For any signage or site wayfinding elements, it is assumed that the City will provide all images and logos (300 dpi or greater) and all final approved copy (text, quotes, names, etc.) for each proposed sign in digital format.

Landscape Plans and Details (3 Sheets) – Kimley-Horn will prepare landscape plans, work with the City to develop the initial plant palette and comply with California's Water Use Classification of Landscape Species (WUCOLS) information

Irrigation Plans and Details (3 Sheets) – Kimley-Horn will prepare landscape irrigation plans which comply with California's Water Efficient Ordinance and indicate the anticipated point of connection, controller locations, and proposed irrigation mainline routing with anticipated pipe sizing.

Lighting and Electrical Plans and Details (3 Sheets) – Kimley-Horn will prepare electrical and lighting engineering design plans including all equipment and lighting locations, conduit routing locations, lighting and equipment installation details, and calculations.

Task 2.2 Project Management, Schedule and Quality Assurances and Control:
The Kimley-Horn team project manager will provide coordination between the design team and the City and monitor project progress and the project schedule on a regular basis. The project manager will virtually attend up to six (6) progress meetings with the City and project stakeholders. The project manager will coordinate all monthly project invoicing. The Kimley-Horn team will provide an in-house quality control review.

Task 2.3 Specifications, Reports and Estimates

Task 2.3.1 Special Provisions
Kimley-Horn will prepare technical specifications to accompany the construction plans. The technical specifications will be prepared utilizing City standards and the 2018 APWA standard specifications ("Green Book") for onsite construction. Specifications will be submitted at 90% and Final submittals. It is assumed that the City will provide the volume one specifications.

Task 2.3.2 Opinion of Probable Construction Costs
Kimley-Horn will prepare the Engineer's Opinion of Probable Construction Cost (OPCC), based on the latest design quantity takeoffs and current unit prices. The OPCC will provide a bid item description, bid unit, bid quantity, unit price, and total price for each bid item. The item description will correspond with the Bid Schedule item description to be used when advertising the project for construction bids.

Task 2.3.3 Drainage Technical Memorandum
The Kimley-Horn team will prepare a drainage technical memorandum for the final park design. The drainage memorandum will be done using AES HydroWin (Riverside County Module) for the 1 hour, 3 hour, 6 hour, and 24 hour durations.

The increase in peak flow as a result of development is assumed to be nominal and acceptable to the approving agency (City of Moreno Valley). Based on the surrounding developments, it is assumed that there is no storm drain infrastructure in the adjacent roadway and the goal of the site will be to utilize the existing condition sheet flow for runoff to Business Center Drive. No detention basin design or other mitigation features are assumed warranted, and therefore not included. Offset hydrology and/or offsite hydraulic analysis is considered unwarranted and not included. No floodplain mapping or similar analysis is included or considered warranted. A preliminary drainage technical memorandum will be included with the 60% design submittal for review and comment by the City. A final drainage technical memorandum will be submitted addressing one round of consolidated City review comments with the final submittal.

Task 2.3.4 Water Quality Management Plan (WQMP)
The Kimley-Horn team will prepare a WQMP using the City's standard template. The Team will work with City Staff during the conceptual site plan phase to understand how the site configuration impacts locations for stormwater treatment (project will not be a PDP). The amount of impervious area proposed on site will dictate the type of stormwater treatment required for the project. The Kimley-Horn team assumes that the project will be kept below the 10,000 sq-ft threshold for new development projects, which would eliminate the need for post-construction structural BMPs. Reducing the impervious area proposed on site will be a goal throughout the design process as it is linked to project cost and long-term maintenance parameters.

Task 2.3.5 Geotechnical Investigation
The Kimley-Horn team will provide geotechnical investigation services that will consist of a subsurface field investigation and recommendations for retaining wall and shade structure footings, flatwork and roadway pavement sections, and infiltration testing and results. Additionally, background information including readily available geotechnical reports, geologic maps, groundwater data, and aerial photographs will be researched. The Kimley-Horn team will develop a geotechnical evaluation report by compiling the analysis of the data obtained and discussing the findings, conclusions, and recommendations. As part of this task it is assumed that one (1) shallow exploratory boring will be completed as well as one (1) infiltration test will be conducted. Web Soil Survey suggests hydrologic soil type C which typically does provide high infiltration opportunities for storm water.

Task 3: Construction Phase Services
The Kimley-Horn team will prepare final bid document plans, specifications, bid form, and OPCC for use by the City in project bidding. Kimley-Horn will incorporate consolidated comments from final submittal into the package before submitting to the City. Bid documents will be prepared from the final signed plans, specifications, bid form, OPCC, and other technical documents reviewed and approved. The Kimley-Horn Team assumes a construction period of no more than six (6) months.

Task 3.1 Bid Phase Services
Kimley-Horn will provide bid phase support services as requested by the City of Moreno Valley project manager. Bid phase service may include: pre-bid meeting attendance, answering RFIs, preparing addenda, and preparing conform documents. A total of twenty-four (24) hours is assumed for this task. Any additional effort will be considered additional services.

Task 3.2 Construction Phase Services
Kimley-Horn will provide Construction Phase Services as requested by the City's project manager. Up to eighty (80) hours are assumed for the following:

a. Preparing supplementary sketches required to resolve design-related items within the above outlined Scope of Services due to field conditions.
b. Attendance at up to four (4) construction meeting at the site within this Scope of Services.
c. Review of design-related submittal packages within the above outlined Scope of Services.
d. Attendance at one (1) preliminary punch walk list meeting.
e. Attendance at one (1) final punch walk list meeting.

Additional site visits not outlined in the scope of services and directed by the City or Contractor will be considered an additional service.

Task 3.3 Record Documents
Kimley-Horn will revise the approved final design plans for the project based upon field changes and revisions as provided in the plan redlines/markups by the contractor's field superintendent and approved by the City. These plans will be provided to the City's project manager in Adobe PDF format.

Task 4: Optional Tasks and Services

Optional Task 4.1: 3D Character Sketches for Grant Proposal - The Kimley-Horn team shall prepare two (2) three-dimensional digital character sketches (still/ static images) based on the Final Conceptual Plan (Task 1.7) which will realistically convey what the proposed dog park will look like when constructed. The images will be intended to further convey the design elements proposed and complement the Concept Plan included in the Grant Proposal. The design team assumes one (1) round of revisions to character sketches based on consolidated comments from the City and project stakeholders.

Optional Task 4.2: Additional Construction Phase Services – In addition to Task 3 above, Kimley-Horn will assist the City of Moreno Valley's Resident Engineer with logging and coordinating submittals/ RFI's, reviewing invoices, reviewing change orders, and construction oversight. Prepare for, attend, and summarize issues and decisions for the following meetings: a pre-construction meeting, up to 16 virtual weekly construction meetings, and up to 4 site meetings (as needed). The Kimley-Horn Team assumes a construction period of no more than six (6) months.

ASSUMPTIONS/EXCLUSIONS

Any services not specifically provided for in our scope of services as well as any changes in scope made at the City's request, will be considered additional services and will be performed at our then current hourly rates. This will require approval in writing before any work will continue. Additional services Kimley-Horn can provide include, but are not limited to, the following:

1. Hours noted for tasks are estimates only. If more time is required for the scope of work, additional budget will be requested
2. This proposal assumes that the standards and practices in effect at the City of Moreno Valley, at the time of this proposal, will remain in effect throughout the course of development.
3. Meetings beyond those identified in this Scope and Fee Proposal
4. Meetings are assumed to be virtual, unless specifically noted above
5. Water Pressure readings and/or pump station design
6. GIS Services
7. Value Engineering or Phased Construction Plans
8. Submittals at 60%,90%,100% and Final shall include 6 bond copies of the plan documents and 2 bond copies of the specifications. All other submittals and deliverables, unless noted above, are assumed to be digital and in Adobe PDF format only.
9. Submittal and/or Permitting Fees
10. Grant Writing, Review and/or Carbon Sequestration Calculations
11. Environmental Services
12. Adjacent Property Owner Coordination
13. City to Provide Drainage Reports for Adjacent Properties/ Developments
14. Construction Staking
15. Inspections and Materials Testing
16. As-built Survey
17. Construction Noise and Vibration, Operational Vibration and Traffic Noise Generation studies
18. Erosion Control Plans and Details
19. Traffic Control Plans and Details
20. Existing Plant Inventory or Landscape Preservation Plans
21. Water Features and/or Fountains
22. Structural Review, Calculations and/or Certification
23. Storm Water Pollution Prevention Plan (SWPPP) and SWPPP inspections
24. Notice of Intent (NOI) and Notice of Termination (NOT) to the Regional Water Board
25. Warranty and/or Maintenance Administration
26. A soils consultant and soil analysis will be coordinated/ prepared by the contractor upon the completion of mass grading. The existing soil nutrient information will be compared against the proposed plant palette to determine the appropriate amendment recommendations
27. Any continuous simulation modeling and/or the design of structural BMPs, if needed, would be considered additional services

FEE

TASK	DESCRIPTION	TOTAL
1.0	**Conceptual Master Plan Development**	**$26,320**
1.1	Project Kick-off Meeting/ Site Visit	$2,060
1.2	Data Collection	$1,460
1.3	Topographical Survey	$10,140
1.4	Community Based Planning Sessions Data Review	$560
1.5	Prelim Master Plan Bubble Diagrams	$1,800
1.6	Draft Conceptual Master Plan	$3,820
1.7	Conceptual Design Comment Resolution Meeting and Final Conceptual Plan	$2,790
1.8	Preliminary Opinion of Probable Construction Costs (OPCC)	$1,120
1.9	City Council Presentation	$780
1.10	Project Management, Schedule and Quality Assurances and Control	$1,290
	Task 1.0: Expenses	*$500*
2.0	**Construction Documents and Reports**	**$79,650**
2.1	Construction Documents	
	60%	*$20,250*
	90%	*$16,820*
	100% / Final	*$10,820*
2.2	Project Management, Schedule and Quality Assurances/Control	$2,580
2.3	Specifications, Reports and Estimates	
2.3.1	*Special Provisions*	$5,900
2.3.2	*Opinion of Probable Costs*	$3,730
2.3.3	*Drainage Technical Memorandum*	$6,750
2.3.4	*Stormwater Memorandum*	$5,940
2.3.5	*Geotechnical Investigation*	$6,860
3.0	**Construction Phase Services**	**$22,070**
3.1	Bid Phase Services	$4,070
3.2	Construction Phase Services	$13,820
3.3	Record Documents	$4,180
	Task 2.0-3.0: Expenses	*$9,500*

EXHIBIT "C"

TERMS OF PAYMENT

1. The Contractor's compensation shall not exceed $171,560.00. Construction support services will be provided contingent upon award of grant funding.

2. The Contractor will obtain, and keep current during the term of this Agreement, the required City of Moreno Valley business license. Proof of a current City of Moreno Valley business license will be required prior to any payments by the City. Any invoice not paid because the proof of a current City of Moreno Valley business license has not been provided will not incur any fees, late charges, or other penalties. Complete instructions for obtaining a City of Moreno Valley business license are located at: http://www.moval.org/do_biz/biz-license.shtml

3. The Contractor will electronically submit an invoice to the City on a monthly basis for progress payments along with documentation evidencing services completed to date. The progress payment is based on actual time and materials expended in furnishing authorized professional services since the last invoice. At no time will the City pay for more services than have been satisfactorily completed and the City's determination of the amount due for any progress payment shall be final. The Contractor will submit all original invoices to Accounts Payable staff at AccountsPayable@moval.org

   Accounts Payable questions can be directed to (951) 413-3073.

   Copies of invoices may be submitted to the Parks & Community Services Department at

   leew@moval.org or calls directed to (951) 413-3726.

3. The Contractor agrees that City payments will be received via Automated Clearing House (ACH) Direct Deposit and that the required ACH Authorization form will be completed prior to any payments by the City. Any invoice not paid because the completed ACH Authorization Form has not been provided will not incur any fees, late charges, or other penalties. The ACH Authorization Form is located at: http://www.moval.org/city_hall/forms.shtml#bf

4. The minimum information required on all invoices is:

   A. Vendor Name, Mailing Address, and Phone Number
   B. Invoice Date
   C. Vendor Invoice Number
   D. City-provided Reference Number (e.g. Project, Activity)
   E. Detailed work hours by class title (e.g. Manager, Technician, or Specialist), services performed and rates, explicit portion of a contract amount, or detailed billing information that is sufficient to justify the invoice amount; single, lump amounts without detail are not acceptable.

6. The City shall pay the Contractor for all invoiced, authorized professional services within thirty (30) days of receipt of the invoice for same.

7. Reimbursement for Expenses. Contractor shall not be reimbursed for any expenses unless authorized in writing by City.

8. Maintenance and Inspection. Contractor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Contractor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Contractor shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

Report to City Council

TO:	Mayor and City Council
FROM:	Marshall Eyerman, Assistant City Manager
AGENDA DATE:	February 2, 2021
TITLE:	PUBLIC HEARING FOR FOUR NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM MAIL BALLOT PROCEEDINGS

RECOMMENDED ACTION

Recommendations: That the City Council:

1. Conduct the Public Hearing and accept public testimony for the mail ballot proceedings for the National Pollutant Discharge Elimination System (NPDES) Residential Regulatory Rate or Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate to be applied to the property tax bill of the parcels identified herein for PEDROHYPJVC, LLC, located on the north side of Kalmia Ave., west of Lasselle St., Robles Bros Inv, located at 28200 War Admiral St., ROC III CA Belago, located on the south side of John F. Kennedy Dr., east of Moreno Beach Dr., and Ulman Harry & Gisela Living Trust Dated 11/22/82, located on the northeast corner of Resource Way and Corporate Way;

2. Direct the City Clerk to open and count the returned NPDES ballots;

3. Verify and accept the results of the mail ballot proceedings as maintained by the City Clerk on the Official Tally Sheet and if approved, set the rate and impose the NPDES Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate or the Residential Regulatory Rate, as applicable, on the Assessor's Parcel Numbers as mentioned;

4. Receive and file the Official Tally Sheet with the City Clerk's office.

SUMMARY

The action before the City Council is to conduct a Public Hearing for four NPDES mail ballot proceedings. The process to accept seven parcels into the City's NPDES funding program impacts only the property owners identified below, not the general citizens or taxpayers of the City.

The City requires property owners of development projects to mitigate the cost of certain impacts created by the proposed development (e.g., the increase in costs of complying with state and federal NPDES requirements). The City offers the NPDES funding program to assist property owners in satisfying the requirement. After a property owner approves the City's NPDES rate through a mail ballot proceeding, the City can levy the rate on the annual property tax bill of the authorized parcel(s).

As a condition of approval for development of their projects, the Property Owners, as identified below, are required to provide a funding source for the NPDES program and have requested the City conduct a mail ballot proceeding to satisfy the condition of approval. If each property owner approves the mail ballot and the City Council accepts the results, the condition of approval will be satisfied for their respective projects. Tonight's Public Hearing is a required part of the process.

DISCUSSION

The Clean Water Act of 1987 established requirements for the discharge of Urban Runoff from Municipal Separate Storm Sewer Systems under the NPDES program. The Santa Ana Regional Water Quality Control Board administers the NPDES program through the issuance of a Permit. The NPDES program requires public agencies to obtain coverage under the Permit to discharge urban stormwater runoff from municipally owned drainage facilities, including streets, highways, storm drains, and flood control channels. The City's current NPDES Permit requires all new development projects to comply with stormwater management requirements.

The City Council originally adopted the NPDES Residential Regulatory Rate on June 10, 2003 and the NPDES Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate ("Commercial/Industrial Rate") on January 10, 2006. Each fiscal year, the City Council reviews and sets the rates for the following fiscal year.

The Planning Commission approves projects on the condition the developer provides a funding source, consistent with the rates established by the City Council, to support activities for the NPDES program requirements. Revenue received from the rate supports the increased compliance activities related to the development. It also reduces the financial impact to the General Fund to maintain compliance with the unfunded requirements of the Permit.

As a condition of approval for the projects identified below, the Property Owners are required to provide a funding source to mitigate the increase in costs to the NPDES program, which will be created by their development project. The table below provides information for the parcels under development.

Property Owner/ Project	Assessor's Parcel Number	Location	FY 2020/21 Maximum Rate[1]
PEDROHYPJVC, LLC 83 single-family residential development PEN19-0217/SBP20-0019	474-110-004 & 474-110-014	North side of Kalmia Ave., west of Lasselle St.	$346.38/parcel Residential Rate
Robles Bros Inv Custom Home PEN18-0222/SBP20-0018	478-272-003	28200 War Admiral St.	$346.38/parcel Residential Rate
ROC III CA Belago 417-unit multi-family housing PEN16-0130/SBP20-0023	304-100-007	South side of John F. Kennedy Dr., east of Moreno Beach Dr.	$260.84/parcel Commercial/Industrial Rate
Ulman Harry & Gisela Living Trust Dated 11/22/82 47,400 sq. ft. industrial building PEN19-0201/SBP20-0024	297-220-006, 297-220-007, & 297-220-008	Northeast corner of Resource Way and Corporate Way	$260.84/parcel Commercial/Industrial Rate

[1] The parcel's development status will be evaluated, and the applied rate calculated in accordance with the rate schedule, prior to levying the NPDES rate on the property tax roll each year. The applied rate is the amount applied to the property tax bill. It cannot exceed the maximum rate.

A property owner has two options to satisfy the condition of approval:

1. Approve the NPDES rate and authorize the City to collect the rate on the annual Riverside County property tax bill through participation in a successful mail ballot proceeding; or

2. Fund an endowment.

The Property Owners elected to have the NPDES rate applied to the annual property tax bill of the property under development. Proposition 218 outlines the process to approve new charges, or an increase to existing charges, on property tax bills, which includes conducting a mail ballot proceeding, noticing requirements, timing of noticing, and providing an opportunity for the property owner to address the City Council (i.e., public comment portion of the Public Hearing). A notice describing the purpose and amount of the charge, including the potential annual inflationary adjustment, and a ballot for the property was mailed to each Property Owner at least 45-days in advance of tonight's meeting (see Attachments 1-4). The ballot is due to the City Clerk prior to the close of the Public Hearing. The ballot can be opened and counted, and results announced, at the close of the Public Hearing.

The condition of approval to provide a funding source for the NPDES program will be satisfied with a property owner's approval of the NPDES mail ballot (i.e., marked yes and signed) and City Council acceptance of the results. In the event the ballot is not returned, is not approved, or is invalid (e.g., unmarked or unsigned), this condition of approval will remain unsatisfied and may delay development of the project. In the event more than one mail ballot proceeding is being conducted tonight, each ballot will be counted separately to determine if a property owner approved inclusion of their respective property in the NPDES funding program.

This action meets the Strategic Plan Priorities to manage and maximize Moreno Valley's public infrastructure to ensure an excellent quality of life, develop and implement innovative, cost effective infrastructure maintenance programs, public facilities management strategies, and capital improvement programming and project delivery.

ALTERNATIVES

1. Conduct the Public Hearing and upon its close, open, count, and verify the returned ballots and accept the results. *Staff recommends this alternative as it will satisfy each project's condition of approval provided the property owner approves the ballot.*

2. Open the Public Hearing and continue it to a future regularly scheduled City Council meeting. *Staff does not recommend this alternative as it will delay announcement of the ballot results and may delay project development*.

3. Do not conduct the Public Hearing. *Staff does not recommend this alternative as it will delay the condition of approval from being satisfied and may delay project development. The City will incur additional costs to restart the 45-day noticing period.*

4. Do not conduct the Public Hearing at this time but reschedule it to a date specific regularly scheduled City Council meeting. *Staff does not recommend this alternative as it may delay project development and will cause the City to incur additional costs to restart the 45-day noticing period.*

FISCAL IMPACT

Revenue received from the NPDES rate is restricted and can only be used within the stormwater management program. The revenue provides funding to maintain compliance with the unfunded requirements of the Permit. It also offsets stormwater management program expenses, which reduces the financial impact to the General Fund. The NPDES rate is only applied to the property tax bills of parcels where approval of the rate has been authorized through a successful mail ballot proceeding.

The FY 2020/21 maximum Residential Rate is $346.38 per parcel, and any division thereof. The FY 2020/21 maximum Commercial/Industrial Rate is $260.84 per parcel, and any division thereof. The maximum NPDES rates are subject to an annual inflationary adjustment. However, the annual adjustment cannot be applied unless the City Council annually authorizes such adjustment. The increase to the maximum rate cannot exceed the annual inflationary adjustment without approval of the property owners subject to the charge. The NPDES rate applied to the property tax bill will be based on the development status of the property at the time the applied rates are calculated for the upcoming fiscal year.

NOTIFICATION

The ballot documents were mailed to each Property Owner at least 45-days in advance of the Public Hearing. The documents included a notice, NPDES ballot, NPDES Commercial/Industrial or Residential Rate schedule, map of the project area, instructions for marking and returning the ballot, and a postage-paid return envelope addressed to the City Clerk.

The Press-Enterprise published the legal notice for tonight's Public Hearing on January 14 and January 21, 2021.

CITY COUNCIL GOALS

Advocacy. Develop cooperative intergovernmental relationships and be a forceful advocate of City policies, objectives, and goals to appropriate external governments, agencies and corporations.

Revenue Diversification and Preservation. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 5.2: Promote the installation and maintenance of cost effective, low maintenance landscape, hardscape and other improvements which create a clean, inviting community.

NOTICE TO PROPERTY OWNER - MAIL BALLOT PROCEEDING FOR THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) MAXIMUM RESIDENTIAL REGULATORY RATE FOR APN(s) 474-110-004 and 474-110-014

******* OFFICIAL BALLOT ENCLOSED *******

Introduction

In November of 1996, California voters passed Proposition 218 ("The Right to Vote on Taxes Act"). As a result, any new or proposed increase in a property-related charge requires approval by the property owner of record. In compliance with Proposition 218 legislation, the City of Moreno Valley Special Districts Division is conducting a mail ballot proceeding to provide the owner of the APN(s) listed above the opportunity to express support for or opposition to the approval of the NPDES Maximum Residential Regulatory Rate and services. Approval of the NPDES Maximum Residential Regulatory Rate through a mail ballot proceeding fulfills the Land Development Division's Condition of Approval to provide a funding source for the NPDES financial program.

Background

The Clean Water Act of 1987 established requirements for the discharge of Urban Runoff from Municipal Separate Storm Sewer Systems under the NPDES Program. The NPDES Program is administered by the Santa Ana Regional Water Quality Control Board through the issuance of a Permit. The City's current NPDES Permit mandates all new development projects comply with storm water management activities. The NPDES Program requires public agencies to obtain coverage under the Permit to discharge urban storm water runoff from municipally owned drainage facilities, including streets, highways, storm drains, and flood control channels.

Services Provided

In compliance with the Federal Clean Water Act, the City of Moreno Valley shall provide the necessary services for the continuous operation, enhancement, and maintenance of the storm water discharge system, and perform inspections of the affected areas to ensure compliance with federally mandated NPDES Permit requirements.

How is the Amount of the Charge Determined?

Each fiscal year (FY), the City of Moreno Valley determines the type of services necessary to comply with NPDES Permit requirements and levies the rate applicable for that service, not to exceed the rate previously approved by the property owner.

Notice of Mail Ballot Proceeding for PEDROHYPJVC, LLC
December 17, 2020

Proposed Charge

For FY 2020/21, the NPDES Maximum Residential Regulatory Rate is $346.38 per parcel. The total amount of the NPDES rates levied for FY 2020/21 was $572,616.88 for the program as a whole.

Annual Adjustment

Beginning in FY 2021/22, the NPDES Maximum Residential Regulatory Rate will be subject to an annual adjustment based on the percentage change calculated for the previous year in the Los Angeles-Long Beach-Anaheim Consumer Price Index for All Urban Consumers, as published by the Department of Labor's Bureau of Labor Statistics.

Duration of the Charge

Upon approval of the NPDES Maximum select rate Regulatory Rate, the annual levy amount will be assessed to the APN(s) listed above (and any division thereof) and shall be placed on the Riverside County property tax bill or included as a monthly charge on a utility bill. The NPDES Maximum Residential Regulatory Rate will be levied each following year at the proposed rate, which includes an annual inflation adjustment.

Public Hearing

To provide information concerning this mail ballot proceeding, the City has scheduled a Public Hearing, which will be held at the **Moreno Valley City Hall Council Chamber located at 14177 Frederick Street, Moreno Valley.**

Public Hearing
Tuesday, February 2, 2021
6:00 p.m.
(Or As Soon Thereafter As The Matter May Be Called)

Tabulation of the returned ballot will commence after the close of the public testimony portion of the Public Hearing. Any ballot received shall be tabulated under the direction of the City Clerk in compliance with the City's Policy for Conducting Mail Ballot Proceedings Policy #1.12.

Effect if the Charge is Approved

Approval of the NPDES Maximum Residential Regulatory Rate will be confirmed if the ballot is marked in favor (marked Yes) of the NPDES rate. Approving the NPDES Maximum Residential Regulatory Rate through a mail ballot proceeding will fulfill the Land Development Division's Condition of Approval to provide an ongoing funding source for the NPDES financial program.

Effect if the Charge is Not Approved

Not approving the NPDES Maximum Residential Regulatory Rate to meet state and federally mandated NPDES Permit requirements **will not** satisfy the Land Development Division's Condition of Approval to provide a funding source for the NPDES financial program. If the returned ballot is marked "No", the NPDES rate will not be levied on the property tax bill.

Effect if the Ballot is Deemed Invalid or Incomplete

Not marking the corresponding box on the ballot in support of or opposition to the proposed program and annual rate and/or not signing the ballot will result in an invalid ballot. In order to satisfy the Land Development Division's Condition of Approval by placement of the NPDES rate on the annual property tax bill, the mail ballot proceeding and 45-day noticing period will need to start over. Reinitiating the process will require payment of the mail ballot proceeding fee.

For More Information

If you have any questions about the mail ballot proceeding process, please contact Isa Rojas, Management Analyst, with the City's Special Districts Division at 951.413.3470 or via email at IsaRo@moval.org or SDAdmin@moval.org during the City's business hours.

Questions regarding the NPDES financial program, the annual rate, or the Land Development Division's Conditions of Approval should be directed to the Land Development Division at 951.413.3120 or via email at landdevelopment@moval.org during the City's business hours.

The City's business hours are Monday through Thursday from 7:30 a.m. to 5:30 p.m. and Friday from 7:30 a.m. to 4:30 p.m.

Completing Your Ballot

Please follow the instructions below to complete and return your ballot. Procedures for the completion, return, and tabulation of the ballot are also on file in the City Clerk's office.

1. Mark the enclosed ballot in support of or opposition to the proposed program and annual rate **by placing a mark in the corresponding box.** Ballots received without a designated vote will be considered invalid.
2. Sign your name on the ballot. Ballots received without signature(s) will be considered invalid *and will not be counted.*
3. Mail or personally deliver your completed ballot in a sealed envelope to the City Clerk's office, 14177 Frederick Street, Moreno Valley, California, 92553. For your convenience, a postage-paid envelope has been included for return of the ballot.
4. Ballot(s) must be **received** by the City Clerk prior to the close of the public testimony portion of the Public Hearing scheduled for **February 2, 2021,** at the Moreno Valley City Hall Council Chamber. The Public Hearing will be held at 6:00 p.m. or as soon thereafter as the matter may be called. Ballots received after the close of the Public Hearing cannot be legally counted.

Ballot Marks

Appropriate ballot markings include any one of the following for either the YES/Approved or NO/Not Approved blank box:

A check mark substantially inside a box;

An X mark substantially inside a box;

A dot or oval mark substantially inside a box;

A completely shaded or filled mark substantially inside a box;

A line, single or dashed, or combination of lines, through the box area. Lines may be any one of the following marks: horizontal, vertical, or diagonal. The mark may either run from side to side or corner to corner. All valid lines must be substantially within the box area and not marking any part of another blank box on the ballot;

A circle around the box and/or associated clause; or

A square or rectangle around the box and/or associated clause.

Balloting marks shall not extend past one box area into any portion of another nor surround the perimeter or any portion of more than one box area. Markings that extend past one box area into any portion of another or surround the perimeter or any portion of more than one box area shall be considered invalid and not counted.

Ballot Mark Revisions (Changes): An error or desire to revise (change) a selection made on the ballot may be completed and returned any time **prior** to the conclusion of public testimony at the Public Hearing. **The revision must be initialed by the record owner(s) of property. Initials must be clearly printed and placed at the right top corner of the revised selection.**

OFFICIAL MAIL BALLOT
for Assessor's Parcel Number (APN)474-110-004 and 474-110-014
National Pollutant Discharge Elimination System (NPDES)
Residential Regulatory Rate

YES* — as property owner of the APN(s) listed above, **I approve** the NPDES Maximum Residential Regulatory Rate and services. For fiscal year (FY) 2020/21, the NPDES Maximum Residential Regulatory Rate is $346.38 per parcel, a combined total of $692.76 for the APNs. This calculation is based on the current parcel configuration; the actual annual amount annual levied will be determined at the time the levy is calculated. Upon approval of the maximum regulatory rate, the annual levy amount shall be placed on the annual Riverside County property tax bill or included as a monthly charge on a utility bill. Beginning FY 2021/22, the maximum regulatory rate will be subject to an annual adjustment based on the percentage change calculated for the previous year in the Los Angeles-Long Beach-Anaheim Consumer Price Index for All Urban Consumers, as published by the Department of Labor's Bureau of Labor Statistics. The City shall provide the necessary services for the continuous operation, enhancement, and maintenance of the storm water discharge system, and perform inspections of the affected areas to ensure compliance with federally mandated NPDES Permit requirements.

NO** — as property owner of the APNs listed above, **I do not approve** the NPDES Maximum Residential Regulatory Rate and services. I understand that not approving the NPDES Maximum Residential Regulatory Rate to fund state and federally mandated NPDES Permit requirements will not satisfy the project's Conditions of Approval. The NPDES Maximum Residential Regulatory Rate will not be levied on the annual Riverside County property tax bill.

YES*	NO**	Weighted Ballot Count*	Fiscal Year 2020/21 NPDES Maximum Residential Regulatory Rate per Parcel
☐	☐	2	$346.38
Each Assessor's Parcel Number equals 1 Weighted Ballot.			

I HEREBY DECLARE UNDER PENALTY OF PERJURY THAT I AM THE RECORD OWNER OF THE PARCEL(S) IDENTIFIED ON THIS BALLOT OR AM AUTHORIZED TO SUBMIT A BALLOT ON BEHALF OF THE RECORD OWNER.

_____
SIGNATURE OF PROPERTY OWNER

_____
PRINTED NAME DATE

Please remember to mark the appropriate box, sign and date the ballot, and return to the City Clerk's office in the enclosed envelope. This ballot must be received by the City Clerk of the City of Moreno Valley prior to the close of the public testimony portion of the Public Hearing. The Public Hearing will be held at 6:00 p.m., or as soon thereafter as the matter may be called, on February 2, 2021, at the Moreno Valley City Hall Council Chamber, 14177 Frederick Street, Moreno Valley, California.

Ballot(s) deemed invalid or incomplete will be discarded and a new process must be initiated in order to place the charge on the annual Riverside County property tax bill, which includes payment of the mail ballot fee. For administrative convenience, all parcels for your project have been combined on one ballot. If you prefer to have a separate ballot for each APN please call 951.413.3470 to request separate ballots.

NOTICE TO PROPERTY OWNER - MAIL BALLOT PROCEEDING FOR THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) MAXIMUM RESIDENTIAL REGULATORY RATE FOR APN(s) 478-272-003

******* OFFICIAL BALLOT ENCLOSED *******

Introduction

In November of 1996, California voters passed Proposition 218 ("The Right to Vote on Taxes Act"). As a result, any new or proposed increase in a property-related charge requires approval by the property owner of record. In compliance with Proposition 218 legislation, the City of Moreno Valley Special Districts Division is conducting a mail ballot proceeding to provide the owner of the APN(s) listed above the opportunity to express support for or opposition to the approval of the NPDES Maximum Residential Regulatory Rate and services. Approval of the NPDES Maximum Residential Regulatory Rate through a mail ballot proceeding fulfills the Land Development Division's Condition of Approval to provide a funding source for the NPDES financial program.

Background

The Clean Water Act of 1987 established requirements for the discharge of Urban Runoff from Municipal Separate Storm Sewer Systems under the NPDES Program. The NPDES Program is administered by the Santa Ana Regional Water Quality Control Board through the issuance of a Permit. The City's current NPDES Permit mandates all new development projects comply with storm water management activities. The NPDES Program requires public agencies to obtain coverage under the Permit to discharge urban storm water runoff from municipally owned drainage facilities, including streets, highways, storm drains, and flood control channels.

Services Provided

In compliance with the Federal Clean Water Act, the City of Moreno Valley shall provide the necessary services for the continuous operation, enhancement, and maintenance of the storm water discharge system, and perform inspections of the affected areas to ensure compliance with federally mandated NPDES Permit requirements.

How is the Amount of the Charge Determined?

Each fiscal year (FY), the City of Moreno Valley determines the type of services necessary to comply with NPDES Permit requirements and levies the rate applicable for that service, not to exceed the rate previously approved by the property owner.

Proposed Charge

For FY 2020/21, the NPDES Maximum Residential Regulatory Rate is $346.38 per parcel. The total amount of the NPDES rates levied for FY 2020/21 was $572,616.88 for the program as a whole.

Annual Adjustment

Beginning in FY 2021/22, the NPDES Maximum Residential Regulatory Rate will be subject to an annual adjustment based on the percentage change calculated for the previous year in the Los Angeles-Long Beach-Anaheim Consumer Price Index for All Urban Consumers, as published by the Department of Labor's Bureau of Labor Statistics.

Duration of the Charge

Upon approval of the NPDES Maximum select rate Regulatory Rate, the annual levy amount will be assessed to the APN(s) listed above (and any division thereof) and shall be placed on the Riverside County property tax bill or included as a monthly charge on a utility bill. The NPDES Maximum Residential Regulatory Rate will be levied each following year at the proposed rate, which includes an annual inflation adjustment.

Public Hearing

To provide information concerning this mail ballot proceeding, the City has scheduled a Public Hearing, which will be held at the **Moreno Valley City Hall Council Chamber located at 14177 Frederick Street, Moreno Valley.**

Public Hearing
Tuesday, February 2, 2021
6:00 p.m.
(Or As Soon Thereafter As The Matter May Be Called)

Tabulation of the returned ballot will commence after the close of the public testimony portion of the Public Hearing. Any ballot received shall be tabulated under the direction of the City Clerk in compliance with the City's Policy for Conducting Mail Ballot Proceedings Policy #1.12.

Effect if the Charge is Approved

Approval of the NPDES Maximum Residential Regulatory Rate will be confirmed if the ballot is marked in favor (marked Yes) of the NPDES rate. Approving the NPDES Maximum Residential Regulatory Rate through a mail ballot proceeding will fulfill the Land Development Division's Condition of Approval to provide an ongoing funding source for the NPDES financial program.

Effect if the Charge is Not Approved

Not approving the NPDES Maximum Residential Regulatory Rate to meet state and federally mandated NPDES Permit requirements **will not** satisfy the Land Development Division's Condition of Approval to provide a funding source for the NPDES financial program. If the returned ballot is marked "No", the NPDES rate will not be levied on the property tax bill.

Effect if the Ballot is Deemed Invalid or Incomplete

Not marking the corresponding box on the ballot in support of or opposition to the proposed program and annual rate and/or not signing the ballot will result in an invalid ballot. In order to satisfy the Land Development Division's Condition of Approval by placement of the NPDES rate on the annual property tax bill, the mail ballot proceeding and 45-day noticing period will need to start over. Reinitiating the process will require payment of the mail ballot proceeding fee.

For More Information

If you have any questions about the mail ballot proceeding process, please contact Isa Rojas, Management Analyst, with the City's Special Districts Division at 951.413.3470 or via email at IsaRo@moval.org or SDAdmin@moval.org during the City's business hours.

Questions regarding the NPDES financial program, the annual rate, or the Land Development Division's Conditions of Approval should be directed to the Land Development Division at 951.413.3120 or via email at landdevelopment@moval.org during the City's business hours.

The City's business hours are Monday through Thursday from 7:30 a.m. to 5:30 p.m. and Friday from 7:30 a.m. to 4:30 p.m.

Completing Your Ballot

Please follow the instructions below to complete and return your ballot. Procedures for the completion, return, and tabulation of the ballot are also on file in the City Clerk's office.

1. Mark the enclosed ballot in support of or opposition to the proposed program and annual rate **by placing a mark in the corresponding box.** Ballots received without a designated vote will be considered invalid.
2. Sign your name on the ballot. Ballots received without signature(s) will be considered invalid *and will not be counted.*
3. Mail or personally deliver your completed ballot in a sealed envelope to the City Clerk's office, 14177 Frederick Street, Moreno Valley, California, 92553. For your convenience, a postage-paid envelope has been included for return of the ballot.
4. Ballot(s) must be **received** by the City Clerk prior to the close of the public testimony portion of the Public Hearing scheduled for **February 2, 2021,** at the Moreno Valley City Hall Council Chamber. The Public Hearing will be held at 6:00 p.m. or as soon thereafter as the matter may be called. Ballots received after the close of the Public Hearing cannot be legally counted.

Ballot Marks

Appropriate ballot markings include any one of the following for either the YES/Approved or NO/Not Approved blank box:

A check mark substantially inside a box;

An X mark substantially inside a box;

A dot or oval mark substantially inside a box;

A completely shaded or filled mark substantially inside a box;

A line, single or dashed, or combination of lines, through the box area. Lines may be any one of the following marks: horizontal, vertical, or diagonal. The mark may either run from side to side or corner to corner. All valid lines must be substantially within the box area and not marking any part of another blank box on the ballot;

A circle around the box and/or associated clause; or

A square or rectangle around the box and/or associated clause.

Balloting marks shall not extend past one box area into any portion of another nor surround the perimeter or any portion of more than one box area. Markings that extend past one box area into any portion of another or surround the perimeter or any portion of more than one box area shall be considered invalid and not counted.

Ballot Mark Revisions (Changes): An error or desire to revise (change) a selection made on the ballot may be completed and returned any time **prior** to the conclusion of public testimony at the Public Hearing. **The revision must be initialed by the record owner(s) of property. Initials must be clearly printed and placed at the right top corner of the revised selection.**

OFFICIAL MAIL BALLOT
for Assessor's Parcel Number (APN)
478-272-003
National Pollutant Discharge Elimination System (NPDES)
Residential Regulatory Rate

YES* — as property owner of the APN(s) listed above, **I approve** the NPDES Maximum Residential Regulatory Rate and services. For fiscal year (FY) 2020/21, the NPDES Maximum Residential Regulatory Rate is $346.38 per parcel. Upon approval of the maximum regulatory rate, the annual levy amount shall be placed on the annual Riverside County property tax bill or included as a monthly charge on a utility bill. Beginning FY 2021/22, the maximum regulatory rate will be subject to an annual adjustment based on the percentage change calculated for the previous year in the Los Angeles-Long Beach-Anaheim Consumer Price Index for All Urban Consumers, as published by the Department of Labor's Bureau of Labor Statistics. The City shall provide the necessary services for the continuous operation, enhancement, and maintenance of the storm water discharge system, and perform inspections of the affected areas to ensure compliance with federally mandated NPDES Permit requirements.

NO** — as property owner of the APNs listed above, **I do not approve** the NPDES Maximum Residential Regulatory Rate and services. I understand that not approving the NPDES Maximum Residential Regulatory Rate to fund state and federally mandated NPDES Permit requirements will not satisfy the project's Conditions of Approval. The NPDES Maximum Residential Regulatory Rate will not be levied on the annual Riverside County property tax bill.

NOTICE TO PROPERTY OWNER - MAIL BALLOT PROCEEDING FOR THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) MAXIMUM COMMON INTEREST, COMMERCIAL, INDUSTRIAL, AND QUASI-PUBLIC USE REGULATORY RATE FOR APN(s) 304-100-007

******* OFFICIAL BALLOT ENCLOSED *******

Introduction

In November of 1996, California voters passed Proposition 218 ("The Right to Vote on Taxes Act"). As a result, any new or proposed increase in a property-related charge requires approval by the property owner of record. In compliance with Proposition 218 legislation, the City of Moreno Valley Special Districts Division is conducting a mail ballot proceeding to provide the owner of the APN(s) listed above the opportunity to express support for or opposition to the approval of the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate and services. Approval of the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate through a mail ballot proceeding fulfills the Land Development Division's Condition of Approval to provide a funding source for the NPDES financial program.

Background

The Clean Water Act of 1987 established requirements for the discharge of Urban Runoff from Municipal Separate Storm Sewer Systems under the NPDES Program. The NPDES Program is administered by the Santa Ana Regional Water Quality Control Board through the issuance of a Permit. The City's current NPDES Permit mandates all new development projects comply with storm water management activities. The NPDES Program requires public agencies to obtain coverage under the Permit to discharge urban storm water runoff from municipally owned drainage facilities, including streets, highways, storm drains, and flood control channels.

Services Provided

In compliance with the Federal Clean Water Act, the City of Moreno Valley shall provide annual and periodic facility inspections for site design, NPDES permit compliance, and Best Management Practices implementation and maintenance for specified facilities.

How is the Amount of the Charge Determined?

Each fiscal year (FY), the City of Moreno Valley determines the type of services necessary to comply with NPDES Permit requirements and levies the rate applicable for that service, not to

exceed the rate previously approved by the property owner.

Proposed Charge

For FY 2020/21, the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate is $260.84 per parcel. The total amount of the NPDES rates levied for FY 2020/21 was $572,616.88 for the program as a whole.

Annual Adjustment

Beginning in FY 2021/22, the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate will be subject to an annual adjustment based on the percentage change calculated for the previous year in the Los Angeles-Long Beach-Anaheim Consumer Price Index for All Urban Consumers, as published by the Department of Labor's Bureau of Labor Statistics.

Duration of the Charge

Upon approval of the NPDES Maximum select rate Regulatory Rate, the annual levy amount will be assessed to the APN(s) listed above (and any division thereof) and shall be placed on the Riverside County property tax bill or included as a monthly charge on a utility bill. The NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate will be levied each following year at the proposed rate, which includes an annual inflation adjustment.

Public Hearing

To provide information concerning this mail ballot proceeding, the City has scheduled a Public Hearing, which will be held at the **Moreno Valley City Hall Council Chamber located at 14177 Frederick Street, Moreno Valley.**

Public Hearing
Tuesday, February 2, 2021
6:00 p.m.
(Or As Soon Thereafter As The Matter May Be Called)

Tabulation of the returned ballot will commence after the close of the public testimony portion of the Public Hearing. Any ballot received shall be tabulated under the direction of the City Clerk in compliance with the City's Policy for Conducting Mail Ballot Proceedings Policy #1.12.

Effect if the Charge is Approved

Approval of the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate will be confirmed if the ballot is marked in favor (marked Yes) of the NPDES rate. Approving the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate through a mail ballot proceeding will fulfill the Land Development Division's Condition of Approval to provide an ongoing funding source for the NPDES financial program.

Effect if the Charge is Not Approved

Not approving the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate to meet state and federally mandated NPDES Permit requirements **will not**

satisfy the Land Development Division's Condition of Approval to provide a funding source for the NPDES financial program. If the returned ballot is marked "No", the NPDES rate will not be levied on the property tax bill.

Effect if the Ballot is Deemed Invalid or Incomplete

Not marking the corresponding box on the ballot in support of or opposition to the proposed program and annual rate and/or not signing the ballot will result in an invalid ballot. In order to satisfy the Land Development Division's Condition of Approval by placement of the NPDES rate on the annual property tax bill, the mail ballot proceeding and 45-day noticing period will need to start over. Reinitiating the process will require payment of the mail ballot proceeding fee.

For More Information

If you have any questions about the mail ballot proceeding process, please contact Isa Rojas, Management Analyst, with the City's Special Districts Division at 951.413.3470 or via email at IsaRo@moval.org or SDAdmin@moval.org during the City's business hours.

Questions regarding the NPDES financial program, the annual rate, or the Land Development Division's Conditions of Approval should be directed to the Land Development Division at 951.413.3120 or via email at landdevelopment@moval.org during the City's business hours.

The City's business hours are Monday through Thursday from 7:30 a.m. to 5:30 p.m. and Friday from 7:30 a.m. to 4:30 p.m.

Completing Your Ballot

Please follow the instructions below to complete and return your ballot. Procedures for the completion, return, and tabulation of the ballot are also on file in the City Clerk's office.

1. Mark the enclosed ballot in support of or opposition to the proposed program and annual rate **by placing a mark in the corresponding box.** Ballots received without a designated vote will be considered invalid.
2. Sign your name on the ballot. Ballots received without signature(s) will be considered invalid *and will not be counted.*
3. Mail or personally deliver your completed ballot in a sealed envelope to the City Clerk's office, 14177 Frederick Street, Moreno Valley, California, 92553. For your convenience, a postage-paid envelope has been included for return of the ballot.
4. Ballot(s) must be **received** by the City Clerk prior to the close of the public testimony portion of the Public Hearing scheduled for **February 2, 2021,** at the Moreno Valley City Hall Council Chamber. The Public Hearing will be held at 6:00 p.m. or as soon thereafter as the matter may be called. Ballots received after the close of the Public Hearing cannot be legally counted.

Ballot Marks

Appropriate ballot markings include any one of the following for either the YES/Approved or NO/Not Approved blank box:

A check mark substantially inside a box;

An X mark substantially inside a box;

A dot or oval mark substantially inside a box;

A completely shaded or filled mark substantially inside a box;

A line, single or dashed, or combination of lines, through the box area. Lines may be any one of the following marks: horizontal, vertical, or diagonal. The mark may either run from side to side or corner to corner. All valid lines must be substantially within the box area and not marking any part of another blank box on the ballot;

A circle around the box and/or associated clause; or

A square or rectangle around the box and/or associated clause.

Balloting marks shall not extend past one box area into any portion of another nor surround the perimeter or any portion of more than one box area. Markings that extend past one box area into any portion of another or surround the perimeter or any portion of more than one box area shall be considered invalid and not counted.

Ballot Mark Revisions (Changes): An error or desire to revise (change) a selection made on the ballot may be completed and returned any time **prior** to the conclusion of public testimony at the Public Hearing. **The revision must be initialed by the record owner(s) of property. Initials must be clearly printed and placed at the right top corner of the revised selection.**

NOTICE TO PROPERTY OWNER - MAIL BALLOT PROCEEDING FOR THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) MAXIMUM COMMON INTEREST, COMMERCIAL, INDUSTRIAL, AND QUASI-PUBLIC USE REGULATORY RATE FOR APN(s) 297-220-006, 297-220-007 and 297-220-008

******* OFFICIAL BALLOT ENCLOSED *******

Introduction

In November of 1996, California voters passed Proposition 218 ("The Right to Vote on Taxes Act"). As a result, any new or proposed increase in a property-related charge requires approval by the property owner of record. In compliance with Proposition 218 legislation, the City of Moreno Valley Special Districts Division is conducting a mail ballot proceeding to provide the owner of the APN(s) listed above the opportunity to express support for or opposition to the approval of the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate and services. Approval of the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate through a mail ballot proceeding fulfills the Land Development Division's Condition of Approval to provide a funding source for the NPDES financial program.

Background

The Clean Water Act of 1987 established requirements for the discharge of Urban Runoff from Municipal Separate Storm Sewer Systems under the NPDES Program. The NPDES Program is administered by the Santa Ana Regional Water Quality Control Board through the issuance of a Permit. The City's current NPDES Permit mandates all new development projects comply with storm water management activities. The NPDES Program requires public agencies to obtain coverage under the Permit to discharge urban storm water runoff from municipally owned drainage facilities, including streets, highways, storm drains, and flood control channels.

Services Provided

In compliance with the Federal Clean Water Act, the City of Moreno Valley shall provide annual and periodic facility inspections for site design, NPDES permit compliance, and Best Management Practices implementation and maintenance for specified facilities.

How is the Amount of the Charge Determined?

Each fiscal year (FY), the City of Moreno Valley determines the type of services necessary to comply with NPDES Permit requirements and levies the rate applicable for that service, not to

exceed the rate previously approved by the property owner.

Proposed Charge

For FY 2020/21, the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate is $260.84 per parcel. The total amount of the NPDES rates levied for FY 2020/21 was $572,616.88 for the program as a whole.

Annual Adjustment

Beginning in FY 2021/22, the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate will be subject to an annual adjustment based on the percentage change calculated for the previous year in the Los Angeles-Long Beach-Anaheim Consumer Price Index for All Urban Consumers, as published by the Department of Labor's Bureau of Labor Statistics.

Duration of the Charge

Upon approval of the NPDES Maximum select rate Regulatory Rate, the annual levy amount will be assessed to the APN(s) listed above (and any division thereof) and shall be placed on the Riverside County property tax bill or included as a monthly charge on a utility bill. The NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate will be levied each following year at the proposed rate, which includes an annual inflation adjustment.

Public Hearing

To provide information concerning this mail ballot proceeding, the City has scheduled a Public Hearing, which will be held at the **Moreno Valley City Hall Council Chamber located at 14177 Frederick Street, Moreno Valley.**

Public Hearing
Tuesday, February 2, 2021
6:00 p.m.
(Or As Soon Thereafter As The Matter May Be Called)

Tabulation of the returned ballot will commence after the close of the public testimony portion of the Public Hearing. Any ballot received shall be tabulated under the direction of the City Clerk in compliance with the City's Policy for Conducting Mail Ballot Proceedings Policy #1.12.

Effect if the Charge is Approved

Approval of the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate will be confirmed if the ballot is marked in favor (marked Yes) of the NPDES rate. Approving the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate through a mail ballot proceeding will fulfill the Land Development Division's Condition of Approval to provide an ongoing funding source for the NPDES financial program.

Effect if the Charge is Not Approved

Not approving the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate to meet state and federally mandated NPDES Permit requirements **will not**

satisfy the Land Development Division's Condition of Approval to provide a funding source for the NPDES financial program. If the returned ballot is marked "No", the NPDES rate will not be levied on the property tax bill.

Effect if the Ballot is Deemed Invalid or Incomplete

Not marking the corresponding box on the ballot in support of or opposition to the proposed program and annual rate and/or not signing the ballot will result in an invalid ballot. In order to satisfy the Land Development Division's Condition of Approval by placement of the NPDES rate on the annual property tax bill, the mail ballot proceeding and 45-day noticing period will need to start over. Reinitiating the process will require payment of the mail ballot proceeding fee.

For More Information

If you have any questions about the mail ballot proceeding process, please contact Isa Rojas, Management Analyst, with the City's Special Districts Division at 951.413.3470 or via email at IsaRo@moval.org or SDAdmin@moval.org during the City's business hours.

Questions regarding the NPDES financial program, the annual rate, or the Land Development Division's Conditions of Approval should be directed to the Land Development Division at 951.413.3120 or via email at landdevelopment@moval.org during the City's business hours.

The City's business hours are Monday through Thursday from 7:30 a.m. to 5:30 p.m. and Friday from 7:30 a.m. to 4:30 p.m.

Completing Your Ballot

Please follow the instructions below to complete and return your ballot. Procedures for the completion, return, and tabulation of the ballot are also on file in the City Clerk's office.

1. Mark the enclosed ballot in support of or opposition to the proposed program and annual rate **by placing a mark in the corresponding box.** Ballots received without a designated vote will be considered invalid.
2. Sign your name on the ballot. Ballots received without signature(s) will be considered invalid *and will not be counted.*
3. Mail or personally deliver your completed ballot in a sealed envelope to the City Clerk's office, 14177 Frederick Street, Moreno Valley, California, 92553. For your convenience, a postage-paid envelope has been included for return of the ballot.
4. Ballot(s) must be **received** by the City Clerk prior to the close of the public testimony portion of the Public Hearing scheduled for **February 2, 2021,** at the Moreno Valley City Hall Council Chamber. The Public Hearing will be held at 6:00 p.m. or as soon thereafter as the matter may be called. Ballots received after the close of the Public Hearing cannot be legally counted.

Ballot Marks

Appropriate ballot markings include any one of the following for either the YES/Approved or NO/Not Approved blank box:

✔	A check mark substantially inside a box;

An X mark substantially inside a box;

A dot or oval mark substantially inside a box;

A completely shaded or filled mark substantially inside a box;

A line, single or dashed, or combination of lines, through the box area. Lines may be any one of the following marks: horizontal, vertical, or diagonal. The mark may either run from side to side or corner to corner. All valid lines must be substantially within the box area and not marking any part of another blank box on the ballot;

A circle around the box and/or associated clause; or

A square or rectangle around the box and/or associated clause.

Balloting marks shall not extend past one box area into any portion of another nor surround the perimeter or any portion of more than one box area. Markings that extend past one box area into any portion of another or surround the perimeter or any portion of more than one box area shall be considered invalid and not counted.

Ballot Mark Revisions (Changes): An error or desire to revise (change) a selection made on the ballot may be completed and returned any time **prior** to the conclusion of public testimony at the Public Hearing. **The revision must be initialed by the record owner(s) of property. Initials must be clearly printed and placed at the right top corner of the revised selection.**

OFFICIAL MAIL BALLOT
for Assessor's Parcel Number (APN) 297-220-006, 297-220-007 and 297-220-008
National Pollutant Discharge Elimination System (NPDES)
Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate

YES* — as property owner of the APN(s) listed above, **I approve** the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate and services. For fiscal year (FY) 2020/21, the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate is $260.84 per parcel, a combined total of $782.52 for the APNs. This calculation is based on the current parcel configuration; the actual annual amount levied will be determined at the time the levy is calculated. Upon approval of the maximum regulatory rate, the annual levy amount shall be placed on the annual Riverside County property tax bill or included as a monthly charge on a utility bill. Beginning FY 2021/22, the maximum regulatory rate will be subject to an annual adjustment based on the percentage change calculated for the previous year in the Los Angeles-Long Beach-Anaheim Consumer Price Index for All Urban Consumers, as published by the Department of Labor's Bureau of Labor Statistics. The City shall provide annual and periodic facility inspections for site design, NPDES permit compliance, and Best Management Practices implementation and maintenance for specified facilities.

NO** — as property owner of the APNs listed above, **I do not approve** the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate and services. I understand that not approving the NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate to fund state and federally mandated NPDES Permit requirements will not satisfy the project's Conditions of Approval. The NPDES Maximum Common Interest, Commercial, Industrial, and Quasi-Public Use Regulatory Rate will not be levied on the annual Riverside County property tax bill.

I HEREBY DECLARE UNDER PENALTY OF PERJURY THAT I AM THE RECORD OWNER OF THE PARCEL(S) IDENTIFIED ON THIS BALLOT OR AM AUTHORIZED TO SUBMIT A BALLOT ON BEHALF OF THE RECORD OWNER.

_____
SIGNATURE OF PROPERTY OWNER

_____
PRINTED NAME DATE

Please remember to mark the appropriate box, sign and date the ballot, and return to the City Clerk's office in the enclosed envelope. This ballot must be received by the City Clerk of the City of Moreno Valley prior to the close of the public testimony portion of the Public Hearing. The Public Hearing will be held at 6:00 p.m., or as soon thereafter as the matter may be called, on February 2, 2021, at the Moreno Valley City Hall Council Chamber, 14177 Frederick Street, Moreno Valley, California.

Ballot(s) deemed invalid or incomplete will be discarded and a new process must be initiated in order to place the charge on the annual Riverside County property tax bill, which includes payment of the mail ballot fee. For administrative convenience, all parcels for your project have been combined on one ballot. If you prefer to have a separate ballot for each APN please call 951.413.3470 to request separate ballots.

Report to City Council

TO: Mayor and City Council

FROM: Manuel A. Mancha, Community Development Director

AGENDA DATE: February 2, 2021

TITLE: PROPOSED GENERAL PLAN AMENDMENT, CHANGE OF ZONE, TENTATIVE TRACT MAP 37909, AND CONDITIONAL USE PERMIT FOR A 81-UNIT SINGLE FAMILY RESIDENTIAL PROJECT, IRIS PARK LOCATED ON IRIS AVENUE EAST OF PERRIS BOULEVARD (PROJECT 1) AND GENERAL PLAN AMENDMENT, SPECIFIC PLAN 205 AMENDMENT, AND PLOT PLAN FOR A 220,390 SQUARE FOOT LIGHT INDUSTRIAL BUILDING, THE DISTRICT LOCATED ON THE SOUTHEAST CORNER OF HEACOCK STREET AND IRONWOOD AVENUE (PROJECT 2).

RECOMMENDED ACTION

Recommendations:

1. **ADOPT** Resolution 2021-XX: A Resolution of the City Council of the City of Moreno Valley **CERTIFYING** that the Initial Study/Mitigated Negative Declaration prepared for General Plan Amendment PEN20-0066, Change of Zone PEN20-0067, Tentative Tract Map 37909 PEN20-0063 and Conditional Use Permit PEN20-0065 on file with the Community Development Department, incorporated herein by this reference, was completed in compliance with the California Environmental Quality Act Guidelines, and that the City Council reviewed and considered the information contained in the Initial Study/ Mitigated Negative Declaration and that the document reflects the City's independent judgment and analysis, and **ADOPTING** the Mitigation Monitoring and Reporting Program prepared for the above-referenced Mitigated Negative Declaration (Project #1, Iris Park); and

2. **ADOPT** Resolution 2021-XX: A Resolution of the City Council of the City of Moreno Valley **CERTIFYING** that the Initial Study/Mitigated Negative Declaration, prepared for General Plan Amendment PEN20-0139, Specific Plan 205

Amendment PEN20-0138, and Plot Plan PEN20-0137, on file with the Community Development Department, incorporated herein by this reference, was completed in compliance with the California Environmental Quality Act Guidelines, and that the City Council reviewed and considered the information contained in the Initial Study/ Mitigated Negative Declaration, and that the document reflects the City's independent judgment and analysis, and **ADOPTING** the Mitigation Monitoring and Reporting Program prepared for the above-referenced Mitigated Negative Declaration (Project #2, The District); and

3. **ADOPT** Resolution 2021-XX: A Resolution of the City Council of the City of Moreno Valley approving a General Plan Amendment based on the Recitals, Evidence contained in the Administrative Record and Findings as set for the in Resolution No. 2021-XX to amend the General Plan Land Use map as described in the Resolution, based on the findings contained in the Resolution, and the revised Land Use Maps for PEN20-0066 (Project #1, Iris Park) and PEN20-0139 (Project #2, The District); and

Project #1, Iris Park

4. **INTRODUCE** and conduct the first reading by title only of Ordinance No. XXX, approving a Change of Zone PEN20-0067 to amend the City Zoning Atlas based on the Recitals, Evidence contained in the Administrative Records and Findings as set forth in Resolution No. 2021-XX; and

5. **ADOPT** Resolution No. 2021-XX, A Resolution of the City Council of the City of Moreno Valley approving Tentative Tract Map 37909, PEN20-0063 based on the findings contained in this resolution, and subject to the conditions of approval included as Exhibit A; and

6. **ADOPT** Resolution No. 2021-XX, A Resolution of the City Council of the City of Moreno Valley approving Conditional Use Permit PEN20-0065 based on the findings contained in this resolution, and subject to the conditions of approval included as Exhibit A; and

Project #2, The District

7. **INTRODUCE** and conduct the first reading by title only of Ordinance No. XXX, approving a Specific Plan 205 Amendment PEN20-0138 to amend the Specific Plan 205 based on the Recitals, Evidence contained in the Administrative Records and Findings as set forth in Resolution No. 2021-XX; and

8. **ADOPT** Resolution No. 2021-XX, A Resolution of the City Council of the City of Moreno Valley approving Plot Plan PEN20-0137 based on the findings contained in this resolution, and subject to the conditions of approval included as Exhibit A; and

9. **SCHEDULE** the second reading and adoption of Ordinance Nos. XXX and XXX for the next regular City Council meeting.

SUMMARY

This report recommends approval of development applications for two projects: Project 1, Iris Park, an 81-unit single family development project located on Iris Avenue east of Perris Boulevard, and Project 2, The District Moreno Valley, a 220,390 square foot light industrial building development project located on the southeast corner of Heacock Street and Ironwood Avenue.

The recommended actions for Project 1 include approval of a General Plan Amendment, Change of Zone, Tentative Tract Map 37909, and Conditional Use Permit for a residential Planned Unit Development; Project 2 include approval of a General Plan Amendment, Specific Plan 205 Amendment, and Plot Plan for industrial development.

As provided for in the State Government Code, a mandatory element of the General Plan may be amended no more than four times during one calendar year. However, each amendment may include more than one change to a General Plan element. The recommended action is for the City Council to approve one General Plan Amendment to the Land Use Element covering the land use designation changes for Project 1 and 2. This unified change will be the first amendment to the Land Use Element of the General Plan for the 2021 calendar year.

DISCUSSION

PROJECT 1, IRIS PARK, PEN20-0063 -PEN20-0066

Advisory Board/Commission Recommendation

At its December meeting, the Planning Commission held a public hearing and voted to recommend that the City Council certify the Mitigated Negative Declaration, adopt a Mitigation Monitoring Reporting Program, and approve the General Plan Amendment, Change of Zone, Tentative Tract Map 37909, and Conditional Use Permit for a Planned Unit Development.

Project

The Applicant, Passco Pacifica LLC, is requesting approval of the following: a General Plan Amendment (PEN20-0066), to change the General Plan land use designation of the Project site from Residential 5 (R5) to Residential 10 (R10), 2) a Change of Zone (PEN20-0067) to change the City Zoning Atlas pertaining to the Iris Park Community from Residential 5 (R5) District to Residential Single-Family 10 (RS10) District, 3) a Tentative Tract Map (TTM 37909) to subdivide the 10.82-acre Project site into eighty-one (81) single family lots, and 4) a Conditional Use Permit for a Planned Unit Development with associated amenities and public improvements.

General Plan Amendment

The City of Moreno Valley General Plan land use designates the Project site as Residential 5 (R5) and the proposal would change this to Residential 10 (R10).

The primary purpose of Residential 10 (R10) is to provide for a variety of residential products and to encourage innovation in housing types with enhanced amenities such as common open space and recreation areas. Within the General Plan designation these areas are intended for attached residential dwelling units with a maximum density of ten (10) dwelling units per acre.

Change of Zone

The Project site is currently zoned Residential 5 (R5) District. The primary purpose of the Residential 5 (R5) District is to provide residential development on suburban lots with an allowable density of five units per acres.

The applicant is proposing a Change of Zone to Residential Single-Family 10 (RS10) District. The primary purpose of the Residential Single-Family 10 (RS10) District is to provide for residential development on small single-family lots with amenities not generally found in suburban subdivisions. The district is intended for subdivisions.

Conditional Use Permit

The Project includes a Conditional Use Permit for a Planned Unit Development (PUD). The purpose of the PUD is to provide specific development guidelines for the Project. A PUD provides for greater innovation in housing development such as a variation in lot sizes and amenities not found in standard housing tracts.

The proposed PUD provides guidelines for multiple architectural styles of housing that meet or exceed City-wide standards in the Municipal Code. All development within the tract is required to meet the standards as stated in the PUD including plotting, setbacks, open space areas and architecture. The PUD includes a Community Park with a pavilion gathering area, picnic tables and barbeques for the residents. A smaller park offers benches and exercise equipment.

With the approval of the General Plan Amendment, the Change of Zone and the Tentative Tract Map, the Project would meet the objectives of the Conditional Use Permit for a Planned Unit Development.

Site Surrounding

The approximately 10.82 acre site is located on the south side of Iris Avenue east of Perris Boulevard. The parcel is triangular in shape with the larger portion fronting Iris Avenue and narrowing to the south. All properties to the north and east are zoned Residential 5 (R5) District with existing single family residential units. Directly south is an existing elementary school with small lot subdivisions further south.

The westerly portion of the site on the diagonal is the 100-foot State of California Aqueduct easement which is the future location of the City's Juan Bautista de Anza Aqueduct Bike Trail. The easement is included in the tract map and no development

can occur within this area. In partnering with the City, the developer will provide landscaping for the trail site and the City will construct the proposed meandering trail along the mid to westerly portion of the easement. The Project will provide access to the open trail for residents. The trail will be open to the public and in the future connect to the trail existing south of the Project.

Access/Parking

The Project will be accessed by a main driveway along Iris Avenue at the easterly portion of the Project frontage. This driveway has been designed to accommodate gated access with a call box and adequate turnaround if unable to access the site, and decorative paving. A second westerly driveway provides for exit only and provide fire access when needed.

All units include a two-car garage with no on-street parking allowed. The Project includes guest parking with 55 spaces which is 14 spaces more than required.

Design/Landscaping

Consistent with the PUD guidelines three building footprints are proposed with four different building styles, which include Spanish, Farmhouse, and French. Each of the four different building styles will have three color combinations to provide interest among the housing types. Each lot will have a front facing garage with a minimum back yard setback of twelve feet from back of house to the property line. The minimum separation between structures is six feet, with a minimum of three feet to any property line.

All front yards will be landscaped per the City's Landscape Requirements and the Planned Unit Development Guidelines. All community landscaping will be designed per the PUD and maintained by the required Homeowners Association (HOA).

Environmental

An Initial Study was prepared by EPD Solutions, Inc. in compliance with the California Environmental Quality Act (CEQA) and the CEQA Guidelines. The Initial Study/Mitigated Negative Declaration (IS/MND) provides information in support of the finding that a Mitigated Negative Declaration serves as the appropriate CEQA documentation for the proposed Project, in that the proposed Project, with the implementation of the proposed mitigation measures, will not have a significant effect on the environment. Technical studies prepared in support of the IS/MND include the following: Air Quality – GHG, Cultural Resources Assessment, Hydrology Report, Noise Analysis, Paleontological Resources, Phase I Environmental Assessment and a Traffic Generation Analysis. Copies of all of the appendices to the IS/MND are attached to this staff report.

PROJECT 2, THE DISTRICT MORENO VALLEY PEN20-0137 – PEN20-0139

DISCUSSION

Advisory Board/Commission Recommendation

At its January meeting, the Planning Commission held a public hearing and voted to recommend that the City Council certify the Mitigated Negative Declaration, adopt a Mitigation Monitoring Reporting Program, and approve the General Plan Amendment, Specific Plan Amendment, and a Plot Plan for an approximately 220,239 square foot light industrial building.

Project

The applicant, LCG 10MV, LLC, is requesting approval of the following: a General Plan Amendment (PEN20-0139) to amend the General Plan land use designation from Commercial (C) to Business Park (BP); a Specific Plan Amendment (PEN20-0138) to amend the Specific Plan 205 land use designation from Retail Commercial (R/C) to Mixed Uses (MU); and a Plot Plan for an approximately 220,390 light industrial building, for property located at the southeast corner of Ironwood Avenue and Heacock Street.

General Plan Amendment

The City of Moreno Valley General Plan land use map designates the Project site as Commercial (C) and the proposal would change this to a Business Park (BP) land use designation.

The primary purpose of areas designated Commercial (C) is to provide property for business purposes, including, but not limited to, retail stores, restaurants, banks, hotels, professional offices, personal services and repair services. The Primary purpose of the Business Park (BP) is to provide for manufacturing, research and development, warehousing and distribution, as well as office and support commercial activities.

The proposed General Plan Amendment would be consistent with the adjacent parcels to the south and east, and would result in a total increase of approximately 9.96-acres of Business Park (BP) designated land and a corresponding reduction of approximately 9.96-acres of Commercial (C) designated land.

Specific Plan Amendment

The project site is located within Specific Plan 205 and currently has a land use designation of Commercial/Retail (C/R). The applicant is proposing a Specific Plan Amendment to change the Specific Plan land use designation of the project site to Mixed Uses (MU) consistent with the adjacent parcels to the south and east. The Mixed-Uses (MU) designation allow for a wider range of uses than the Commercial Retail (C/R) designation and would include a variety of business park, office, retail and other commercial uses as well as light industrial uses.

Zoning Atlas Amendment

Both the General Plan Amendment and Specific Plan Amendment will require the necessary and corresponding amendment to the City's Zoning Atlas to reflect the

proposed changes in the zoning classification and/or redistricting associated with each Amendment.

Plot Plan

The Applicant is proposing the construction of a light industrial building of approximately 220,390 square feet in size with associated parking and landscape improvements.

Site Surrounding

The approximately 9.96-acre site is located on the southeast corner of Heacock Street and Ironwood Avenue.

The surrounding area includes existing single family homes and an electrical substation to the north across Ironwood Avenue on property zoned Residential 5 (R5) District; light industrial buildings currently under construction on properties located within Specific Plan 205 to the south and east; and a mix of existing single family homes, offices, and commercial businesses to the west within the Neighborhood Commercial (NC) District and the Office Commercial (OC) District.

Access/Parking

Access to the Project site will be from two driveways on Heacock Street, one for trucks and one for automobiles, with an additional access driveway on Ironwood Avenue for both automobiles and trucks.

Parking for both automobiles and trucks meet the Municipal Code requirements. Ninety-eight (98) automobile stalls are provided that include the required ADA, E.V., and vehicle charging stations. Thirty-six (36) truck parking stalls are provided in the truck court.

Design/Landscaping

The proposed project light industrial type building has been designed to incorporate a contemporary architectural design that includes a combination of materials including concrete, metal, and glass. The building will be painted white with grey and blue accents.

The building has been designed to incorporate an architectural focal point near the intersection of Heacock Street and Ironwood Avenue through the use of vision and spandrel glass, metal canopies, and enhanced landscaping. These materials are further utilized along both street frontages to enhance the project aesthetics and to upgrade the use of tilt-up concrete panels traditionally associated with light industrial buildings.

The layout of the building on the site places the loading docks and truck parking to the southeast corner of the site adjacent to the other light industrial buildings that are currently under construction within the Specific Plan.

The Project has been designed to meet and exceed the required design and landscape standards and objectives set forth in the Municipal Code. The landscape elements of the Project include the landscape setback areas along Heacock Street and Ironwood Avenue with enhanced landscaping along the frontage of both streets and adjacent to the building that will include street trees, on-site trees and plants.

Environmental

An Initial Study was prepared by Blodgett Baylosis Environmental Planning in compliance with the California Environmental Quality Act (CEQA) Guidelines. The Initial Study examined the potential of the proposed Project impacts on the environment. The Initial Study/Mitigation Negative Declaration (IS/MND) provides information in support of the finding that a Mitigated Negative Declaration serves as the appropriate CEQA documentation for the proposed Project in that the proposed Project, with the implementation of the proposed mitigation measures, will not have a significant effect on the environment. Technical studies prepared in support of the IS/MND include the following: Air Quality Worksheets, Utility Worksheets, Biological Assessment, Basin Constraints Analysis, Jurisdictional Wetlands and Waters Assessment, and Traffic Impact Analysis. The electronic files for the IS/MND with appendices are attached to this staff report.

ALTERNATIVES

1. Conduct a public hearing on Project 1 and Project 2, and take actions to certify the Initial Study/Mitigated Negative Declarations and Mitigation Monitoring and Reporting Program for Projects 1 and 2, and approve the General Plan Amendment, Change of Zone, Tentative Tract Map 37909, and Conditional Use Permit for Project 1 and the General Plan Amendment, Specific Plan Amendment, and Plot Plan for Project 2 applications, consistent with the Staff recommendations to the Planning Commission. Staff recommends this alternative.

2. Conduct a public hearing on Project 1 and Project 2, and approve all Project 1 applications including the General Plan Amendment for Project 1 only but do not approve the applications for Project 2. This would result in the approval of the Iris Park Project only. Staff does not recommend this alternative.

3. Conduct a public hearing on Project 1 and Project 2, approve all Project 2 applications including the General Plan Amendment for Project 2 only but do not approve the applications for Project 1. This would result in the approval of The District Moreno Valley project only. Staff does not recommend this alternative.

4. Conduct public hearings on Project 1 and Project 2, and do not approve the applications for Project 1 or Project 2. Staff does not recommend this alternative.

FISCAL IMPACT

Not Applicable

NOTIFICATION

The public hearing notices for Project 1 and Project 2 were published in the local newspaper on January 22, 2021. Public notices were sent to all property owners of record within 600 feet of the project sites on January 21, 2021. The public hearing notice for the projects were posted on the respective project sites on January 22, 2021. As of the preparation of this report, staff has received no public inquiries in response to the noticing efforts. Should comments regarding this noticing be received prior to the City Council hearing, they will be provided at the Public Hearing.

CITY COUNCIL GOALS

Positive Environment. Create a positive environment for the development of Moreno Valley's future.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 1.1: Proactively attract high-quality businesses.

Objective 1.3: Promote local hiring through the expansion of local, quality, high paying jobs, and workforce development efforts.

Objective 1.5: Showcase Moreno Valley’s unique assets.

Objective 2.5: Develop partnerships with local businesses and warehouse operators to reduce traffic related issues.

RESOLUTION NUMBER 2021-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING GENERAL PLAN AMENDMENT PEN20-0066 TO AMEND THE GENERAL PLAN LAND USE MAP, CHANGING THE LAND USE DESIGNATION FROM RESIDENTIAL 5 (R5) TO RESIDENTIAL 10 (R10) FOR THE PROPERTY LOCATED ON THE SOUTH SIDE OF IRIS AVENUE EAST OF PERRIS BOULEVARD (APN 312-020-025) AND GENERAL PLAN AMENDMENT PEN20-0139 TO AMEND THE GENERAL PLAN LAND USE MAP, CHANGING THE LAND USE DESIGNATION FROM COMMERCIAL TO BUSINESS PARK FOR THE PROPERTY LOCATED ON THE SOUTHEAST CORNER OF HEACOCK STREET AND IRONWOOD AVENUE (481-020-013, 029, 030, 034, 035, & 038) AND THE NECESSARY AND CORRESPONDING AMENDMENTS TO THE SPECIFIC PLAN 205 AND THE CITY'S ZONING ATLAS

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California; and

WHEREAS, Passco Pacifica LLC., ("Developer") has filed an application for the approval of General Plan Amendment PEN20-0066 ("Application") to amend the Moreno Valley General Plan from Residential 5 (R5) to Residential 10 (R10) for the property located on the south side of Iris Avenue east of Perris Boulevard (APN 312-020-025) ("Site"); and

WHEREAS, LCG 10MV LLC., ("Developer") has filed an application for the approval of General Plan Amendment PEN20-0139 ("Application") to amend the Moreno Valley General Plan from Commercial to Business Park for the property located on the southeast corner of Heacock Street and Ironwood Avenue (APN 481-020-013, 029, 030, 034, 035, & 038) ("Site"), which shall also require any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Moreno Valley Municipal Code and Government Code section 65905, a public hearing was scheduled for February 2, 2021, and notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Sites; and

WHEREAS, on December 10, 2020 a hearing was conducted by the Planning Commission to consider General Plan Amendment PEN20-0066, whereby the Planning Commission approved Planning Commission Resolution 2020-50, a recommendation that the City Council approve the General Plan Amendment; and

WHEREAS, on December 10, 2020, in accordance with the provisions of the California Environmental Quality Act (CEQA[1]) and CEQA Guidelines,[2] the Planning Commission considered and approved Planning Commission Resolution 2020-49 recommending that the City Council adopt a Mitigated Negative Declaration and Mitigation Monitoring Plan for the Iris Park Project; and

WHEREAS, on January 14, 2021, a hearing was conducted by the Planning Commission to consider General Plan Amendment PEN20-0139 whereby the Planning Commission approved Planning Commission Resolution 2021-02, a recommendation that the City Council approve the General Plan Amendment; and

WHEREAS, on January 14, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA[3]) and CEQA Guidelines,[4] the Planning Commission considered and approved Planning Commission Resolution 2021-01 recommending that the City Council adopt a Mitigated Negative Declaration and Mitigation Monitoring Plan for The District Moreno Valley project.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed Project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the City Council has considered all of the evidence submitted into the administrative record for the General Plan Amendment, including, but not limited to, the following:

(a) Moreno Valley General Plan and all relevant provisions contained therein;
(b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all relevant provisions referenced therein;
(c) The Moreno Valley General Plan amendment changing the land use designations:

Project 1 - Residential 5(R5) to Residential 10(R10)

[1] Public Resources Code §§ 21000-21177
[2] 14 California Code of Regulations §§15000-15387
[3] Public Resources Code §§ 21000-21177
[4] 14 California Code of Regulations §§15000-15387

Project 2 - Commercial to Business Park and all relevant provisions contained therein as shown on Exhibit A and Exhibit B respectively;

(d) Application for the approval of a General Plan Amendment PEN20-0066 and PEN20-0139 and all documents, records and references contained therein;

(e) Staff Report prepared for the City Council's consideration and all documents, records and references related thereto, and Staff's presentation at the public hearing;

(f) Testimony and/or comments from Applicant and its representatives during the public hearing; and

(g) Testimony, comments and correspondence from all persons that were provided in written format or correspondence, at, or prior to, the public hearing.

Section 4. **Findings**

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the City Council makes the following findings:

(a) The proposed General Plan amendments are consistent with the existing goals, objectives, policies and programs of the General Plan; and

(b) The proposed General Plan amendments will not adversely affect the public health, safety or general welfare.

Section 5. **Approval**

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings, as set forth herein, the City Council hereby approves General Plan Amendment PEN20-0066 and PEN20-0139 as depicted in the exhibits attached hereto as Exhibit A and Exhibit B, and any necessary and corresponding amendment to the Specific Plan 205 and the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment.

Section 6. **Repeal of Conflicting Provisions**

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. **Severability**

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. **Effective Date**

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. **Certification**

That the City Clerk for the City Council shall certify to the passage of this Resolution.

RESOLUTION NUMBER 2021-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, ADOPTING A MITIGATED NEGATIVE DECLARATION AND MITIGATION MONITORING PLAN FOR THE IRIS PARK COMMUNITY PROJECT LOCATED ON THE SOUTH SIDE OF IRIS AVENUE EAST OF PERRIS BOULEVARD (APN 312-020-025)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and the lead agency for the preparation and consideration of environmental documents for local projects that are subject to requirements of the California Environmental Quality Act (CEQA[1]) and CEQA Guidelines[2]; and

WHEREAS, Passco Pacifica LLC., ("Developer") is seeking approval for the development of the Iris Park Community, an eighty-one- (81) lot, single-family residential development on a 10.82-acre site that includes: 1) a General Plan Amendment (PEN20-0066) (GPA) amending Figure 2-2 "Land Use Map" of the Moreno Valley General Plan to change the land use designation of the Project site from Residential 5 (R5) to Residential 10 (R10); 2) a Change of Zone (PEN20-0067) amending the City of Moreno Valley Zoning Atlas to rezone the project site from Residential 5 (R5) District to Residential Single-Family 10 (RS10) District; 3) a Tentative Tract Map (TTM 37909) (PEN20-0063) to subdivide the subject property into eighty-one (81) single family lots; and 4) a Conditional Use Permit (PEN20-0065) for a Planned Unit Development with associated amenities and public improvements ("Project") located on the south side of Iris Avenue east of Perris Boulevard (APN 312-020-025) ("Site"); and

WHEREAS, Planning Division Staff completed an environmental assessment for the proposed Project, and, based on the assessment, decided to prepare an Initial Study ("IS") and a Mitigated Negative Declaration ("MND") in accordance with Section 6 (ND Procedures) of the City's Rules and Procedures for the Implementation of the California Environmental Quality Act and the requirements of the CEQA Guidelines Sections 15070 – 15075; and

WHEREAS, a Notice of Intent to Adopt a Mitigated Negative Declaration was duly noticed and circulated for public review for a period of 20 days commencing on October 23, 2020, through November 12, 2020; and

WHEREAS, in conformance with CEQA and the CEQA Guidelines, a Mitigation Monitoring Plan ("MMP") that includes a program for reporting on and monitoring Project mitigation measures was prepared for the proposed Project and circulated with the Mitigated Negative Declaration; and

[1] Public Resources Code §§ 21000-21177
[2] 14 California Code of Regulations §§15000-15387

WHEREAS, on November 12, 2020 a duly noticed public hearing was conducted by the Planning Commission where the item was continued to the December 10, 2020 Planning Commission meeting; and

WHEREAS, on December 10, 2020 a hearing was conducted by the Planning Commission to consider a recommendation that the City Council approve the Mitigated Negative Declaration and the Mitigation Monitoring Plan and approve the proposed Project; and

WHEREAS, on December 10, 2020 a hearing was conducted by the Planning Commission whereby the Planning Commission approved Planning Commission Resolution 2020-49, a recommendation that the City Council approve the Mitigated Negative Declaration and the Mitigation Monitoring Plan and approve the proposed Project; and

WHEREAS, on February 2, 2021 a hearing was conducted by the City Council whereby the City Council approved the Mitigated Negative Declaration and the Mitigation Monitoring Plan and approve the proposed Project; and

WHEREAS, at the conclusion of the public hearing, in the exercise of its own independent judgment, the City Council determined that the Mitigated Negative Declaration and the Mitigation Monitoring Plan would reduce the environmental impacts of the Project to levels of less than significant and that there is no substantial evidence supporting a fair argument that the Project will have a significant effect on the environment.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. **Recitals and Exhibits**

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. **Evidence**

That the City Council has considered all of the evidence submitted into the Administrative Record for the Mitigated Negative Declaration and Mitigation Monitoring Plan, including, but not limited to, the following:

(a) Initial Study and Mitigated Negative Declaration prepared for the proposed Project, attached hereto as Exhibit A;
(b) Notice of Intent to Adopt a Mitigated Negative Declaration/Newspaper Notice, attached hereto as Exhibit B;
(c) Mitigation Monitoring Plan, attached hereto as Exhibit C;

(d) Staff Report prepared for the City Council consideration and all documents, records and references related thereto, and Staff's presentation at the public hearing; and
(e) Testimony, comments and correspondence from all persons that were provided at, or prior to, the public hearing.

Section 3. **Findings**

That based on the content of the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the City Council makes the following findings:

(a) That the City has independently reviewed, analyzed, and considered the Mitigated Negative Declaration and Mitigation Monitoring Plan, and the whole record before it, including, the Initial Study and comments received;
(b) That the proposed mitigation measures will reduce all environmental impacts of the proposed Project to levels of insignificance and there is no substantial evidence supporting a fair argument that the Project will have a significant effect on the environment;
(c) That the Mitigated Negative Declaration and Mitigation Monitoring Plan have been completed in compliance with CEQA and the CEQA Guidelines consistent the City's Rules and Procedures for the Implementation of the California Environmental Quality Act.
(d) That the Mitigated Negative Declaration and Mitigation Monitoring Plan reflect the independent judgment and analysis of the City as lead agency for the proposed Project; and
(e) That the Mitigated Negative Declaration and Mitigation Monitoring Plan are adequate to serve as the required CEQA environmental documentation for the proposed Project.

Section 4. **Adoption**

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings, as set forth herein, the City Council hereby adopts the Mitigated Negative Declaration/Initial Study attached hereto as Exhibit A and the Mitigation Monitoring Plan attached hereto as Exhibit C.

Section 5. **Repeal of Conflicting Provisions**

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 6. **Severability**

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court

action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 7. **Effective Date**

That this Resolution shall take effect immediately upon the date of adoption.

Section 8. **Certification**

That the City Clerk for the City Council shall certify to the passage of this Resolution.

INITIAL STUDY/MITIGATED NEGATIVE DECLARATION (IS/MND) FOR IRIS PARK

MITIGATED NEGATIVE DECLARATION

Project Name: Iris Park

Findings: It is hereby determined that, based on the information contained in the attached Initial Study, the project would not have a significant adverse effect on the environment.

Mitigation measures necessary to avoid the potentially significant effects on the environment are included in the attached Initial Study, which is hereby incorporated and fully made part of this Mitigated Negative Declaration. The City of Moreno Valley has hereby agreed to implement each of the identified mitigation measures, which would be adopted as part of the attached Mitigation Monitoring and Reporting Program.

BACKGROUND INFORMATION AND PROJECT DESCRIPTION:

1. **Project Case Number(s):** PEN20-0063, PEN20-0065, PEN20-0066, PEN20-0067, PEN20-0068

2. **Project Title:** Iris Park

Pacifica Investments	Maple Lane Group, LLC
333 City Boulevard West	2005 Winston Court
Suite 1700	Upland, California 91784
Orange, California 92868	

8. **Project Location:** The project site is located southeast of the intersection of Iris Avenue and Perris Boulevard and directly south of the intersection of Iris Avenue and Wedow Drive in the city of Moreno Valley at Assessor's Parcel Number 312-020-025, and southeast of the southeasterly corner of Iris Avenue and Perris Boulevard. Moreno Valley is located in Riverside County and encompasses approximately 52 square miles of land. It is bounded by the city of Riverside to the east; the city of Perris to the south; the San Jacinto mountains to the east; and the cities of Redlands and San Bernardino to the north.

   As shown on Figure 1, Regional Location, regional access to the project site is provided by Interstate 215 (I-215). Iris Avenue provides local access to the project site. The project site is located in Section 29, Township 3 South, Range 3 West, San Bernardino Baseline and Meridian, and is mapped on the U.S. Geological Survey (USGS) Sunnymead 7.5' topographic quadrangle.

9. **General Plan Designation:** Residential (5 du/ac) and Commercial

Residential 5: The primary purpose of areas designated Residential 5 is to provide for single-family detached housing on standard sized suburban lots.

Commercial: The primary purpose of areas designated Commercial is to provide commercial properties and distribute commercial areas citywide to encourage walking and bicycling.

10. **Specific Plan Name and Designation:** N/A

11. **Existing Zoning:** Residential 5 District (R5) and Community Commercial (CC)

Residential 5 District: The primary purpose of the R5 district is to provide for residential development on common sized suburban lots. This district is intended as an area for development of single-family residential and mobile home subdivisions at a maximum allowable density of 5 du/ac, as indicated in Section 9.03.020 of the Municipal Code.

Community Commercial: The primary purpose of the community commercial (CC) district is to provide for the general shopping needs of area residents and workers with a variety of business, retail, personal and related or similar services.

To implement the proposed development, the project includes a General Plan Amendment to change the Land Use designation of the site from Residential: Max. 5 du/ac (R5) and Commercial (C) to Residential: Max. 10 du/ac (R10) and a Change of Zone to reclassify the site from Residential 5 (R5) District and Community Commercial (CC) District to Residential Single-Family 10 (RS10) District.

12. **Surrounding Land Uses and Setting:**

	Land Use	General Plan	Zoning
Project Site	**Vacant**	**Residential: 5 max du/ac (R5) Commercial (C)**	**Residential 5 (R5) District Community Commercial (CC) District**
North	Single-Family Residential	Residential: Max. 5 du/ac (R5)	Residential 5 (R5) District
South	Single-Family Residential	Residential: Max. 5 du/ac (R5) Residential: Max. 10 du/ac (R10)	Residential 5 (R5) District Residential 10 (R10) District
East	Single-Family Residential	Residential: Max. 5 du/ac (R5)	Residential 5 (R5) District
West	Commercial Shopping Center, Val Verde Academy	Commercial (C) Residential: Max. 5 du/ac (R5)	Community Commercial (CC) District Residential 5 (R5) District

13. **Description of the Site and Project:**

Environmental Setting

The approximately 10.82-acre project site consists of one parcel (Assessor's Parcel Number 312-020-025) and is a vacant lot. A 100-foot-wide easement in favor of the State of California for the California Aqueduct is located along the western edge of the site, covering 3.02 acres. Vehicular access to the site is provided by Iris Avenue. The perimeter

of the site is partially secured by wall sand fencing on adjacent properties along the eastern, western, and southern portions of the site.

Vegetation on the site consists of a light moderate to growth of weeds. The topography of the site is relatively flat, with a very gentle fall towards the southeast. The project site is located within a relatively flat valley, with elevations averaging approximately 1496 feet above mean sea level. Figure 1, *Aerial View*, provides an aerial of the existing project site.

Project Description

Project Characteristics

The Iris Park project ("project" or "proposed project") would construct 81 new single-family residences, as well as onsite roadways, sidewalks, a detention basin, common open space, and private open space areas on the project site. Figure 6, Conceptual Site Plan, illustrates the proposed site configuration following project implementation.

The proposed project site totals approximately 10.82 acres in size, which includes the 100-foot-wide California Aqueduct easement on the western portion of the site. In conjunction with the project, the City intends to construct a public park along this easement. The proposed public park would include landscaping and an extension of the existing trail located along segments of the California Aqueduct easement in the city.

To implement the proposed development, the project includes a General Plan Amendment to change the Land Use designation of the site from Residential: Max. 5 du/ac (R5), which currently composes approximately 9.87 acres on the site, and Commercial (C), which currently composes approximately 0.95 acres on the site, to Residential: Max. 10 du/ac (R10); a Change of Zone to reclassify the site from Residential 5 (R5) and Community Commercial (CC) to Residential Single-Family 10 (RS10); a Tentative Tract Map (TTM 37909) to subdivide the project site into 81 lots; and a Conditional Use Permit for a Planned Unit Development.

Project Features

The proposed residential development would include 81 single-family residences on the 10.82-acre project site, yielding a density of 7.48 du/acre. Residential lots would range from 2,197 SF to 4,741 SF. The single-family residences would range in size from 1,848 square feet (SF) to 2,201 SF, with 3-bedroom to 5-bedroom floor plans, private yards, and two-car garages. Overall, the project proposes a total residential building footprint of 164,549 SF. The minimum residential lot area would be 2,250 SF, with a range from 2,250 SF to 4,293 SF. Table 1 below provides a breakdown of the proposed development features on the project site.

Table 1. Proposed Development

Floor Plan Type	Percent of the project site	No. of Plans`	Total Livable Area (SF)
3 bedroom/2.5 bath	30%	26	48,048
4 bedroom/2.5 bath	30%	23	46,069
4 bedroom/3 bath	40%	32	70,432
Totals:	**100%**	**81**	**164,549**

The project also proposes to construct common open space areas, private open space areas, and a detention basin, as detailed in Table 2 below. A 17,996 square-foot common open space area is proposed within the northeastern portion of the residential development and would include landscaping, walkways, and seating areas. Smaller open space areas, including a 4,619 square-foot fitness park, would be located along the western edge of the site, adjacent to the California Aqueduct easement. The easement itself would provide a trail and landscaped areas. New walkways are also proposed throughout the residential development. The project would provide private yards within the single-family residential lots.

Table 2. Proposed Open Space

Description	Area (SF)
Common Open Space	29,185
Private Open Space	51,572
Total	**80,757**

New 6-foot high walls would be constructed along the northern boundary of the site adjacent to Iris Avenue, in addition to new 4-foot high tubular steel fencing along the western boundary of the site adjacent to the California Aqueduct easement. The existing fence along the eastern boundary of the site would remain. The proposed residential project will have a gated entry along Iris Avenue, with a gate set back sixty feet from the street.

Architectural Design

The proposed two-story single-family residences would include three different architectural styles to provide aesthetic variation throughout the community. The single-family residences would be designed with various architectural elements, multi-level rooflines, and an earth tone color scheme. In addition, the residences would incorporate stucco finishes, detailed roof elements, awnings, metal railings, and decorative windows and doors in the exterior design. Enhanced elevations would be incorporated where building sides or rears are visible from streets. The tallest roofline of the two-story residences would be less than 30 feet in height.

Access and Circulation

Vehicular access to the project site would be provided via two gated driveways on Iris Avenue, which would provide access to the community's internal roadways. The proposed residential project will have a gated main entrance along Iris Avenue, with a gate set back sixty feet from the street and a secondary gated access point off of Iris Avenue. The main entrance area will have a turnaround area before the gate and will feature a storage lane for visitors to use a call box for permission to enter the community. The single-family residences would be accessed by private driveways along the internal roadways, as shown on Figure 6, *Conceptual Site Plan*. The project also includes pedestrian paths to provide for non-vehicular on-site circulation and for connection to existing sidewalks and bike lanes adjacent to the proposed project.

Parking

The proposed project would provide garage, driveway, and on-street parking. Each residence would have a two-car garage. The project would also provide 49 on-street parking spaces. Table 3 shows the parking to be provided by the project.

Table 3. Proposed Parking

Type of Parking	Required	Provided
Enclosed Parking Spaces	162	162
Guest Parking	41	49
Total Parking Spaces Provided	203	211
Parking to Unit Ratio		2.6/dwelling unit

Recreation and Open Space

The project includes the development of 29,185 SF of common open space. As part of the common open space, a 17,996 SF community park is proposed within the northeastern portion of the project site, and a 4,619 SF fitness park is proposed within the western portion of the project site. The community park would provide amenities for future residents, such as walking paths, seating areas, picnic tables, and a group shade structure with picnic tables and communal barbeques. The fitness park would provide four community fitness stations, picnic benches, and walking paths The project includes connections to a future public linear park, to be developed by the City, along the California Aqueduct easement. The future linear park would provide walking trails and landscaped areas. Figure 7, *Conceptual Landscape Plan,* illustrates the proposed recreational and open space areas within the project.

Landscaping

Landscaping proposed as part of the project would consist of drought-tolerant ornamental trees, shrubbery, and groundcover. Turf would be provided in active use areas in common open spaces. In total, the project would include 67,646 SF of total landscaping on the project site. The landscape plan would be consistent with the City's landscape and irrigation design standards, as provided in Section 9.17.030 of the City's Municipal Code.

Landscaping improvements would also be provided along Iris Avenue to City standards, which would include a 10-foot landscape setback between then existing sidewalk on Iris Avenue and the proposed community wall along the northern portion of the site. The street trees within the setback would consist of 36-inch and 24-inch ornamental box trees to enhance the frontage on Iris Avenue and allow for additional privacy within the proposed community. In addition, the roadway entrances into the proposed residential community would include decorative pavement, as well as decorative signage and matching height palm trees to aesthetically enhance the entrance to the residential community.

Overall, landscaping throughout the complex would be consistent and provide a cohesive design. Landscaping improvements at the perimeter of the complex are intended to integrate the proposed project with the surrounding neighborhood context and streetscape character. Figure 7, *Conceptual Landscape Plan*, illustrates the proposed landscape areas and landscape pallet.

Lighting

Outdoor lighting included as part of future development on the project site would be typical of single-family residential uses and would consist of wall-mounted lighting as well as pole-mounted lights along the proposed internal roadways. Nighttime lighting would be used as accent/security lighting in the park area. All of the project's outdoor lighting would

be directed downward and shielded to minimize off-site spill. The location of all exterior lighting would comply with lighting standards established in the City's Municipal Code.

Infrastructure Improvements

Water and Sewer

The proposed project would install new sewer lines within the project's proposed onsite streets that would connect to the existing sewer manholes and 18-inch sewer line in the 100-foot wide easement to the west. The project would also install new water lines within the project's proposed onsite streets that would connect to the existing 12-inch water line in Iris Avenue.

Drainage

In the existing condition, the topography of the project site is planar, with a small elevation change towards the southeast. Thus, the project site's current surface runoff flows generally as sheet flow to the south-southeast. In the developed condition, the project site would consist of several drainage sub-areas where storm flows would flow towards the proposed internal roadways and would ultimately be conveyed to the proposed infiltration basin system within the southeast corner of the property. The infiltration basin would be installed within the proposed landscape area onsite adjacent to the easement areas along the westerly portion of the property and would discharge to the existing point of discharge within the existing easements.

SUBDIVISION

As part of the project, TTM 37858 would be required to subdivide the existing parcel (APN 312- 020-025) to create 81 residential lots, as shown on Figure 8, *Tentative Tract Map*. The project site would consist of the residential development and associated infrastructure. Existing parcels in the project vicinity would not be impacted by the proposed parcel reconfiguration.

GENERAL PLAN AND ZONING

The project site currently has existing General Plan land use designations of Residential: Max. 5 du/ac (R5) and Commercial (C). As part of the project, a General Plan Amendment is proposed to change the designation of the site to Residential: Max. 10 du/ac (R10), which would allow the proposed single-family residences at a density of approximately 7.58 du/acre. In addition, the project site currently has zoning designations of Residential 5 (R5) District and Community Commercial (CC) District. As such, the project includes a zone change to Residential Single-Family 10 (RS10) to implement the proposed single-family residential uses. Section 9.03.020 of the City's Municipal Code states that the Residential Single-Family 10 District (RS10) zoning district is to provide for residential development on small single-family lots with amenities not generally found in suburban subdivisions. The district is intended for subdivisions at a maximum allowable density of 10 dwelling units per net acre.

Following approval of the General Plan Amendment and zone change, the land use designation and zoning classification associated with the project site would be consistent with the proposed use. As a result of project implementation, all other land use designations and zoning classifications in the project vicinity would remain the same as under existing conditions. Any General Plan Amendment or zone change proposed as

part of a future project (that is subject to discretionary approval) would be subject to separate environmental review on a project-specific basis, in accordance with the provisions of CEQA and the State CEQA Guidelines.

Table 4. Current General Plan Designation and Zoning Designation

Current General Plan Designation	Current Zoning Designation	Acreage
Residential: Max 5 du/ac (R5)	Residential 5 (R5) District	9.87
Commercial (C)	Community Commercial (CC) District	0.95

CONSTRUCTION DURATION AND ZONING

Construction activities include demolition of the existing structures, pavement, and the existing utility infrastructure; grubbing, grading, excavation and re-compaction of soils; utility and infrastructure installation; building construction; roadway pavement; and architectural coatings. Approximately 6,042 cy of soil is proposed to be exported during grading activities.

Construction activities for the project would occur over 26 months and would begin in 2021 with the opening for project occupancy in 2023. Construction activities would occur in the following stages: site preparation, grading, building construction, architectural coating, and paving. Pursuant to the Chapter 11.80.030 of the Moreno Valley Municipal Code, construction activities would be limited to between the hours of 7:00 a.m. to 8:00 p.m. Monday through Friday, excluding holidays unless written approval is obtained from the City Building Official or City Engineer.

DISCRETIONARY APPROVALS

In accordance with Sections 15050 and 15367 of the State CEQA Guidelines, the City is the designated Lead Agency for the proposed project and has principal authority and jurisdiction for CEQA actions and project approval. Responsible Agencies are those agencies that have jurisdiction or authority over one or more aspects associated with the development of a proposed project and/or mitigation. Trustee Agencies are State agencies that have jurisdiction by law over natural resources affected by a proposed project.

The following discretionary approvals by the City of Moreno Valley, as Lead Agency, are anticipated to be necessary for implementation of the proposed project:

City of Moreno Valley

- General Plan Amendment to change the site's land use designation from Residential: Max. 5 du/ac (R5) and Commercial (C) to Residential: Max. 10 du/ac (R10)
- Zone change from Residential 5 District (R5) and Community Commercial (CC) to Residential Single Family 10 District (RS10)
- Approval of Tentative Tract Map (TTM 37909)
- Approval of a Conditional Use Permit (CUP) for a Planned Unit Development (PUD)

14. **Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?**

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21080.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3(c) contains provisions specific to confidentiality.

The City sent notices regarding the project to the following Native American tribes that may have knowledge regarding tribal cultural resources in the project vicinity:

- Agua Caliente Band of Cahuilla Indians
- Cahuilla Band of Indians
- Desert Cahuilla Indians
- Los Coyotes Band of Cahuilla Mission Indians
- Morongo Band of Mission Indians
- Pechanga Band of Luiseño Indians
- Rincon Band of Luiseño Indians
- San Manuel Band of Mission Indians
- Santa Rosa Band of Mission Indians
- Serrano Nation of Mission Indians
- Soboba Band of Luiseño Indians

The Agua Caliente Band of Cahuilla Indians, Pechanga Band of Luiseño Indians, Rincon Band of Luiseño Indians, and Soboba Band of Luiseño Indians requested consultation regarding the proposed Project. The consulting tribes consider the area sensitive for cultural resources as several sites are located nearby. Although no information for site specific tribal cultural resources was provided (and there are no known tribal cultural resources on or adjacent to the project site), the consulting tribes requested inclusion of mitigation due to the potential of the Project to unearth previously undocumented tribal cultural resources during construction. These mitigation measures are incorporated in this Initial Study.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

☐	Aesthetics	☐	Agriculture & Forestry Resources	☐	Air Quality
☐	Biological Resources	☐	Cultural Resources	☐	Energy
☐	Geology & Soils	☐	Greenhouse Gas Emissions	☐	Hazards & Hazardous Materials
☐	Hydrology & Water Quality	☐	Land Use & Planning	☐	Mineral Resources
☐	Noise	☐	Population & Housing	☐	Public Services
☐	Recreation	☐	Transportation	☐	Tribal Cultural Resources
☐	Utilities & Service Systems	☐	Wildfire	☐	Mandatory Findings of Significance

DETERMINATION (To be completed by the Lead Agency):

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Date

City of Moreno Valley

For

EVALUATION OF ENVIRONMENTAL IMPACTS:

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a Lead Agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3) Once the Lead Agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect is significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4) Less Than Significant with Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The Lead Agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).

5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or another CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

   a) Earlier Analyses Used. Identify and state where they are available for review.

   b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

   c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g. general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7) Supporting Information Sources. A source list should be attached, and other sources used, or individuals contacted should be cited in the discussion.

8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.

9) The explanation of each issue should identify:

   a) the significance criteria or threshold, if any, used to evaluate each question; and

   b) the mitigation measure identified, if any, to reduce the impact to less than significance.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
I. AESTHETICS – Except as provided in Public Resources Code §21099 – Modernization of Transportation Analysis for Transit-Oriented Infill Projects – **Would the project:**				
a) Have a substantial adverse effect on a scenic vista?	☐	☐	☐	☒

Response:
No Impact. Scenic vistas consist of expansive, panoramic views of important, unique, or highly valued visual features that are seen from public viewing areas. This definition combines visual quality with information about view exposure to describe the level of interest or concern that viewers may have for the quality of a particular view or visual setting. A scenic vista can be impacted in two ways: a development project can have visual impacts by either directly diminishing the scenic quality of the vista or by blocking the view corridors or "vista" of the scenic resource. Important factors in determining whether the proposed project would block scenic vistas include the project's proposed height, mass, and location relative to surrounding land uses and travel corridors.

The project site is located within a developed area of the city of Moreno Valley and is not within or adjacent to a scenic vista. The site is adjacent to roadways and existing residential, commercial, and educational land uses. The Moreno Valley General Plan Figure 6-2, Major Scenic Resources identifies the scenic resources within the City that include: Box Springs Mountains, Moreno Peak, Russell Mountains, Reche Mountains, and the Badlands.

The site is located approximately 1.5 miles west of the Russell Mountains. However, only partial views of the Russell Mountains are present on the project site between the existing single-family residences to the east. The proposed single-family residences would be a maximum of approximately 30 feet in height and would be the same height as existing single-family residences to the north and south.

In addition, Figure 6-2, *Major Scenic Resources* of the General Plan designates various view corridors throughout the city. The proposed project is not within or adjacent to a designated view corridor. Thus, development of the project site with single-family residences would not obstruct, interrupt, or diminish a scenic vista; and impacts would not occur.

b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒

Response:
No Impact. There are no designated state scenic highways in Moreno Valley. The closest eligible state scenic highway is State Route (SR) 74, which travels east/west and is approximately 9 miles to the south of the project site. The closest officially designated state scenic highway is SR-243, 24 miles from the project site, which runs from Interstate 10 (I-10) south of the city of Banning limits and through Idyllwild to Mountain Center (Caltrans 2018). Neither of the scenic highways discussed above are visible from the project site, therefore, no impacts to state scenic highways would occur from implementation of the proposed project.

c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	☐	☐	☒	☐

Response:
Less Than Significant Impact. As described previously, the project site is located in a developing portion of Moreno Valley and is adjacent to roadways to the north, single-family residences to the east, commercial and educational uses to the west, and single-family residences to the south. Nearby parcels are developed with single-family residential, commercial, and educational uses. The project site is vacant. The existing character of the site and surrounding area is neither unique nor of special aesthetic value or quality.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

The project would develop the project site to contain 81 new single-family residences, which would be similar to the single-family residential uses that are adjacent to the east of the site, to the south of the site beyond the Val Verde Academy, and to the north of the site beyond Iris Avenue.

Zoning. The project site is currently zoned as Residential 5 District (R5) and Community Commercial District (CC). The project includes a zone change to Residential Single-Family 10 District (RS10) to implement the proposed single-family residential uses. Section 9.03.020 of the City's Municipal Code states that the Residential Single-Family 10 District (RS10) zoning district is to provide for residential development on small single-family lots with amenities not generally found in suburban subdivisions. The district is intended for subdivisions at a maximum allowable density of 10 du/ac.

The proposed development would also require approval of a Conditional Use Permit (CUP) for a Planned Unit Development (PUD), which allows for a development to establish unique criteria for such things as setbacks, lot width and depth, building separation, and lot size. This is allowed in exchange for a higher level of detail and amenities within the project than typically required for standard residential development. The project would include a higher level of detail and amenities than standard residential development, including recreational amenities. Therefore, the project would be consistent with the standards for approval of a PUD listed in Section 9.03.060 of the City's Municipal Code.

In addition, as required within the RS10 district, the project shall provide small lot single-family subdivisions on less than 15 gross acres with landscaping and decorative walls along the street side of corner lots and at least two of the following amenities throughout the project; front porches; automatic garage door openers; and/or electronic security systems. The proposed project would install landscaping and decorative walls throughout the project site, as seen in Figure 7, *Landscape Plan*. The project would also provide front porches and automatic garage door openers for compliance with Section 9.03.040 of the Municipal Code.

As detailed in Table AES-1, with approval of a PUD, the proposed project would be consistent with the development standards for the RS10 zoning district listed in Municipal Code Section 9.03.040. Thus, the proposed project would not conflict with applicable zoning regulations governing scenic quality.

Table AES-1: Project Consistency with Residential 10 District (RS10) Development Standards

Standard	Municipal Code	Proposed
Minimum lot size	4,500 SF	2,250 SF*
Lot width	45 ft.	30 ft.*
Lot depth	85 ft.	75 ft.*
Maximum density	10 du/acre	7.58 du/acre
Height limit	35 feet/2 stories	30 feet/2 stories
*consistent with approval of a PUD		

General Plan. The project site currently has a General Plan land use designation of Residential: Max. 5 du/ac (R5) and Commercial (C). The proposed project includes a General Plan Amendment to change the designation of the site to Residential: Max. 10 du/ac (R10). According to the General Plan Land Use Element, the Residential: Max. 10 du/ac (R10) General Plan land use designation allows for development of residential uses to a maximum density of 10 dwelling units per acre. According to the General Plan Land Use Element, the Commercial General Plan land use designation allows for development of commercial uses.

The project's proposed density of approximately 7.48 du/ac would be consistent with the maximum allowable density of 10 du/ac with approval of a PUD. In addition, the project would be consistent with the General Plan Land Use Element goals and policies related to scenic quality, as shown in Table AES-2.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table AES-2: Consistency with Land Use Element Goals and Policies Related to Scenic Quality

Goal or Policy	Project Consistency
Goal 2.1: A pattern of land uses, which organizes future growth, minimizes conflicts between land uses, and which promotes the rational utilization of presently underdeveloped and undeveloped parcels.	**Consistent.** The proposed project is a residential community on an infill parcel that creates a transition between the lower-density residential development to the east and the commercial and institutional uses to the west. This infill project would support the goal of minimizing conflict between land uses as it would contribute to the overall cohesiveness of the city by developing an underutilized plot of land. Therefore, the project would be consistent with Goal 2.1.
Goal 2.4: A supply of housing in sufficient numbers suitable to meet the diverse needs of future residents and to support healthy economic development without creating an oversupply of any particular type of housing.	**Consistent.** The proposed project would develop the vacant site with 81 new single-family residences, which would assist in meeting the diverse needs of future residents. In addition, the project would provide varying plans and architectural styles for the single-family residences, which would support healthy economic development ensuring an oversupply of a particular type of housing would not occur. Therefore, the project would be consistent with Goal 2.4.
Policy 2.2.8: The primary purpose of areas designated Residential 10 is to provide for a variety of residential products and to encourage innovation in housing types. Developments within Residential 10 areas are typically expected to provide amenities not generally found in suburban subdivisions, such as common open space and recreational areas. The maximum allowable density shall be 10.0 dwelling units per acre.	**Consistent.** This project involves a General Plan Amendment from R5 and C to R10 and a proposed Zone Change from R5 and CC to RS10. These land use changes allow for an increase in residential density from maximum 5 du/ac to 10 du/ac. The project implements an innovative housing type, detached single-family homes with attached garages on compact lots, and includes common open space areas and recreational features. Therefore, the project would be consistent with Policy 2.2.8.
Policy 2.2.12: Planned Unit Developments (PUD) shall be encouraged for residential construction in order to provide housing that is varied by type, design, form of ownership, and size. PUD's shall also provide opportunities to cluster units to protect significant environmental features and/or provide unique recreational facilities.	**Consistent.** As described in the Project Description, the proposed project would provide various plans and architectural styles for the single-family residences to provide housing that is varied by type, design, and size. In addition, the project would provide sidewalks and landscaping along the streets and within common areas provide unique recreational

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
	facilities. Therefore, the project would be consistent with Policy 2.2.12.			
Policy 2.2.13: Discourage costly "leap-frog" development patterns by encouraging in-fill development wherever feasible, thereby reducing overall housing costs. Development within an area designated as SP 212-1 (Moreno Highlands) is not considered to be leapfrog development.	**Consistent.** The project is proposing to develop 81 single-family detached residences on an infill parcel. The project having a density of 10 du/ ac and developing an infill parcel is consistent with this local policy and is also supportive of State guidance to increase housing availability and affordability. Therefore, the project would be consistent with Policy 2.2.13.			
Policy 2.2.14: Encourage a diversity of housing types, including conventional, factory built, mobile home, and multiple family dwelling units.	**Consistent.** As described in the previous response, the proposed project would provide varying plans and architectural styles for the single-family residences to provide a diversity of housing types. Therefore, the project would be consistent with Policy 2.2.14.			
Policy 2.3.1: Within individual residential projects, a variety of floor plans and elevations should be offered.	**Consistent.** As described in the previous response, the proposed project would provide varying plans and architectural styles for the single-family residences. Therefore, the project would be consistent with Policy 2.3.1.			
Policy 2.3.2: Encourage building placement variations, roofline variations, architectural projections, and other embellishments to enhance the visual interest along residential streets.	**Consistent.** The proposed residential development would be designed with contemporary architectural elements, multi-level rooflines, and a complementary color scheme. Architectural elements in the exterior design would include stucco finish, stone veneer accents, metal awnings and deck railings, and vinyl window and door trim. The project would be designed with varying architectural design influences. When complete, the development would be representative of a modern residential community. In addition, landscaping improvements associated with the proposed project are anticipated to improve the existing visual character of the project site and would serve to provide increased visual interest along residential streets. Therefore, the project would be consistent with Policy 2.3.2.			

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Policy 2.3.3: Discourage the development of single-family residences with a bulk (building mass) that is out of scale with the size of the parcels on which they are located.	**Consistent.** The proposed project would construct the proposed single-family residences with 3 different plans designed to conform to the size of the parcel on which they are located. Therefore, the project would be consistent with Policy 2.3.3.
Policy 2.3.4: Design large-scale small lot single family and multiple family residential projects to group dwellings around individual open space and/or recreational features.	**Consistent.** The proposed project would construct the proposed single-family residences with approximately 40,200 SF of private open space, as well as approximately 26,136 SF of common open space within the designated community park and fitness park proposed for the project site. Therefore, the project would be consistent with Policy 2.3.4.
Policy 2.10.1: Encourage a design theme for each new development that is compatible with surrounding existing and planned developments.	**Consistent.** The proposed project includes architectural styles, colors, and materials that are consistent with surrounding development, while providing enhancements that are consistent with contemporary architectural trends, allowing the community to be both compatible and distinctive. The overall theme encourages a seamless transition between the adjacent developments. Therefore, the project would be consistent with Policy 2.10.1.

Overall, the proposed project would be consistent with development standards required by the Residential Single-Family 10 Zoning District (RS10) with the approval of a CUP for a PUD, the Residential: Max. 10 du/ac (R10) General Plan land use designation, as well as the Land Use Element goals and policies related to scenic quality. Thus, the project would not conflict with applicable zoning and other regulations governing scenic quality. Furthermore, the project would increase the visual cohesion between the project site and the surrounding single-family residential area. Hence, the proposed project would not degrade the visual character of the project site and surrounding area; and impacts would be less than significant.

d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☐	☐	☒	☐

Response:

Less Than Significant Impact. The project site is undeveloped and has no existing source of nighttime lighting. However, the project site is surrounded by sources of nighttime lighting including streetlights along Iris Avenue, illumination from vehicle headlights, offsite exterior residential related lighting, offsite exterior commercial lighting, offsite exterior institutional lighting, and interior illumination passing through windows. Sensitive receptors relative to lighting and glare include residents, motorists, and pedestrians.

The proposed project would include the provision of street lighting and nighttime lighting for security purposes around all of the residences. Implementation of the proposed project would contribute additional sources to the overall ambient

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

nighttime lighting conditions. However, all outdoor lighting would be hooded, appropriately angled away from adjacent land uses, and would comply with the Moreno Valley Municipal Code, Section 9.16.280 that will highlight building features and add emphasis to important spaces and entryways, while limiting glare and light trespass onto adjacent properties. Because the project site is within an urban area with various sources of existing nighttime lighting, and the project would be required to comply with the City's lighting regulations that would be verified by the City's Building and Safety Division during the permitting process, the lighting increase in light that would be generated by the project would not adversely affect day or nighttime views in the area. Overall, lighting impacts would be less than significant.

Reflective light (glare) can be caused by sunlight or artificial light reflecting from finished surfaces such as window glass or other reflective materials. Generally, darker or mirrored glass would have a higher visible light reflectance than clear glass. Buildings constructed of highly reflective materials from which the sun reflects at a low angle can cause adverse glare. The proposed project would not use highly reflective surfaces, or glass sided buildings. Although the residences would contain windows, the windows would be separated by stucco and architectural elements, which would limit the potential of glare. In addition, as described previously, onsite lighting would be angled down and shielded, which would avoid the potential on onsite lighting to generate glare. Therefore, the project would not generate substantial sources of glare, and impacts would be less than significant.

Existing Plans, Programs, or Policies

None.

Mitigation Measures

None.

II. AGRICULTURE AND FOREST RESOURCES – In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest protocols adopted by the California Air Resources Board.

Would the project:

a)	Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Response: **No Impact.** The project site is identified by the California Department of Conservation (CDC) Important Farmland Finder as "Urban and Built-Up Land" (CDC 2020). "Urban and Build-Up Land" is occupied by structures with a building density of at least 1 unit to 1.5 acres, or approximately 6 structures to a 10-acre parcel. The project site is not designated as Prime, Unique, or Farmland of Statewide Importance. Thus, the proposed project would not result in impacts related to conversion of Prime Farmland, Unique Farmland, or Farmland of Statewide Importance to non-agricultural use.				
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
Response: **No Impact.** The project site has an existing zoning designation of Residential 5 (R5) District and Community Commercial (CC) District. The project site is not zoned for agricultural use and is not subject to a Williamson Act contract. Thus, the proposed project would not result in impacts related to conflict with an existing agricultural zoning or Williamson Act contract, and impacts would not occur.				
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	☐	☐	☐	☒
Response: **No Impact.** No forest land exists on or adjacent to the project site. The project is not zoned for forest land or timberland uses. Thus, the proposed project would not result in impacts related to conflict with an existing forest land or timberland zoning, and impacts would not occur.				
d) Result in the loss of forest land or conversion of forest land to non-forest use?	☐	☐	☐	☒
Response: **No Impact.** No forest land exists on the project site. Thus, the proposed project would not result in the loss of forest land or conversion of forest land to non-forest use, and impacts would not occur.				
e) Involve other changes in the existing environment which, due to their location or nature, could result in the conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	☐	☐	☐	☒
Response: **No Impact.** As described in the responses above, the project area does not include farmland or forest land; thus, implementation of the proposed project would not involve other changes in the existing environment which, due to their location or nature, could result in conversion of farmland, to non-agricultural use or conversion of forest land to non-forest use. Impacts would not occur.				
Existing Plans, Programs, or Policies None.				
Mitigation Measure None.

III. AIR QUALITY – Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. **Would the project:**				
a) Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☒	☐

Response: Less Than Significant Impact. The project site is located in the South Coast Air Basin (SCAB), which is under the jurisdictional boundaries of the South Coast Air Quality Management District (SCAQMD). The SCAQMD and Southern California Association of Governments (SCAG) are responsible for preparing the Air Quality Management Plan (AQMP), which addresses federal and state Clean Air Act (CAA) requirements. The AQMP details goals, policies, and programs for improving air quality in the Basin. In preparation of the AQMP, SCAQMD and SCAG uses regional growth projections to forecast, inventory, and allocate regional emissions from land use and development-related sources.

As described in Chapter 12, Section 12.2 and Section 12.3 of the SCAQMD's CEQA Air Quality Handbook (1993), for purposes of analyzing consistency with the AQMP, if a proposed project would result in growth that is substantially greater than what was anticipated, then the proposed project would conflict with the AQMP. On the other hand, if a project's density is within the anticipated growth of a jurisdiction, its emissions would be consistent with the assumptions in the AQMP, and the project would not conflict with SCAQMD's attainment plans. In addition, the SCAQMD considers projects consistent with the AQMP if the project would not result in an increase in the frequency or severity of existing air quality violations or cause a new violation.

The proposed project is a residential development project on currently vacant site. The site is located within a residential area of Moreno Valley. As further described in Section 14, *Population and Housing*, the 81 new residences would result in the addition of 321 new residents, which would represent a population increase of approximately 0.15 percent and a 0.14 percent increase in residential units within the city. This limited level of growth would not exceed growth projections and would be consistent with the assumptions in the AQMP.

In addition, emissions generated by construction and operation of the proposed project would not exceed thresholds. As described in the analysis below, the project would not result in an increase in the frequency or severity of existing air quality violations or cause a new violation. Therefore, impacts related to conflict with the AQMP from the proposed project would be less than significant.

b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	☐	☐	☒	☐

Response:

Less Than Significant Impact. The SCAB is in a non-attainment status for federal ozone standards, federal carbon monoxide standards, and state and federal particulate matter standards. Any development in the SCAB, including the proposed project, could cumulatively contribute to these pollutant violations. The methodologies from the SCAQMD CEQA Air Quality Handbook are used in evaluating project impacts. SCAQMD has established daily mass thresholds for regional pollutant emissions, which are shown in Table AQ-1. Should construction or operation of the proposed project exceed these thresholds a significant impact could occur; however, if estimated emissions are less than the thresholds, impacts would be considered less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table AQ-1: SCAQMD Regional Daily Emissions Thresholds

Pollutant	Construction (lbs/day)	Operations (lbs/day)
NOx	100	55
VOC	75	55
PM-10	150	150
PM-2.5	55	55
SOx	150	150
CO	550	550

Source: CalEEMod Emission Summary (Appendix A)

Construction

Construction activities associated with the proposed project would generate pollutant emissions from the following: (1) demolition and removal of the existing onsite improvements and recycling debris; (2) grading and excavation; (3) construction workers traveling to and from project site; (4) delivery and hauling of construction supplies to, and debris from, the project site; (5) fuel combustion by onsite construction equipment; (6) building construction; application of architectural coatings; and paving. The amount of emissions generated on a daily basis would vary, depending on the intensity and types of construction activities occurring.

It is mandatory for all construction projects to comply with several SCAQMD Rules, including Rule 823 for controlling fugitive dust, PM-10, and PM-2.5 emissions from construction activities. Rule 823 requirements include, but are not limited to: applying water in sufficient quantities to prevent the generation of visible dust plumes, applying soil binders to uncovered areas, reestablishing ground cover as quickly as possible, utilizing a wheel washing system to remove bulk material from tires and vehicle undercarriages before vehicles exit the site, covering all trucks hauling soil with a fabric cover and maintaining a freeboard height of 12 inches, and maintaining effective cover over exposed areas. Compliance with Rule 823 was accounted for in the construction emissions modeling for the project. In addition, implementation of SCAQMD Rule 1113 that governs the VOC content in architectural coating, paint, thinners, and solvents, was accounted for in the construction emissions modeling for the project. As shown in Table AQ-2, CalEEMod results indicate that construction emissions generated by the proposed project would not exceed SCAQMD regional thresholds. Therefore, emissions from construction activities would be less than significant.

Source: CalEEMod Emission Summary (Appendix A)

Operation

Operation of the 81 single-family residences would result in long-term regional emissions of criteria air pollutants and ozone precursors associated with area sources, such as natural gas consumption, landscaping, applications of architectural coatings, and consumer products. However, vehicular emissions would generate a majority of the operational emissions from the project.

Operational emissions associated with the proposed project were modeled using CalEEMod and are presented in Table AQ-3. As shown, the proposed project would result in long-term regional emissions of the criteria pollutants that would be below the SCAQMD's applicable thresholds. Therefore, operation of the project would not result in a cumulatively considerable net increase of any criteria pollutant impacts, and operational impacts would be less than significant.

c) Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☒	☐

Response:

Less Than Significant Impact. The SCAQMD's *Final Localized Significance Threshold Methodology* (SCAQMD 2008) recommends the evaluation of localized NO2, CO, PM-10, and PM-2.5 construction-related impacts to sensitive receptors in the immediate vicinity of the project site. Such an evaluation is referred to as a localized significance threshold (LST) analysis. According to the SCAQMD's *Final Localized Significance Threshold Methodology*, "off-site mobile emissions from the project should not be included in the emissions compared to the LSTs" (SCAQMD 2008). SCAQMD has developed LSTs that represent the maximum emissions from a project that are not expected to cause or contribute to an exceedance of the most stringent applicable federal or state ambient air quality standards, and thus would not cause or contribute to localized air quality impacts. LSTs are developed based on the ambient concentrations of NOx, CO, PM-10, and PM-2.5 pollutants for each of the 38 source receptor areas (SRAs) in the SCAB. The project site is located within SRA 24, Perris Valley. The LSTs for this SRA were applied to the project.

Sensitive receptors can include residences, schools, playgrounds, childcare centers, athletic facilities. The project location is surrounded by several residential areas to the north and east with a shopping center and Val Verde Academy to the west of the project. The closest sensitive receptors where such a receptor could reside for 24 hours or longer are located at existing residences along the project's eastern property line. Therefore, the distance for sensitive receptors in the LST assessment was set at 25 meters, the shortest distance contained in the SCAQMD LST emission look-up tables (AQ 2020).

Construction

The localized thresholds from the mass rate look-up tables in SCAQMD's Final Localized Significance Threshold Methodology document, were developed for use on projects that are less than or equal to 5-acres in size or have a disturbance of less than or equal to 5 acres daily. The maximum daily area disturbed during construction is 4.0 acres, which occurs during grading activities. Therefore, the maximum daily disturbed area during construction was set as 4.0 acres for the localized assessment of construction impacts (AQ 2020).

Table AQ-4 identifies the localized impacts at the nearest receptor location in the vicinity of the project. As shown, project construction-source emissions would not exceed the applicable SCAQMD LSTs for emissions of any criteria pollutant. Thus, implementation of the project would not result in a localized air quality impact.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table AQ-4: Localized Significance Summary of Construction

Construction Activity	Maximum Daily Emissions (pounds/day)			
	NOx	CO	PM-10	PM-2.5
2021				
Site Preparation	60.8	21.9	9.6	5.3

ROG=reactive organic gases NOx=oxides of nitrogen PM-10= particulate matter 10 microns or less in diameter
PM-2.5=particulate matter 2.5 microns or less in diameter CO=carbon monoxide SOx= sulfure oxides
PM emissions reflect SCAQMD Rule 823 reductions
Source: see CalEEMod model output

As described in Response 4.3(a), the proposed project would not significantly increase long-term emissions within the project area. Construction of the proposed project may expose nearby residential sensitive receptors to airborne particulates as well as a small quantity of construction equipment pollutants (i.e., usually diesel-fueled vehicles and equipment). However, construction contractors would be required to implement measures to reduce or eliminate emissions by following SCAQMD's standard construction practices (Rules 822 and 823, as included as PPP AQ-1 and PPP AQ-2). Rule 822 requires implementation of dust suppression techniques to prevent fugitive dust from creating a nuisance off site. Rule 823 requires that fugitive dust be controlled with best available control measures so that the presence of such dust does not remain visible in the atmosphere beyond the property line of the emission source. Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations during construction, and impacts would be less than significant.

Operation

For operational LSTs, onsite passenger car and truck travel emissions were modeled. The SCAQMD has established that impacts to air quality are significant if there is a potential to contribute or cause localized exceedances of the federal and/or state Ambient Air Quality Standards. As shown on Table AQ-5, operational emissions would not exceed the SCAQMD's localized significance thresholds for any criteria pollutant at the nearest sensitive receptor. Therefore, localized air quality impacts from operational activities would be less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table AQ-5: Localized Significance Summary of Operations

Operational Activity	Maximum Daily Localized Emissions (pounds/day)

d) Result in other emissions (such as those leading to odors adversely affecting a substantial number of people?	☐	☐	☒	☐

Response:

No Impact. The proposed project would not emit other emissions, such as those generating objectionable odors, that would affect a substantial number of people. The threshold for odor is identified by SCAQMD Rule 822, Nuisance, which states:

> *A person shall not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property. The provisions of this rule shall not apply to odors emanating from agricultural operations necessary for the growing of crops or the raising of fowl or animals*.

The type of facilities that are considered to result in other emissions, such as objectionable odors, include wastewater treatments plants, compost facilities, landfills, solid waste transfer stations, fiberglass manufacturing facilities, paint/coating operations (e.g., auto body shops), dairy farms, petroleum refineries, asphalt batch plants, chemical manufacturing, and food manufacturing facilities.

The proposed project would implement residential development within the project area that does not involve the types of uses that would emit objectionable odors affecting a substantial number of people. In addition, odors generated by non-residential land uses are required to be in compliance with SCAQMD Rule 822, which would prevent nuisance odors.

During construction, emissions from construction equipment, architectural coatings, and paving activities may generate odors. However, these odors would be temporary, intermittent in nature, and would not affect a substantial number of people. The noxious odors would be confined to the immediate vicinity of the construction equipment. Also, the short-term construction-related odors would cease upon the drying or hardening of the odor-producing materials. Therefore, impacts associated with other emissions, such as odors, would not adversely affect a substantial number of people.

Existing Plans, Programs, or Policies

PPP AQ-1: Rule 822. The project is required to comply with the provisions of South Coast Air Quality Management District (SCAQMD) Rule 822. The project shall not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

persons or to the public, or which endanger the comfort, repose, health or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property.

PPP AQ-2: Rule 823. The project is required to comply with the provisions of South Coast Air Quality Management District (SCAQMD) Rule 823, which includes the following:

- All clearing, grading, earth-moving, or excavation activities shall cease when winds exceed 25 mph per SCAQMD guidelines in order to limit fugitive dust emissions.
- The contractor shall ensure that all disturbed unpaved roads and disturbed areas within the project are watered, with complete coverage of disturbed areas, at least 3 times daily during dry weather; preferably in the mid-morning, afternoon, and after work is done for the day.
- The contractor shall ensure that traffic speeds on unpaved roads and project site areas are reduced to 15 miles per hour or less.

PPP AQ-3: Rule 1113. The project is required to comply with the provisions of South Coast Air Quality Management District Rule (SCAQMD) Rule 1113. Only "Low-Volatile Organic Compounds" paints (no more than 50 gram/liter of VOC) and/or High Pressure Low Volume (HPLV) applications shall be used**.**

Mitigation Measure
None.

IV. BIOLOGICAL RESOURCES – Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☒	☐	☐

Response:
Less Than Significant Impact with Mitigation Incorporated. The project site is vacant and undeveloped and has been disturbed. A Biological Habitat Assessment was prepared for the proposed project, which included a literature search to identify special status plants, wildlife, and habitats known to occur in the vicinity of the project site. General plant and wildlife surveys were also conducted to identify any biological resources on or adjacent to the project site. The project site is within the Western Riverside County MSHCP Reche Canyon/Badlands Area Plan.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

The Habitat Assessment identified 18 special-status wildlife species and one special-status plant species. Special-status wildlife species identified in the literature review that were determined to have a potential for occurrence (PFO) within the survey area include California horned lark (*Eremophila alpestris actia*), California glossy snake (*Arizona elegans occidentalis*) and Western yellow bat (*Lasiurus xanthinus*). Species PFO was determined based on proximity of historical records and quality of habitat on site. Of the 18 target wildlife species documented to occur within the project vicinity, one (California horned lark) was determined to have a moderate potential for occurrence, and two (glossy snake and western yellow bat) had a low potential for occurrence based on proximity of historical records and quality of habitat on site.

California horned lark is a covered species under the MSHCP. This species may be subject to both temporary and permanent, direct, and indirect impacts, as a result of the proposed project (Blackhawk 2020). Thus, Mitigation Measure BIO-1 has been included to ensure compliance with the MSHCP through the payment of MSCHP mitigation fees. With implementation of Mitigation Measures BIO-1, impacts related to MSCHP covered special-status species would be less than significant.

Western yellow bat was determined to have a low potential for roosting within the survey area based on the presence of Mexican fan palms (*Washingtonia robusta*) present on lands immediately adjacent to the project site. However, suitable roosting sites for this species do not occur directly within the project and this species is presumed absent from the project site (Blackhawk 2020).

Based on California Natural Diversity Database, U.S. Fish and Wildlife Service, and Calfiornia Native Plant Society-documented occurrences within five miles of the project site, the literature review identified one special-status plant species requiring evaluation for its potential to occur on the project site (smooth tarplant; *Centromadia pungens ssp. laevis*). Smooth tarplant was determined to be absent from the project site and survey area, based on lack of individuals observed on site, proximity of historic records, and quality of habitat on site.

In addition, a Habitat Assessment for burrowing owl was performed throughout the survey area, as the entirety of the project falls within areas designated as MSHCP survey areas for the species. Blackhawk performed a habitat assessment for burrowing owl concurrently with the habitat assessment on February 24, 2020. The assessment was performed per the Burrowing Owl Survey Instructions for the Western Riverside Multiple Species Habitat Conservation Plan Area – Step 1 Habitat Assessment (2005, by walking meandering transects through the entire survey area (excluding urban development). At the time of the assessment, the project site did not support suitable habitat for burrowing owl; however, two rubble piles containing shallow cavities were identified on the site and were occupied by desert cottontail and a domestic cat during the 2020 breeding season, precluding occupation by burrowing owl. The habitat assessment determined that the survey area does not support suitable habitat for burrowing owl. Though, occupied by other species at the time of the assessment, these rubble piles have a low potential to support migrating burrowing owls as temporary roost sites, if they become vacant (prior to construction. Following the MSHCP recommendation of a preconstruction burrowing owl survey within 30 days prior to construction, no negative impacts to burrowing owl are anticipated. If burrowing owls are present during the nonbreeding season (September 1 through February 28), burrowing owl exclusion measures may be implemented in accordance with the Plan.

The Habitat Assessment performed by Blackhawk Environmental identified suitable habitat and substrate for migratory birds that are protected under the Migratory Bird Treaty Act and California Department of Fish and Wildlife (CDFW) Codes 3503 and 3503.5 (Blackhawk 2020). Therefore, Mitigation Measure BIO-2 has been included to require pre-construction nesting bird surveys, as well as recommendations for vegetation removal outside of the nesting bird season. With implementation of Mitigation Measure BIO-2, impacts related to protected bird species would also be reduced to a less than significant level.

Thus, through adherence to the recommendations provided in the Habitat Assessment, payment of the MSHCP mitigation fees, and implementation of pre-construction nesting bird surveys, the project would be fully consistent with the MSCHP, CDFW, and USFWS, and impacts would be less than significant with implementation of MM BIO-1 and MM BIO-2.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☒

Response:
No Impact. The project site consists of vacant land that has been heavily disturbed by grading. The Habitat Assessment performed by Blackhawk Environmental identified that the presence of any potentially jurisdictional features, including associated vegetation/communities, presence of ordinary high watermarks (OHWMs) or streambeds, substrates, hydrological indicators and potential connectivity was not observed during the Habitat Assessment.
In addition, riparian/riverine habitats were not identified within the project site. Due to the lack of habitat which supports riparian species, riparian/riverine-associated species listed in section 6.1.2 of the Plan are not expected to occur. No MSHCP-covered or riparian-associated species were directly observed during the February 24, 2020 field survey (Blackhawk 2020). Thus, impacts to riparian habitat or other sensitive natural community would not occur from implementation of the proposed project.

c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☒

Response:
No Impact. As described in the response above, the project site does not contain any drainages, creeks, rivers, or other wetland areas, or any potentially jurisdictional water bodies that may be subject to USACE, RWQCB, and/or CDFW jurisdictions. In addition, no vernal pools or habitat that could potentially support fairy shrimp species were observed on the project site. Thus, impacts to state or federally protected wetlands would not occur from implementation of the proposed project.

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with an established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☒	☐

Response:
Less Than Significant Impact with Mitigation Incorporated. The project site is vacant and undeveloped but is adjacent to roadways, disturbed, and developed land uses. Due to the existing conditions of the project site and the surrounding land uses, the project would not interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors. There are no native wildlife nursery sites. However, as described previously, the site includes areas that are suitable for nesting birds that are protected under the Migratory Bird Treaty Act and California Department of Fish and Wildlife (CDFW) Codes 3503 and 3503.5 (Blackhawk 2020). Therefore, Mitigation Measure BIO-2 has been included to require pre-construction nesting bird surveys.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☒

Response:
No Impact. There are no local biological related policies or ordinances, such as a tree preservation policy or ordinance that is applicable to the proposed project. The project site is adjacent existing non-native ornamental trees that are on the right-of-way on Iris Avenue and adjacent to the single-family residential areas to the east and are not subject to any ordinances. The project site contains non-protected native shrubs and herbs as well as non-native grasses and shrubs, but there are no trees on the project site. Therefore, implementation of the proposed project would not conflict with local polices or ordinances protecting trees and no impact would occur.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or another approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒

Response:

No Impact. See Response 4(a) above. The project site occurs within the Western Riverside County MSHCP. As required by the MSHCP, a Habitat Assessment for burrowing owl was performed throughout the survey area, as the entirety of the project falls within areas designated as MSHCP survey areas for the species. Furthermore, MM BIO-1 includes payment of MSHCP mitigation fees. With performance of the Habitat Assessment for burrowing owl and payment of MSHCP mitigation fees, the project is consistent with the provisions of the MSHCP. Development of the project site would not conflict with local, regional, or state resource preservation and/or conservation policies. Therefore, no significant impacts would occur as a result of project implementation.

Existing Plans, Programs, or Policies

None.

Mitigation Measures

MM-BIO 1: Payment of MSHCP Mitigation Fees. Prior to issuance of a grading or building permit, the applicant will be required to pay relevant MSHCP mitigation fees per the Final Mitigation Fee Nexus Report. These fees will be determined in consultation with the Riverside Conservation Authority based on final project classification and impacts. Payment of all mitigation fees will be required as part of the project approval process.

MM-BIO 2: Preconstruction Nesting Bird Surveys. To the extent feasible, conduct vegetation removal outside of the nesting bird season (generally between March 1 and August 31). If vegetation removal is required during the nesting bird season, conduct take avoidance surveys for nesting birds within 100-feet of areas proposed for vegetation removal. Surveys should be conducted by a qualified biologist(s) within 14 days of vegetation removal. If active nests are observed, a qualified biologist will determine appropriate minimum disturbance buffers or other adaptive mitigation techniques (e.g., biological monitoring of active nests during construction-related activities, staggered schedules, etc.) to ensure that impacts to nesting birds are avoided until the nest is no longer active.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
V. CULTURAL RESOURCES – Would the project:				
a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?	☐	☐	☐	☒

Response:

Less than Significant. According to the *State CEQA Guidelines*, a historical resource is defined as something that meets one or more of the following criteria:

1) Listed in, or determined eligible for listing in, the California Register of Historical Resources;
2) Listed in a local register of historical resources as defined in Public Resources Code (PRC) Section 5020.1(k);
3) Identified as significant in a historical resources survey meeting the requirements of PRC Section 5024.1(g); or
4) Determined to be a historical resource by the project's Lead Agency.

As described previously, the project site is currently vacant. A review of historical aerial photographs and topographic maps indicate that prior to 1990s, the project area was agricultural. By the late 1990s, the surrounding area saw increased commercial and residential development that has continued up to the present day. Based on the results of the cultural resources search and survey, the proposed project area is considered to have a low sensitivity for presence of significant prehistoric or historical archaeological deposits or features (CUL 2020). Therefore, the project would not cause a substantial adverse change in the significance of a historical resource, and no impact would occur.

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	☐	☒	☐	☐

Response:

Less than Significant Impact with Mitigation Incorporated. The Phase 1 Cultural Resources Assessment prepared for the project site included an archaeological records check that was completed at the University of California, Riverside, Eastern Information Center (UCR-EIC). The UCR-EIC is the countywide clearing house/repository for all archaeological and cultural studies completed within the Riverside County. All pertinent data was researched, including previous studies for a one-mile radius surrounding the project area and the identification of recorded resources within one mile. In addition, the research included review of the current listings (federal, state, and local) for evaluated resources and reviewed historic maps. The record search indicated five previously recorded resources located within a one-mile radius of the area, with no resources located directly within the project area (CUL 2020). However, because previous resources have been identified within a one-mile radius of the project area, MM CUL-1 has been included to require contractors to halt work within 50 feet of any inadvertent finds of potential archaeological resource and to have the find evaluated by a qualified archaeologist.

Furthermore, as required for compliance with CEQA guidelines and the data requirements of the Office of Historic Preservation (OHP), an intensive field survey was conducted to adequately identify, describe, report , and, if possible, evaluate any cultural resources identified within the project area boundaries. This intensive field survey was conducted on March 6, 2020 by MCC Archaeologist Zachary White. During the course of fieldwork, survey conditions were fair and ground visibility was poor to good (10-80%) throughout the 10.8-acre project area, due to prior ground disturbance and vegetation coverage. The field survey determined that the property has been disturbed due to vehicular activity and modern dumping activity. No cultural resources were identified during the investigation (CUL 2020).

Based on the negative findings presented above, there are no cultural resources, significant or not, within or adjacent to the project area. In addition, as discussed previously, based on the results of the cultural resources search and survey, the proposed project area is considered to have a low sensitivity for presence of significant prehistoric or historical archaeological deposits or features Further, implementation of MM CUL-1 would ensure the proper treatment of any unknown resources that might be identified during construction activities. Thus, potential impacts related to archaeological resources would be less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Disturb any human remains, including those interred outside of formally dedicated cemeteries?	☐	☐	☐	☒

Response:

No Impact. The project site has not been previously used as a cemetery. Thus, human remains are not anticipated to be uncovered during project construction. In addition, procedures of conduct following the discovery of human remains on non-federal lands have been mandated by California Health and Safety Code §7050.5, PRC §5097.98 and the California Code of Regulations (CCR) §15064.5(e), which have been included as PPP CUL-1. According to the provisions in CEQA, should human remains be encountered, all work in the immediate vicinity of the burial must cease and any necessary steps to ensure the integrity of the immediate area must be taken. The Riverside County Coroner shall be immediately notified and must then determine whether the remains are Native American. If the Coroner determines the remains are Native American, the Coroner has 24 hours to notify the NAHC, who will in turn, notify the person they identify as the Most-Likely-Descendent (MLD) of any human remains. Further actions will be determined, in part, by the desires of the MLD. The MLD has 48 hours to make recommendations regarding the disposition of the remains following notification from the NAHC of the discovery. If the MLD does not make recommendations within 48 hours, the owner shall, with appropriate dignity, reinter the remains in an area of the property secure from further disturbance. Alternatively, if the owner does not accept the MLD's recommendations, the owner or the descendent may request mediation by the NAHC (CUL 2020). Thus, with compliance with PPP CUL-1, no impacts would occur.

Existing Plans, Programs, or Policies

PPP CUL-1: Human Remains. Should human remains be encountered, all work in the immediate vicinity of the burial must cease and any necessary steps to ensure the integrity of the immediate area must be taken. The Riverside County Coroner shall be immediately notified and must then determine whether the remains are Native American. If the Coroner determines the remains are Native American, the Coroner has 24 hours to notify the NAHC, who will in turn, notify the person they identify as the Most-Likely-Descendent (MLD) of any human remains. Further actions will be determined, in part, by the desires of the MLD. The MLD has 48 hours to make recommendations regarding the disposition of the remains following notification from the NAHC of the discovery. If the MLD does not make recommendations within 48 hours, the owner shall, with appropriate dignity, reinter the remains in an area of the property secure from further disturbance. Alternatively, if the owner does not accept the MLD's recommendations, the owner or the descendent may request mediation by the NAHC.

Mitigation Measures

MM CUL-1: Inadvertent Discoveries. In the event that buried archaeological resources are inadvertently discovered during ground-disturbing activities, work must be halted within 50 feet of the find until it can be evaluated by a qualified archaeologist. Construction activities could continue in other areas. If the discovery proves to be significant, additional work, such as data recovery excavation or fossil recovery, may be warranted and would be discussed in consultation with the appropriate regulatory agency(ies).

cannot be provided to the public due to the inclusion of confidential information pursuant to Government Code Section 6254.10.)

6. Phase I Cultural Resources Assessment: Iris Park Project, City of Moreno Valley, Riverside County, California. March 2020. Prepared by Material Culture Consulting, Inc. (Appendix C).

VI. ENERGY – Would the project:				
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	☐	☐	☒	☐

Response:

Less Than Significant Impact. The project site is currently vacant. The Southern California Gas Company provides natural gas to the surrounding area. Additionally, Southern California Edison and Moreno Valley Utility currently provides electricity services to the surrounding area. The proposed project would install onsite electrical and natural gas infrastructure that would connect to the existing offsite lines.

Construction

During construction of the proposed project, energy would be consumed in three general forms:

1. Petroleum-based fuels used to power off-road construction vehicles and equipment on the project sites, construction worker travel to and from the project sites, as well as delivery truck trips;
2. Electricity associated with providing temporary power for lighting and electric equipment; and
3. Energy used in the production of construction materials, such as asphalt, steel, concrete, pipes, and manufactured or processed materials such as lumber and glass.

Construction activities related to the proposed building and the associated infrastructure would not be expected to result in demand for fuel greater on a per-unit-of-development basis than other development projects in southern California. In addition, the extent of construction activities that would occur is limited to an 18-month period, and the demand for construction-related electricity and fuels would be limited to that time frame.

Construction contractors are required to demonstrate compliance with applicable California Air Resources Board (CARB) regulations governing the accelerated retrofitting, repowering, or replacement of heavy-duty diesel on- and off-road equipment as part of the City's construction permitting process. In addition, compliance with existing CARB idling restrictions would reduce fuel combustion and energy consumption. The energy modeling shows that project construction electricity usage over the 26-month construction period is estimated to use 31,154 gallons of diesel fuel, as shown in Table E-1.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table E-1: Estimated Construction Equipment Diesel Fuel Consumption

Activity	Equipment	Project Number	Project Hours per day	Default Horse-power	Default Load Factor	Days of Construction	Total Horsepower-hours	Fuel Rate (gal/hp-hr)	Fuel Use (gallons)

	Rollers	2	8	80	0.36	10	4,608	0.01942	89
								TOTAL	**31,154**

Source: CalEEMod Emission Summary (Appendix A)

Table E-2 shows that construction workers would use approximately 38,210gallons of fuel to travel to and from the project site, and haul trucks and vendor trucks would use approximately 19,888 gallons of diesel fuel.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table E-2: Estimated Construction Vehicle Trip Related Fuel Consumption

Construction Source	Gallons of Diesel Fuel	Gallons of Gasoline Fuel
Haul Trucks	2,165	0
Vendor Trucks	17,723	0
Worker Vehicles	0	38,210
Construction Vehicles Total	19,888	38,210

Source: CalEEMod Emission Summary (Appendix A)

Overall, construction activities would comply with all existing regulations, and would therefore not be expected to use fuel in a wasteful, inefficient, and unnecessary manner. Thus, no impacts related to construction energy usage would occur.

Operation

Once operational, the project would generate demand for electricity, natural gas, as well as gasoline for motor vehicle trips. Operational use of energy includes the heating, cooling, and lighting of the residences, water heating, operation of electrical systems and plug-in appliances, and outdoor lighting, and the transport of electricity, natural gas, and water to the residences where they would be consumed. This use of energy is typical for urban development, no additional energy infrastructure would be required to be built to operate the project, and no operational activities would occur that would result in extraordinary energy consumption.

The proposed project would be required to meet the current Title 24 energy efficiency standards. The City's administration of the Title 24 requirements includes review of design components and energy conservation measures that occurs during the permitting process, which ensures that all requirements are met. Typical Title 24 measures include insulation; use of energy-efficient heating, ventilation and air conditioning equipment (HVAC); solar-reflective roofing materials; energy-efficient indoor and outdoor lighting systems; reclamation of heat rejection from refrigeration equipment to generate hot water; and incorporation of skylights, etc. In complying with the Title 24 standards, impacts to peak energy usage periods would be minimized, and impacts on statewide and regional energy needs would be reduced. Thus, operation of the project would not use large amounts of energy or fuel in a wasteful manner, and no operational energy impacts would occur. As detailed in Table E-3, operation of the proposed project is estimated to result in the annual use of approximately 32,304 gallons of diesel fuel, 87,330 gallons of gas, approximately 706,035 kilowatt-hour (kWh) of electricity, and approximately 2,478,290 thousand British thermal units (kBTU) of natural gas.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Source: CalEEMod Emission Summary (Appendix A)

b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	☐	☐	☐	☒

Response:

No Impact. The proposed project would be required to meet the CalGreen energy efficiency standards in effect during permitting of the project. The City's administration of the requirements includes review of design components and energy conservation measures during the permitting process, which ensures that all requirements are met. In addition, the project would not conflict with or obstruct opportunities to use renewable energy, such as solar energy. As discussed, the project proposes to use photovoltaic (PV) solar panels on each of the residences to offset their energy demand in accordance with Title 24. As such, the project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency, and impacts would not occur.

Existing Plans, Programs, or Policies

PPP GHG-1: CalGreen Compliance, provided in Section 8, *Greenhouse Gas Emissions.*

Mitigation Measures

None.

5. City of Moreno Valley Energy Efficiency and Climate Action Strategy. Accessed at: http://www.moval.org/pdf/efficiency-climate112012nr.pdf (Accessed April 28, 2020).

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VII. GEOLOGY AND SOILS – Would the project:				
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to https://www.conservation.ca.gov/cgs/Documents/SP_042.pdf	☐	☐	☐	☒

Response:
No Impact. The project site is not located within a designated Alquist-Priolo Earthquake Fault Zone or County of Riverside Fault zone. As described by the Preliminary Geotechnical and Infiltration Feasibility Investigation prepared for the proposed project, the nearest known active fault zone is the San Jacinto fault zone located approximately 6.1 miles northeast of the project site. Other major faults within the region include the Elsinore fault zone located approximately 16.2 miles to the southwest, and the San Andreas fault zone located approximately 17 miles to the northeast of the project site (GEO 2020). Thus, the proposed project would not expose people or structures to potential substantial adverse effects from rupture of a known earthquake fault that is delineated on an Alquist-Priolo Earthquake Fault Zoning Map, and impacts would not occur.

ii) Strong seismic ground shaking?	☐	☐	☒	☐

Response:
Less Than Significant Impact. The project site is located within a seismically active region of Southern California. As mentioned previously, San Jacinto Fault is located approximately 6.1 miles northeast of the project site (GEO 2020). Thus, moderate to strong ground shaking can be expected at the site. The amount of motion can vary depending upon the distance to the fault, the magnitude of the earthquake, and the local geology. Greater movement can be expected at sites located closer to an earthquake epicenter, that consists of poorly consolidated material such as alluvium, and in response to an earthquake of great magnitude.

Structures built in the City are required to be built in compliance with the California Building Code (CBC [California Code of Regulations, Title 24, Part 2]), included in the Municipal Code as Chapter 8.20. In addition, PPP GEO-1 has been included to provide provisions for earthquake safety based on factors including occupancy type, the types of soils onsite, and the probable strength of the ground motion. Compliance with the CBC would include the incorporation of: 1) seismic safety features to minimize the potential for significant effects as a result of earthquakes; 2) proper building footings and foundations; and 3) construction of the building structures so that it would withstand the effects of strong ground shaking. Because the proposed project would be constructed in compliance with the CBC, the proposed project would result in a less than significant impact related to strong seismic ground shaking.

iii) Seismic-related ground failure, including liquefaction?	☐	☐	☒	☐

Response:
Less Than Significant Impact. Soil liquefaction is a phenomenon in which saturated, cohesionless soils layers, located within approximately 50 feet of the ground surface, lose strength due to cyclic pore water pressure generation from seismic shaking or other large cyclic loading. During the loss of stress, the soil acquires “mobility” sufficient to permit both horizontal and vertical movements. Soil properties and soil conditions such as type, age, texture, color, and consistency, along with historical depths to ground water are used to identify, characterize, and correlate liquefaction susceptible soils.

According to the Preliminary Geotechnical and Infiltration Feasibility Investigation for the proposed project, the County of Riverside has mapped the overall site area as having low liquefaction potential. Liquefaction is a process in which strong ground shaking causes saturated soils to lose their strength and behave as a fluid. Ground failure associated with liquefaction can result in severe damage to structures. Soil types susceptible to liquefaction include sand, silty sand, sandy silt, and silt, as well as soils having a plasticity and a moisture content greater than 85 percent of the liquid limit.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

The geologic conditions for increased susceptibility to liquefaction are: 1) shallow groundwater (generally less than 50 feet in depth); 2) the presence of unconsolidated sandy alluvium, typically Holocene in age; and 3) strong ground shaking. All three of these conditions must be present for liquefaction to occur.

Both the liquefaction potential index (LPI) and the liquefaction severity number (LSN) indices were calculated for the soil profiles of exploratory borings taken on the project site. The results indicate that the liquefaction risk of the site is "very low" to "low" per the LPI index of 0. In addition, the site exhibits "little to no expression of liquefaction, minor effects" per the LSN index of 0 (GEO 2020).

Furthermore, as described previously, structures built in the City are required to be built in compliance with the CBC, as included in the City's Municipal Code as Chapter 8.20 (and herein as PPP GEO-1), which implements specific requirements for seismic safety, excavation, foundations, retaining walls and site demolition. Compliance with the CBC, as included as PPP GEO-1, would require specific engineering design recommendations be incorporated into grading plans and building specifications as a condition of construction permit approval to ensure that project structures would withstand the effects of seismic ground movement, including liquefaction and settlement. Compliance with the requirements of the CBC and City's municipal code for structural safety (included as PPP GEO-1) would reduce hazards from seismic-related ground failure, including liquefaction and settlement to a less than significant level.

iv) Landslides?	☐	☐	☐	☒

Response:
No Impact. Landslides and other slope failures are secondary seismic effects that are common during or soon after earthquakes. Areas that are most susceptible to earthquake-induced landslides are steep slopes underlain by loose, weak soils, and areas on or adjacent to existing landslide deposits.

As described above, the project site is located in a seismically active region subject to strong ground shaking. However, the project site is flat and does not contain any steep slopes or any other areas that could be subject to landslides. In addition, the site is located in a flat and developed area. Therefore, the project would not cause potential substantial adverse effects related to slope instability or seismically induced landslides.

b) Result in substantial soil erosion or the loss of topsoil?	☐	☐	☒	☐

Response:
Less Than Significant Impact. Construction of the project has the potential to contribute to soil erosion and the loss of topsoil. Grading and excavation activities that would be required for the proposed project would expose and loosen topsoil, which could be eroded by wind or water.

The City's Municipal Code Section 8.21.170 implements the requirements of the all applicable requirements of the State Water Resources Control Board (SWRCB) and the Santa Ana Regional Water Quality Control Board (SARWQCB), and all projects in the City are required to conform to the permit requirements. This includes installation of Best Management Practices (BMPs) in compliance with the NPDES permit, which establishes minimum stormwater management requirements and controls that are required to be implemented for the proposed project. To reduce the potential for soil erosion and the loss of topsoil, a Stormwater Pollution Prevention Plan (SWPPP) is required by the Regional Water Quality Control Board (RWQCB) regulations to be developed by a QSD (Qualified SWPPP Developer). The SWPPP is required to address site-specific conditions related to specific grading and construction activities. The SWPPP is required to identify potential sources of erosion and sedimentation loss of topsoil during construction, identify erosion control BMPs to reduce or eliminate the erosion and loss of topsoil, such as use of silt fencing, fiber rolls, or gravel bags, stabilized construction entrance/exit, hydroseeding. With compliance with the City's Municipal Code, RWQCB requirements, and the BMPs in the SWPPP that is required to be prepared to implement the project included as PPP WQ-1, construction impacts related to erosion and loss of topsoil would be less than significant.

In addition, the proposed project includes installation of landscaping, such that during operation of the project substantial areas of loose topsoil that could erode would not exist. In addition, as described in Section 10, *Hydrology and Water*

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Quality, the onsite drainage features that would be installed by the project have been designed to slow, filter, and slowly discharge stormwater into the offsite drainage system, which would also reduce the potential for stormwater to erode topsoil during project operations. Furthermore, implementation of the project requires City approval of a site specific Water Quality Management Plan (WQMP), which would ensure that the City's Municipal Code, RWQCB requirements, and appropriate operational BMPs would be implemented to minimize or eliminate the potential for soil erosion or loss of topsoil to occur. As a result, potential impacts related to substantial soil erosion or loss of topsoil would be less than significant.				
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	☐	☐	☒	☐

Response:

Less Than Significant Impact. As described above, the project site is flat, and does not contain nor is adjacent to any slope or hillside area. The project would not create slopes. Thus, on or off-site landslides would not occur from implementation of the project.

Differential settlement or subsidence could occur if buildings or other improvements are built on low-strength foundation materials (including imported fill) or if improvements straddle the boundary between different types of subsurface materials (e.g., a boundary between native material and fill). Although differential settlement generally occurs slowly enough that its effects are not dangerous to inhabitants, it can cause building damage over time. Seismic settlement in dry soils generally occurs in loose sands and silty sands, with cohesive soils being less prone to significant settlement. The Idriss and Boulanger (2008) and Pradel (1998) methods were used to evaluate liquefaction-induced settlement and dry sand settlement. The results indicate that a maximum seismic settlement of less than one-half inch can be anticipated. Based on the relative uniformity of soil materials encountered, differential seismic settlement is anticipated to be approximately one-half of the total seismic settlement. Overall, since the site is underlain by dense/stiff to dense/hard older alluvial materials, the potential for settlement is considered low. In addition, the earthwork operations recommended to be conducted during the development of the site will mitigate any near surface loose soil conditions. Thus, impacts would be less than significant (GEO 2020).

Liquefaction also involves lateral or horizontal displacement (lateral spreading) of essentially intact blocks of surficial soils on slopes or toward a free-face slope such as river or canal bank. The potential for and magnitude of lateral spreading is dependent upon many conditions, including the presence of a relatively thick, continuous, potentially liquefiable sand layer and high slopes. As discussed previously, Both the liquefaction potential index (LPI) and the liquefaction severity number (LSN) indices were calculated for the soil profiles of exploratory borings taken on the project site. The results indicate that the liquefaction risk of the site is "very low" to "low" per the LPI index of 0. In addition, the site exhibits "little to no expression of liquefaction, minor effects" per the LSN index of 0. In addition, site reconnaissance and review of aerial imagery of the site and vicinity indicates that there are no known or suspected landslides at the site or in close proximity to the site and, therefore, the potential for seismically induced landslides occurring at the site is considered very low (GEO 2020).

Also, as described previously, compliance with the CBC, as included as PPP GEO-1, would require specific engineering design recommendations be incorporated into grading plans and building specifications as a condition of construction permit approval to ensure that project structures would withstand the effects of related to ground movement, including lateral spreading. Thus, with compliance with the CBC, as included as PPP GEO-1, would reduce potential impacts to a less than significant level.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?	☐	☐	☒	☐

Response:

Less Than Significant Impact. Expansive soils contain certain types of clay minerals that shrink or well as the moisture content changes; the shrinking or swelling can shift, crack, or break structures built on such soils. Arid or semiarid areas

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

with seasonal changes of soil moisture experiences, such as southern California, have a higher potential of expansive soils than areas with higher rainfall and more constant soil moisture.

The Preliminary Geotechnical and Infiltration Feasibility Investigation performed an evaluation of the potential for expansive soils at the site. The laboratory testing performed found the soils tested to have a very low expansion potential. For very low expansive soils, no specialized construction procedures to resist expansive soil activity are necessary. However, careful evaluation of on-site soils and any import fill for their expansion potential should be conducted during the grading operation (GEO 2020). As described previously, compliance with the CBC, as included as PPP GEO-1, would require specific engineering design recommendations be incorporated into grading plans and building specifications as a condition of construction permit approval to ensure that project structures would withstand the effects of related to ground movement, including expansive soils. Thus, impacts would be less than significant.

e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	☐	☐	☐	☒

Response:
No Impact. The project would not use septic tanks or alternative methods for disposal of wastewater into subsurface soils. Furthermore, the proposed project would connect to existing public wastewater infrastructure. Therefore, the project would not result in any impacts related to septic tanks or alternative wastewater disposal methods.

f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☐	☐	☒	☐

Response:
Less than Significant Impact with Mitigation Incorporated. The Phase 1 Paleontological Resources Assessment prepared for the project included a locality search conducted through the Natural History Museum of Los Angeles County (LACM) to identify any previously identified paleontological resources near the project site.

The Phase 1 Paleontological Resources Assessment found that no significant paleontological resources were identified within the project area during the locality search or field survey. The uppermost layers of soil within the project area are of recently disturbed Quaternary alluvium that is unlikely to contain significant fossil vertebrates. However, LACM notes that significant fossils have been found within similar alluvial mapped units, and that any excavations that extend deeper and into older and finer-grained Quaternary deposits may encounter significant fossil vertebrate remains. In addition, the project area is mapped in RCLIS as High B is based on geologic formations or mapped rock units that are known to contain (or have the correct age and depositional conditions to contain) significant paleontological resources at a depth below 5 feet (PALEO 2020).

Therefore, based on the results of the Phase I Paleontological Resources Assessment, the project area is considered to have high sensitivity for the potential to impact paleontological resources during construction activities at or below 5 feet in undisturbed sedimentary deposits. MCC recommends preparation of a Paleontological Resource Management Plan (PRMP) prior to construction excavation. Thus, Mitigation Measure PAL-1 has been included to require preparation of a PRMP and that a professional paleontologist be hired to oversee monitoring. With implementation of Mitigation Measure PAL-1, impacts to paleontological resources would be less than significant.

Existing Plans, Programs, or Policies
PPP GEO-1: California Building Code. The project is required to comply with the California Building Code as included in the City's Municipal Code Chapter 8.20 to preclude significant adverse effects associated with seismic hazards. California Building Code related and geologist and/or civil engineer specifications for the project are required to be incorporated into grading plans and specifications as a condition of project approval.
PPP WQ-1: Stormwater Pollution Prevention Plan, provided in Section 10, *Hydrology and Water Quality*.
PPP WQ-2: Water Quality Management Plan, provided in Section 10, *Hydrology and Water Quality*.

Mitigation Measures

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

MM PAL-1: Paleontological Resources. Prior to issuance of grading permits, the developer will retain a qualified paleontologist to provide the following monitoring and reporting services during construction:

- A trained and qualified paleontological monitor will perform full-time monitoring of any excavations on the project that have the potential to impact paleontological resources in undisturbed native sediments below 5 feet in depth. The monitor will have the ability to redirect construction activities to ensure avoidance of adverse impacts to paleontological resources.
- The project paleontologist may re-evaluate the necessity for paleontological monitoring after examination of the affected sediments during excavation.
- Any potentially significant fossils observed shall be collected and recorded in conjunction with best management practices and SVP professional standards.
- Any fossils recovered during mitigation should be deposited in an accredited and permanent scientific institution for the benefit of current and future generations.
- A report documenting the results of the monitoring, including any salvage activities and the significance of any fossils, will be prepared and submitted to the appropriate City personnel.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

VIII. GREENHOUSE GAS EMISSIONS – Would the project:

GHG Thresholds

The City of Moreno Valley has not adopted a numerical significance threshold to evaluate greenhouse gas (GHG) impacts. SCAQMD does not have approved thresholds; however, it does have draft thresholds that provides a tiered approach to evaluate GHG impacts, which includes the following:

- Tier 1 consists of evaluating whether or not the project qualifies for any applicable exemption under CEQA.
- Tier 2 consists of determining whether the project is consistent with a GHG reduction plan. If a project is consistent with a qualifying local GHG reduction plan, it does not have significant GHG emissions.
- Tier 3 consists of screening values, which the lead agency can choose, but must be consistent with all projects within its jurisdiction. A project's construction emissions are averaged over 30 years and are added to the project's operational emissions. If a project's emissions are below one of the following screening thresholds, then the project is less than significant:
    - Residential and Commercial land use: 3,000 MTCO2e per year
    - Industrial land use: 10,000 MTCO2e per year
    - Based on land use type: residential: 3,500 MTCO2e per year; commercial: 1,820 MTCO2e per year; or mixed use: 3,000 MTCO2e per year

The SCAQMD's draft threshold uses the Executive Order S-3-05 year 2050 goal as the basis for the Tier 3 screening level. Achieving the Executive Order's objective would contribute to worldwide efforts to cap CO2 concentrations at 450 ppm, thus stabilizing global climate. Therefore, for purposes of examining potential GHG impacts from implementation of the proposed project, and to provide a conservative analysis of potential impacts, the Tier 3 screening level for all land use projects of 3,000 MTCO2e was selected as the significance threshold (AQ 2020).

In addition, SCAQMD methodology for project's construction are to average them over 30-years and then add them to the project's operational emissions to determine if the project would exceed the screening values listed above (AQ 2020).

Climate Action Plan

The City of Moreno Valley adopted an Energy Efficiency and Climate Action Strategy document in 2012. The Energy Efficiency and Climate Action Strategy is a policy document which identifies ways that the City can reduce energy and water consumption and GHG emissions as an organization (its employees and the operation of its facilities) and outlines the actions that the City can encourage and community members can employ to reduce their own energy and water consumption and GHG emissions. The project involves the construction and operation of an automobile dealership that would fall under the scope of these policies.

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	☐	☐	☒	☐

Response:

Less Than Significant Impact. Construction activities produce GHG emissions from various sources, such as site excavation, grading, utility engines, heavy-duty construction vehicles onsite, equipment hauling materials to and from the site, asphalt paving, and motor vehicles transporting the construction crew.

In addition, operation of the proposed residences would result in area and indirect sources of operational GHG emissions that would primarily result from vehicle trips, electricity and natural gas consumption, water transport (the energy used to pump water), and solid waste generation. GHG emissions from electricity consumed by the residences would be generated off-site by fuel combustion at the electricity provider. GHG emissions from water transport are also indirect emissions resulting from the energy required to transport water from its source.

The estimated operational GHG emissions that would be generated from implementation of the proposed project are shown in Table GHG-1. Additionally, in accordance with SCAQMD recommendation, the project's amortized construction

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

related GHG emissions are added to the operational emissions estimate in order to determine the project's total annual GHG emissions.

Table GHG-1: Greenhouse Gas Emissions

Activity	Annual GHG Emissions ($MTCO_2e$)
Project Operational Emissions	
Area	1
Energy	305
Mobile	1,142
Waste	48
Water	43
Total	1,538
Project Construction Emissions	47
Project Construction and Operation	1,585
Significance Threshold	**3,000**
Project Exceeds Threshold?	**No**

Source: CalEEMod Emission Summary (Appendix A)

As shown on Table GHG-1, the project would result in approximately 1,585 MTCO2e per year, below the screening threshold of 3,000 MTCO2e per year. Therefore, impacts related to greenhouse gas emissions would be less than significant.

b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emission of greenhouse gases?	☐	☐	☐	☒

Response:

No Impact. The proposed project would develop the site with single-family residences that would comply with state programs that are designed to be energy efficient. The proposed project would comply with all mandatory measures under the California Title 24, California Energy Code, and the CalGreen Code, which would provide efficient energy and water consumption. The City's administration of the requirements includes review of the energy conservation measures during the permitting process, which ensures that all requirements are met. In addition, the project includes photovoltaic (PV) solar panels to offset the energy demand. Therefore, the proposed project would not conflict with existing plans, policies, and regulations adopted for the purpose of reducing the emissions of greenhouse gas.

Existing Plans, Programs, or Policies

PPP GHG-1: CalGreen Compliance. The project is required to comply with the CalGreen Building Code as included in the City's Municipal Code to ensure efficient use of energy. CalGreen specifications are required to be incorporated into building plans as a condition of building permit approval.

Mitigation Measures

None.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

IX. HAZARDS AND HAZARDOUS MATERIALS – Would the project:

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☒	☐

Response:

Less Than Significant Impact. A hazardous material is defined as any material that, due to its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the environment. Hazardous materials include, but are not limited to, hazardous substances, hazardous wastes, and any material that regulatory agencies have a reasonable basis for believing would be injurious to the health and safety of persons or harmful to the environment if released into the home, workplace, or environment. Hazardous wastes require special handling and disposal because of their potential to damage public health and the environment.

Construction

The proposed construction activities would involve the routine transport, use, and disposal of hazardous materials such as paints, solvents, oils, grease, and caulking during construction activities. In addition, hazardous materials would routinely be needed for fueling and servicing construction equipment on the site. These types of materials are not acutely hazardous, and all storage, handling, use, and disposal of these materials are regulated by federal and state regulations that are implemented by the City during building permitting for construction activities. Construction would also include temporary dewatering during excavation for utility installations if the excavation is deep enough to encounter groundwater. If such excavations are in the vicinity of the impacted groundwater in the northeast portion of the site, the water would either be contained and transported to a licensed off-site treatment facility or treated on site before discharge under a county permit to the sanitary sewer. As a result, construction of the project would not create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials, and impacts would be less than significant.

Operation

The project involves operation of 81 new single-family residences, which involve routinely using hazardous materials including solvents, cleaning agents, paints, pesticides, batteries, fertilizers, and aerosol cans. These types of materials are not acutely hazardous and would only be used and stored in limited quantities. The normal routine use of these hazardous materials products pursuant to existing regulations would not result in a significant hazard to people or the environment in the vicinity of the project. Therefore, operation of the project would not result in a significant hazard to the public or to the environment through the routine transport, use, or disposal of hazardous waste, and impacts would be less than significant.

b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☒	☐

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Response:

Less Than Significant Impact. A Phase I ESA was prepared by AES Due Diligence, Inc. (AES) for the project site. The purpose of the Phase I analysis was to evaluate the project site for potential Recognized Environmental Concerns (RECs) that may be present, off-site conditions that may impact the subject property, and/or conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the project site.

ASTM defines a Recognized Environmental Condition (REC) as ”the presence or likely presence of an hazardous substance or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.”

The project site was evaluated for the presence of Recognized Environmental Condition’s (REC), including Controlled Recognized Environmental Conditions (CREC) and Historic Recognized Environmental Conditions (HREC). The project site was also evaluated for Business Environmental Risks (BER) and *de minimis* conditions.

A Controlled Recognized Environmental Condition (CREC) is defined as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, of meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

A Historic Recognized Environmental Condition (HREC) is defined as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

A de minimis environmental condition “generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.” However, conditions determined to be de minimis are not a REC.

Business Environmental Risk (BER) is a risk, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the parcel of commercial real estate, not necessarily limited to those environmental issues investigated in this Phase I ESA. Business environmental risk issues may involve addressing one or more non-scope considerations.

The Phase I ESA was performed in general accordance with ASTM Designation E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and following the Scope of Work outlined in AES Due Diligence, Inc.’s proposal. AES Due Diligence, Inc. (AES) conducted on-site observations on October 31, 2019, interviewed site operations personnel and observed adjacent properties. Environmental Data Resources, Inc. (EDR) conducted database searches following ASTM guidelines. Such searches are generally limited to a radius of one mile from the subject site. Additionally, ASTM non-scope items are addressed in this Assessment, including Asbestos, Lead-Based Paint, Radon Gas, Mold, Wetlands and Lead in Drinking Water. No testing was conducted for ASTM Non-Scope items.

Based on site observations, interviews and review of available documents and the database records search, AES concludes that no HRECs, RECs, BERs, CRECs, or de minimis conditions were identified at the subject site. AES recommends no additional investigation at this time (Phase I 2020). Thus, the proposed project would not create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment and impacts would be less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☒	☐

Response:
Less Than Significant Impact. The project site is adjacent to Val Verde Academy, which is located adjacent to the project site to the south. However, as discussed previously, construction and operation of the project would involve the use, storage and disposal of small amounts of hazardous materials on the project site. These hazardous materials would be limited and used and disposed of in compliance with federal, state, and local regulations, which would reduce the potential for accidental release into the environment near the school. The emissions that would be generated from construction and operation of the project were evaluated in the air quality analysis discussed above, and the emissions generated from the project would not cause or contribute to an exceedance of the federal or state air quality standards. Thus, the project would not emit hazardous or handle acutely hazardous materials, substances, or waste near the school, and impacts would be less than significant.

d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☒

Response:
No Impact. The Phase I Environmental Site Assessment (Phase I 2019) prepared for the project conducted a database search to determine if the project site or any nearby properties are identified as having hazardous materials. The Phase I record search determined that the project site is not located on or near by a site which is included on a list of hazardous materials sites. As a result, impacts related to hazards from being located on or adjacent to a hazardous materials site would not occur from implementation of the proposed project.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	☐	☐	☒	☐

Response:
Less than Significant Impact. The project site is located approximately 1.2 miles to the east of the March Air Reserve Base (MARB). The project is within the MARB/Inland Port Airport Land Use Compatibility Plan (RCALUC 2014); however, the project is in Zone E, which is beyond the 55-CNEL contour. Therefore, there would be a low noise impact with occasional overflights intrusive to some outdoor activities. In addition, the risk level is low in relation to safety and airspace protection factors, as determined in the MARB/Inland Port Airport Land Use Compatibility Plan (RCALUC 2014). Therefore, the project would not result in a safety hazard for people residing or working in the project area, and impacts would be less than significant.

f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☒	☐

Response:
Less Than Significant Impact. The proposed project would not physically interfere with an adopted emergency response plan or emergency evacuation plan.
Construction
Short-term construction activities would occur within the project site and would not restrict access of emergency vehicles to the project site or adjacent areas. In addition, travel along surrounding roadways would remain open and would not interfere with emergency access in the site vicinity. Any temporary lane closures needed for utility connections to Iris

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Avenue or driveway access construction would be implemented consistent with the recommendations of the California Joint Utility Traffic Control Manual (Caltrans 2014), as incorporated into the construction permits. In addition, no other roadways outside of the project site would be impacted. Thus, impacts related to an emergency response or evacuation plan during construction would be less than significant.

Operation

Direct access to the project site is would be provided from Iris Avenue by two driveways. The project is required to provide internal streets and fire suppression facilities (e.g., hydrants and sprinklers) that conform to the California Fire Code requirements, included as Municipal Code Chapter 8.36, as verified through the City's permitting process. As such, the project would not impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan, and impacts would be less than significant.

g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	☐	☐	☐	☒

Response:

No Impact. As described previously, the project site is vacant and within a developed and urban area that is not within a wildfire hazard zone. In addition, the project site is flat and surrounded by flat areas. There are no slope or hillsides that would become unstable. In addition, the project would install onsite drainage that would be conveyed to the existing flood control channel, which is consistent with the existing condition. Therefore, impacts related to flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes would not occur from the proposed project.

Existing Plans, Programs, or Policies

None.

Mitigation Measures

None.

X. HYDROLOGY AND WATER QUALITY – Would the project:				
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	☐	☐	☒	☐

Response:

Less Than Significant Impact.

Construction

Implementation of the proposed project includes site preparation, construction of new buildings, and infrastructure improvements. Grading, stockpiling of materials, excavation, construction of new structures, and landscaping activities would expose and loosen sediment and building materials, which would have the potential to mix with stormwater and urban runoff and degrade surface and receiving water quality.

Additionally, construction generally requires the use of heavy equipment and construction-related materials and chemicals, such as concrete, cement, asphalt, fuels, oils, antifreeze, transmission fluid, grease, solvents, and paints. In the absence of proper controls, these potentially harmful materials could be accidentally spilled or improperly disposed of during construction activities and could wash into and pollute surface waters or groundwater, resulting in a significant impact to water quality.

Pollutants of concern during construction activities generally include sediments, trash, petroleum products, concrete waste (dry and wet), sanitary waste, and chemicals. Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality. In addition, chemicals, liquid products, petroleum products (such as paints, solvents, and fuels), and concrete-related waste may be spilled or leaked during construction, which would have the potential to be transported via storm runoff into nearby receiving waters and eventually may affect surface or groundwater quality. During construction activities, excavated soil would be exposed, thereby increasing the potential for soil erosion and sedimentation to occur compared to existing conditions. In addition, during construction, vehicles and equipment are prone to tracking soil and/or spoil from work areas to paved roadways, which is another form of erosion that could affect water quality.

However, the use of BMPs during construction implemented as part of a SWPPP as required by the NPDES General Construction Permit and included as PPP WQ-1 would serve to ensure that project impacts related to construction activities resulting in a degradation of water quality would be less than significant. Furthermore, an Erosion and Sediment Transport Control Plan prepared by a qualified SWPPP developer (QSD) is required to be included in the SWPPP for the

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

project, and typically includes the following types of erosion control methods that are designed to minimize potential pollutants entering stormwater during construction:

- Prompt revegetation of proposed landscaped areas;
- Perimeter gravel bags or silt fences to prevent off-site transport of sediment;
- Storm drain inlet protection (filter fabric gravel bags and straw wattles), with gravel bag check dams within paved roadways;
- Regular sprinkling of exposed soils to control dust during construction and soil binders for forecasted wind storms;
- Specifications for construction waste handling and disposal;
- Contained equipment wash-out and vehicle maintenance areas;
- Erosion control measures including soil binders, hydro mulch, geotextiles, and hydro seeding of disturbed areas ahead of forecasted storms;
- Construction of stabilized construction entry/exits to prevent trucks from tracking sediment on City roadways;
- Construction timing to minimize soil exposure to storm events; and
- Training of subcontractors on general site housekeeping.

Therefore, compliance with the Statewide General Construction Activity Stormwater Permit requirements, included as PPP WQ-1, which would be verified during the City's construction permitting process, would ensure that project impacts related to construction activities resulting in a degradation of water quality would be less than significant.

Operation

The proposed project includes operation of single-family residential uses. Potential pollutants associated with the proposed uses include various chemicals from cleaners, pathogens from pet wastes, nutrients from fertilizer, pesticides and sediment from landscaping, trash and debris, and oil and grease from vehicles. If these pollutants discharge into surface waters, it could result in degradation of water quality.

Rational method hydrology calculations have been prepared for 2, 10 & 100-year existing and proposed condition for the project site. In the existing condition, site drainage sheet flows across the property to southeast towards where it flows offsite across the existing MWD and EMWD easements (Hydrology 2020).

In the proposed condition, the site will be a several sub-areas where storm flows will flow to the internal street section and be conveyed to the southeast corner of the property where they will be directed into an infiltration basin system. The infiltration basin will be located in the proposed landscape area onsite adjacent to the easement areas along the westerly portion of the property and will discharge to the existing point of discharge. Based on the calculations and proposed improvements, onsite flows can be conveyed to suitable points of disposal, and the proposed site development will not impact offsite properties (Hydrology 2020).

As described previously, the WQMP is required to be approved prior to the issuance of a building or grading permit. The project's WQMP would be reviewed and approved by the City to ensure it complies with the Santa Ana RWQCB MS4 Permit regulations. In addition, the City's permitting process would ensure that all BMPs in the WQMP would be implemented with the project. Overall, implementation of the WQMP pursuant to the existing regulations (included as PPP WQ-2), would ensure that operation of the proposed project would not violate any water quality standards, waste discharge requirements, or otherwise degrade water quality; and impacts would be less than significant.

b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	☐	☐	☒	☐

Response:

Less Than Significant Impact. EMWD's 2015 Urban Water Management Plan (UWMP) describes that EMWD's local supplies include groundwater, desalinated groundwater, and recycled water. Groundwater is pumped from the Hemet/San Jacinto and West San Jacinto areas of the San Jacinto Groundwater Basin. Groundwater in portions of the West San Jacinto Basin is high in salinity and requires desalination for potable use. EMWD owns and operates two

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

desalination plants that convert brackish groundwater from the West San Jacinto Basin into potable water. EMWD also owns, operates, and maintains its own recycled water system that consists of four Regional Water Reclamation Facilities and several storage ponds spread throughout EMWD's service area that are all connected through the recycled water system.

As detailed on Table WQ-1, the EMWD's 2015 Urban Water Management Plan (UWMP) shows that the anticipated production of groundwater would remain the same between 2020 and 2082, however, the anticipated production of desalinated groundwater would increase by 3,100 acre-feet per year (AFY) between 2020 and 2082. In 2082, groundwater and desalinated groundwater would provide 11.4 percent of the District's water supply.

Table WQ-1: Total Retail Water Supply (AFY)

Source	2015	2020	2025	2030	2035	2082	2082 Percentage
Imported Water	56,397	81,197	89,097	100,497	111,597	122,097	61.7%
Groundwater	15,252	12,303	12,303	12,303	12,303	12,303	6.3%
Desalinated Groundwater	7,288	7,000	10,100	10,100	10,100	10,100	5.1%
Recycled Water	44,150	45,245	48,334	50,017	51,800	53,300	26.9%
Total Retail Supply	**123,087**	**145,745**	**159,834**	**172,917**	**185,800**	**197,800**	**100%**

Source: 2015 UWMP

As detailed in Section 19, *Utilities and Service Systems*, the supply of water listed in Table WQ-1 would be sufficient during both normal years and multiple dry year conditions between 2020 and 2082 to meet all of the City's estimated needs, including the proposed project. Therefore, the project would not result in changes to the projected groundwater pumping that would decrease groundwater supplies. Thus, impacts related to groundwater supplies would be less than significant.

In addition, after completion of project construction, the site would be covered by 70 percent impervious surface area and the project would convey stormwater drainage into landscaped areas and the proposed infiltration basin, which would infiltrate into soils and groundwater that occurs onsite. Therefore, impacts related to interference with groundwater recharge would be less than significant.

c)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
i)	Result in substantial erosion or siltation on- or off-site?	☐	☐	☒	☐

Response:
Less than Significant Impact.

Construction
Construction of the project would require grading and excavation of soils, which would loosen sediment and could result in erosion or siltation. However, the project site does not include any slopes, which reduces the erosion potential and the large majority of soil disturbance would be related to excavation and backfill for installation of building foundations and underground utilities.

The NPDES Construction General Permit requires preparation and implementation of a SWPPP by a Qualified SWPPP Developer for the proposed construction activities (included as PPP WQ-1). The SWPPP is required to address site-specific conditions related to potential sources of sedimentation and erosion and would list the required BMPs that are necessary to reduce or eliminate the potential of erosion or alteration of a drainage pattern during construction activities.

In addition, a Qualified SWPPP Practitioner (QSP) is required to ensure compliance with the SWPPP through regular monitoring and visual inspections during construction activities. The SWPPP would be amended and BMPs revised, as determined necessary through field inspections, in order to protect against substantial soil erosion, the loss of topsoil, or alteration of the drainage pattern. Compliance with the Construction General Permit and a SWPPP prepared by a QSD

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

and implemented by a QSP (per PPP WQ-1) would prevent construction-related impacts related to potential alteration of a drainage pattern or erosion from development activities. With implementation of the existing construction regulations that would be verified by the City during the permitting approval process, impacts related to alteration of an existing drainage pattern during construction that could result in substantial erosion, siltation, and increases in stormwater runoff would be less than significant.

Operation.

After completion of project construction, the site would be 70 percent impervious. The impervious areas would not be subject to erosion and the pervious areas would be landscaped with groundcovers that would inhibit erosion.

As discussed previously, in the existing condition, site drainage sheet flows across the generally as sheet flow to the south-southeast. In the developed condition, the project site would consist of several drainage sub-areas where storm flows would flow towards the proposed internal roadways and would ultimately be conveyed to the proposed infiltration basin system within the southeast corner of the property. The infiltration basin would be installed within the proposed landscape area onsite adjacent to the WMD and EMWD easement areas along the westerly portion of the property and would discharge to the existing point of discharge within the existing easements (Hydrology 2020).

Additionally, the MS4 permit requires new development projects to prepare a WQMP (included as PPP WQ-2) that is required to include BMPs to reduce the potential of erosion and/or sedimentation through site design and structural treatment control BMPs. The Preliminary WQMP has been completed and is included as Appendix H. As part of the permitting approval process, the proposed drainage and water quality design and engineering plans would be reviewed by the City's Engineering Division to ensure that the site-specific design limits the potential for erosion and siltation. Overall, the proposed drainage system and adherence to the existing regulations would ensure that project impacts related to alteration of a drainage pattern and erosion/siltation from operational activities would be less than significant.

ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite?	☐	☐	☒	☐

Response:

Less Than Significant Impact.

The project site does not include, and is not adjacent to, a stream or river. Implementation of the project would not alter the course of a stream or river.

Construction

Construction of the project would require grading and excavation of soils. These activities could temporarily alter the existing drainage pattern of the site and change runoff flow rates. However, as described previously, implementation of the project requires a SWPPP (included as PPP WQ-1) that would address site specific drainage issues related to construction of the project and include BMPs to eliminate the potential of flooding or alteration of a drainage pattern during construction activities. This includes regular monitoring and visual inspections during construction activities. Compliance with the Construction General Permit and a SWPPP prepared by a QSD and implemented by a QSP (per PPP WQ-1) as verified by the City through the construction permitting process would prevent construction-related impacts related to potential alteration of a drainage pattern or flooding on or off-site from development activities. Therefore, construction impacts would be less than significant.

Operation

As described previously, the proposed project would result in an increase of impervious surfaces that would result in an increase of stormflows. However, the project would maintain the existing drainage pattern and convey runoff to infiltration basins and landscaped areas for treatment and retention that have been designed to accommodate the increased volume pursuant to the MS4 permit requirements. As part of the permitting approval process, the proposed drainage design and engineering plans would be reviewed by the City's Engineering Division to ensure that the proposed drainage would accommodate the appropriate design flows. Overall, the proposed drainage system and adherence to the existing MS4 permit regulations would ensure that project impacts related to alteration of a drainage pattern or flooding from operational activities would be less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	☐	☐	☒	☐

Response:
Less Than Significant Impact.
As described previously, the project site does not include, and is not adjacent to, a stream or river. Implementation of the project would not alter the course of a stream or river.

Construction
As described in the previous response, construction of the proposed project would require grading and excavation activities that could temporarily alter the existing drainage pattern of the site and could result in increased runoff and polluted runoff if drainage is not properly controlled. However, implementation of the project requires a SWPPP (included as PPP WQ-1) that would address site specific pollutant and drainage issues related to construction of the project and include BMPs to eliminate the potential of polluted runoff and increased runoff during construction activities. This includes regular monitoring and visual inspections during construction activities. Compliance with the Construction General Permit and a SWPPP prepared by a QSD and implemented by a QSP (per PPP WQ-1) as verified by the City through the construction permitting process would prevent construction-related impacts related to increases in run-off and pollution from development activities. Therefore, impacts would be less than significant.

Operation
As described previously, the proposed project would result in an increase of impervious surfaces that would generate increased runoff. However, the project would manage the increased flow with infiltration basins and landscaping that has been designed to accommodate the increased volume pursuant to the MS4 permit requirements. The units would retain, filter, treat, and slowly discharge runoff into existing off-site drainage basins adjacent to the WMD and EMWD easement areas along the westerly portion of the property and will discharge to the existing point of discharge.

As part of the permitting approval process, the proposed drainage design and engineering plans would be reviewed by the City's Engineering Division to ensure that the proposed drainage would accommodate the appropriate design flows. Additionally, the City permitting process would ensure that the drainage system specifications adhere to the existing MS4 permit regulations, which would ensure that pollutants are removed prior to discharge. Overall, with compliance to the existing regulations as verified by the City's permitting process, project impacts related to the capacity of the drainage system and polluted runoff would be less than significant.

iv) Impede or redirect flood flows?	☐	☐	☒	☐

Response:
Less Than Significant Impact. According to the Federal Emergency Management Agency (FEMA) Map 06065C0765G, the project site is designated as zone X, meaning it is in an area of minimal flood hazard (FEMA 2020). As detailed in the previous responses, implementation of the project would result in a 70 percent increase of impermeable surfaces on the site. However, the project would maintain the existing drainage pattern; and drainage would be accommodated by onsite by landscaping and infiltration basins that have been sized to accommodate MS4 requirements. Therefore, the project would not result in impeding or redirecting flood flows by the addition of the impervious surfaces. As detailed previously, the City's permitting process would ensure that the drainage system specifications adhere to the existing MS4 permit regulations, and compliance with existing regulations would ensure that impacts would be less than significant.

d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	☐	☐	☐	☒

Response:
No Impact. According to the Federal Emergency Management Agency (FEMA) Map 06065C0765G, the project site is designated as zone X, meaning it is in an area of minimal flood hazard (FEMA 2020). Thus, the project site is not located

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

within a flood hazard area that could be inundated with flood flows and result in release of pollutants. Impacts related to flood hazards and pollutants would not occur from the project.

Tsunamis are generated ocean wave trains generally caused by tectonic displacement of the sea floor associated with shallow earthquakes, sea floor landslides, rock falls, and exploding volcanic
islands. The proposed project is approximately 41 miles from the ocean shoreline. Based on the distance of the project site to the Pacific Ocean, the project site is not at risk of inundation from tsunami. Therefore, the proposed project would not risk release of pollutants from inundation from a tsunami. No impact would occur.

Seiching is a phenomenon that occurs when seismic ground shaking induces standing waves (seiches) inside water retention facilities (e.g., reservoirs and lakes). Such waves can cause retention structures to fail and flood downstream properties. The project site is not located adjacent to any water retention facilities. For this reason, the project site is not at risk of inundation from seiche waves. Therefore, the proposed project would not risk release of pollutants from inundation from seiche. No impact would occur.

e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	☐	☐	☒	☐

Response:

Less Than Significant Impact. As described previously, use of BMPs during construction implemented as part of a SWPPP as required by the NPDES Construction General Permit and PPP WQ-1 would serve to ensure that project impacts related to construction activities resulting in a degradation of water quality would be less than significant. Thus, construction of the project would not conflict or obstruct implementation of a water quality control plan.

Also, as described previously, new development projects are required to implement a WQMP (per PPP WQ-2) that would comply with the Santa Ana RWQCB MS4 Permit regulations. The WQMP and applicable BMPs are verified as part of the City's permitting approval process, and construction plans would be required to demonstrate compliance with these regulations. Therefore, operation of the proposed project would not conflict of obstruct with a water quality control plan.

In addition, as detailed previously, the EMWD manages basin water supply and the anticipated production of groundwater would remain steady from 2025 through 2082 (as shown in Table WQ-1). As described previously and further detailed in Section 19, *Utilities and Service Systems*, the City's supply of water listed in Table WQ-1 would be sufficient during both normal years and multiple dry year conditions between 2020 and 2082 to meet all of the City's estimated needs, including the proposed project. Therefore, the project would be consistent with the groundwater management plan and would not conflict with or obstruct its implementation. Thus, impacts related to water quality control plan or sustainable groundwater management plan would be less than significant.

Existing Plans, Programs, or Policies

PPP WQ-1: Stormwater Pollution Prevention Plan. Prior to grading permit issuance, the project developer shall have a Stormwater Pollution Prevention Plan (SWPPP) prepared by a Qualified SWPPP Developer (QSD) in accordance with the City's Municipal Code Chapter 8.10 and the Santa Ana Regional Water Quality Control Board National Pollution Discharge Elimination System (NPDES) Storm Water Permit Order No. R4-2012-0175 (MS4 Permit). The SWPPP shall incorporate all necessary Best Management Practices (BMPs) and other NPDES regulations to limit the potential of erosion and polluted runoff during construction activities. Project contractors shall be required to ensure compliance with the SWPPP and permit periodic inspection of the construction site by the City of Moreno Valley staff or its designee to confirm compliance.

PPP WQ-2: Water Quality Management Plan, Prior to grading permit issuance, the project applicant shall have a Water Quality Management Plan (WQMP) approved by the City for implementation. The project shall comply with the City's Municipal Chapter 8.10 and the Municipal Separate Storm Sewer System (MS4) permit requirements in effect for the Regional Water Quality Control Board (RWQCB) at the time of grading permit to control discharges of sediments and other pollutants during operations of the project.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Mitigation Measures
None.

XI. LAND USE AND PLANNING – Would the project:

a) Physically divide an established community?	☐	☐	☐	☒

Response:
No Impact. The project site is currently vacant and is surrounded by a roadway to the north followed by single-family residences; single-family residences to the east; commercial uses to the west; and single-family residences and educational uses to the south. The proposed project would develop the site to provide 81 single-family residential units, which are consistent with the existing single-family residences to the north, east, and south of the site at a higher allowable density of RS10. Therefore, the change of the project site from a vacant site to single-family residential would not physically divide an established community. In addition, the project would not change roadways or install any infrastructure that would result in a physical division. Thus, the proposed project would not result in impacts related to physical division of an established community.

b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☒	☐

Response:
Less Than Significant Impact. As described previously, the project site is currently vacant. The project would develop the project site to provide 81 new single-family residences, which would be similar to the single-family residential uses that are located adjacent to the east of the site, to the north of the site beyond Iris Avenue, and to the south of the site.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

General Plan
The project site currently has a General Plan land use designation of has a land use designation of Residential: Max. 5 du/ac (R5) and Commercial (C), which does not have the purpose of avoiding or mitigating an environmental effect. The proposed project includes a General Plan Amendment to change the land use designation of the site to Residential: Max. 10 du/ac (R10), which would allow the proposed single-family residences at a density of 7.58 du/acre. The General Plan Land Use Element states that the Residential: Max. 10 du/ac (R10) designation allows for allows for development of residential uses to a maximum density of 10 dwelling units per acre. As the project would develop residences at a density of 7.58 dwelling units per net acre, it would be consistent with the proposed land use designation, and the proposed change in land use would be less than significant.

Zoning
The project site is currently zoned the project site currently has a zoning designation of Residential 5 (R5) District and Community Commercial (CC) District. As such, the project includes a zone change to Residential Single-Family 10 District (RS10) to implement the proposed single-family residential uses. Section 9.03.020 of the City's Municipal Code states that the Residential Single-Family 10 District (RS10) zoning district is to provide for residential development on small single-family lots with amenities not generally found in suburban subdivisions. The district is intended for subdivisions at a maximum allowable density of ten (10) dwelling units per net acre. As described previously, the project would develop single-family residences at a density of 7.48 dwelling units per net acre. In addition, the project is requesting approval of a Conditional Use Permit (CUP) for a Planned Unit Development (PUD), which allows for a development to establish unique criteria for such things as setbacks, lot width and depth, building separation, lot size, etc. This is allowed in exchange for a higher level of detail and amenities within the project than typically required for standard residential development. Thus, the proposed project would not conflict with any applicable zoning regulations adopted for the purpose of avoiding or mitigating an environmental effect.

Existing Plans, Programs, or Policies
None.

Mitigation Measures
None.

XII. MINERAL RESOURCES – Would the project:

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒

Response:
No Impact. The project site is located in Mineral Resource Zone 3 (MRZ-3), according to the Mineral Land Classification Map provided by the California Department of Conservation (CDC 2020). The MRZ-3 zone within the Significant Mineral Aggregate Resource Area (SMARA) Study Area is defined as areas containing mineral deposits which the significance cannot be evaluated from available data.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

The City's General Plan EIR states that no locally, regionally, or statewide significant mineral resources are located within the City. Therefore, development of the site would not result in the loss of availability of a known mineral resource that would be of value to the region, and impacts would not occur.

b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?	☐	☐	☐	☒

Response:
No Impact. As described in the previous response, the City's General Plan EIR states that no locally, regionally, or statewide significant mineral resources are located within the City. Therefore, implementation of the project would not result in the loss of locally important mineral resources, and impacts would not occur.

Existing Plans, Programs, or Policies
None.

Mitigation Measures
None.

XIII. NOISE – Would the project result in:

City of Moreno Valley Municipal Code

Sound level limits: Chapter 11.80.03 of the City's Municipal Code establishes maximum noise levels permitted within the city, which are listed in Table N-1:

Table N-1: City of Moreno Valley Maximum Continuous Sound Levels

Duration per Day (Continuous Hours)	Sound Level [dBA]
8	90
6	92
4	95
3	97
2	100
1.5	102
1	105
.5	110
.25	115

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Source: City of Moreno Valley Municipal Code

Sensitive Receptor Noise Levels: Chapter 11.80.30 of the City's Municipal Code establishes the permissible noise level that may be received at nearby sensitive uses (e.g., residential). For noise-sensitive residential properties 200 feet from the source, the exterior noise level shall not exceed 60 dBA during daytime hours (8:00 a.m. to 10:00 p.m.) and shall not exceed 55 dBA during the nighttime hours (10:01 p.m. to 7:59 a.m.) (Municipal Code, Chapter 11.80).

Construction Noise: Section 8.14.082.E of the City's Municipal Code also provides construction noise standards, which state that Any construction within the city shall only be completed between the hour of seven a.m. to eight p.m. Monday through Friday, excluding holidays, unless written approval is obtained from the city building official or city engineer.

Sensitive Receptors

The nearest sensitive receptors to the project site are the single-family homes located adjacent to the east side of the project site, where the nearest residential structure is as near as 25 feet east of the project site. In addition, Val Verde Academy is located adjacent to the southwest side of the project site, where the nearest school structure is as near as 180 feet southwest of the project site.

Existing Ambient Noise Levels

To identify the existing ambient noise levels in the project area, noise level measurements were taken on and adjacent to the project site on May 9, 2020 and May 10, 2020. As shown on Table N-2, the average noise levels in the project area range from 52.1 dBA to 63.3 dBA. Table N-2 also shows that the both the daytime and nighttime noise levels at the nearby sensitive receptors currently exceeds the City's residential noise standards of 60 dBA Leq during the daytime.

Table N-2: Existing Ambient Noise Level Measurements

Site No.	Site Description	Average (dBA Leq)		1-hr Average (dBA Leq/Time)		Weighted-Average (dBA CNEL)
		Daytime	Nighttime	Minimum	Maximum	
1	Located on the southwest property line fence, approximately 8 feet south of the shopping center and adjacent to the northern portion of Val Verde Academy.	50.0	45.4	37.3 2:52 a.m.	56.2 8:10 p.m.	54.4
2	Located on the east property line fence, approximately 100 feet south of the centerline for Iris Avenue.	61.1	53.5	47.3 3:06 a.m.	63.9 5:00 p.m.	63.3
3	Located at the south corner of the project site on the fence for Val Verde Academy.	51.4	41.5	35.1 3:46 a.m.	54.8 4:18 p.m.	52.1

Source: NOI 2020

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐

Response:
Less Than Significant Impact.
Construction
The construction activities for the proposed project are anticipated to include site preparation and grading of project site, construction of the 81 single-family residences, paving of the onsite driveways and parking areas, and application of architectural coatings. Noise impacts from construction activities associated with the proposed project would be a function of the noise generated by construction equipment, equipment location, sensitivity of nearby land uses, and the timing and duration of the construction activities. The nearest sensitive receptors to the project site are the single-family residences located approximately 25 feet east of the project site.

Table N-3 shows that the highest noise from construction would occur during the site preparation and grading phases when noise levels are anticipated to reach 59 dBA Leq at the nearest sensitive receptors (residences), which is below the City's noise threshold of 60 dBA (Municipal Code Chapter 11.80.30). In addition, the project would comply with the allowable construction times pursuant to the City's Municipal Code, the construction-related noise levels would not exceed any standards. Therefore, construction noise impacts would be less than significant.

Table N-3: Construction Noise Levels at the Nearest Sensitive Receptor

Construction Phase	Construction Noise Level (dBA Leq) at: Nearest Homes to the East[1]	Nearest School to Southwest[2]
Site Preparation	59	64
Grading	59	64
Building Construction	58	61
Paving	55	59
Painting	50	52
City's Noise Threshold[3]	**60**	**65**
Exceed Thresholds?	No	No

Notes:
[1] The construction noise levels were calculated at 200 feet from the project's property line pursuant to Section 11.80.030(C) of the Municipal Code.
[2] In order to account for the existing 6-foot high wall on the east property line and the first row of homes that are located within 200 feet of the property line 10 dB of shielding was added to the RCNM Model.
[3] In order to account for the commercial and school structures that are located within 200 feet of the property line, 5 dB of shielding was added to the RCNM Model..
[4] City Noise Thresholds obtained from Section 11.80.030(C) of the Municipal Code.
Source: RCNM, Federal Highway Administration, 2006

Source: NOI 2020

Operation
Development of the proposed project would result in 81 single-family residences, which would generate approximately 61 trips during the a.m. peak hour, 81 trips during the p.m. peak hour, for a total of 774 daily trips. The noise generated from these vehicular trips has been identified through a comparison of noise generated by traffic volumes with and without the project, provided in Table N-4.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table N-4: Project Traffic Noise Contributions

		dBA CNEL at Nearest Receptor			
Roadway	Segment	Existing	Existing Plus Project	Project Contribution	Increase Threshold
Iris Avenue	East of Perris Blvd	68.8	69.0	0.2	+0.1 dBA

Source: FHWA Traffic Noise Prediction Model FHWA-RD-77-108.

Source: NOI 2020

Objective 6.5 of the City's General Plan Noise Element requires the City to minimize noise impacts from significant noise generators including roadway noise impacts. However, neither the General Plan nor the CEQA Guidelines define what constitutes a "substantial permanent increase to ambient noise levels." Therefore, thresholds from the FTA *Transit Noise and Vibration Impact Assessment* (2018) have been utilized, which identifies noise impacts by comparing the existing noise levels and the future noise levels with the proposed project. Based on the FTA guidance, a substantial increase in ambient noise from vehicular traffic could occur when the noise levels at noise-sensitive land uses (e.g. residential, etc.) are less than 60 dBA CNEL and the project creates an increase of 3 dBA CNEL or greater noise level increase; or when noise levels range from 60 to 65 dBA CNEL and the project creates 2 dBA CNEL or greater noise level increase.

As shown in Table N-4 above, the project traffic would result in a increase of 0.2 dBA, which is below the noise increase thresholds of 1 dBA. Therefore, impacts related to operational noise would be less than significant.

b) Generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☒	☐

Response:
Less Than Significant Impact.
Construction
Construction activities associated with the proposed project would require the operation of off-road equipment and trucks that are known sources of vibration. Construction activity can result in varying degrees of ground vibration, depending on the equipment used on the site. Operation of construction equipment causes ground vibrations that spread through the ground and diminish in strength with distance. Vibrations at buildings could produce results that range from no perceptible effects at the low levels to damage at the highest levels. It should be noted that vibration is much more discernible in a siting or laying down position, which typically only occur inside a home. As such, this analysis is based on the vibration levels at the nearest homes, instead of the nearest residential property lines.

Section 16.30.130(K) of the City's Municipal Code restricts the operation of any device that creates a vibration which is above the vibration perception threshold of an individual at or beyond the property boundary of the source. The perception threshold is defined as a motion velocity of 0.01 inch per second over the range of 1 to 100 Hertz or a root mean square (rms) velocity of 0.01 inch per second (PPV). Table N-5 shows the typical PPV and average vibration levels shown in vibration velocity in decibels (VdB) that are produced from some common construction equipment that would likely be utilized during construction of the proposed project (NOI 2020).

Table N-5: Typical Vibration Source Levels for Construction Equipment

Equipment	Peak Particle Velocity (inches/second)	Approximate Vibration Level (L_v) at 25 feet
Pile driver (impact)	1.518 (upper range) 0.644 (typical)	112 104
Pile driver (sonic)	0.734 (upper range) 0.170 (typical)	105 93

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Clam shovel drop (slurry wall)	0.202	94
Vibratory Roller	0.210	94
Hoe Ram	0.089	87
Large bulldozer	0.089	87
Caisson drill	0.089	87
Loaded trucks	0.076	86
Jackhammer	0.035	79
Small bulldozer	0.003	58

Source: NOI 2020

Chapter 9.10 of the Municipal Code includes performance standards for proposed development projects that may impact the surrounding neighborhood and Section 9.10.030(B), which is part of this Chapter, exempts temporary construction activities from Section 9.10.170 that restricts the creation of vibration that can be felt at the property line, provided that construction activities occur between the hours of 7 a.m. and 7 p.m. Since the City's Municipal does not provide a quantifiable vibration level for construction activities, Caltrans guidance has been utilized, which defines the threshold of perception from transient sources at 0.25 inch per second peak particle velocity (PPV).

The primary source of vibration during construction would be from the operation of a bulldozer. As demonstrated above in Table N-5, a large bulldozer would create a vibration level of 0.089 inch-per-second PPV at 25 feet, which is the approximate distance to the nearest residence. The vibration level at the nearest residence from the project site is within the 0.25 inch per second PPV threshold detailed above. Therefore, construction-related vibration impacts would be less than significant.

Operation

Operation of the proposed single-family uses would include heavy trucks for residents moving in and out of the residences, large deliveries, and garbage trucks for solid waste disposal. Truck vibration levels are dependent on vehicle characteristics, load, speed, and pavement conditions. However, typical vibration levels for the heavy truck activity at normal traffic speeds would be approximately 0.006 in/sec PPV, based on the FTA Transit Noise Impact and Vibration Assessment. Truck movements on site would be travelling at very low speed, so it is expected that truck vibration at nearby sensitive receivers would be less than the vibration threshold of 0.08 in/sec PPV for fragile historic buildings and 0.04 in/sec PPV for human annoyance, and therefore, would be less than significant.

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☒	☐

Response:

Less Than Significant Impact. The project site is located approximately 1.2 miles to the east of the March Air Reserve Base (MARB). The project is within the MARB/Inland Port Airport Land Use Compatibility Plan (RCALUC 2014); however, the project is in Zone E, which is beyond the 55-CNEL contour. Therefore, there would be a low noise impact with occasional overflights intrusive to some outdoor activities (RCALUC 2014). Thus, aircraft noise impacts would be less than significant.

Existing Plans, Programs, or Policies

None.

Mitigation Measures

None.

6. Noise Impact Analysis, Iris Park Single-Family Residential Project, City of Moreno Valley. May 19, 2020. Prepared by Vista Environmental (Appendix I).

XIV. POPULATION AND HOUSING – Would the project:

a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of road or other infrastructure)?	☐	☐	☒	☐

Response:
Less Than Significant Impact. The project would construct 81 single-family residences on the project site. The California Department of Finance (CDF) data details that the City of Moreno Valley had a residential population of 207,743 and 57,005 residential units in 2019. Of these, 46,098 (approximately 80 percent) are single-family detached units. In addition, it is estimated that the City has an average of 3.96 persons per household.

Based on this information, the proposed project would result in a net increase of approximately 321 new residents. The addition of 321 new residents would represent a population increase of approximately 0.15 percent and the new housing units would result in a 0.14 percent increase in residential units within the City. This limited level of growth on a site that has been previously developed would not constitute substantial growth.

The proposed project is located in an urbanized residential area of the City and is surrounded by residential and commercial uses and is already served by the existing roadways and infrastructure systems. No infrastructure would be extended or constructed to serve areas beyond the project site, and indirect impacts related to growth would not occur from implementation of the proposed project. Therefore, potential impacts related to inducement of unplanned population growth, either directly or indirectly, would be less than significant.

b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒

Response:
No Impact. As described above, the project site is vacant and undeveloped land and does not contain any housing or people on the project site. The proposed project would construct 81 new single-family residences and would not displace any existing housing or people and would not necessitate the construction of housing elsewhere. Thus, impacts would not occur.

Existing Plans, Programs, or Policies
None.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Mitigation Measures
None.

Sources:

1. Moreno Valley General Plan, adopted July 11, 2006

2. Final Environmental Impact Report City of Moreno Valley General Plan, certified July 11, 2006
   - Section 5.12 – Population and Housing
     - Attachments #1 - #10 – Housing Sites Inventory
     - Exhibits A1 – A11, C, D, and E – Maps of Housing Sites
3. Title 9 – Planning and Zoning of the Moreno Valley Municipal Code
4. California Department of Finance. May 2019. E-5 Population and Housing Estimates for Cities, Counties, and the State, 2011-2019 with 2010 Census Benchmark. Accessed: http://www.dof.ca.gov/Forecasting/Demographics/Estimates/E-5/ (Accessed May 11, 2020).

XV. PUBLIC SERVICES – Would the project:

a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

i) Fire protection?	☐	☐	☒	☐

Response:
Less Than Significant Impact. The City of Moreno Valley Fire Department provides fire protection to the project area. The City's Fire Department is the primary response agency to fires, emergency medical service, hazardous materials incidents, traffic accidents, terrorist acts, catastrophic weather events, and technical rescues. Additionally, the City's Office of Emergency Management is located within the Fire Department allowing for a well-coordinated response to both natural and man-made disasters. The Moreno Valley Fire Department is part of the CALFIRE/Riverside County Fire Department's regional, integrated, cooperative fire protection organization, which provides access to other regional fire and emergency equipment and/or services, as needed.

There are two fire stations within two miles of the project site. Fire Station 65 is located 1.6 miles from the project site at 15111 Indian Street. This fire station houses one paramedic engine company and a reserve fire engine. Fire Station 91 is located 2.0 miles from the project site at 16110 Lasselle Street. This fire station is two bay fire station that houses one paramedic engine company and is home to the City's two Battalion Chiefs (Fire 2020).
The project would develop 81 single-family residences in an area already served by the City's Fire Department and within close proximity to two existing fire stations. Due to the small increase in employees and customers that would occur from implementation of the project a limited incremental increase in demand for fire protection and emergency medical services would occur. However, the project would be required to adhere to the California Fire Code (included in the City's Municipal Code Chapters 8.36) and would be reviewed by the Fire Department during the project permitting process to ensure that the project plans meet the fire protection requirements.

The project would be adequately served by the two fire stations that currently serve the project area. Due to the limited increase in employees and customers, and the close location of the existing fire stations, the proposed project would not result in the need for, new or physically altered fire department facilities that are not currently planned. Therefore, impacts related to fire protection services would be less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
ii) Police protection?	☐	☐	☒	☐

Response:
Less Than Significant Impact. The City of Moreno Valley receives policing services through a contract for services with the Riverside County Sheriff's Office. The City's police station is located at 22850 Calle San Juan De Los Lagos, which is approximately 4.1 miles from the project site. Because the project site is currently vacant and undeveloped, implementation of the project would result in an onsite population that would create the need for police services. Calls for police service during project construction may include: theft of building materials and construction equipment, malicious mischief, graffiti, and vandalism. Operation of the project could generate a typical range of police service calls, such as burglaries, thefts, and disturbances. To reduce the potential for these types of crimes, security concerns are addressed in the project design by providing low-intensity security lighting for the purposes of wayfinding, safety, and building structure security.

Although an incremental increase could result from implementation of the project, the need for law enforcement services from the proposed project would be limited and within the area that is currently served. Thus, the need for policing services generated by the project would not require the construction or expansion of police department facilities. Therefore, impacts related to police protection would be less than significant.

iii) Schools?	☐	☐	☒	☐

Response:
Less Than Significant Impact. The project site is located within the Moreno Valley Unified School District, which operates and maintains 43 schools, including 23 elementary schools (K-5), 6 middle schools (7-8), 5 high schools (9-12), and 9 specialized schools. The site is currently located within the attendance area boundaries of Ridgecrest Elementary School, Mountain View Middle School, and Valley View High School.

The project would develop 81 single-family residences. The District's April 2020 Developer Fee Justification Report indicates that there are over 53,581 residential dwelling units existing within the District. It is anticipated that a total of 13,156 additional units will be constructed by 2040. Based on the District's Student Generation Rate of 0.6041, this will generate over 7,947 additional K-12 students during that period (MV 2020). With the Student Generation Rate of 0.6041, the project will generate approximately 49 additional K-12 students upon implementation.

Pursuant to Government Code Section 65995 et seq., the need for additional school facilities is addressed through compliance with school impact fee assessment. SB 50 (Chapter 827 of Statutes of 1998) sets forth a state school facilities construction program that includes restrictions on a local jurisdiction's ability to condition a project on mitigation of a project's impacts on school facilities in excess of fees set forth in the Government Code. These fees are collected by school districts at the time of issuance of building permits for development projects. Pursuant to Government Code Section 65995 applicants shall pay developer fees to the appropriate school districts at the time building permits are issued; and payment of the adopted fees provides full and complete mitigation of school impacts. As a result, impacts related to school facilities would be less than significant with the Government Code required fee payments.

iv) Parks?	☐	☐	☒	☐

Response:
Less Than Significant Impact. Utilizing Map 3.1, Existing Parks and Community Facilities, in the City of Moreno Valley Parks, Recreation and Open Space Comprehensive Plan, the City operates and maintains six parks within the project's vicinity: Rock Ridge Park, approximately 4.7 miles to the northwest; Morrison Park, approximately 4.4 miles to the northwest; Ridgecrest Park, approximately 4.1 miles to the southeast; Weston Park, approximately 3.8 miles to the northwest; the Moreno Valley Community Park, approximately 4.8 miles to the west; and Celebration Park, approximately 3.3 miles to the southwest.

The project includes several onsite recreational areas, the largest being a park of almost 0.43 acre. These facilities will satisfy a substantial portion of the parks demands from the new residents. Further, the City's Municipal Code (Section

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

3.38.080 and Chapter 3.40) includes requirements for mitigation fees in favor of park improvements and/or parkland dedication; where applicable, these fees would be included as a condition of the approval of the residential development (included as PPP PS-2). These fees would be used in the City of the purpose of acquiring, designing, constructing, improving, providing and maintaining, to the extent permitted by law, park improvements provided for in the City's general plan and its adopted capital improvement program or an adopted master plan of parks and recreation facilities, as amended from time to time. Therefore, impacts related to the need to provide new or altered park and recreation facilities in order to maintain acceptable service ratios would be less than significant.

v) Other public facilities?	☐	☐	☒	☐

Response:

Less Than Significant Impact. The proposed project would develop 81 single-family residential units within an area that already contains single-family residential. The additional residences would result in a limited incremental increase in the need for additional services, such as public libraries and post offices, etc. Because the project area is already served by other services and the project would result in a limited increase in residences, the project would not result in the need for new or physically altered facilities to provide other services, the construction of which could cause significant environmental impacts. Therefore, impacts would be less than significant.

Existing Plans, Programs, or Policies

PPP PS-1: The project will be required to pay applicable development fees levied by the Moreno Valley Unified School District pursuant to the School Facilities Act (Senate Bill [SB] 50, Stats. 1998, c.827) to offset any effects on school facilities resulting from new development.

PPP PS-2: Park Fees. As a condition of the approval of a residential development, the project shall pay applicable park related fees and/or dedicate parkland pursuant to Municipal Code Section 3.38.080 and Chapter 3.40.

Mitigation Measures

None.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
8. Moreno Valley Unified School District Fee Justification Report for New Residential and Commercial/Industrial Development. 2020.				
XVI. RECREATION – Would the project:				
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☒	☐

Response:
Less Than Significant Impact. As described previously project would develop 81 single-family residences. Residential developments are subject to Municipal Code Section 3.38.080 and Chapter 3.40, requiring park improvements residential development impact fees and/or parkland dedication or in-lieu fees for residential development as a condition of project approval (included as PPP PS-2). These fees would be used in the City of the purpose of acquiring, designing, constructing, improving, providing and maintaining, to the extent permitted by law, park improvements provided for in the City's general plan and its adopted capital improvement program or an adopted master plan of parks and recreation facilities, as amended from time to time. Furthermore, the project would develop recreational areas within the new residential development, including a community park, fitness stations, and connections to a future public linear park along the California Aqueduct easement. Therefore, impacts related to the increase the use of existing parks and recreational facilities, such that physical deterioration of the facility would be accelerated would be less than significant.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which have an adverse physical effect on the environment?	☐	☐	☒	☐

Response:
Less Than Significant Impact. As described above, while the project would contribute park development fees pursuant to Municipal Code 3.38.080 (included as PPP PS-2) to be used towards the future expansion or maintenance parks and recreational facilities, these fees are standard with every residential development. The project would also construct recreational facilities within the residential development area, including a community park, fitness stations, and connections to a future public linear park. The development of these recreational facilities are analyzed throughout this study as part of the proposed project and would not result in a significant adverse physical effect on the environment. As a result, impacts would be less than significant.

Existing Plans, Programs, or Policies
PPP PS-2: Park Fees, provided in Section 15, *Public Services*.

Mitigation Measures
None.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVII. TRANSPORTATION – Would the project:				
a) Conflict with program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	☐	☐	☒	☐

Response:
Less Than Significant Impact.
Construction
Construction activities associated with the project would generate vehicular trips from construction workers traveling to and from project site, delivery of construction supplies and import materials to, and export of debris from, the project site. However, these activities would only occur for a period of 12 months. The increase of trips during construction activities would be limited and are not anticipated to exceed the number of operational trips described below. The short-term vehicle trips from construction of the project would generate less than significant traffic related impacts.
Operation
As shown in Table T-1 below, the proposed project would generate approximately 61 trips during the AM peak hour, 81 trips during the PM peak hour, and a total of 774 daily trips.

Table T-1: Project Trip Generation

Land Use	Units	Daily	AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
Trip Rates								
Single-Family Detached Housing[1]	DU	9.440	0.185	0.555	0.740	0.624	0.366	0.990
Project Trip Generation								
Detached Single Family	81 DU	774	15	46	61	51	30	81

Notes:
DU = Dwelling Units
1 Trip rates from the Institute of Transportation Engineers, Trip Generation, 10th Edition, 2017. Land Use Code 210 - Single-Family Detached Housing.

Source: EPD 2020 (Appendix J)

According to Exhibit A of the City of Moreno Valley Traffic Impact Analysis Preparation Guide, projects that generate fewer than 100 vehicle trips during the peak hours are generally exempt from the requirement to prepare a traffic impact analysis. The worst-case peak hour trip generation of the project is 81 PM peak hour trips, fewer than 100 peak hour trips. Therefore, the project would not result in a conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, and impacts would be less than significant.

The project area is currently served by the Riverside Transit Authority (RTA). The RTA provides both local and regional services throughout the region with 38 fixed routes, 9 commuter link routes, and Dial-A-Ride services. The existing RTA bus stop for Route 19, located adjacent to the project site on Iris Avenue, is the closest existing route to the project. Operation of the project would not affect the operation of the bus route. Thus, no impacts would occur. In addition, both sidewalks and bicycle lanes are located adjacent to the project site on Iris Avenue. The proposed project would not alter any of the existing bicycle or sidewalk facilities. Thus, impacts related to bicycle or pedestrian circulation would not occur from implementation of the project.

b) Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	☐	☐	☐	☐

Response:
Less than Significant Impact. The City of Moreno Valley has prepared updated *Traffic Impact Analysis Guidelines* (Guidelines) for Land Use Projects in June 2020 to address changes to CEQA pursuant to SB-743 to include VMT analysis methodology and thresholds. The City recommends using VMT per capita for home-based trips for residential

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

projects. Based on the Guidelines, a project would result in a significant project generated VMT impact under either of the following conditions:

1. A project would have a significant VMT impact if, in the Existing Plus Project scenario, its net VMT per capita (for residential projects) or per employee (for office and industrial projects) exceeds the average VMT for Moreno Valley. For all other uses, a net increase in VMT would be considered a significant impact.
2. If a project is consistent with the regional RTP/SCS, then the cumulative impacts shall be considered less than significant subject to consideration of other substantial evidence. If it is not consistent with the RTP/SCS, then it would have a significant VMT impact if:
    a. For residential projects its net VMT per capita exceeds the average VMT per capita for Moreno Valley in the RTP/SCS horizon-year.
    b. For office and industrial projects its net VMT per employee exceeds the average VMT per employee for Moreno Valley in the RTP/SCS horizon-year
    c. For all other land development project types, a net increase in VMT in the RTP/SCS horizon-year would be considered a significant impact.

The VMT analysis was conducted using two steps. First, the per capita VMT was calculated from the Riverside Transportation Analysis Model (RivTAM). Second, since the project includes project characteristics which reduce VMT but cannot be evaluated using the RivTAM, those calculations were conducted off-model. The RivTAM uses a base year of 2012 and a future year of 2040, and both models were run for the without and with project scenarios. VMT outputs are included in Attachment A to the VMT Memorandum (Appendix K to this document). Consistent to the Guidelines, the baseline (2020) conditions VMT was calculated by interpolating the Base Year and Future Year RivTAM runs. The methodology for the VMT analysis is further discussed in Appendix K to this document.

The first part of the VMT analysis was conducted using the RivTAM. Table T-2 summarizes the findings of the Base Year (2012) model run and Table T-3 summarizes the findings of the Future Year (2040) model run respectively. As seen on Table T-3, the Future Year (2040) project VMT per capita is 11.8 miles, which is less than the City's home-based VMT per capita of 13.7 miles, showing a less than significant impact under cumulative conditions.

Table T-2: Base Year (2012) Model VMT Summary

	Homebased VMT	Total Households	Total Population	VMT/Capita
Project	4,937	81	343	14.4
Moreno Valley				12.8
Source: VMT Memorandum (Appendix K).				

Table T-3: Future Year (2040) Model VMT Summary

	Homebased VMT	Total Households	Total Population	VMT/Capita
Project	4,039	81	343	11.8
Moreno Valley				13.7
Source: VMT Memorandum (Appendix K).				

Based on the City's Guidelines, Baseline VMT was calculated by interpolating between the model base and future years. Table T-4 shows the resulting VMT for the City and the Project. As seen on Table T-4, the project VMT per Capita is 13.6 miles, which is 4.58% greater than the City of Moreno Valley VMT/Capita of 13.0 miles.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table T-4: Future Year (2040) Model VMT Summary

	Homebased VMT	Total Households	Total Population	VMT/Capita
Project	4,681	81	343	13.6
Moreno Valley				13.0
Project VMT as a Percentage of City				**104.58%**

Source: VMT Memorandum (Appendix K).

The City also requires analysis of project effect on VMT within the City's roadways for disclosure although no thresholds are specified. This analysis was based on the RivTAM. Tables T-5, T-6, and T-7 show the results of the analysis for the Base Year (2012), Future Year (2040), and Baseline Year (2020) conditions. As seen from the tables, the project reduces per capita VMT within the City limits under all scenarios.

Table T-5: City of Moreno Valley - Project Effect on VMT (Base Year 2012)

	Without Project	With Project
Roadway VMT	1,717,720	1,716,263
Service Population	225,662	226,005
VMT/Service Population	**7.61**	**7.59**

Source: VMT Memorandum (Appendix K).

Table T-6: City of Moreno Valley - Project Effect on VMT (Future Year 2040)

	Without Project	With Project
Roadway VMT	2,783,726	2,759,709
Service Population	307,007	307,350
VMT/Service Population	**9.07**	**8.98**

Source: VMT Memorandum (Appendix K).

Table T-7: City of Moreno Valley - Project Effect on VMT (Baseline Year 2020)

	Without Project	With Project
Roadway VMT	2,022,293	2,014,391
Service Population	248,903	249,246
VMT/Service Population	**8.12**	**8.08**

Source: VMT Memorandum (Appendix K).

The second part of the VMT analysis includes the off-model calculations. The project includes several site-specific conditions that cannot be analyzed using the RivTAM, including a nearby pedestrian trail, a bus stop on a high-frequency transit route, and a higher residential density than assumed in the General Plan. These conditions these were calculated separately using CalEEMod and CAPCOA guidelines. These conditions reduce the VMT impacts of any development on the project site, as calculated in Table T-8.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Table T-8: VMT Reductions due to Site-Specific Conditions

	Annual VMT	Percent Reduction	Source
BAU VMT	2,669,967		CalEEMod
Pedestrian Connections Off Site	2,616,568	2.00%	CalEEMod
Proximity to Transit	2,536,469	5.00%	CalEEMod
Increased Density (Compared to GP)		3.60%	LUT 1 (CAPCOA)
Mitigated VMT	2,387,004		
Reductions due to PDFs	**89.40%**	**10.60%**	
Source: VMT Memorandum (Appendix K).			

Table T-9, below, shows the project generated VMT after accounting for site-specific conditions. As shown on Table T-9, these conditions result in project VMT being lower than the City VMT for both the baseline and cumulative conditions.

Table T-9: Project VMT Including Site-Specific Conditions

	Project VMT/Capita	Percent of City VMT
Baseline (2020) Project VMT/Capita (from RivTAM)	13.6	104.58%
Baseline (2020) Project VMT/Capita After PDF	**12.2**	**93.50%**
Cumulative (2040) Project VMT/Capita (from RivTAM)	11.8	86.15%
Cumulative (2040) Project VMT/Capita (after PDFs)	**10.5**	**80.67%**
Source: VMT Memorandum (Appendix K).		

Overall, the project generated VMT is under baseline conditions is 12.2 miles which is less than the City average of 13.0 miles. The project generated VMT under cumulative conditions is 10.5 miles, which is less than the City average of 13.7 miles. The “with project” VMT per service population on City roadways under the baseline and cumulative conditions are less than those under “without project” conditions. Therefore, the project would be consistent with CEQA Guidelines section 15064 and impacts would be less than significant.

c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☒	☐

Response:

Less Than Significant Impact. The project includes development of single-family residences. The project includes community type uses and does not include any incompatible uses, such as farm equipment. The proposed project area would be accessed from Iris Avenue, as well as through the onsite streets to each residence.

The project would also not increase any hazards related to a design feature. All of the onsite streets would be developed in conformance with City design standards. The City’s construction permitting process includes review of project plans to ensure that no potentially hazardous transportation design features would be introduced by the project. For example, the design of the project streets would be reviewed to ensure fire engine accessibility and turn around area is provided to the fire code standards. As a result, impacts related to vehicular circulation design features would be less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
d) Result in inadequate emergency access?	☐	☐	☒	☐

Response:
Less than Significant Impact.
Construction
The proposed construction activities, including equipment and supply staging and storage, would occur within and adjacent to the project area on Iris Avenue, and would not restrict access of emergency vehicles to the project site or adjacent areas. The installation of driveways and connections to existing infrastructure systems that would be implemented during construction of the proposed project could require the temporary closure of Iris Avenue. Traffic detours are not expected to be necessary. In addition, the construction activities would be required to ensure emergency access in accordance with Section 503 of the California Fire Code (Title 24, California Code of Regulations, Part 9), which would be ensured through the City's permitting process. Thus, implementation of the project through the City's permitting process would ensure existing regulations are adhered to and would reduce potential construction related emergency access impacts to a less than significant level.

Operation
As described previously, the proposed project area would be accessed from Iris Avenue, as well as through the onsite streets to each residence. Permitting of these roadways would provide adequate and safe circulation to, from, and through the project are and would provide two routes for emergency responders to access different portions of the project area. Because the project is required to comply with all applicable City codes, as verified by the City, potential impacts related to inadequate emergency access would be less than significant.

Existing Plans, Programs or Policies
None.

Mitigation Measures
None.

XVIII. TRIBAL CULTURAL RESOURCES – Would the project:

AB 52 and SB 18 Requirements

The project would be required to comply with AB 52 and SB 18 regarding tribal consultation. Chapter 532, Statutes of 2014 (i.e., AB 52), requires that Lead Agencies evaluate a project's potential to impact "tribal cultural resources." Such resources include sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are eligible for inclusion in the California Register or included in a local register of historical resources (PRC Section 21074). AB 52 also gives Lead Agencies the discretion to determine, supported by substantial evidence, whether a resource falling outside the definition stated above nonetheless qualifies as a "tribal cultural resource."

SB 18 requires cities and counties acting as Lead Agency to contact and consult with California Native American tribes before adopting or amending a General Plan. The intent of SB 18 is to establish meaningful consultation between tribal governments and local governments at the earliest possible point in the planning process and to enable tribes to manage "cultural places." Cultural places are defined as a Native American sanctified cemetery, place of worship, religious or ceremonial site, or sacred shrine (PRC Section 5097.9), or a Native American historic, cultural, or sacred site, that is listed or may be eligible for listing in the California Register, including any historic or prehistoric ruins, any burial ground, or any archaeological or historic site (PRC Section 5097.993).

In compliance with these requirements, the City sent out to the following Native American tribes that may have knowledge regarding tribal cultural resources in the project vicinity.

- Agua Caliente Band of Cahuilla Indians
- Cahuilla Band of Indians
- Desert Cahuilla Indians
- Los Coyotes Band of Cahuilla Mission Indians
- Morongo Band of Mission Indians
- Pechanga Band of Luiseño Indians
- Rincon Band of Luiseño Indians
- San Manuel Band of Mission Indians
- Santa Rosa Band of Mission Indians
- Serrano Nation of Mission Indians
- Soboba Band of Luiseño Indians

Native American consultation was conducted as part of the Phase I Cultural Resources Assessment (CUL 2020), which included initial contact with the Native American Heritage Commission and follow-up letters to local Native American representatives. The NAHC provided Material Culture Consulting, Inc. (MCC) with contact information for 21 tribes/individuals to reach out to for additional information on February 18, 2020. MCC sent letters on February 18, 2020 to all 21 Native American contacts, requesting any information related to cultural resources or heritage sites within or adjacent to the project area. Additional attempts at contact by letter, email, or phone call were made on March 4, 2020 and March 18, 2020. As a result of this outreach effort, MCC received seven responses from Native American Tribes or individuals. Several tribes responded with concerns about presence of nearby resources and presented requests for formal consultation with the Lead Agency. MCC did not conduct formal consultation with any of the Native American representatives and recommends that appropriate consultation take place as soon as possible between Riverside County, as lead agency, and all interested parties (CUL 2020).

The Agua Caliente Band of Cahuilla Indians, Pechanga Band of Luiseño Indians, Rincon Band of Luiseño Indians, and Soboba Band of Luiseño Indians requested consultation regarding the proposed Project. The consulting tribes consider

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
the area sensitive for cultural resources as several sites are located nearby. Although no information for site specific tribal cultural resources was provided (and there are no known tribal cultural resources on or adjacent to the project site), the consulting tribes requested inclusion of mitigation due to the potential of the Project to unearth previously undocumented tribal cultural resources during construction.				
a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k), or	☐	☐	☐	☒

Response:
No Impact. As detailed previously in Section 5, *Cultural Resources*, the project site is currently vacant. A review of historical aerial photographs and topographic maps indicate that prior to 1990s, the project area was agricultural. By the late 1990s, the surrounding area saw increased commercial and residential development that has continued up to the present day.

The Phase I Cultural Resources Assessment prepared for the project included a search of the California Historical Resource Information System (CHRIS) at the Eastern Information Center (EIC), located at the University of California, Riverside, Riverside County. The record search indicated five previously recorded resources located within a 1-mile radius of the area, with no resources located directly within the project area. Furthermore, the Sacred Lands File search completed by the NAHC did not identify any previously known tribal cultural resources or sacred lands within the vicinity of the project area (CUL 2020). Therefore, no substantial evidence exists that tribal cultural resources are present in the project site, and potential impacts would be less than significant.

ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	☐	☐	☒	☐

Response:
Less Than Significant Impact. The project site is vacant, and as discussed in Impact TCR-1 above, no substantial evidence exists that tribal cultural resources are present in the project site. Based on the results of the cultural resources search and survey, the proposed project area is considered to have a low sensitivity for presence of significant prehistoric or historical archaeological deposits or features (CUL 2020).

In addition, as described previously, PPP CUL-1 requires a qualified professional archeologist to be present at the pre-grade meeting to detail an inadvertent discovery plan and for contractors to halt work within 50 feet in the event of uncovering a potential archaeological resource and to have the find evaluated by a qualified archaeologist. Furthermore, implementation of PPP CUL-2, California Health and Safety Code, Section 7050.5 requires that if human remains are discovered in the project site, disturbance of the site shall halt and remain halted until the coroner has conducted an investigation. If the coroner determines that the remains are those of a Native American, he or she shall contact, by telephone within 24 hours, the Native American Heritage Commission. Therefore, with implementation of PPP CUL -1 and PPP CUL-2, impacts to tribal cultural resources would be less than significant.

Existing Plans, Programs, or Policies
PPP CUL-1: Inadvertent Discoveries. Listed previously in Section 5, Cultural Resources.
PPP CUL-2: Human Remains. Listed previously in Section 5, Cultural Resources.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Mitigation Measures

MM TCR-1: Prior to the issuance of a grading permit, the Developer shall retain a professional archaeologist to conduct monitoring of all mass grading and trenching activities. The Project Archaeologist shall have the authority to temporarily redirect earthmoving activities in the event that suspected archaeological resources are unearthed during Project construction. The Project Archaeologist, in consultation with the Consulting Tribe(s), the contractor, and the City, shall develop a Cultural Resources Management Plan (CRMP) in consultation pursuant to the definition in AB52 to address the details, timing and responsibility of all archaeological and cultural activities that will occur on the project site. A consulting tribe is defined as a tribe that initiated the AB 52 tribal consultation process for the Project, has not opted out of the AB52 consultation process, and has completed AB 52 consultation with the City as provided for in Cal Pub Res Code Section 21080.3.2(b)(1) of AB52. Details in the Plan shall include:

a. Project grading and development scheduling;

b. The Project archeologist and the Consulting Tribes(s) as defined in CR-1 shall attend the pre-grading meeting with the City, the construction manager and any contractors and will conduct a mandatory Cultural Resources Worker Sensitivity Training to those in attendance. The Training will include a brief review of the cultural sensitivity of the Project and the surrounding area; what resources could potentially be identified during earthmoving activities; the requirements of the monitoring program; the protocols that apply in the event inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols. All new construction personnel that will conduct earthwork or grading activities that begin work on the Project following the initial Training must take the Cultural Sensitivity Training prior to beginning work and the Project archaeologist and Consulting Tribe(s) shall make themselves available to provide the training on an as-needed basis;

c. The protocols and stipulations that the contractor, City, Consulting Tribe(s) and Project archaeologist will follow in the event of inadvertent cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation.

MM TCR-2: Prior to the issuance of a grading permit, the Developer shall secure agreements with the Pechanga Band of Luiseño Indians and the Soboba Band of Luiseño Indians for tribal monitoring. The Developer is also required to provide a minimum of 30 days advance notice to the tribes of all mass grading and trenching activities. The Native American Tribal Representatives shall have the authority to temporarily halt and redirect earth moving activities in the affected area in the event that suspected archaeological resources are unearthed. If the Native American Tribal Representatives suspect that an archaeological resource may have been unearthed, the Project Archaeologist or the Tribal Representatives shall immediately redirect grading operations in a 100-foot radius around the find to allow identification and evaluation of the suspected resource. In consultation with the Native American Tribal Representatives, the Project Archaeologist shall evaluate the suspected resource and make a determination of significance pursuant to California Public Resources Code Section 21083.2.

MM TCR-3: In the event that Native American cultural resources are discovered during the course of grading (inadvertent discoveries), the following procedures shall be carried out for final disposition of the discoveries:

a) One or more of the following treatments, in order of preference, shall be employed with the tribes. Evidence of such shall be provided to the City of Moreno Valley Planning Department:

i. Preservation-In-Place of the cultural resources, if feasible. Preservation in place means avoiding the resources, leaving them in the place they were found with no development affecting the integrity of the resources.

ii. Onsite reburial of the discovered items as detailed in the treatment plan required pursuant to Mitigation Measure CR-1. This shall include measures and provisions to protect the future reburial area from any

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

future impacts in perpetuity. Reburial shall not occur until all legally required cataloging and basic recordation have been completed. No recordation of sacred items is permitted without the written consent of all Consulting Native American Tribal Governments as defined in CR-1.

MM TCR-4: The City shall verify that the following note is included on the Grading Plan:

"If any suspected archaeological resources are discovered during ground-disturbing activities and the Project Archaeologist or Native American Tribal Representatives are not present, the construction supervisor is obligated to halt work in a 100-foot radius around the find and call the Project Archaeologist and the Tribal Representatives to the site to assess the significance of the find."

MM TCR-5: If potential historic or cultural resources are uncovered during excavation or construction activities at the project site, work in the affected area must cease immediately and a qualified person meeting the Secretary of the Interior's standards (36 CFR 61), Tribal Representatives, and all site monitors per the Mitigation Measures, shall be consulted by the City to evaluate the find, and as appropriate recommend alternative measures to avoid, minimize or mitigate negative effects on the historic, or prehistoric resource. Determinations and recommendations by the consultant shall be immediately submitted to the Planning Division for consideration, and implemented as deemed appropriate by the Community Development Director, in consultation with the State Historic Preservation Officer (SHPO) and any and all Consulting Native American Tribes as defined in CR-1 before any further work commences in the affected area.

MM TCR-6: If human remains are discovered, no further disturbance shall occur in the affected area until the County Coroner has made necessary findings as to origin. If the County Coroner determines that the remains are potentially Native American, the California Native American Heritage Commission shall be notified within 24 hours of the published finding to be given a reasonable opportunity to identify the "most likely descendant". The "most likely descendant" shall then make recommendations, and engage in consultations concerning the treatment of the remains (California Public Resources Code 5097.98). (GP Objective 23.3, CEQA).

5. Cultural Resources Inventory for the City of Moreno Valley, Riverside County, California, prepared by Daniel F. McCarthy, Archaeological Research Unit, University of California, Riverside, October 1987 (*This document cannot be provided to the public due to the inclusion of confidential information pursuant to Government Code Section 6254.10.*)
6. Phase I Cultural Resources Assessment: Iris Park Project, City of Moreno Valley, Riverside County, California. March 2020. Prepared by Material Culture Consulting, Inc. (Appendix C).

XIX. UTILITIES AND SERVICE SYSTEMS – Would the project:				
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or	☐	☐	☒	☐

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
relocation of which could cause significant environmental effects?				

Response:

Water Infrastructure

The proposed project would install a new water pipeline within the project site that would connect to the existing 18-inch EMWD water pipeline in the adjacent Metropolitan Water District (MWD) easement. The new onsite water system would convey water supplies to the proposed residences and landscaping through plumbing/landscaping fixtures that are compliant with the CalGreen Plumbing Code for efficient use of water.

The proposed project would continue to receive water supplies through the existing water line located within the Iris Avenue rights-of-way that has the capacity to provide the increased water supplies needed to serve the proposed project, and no extensions or expansions to the water pipelines that convey water to the project site would be required. The installation of onsite water distribution lines would only serve the proposed project and would not provide water to any off-site areas.

The construction activities related to the onsite water infrastructure that would be needed to serve the proposed single-family residences is included as part of the proposed project and would not result in any physical environmental effects beyond those identified throughout this MND. For example, construction emissions for excavation and installation of the water infrastructure is included in Sections 3, *Air Quality* and 8, *Greenhouse Gas Emissions*. Therefore, the proposed project would not result in the construction of new water facilities or expansion of existing facilities, the construction of which could cause significant environmental effects, and impacts would be less than significant.

Wastewater Infrastructure

The project includes installation of onsite sewer lines within the proposed onsite streets that would connect to the existing 18-inch sewer line in the adjacent California Aqueduct easement. These wastewater flows will be further transported to the Moreno Valley Regional Water Reclamation Facility.

The construction activities related to installation of the onsite sewer infrastructure that would serve the proposed project is included as part of the proposed project and would not result in any physical environmental effects beyond those identified throughout this MND. For example, construction emissions for excavation and installation of the sewer infrastructure is included in Section 3, *Air Quality* and 8, *Greenhouse Gas Emissions*, and noise volumes from these activities are evaluated in Section 13, *Noise*. As the proposed project includes facilities to serve the proposed development, it would not result in the need for construction of other new wastewater facilities or expansions, the construction of which could cause significant environmental effects. Therefore, impacts would be less than significant.

b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	☐	☐	☒	☐

Response:

Less Than Significant Impact. The proposed project would result in an increased demand for water supplies from the 81 single-family residential units and from associated project recreational areas. Water supplies to the project area are provided by EMWD, which serves 555 square miles of western Riverside County and includes the project area (UWMP 2015). In 2015, EMWD had a water demand of 146,090 AF, and based on land use and growth projections it anticipates a demand of 197,901 AF in 2020, which is a 35 percent increase over 2015 demands (an increase of 51,811 AF) (UWMP 2015). The UWMP details that the District has water supply to meet the projected demands over the next 25 years and beyond (UWMP 2015). The UWMP describes that the District has a projected supply of 197,901 AFY in 2020, and a predicted supply of 268,200 AFY in 2082.

To provide a conservative estimate of project water use, a generation rate of 176 gallons per capita per day was used to estimate water demand from the proposed project (UWMP 2015). As described in Section 14, *Population and Housing*, the proposed project would result in 325 additional residents at full occupancy. Based on the District's 2020 water use target of 176 gallons per capita per day, the 325 additional residents would generate a water demand of 57,200 gallons

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
per day. The project would limit water demand by inclusion of low-flow plumbing and irrigation fixtures, pursuant to the California Title 24 requirements. As detailed previously, the District has water supply to meet the projected demands over the next 25 years and beyond. In addition, the 2015 UWMP details the available supply, including groundwater, imported water, and recycled water would meet the projected demand during normal, single dry and multiple dry years (UWMP 2015). Therefore, impacts related to water supplies from the proposed project would be less than significant.				
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☐	☒
Response: **No Impact.** As described above, wastewater flows would be conveyed to the Moreno Valley Regional Water Reclamation Facility. The treatment facility typically processes 10.6 million gallons per day (MGD) but has a current capacity for 16 MGD and an ultimate capacity of 41 MGD (UWMP 2015). Through the City's plan check process, the City's Engineering Department would confirm that the wastewater generated from the Project would be accommodated within this capacity. Thus, the wastewater treatment plant has adequate capacity to serve the Project's projected demand in addition to the provider's existing commitments, and impacts would not occur.				
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	☐	☐	☒	☐
Response: **Less Than Significant Impact.** The closest landfill to the vacant project site is the Badlands Sanitary Landfill, which is located approximately 7.9 miles northeast from the project site at 31125 Ironwood Avenue in Moreno Valley. The landfill is permitted to accept 4,800 tons per day of solid waste and is permitted to operate through 2022 (CalRecycle 2020). As of March 2020, the landfill has a remaining capacity of 15,748,799 cubic yards (CalRecycle 2020). The CalEEMod solid waste generation rate for single-family residential land use is 0.41 tons per resident per year. As described previously, full occupancy of the proposed project would generate approximately 325 new residents. Thus, operation of the project would generate approximately 133.25 tons per solid waste per year; or 2.56 tons per week. However, at least 75 percent of the solid waste is required by AB 341 to be recycled, which would reduce the volume of landfilled solid waste to approximately 0.64 tons per week or .09 tons per day, which is within the Badlands Sanitary Landfill's existing permitted capacity of 4,800 tons per day. Thus, the proposed project would be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs and the project would not impair the attainment of solid waste reduction goals. Impacts related to landfill capacity would be less than significant.				
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	☐	☐	☐	☒
Response: **No Impact**. The proposed project would result in new development that would generate an increased amount of solid waste. All solid waste-generating activities within the City are subject to the requirements set forth in Section 5.828.1 of the 2016 California Green Building Standards Code that requires demolition and construction activities to recycle or reuse a minimum of 65 percent of the nonhazardous construction and demolition waste, and AB 341 that requires diversion of a minimum of 75 percent of operational solid waste. Implementation of the proposed project would be consistent with all state regulations, as ensured through the City's development project permitting process. Therefore, the proposed project would comply with all solid waste statute and regulations; and impacts would not occur.				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Existing Plans, Programs, or Policies
None.

Mitigation Measures
None.

XX. WILDFIRE – If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, **would the project:**				
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒

Response:
No Impact. The project site is developed and within an urbanized residential area of Moreno Valley. The project site is surrounded by developed and urban areas. The project site is not adjacent to any wildland areas. According to the CAL FIRE Hazard Severity Zone map, the project site is not within a fire hazard zone. The project area would be accessed from two driveways on Iris Avenue. Permitting of these roadways would provide adequate and safe circulation to, from, and through the project area and would provide two routes for emergency responders to access different portions of the project area. Because the project is required to comply with all applicable City codes, as verified by the City potential impacts related to an emergency response or evacuation would be less than significant.

b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	☐	☐	☐	☒

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Response: **No Impact.** As discussed previously, the project site is developed and within an urbanized residential area of Moreno Valley. The project site is surrounded by developed and urban areas. The project site is not adjacent to any wildland areas, and as determined by the CAL FIRE Hazard Severity Zone map, the project site is not within a fire hazard zone. In addition, the project site is flat and within a flat area. The site is adjacent to roadways and commercial and residential developments. There are no factors on or adjacent to the project site that would exacerbate wildfire risks. Thus, no impact related to other factors that would expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire would occur from the project.				
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	☐	☐	☐	☒
Response: **No Impact.** As described previously, the project site is developed and within a developed and urban area that is not within a wildfire hazard zone. The project does not include any infrastructure that would exacerbate fire risks. In addition, the project would provide internal streets and fire suppression facilities (e.g., hydrants and sprinklers) that conform to the California Fire Code requirements, included as Municipal Code Chapter 8.36, as verified through the City's permitting process. Therefore, impacts related to infrastructure that could exacerbate fire risks would not occur with the proposed project.				
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	☐	☐	☐	☒
Response: **No Impact.** As described previously, the project site is developed and within a developed and urban area that is not within a wildfire hazard zone. In addition, the project site is flat and surrounded by flat areas. There are no slope or hillsides that would become unstable. In addition, the project would install onsite drainage that would be conveyed to the existing flood control channel, which is consistent with the existing condition. Therefore, impacts related to flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes would not occur from the proposed project.

XXI. MANDATORY FINDINGS OF SIGNIFICANCE				
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☒	☐	☐

Response:

Less Than Significant with Mitigation Incorporated. The Habitat Assessment (Blackhawk 2020) describes that the special-status wildlife and plant species with the potential to occur on the project site are covered by compliance with the MSHCP, which requires payment of fees, included as PPP BIO-1. In addition, because the site supports suitable habitat for burrowing owl the MSHCP requires focused surveys pursuant to the Western Riverside County Regional Conservation Authority (RCA) Burrowing Owl Survey Instructions for the MSHCP area. Hence, Mitigation Measure BIO-1 requires a preconstruction burrowing owl survey to be conducted pursuant to the RCA Survey Instructions prior to start of ground disturbance activities. With implementation of Mitigation Measures BIO-1, impacts related to burrowing owl would be less than significant.

In addition, the Habitat Assessment identified suitable habitat and substrate for raptors and migratory birds that are protected under the Migratory Bird Treaty Act and Section 3503.5 of the California Department of Fish and Wildlife (CDFW) code. Therefore, Mitigation Measure BIO-2 is included to require nesting bird surveys if construction activities begin during the nesting season. With implementation of Mitigation Measure BIO-2, impacts related to protected bird species would also be reduced to a less than significant level.

As described in Section 5, *Cultural Resources*, the project site does not contain any buildings or structures that meet any of the California Register of Historical Resources (California Register) criteria or qualify as "historical resources" as defined by CEQA. Therefore, the proposed project would not cause a substantial adverse change in the significance of a historical resource. In addition, the Phase I Cultural Resources Assessment determined that based on the results of the cultural resources search and survey, the proposed project area is considered to have a low sensitivity for presence of significant prehistoric or historical archaeological deposits or features. However, because previous resources have been identified within a one-mile radius of the project area, MM CUL-1 has been included to require contractors to halt work within 50 feet of any inadvertent finds of potential archaeological resource and to have the find evaluated by a qualified archaeologist.

The project area is considered moderately sensitive for paleontological resources. Thus, MM PAL-1 has been included to require paleontological monitoring during all future excavations that would exceed a relative depth of five feet below the present surface. Thus, implementation of MM PAL-1 would reduce potential impacts to important examples of California prehistory to a less than significant level.

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current project, and the effects of probable future projects.)?	☐	☐	☒	☐

Response:

Less than Significant with Mitigation Incorporated. The project would develop the project site for single-family residences within a developed area. The project would provide land uses that are consistent with the adjacent single-

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

family residential and retail commercial uses. As described above, all of the potential impacts related to implementation of the project would be less than significant or reduced to a less than significant level with implementation of mitigation measures that are imposed by the City that effectively reduce environmental impacts.

The other cumulative effects of the proposed project taken into consideration with these other projects would be limited, because the project site has already been developed and disturbed and the new uses onsite would not result in substantial change in the urban use of the area. As discussed in Section 19, *Utilities and Service Systems*, public services and utility infrastructure are in place to serve the project and would not result in cumulatively considerable increases in service and utility needs to serve the project. In addition, the project would not result in substantial effects to any environmental resource topic, as described though out this document.

Overall, the proposed project would develop an area that has been subject to previous urban uses, is disturbed, and is surrounded by consistent development and roadways. Impacts to environmental resources or issue areas would not be cumulatively considerable; and cumulative impacts would be less than significant with implementation of the previously identified mitigation measures related to cultural resources, paleontological resources, hazardous materials, and tribal cultural resources.

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☒	☐	☐

Response:

Less than Significant with Mitigation Incorporated. The project proposes development of the project site for single-family residential uses. As described previously, the project site is within an urban area and surrounded by consistent land uses. The project would not consist of any use or any activities that would result in a substantial negative affect on persons in the vicinity. All resource topics associated with the proposed project have been analyzed in accordance with CEQA and the State CEQA Guidelines and were found to pose no impacts or less-than-significant impacts with implementation of mitigation measures related to cultural resources, paleontological resources, hazardous materials, and tribal cultural resources; and existing plans, programs, or policies that are required by the City. Consequently, the proposed project would in environmental effects that would cause substantial adverse effects on human beings directly or indirectly, and impacts would be less than significant with mitigation.

CITY OF MORENO VALLEY
PLANNING COMMISSION

VIA TELECONFERENCE ONLY
PURSUANT TO COVID-19
GOVERNOR EXECUTIVE ORDER N-29-20

NOTICE OF PUBLIC HEARING AND ENVIRONMENTAL DETERMINATION

NOTICE IS HEREBY GIVEN that a teleconferenced Public Hearing will be held by the Planning Commission of the City of Moreno Valley on the date and time set forth below:

Date and Time:	November 12, 2020 at 7:00 p.m.
Location:	**VIA TELECONFERENCE ONLY** **Go to http://morenovalleyca.iqm2.com/Citizens/default.aspx for instructions.**
Item:	PEN20-0063 Tentative Tract 37909 PEN20-0065 Conditional Use Permit for a Planned Unit Development PEN20-0066 General Plan Amendment PEN20-0067 Change of Zone
Applicant:	Passco Pacifica LLC
Property Owner:	Maple Lane Group LLC
APN:	312-020-025
Location:	South side of Iris Avenue east of Perris Boulevard
Proposal:	The applicant is requesting approval of the following entitlements for an 10.82-acre site: 1) a General Plan Amendment (GPA) amending Figure 2-2 "Land Use Map" of the Moreno Valley General Plan to change the land use designation of the project site from Residential 5 (R5) to Residential 10 (R10); 2) a Change of Zone amending the City of Moreno Valley Zoning Atlas to rezone the project site from Residential 5 (R5) District to Residential Single-Family 10 (RS10) District; 3) a Tentative Tract Map 37909 to subdivide into eighty-two (82) single family lots; and 4) a Conditional Use Permit for a Planned Unit Development with associated amenities and public improvements.
Council District:	4

Environmental Determination: The project has been evaluated against criteria set forth in the California Environmental Quality Act (CEQA) Guidelines Section 15070 and has determined that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because mitigation measures have been required of the project that will reduce potential impacts to a less than significant level. Therefore, a Mitigated Negative Declaration is recommended for the project.

PUBLIC TESTIMONY: All interested parties will be provided an opportunity to submit oral testimony during the teleconferenced Public Hearing and/or provide written testimony during or prior to the teleconferenced Public Hearing. The application file and related environmental documents may be inspected by appointment at the Community Development Department at 14177 Frederick Street, Moreno Valley, California by calling (951) 413-3206 during normal business hours (7:30 a.m. to 5:30 p.m., Monday through Thursday).

COVID-19 – IMPORTANT NOTICES: Please note that due to the COVID-19 pandemic situation, staff will attempt to make reasonable arrangements to ensure accessibility to inspect the aforementioned records. **In addition, special instructions on how to effectively participate in the teleconferenced Public Hearing, as approved by Governor Executive Order No. N-25-20, will be posted at http://morenovalleyca.iqm2.com/Citizens/default.aspx and will be described in the Planning Commission agenda.**

PLEASE NOTE: The Planning Commission may consider and approve changes to the proposed items under consideration during the teleconferenced Public Hearing.

GOVERNMENT CODE § 65009 NOTICE: If you challenge any of the proposed actions taken by the Planning Commission in court, you may be limited to raising only those issues you or someone else raised during the teleconferenced Public Hearing described in this notice, or in written correspondence deliv[illegible] the Planning Division of the City of Moreno Valley during or prior to, the teleconferenced Public Hea[illegible]

ACCESSIBILITY: Upon request and in compliance with the Americans with Disabilities Act of 1990, any person with a disability who requires a modification or accommodation in order to participate in a meeting should direct such request to Guy Pegan, ADA Coordinator, at (951) 413-3120 at least 48 hours before the meeting. The 48-hour notification will enable the City to make reasonable arrangements to ensure accessibility to this meeting.

STAFF CONTACT: Due to the COVID-19 pandemic situation, if you have questions regarding this Public Hearing, please contact Julia Descoteaux, Associate Planner, by telephone at (951) 413-3209 or via email at juliad@moval.org.

Mitigation Monitoring and Reporting Program

Introduction

The California Environmental Quality Act (CEQA) requires a lead or public agency that approves or carries out a project for which an Mitigated Negative Declaration has been certified which identifies one or more significant adverse environmental effects and where findings with respect to changes or alterations in the project have been made, to adopt a "…reporting or monitoring program for the changes to the project which it has adopted or made a condition of project approval in order to mitigate or avoid significant effects on the environment" (CEQA, Public Resources Code Sections 21081, 21081.6).

A Mitigation Monitoring and Reporting Program (MMRP) is required to ensure that adopted mitigation measures are successfully implemented for the Iris Park project (project). The City of Moreno Valley is the Lead Agency for the project and is responsible for implementation of the MMRP. This report describes the MMRP for the project and identifies the parties that will be responsible for monitoring implementation of the individual mitigation measures in the MMRP.

Mitigation Monitoring and Reporting Program

The MMRP for the project will be active through all phases of the project, including design, construction, and operation. The attached table identifies the mitigation program required to be implemented by the City for the Iris Park project. The table identifies the Standard Conditions; Plan, Program, Policies (PPPs); and mitigation measures required by the City to mitigate or avoid significant adverse impacts associated with the implementation of the project, the timing of implementation, and the responsible party or parties for monitoring compliance.

The MMRP also includes a column that will be used by the compliance monitor (individual responsible for monitoring compliance) to document when implementation of the measure is completed. As individual Plan, Program, Policies; and mitigation measures are completed, the compliance monitor will sign and date the MMRP, indicating that the required actions have been completed.

This page intentionally left blank.

TABLE 1: MITIGATION MONITORING AND REPORTING PROGRAM
IRIS PARK PROJECT MND

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
AIR QUALITY			
Plan, Program, or Policy PPP AQ-1: Rule 822. The project is required to comply with the provisions of South Coast Air Quality Management District (SCAQMD) Rule 822. The project shall not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property.	In Construction Plans and Specifications. Prior to Demolition, Grading and Building Permits	City of Moreno Valley Building and Safety Division	
Plan, Program, or Policy PPP AQ-2: Rule 823. The project is required to comply with the provisions of South Coast Air Quality Management District (SCAQMD) Rule 823, which includes the following: • All clearing, grading, earth-moving, or excavation activities shall cease when winds exceed 25 mph per SCAQMD guidelines in order to limit fugitive dust emissions. • The contractor shall ensure that all disturbed unpaved roads and disturbed areas within the project are watered, with complete coverage of disturbed areas, at least 3 times daily during dry weather; preferably in the mid-morning, afternoon, and after work is done for the day.	In Construction Plans and Specifications. Prior to Grading and Building Permits	City of Moreno Valley Building and Safety Division	

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
• The contractor shall ensure that traffic speeds on unpaved roads and project site areas are reduced to 15 miles per hour or less.			
Plan, Program, or Policy PPP Rule 1113. The project is required to comply with the provisions of South Coast Air Quality Management District Rule (SCAQMD) Rule 1113. Only "Low-Volatile Organic Compounds" paints (no more than 50 gram/liter of VOC) and/or High Pressure Low Volume (HPLV) applications shall be used.	In Construction Plans and Specifications. Prior to Grading and Building Permits	City of Moreno Valley Building and Safety Division	
BIOLOGICAL RESOURCES			
Mitigation Measure MM-BIO 1: Payment of MSHCP Mitigation Fees. Prior to issuance of a grading or building permit, the applicant will be required to pay relevant MSHCP mitigation fees per the Final Mitigation Fee Nexus Report. These fees will be determined in consultation with the Riverside Conservation Authority based on final project classification and impacts. Payment of all mitigation fees will be required as part of the project approval process.	In Construction Plans and Specifications. Prior to Demolition and Building Permits	City of Moreno Valley Planning Division	
Mitigation Measure MM-BIO 2: Preconstruction Nesting Bird Surveys. To the extent feasible, conduct vegetation removal outside of the nesting bird season (generally between March 1 and August 31). If vegetation removal is required during the nesting bird season, conduct take avoidance surveys for nesting birds within 100-feet of areas proposed for vegetation removal. Surveys should be conducted by a qualified biologist(s) within 14 days of vegetation removal. If active nests are observed, a qualified biologist will determine appropriate minimum disturbance buffers or other adaptive mitigation techniques (e.g., biological monitoring of active nests during construction-related activities, staggered schedules, etc.) to ensure that impacts to nesting birds are avoided until the nest is no longer active.	In Construction Plans and Specifications. Prior to Grading Permits	City of Moreno Valley Planning Division	

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
CULTURAL RESOURCES			
Plan, Program, or Policy PPP CUL-1: Human Remains. Should human remains be encountered, all work in the immediate vicinity of the burial must cease and any necessary steps to ensure the integrity of the immediate area must be taken. The Riverside County Coroner shall be immediately notified and must then determine whether the remains are Native American. If the Coroner determines the remains are Native American, the Coroner has 24 hours to notify the NAHC, who will in turn, notify the person they identify as the Most-Likely-Descendent (MLD) of any human remains. Further actions will be determined, in part, by the desires of the MLD. The MLD has 48 hours to make recommendations regarding the disposition of the remains following notification from the NAHC of the discovery. If the MLD does not make recommendations within 48 hours, the owner shall, with appropriate dignity, reinter the remains in an area of the property secure from further disturbance. Alternatively, if the owner does not accept the MLD's recommendations, the owner or the descendent may request mediation by the NAHC.	In Construction Plans and Specifications. Prior to Grading Permits	City of Moreno Valley Planning Division	
Mitigation Measure MM CUL-1: Inadvertent Discoveries. In the event that buried archaeological resources are inadvertently discovered during ground-disturbing activities, work must be halted within 50 feet of the find until it can be evaluated by a qualified archaeologist. Construction activities could continue in other areas. If the discovery proves to be significant, additional work, such as data recovery excavation or fossil recovery, may be warranted and would be discussed in consultation with the appropriate regulatory agency(ies).	In Construction Plans and Specifications. Prior to Grading Permits.	City of Moreno Valley Planning Division	
GEOLOGY AND SOILS			

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
Plan, Program, or Policy PPP GEO-1: California Building Code. The project is required to comply with the California Building Code as included in the City's Municipal Code Chapter 8.20 to preclude significant adverse effects associated with seismic hazards. California Building Code related and geologist and/or civil engineer specifications for the project are required to be incorporated into grading plans and specifications as a condition of project approval.	In Construction Plans and Specifications. Prior to Building Permits	City of Moreno Valley Building and Safety Division	
Mitigation Measure MM PAL-1: Paleontological Resources. Prior to issuance of grading permits, the developer will retain a qualified paleontologist to provide the following monitoring and reporting services during construction: • A trained and qualified paleontological monitor will perform full-time monitoring of any excavations on the project that have the potential to impact paleontological resources in undisturbed native sediments below 5 feet in depth. The monitor will have the ability to redirect construction activities to ensure avoidance of adverse impacts to paleontological resources. • The project paleontologist may re-evaluate the necessity for paleontological monitoring after examination of the affected sediments during excavation. • Any potentially significant fossils observed shall be collected and recorded in conjunction with best management practices and SVP professional standards. • Any fossils recovered during mitigation should be deposited in an accredited and permanent scientific institution for the benefit of current and future generations.	In Construction Plans and Specifications. Prior to Grading Permits	City of Moreno Valley Planning Division	

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
• A report documenting the results of the monitoring, including any salvage activities and the significance of any fossils, will be prepared and submitted to the appropriate City personnel.			
GREENHOUSE GAS EMISSIONS			
Plan, Program, or Policy PPP GHG-1: CalGreen Compliance. The project is required to comply with the CalGreen Building Code as included in the City's Municipal Code to ensure efficient use of energy. CalGreen specifications are required to be incorporated into building plans as a condition of building permit approval.	In Construction Plans and Specifications. Prior to Building Permits	City of Moreno Valley Building and Safety Division	
HYDROLOGY AND WATER QUALITY			
Plan, Program, or Policy PPP WQ-1: Stormwater Pollution Prevention Plan. Prior to grading permit issuance, the project developer shall have a Stormwater Pollution Prevention Plan (SWPPP) prepared by a Qualified SWPPP Developer (QSD) in accordance with the City's Municipal Code Chapter 8.10 and the Santa Ana Regional Water Quality Control Board National Pollution Discharge Elimination System (NPDES) Storm Water Permit Order No. R4-2012-0175 (MS4 Permit). The SWPPP shall incorporate all necessary Best Management Practices (BMPs) and other NPDES regulations to limit the potential of erosion and polluted runoff during construction activities. Project contractors shall be required to ensure compliance with the SWPPP and permit periodic inspection of the construction site by the City of Moreno Valley staff or its designee to confirm compliance.	In Construction Plans and Specifications. Prior to Demolition, Grading, and Building Permits	City of Moreno Valley Building and Safety Division	

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
Plan, Program, or Policy PPP WQ-2: Water Quality Management Plan, Prior to grading permit issuance, the project applicant shall have a Water Quality Management Plan (WQMP) approved by the City for implementation. The project shall comply with the City's Municipal Chapter 8.10 and the Municipal Separate Storm Sewer System (MS4) permit requirements in effect for the Regional Water Quality Control Board (RWQCB) at the time of grading permit to control discharges of sediments and other pollutants during operations of the project.	In Construction Plans and Specifications. Prior to Grading and Building Permits	City of Moreno Valley Building and Safety Division	
PUBLIC SERVICES			
Plan, Program, or Policy PPP PS-1: The project will be required to pay applicable development fees levied by the Moreno Valley Unified School District pursuant to the School Facilities Act (Senate Bill [SB] 50, Stats. 1998, c.827) to offset any effects on school facilities resulting from new development.	Prior to Building Permits.	City of Moreno Valley Planning Division	
Plan, Program, or Policy PPP PS-2: Park Fees. As a condition of the approval of a residential development, the project shall pay applicable park related fees and/or dedicate parkland pursuant to Municipal Code Section 3.38.080 and Chapter 3.40.	Prior to Building Permits.	City of Moreno Valley Planning Division	
TRIBAL CULTURAL RESOURCES			
Mitigation Measure MM TCR-1: Prior to the issuance of a grading permit, the Developer shall retain a professional archaeologist to conduct monitoring of all mass grading and trenching activities. The Project Archaeologist shall have the authority to temporarily redirect earthmoving activities in the event that suspected archaeological resources are unearthed during Project construction. The Project Archaeologist, in consultation with the Consulting Tribe(s), the contractor, and the City, shall develop a Cultural	Prior to Grading Permits.	City of Moreno Valley Planning Division	

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
Resources Management Plan (CRMP) in consultation pursuant to the definition in AB52 to address the details, timing and responsibility of all archaeological and cultural activities that will occur on the project site. A consulting tribe is defined as a tribe that initiated the AB 52 tribal consultation process for the Project, has not opted out of the AB52 consultation process, and has completed AB 52 consultation with the City as provided for in Cal Pub Res Code Section 21080.3.2(b)(1) of AB52. Details in the Plan shall include: a. Project grading and development scheduling; b. The Project archeologist and the Consulting Tribes(s) as defined in CR-1 shall attend the pre-grading meeting with the City, the construction manager and any contractors and will conduct a mandatory Cultural Resources Worker Sensitivity Training to those in attendance. The Training will include a brief review of the cultural sensitivity of the Project and the surrounding area; what resources could potentially be identified during earthmoving activities; the requirements of the monitoring program; the protocols that apply in the event inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols. All new construction personnel that will conduct earthwork or grading activities that begin work on the Project following the initial Training must take the Cultural Sensitivity Training prior to beginning work and the Project archaeologist and Consulting Tribe(s) shall make themselves available to provide the training on an as-needed basis; c. The protocols and stipulations that the contractor, City, Consulting Tribe(s) and Project archaeologist will follow in the event of			

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
inadvertent cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation.			
Mitigation Measure MM TCR-2: Prior to the issuance of a grading permit, the Developer shall secure agreements with the Pechanga Band of Luiseño Indians and the Soboba Band of Luiseño Indians for tribal monitoring. The Developer is also required to provide a minimum of 30 days advance notice to the tribes of all mass grading and trenching activities. The Native American Tribal Representatives shall have the authority to temporarily halt and redirect earth moving activities in the affected area in the event that suspected archaeological resources are unearthed. If the Native American Tribal Representatives suspect that an archaeological resource may have been unearthed, the Project Archaeologist or the Tribal Representatives shall immediately redirect grading operations in a 100-foot radius around the find to allow identification and evaluation of the suspected resource. In consultation with the Native American Tribal Representatives, the Project Archaeologist shall evaluate the suspected resource and make a determination of significance pursuant to California Public Resources Code Section 21083.2.	Prior to Grading Permits.	City of Moreno Valley Planning Division	
Mitigation Measure MM TCR-3: In the event that Native American cultural resources are discovered during the course of grading (inadvertent discoveries), the following procedures shall be carried out for final disposition of the discoveries: a) One or more of the following treatments, in order of preference, shall be employed with the tribes. Evidence of such shall be provided to the City of Moreno Valley Planning Department:	During Project Grading and Construction.	City of Moreno Valley Planning Division	

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
i. Preservation-In-Place of the cultural resources, if feasible. Preservation in place means avoiding the resources, leaving them in the place they were found with no development affecting the integrity of the resources. ii. Onsite reburial of the discovered items as detailed in the treatment plan required pursuant to Mitigation Measure CR-1. This shall include measures and provisions to protect the future reburial area from any future impacts in perpetuity. Reburial shall not occur until all legally required cataloging and basic recordation have been completed. No recordation of sacred items is permitted without the written consent of all Consulting Native American Tribal Governments as defined in CR-1.			
Mitigation Measure MM TCR-4: The City shall verify that the following note is included on the Grading Plan: "If any suspected archaeological resources are discovered during ground-disturbing activities and the Project Archaeologist or Native American Tribal Representatives are not present, the construction supervisor is obligated to halt work in a 100-foot radius around the find and call the Project Archaeologist and the Tribal Representatives to the site to assess the significance of the find."	Prior to Grading Permit.	City of Moreno Valley Planning Division	

Standard Condition/ Plan, Program, Policy / Mitigation Measure	Timing	Responsible for Ensuring Compliance / Verification	Date Completed and Initials
Mitigation Measure MM TCR-5: If potential historic or cultural resources are uncovered during excavation or construction activities at the project site, work in the affected area must cease immediately and a qualified person meeting the Secretary of the Interior's standards (36 CFR 61), Tribal Representatives, and all site monitors per the Mitigation Measures, shall be consulted by the City to evaluate the find, and as appropriate recommend alternative measures to avoid, minimize or mitigate negative effects on the historic, or prehistoric resource. Determinations and recommendations by the consultant shall be immediately submitted to the Planning Division for consideration, and implemented as deemed appropriate by the Community Development Director, in consultation with the State Historic Preservation Officer (SHPO) and any and all Consulting Native American Tribes as defined in CR-1 before any further work commences in the affected area.	During Project Excavation, Grading, and Construction.	City of Moreno Valley Planning Division	
Mitigation Measure MM TCR-6: If human remains are discovered, no further disturbance shall occur in the affected area until the County Coroner has made necessary findings as to origin. If the County Coroner determines that the remains are potentially Native American, the California Native American Heritage Commission shall be notified within 24 hours of the published finding to be given a reasonable opportunity to identify the "most likely descendant". The "most likely descendant" shall then make recommendations, and engage in consultations concerning the treatment of the remains (California Public Resources Code 5097.98). (GP Objective 23.3, CEQA).	During Project Excavation, Grading, and Construction.	City of Moreno Valley Planning Divison	

Appendix A to Initial Study
CalEEMod Emission Summary

CalEEMod Emission Summary

TO: Rafik Albert, EPDS
FROM: Vince Mirabella
DATE: September 21, 2020

SUBJECT: Summary of CalEEMod Model Runs and Output for the Iris Park Residential Project, Moreno Valley, California

SECTION 1: PROJECT INFORMATION

1.1 - Project Name

Iris Park Residential Project, Moreno Valley, CA

1.2 - Project Location

The project site is located on the south side of Iris Avenue, about 500 feet east of Perris Boulevard, on APN 312-020-025. The project site is triangular in shape and has a gross acreage of approximately 10.82 acres, including 3.02 acres that is planned for development by the City of Moreno Valley as a public park and trail over the California Aqueduct.

1.3 - Project Description

Iris Park is a proposed 81-lot single-family detached subdivision. The community will have two gated access points off Iris Avenue. Three small park areas are spread out on the site. Residential lots would range from 2,197 sq. ft. to 4,741 sq. ft. Homes would range from 1,848 sq. ft. to 2,201 sq. ft., with 3 to 5 bedrooms and 2.5 to 3 baths. Homes would be two stories, include a back yard approximately 12 to 14 feet deep, and have an attached two-car garage. Three architectural styles are proposed: Spanish, French, and Farmhouse. The project overall would provide 217 parking spaces, including 162 garage spaces and 49 spaces on private streets

1.4 - Purpose of the Report

This report summarizes the results of the project construction and operational criteria pollutant and greenhouse gas (GHG) emissions and energy usage estimates using the California Emissions Estimator Model (CalEEMod Version 2016.3.2) land use emission model for use in preparing CEQA regulatory documentation. The estimated project emissions were compared to the recommended air quality and GHG significance thresholds recommended by the South Coast Air Quality Management District (SCAQMD).

1.5 - Conclusions

- The construction and operation of the project would not exceed any project-level criteria pollutant regional or localized emission significance threshold adopted by the SCAQMD. Therefore, the project would result in a less than significant impact and no mitigation is required.

- The construction and operation of the project would not result in a cumulatively significant impact on the region's air quality. Therefore, the project would result in a less than significant impact and no mitigation is required.

- The construction and operation of the project would not exceed the greenhouse gas significance threshold adopted for this project. Therefore, the project would result in a less than significant impact and no mitigation is required.

- The construction and operation of the project would not result in the wasteful, inefficient, and unnecessary consumption of energy, especially fossil fuels such as coal, natural gas, and petroleum, associated with project design, project location, the use of electricity and natural gas, and the use of fuel by vehicles anticipated to travel to and from the project. Therefore, the project would result in a less than significant impact and no mitigation is required.

SECTION 2: CALEEMOD EMISSION ESTIMATES – CRITERIA POLLUTANTS

This section quantifies the project construction and operational criteria pollutant emissions[1] for the project design and compares the emissions to the regional and local emission significance thresholds adopted by the SCAQMD.

2.1 - Significance Thresholds-Criteria Pollutants

The City has not adopted its own set of criteria pollutant significance thresholds. Therefore, the respective significance thresholds adopted by the SCAQMD were applied to the project in assessing the significance of the project's emissions.

2.1.1 Regional Emission Significance Thresholds

The incremental regional air quality impacts of an individual project are generally very small and difficult to measure. However, the SCAQMD's regional significance thresholds define levels of maximum daily emissions whose exceedance by a project's construction or operation may add to the overall emission burden within the SCAQMD and impact the attainment and maintenance of ambient air quality standards.

The regional thresholds apply to criteria pollutant emissions of carbon monoxide (CO), oxides of nitrogen (NO_x), oxides of sulfur (SO_x), particulate matter (PM_{10} and $PM_{2.5}$), and reactive organic gases (ROG). The quantification of regional emissions includes those project emissions generated from both onsite emission sources (i.e., offroad construction equipment, fugitive dust, area sources) and offsite emission sources (vehicle travel to and away from the project). Table 1 shows the SCAQMD's regional significance thresholds.

Table 1: SCAQMD Regional Emission Significance Thresholds

Air Pollutant	Maximum Daily Emissions (pounds/day)	
	Construction	Operation
Carbon Monoxide	550	550
Oxides of Nitrogen	100	55
Sulfur Oxides	150	150
PM_{10}	150	150
$PM_{2.5}$	55	55
Reactive Organic Gases	75	55
Source: SCAQMD[2]		

[1]Criteria pollutants are the only air pollutants with national air quality standards that define allowable concentrations of these substances in the ambient air. Criteria pollutants include carbon monoxide (CO), oxides of nitrogen (NO_x), sulfur dioxide (SO_x), and particulate matter (PM_{10} and $PM_{2.5}$). Note that ozone is another criteria pollutant; however, in terms of defining significance thresholds, ozone is represented by its precursor components, oxides of nitrogen (NO_x) and reactive organic gases.

[2] SCAQMD April 2019. Website: http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf

2.1.2 Localized Significance Thresholds

Project-related construction or operational air emissions may have the potential to exceed the State and national air quality standards in the project vicinity, even though these pollutant emissions may not be significant enough to create a regional impact on the SCAQMD. As a result, the SCAQMD has also adopted localized significance thresholds (LSTs) that represent the maximum rates of daily construction or operational emissions from a project site that would not result in air pollutant levels that would exceed a national or State ambient air quality standards (SCAQMD 2003[3],2008[4]). There are three principal differences between the regional thresholds and the LSTs. First, the regional thresholds include all sources of project construction and operational emissions generated from both onsite and offsite emission sources, whereas the LSTs only consider the emissions generated from onsite emission sources. Second, the LSTs only apply to CO, NO_X, and particulate matter (PM_{10} and $PM_{2.5}$), while the regional thresholds include both ROG and SO_x. Third, the regional thresholds apply to emission sources regardless of where the source is located within the SCAQMD. In contrast, the LSTs are location-dependent and also depend on the size of the project, and emission location relative to the nearest sensitive receptor[5].

For purposes of this localized assessment, the SCAQMD provides screening emission look-up tables for projects that disturb a maximum of 5 acres in size in a day. The look-up tables were developed by the SCAQMD to readily determine if the daily emissions of CO, NO_x, PM_{10}, and $PM_{2.5}$ from a project could result in a significant impact on the local air quality. The appropriate LSTs can be determined based on the project's source receptor area (SRA)[6], size, and distance to nearest sensitive receptor. The SCAQMD has divided the SCAQMD into 37 SRAs, each with a set of LSTs that depend on the air pollutant, project size, and distance to the nearest sensitive receptor. The project site is located within SRA 24, Perris Valley. The LSTs for this SRA were applied to the project.

LSTs for Construction

The SCAQMD has published a "Fact Sheet for Applying CalEEMod to Localized Significance Thresholds" (SCAQMD 2011)[7]. The CalEEMod model calculates construction emissions based on the number and types of construction equipment, equipment hours, rates of emission, the maximum daily disturbance activity possible for each piece of equipment, and the developmental intensity. The daily maximum disturbed area during construction serves as the factor in determining the project size value of the LSTs for construction. Table 2 shows the maximum daily disturbed acreage during site preparation, and grading based on the types and numbers of construction equipment used for each construction activity, as identified by the CalEEMod model. As shown in Table 2, the maximum daily area disturbed during construction is 4.0 acres that occurs during the grading activity. Therefore, the maximum daily disturbed area during construction was set as 4.0 acres for the localized assessment of construction impacts.

---

[3] SCAQMD 2003. Final Localized Significance Threshold Methodology. Website: http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/final-lst-methodology-document.pdf?sfvrsn=2

[4] SCAQMD 2008: Final Localized Significance Threshold Methodology. Website: http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/final-lst-methodology-document.pdf

[5] The SCAQMD defines a sensitive receptor as an individual who is most health-wise susceptible to exposures to air pollutants including children the elderly, and adults with chronic health issues. Such receptors include residences, schools, elderly care centers, and hospitals where such receptors could be exposed to air pollutants for at least 24 hours.

[6] A source-receptor area (SRA) is a geographic area within the SCAQMD that can act as both a source of emissions and a receptor of emission impacts.

[7] SCAQMD 2011: Fact Sheet for Applying CalEEMod to Localized Significance Thresholds. Website: http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/caleemod-guidance.pdf

Table 2: Equipment Specific Site Preparation and Grading Disturbed Area Rates

Activity	Equipment Type	Equipment Quantity	Acres Graded per 8-hour Day	Operating Hours per Day	Acres Graded per Day
Site Preparation	Rubber Tired Dozer	3	0.5	8	1.5
	Crawler Tractor	4	0.5	8	2.0
					Total 3.5 acres
Grading	Excavators	2	0.0	8	0.0
	Graders	1	0.5	8	0.5
	Rubber Tired Dozers	1	0.5	8	0.5
	Crawler Tractor	2	0.5	8	1.0
	Scrapers	2	1	8	2.0
					Total 4.0 acres

Source: Table 5 shows the construction inventory developed for the Site Preparation and Grading activities as derived from the CalEEMod model.

The specification of LSTs is also dependent on the distance to the nearest sensitive receptor. The location of the nearest sensitive receptor depends not only on the distance from the project but also on the duration for which a receptor may be exposed to air pollution. The SCAQMD considers a sensitive receptor to be a location such as a residence, hospital, convalescent facility where it is possible than an individual could remain for 24 hours or longer. Commercial and industrial facilities are not included in the definition of a sensitive receptor because employees do not typically remain onsite for a full 24 hours, but are present for shorter periods, such as eight hours[8].

The project location is surrounded by several residential areas to the north and east with a shopping center and Val Verde Academy to the west of the project. The closest sensitive receptors where such a receptor could reside for 24 hours or longer are located at existing residences along the project's eastern property line. Therefore, the distance for sensitive receptors in the LST assessment was set at 25 meters, the shortest distance contained in the SCAQMD LST emission look-up tables. Table 3 provides the applicable construction LSTs for this project.

Table 3: Construction Localized Significance Thresholds

NOx (lbs/day)	CO (lbs/day)	PM10 (lbs/day)	PM2.5 (lbs/day)
239	1,346	11	7

LSTs for SRA 24, project area of 4.0 acres and a receptor distance of 25 meters. The LSTs were interpolated from the 2 and 5 acre LSTs provided in the SCAQMD LST look-up tables.

[8] SCAQMD 2003. Final Localized Significance Threshold Methodology. Website: http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/final-lst-methodology-document.pdf?sfvrsn=2

LST for Operation

Because the LST methodology is applicable to projects where emission sources occupy a fixed location, LST methodology would typically not apply to the operational phase of a residential project because emissions for these projects are primarily generated by mobile sources traveling on local roadways over generally large distances or areas and not from emission sources located on the project site. LSTs would apply to the operational phase of a project if the project includes stationary sources or attracts mobile sources that may spend long periods queuing and idling at the site. For example, the LST methodology applies to operational projects such as warehouse/transfer facilities or large stationary sources such as a refinery, chemical factory, or railyard. As the project would include residential uses, an operational analysis applying the LST methodology is not appropriate and the localized operational impacts would be considered less than significant.

2.1.3 Cumulative Significance Thresholds

The SCAQMD has published the following report on how to address cumulative impacts from air pollution: White Paper on Potential Control Strategies to Address Cumulative Impacts from Air Pollution (SCAQMD 2003)[9]. Projects that exceed the project-specific significance thresholds are considered by the SCAQMD to be cumulatively considerable. Therefore, the project-specific and cumulative significance thresholds are the same. As a result, projects that do not exceed the project-specific thresholds are generally not considered to be cumulatively significant.

The US Environmental Protection Agency currently designates the South Coast Air Basin where the project is located as nonattainment for ozone, PM_{10}, and $PM_{2.5}$. By its nature, air pollution is largely a cumulative impact resulting from emissions generated over a large geographic region. The nonattainment status of regional pollutants is a result of past and present development within the air basin, and this regional impact is a cumulative impact. In other words, new development projects (such as the proposed project) within the air basin would contribute to this impact only on a cumulative basis. No single project would be sufficient in size, by itself, to result in nonattainment of regional air quality standards. Instead, a project's emissions may be individually limited, but cumulatively considerable when taken in combination with past, present, and future development projects.

The determination of cumulative air quality impacts for construction and operational emissions was, therefore, based on whether the project would result in regional emissions that exceed SCAQMD regional thresholds of significance for construction and operations on a project level. Projects that generate emissions below the SCAQMD regional significance thresholds would be considered consistent with regional air quality planning efforts and would not generate cumulatively considerable emissions.

[9] SCAQMD 2003. White Paper on Potential Control Strategies to Address Cumulative Impacts from Air Pollution

2.2 - Criteria Pollutant Emission and Impact Estimates

2.2.1 Project Emissions

Construction

Assumption***s***

- Construction Schedule: Construction is anticipated to commence in January 2021 and last for approximately 2 years. The project occupancy is expected in 2023
- The project site is currently vacant.
- 6,042 cubic yards of soil to be exported during grading
- Fugitive dust mitigation applied as per SCAQMD Rule 403 – Fugitive Dust (3x daily watering, vehicle speeds < 15 mph on unpaved roads, soil moisture content =12% on unpaved roads)
- Construction equipment inventory derived from the CalEEMod model equipment specifications

Construction Emissions

The project's conceptual construction schedule and equipment inventory are provided in Table 4 and Table 5, respectively, based on the schedule provided by the applicant and equipment provided in the CalEEMod model for the project size and land uses. Table 6 presents the project's construction vehicle trips.

Table 4: Construction Schedule

Activity	Start Date	End Date	Total Days
Site Preparation	01/04/2021	01/15/2021	10

Project Operational Emissions

The project's day-to-day operations would generate the project's long-term emissions. Operational emissions for land use development projects are typically distinguished as mobile, area, and energy-source emissions. Mobile-source emissions are associated with project-related automobiles and other motor vehicles that would travel to and from the project site. In accordance with the project's traffic impact memorandum[10], the project is expected to generate 762 daily weekday trips. The CalEEMod default vehicle

[10] EPD Solutions 2020. Project Traffic Trip Generation Memorandum

fleet mix, trip purpose, and trip lengths were assumed in estimating the project's mobile source emissions. Area-source emissions result from landscape maintenance activities and periodic architectural coatings. while energy-source emissions result primarily from natural gas consumption. Table 9 summarizes the project's regional operational emissions along with a comparison to the SCAQMD's regional significance thresholds. As noted in Table 9, the project's regional operational emissions are less than the regional significance thresholds.

Table 9: Estimated Maximum Daily Regional Operational Emissions

Operational Activity	Maximum Daily Regional Emissions (pounds/day)				
	ROG	NO_x	CO	PM_{10}	$PM_{2.5}$
Area	4.3	0.1	6.7	0.0	0.0
Energy	0.1	0.6	0.3	0.1	0.1
Mobile –	1.1	8.1	14.3	5.9	1.6
Total Operational Emissions	**5.5**	**8.8**	**24.3**	**6.0**	**1.7**

2.2.2 Cumulative Impacts

Construction

As shown above in Table 7, the project's maximum daily regional construction emissions would not exceed SCAQMD's regional thresholds of significance. Therefore, the project's construction emissions would not result in a cumulatively considerable incremental contribution to the existing air quality. Furthermore, all construction activities would comply with applicable SCAQMD rules and regulations, including Rule 403 to minimize fugitive PM dust emissions. Therefore, the cumulative impact of the construction of the project would be less than significant.

Operations

As shown in Table 9 above, the project's maximum daily operational emissions would not exceed SCAQMD's regional thresholds of significance. Therefore, the project's operational emissions would not result in a cumulatively considerable incremental contribution to the existing air quality. The cumulative impact from the long-term operation of the project would be less than significant.

2.3 - Conclusion

The project's construction and operational emissions would not exceed the SCAQMD's established project level or cumulative regional or localized pollutant significant thresholds during either construction or operation. Therefore, the project's impacts are less than significant and no mitigation is required.

SECTION 3: CALEEMOD EMISSION ESTIMATES - GREENHOUSE GAS EMISSIONS

This section analyzes the potential impacts on climate change from the project's emissions of various greenhouses (GHG).

3.1 - Significance Threshold

The City of Moreno Valley has not adopted its own numeric threshold of significance for determining impacts with respect to greenhouse gas (GHG) emissions. SCAQMD has adopted a significance threshold of 10,000 $MTCO_2e$ per year for permitted (stationary) sources of GHG emissions for which SCAQMD is the designated lead agency. To provide guidance to local lead agencies on determining significance for GHG emissions in their CEQA documents, SCAQMD convened a GHG CEQA Significance Threshold Working Group (Working Group). Based on the last Working Group meeting (Meeting No. 15) in September 2010, SCAQMD identified a tiered approach for evaluating GHG emissions for development projects where SCAQMD is not the lead agency (SCAQMD 2010).

- Tier 1. If a project is exempt from CEQA, project-level and cumulative GHG emissions are less than significant.
- Tier 2. If the project complies with a GHG emissions reduction plan or mitigation program that avoids or substantially reduces GHG emissions in the project's geographic area (e.g., city or county), project-level and cumulative GHG emissions are less than significant.
- Tier 3. If GHG emissions are less than the screening-level threshold, project-level and cumulative GHG emissions are less than significant.

For projects that are not exempt or where no qualifying GHG reduction plans are directly applicable, SCAQMD requires an assessment of GHG emissions. Project-related GHG emissions include on-road transportation, energy use, water use, wastewater generation, solid waste disposal, area sources, off-road emissions, and construction activities. The SCAQMD Working Group concluded that because construction activities would result in a "one-time" net increase in GHG emissions, construction activities should be amortized into the operational phase GHG emissions inventory based on the service life of a building. For buildings an amortization time of 30-years was recommended by the SCAQMD. With regards to quantitative significance thresholds, the SCAQMD identified a screening-level threshold of 3,000 $MTCO_2e$ annually for all land use types or the following land-use specific thresholds: 1,400 $MTCO_2e$ for commercial projects, 3,500 $MTCO_2e$ for residential projects, and 3,000 $MTCO_2e$ for mixed-use projects. These bright-line thresholds are based on a review of the Governor's Office of Planning and Research database of CEQA projects. Based on their review of 711 CEQA projects, 90 percent of CEQA projects would exceed the bright-line thresholds. For purposes of this assessment, a significance threshold of 3,000 $MTCO_2e$ was used as the threshold for this assessment. Thus, based on guidance from the SCAQMD, if a non-industrial project would emit GHGs less than 3,000 $MTCO_2e$ per year, the project is not considered a substantial GHG emitter and the GHG impact is less than significant, requiring no additional analysis and no mitigation

3.2.1 Construction

Table 10 summarizes the project's construction GHG emissions. As per SCAQMD guidance, the project's construction emissions are amortized over a 30-year time period and added to the operational emissions to quantify the project's total GHG emissions.

Table 10: Project Construction GHG Emissions

Activity	Annual GHG Emissions ($MTCO_2e$)
2021	684
2022	626
2023	108
Total Emissions	1,418
Total Emissions Amortized Over 30 years	47
Source: see CalEEMod output	

3.2.2 Operations

Table 11 summarizes the project's operational GHG emissions, along with the construction GHG emissions and the total project GHG emissions. The project would result in GHG emissions of 1,585 $MTCO_2e$ per year. This level of emissions does not exceed the 3,000 $MTCO_2e$ per year significance threshold adopted for this project. Therefore, the project would have a less than significant individual and cumulative impact for GHG emissions.

Table 11: Project Operational GHG Emissions

Activity	Annual GHG Emissions ($MTCO_2e$)
Project Operational Emissions Area Energy Mobile Waste Water Total	 1 305 1,142 48 43 1,538
Project Construction Emissions	47
Project Construction and Operation	1,585
Significance Threshold	**3,000**
Project Exceeds Threshold?	**NO**
Source: see CalEEMod output	

3.2 - Conclusion

The project's construction and operational GHG emissions would have a less than significant individual and cumulative impact for GHG emissions. Therefore, the project would result in a less than significant impact and no mitigation is required.

SECTION 4: PROJECT FUEL AND ENERGY CONSUMPTION

4.1 - Assumptions

- Construction equipment fuel consumption derived from ARB Offroad2017 emission model and the CalEEMod construction equipment
- Fuel Consumption from vehicle travel derived from ARB EMFAC2017 emission model
- Electrical and natural gas usage derived from the CalEEMod model

4.2 - Significance Thresholds

Neither Appendix F of the State CEQA Guidelines nor PRC Section 21100(b)(3)) provide a numerical threshold of significance that might be used to evaluate the potential significance of energy consumption of a proposed project. Instead, the emphasis is on reducing "the wasteful, inefficient, and unnecessary consumption of energy." Based on this focus of the guidelines, for purposes of this report, the proposed project would have a significant impact related to energy consumption if it would:

- Involve the wasteful, inefficient, and unnecessary consumption of energy, especially fossil fuels such as coal, natural gas, and petroleum, associated with project design, project location, the use of electricity and natural gas, and the use of fuel by vehicles anticipated to travel to and from the project.

4.3 - Construction

4.3.1 Electricity and Natural Gas Usage

Southern California Edison Company would provide temporary electric power for necessary lighting and electronic equipment such as computers inside temporary construction trailers and construction tools. The electricity used for such activities would be temporary and would be substantially less than that required for project operation and would have a negligible contribution to the project's overall energy consumption.

Natural gas is not anticipated to be required during the construction of the proposed project. Fuels used during the construction would primarily consist of diesel and gasoline, which are discussed below under the "petroleum" subsection. Any minor amounts of natural gas that may be consumed as a result of project construction would be substantially less than that required for project operation and would have a negligible contribution to the project's overall energy consumption.

4.3.2 Petroleum Fuel Usage

Off-road heavy-duty construction equipment associated with construction activities would rely on diesel fuel as would vendor and haul trucks involved in delivering building materials and removing soil during grading from the project site. Construction workers would travel to and from the project site throughout the duration of construction. It is assumed in this analysis that construction workers would travel to and from the site in gasoline-powered passenger vehicles. Table 12 presents the fuel usage for the off-road construction equipment. These estimates are based on the total fuel consumption and horsepower-hour

data contained within the ARB OFFROAD2017 emission model for specific types of diesel construction equipment to be employed in the project construction. Note that the total fuel consumption during construction computed below likely substantially overstates the amount of fuel usage. Although construction equipment and their duration are listed under a particular construction activity, there is a likelihood that all of the inventoried equipment would not operate over the entire duration of the construction activity. For example, during building construction, a crane is listed as one of the operational pieces of equipment. However, it is highly unlikely that the crane would operate over the entire duration of 300 days assumed during the building construction activity.

Table 13 summarizes the project's construction vehicle fuel usage. The fuel usage is based on the vehicle type (worker vehicle, vendor vehicle, and haul truck), vehicle miles traveled, and fuel usage factors contained in the ARB EMFAC2017 mobile source emission model and in the CalEEMod model. Table 14 summarizes the total fuel construction during construction.

4.4 - Operational Energy Requirements

Table 15 summarizes the project's operational energy requirements.

4.5 - Conclusion

Construction of the project would result in fuel consumption from the use of construction tools and equipment, vendor and haul truck trips, and vehicle trips generated from construction workers traveling to and from the site. Construction activities and corresponding fuel energy consumption would be temporary and localized, as the use of diesel fuel and heavy-duty equipment would not be a typical operational condition of the project. The operational aspects of the project would involve energy use in the form of natural gas and electricity consumption for residential uses and fuel consumption from residential vehicle travel. Also, there are no unusual project characteristics that would cause the use of construction equipment that would be less energy efficient compared with other similar construction sites in other parts of the State. The rational goal of any construction job, whether it is for a household task or construction project such as the proposed project, is to minimize construction costs while meeting all legal requirements for doing so. Therefore, construction-related fuel consumption by the project would not result in inefficient, wasteful, or unnecessary energy use compared with other construction sites in the region.

The operation of the project would involve the development of 81 single family housing units. According to CEQA Guidelines Appendix F, the goal of conserving energy implies the wise and efficient use of energy, including decreasing overall per capita energy consumption, reducing reliance on natural gas and oil, and increasing reliance on renewable energy sources. The project would comply with all of the energy efficiency requirements under all applicable State, county, and local business and energy code ordinances. As a result, the operation of the project would not result in inefficient, wasteful, or unnecessary energy use compared with other similar residential projects in the region. Therefore, the project would result in a less than significant impact and no mitigation is required.

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2023
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	534	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics - SCE CO2 Intensity Factor 2020 to 2029

Land Use - Residential = 81 SFU
Internal Roadways = 2.79 acres
Park area = 3.02 acres

Construction Phase - Construction schedult provided by client

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment - .....

Off-road Equipment - Use of larger equipment

Off-road Equipment - ..

Off-road Equipment - ..

Off-road Equipment - Use of Larger equipment

Grading - Soil export of 6,042 cy

Architectural Coating -

Vehicle Trips - Weekday trip generation from the project trip memorandum - EPDS
Weekend trip rates from CalEEMod default values

Woodstoves - Assumes no fireplaces in residential units

Construction Off-road Equipment Mitigation - Applied ffffigitive dust reductions as required under SCAQMD Rule 493

Fleet Mix - SFU fleet mix is the default CalEEMod fleet mix for Riversode County in 2023

Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	534	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics - SCE CO2 Intensity Factor 2020 to 2029

Land Use - Residential = 81 SFU
Internal Roadways = 2.79 acres
Park area = 3.02 acres

Construction Phase - Construction schedult provided by client

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment - .....

Off-road Equipment - Use of larger equipment

Off-road Equipment - ..

Off-road Equipment - ..

Off-road Equipment - Use of Larger equipment

Grading - Soil export of 6,042 cy

Architectural Coating -

Vehicle Trips - Weekday trip generation from the project trip memorandum - EPDS
Weekend trip rates from CalEEMod default values

Woodstoves - Assumes no fireplaces in residential units

Construction Off-road Equipment Mitigation - Applied ffffigitive dust reductions as required under SCAQMD Rule 493

Fleet Mix - SFU fleet mix is the default CalEEMod fleet mix for Riversode County in 2023

EXECUTIVE SUMMARY

Blackhawk Environmental (Blackhawk) conducted a literature review, field reconnaissance survey, and biological assessment of the proposed Iris Park Project (Project; APN 312-020-025) to assess existing site conditions, as well as assess the potential for sensitive species or habitats to occur within the Project site and surrounding area. This report is intended to fulfill requirements for determining Project consistency with the Western Riverside Multiple Species Habitat Conservation Plan (MSHCP; Plan).

Iris Park (Project) includes 10.82 acres of undeveloped lands in the incorporated City of Moreno Valley, Riverside County, California. The Project is located generally east of March Air Reserve Base and Interstate 215 and south of State Route (SR) 60 (Attachment A, Figure 1). The Project site is bordered by the Val Verde Academy to the west, Iris Avenue to the north, California Aqueduct Linear Park Site to the south and the residential community associated with Ebony Avenue to the east.

The Project is a is a proposed 81-lot single-family detached subdivision located on the south side of Iris Avenue, about 500 feet east of Perris Boulevard, on APN 312-020-025. The project site is triangular in shape and has a gross acreage of approximately 10.82 acres, including 3.02 acres that is planned for development by the City of Moreno Valley as a public park and trail over the California Aqueduct. The community will have two gated access points off Iris Avenue. Three small park areas are spread out on the site. Residential lots would range from 2,197 sq. ft. to 4,741 sq. ft. Homes would range from 1,848 sq. ft. to 2,201 sq. ft., with 3 to 5 bedrooms and 2.5 to 3 baths. Homes would be two stories, include a back yard approximately 12 to 14 feet deep, and have an attached two-car garage. Three architectural styles are proposed: Spanish, French, and Farmhouse. The project overall would provide 217 parking spaces, including 162 garage spaces and 49 spaces on private streets.

The Project site is located entirely within the Riverside County, California and will include 10.82 acres occurring on vacant land. Proposed Project impact areas are shown in Attachment A, Figure 3. The Project is located within the boundaries of the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP; Plan) in the Reche Canyon/Badlands Area Plan. The Project site is not located within any Criteria Cell and is located outside of Plan Conservation Areas. The Project area is not located within areas requiring assessment for special status mammals, amphibians, narrow endemic plants, or other criteria area species. The Project area requires assessment and surveys for burrowing owl (*Athene cunicularia*), if suitable habitat is identified during a habitat assessment; suitable burrowing owl habitat was not present within the survey area.

The Project site contains a single vegetation community and/or land cover type (Residential/Urban/Exotic – Disturbed Areas) and predominately contains non-native grasses and non-native annual plant species commonly associated with anthropogenically-altered landscapes, while areas surrounding the Project site contain sparse ornamental shrubs and trees, amongst development.

A literature review conducted for the Project site identified documented occurrences from within five miles of the Project site for a total of 18 special-status wildlife species and one special-status plant species. A field reconnaissance survey and habitat assessment was conducted on February 24, 2020. During the survey, each of these "target species" species were evaluated for their potentials for occurrence (PFO) within and/or adjacent to the Project site. In order to evaluate habitat which may

be suitable for burrowing owl, and to evaluate the potential for indirect impacts, the assessment included all proposed Project features as well as an additional 150-meter (492 feet) survey buffer surrounding the proposed Parcel (Survey Area). During the assessment, no additional special-status wildlife species were observed within or adjacent to the Project site.

Special-status wildlife species identified in the literature review that were determined to have a potential for occurrence (PFO) within the Survey Area consisted of California horned lark (*Eremophila alpestris actia*; moderate PFO), California glossy snake (*Arizona elegans occidentalis*; low PFO) and Western yellow bat (*Lasiurus xanthinus;* low PFO [roosting]). Of the three species with the potential to occur, only the California horned lark is covered under the MSHCP. Species PFO was determined based on proximity of historic records and quality of habitat on site. At the time of the assessment, the Survey Area did not support suitable habitat for burrowing owl; however, two rubble piles containing shallow cavities were identified on the site and were occupied by desert cottontail and a domestic cat during the 2020 breeding season, precluding occupation by burrowing owl. Therefore, suitable habitat for burrowing owl was found absent from the Project site and focused burrowing owl surveys were not required pursuant to the Burrowing Owl Survey Instructions for the Western Riverside MSHCP. Though, occupied by other species at the time of the assessment, these rubble piles have a low potential to support migrating burrowing owls as temporary roost sites, if they become vacant (i.e. not occupied by desert cottontails or domestic cats) prior to construction. Following the MSHCP recommendation of a preconstruction burrowing owl survey within 30 days prior to construction, no negative impacts to burrowing owl are anticipated. If burrowing owls are present during the non-breeding season (September 1 through February 28), burrowing owl exclusion measures may be implemented in accordance with the Plan.

The remaining 15 target sensitive species were considered absent due to lack of suitable habitats on the Project site and Survey Area and no sensitive species were present at the time of the assessment.

Based on CNDDB, USFWS, and CNPSEI-documented occurrences within five miles of the Project site, the literature review resulted in a list of one special-status plant species evaluated for its' potential to occur on the Project site (smooth tarplant; *Centromadia pungens ssp. laevis*). Smooth tarplant was determined to be absent from the Project site and Survey Area, based on lack of individuals observed on site, proximity of historic records and quality of habitat on site. Smooth tarplant is covered under the MSHCP; however, is presumed absent.

The Project site and surrounding areas support suitable nesting substrates for various general migratory bird and raptor species common to the region. Take authorization for migratory bird and raptor species is not provided by the Plan. The Plan functionally covers the remaining special-status species identified with potentials to occur, as well as impacts to their habitats. No other special-status resources are present or are expected to occur. Mitigation for potential Project-related impacts to the species identified to occur or with the potentials to occur during the literature review and assessment can be achieved through payment of a mitigation fee to the appropriate MSHCP authority. No significant adverse impacts to special-status biological resources of the region are anticipated with implementation of Project mitigation contained herein.

Riparian/riverine habitats, as defined by the MSHCP, do not occur within the proposed Project area. The habitat assessment did not identify any drainages or waterways which may fall under the jurisdiction by the United States Army Corps of Engineers (USACE), Regional Water Quality Control Board (RWQCB), and California Department of Fish and Wildlife (CDFW). No vernal pools or habitat that could potentially support fairy shrimp species were observed on the Project site. No vernal pools

were observed, and they are not known to historically occur within the Project site or within 2 miles of the Survey Area. Additional permitting from these agencies should not be required for Project authorization.

1.0 INTRODUCTION

Blackhawk was contracted by Environmental Planning Development Solutions, Inc. (EPD) to conduct environmental surveys and provide a Habitat Assessment Report and MSHCP Consistency Analysis Report for proposed Iris Park Project (Project; APN 312-020-025), located within an approximately 10.82-acre private land parcel in Riverside County, California. Blackhawk conducted a literature review, field reconnaissance survey, and biological assessment of the proposed Project to assess existing site conditions, as well as assess the potential for sensitive species or habitats to occur within the Project site.

The purpose of this survey effort and consistency analysis is to identify and document sensitive biological resources potentially occurring within the Project site and surrounding areas. The Project is located within the boundaries of the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP) in the Reche Canyon/Badlands Area Plan; however, the Project is not located within a MSHCP Cell Group or MSHCP Criteria Cell(s). The survey effort focused on documentation of existing site conditions, such as soils, topography, vegetation communities, riverine/riparian habitats, vernal pools and special status species as required for review under the MSHCP. Specifically, the assessment was conducted to determine if habitat was present for BUOW due to the Project location occurring within the MSHCP BUOW survey area, as well as all other sensitive species identified in the literature review as required by the Plan (Table 3 and 4). The assessment did not include a formal jurisdictional or wetland delineation or aquatic resources mapping effort.

1.1 Project Description

The Project is located within a 10.82-acre parcel (APN 312-020-025) in Riverside County, located generally east of March Air Reserve Base and Interstate 215 and south of State Route (SR) 60 in the incorporated City of Moreno Valley (Attachment A, Figure 1). The Project is a proposed 81-lot single-family detached subdivision located on the south side of Iris Avenue, about 500 feet east of Perris Boulevard, on APN 312-020-025. The project site is triangular in shape and has a gross acreage of approximately 10.82 acres, including 3.02 acres that is planned for development by the City of Moreno Valley as a public park and trail over the California Aqueduct. The community will have two gated access points off Iris Avenue. Three small park areas are spread out on the site. Residential lots would range from 2,197 sq. ft. to 4,741 sq. ft. Homes would range from 1,848 sq. ft. to 2,201 sq. ft., with 3 to 5 bedrooms and 2.5 to 3 baths. Homes would be two stories, include a back yard approximately 12 to 14 feet deep, and have an attached two-car garage. Three architectural styles are proposed: Spanish, French, and Farmhouse. The project overall would provide 217 parking spaces, including 162 garage spaces and 49 spaces on private streets. Proposed Project impact areas are shown on Attachment A, Figure 3.

2.0 REGULATORY SETTING

The proposed Project is subject to a host of state and federal regulations associated with a number of regulatory programs. These programs often overlap and were developed to protect natural resources, including: state- and federally listed plants and animals; aquatic resources including rivers and creeks, ephemeral streambeds, wetlands, and areas of riparian habitat; other special-status species that are not listed as threatened or endangered by the state or federal governments; and other special-status vegetation communities.

2.1 State and/or Federally Listed Plant and Wildlife Species

2.1.1 State of California Endangered Species Act

California's Endangered Species Act (CESA) defines an endangered species as "a native species or subspecies of a bird, mammal, fish, amphibian, reptile, or plant which is in serious danger of becoming extinct throughout all, or a significant portion, of its range due to one or more causes, including loss of habitat, change in habitat, overexploitation, predation, competition, or disease." The State defines a threatened species as "a native species or subspecies of a bird, mammal, fish, amphibian, reptile, or plant that, although not presently threatened with extinction, is likely to become an Endangered species in the foreseeable future in the absence of the special protection and management efforts required by this chapter. Any animal determined by the commission as rare on or before January 1, 1985 is a threatened species." Candidate species are defined as "a native species or subspecies of a bird, mammal, fish, amphibian, reptile, or plant that the commission has formally noticed as being under review by the department for addition to either the list of endangered species or the list of threatened species, or a species for which the commission has published a notice of proposed regulation to add the species to either list." Candidate species may be afforded temporary protection as though they were already listed as threatened or endangered at the discretion of the Fish and Game Commission. Unlike the Federal Endangered Species Act (FESA), CESA does not list invertebrate species.

Article 3, Sections 2080 through 2085, of the CESA addresses the taking of threatened, endangered, or candidate species by stating "No person shall import into this state, export out of this state, or take, possess, purchase, or sell within this state, any species, or any part or product thereof, that the commission determines to be an endangered species or a threatened species, or attempt any of those acts, except as otherwise provided." Under the CESA, "take" is defined as "hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill." Exceptions authorized by the state to allow "take" require permits or memoranda of understanding and can be authorized for endangered species, threatened species, or candidate species for scientific, educational, or management purposes and for take incidental to otherwise lawful activities. Sections 1901 and 1913 of the California Fish and Game Code provide that notification is required prior to disturbance.

2.1.2 Federal Endangered Species Act

The FESA of 1973 defines an endangered species as "any species that is in danger of extinction throughout all or a significant portion of its range." A threatened species is defined as "any species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range." Under provisions of Section 9(a)(1)(B) of the FESA it is unlawful to

"take" any listed species. "Take" is defined in Section 3(18) of FESA: "...harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct." Further, the United States Fish and Wildlife Service (USFWS), through regulation, has interpreted the terms "harm" and "harass" to include certain types of habitat modification that result in injury to, or death of species as forms of "take." These interpretations, however, are generally considered and applied on a case-by-case basis and often vary from species to species. In a case where a property owner seeks permission from a Federal agency for an action that could affect a federally listed plant and animal species, the property owner and agency are required to consult with USFWS. Section 9(a)(2)(b) of the FESA addresses the protections afforded to listed plants.

2.1.3 State and Federal Take Authorizations for Listed Species

Federal or state authorizations of impacts to or incidental take of a listed species by a private individual or other private entity would be granted in one of the following ways:

- Section 7 of the FESA stipulates that any federal action that may affect a species listed as threatened or endangered requires a formal consultation with USFWS to ensure that the action is not likely to jeopardize the continued existence of the listed species or result in destruction or adverse modification of designated critical habitat. 16 U.S.C. 1536(a)(2).

- In 1982, the FESA was amended to give private landowners the ability to develop Habitat Conservation Plans (HCP) pursuant to Section 10(a) of the FESA. Upon development of an HCP, the USFWS can issue incidental take permits for listed species where the HCP specifies at minimum, the following: (1) the level of impact that will result from the taking, (2) steps that will minimize and mitigate the impacts, (3) funding necessary to implement the plan, (4) alternative actions to the taking considered by the applicant and the reasons why such alternatives were not chosen, and (5) such other measures that the Secretary of the Interior may require as being necessary or appropriate for the plan.

- Sections 2090-2097 of the California Endangered Species Act (CESA) require that the state lead agency consult with CDFW on projects with potential impacts on state-listed species. These provisions also require CDFW to coordinate consultations with USFWS for actions involving federally listed as well as state- listed species. In certain circumstances, Section 2080.1 of the California Fish and Game Code allows CDFW to adopt the federal incidental take statement or the 10(a) permit as its own based on its findings that the federal permit adequately protects the species under state law.

2.2 California Environmental Quality Act

Shortly after the United States federal government passed the National Environmental Policy Act (NEPA), the California Environmental Quality Act (CEQA) was passed in 1970 to institute a statewide policy of environmental protection. CEQA does not directly regulate land uses, but instead requires state and local agencies within California to follow a protocol of analysis and public disclosure of environmental impacts of proposed projects and adopt all feasible measures to mitigate those impacts. CEQA makes environmental protection a mandatory part of every California state and local agency's decision-making process.

2.2.1 CEQA Thresholds of Significance

Environmental impacts relative to biological resources are assessed using impact significance threshold criteria, which reflect the policy statement contained in CEQA, Section 21001(c) of the California Public Resources Code. Accordingly, the State Legislature has established it to be the policy of the State of California to:

> *"Prevent the elimination of fish or wildlife species due to man's activities, ensure that fish and wildlife populations do not drop below self- perpetuating levels, and preserve for future generations representations of all plant and animal communities..."*

Determining whether a project may have a significant effect, or impact, plays a critical role in the CEQA process. According to CEQA, Section 15064.7 (Thresholds of Significance), each public agency is encouraged to develop and adopt (by ordinance, resolution, rule, or regulation) thresholds of significance that the agency uses in the determination of the significance of environmental effects. A threshold of significance is an identifiable quantitative, qualitative or performance level of a particular environmental effect, non-compliance with which means the effect will normally be determined to be significant by the agency and compliance with which means the effect normally will be determined to be less than significant. In the development of thresholds of significance for impacts to biological resources CEQA provides guidance primarily in Section 15065, Mandatory Findings of Significance, and the CEQA Guidelines, Attachment G, Environmental Checklist Form. Section 15065(a) states that a project may have a significant effect where:

> *"The project has the potential to: substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or wildlife community, substantially reduce the number or restrict the range of an endangered, rare, or threatened species, ..."*

Therefore, for the purpose of this analysis, impacts to biological resources are considered potentially significant (before considering offsetting mitigation measures) if one or more of the following criteria discussed below would result from implementation of the proposed project.

2.2.2 Criteria for Determining Significance Pursuant to CEQA

Attachment G of the 1998 State CEQA guidelines indicate that a project may be deemed to have a significant effect on the environment if the project is likely to:

> *a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service.*
>
> *b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service.*

c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means.

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.

2.2.3 CEQA Guidelines Section 15380

The CEQA requires evaluation of a project's impacts on biological resources and provides guidelines and thresholds for use by lead agencies for evaluating the significance of proposed impacts. Sections 5.1.1 and 5.2.2 below set forth these thresholds and guidelines. Furthermore, pursuant to the CEQA Guidelines Section 15380, CEQA provides protection for non-listed species that could potentially meet the criteria for state listing. For plants, CDFW assigns California Rare Plant Ranks (CRPR) to species categorized as List 1A, 1B, or 2 of the California Native Plant Society (CNPS) *Inventory of Rare and Endangered Plants in California* may meet the criteria for listing and should be considered under CEQA. CDFW also recommends protection of plants, which are regionally important, such as locally rare species, disjunct populations of more common plants, or plants on the CNPS Lists 3 or 4.

2.3 Special Status Species Designations

2.3.1 Federally Designated Special-Status Species

Some years ago, the USFWS instituted changes in the listing status of candidate species. Former C1 (candidate) species are now referred to simply as candidate species and represent the only candidates for listing. All references to federally protected species in this report (whether listed, proposed for listing, or candidate) include the most current published status or candidate category to which each species has been assigned by USFWS. Additionally, the USFWS *Birds of Conservation Concern 2008* report was published to identify the migratory and non-migratory bird species (beyond those already federally listed) that represent the highest conservation priorities for USFWS.

For this report, the following acronyms are used for federal special-status species:

- FE: Federally listed as Endangered
- FT: Federally listed as Threatened
- FPE: Federally proposed for listing as Endangered
- FPT: Federally proposed for listing as Threatened
- FC: Federal Candidate species (Former Category 1 candidates)
- BCC: USFWS Birds of Conservation Concern

2.3.2 State-Designated Special-Status Species

Some mammals and birds are protected by the state as Fully Protected (FP) Mammals or Fully Protected Birds, as described in the California Fish and Game Code, Sections 4700 and 3511, respectively. California Species of Special Concern (SSC) are species designated as vulnerable to extinction due to declining population levels, limited ranges, and/or continuing threats. This list is primarily a working document for the CDFW's California Natural Diversity Database (CNDDB) project. Informally listed taxa are not protected but warrant consideration in the preparation of biotic assessments. For some species, the CNDDB is only concerned with specific portions of the life history, such as roosts, rookeries, or nest sites. For this report the following acronyms are used for State special-status species:

- SE: State-listed as Endangered
- ST: State-listed as Threatened
- SCE: State candidate for listing as Endangered
- SCT: State candidate for listing as Threatened
- FP: State Fully Protected
- SSC: Species of Special Concern

2.3.3 California Rare Plant Rank

The CNPS is a private plant conservation organization dedicated to the monitoring and protection of sensitive species in California. The California Native Plant Society's *California Native Plant Society's Inventory of Rare and Endangered Plants of California* separates plants of interest into five categories. CNPS has compiled an inventory comprised of the information focusing on geographic distribution and qualitative characterization of Rare, Threatened, or Endangered vascular plant species of California (Tibor 2001). The list serves as the candidate list for listing as threatened and endangered by CDFW.

- CRPR 1A: Plants presumed extirpated in California and either rare or extinct elsewhere
- CRPR 1B: Plants rare, threatened, or endangered in California and elsewhere
- CRPR 2A: Plants presumed extirpated in California but common elsewhere
- CRPR 2B: Plants rare, threatened, or endangered in California but more common elsewhere
- CRPS 3: Plants about which more information is needed
- CRPR 4: Plants of limited distribution

2.4 Additional Applicable State and Federal Regulations

Each of the following regulations bears some applicability toward assessing the natural resources of the Project Site and any effects that construction and long-term operations and maintenance activities may have upon such resources. These are included for informational and referential purposes only.

2.4.1 Bald and Golden Eagle Protection Act

The Bald and Golden Eagle Protection Act (PL 95-616; 16 USC §§ 668 et seq.) provides for protection of the bald and golden eagles by prohibiting taking, possession, and commerce in the birds.

2.4.2 Clean Water Act

The Clean Water Act (CWA) regulates the discharge of pollutants to waters of the United States in order to protect water quality and the beneficial uses of these waters. Through a permit application process, CWA Section 404 regulates dredge and fill discharges to waters of the United States.

2.4.3 Fish and Wildlife Conservation Act of 1980

The Fish and Wildlife Conservation Act of 1980 (PL 96-366; 16 USC §§2901 et seq.) provides for conservation, protection, restoration and propagation of certain species, including migratory birds threatened with extinction.

2.4.4 Migratory Bird Treaty Act

The Migratory Bird Treaty Act (PL 65-186, as amended; 16 USC §§ 703 et seq.) protects most birds, whether or not they migrate. Birds, their nests, eggs, parts, or products may not be killed or possessed. Game birds are listed and protected except where specific seasons, bag limits, and other features govern their hunting. Exceptions are made for some agricultural pests, which require a USFWS permit (yellow-headed, red-winged, bi-colored red-winged, tri-colored red-winged, Rusty and Brewer's blackbirds, cowbirds, all grackles, crows and magpies). Some other birds that injure crops in California may be taken under the authority of the County Agricultural Commissioner (meadowlarks, horned larks, golden-crowned sparrows, white- and other crowned sparrows, goldfinches, house finches, acorn woodpeckers, Lewis' woodpeckers and flickers). Permits may be granted for various non-commercial activities involving migratory birds and some commercial activities involving captive-bred migratory birds.

2.4.5 California Fish & Game Codes 3500 Series

California Fish & Game Codes 3500, 3503, 3503.5, 3505, 3511 and 3513 are State regulations that cover resident and non-resident game birds, protected bird nests, protected raptor nests, egrets, ospreys, Fully Protected bird species, and take considerations for Migratory Bird Treaty Act birds.

- Code 3500: "(a) Resident game birds are as follows:
  (1) Doves of the genus Streptopelia, including, but not limited to, spotted doves, ringed turtledoves, and Eurasian collared-doves.
  (2) California quail and varieties thereof.
  (3) Gambel's or desert quail.
  (4) Mountain quail and varieties thereof.
  (5) Sooty or blue grouse and varieties thereof.
  (6) Ruffed grouse.
  (7) Sage hens or sage grouse.
  (8) Hungarian partridges.
  (9) Red-legged partridges including the chukar and other varieties.
  (10) Ring-necked pheasants and varieties thereof.
  (11) Wild turkeys of the order Galliformes.

(b) Migratory game birds are as follows:
(1) Ducks and geese.
(2) Coots and gallinules.
(3) Jacksnipe.
(4) Western mourning doves.
(5) White-winged doves.
(6) Band-tailed pigeons.
(c) References in this code to "game birds" means both resident game birds and migratory game birds."

- Code 3503: "It is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as otherwise provided by this code or any regulation made pursuant thereto."

- Code 3503.5: "It is unlawful to take, possess, or destroy any birds in the orders Falconiformes or Strigiformes (birds-of-prey) or to take, possess, or destroy the nest or eggs of any such bird except as otherwise provided by this code or any regulation adopted pursuant thereto."

- Code 3505: "It is unlawful to take, sell, or purchase any aigrette or egret, osprey, bird of paradise, goura, numidi, or any part of such a bird."

- Code 3511: "(a) (1) Except as provided in Section 2081.7 or 2835, fully protected birds or parts thereof may not be taken or possessed at any time. No provision of this code or any other law shall be construed to authorize the issuance of permits or licenses to take any fully protected bird, and no permits or licenses heretofore issued shall have any force or effect for that purpose. However, the department may authorize the taking of those species for necessary scientific research, including efforts to recover fully protected, threatened, or endangered species, and may authorize the live capture and relocation of those species pursuant to a permit for the protection of livestock. Prior to authorizing the take of any of those species, the department shall make an effort to notify all affected and interested parties to solicit information and comments on the proposed authorization. The notification shall be published in the California Regulatory Notice Register and be made available to each person who has notified the department, in writing, of his or her interest in fully protected species and who has provided an e-mail address, if available, or postal address to the department. Affected and interested parties shall have 30 days after notification is published in the California Regulatory Notice Register to provide any relevant information and comments on the proposed authorization.
(2) As used in this subdivision, "scientific research" does not include any actions taken as part of specified mitigation for a project, as defined in Section 21065 of the Public Resources Code.
(3) Legally imported fully protected birds or parts thereof may be possessed under a permit issued by the department.
(b) The following are fully protected birds:
(1) American peregrine falcon (*Falco peregrinus anatum*).
(2) Brown pelican.
(3) California black rail (*Laterallus jamaicensis coturniculus*).
(4) California Ridgway's rail (*Rallus longirostris obsoletus*).
(5) California condor (*Gymnogyps californianus*).
(6) California least tern (*Sterna albifrons browni*).

(7) Golden eagle.
(8) Greater sandhill crane (*Grus canadensis tabida*).
(9) Light-footed Ridgway's rail (*Rallus longirostris levipes*).
(10) Southern bald eagle (*Haliaeetus leucocephalus leucocephalus*).
(11) Trumpeter swan (*Cygnus buccinator*).
(12) White-tailed kite (*Elanus leucurus*).
(13) Yuma Ridgway's rail (*Rallus longirostris yumanensis*)."

- Code 3513: "It is unlawful to take or possess any migratory nongame bird as designated in the Migratory Bird Treaty Act or any part of such migratory nongame bird except as provided by rules and regulations adopted by the Secretary of the Interior under provisions of the Migratory Treaty Act."

2.4.6 Native Plant Protection Act

The Native Plant Protection Act (NPPA) was enacted in 1977 and allows the California Fish and Game Commission to designate plants as rare or endangered. There are 64 species, subspecies, and varieties of plants that are protected as rare under the NPPA. The NPPA prohibits take of endangered or rare native plants, but includes some exceptions for agricultural and nursery operations, emergencies, and/or with proper notification to the CDFW for vegetation removal from canals, roads, and other sites, changes in land use, and in certain other situations.

2.4.7 Porter-Cologne Water Quality Control Act

The Porter-Cologne Water Quality Control Act (California Water Code §§13000 et seq.) is the State's primary water law. It gives the State Water Resources Control Board (SWRCB) and the nine regional water quality control boards substantial authority to regulate water use of surface and sub-surface waters.

2.5 Local Regulations

2.5.1 Western Riverside Multiple Species Habitat Conservation Plan

The Western Riverside County Multiple Species Habitat Conservation Plan is a comprehensive, multi-jurisdictional Habitat Conservation Plan (HCP) focusing on conservation of species and their associated habitats in Western Riverside County.

The MSHCP will serve as an HCP pursuant to Section 10(a)(1)(B) of the FESA, as well as a NCCP under the NCCP Act of 2001. The MSHCP will be used to allow the participating jurisdictions to authorize "take" of plant and wildlife species identified within the MSHCP area. USFWS and CDFW (Wildlife Agencies) have authority to regulate the take of threatened, endangered, and rare species. Under the MSHCP, the Wildlife Agencies will grant "take authorization" for otherwise lawful actions, such as public and private development that may incidentally take or harm individual species or their habitat outside of the MSHCP Conservation Area, in exchange for the assembly and management of a coordinated MSHCP Area. The MSHCP is designed to provide mitigation compliance under the FESA, CESA, CEQA, and National Environmental Protection Act (NEPA) with payment of a development mitigation fee to the appropriate local jurisdiction and completion of requisite habitat assessments/focused surveys for projects within those jurisdictions.

3.0 METHODS

Methods described below focused on determination of potential for occurrence of special-status plant and wildlife species. Specific consideration was given for species not covered or functionally covered under the Western Riverside MSHCP. Species are considered to be special-status, and are therefore subject to analysis in this section, if they meet one or more of the following criteria:

- Plant and animal species listed as endangered (FE), threatened (FT), or candidates (FPE or FPT) for listing under the Federal Endangered Species Act (FESA);
- Plant and animal species listed as endangered (SE), threatened (ST), or candidates (SPE or SPT) for listing under the California Endangered Species Act (CESA);
- Animals designated as Fully Protected Species (FP), as defined in California Fish and Game Code Sections 3511, 4700, 5050, and 5515;
- Animal species designated as Species of Special Concern (SSC) by the CDFW;
- Bat species designated as High Priority (H) by the Western Bat Working Group;
- Plants that are state listed as Rare[1]; or
- Plant species ranked by the California Native Plant Society (CNPS) as having a California Rare Plant Rank (CRPR) of 1 or 2.[2]

Sensitive natural communities are communities that have a limited distribution and are often vulnerable to the environmental effects of projects. These communities may or may not contain sensitive species or their habitats. For purposes of this assessment, sensitive natural communities are considered to be any of the following:

- Vegetation communities listed in the CNDDB;
- Communities listed in the Natural Communities List with a rarity rank of S1 (critically imperiled), S2 (imperiled), or S3 (vulnerable).

3.1 Literature Review

As a foundation for MSHCP requirements, the Riverside County Parcel Report was considered for information regarding sensitive habitat types and potential survey requirements applicable to portions of the Project occurring within private land. The RCA MSHCP Information map was further used to review Plan Survey areas and Criteria Species areas which may overlay portions of the Project occurring within County ROW. Additional sources of information included the National Wetlands Inventory database (NWI), the US Department of Agriculture (USDA) Web Soil Mapper, Calflora database, US Geological Service (USGS) topographic maps, and Google Earth aerial imagery.

Blackhawk Environmental conducted database records search (February 20, 2020) centered on the USGS 7.5-minute *Sunnymead* quadrangle and including up to a five-mile radius surrounding the Project. The database records search included the CDFW California Natural Diversity Database (CNDDB) (CDFW 2020), the US Fish & Wildlife Service (USFWS) Species Occurrence Database (USFWS 2020), and the California Native Plant Society's (CNPS) Electronic Inventory (EI) of Rare and

[1] Plants that were previously state listed as "Rare" have been re-designated as state threatened.

[2] Under the CEQA review process, only CRPR 1 and 2 species are considered, as these are the only CNPS species that meet CEQA's definition of "rare" or "endangered." Impacts to List 3 and 4 species do not meet CEQA's definition of "rare" or "endangered."

Endangered Vascular Plants of California (CNPS 2020). The CNDDB contains records of reported occurrences of federal- and state-listed species, proposed endangered or threatened species, Federal Birds of Conservation Concern (BCC), California Species of Special Concern (SSC) and otherwise sensitive species or communities that may occur within and/or in the vicinity of a Project (Figure 2). The USFWS Species Occurrence Database records federal-listed and candidate species. The CNPS Electronic inventory was filtered for CRPR 2.B and higher species. For the purposes of the habitat assessment, all historic records identified using the methods above, as well as MSHCP species with additional survey needs and procedures, were considered "target species."

The USDA Web Soil Survey was used to review soil types documented to occur within the Project site, as soil types often relate to the PFOs for a number of special-status species and habitat types. Also, a synoptic review was conducted of the NWI database, Google Earth imagery and USGS topographic maps for documented or potential water features on and adjacent to the Project site. These databases and literature reviews were used to provide details on special-status species that have potentials to occur within the proposed Project site and/or its surrounding area prior to conducting habitat assessment or focused survey efforts.

Utilizing the background data described above, Blackhawk biologist Ryan Quilley conducted a field survey of the Project site on February 24, 2020 to assess the Project site for existing conditions and the capacity to potentially harbor target species. Representative photos of the Project site, habitats, and existing site conditions are included in Attachment B.

Following the habitat assessment, potentials for sensitive species to occur were evaluated based on proximity, connectivity, recency and abundance of known occurrences, availability of suitable habitats, historic distributions of the species, and existing site conditions. Potentials for occurrence were generally evaluated based on the following criteria:

- Present – The species was observed within the Project area during the survey effort.
- High – Historic records indicate that the species has been known to occur within the vicinity of the Project (1 mile), and suitable habitat occurs onsite.
- Moderate – Historic records indicate that the species has been known to occur within the vicinity of the Project, but low-quality suitable habitat occurs onsite, or; no historic records occur within the Project, but the Project occurs within the historic range of the species, and moderate to high quality habitat occurs.
- Low – Historic records indicate that the species has not been known to occupy the immediate vicinity of the Project, and low-quality habitat for the species exists onsite.
- Assumed Absent – The species is restricted to habitats not occurring within the Project or is considered extirpated from the Project area.

3.2 Habitat Assessment

Blackhawk Environmental Biologist Ryan Quilley conducted the habitat assessment on February 24, 2020. In order to evaluate areas which may be appropriate for temporary Project use, and to evaluate the potential for indirect impacts, the assessment included all proposed Project features as well as an additional 150-meter (492 feet) survey buffer surrounding the proposed Parcel (Survey Area). Fully developed areas were excluded from the Survey Area due to lack of potential habitat for sensitive species. The survey was conducted between 07:20 A.M. and 08:55 A.M. Survey conditions

are included in Table 1 below.

Table 1. Habitat Assessment Conditions

Biologist(s)	Date	Time	Air Temperature (°F)	Wind Speed (mph)	Cloud Cover (%)	Precipitation
Ryan Quilley	2/24/2020	0720-0855	45-60	0-2	0	None

Methods used during the habitat assessment included slowly walking the entire Project site while documenting flora and fauna species and using Global Positioning System (GPS) technology to map dominant vegetation communities and potential hydrologic features. Where appropriate, the biologist paused at select vantage points to provide full visual coverage of the Project site and Survey Area. Pedestrian surveys of the Project Survey Area were performed throughout all areas of the Project and associated survey buffer, with the exception of fully developed lands; and are further discussed below. During the field survey, all plant and wildlife species observed or detected were recorded in field notebooks. Binoculars were used as needed to identify wildlife species. Plant species observed were identified to species or subspecies level when feasible according to the nomenclature in The Jepson Manual: Vascular Plants of California Edition 2 (2012). Vegetation communities were described according to dominant plant species and annotated on a high-resolution aerial photograph of the Project site. The habitat assessment did not include focused or protocol level surveys for any special-status plant or wildlife species; however, the habitat assessment included a burrowing owl habitat assessment, per Plan requirements.

3.3 Jurisdictional Water Bodies, Riverine/Riparian Habitats, Vernal Pools and Listed Fairy Shrimp Habitat

Aerial imagery, the NWI database, and USGS topographic maps of the Project site were reviewed to identify any known or potential drainage features, riparian/riverine habitat types, water bodies and/or other features that may fall under USACE, RWQCB, and/or CDFW jurisdictions and that may require investigation during the field survey. Per the MSHCP, riparian/riverine habitats are lands containing habitat dominated by trees, shrubs, persistent emergents, or emergent mosses and lichens which occur close to or which depend upon soil moisture from a nearby fresh water source or areas with freshwater flow during all or a portion of the year. The presence of any potentially jurisdictional features, including associated vegetation/communities, presence of ordinary high watermarks (OHWMs) or streambeds, substrates, hydrological indicators and potential connectivity, were documented during the field survey. Although the survey did not include a formal jurisdictional delineation, the survey included evaluation of potentially jurisdictional water bodies that may be subject to USACE, RWQCB, and/or CDFW jurisdictions within or adjacent to the Project as well as an assessment of riverine/riparian habitats as defined by the Plan, and none were observed to occur.

3.3.1 Vernal Pools and Listed Fairy Shrimp Habitat

The habitat assessment included a review of the proposed Project and Survey Area for stock ponds, ephemeral pools, road ruts, and other seasonally ponded areas which may support listed fairy shrimp species. The survey was performed during the 2020 wet season. The biologist noted any areas which may support standing water in excess of 2 centimeters. Where presence of standing water was not noted, the biologist recorded any indicators of non-riverine seasonally ponded areas such as water marks, soil cracks, algal mats, or other indicators which may indicate intermittent ponding. As part of the notation of floral species, the biologist recorded any observed vernal pool indicator species per USACE guidance (USACE 1997). Methods included the review of historic aerial imagery to determine

if inundation was readily visible on historic aerials.

3.4 MSHCP Additional Survey Needs and Procedures

The proposed Project falls within an MSHCP Survey Areas for burrowing owl (e.g. amphibian species, mammal species, narrow endemic plant species, and/or special linkage areas). Assessment of habitat suitability for burrowing owl was performed per accepted protocols. These methods are discussed below. The proposed Project does not occur within areas requiring additional assessment and surveys for mammals, amphibians, narrow endemic plants, or Criteria Areas.

3.4.1 Burrowing Owl

A habitat assessment for burrowing owl was performed throughout the Survey Area, as the entirety of the Project falls within areas designated as MSHCP survey areas for the species. Blackhawk performed a habitat assessment for burrowing owl concurrently with the habitat assessment on February 24, 2020. The assessment was performed per the *Burrowing Owl Survey Instructions for the Western Riverside Multiple Species Habitat Conservation Plan Area – Step 1 Habitat Assessment* (2005, by walking meandering transects through the entire Survey Area (excluding urban development). Pedestrian survey transects were spaced in a manner which allowed 100% visual coverage of the ground surface and transect centerlines were no more than 30 meters (approximately 100 ft.) apart. Transect spacing was adjusted as necessary to account for differences in terrain, vegetation density and ground surface visibility. The approximate spacing and directionality of transects is shown on Figure 3. Suitable habitat, as defined by the MSHCP, consists of a variety of natural and modified habitats for nesting and foraging that is typically characterized by low growing vegetation. Burrowing owl habitat includes, but is not limited to, native and non-native grassland, interstitial grassland within shrub lands, shrub lands with low density shrub cover, golf-courses, drainage ditches, earthen berms, unpaved airfields, pastureland, dairies, fallow fields, and agricultural use areas. Burrowing owls typically use burrows made by fossorial (adapted for burrowing or digging) mammals, such as ground squirrels (*Spermaphilus beecheyi*) or badgers (*Taxidea taxus*), they often utilize manmade structures, such as earthen berms; cement culverts; cement, asphalt, rock, or wood debris piles; or openings beneath cement or asphalt pavement. Burrowing owls are often found within, under, or in close proximity to man-made structures. In order to assess potential habitat, the biologist focused on the identification of suitable burrows within and adjacent to the site. Per the MSHCP, if burrowing owl habitat is not present on-site (i.e. if the site is completely covered by chaparral, cement or asphalt) Step II of the survey is not necessary and no pre-construction surveys are necessary.

4.0 ENVIRONMENTAL SETTNG AND RESULTS

4.1 Literature Review Results

The literature review resulted in a total of 18 special-status wildlife species and one special-status plant species known to occur within the Project vicinity. Three wildlife species are Federally Endangered, and one is State Threatened. No plant species are listed as Threatened or Endangered under the CESA or FESA. In addition to the above-mentioned FESA and CESA designations, the remaining 16 species had a CDFW listing status of at least Species of Special Concern (SSC) or CRPR ranking of 2 or higher. A CNDDB map of all sensitive wildlife and plant species known to occur within five miles of the Project site can be found in Attachment A, Figure 2. The resulting lists of species are included in Tables 3 and 4 and discussed in Section 4.2.4 and 4.2.5 below.

- Federally Endangered: three wildlife species; Riverside fairy shrimp, Stephen's kangaroo rat and San Bernardino kangaroo rat.

- State Threatened: one wildlife species; Stephen's kangaroo rat (*Dipodomys stephensi*)].

4.1.1 MSHCP Requirements (criteria cells, fee areas, narrow endemic plants, jurisdictional areas)

The Project site is located within Riverside County in the Reche Canyon/Badlands Area Plan. The RCIP report indicates the Project does not occur within a Plan Cell Group or Plan Criteria Cell; however, the Project is located within the Reche Canyon/Badlands Area Development Impact Fee (DIF) Area and is subject to payment of said fees as compliance. The MSHCP requires burrowing owl habitat assessments and surveys (if suitable habitat is present) are to be conducted on the Project site, but it does not require additional surveys for criteria areas species, amphibian species, mammal species, narrow endemic plant species, and/or special linkage areas.

4.2 Habitat Assessment Results

The proposed Project Includes 10.82 acres of undeveloped lands in the incorporated City of Moreno Valley, Riverside County, California. The Project is located generally east of March Air Reserve Base and Interstate 215 and south of State Route (SR) 60 (Attachment A, Figure 1). The Project site is bordered by the Val Verde Academy to the west, Iris Avenue to the north, California Aqueduct Linear Park Site to the south and the residential community associated with Ebony Avenue to the east. Regional access is provided by Iris Avenue to the north. Areas surrounding the Project site include residential and commercial developments, major and arterial roadways, parking areas, infrastructure, and landscaped areas, as well as undeveloped areas including the site itself and small undeveloped parcels to the west.

Elevations within the Project site range from 1,588 feet to 1,573 feet above mean sea level (AMSL) with little variation throughout the entire Project area.

4.2.1 Soils

Mapped soil units within the Project Survey Area include Exeter, Greenfield and Hanford sandy loams and loamy sands with slopes ranging between zero to two percent. Three distinct soil series are present within the Project area. These soil units are included in Table 2.

Table 2. Soils Occurring Within the Project Site

Map Unit Symbol	Map Unit Name	Acres in Survey Area	Percent of Survey Area
EnA	Exeter sandy loam, 0 to 2 percent slopes	2.11	19.5
GyA	Greenfield sandy loam, 0 to 2 percent slopes	7.00	64.7
HgA	Hanford fine sandy loam, 0 to 2 percent slopes	1.71	15.80
Total		10.82	100.00

4.2.2 Existing Land Use and Site Conditions

The Project site consists of a flat, vacant, triangular area characterized entirely by previously disturbed areas showing evidence of past historic mass grading of the site, imported soils (fill material containing sand and gravel), a single existing dirt access road, anthropogenic topographical disruptions from past land uses (tilling), and small debris piles. There was evidence onsite of recent (<1 year) disturbances, and the observed vegetation communities were highly disturbed. No native habitat was identified within the Project site, and nonnative annual species accounted for over ninety percent of the plant species percent cover on the vegetated areas.

Absolute vegetative cover averaged seventy percent and non-native plant species were dominant in all portions of the Project site. Shrubs were absent and annual, nonnative plant species accounted for an average vegetation height of one foot. The only observed trees within the Survey Area were located outside of the Project site and consisted of scattered ornamental species such as eucalyptus (*Eucalyptus ssp.*), golden wattle (*Acacia sp.*) and Mexican fan palm associated with residential development to the east and northwest of the parcel and the Val Verde Academy to the west of the parcel. The Project site provides marginally suitable habitat for common plant and wildlife species known to occur in the region and is restricted to species associated with disturbed areas.

Hydrology within the Project is characteristic of previously graded urban development areas with flat topography, isolated from surface run-off by municipal storm drain systems surrounding the site. The Project site has a slight grade and generally drains from north to south. Soils throughout the project are broadly described as “well drained,” comprised of sandy loams. Areas of natural hydrology were not observed within the Project, with the exception of small rills due to sheet flow.

4.2.3 Vegetation Communities and Land Use Types

According to the MSHCP Information Map, the Project is proposed to occur within developed/disturbed land. Field verification of the site identified two distinct MSHCP vegetation community and/or land use type within the Project site. Land use types are described according to *Volume II, Section C Habitat Accounts – Vegetation Associations of the Plan* and further refined into

subgroups according to *Preliminary Descriptions of the Terrestrial Natural Communities of California* (Holland 1986). Vegetation mapping showing the distribution of the two communities identified within the Project site and the Survey Area is shown in Figure 3 of Attachment A. The vegetation community/land cover uses present on the Project site and its' acreage include:

Project Site:

- 10.82 acres of Residential/Urban/Exotic – Disturbed Lands (Holland code 11300)

Survey Area (150 meter buffer):

- 12.23 acres of Residential/Urban/Exotic – Disturbed Lands (Holland code 11300)
- 54.39 acres of Residential/Urban/Exotic – Urban/Developed Areas (Holland code 11200)

Residential/Urban/Exotic – Distrubed Lands (Holland code 11300)

According to the Plan descriptions of Residential/Urban/Exotic areas, weed communities occur commonly in roadside areas and abandoned lots, such as the proposed Project lot. Within the Survey Area, these areas are further characterized according to Holland as "Disturbed Lands," which may result from anthropogenic or natural causes and can take on many forms in context of the surrounding vegetation communities, available seed banks, and disturbance factors. These areas can result from previous grading, vehicle traffic, or temporary land uses such as project staging. If disturbance variables are removed, and Disturbed Land is left to natural processes, these areas have the capacity to revegetate in the short term, but do not function as native vegetation communities. This contrasts with Urban/Developed Areas described herein, that do not have the capacity to revegetate in the short term or consist of maintained landscaping.

The entire parcel (10.82 acres) can be characterized by Residential/Urban/Exotic – Disturbed Lands in the form of non-native grasses and recently disturbed soils. Dominant and sub-dominant vegetation in this habitat include smooth barley (*Hordeum murinum*), cheeseweed (*Malva parviflora*), wild radish (*Raphanus sativus*), common fiddleneck (Amsinckia menziesii) and red brome (*Bromus madritensis*). Herbaceous ground cover in these areas was observed to provide groundcover in excess of eighty percent. Average height of vegetation was low, ranging from one half to three feet above ground. An additional 1.41 acres of similarly characterized habitat occurs within the surrounding Survey Area. Visible signs of recent mechanical raking (tilling) and consistent anthropogenic disturbance were observed within this habitat type, precluding the potential for most special-status species of plants and wildlife (Attachment B, Photograph 4). The regional value of disturbed Residential/Urban/Exotic – Weed Communities on site is low; having potential as foraging habitat for raptors, some passerine bird species and use by rodents capable of withstanding frequent anthropogenic disturbance

Residential/Urban/Exotic – Urban/Developed Areas (Holland code 11200)

The Plan characterizes developed areas and urban environments in a variety of ways, including tree groves, street strips, green belts, and shrub cover. Within the Survey Area this land use is further refined to include existing development according to Holland as "Urban/Developed Areas" which are nearly or entirely devoid of native vegetation and show significant evidence of intentional, human-caused conversion of previously existing natural habitats into development. Developed land is characterized by permanent or semi-permanent structures, pavement or hardscape, and landscaped areas that often require irrigation. This vegetation community typically includes unvegetated or landscaped areas with a variety of ornamental (usually non-native) plants (Oberbauer 2008). A total of 54.39

acres of Urban/Developed Areas were observed within the Survey Area.

4.2.3 Jurisdictional Waters and Riverine/Riparian Habitats

USACE, RWQCB and CDFW regulate discharge into and impacts to wetland and non-wetland water bodies meeting certain criteria. The MSHCP regulates impacts to riverine/riparian communities and vernal pools, as well as species associated with these habitat types, as outlined in section 6.1.2 of the MSHCP. The MSHCP specifically describes riverine/riparian habitats as "lands which contain habitat dominated by trees, shrubs, persistent emergents, or emergent mosses and lichens, which occur close to or which depend upon soil moisture from a nearby fresh water source; or areas with freshwater flow during all or a portion of the year."

The habitat assessment did not identify any drainage features which meet the MSHCP criteria for riverine or riparian habitat within the Project vicinity. Based on lack of riverine habitat a Jurisdictional Assessment and accompanying Jurisdictional Delineation Report is not required.

4.2.4 Sensitive and Observed Wildlife Species

The literature review resulted in a list of eighteen special-status target wildlife species with the potential to occur within the Project vicinity. These species and their potentials for occurrence are further described in Table 3. A complete list of wildlife species observed during the habitat assessment is included in Attachment C.

Table 3. Sensitive Wildlife Species Potentially Occurring Within the Survey Area

Species Name	Listing Status	Habitat Requirements	Potential for Occurrence
Birds			
Burrowing owl *Athene cunicularia*	Federal: BCC State: SSC MSHCP: Covered	Shortgrass prairies, grasslands, lowland scrub, agricultural lands (particularly rangelands), coastal dunes, desert floors, and some artificial, open areas as a year-long resident. Occupies abandoned ground squirrel burrows as well as artificial structures such as culverts and underpasses.	Presumed Absent. Six historical occurrences were recorded within five miles of the Project site; however, at the time of the survey, the site had no suitable burrows and lacks enough suitable habitat to support this species.
California horned lark *Eremophila alpestris actia*	Federal: None State: WL MSHCP: Covered	A common, widespread bird of the open country, the Horned Lark prefers short, sparsely vegetated prairies, deserts, and agricultural lands.	Moderate. Two historical occurrences were recorded within five miles of the Project site. Residential/Urban/Exotic – Weed Communities dominated by non-native grasses within the site provides suitable nesting and foraging habitat.
Loggerhead shrike *Lanius*	Federal: BCC State: SSC MSHCP:	Inhabits open country with short vegetation and well-spaced shrubs or low trees,	Presumed Absent (Nesting). One historical occurrence was recorded within five miles of

ludovicianus (nesting)	Covered	particularly those with spines or thorns. Frequents agricultural fields, pastures, old orchards, riparian areas, desert scrublands, savannas, prairies, golf courses and cemeteries.	the Project site; however, the site does not provide any suitable nesting substrate.
Reptiles and Amphibians			
California glossy snake *Arizona elegans occidentalis*	Federal: None State: SSC MSHCP: Not Covered	This nocturnal species inhabits a variety of grassland, sage scrub, dry wash and chaparral habitats from sea level to over 7,000 feet in elevation. Tends to prefer sandy, loose soils. It remains in its burrow by day.	Low. One historical occurrence was recorded within five miles of the Project site; however, the site is disturbed and unlikely to provide suitable habitat for this species. Additionally, the site is surrounded by development, further precluding occupation by this species.
San Diego horned lizard *Phrynosoma blainvillii* (formerly *Phrynosoma coronatum blainvillei*)	Federal: None State: SSC MSHCP: Covered	Occurs widely in sage scrub, woodlands, grasslands, and chaparral communities within microhabitats of loose granitic soils and open areas for sunning and foraging. This species is commonly associated with the presence of native harvester ants.	Presumed Absent. Multiple historical occurrences are recorded within five miles of the Project site; however, suitable habitat does not exist within the Project site. Additionally, the site is surrounded by development, further precluding occupation by this species.
Coastal whiptail *Aspidoscelis tigris stejnegeri* (formerly *Cnemidophorus tigris multiscutatus*)	Federal: None State: SSC MSHCP: Covered	Prefers open scrub, chaparral, and woodland habitats with open areas for basking and native ants as a prey base.	Presumed Absent. One historical occurrence was recorded within five miles of the Project site; however, the site is highly disturbed, lacks shrub cover, and is unlikely to provide suitable habitat for this species. Additionally, the site is surrounded by development, further precluding occupation by this species.
Northern red diamond rattlesnake *Crotalus ruber ruber*	Federal: None State: SSC MSHCP: Covered	Inhabits arid scrub, coastal chaparral, oak and pine woodlands, rocky grassland, cultivated areas. On the desert slopes of the mountains, it ranges into rocky desert flats.	Presumed Absent. Four historical occurrences are recorded within five miles of the Project site; however, suitable habitat does not exist within the Project site. Additionally, the site is surrounded by development, further precluding occupation by this species.
Belding's orange-	Federal: None	Occurs widely in sage scrub,	Presumed Absent. One

throated whiptail *Aspidoscelis hyperythra beldingi*	State: SSC MSHCP: Covered	woodlands, grasslands, and chaparral communities within microhabitats of loose granitic soils and open areas for sunning and foraging.	historical occurrence was recorded within five miles of the Project site; however, the site is disturbed, lacks shrub cover, and is unlikely to provide suitable habitat for this species. Additionally, the site is surrounded by development, further precluding occupation by this species.
Western spadefoot toad *Spea hammondii*	Federal: None State: SSC MSHCP: Covered	Prefers open areas with sandy or gravelly soils, in a variety of habitats including mixed woodlands, grasslands, coastal sage scrub, chaparral, sandy washes, lowlands, river floodplains, alluvial fans, playas, alkali flats, foothills, and mountains. Breeding sites include vernal pools and other temporary rain pools, cattle tanks, and occasionally in pools of intermittent streams. Typically, the pools are turbid with little or no cover.	Presumed Absent. Five historical occurrences are recorded within five miles of the Project site; however, suitable habitat does not exist within the Project site, and no seasonal water bodies were observed in the vicinity. Additionally, the site is surrounded by development, further precluding occupation by this species.
Mammals			
Los Angeles pocket mouse *Perognathus longimembris brevinasus*	Federal: None State: SSC MSHCP: Covered	This species is associated with sparsely vegetated lower elevation grasslands, alluvial sage scrub and coastal sage scrub, where it tends to occur in patches with fine sandy soils, such as dry washes and aeolian deposits.	Presumed Absent. Five historical occurrences are recorded within five miles of the Project site; however, the Project site is characterized by heavily disturbed soils, lacks sufficient grass or shrub cover, contains fill soil/gravel materials, and lacks connectivity to higher quality habitat. No pocket mouse burrows were observed. Suitable habitat for this species is absent from the site.
Northwestern San Diego pocket mouse *Chaetodipus fallax fallax*	Federal: None State: SSC MSHCP: Covered	Prefers loose, sandy, and gravelly soils, or mixed rocks, on moderate to steep rocky slopes with nearby shrubs. Habitats include coastal scrub, chamise-redshank chaparral, mixed chaparral,	Presumed Absent. Two historical occurrences are recorded within five miles of the Project site; the Project site is characterized by disturbed soils, lacks sufficient shrub cover, contains fill soil/gravel

		sagebrush, desert wash, desert scrub, desert succulent shrub, pinyon-juniper and annual grassland. Known range extends north to the San Bernardino and San Gabriel mountains, east to the San Jacinto Mountains, and south into Baja California.	materials, and lacks connectivity to higher quality habitat. No pocket mouse burrows were observed. Suitable habitat for this species is absent from the site.
Pocketed free-tailed bat *Nyctinomops femorosaccus*	Federal: None State: SSC MSHCP: Not Covered	Colonial species that roosts primarily in crevices in steep rugged cliffs, high rocky outcrops and slopes; it is readily found in abandoned quarries. May also roost in buildings, caves, and under roof tiles. It has been found in a wide variety of plant associations, including riparian, oak woodland, coniferous forest, open meadow and grassland, and coastal and desert scrublands, including over scrubby ridges, reservoirs, ponds, wetlands, and artificial lights.	Presumed Absent (Roosting/Foraging). One historical occurrence has been reported within five miles of the Project site. The Project site contains poor foraging habitat and roosting habitat/structure is not present on the Project site.
San Bernardino kangaroo rat *Dipodomys merriami parvus*	Federal: FE State: SSC MSHCP: Covered	This species occurs primarily in alluvial fan sage scrub (AFSS) which is a distinct habitat type of the coastal sage scrub (CSS) community. The AFSS habitats are confined to river and floodplains of southern San Bernardino County, the current distribution of the SBKR in San Bernardino County is San Ana Wash, Cajon and Lytle Creek, Plunge Creek, City Creeks, and area west of Rialto Drainage near the Jurupa Hills.	Presumed Absent. Three historical occurrences are recorded within five miles of the Project site; however, the Project site is characterized by disturbed soils and fill materials and lacks connectivity to higher quality habitat. Habitat for this species is sub-marginal at best, but with no kangaroo rat burrows observed, and a lack of reasonable connectivity to known populations, this species is assumed absent.
Southern grasshopper mouse	Federal: None State: SSC MSHCP: Not	Typically found in open habitats, including native perennial grasslands and	Presumed Absent. One historical occurrence has been recorded within five miles of

Onychomys torridus ramona	Covered	coastal sage scrub to the west of the mountain and alluvial fans and desert scrub to the east.	the Project site; however, the Project site is characterized by disturbed soils, a lack of shrub cover, imported fill materials, and lacks connectivity to higher quality habitat. Habitat for this species is assumed absent.
Stephen's kangaroo rat *Dipodomys stephensi*	Federal: FE State: ST MSHCP: Covered	Occurs primarily in low-growing annual and perennial grassland habitats but may occur in coastal scrub or sagebrush with sparse canopy cover and low herbaceous growth, or in disturbed areas. Preferred perennials are buckwheat and chamise; preferred annuals are brome grass and filarees.	Presumed Absent. Nine historical occurrences are recorded within five miles of the Project site; however, the Project site is characterized by disturbed soils and fill materials and lacks connectivity to higher quality habitat. Habitat for this species is sub-marginal at best, but with no kangaroo rat burrows observed, and a lack of reasonable connectivity to known populations, this species is assumed absent.
Western mastiff bat *Eumops perotis californicus*	Federal: None State: SSC MSHCP: Not Covered	Occurs in many open, semi-arid to arid habitats, including conifer and deciduous woodlands, coastal scrub, annual and perennial grasslands, palm oases, chaparral, desert scrub, and urban. Crevices in cliff faces, high buildings, trees, and tunnels are required for roosting. When roosting in rock crevices, it needs vertical faces to drop off to take flight. Reproduction: Nursery roosts described as tight rock crevices at least 35 inches deep and two inches wide, or crevices in buildings. Suitable habitat consists of extensive open areas with abundant roost locations provided by crevices in rock outcrops and buildings. Is known to forage over 25 miles away from its roost site (Zeiner et al 1988).	Presumed Absent (Roosting/Foraging). Two historical occurrences have been reported within five miles of the Project site. The Project site contains poor quality foraging habitat and no roosting habitat/structure. Additionally, the site is surrounded by development, further precluding occupation by this species.

Western yellow bat *Lasiurus xanthinus*	Federal: None State: SSC MSHCP: Not Covered	Roosts are commonly in palm trees, and occasionally in cottonwood trees or yuccas, often near surface water in open grassy areas or scrub habitat. Forages over water and among trees in coastal, foothill, and desert riparian areas, and in suburban neighborhoods.	Low (Roosting), Presumed Absent (Foraging). Two historical occurrences have been reported within five miles of the Project site. The Project site does not contain suitable foraging and roosting habitat/structure for this species. Potential roosting sites in Mexican fan palms are present in adjacent areas to the Project site within the Survey Area.
Crustaceans			
Riverside fairy shrimp *Streptocephalus wootoni*	Federal: FE State: None MSHCP: Covered	Restricted to deep seasonal vernal pools, vernal pool like ephemeral ponds, and stock ponds and other human modified depressions (TLMA 2004). Riverside fairy shrimp prefer warm-water pools that have low to moderate dissolved solids, are less predictable, and remained filled for extended periods of time (Eriksen and Belk 1999). In Riverside County, Riverside fairy shrimp have been found in pools formed over the following soils: Murrieta stony clay loams, Las Posas series, Wyman clay loam, and Willows soils (U.S. Fish and Wildlife Service 2001).	Presumed Absent. Two historical occurrences have been reported within five miles of the Project site; however, this species requires vernal pool habitats which are absent from the Project site.

Of the 18 target wildlife species documented to occur within the Project vicinity, one (California horned lark) was determined to have a moderate potential for occurrence, and two (glossy snake and western yellow bat) had a low potential for occurrence based on proximity of historic records and quality of habitat on site. Specifically, western yellow bat was determined to have a low potential for roosting within the Survey Area based on the presence of Mexican fan palms (*Washingtonia robusta*) present on lands immediately adjacent to the Project site. However, suitable roosting sites for this species do not occur directly within the Project and this species is presumed absent from the Project site. The remaining 15 target sensitive species were considered absent due to lack of suitable habitats on the Survey Area.

4.2.5 Special Status and Observed Plant Species

Based on CNDDB, USFWS, and CNPSEI-documented occurrences within five miles of the Project site,

the literature review resulted in a list of one special-status plant species evaluated for its' potential to occur on the Project site. This single species and potential for occurrence is further described in Table 4 below. A complete list of plant species observed during the field survey is included in Attachment D.

Table 4. Special-Status Plant Species Potentially Occurring Within the Project Site

Species Name	Listing Status	Habitat Requirements	Potential for Occurrence
Smooth tarplant *Centromadia pungens ssp. laevis*	Federal: None State: None CRPR: 1B.1 MSHCP: Not Covered	Annual herb that occurs in alkali soils within chenopod scrub, meadows and seeps, playas, riparian woodland, valley and foothill grassland. Blooms: Apr-Sep Elevation: 0-640 m	Presumed Absent. One historical occurrence has been recorded within five miles of the Project site; however, alkali soils in suitable habitat were not observed on the Project site. Additionally, no senesced individuals, seedlings or plants of any tarplant species were observed.

The single special-status plant species (smooth tarplant) documented to occur within the Project vicinity, is presumed absent within the Survey Area based on proximity of historic records and lack of suitable habitat on site.

4.2.6 Special Status and Observed Habitat Types

The literature review did not result in any special-status habitat types with potential to occur on the Project site.

4.3 Migratory Birds

The Project site predominately contains non-native grasses and non-native annual plant species commonly associated with anthropogenically-altered landscapes, while areas surrounding the Project site contain sparse ornamental shrubs and trees, amongst development. These habitat types provide suitable nesting habitat primarily for avian species commonly associated with developed and Residential/Urban/Exotic – Weed Communities dominated by non-native grasses. Nearly all native nesting birds are protected by the Migratory Bird Treaty Act (MBTA) and CDFW Codes 3500 through 3516.

Common bird species with the potential to nest within the Project site and adjacent habitats include American crow (*Corvus brachyrhynchos*), common raven (*Corvus corax*), house finch (*Haemorhous mexicanus*), house sparrow (*Passer domesticus;* not MBTA-covered), European starling (*Sturnus vulgaris;* not MBTA-covered), northern mockingbird (*Mimus polyglottos*), Anna's hummingbird (*Calypte anna*), black phoebe (*Sayornis nigricans*) and Say's phoebe (*Sayornis saya*) among others. Suitable nesting habitat for raptor species identified during the survey (i.e., American kestrel), consisted of potential cavities within ornamental palms and buildings that were adjacent to the Project site. The open nature of the Project site and Residential/Urban/Exotic – Weed Communities dominated by non-native grasses, also provides suitable habitat for ground nesting birds such as

horned lark, savannah sparrow (*Passerculus sandwichensis*), killdeer (*Charadrius vociferans*), among others.

4.4 Reserve Interface and Wildlife Movement Corridors

Tracks, sign, burrows and/or direct visual observation of small mammal species was limited and consisted of scarce Botta's pocket gopher (*Thomomys bottae*) burrows along the northern Project limit and direct observation of desert cottontail (*Sylvillagus audubonii*) within a single small rubble pile within the northwest portion of the Project site. Domestic dog tracks and a single domestic cat were observed within the Project site. The Project site does not contain large natural areas and habitat fragments, and is isolated by surrounding development, precluding wildlife corridors and connectivity to large conservation areas. The Project does not occur within Plan Conservation Areas or Public/Quasi Public Lands (PQP), and the nearest PQP area is three quarters of a mile south of the Project site and connectivity between open space Conservation Areas and the Project is absent as a result of heavy urban development in surrounding lands.

5.0 WESTERN RIVERSIDE MSHCP CONSISTENCY ANALYSIS

The Project is not located within a MSHCP Criteria Cell or Cell Group. The MSHCP establishes habitat assessments for certain plant and wildlife species. The Project is located within an area of the MSHCP requiring habitat assessments for burrowing owl and burrowing owl surveys, if suitable habitat is present; however, no suitable burrowing owl habitat was identified within the Project area or adjacent survey areas. The Project was not observed to support riparian/riverine habitats. The Project does not exist adjacent to Public/Quasi Public Lands. The Project is not located within an area requiring surveys for mammals, amphibians, narrow endemic plant species, or criteria area species.

5.1 Reserve Assembly Analysis

The proposed Project is not located within a Plan Criteria Cell or Cell Group, and therefore will not directly impact Conservation Areas or long-term reserve assembly. The proposed Project does not occur immediately adjacent to Plan Conservation Areas and therefore will avoid direct impacts to these areas. Potential indirect impacts associated with the proposed Project adjacent to these areas is discussed in Section 5.2 below.

5.2 Urban Wildlands Interface

According to the Plan, the Urban/Wildlands Interface Guidelines are intended to address indirect effects associated with locating development in proximity to Plan Conservation Areas. Plan Conservation Areas include Public/Quasi Public Lands (PQP), San Jacinto Wldlife Area Additional Acquisition, Preexisting Conservation Agreements and Rural Moutainous Designation in the MSHCP Plan Area. The Project Site does not occur within any of these Conservation Areas and urban development isolates the Survey Area from all Conservation Areas by more than three quarters of a mile. The Project Site does not occur within a Special Linkage Aree and connectivity to the site is absent as a result of heavy urban development in surrounding lands. The Project does not occur adjacent to Conservation Areas, therefore, development of this parcel is not likely to result in "edge effects" that will adversely affect biological resources within the MSHCP Public/Quasi Public Lands (TLMA, 2004). Analysis was conducted under section 6.1.4 of the MSHCP to determine potential impacts.

5.2.1 *Drainage and Storm Water Runoff*

Though the project is not within or immediately adjacent to PQP lands, Project indirect impacts could involve drainage and storm water runoff from the Project site to adjacent flow-ways (Iris Avenue and Red Maple Lane) and potentially into the municipal storm drain system. A possible temporary indirect impact during construction may include an increase of soil erosion above natural levels currently observed in these areas. Other potential effects may result from non-storm water discharges, excavation stockpile runoff, or other elements that might degrade or harm biological resources or ecosystem processes within distant MSHCP PQP Lands, if fed by the municipal storm drain system. Regardless of proximity to PQP Lands, Best Management Practices (BMPs) should be included to ensure that siltation and erosion are minimized during construction, and also incorporated into the final design of the Project in order to ensure that future water quality is not degraded. In particular, measures shall be put in place to avoid discharge of untreated surface runoff from developed and paved areas into existing natural drainage courses and/or MSHCP Public Quasi-Public Lands (TLMA, 2004).

5.2.2 *Toxics*

Due to the use of heavy machinery proposed in the development of the Project site, as well as standard development practices, a possible indirect impact to the distant MSHCP Public/Quasi Public Lands could involve toxic runoff from the Project site to City storm drains. Toxic runoff may originate from hydraulic fuel, automotive fluid leaks, oil, etc. Similar measures as those used to address drainage impacts will be implemented to prevent toxic impacts to the any MSHCP Public/Quasi Public Lands.

5.2.3 *Lighting*

No PQP lands exist adjacent to the Project and therefore there should be no associated impacts to adjacent habitats or MSHCP Public/Quasi Public Lands as a result of night lighting.

5.2.4 *Noise*

Project activities may result in an increase of noise levels in areas immediately surrounding the Project site; however, no adjacent habitats and MSHCP Public/Quasi Public Lands do not exist within the vicinity of the Project. Therefore, increased noise levels associated with Project implementation are not anticipated to effect wildlife associated with MSHCP Public/Quasi Public Lands.

5.1.5 *Invasives*

The Project is surrounded by urban development and is not adjacent to MSHCP Public/Quasi Public Lands, therefore transfer of invasive species to distant MSHCP Public/Quasi Public Lands is not anticipated. The site itself does not provide any native habitat and is dominated by non-native annual species.

5.1.6 *Grading/ Land Development*

All Project activities shall remain restricted to designated work areas proposed for disturbance as shown in Attachment A, Figure 3, “Project Boundary”. The Project work area occurs outside of all

MSHCP Conservation Areas, Riverine Habitat, and avoids habitat areas which may support species for which additional surveys would be required.

5.2 Additional Survey Needs and Procedures

Additional surveys are not anticipated in conjunction with Plan implementation in order to achieve coverage for species discussed in 6.3.2 of the Plan, since these species either were determined to be absent from the Project site, or potential impacts to species with a PFO will be limited to a level that is below levels considered significant under CEQA/NEPA guidelines and the MSHCP.

The Project falls within the MSHCP Survey Area for burrowing owl. The habitat assessment included consideration of this species, discussed below.

5.2.1 Burrowing Owl

The Project site is located within a MSHCP burrowing owl survey area, if suitable habitat is identified during the burrowing owl habitat assessment. A habitat assessment during a site visit conducted on February 24, 2020 identified Disturbed Areas which may be considered suitable for burrowing owl. Based on the potential for suitable habitat, a habitat assessment was performed as described in section 3.4.1 above. The results of the habitat assessment determined that suitable burrowing owl habitat does not exist within the Project site or Survey Area due to a lack of suitable burrow sites. Natural or manmade burrows were not observed, with the exception of two small concrete rubble piles, one of which was occupied by a feral cat and the other occupied by several desert cottontail rabbits, precluding owl occupation. No whitewash, pellets, feathers or other burrowing owl sign were observed during the survey. Additionally, crevices created by these concrete rubble piles were considered to be too shallow to support burrowing owl. Due to absence of suitable habitat for this species within the Survey Area, no additional surveys for this species are required.

5.3 Criteria Area Species and Narrow Endemic Plant Species

The Project site is not located within a Narrow Endemic Plants Survey Area under section 6.1.3 of the Plan. The Project site is not located within a Criteria Area Species Survey for special-status plant species under section 6.3.2 of the Plan. No additional non-covered special-status or narrow endemic plant species with the potential to occur on site were identified during the literature review and/or site assessment.

5.4 Jurisdictional Waters

The presence of any potentially jurisdictional features, including associated vegetation/communities, presence of ordinary high watermarks (OHWMs) or streambeds, substrates, hydrological indicators and potential connectivity was not observed during the habitat assessment. The habitat assessment did not include a formal jurisdictional delineation effort as potentially jurisdictional water bodies that may be subject to USACE, RWQCB, and/or CDFW jurisdictions were not documented to occur within or adjacent to the Project. Therefore, an additional assessment is not required to determine if specific areas of the Project site meet either 1) criteria to be considered a relatively permanent water or tributary of a TNW providing meeting significant nexus standards and fall under the jurisdiction of the USACE, RWQCB and/or CDFW as a non-wetland water and streambed, or 2) meet the three-parameter criteria of a wetland and fall under the jurisdiction of the USACE, RWQCB and/or CDFW as

wetland areas.

5.4.1 Riparian/Riverine Habitats

Per Section 6.1.2 of the MSHCP, riparian/riverine habitats are lands containing habitat dominated by trees, shrubs, persistent emergents, or emergent mosses and lichens which occur close to or which depend upon soil moisture from a nearby fresh water source or areas with freshwater flow during all or a portion of the year. The habitat assessment included a review of areas which may meet criteria as riparian/rivering habitats per the Plan. No riparian/riverine habitats were documented within the Project site or Survey Area.

5.4.2 Riparian/Riverine Species

Riparian/riverine habitats were not identified within the Project site. Due to the lack of habitat which supports riparian species, riparian/riverine-associated species listed in section 6.1.2 of the Plan are not expected to occur. No MSHCP-covered or riparian-associated species were directly observed during the February 24, 2020 field survey.

5.5 Vernal Pools and Fairy Shrimp

No vernal pools or habitat that could potentially support fairy shrimp species were observed on the Project site. No vernal pools were observed, and they are not known to historically occur within the Project site or within 2 miles of the Survey Area. The closest historical record of listed fairy shrimp to the Project Site occurs approximately 2.5 miles to the west. The Project is surrounded by urban development and lacks any connectivity to known populations of listed fairy shrimp, further precluding the potential for occurrence. In addition to the absence of historical records of occurrence, native soil types mapped for the Project include well drained sandy loams, not expected to support natural formation of vernal pools or fairy shrimp habitat. As a result, these areas are not expected to support vernal pool species.

6.0 IMPACTS AND MITIGATION

This section of the report includes a discussion of the potential direct, indirect, and cumulative impacts to onsite special-status biological resources that may result upon the construction and implementation of the Project. Direct impacts include those involving the loss, alteration, and/or disturbance of plant communities, and consequently, the flora and fauna of the affected area. Direct impacts also include the destruction of individual plants and/or wildlife. Direct impacts may adversely affect regional populations of certain species, or result in isolated populations, reducing genetic diversity and range-wide population stability; conversely, direct impacts may also have intended or unintended positive effects in some cases.

Indirect impacts include a variety of effects related to areas or habitats that are not directly removed by project development, such as loss of foraging habitat, increased ambient noise, artificial light, introduced predators (e.g., domestic cats, dogs and other non-native animals), competition with exotic plants and animals, increased human presence and associated disturbances (e.g., trash, green waste, physical intrusion). Indirect impacts may include long, and/or short-term daily activities associated with project build-out, such as increased traffic, permanent barriers or fences, buildings, exotic seed-bearing ornamental plantings, irrigated landscapes and human presence, among others. These types of impacts are known as edge effects and over time, may result in some encroachment on native plants by exotic plants, altered behavioral wildlife patterns, reduced wildlife diversity, and decreased wildlife abundance in habitats adjacent to a given project site. However, as is the case with direct impacts, indirect impacts may also have intended or unintended positive effects for certain species.

The potential for significant adverse effects, either directly or indirectly through habitat modification or conversion, on any special-status vegetation community, plant species or wildlife species, or that could occur as a result of the development of this Project is discussed within this section.

6.1 Project Impacts

This section provides definitions and discussion of the various Project-related impacts which are anticipated to occur.

6.1.1 Habitat Impacts

Construction of the proposed Project will result in permanent loss of 10.82 acres of Residential/Urban/Exotic – Disturbed Areas associated with the permanent footprint of the residential development, parks, roads, and a trail.. These include all areas proposed for ground disturbance, clearing, grading, equipment staging, materials laydown, storage and ultimate development of the parcel. This area is shown on Attachment A as “Project Boundary.”

The estimated acreages of proposed impacts resulting from implementation as described above are summarized in Table 6.

Table 6. Summary of Proposed Project Impacts to Vegetation Communities/Land Use Types

Vegetation Community/ Land Use Type	Acreage
Residential/Urban/Exotic – Weed Communities	10.82

6.1.2 Construction-Related Impacts

Short-term (Temporary) Construction-Related Direct Impacts

Potential direct impacts to special status biological resources, absent mitigation measures, which may occur as a result of construction of the proposed Project include wildlife entrapment, killed or injured wildlife, and unauthorized grading or vegetation removal. These activities have the potential to occur for any number of reasons, including lack or absence of project design staking, inadequate or unmaintained demarcation of proposed impacts areas, misinterpretation of Project designs, and human error in operating equipment. Dependent on construction methodology and sequencing, impacts resulting from wildlife entrapment may occur at any Project site where excavations remain open and un-sealed for extended periods.

Short-term (Temporary) Construction-Related Indirect Impacts

Potential temporary indirect impacts as a result of construction of the proposed Project include non-storm-water discharges resulting from spills or leaks and storm-water discharges from sediment laden runoff into adjacent municipal storm drain systems.

Potential temporary indirect impacts as a result of the Project may include fugitive dust, excess noise, and the attraction of predators to the Project site that could ultimately result in take of special-status species.

6.1.3 Operations and Maintenance-Related Impacts

The proposed Project would include the complete development of the proposed parcel. As the Project location is surrounded by previously developed lands, there are no anticipated operations and maintenance-related impacts from the Project, once development is complete.

Long-term (Permanent) Operations and Maintenance-Related Direct Impacts

Direct impacts associated with the completion of the Project would be restricted to the permanent loss of Residential/Urban/Exotic – Weed Communities. Additional impacts to special status biological resources are not anticipated to result from operations and maintenance activities.

Long-term (Permanent) Operations and Maintenance-Related Indirect Impacts

Indirect impacts associated with the long-term operation of the Project are not anticipated due to the Project location being surrounded by developed areas. Though, without implementation mitigation measure and not adjacent to PQP lands. Impacts as a result of Operations and Maintenance of the proposed Project could include non-storm-water discharges resulting from spills or leaks and storm-water discharges from sediment laden runoff into adjacent municipal storm drain systems. Without proper implementation of a SWPPP and stormwater management systems

incorporated in the construction design, consistent with state and local requirements, there is a potential for long term urban discharge.

6.2 Special-Status Species

6.2.1 MSHCP-Covered Special Status Species

Of the eighteen special-status target wildlife species evaluated, only three are expected to have the potential to occur. Of these three wildlife species, the California horned lark (moderate PFO; State WL) is the only species functionally covered under the Plan. This species may be subject to both temporary and permanent, direct and indirect impacts, as a result of the proposed Project. Absent mitigation, Project-related impacts to this species are potentially significant. The following MM is recommended to reduce potential impacts to below significant levels for Plan-covered special-status species:

- MM-BIO 1: Payment of MSHCP Mitigation Fees. Prior to issuance of a grading or building permit, the Project applicant will be required to pay relevant MSHCP mitigation fees per the Final Mitigation Fee Nexus Report. These fees will be determined in consultation with the Riverside Conservation Authority based on final Project classification and impacts. Payment of all mitigation fees will be required as part of the Project approval process.

The single special-status target plant species evaluated (smooth tarplant) does not have the potential to occur. Smooth tarplant (Assumed Absent PFO; SSC) is covered under the Plan.

6.2.2 Special-Status Species Not Functionally Covered Under the MSHCP

Of the special-status species expected to have the potential to occur, the following two species are not functionally covered under the Plan:

- California glossy snake (low PFO; SSC)
- Western yellow bat (low [roosting]; SSC)

Focused surveys for these special-status species were not performed and potential for impacts is presumed based on extent and availability of habitat. California glossy snake may be subject to permanent, direct impacts, as a result of the proposed Project; however, anticipated Project-related impacts to California glossy snake is less than significant due to the Project size, existing marginal habitat, previous disturbance and low probability that this species exists within the Project site.

Western yellow bat may be subject to temporary indirect impacts as a result of the proposed Project. The only potentially suitable roosting habitat for Western yellow bat exists in the form of scattered ornamental Mexican fan palms which only occur outside of the Project impact footprint. Indirect impacts to potential western yellow bat roost sites may include temporary increases in noise as a result of construction activity. However, these activities are expected to be short in duration and generally would not exceed existing ambient conditions adjacent to the site. Based on low potential for this species to occur in combination with the temporary nature of potential impacts, potential impacts to this species are likely considered less than significant.

Additionally, with the implementation of MM BIO-1 above, which will contribute to the ongoing reserve assembly of the region, impacts to either of the aforementioned species are likely to be less than significant.

6.3 Species Requiring Additional Surveys and/or Habitat Assessments

6.3.1 Burrowing Owl

At the time of the assessment, the Survey Area did not support suitable habitat for burrowing owl; however, two rubble piles containing shallow cavities were identified on the site and were occupied by desert cottontail and a domestic cat during the 2020 breeding season, precluding occupation by burrowing owl. Therefore, suitable habitat for burrowing owl was found absent from the Project site and focused burrowing owl surveys were not required pursuant to the Burrowing Owl Survey Instructions for the Western Riverside MSHCP. Though, occupied by other species at the time of the assessment, these rubble piles have a low potential to support migrating burrowing owls as temporary roost sites, if they become vacant (i.e. not occupied by desert cottontails or domestic cats) prior to construction.

With the implementation of the proposed mitigation measures for potential Project-related impacts to burrowing owl, the Project will fulfill the requirements related to biological resources pursuant to CEQA and the Plan.

- MM-BUOW 1: Within 30 days of construction, conduct take avoidance surveys for burrowing owl per guidelines specified in the Western Riverside County Regional Conservation Authority Burrowing Owl Survey Instructions for the Plan Area (2006).

- MM-BUOW 2: If burrowing owls are observed to occupy the Project site and/or adjacent areas during take avoidance surveys or incidentally during construction, the City of Moreno Valley Planning Department will be notified, and avoidance measures may be implemented during the breeding season (March 1 through August 31). If burrowing owls are present during the non-breeding season (September 1 through February 28), burrowing owl exclusion measures may be implemented in accordance with the Plan.

6.4 Migratory Birds

The assessment identified suitable habitat and substrate for migratory birds protected under the MBTA and CDFW Codes 3503 and 3503.5. Permanent impacts to migratory birds as a result of the Project may include habitat loss, nesting habitat removal, roosting site loss and/or loss of individuals. Indirect impacts may include fugitive dust, excess noise, increased artificial lighting, and the attraction of predators to the Project site. The following mitigation measure is recommended to reduce potential impacts to migratory bird species below significant levels:

- MM-BIO 2: Perform Per-Construction Nesting Bird Surveys. To the extent feasible, conduct vegetation removal outside of the nesting bird season (generally between March 1 and August 31). If vegetation removal is required during the nesting bird season, conduct take avoidance surveys for nesting birds within 100-feet of areas proposed for vegetation removal. Surveys should be conducted by a qualified biologist(s) within three days of vegetation removal. If active nests are observed, a qualified biologist will determine appropriate minimum disturbance buffers or other adaptive mitigation techniques (e.g., biological monitoring of active nests during construction-related activities, staggered schedules, etc.) to ensure that impacts to nesting birds are avoided until the nest is no longer active.

6.5 MSHCP Urban Wildlands Interface Impacts

As discussed in Section 6.1.3 above, the proposed Project has the potential for indirect impacts to PQP Lands and Plan Conservation Areas through potential stormwater and non-stormwater discharges. However, the Project will incoroporate "best practices" for storm water pollution prevention identified during the development of a Proejct Storm Water Pollution Prevention Plan (SWPPP). Furthermore, the Project has been designed to incorporate stormwater management facitities to manage and control urban run-off during long-term operations. As such, potential indirect impacts to PQP and Conservation Areas are likely considered less than significant.

6.6 Riparian/Riverine Habitat and/or Potentially Jurisdictional Areas

The habitat assessment did not identify Riparian/Riverine habitat and potentially jurisdictional areas subject to regulation by USACE, RWQCB, and/or CDFW. Therefore, there are no anticipated potential impacts to these areas and Project development will not result in significant impacts.

7.0 CONCLUSIONS

The Project site is within the Reche Canyon/Badlands Area Plan of the MSHCP, but not within any Criteria Cell or Cell Group.

The Project does not provide suitable habitat for riparian/riverine associated species. The Project site does not contain vernal pools or potential listed fairy shrimp habitat. At the time the assessment was conducted, the Project site did not provide suitable habitat for burrowing owl; however, two rubble piles, occupied by other species at the time of the assessment, have a low potential to support migrating burrowing owls as temporary roost sites, if they become vacant (i.e. not occupied by desert cottontails or domestic cats) prior to construction. Following the MSHCP recommendation of a preconstruction burrowing owl survey within 30 days prior to construction, no negative impacts to burrowing owl are anticipated. If burrowing owls are present during the non-breeding season (September 1 through February 28), burrowing owl exclusion measures may be implemented in accordance with the Plan. If burrowing owls are present during the breeding season (March 1 through August 31), avoidance measures will be implemented.

The Project site provides potentially suitable habitat for California glossy snake and also provides suitable nesting habitat for California horned lark and other avian species. Adjacent areas, outside of the Project footprint may provide roosting habitat for Western yellow bat in the form of Mexican fan palms. Impacts to adjacent PQP lands, special-status species, PQP Lands, Riverine habitat, potential jurisdictional water resources and nesting birds are anticipated to be less than significant with mitigation proposed herein to offset any direct and/or indirect impacts.

By adhering to the recommendations provided in this Report (and resulting additional actions, if required), payment of the MSHCP mitigation fees and fulfillment of the stipulations set forth by the County of Riverside HANS process, this Project is fully consistent with the Plan and would fulfill requirements for biological resources pursuant to CEQA, FESA, and CESA.

8.0 SURVEYOR CERTIFICATION

All data, statements, analyses, findings and attachments within this report are accurate and truthful in terms of describing the existing conditions and the Project as proposed to Blackhawk Environmental. By adhering to the mitigation measures proposed within this habitat assessment report and payment of appropriate fees to the Western Riverside County Regional Conservation Authority, compensatory mitigation related to the complete the Project will be met to CEQA significance thresholds.

AVES	BIRDS
ACCIPITRIDAE	Kites, Hawks, Eagles, and Allies
Falco sparverius	American kestrel
CHARADRIIDAE	Plovers, Dotterels & Lapwings
Charadrius vociferans	killdeer
CORVIDAE	Crows & Jays
Corvus brachyrhynchos	American crow
Corvus corax	common raven
FRINGILLIDAE	Finches and Allies
Haemorhous mexicanus	house finch
ICTERIDAE	Blackbirds and Allies
LARIDAE	Gulls, Terns, and Skimmers
Larus californicus	California gull
MIMIDAE	Mockingbirds & Thrashers
Mimus polyglottos	northern mockingbird
MOTACILLIDAE	Wagtails, Longclaws, and Pipits
Anthus rubescens	American pipit
PARULIDAE	Wood Warblers & relatives
Setophaga coronata	yellow-rumped warbler
PASSERELLIDAE	New World Sparrows
Passerculus sandwichensis	savannah sparrow
PASSERIDAE	Old World Sparrows
*Passer domesticus**	house sparrow
STURNIDAE	Starlings and Mynas
*Sturnus vulgaris**	European starling
TROCHILIDAE	Hummingbirds
Calypte anna	Anna's hummingbird
Selasphorus sp.	rufous or Allen's hummingbird
TURDIDAE	Thrushes
Sialia mexicana	western bluebird
TYRANNIDAE	Tyrant Flycatchers
Sayornis nigricans	black phoebe
Sayornis saya	Say's phoebe

MAMMALIA	MAMMALS
CANIDAE	Canids
*Canis familiaris**	Domestic dog
FELIDAE	Felines
*Felus catus**	domestic cat
GEOMYIDAE	Gophers
Thomomys bottae	Botta's pocket gopher
LEPORIDAE	Rabbits and Hares
Sylvillagus audubonii	desert cottontail

**Non-native*

Type of Study: Phase I Cultural Resources Assessment
Cultural Resources within Area of Potential Impact: None
Project Location: USGS 7.5' Topographic Quadrangle Sunnymead, Section 29 of Township 3 South, Range 3 West
APN: 312-020-025
Project Area: Approximately 10.8 acres
Date of Field Survey: March 6, 2020
Key Words: Archaeology, CEQA, Moreno Valley, Riverside County, Low sensitivity

MANAGEMENT SUMMARY

Passco Pacifica LLC (Proponent) proposes the construction of Iris Park, a proposed 81-lot single-family detached subdivision located on the south side of Iris Avenue, about 500 feet east of Perris Boulevard, on APN 312-020-025. The project site is triangular in shape and has a gross acreage of approximately 10.82 acres, including 3.02 acres that is planned for development by the City of Moreno Valley as a public park and trail over the California Aqueduct. The community will have two gated access points off Iris Avenue. Three small park areas are spread out on the site. Residential lots would range from 2,197 sq. ft. to 4,741 sq. ft. Homes would range from 1,848 sq. ft. to 2,201 sq. ft., with 3 to 5 bedrooms and 2.5 to 3 baths. Homes would be two stories, include a back yard approximately 12 to 14 feet deep, and have an attached two-car garage. Three architectural styles are proposed: Spanish, French, and Farmhouse. The project overall would provide 217 parking spaces, including 162 garage spaces and 49 spaces on private streets. Material Culture Consulting, Inc. (MCC) was retained by E|P|D Solutions, Inc. to conduct a Phase I cultural resource investigation of the Project Area. This assessment was conducted in accordance with the California Environmental Quality Act (CEQA) and Riverside County Guidelines, and included a cultural resources records search, a search of the Sacred Lands File (SLF) by the Native American Heritage Commission (NAHC), outreach efforts with 21 Native American tribal representatives, background research, and a pedestrian field survey.

Yahaira Gonzalez, MCC Archaeologist, conducted a search of the California Historical Resource Information System (CHRIS) on February 25, 2020 at the Eastern Information Center (EIC), located on the campus of University of California, Riverside. The cultural resources records search identified twenty-six prior cultural resources investigations within a 1-mile radius of the Project Area. One of these studies intersects the Project Area. A total of five previously recorded cultural resources were identified within a 1-mile radius of the Project Area, yet none of these are documented within the Project Area. A review of historical aerial photographs and topographic maps indicate that prior to the 1990s, the Project Area was used for agricultural purposes. By the late 1990s, the surrounding area saw increased commercial and residential development that has continued up to the present day.

The SLF did not identify any previously known tribal cultural resources or sacred lands within the vicinity of the Project Area. The NAHC provided MCC with contact information for 21 tribes/individuals to reach out to for additional information on February 18, 2020. MCC sent letters on February 18, 2020 to all 21 Native American contacts, requesting any information related to cultural resources or heritage sites within or adjacent to the Project Area. Additional attempts at contact by letter, email, or phone call were made on March 4, 2020 and March 18, 2020. As a result of this outreach effort, MCC received seven responses from Native American Tribes or individuals. Several tribes responded with concerns about presence of nearby resources and presented requests for formal consultation with the Lead Agency. These results are summarized in the Native American Outreach and Background Research section of this report and all correspondence is found in Appendix C. MCC did not conduct formal consultation with any of the Native American representatives, and recommends that appropriate consultation take place as soon as possible between Riverside County, as lead agency, and all interested parties.

The pedestrian survey of the Project Area was conducted on March 6, 2020 by MCC Archaeologist Zachary White. During the course of fieldwork, survey conditions were fair and ground visibility was poor to good (10-80%) throughout the 10.8-acre Project Area, due to prior ground disturbance and vegetation coverage. The property has been disturbed due to vehicular activity and modern dumping activity. No cultural resources were identified during the investigation.

Based on the above findings, the probability of encountering significant cultural resources within the Project Area is considered low. MCC recommends no further mitigation measures prior to implementation of the Project. While we do not recommend additional mitigation, we do recommend including a condition of approval which addresses

inadvertent discoveries of cultural materials and/or human remains, should these be encountered during any phase of Project implementation.

A copy of this report will be permanently filed with the EIC at University of California, Riverside. All notes, photographs, correspondence and other materials related to this Project are located at MCC, Inc., located in Pomona, California.

INTRODUCTION

Passco Pacifica LLC (Proponent) proposes the construction Iris Park, a proposed 81-lot single-family detached subdivision located on the south side of Iris Avenue, about 500 feet east of Perris Boulevard (Project), located in the City of Moreno Valley in Riverside County, California. Material Culture Consulting, Inc. (MCC) was retained by E|P|D Solutions, Inc. to conduct a Phase I cultural resource investigation of the Project Area. This assessment was conducted pursuant to all applicable State of California regulations regarding cultural resources, as well as guidelines established by the City of Moreno Valley. According to these regulations and guidelines, if development of a Project has the potential to result in significant impacts to cultural resources, a plan must be developed to mitigate those impacts to a level which is less than a significant. This assessment documents the potential for encountering cultural resources during development of this Project and provides recommendations on how to mitigate impacts to those resources.

PROJECT LOCATION AND DESCRIPTION

The Project is located in the City of Moreno Valley, Riverside County, California (Figure 1). Iris Park is a proposed 81-lot single-family detached subdivision located on the south side of Iris Avenue, about 500 feet east of Perris Boulevard, on APN 312-020-025 (Figures 2 and 3). The project site is triangular in shape and has a gross acreage of approximately 10.82 acres, including 3.02 acres that is planned for development by the City of Moreno Valley as a public park and trail over the California Aqueduct. The community will have two gated access points off Iris Avenue. Three small park areas are spread out on the site. Residential lots would range from 2,197 sq. ft. to 4,741 sq. ft. Homes would range from 1,848 sq. ft. to 2,201 sq. ft., with 3 to 5 bedrooms and 2.5 to 3 baths. Homes would be two stories, include a back yard approximately 12 to 14 feet deep, and have an attached two-car garage. Three architectural styles are proposed: Spanish, French, and Farmhouse. The project overall would provide 217 parking spaces, including 162 garage spaces and 49 spaces on private streets. Specifically, the proposed Project is located in Section 29, within Township 3 South, Range 3 West on the U.S. Geological Survey (USGS) Sunnymead 7.5' topographic quadrangle (San Bernardino Baseline and Meridian) (Figure 2).

PROJECT PERSONNEL

Tria Belcourt, M.A., RPA, served as the Principal Investigator for the study and supervised all work. Ms. Belcourt coordinated and oversaw the records searches, communicated with NAHC and Native American individuals, and provided quality control for this report. Ms. Belcourt is a Registered Professional Archaeologist (RPA) and Qualified Riverside County Archaeologist, with a M.A. in Anthropology from the University of Florida, a B.A. in Anthropology from the University of California at Los Angeles and over 16 years of experience in California archaeology (See Appendix A).

Sonia Sifuentes, M.Sc, RPA, provided co-authorship of this report. Julia Carvajal, M.A., managed the field survey and all GIS support for the project and report. Yahaira Gonzalez, B.A., conducted the records search and co-authored this report, and Zachary White, B.A., performed the pedestrian survey.

ENVIRONMENTAL SETTING

The Project Area is located within the city limits of Moreno Valley in northwestern Riverside County. Riverside County is situated within the Peninsular Ranges Geologic Province, a northwest-southeast oriented complex of blocks separated by similarly trending faults (Norris and Webb 1978). Most geological formations found within this area are comprised the Southern California Batholith, a great mass of basement igneous rocks. The Project Area also lies within the Central Perris Block (Kenney 1999). The Perris Block is a structurally stable, internally cohesive mass of crustal rocks bounded on the east by the San Jacinto fault zone, bounded on the west by the Elsinore and Chino fault zones, and on the north by the Cucamonga fault zone (Norris and Webb, 1976; Morton and Matti, 1989), and on the south by a series of sedimentary basins (Morton and Matti 1989). This structural block is believed to have been active since Pliocene time (Woodford et al 1971).

Vegetation observed within the Project Area include invasive grasses and weeds and brittle bush observed along the southern portion. Non-native landscaping is present within the surround region, with a residential and commercial development located to the South-southwest and Northwest of the Project Area. The climate in the region is characterized as Mediterranean, with hot, dry summers and temperate, wet winters. The Project Area is located within a relatively flat valley, with elevations averaging approximately 456 m (1496 ft.) above mean sea level (AMSL). Vegetation in much of the area has been altered by historical and modern development, with introduced species of flora, including annual grasses, weeds, and sunflowers observed. Perris Reservoir and Russell Mountains are located approximately 2.59 miles southeast of the Project Area. Moreno Valley area enjoys a mild Mediterranean climate characterized by warm, dry summers and cool, moist winters.

PREHISTORIC CONTEXT

The earliest evidence of human presence of North America radiocarbon dates as early as 15,000 years before present (BP) (Waters et al. 2011). Most of the cultural material to this period derives from a site in present-day Salado, Texas. Known as the Buttermilk Creek Complex, this assemblage of over 15,000 artifacts underlaid a Clovis assemblage and provides evidence of occupation prior to the Clovis horizon (Waters et al. 2011). No projectile points have been recovered from the Buttermilk Creek Complex and Clovis Complex is still the earliest known emergence of this technology. In California, the oldest radiocarbon date is derived from a from a site located in Siskiyou County (Tule Lake Rockshelter/CA-SIS- 218A), which dates as early as 13,000 years BP (Jones and Klar 2007; Erlandson et al. 2014).

The chronological prehistory of inland southern California remains more elusive than the much-researched desert and coastal regions. Most researchers generally agree that the earliest occupation for the Riverside County area dates to the late Pleistocene/early Holocene (11,000 to 8,000 years ago). The regional prehistoric chronology discussed here includes San Dieguito Complex, Encinitas Tradition, Milling Stone Horizon, La Jolla Complex, Pauma Complex, and San Luis Rey Complex, as they relate to the archaeological assemblages of the region. Other chronological classification utilized for southern California include King's Early Period, which does includes regional subtraditions of the La Jolla and Pauma Complexes, along with the Early Santa Barbara region subtradition (Oak Grove culture), and the Late Santa Barbara region subtradition (Hunting and Campbell traditions) (King 2001).

The earliest sites known in the area are attributed to the San Dieguito culture, which consisted of a hunting culture with flaked stone tool industry (Warren 1967). Also known as the Paleo Indian Period, the environment during this period was cool and moist, which allowed for glaciation in the mountains and the formation of deep, pluvial lakes in the deserts and basin lands (Moratto 1984). The material culture related to this time included scrapers, hammer stones, large flaked cores, drills, and choppers, which were used to process food and raw materials. During the archaeological investigations at the Eastside Reservoir, an early date of 7,380 +/- 300 before present from site CA-

RIV-5786 implies that people lived in the area at this time. Two other archaeological sites that date to this period are also within the vicinity of nearby Menifee: CA-RIV-2798/H, near the shoreline of Lake Elsinore; and CA-RIV-6069, located in San Jacinto Valley near Mystic Lake. These early sites revealed deep, intact deposits with a number of stone tools and features, which are more likely to be found along ancient lake terraces.

Around 8,000 years ago, subsistence patterns changed, resulting in a material complex consisting of an abundance of milling stones (for grinding food items) and a decrease in the number of chipped stone tools. The material culture from this time period includes large, bifacially worked dart points and grinding stones, handstones, and metates. Archaeologists initially designated this period as the Millingstone Horizon (Wallace 1955), which was later redefined as a cultural tradition named the Encinitas Tradition (Warren 1967). The Encinitas Tradition has various regional expressions including Topanga and La Jolla (Moriarty 1966). Naming conventions for this time period by archaeologists varied as some adopted a generalized Encinitas Tradition without regional variations, while others continued to use Millingstone Horizon, and still others used Middle Holocene (the geologic time period) to indicate this observed pattern (Sutton and Gardner 2010:1-2). Recently, this generalized terminology was criticized by Sutton and Gardner (2010) as suppressing the identification of cultural, spatial, and temporal variation, as well as the movement of peoples throughout space and time. It is these factors that are believed to be critical to an understanding of prehistoric cultural adaptation and change in this portion of southern California (Sutton and Gardner 2010:1-2).

The Encinitas Tradition characteristics include abundant metates and manos; crudely made core and flake tools; bone tools; shell ornaments; and very few projectile points, indicating a subsistence pattern focused on hunting and gathering a variety of floral resources. Faunal remains vary by location but include marine mammals, fish, and shellfish; as well as terrestrial animals, reptiles, and birds (Sutton and Gardner 2010:7). The Encinitas Tradition has been redefined to have four patterns (Sutton and Gardner 2010: 8-25). These include the Topanga Pattern in coastal Los Angeles and Orange counties; the La Jolla Pattern in coastal San Diego County; and the Sayles or Pauma Complex in inland San Diego County extending into western Riverside County, where the project is located. At approximately 3,500 years ago, Pauma Complex in the general Project vicinity adopted new cultural traits which transformed the archaeological site characteristics - including mortar and pestle technology, greater tool variety (including atlatl dart points and crescentics), and evidence of a more sedentary lifestyle (Warren et al. 1961; Meighan 1954).

At approximately 1,500 years before present, bow and arrow technology started to emerge in the archaeological record, which indicated changes in settlement patterns and subsistence systems. The local population incorporated new materials while retaining their day to day subsistence methods of the past, as evidenced by the archaeological record. The Palomar Tradition is attributed to this time, and is comprised of two larger patterns: the Peninsular Pattern in the inland areas of the northern Peninsular Ranges (e.g., San Jacinto and Santa Rosa mountains) and the northern Coachella Valley (Sutton 2010); and the San Luis Rey pattern of the Project Area. Archaeological sites from this time period are characterized by soapstone bowls, arrowhead projectile points, pottery vessels, rock paintings, and evidence of cremation sites. This shift in material culture assemblages is largely attributed to the emergence of Shoshonean (Takic-speaking) people who entered California from the east.

Recent investigations at the Eastside Reservoir project (Applied Earthworks 2001) refined the chronology for the past 1500 years into four stages: Saratoga Springs (1500-750 BP), Late Prehistoric (750-410 BP), Protohistoric (410-180 BP), and Historic (post-180 BP). The indications from this research show a large number of semi-residential sites during the Medieval Climatic Anomaly at the end of the Saratoga Springs period and ending by the Late Prehistoric (Applied Earthworks 2001). The increased use of the area suggests that the area may have had a more favorable environment than in surrounding regions.

ETHNOGRAPHIC CONTEXT

The Project Area has historically been situated between two Native American territories, the Luiseño people and the Cahuilla people, and is located south of the southern boundaries of Serrano traditional use area (Figure 4). The "Takic Expansion", which discusses the concept of migration phases of Takic/proto-Takic speaking peoples from the Great Basin into the desert and coastal Southern California regions, is believed to have occurred approximately 1000 to 600 years B.P (Koerper 1979; Moratto 1984; Laylander 2010). It is believed that both the Cahuilla and Luiseño ethnographic groups derived from this migration.

Cahuilla

The Cahuilla territory was bounded by the San Bernardino Mountains to the north, the Orocopia Mountains to the east, the Santa Ana River/the San Jacinto Plain and the eastern portion of Palomar Mountains to the west, and Borrego Springs and the Chocolate Mountains to the south (Bean 1978). The Project Area falls within the western region of the tribe's traditional territory, denoted by the San Gorgonio Pass. The Cahuilla existed within the most geographically diverse region, having exploited more than 500 native and non-native plants (Bean and Saubel 1972). The Cahuilla spoke a language that belongs to the Cupan group of the Takic subfamily of the Uto-Aztecan language family, a language family that includes the Shoshonean groups of the Great Basin (Bean and Shipek 1978).

The prehistoric Cahuilla occupation is characterized by structures within permanent villages that ranged from small brush shelters to dome-shaped or rectangular dwellings. Villages were situated near water sources, in the canyons near springs, or on alluvial fans at man-made walk-in wells (Bean 1972). There appears to be slight difference in subsistence tools between the Desert, Pass, or Mountain Cahuilla groups. The Desert Cahuilla used deep, wooden mortars with a long pestle whereas San Gorgonio Pass Cahuilla utilized shallower mortars with basketry rims (Kroeber 1908: 40, 43). Cahuilla granaries were usually raised on pole platforms two to four feet high, which resembled birds' nests, and were used to store mesquite (Kroeber 1908: 42).

In comparison with other Southern California tribes, the Cahuilla appeared to have had a lower population density and a less rigid social structure. The Cahuilla are patrilineal, with closely related patrilineages that share an assumed common ancestor which is important socially and ceremonially (Hudlow 2007). The office of lineage leader, also known as a *nét*, directed subsistence activities, settled conflicts, represented the clan regionally and was responsible for correct performances of ceremonies, with the official role of the chief passed from father to eldest son (Bean 1978; Hudlow 2007).

Initial contact with European explorers with the Cahuilla most likely occurred during the expedition of Juan Bautista de Anza in 1777 (Napton and Greathouse 1982). The presence of the San Gabriel Mission in the early 1800s led to more contact via baptisms (Napton and Greathouse 1982). It also led to the Native Americans moving away from traditional habitation sites to separate themselves from the influence of the Mission (Brumgardt 1977). The Cahuilla traditions may have been relatively stable until mission secularization in 1834, due to the policy of the Catholic Mission fathers, or padres, to maintain imported European traditional style settlement and economic patterns (Bean and Shipek 1978). After 1877, when the United States government established Indian reservations in the region and religious missionaries began conversion of the Native American populations in the region, traditional cultural practices were prohibited. Presently, the Cahuilla reside in nine separate reservations in Southern California, located in Imperial, Riverside and San Diego counties (Bean 1978).

Luiseño

The Spanish name Luiseño was used to identify Native Americans who were associated with the Mission San Luis Rey, since the Luiseño most likely had no known native term for their own nationality (Bean and Shipek 1978).

Extensive research has been accumulated that gives detailed accounts of the Luiseño (DuBois 1908, Sparkman 1908, Kroeber 1976, White 1963, and Bean and Shipek 1978). At the time of these ethnographies, the Luiseño maintained a sophisticated political organization structure, and their lands extended from western San Jacinto to the Pacific Ocean along several major waterways, including Temecula, Santa Margarita, and San Luis Rey Rivers (Bean and Shipek 1978). Neighboring tribes included the Cahuilla to the east, the Serrano to the north, and the Gabrielino to the west. Each of these groups are of the same Uto-Aztecan linguistic subfamily of Takic-speakers. The boundaries for territories fluctuate as new information evolves in ethnographic and ethnohistoric research, so there is a likelihood that there was quite a bit of overlap and intermarriage between groups over time.

The Luiseño organized themselves according to family groups or lineages, rather than forming exogamous moieties. Each lineage occupied land that they held in common, and they lived socially and politically separately from others (Bean and Shipek 1978). They typically resided in villages near reliable water sources and maintained special purpose camps close to the main villages. In the springtime, families would replenish food supplies by gathering local fruit, seeds, bulbs and roots. In the fall, families would move into the upland areas to gather acorns, prickly pear, toyon berries, and yucca. The Luiseño territory contained several species of oak that produced edible acorns. Acorns were stored and processed as needed by breaking the shell, grinding the meat into a powder, and leaching the tannic acid from the nut by using water. A porridge was made from the leached nuts and cooked with water using hot stones in baskets. The Luiseño used a wide variety of tools, including manos and metates, bone and shellfish hooks, stone and shell ornaments, bone awls, wooden throwing sticks, hammer stones, handstones, pestles, mortars, and drills, which are evident in late Prehistoric archaeological sites. Presently, there are six federally recognized Luiseño tribes with associated reservations within Southern California.

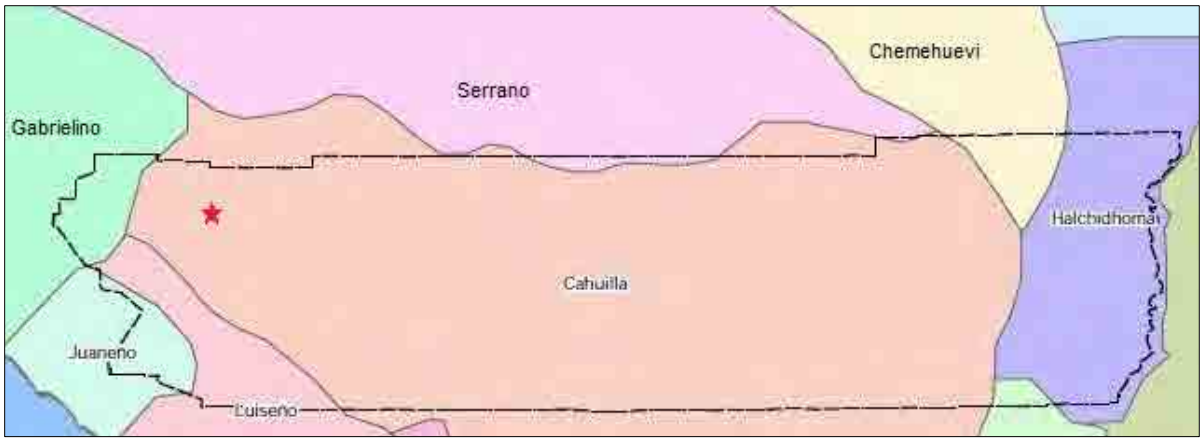

Figure 4. Traditional Tribal Areas in Riverside County and Project Area (derived from County of Riverside 2015)

Serrano

The Serrano has been defined as a Northern Uto-Aztecan language sub-family which resided in the mountains and deserts of interior southern California, known as the Mountain Serrano and the Desert Serrano (Sutton and Earle 2017). The Serrano's traditional use area is believed to located from the Cajon Pass of the San Gabriel/San Bernardino Mountains, as far east as Twentynine Palms, as far south as to Yucaipa, and as far north as Barstow (Bean and Smith 1978). Gifford (1971) categorizes the Serrano as a clan and moiety-oriented, or local lineage-oriented, group tied to traditional territories or use areas. Typically, a "village" consisted of a collection of families centered about a ceremonial house, with individual families inhabiting willow-framed huts with tule thatching. Considered hunter-gatherers, the Serrano exhibited sophisticated technologies devoted to hunting small animals and gathering roots, tubers and seeds of various kinds. Principal game animals included were deer, mountain sheep, antelope, rabbits, small rodents, and various birds (Bean and Smith 1978). The Serrano spoke a language

that belongs to the Takic subfamily of the Uto-Aztecan language family, with some evidence of similarity with the Gabrielino (of the Los Angeles Basin) (Miller 1984).

European influence on the Serrano was limited until 1819, with the establishment of an asistencia near present-day Redlands (Bean and Smith 1978). By 1834, most of the western Serrano population had been displaced, with those located northeast of San Gorgonio Pass continued to thrive. Today, Serrano descendants are found mostly on the Morongo and San Manuel reservations, which are a modern-day culmination of Serrano, Cahuilla, and Cupeno lineages.

HISTORIC CONTEXT

In 1769, Spanish settlers began to enter and colonize Alta California, which caused the region to undergo an immense change. As early as 1827, Anglo-Americans were migrating into Southern California. In the decades to come, California would be taken by the United States with the end of the Mexican-American War and subsequent events such as the Civil War and California Gold Rush continued to shape the history of California.

Spanish Period (1769 to 1821) to Mexican Period (1821 to 1848)
The Spanish period began in 1769 with Captain Gaspar de Portolá's land expedition, and ended in 1821 with Mexican Independence. During the Spanish Period, the influence of San Luis Rey Mission (1798) was apparent throughout the surrounding regions, with much of the area used for cattle grazing. At its peak, the Mission controlled multiple ranches and claimed control over what is now western Riverside County and northern San Diego County, including the Project Area. Most land was managed as outlying ranches known as asistencias. The asistencias allowed the Luiseño of the area to reside in their villages and not move onto the mission itself. However, after control of the area shifted to Mexico, secularization began throughout the area and the missions and their associated ranches began to decline. The Mexican government proceeded to push settlements of Mexican populations from the south by deeding large grants to individuals who promised to employ settlers. Small villages were established on some ranchos, while small towns appeared in areas between ranchos. The Project Area, however, was not part of any Mexican land grant and the general area that is now Moreno Valley was largely uninhabited during these periods.

American Period (1848 to present)
The Gold Rush of 1849 saw a tremendous influx of Americans and Europeans flooding into Southern California. The passage of the Homestead Act of 1862 increased the influx of settlers within the region. Eventually, Riverside County was settled by homesteaders and farmers, and quickly became a diversified agricultural area with citrus, grain, grapes, poultry, and swine being the leading commodities. This influx of settlers led to population pressures and increased conflicts with the local indigenous groups. The passage of the Act for the Governance and Protection of Indians in 1850 further degraded the position of the Luiseño and Cahuilla. By 1877, The Cahuilla were moved to reservations in a checkerboard pattern throughout the Palm Springs and Coachella Valleys in Riverside County (Napton and Greathouse 1982) which broke up reservation land into discontinuous patchwork pieces, restricting access by the tribe to sacred lands and traditional gathering places. The Moreno Valley area remained unclaimed public land until 1870, when a large tract of over 13,400 acres were purchased from the U.S. government in a single transaction (Tang and Hogan 2013).

Development of the City or Moreno Valley began during the late 19th century. In 1883, Frank E. Brown ventured from Redlands into the Moreno Valley region and secured a large acreage that were platted into ten-acre tracts (Ellis 1912). This attracted settlers and farmers into the region and the Town of Moreno was established in Brown's honor in 1890 (Ellis 1912; P&D Consultants 2006). However, due to water conflicts and litigations that ultimate went in favor of the City of Redlands, a period of drought forced the failure of most farmers in the area and lead to

an exodus from the Town of Moreno to other closer locations like Riverside, dubbing the area and town "The Valley/Town on Wheels" (Ellis 1912; Ghori 2014; City of Moreno Valley 2020).

Figure 5. Frank Brown, far right, during pipeline placement, circa 1891 (Ghori 2014)

In 1918, the construction of a military training airfield in the area brought in new community growth. Located approximately 1.30 miles west of the Project Area, it was originally called the Alessandro Aviation Field, with its official name changed to March Air Field in honor of an Army pilot who had died during a training crash (Ghori 2014). First encompassing 640 acres of land, March Air Field grew to encompass more than 7,000 acres, with the base supporting 85,000 troops at its height of activity (City of Moreno Valley 2020). In 1996, March was realigned as an Air Reserves Base and is still currently active.

Figure 6. Postcard of March Air Field, unknown date (Ghori 2014)

From the late 1950s to the late 1980s, the Riverside International Raceway operated within Moreno Valley. Established by Rudy Cleye, it was considered a dangerous track and circuit changes occurred in 1969 (Racing Circuits 2018). It hosted many prominent races, including NASCAR championships (Ghori 2014). By 1989, the land the track was on was sold to create housing and a shopping mall, located 4.5 miles northwest of the Project Area

(Racing Circuits 2018). By 1984, the communities of Edgemont, Sunnymead, and Moreno voted to incorporate after prior failed efforts, and the City of Moreno Valley was established (City of Moreno 2020).

RESEARCH DESIGN

The objectives of an archaeological assessment are to locate, interpret, and evaluate the effects and significance of past human activities within the study area. The indicators of such activities are represented by cultural resources, which can consist of many different types of materials, organizational, distributional, and structural evidence that includes stone tools, historic neighborhoods, historic-era can scatters, village sites, food waste, tool manufacturing waste, trails, stone alignments, petroglyphs, hearths, or human skeletal remains. All of these types of resources are known to exist within the general Project region. The scope of this study is to identify and evaluate the significance of cultural resources within the Project Area and determine protective measures that would minimize negative impacts to these resources if avoidance is not possible.

LEGAL COMPLIANCE BASIS

This project is subject to both state and local regulations, including CEQA and the Riverside County General Use Plan. CEQA declares that it is state policy to "take all action necessary to provide the people of this state with...historic environmental qualities." It further states that public or private projects financed or approved by the state are subject to environmental review by the state. All such projects, unless entitled to an exemption, may proceed only after this requirement has been satisfied. CEQA requires detailed studies that analyze the environmental effects of a proposed project. In the event that a project is determined to have a potential significant environmental effect, the act requires that alternative plans and mitigation measures be considered. CEQA includes historic and archaeological resources as integral features of the environment. The level of consideration may vary with the importance of the resource.

The Moreno Valley General Plan's Objective 7.6 is to "identify and preserve Moreno Valley's unique historical and archaeological resources for future generations" (City of Moreno Valley 2006). Five policies aim to promote this objective, including Policy 7.6.2, "implement appropriate mitigation measures to conserve cultural resources that are uncovered during excavation and construction activities" (City of Moreno Valley 2006).

RESEARCH THEMES WITHIN THE PROJECT AREA

Riverside County and the Perris Valley have a rich prehistoric and historic cultural heritage. Prehistoric sites are known to occur along intermittent drainages, as well as in the hills west of the Project Area and are often associated with boulder outcrops. Food processing sites, consisting of bedrock grinding and milling features, and ground stone artifacts (whole and fragmentary) are found within this region. The closest known sites such as these are located along the foothills and canyons to the west, indicating that certain areas may have been used more frequently or for extended periods. Prehistoric rock art sites are known to exist in the general region; however, no such sites have been identified in the records search of the Project Area.

Future archaeological research within the general Project Area has the potential to address research questions regarding settlement patterns, site structure, subsistence strategies, trade and distribution networks and tool technologies. Questions for the Project have been selected to contribute to the context and understanding of the prehistory and history of California. Based on the literature review, research questions fall into several prehistoric and historic domains. The prehistoric research domains are Chronology and Cultural Affiliation, Subsistence and Site Function, and Toolstone Procurement and Use. Historic research topics focus primarily on the domain of Community Development. Defining research questions also helps focus the documentation of resources during survey so that artifacts, features and other remains that can contribute to an understanding of regional history and prehistory are carefully noted.

CHRONOLOGY AND CULTURAL AFFILIATION

At prehistoric sites throughout Riverside County, chronometric data generally derive from time-sensitive artifacts (e.g., projectile points, beads, and ceramics) and artifacts/organic materials that can provide absolute dating (e.g., obsidian hydration, and calibrated radiocarbon dating). Time-sensitive and dateable artifacts can occur in surface and subsurface contexts, the former sometimes less reliable than the latter in terms of dating archaeological components. Dateable organic remains (e.g., bone, shell, fiber, loose charcoal) occur in multiple contexts within an archaeological site, which include but is not limited to food processing, shell bead manufacturing, and burials.

Chronological measurements using absolute or relative (e.g., stratigraphy and seriation) methods can be used to compare and contrast temporal adaptive patterns in human behavior. For the most part, sites that can be dated have greater information potential than undated sites as they can be placed in time and help refine our understanding of long-and short-term changes in prehistoric human adaptation.

Given the importance of chronological data to all archaeological interpretation, it will be critical to document the presence of any time-sensitive artifacts within the Project Area. Sites that can contribute valuable chronological data may be recommended eligible for listing on CRHR under Criterion (4), research potential.

SUBSISTENCE-SETTLEMENT PATTERNS

Subsistence is one of the most basic of human needs that has a direct effect on human behavior. Prehistoric subsistence procurement activities consist of any number of variables including: site location in relation to land form, water supply, and raw materials; site size; site function; and duration of occupation. Material culture, such as lithic and ground stone tools, ceramics, and faunal and botanical remains, provide data representative of subsistence-related activities and strategies.

The Project Area is within a larger settlement area used by the Luiseño and Cahuilla, with the these cultures and the Serrano utilizing the region for trade. Information on the nature and intensity of prehistoric use of the Project Area, including the types of sites present, their density, and environmental context, will contribute to a more complete picture of settlement and subsistence patterns in this part of California. Combined with chronological information (above), this information can also assist in determining adaptive changes over time. Sites that can offer valuable data concerning prehistoric subsistence-settlement patterns may be recommended eligible for listing on CRHR under Criterion (4), research potential.

TOOL-STONE PROCUREMENT AND USE

Basic patterns in lithic materials use can be useful for reconstructing the approximate geographic extent of past settlement and trade systems. Sites that offer valuable information concerning patterns of raw material procurement and use and tool manufacture may be recommended eligible for listing on CRHR under Criterion (4), research potential, particularly if they are accompanied by chronological data that may be used to place stone-working behaviors in time.

HISTORIC RESEARCH DOMAINS

Historic archaeological sites can offer important data concerning any number of historic themes and may be recommended eligible for listing on CRHR under Criterion (4), research potential. They may also be eligible under Criterion (1) if they can be linked to certain historical events that are important to California's past, Criterion (2) if they are found associated with persons important in history, or under Criterion (3) if they contain structural features that are distinctive of a particular historic period or demonstrate an exceptional aesthetic quality. For the purposes of this project, we plan to focus historic period research on the theme of community development and built environments. The historic research domains will specifically address the historic-era built environment within the project vicinity, as it is felt that this topic is important to our understanding of the history in Western Riverside County.

SIGNIFICANCE EVALUATIONS

The criteria for listing resources on the California Register of Historic Resources (CRHR) were expressly developed to be in accordance with previously established criteria developed for listing on the National Register of Historic Places and require similar protection to that which the National Historic Preservation Act Section 106 mandates for historic properties. According to Public Resources Code (PRC) Section 5024.1(c) (1-4), a resource is considered historically significant if it meets at least one of the following criteria:

1) Associated with events that have made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States;
2) Associated with the lives of persons important to local, California or national history;
3) Embodies the distinctive characteristics of a type, period, region or method of construction or represents the work of a master or possesses high artistic values; or
4) Has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California or the nation.

In addition to having significance, resources must have integrity for the period of significance. The period of significance is the date or span of time within which significant events transpired, or significant individuals made their important contributions. Integrity is the authenticity of a historical resource's physical identity as evidenced by the survival of characteristics or historic fabric that existed during the resource's period of manufacture and use. Alterations to a resource or changes in its use over time may have historical, cultural, or architectural significance. Simply, resources must retain enough of their historic character or appearance to be recognizable as historical resources and to convey the reasons for their significance. A resource that has lost its historic character or appearance may still have sufficient integrity for the California Register, if, under Criterion 4, it maintains the potential to yield significant scientific or historical information or specific data. Note that California Historical Landmarks with numbers 770 or higher are automatically included in the CRHR.

Sites with the potential to yield artifacts and other data that can address research questions may be evaluated as eligible for CRHR listing per Criterion (4). Some prehistoric sites may be evaluated as CRHR-eligible under Criterion (1) if they relate to culturally significant events or (mythological) persons (Criterion 2), or represent high artistic forms (e.g., rock art), per Criterion (3).

Under CEQA, if an archaeological site is not a significant "historical resource" but meets the definition of a "unique archaeological resource" as defined in PRC Section 21083.2, then it should be treated in accordance with the provisions of that section. A unique archaeological resource is defined in PRC Section 21083.2(g) as follows:
An archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

1) Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information;
2) Has a special and particular quality such as being the oldest of its type or the best available example of its type; or
3) Is directly associated with a scientifically recognized important prehistoric or historic event or person.

Resources that neither meet any of these criteria for listing on the NRHP or CRHR nor qualify as a "unique archaeological resource" under CEQA PRC Section 21083.2 are viewed as not significant. Under CEQA, "A non-unique archaeological resource need be given no further consideration, other than the simple recording of its existence by the lead agency if it so elects" [PRC Section 21083.2(h)].

Under CEQA, impacts to historical resources that alter the characteristics that qualify the historical resource for listing on the CRHR are considered to be a significant effect. The impacts to a historical resource are considered significant if: The Project activities physically destroy or damage all or part of a resource; change the character of the use of the resource or physical feature within the setting of the resource which contribute to its significance; or introduce visual, atmospheric, or audible elements that diminish the integrity of significant features of the resource. If it can be demonstrated that a Project will cause damage to a unique archaeological resource, the lead agency may require reasonable efforts to be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. To the extent that they cannot be left undisturbed, mitigation measures are required (Section 21083.2 (a), (b), and (c)).

TRIBAL CULTURAL RESOURCES

Assembly Bill (AB) 52 (Gatto; Stats. 2014, ch. 532), enacted in September 2014, sets forth both procedural and substantive requirements for analysis of tribal cultural resources as defined in Public Resources Code (PRC) Section 21074, and consultation with California Native American tribes. Tribal cultural resources include sites, features, places, cultural landscapes, and sacred places or objects that have cultural value or significance to a tribe. A tribal cultural resource is one that is either: (1) listed on, or eligible for listing on the CRHR or local register of historical resources (see section below); or (2) a resource that the CEQA lead agency, at its discretion and supported by substantial evidence, determines is significant pursuant to the criteria in PRC Section 5024.1, subdivision (c) (see PRC Section 21074). Further, because tribes traditionally and culturally affiliated with a geographic area may have specific expertise concerning their tribal cultural resources, AB 52 sets forth requirements for notification and invitation to government to government consultation between the CEQA lead agency and geographically affiliated tribes (PRC Section 21080.3.1[a]). Under AB 52, lead agencies must avoid damaging effects to tribal cultural resources, when feasible, regardless of whether consultation occurred or is required.

Tribal cultural resources per PRC 21074 (a)(1)(A)–(B) are defined as either of the following:

1) Sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are either of the following:

    a) Included or determined to be eligible for inclusion in the California Register of Historical Resources.

    b) Included in a local register of historical resources as defined in subdivision (k) of Section 5020.1.

2) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1. In applying the criteria set forth in subdivision (c) of Section 5024.1 for the purposes of this paragraph, the lead agency shall consider the significance of the resource to a California Native American tribe.

    a) A cultural landscape that meets the criteria of subdivision (a) is a tribal cultural resource to the extent that the landscape is geographically defined in terms of the size and scope of the landscape.

    b) A historical resource described in Section 21084.1, a unique archaeological resource as defined in subdivision (g) of Section 21083.2, or a “nonunique archaeological resource” as defined in subdivision (h) of Section 21083.2 may also be a tribal cultural resource if it conforms with the criteria of subdivision (a).

METHODS

CALIFORNIA HISTORIC RESOURCES INVENTORY SYSTEM AND CULTURAL BACKGROUND RESEARCH

On February 25, 2020, Yahaira Gonzalez, B.A., MCC Archaeologist, conducted a search of the California Historical Resource Information System (CHRIS) at the Eastern Information Center (EIC), located at the University of California, Riverside, Riverside County. The search identified any previously recorded cultural resources and investigations within a 1-mile radius of the Project Area. The CHRIS search also included a review of the National Register of Historic Places (NRHP), the California Register of Historical Resources (CRHR), the California Points of Historical Interest list, the California Historical Landmarks list, the Archaeological Determinations of Eligibility list, and the California State Inventory of Historic Resources. Additional background research included historical aerial photos and a search of the Bureau of Land Management General Land Office Records.

NATIVE AMERICAN OUTREACH AND BACKGROUND RESEARCH

MCC requested a search of the Sacred Lands File from the Native American Heritage Commission (NAHC) on February 4, 2020. The Commission responded on February 18, 2020, stating that there are no known sacred lands within a 1-mile radius of the Project Area. The NAHC provided contact information for 21 Native American tribes or individuals who could potentially provide additional information regarding the general Project vicinity. MCC subsequently sent letters on February 18, 2020 to the 21 Native American contacts, requesting any information related to cultural resources or heritage sites within or adjacent to the Project Area. Additional attempts at contact by letter, email, or phone call were made on March 4, 2020 and March 18, 2020. MCC did not conduct formal consultation with Native American representatives.

FIELD SURVEY

The survey stage is a necessary component of a project's environmental assessment phase to verify the exact location of each identified cultural resource, the condition or integrity of the resource, and the proximity of the resource to areas of cultural resources sensitivity. Zachary White, B.A., MCC Archaeologist, conducted the survey of the proposed Project Area on March 6, 2020. The survey consisted of walking parallel transects spaced at approximately 6-meter intervals over the Project parcel, while closely inspecting the ground surface. Transects were oriented East to West due to the triangular shape of the Project Area. All undeveloped ground surface areas within the ground disturbance portion of the Project Area were examined for artifacts (e.g., flaked stone tools, tool-making debris, stone milling tools or fire-affected rock), soil discoloration that might indicate the presence of a anthrosol, soil depressions and features indicative of the former presence of structures or buildings (e.g., postholes, foundations), or historic-era debris (e.g., metal, glass, ceramics). Existing ground disturbances (e.g. cutbanks, ditches, animal burrows, etc.) were visually inspected. Representative photographs were taken of the entire Project Area and are located in the Results section.

RESULTS

CALIFORNIA HISTORIC RESOURCES INVENTORY SYSTEM AND CULTURAL BACKGROUND RESEARCH

The cultural resources search identified 26 prior cultural resources investigations within a 1-mile radius of the Project Area. One of these studies intersects the Project Area (see Table 1).

Table 1. Previously Conducted Investigations within 1-mile Buffer of Project Area

CHRIS Report Number	Authors	Year	Title of Study	Affiliation	Distance from Project Area

Within ¼ mile

A total of five previously recorded cultural resources were identified within a 1-mile radius of the Project Area, with none of these recorded within the Project Area. No previously recorded cultural resources have been

documented in the Project Area. Resources identified in the records search include one prehistoric resource and four historic resources (See Table 2). The closest mapped archaeological resource (P-33-023936/CA-RIV-011757) is located less than ½ mile northwest of the Project Area. P-33-023936/CA-RIV-011757 is a historic ranch/farm, known as the Barron/Lantz Holdings.

Table 2. Previously Recorded Resources within 1-mile Buffer of Project Area

Primary Number	Trinomial	Age	Attributes	NRHP/CRHR	Distance from Project Area
P-33-007920		Historic	HP02: Single family property	N/A	Within 1-mile
P-33-015301		Prehistoric	AP16: Other (Isolate)	N/A	Within 1-mile
P-33-023936	CA-RIV-011757	Historic	HP33: Ranch/farm	N/A	Within ½ mile
P-33-028072	CA-RIV-012673	Historic	AH04: Privies/dumps/trash scatters	N/A	Within 1-mile
P-33-028073	CA-RIV-012674	Historic	AH04: Privies/dumps/trash scatters	N/A	Within 1-mile

The complete results of the CHRIS resources records searches are included as Confidential Appendix B of this report.

Several additional sources were consulted for this project as well (Table 3). Additional sources did not identify significant potential for historic-era or prehistoric cultural resources.

Table 3. Additional Sources Consulted for the Project

Source	Results
National Register of Historic Places (1979-2002 & supplements)	Negative
Historical United States Geological Survey topographic maps (USGS 2012)	Some agricultural disturbance noted until 1990s, with increase development in the surrounding area since the 1990s
Historical United States Department of Agriculture aerial photos	Some agricultural disturbance noted until 1990s, with increase development in the surrounding area since the 1990s
California Register of Historical Resources (1992-2010)	Negative
California Inventory of Historic Resources (1976-2010)	Negative
California Historical Landmarks (1995 & supplements to 2010)	Negative
California Points of Historical Interest (1992 to 2010)	Negative
Local Historical Register Listings	Negative
Bureau of Land Management General Land Office Records	Negative

A review of historical aerial photographs and topographic maps indicate that prior to 1990s, the Project Area was agricultural (Figures 7 and 8). By the late 1990s, the surrounding area saw increased commercial and residential development that has continued up to the present day (Figure 9).

Figure 7. Project Area with agricultural activity (as depicted on 1966 aerial)

Figure 8. Project Area with some disturbance and increased surrounding development (as depicted on 2002 aerial)

Figure 9. Project Area with additional development to the south-southeast (as depicted on 2012 aerial)

NATIVE AMERICAN OUTREACH AND BACKGROUND RESEARCH

As a result of the effort to contact the 21 Native American Tribes or individuals identified by the NAHC, MCC received seven responses. These responses came in the form of letters, emails, and phone calls. Below is a summary of the responses provided by Native American Tribes.

On March 9, 2020, MCC received an email from Arysa Gonzalez Romero, Historic Preservation Technician for the Agua Caliente Band of Cahuilla Indians (ACBCI), who notified MCC that the Project is located within the tribe's Traditional Use Area. ACBCI THPO requested copies of any cultural resource documentation generated in connection with the report; copy of the record search; and description of proposed Project.

On February 26, 2020, MCC received an email from Travis Armstrong, Tribal Historic Preservation Officer for Morongo Band of Mission Indians (Morongo). Mr. Armstrong stated that Morongo had no additional comments to provide to MCC at this time but may provide other information to the lead agency during the AB-52 consultation process.

On March 17, 2020, MCC received an email from Molly Earp-Escobar, Cultural Planning Specialist for the Pechanga Band of Luiseno Indians, stating that the Project Area is not within reservation lands although it is within their ancestral territory. The tribe requested to be involved in the project.

On March 3, 2020, MCC received an email from Alexandra McCleary, Tribal Archaeologist for the San Manuel Band of Mission Indians, who stated that the Project is located outside of Serrano ancestral territory and tribe will not be requesting consulting party status

On March 18, 2020, MCC received an email from Jessica Valdez, Cultural Resource Specialist for the Soboba Band of Luiseno Indians, who notified MCC that the Project Area is considered sensitive by the people of Soboba, as

there are existing sites in the surrounding areas. An in-house database search identified multiple areas of potential impact. Specifics will be discussed in direct consultation with the lead agency

MCC contacted Mercedes Estrada from the Santa Rosa Band of Cahuilla Indians via phone call on March 18, 2020. Marina Hendon received the phone call and stated Ms. Estrada is no longer employed by the tribe. Additionally, Ms. Hendon stated that the tribe had no response regarding this project.

MCC contacted Michael Mirelez, Cultural Resource Coordinator for Torres-Martinez Desert Cahuilla Indians via phone call on March 18, 2020. During the phone call, Mr. Mirelez deferred to Soboba for any comments related to the proposed Project.

As of March 27, 2020, MCC has not received any additional responses from the remaining NAHC-listed groups or individuals we contacted for information. Should MCC receive additional responses once the final report is submitted, the information will be passed on to the Proponent to be added to the report as an addendum. The NAHC and Native American correspondence materials, including our communication attempts, are provided as Appendix C.

FIELD SURVEY RESULTS

During the course of fieldwork, survey conditions were fair (See Figures 10 through 13). Ground visibility in the entire Project Area was fair, ranging from less than 10 to 80% due to prior ground disturbance and overgrown vegetation within the Project Area. Disturbances within the Project Area include vehicular activity and modern dumping of concrete and bricks remnants. Soil observed during fieldwork was noted as light brown, fine-grain sandy loam consistent with alluvial fan deposits mapped in the area. No cultural resources were identified during the survey.

CONCLUSIONS AND RECOMMENDATIONS

The Phase I cultural resource assessment of the Project Area included a CHRIS records search, NAHC outreach, background research, and a field pedestrian survey. The record search indicated five previously recorded resources located within a 1-mile radius of the area, with no resources located directly within the Project Area. Based on the results of the cultural resources search and survey, the proposed Project Area is considered to have a low sensitivity for presence of significant prehistoric or historical archaeological deposits or features. MCC recommends ***No Mitigation is Needed***. While we do not recommend additional mitigation, MCC does recommend setting a plan in place to expediently address inadvertent discoveries and human remains (as described below), should these be encountered during construction activities. MCC also notes at least two Native American tribes, Soboba and Morongo, request to proceed with AB-52 consultation proceedings with the Project Proponent and the Lead Agency. MCC recommends that the consultation process be initiated as soon as possible, to avoid unnecessary delays to Project development and implementation.

INADVERTENT DISCOVERIES

Despite actions taken to ensure that all cultural resources are located prior to construction, including record searches and field surveying, there is a possibility that undiscovered, buried archaeological resources might be encountered during construction. In the event that these resources are inadvertently discovered during ground-disturbing activities, work must be halted within 50 feet of the find until it can be evaluated by a qualified archaeologist. Construction activities could continue in other areas. If the discovery proves to be significant, additional work, such as data recovery excavation or fossil recovery, may be warranted and would be discussed in consultation with the appropriate regulatory agency(ies).

HUMAN REMAINS

Procedures of conduct following the discovery of human remains on non-federal lands have been mandated by California Health and Safety Code §7050.5, PRC §5097.98 and the California Code of Regulations (CCR) §15064.5(e). According to the provisions in CEQA, should human remains be encountered, all work in the immediate vicinity of the burial must cease and any necessary steps to ensure the integrity of the immediate area must be taken. The Riverside County Coroner shall be immediately notified and must then determine whether the remains are Native American. If the Coroner determines the remains are Native American, the Coroner has 24 hours to notify the NAHC, who will in turn, notify the person they identify as the Most-Likely-Descendent (MLD) of any human remains. Further actions will be determined, in part, by the desires of the MLD. The MLD has 48 hours to make recommendations regarding the disposition of the remains following notification from the NAHC of the discovery. If the MLD does not make recommendations within 48 hours, the owner shall, with appropriate dignity, reinter the remains in an area of the property secure from further disturbance. Alternatively, if the owner does not accept the MLD's recommendations, the owner or the descendent may request mediation by the NAHC.

CERTIFICATION: I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this report, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief.

MANAGEMENT SUMMARY

Passco Pacifica LLC (Proponent) proposes the construction of a residential development project (Project), located in the City of Moreno Valley in Riverside County, California. Material Culture Consulting, Inc. (MCC) was retained by the E|P|D solutions, Inc. to conduct a Phase I paleontological resource investigation of the Project Area in accordance with the California Environmental Quality Act (CEQA). This assessment included a fossil locality search, an examination of geologic maps and paleontological literature, and a pedestrian field survey.

No significant paleontological resources were identified within the Project Area during the fossil locality search or the field survey. The Riverside County Land Information System (RCLIS) GIS data reveals all of the Project Area lies within an area mapped as High B sensitivity. High B sensitivity indicates that excavation has the potential to impact paleontological resources in this area at a depth at or below 5 feet. Excavation during the course of the Project may reach paleontologically sensitive deposits, and, as a result, could impact paleontological resources. Therefore, MCC recommends the following procedures:

- A trained and qualified paleontological monitor shall perform full-time monitoring of any excavations on the Project that have the potential to impact paleontological resources in undisturbed High B sensitivity native sediments, at or below 5 feet in depth. The monitor will have the ability to redirect construction activities to ensure avoidance of adverse impacts to paleontological resources.
- The project paleontologist may re-evaluate the necessity for paleontological monitoring after examination of the affected sediments during excavation, with approval from County and Client representatives.
- Any potentially significant fossils observed shall be collected and recorded in conjunction with best management practices and Society of Vertebrate Paleontology (SVP) professional standards.
- Any fossils recovered during mitigation should be deposited in an accredited and permanent scientific institution for the benefit of current and future generations.
- A report documenting the results of the monitoring, including any salvage activities and the significance of any fossils, will be prepared and submitted to the appropriate County personnel.

LIST OF FIGURES

INTRODUCTION

Passco Pacifica LLC (Proponent) proposes the construction of a residential development project (Project), located in the City of Moreno Valley in Riverside County, California. Material Culture Consulting, Inc. (MCC) was retained by the E|P|D solutions, Inc. to conduct a Phase I paleontological investigation of the Project Area. This paleontological resource assessment was conducted in compliance with the California Environmental Quality Act (CEQA), Public Resources Code (13 PRC) 2100, (14 CAC) 15000, Appendix G, Section J, (PRC) 2100-21177, Appendix G, (PRC) 5097.5 and guidelines set forth by the County of Riverside. According to these regulations and guidelines, if development of a Project has the potential to result in significant impacts to paleontological resources, a plan must be developed to mitigate those impacts to a level which is less than a significant. This investigation included a fossil locality search, and a pedestrian field survey. The following report identifies the potential for encountering paleontological resources during development of this Project and provides recommendations on how to mitigate impacts to those resources.

PROJECT LOCATION AND DESCRIPTION

The Project is located in the City of Moreno Valley, Riverside County, California (Figure 1). The Project Area is bound by a commercial complex and Perris Boulevard to the west; a commercial complex, a vacant lot and Red Maple Lane to the south; residential properties to the east; and Iris Avenue to the north (Figures 2 and 3). Specifically, the proposed Project is located in Section 29, within Township 3 South, Range 3 West on the U.S. Geological Survey (USGS) Sunnymead 7.5' topographic quadrangle (San Bernardino Baseline and Meridian) (Figure 2). The 10.8-acre Project Area encompasses one parcel, APN 312-020-025. The Project Area is currently a vacant lot. The proposed Project would develop the area into 84 single-family detached home lots. Approximately seven acres will be utilized for the construction of the homes, with a 100-foot wide easement area designated on the west-southwestern boundary, encompassing approximately three acres. The development would include small outdoor recreational areas and stormwater management facilities. The area north of the easement will be landscaped and include a pedestrian trail.

PROJECT PERSONNEL

Jennifer Kelly, M.S., a Qualified Riverside County Paleontologist, served as the Principal Investigator for the study. Ms. Kelly conducted the paleontological resource literature and map reviews, oversaw the field study, and oversaw preparation of this report. Ms. Kelly has a M.Sc. in Geology from California State University, Long Beach. Ms. Kelly has over ten years of experience in environmental and paleontological compliance in California (See Appendix A).

Sonia Sifuentes, M.Sc., co-authored this report. Julia Carvajal, M.A., managed the field survey and all GIS support for the project and report. Zachary White, B.A., MCC archaeologist and cross-trained paleontologist, conducted the pedestrian survey. Yahaira Gonzales, B.A. co-authored this report.

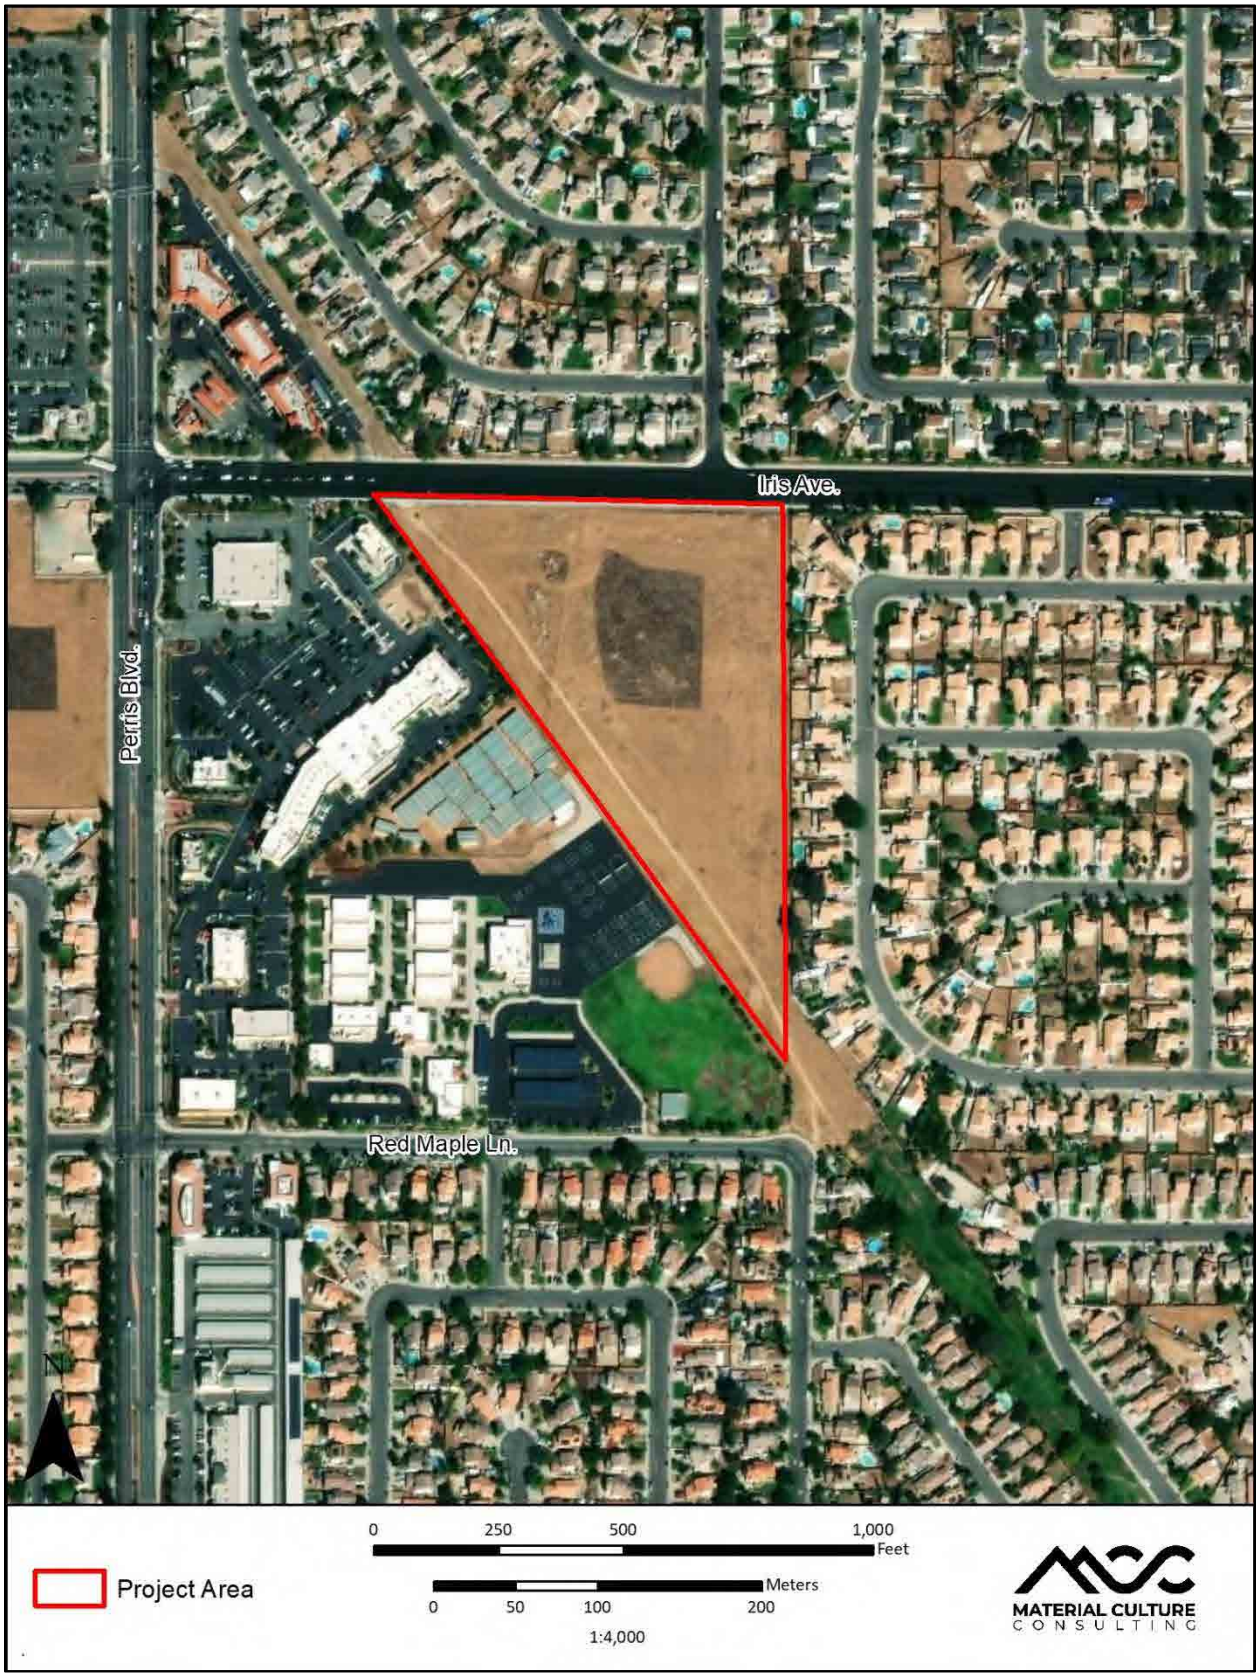

Figure 3. Iris Park Project Area (1:4,000, as depicted on aerial photograph)

ENVIRONMENTAL SETTING

Riverside County is situated within the Peninsular Ranges Geologic Province. The Project Area is located within the city limits of Moreno Valley in northwestern Riverside County. The Project is bounded by a commercial complex and Perris Boulevard to the west, a commercial complex, a vacant lot and Red Maple Lane to the south, residential properties to the east, and Iris Avenue to the north. The Project Area is located within a relatively flat valley, with elevations averaging approximately 456 m (1496 ft.) above mean sea level (AMSL). Vegetation in much of the area has been altered by historical and modern development, with introduced species of flora, including annual grasses, weeds, and sunflowers observed. Perris Reservoir and Russell Mountains are located approximately 2.59 miles southeast of the Project Area. Moreno Valley area enjoys a mild Mediterranean climate characterized by warm, dry summers and cool, moist winters.

GEOLOGICAL CONTEXT

Riverside County is situated within the Peninsular Ranges Geologic Province, a northwest-southeast oriented complex of blocks separated by similarly trending faults (Norris and Webb 1978). Most geological formations found within this area are comprised the Southern California Batholith, a great mass of igneous basement rocks. The Project Area also lies within the Central Perris Block (Kenney 1999). The Perris Block is a structurally stable, internally cohesive mass of crustal rocks bounded on the east by the San Jacinto fault zone, bounded on the west by the Elsinore and Chino fault zones, and on the north by the Cucamonga fault zone (Norris and Webb, 1976; Morton and Matti, 1989), and on the south by a series of sedimentary basins (Morton and Matti 1989). This structural block is believed to have been active since Pliocene time (Woodford et al 1971). The entire Project Area is mapped as Quaternary alluvium (Q) by Jennings, Strand, and Rogers (1977) (Figure 4). Morton and Matti (2001) mapped the Project Area lying mainly within very old alluvial fan deposits ($Qvof_a$) with in young alluvial arenaceous fan deposits (Qyf_a) directly west of the Project Area (Figure 5).

Young Quaternary alluvial fan deposits (arenaceous) (Qyf_a) are Holocene to late Pleistocene-aged alluvial fan deposit that is derived from geologically diverse sediment units. The sediments are mainly gray-hued, slightly consolidated sand (Morton and Matti 2001).

Very Old Alluvial fan deposits ($Qvof_a$) are early Pleistocene deposits consisting of mostly well-dissected, well-indurated, reddish-brown sand deposits with minor gravel (Morton and Matti 2001). These deposits are commonly flanking bedrock areas and can contain duripans and locally silcretes (Morton and Matti 2001). Quaternary very old alluvial fan deposits have the potential to produce scientifically important fossils of land mammals, invertebrates, and plants in this area, and have been assigned a high sensitivity ranking within the County of Riverside. Notably, the excavations for the Diamond Valley Lake in Hemet produced exceptional specimens of Pleistocene animals including mammoths, horses, camels, and bison in units similar to these.

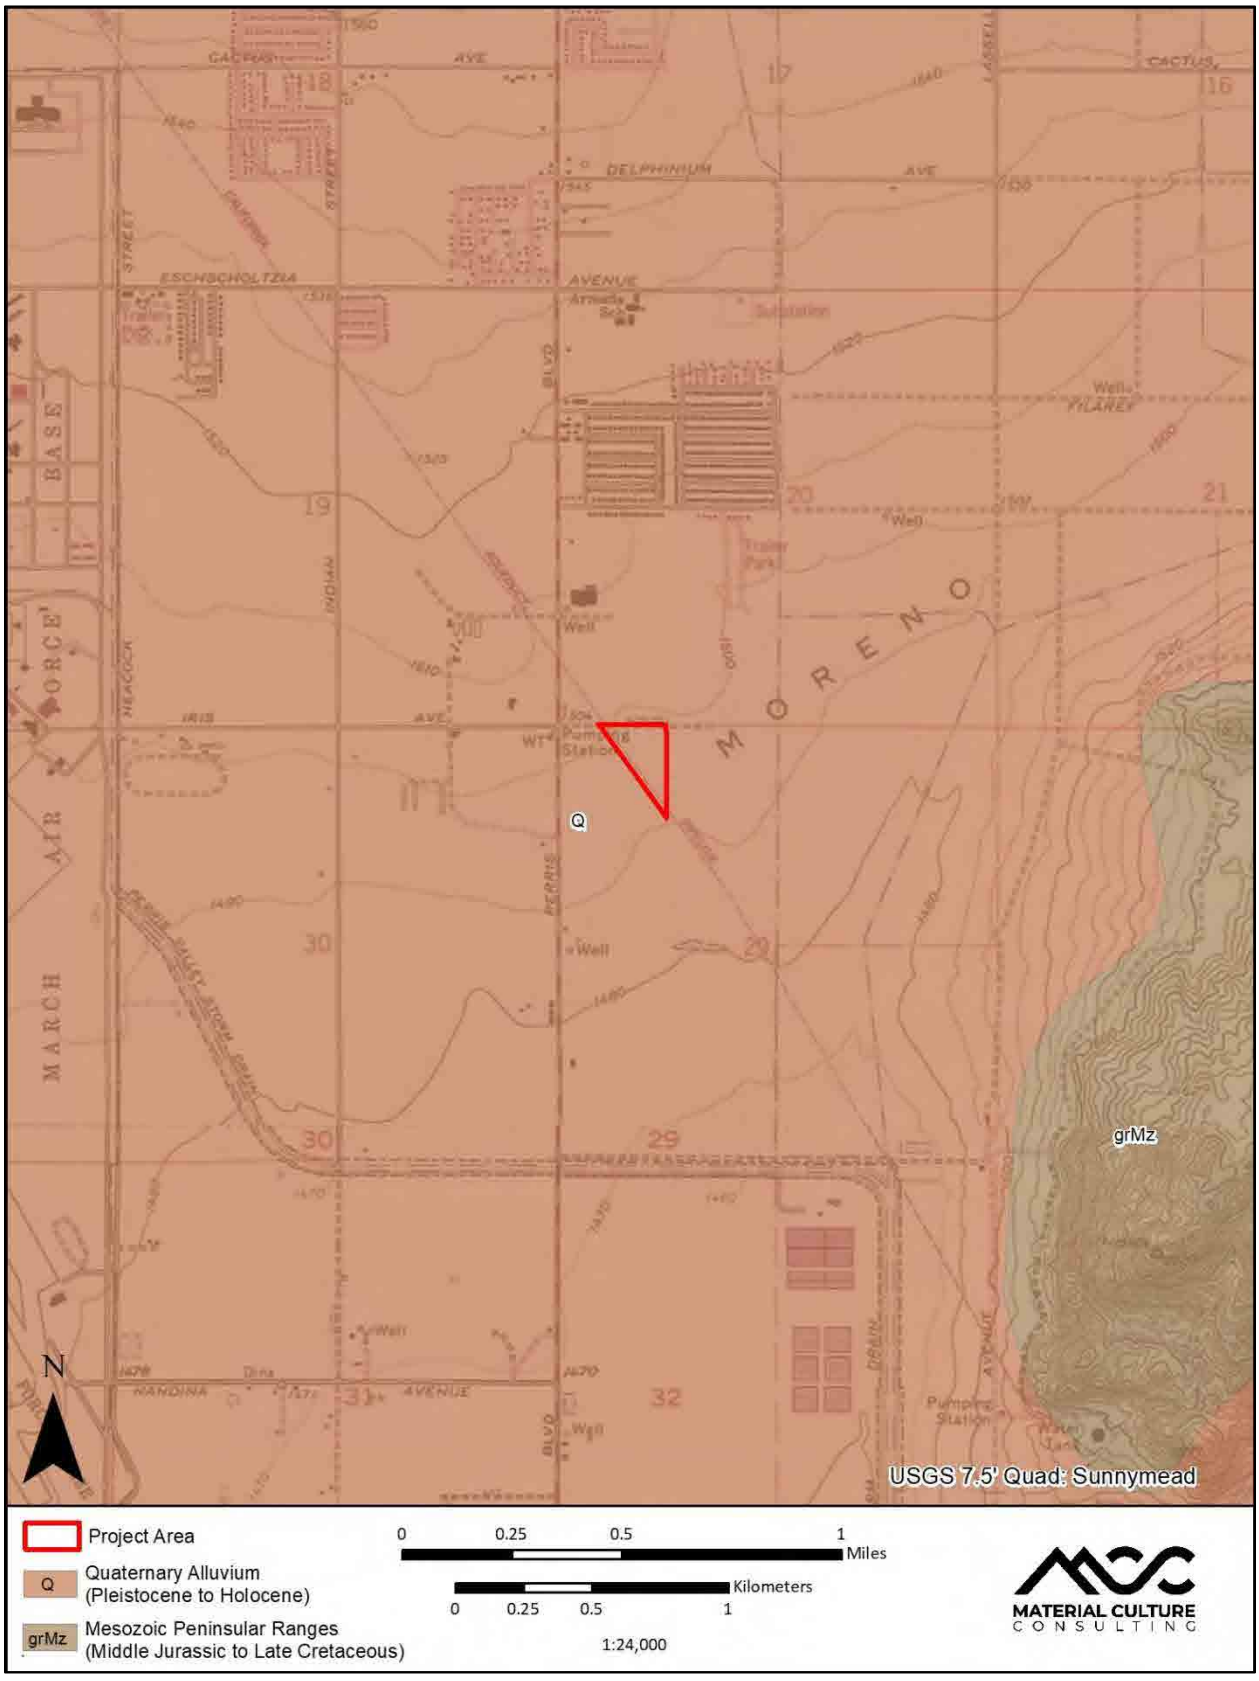

Figure 4. EPD Iris Park Project Geologic Map 1 (from Jennings, Strand, and Rogers 1977)

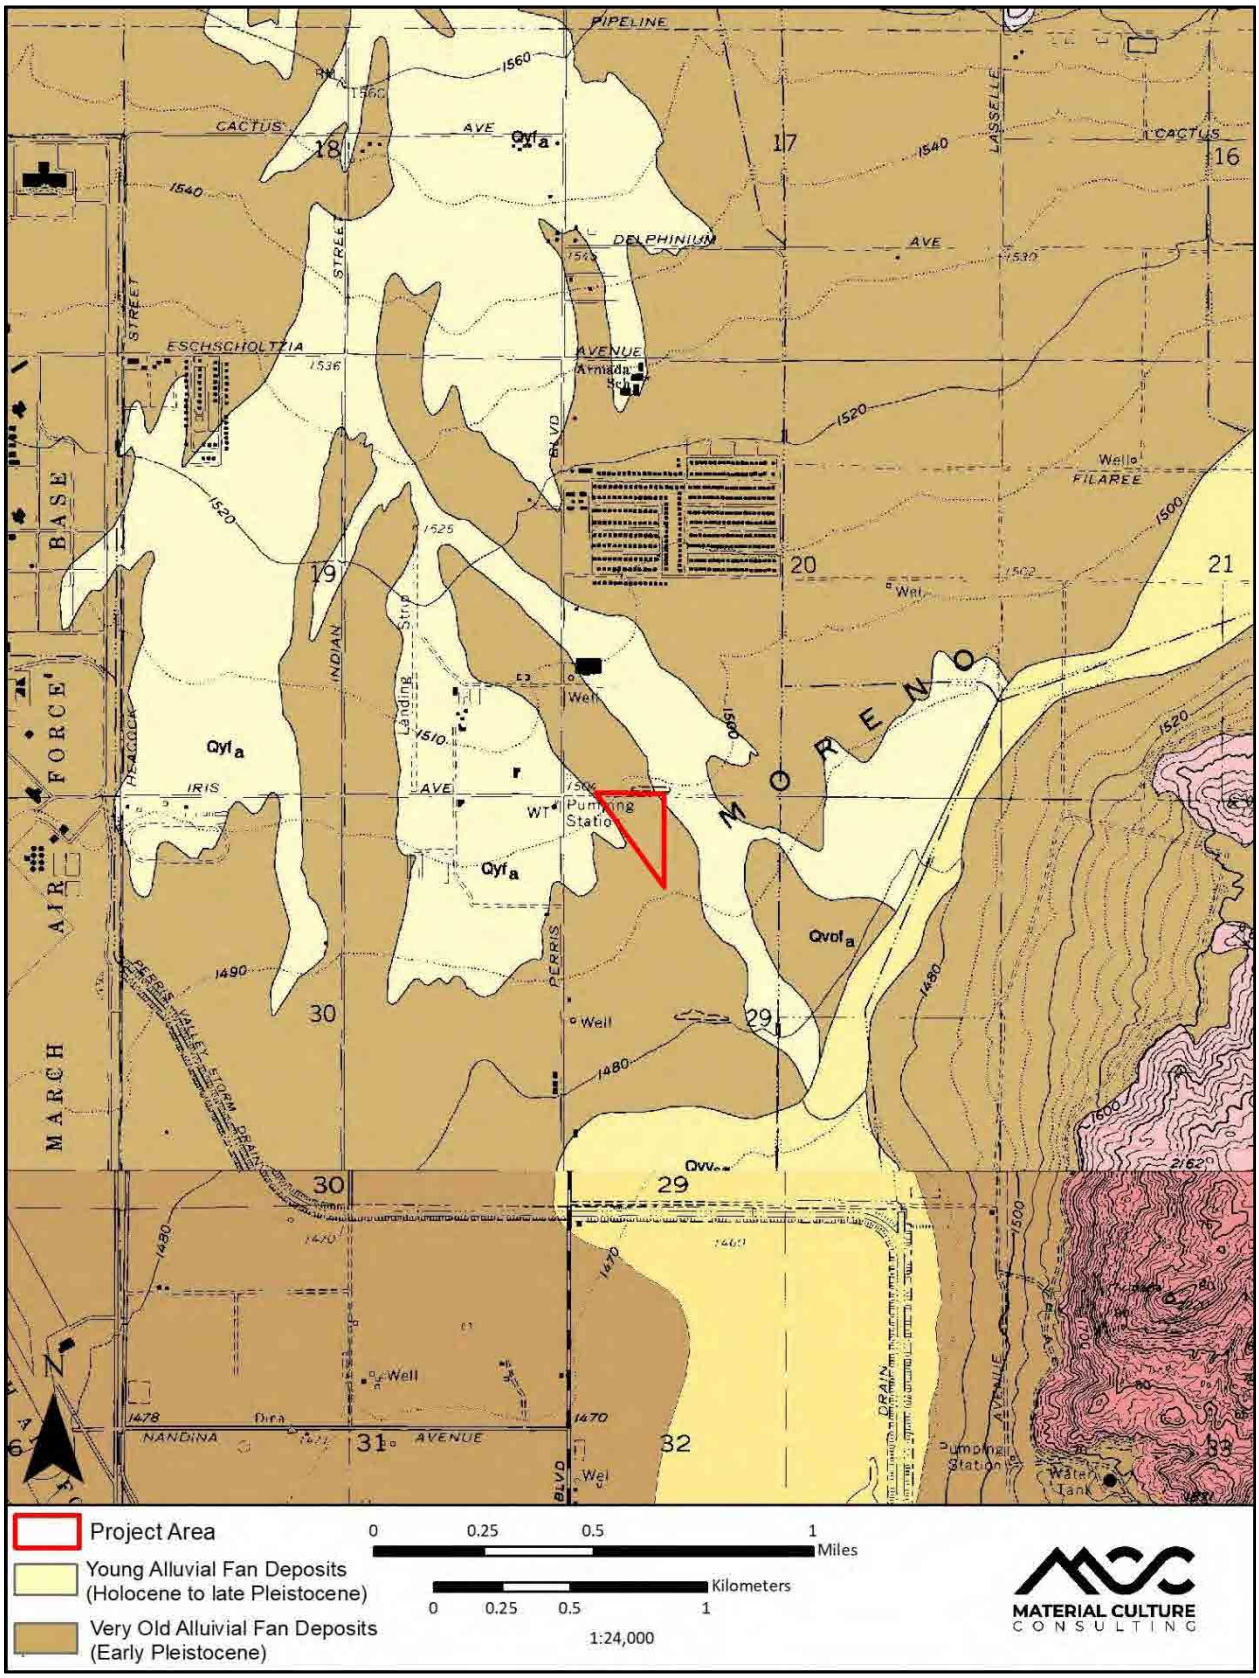

Figure 5.EPD Iris Park Project Geologic Map 2 (from Morton and Matti 2001).

RESEARCH DESIGN

The paleontological resources assessment was conducted according to CEQA, Public Resources Code (13 PRC) 2100, (14 CAC) 15000, Appendix G, Section J, (PRC) 2100-21177, Appendix G, (PRC) 5097.5. The paleontological resources assessment was conducted to evaluate the potential existence of resources that would require a preparation of a monitoring plan and monitoring activities, in order to reduce impacts to a less than significant level. Guidelines set forth by Riverside County were consulted to ensure that all local and state requirements were met.

The Riverside County Land Information System (RCLIS) overlay map defines what significant impact on paleontological resources consists of, and requires monitoring of, activities within designated High sensitivity areas (both High A and B) that may affect these resources. Areas with a "High Potential" for paleontological resources include sedimentary rock units with a high potential for containing significant non-renewable paleontological resources and are rock units within which vertebrate or significant invertebrate fossils have been determined to be present or likely to be present. These units include, but are not limited to, sedimentary formations which contain significant non-renewable paleontological resources anywhere within their geographical extent, and sedimentary rock units temporally or lithologically suitable for the preservation of fossils. High sensitivity includes not only the potential for yielding abundant vertebrate fossils, but also for production of a few significant fossils that may provide new and significant (taxonomic, phylogenetic, ecologic, and/or stratigraphic) data. High sensitivity areas are mapped as either "High A" or "High B."

The *Moreno Valley General Plan*'s (2006) Conservation Element Programs 7-6 states "in areas where archaeological or paleontological resources are known or reasonably expected to exist, based upon the citywide survey conducted by the UCR Archaeological Research Unit, incorporate the recommendations and determinations of that report to reduce potential impacts to levels of insignificance". Additionally, the *Environmental Impact Report for City of Moreno Valley General Plan* (P&D Consultants 2006) has one mitigation measure concerning paleontological resources:

- MM-1. Prior to the approval of a project, the City will assess potential impacts to significant historic, prehistoric archeological, and paleontological resources, including impacts to human remains, pursuant to Section 15064.5 of the California Environmental Quality Act Guidelines. If significant impacts are identified, the City will require the project to be modified to avoid the impacts or require measures to mitigate the impacts. Mitigation may involve monitoring, resource recovery, documentation or other measures.

Paleontological resources (fossils) are the remains of prehistoric life. These remains can be bones, teeth, shells, wood or leaves, or trace fossils (including burrows and trackways). The Society for Vertebrate Paleontology (SVP) generally considers any resource greater than 5,000 years old to be a fossil (SVP 2010). Fossils are evidence of ancient life, and as such provide an invaluable window into the past. Fossils are considered non-renewable resources and in California, impacts to paleontological resources must be considered pursuant to CEQA requirements for environmental reviews.

METHODS

LITERATURE AND MAP REVIEW AND LOCALITY SEARCH

The literature review included an examination of geologic maps of the Project Area and a review of relevant geological and paleontological literature to determine which geologic units are present within the Project Area and whether fossils have been recovered from those geologic units elsewhere in the region. As geologic units may extend over large geographic areas and contain similar lithologies and fossils, the literature review includes areas well beyond the Project Area. The results of this literature review include an overview of the geology of the Project Areas and a discussion of the paleontological sensitivity (or potential) of the geologic units within the Project Area. The County of Riverside also provides a paleontological resource sensitivity map for the entire county (RCLIS). This map was consulted by MCC staff on March 4, 2020.

The purpose of a locality search is to establish the status and extent of previously recorded paleontological resources within and adjacent to the study area for a given project. In February2020, a locality search was conducted through the Natural History Museum of Los Angeles County (LACM) of Los Angeles (Appendix B). This search identified any vertebrate localities in the LACM records that exist near the Project Area in the same or similar deposits.

PALEONTOLOGICAL RESOURCES SURVEY METHODS

The survey stage is a necessary component of a project's environmental assessment phase to verify the exact location of each identified paleontological resource, the condition or integrity of the resource, and provides invaluable information on the type of sediment present within the Project Area, which informs the assessment of paleontological sensitivity. On March 6, 2020, MCC qualified archaeologist and cross-trained paleontologist Zachary White conducted a pedestrian survey of the Project Area. Special attention was paid to any graded areas and to rodent burrows that offered a better view of the underlying sediment. The purpose of a field survey is to note the sediments in the Project Area, relocate any known paleontological localities, and identify any unrecorded paleontological resources exposed on the surface. In this way, impacts to existing, unrecorded paleontological material may be mitigated prior to the beginning of ground-disturbing activities and portions of the Project Area that are more likely to contain paleontological resources may be identified.

RESULTS

LAMC LOCALITY SEARCH AND LITERATURE REVIEW RESEARCH

The record search results from the LACM (McLeod 2020, Appendix B) do not indicate any fossil localities have been found directly within the Project Area, nor within a 1-mile radius. The surficial deposits of younger Quaternary alluvium mapped within the Project Area derived primarily from alluvial fan deposits from the more elevated terrain to the north (McLeod 2020).While these deposits are unlikely to contain significant fossil vertebrates within the uppermost layers, they may be underlain by older Quaternary deposits that do contain significant vertebrate fossils. The closest vertebrate fossil locality from similar older Quaternary deposits is LACM 4540, located approximately 9.5 miles east-southeast of the Project Area around Jack Rabbit Trail in the eastern side of the San Jacinto Valley. This locality produced a fossil specimen of horse (*Equus*) (McLeod 2020). Additional literature was consulted, including The University of California Museum of Paleontology (UCMP)'s Miocene Mammal Mapping Project (MioMap). The database results indicate no fossil localities are within a 1-mile radius of the Project; however, there are a number of localities in the same general area as LACM 4540, approximately 9.5 miles east-southeast of the Project (Carrasco et al. 2005). The RCLIS map indicates that the Project Area has a high potential (High B) to produced paleontological resources during ground disturbing activities (Figure 6).

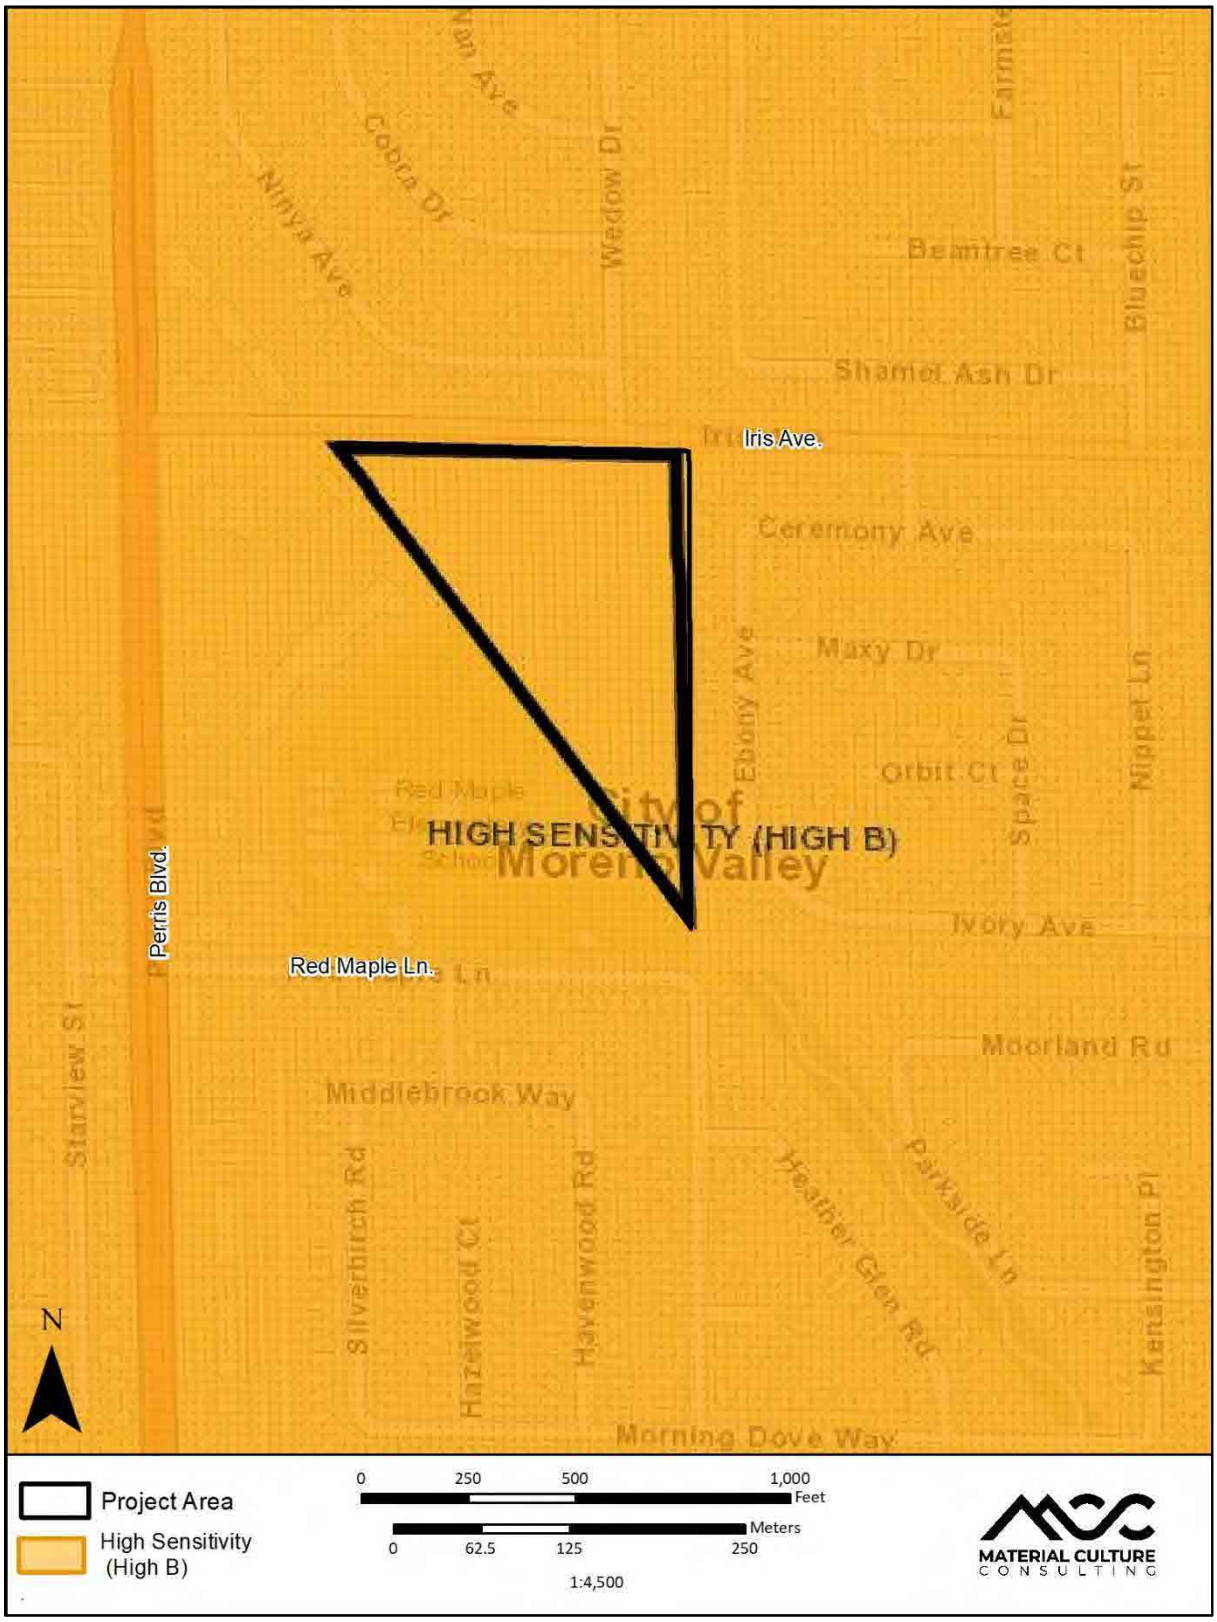

Figure 6. Paleontological Sensitivity (from RCLIS, orange indicates High B Sensitivity)

FIELD SURVEY RESULTS

During the course of fieldwork, survey conditions were fair (see Figures 7 through 13). Ground visibility in the entire Project Area was fair, ranging from less than 10 to 80% due to prior ground disturbance and overgrown vegetation within the Project Area. Disturbances within the Project Area include vehicular activity and modern dumping of concrete and brick remnants. The visual observation of sediment throughout the site does align with the geologic mapping of Quaternary alluvium, with light brown, fine grain sandy loam noted, with sub-rounded pebbles with high sphericity inclusions observed (see Figures 12 and 13). No paleontological resources were observed during the fieldwork survey.

CONCLUSIONS AND RECOMMENDATIONS

MCC conducted a Phase I paleontological resource assessment of the Project Area that included a fossil locality records search and an intensive pedestrian survey covering all 10.8 acres. No significant paleontological resources were identified within the Project Area during the locality search or field survey. The uppermost layers of soil within the Project Area are of recently disturbed Quaternary alluvium that is unlikely to contain significant fossil vertebrates. However, LACM notes that significant fossils have been found within similar alluvial mapped units, and that any excavations that extend deeper and into older and finer-grained Quaternary deposits may encounter significant fossil vertebrate remains. In addition, the Project Area is mapped in RCLIS as High B is based on geologic formations or mapped rock units that are known to contain (or have the correct age and depositional conditions to contain) significant paleontological resources at a depth below 5 feet.

RECOMMENDED MITIGATION

Based on the results of the Phase I paleontological resource assessment, the proposed Area is considered to have high sensitivity for the potential to impact paleontological resources during construction activities at or below 5 feet in undisturbed sedimentary deposits. MCC recommends preparation of a Paleontological Resource Management Plan (PRMP) prior to construction excavation, in order to mitigate any potential impact to non-renewable fossil resources to a less-than-significant level. It is recommended that a professional paleontologist be hired to oversee monitoring and the preparation of a PRMP. At a minimum, the PRMP should include the following items:

- A trained and qualified paleontological monitor should perform full-time monitoring of any excavations on the Project that have the potential to impact paleontological resources in undisturbed native sediments below 5 feet in depth. The monitor will have the ability to redirect construction activities to ensure avoidance of adverse impacts to paleontological resources.

- The Project paleontologist may re-evaluate the necessity for paleontological monitoring after examination of the affected sediments during excavation, with approval from the City and Client representatives.

- Any potentially significant fossils observed shall be collected and recorded in conjunction with best management practices and SVP professional standards.

- Any fossils recovered during mitigation should be deposited in an accredited and permanent scientific institution for the benefit of current and future generations.

- A report documenting the results of the monitoring, including any salvage activities and the significance of any fossils, will be prepared and submitted to the appropriate City personnel.

CERTIFICATION: I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this report, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief.

Appendix A:
Qualifications

Jennifer Kelly, M.Sc.
Paleontological Principal Investigator and Project Manager

MATERIAL CULTURE CONSULTING

Jennifer Kelly has experience in all aspects of paleontology. She has extensive experience with monitoring, salvage, fieldwork, project management, and report writing, as well as volunteer experience from the La Brea Tar Pits/Page Museum and the Cooper Center of Orange County (Paleontology department) and field experience as a Staff Geologist for Leighton Geotechnical. Her expertise is Geology, and she has her M.S. in Geological Sciences, emphasis in Geochemistry.

Jennifer has taught lab courses in paleontology and general geology, and also assisted with field mapping classes. Jennifer is HAZWOPER 40-hour certified and a registered Orange County paleontologist. She has authored and co-authored more than 100 paleontological compliance documents, including PRMPs, EIR, EIS, PEA, treatment plans, final monitoring reports, survey reports, and other compliance documents, in compliance with NEPA, CEQA, Caltrans and city and county laws, ordinances, regulations, and statutes.

Education

2012 M.Sc. in Geology, California State University, Long Beach, California
2005 B.S., Geology (preliminary work for entry to M.S. Geology Program), California State University, Long Beach
2004 B.A., Theater Arts, California State University, Long Beach

Certifications and Training

- 40 Hour Certification for HAZWOPER training under 29 CFR 1910. 120, CA (2013 – 2014)
- Orange County Certified Paleontologist
- San Diego County Certified Paleontologist

Recent Professional Experience in California

Paleontological Principal Investigator and Project Manager, Harvill Industrial Project, City of Jurupa Valley, Riverside County, California (2017-present). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation for this project, and prepared the Paleontological Resources Impact Mitigation Plan (PRIMP). Kelly also oversees the paleontological monitoring program for this Project. This project is ongoing and is scheduled to be complete in 2020.

Paleontological Principal Investigator and Project Manager, Rider Commerce Center Project, Unincorporated Riverside County, California (2018-present). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation for this project, and prepared the Paleontological Resources Impact Mitigation Plan (PRIMP). Kelly also oversees the paleontological monitoring program for this Project. This project is ongoing and is scheduled to be complete in 2020.

Paleontological Principal Investigator and Project Manager, Ontario Ranch Logistic Center, City of Ontario, County of San Bernardino, California (2018-present) Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation for this project, and authored the PRIMP for this project. Kelly also oversees the paleontological monitoring program for this Project. This project

is ongoing and is scheduled to be complete in 2021.

Paleontological Principal Investigator and Project Manager, Saddleback College, City of Mission Viejo, Orange County (2018-present) Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation for this project, prepared the Paleontological Resources Impact Mitigation Plan (PRIMP), and oversaw the paleontological monitoring program detailed in the PRIMP. Kelly is currently co-authoring the final paleontological mitigation report This project is in the final stages and is scheduled to be completed 2020.

Private Development Sector Experience

Paleontological Principal Investigator and Project Manager, Proposed Alta Vista Specific Plan Project, SC Development, City of Placentia, Orange County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Magnolia Tank Farm Project, SLF-HB Magnolia, LLC, City of Huntington Beach, Orange County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Santa Fe Springs Apartment Project, Clearwater Communities, City of Whittier, Los Angeles County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Rider Business Center Project, Capstone Advisor, Unincorporated Riverside County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Los Olivos French Valley Project, Newland Homes LLC, Unincorporated Riverside County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Veteran's Village Community Development Project, UHC LLC, Cathedral City, Riverside County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Colony Commerce East Project, CapRock Partners, City of Ontario, San Bernardino County (2016). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Jurupa Valley Medical Clinic Project, Boureston Company, City of Jurupa Valley, Riverside County (2016). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Renewable Energy Sector Experience

Paleontological Principal Investigator and Project Manager, California Department of Corrections and

Rehabilitation Ventura Youth Correctional Facility Solar Project, Ecoplexus, Inc, City of Camarillo, Ventura County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Anderson-Devil's Den Solar Project, Forefront Power, Lost Hills, Kern County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Anderson-Coalinga 1-1109 Solar Project, Forefront Power, Ora, Unincorporated Fresno County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Anderson-Coalinga 2 Solar Project, Forefront Power, City of Coalinga, Fresno County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Anderson-Derrick Solar Project, Forefront Power, City of Coalinga, Fresno County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Anderson-Dulgarian Solar Project, Forefront Power, Lost Hills, Kern County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Anderson-Gates Solar Project, Forefront Power, City of Coalinga, Fresno County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Mahal Property Solar Project, Forefront Power, City of Selma, Fresno County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, Rector Reservoir Solar Facility Project, Forefront Power, Napa Valley, Napa County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, California Men's Colony Solar Facility Project, Forefront Power, San Luis Obispo, San Luis Obispo County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Paleontological Principal Investigator and Project Manager, California Department of Corrections and Rehabilitation California Institute for Women Solar Project, Ecoplexus, Inc, City of Corona, San Bernardino County (2017). Ms. Kelly coordinated all surveying, preparation of compliance and environmental documentation relating to Paleontological resources for this project**.**

Utility Sector Experience

Paleontological Project Manager, Cadiz Ground Water Project, San Bernardino County, California

(2012-2013). Ms. Kelly conducted all research and data collection for the Cadiz Groundwater Conservation and Storage Project for completion of a DEIR section on paleontological resources. Based on the results of the analysis, Kelly prepared the mitigation measures which were designed to reduce potential adverse impacts to paleontological resources.

Paleontological Project Manager, Manzana Wind Express Project, Kern County, California (2012-2015). Ms**.** Kelly prepared the Paleontological Mitigation Monitoring Resource Plan, which allowed her to develop a key role in presenting environmental training programs to construction workers and other environmental compliance monitors. She also authored the final paleontological monitoring report. The Project's construction consisted of the installation more than 300 wind energy turbines, aligned along approximately 26 rows, on the 6,275-acre proposed site. The Manzana Wind Energy Project site was found to have the potential for scientifically significant paleontological resources that could be impacted by construction-related ground disturbance. She co-authored the final paleontological mitigation report in compliance with CEQA and Kern County guidelines.

Paleontological Project Manager, Pacific Wind Express Project, Kern County, California (2008-2009). Ms**.** Kelly prepared the Paleontological Mitigation Monitoring Resource Plan, which allowed her to develop a key role in presenting environmental training programs to construction workers and other environmental compliance monitors. She co-authored the final paleontological mitigation report.

Paleontological Project Manager, Tehachapi Renewable Transmission Project (TRTP), Southern California Edison (SCE), Kern County, Los Angeles County, San Bernardino County (2009-2015). Ms. Kelly conducted and led surveys along this project's right of way. She was also in charge of scheduling monitoring crews during grading in areas of paleontological sensitivity, managing and reviewing log sheets, and tracking data that is incorporated to final reports. Ms. Kelly played a valuable role with scheduling for the project's needs. She monitored, surveyed, and reported on all paleontological facets of this project as the Lead Paleontological Monitor for segment 3B, which was located near Rosamond, and for segments 4-11 which extended into Los Angeles and San Bernardino Counties. She authored more than 10 of the compliance reports for this project. She also performed monitoring on every segment of this Project.

Paleontological Project Manager, SCE, Valley South Subtransmission Line Project, Riverside County, California (2007-2010). Ms. Kelly managed scheduling and provided oversight for coordination of all surveying, preparation of compliance and environmental documentation for this project, including three proposed alternatives, and co-wrote the final PEA and survey reports, utilizing CEQA and Riverside County paleontological guidelines.

Paleontological Project Manager, SCE, San Joaquin Cross Valley Loop Project, Tulare County, California (2010-2013). Ms. Kelly assisted with coordination of all surveying, preparation of compliance and environmental documentation for this project, and co-authored the final Paleontological Monitoring Plan for this project.

Paleontological Project Manager, SCE, Devore Substation Project, San Bernardino County, California (2010-2012). Ms. Kelly prepared the compliance and environmental documents for this project, including paleontological inventory and geological map research.

Paleontological Project Manager, El Casco System-Transmission Line, SCE, throughout Riverside County (2011-2014). Ms. Kelly performed paleontological monitoring. Her duties included salvaging small and large fossils, screen washing and sorting fossils. She aided in the processing of microfossils collected from bulk sampling of fossil bearing sediment, and documenting stratigraphic locations of fossil bearing units. This project was in compliance with both CEQA and under the jurisdiction of the CPUC.

Paleontological Project Manager**, **South of Kramer Project, SCE, Hesperia to Barstow, San Bernardino, County (2009-2016). Ms. Kelly provided project management and compliance surveying, which included surveying from Hesperia to Barstow, CA for a Proponent's Environmental Assessment (PEA). All portions of the Proposed Project were located within San Bernardino County, California. Kelly co-authored the final survey report for this Project. A BLM Permit was authorized for the survey.

Paleontological Project Manager**, **OC Access Road Grading, SCE, Orange and Riverside County (2010-2011). Ms. Kelly assisted in documentation for the cultural resources portion, which include information regarding the location and condition of archaeological and paleontological sites recorded at or near the access roads, and recommends impact avoidance measures for future years in implementing the Protocol for 73 known archaeological sites. This required extensive coordination with Orange County Fire Authority grading department, SCE's Operations and Maintenance (O&M), and Orange County Parks. Trimble units were used for the documentation before and after grading of access roads. Communication played a key role when strategizing which locations were being graded where and when. The company came in under budget because of Kelly's efficiency and ability to coordinate and schedule.

Paleontological Project Manager, West of Devers Transmission Line Project, SCE, Riverside County, California (2009-2016). Ms. Kelly provided all project management and paleontological related services. This included proper BLM authorization and permitting to conduct surveying and a research design for field reconnaissance related to PEA, EIS/EIR documentation for the proposed transmission line. She assisted with managing documentation with laws relating to paleontological resources, among which are CEQA and NEPA compliance.

Paleontological Project Manager, Pacific Gas and Electric (PG&E), Line 300A/MP 147.7 and 180.8 Projects, San Bernardino County, California (2005-2006). Kelly prepared the mitigation recommendations and a paleontological inventory report for this project. She also was responsible for scheduling surveys on BLM and United States Marine Corps lands.

Paleontological Project Manager, PG&E, Jefferson to Stanford No. 2 60 kV Feasibility Project, San Mateo County, California (2012-2014). Kelly assisted with the preparation of the paleontological resources review and paleontological inventory report (PIR) and Proponent's Environmental Assessment (PEA) for this project. Several potential routes were assessed for this project, and the feasibility and paleontological potential was determined for this project. The report and PIR were prepared according to CEQA guidelines.

Paleontological Project Manager**, **Camp Pendleton Project, SDG&E, throughout San Diego and Orange Counties (2013-2017). Kelly provided on-call paleontological services for this project. She was a key facet in report production and research which enabled her firm to perform all survey and monitoring work required on Camp Pendleton for CEQA/NEPA check list assessments requested from SDG&E. Kelly was cleared from the Department of Defense in order to conduct work on the base. Site assessments and monitoring include all work related to: future location of power poles and towers, water control features, trenching and subsurface excavations, access roads, grading impacts to develop substations and other facilities, work pads, staging yards, and gas pipelines.

Attn: Julia Carvajal, Archaeologist & GIS Specialist

re: Paleontological resources for the proposed Iris Park Project, in the City of Moreno Valley, Riverside County, project area

Dear Julia:

I have conducted a thorough check of our paleontology collection records for the locality and specimen data for proposed Iris Park Project, in the City of Moreno Valley, Riverside County, project area as outlined on the portion of the Sunnymead USGS topographic quadrangle map that you sent to me via e-mail on 4 February 2020. We do not have any vertebrate fossil localities that lie directly within the proposed project area boundaries, but we do have localities somewhat nearby from sedimentary deposits similar to those that probably occur at depth in the proposed project area.

Surface deposits in the entire proposed project area consist of younger Quaternary Alluvium, derived as alluvial fan deposits from the more elevated terrain to the north. These sedimentary deposits typically do not contain significant vertebrate fossils, at least in the uppermost layers, but they may be underlain by older Quaternary deposits that do contain significant vertebrate fossils. Our closest vertebrate fossil locality from somewhat similar deposits is LACM 4540, from the gravel pits just west of Jack Rabbit Trail east-southeast of the proposed project area on the eastern side of the San Jacinto Valley, that produced a specimen of fossil horse, *Equus*.

Shallow excavations in younger Quaternary Alluvium in the proposed project area are unlikely to uncover significant vertebrate fossil remains. Deeper excavations in the proposed project area that extend down into older Quaternary deposits, however, may well encounter significant vertebrate fossils. Any substantial excavations in the proposed project area, therefore, should be monitored closely to quickly and professionally recover any fossil remains discovered while not impeding development. Also, sediment samples should be collected and processed to determine the small fossil potential in the proposed project area. Any fossils recovered during mitigation should be deposited in an accredited and permanent scientific institution for the benefit of current and future generations.

This records search covers only the vertebrate paleontology records of the Natural History Museum of Los Angeles County. It is not intended to be a thorough paleontological survey of the proposed project area covering other institutional records, a literature survey, or any potential on-site survey.

Sincerely,

Samuel A. McLeod, Ph.D.

Orange, California 92868

Project No. 33591.1

Attention: Mr. Oscar Graham

Subject: Preliminary Geotechnical and Infiltration Feasibility Investigation, Proposed Iris Park Residential Development, APN 312-020-025, Moreno Valley, California.

LOR Geotechnical Group, Inc., is pleased to present this report summarizing our geotechnical investigation for the above referenced project. In summary, it is our opinion that the proposed development is feasible from a geotechnical perspective, provided the recommendations presented in the attached report are incorporated into design and construction.

To provide adequate support for the proposed residential structures, we recommend that a compacted fill mat be constructed beneath footings and slabs. The compacted fill mat will provide a dense, high-strength soil layer to uniformly distribute the anticipated foundation loads over the underlying soils. All undocumented fill material and any loose alluvial materials should be removed from structural areas and areas to receive engineered compacted fill. The data developed during this investigation indicates that removals on the order of approximately 5 to 7 feet will be required within the currently planned development areas. The given removal depths are preliminary. The actual depths of the removals should be determined during the grading operation by observation and/or in-place density testing.

Very low expansion potential, fair R-value quality, poor infiltration characteristics, and a negligible soluble sulfate content generally characterize the onsite soil materials tested.

Project No. 33591.1

INTRODUCTION

During November of 2019, a Preliminary Geotechnical and Infiltration Feasibility Investigation was performed by LOR Geotechnical Group, Inc., for proposed Iris Park residential development of APN 312-020-025 in the City of Moreno Valley, California. The purpose of this investigation was to conduct a technical evaluation of the geologic setting of the site and to provide geotechnical design recommendations for the proposed improvements. The scope of our services included:

- Review of available pertinent geotechnical literature, reports, maps, and agency information pertinent to the study area;
- Interpretation of aerial photographs of the site and surrounding regions dated 1966 through 2018;
- Geologic field reconnaissance mapping to verify the areal distribution of earth units and significance of surficial features as compiled from documents, literature, and reports reviewed;
- A subsurface field investigation to determine the physical soil conditions pertinent to the proposed development;
- Infiltration testing via the constant head test method at two locations within the approximate area proposed for the infiltration of onsite runoff waters;
- Laboratory testing of selected soil samples obtained during the field investigation;
- Development of geotechnical recommendations for site grading and foundation design; and
- Preparation of this report summarizing our findings, and providing conclusions and recommendations for site development.

The approximate location of the site is shown on the attached Index Map, Enclosure A-1, within Appendix A.

To orient our investigation at the site, you provided us with Site Plan, prepared by IDE Arc Architecture & Planning, undated, that showed the proposed development. As noted on that map, the site will be developed with 84 residential lots and the associated interior streets. An infiltration basin is also proposed. The Site Plan was utilized as a base map for our field investigation and is presented as Enclosure A-2, within Appendix A.

PROJECT CONSIDERATIONS

Information furnished to this firm indicates that the proposed project will consist of the construction of 84 single-family residences.

These will likely be one or two stories in height and are anticipated to be of wood frame construction with an exterior plaster veneer. Light to moderate foundation loads are anticipated with such structures. Cuts and fills on the order of a few feet are anticipated to create the planar building pads.

EXISTING SITE CONDITIONS

The subject site consists of a triangular shaped, relatively flat, vacant area of land that is approximately 10 acres in size. At the time of our investigation, vegetation on the site consisted of a light moderate growth of weeds. The topography of the site is planar, with a very gentle fall towards the southeast.

Iris Avenue, a fully improved roadway, bounds the site on the north followed by a tract of single family residences. A tract of single family residences bounds the site on the east. The California Aqueduct easement comprises the western 100 feet of the site with a shopping center and school beyond. South of the site is a tract of single family homes.

AERIAL PHOTOGRAPH ANALYSIS

The aerial photographs reviewed consisted of vertical aerial stereoscopic photographs of varying scales. We reviewed imagery available from Google Earth (2018) and from Historic Aerials (2019).

The site consisted of vacant land which appeared to be dry land farmed with surrounding properties from 1966, the earliest photograph available, to 1978. The 1997 photograph shows the site as vacant land with some stockpiles of fill material in the northeast corner. Numerous dirt paths are visible in this area. The 2006 photograph shows additional smoothed out fill to the west of the previously noted fill. An earthen berm is present on the north and west side of this area. A minor amount of additional end dumped fill is visible in the 2009 photograph.

Our review of the aerial photographs did not reveal any adverse geologic conditions, such as possible faults or landslides, as being present at or within close proximity to the site.

FIELD EXPLORATION PROGRAM

Our subsurface field exploration program was conducted on November 7, 2019 and consisted of drilling 5 exploratory borings with a truck-mounted Mobile B-61 drill rig equipped with 8-inch diameter hollow stem augers. The borings were drilled to depths of approximately 21 to 51.5 feet below the existing ground surface. The approximate locations of our exploratory borings are presented on the attached Site Plan, Enclosure A-2 within Appendix A.

The subsurface conditions encountered in the exploratory borings were logged by a geologist from this firm. Relatively undisturbed and bulk samples were obtained at a maximum depth interval of 5 feet and returned to our geotechnical laboratory in sealed containers for further testing and evaluation. A detailed description of the field exploration program and the boring logs are presented in Appendix B.

LABORATORY TESTING PROGRAM

Selected soil samples obtained during the field investigation were subjected to laboratory testing to evaluate their physical and engineering properties. Laboratory testing included in-place moisture content and dry density, laboratory compaction characteristics, direct shear, sieve analysis, sand equivalent, R-value, consolidation, expansion index, Atterberg limits, and soluble sulfate content. A detailed description of the laboratory testing program and the test results are presented in Appendix C.

GEOLOGIC CONDITIONS

Regional Geologic Setting

The site is located within the south-central portion of Moreno Valley which lies within the northern end of Perris Valley. This area is located on the Perris block, within the northern Peninsular Ranges geologic province of southern California. While the Perris block is considered to be a relatively stable structural block, it is bounded by active faults. The Perris block is underlain predominately by a very large mass of crystalline igneous rocks of Cretaceous age and older metasedimentary and metavolcanic rocks.

The Perris block has a series of erosional surfaces, marked by low topographic relief and capped with unconsolidated alluvial sediments stripped from the surrounding highlands, such as the Box Spring Mountains and the hills around Lake Perris located east of the site.

These were mapped by the California Division of Mines and Geology as being underlain by deposits of relatively unconsolidated, but weakly to moderately indurated younger to older alluvium (Morton and Matti, 2001 and Morton, 2003).

The nearest known active fault zone is the San Jacinto fault zone located approximately 9.8 kilometers (6.1 miles) to the northeast. Other major faults within the region include the Elsinore fault zone located approximately 26 kilometers (16.2 miles) to the southwest, and San Andreas fault zone located approximately 27 kilometers (17 miles) to the northeast. The site and the regional geologic setting are shown on Enclosure A-3 within Appendix A.

Site Geologic Conditions

Fill/Topsoil: As encountered within the majority of our exploratory borings, fill/topsoil materials on the order of 2 feet thick are present across much of the site. The fill materials were noted to be light brown, dry, and loose silty sand. These materials are most likely the result of weed abatement practices (discing).

Fill: As encountered within our exploratory boring placed in the northeast portion of the site, fill materials on the order of 5 feet are present. These materials consisted of dry, loose, silty sand with some debris and are believed to be end dumped fills noted in our review of aerial photographs.

Older Alluvium: Underlying the fill materials at the site, older alluvial materials were encountered within all of our exploratory borings to the maximum depths explored. These units were noted to consist of silty sand and sandy silt, and lessor amounts unit of well graded sand, clayey sand and lean clay with sand. The older alluvial materials were in a relatively loose to medium dense/stiff state upon first encounter, becoming medium dense/very stiff to dense/hard with depth based on our equivalent Standard Penetration Test (SPT) data and in-place density testing. Consolidation testing of the older alluvial materials indicate normal consolidation/hydro-consolidation characteristics at depths of 7 feet and greater.

A detailed description of the subsurface soil conditions as encountered within our exploratory borings is presented on the Boring Logs within Appendix B.

Groundwater Hydrology

Groundwater was encountered within our exploratory borings B-2 at a depth of approximately 33.5 feet below the existing ground surface.

Records for nearby wells which were readily available from the State of California Department of Water Resources online database (CDWR, 2019) and the Western Municipal Water District Cooperative Well Measurement Program (WMWD, 2019) were reviewed as a part of this investigation. In addition, historic groundwater level data was reviewed from a groundwater contour map prepared by the U.S.G.S. (Carson and Matti, 1985).

According to the State of California Department for Water resources online database, the nearest well with available data is State Well Number 03S03W32B001S located to the southeast, approximately 1.4 kilometers (0.9 miles). In this well, groundwater was last measured at a depth of 21 feet below the ground surface on April 26, 2019. The depth to groundwater in the past was noted to vary slightly over time. Data for this well was presented from 2011 to 2019 and the elevation was listed as 1,476 feet above mean sea level.

Groundwater well data from the Cooperative Well Measuring Program, Spring 2019, indicates that the nearest well is the well noted above and no additional relevant information is presented within this database.

As illustrated on Enclosure A-1, the elevation of the site is approximately 1,495 feet above mean sea level. Based on the information above, groundwater is anticipated to lie approximately 35 feet in the general site area.

Surface Runoff

Current surface runoff of precipitation waters across the site is generally as sheet flow to the south-southeast.

Mass Movement

Mass movement features such as landslides, rockfalls, or debris flows within the site vicinity are not known to exist and no evidence of mass movement was observed on the site or in the vicinity during our review of aerial photographs or reconnaissance.

Faulting

No active or potentially active faults are known to exist at the subject site. In addition, the subject site does not lie within a current State of California Earthquake Fault Zone (Hart and Bryant, 2003).

As previously mentioned, the closest known active fault is the San Jacinto Valley segment of the San Jacinto fault zone, located approximately 9.8 kilometers (6.1 miles) to the northeast. In addition, other relatively close active faults include the Glen Ivy segment of the Elsinore fault zone, located approximately 26 kilometers (16.2 miles) to the southwest, and the San Bernardino segment of the San Andreas fault zone located approximately 27 kilometers (17 miles) to the northeast.

The San Jacinto fault zone is a sub-parallel branch of the San Andreas fault zone, extending from the northwestern San Bernardino area, southward into the El Centro region. This fault has been active in recent times with several large magnitude events. It is believed that the San Jacinto fault is capable of producing an earthquake magnitude on the order of 6.5 or greater.

The Elsinore fault zone is one of the largest in southern California. At its northern end it splays into two segments and at its southern end it is cut by the Yuba Wells fault. The primary sense of slip along the Elsinore fault is right lateral strike-slip. It is believed that the Elsinore fault zone is capable of producing an earthquake magnitude on the order of 6.5 to 7.5.

The San Andreas fault is considered to be the major tectonic feature of California, separating the Pacific Plate and the North American Plate. While estimates vary, the San Andreas fault is generally thought to have an average slip rate on the order of 24mm/yr and capable of generating large magnitude events on the order of 7.5 or greater.

Current standards of practice often include a discussion of all potential earthquake sources within a 100 kilometer (62 mile) radius. However, while there are other large earthquake faults within a 100 kilometer (62 mile) radius of the site, none of these are considered as relevant to the site due to their greater distance and/or smaller anticipated magnitudes.

Historical Seismicity

In order to obtain a general perspective of the historical seismicity of the site and surrounding region a search was conducted for seismic events at and around the area within various radii. This search was conducted utilizing the historical seismic search website of the USGS. This website conducts a search of a user selected cataloged seismic events database, within a specified radius and selected magnitudes, and then plots the events onto a map. At the time of our search, the database contained data from January 1, 1932 through November 20, 2019.

In our first search, the general seismicity of the region was analyzed by selecting an epicenter map listing all events of magnitude 4.0 and greater, recorded since 1932, within a 100 kilometer (62 mile)radius of the site, in accordance with guidelines of the California Division of Mines and Geology. This map illustrates the regional seismic history of moderate to large events. As depicted on Enclosure A-4, within Appendix A, the site lies within a relatively active region associated with the San Andreas fault trending northwest and the northwest trending faulting of the Mojave Desert geomorphic province.

In the second search, the micro seismicity of the area lying within a 15 kilometer (9.3 mile) radius of the site was examined by selecting an epicenter map listing events on the order of 1.0 and greater since 1978. In addition, only the “A” events, or most accurate events were selected. Caltech indicates the accuracy of the “A” events to be approximately 1 km. The results of this search is a map that presents the seismic history around the area of the site with much greater detail, not permitted on the larger map. The reason for limiting the events to the last 40± years on the detail map is to enhance the accuracy of the map. Events recorded prior the mid 1970's are generally considered to be less accurate due to advancements in technology. As depicted on this map, Enclosure A-5, the San Jacinto fault zone appear to be the source of numerous events.

In summary, the historical seismicity of the site entails numerous small to medium magnitude earthquake events occurring around the subject site, predominately associated with the presence of the San Jacinto fault zone. Any future developments at the subject site should anticipate that moderate to large seismic events could occur very near the site.

Secondary Seismic Hazards

Other secondary seismic hazards generally associated with severe ground shaking during an earthquake include liquefaction, seiches and tsunamis, earthquake induced flooding, landsliding and rockfalls, and seismic-induced settlement.

Liquefaction: The potential for liquefaction generally occurs during strong ground shaking within granular, loose, sediments where the groundwater is usually less than 50 feet. The County of Riverside has mapped the overall site area as having low liquefaction potential (TLMA, 2019).

Liquefaction is a process in which strong ground shaking causes saturated soils to lose their strength and behave as a fluid (Matti and Carson, 1991). Ground failure associated with liquefaction can result in severe damage to structures. Soil types susceptible to liquefaction include sand, silty sand, sandy silt, and silt, as well as soils having a plasticity

index (PI) less than 7 (Boulanger and Idriss, 2004) and loose soils with a PI less than 12 and a moisture content greater than 85 percent of the liquid limit (Bray and Sancio, 2006). The geologic conditions for increased susceptibility to liquefaction are: 1) shallow groundwater (generally less than 50 feet in depth); 2) the presence of unconsolidated sandy alluvium, typically Holocene in age; and 3) strong ground shaking. All three of these conditions must be present for liquefaction to occur.

Severe seismic shaking may cause dry and non-saturated sands to densify, resulting in settlement expressed at the ground surface. Seismic settlement in dry soils generally occurs in loose sands and silty sands, with cohesive soils being less prone to significant settlement.

A quantitative method using an index called the liquefaction potential index (LPI) was developed and presented by Iwasaki et al. (1978, 1982). The LPI is defined as:

$$LPI = \int_0^{20} F_1 W(z) dz$$

where $W(z) = 10 - 0.5z$, $F_1 = 1 - FS$ for $FS < 1.0$, $F_1 = 0$ for $FS > 1.0$ and z is the depth below the ground surface in meters. The LPI presents the risk of liquefaction damage as a single value with the following indicators of liquefaction-induced damage:

LPI Range and Damage	
LPI Range	**Damage**
LPI = 0	Liquefaction risk is very low.
0 < LPI ≤ 5	Liquefaction risk is low.
5 < LPI ≤ 15	Liquefaction risk is high.
LPI > 15	Liquefaction risk is very high.

The most recent development for quantitative descriptions of liquefaction-induced surface damage, called "liquefaction vulnerability", was made by Tonkin & Taylor (2013) after the Christchurch earthquakes occurred between 2010 and 2011 and was based on field observations and analyses of approximately 7,500 CPT investigations. A new index, the liquefaction severity number (LSN), was proposed and defined as:

$$LSN = \int \frac{\varepsilon_v}{z} dz$$

where ε_v is the calculated volumetric densification strain in the subject layer from Zhang et al. (2002) and z is the depth to the layer of interest in meters below the ground surface. The typical behaviors of sites with a given LSN are summarized in following table.

LSN Ranges and Observed Land Effects

LSN Range	Predominant Performance
0-10	Little to no expression of liquefaction, minor effects
10-20	Minor expression of liquefaction, some sand boils
20-30	Moderate expression of liquefaction, with sand boils and some structural damage
30-40	Moderate to severe expression of liquefaction, settlement can cause structural damage
40-50	Major expression of liquefaction, undulations and damage to ground surface, severe total and differential settlement of structures
>50	Severe damage, extensive evidence of liquefaction at surface, severe total and differential settlements affecting structures, damage to services

Both LPI and LSN indices were calculated for the soil profiles of Exploratory Boring No. B-2. The results indicate that the liquefaction risk of the site is “very low” to "low" per the LPI index of 0. The site exhibits "little to no expression of liquefaction, minor effects" per the LSN index of 0.

The Idriss and Boulanger (2008) and Pradel (1998) methods were used to evaluate liquefaction-induced settlement and dry sand settlement. As input into our calculations a deaggregated modal moment magnitude of 6.5 and an acceleration of 0.553g were utilized for the representative soil profiles as provided in Boring B-2.

The results indicate that a maximum seismic settlement of less than one-half inch can be anticipated. Based on the relative uniformity of soil materials encountered, differential seismic settlement is anticipated to be approximately one-half of the total seismic settlement. The settlement calculated is accumulated from soil layers to a maximum depth of 50 feet and the result of our analysis is provided in Appendix E.

Seiches/Tsunamis: The potential for the site to be affected by a seiche or tsunami (earthquake generated wave) is considered nil due to the absence of any large bodies of water near the site.

Flooding (Water Storage Facility Failure): There are no large water storage facilities located on or upstream near the site which could possibly rupture during an earthquake and affect the site by flooding.

Seismically-Induced Landsliding: Our research, site reconnaissance and review of aerial imagery of the site and vicinity indicates that there are no known or suspected landslides at the site or in close proximity to the site and, therefore, the potential for seismically-induced landslides occurring at the site is considered very low.

Rockfalls: No large, exposed, loose or unrooted boulders that could affect the integrity of the site are present above the site.

Seismically-Induced Settlement: Settlement generally occurs within areas of loose, granular soils with relatively low density. Since the site is underlain by dense/stiff to dense/hard older alluvial materials, the potential for settlement is considered low. In addition, the earthwork operations recommended to be conducted during the development of the site will mitigate any near surface loose soil conditions.

SOILS AND SEISMIC DESIGN CRITERIA (California Building Code 2016)

Section 1613 of Chapter 16 of the 2016 California Building Code (CBC) contains the procedures and definitions for the calculations of the earthquake loads on structures and non structural components that are permanently attached to structures and their supports and attachments.

It should be noted that the classification of use and occupancy of all proposed structures at the site, and thus design requirements, shall be the responsibility of the structural engineer and the building official.

CBC Earthquake Design Summary

The following earthquake design criteria have been formulated for the site utilizing the source referenced above. However, these values should be reviewed and the final design should be performed by a qualified structural engineer familiar with the region.

CBC 2016 SEISMIC DESIGN SUMMARY* Site Location (WGS 84) 33.8872, -117.2226, Occupancy Category II	
Site Class Definition Chapter 20 ASCE 7	D
S_s Mapped Spectral Response Acceleration at 0.2s Period, (Figure 1613.3.1(1))	1.500
S_1 Mapped Spectral Response Acceleration at 1s Period, (Figure 1613.3.3(2))	0.605

INFILTRATION TESTING AND TEST RESULTS

Two constant head infiltration tests were conducted within the general area proposed for the infiltration of runoff waters. Testing consisted of two test holes which were excavated using a hollow stem auger drill rig to depths of approximately 5 feet below the existing ground surface. The holes were 8-inches in diameter. Two inches of gravel was placed in the bottom of the holes and perforated plastic liners were placed into each hole. A 2-inch PVC pipe with a preset water level of 0.5 feet was inserted into each liner. A 5-gallon glass bottle was then inverted over each pipe with a vacuum seal in order to maintain a constant 0.5 feet of water with each hole. The volume of water used in a given time period was recorded at various time intervals to establish the infiltration rates.

Infiltration test results are summarized in the following table:

Test No.	Depth (ft.)*	Infiltration Rate** in/hr
I-1	4	0.10
I-2	4	0.10

* depth measured below existing ground surface
** clear water rate

The results of our infiltration testing are attached as Enclosures D-1 and D-2. The test results indicate poor infiltration characteristics for the soils tested.

CONCLUSIONS

General

This investigation provides a broad overview of the geotechnical and geologic factors which are expected to influence future site planning and development. On the basis of our field investigation and testing program, it is the opinion of LOR Geotechnical Group, Inc., that the proposed development is feasible from a geotechnical standpoint, provided the recommendations presented in this report are incorporated into design and implemented during grading and construction.

The subsurface conditions encountered in our exploratory borings are indicative of the locations explored. The subsurface conditions presented here are not to be construed as being present the same everywhere on the site. If conditions are encountered during the construction of the project which differ significantly from those presented in this report, this firm should be notified immediately so we may assess the impact to the recommendations provided.

Foundation Support

Based upon the field investigation and test data, it is our opinion that the existing fill/topsoil and fill soils will not, in their present condition, provide uniform and/or adequate support for the proposed improvements. Left as is, this condition could cause unacceptable differential and/or overall settlements upon application of the anticipated foundation loads.

To provide adequate support for the proposed structural improvements, we recommend that a compacted fill mat be constructed beneath footings and slabs.

This compacted fill mat will provide a dense, high-strength soil layer to uniformly distribute the anticipated foundation loads over the underlying soils. In addition, the construction of this compacted fill mat will allow for the removal of any undocumented fill soils that are present within the proposed building areas. Conventional foundation systems, using either individual spread footings and/or continuous wall footings, will provide adequate support for the anticipated downward and lateral loads when utilized in conjunction with the recommended fill mat.

Soil Expansiveness

Our laboratory testing found the soils tested to have a very low expansion potential. For very low expansive soils, no specialized construction procedures to resist expansive soil activity are necessary.

Careful evaluation of on-site soils and any import fill for their expansion potential should be conducted during the grading operation.

Sulfate Protection

The results of the soluble sulfate tests conducted on selected subgrade soils expected to be encountered at foundation levels indicate that there is a negligible sulfate exposure to concrete elements in contact with the on site soils per the 2016 CBC. Therefore, no specific recommendations are given for concrete elements to be in contact with the onsite soils.

Infiltration

The results of our field investigation and test data indicates the site soils are not conducive to infiltration or percolation. Therefore, water quality storm water systems should not incorporate on-site infiltration/percolation when determining storm water treatment capacity.

Geologic Mitigations

No special geologic recommendation methods are deemed necessary at this time, other than the geotechnical recommendations provided in the following sections.

Seismicity

Seismic ground rupture is generally considered most likely to occur along pre-existing active faults. Since no known faults are known to exist at, or project into the site, the probability of ground surface rupture occurring at the site is considered nil.

Due to the site's close proximity to the faults described above, it is reasonable to expect a strong ground motion seismic event to occur during the lifetime of the proposed development on the site. Large earthquakes could occur on other faults in the general area, but because of their lesser anticipated magnitude and/or greater distance, they are considered less significant than the faults described above from a ground motion standpoint.

The effects of ground shaking anticipated at the subject site should be mitigated by the seismic design requirements and procedures outlined in Chapter 16 of the California Building Code. However, it should be noted that the current building code requires the minimum design to allow a structure to remain standing after a seismic event, in order to allow for safe evacuation. A structure built to code may still sustain damage which might ultimately result in the demolishing of the structure (Larson and Slosson, 1992).

RECOMMENDATIONS

Geologic Recommendations

No special geologic recommendation methods are deemed necessary at this time, other than the geotechnical recommendations provided in the following sections.

General Site Grading

It is imperative that no clearing and/or grading operations be performed without the presence of a qualified geotechnical engineer. An on-site, pre-job meeting with the owner, the developer, the contractor, and geotechnical engineer should occur prior to all grading related operations. Operations undertaken at the site without the geotechnical engineer present may result in exclusions of affected areas from the final compaction report for the project.

Grading of the subject site should be performed in accordance with the following recommendations as well as applicable portions of the California Building Code, and/or applicable local ordinances.

All areas to be graded should be stripped of significant vegetation and other deleterious materials.

It is our recommendation that any existing fills under any proposed flatwork and/or paved areas be removed and replaced with engineered compacted fill. If this is not done, premature structural distress (settlement) of the flatwork and pavement may occur. Any undocumented fills encountered during grading should be completely removed and cleaned of significant deleterious materials. These may then be reused as compacted fill.

Cavities created by removal of undocumented fill soils and/or subsurface obstructions should be thoroughly cleaned of loose soil, organic matter and other deleterious materials, shaped to provide access for construction equipment, and backfilled as recommended in the following Engineered Compacted Fill section of this report.

Initial Site Preparation

Any and all existing uncontrolled fills and any loose/soft native alluvial soils should be removed from structural areas and areas to receive structural fills. The data developed during this investigation indicates that removals on the order of 5 to 7 feet will be required to encounter competent older alluvium. However, deeper removals may be required locally. Removals should extend horizontally at a distance equal to the depth of the removals plus proposed fill and at least a minimum of 5 feet. The actual depths of removals should be determined during the grading operation by observation and/or by in-place density testing.

Preparation of Fill Areas

After completion of the removals described above and prior to placing fill, the surfaces of all areas to receive fill should be scarified to a depth of at least 6 inches. The scarified soil should be brought to near optimum moisture content and compacted to a relative compaction of at least 90 percent (ASTM D 1557).

Preparation of Foundation Areas

All footings should rest upon a minimum of 24 inches of properly compacted fill material placed over competent natural alluvial soils. In areas where the required fill thickness is not accomplished by the removal of unsuitable soils, the footing areas should be further subexcavated to a depth of at least 24 inches below the proposed footing base grade, with the subexcavation extending at least 5 feet beyond the footing lines. The bottom of this excavation should then be scarified to a depth of at least 6 inches, brought to near

optimum moisture content, and recompacted to at least 90 percent relative compaction (ASTM D 1557) prior to refilling the excavation to grade as properly compacted fill. Fill areas should not be constructed so as to place structures across any area where the maximum depth of fill to minimum depth of fill is greater than a 3:1 ratio.

To provide adequate support, concrete slabs-on-grade should bear on a minimum of 24 inches of compacted soil. The final pad surfaces should be rolled to provide smooth, dense surfaces upon which to place the concrete.

Engineered Compacted Fill

The on-site soils should provide adequate quality fill material, provided they are free from organic matter and other deleterious materials. Unless approved by the geotechnical engineer, rock or similar irreducible material with a maximum dimension greater than 6 inches should not be buried or placed in fills.

Import fill, if required, should be inorganic, non-expansive granular soils free from rocks or lumps greater than 6 inches in maximum dimension. Sources for import fill should be approved by the geotechnical engineer prior to their use.

Fill should be spread in maximum 8-inch uniform, loose lifts, with each lift brought to near optimum moisture content prior to, during and/or after placement, and compacted to a relative compaction of at least 90 percent in accordance with ASTM D 1557.

Based upon the relative compaction of the near surface soils determined during this investigation and the relative compaction anticipated for compacted fill soil, we estimate a compaction shrinkage factor of approximately 10 to 15 percent. Therefore, 1.10 to 1.15 cubic yards of in-place materials would be necessary to yield one cubic yard of properly compacted fill material. Subsidence is anticipated to be 0.10 feet. These values are for estimating purposes only, and are exclusive of losses due to stripping or the removal of subsurface obstructions.

These values may vary due to differing conditions within the project boundaries and the limitations of this investigation. Shrinkage should be monitored during construction. If percentages vary, provisions should be made to revise final grades or adjust quantities of borrow or export.

Short-Term Excavations

Following the California Occupational and Safety Health Act (CAL-OSHA) requirements, excavations 5 feet deep and greater should be sloped or shored. All excavations and shoring should conform to CAL-OSHA requirements.

Short-term excavations 5-feet deep and greater shall conform to Title 8 of the California Code of Regulations, Construction Safety Orders, Section 1504 and 1539 through 1547. Based on our exploratory borings, it appears that Type C soil is the predominant type of soil on the project and all short-term excavations should be based on this type of soil. Deviation from the standard short-term slopes are permitted using Option 4, Design by a Registered Professional Engineer (Section 1541.1).

Short-term slope construction and maintenance are the responsibility of the contractor, and should be a consideration of his methods of operation and the actual soil conditions encountered.

Slope Construction

Preliminary data indicates that cut and fill slopes should be constructed no steeper than two horizontal to one vertical. Fill slopes should be overfilled during construction and then cut back to expose fully compacted soil. A suitable alternative would be to compact the slopes during construction, then roll the final slopes to provide dense, erosion-resistant surfaces.

Slope Protection

Since the site soils are susceptible to erosion by running water, measures should be provided to prevent surface water from flowing over slope faces. Slopes at the project should be planted with a deep rooted ground cover as soon as possible after completion. The use of succulent ground covers such as iceplant or sedum is not recommended. If watering is necessary to sustain plant growth on slopes, the watering system should be monitored to assure proper operation and to prevent over watering.

Foundation Design

If the site is prepared as recommended, the proposed structures may be safely founded on conventional shallow foundations, either individual spread footings and/or continuous wall footings, bearing on a minimum of 24 inches of engineered compacted fill.

All foundations should have a minimum width of 12 inches and should be established a minimum of 12 inches below lowest adjacent grade.

For the minimum width and depth, spread foundations may be designed using an allowable bearing pressure of 1,800 psf. This bearing pressure may be increased by 400 psf for each additional foot of width, and by 400 psf for each additional foot of depth, up to a maximum of 4,000 psf. For example, a footing 3 feet wide and embedded 2 feet will have an allowable bearing pressure of 3,000 psf.

The above values are net pressures; therefore, the weight of the foundations and the backfill over the foundations may be neglected when computing dead loads. The values apply to the maximum edge pressure for foundations subjected to eccentric loads or overturning. The recommended pressures apply for the total of dead plus frequently applied live loads, and incorporate a factor of safety of at least 3.0. The allowable bearing pressures may be increased by one-third for temporary wind or seismic loading. The resultant of the combined vertical and lateral seismic loads should act within the middle one-third of the footing width. The maximum calculated edge pressure under the toe of foundations subjected to eccentric loads or overturning should not exceed the increased allowable pressure. Buildings should be setback from slopes in accordance with the California Building Code.

Resistance to lateral loads will be provided by passive earth pressure and base friction. For footings bearing against compacted fill, passive earth pressure may be considered to be developed at a rate of 400 pounds per square foot per foot of depth. Base friction may be computed at 0.30 times the normal load. Base friction and passive earth pressure may be combined without reduction. These values are for dead load plus live load and may be increased by one-third for wind or seismic loading.

Settlement

Total settlement of individual foundations will vary depending on the width of the foundation and the actual load supported. Maximum settlement of shallow foundations designed and constructed in accordance with the preceding recommendations are estimated to be on the order of 0.5 inch. Differential settlements between adjacent footings should be about one-half of the total settlement. Settlement of all foundations is expected to occur rapidly, primarily as a result of elastic compression of supporting soils as the loads are applied, and should be essentially completed shortly after initial application of the loads.

Building Area Slab-On-Grade

Concrete floor slabs should bear on a minimum of 24 inches of engineered compacted fill placed over competent native materials. The final pad surfaces should be rolled to provide smooth, dense surfaces upon which to place the concrete.

Slabs to receive moisture-sensitive coverings should be provided with a moisture vapor barrier. This barrier may consist of an impermeable membrane. Two inches of sand over the membrane will reduce punctures and aid in obtaining a satisfactory concrete cure. The sand should be moistened just prior to placing of concrete. The slabs should be protected from rapid and excessive moisture loss which could result in slab curling. Careful attention should be given to slab curing procedures, as the site area is subject to large temperature extremes, humidity, and strong winds.

Exterior Flatwork

To provide adequate support, exterior flatwork improvements should rest on a minimum of 12 inches of soil compacted to at least 90 percent (ASTM D 1557).

Flatwork surface should be sloped a minimum of 1 percent away from buildings and slopes, to approved drainage structures.

Wall Pressures

The design of footings for retaining structures should be performed in accordance with the recommendations described earlier under Preparation of Foundation Areas and Foundation Design. For design of retaining wall footings, the resultant of the applied loads should act in the middle one-third of the footing, and the maximum edge pressure should not exceed the basic allowable value without increase.

For design of retaining walls unrestrained against movement at the top, we recommend an equivalent fluid density of 48 pounds per cubic foot (pcf) be used. This assumes level backfill consisting of recompacted, non-expansive, native soils placed against the structures and with the backcut slope extending upward from the base of the stem at 35 degrees from the vertical or flatter.

To avoid overstressing or excessive tilting during placement of backfill behind walls, heavy compaction equipment should not be allowed within the zone delineated by a 45 degree line extending from the base of the wall to the fill surface.

The backfill directly behind the walls should be compacted using light equipment such as hand operated vibrating plates and rollers. No material larger than 3-inches in diameter should be placed in direct contact with the wall.

Wall pressures should be verified prior to construction, when the actual backfill materials and conditions have been determined. Recommended pressures are applicable only to level, non-expansive, properly drained backfill (with no additional surcharge loadings).

If inclined backfills are proposed, this firm should be contacted to develop appropriate active earth pressure parameters. Toe bearing pressure for non-structural walls on soils, not prepared as described earlier under Preparation of Foundation Areas, should not exceed California Building Code values.

Sulfate Protection

The results of the soluble sulfate tests conducted on selected subgrade soils expected to be encountered at foundation levels are presented on Enclosure C.

Based on the test results it appears that there is a negligible sulfate exposure to concrete elements in contact with on site soils. The CBC, therefore, does not recommend special design criteria for concrete elements in conduct with such materials.

Preliminary Pavement Design

Testing and design for preliminary on-site pavement was conducted in accordance with the California Highway Design Manual. Based upon our preliminary sampling and testing, and upon Traffic Index indicated by the City of Moreno Valley Standard Plans (2018), it appears that the structural section tabulated below should provide satisfactory pavement for the subject pavement improvements:

AREA	T.I.	DESIGN R-VALUE	PRELIMINARY SECTION
Local Street	6.0	30	0.35' AC*/0.70' CAB
AC - Asphalt Concrete CAB - Crushed Aggregate Base * City of Moreno Valley minimum			

The above structural section is predicated upon 90 percent relative compaction (ASTM D 1557) of all utility trench backfills and 95 percent relative compaction (ASTM D 1557) of the upper 12 inches of pavement subgrade soils and of any aggregate base utilized.

In addition, the aggregate base should meet specifications for Crushed Aggregate Base.

In areas of the pavement which will receive high abrasion loads due to start-ups and stops, or where trucks will move on a tight turning radius, consideration should be given to installing concrete pads. Such pads should be a minimum of 0.5-foot thick concrete, with a 0.35-foot thick aggregate base. Concrete pads are also recommended in areas adjacent to trash storage areas where heavier loads will occur due to operation of trucks lifting trash dumpsters.

It should be noted that all of the above pavement design was based upon the results of preliminary sampling and testing, and should be verified by additional sampling and testing during construction when the actual subgrade soils are exposed.

Infiltration

Based upon our field investigation and infiltration test data, the site soils are not considered suitable for infiltration or percolation. Therefore water quality storm water systems should not incorporate on-site infiltration/percolation when determining storm water treatment capacity.

Construction Monitoring

Post investigative services are an important and necessary continuation of this investigation. Project plans and specifications should be reviewed by the project geotechnical consultant prior to construction to confirm that the intent of the

recommendations presented herein have been incorporated into the design. Additional expansion index, R-value, and soluble sulfate testing may be required during site rough grading.

During construction, sufficient and timely geotechnical observation and testing should be provided to correlate the findings of this investigation with the actual subsurface conditions exposed during construction. Items requiring observation and testing include, but are not necessarily limited to, the following:

1. Site preparation-stripping and removals.

2. Excavations, including approval of the bottom of excavation prior to filling.

3. Scarifying and recompacting prior to fill placement.

4. Subgrade preparation for pavements and slabs-on-grade.

5. Placement of engineered compacted fill and backfill, including approval of fill materials and the performance of sufficient density tests to evaluate the degree of compaction being achieved.

6. Foundation excavations.

LIMITATIONS

This report contains geotechnical conclusions and recommendations developed solely for use by Passco Pacifica, LLC, and their design consultants, for the purposes described earlier. It may not contain sufficient information for other uses or the purposes of other parties. The contents should not be extrapolated to other areas or used for other facilities without consulting LOR Geotechnical Group, Inc.

The recommendations are based on interpretations of the subsurface conditions concluded from information gained from subsurface explorations and a surficial site reconnaissance. The interpretations may differ from actual subsurface conditions, which can vary horizontally and vertically across the site. If conditions are encountered during the construction of the project which differ significantly from those presented in this report, this firm should be notified immediately in order that we may assess the impact to the recommendations provided.

Due to possible subsurface variations, all aspects of field construction addressed in this report should be observed and tested by the project geotechnical consultant.

If parties other than LOR Geotechnical Group, Inc., provide construction monitoring services, they must be notified that they will be required to assume responsibility for the geotechnical phase of the project being completed by concurring with the recommendations provided in this report or by providing alternative recommendations.

The report was prepared using generally accepted geotechnical engineering practices under the direction of a state licensed geotechnical engineer. No warranty, expressed or implied, is made as to conclusions and professional advice included in this report. Any persons using this report for bidding or construction purposes should perform such independent investigations as deemed necessary to satisfy themselves as to the surface and subsurface conditions to be encountered and the procedures to be used in the performance of work on this project.

TIME LIMITATIONS

The findings of this report are valid as of this date. Changes in the condition of a property can, however, occur with the passage of time, whether they be due to natural processes or the work of man on this or adjacent properties. In addition, changes in the Standards-of-Practice and/or Governmental Codes may occur. Due to such changes, the findings of this report may be invalidated wholly or in part by changes beyond our control. Therefore, this report should not be relied upon after a significant amount of time without a review by LOR Geotechnical Group, Inc. verifying the suitability of the conclusions and recommendations.

CLOSURE

It has been a pleasure to assist you with this project. We look forward to being of further assistance to you as construction begins. Should conditions be encountered during construction that appear to be different than as indicated by this report, please contact this office immediately in order that we might evaluate these conditions.

Should you have any questions regarding this report, please do not hesitate to contact our office at your convenience.

Respectfully submitted,
LOR Geotechnical Group, Inc.

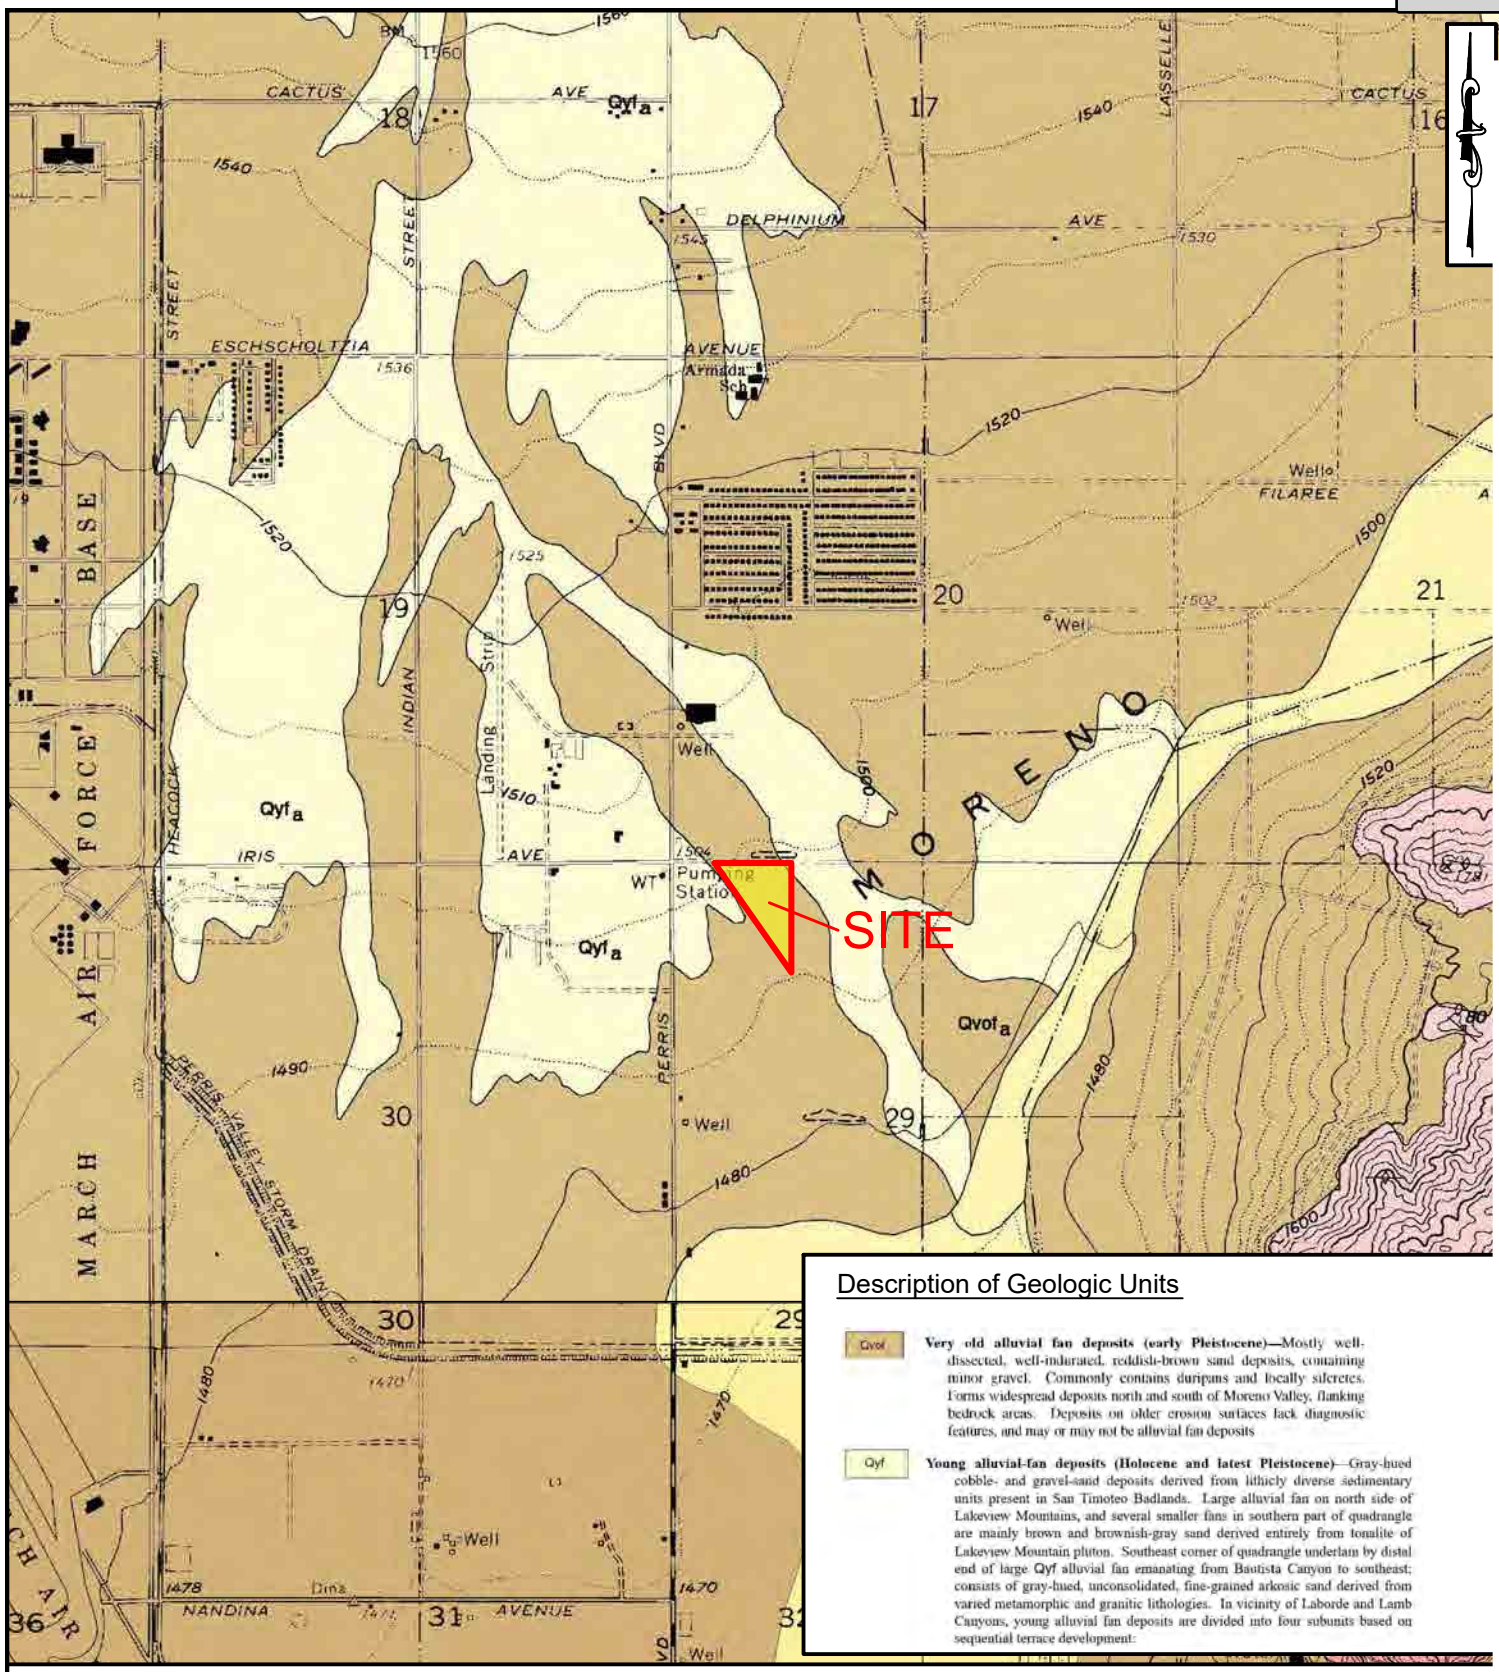
		SCALE:	1" ≈ 200'



Description of Geologic Units

Qvof — **Very old alluvial fan deposits (early Pleistocene)**—Mostly well-dissected, well-indurated, reddish-brown sand deposits, containing minor gravel. Commonly contains duripans and locally silcretes. Forms widespread deposits north and south of Moreno Valley, flanking bedrock areas. Deposits on older erosion surfaces lack diagnostic features, and may or may not be alluvial fan deposits

Qyf — **Young alluvial-fan deposits (Holocene and latest Pleistocene)**—Gray-hued cobble- and gravel-sand deposits derived from lithicly diverse sedimentary units present in San Timoteo Badlands. Large alluvial fan on north side of Lakeview Mountains, and several smaller fans in southern part of quadrangle are mainly brown and brownish-gray sand derived entirely from tonalite of Lakeview Mountain pluton. Southeast corner of quadrangle underlain by distal end of large Qyf alluvial fan emanating from Bautista Canyon to southeast; consists of gray-hued, unconsolidated, fine-grained arkosic sand derived from varied metamorphic and granitic lithologies. In vicinity of Laborde and Lamb Canyons, young alluvial fan deposits are divided into four subunits based on sequential terrace development:

U.S. Geologic Survey (2017a) real-time earthquake epicenter map. Plotted are 544 epicenters of instrument-recorded events from 1978 to present (11/20/19) of local magnitude M4.0 or greater within a radius of ~62 miles (100 kilometers) of the site. Location accuracy varies. The site is indicated by the green square. The selected magnitude corresponds to a threshold intensity value where very light damage potential begins. These evens are also generally widely felt by persons. Red lines mark the surface traces of known Quaternary-age faults.

APPENDIX B

Field Investigation Program and Boring Logs

APPENDIX B
FIELD INVESTIGATION

Subsurface Exploration

The site was investigated on November 7, 2019 and consisted of advancing 5 exploratory borings to depths between 21.5 feet and 51.5 feet below the existing ground surface. The approximate locations of the borings are shown on Enclosure A-2, within Appendix A.

The drilling exploration was conducted using a truck-mounted Mobile B-61 drill rig equipped with 8-inch diameter hollow stem augers. The soils were continuously logged by our geologist who inspected the site, created detailed logs of the borings, obtained undisturbed, as well as disturbed, soil samples for evaluation and testing, and classified the soils by visual examination in accordance with the Unified Soil Classification System.

Relatively undisturbed samples of the subsoils were obtained at a maximum interval of 5 feet. The samples were recovered by using a California split barrel sampler of 2.50 inch inside diameter and 3.25 inch outside diameter or a Standard Penetration Sampler (SPT) from the ground surface to the total depth explored. The samplers were driven by a 140 pound automatic trip hammer dropped from a height of 30 inches. The number of hammer blows required to drive the sampler into the ground the final 12 inches were recorded and further converted to an equivalent SPT N-value. Factors such as efficiency of the automatic trip hammer used during this investigation (80%), borehole diameter (8"), and rod length at the test depth were considered for further computing of equivalent SPT N-values corrected for field procedures (N60) which are included in the boring logs, Enclosures B-1 through B-5.

The undisturbed soil samples were retained in brass sample rings of 2.42 inches in diameter and 1.00 inch in height, and placed in sealed containers. Disturbed soil samples were obtained at selected levels within the borings and placed in sealed containers for transport to the laboratory.

All samples obtained were taken to our geotechnical laboratory for storage and testing. Detailed logs of the borings are presented on the enclosed Boring Logs, Enclosures B-1 through B-5. A Boring Log Legend and Soil Classification Chart are presented on Enclosures B-i and B-ii, respectively.

CONSISTENCY OF SOIL

SANDS

SPT BLOWS	CONSISTENCY
0-4	Very Loose
4-10	Loose
10-30	Medium Dense
30-50	Dense

APPENDIX C

Laboratory Testing Program and Test Results

APPENDIX C
LABORATORY TESTING

General

Selected soil samples obtained from our borings were tested in our geotechnical laboratory to evaluate the physical properties of the soils affecting foundation design and construction procedures. The laboratory testing program performed in conjunction with our investigation included in-place moisture content and dry density, laboratory compaction characteristics, direct shear, sieve analysis, sand equivalent, R-value, consolidation, expansion index, Atterberg limits, and soluble sulfate content. Descriptions of the laboratory tests are presented in the following paragraphs:

Moisture Density Tests

The moisture content and dry density information provides an indirect measure of soil consistency for each stratum, and can also provide a correlation between soils on this site. The dry unit weight and field moisture content were determined for selected undisturbed samples, in accordance with ASTM D 2922 and ASTM D 2216, respectively, and the results are shown on the Boring Logs, Enclosures B-1 through B-5 for convenient correlation with the soil profile.

Laboratory Compaction

Selected soil samples were tested in the laboratory to determine compaction characteristics using the ASTM D 1557 compaction test method. The results are presented in the following table:

LABORATORY COMPACTION				
Boring Number	**Sample Depth (feet)**	**Soil Description (U.S.G.S.)**	**Maximum Dry Density (pcf)**	**Optimum Moisture Content (percent)**
B-1	0-3	(SM) Silty Sand	134.0	8.5

Direct Shear Tests

Shear tests are performed with a direct shear machine in general accordance with ASTM D 3080 at a constant rate-of-strain (usually 0.04 inches/minute). The machine is designed to test a sample partially extruded from a sample ring in single shear. Samples are tested at varying normal loads in order to evaluate the shear strength parameters, angle of internal friction and cohesion. Samples are tested in a remolded condition (90 percent relative compaction per ASTM D 1557) and soaked, to represent the worst case conditions expected in the field.

The results of the shear tests are presented in the following table:

DIRECT SHEAR TESTS				
Boring Number	**Sample Depth (feet)**	**Soil Description (U.S.G.S.)**	**Angle of Internal Friction (degrees)**	**Apparent Cohesion (psf)**
B-1	0-3	(SM) Silty Sand	28	200

Sieve Analysis

A quantitative determination of the grain size distribution was performed for selected samples in accordance with the ASTM D 422 laboratory test procedure. The determination is performed by passing the soil through a series of sieves, and recording the weights of retained particles on each screen. The results of the sieve analyses are presented graphically on Enclosure C-1.

Sand Equivalent

The sand equivalent of selected soils were evaluated using the California Sand Equivalent Test Method, Caltrans Number 217. The results of the sand equivalent tests are presented with the grain size distribution analyses on Enclosure C-1.

R-Value Test

Soil samples were obtained at probable pavement subgrade level and was tested to determine its R-value using the California R-Value Test Method, Caltrans Number 301. The results of the R-value test is presented on Enclosure C-1.

Consolidation Tests

The apparatus used for the consolidation tests (odometer) is designed to test a one-inch high portion of the undisturbed soil sample as contained in a sample ring. Porous stones and filler paper are placed in contact with the top and bottom of the specimen to permit the addition or release of water. Loads are applied to the test specimen in specified increments, and the resulting axial deformations are recorded. The results are plotted as log of axial pressure versus consolidation or compression, expressed as strain or sample height.

Samples are tested at field and greater-than field moisture contents. The results are shown on Enclosures C-2 through C-5.

Expansion Index Tests

Remolded samples are tested to determine their expansion potential in accordance with the Expansion Index (EI) test. The test is performed in accordance with the Uniform Building Code Standard 18-2. The test results are presented in the following table:

EXPANSION INDEX TESTS

Boring Number	Sample Depth (feet)	Soil Description (U.S.C.S.)	Expansion Index (EI)	Expansion Potential
B-1	0-3	(SM) Silty Sand	11	Very Low

Atterberg Limits

Selected samples of the fine-grained soil units encountered at the site are tested for their Atterberg limits in accordance with ASTM D 4318. The results of these tests are presented on Enclosure C-6.

Soluble Sulfate Content Tests

The soluble sulfate content of selected subgrade soils was evaluated and the concentration of soluble sulfates in the soils was determined by measuring the optical density of a barium sulfate precipitate. The precipitate results from a reaction of barium chloride with water extractions from the soil samples. The measured optical density is correlated with readings on precipitates of known sulfate concentrations. The test results are presented on the following table:

SOLUBLE SULFATE CONTENT TESTS			
Boring Number	**Sample Depth (feet)**	**Soil Description (U.S.G.S.)**	**Sulfate Content (percent by weight)**
B-1	0-3	(SM) Silty Sand	< 0.0085

Re: Phase I Environmental Site Assessment
Iris Park
Iris Avenue, east of Perris Blvd.
Moreno Valley, CA 92551
Project No. 19004122

Dear: Mr. Graham:

In accordance with our accepted proposal, AES performed a walk-through survey of the above-referenced property on October 31, 2019. An electronic copy of the report is provided for your use. AES Due Diligence, Inc. is not affiliated with the client or any other parties to this transaction.

We appreciate the opportunity to provide consulting services to you. If you have any questions, please contact our Corporate Office at (858) 569-0211.

Very truly yours,

AES DUE DILIGENCE, INC.

Robert Presta, MBA, President
Registered Environmental Assessor in the former EPA Program

Environmental Professional Statement

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a site of the nature, history, and setting of the subject site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

II OBJECTIVE AND SCOPE

Objective

The purpose of this Phase I Environmental Site Assessment is to identify recognized environmental conditions that may have an impact on the subject site, using readily available sources of information, interviews and field observations. It is our understanding the Client intends to acquire the site.

Procedures

This Assessment is a Phase I Environmental Site Assessment (ESA) for the improvements located at Iris Avenue, east of Perris Boulevard in Moreno Valley, CA 92551, performed in general accordance with ASTM Designation E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and following the Scope of Work outlined in AES Due Diligence, Inc.'s proposal. AES Due Diligence, Inc. (AES) conducted on-site observations on October 31, 2019, interviewed site operations personnel and observed adjacent properties. Environmental Data Resources, Inc. (EDR) conducted database searches following ASTM guidelines. Such searches are generally limited to a radius of one mile from the subject site. Additionally, ASTM Non-Scope items are addressed in this Assessment, including Asbestos, Lead-Based Paint, Radon Gas, Mold, Wetlands and Lead in Drinking Water. No testing was conducted for ASTM Non-Scope items.

Limitations

The purpose of the Phase I ESA of the site is to address the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. If requested by the Client, certain non-scope business environmental risks are addressed in the Assessment. The Phase I ESA is intended to allow the Client to satisfy one of the requirements to qualify for the innocent landowner defense, contiguous property Owner or bonafide prospective purchaser limitations on CERCLA liability: i.e. the practice that constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 USC § 9601(35)(B). The Phase I ESA does not address whether requirements in addition to appropriate inquiry were met in order to qualify for CERCLA's innocent landowner defense.

The objectives of the Phase I ESA are as follows:

1. Evaluate if recognized environmental conditions (REC), controlled recognized environmental conditions (CREC), historic recognized environmental conditions (HREC) or *de minimis* environmental conditions are present on the site.

2. Provide sufficient documentation of sources, records and resources utilized in conducting the Phase I ESA.

3. Prepare a professional opinion regarding the presence of RECs at the site.

Special Terms and Conditions

The Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the site.

A Phase I ESA attempts to identify the environmental conditions of the site and vicinity. Environmental conditions and regulations are subject to change and re-interpretation. Current conditions or regulatory requirements should not be assumed to continue to represent conditions at some future time. This Assessment represents AES's professional judgments and opinions based on information presented in this Assessment and no warranty, either expressed or implied, are contained herein.

Limitations and Exceptions of Assessment

The surface conditions of the site were noted by visual observations or information obtained during interviews. No physical testing, soil/groundwater sampling or laboratory analysis was included unless otherwise noted in the Assessment.

The executive summary was prepared for the convenience of the users of this Assessment. This summary does not contain all the information presented in this Assessment and, therefore, the entire Assessment should be read to assure all pertinent information is transmitted.

AES performed the Phase I ESA of the site in substantial conformance with the scope and limitations of ASTM E 1527-13, Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process* unless otherwise noted in the Assessment. Certain environmental conditions may exist on a site that are beyond the scope of the Standard but may warrant consideration. Per the Standard, this environmental site assessment is presumed to be valid for a specific time limit as defined in ASTM Designation E-1527-13.

AES utilized the following methods to complete the reconnaissance of the site. AES observed the site and adjoining properties for indicators of existing or potential recognized environmental conditions. The site walkover consisted of walking the site boundary and several transects across the site. For a site with buildings, the accessible areas of the buildings were entered and observed. Please note that AES did not look under floors, above ceilings or inside walls. The adjoining properties were observed from the periphery of the site, if possible. The observations were documented with representative photographs.

The following limiting conditions were encountered during the course of the Phase I ESA:

- The questionnaire was not returned.

However, this did not preclude AES from developing an opinion regarding the environmental condition of the site.

Documents

Our Assessment represents our professional experience and judgment, and a good faith effort to obtain all available information. Documents and data provided by the Client, its designated representatives, or other interested parties, and consulted in the preparation of this Assessment, have been reviewed and may be referenced herein, with the understanding that AES assumes no responsibility or liability for their accuracy or for the withholding by any of the involved parties of any assessments or other information that could affect the transaction.

Intended Use

AES Due Diligence, Inc. is not affiliated with the borrower or any other parties to this transaction. This Assessment is intended to be used in its entirety. No portion of it may be deleted or used out of context without the written consent of AES. The opinions and information contained in this Assessment are time sensitive and represent our evaluation of the environmental site conditions at the time the services were provided. This Assessment was prepared for a limited use involving a single transaction, as set forth herein, and may not be used for any other purpose without the written consent of AES.

Proprietary Information

Field data, field notes, and other data and documents assembled by AES to produce this Assessment represent the work product of AES's training, experience and professional skill. This information belongs to and remains the property of AES Due Diligence, Inc.

Definitions

ASTM defines a Recognized Environmental Condition (REC) as ”the presence or likely presence of an hazardous substance or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.”

A Controlled Recognized Environmental Condition (CREC) is defined as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, of meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

A Historic Recognized Environmental Condition (HREC) is defined as ”a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

A *de minimis* environmental condition “generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.” Conditions determined to be *de minimis* are not a REC.

Business Environmental Risk (BER) is a risk, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the parcel of commercial real estate, not necessarily limited to those environmental issues investigated in this Phase I ESA. Business environmental risk issues may involve addressing one or more non-scope considerations.

III PROPERTY DESCRIPTION

Site Visit and Interviews

On October 31, 2019, AES visited the subject site and reviewed the fixed facility. No one accompanied Richard E. Darwicki of AES during the site visit.

AES observed the vacant property at the specified location. AES looked for underground and aboveground storage tanks, unusual surface appearances, wetlands and other issues that may indicate environmental conditions on the subject site. AES noted the location of on-site storm drainage structures where these were encountered. AES observed sites adjoining the subject site and areas within the immediate vicinity of the subject site.

AES photographed selected features at or near the subject site to support this written Assessment. The photographs are identified, described and appended to this Assessment.

Subject Site

The project is situated on one parcel estimated to total approximately 10.8 acres. The site is located on Iris Avenue, east of Perris Boulevard in Moreno Valley, CA 92551. There is a California Aqueduct easement along the southwest property line. The buildable portion of the lot is indicated to be 7.80 acres. No improvements have been completed at the subject site. The site is planned for residential development.

According to the EDR Database Report the topography of the site is gently sloping to the southeast. The site has a maximum surface elevation difference of approximately 10 feet.

There is a dirt road along the southwest property line but no paved areas on the site.

Utility services that will be providing service to the subject site include the Southern California Edison Company as the electrical supplier; Southern California Gas Company as the natural gas supplier; and municipal water, storm drain and sanitary sewer services from buried utilities along the adjacent thoroughfares.

Building

No buildings are currently located on the subject site.

Adjoining Properties

Properties immediately adjoining the subject site are listed in the following table. The adjoining properties are located in Moreno Valley, CA 92551.

Adjoining Properties			
Name	**Operation**	**Direction from Site**	**Concerns**
Iris Avenue Homes Beyond	Single-Family Residential	North	None
Homes Along Ebony Avenue	Single-Family Residential	East	None
Val Verde Academy 25100 Red Maple Lane	School	Southwest	EnviroStor
IHOP 16080 Perris Blvd	Restaurant	Southwest	None
KFC 16040 Perris Blvd.	Restaurant	Southwest	None
Ortiz Beauty Salon 15974-F Perris Blvd.	Commercial Uses	Northwest	None

The database listings are discussed in the Database Records Review section of this Report. Because of the controlled surface drainage and the predominantly non-hazardous uses on the adjoining properties, they do not, in our opinion, pose a significant environmental risk to the subject site. The above referenced sites with environmental concerns are discussed in the Environmental Records Review section of this Report.

Vicinity

AES observed other properties located near the subject site for current uses or conditions that might be environmentally significant. The local area properties observed by AES did not appear to be engaged in environmentally significant activities.

Topography and Hydrogeology

AES reviewed the United States Geological Survey (USGS) Topographic Map, which indicates that the subject site is approximately 1,500 feet above mean sea level. AES observed that the general drainage flows in a southeasterly direction across the surface of the site. No substantial grade changes appear to have been made to the subject site when compared to the topography of surrounding sites. A copy of the USGS topographic map that covers the subject site is appended.

AES did not observe site grading activities at the site. The lot has been cleared and has a slight weed growth.

Geology and Surficial Soils

According to the EDR Database Report, the subject site is located above Mesozoic era plutonic and intrusive bedrock. The depth to bedrock is unknown.

According to the information obtained through the EDR Database Report, the subject site is located in an area of sandy loam soils. These soil types have moderate permeability and would be expected to have moderate susceptibility as a result of surface spreading of wastes, depending upon local soil conditions

Surface and Ground Water Flow

The regional surface water flows in a southeasterly direction according to the EDR Database Report. The ground water flow in the area is assumed to be to the southeast. The depth to ground water is 70 feet below ground surface.

IV SITE HISTORY

No Environmental Reports prepared by others were provided to AES for review. AES conducted a limited historical review regarding the subject site. The following summarizes AES's review of readily available historical records and maps gathered from government agencies and commercial enterprises regarding the subject site history and use. This should not be considered a listing of all available information.

Interviews

Mr. Graham indicated that the subject site was used for agricultural purposes and is now vacant land.

Building Department Records Review

No permits or Certificates of Occupancy for improvements were found in the City records reviewed.

Regulatory Agency File Review

AES filed Freedom of Information Act requests with the following agencies: None

We searched the State Water Resources Control Board records using the GeoTracker website.

Aerial Photograph and Historical Map Review

Aerial photographs are reviewed to identify past site use and areas of environmental concern on the subject site. AES has reviewed aerial photographs of the subject site. The photographs were obtained from Environmental Data Resources. Copies of the aerial photographs that were obtained and reviewed by AES are appended. Please see chart below for the specific dates and description summary.

Beginning in the 1860s, the Sanborn Fire Insurance Company, and others, prepared maps that depict site improvements and commercial activities in many metropolitan areas in the United States. AES attempted to obtain fire insurance maps, specific to the site, to review as part of this Phase I Environmental Site Assessment. According to EDR, no Sanborn Maps were produced for this site.

Historical maps provide information concerning historical site boundaries and improvements. Historic Topographic Maps were reviewed for the site; please see the chart below for enumeration of years and findings.

The historical maps reviewed were obtained from EDR and are appended.

Site History Summary		
Date	**Record Type**	**Land Use**
1901	Historical Topographic Map	Undeveloped land
1942	Historical Topographic Map	Undeveloped land
1943	Historical Topographic Map	Undeveloped land
1953	Historical Topographic Map	Undeveloped land
1967	Historical Topographic Map	Undeveloped land
1967	Aerial Photograph	Agricultural uses
1973	Historical Topographic Map	Undeveloped land
1978	Aerial Photograph	Agricultural uses
1979	Historical Topographic Map	Undeveloped land
1985	Aerial Photograph	Agricultural uses
1989	Aerial Photograph	Cleared land, residential developments to north and east
1997	Aerial Photograph	Vacant land to southwest, residential to north and east
2002	Aerial Photograph	Vacant land to southwest, residential to north and east
2006	Aerial Photograph	Vacant land, school site under development to the southwest
2006	Aerial Photograph	Vacant land, current adjacent properties
2012	EDR Topographic Map	No buildings plotted
2016	Aerial Photograph	Vacant land, current adjacent properties

Based on AES's interpretation of the available documentation noted above the first developed and historic site use was primarily agricultural uses. Agricultural uses were first noted on the aerial map beginning in 1967.

No evidence of long-term fill activity, surface scarring, staining or other issues of environmental concern were visible in the aerial photographs during the review process.

Directories

City directories often provide information concerning historical site ownership and use. City Directories were reviewed for the years 1971 through 2014, in roughly five-year intervals. No significant listing was found. A copy of the City Directory Abstract is appended.

Title Records Review

A title records review, or chain-of-title, can be used to identify prior ownership of a property and to evaluate previous activities or operations in terms of environmental significance. Significant easements, covenants, restrictions and environmental liens may be indicated in title records. A chain-of-title regarding the subject site was not provided to AES for review as part of this Phase I Environmental Site Assessment. A Preliminary Title Commitment was provided by Chicago Title Company. No environmental concerns were noted and a copy is appended.

Document Review

No reports or other documents were provided for review by AES.

Data Gaps

The history and land use of the subject site has been determined by review of available historical aerial photographs, city directories, old topographic maps, personal interviews, public agency records, and other available resources. This history has been extended back as far as "it can be shown that the property contained structures or from the time the property was first used for residential, agricultural, commercial, industrial or governmental purposes." Necessary and available historical resources (aerial photographs, fire insurance maps, USGS topographic maps, historical city directories, building department records, zoning/land use records, interviews, etc.) were reviewed to establish a thorough land use history in order to identify historical environmental conditions. The following is a list of data gaps (insufficient data) and associated potential environmental significance:

No Data Gaps (insufficient data) were identified by AES for the subject site.

V ENVIRONMENTAL SITE ASSESSMENT

Fixed Facilities Review

No improvements to the subject site were observed by AES on October 31, 2019.

No asbestos containing materials or lead based paint were observed on the subject site.

No landscape maintenance services are performed on the subject site, and no landscape equipment is stored on the subject site. Neither automotive nor landscape equipment is maintained at the subject site.

Site Tenant Activities

AES observed no tenants or structures on the subject site.

AES confirmed the general nature of activities within the site boundaries. Past use of the site is indicated to have been agricultural based on a review of aerial photographs reviewed for this report.

Upon review of the activities at the above locations, AES found no specific environmental concerns regarding these operations.

On-Site Chemical and Petroleum Product Storage

AES looked for chemicals, hazardous substances, petroleum-based fuels and lubricants, and janitorial and cleaning supplies stored on the subject site. No chemicals or hazardous substances were observed on the subject site. The site is generally free of debris and illegal dumping.

Waste Disposal Practices

AES identified no wastes generated at the subject site.

Underground and Aboveground Storage Tanks

Owners and operators of certain USTs are required to register those USTs with the state agency responsible for administering the federally mandated UST program. A search of the list of registered USTs in California, prepared by EDR, showed that there are no registered USTs located on the subject site.

AES observed no presence of USTs and ASTs on the subject site. We found no records of USTs and no records of ASTs currently on the subject site.

AES visually observed the subject site for surficial evidence of USTs and ASTs. AES did not observe evidence of USTs or ASTs at the subject site.

There is an underground portion of the California Aqueduct in an easement along the southwest property line.

Polychlorinated Biphenyls (PCBs)

Federal regulations put into effect following the Toxic Substances Control Act (TSCA) require that electrical transformers be labeled to identify their PCB content. Manufacture and distribution of PCBs was banned in 1979. Transformer owners are responsible for compliance with all applicable regulations governing those transformers, including maintenance of the transformer and any remediation work resulting from a transformer-related incident.

No electrical transformers are provided on site.

Exterior Surface Condition

AES observed the exterior surface of the subject site. It is estimated that no portion of the subject site surface was covered by improvements and pavement. AES's observation of the site soil surfaces included the entire site.

None of the historical documentation reviewed, indicated that the subject site was previously utilized as a quarry and/or solid waste disposal facility.

No pits, ponds or lagoons were observed at the subject site during the site visit. No areas of distressed or dead vegetation, surface depressions or surface stains attributed to chronic leaks or spills were observed during the site visit.

Interior Surface Condition

AES observed no interior surfaces for evidence of unusual conditions. The site has no structures and is vacant land. The 1979 U.S. Geological Survey topographic map illustrates a pipeline trending northwest-southeast. According to the city of Moreno Land Development, this pipeline is an aqueduct that water passes through.

Vapor Encroachment Condition (VEC)

A Vapor Encroachment Screening was performed for the subject site following the guidelines of ASTM E2600-10, Tier 1 Vapor Encroachment Screening. The screening consists of an initial search of all standard government record databases and EDR's proprietary historical records related to former dry cleaners, gas stations and manufactured gas plants within the 1/3 mile radius (default Area of Concern-AOC). Based on local ground water flow direction knowledge, AES reduced the AOC by the Buonicore Method. Individual facilities within the remaining AOC were evaluated.

Based on this evaluation, a VEC can be ruled out because a VEC does not exist or is not likely to exist.

VI DATABASE RECORDS REVIEW

Environmental Records Review

An environmental records database search report dated October 25, 2019, was provided by Environmental Data Resources (EDR). A copy of EDR's report is appended. The following discussion excerpts specific items from the report that deserve additional description.

In addition to the mapped sites in the EDR report, there may also be a list of unmapped sites. These are reported database sites that, due to incomplete addressing information, could not be accurately plotted by EDR. In an attempt to locate all unmappable sites, AES compared each address provided on the unmappable site list to known addresses of the site and vicinity and attempted to locate unmappable sites during reconnaissance of the vicinity. AES concludes that no unmappable sites were identified that meet the search radius criteria of the scope of work and are considered to be environmentally significant to the subject site.

Superfund Enterprise Management System (SEMS) – Formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

Since 1982, the U.S. EPA has maintained lists of contaminated sites under the federal Superfund Program in accord with the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA). The U.S. EPA discovers these sites from citizen reports, routine inspection of hazardous waste generators, treatment, storage and disposal facilities, and reporting requirements.

Superfund Enterprise Management System (SEMS) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Review of the SEMS list provided by EDR identifies no SEMS sites within the approximate minimum search distance of one-half mile from the subject site.

Federal CERCLIS-NFRAP List (SEMS Archive)

CERCLA sites designated No Further Remedial Action Planned (NFRAP) have been removed from CERCLIS. CERC-NFRAP sites may be where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the National Priorities List (NPL), or the contamination was not serious enough to require Federal Superfund action or NPL consideration. CERCLIS-NFRAP sites, however, may continue to represent a concern to local or state regulators. CERCLIS-NFRAP was renamed to SEMS Archive by the EPA in 2015.

Review of the SEMS Archive list provided by EDR identifies no SEMS Archive sites within the approximate minimum search distance of one-half mile from the subject site.

National Priorities List

The U.S. EPA maintains this list as a subset of CERCLIS, identifying over 1,200 CERCLA sites for priority cleanup under the Superfund Program. Once sites have been designated on the CERCLIS list, the U.S. EPA uses its Hazard Ranking System to determine the potential risks of those sites to human health and the environment. Only the sites that present the greatest risk are added to the NPL, which qualifies the sites to receive CERCLA remedial funding.

Review of the NPL list provided by EDR identifies no NPL sites within the approximate minimum search distance of one mile from the subject site.

RCRA – Generators

The U.S. EPA's RCRA (Resource Conservation and Recovery Act, 42 U.S.C. '6991 *et seq.*) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. Generators are also listed in the FINDS database.

Review of the RCRA LQ-Generator list provided by EDR identifies only one RCRA-LQG site listed. There are no RCRA-LQG facilities on the subject site and there are no RCRA-LQG facilities on adjoining properties.

RCRA-Large Quantity Generator Facilities Noted on EDR Report

Facility Name	Location			Violation Status	TSDF Status
	Distance	Direction	Gradient		
Walgreens #9616	0.061 mi.	West	Cross	No Violations	Not TSDF

The above referenced RCRA LQ-Generator facility was evaluated based on the following criteria: violator status, area geology, gradient relationship and separation distance. Based on this evaluation, and due to their regulated nature, it is believed that this does not represent an environmental concern to the subject site.

Review of the RCRA SQ-Generator list provided by EDR identifies a total of three RCRA-SQG sites listed. There are no RCRA-SQG facilities on the subject site and there are no RCRA-SQG facilities on adjoining properties.

RCRA-Small Quantity Generator Facilities Noted on EDR Report					
Facility Name	Location			Violation Status	TSDF Status
	Distance	Direction	Gradient		
Shell Service Station	0.076 mi.	WNW	Up	No Violations	Not TSDF
Malek Ayass	0.093 mi.	WNW	Up	No Violations	Not TSDF
Home Depot	0.141 mi.	WNW	Up	No Violations	Not TSDF

The above referenced RCRA SQ-Generator facilities were evaluated based on the following criteria: violator status, area geology, gradient relationship and separation distance. Based on this evaluation, and due to their regulated nature, it is believed that this does not represent an environmental concern to the subject site.

RCRA - Treatment, Storage, Disposal Facilities (TSD)

The Resource Conservation and Recovery Act Information System (RCRIS) is a compilation of selective information on facilities that generate, store, transport, treat or dispose of hazardous waste. Inclusion of a facility on the RCRIS database is not necessarily an indication of an environmental problem.

Review of the RCRIS-TSD list provided by EDR identifies no RCRIS-TSD sites within the approximate minimum search distance of one mile from the subject site.

Emergency Response Notification System (ERNS)

The ERNS is a compilation of reported releases of hazardous substances into the environment. The database contains information from Spill reports made to federal authorities, including the U.S. EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation.

Review of the ERNS list provided by EDR identifies no ERNS listings adjacent to or at the subject site.

Underground Storage Tanks (USTs)

Certain USTs are regulated under the RCRA Act, and must be registered with the state agency responsible for administering the UST program. USTs are also listed in the CA FID database. Inclusion of a facility on the UST database is not necessarily an indication of an environmental problem.

Review of the list provided by EDR identifies a one site within a search radius of one-quarter mile. There are no facilities on the subject site and there are no facilities on adjoining properties.

The above referenced facility is a Shell gas station with a leaking tank at 15980 Perris Boulevard. Leaking tanks are discussed in the following section.

Leaking Underground Storage Tanks (LUSTs)

LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. LUSTs are also listed in the CORTESE database.

Review of the list provided by EDR identifies a total of four listings at two unique addresses within the ASTM standard minimum search distance of one-half mile from the subject site. There are no facilities on the subject site and there are no facilities on adjoining properties.

The Shell Station located at 15980 Perris Boulevard has been impacted by a petroleum release that impacted groundwater. Groundwater flow from the Shell station is to the southeast. Depth to groundwater is 70 feet below ground surface. Groundwater samples from monitor well, MW-8, located in the northeast corner of the intersection of Iris Avenue and Perris Boulevard, contained detectable gasoline range hydrocarbons (C_4-C_{12}) and no detectable benzene, toluene, xylene and ethylbenzene. Based on these conditions, the Shell station subsurface contamination is not expected to migrate beneath the subject site.

Registered LUST Facilities

Facility Name and Address	Location			Material Released	Reported Impact and Current Status
	Distance	Direction	Gradient		
Shell Perris Blvd. 15980 Perris Blvd.	0.076 mi.	WNW	Up	Gasoline	Soil only, leak being confirmed 2004
Shell Service Stn. 15980 Perris Blvd.	0.076 mi.	WNW	Up	Gasoline	Aquifer affected, Open case, monitoring on going.
ARCO#5764 16466 Perris Blvd.	0.335 mi.	SSW	Down	Gasoline	Soil only, leak being confirmed 2003
ARCO#5764 16466 Perris Blvd.	0.335 mi.	SSW	Down	Gasoline	Case Closed 11/30/2004

NA – Information not provided in the EDR report

The above referenced facilities were evaluated based on the following criteria: violator status, area geology, gradient relationship, and separation distance. Based on this evaluation, and due to their regulated nature, it is believed that this does not represent an environmental concern to the subject site.

Solid Waste Facilities/Landfills (SWF/LS)

Solid waste records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Section 2004 criteria for solid waste landfills or disposal sites.

Review of the list provided by EDR identifies no sites within the approximate minimum search distance of one-half mile from the subject site.

EnviroStor

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Review of the list provided by EDR identifies a total of two sites within the ASTM standard minimum search distance of one mile from the subject site. There are no facilities on the subject site and there is one facility on adjoining properties. The Indian Middle School is shown as over ½-mile distant and had DDT removal performed in 2006. The Red Maple School Site (Val Verde Unified School District) adjoining the Subject site was a School Investigation where agricultural row crops historically were grown. No contaminants were found. Completion was noted in the EDR report as November 29, 2001.

The above referenced facilities were evaluated based on the following criteria: violator status, reported status of past investigation on adjacent property, area geology, gradient relationship and separation distance. Based on this evaluation, and due to their regulated nature, it is believed that this does not represent an environmental concern to the subject site.

DEED (Institutional Controls)

Site Mitigation and Brownfield's Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfield's Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Review of the list provided by EDR identifies no sites within the approximate minimum search distance of one mile from the subject site.

California Hazardous Material Incident Reporting System (CHMIRS)

The California Office of Emergency Services database contains reported information on incidents involving accidental releases or spills of hazardous materials.

Review of the list provided by EDR identifies no listings adjacent to or at the subject site.

Hazardous Waste and Substances Sites List (CORTESE)

The Cal-EPA publishes a listing of potential and confirmed hazardous waste sites throughout the State of California. Under California Government Code Section 65962.5, these sites are submitted to the Cal-EPA by the State Department of Health Services, State Water Resources Control Board, the Integrated Waste Management Board and the Department of Toxic Substances Control.

The database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release, and all solid waste disposal facilities from which there is a known migration.

Review of the list provided by EDR identifies one site within the ASTM standard minimum search distance of one-half mile from the subject site. There are no facilities on the subject site and there are no facilities on adjoining properties. The site is the formerly discussed Shell Service Station LUST facility at 15980 Perris Boulevard.

The above referenced facility was evaluated based on the following criteria: violator status, area geology, gradient relationship and separation distance. Based on this evaluation, and due to their regulated nature, it is believed that this does not represent an environmental concern to the subject site.

VCP (Voluntary Cleanup Program)

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Review of the list provided by EDR identifies no listings adjacent to or at the subject site.

Hazardous Waste Information System (HAZNET)

The California Department of Health Services, Toxic Substances Control Division, has developed and maintained lists of hazardous waste generators and hazardous waste treatment, storage and disposal facilities in the State of California, in accordance with the Hazardous Waste Control Law (California Health and Safety Code Section 25100 *et seq.*) And the Hazardous Waste Management Act of 1976 (California Health and Safety Code Section 25179.1 *et seq.*). Inclusion of a facility in the HAZNET list is not necessarily an indication of an environmental problem.

Additionally, the California Health and Safety Code requires all counties to prepare and submit hazardous waste management plans. To assist the counties, the Toxic Substances Control Division maintains lists containing hazardous waste generation and disposal data within each county. The Toxic Substances Control Division has assembled this information from manifest reports required from hazardous waste generators. This database currently lists over 20,000 facilities in the State of California.

Review of the list provided by EDR identifies no listings adjacent to or at the subject site.

Historic USTs

The Hazardous Substance Storage Container Database is a historical listing of former UST sites that are closed and typically not listed with the current UST sites.

Review of the list provided by EDR identifies no listings adjacent to or at the subject site.

EDR Historical Auto Service Stations

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

Review of the list provided by EDR identifies no listings adjacent to or at the subject site.

Dry Cleaners and EDR Historical Dry Cleaners

This database provides a list of drycleaner facilities that have EPA ID numbers. These facilities have certain SIC codes including: power laundries, family and commercial; garment pressing and cleaner's agents; linen supply; coin-operated laundries and cleaning; dry cleaning plants, except rugs; carpet and upholstery cleaning; industrial launderers and laundry and garment services.

Review of the list provided by EDR identifies a total of six listings for two unique addresses. There are no facilities on the subject site and there are no facilities on adjoining properties.

The above referenced facilities were evaluated based on the following criteria: violator status, area geology, gradient relationship and separation distance. Based on this evaluation, and due to their regulated nature, it is believed that this does not represent an environmental concern to the subject site.

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, Laundromat, cleaning/laundry, wash & dry etc.

Review of the list provided by EDR identifies no Historical Dry Cleaner listings adjacent to or at the subject site.

Waste Management Unit Database System (WMUDS/SWAT)

The California Integrated Waste Management Board maintains an inventory list of both open as well as closed and inactive solid waste disposal facilities and transfer stations in accordance with the Solid Waste Management and Resource Recovery Act of 1972, California Government Code Section 2.66790(b). Generally, the California Integrated Waste Management Board learns of locations of disposal facilities through permit applications and from local enforcement agencies. The Waste Management Unit Database System is used by the California Water Resources Control Board and the Regional Water Quality Control Boards for program tracking and inventory of waste management units.

Review of the latest WMUDS/SWAT listing identifies no WMUDS/SWAT facilities within the approximate minimum search distance of one-half mile from the subject site.

Manufactured Gas Plants (MGP)

Manufactured Gas Plants produced combustible gas for urban use prior to the widespread use and pipeline distribution of natural gas in the 1950s. The main fuels used in production of this gas were coke, coal and oil; the by-products of this manufacturing process include a variety of tars, sludge and other chemicals. MGP sites tend to have subsurface contamination due to the common practice of disposing of the waste products on site.

Review of the MGP list provided by EDR identifies no MGP sites within the approximate minimum search distance of one mile from the subject site.

US Brownfields

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields.

Review of the list provided by EDR identifies no sites within the approximate minimum search distance of one-half mile from the subject site.

Federal Superfund Lien Searches

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Review of the list provided by EDR identifies no listings adjacent to or at the subject site.

In, addition, there are no Federal, State or non-priority liens on the subject property listed in the EDR Database Report or Activity and Use Limitations (AULs) associated with the subject site.

VII ASTM NON-SCOPE ITEMS

Asbestos

In 1977, the U.S. EPA acted to eliminate friable asbestos from building materials. Friable materials are defined as those that can be crushed or reduced to powder by hand pressure. Materials do not have to be damaged to be identified as friable. Additionally, the United States Occupational Safety and Health Administration (OSHA) now requires certain untested materials to be presumed to contain asbestos for buildings constructed prior to 1981.

During the site visit, AES observed vacant land with no building on site. No documents were provided for review. There was no visible construction and no signs of asbestos containing materials were observed.

No sampling or analytical testing of ASTM Non-Scope items was conducted.

Lead Based Paint

In 1978, the Consumer Product Safety Commission banned the use of lead as an additive in paint. During the site visit, there was vacant land with no signs of painted structures or empty cans.

Potable Water Supply

The subject site is serviced by a municipally operated, public water system, which is regulated by the Safe Drinking Water Act of 1974. This Act requires that public water supplies be tested for the presence of lead in water. AES contacted the local water utility company, the City of Moreno Valley, regarding the results of water tests. The utility company reports that the lead content of the water is below the U.S. EPA action level of 0.015 milligrams per liter.

Radon Gas

Radon gas is a naturally occurring, colorless, odorless gas that is the by-product of the decay of radioactive materials found within bedrock and soil. Radon gas enters buildings through cracks, structural joints, and plumbing openings in floor levels that are in direct contact with the soil. Radon gas, when inhaled, has been found to be carcinogenic in some humans. The U.S. EPA recommended action level for radon gas is 4.0 pCi/L (picoCuries per liter).

The State of California, in conjunction with the U.S. EPA, has conducted residential screening tests in Riverside County. The results of that screening indicate that Riverside County is predicted to have an average indoor radon screening level of 1.7 pCi/L, with 100% of tests less than 4.0 pCi/L.

AES reviewed the U.S. EPA's Map of Radon Zones for California, which identifies Riverside County as being within radon zone 2. Counties within radon zone 2 have a predicted average indoor radon gas screening level of between 2 and 4 pCi/L.

Based on the literature reviewed, it is our opinion that the risk of radon gas accumulation is not a significant environmental concern at the subject site.

No sampling or analytical testing of ASTM Non-Scope items was conducted.

Wetlands

AES did not observe ponded water, flowing water, saturated soils or hydrophytic vegetation at the subject site.

Mold

AES observed portions of the exposed soil for signs of mold and/or mildew and none was observed. Based on the condition of these surfaces, mold and/or mildew were not an environmental concern to the subject property (vacant land) at the time of our site visit.
Please note that AES did not perform any probes of surface materials, use moisture meters to test materials or use specialized equipment to test air quality for signs of existing mold and/or mildew. If further confirmation is required for determining if mold and/or mildew is present in the vacant land, AES recommends that a qualified Industrial Hygienist be retained to perform the necessary industry standard tests and provide a report of their findings.

VIII CONCLUSIONS

Findings and Opinion

AES completed a Phase I ESA for the site in substantial conformance with the scope and limitations of the Standard. Any exceptions to, or deletions from, the Standard are described in the Assessment.

Historical Recognized Environmental Conditions (HRECs)

Based on site observations, interviews and review of available documents and the database records search, AES concludes that no HRECs were identified at the subject site. AES recommends no additional investigation at this time.

Current Recognized Environmental Conditions (RECs)

Based on site observations, interviews and review of available documents and the database records search, AES concludes that no RECs were identified at the subject site. AES recommends no additional investigation at this time.

Business Environmental Risk (BER)

Based on site observations, interviews and review of available documents and the database records search, AES concludes that no *BER's* were identified at the subject site. AES recommends no additional investigation at this time.

Controlled Recognized Environmental Conditions (CREC)

Based on site observations, interviews and review of available documents and the database records search, AES concludes that no CRECs were identified at the subject site. AES recommends no additional investigation at this time.

de minimis Environmental Conditions

Based on site observations, interviews and review of available documents and the database records search, AES concludes that no *de minimis* conditions were identified at the subject site.

Conclusions

We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations ASTM Practice E 1527-13 of Iris Park (Riverside County APN# 312-020-025), Moreno Valley, CA 92551, the *property.* Any exceptions to or deletions from, this practice are described in Section II of this *report.* This assessment has revealed no evidence of *Recognized Environmental Conditions, Controlled Recognized Environmental Conditions, Business Environmental Risks or Historical Recognized Environmental Conditions* with the *property.* AES recommends no additional investigation at this time.

X QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Richard E. Darwicki - Mr. Darwicki is a Registered Environmental Assessor in the former EPA Program and has over ten years of experience related to environmental assessments and over 30 years experience related to engineering matters. He has completed numerous Phase I Environmental Site Assessments throughout the United States. He is also a Licensed Engineer in the State of California and attended Santa Ana College and Fullerton College.

Timothy K. Dahlstrand - Mr. Dahlstrand has over twenty-five years of experience related to environmental and engineering matters. He has completed and supervised hundreds of Phase I Environmental Site Assessments throughout the United States and internationally. He holds a B.A. in Geology and a M.S. in Civil Engineering from Northwestern University.

Stephen J. Baker – Mr. Baker is a California and Washington Registered Geologist and Certified Hydrogeologist. He has conducted cursory environmental surveys, Phase I Evaluations, site characterization of sediment and groundwater, remedial design and implementation, post monitoring and achievement of "No Further Action" status by the lead regulating agencies. Mr. Baker holds a degree in geology from Ohio State University and a California Registered Geologist License number 4354.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

WALGREENS #9616 EPA ID:: CAL000324989	16020 PERRIS BLVD	W 0 - 1/8 (0.060 mi.)	A2	10

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there are

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

WALGREENS #9616 (Continued) **1016954453**

. Waste code: P075
. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

. Waste code: U034
. Waste name: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 99

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 45

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 6

Waste code: D010
Waste name: SELENIUM
Amount (Lbs): 6

Waste code: D024
Waste name: M-CRESOL
Amount (Lbs): 1

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs): 6

Waste code: P075
Waste name: NICOTINE, & SALTS
Amount (Lbs): 22

Violation Status: No violations found

SHELL SERVICE STATION (Continued) **1005904292**

Potential Contaminants of Concern: Gasoline
Site History: ***Data prior to 2005 does not appear in GeoTracker. Consult agency file for all site data*** Site History/Release Information: July 2003 - Soil samples were taken during dispenser and piping upgrades. Petroleum constituents were detected in several of the samples with the highest concentration in the north-central dispenser area (piping sample P4d7 with 17 ppm TBA). All samples were non-detect (ND) for benzene and MTBE. 203 tons of impacted soil was removed during the upgrades. The site was entered into the Local Oversight Program. Assessment and Remediation: 2005 - Four groundwater (gw) monitoring wells (MW-1 through MW-4) were installed around the perimeter of the UST cavity and dispenser islands. Heaviest soil impacts were identified near the USTs (MW-1 and MW-4) between 20 and 85 feet below grade (ft bg) with the highest concentrations approx 50 to 55 ft bg (78 ppm MTBE in MW-4@50 ft). The highest TBA detection in the soil was 57 ppm (MW-4@30 ft) while other constituents tested were low or ND. Depth to gw was approx 83 ft bg with flow to the southwest. Maximum gw concentrations were: 3800 ppb TPHg (MW-1), 80 ppb B (MW-3), ND<50 ppb TXE, 14000 ppb MTBE (MW-1), ND<500 ppb TBA. Neither the soil or the gw impacts were delineated 2006 - Three gw monitoring wells (MW-6, MW-10, MW-11) were installed at the property boundaries. Two observation wells (OBS-1 and OBS-2) were installed for remedial feasibility pilot testing. One cone penetration test (CPT) boring (CPT-1) was completed adjacent to MW-6. GW grab sample from CPT-1 detected 34000 ppb TPHg, 370000 ppb MTBE, 2600 ppb TBA and 1900 ppb TAME. GW from MW-6 (adjacent to Perris Blvd) and MW-11 (northern portion of the station) had very high MTBE detections (480000 ppb MW-6 and 200000 ppb MW-11). 2007 - Four dual-nested soil vapor extraction (SVE) wells (SVE-1 through SVE-4) were installed for remedial feasibility testing. All four wells had elevated MTBE and TBA in the soil with concentrations up to 42 ppm MTBE (SVE-1@45 feet) and 56 ppm TBA (SVE-4@60 feet). Eleven air sparge (AS) wells (AS-1, AS-3 through AS-11, AS-13) were also installed for remedial feasibility testing. All locations had ppm concentrations of MTBE at depths below 50 ft bg. Three off-site monitoring wells (MW-5, MW-8, and MW-12) were installed northwest (MW-5 and MW-12) and southwest (MW-8) of the site. GW from MW-8 and MW-12 had low to ND concentrations and MW-5 had detections of 1200 ppb TPHg and 2200 ppb MTBE. SVE and gw extraction pilot testing was conducted. SVE mass removal rates were approx 85 lb/day TPHg and 64 lb/day MTBE. Vapor concentrations remained consistent throughout the test. Consultant recommended remediating the site using SVE with air sparging/oxygen injection. 2007 (December) to 2011 SVE and AS remediation was conducted. Beginning December 2007, vapors were extracted from all four dual-nested SVE wells and beginning January 2008, air sparging was implemented on all 11 AS wells. SVE was shut down July 2010 and AS continued to operate until October 2011. A total 836 lbs TPHg and 591 lbs MTBE were removed using SVE. 2008 - One on-site monitoring well (MW-13) and four off-site monitoring wells (MW-14 through MW-16, MW-19) were installed to further delineate the gw plume. The wells provided delineation of the dissolved plume to the north and west. One gw extraction well (EW-1) and two observation wells (OBS-3 and OBS-4) were installed for gw remediation feasibility testing. GW in EW-1 and OBS-4 had elevated concentrations. Nine remedial gw extraction events were conducted to reduce elevated MTBE and TBA in the gw. A vacuum truck was used to pump a total of 2207 gallons of gw from MW-1, MW-4, MW-6, MW-10, and MW-11. 2009 - Off-site monitoring

SHELL SERVICE STATION (Continued) **1005904292**

wells MW-17 and MW-18 were installed west of Perris Blvd. The wells provided delineation of the western gw plume boundary as TBA was the only detection in the gw (34 and 79 ppb). Three re-injection wells (RI-1 through RI-3) were installed for injection of treated gw since off-site discharge permits could not be obtained. GW extraction pilot testing was conducted and it was concluded that this would be a feasible remedial technology for reducing gw impacts at the site. Permits for gw discharge were unable to be obtained, so re-injection of treated gw was proposed. Re-injection pilot testing was conducted and it was concluded that re-injection would be feasible method of managing the treated gw. 2010 - Two on-site monitoring wells (MW-20 and MW-21) were installed southwest of the station building. GW sampling indicated the wells defined the southwestern limits of the dissolved plume. SVE rebound testing was conducted. Test results were favorable with rebounded vapor concentrations all below 1 ppmv. Five confirmation soil borings (CB-1 through CB-5) were drilled to 85 ft bg. Soil samples from each 5-ft depth interval from each boring were ND for all constituents except MTBE and TBA. The highest MTBE detection was 0.2 ppm from CB-4-75 and the highest TBA detection was 3 ppm from CB-2-80. All MTBE and TBA detections were from samples collected below the water table. Soil remedial efforts were considered effective, however, MTBE and TBA concentrations in the gw remained elevated. 2011 - Two off-site monitoring wells (MW-7 and MW-9) were installed south of Iris Avenue. GW sampling indicated the wells defined the southern and southeastern limits of the dissolved plume. 2012 - Two additional gw monitoring wells (MW-22 and MW-23) were installed. MW-22 was installed on-site, adjacent to EW-1, and MW-23 was installed off-site, southeast of MW-9. Neither well had GW impacts. Delineation of soil and gw impacts was considered complete. 2013 to 2015 - Monitored natural attenuation (MNA) was implemented, and Oxygen-releasing sleeves (O-Sox) were placed in wells MW-4, MW-6, MW-11, MW-15 and OBS-4 in an attempt to reduce remaining elevated MTBE and TBA concentrations. Notable decreases in concentrations were not observed and the O-Sox were removed January 2015. MTBE and TBA concentrations have remained relatively stable following another year of monitoring since O-Sox removal. 2015 - With a rise in gw levels of approx 30-ft since monitoring began in 2005, most of the wells associated with the cleanup have submerged well screens. RCDEH requested installation of an appropriately screened well in the area with the highest gw concentrations so the results could be compared with nearby submerged well(s). One gw mon well (MW-24) was installed near submerged well MW-6. Soil from MW-24 was ND for all constituents tested from 5 to 65 ft bg. A year of gw monitoring of MW-24 has shown all constituents ND, except one detection of TBA (11 ppb). During this same sampling period, gw from MW-6 had detections up to 6700 ppb TPHg, 3800 ppb MTBE and 42000 ppb TBA. The consultant concludes that the elevated concentrations in MW-6 are attributable to petroleum fuel constituents trapped in the fine grained material and surrounding filter pack at depths below the current gw level. As such, it is not representative of surrounding conditions and should not be used for LTCP evaluation. Groundwater Monitoring: GW monitoring has been conducted at the site since March 2005. During this time period, gw has risen approx 30 ft from an initial depth of approx 80 ft bg to the current depth of approx 50 ft bg. GW flow has been consistently to the south and southeast. Most of the wells have submerged well screens as discussed above. Maximum historic gw concentrations were: 400000 ppb TPHg (MW-6), 80 ppb benzene (MW-3),

SHELL SERVICE STATION (Continued) **1005904292**

480000 ppb MTBE (MW-6), and 260000 ppb TBA (MW-4). Current (August 2016) gw concentrations are: 6600 ppb TPHg, 2500 ppb MTBE, and 35000 ppb TBA (well MW-6). The new properly screened well, MW-24 (near MW-6), did not have any contaminants detected. Low Threat Closure Policy (LTCP) Evaluation: The site meets the General Criteria and the Direct Contact and Outdoor Air Exposure Criteria of the LTCP. The Petroleum Vapor Intrusion to Indoor Air Criteria was not evaluated based on the active commercial petroleum fueling facility LTCP exemption. Except for the MTBE exceedance in well MW-6 (2500 ppb MTBE Q3-2016), the LTCP Groundwater-Specific Criteria was met using scenario 1.2 (plume length <250 ft, no free product, nearest existing water supply well >1000 ft, benzene <3000 ppb, and <1000 ppb MTBE). MW-6 is located approx 25 ft from MW-24, which is ND for MTBE. It should be noted that elevated TBA concentrations remain in the gw at MW-6 (35000 ppb), however, the LTCP does not specifically address concentrations of TBA, but instead considers TBA attributable to the break-down of MTBE. A UST system is currently installed and operating at the site. Prior to a change in land use, the potential threat of petroleum vapor intrusion into indoor air should be evaluated.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Violation Date: 06-19-2019
Citation: 23 CCR 16 2715(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(f)
Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure,

ARCO #5764 (Continued) **S101590180**

hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).

Violation Notes: Returned to compliance on 06/19/2019. OBSERVATION: Owner/operator failed to certify the UST monitoring equipment every 12 months as required. Observed that the most recent monitoring certification was conducted at this facility on May 29, 2018. CORRECTIVE ACTION: Owner/operator shall certify the continuous monitoring system as required every 12 months. The monitoring certification was conducted today at the time of inspection. The violation is corrected on site. The monitoring certification is due annually in May and should not be conducted in June next year due to late testing.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019
Date Data Arrived at EDR: 06/26/2019

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health
