PLEDGE OF ALLEGIANCE

ROLL CALL

INTRODUCTIONS

**PUBLIC COMMENTS ON THE AGENDA AND ON ANY SUBJECT NOT ON THE
AGENDA UNDER THE JURISDICTION OF THE CITY COUNCIL**

Any person wishing to address the Mayor and City Council on any matter, either under the Public Comments section of the Agenda or scheduled items or public hearings, must follow the procedures set forth above and wait to be identified to speak by the Mayor. Members of the public may be limited to three minutes per person or the allowed time set by the Mayor, except for the applicant. The Mayor may establish an overall time limit for comments on a particular Agenda item. Members of the public must direct their questions to the Mayor and not to other members of the City Council, the applicant, the Staff, or the audience.

JOINT CONSENT CALENDARS (SECTIONS A-E)

All items listed under the Consent Calendars, Sections A, B, C, D, and E are considered to be routine and non-controversial, and may be enacted by one motion unless a member of the City Council, Community Services District, City as Successor Agency for the Community Redevelopment Agency, Housing Authority or the Board of Library Trustees requests that an item be removed for separate action. The motion to adopt the Consent Calendars is deemed to be a separate motion by each Agency and shall be so recorded by the City Clerk. Items withdrawn for report or discussion will be heard after public hearing items.

A. CONSENT CALENDAR-CITY COUNCIL

- A.1. ORDINANCES - READING BY TITLE ONLY - THE MOTION TO ADOPT AN ORDINANCE LISTED ON THE CONSENT CALENDAR INCLUDES WAIVER OF FULL READING OF THE ORDINANCE.

Recommendation: Waive reading of all Ordinances.

Recommendation:

- 1. Receive and file the Fiscal Year 2021/2022 Council Discretionary Expenditure Report for July 1, 2021 through August 31, 2021

- A.6. LIST OF PERSONNEL CHANGES (Report of: Financial & Management Services)

Recommendation:

- 1. Ratify the list of personnel changes as described.

- A.7. PURSUANT TO A LANDOWNER PETITION, ANNEX CERTAIN PARCEL(S) INTO COMMUNITY FACILITIES DISTRICT NO. 2014-01 (MAINTENANCE SERVICES) - AMENDMENT NO. 60 (RESO. NO. 2021-__) (Report of: Financial & Management Services)

Recommendation:

1. Acting as the legislative body of Community Facilities District No. 2014-01 (Maintenance Services), adopt Resolution No. 2021-__, a Resolution of the City Council of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2014-01 (Maintenance Services) and approving the amended map for said District (Amendment No. 60) (24771 Nandina, located on the south side of Nandina Ave., west of Perris Blvd.).

- A.8. ACCEPTANCE OF THE FISCAL YEAR 2020 STATE HOMELAND SECURITY PROGRAM (SHSP) GRANT AWARD (Report of: Fire Department)

Recommendations:

1. Accept the Fiscal Year 2020 State Homeland Security Program (SHSP) grant award of \$24,223 from the Riverside County Emergency Management Department.
2. Authorize a budget adjustment of \$24,223 to the Emergency Management Grant fund (2503) revenue and expenditure accounts.

- A.9. SB 1205 FY 2020/2021 State Mandate Inspections (Report of: Fire Department)

Recommendation:

1. Approve Resolution No. 2021-XX, acknowledging receipt of a report made by the Fire Chief of the Moreno Valley Fire Department regarding the inspection of certain occupancies requiring annual inspections in such occupancies pursuant to sections 13146.2 and 13146.3 of the California Health and Safety Code. Staff recommends this alternative.

- A.10. PEN16-0095 (TRACT 36760) – APPROVAL OF MAINTENANCE AGREEMENT BY AND BETWEEN THE CITY OF MORENO VALLEY AND LEGACY PARK COMMUNITY ASSOCIATION FOR THE TRACT LOCATED ON THE EAST SIDE OF INDIAN STREET BETWEEN GENTIAN AVENUE AND SANTIAGO DRIVE. DEVELOPER – MERITAGE HOMES OF CALIFORNIA, INC. (Report of: Public Works)

Recommendations:

1. Approve the Maintenance Agreement by and between the City of Moreno Valley and Legacy Park Community Association;
2. Authorize the City Manager to execute the Maintenance Agreement with Legacy Park Community Association; and
3. Authorize the City Clerk to transmit the executed Maintenance Agreement to the Riverside County Recorder's Office for recordation.

- A.11. APPROVE THE SECOND AMENDMENT TO THE AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH MICHAEL BAKER INTERNATIONAL FOR THE INDIAN STREET / CARDINAL AVENUE BRIDGE (OVER LATERAL A), PROJECT NO. 802 0004 (Report of: Public Works)

Recommendations:

1. Approve the Second Amendment to the Agreement for Professional Consultant Services with Michael Baker International, to perform Environmental Clearance, Right of Way Documentation, and Bridge and Roadway Design for the Indian Street / Cardinal Avenue Bridge (Over Lateral A) project, funded with Arterial Developer Impact Fee (DIF) funds;
2. Authorize the City Manager to execute the Second Amendment to Agreement for Professional Consultant Services with Michael Baker International, subject to the approval by the City Attorney;
3. Authorize an amendment to the existing Purchase Order with Michael Baker International in the amount of up to but not to exceed \$650,000.00 once the Agreement has been signed by all parties; and
4. Authorize the Public Works Director to execute any subsequent related amendments to the Agreement for Professional Consultant Services with Michael Baker International, not to exceed the total Purchase Order amount, subject to approval by the City Attorney.

A.12. AUTHORIZATION TO AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO TRANSTECH ENGINEERS, INC. FOR THE STATE ROUTE 60/ REDLANDS BOULEVARD INTERCHANGE IMPROVEMENTS, PROJECT NO. 801 0064 (Report of: Public Works)

Recommendations:

1. Award an Agreement for Professional Consultant Services to Transtech Engineers, Inc. to perform professional services for the Project Approval and Environmental Document (PA/ED) Phase for State Route 60/Redlands Blvd Interchange Improvements project , funded by Transportation Uniform Mitigation Fee (TUMF) Program funds;
2. Authorize the issuance of a Purchase Order to Transtech Engineers, Inc., in the amount of \$2,536,589 when the contract has been signed by all parties;
3. Authorize the City Manager to execute the contract with Transtech Engineers, Inc., subject to the approval by the City Attorney; and
4. Authorize the Public Works Director to execute any subsequent related amendments to the Agreement for Professional Consultant Services with Transtech Engineers, Inc., not to exceed the total Purchase Order amount, subject to the approval by the City Attorney

A.13. AUTHORIZE A PURCHASE ORDER TO ONESOURCE DISTRIBUTORS FOR THE PURCHASE OF EMERGENCY STOCK FOR MORENO VALLEY UTILITY (MVU) (Report of: Public Works)

Recommendations:

1. Authorize a Purchase Order to OneSource Distributors for the purchase of various electrical items used for emergency response by Moreno Valley Utility, funded by MVU's operating fund; and
2. Authorize the purchase of various electrical items as needed for emergency response in an amount not to exceed a total of \$250,000 for fiscal year 2021/2022.

A.14. APPROVE THE 2022 ANNUAL SYSTEM RESOURCE ADEQUACY PLAN FOR MORENO VALLEY UTILITY (Report of: Public Works)

Recommendations:

1. Approve the Annual System Resource Adequacy Plan ("Plan") for calendar year 2022 and authorize the City Manager to make minor adjustments to the Plan as necessary to meet State requirements; and

2. Authorize filing of the 2022 Annual System Resource Adequacy Plan with the California Independent System Operator (CAISO) in compliance with Section 40 of its tariff.

A.15. ADOPTION OF A RESOLUTION AUTHORIZING THE ACCEPTANCE OF THE REAL PROPERTY DONATION FOR APN 487-370-015 LOCATED ON THE WEST SIDE OF MORRISON STREET, NORTH OF COTTONWOOD AVENUE (Report of: Public Works)

Recommendation:

1. Adopt Resolution No. 2021-XXX authorizing the acceptance of real property and allowing the City Manager to execute all documents necessary for the transaction of the real property donation of parcel APN 487-370-015

A.16. AUTHORIZE THE AWARD OF PROFESSIONAL SERVICES AGREEMENTS TO ACCO, F.M. THOMAS, AND HASCO FOR HEATING, VENTILATION, AND AIR-CONDITIONING (HVAC) SERVICES AT CITY FACILITIES AND SITES (Report of: Public Works)

Recommendations:

1. Award a five-year contract to ACCO for a total not-to-exceed amount of \$800,000 for professional heating, ventilation, air conditioning, and related equipment maintenance and repair; and authorize the City Manager to execute contracts in conformance with the attached Agreement using fund 7310, Facilities Maintenance;
2. Award a five-year contract to F.M. Thomas and a five-year contract with HASCO each for a total not-to-exceed amount of \$100,000 for professional heating, ventilation, air conditioning, and related equipment maintenance and repair; and authorize the City Manager to execute contracts in conformance with the attached Agreements using fund 7310, Facilities Maintenance;
3. Authorize the issuance of annual purchase orders for ACCO, F.M. Thomas, and HASCO on an as needed basis each year of the Agreement term subject to funds available in the City Council approved Operating Budget; and
4. Authorize the Director of Public Works/City Engineer to execute any amendments, purchase orders and/ or change orders not-to-exceed the authorized amounts, contingent upon approved budget and approval of the City Attorney.

CALL TO ORDER

The Joint Meeting of the City Council, Community Services District, City as Successor Agency for the Community Redevelopment Agency of the City of Moreno Valley, Moreno Valley Housing Authority, Moreno Valley Public Financing Authority and the Board of Library Trustees was called to order at 6:01 p.m. by Mayor Gutierrez in the Council Chamber located at 14177 Frederick Street.

PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was led by Mayor Gutierrez.

ROLL CALL

Council:	Dr. Yxstian A. Gutierrez	Mayor
	Victoria Baca	Mayor Pro Tem
	David Marquez	Council Member
	Ulises Cabrera	Council Member

INTRODUCTIONS

Staff:	Pat Jacquez-Nares	City Clerk
	Steve Quintanilla	Interim City Attorney
	Mike Lee	City Manager
	Brian Mohan	Acting Assistant City Manager/Chief Financial Officer/Treasurer
	Michael Wolfe	Assistant City Manager/Director of Public Works/City Engineer
	Manuel Mancha	Community Development Director
	Erica Green	Acting Parks & Community Services Director
	John Salisbury	Police Chief
	Bill Weiser	Riverside County Fire Chief

Minutes Acceptance: Minutes of Aug 3, 2021 6:00 PM (CONSENT CALENDAR-CITY COUNCIL)

PUBLIC COMMENTS ON ANY SUBJECT UNDER THE JURISDICTION OF THE CITY COUNCIL

Jeanine Lovelace

1. Provided her history in Moreno Valley.
2. Stated her opposition to the location of the new downtown at the corner of Nason and Alessandro and provided reasons why the people in that area did not support the development.
3. She further suggested the formation of a community committee to look at the different open spaces for potential development areas and that the new downtown should be on Sunnymead.

Derrick Murray

1. Stated he attended the meeting in order to meet his District 3 Council Member.
2. Reported issues he was having in his neighborhood by the Stater Brothers store with the homeless population and illegal dumping.

Council Member Marquez addressed Mr. Murray's concerns and clarified Mr. Murray's phone number.

Bob Palomarez

1. Thanked Police and Fire for all their work.
2. Wished Mayor Gutierrez the best in his campaign for the County Supervisor's seat.
3. Lauded all the work the Mayor had done for the City. He also praised staff for their work.

Louise Palomarez

1. Agreed with Bob Palomarez' comments.
2. She stated her support for Mayor Gutierrez' agenda.
3. Wished Mayor Gutierrez the best of luck in his Supervisor's campaign.
4. Stated her fear with the potential replacements for the Mayor's Office.
5. Stated that she missed Dr. Thornton and that she was an asset to the Council.
6. Praised and thanked staff for all their hard work.
7. She was very pleased with the 4th of July event and the bands that participated.
8. She would like to see progressive members elected to the City Council to help move the City forward not backward.

Roy Bleckert

1. Spoke on the COVID-19 vaccines.
2. Stated his support for the second reading of the General Plan Amendment.

Mayor Gutierrez thanked the Riverside County Fire Chief for attending the meeting.

JOINT CONSENT CALENDARS (SECTIONS A-E)

RESULT: APPROVED [UNANIMOUS]
MOVER: David Marquez, Council Member
SECONDER: Victoria Baca, Mayor Pro Tem
AYES: Dr. Yxstian A. Gutierrez, Victoria Baca, David Marquez, Ulises Cabrera

A. CONSENT CALENDAR-CITY COUNCIL

G. GENERAL BUSINESS

G.1. AUTHORIZATION TO REFINANCE THE 2018 STREETLIGHT FINANCING AGREEMENT WITH BANC OF AMERICA LEASING & CAPITAL (RESO. NO. 2021-57) (Report of: Financial & Management Services)

Acting Assistant City Manager and Chief Financial Officer Mohan provided a brief summary of this item.

Council Member Marquez requested clarification on the interest rates.

Acting Assistant City Manager and Chief Financial Officer Mohan stated the interest rate was 5.42 and it was lowered to 3.4.

Council Member Cabrera asked which fund would benefit from the money generated from the savings.

Acting Assistant City Manager and Chief Financial Officer Mohan stated the annual savings would go into the General Fund, which would be approximately \$65,000.

Recommendations: That the City Council:

Adopt Resolution No. 2021-57 of the City Council of the City of Moreno Valley, California, authorizing the execution and delivery of Amended and Restated Equipment Lease/Purchase Agreement with Banc of America Leasing & Capital, LLC, saving the General Fund an estimated \$855,000 over the term of the agreement.

RESULT: APPROVED [UNANIMOUS]
MOVER: Ulises Cabrera, Council Member
SECONDER: David Marquez, Council Member
AYES: Dr. Yxstian A. Gutierrez, Victoria Baca, David Marquez, Ulises Cabrera

G.2. PROPOSED LOCAL MORENO VALLEY ESSENTIAL SERVICES MEASURE (RESO. NO. 2021-58 & ORD. NO. 982) (Report of: Financial & Management Services)

Acting Assistant City Manager and Chief Financial Officer Mohan provided a brief summary of this item.

Council Member Marquez asked what the City's current tax rate is and the average amongst other cities.

Acting Assistant City Manager and Chief Financial Officer Mohan stated the City had a 7.75% and the average in the western county cities was 8.31%. The City would receive 100% of this one-cent increase.

Mayor Gutierrez stated that the approval of this item would ask the voters to decide on the increase.

Acting Assistant City Manager and Chief Financial Officer Mohan confirmed the approval would place the question/measure on the ballot.

Council Member Cabrera stated his support for this item and stated that either the City tried to get this money or other governmental entities would be able to place it on the ballot and take the money that would be generated.

Recommendations: That the City Council:

Adopt the attached Resolution No. 2021-58, Placing the Local Moreno Valley Essential Services Measure, a One Cent Local General Tax Measure on the Ballot for voter consideration on the November 2, 2021 Election.

RESULT: APPROVED [UNANIMOUS]
MOVER: Ulises Cabrera, Council Member
SECONDER: Victoria Baca, Mayor Pro Tem
AYES: Dr. Yxstian A. Gutierrez, Victoria Baca, David Marquez, Ulises Cabrera

H. ITEMS REMOVED FROM CONSENT CALENDARS FOR DISCUSSION OR SEPARATE ACTION - NONE

I.REPORTS

Minutes Acceptance: Minutes of Aug 3, 2021 6:00 PM (CONSENT CALENDAR-CITY COUNCIL)

I.1. CITY COUNCIL REPORTS

(Informational Oral Presentation - not for Council action)

March Joint Powers Commission (JPC) - None

Riverside County Habitat Conservation Agency (RCHCA) - None

Riverside County Transportation Commission (RCTC)

Mayor Gutierrez reported that as part of a major regional transportation project, the Placentia Avenue bridge over I-215 had been closed. This temporary closure was needed for construction of the new interchange. The public was encouraged to slow down while traveling through the work zone and follow posted detour routes. Please visit the RCTC website at www.rctc.org <<http://www.rctc.org>> for more project information.

Riverside Transit Agency (RTA)

Council Member Marquez reminded everyone about the RTA's Free Fares for Youth and College Students program. Passengers 18 and under and college students could ride anywhere RTA buses go, anytime they operated, for free. Please visit RiversideTransit.com for further details.

Western Riverside Council of Governments (WRCOG)

Mayor Pro Tem Baca reported on the items covered at the WRCOG Executive Committee meeting on August 2, 2021, which included updates on a number of continuing business items of the WRCOG Executive Committee, but there were no major items to report on. The new Executive Director for WRCOG, Kurt Wilson, participated in the meeting.

Western Riverside County Regional Conservation Authority (RCA) - None

School District/City Joint Task Force - None

I.2. CITY MANAGER'S REPORT

(Informational Oral Presentation - not for Council action)

City Manager Lee welcomed the Council back from their summer recess. He urged everyone to use the Moreno Valley App to report any issues. He announced that the cooling centers remained open.

CLOSING COMMENTS AND/OR REPORTS OF THE CITY COUNCIL, COMMUNITY SERVICES DISTRICT, CITY AS SUCCESSOR AGENCY FOR THE COMMUNITY REDEVELOPMENT AGENCY, HOUSING AUTHORITY, PUBLIC FINANCING AUTHORITY, AND THE BOARD OF LIBRARY TRUSTEES.

Council Member Marquez

1. Stated it was good to be back from the summer recess.
2. Stated there was only one report taken in the past two weeks on a pothole.
3. Hoped that the voters approved the measure so that the City could pave the roads.
4. Thanked staff for their great work.

Council Member Cabrera

1. Stated it was a hot and busy summer.
2. Announced the various back to school and backpack giveaways taking place in the City within the next two weeks.
3. Announced the City's rental assistance program and praised staff for their ability to disseminate the money quickly.
4. Thanked Caltrans for cleaning Frederick Street's on and off ramps.
5. Urged everyone to get vaccinated.

Mayor Pro Tem Baca

1. Stated it was good to be back.
2. Thanked City Manager Lee for mentioning the cooling centers and urged everyone in need to use them.
3. Reminded everyone to take care of their pets and to bring them indoors.
4. Reminded everyone that school would start next week, that there would be an uptake in traffic, to slow down, and that everyone should be vigilant and careful.
5. Stated that the 4th of July was a blast, the Fun Fest was spectacular, and the fireworks were fantastic.
6. Stated that people loved the movies and the concerts in the parks. The bands were great.
7. Asked people to prepare themselves for another shutdown due to COVID. Urged everyone to follow the COVID safety protocols.

Mayor Gutierrez

1. Stated that unfortunately 412 residents had passed due to COVID. Urged residents to follow the COVID safety protocols.
2. Stated that the 4th of July was indeed spectacular.
3. Stated that he has received praise from residents on the Moval Movies and Moval Rocks events.
4. Thanked staff for the efforts in citing people that were using illegal fireworks.
5. Announced that the Salvation Army had a new location on Alessandro, and they were the City's partners with the Homeless to Work program.
6. Announced that the State of the City was scheduled for August 19, 2021.

ADJOURNMENT

There being no further business to come before the City Council, Mayor Gutierrez adjourned the meeting at 6:43 p.m.

CALL TO ORDER

The Joint Meeting of the City Council, Community Services District, City as Successor Agency for the Community Redevelopment Agency of the City of Moreno Valley, Moreno Valley Housing Authority, Moreno Valley Public Financing Authority and the Board of Library Trustees was called to order at 6:00 p.m. by Mayor Gutierrez in the Council Chamber located at 14177 Frederick Street.

PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was led by Mayor Gutierrez.

ROLL CALL

Council:	Dr. Yxstian A. Gutierrez	Mayor
	Victoria Baca	Mayor Pro Tem
	David Marquez	Council Member
	Ulises Cabrera	Council Member

INTRODUCTIONS

Staff:	Pat Jacquez-Nares	City Clerk
	Steve Quintanilla	Interim City Attorney
	Mike Lee	City Manager
	Brian Mohan	Acting Assistant City Manager/Chief Financial Officer/Treasurer
	Michael Wolfe	Assistant City Manager/Director of Public Works/City Engineer
	Manuel Mancha	Community Development Director
	Erica Green	Acting Parks & Community Services Director
	John Salisbury	Police Chief
	Dave Rodriguez	Battalion Chief

Minutes Acceptance: Minutes of Aug 17, 2021 6:00 PM (CONSENT CALENDAR-CITY COUNCIL)

PUBLIC COMMENTS ON ANY SUBJECT ON THE AGENDA AND NOT ON THE AGENDA UNDER THE JURISDICTION OF THE CITY COUNCIL

Keri Then

1. Thanked the City staff and the Council Members for addressing her email on the issue with the wild burros crossing the new seven-lane bridge. She suggested that some type of deterrent be added upon the completion of the new bridge.
2. Again thanked the City staff and Council on the Beautify MoVal event held on Saturday. She and her neighbors participated in the clean up at Hidden Springs Park. Stated she was concerned with the smoking that was being done at the park because it could start a fire.
3. Reported that the residents of District 2 were concerned with the City's ordinance on the 12-hour requirement for the trashcans. Waste Management's lack of personnel contributed to the residents need to leave the trash receptacles out longer, which added to the burros dumping the trash. Residents did not want to be fined for these occurrences.
4. Stated that the street sweeping no parking signs do not reflect the correct day of service.

Bob Palomarez

1. Gave his condolences to the family of the three year old that perished in the house fire and praised the Police Officers for their heroism.
2. Provided a story illustrating the heart of the police officers.
3. Opposed defunding the police.

Louise Palomarez

1. Agreed with Bob Palomarez' statements.
2. Praised the Council for all their good work.
3. Stated that Mayor Gutierrez leaving for the County seat would be a great loss for the City.
4. Opposed the suggested Sunnymead location for the new Moreno Valley Downtown. Supported the City's recommendation of the Nason location.
5. Stated that all events at the Amphitheatre were great.

JOINT CONSENT CALENDARS (SECTIONS A-E)

RESULT:	APPROVED [3 TO 1]
MOVER:	Victoria Baca, Mayor Pro Tem
SECONDER:	David Marquez, Council Member

A. CONSENT CALENDAR-CITY COUNCIL

- A.1. ORDINANCES - READING BY TITLE ONLY - THE MOTION TO ADOPT AN ORDINANCE LISTED ON THE CONSENT CALENDAR INCLUDES WAIVER OF FULL READING OF THE ORDINANCE.

Recommendation: Waive reading of all Ordinances.

Minutes Acceptance: Minutes of Aug 17, 2021 6:00 PM (CONSENT CALENDAR-CITY COUNCIL)

A.2. MAYORAL APPOINTMENT TO THE PLANNING COMMISSION (Report of: City Clerk)

Recommendation:

- 1. Receive and confirm the Mayoral appointment as follows:

PLANNING COMMISSION

<u>Name</u>	<u>Position</u>	<u>Term</u>
Omar Cobian	Member	Ending 06/30/22

Council Member Marquez stated his concerns with the inability to interview Mr. Cobian. Stated he was informed that he could not interview Mr. Cobian. Council Member Marquez stated that Mr. Cobian was the President of the Carpenter's Union, which had heavily donated to two serving Council Members. He would like to see a more inclusive appointment process where interviews could be held at a public meeting and have questions from all Council Members. Council Member Marquez stated he would not support this item and would vote no on the Consent Calendar.

A.3. ACCEPTANCE OF THE FISCAL YEAR 2021 EDWARD BYRNE MEMORIAL JUSTICE ASSISTANCE GRANT PROGRAM AWARD (Report of: Community Development)

Recommendation:

- 1. Accept the Fiscal Year 2021 Bureau of Justice Assistance Edward Byrne Memorial Justice Assistance Grant Program award of \$54,555 administered through the Riverside County Sheriff's Department;
- 2. Authorize the City Manager, or his designee, to execute for and on behalf of the City of Moreno Valley, agreements and other related documents required by the Bureau of Justice Assistance for participation in the Edward Byrne Memorial Justice Assistance Grant Program, subject to the approval of the City Attorney; and
- 3. Authorize the Chief Financial Officer, or his designee, to make any necessary budget adjustments as recommended in the Fiscal Impact section of this report.

Minutes Acceptance: Minutes of Aug 17, 2021 6:00 PM (CONSENT CALENDAR-CITY COUNCIL)

- A.4. APPROVE AN AMENDMENT TO THE AGREEMENT WITH PERMITROCKET SOFTWARE, LLC, DBA EPERMITHUB, FOR ELECTRONIC PLAN CHECK SOFTWARE SOLUTION, SOFTWARE AS A SERVICE SUBSCRIPTION (AGMT. NO. 2020-192-01) (Report of: Community Development)

Recommendations:

1. Approve an Amendment to the Agreement with PermitRocket Software, LLC, dba ePermitHub, for electronic plan check software solution, software as a service (SaaS) subscription, and authorize the City Manager, or his designee, to execute the Amendment and any subsequent Amendments, subject to the approval of the City Attorney.
2. Authorize an increase of \$187,056.43 to the not-to-exceed amount of the Agreement with PermitRocket Software, LLC, dba ePermitHub to \$395,573.13. These costs are offset by plan check revenues. There will be no impact to the General Fund.
3. Authorize the Purchasing Manager, or her designee, to approve an increase of \$187,056.43 to purchase order #2021-494, in accordance with approved terms of the agreement.

- A.5. LIST OF PERSONNEL CHANGES (Report of: Financial & Management Services)

Recommendation:

1. Ratify the list of personnel changes as described.

- A.6. PAYMENT REGISTER- JUNE 2021 (Report of: Financial & Management Services)

Recommendation:

1. Receive and file the Payment Register.

- A.7. A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, RATIFYING THE ATTESTATION OF VERACITY SUBMITTED TO THE CALIFORNIA ENERGY COMMISSION FOR THE 2020 POWER SOURCE DISCLOSURE PROGRAM ANNUAL REPORT (Report of: Public Works)

Recommendation:

1. Approve Resolution No. 2021-XX. A Resolution of the City Council of the City of Moreno Valley, California, Ratifying the Attestation of

Veracity Submitted to the California Energy Commission for the 2020 Power Source Disclosure Program Annual Report.

A.8. DRACAEA AVENUE NEIGHBORHOOD GREENWAY CORRIDOR STUDY (RESO. NO. 2021-60) (Report of: Public Works)

Recommendation:

1. Adopt Resolution No. 2021-60, a Resolution of the City Council of the City of Moreno Valley, California, accepting the Dracaea Avenue Neighborhood Greenway Corridor Study.

A.9. PEN16-0131 – ACCEPT DEVELOPMENT IMPACT FEES (DIF) IMPROVEMENT CREDIT AGREEMENT #D21-003 FOR CACTUS COMMERCE CENTER PROJECT LOCATED AT THE NORTHEAST CORNER OF CACTUS AVENUE AND COMMERCE CENTER DRIVE DEVELOPER: CACTUS COMMERCE, L.P. (AGMT. NO. 2021-172) (Report of: Public Works)

Recommendations:

1. Accept and approve the Development Impact Fees Improvement Credit Agreement #D21-003 (DIF Agreement) for PEN16-0131 improvements.
2. Authorize the City Manager to execute the DIF Agreement.

A.10. PEN20-0075 (TRACT 31590) – APPROVE MAINTENANCE AGREEMENT BY AND BETWEEN THE CITY OF MORENO VALLEY AND DEL SOL MORENO VALLEY HOMEOWNERS ASSOCIATION FOR THE TRACT LOCATED WEST OF MORENO BEACH DRIVE, BETWEEN ALESSANDRO BOULEVARD AND BRODIAEA AVENUE. DEVELOPER – DR HORTON LOS ANGELES HOLDING COMPANY, INC. (AGMT. NO. 2021-173) (Report of: Public Works)

Recommendations:

1. Approve the Maintenance Agreement by and between the City of Moreno Valley and Del Sol Moreno Valley Homeowners Association.
2. Authorize the Mayor to execute the Maintenance Agreement with Del Sol Moreno Valley Homeowners Association.
3. Authorize the City Clerk to transmit the executed Maintenance Agreement to the Riverside County Recorder's Office for recordation.

- A.11. PEN19-0150 (PM 37750) – APPROVE PARCEL MAP 37750 LOCATED AT THE SOUTHEAST CORNER OF DAY STREET AND IRONWOOD AVENUE. OWNERS: M&F DEVELOPMENT COMPANY; MBBB, LLC; TRIPLE S GROUP, LLC; AND IRENE WEBB SALYER, TRUSTEE OF THE ERNEST WEBB CREDIT TRUST (Report of: Public Works)

I.2. CITY MANAGER'S REPORT

(Informational Oral Presentation - not for Council action)

City Manager Lee provided a public service announcement that the Delta Variant of the COVID-19 virus had returned. Reminded everyone that the City still had free masks and hand sanitizers at the BERC and libraries. These items were donated by the businesses in the City. He thanked the Council for being proactive in their outreach.

CLOSING COMMENTS AND/OR REPORTS OF THE CITY COUNCIL, COMMUNITY SERVICES DISTRICT, CITY AS SUCCESSOR AGENCY FOR THE COMMUNITY REDEVELOPMENT AGENCY, HOUSING AUTHORITY, PUBLIC FINANCING AUTHORITY, AND THE BOARD OF LIBRARY TRUSTEES.

Council Member Cabrera

1. Thanked all the volunteers that attended the Community Day of Service on Saturday, there was a great turnout. The games were a lot of fun for the children.
2. Sent his condolences to the family of Joshua Cabrera and thanked the Officers that saved the other family members lives.
3. Announced that in the coming week Caltrans would conduct clean ups on the 215 and 60 on and off ramps throughout Riverside, Perris, Jurupa Valley and Moreno Valley.
4. Announced that he attended the Rising Stars Business Academy student orientation.
5. Thanked the various sponsors of the backpack giveaways held throughout the City.
6. Urged everyone to stay safe, to wear their masks, and to get vaccinated.

Mayor Pro Tem Baca

1. Reminded everyone that Thursday was the State of the City event where Mayor Gutierrez provided the City's annual update.
2. Urged everyone to follow the COVID safety protocols.

Mayor Gutierrez

1. Urged everyone to follow the COVID safety protocols especially with the Delta variant surge.
2. Thanked staff and the Media team for their hard work on the Community Day of Service, it was a great event.
3. Shared his sentiments with the Deputies, family, and firefighters that experienced the tragic loss of Joshua Cabrera.

ADJOURNMENT

There being no further business to come before the City Council, Mayor Gutierrez adjourned the meeting at 6:26 p.m. in the memory of Joshua Cabrera.

SECTION V: QUESTIONS

Commissioner Shirt Size S

I am applying to be a:

Member at Large

Please answer the following questions. Use additional sheets if necessary and reference the question:

Why do you want to serve on the City's Emerging Leaders Council?

I would like to serve on the City's Emerging Leaders Council to make a difference in the community. I really liked the ideas that the council presented. I would love to make those plans a reality like the food truck events, the community garden, etc.

Describe any experience you have had that you feel has prepared you to on the Council?

I have been in NJHS and NHS for 4 years. There have been many experiences that I have experienced in that organization that have prepared me for the Council. There have been many service projects I have participated in like food drives, care projects, and more.

What issues would you address or activities would you plan if you were a Council Member?

I would really enjoy planning food pantries or community gardens that would be things that really help the community. I think planning events where small businesses, students, and other communities could be involved would also be good activities.

What do you think is one of the major issues facing teens/young adults in Moreno Valley and how would you address it?

There is a lack of communication between the city and teens and young adults. A lot of teens and young adults don't feel like can't make a difference if they aren't working for the city government itself. Having better communication with schools or the surrounding universities about events would help close the gap.

What do you hope to accomplish by your participation on the Emerging Leaders Council? How will your participation enhance your future goals and objectives?

I hope to be more involved in the cities events and projects. I would like to help create more programs and events that would help the people in the community. In the future, I hope I can be more outgoing and share my ideas more easily which I believe being in the Emerging Leaders Council will help do.

Are you able to commit to participating in one meeting per month? Each meeting can last approximately two hours.

Yes No

Do you have means of transportation to arrive to meetings on time?

Yes No

May we contact the person who wrote your letter of recommendation?

Yes No

I hereby authorize that the City of Moreno Valley may obtain and review on a confidential basis, such information regarding me as may be contained in the California State Summary Criminal History and in records of the California Department of Motor Vehicles.

Yes No

Pursuant to Resolution 2016-42 all board, commission, or council members must be registered voters of the City of Moreno Valley, provided that they are at least 18 years old.

I hereby agree to attend all Board meetings, unless excused, and understand that I may be removed for lack of attendance, pursuant to Municipal Code, Subsection 2.06.010(C) which states, "If a member is absent without advance permission of the board or commission or the appointing authority from three consecutive regular meetings or from 25% of the duly scheduled meetings of the board or commission within any fiscal year, the membership shall thereupon become vacant and shall be filled as any other vacancy."

SECTION VI: ACKNOWLEDGEMENT

For the Applicant: I certify that all statements in this application are true and complete to the best of my knowledge. I understand that any false statements of material fact will subject me to disqualification or dismissal if appointed. I release the City of Moreno Valley from any liability for the aforesaid information.

For the Parent/Guardian: I give permission for Valeria Sanchez Garcia to apply to be on the City of Moreno Valley Emerging Leaders Council as a Member at Large. If selected, I will permit and support them in attending meetings and activities related to the Emerging Leaders Council. I understand that meetings may be at various times and locations throughout the City of Moreno Valley and beyond City boundaries. I will support and encourage them to fulfill their participation requirements and professional standards as well as uphold the ELC values, mission, and objectives.

Photo Release: I give permission to the City of Moreno Valley to take photographs while participating in ELC events and activities for the use in future City publicity in broadcast, brochures, telecasts, newspapers and any promotional advertising or other materials. I waive any rights to privacy or publicity I may have in connection with such uses and understand that I will not receive any compensation for such use. By my signature below, I agree to the conditions of my participation stated herein and agree to this Photo Release.

Attachment: Valeria Sanchez_Redacted (5533 : MAYORAL APPOINTMENT TO THE EMERGING LEADERS COUNCIL)

RANCHO VERDE HIGH SCHOOL

Val Verde Unified School District

August 30th, 2021

To Whom It May Concern:

I would like to recommend Valeria Sanchez for your Emerging Leaders Program. Valeria is one of the most dedicated and focused students I have ever had the privilege of teaching and I believe she would be an outstanding addition to your program. Valeria transferred into Rancho Verde at the beginning of the Spring Semester last year. Due to differences in the course offerings between Valeria's original school and Rancho Verde she was placed in AP World History. In most of these transfer situations students have a challenging time picking up the coursework and catching up on the material they missed from earlier in the year. This was not the case with Valeria. From the very first day in distance learning Valeria was ready to reach out and learn the material that she needed to be successful on the AP exam at the end of the year. She took the task of learning the entire first semester's worth of curriculum on her own and outside of a few short meetings asking for clarification on materials Valeria took responsibility and learned the curriculum she would be tested on. Over the course of my twelve years of teaching I have only had a small handful of students demonstrate this determination to be successful especially given the amount of information she was expected to learn. Given the situation it would have been entirely understandable if Valeria had not been successful, but she refused to let the environment limit her success and instead stayed focused on her goals and achieved a Four on her AP exam.

In addition to her successes academically Valeria is equally passionate about contributing to her community. During several Zoom sessions during the Spring Semester Valeria indicated her interest in working on local projects. She enjoys planning and promoting activities which give back to the public such as food pantries or developing spaces which promote civic efforts such as community gardens. Valeria is especially interested in promoting cross cultural events to help the people within her community gain a better understanding of one another and to help foster an increased sense of identity.

Valeria refuses to let others define her. She knows who she is and what she wants to accomplish. Her dedication to her goals and her compassion and willingness to assist them show a level of maturity that is rare for a high school student.

Valeria Sanchez is a committed student both in the class and outside. She represents the best of what the Val Verde district has to offer, and it is my pleasure to recommend her for this program. If you have any additional questions about Valeria, please contact me either at Rancho Verde High [REDACTED] or through email at [REDACTED]

Sincerely,

[REDACTED]

Attachment: Valeria Sanchez_Redacted (5533 : MAYORAL APPOINTMENT TO THE EMERGING LEADERS COUNCIL)

Report to City Council

TO: Mayor and City Council

FROM: Pat Jacquez-Nares, City Clerk

AGENDA DATE: October 5, 2021

TITLE: COUNCIL DISCRETIONARY EXPENDITURE REPORTS FOR FISCAL YEAR 2021/2022 FROM JULY 1, 2021 THROUGH AUGUST 31, 2021

RECOMMENDED ACTION

Recommendation:

1. Receive and file the Fiscal Year 2021/2022 Council Discretionary Expenditure Report for July 1, 2021 through August 31, 2021.

SUMMARY

This staff report is prepared at the request of the City Council to provide transparency with respect to the expenditure of City funds from City Council Discretionary Expenditure Accounts. These reports are for each Council Member's year to date expenditures for Fiscal Year 2021/2022, for July 1, 2021 through August 31, 2021. Each Council District receives an annual budget allocation of \$3,000 and the Mayor receives an annual budget allocation of \$6,000.

With the adoption of the current fiscal year budget and pursuant to Resolution No. 2021-31, unused monies from Fiscal Year 2020/2021 will be carried over to the current Fiscal Year as approved by the City Manager. The Discretionary Expenditure Reports will reflect the amended budget amount in a future period.

The expenditure reports are included routinely in the City Council agenda as an additional means of distributing reports on activities to the Council and public. The reports are to be posted to the City's website following Council approval. The monthly reports provide unaudited information and are reconciled to the City's general ledger. Following the end of the Fiscal Year, the financial information shall be reviewed as part of the City's independent financial audit.

NOTIFICATION

Posting of the agenda as required by the Brown Act.

Report to City Council

TO: Mayor and City Council

FROM: Brian Mohan, Assistant City Manager

AGENDA DATE: October 5, 2021

TITLE: LIST OF PERSONNEL CHANGES

RECOMMENDED ACTION

Recommendation:

1. Ratify the list of personnel changes as described.

DISCUSSION

The attached list of personnel changes scheduled since the last City Council meeting is presented for City Council ratification.

Staffing of City positions ensures assignment of highly qualified and trained personnel to achieve Momentum MoVal priorities, objectives and initiatives.

FISCAL IMPACT

All position changes are consistent with appropriations previously approved by the City Council.

Report to City Council

TO: Mayor and City Council

FROM: Brian Mohan, Assistant City Manager

AGENDA DATE: October 5, 2021

TITLE: PURSUANT TO A LANDOWNER PETITION, ANNEX CERTAIN PARCEL(S) INTO COMMUNITY FACILITIES DISTRICT NO. 2014-01 (MAINTENANCE SERVICES) - AMENDMENT NO. 60 (RESO. NO. 2021-__)

RECOMMENDED ACTION

Recommendation:

Acting as the legislative body of Community Facilities District No. 2014-01 (Maintenance Services), adopt Resolution No. 2021-__, a Resolution of the City Council of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2014-01 (Maintenance Services) and approving the amended map for said District (Amendment No. 60) (24771 Nandina, located on the south side of Nandina Ave., west of Perris Blvd.).

SUMMARY

Adoption of the resolution will certify the annexation of one parcel into Community Facilities District (CFD) No. 2014-01 (Maintenance Services) ("District"). This action impacts only the property owner identified below, not the general citizens or taxpayers of the City.

The City requires property owners of new development projects to mitigate the cost of certain impacts created by the proposed development (e.g., the cost of operation and maintenance of public street lighting, landscaping, and/or streets and drainage). The City created CFD No. 2014-01 to provide the development community with a funding mechanism to assist in satisfying the requirement. After a property owner elects to annex their property into the District and the City Council approves the annexation, a special tax can be levied on the annual property tax bill of the annexed parcel(s) to fund the cost to provide the services.

The Property Owner, as defined below, has elected to annex the parcel of their project into the District to satisfy the condition. The Property Owner submitted a Landowner Petition approving the annexation and the City Clerk confirmed the Petition is valid.

DISCUSSION

As a condition of approval for the development project identified below, the Property Owner is required to provide an ongoing funding source for certain public services (i.e., the operation and maintenance services of public street lighting), which are required to be installed as part of the development project. The table below provides information for the property under development.

Property Owner/ Project ACP Record #	APN	Location
24771 Nandina 95,474 sq. ft. warehouse building PEN20-0041/SCP21-0006	316-211-003	South side of Nandina Ave., west of Perris Blvd.

The City Council formed CFD No. 2014-01 (Maintenance Services) to provide an alternative funding tool for the development community. It provides a mechanism to fund the operation and maintenance of public street lighting services, landscaping, and streets and drainage. After a landowner approves annexation of their property into the District and the City Council approves the annexation, the City is authorized to levy a special tax onto the annual property tax bill to fund the services related to or impacted by their development.

The Third Amended and Restated Rate and Method of Apportionment of Special Tax (“RMA”) for the District describes the different special tax rate areas, services provided, and formula to calculate the special tax rate for each of the tax rate areas. Several special tax rate areas were created to accommodate a variety of scenarios to ensure costs are fairly shared between property owners. For example, there is a tax rate area for “single-family residential street lighting” and one for “street lighting for property other than single-family residential” (e.g., commercial, industrial, or multi-family projects). Different tax rate areas are needed for street lighting because the spacing and size/type of lights differ based on the type of development. Likewise, there are several tax rate areas for maintenance of public landscaping (i.e. medians, parkways, and/or traffic circles). A property owner’s proportionate share of landscape maintenance costs will vary depending upon the total square footage of landscaping to be maintained and the number of properties sharing in the cost for that development. There is also a tax rate area for streets and drainage within single-family residential projects, which is calculated based on each parcel’s proportionate share of the improvements.

On April 20, 2021, the City Council adopted Ordinance No. 980, which designated the entire territory of the City as a future annexation area for the District. With the future annexation area designated, annexations can occur without an additional public hearing as long as the annexing landowner provides unanimous consent. Once annexed, parcels are subject to the annual special tax to fund the service they are receiving.

With the establishment of the District, a property owner now has two options to satisfy the condition(s) of approval:

1. Submit a Landowner Petition unanimously approving annexation of the property into the District. Approval of the petition and special tax rate allows the City to annually levy the special tax on the property tax bill of the property. This option is only available if there are fewer than 12 registered voters living within the proposed annexation area; or
2. Establish a homeowner or property owner association to provide the ongoing operation and maintenance of the improvements.

The Property Owner elected to annex their property into CFD No. 2014-01 and have the special tax applied to the annual property tax bill. The Office of the Riverside County Registrar of Voters confirmed there were no registered voters residing at the property, allowing a special election of the landowner. Adoption of the attached resolution (Attachment 1) amends the District and adds the property to the tax rate area identified in the Fiscal Impact section of this report and directs the recordation of the boundary map (Attachment 2) and amended notice of special tax lien for the amendment. The City Clerk received and reviewed the Landowner Petition and confirmed the Property Owner unanimously approved the annexation of their property into the District (Attachment 3).

Successful completion of the annexation process satisfies the project's condition of approval to provide a funding source for the operation and maintenance of public street lighting.

ALTERNATIVES

1. Adopt the resolution. *Staff recommends this alternative as it will annex the property into CFD No. 2014-01 at the request of the Property Owner and satisfy the condition of approval for the proposed development.*
2. Do not adopt the resolution. *Staff does not recommend this alternative as it is contrary to the request of the Property Owner, will not satisfy the condition of approval, and may delay development of the project.*
3. Do not adopt the resolution but rather continue the item to a future regularly scheduled City Council meeting. *Staff does not recommend this alternative as it will delay the Property Owner from satisfying the condition of approval and may delay development of the project.*

FISCAL IMPACT

Revenue received from the special tax is restricted and can only be used to fund the services for each tax rate area within the District. The special tax can only be applied to

a property tax bill of a parcel wherein the qualified electors (i.e., landowners or registered voters, depending upon the number of registered voters) have previously provided approval. The maximum special tax rate for the tax rate area is detailed below. If the projected revenue from the maximum special tax exceeds what is necessary to fund the services within the tax rate area, a lower amount will be applied to the property tax bill for all the properties within the affected tax rate area.

Property Owner (Amendment No.) Project ACP Record #	Tax Rate Area ¹	FY 2021/22 Maximum Special Tax Rate ¹
24771 Nandina (60) 95,474 sq. ft. warehouse building ² PEN20-0041/SCP21-0006	SL-02	\$4.53/front linear ft.
¹ The special tax applied to the property tax bill will be based on the needs of the tax rate area within the District. The applied special tax rate cannot exceed the maximum special tax rate. The FY 2021/22 applied rate for SL-02 (Street Lighting for Property Other than SFR) is \$0.70/per front linear foot. ² One street light is to be installed along Nandina Ave.		

The maximum special tax rate is subject to an annual inflation adjustment based on the change in the Consumer Price Index (CPI) or five percent (5%), whichever is greater. However, the annual adjustment cannot be applied unless the City Council annually authorizes such adjustment. The increase to the maximum special tax rate cannot exceed the annual inflationary adjustment without a two-thirds approval of the qualified electors within the affected tax rate area.

NOTIFICATION

The annexation materials were mailed to the Property Owner on August 16, 2021. A cover letter, Landowner Petition, RMA, and an envelope to return the completed petition were included.

CITY COUNCIL GOALS

Revenue Diversification and Preservation. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

- 1. Economic Development
- 2. Public Safety
- 3. Library
- 4. Infrastructure
- 5. Beautification, Community Engagement, and Quality of Life
- 6. Youth Programs

Objective 4.2: Develop and maintain a comprehensive Infrastructure Plan to invest in and deliver City infrastructure.

Objective 5.2: Promote the installation and maintenance of cost effective, low maintenance landscape, hardscape and other improvements which create a clean, inviting community.

RESOLUTION NO. 2021-____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, ORDERING THE ANNEXATION OF TERRITORY TO CITY OF MORENO VALLEY COMMUNITY FACILITIES DISTRICT NO. 2014-01 (MAINTENANCE SERVICES) AND APPROVING THE AMENDED MAP FOR SAID DISTRICT

WHEREAS, by its Resolution No. 2014-25, the City Council established the City of Moreno Valley Community Facilities District No. 2014-01 (Maintenance Services) (the "CFD"), a citywide district, pursuant to the Mello-Roos Community Facilities Act of 1982 (Government Code Section 53311 *et seq.*) (the "Act"); and

WHEREAS, by its Ordinance No. 874, the City Council authorized an annual special tax to be levied against all non-exempt parcels of real property within the CFD (the "Special Tax") to fund street lighting services and landscape maintenance services; and

WHEREAS, by its Ordinance No. 980, the City Council authorized an annual special tax to be levied against all non-exempt parcels of real property within the CFD to fund Drainage and Street Maintenance Services; and

WHEREAS, in order to permit landowners to efficiently annex developing parcels to the CFD, the City Council, by its Ordinance No. 980 designated the entire territory of the City as a future annexation area for the CFD and approved the third amended and restated rate and method of apportionment for the Special Tax; and

WHEREAS, the landowner of the parcel(s) listed on Exhibit A to this Resolution, which is attached hereto and incorporated herein by reference, has submitted to the City a petition requesting and approving annexation of the listed parcel(s) (the "Annexation Parcel(s)") to the CFD; and

WHEREAS, the Annexation Parcel(s) are comprised of the territory shown on the boundary map (the "Boundary Map") "Amendment No. 60 to Boundaries of City of Moreno Valley Community Facilities District No. 2014-01 (Maintenance Services), City of Moreno Valley, County of Riverside, State of California" which is included as Exhibit B to this Resolution, and incorporated herein by this reference; and

WHEREAS, the City Council desires to annex the Annexation Parcel(s) to the CFD.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Recitals. The above recitals are all true and correct and are herein incorporated.

1
Resolution No. 2021-____
Date Adopted: October 5, 2021

2. Annexation Approved. The Annexation Parcel(s) are hereby added to and part of the CFD with full legal effect. The Annexation Parcel(s) are subject to the Special Tax associated with the Tax Rate Area(s) indicated on Exhibit A to this Resolution.

3. Description of Services. The following is a general description of all services (the "Services") provided in the CFD:

A. Landscape Maintenance Services: Maintaining, servicing, and operating landscape improvements and associated appurtenances located within the public right-of-way and within dedicated landscape easements for the CFD. These improvements may include but are not limited to parkways, medians, open space landscaping, fencing, monuments, ornamental lighting, drainage, turf, ground cover, shrubs, vines and trees, irrigation systems, and appurtenant facilities and structures. Fundable costs may include, but are not limited to: (i) contracting costs for landscape maintenance services, including litter removal, (ii) salaries and benefits of City staff, (iii) expenses related to equipment, apparatus, and supplies related to these services, (iv) City administrative and overhead costs associated with providing such services within the CFD, and (v) lifecycle costs associated with the repair and replacement of facilities.

B. Street Lighting Services: Maintaining, servicing, and operating street lights and appurtenant improvements. Fundable costs may include, but are not limited to: (i) contracting costs for street light maintenance, (ii) salaries and benefits of City staff, if the City directly provides street light maintenance services, (iii) utility expenses and the expense related to equipment, apparatus, and supplies related to these services and authorized by the Act, (iv) City administrative and overhead costs associated with providing such services for the CFD, and (v) lifecycle costs associated with the repair and replacement of facilities.

C. Drainage and Street Maintenance Services: Maintaining, servicing, and operating drainage improvements and maintaining streets. Drainage improvements include public improvements and appurtenance (and associated easements) that are designed or used to capture, retain, detain, remove, transport, or treat surface water and storm water runoff. Fundable costs may include, but are not limited to: (i) contracting costs for street and drainage maintenance services, including litter removal, (ii) salaries and benefits of City staff if the City directly provides these services, (iii) expenses related to equipment, apparatus, and supplies related to these services, (iv) City administrative and overhead costs associated with providing such services within the CFD, and (v) lifecycle costs associated with the repair and replacement of streets and drainage improvements.

The Annexation Parcel(s) will only be provided with the services indicated on Exhibit A.

4. Amended Boundary Map. The Boundary Map attached hereto as Exhibit B is hereby approved. This map amends, and does not supersede, the existing maps of the

2

Resolution No. 2021-____
Date Adopted: October 5, 2021

CFD. The City Council directs that said map be filed with the Riverside County Recorder pursuant to Section 3113 of the Streets and Highways Code.

5. Notice of Special Tax Lien. The City Council directs that an amended notice of special tax lien be recorded pursuant to Section 3117.5 of the Streets and Highways Code with respect to the Annexation Parcel(s) associated with the Boundary Map.

6. This Resolution shall be effective immediately upon adoption.

7. The City Clerk shall certify to the adoption of this Resolution, and shall maintain on file as a public record this Resolution.

8. Severability. That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

9. Repeal of Conflicting Provisions. That all the provisions heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

APPROVED AND ADOPTED this 5th day of October 2021.

Report to City Council

TO: Mayor and City Council

FROM: Brian Mohan, Assistant City Manager

AGENDA DATE: October 5, 2021

TITLE: ACCEPTANCE OF THE FISCAL YEAR 2020 STATE HOMELAND SECURITY PROGRAM (SHSP) GRANT AWARD

RECOMMENDED ACTION

Recommendation:

1. Accept the Fiscal Year 2020 State Homeland Security Program (SHSP) grant award of \$24,223 from the Riverside County Emergency Management Department.
2. Authorize a budget adjustment of \$24,223 to the Emergency Management Grant fund (2503) revenue and expenditure accounts.

SUMMARY

This report recommends acceptance of the Fiscal Year 2020 State Homeland Security Program (SHSP) grant award in the amount of \$24,223. Funds will be utilized to support Community Emergency Response Team (CERT) training, equipment, and exercises.

DISCUSSION

The Fiscal Year 2020 SHSP plays an important role in the implementation of the National Preparedness System by supporting the building, sustainment, and delivery of core capabilities essential to achieving the National Preparedness Goal of a secure and resilient Nation. Delivering core capabilities requires the combined effort of the whole community, rather than the exclusive effort of any single organization or level of government. The Fiscal Year 2020 SHSP's allowable costs support these efforts and, for the City of Moreno Valley, this grant is limited to expenditures related to Community Emergency Response Team (CERT) training, equipment, and exercises.

The Riverside County Emergency Management Department (EMD) on behalf of all jurisdictions in Riverside County, applies for this federal grant on an annual basis. Riverside County EMD then distributes the grant funding to eligible agencies throughout the Operational Area. This year, the Fire Department has submitted to utilize the grant funding for the salary and benefits associated with the Office of Emergency Management Program Specialist during Fiscal Year 2020/2021 and Fiscal Year 2021/2022. This position will directly assist in teaching CERT classes to the community.

The City of Moreno Valley applies for various federal grants from the Department of Homeland Security, sub-granted through the State of California. An application requirement for this federal financial assistance is to designate certain City officials who are authorized to execute all pertinent grant applications and related documents. This authority must now be renewed annually.

ALTERNATIVES

1. Accept the Fiscal Year 2020 State Homeland Security Program (SHSP) grant award. *This alternative will allow the City to receive Fiscal Year 2020 Homeland Security Grant funding which will allow the Office of Emergency Management to better prepare the citizens of Moreno Valley for a natural or man-made disaster.*
2. Do not accept the Fiscal Year 2020 State Homeland Security Program (SHSP) grant award. *This alternative will prohibit the City from receiving Fiscal Year 2020 Homeland Security Grant funding which will hinder the ability of the citizens of Moreno Valley to be prepared to survive a natural or man-made disaster.*

FISCAL IMPACT

The Office of Emergency Management is requesting City Council to approve the acceptance of the 2020 SHSP grant award. Funding for this grant award, if approved, will be allocated as follows:

Description	Fund	GL Account No.	Type (Rev/Exp)	FY 2019/2020 Proposed Budget Amendment
Emergency Mgmt Grant – Federal Grant Revenue	2503	40-47-74106-485000	Rev	\$24,233
Emergency Mgmt Grant – Salaries, Regular	2503	40-47-74106-611110	Exp	\$24,233

RE: FY20 State Homeland Security Program Grant (SHSP) Award - \$24,223
Grant #2020-0095 CFDA#: 97.067

The California Office of Emergency Services (CalOES) has approved Riverside County's FY20 State Homeland Security Program Grant (SHSP) application and has authorized the commencement of reimbursement requests as of **8/6/2021**. The grant cycle for this grant will **end on May 31, 2022**. All **final reimbursement requests** are **due** no later than **June 10, 2022**.

Upon approval of pending paperwork this letter serves as authorization to begin spending and requesting reimbursement of your Anti-Terrorism Approval Authority (ATAA) approved projects. In an effort to ensure that all awarded funds are expended the State is requiring that reimbursement requests should be made at least every 6 months. Expenses for equipment should be completed within the first 8 months after receiving this award letter. Training must be completed or scheduled within the first year of this grant. Under extenuating circumstances some exceptions may be approved. **Full Expenditure of the awarded funds is expected.**

Riverside County Operational Area may reduce, suspend, or terminate current and/or future grant funding, in whole or in part, or other measures may be imposed for any of the following reasons:

- Failure to submit required reports.
- Failure to expend a minimum of 90% of awarded funding.
- Failure to expend funds in a timely manner consistent with the grant milestones, guidance, and assurances.
- Failure to comply with the requirements or statutory progress toward the goals or objectives of federal or state law.
- Failure to follow grant agreement requirements or special conditions.
- False certification in the application or document.
- Failure to adequately manage, monitor or direct the grant funding activities of their City/Agency.

Riverside County EMD does require you to provide a signed FY20 Grant Assurance and completed and signed Workbook Face-Sheet as soon as possible. Modifications and Reimbursement Requests cannot be processed until we receive these documents. Please remember that changes to your grant will require the approval of the OA prior to incurring any costs. All modifications, EHP's, sole source procurement, EOC and construction requests require additional approvals from CalOES through the OA prior to incurring any costs.

By accepting this award, it is understood that you are agreeing to comply with all applicable federal, state, and local requirements of the grant as put forth in the FY20 Grant Assurances, federal and state guidances, and all provisions of 2 CFR 200 including part F- "Audit Requirements". Any funds found owed as a result of a final review or audit must be refunded to the County within 15 days upon receipt of an invoice from Riverside County EMD.

As always, please feel free to contact us with any questions you may have. I look forward to working with you and appreciate your cooperation and support.

Regards,

Joe Barron

Administrative Services Analyst II
Riverside County EMD

Report to City Council

TO: Mayor and City Council

FROM: Brian Mohan, Assistant City Manager

AGENDA DATE: October 5, 2021

TITLE: SB 1205 FY 2020/2021 STATE MANDATE INSPECTIONS

RECOMMENDED ACTION

Approve Resolution No. 2021-XX, acknowledging receipt of a report made by the Fire Chief of the Moreno Valley Fire Department regarding the inspection of certain occupancies requiring annual inspections in such occupancies pursuant to sections 13146.2 and 13146.3 of the California Health and Safety Code. Staff recommends this alternative.

SUMMARY

Senate Bill (SB) 1205 was approved on September 27, 2018, which requires annual reporting to the City Council on Fire Departments completion of State Mandated inspections per Health and Safety Code 13146.2 and 13146.3. In accordance with California Health and Safety Codes 13145, 13146, and 17921, the City of Moreno Valley Fire Department inspects all annually state mandated structures for compliance with building standards as well as other regulations set forth by the State Fire Marshal. These annually inspected structures include hotels, motels, lodging houses, apartment houses, as well as private and public schools.

DISCUSSION

The California Health and Safety Code Sections 13145 and 13146 mandate City and County Fire Departments to enforce building standards adopted by the State Fire Marshal. Since the start of the program in 2010, the City has seen benefits of the comprehensive inspection program and the increased level of safety at these facilities.

In accordance with the City's adopted fee schedule, inspection fees are charged as allowed by the Health and Safety Code Sections 13146.2 and 13146.3. The Fire Department inspects identified buildings used as a public or private school, hotel, motel, lodging house, apartment house and certain residential care facilities for compliance

with building standards. In accordance with 13146.2 and 13146.3, the Fire Department has identified a total of 340 State Mandated annual facilities requiring inspection for FY20/21. 100% of the required 340 facilities requiring annual inspections have been completed, which includes 1,140 buildings for FY2020/2021. A copy of the SB 1205 Annual Report is attached to Resolution No. 2021-XX as Exhibit A.

ALTERNATIVES

1. Approve Resolution No. 2021-XX, acknowledging receipt of a report made by the Fire Chief of the Moreno Valley Fire Department regarding the inspection of certain occupancies requiring annual inspections in such occupancies pursuant to sections 13146.2 and 13146.3 of the California Health and Safety Code. Staff recommends this alternative.
2. Do not Approve Resolution No. 2021-XX, acknowledging receipt of a report made by the Fire Chief of the Moreno Valley Fire Department regarding the inspection of certain occupancies requiring annual inspections in such occupancies pursuant to sections 13146.2 and 13146.3 of the California Health and Safety Code. Staff does not recommend this alternative.

FISCAL IMPACT

There is no cost to the City for approval of the Resolution. The City will request reimbursement of incurred costs if the State identifies this particular statute impose costs mandated by the State. The reimbursement of State mandated cost is covered under Senate Bill 90 and is managed by the Financial & Management Services Department.

Senate Bill No. 1205

CHAPTER 854

An act to add Section 13146.4 to the Health and Safety Code, relating to fire protection.

[Approved by Governor September 27, 2018. Filed with Secretary of State September 27, 2018.]

LEGISLATIVE COUNSEL'S DIGEST

SB 1205, Hill. Fire protection services: inspections: compliance reporting.

Existing law requires the chief of any city or county fire department or district providing fire protection services and his or her authorized representatives to inspect every building used as a public or private school within his or her jurisdiction, for the purpose of enforcing specified building standards, not less than once each year, as provided. Existing law requires every city or county fire department or district providing fire protection services that is required to enforce specified building standards to annually inspect certain structures, including hotels, motels, lodging houses, and apartment houses, for compliance with building standards, as provided.

This bill would require every city or county fire department, city and county fire department, or district required to perform the above-described inspections to report annually to its administering authority, as defined, on the department's or district's compliance with the above-described inspection requirements, as provided. The bill would require the administering authority to acknowledge receipt of the report in a resolution or a similar formal document. To the extent this bill would expand the responsibility of a local agency, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

The people of the State of California do enact as follows:

SECTION 1. Section 13146.4 is added to the Health and Safety Code, to read:

13146.4. (a) Every city or county fire department, city and county fire department, or district required to perform an annual inspection pursuant

to Sections 13146.2 and 13146.3 shall report annually to its administering authority on its compliance with Sections 13146.2 and 13146.3.

(b) The report made pursuant to subdivision (a) shall occur when the administering authority discusses its annual budget, or at another time determined by the administering authority.

(c) The administering authority shall acknowledge receipt of the report made pursuant to subdivision (a) in a resolution or a similar formal document.

(d) For purposes of this section, “administering authority” means a city council, county board of supervisors, or district board, as the case may be.

SEC. 2. If the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code.

O

RESOLUTION NO. 2021 - XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, ACKNOWLEDGING RECEIPT OF A REPORT MADE BY THE FIRE CHIEF OF THE MORENO VALLEY FIRE DEPARTMENT REGARDING THE INSPECTION OF CERTAIN OCCUPANCIES REQUIRING ANNUAL INSPECTIONS IN SUCH OCCUPANCIES PURSUANT TO SECTIONS 13145, 13146 and 17921 OF THE CALIFORNIA HEALTH AND SAFETY CODE

WHEREAS, California Health & Safety Code Section 13146.4 was added in 2018, and became effective on September 27, 2018; and

WHEREAS, California Health & Safety Code Sections 13146.2 and 13146.3 requires all fire departments, including the Moreno Valley Fire Department, that provide fire protection services to perform annual inspections in every building used as public or private schools, hotels, motels, lodging houses, and apartment houses for compliance with building standards, as provided and

WHEREAS, California Health & Safety Code Section 13146.4 requires all fire departments, including the Moreno Valley Fire Department, that provide fire protection services to report annually to its administering authority on its compliance with sections 13146.2 and 13146.3 and,

WHEREAS, the Council of the City of Moreno Valley intends this Resolution to fulfill the requirements of the California Health & Safety Code regarding acknowledgment of the Moreno Valley Fire Department's compliance with California Health and Safety Code Sections 13146.4.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

The Council expressly acknowledges the receipt of the annual fire inspection report for fiscal year 2020/2021, attached hereto as Exhibit "A".

Report to City Council

TO: Mayor and City Council

FROM: Michael Lloyd, Public Works Director/City Engineer

AGENDA DATE: October 5, 2021

TITLE: PEN16-0095 (TRACT 36760) – APPROVAL OF MAINTENANCE AGREEMENT BY AND BETWEEN THE CITY OF MORENO VALLEY AND LEGACY PARK COMMUNITY ASSOCIATION FOR THE TRACT LOCATED ON THE EAST SIDE OF INDIAN STREET BETWEEN GENTIAN AVENUE AND SANTIAGO DRIVE. DEVELOPER – MERITAGE HOMES OF CALIFORNIA, INC.

RECOMMENDED ACTION

Recommendations:

1. Approve the Maintenance Agreement by and between the City of Moreno Valley and Legacy Park Community Association;
2. Authorize the City Manager to execute the Maintenance Agreement with Legacy Park Community Association; and
3. Authorize the City Clerk to transmit the executed Maintenance Agreement to the Riverside County Recorder's Office for recordation.

SUMMARY

This report recommends approval of a maintenance agreement with Legacy Park Community Association for residential Tract 36760, which is located on the east side of Indian Street between Gentian Avenue and Santiago Drive. The developer, Meritage Homes, is required to enter into a maintenance agreement with the City so that the City may maintain the water quality basins within the development to reduce pollutants in storm water and non-storm water discharges associated with the development. The proposed maintenance agreement between Legacy Park Community Association and the City is necessary to ensure long-term access, maintenance, and provide funding.

DISCUSSION

Meritage Homes is the developer and owner of Tract Map 36760, which is located on the east side of Indian Street between Gentian Avenue and Santiago Drive. The developer is required to construct water quality basins to mitigate certain environmental impacts. Meritage Homes will install Best Management Practices (BMPs) to mitigate the development's impact on water quality. These BMPs are included in each water quality basin in which the City will maintain the landscaping and irrigation. The developer will join the existing Legacy Park Community Association and will retain ownership of the water quality basins. Upon the first conveyance of a home to an individual property owner, Legacy Park Community Association will assume the obligations stipulated in the maintenance agreement. A maintenance agreement is required since the water quality basins are privately owned.

The water quality basins not only provide mitigation for water quality impacts, but also act as an extension of the City's storm drain system. As such, the long term maintenance of these basins are crucial to ensure safe operations during the storm events to protect surrounding properties. Additionally, under the requirements of the National Pollutant Discharge Elimination System (NPDES) MS-4 Permit, it is essential that the City monitors and ensures continued maintenance of the water quality basins that will accept storm water and non-storm water discharges from the development.

Authorizing the City to maintain the landscaping within the water quality basins will assist the City in the following ways:

- Assure continued maintenance of the required landscaping within the water quality basins, and
- Comply with State and Federal regulations for monitoring storm water and non-storm water discharges to the City storm drains.

The maintenance agreement is necessary to guarantee long-term funding for public maintenance of the landscaping and to ensure continued access to the water quality basins. Some of the key components of the agreement include:

- Provides a thirty (30) year term with provisions for extension(s).
- Identifies specific areas to be maintained by the City.
- Identifies schedules for maintenance.
- Establishes minimum insurance requirements to be carried by the Homeowners/Community Association.
- Provides a Judicial Reference provision, which resolves any disputes regarding the Agreement through an agreed upon or judicially appointed referee. This simplifies the litigation process but waives a right to a jury trial.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *This alternative ensures the water quality basins will be maintained in a safe and operationally sound condition and ensures the City remains in compliance with NPDES requirements.*
2. Do not approve and do not authorize the recommended actions as presented in this staff report. *This alternative leaves maintenance of the water quality basins with Meritage Homes of California, Inc. or Legacy Park Community Association. Additionally, this alternative may cause non-compliance with NPDES requirements.*

FISCAL IMPACT

There is no fiscal impact associated with the recommended actions. The developer has balloted for the NPDES Regulatory Rate. Property owners will be assessed NPDES fees, which fund the cost of maintenance of the water quality basins.

ASSOCIATION**

Attachment: Maintenance Agreement - Legacy Park - PEN16-0095 (TR 36760) [Revision 1] (4313 : PEN16-0095 (TRACT 36760) - APPROVAL OF

**MAINTENANCE AGREEMENT BY AND BETWEEN
CITY OF MORENO VALLEY AND
LEGACY PARK COMMUNITY ASSOCIATION**

This Maintenance Agreement (“**Agreement**”) is made and entered into effective on the date (“**Effective Date**”) the City signs this Agreement. This Agreement is by and between LEGACY PARK COMMUNITY ASSOCIATION, a California nonprofit mutual benefit corporation (“**Association**”), and the CITY OF MORENO VALLEY (the “**City**”). The Association and the City are sometimes hereinafter each referred to as a “**Party**” and collectively as the “**Parties.**”

PREAMBLE

A. Association is an incorporated homeowners’ association responsible for the operation and maintenance of Association Property (as hereinafter defined) of a single-family residential development known as “Legacy Park” located on Tract No. 36760 in the City of Moreno Valley, County of Riverside, State of California (“**Project**”). Association’s maintenance responsibilities are set forth in Article V of the “Declaration of Covenants, Conditions and Restrictions for Legacy Park” recorded against the Project (as may be amended or supplemented, collectively, the “**Declaration**”). Unless otherwise expressly provided, all capitalized terms used in this Agreement shall have the definition and meanings set forth in the Declaration.

B. In satisfaction of the City conditions of approval for development of the Project, Association is required to enter into an agreement for the City to provide certain services relating to maintenance (“**Maintenance**”) of certain improvements within the Project which are the responsibility of Association pursuant to the Declaration, including without limitation, certain water quality basins, which are located within the Common Area (as defined in California Civil Code Section 4095 and referenced in the Declaration as “**Association Property**”), all as more fully described in **Exhibit “A”**. The Association shall grant access to the City in order to perform the necessary Maintenance for the water quality basin(s) and detention basin(s) within Association Property.

NOW THEREFORE, in consideration of the promises contained herein, the City and Association agree as set forth below:

1. Term. Subject to applicable law, the term (“**Term**”) of this Agreement shall commence as of the Effective Date of this Agreement and shall remain in effect for thirty (30) years from the Effective Date of this Agreement. At the end of such thirty (30) year period, this Agreement shall be extended for successive terms of thirty (30) years unless a document executed by each of the Parties hereto or their respective successors-in-interest cancels this Agreement or any portion hereof and said document is recorded in the office of the County Recorder of Riverside County. If applicable law limits the duration of the Term, then this Agreement shall be deemed to have a Term equal to the maximum Term permitted by law, and shall, unless affirmatively terminated by the parties hereto, shall be deemed to be renewed and extended for successive maximum terms as permitted by law. The Maintenance shall commence at such time as such maintenance is required following the Effective Date of this Agreement.

During the Term of this Agreement, the Parties hereby covenant and agree to negotiate in good faith any changes to the terms set forth herein as then required by law or otherwise reasonably required.

2. Maintenance of Association Property by the City. After the completion of the Establishment Period (as defined in **Exhibit “B”**), and throughout the Term, the City shall directly provide all Maintenance of Association Property described on **Exhibit “A”** attached hereto. Such Maintenance shall include, without limitation, the maintenance responsibilities described on **Exhibit “B”** attached hereto and incorporated herein. For as long as it is authorized to do so, the City shall assess an annual levy, parcel charge, special tax, or fee (however such amount shall be denominated, the “**Annual Levy**”) against the Lots within the Project designed and intended for the construction of a Residence and ownership by an individual Owner (hereinafter referred to as the “**Residential Lots**”) for the cost and expenses related to the Maintenance.

3. Maintenance of Detention Basin(s) by Association. Throughout the remaining Term, the Association shall directly provide all Maintenance of the Detention Basin(s) on Association Property as described on **Exhibit “A”** and depicted on **Exhibit “D”** attached hereto. Such Maintenance shall include, without limitation, the maintenance responsibilities described on **Exhibit “C”** attached hereto and incorporated herein. The Association shall be responsible for all costs and liabilities of any kind related to the ownership, operation, upkeep and maintenance of the Detention Basin(s) on Association Property. In the event the Association fails to maintain Detention Basin(s) or the functionality of the Detention Basin(s) have been compromised, the City has the right to perform required work to repair, re-construct, or re-grade any component of the Detention Basin. In the event the Association fails to perform the necessary maintenance contemplated by this Instrument, within five (5) days of being given written notice by the City, the lack of maintenance shall be considered a public health and safety concern and declared a “nuisance”, the City shall take all necessary actions as provided in the Municipal Code, to abate the nuisance and charge the entire cost and expense to the Association, including administrative costs, attorneys' fees and interest thereon at the maximum rate authorized by law from the date of the notice of expense until paid in full. Additionally, any damage that results from discharge due to lack of maintenance prescribed herein shall be at the sole cost of the Association.

4. Suspension of Payments of the City. For a period (“**Suspension Period**”) commencing on the Effective Date of this Agreement and continuing to the date as of which the City is no longer able to assess, through Annual Levies, adequate charges against the Residential Lots within the Project for expenses incurred by the City relating to the Maintenance, Association shall not be responsible for the payment of any cost or expenses related to the Maintenance. Upon receipt of written notice from the City to Association at the address listed in **Section 8** hereof (or such other address of which Association shall have previously notified the City in writing in accordance with **Section 8** hereof), informing Association of the City’s inability to assess all or any portion of the Annual levies sufficient for the Maintenance, the Suspension Period shall terminate and Association shall have the absolute obligation to pay the City the full amount necessary to cover all costs and expenses related to the City’s Maintenance of Association Property in excess of the amount that the City is able to assess directly against the Residential Lots (the “**HOA Payment Obligations**”).

5. Budget and Reimbursement to the City. Following termination of the Suspension Period, the City shall prepare and provide to Association a budget (“**Budget**”) for the next Fiscal Year (as defined below) for the Maintenance obligations described in **Exhibit “B”**, which Budget shall set forth the Fiscal Year expenses projected to be incurred by the City for Maintenance and operations of the City with respect to Association Property (including, without limitation, the City’s administrative overhead). The expense projections in each year’s Budget shall be based upon the Maintenance and operating expenses (including, without limitation, the City’s administrative overhead) incurred by the City within the previous three (3) years, and may include (i) normal and customary reserves and contingencies, and (ii) cost of living increases based on the Los Angeles-Riverside-Orange County Regional Consumer Price Index, as published by the United States Department of Labor’s Bureau of Labor Statistics. The Budget shall also reflect an amount for depreciation of City maintained facilities, if any, and a reserve for replacement and/or repair of landscape materials, irrigation system components, and other improvements. Following the completion of the Suspension Period and Association’s receipt of the Budget, Association shall make annual payments to the City for Maintenance and operations expenses incurred by the City as set forth in such Budget by July 1 of the Fiscal Year to which such payment applies. For the purposes of this Agreement, the City’s “Fiscal Year” shall be July 1 through June 30, unless Association is otherwise notified of a change pursuant to **Section 8** hereof.

Notwithstanding any other provision herein, the parties hereto acknowledge, understand and agree that in the event that the right of the City to impose the charges contemplated herein is or becomes prohibited, then, notwithstanding such prohibition, it is the intention of the parties hereto to continue to have the City perform the Maintenance as contemplated hereby, and to have the costs therefor charged to Association. In the event that Association fails or is unable to so assess the Owners for the amounts that the City is prohibited from assessing as contemplated hereby, then, after no less than sixty (60) days prior written notice by the City that Association is in default, Association shall have the absolute obligation to pay the City, and the City shall have the right to collect the HOA Payment Obligations from Association. Further, if and to the extent that there is a change in applicable law, including, without limitation, California Civil Code Section 5735 (which the Parties acknowledge prohibits an “Assignment” (as defined below)) such that an Assignment is clearly permitted (as reasonably determined by Association), the City shall have the option to require Association to assign to the City Association’s right to directly assess Owners for such assessments, together with Association’s corresponding remedies of lien and foreclosure provided in the Declaration in the event that any such Owner(s) fail to pay the required assessments (an “**Assignment**”). An Assignment pursuant to this **Section 5** is expressly subject to the following:

- a. Any such delegation and/or assignment of assessment and/or lien rights shall be deemed a partial, non-exclusive assignment;
- b. Association shall not make and expressly disclaims any representations and/or warranties that it has the right to assign any of its lien rights or rights to assess real property or levy assessments under the Declaration, and, if any assignment is made or deemed made, the City pursues same at its own risk; and
- c. If any Assignment is determined, at any time, by any court or arbitrator, to not be permitted as a matter of law, the City shall immediately cease any actions related thereto.

tmpA8D8

6. Special Assessments and Increases in Assessments. This Agreement shall have no effect on Association’s ability and right, in accordance with the terms of the Declaration, to (a) levy assessments, as may be required, or (b) increase the budgeted amount of regular assessments, or (c) to collect any parcel charges and to file assessment liens for such charges.

7. Obligations of Association. Association agrees as follows:

a. Association and its members shall not amend or repeal, directly or indirectly, the Declaration, or the restrictions described therein, and no rules or regulations of the Board of Association shall be adopted, amended, or repealed, in each case which in any manner increases or may increase the obligations of the City, or decreases or may decrease the obligations of Association, under this Agreement, without the prior written consent of the City, which consent the City may grant or withhold in its sole and absolute discretion;

b. Association may not assign, transfer, or hypothecate this Agreement or their rights or obligations hereunder; provided, however, that the parties hereto hereby agree and recognize that any right of the City to payment from Association in respect of the HOA Payment Obligations does not constitute an assignment or transfer of the rights or obligations under this Agreement. In addition, in view of the personal nature of this Agreement, Association agrees that, during the term of this Agreement, it will not sell, transfer, encumber, or otherwise dispose of Association Property, or any part thereof, without the prior written consent of the City, which consent the City may grant or withhold in its sole and absolute discretion, and any purported sale, transfer, hypothecation, or other disposition thereof, without such consent, shall be null and void ab initio; and

c. Association shall pay, the annual amount to the City required pursuant to **Section 5** hereof, if any.

8. Notices. All notices, statements, or other documents which any party shall be required or desire to give to any other party hereunder must be in writing and shall be given by the party only in one of the following ways: (a) by personal delivery, or (b) by addressing it as indicated below, and by depositing it, registered or certified mail, postage prepaid, in the United States mail. If so delivered or mailed, each such notice, statement, or other document shall be conclusively deemed to have been given when personally delivered, or forty-eight (48) hours after the date of mailing (excluding Saturdays, Sundays, and federal holidays), as the case may be. The addresses for notices and other communications, until further notice, are:

THE CITY: City of Moreno Valley
14177 Frederick Street
Moreno Valley, California 92553
Attn: Land Development Division

THE ASSOCIATION: Legacy Park Community Association
c/o Meritage Homes of California, Inc.
5 Peters Canyon Road, Suite 310
Irvine, California 92606

9. Resolution of Certain Disputes. Any dispute between the City and Association, which relates to this Agreement, shall be settled between them by Judicial Reference as provided by California law. Accordingly, any such dispute shall be heard by a referee pursuant to the provisions of the California Code of Civil Procedure Sections 638 to 645.1, inclusive, and in connection therewith:

a. The Parties to such dispute shall promptly and diligently cooperate with one another and the referee, and shall perform such acts as may be necessary to obtain a prompt and expeditious resolution of the dispute or controversy in accordance with the terms of this Agreement;

b. The Parties to such dispute shall agree upon a single referee who shall then try all issues, whether of fact or law, and report a finding and judgment thereon. If the Parties are unable to agree upon a referee within ten (10) days of a written request to do so by any party, then any party may seek to have a referee appointed pursuant to the California Code of Civil Procedure Sections 638 and 640;

c. Subject to the limitations of this Section, the referee shall have the right to award all legal or equitable relief appropriate under the circumstances of the controversy before him or her; and

d. The cost of such proceeding shall be apportioned among the Parties to the dispute in accordance with California Code of Civil Procedure Section 645.1. In no event shall any such reference proceeding or any appeal therefrom result in an award of punitive damages, and all such damages are hereby waived.

10. Indemnity.

a. Association agrees to indemnify, save, defend, and hold harmless the Community Services District of the City of Moreno Valley, the City, the Moreno Valley Housing Authority, and their respective officers, agents and employees (all of the foregoing persons, other than Association, are collectively referred to as the “**City Indemnitees**”) from and against any claim, action, damages, costs (including, without limitation, all attorney’s fees and litigation costs), injuries, or liability (collectively referred to as “**Claims**”) arising out of the performance of any action contemplated by this Agreement by Association. Should any of the City Indemnitees be named in any suit, or should any claim be brought against any of the City Indemnitees by suit or otherwise, arising out of performance by Association of services rendered pursuant to this Agreement, Association will defend each such City Indemnitee (at each such City Indemnitee’s request and with counsel satisfactory to each such City Indemnitee) and will indemnify each such City Indemnitee for any judgment rendered against it or any sums paid out in settlement or costs incurred in defense otherwise; provided, however, that this indemnification and hold harmless shall not include any Claims arising from the sole negligence or willful misconduct of such City Indemnitee.

b. The City agrees to indemnify, save, defend and hold harmless the Association and its officers, agents and employees from any and all liability, claims, damages or injuries to any person, including injury to the City’s employees and all claims which arise from or

are connected with the negligent performance or failure to perform the services or other obligations of the City under this Agreement, or are caused or claim to be caused by the negligent acts of the City, its officers, agents or employees, or its subcontractor(s) or any person acting for the City or under its control or direction; provided, however, that this indemnification and hold harmless shall not include any Claims arising from the negligence or willful misconduct of the Association, its officers, agents or employees.

11. Insurance.

a. Before commencing performance under this Agreement, and at all other times this Agreement is effective, Association will procure and maintain the following types of insurance with coverage limits complying, at a minimum, with the limits set forth below:

<u>Type of Insurance</u>	<u>Limits (combined single)</u>
Commercial general liability:	\$1,000,000 per occurrence \$ 500,000 property damage \$2,000,000 aggregate
Business automobile liability	\$1,000,000
Workers' compensation	Statutory requirement

b. Commercial general liability insurance will meet or exceed the requirements of ISO-CGL Form No. CG 00 01 11 85 or 88. The amount of insurance set forth above will be a combined single limit per occurrence for bodily injury, personal injury, and property damage for the policy coverage. Liability policies will be endorsed (i) to name the City, Moreno Valley Community Services District, Housing Authority of the City of Moreno Valley, and their respective officials and employees as "additional insured" under said insurance coverage, and (ii) to state that such insurance will be deemed "primary" such that any other insurance that may be carried by any of the City Indemnitees will be excess thereto. Such insurance will be on an "occurrence," not a "claims made," basis and will not be cancellable or subject to reduction except upon thirty (30) days prior written notice to the City Indemnitees.

c. Automobile coverage will be written on ISO Business Auto Coverage Form CA 00 01 06 92, including symbol 1 (Any Auto).

d. Each of the City Indemnitees shall be named as additional insured on all policies of insurance except errors and omissions and workers' compensation.

e. Association will furnish to the City's Land Development Division duly authenticated Certificates of Insurance evidencing maintenance of the insurance required under this Agreement, endorsements as required herein, and such other evidence of insurance or copies of policies on an annual basis and as may be reasonably required by the City. Insurance must be placed with insurers with a current A.M. Best Company Rating equivalent to at least a Rating of "A:-VII." Certificate(s) must reflect that the insurer will provide thirty (30) day notice of any cancellation of coverage.

f. Should Association, for any reason, fail to obtain and maintain the insurance required by this Agreement, the City may obtain such coverage at Association's expense and deduct the cost of such insurance from payments due to Association under this Agreement or terminate.

g. If the definitive insurance policy meeting the terms of **Section 11** and corresponding to the pro forma policy is not issued within ninety (90) days from the Effective Date of this Agreement, then Association covenants and hereby agrees without defense or future objection that the City may do the following without any liability whatsoever:

- i. Cease issuing building permits for the Project; and
- ii. Cease issuing or otherwise approving certificates of occupancy for any aspect of the Project regardless of the date the building permit was issued.

h. Association further acknowledges and agrees that notwithstanding **Sections P.O.B.11.f** and **P.O.B.11.g** above, all of its other obligations under this Agreement will become effective and remain in full force and effect upon the execution and delivery of this Agreement and the delivery and acceptance by the City of the documents and material described in **Section P.O.B.11.e** above and/or the insurance policy.

The requirements for the insurance shall only terminate upon termination of this Agreement as specified in **Section P.O.B.1** hereof.

12. Recordation. This Agreement and any amendments thereto shall be recorded within the records of the Office of the Recorder for the County of Riverside and shall constitute a covenant running with the land for all the Lots within the Project and shall be binding on Association, all property owners, administrators, executors, assigns, heirs, and all other successors in interest.

13. Default and Remedies. In the event Association fails to make the payments required under **Section 5** hereof, fails to obtain the insurance required under **Section 11** hereof, or fails to take any other required action under this Agreement, the City may take whatever action at law or in equity or under this Agreement to which it is entitled, including but not limited to an action for damages or for specific performance or otherwise to enforce performance and observance of any obligation, condition or covenant of Association under this Agreement. Notwithstanding anything else in this Agreement, if Association fails to obtain the insurance required under **Section 11** hereof, the City may obtain such insurance insuring the City, and if available, Association, and charge Association for same. As permitted under the Declaration, the City may recover such insurance costs and other costs associated with the remedies permitted hereby through the Regular Assessment as defined in the Declaration. In addition, the City shall be entitled to all of its costs associated with enforcing the terms of this Agreement, including, without limitation, attorneys' fees and costs, and court costs. Such costs may also be enforced through the Regular Assessments.

14. Miscellaneous. As used in this Agreement, all words in the masculine, feminine, or neuter gender, and the plural or singular number, shall each be construed to include the others whenever the context so requires. This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties hereto. This Agreement shall be governed

by and construed in accordance with the laws of the State of California. Time is of the essence of this Agreement. No change in or addition to, or waiver or termination of this Agreement or any part thereof, shall be valid unless in writing and signed on behalf of each of the Parties hereto. Every provision of this Agreement is intended to be severable. If any term or provision hereof is illegal or invalid for any reason whatsoever, such illegality or unenforceability shall not affect the validity of the remainder of this Agreement. This Agreement may be simultaneously executed in several counterparts, each of which shall be an original and all of which shall constitute but one and the same instrument.

LOTS AA AND DD OF TRACT NO. 36760 IN THE CITY OF MORENO VALLEY, COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, AS PER THAT TRACT MAP RECORDED ON DECEMBER 10, 2020, IN BOOK 475, PAGE(S) 52-65, OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF RIVERSIDE COUNTY, CALIFORNIA.

Attachment: Maintenance Agreement - Legacy Park - PEN16-0095 (TR 36760) [Revision 1] (4313 : PEN16-0095 (TRACT 36760) - APPROVAL OF

EXHIBIT “B”

Maintenance of Association Property by the City

The purpose of the maintenance services program is to ensure the protection of water quality and stormwater control by the successful implementation of those landscape and irrigation improvements, located within Association Property identified in Exhibits “A” and “D”.

These maintenance guidelines are specifically tailored to establish and sustain material installed within Association Property.

For a minimum period of one (1) year (“**Establishment Period**”), following completion of the initial material installation including completion of the landscape and irrigation improvements by Association, Association will be responsible for the care and maintenance of all material and improvements. Association’s involvement during this period is proven to increase the successful adaptation of the plant material.

Within fourteen (14) calendar days following the Establishment Period and the submittal to the City of “As-Built” planting, irrigation and grading plans for all areas to maintained under this Agreement, the City will evaluate Association Property for health of plant material and determine whether the landscape and irrigation systems are fully operable. If judged satisfactory by the City, the Establishment Period will be considered concluded and the City will notify the Association pursuant to **Section 7** of this Agreement. At that time, the long-term maintenance program will begin, and the City will assume the maintenance services identified herein. Should the City judge the health of plant material and/or the landscape and irrigation systems are not fully operable, the City will not assume maintenance services and will notify Association at the address set forth in **Section 8** of this Agreement (or such other address of which Association shall have previously notified the City in writing in accordance with **Section 8** hereof) of its decision.

Following the successful conclusion of the Establishment Period, the City personnel with experience and knowledge in landscaping and irrigation management will supervise all landscaping and irrigation maintenance personnel.

Maintenance Services

In accordance with the City’s Plant and Irrigation Maintenance Specifications, and all applicable law or regulations, the City will perform the maintenance services on an as-needed basis within Association Property. The determination of when such services are needed will be in the City’s sole discretion.

The City shall not perform or otherwise be responsible to implement any monitoring or mitigation compliance or certify to monitoring or mitigation compliance affecting Association Property pursuant to, (i) any conservation covenant or easement, and (ii) any permits issued by the United States Army Corps of Engineers or other similar governmental regulatory agencies.

No other services by the City may be implied or inferred without amendment or modification to this Agreement.

tmpA8D8

EXHIBIT “C”

Maintenance by the Association

The Association’s maintenance responsibilities of the Detention Basin(s) shall include, but not necessarily be limited to, the free-standing walls, retaining walls and/or fences, storm drain lines, underlain pipes, parkway culverts, outlet /inlet/overflow structures, headwalls, rip-rap, slope stability, necessary re-grading of the detention basin(s), , and landscape and irrigation improvements.

The Association’s maintenance responsibilities of the Water Quality Basin(s) shall include, but not necessarily be limited to, the free-standing walls, retaining walls and/or fences, storm drain lines, underlain pipes, parkway culverts, outlet /inlet/overflow structures, headwalls, rip-rap, slope stability, necessary re-grading of the bio-retention basin, and replacement of bio-retention soil as necessary.

The Association Property is described in **Exhibit “A”** and depicted on **Exhibit “D”**.

Report to City Council

TO: Mayor and City Council

FROM: Michael Lloyd, Public Works Director/City Engineer

AGENDA DATE: October 5, 2021

TITLE: APPROVE THE SECOND AMENDMENT TO THE AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH MICHAEL BAKER INTERNATIONAL FOR THE INDIAN STREET / CARDINAL AVENUE BRIDGE (OVER LATERAL A), PROJECT NO. 802 0004

RECOMMENDED ACTION

Recommendations:

1. Approve the Second Amendment to the Agreement for Professional Consultant Services with Michael Baker International, to perform Environmental Clearance, Right of Way Documentation, and Bridge and Roadway Design for the Indian Street / Cardinal Avenue Bridge (Over Lateral A) project, funded with Arterial Developer Impact Fee (DIF) funds;
2. Authorize the City Manager to execute the Second Amendment to Agreement for Professional Consultant Services with Michael Baker International, subject to the approval by the City Attorney;
3. Authorize an amendment to the existing Purchase Order with Michael Baker International in the amount of up to but not to exceed \$650,000.00 once the Agreement has been signed by all parties; and
4. Authorize the Public Works Director to execute any subsequent related amendments to the Agreement for Professional Consultant Services with Michael Baker International, not to exceed the total Purchase Order amount, subject to approval by the City Attorney.

SUMMARY

This report recommends approval of a second amendment to the agreement with Michael Baker International for Professional Consultant Services to complete the environmental, right of way documentation, and design for the Indian Street / Cardinal Avenue Bridge project.

DISCUSSION

As part of the City's General Plan Circulation Element, Indian Street is designated as a Minor Arterial Street and is intended to serve as a critical north-south corridor into and out of the City's south industrial area, especially for emergency response. To complete this emergency response corridor, the construction of a bridge over the existing Perris Valley Storm Drain (PVSD) Lateral A channel is required. As such, the City's Strategic Plan, Momentum MoVal, prioritizes the bridge as a critical infrastructure need.

A Bridge Planning Study ("Study") was completed in 2016 as a base for planning and design. The proposed new bridge will close the existing gap on Indian Street north of the channel to south of the channel, providing pedestrian and vehicular continuity and enhance emergency response times. Following the completion of the Study, in 2018, a Request for Proposal (RFP) for Professional Consultant Services was distributed and advertised in accordance with the City's processes. To provide staff the most flexibility to apply for grant funds for the construction phase at the earliest stage possible, the project's engineering scope of work was separated into two phases:

- Phase 1 – planning phase (preliminary 35% design)
- Phase 2 – environmental clearance, identification of all right-of-way (ROW) and easement needs, identification of all utilities with solutions to all utility issues, and the preparation of plans, specifications, and cost estimate (PS&E).

As part of the 2018 RFP process, Michael Baker International was selected as the most qualified consultant and a professional services agreement was executed for Phase 1 engineer work.

The consultant has successfully completed Phase 1 and has submitted a scope and fee proposal to complete Phase 2. Because there is a potential of Federal and State funding for infrastructure projects as part of the federal recovery act plans and programs, having construction ready projects will likely facilitate quicker access and/or provide a competitive advantage to the City to any funding that may become available. With this proposed amendment to Michael Baker's existing agreement, the final PS&E can be prepared, which creates more grant funding opportunities as a "shovel-ready" project.

Staff recommends approval of the second amendment to the agreement with Michael Baker International, for Phase 2, which includes the preparation of final plans and bid documents, environmental clearance, identification and preparation of right of way documentation, and obtaining construction permits.

Approval of the recommended actions would support Objective 4 of the Momentum MoVal Strategic Plan: “Manage and maximize Moreno Valley’s public Infrastructure to ensure an excellent quality of life, develop and implement innovative, cost effective infrastructure maintenance programs, public facilities management strategies, and capital improvement programming and project delivery.”

ALTERNATIVES

- 1. Approve and authorize the recommended actions as presented in this staff report. *This alternative will provide for the timely design of the Indian Street Bridge project.*
- 2. Do not approve and authorize the recommended actions as presented in this staff report. *This alternative will delay the design of the Indian Street Bridge.*

FISCAL IMPACT

The Indian Street / Cardinal Avenue Bridge project is included in the Fiscal Year 2021/22 and 2022/23 Capital Improvement Plan (CIP) with funding available for the design phase only. The City is currently funding the planning and design phases with Arterial Developer Impact Fee (DIF) funds.

There is no impact to the General Fund.

AVAILABLE BUDGET - FISCAL YEAR 2021/2022 AND 2022/2023:

Developer Impact Fee (DIF) Funding (Account No. 3301-70-77-80002 / Project No. 802 0004-3301)	\$832,112
Total	\$832,112

ESTIMATED COSTS

Design (FY 21/22)	\$300,000
Environmental (FYs 21/22 and 22/23).....	\$275,000
Right of Way documentation (FY 22/23)	\$75,000
Total Estimated Costs	\$650,000

**Includes City project administration, plans and bidding documents review and approval, printing, and other miscellaneous costs.*

ANTICIPATED PROJECT SCHEDULE:

Complete Design.....	Summer 2022
Complete Environmental.....	End of Calendar Year 2022
Complete Right of Way.....	End of Calendar Year 2022

CITY COUNCIL GOALS

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

Positive Environment. Create a positive environment for the development of Moreno Valley's future.

CITY COUNCIL STRATEGIC PRIORITIES

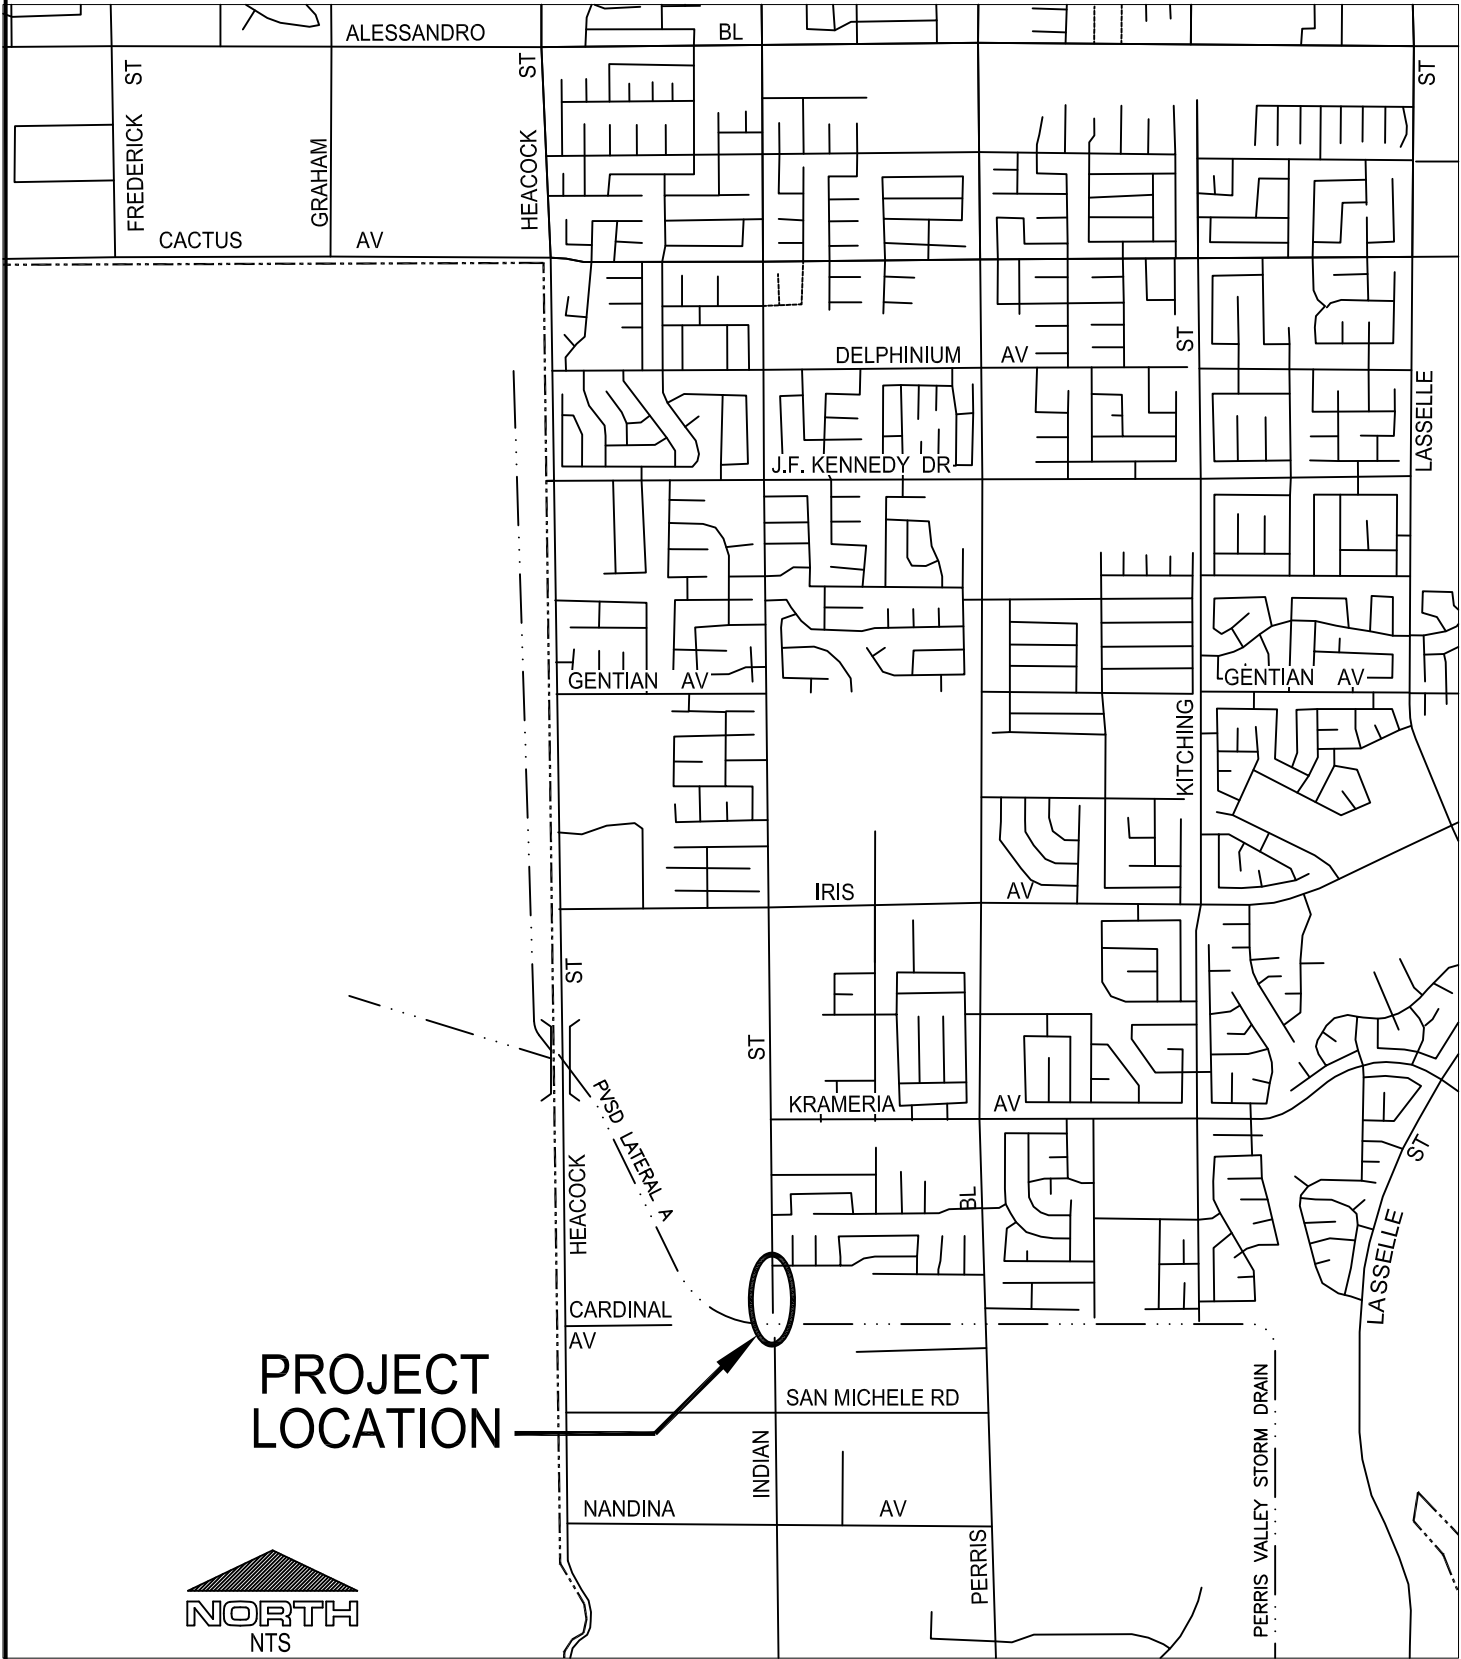

1. Economic Development
2. Public Safety
3. Library
4. Infrastructure
5. Beautification, Community Engagement, and Quality of Life
6. Youth Programs

INDIAN ST / CARDINAL AV BRIDGE (OVER LATERAL A)

PROJECT No 802 0004

**SECOND AMENDMENT TO AGREEMENT
FOR PROFESSIONAL CONSULTANT SERVICES FOR THE
INDIAN STREET / CARDINAL AVENUE BRIDGE (OVER LATERAL A) – PHASE 2 DESIGN
PROJECT NO. 802 0004**

This Second Amendment to Agreement is by and between the CITY of MORENO VALLEY, a municipal corporation, hereinafter referred to as "City," and **Michael Baker International**, a Pennsylvania corporation, hereinafter referred to as "Consultant." This Second Amendment to Agreement is made and entered into effective on the date the City signs this Amendment.

RECITALS:

Whereas, the City and Consultant entered into an Agreement entitled "AGREEMENT for PROFESSIONAL CONSULTANT SERVICES," hereinafter referred to as "Agreement," dated March 22, 2018.

Whereas, the Consultant is providing consultant services for **the Indian Street / Cardinal Avenue Bridge (Over Lateral A) – Phase II Design (PS&E)**.

Whereas, the Agreement was amended by the "First Amendment to Agreement for Professional Consultant Services" dated December 15, 2020.

Whereas, it is desirable to amend the Agreement to extend the Agreement termination date as is more particularly described in Section 1 of this Second Amendment, and to modify the Payment Terms as is more particularly described in Section 1 of this Second Amendment

Whereas, the Consultant has submitted a Proposal dated May 25, 2021 for the Indian Street/Cardinal Avenue Bridge (Over Lateral A) Phase II scope of work to be performed. A copy of the said Proposal is attached as "Exhibit A" and is incorporated herein by this reference.

SECTION 1 AMENDMENT TO ORIGINAL AGREEMENT:

1.1 The Agreement termination date is extended from December 31, 2021 (First Amendment) to **June 30, 2023**, unless the termination date is further extended by an Amendment

**SECOND AMENDMENT TO AGREEMENT FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 802 0004**

to the Agreement.

1.4 The total "Not to Exceed" fee for this contract is \$650,000.00 (\$25,258.00 for the original Agreement, plus \$624,742.00 for the Second Amendment to Agreement).

SECTION 2

2.1 Except as otherwise specifically provided in this Amendment, all other terms and conditions of the Agreement shall remain in full force and effect.

IN WITNESS HEREOF, the parties have each caused their authorized representative to execute this Agreement.

Moreno Valley, CA 92553

Subject: Indian Street / Cardinal Avenue Bridge (Over Lateral A)- Project No. 802004
Amendment No. 2
Phase 2 -Planning and Final Design

Dear Mr. Frohman,

On behalf of Michael Baker International (Michael Baker), I am pleased to provide you with our revised proposed scope, fee, and schedule for Phase 2 of the Indian Street / Cardinal Avenue Bridge (Over Lateral A) Project consisting of Planning and Final Design services.

The original Agreement dated 3/22/2018 authorized Phase 1 Design which included the Memorandum of Project Issues and a description of the preferred bridge type. Phase 1 Design work was been completed. Amendment No.1 dated 12/15/2020 extended the Agreement termination date to 12/31/2020. We understand the work for Phase 2 – Planning and Final Design will be authorized by Amendment No. 2.

The attached scope of work, fee, and schedule is based upon our recent meetings with the City staff as well as Riverside County Flood Control and Water Conservation District (RCFC&WCD) to identify the requirements for the next phase of work. It was made clear by the City that the Environmental Document will require NEPA clearance, and furthermore, RCFC&WCD will require a maintenance access ramp into the Lateral A channel. The remainder of the scope of work is consistent with the last version of the proposal sent to you in September 2020.

Thank you for providing Michael Baker the opportunity to propose on this next phase of the project development. We are looking forward to starting this phase of the Project in early October as indicated on the schedule.

Please contact me at (949) 554-5573, or Brad at (949) 855-5767 if you have any questions regarding this proposal.

Sincerely,

Bradley R. Mielke, PE, SE
Vice-President

Majid Sarraf, P.E.
Project Manager

Attachments: Scope of Work
Fee Estimate
Project Schedule

SCOPE OF WORK

Phase 1 – MEMORANDUM OF PROJECT ISSUES (COMPLETED)

Phase 2 – PLANNING AND FINAL DESIGN

2.01 PROJECT MEETINGS AND MANAGEMENT

This task includes coordination with Michael Baker (CONSULTANT) throughout the 17-month project duration. CONSULTANT is responsible for project oversight, quality assurance and quality control. It is anticipated that four (4) project meetings will be scheduled with the City of Moreno Valley (City) and with the CONSULTANT team. One (1) coordination meeting with Caltrans is identified in Task 2.09.6 Caltrans Bridge Inventory. Two (2) additional meetings are anticipated with Riverside County Flood Control and Water Conservation District (RCFC&WCD). The meetings will reinitiate coordination, address the encroachment permit process for completing geotechnical borings, discuss the maintenance road access, provide RCFC&WCD the opportunity to provide comment and concurrence on the bridge design, and to address the construction encroachment permit process. It should be noted the City will be responsible for the Encroachment Permit application and processing.

Should the City determine that additional meetings beyond those listed below are necessary, services will be provided under a separate scope of work on a time and materials basis.

Deliverables:

- *Four (4) project meetings and two (2) RCFC&WCD meetings.*

2.02 PROJECT SCHEDULE

It is anticipated that Phase 2 activities would be completed in approximately 17 months. CONSULTANT will prepare and maintain the project schedule for Phase 2 activities.

Deliverables:

- *Baseline Project Schedule (One electronic file).*

2.03 ENVIRONMENTAL

CONSULTANT will prepare an Initial Study/Mitigated Negative Declaration (IS/MND) under the California Environmental Quality Act (CEQA). This scope of work assumes that the City of Moreno Valley will be the CEQA lead agency for the project. The IS/MND will be based upon the most recent version of the CEQA Guidelines, updated in December 2018. NEPA documentation services for the project are provided as part of Task 2.12, NEPA Clearance. It is assumed that Caltrans District 8 will be the NEPA lead agency.

Based on the Memorandum of Project Issues prepared for the project, a scope of work for environmental services is provided below.

Assumptions:

- *The IS/MND, NEPA document, and technical studies will analyze a single build alternative (Alternative 2 [2 lane truss bridge] from the Memorandum of Project Issues)*
- *The City of Moreno Valley will be responsible for any radius mailing or newspaper noticing required for the project*
- *The City of Moreno Valley will be responsible for any CEQA filing fees required for the project (e.g., County Clerk Notice of Determination filing fee)*

2.03.01.1 BIOLOGICAL RESOURCES

JURISDICTIONAL DELINEATION

CONSULTANT will conduct a site reconnaissance to perform a delineation that will determine jurisdictional “waters of the U.S.” and “waters of the State” (including potential wetlands), located within the boundaries of the project site. Based on a preliminary desktop review and knowledge of the project site, it is understood that the proposed project likely falls within both State and Federal jurisdictional limits. As such, the delineation will result in a determination of U.S. Army Corps of Engineers (Corps), California Department of Fish and Wildlife (CDFW), and Regional Water Quality Control Board (RWQCB) jurisdiction.

Prior to surveying the project site, CONSULTANT will conduct a thorough literature review of relevant information that supports the site reconnaissance and report preparation. Sources reviewed are anticipated to include, but are not limited to, topographic maps, soil surveys, historic/current aerial photographs, flood maps, hydrology/climate information, and watershed data.

Once the site visit is complete and the project site’s baseline information is obtained, CONSULTANT will prepare a jurisdictional delineation letter report discussing on-site jurisdictional areas. Pursuant to agency requirements, the report will include a maximum of seven (7) figures to enhance the written text and identify jurisdictional areas and anticipated project-related impacts.

HABITAT ASSESSMENT AND MSHCP CONSISTENCY ANALYSIS REPORT

CONSULTANT will review biological technical reports previously prepared for the project and surrounding vicinity, if available, to determine which special-status biological resources are likely to occur on or within the general vicinity of the project site. CONSULTANT will also utilize the CDFW California Natural Diversity Database (CNDDDB) RareFind 5 and California Native Plant Society (CNPS) Electronic Inventory of Rare and Endangered Vascular Plants of California to conduct record searches of special-status biological resources known to occur on and within the general vicinity of the project site. A detailed review of the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP) will be conducted for implications on the proposed project.

Following the literature review, CONSULTANT will systematically survey the project site to document baseline biological conditions from which to evaluate the site's potential to support special-status plant and wildlife species, including habitats covered under the MSHCP (e.g., vernal pools, riparian/riverine habitat).

CONSULTANT will prepare a Habitat Assessment and MSHCP Consistency Analysis to summarize the information and results obtained during the literature review and field survey, document all plant, wildlife, and vegetation communities observed, and determine the potential for any special-status species to occur on or within the vicinity of the project site. In addition, a consistency analysis will be completed to document compliance with the MSHCP and identify potential impacts to MSHCP-covered species and habitats (e.g., vernal pools, riparian/riverine resources). Site photographs taken during the field survey and Geographic Information Systems (GIS) figures will be included in the report to further enhance written text and visually identify specific biological information as it relates to the project site. This task includes time for GIS analysis to support the preparation of up to ten (10) figures. In addition, the report will provide an analysis of anticipated project-related impacts to biological resources and identify any additional biological surveys, mitigation measures, and/or permit requirements that may be required prior to implementation of the proposed project.

Deliverables:

- *Jurisdictional Delineation and Habitat Assessment (One electronic file).*

2.03.01.2 CULTURAL RESOURCES

CONSULTANT has retained Cogstone Resource Management for preparation of a cultural and paleontological resources assessment, along with support for the Native American (AB-52) consultation process. Primary components of the work program will consist of:

- Cultural and paleontological records search;
- A Sacred Lands File search with the Native American Heritage Commission, along with the preparation of AB-52 Native American consultation letters on behalf of the City;
- Pedestrian survey of the project site for cultural, historical and/or paleontological resources;
- Preparation of a cultural and paleontological report, summarizing existing conditions, project impacts, and recommendations as applicable.

It is assumed that two cultural resources will require recording or updating and that an evaluation of built environment resources will be required. A finding of effect document is excluded from this scope.

Deliverables:

- *Cultural Resources Report (One electronic file).*

2.03.01.3 through 2.03.01.5 AIR QUALITY/GHG/ENERGY

2.03.01.3 AIR QUALITY

Fugitive dust and equipment exhaust emissions from construction activities will be quantitatively evaluated using the California Emissions Estimator Model (CalEEMod). The air pollutant emissions during construction will be compared to the SCAQMD regional thresholds of significance. Modeled construction will also be compared to the SCAQMD Localized Significance Thresholds to determine whether the localized impacts would occur. As the project involves a bridge and would not add vehicle capacity, the operational emissions analysis will be qualitative. The operational analysis be based on level of service and delay times at project intersections. Where necessary, carbon monoxide hotspots will be evaluated. Project consistency with the 2016 Air Quality Management Plan will be evaluated. CONSULTANT will also qualitatively discuss naturally occurring asbestos impacts.

2.03.01.4 GREENHOUSE GASES

CONSULTANT will prepare an inventory of the greenhouse gas (GHG) emissions (i.e., nitrous oxide, methane, and carbon dioxide) from direct sources (i.e., construction equipment). The emissions inventory will be compiled utilizing CalEEMod. As the project involves a bridge and would not result in new trip generation, operational emissions analysis will be qualitative.

2.03.01.5 ENERGY

CONSULTANT will analyze the energy implications of the project pursuant to Public Resources Code Section 21100(b)(3) and the Appendix G CEQA Guidelines. These statutes and guidelines require to analyze whether a project would result in the wasteful, inefficient, and unnecessary consumption of energy, or conflict with or obstruct a state or local plan for renewable energy or energy efficiency. The analysis will analyze energy consumption associated with short-term construction activities, long-term operations, buildings, and transportation. Additionally, the assessment of environmental impacts on energy resources will include mitigation measures to reduce inefficient and unnecessary consumption of energy.

Deliverables:

- *Air Quality/GHG/Energy Technical Data (One electronic file).*

2.03.01.6 NOISE

CONSULTANT will review applicable noise and land use compatibility criteria for the project area. Noise standards regulating noise impacts will be discussed for land uses adjacent to the proposed roadway improvements. The construction noise impacts will be evaluated in terms of maximum levels (L_{max}) and hourly equivalent continuous noise levels (Leq) and the frequency of occurrence. A screening level operational noise assessment will be conducted to determine the change in ambient noise due to implementation of the proposed intersection improvements. Compliance with applicable noise standards

will be evaluated, with recommended mitigation measures included where appropriate. This scope excludes on-site noise measurements.

Deliverables:

- *Noise Technical Data (One electronic file).*

2.03.01.7 PHASE I ENVIRONMENTAL SITE ASSESSMENT

CONSULTANT will prepare a Phase I Environmental Site Assessment (Phase I) for the proposed project. The goal of a Phase I is to evaluate site history, existing observable conditions, current site use, and current and former uses of surrounding properties to identify the potential presence of recognized environmental conditions (RECs) associated with the subject site. RECs are defined in the ASTM E 1527-13 Standard as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.” De minimis conditions are not RECs.

The Phase I will consist of four components: Records Review; Site Reconnaissance; Interviews; and Report Preparation. CONSULTANT will document past activities, facilities, and/or waste disposal practices, which may have resulted in soil or groundwater contamination. Past site usage will be investigated through an aerial photograph review, interviews, online review of former permits, online review of documents maintained by applicable agencies, and online research of former citations from State and local agencies. Current site conditions will be documented by an on-site inspection of the project area. A review of the commercial database summaries, provided by Environmental Data Resources, Inc. (EDR), regarding public agency records will be included. Regulatory sites within and surrounding the project area will be mapped within a one-mile radius (as required by the ASTM E 1527-13 search radius requirements). Potentially hazardous materials conditions within the project site will be considered based on the EDR database search. The report will include a summary of the report findings and a discussion of our opinions and conclusions regarding the absence or presence of RECs in connection with the subject site. Documentation supporting the conclusions presented will be appended to the report.

This scope specifically excludes environmental lien searches, chain of title documents, and in-person agency file reviews (although these can be provided/conducted by CONSULTANT on a time and materials basis, if requested by the City).

Deliverables:

- *Phase I ESA (One electronic file).*

2.03.02 RESEARCH AND INVESTIGATION

CONSULTANT will initiate the CEQA process by attaining and evaluating necessary information with respect to the proposed project. Project research will include coordination with the City to acquire relevant environmental data, previous studies for the area and other available files, exhibits, maps, and reference documents. The investigation will include a site visit to review existing land uses and

environmental conditions, as well as a photographic inventory of on-site and surrounding uses. Based upon the detailed information obtained during project initiation, CONSULTANT will draft a preliminary project description for incorporation into the Initial Study.

2.03.03 PREPARATION OF THE INITIAL STUDY

CONSULTANT will prepare an Initial Study in accordance with the CEQA Guidelines. The Initial Study will include detailed explanations of all checklist determinations and discussions of potential environmental impacts. The analysis shall be in accordance with Public Resources Code Section 21080 (c) and CEQA Guidelines Section 15070. The Initial Study will be presented as follows:

2.3.3.1 INTRODUCTION

This section will cite the environmental review requirements of the project, pursuant to the CEQA Guidelines. The Introduction will include the project location, environmental setting, existing uses on- and off-site, the Project Description (confirmed by City staff in Task 1.0, Research and Investigation), project phasing, and relevant background/history information.

2.3.3.2 ENVIRONMENTAL CHECKLIST

This section will include a summary page of project information followed by an explanation of factors considered for potential impacts. The Initial Study Checklist will be presented in a four-column layout, identifying: (1) potentially significant impacts, (2) potentially significant impacts unless mitigated, (3) less than significant impacts, and (4) issues resulting in no impacts.

2.3.3.3 ENVIRONMENTAL ANALYSIS

The Environmental Analysis sections will provide vital supporting information for the conclusions rendered for the Environmental Checklist. In accordance with Appendix G of the CEQA Guidelines, this section includes a detailed review of the following issues:

- Aesthetics
- Mineral Resources
- Agricultural and Forestry Resources
- Noise
- Air Quality
- Population/Housing
- Biological Resources
- Public Services
- Cultural Resources
- Energy
- Recreation

- Transportation
- Geology/Soils
- Tribal Cultural Resources
- Greenhouse Gas Emissions
- Utilities/Service Systems
- Hazards and Hazardous Materials
- Hydrology/Water Quality
- Wildfire
- Mandatory Findings of Significance
- Land Use/Planning

Each topical impact area will be analyzed in detail based upon existing information or technical analyses described above. The existing environmental setting related to each impact topic will be provided, and a summary of the project's potential impacts will be discussed. Where necessary, project design features or mitigation measures will be provided to minimize impacts to a level below significance.

2.3.3.4 INITIAL STUDY DETERMINATION

The determination page will conclude the appropriate action based upon the Initial Study evaluation.

2.3.3.5 GRAPHIC EXHIBITS

The environmental document will include a maximum of five (5) exhibits to enhance the written text and clarify the project and potential environmental impacts.

2.3.3.6 ADMINISTRATIVE DRAFT INITIAL STUDY

CONSULTANT will submit two (2) copies and an electronic file of the Administrative Draft Initial Study for review and comment by the City. Should additional copies be required, additional copies will be provided by CONSULTANT at an additional fee. This scope of work assumes two rounds of review by City staff prior to the 30-day CEQA public review process. Correspondingly, this scope is limited to two rounds of revisions by CONSULTANT in response to City comments.

Deliverables:

- *Two (2) copies of the Administrative Draft Initial Study.*

2.3.3.7 COORDINATION AND MEETINGS

CONSULTANT will consult with State and local agencies regarding the environmental documents. CONSULTANT will provide management services to implement the work program and coordinate the effort with City staff. The budget for these activities is included in the budget for the individual tasks.

CONSULTANT will attend public hearings for the project if requested by the CITY under a separate scope of work on a time and materials basis.

2.3.3.8 VMT ANALYSIS

CONSULTANT will prepare a Vehicle Miles Traveled (VMT) evaluation to support the CEQA process and to address the recent change from delay-based impact analysis to VMT based analysis. According to the new CEQA checklist, transportation projects that reduce or have no impact on vehicle miles traveled should be presumed to cause a less than significant transportation impact. For roadway capacity projects, agencies have discretion to determine the appropriate measure of transportation impact consistent with CEQA and other applicable requirements. The Governor’s Office of Planning and Research Technical Advisory on Evaluating Transportation Impacts in CEQA (OPR Technical Advisory) states that thresholds can be set by the local agency for transportation projects. While the OPR recommends 15% reduction for land use projects, the OPR Technical Advisory is silent on a threshold for transportation projects. Other jurisdictions have adopted thresholds such as San Diego, which has adopted “no increase in VMT” as the threshold for transportation projects. CONSULTANT will confirm that the recommended significance threshold of “no greater than existing” consistent with Caltrans and OPR Technical Advisory guidance is appropriate for this project.

CONSULTANT will evaluate the effect of a transportation project on vehicle travel using “change in total VMT” by comparing the total VMT without the project with the total VMT with the project; the difference being the amount of VMT attributable to the project. CONSULTANT will calculate the project effect on VMT using the regional travel demand model (RIVTAM or RIVCOM, if available).

Some projects have the potential to result in a significant transportation impact because they are likely to induce vehicle travel. Capacity-increasing projects generally need to be evaluated for their potential induced travel. The mechanisms by which induced travel occur include:

- Route changes (may increase or decrease overall VMT)
- Mode shift to automobile use (increases overall VMT)
- Longer trips (increases overall VMT)
- More trips (increases overall VMT)
- More dispersed development (increases overall VMT)

CONSULTANT will calculate induced demand using the Cervero elasticities at a City/Region level. This will be compared to the reduction in VMT by virtue of closing pedestrian gaps and increase in active transportation uses.

CONSULTANT will summarize the analysis methodologies and findings in a technical memorandum which will include the screening criteria, modeling methodology, and VMT calculations. If necessary, the project will examine feasible mitigation measures.

Deliverables:

- *VMT Analysis Technical Memorandum (One electronic file).*

2.3.3.9 LOCATION HYDRAULIC STUDY/SUMMARY FLOODPLAIN EVALUATION REPORT

CONSULTANT will prepare a Location Hydraulic Study (LHS) and a Summary Floodplain Evaluation Report (SFER) to support the environmental document. The LHS/SFER will be a Technical Memorandum consisting of a cover letter, location map, Floodplain Map, and LHS/SFER forms similar to the Highway Design Manual Figures 804.7A and 804.7B CEQA. Because the City and County determined that detailed hydraulic calculations for this channel and access ramps are unnecessary for this project, the LHS will document the Zone AE floodplain and qualitatively assess the hydraulic impacts. Hydraulic calculations, Hydrology, and Federal Emergency Management Agency (FEMA) Research and coordination are excluded from this scope of work.

Deliverables:

- *LHS/SFER Technical Memorandum (One electronic file).*

2.03.04 PREPARATION OF THE PUBLIC REVIEW IS/MND

With the anticipated conclusion in the Initial Study that no significant environmental effects will occur, a Mitigated Negative Declaration (MND) will be prepared. Following this determination, CONSULTANT will prepare the Notice of Intent to Adopt (NOI) and the MND for City review. The NOI and MND will be attached to the Initial Study to fully explain the proposed project and its effects. Five (5) copies, 5 CDs, one (1) camera-ready original, and an electronic file of the IS/MND will be provided to the City. CONSULTANT will submit the IS/MND to the State Clearinghouse and additional agencies/interested parties. This task assumes that the City would be responsible for any radius mailing or newspaper noticing required for public review. The IS/MND would be subject to a mandatory 30-day public review period.

Deliverables:

- *Five (5) copies, five (5) CDs, one (1) camera-ready copy, and one (1) electronic file of the Public Review IS/MND.*

2.03.05 PREPARATION OF THE FINAL IS/MND

CONSULTANT will prepare a draft Final IS/MND for City review and approval. CONSULTANT will respond to one round of City comments on the draft final document. The final document will include a purpose subsection, reference the review process, comments letters received, responses to comments, and any required edits/updates to the Public Review document. Also included within this task is the Mitigation Monitoring and Reporting Program (MMRP) in accordance with Public Resources Code Section 21081.6 (AB 3180). Five (5) copies, five (5) CDs, one (1) camera-ready original, and an electronic file of the Final IS/MND will be provided to the City. CONSULTANT will provide the document to each agency/interested party who submitted a comment letter during the 30-day public review period.

Due to the unpredictable nature of potential comment letters received during the public review period, this task is limited to a maximum of thirty (30) hours for Responses to Comments. Additional effort necessary for the Responses to Comments process (due to a high volume of comment letters, complex issues raised in comment letters, etc.) would be performed on a time and materials basis.

Upon adoption of the IS/MND by the City, CONSULTANT will prepare a Notice of Determination (NOD) and will file the notices at the County Clerk's Office. This scope of work excludes any applicable CEQA filing fees required by the CDFW.

Deliverables:

- *Five(5) copies, five (5) CDs, one (1) camera-ready copy, and one (1) electronic file of the Final IS/MND.*

2.04 DRAINAGE / HYDROLOGY AND HYDRAULIC REPORT

Based on the meeting with the City and Riverside County Flood Control & Water Conservation District (RCFC&WCD) on May 12, 2021, detailed hydraulics of the channel were deemed unnecessary for a bridge spanning the channel. During that meeting, RCFC&WCD requested that channel access ramps be added to permit access along the channel. *Three virtual meetings (maximum 2 hours each) with RCFC&WCD are assumed in the fee estimate for this task plus an 10 hours delegated for internal coordination with the structures and civil team.*

Assumptions / Exclusions:

- 1. Channel Access Ramps will be prepared as part of the Civil Design Plans and will follow the RCFC&WCD Standard Drawing Number CH334. Additional R/W will be obtained to permit the construction of the channel access ramp without reducing the base width or top width of the channel. The toe of the ramp will be at our outside of the invert hinge line of the channel and the top hinge line of the channel will be stepped away from the channel to accommodate the ramp. The ramps will lie on the north side of the channel and have a horizontal geometry similar to the channel access ramp on the southwest quadrant of the North Perris Boulevard bridge over the Perris Valley Channel Lateral A.*
- 2. The Preliminary Design Report and Bridge Planning Study considered scour during the preliminary design. The selected alternative is a clear span bridge. No scour will be calculated. The design of scour protection at the bridge is limited to riprap at the abutments to prevent scour at the abutment face. Abutments may be protected with embankment riprap. The toe down of the riprap will match the as-built depth of the existing channel at this location. If as-built data is unavailable, a depth of five feet (5-ft) will be used.*
- 3. The project is Hydromodification Exempt per the Riverside County Hydromodification Susceptibility Documentation report and Mapping: Santa Ana Region dated January 18, 2017. Hydromodification mitigation measure design is thereby excluded from this scope of work.*
- 4. No realignment of the Indian Street RCB is anticipated. The abutment for the bridge will span the existing RCB. No structural details, structural calculations or hydraulic/hydrology calculations will be provided.*
- 5. Based on the limited improvements off the bridge, on-site hydrology/hydraulics/drainage design is excluded from this scope.*
- 6. The Perris Valley Channel is a mapped Zone AE floodplain. A Location Hydraulic Study will be prepared per the scope provided in the Environmental Documentation Task.*

7. *Preparation of a Conditional Letter of Map Revision (CLOMR), Letter of Map Revision (LOMR), or No-Rise Certification is not anticipated to be required because the City of Moreno Valley is the participating entity in the National Flood Insurance Program, and has deemed that the proposed maintenance ramps will not have an adverse impact on the Base Flood Elevation. Coordination with the Federal Emergency Management Agency (FEMA) is excluded from this scope of work.*

Deliverables:

- *No deliverable is identified for this scope of work.*

2.05 SURVEYING AND TOPOGRAPHIC MAPPING

PROJECT CONTROL/CITY RESEARCH

CONSULTANT will provide a project control survey for the alignment of Indian Street and PVSD Lateral A. Research the City of Moreno Valley, County Flood Control, and County of Riverside for records pertaining the Channel and Indian Street.

CROSS-SECTION CHANNEL

CONSULTANT will provide a cross-section topography survey of the channel at 50' stations from existing right of way to existing right of way. The cross sections will be 500' up and downstream from the centerline of Indian Street.

ROADWAY SURVEY

CONSULTANT will provide a cross-section topography survey of Indian Street at 50' stations from future right of way to right of way. The cross sections will be 700' north and 300' south from the centerline of channel.

POTHOLE LOCATIONS

CONSULTANT will provide locations of 4 geotechnical potholes after they are drilled, and 10 utility potholes staked before drilling and located after they are drilled.

CAD BASE MAP

CONSULTANT will provide a base map of the topography, street and channel centerline and right of way in AutoCAD Civil 3D at 40 scale with one-foot contours.

Deliverables:

- *Project control survey (CAD).*
- *Cross-section topography survey for Channel and Roadway (CAD).*
- *Pothole survey (14) (CAD).*
- *Topography base map (CAD).*

2.06 GEOTECHNICAL INVESTIGATION

PRELIMINARY FOUNDATION REPORT (PFR)

Earth Mechanics Inc (EMI) will prepare a PFR for the Indian Street Bridge to provide preliminary geotechnical information to assist structural designers in the Structure Type Selection process. This PFR will be prepared using the available subsurface data and the format will be in accordance with the Caltrans Guidelines – Foundation Reports for Bridges dated February 2017.

GEOTECHNICAL INVESTIGATION

EMI's geotechnical field investigations plan is presented in the below table. One deep soil boring will be drilled near each proposed abutment location. Two shallow borings will be drilled on Indian Street, north of the channel. Existing pavement sections will be determined using the borings drilled near the proposed southern abutment and south of the Indian Street/Superior Avenue Intersection. Data obtained from some boreholes will be used for multiple design elements. The boreholes will be excavated using a truck-mounted or track-mounted drilling rig equipped with 8-inch diameter hollow-stem augers. Spoils generated from the borehole excavations will be mixed with cement and water and used to backfill the boreholes. Spoils generated from the borings will not be stored in drums, tested for contaminants, or disposed of off-site by EMI. Asphalt concrete cold-patch will be used to replace asphalt that is removed by excavations, and quick-set cement will be used to replace concrete that is removed by excavations.

Design Element	Number of Borings	Approximate Depth (feet)
Indian Street Bridge	2	80
Roadway Improvements (Pavement and Retaining Wall Pair)	1	10
	1	20

EMI will prepare a boring location plan and this plan will be used to secure encroachment permits from City of Moreno Valley. Any environmental, Regional Water Quality Control Board, Fish and Wildlife, and Army Corps permits are not required for this task.

EMI field personnel will collect soil samples for laboratory testing, including bulk samples of near-surface soils and small disturbed and relatively undisturbed ring samples of deeper soils. The small disturbed and relatively undisturbed soil samples will be collected using split-spoon samplers at a vertical interval of about 5 feet, alternating between the Standard Penetration Test (SPT) sampler and the Modified California Drive (MCD) sampler. Samples of subsurface soils will be logged during the field investigation, secured in their containers or collected in plastic bags, and transported to the EMI laboratory.

LABORATORY TESTING

Field logs of the boreholes will be reviewed to select representative soil samples for laboratory testing. Various laboratory tests will be performed on soil samples to determine or derive their physical and

engineering characteristics. Anticipated laboratory tests include: in-situ density and moisture content, grain size, Atterberg Limits, direct shear, UU triaxial, R-value, maximum density and optimum moisture content, and soil corrosion tests. Laboratory tests will be conducted in general accordance with American Society for Testing and Materials (ASTM) standards or California Test methods.

GEOTECHNICAL ENGINEERING ANALYSES

Results obtained from the field investigation and laboratory testing will be used to characterize subsurface soils and conditions and create idealized soil profiles for design purpose. The following analyses will be performed for the project:

- Evaluation of seismicity and estimation of Peak Ground Acceleration based on the Caltrans design criteria, and recommendations of an ARS curve for the bridge structural design.
- Assessment of soil liquefaction potential.
- Foundation analysis for bridge, retaining wall pair, and 10'x4' RCB culvert.
- Assessment of global slope stability and settlement of embankments.
- Evaluation of soil corrosivity conditions and recommendations for mitigation measures.
- Design of pavement structural section in accordance with the Caltrans method.

REPORT PREPARATION

EMI will prepare a Foundation Report (FR) for the bridge, and a Geotechnical Report for the remaining design elements. The FR will be prepared in accordance with the Caltrans Guidelines - Foundation Reports for Bridges dated February 2017. The Geotechnical Report will include design and construction recommendations for a retaining wall pair, slopes, and pavement structural sections. EMI will address any comments resulting from the City of Moreno Valley review and prepare a final FR and a final Geotechnical Report.

Assumptions/Exclusions:

- *Geotechnical Investigation is allowed between 7am and 7pm on weekdays.*
- *No investigation of hazardous materials. If hazardous materials are encountered during the geotechnical field investigation, EMI will terminate work.*
- *Environmental clearance for accomplishing the field work, if required, will be obtained by others. Archaeological, cultural, and biological reviews or studies, if required, will be performed by others.*
- *No permit fee was assumed for City of Moreno Valley.*
- *Existing pavement rehabilitation recommendations, if required, will be provided by others.*

Deliverables:

- *Preliminary Foundations Report.*
- *Geotechnical Borings (4).*
- *Final Foundation Report.*
- *Geotechnical Report.*

2.07 UTILITY COORDINATION AND POTHOLING

Overland Pacific and Cutler (OPC) as a subconsultant will perform this task. OPC will make contact with utility agencies/owners having facilities within the project area to request record data pertaining to existing utilities. Utilities that may impact the project will be plotted on the base plans, along with any planned relocation or adjustment. The base maps will be forwarded back to each utility agency/owner for review, correction, and certification of correctness. The utility research will be isolated to areas likely to be affected by the proposed widening. The purpose of this task is to initiate dialog as early in the project development process as possible to avoid potential delays associated with relocation plan preparation.

OPC will identify and coordinate with the affected utility companies responsible for the design of relocated facilities, if applicable. Draft and final plans will be submitted to the utility companies for their review and Utility Relocation Plans will be requested from the utility companies, when applicable.

OPC will prepare utility pothole exhibits for facilities to be potholed, coordinate pothole activities, and arrange for contractor to perform the potholing. The fee has been established based on an assumed number of 10 separate pothole locations. Michael Baker will also provide horizontal and vertical locations for up to 10 utility potholes. OPC will prepare and submit the Notice to Utility Owners for potholing (estimated three (3) owners).

OPC will:

1. Issue Relocation Claim Letters to conflicting owners.
2. Coordinate and plan with the utility owners and their designers as needed to discuss project design, potential conflicts, relocation alternatives, and resolution to conflicts (est. 4 conflicts with 4 different owners) (8 meetings including field meetings).
3. Determine liability/prior rights for all conflicting owners.
4. Obtain detailed scope of work from the utility owner for relocation, estimated start and completion dates.
5. Issue Notice to Owner to relocate utility (Est.4 Notices).

Assumptions/Exclusions

1. *Although OPC will perform prior rights research to confirm liability, due to the nature and location of the project, it is assumed that all utility owners are installed within the franchise/City right of way and therefore do not have prior rights, if any of the utility owners are in conflict outside of the City right of way and in RCFC right of way, then they would have an easement/permit/license or some sort of right with them and the project/City would be responsible for payment if there isn't an agreement or cooperative agreement with RCFC and the City. Should one or more utility company have prior rights, additional costs for liability determination and the processing of utility agreements would be provided under a separate scope of work on a time and materials basis.*
2. *Based on the assumption of no prior rights by utility owners, utility agreements are not considered necessary.*

3. *All City owned facilities including utility service-related items (water, sewer, City owned street lights) are not considered part of this scope. These items will be identified by Design but actual noticing and detailed coordination is not necessary.*
4. *Scope does not include any fees or work associated with the actual relocation of the utility facilities and/or construction management/inspection.*
5. *All costs and negotiation efforts associated with the need for utility replacement easements or any additional real property rights for the utility owner are not included in this scope and fee.*

2.08 ROADWAY IMPROVEMENT PREPARATION

2.08.1 PRELIMINARY CONCEPT PLAN

Based upon the information compiled, CONSULTANT will prepare a preliminary concept plan for the purposes of environmental clearance (2 – lane truss structure).

The preliminary concept exhibits will include existing topographic and planimetric mapping, existing right of way lines, easement lines, existing utilities, street center lines, horizontal layout of the proposed improvements, and typical cross sections. The exhibits will be in the form of one 11”x17” cut sheet.

2.08.2 FINAL DESIGN (PLANS, SPECIFICATIONS, AND ESTIMATES)

CONSULTANT will prepare final design construction plans based upon the concept plan. All plan types shall be completed in conformance with the latest available design, drafting, and policy and procedure manuals of the City. It is assumed that CAD linework will be provided by the City for the developer project in the north-west quadrant of the Project area.

It is assumed that the final design construction plan set would include the following sheets:

- Title Sheet and Vicinity Map (One sheet)
- Construction Notes and Estimate of Quantities (One sheet)
- Construction Details (One sheet)
- Key Map and Typical Sections (One sheet)
- Roadway Plan and Profile – Grading, Street Improvement, Ramp, and Utility Plan (One sheet)
- Roadway Signing and Striping Plan (One sheet)
- Bridge Plans (Included in Task 2.09)
- Conceptual Plan for additional 2-lanes (One sheet)

CONSULTANT will prepare quantity calculations and a preliminary construction cost estimate for the proposed improvements.

CONSULTANT will prepare special provisions for the construction of the proposed improvements in accordance with City requirements using the current version of the Standard Specifications for Public

Works Construction (“Greenbook”) including all supplements. Modifications are required to direct the contractor to the Greenbook for contractual and other non-technical requirements.

CONSULTANT will incorporate the technical specifications into the current City “boilerplate” contract forms, general conditions, and general provisions that will be provided to CONSULTANT by the City in Microsoft Word format. The special provisions will be prepared by a California-licensed civil engineer for incorporation into the construction bid documents for the overall project.

Draft plans, specifications and estimates will be provided at 65%, 100%, and Final milestones.

Assumptions/Exclusions

1. *The plan set will include a conceptual plan for the additional 2-lanes that will be constructed as a separate bridge and separate project.*
2. *No PS&E bidding phase services, support services during construction, or preparation of as-built plans are included in this scope of work for Phase 2 (Planning and Final Design).*
3. *No pavement overlays or other pavement rehabilitation of existing roadways will be required.*
4. *No irrigation or planting plans, details, or specifications will be required.*
5. *Temporary traffic signal, temporary street lighting, separate interconnect plans, and signal timing plans are excluded.*
6. *The plans assume the access ramps for RCFC would per standards and would not require turn template analysis.*

Deliverables:

- *65% Plans, Specifications, and Estimates (Electronic Submittal).*
- *100% Plans, Specifications, and Estimates (Electronic Submittal).*
- *Final Plans, Specifications, and Estimates (Electronic Submittal).*

2.09 BRIDGE IMPROVEMENT DESIGN AND PLAN PREPARATION

The intent of the bridge design included in this scope of work is to provide a 2-lane bridge design for the initial phase of construction that would be compatible with expansion to a 4-lane condition in the future with a 2-lane “twin bridge” along-side the initial 2-lane bridge. Michael Baker will prepare PS&E for the initial bridge substructure and foundation so that it would accommodate a 2-lane bridge in the future. For this project, the vehicle bridge for Indian Street will be a two-lane truss bridge that spans the Lateral A channel with approximate dimensions of 40 ft. wide x 149 ft. long connecting the existing portions of Indian Street to the north and south of the channel. PS&E shall conform to current Caltrans bridge design criteria and City of Moreno Valley standards.

The design for both phases of bridge construction considers the use of prefabricated steel truss superstructures, designed and manufactured by the Contractor. In this scenario, the Contractor shall provide all design plans and calculations associated with the steel bridge superstructures.

CONSULTANT will provide the design of the initial bridge including concrete bridge foundations, abutments, and define the bridge superstructure geometry (general plan, elevation, and cross section) along with requirements for the steel truss bridge superstructures - designed, delivered, and erected by the Contractor. The Contractor is responsible for preparing the full design (plans and details) and supporting structural calculations for the bridge superstructures in accordance with the criteria established by the CONSULTANT. This will be clearly stated in the PS&E prepared by the CONSULTANT. Typically, the selected Contractor will provide the superstructure plans and calculations as shop drawing submittals that are reviewed by the City and Engineer of Record (CONSULTANT). Review of the initial bridge superstructure submittal would be included in Phase 4 (Construction Support Services) and is not included in Phase 2 (Planning and Final Design).

CONSULTANT will prepare a General Plan for the bridge including layout, typical cross section, and elevation of the bridge. In addition, CONSULTANT will provide the design of the foundations of the bridge.

2.09.1 BRIDGE FOUNDATION DESIGN CALCULATIONS

The bridge (superstructure and foundations) shall be designed by a California-licensed civil engineer in accordance with the applicable provisions of the latest editions of the following Caltrans manuals:

- AASHTO- LRFD 2017 (8th Edition,) w/ Caltrans Amendments
- Caltrans Seismic Design Criteria (SDC, 2.0).
- Caltrans Bridge Memos to Designers.
- Caltrans Bridge Design Aids.

CONSULTANT will provide the design of bridge foundation based upon a Foundation Report (FR) prepared by our subconsultant, EMI which provides recommendations regarding foundation type and structural design parameters in accordance with Caltrans standards (such as pile capacities and seismic design criteria). A bound set of design calculations will be prepared for the bridge foundations and submitted to the City for Review.

Final design of the steel bridge superstructure(s) will be the responsibility of the Contractor along with their selected subcontractor, responsible for providing the steel truss bridge superstructures, and the Contractor shall be responsible for the complete design plans, details and calculations associated with the steel truss bridge superstructure designs. This is the normal procedure for a project involving prefabricated steel bridges. The final design for the premanufactured steel bridge will be prepared by the Bridge Manufacturer responsible for the design and considered a separate submittal to the City for approval. The requirements for the bridge design parameters will be stated in the Project Specifications as part of the Contract documents (PS&E).

2.09.2 BRIDGE GENERAL PLAN (GP) AND FOUNDATION PLAN

CONSULTANT will prepare a Bridge General Plan (showing the bridge layout, elevation, and typical cross section) as well as plans and details associated with the Foundations only. Shop Drawings including Plans and details related to the Prefabricated Manufactured Steel Bridge superstructure will be prepared by

the Bridge Manufacturer as described above. Plans will be drafted in AutoCad format using the background files and survey data provided for the Roadway Plans. Plans will be formatted on City plan sheets and will utilize Caltrans standard plans to the greatest extent possible. In addition, following Caltrans Manuals will be utilized:

- Bridge Design Details Manual;
- Plans Preparation Manual;
- Plans, Specifications, and Estimates (PS&E) guidance

The following structural plan sheets prepared by the CONSULTANT are anticipated for the bridge over the channel:

No. of Sheets	Sheet Title
1	General Plan
1	Foundation Plan
1	Abutment Layout
1	Abutment Details
1	Miscellaneous Details
1	Log of Test Borings
6	Total number of sheets

2.09.3 BRIDGE SPECIAL PROVISIONS AND QA/QC

Bridge Technical Specifications will be based upon Caltrans Standard Specifications and Standard Special Provisions for bridge construction. CONSULTANT will prepare special provisions for the construction of the bridges through editing of the current Caltrans Standard Special Provisions (SSP's) in accordance with Caltrans' PSE Guide. The structure special provisions will be prepared by a California-licensed civil engineer who will sign and seal them as the structure special provisions engineer upon their final incorporation into the construction bid documents for the overall project. As part of the preparation of the structure special provisions, the structure special provisions engineer will perform an overall Quality Assurance/Quality Control (QA/QC) review to achieve agreement among the various structure and roadway construction documents and the specifications.

2.09.4 BRIDGE QUANTITIES

CONSULTANT will prepare quantity take-off calculations for the various structure construction bid items identified by the structures special provisions engineer. CONSULTANT will use the latest Caltrans Contract Cost Data as a basis for establishing an itemized estimate of the structure's construction cost. The total cost estimate will include mobilization and contingency. The structure cost estimate will be incorporated into the overall project cost.

2.09.5 BRIDGE INDEPENDENT CHECK CALCULATIONS

CONSULTANT will provide separate independent check calculations for the bridge foundations prepared

by a California-licensed civil engineer experienced in bridge design. The process will be similar to, but independent of the initial design process. The independent check includes independent design calculations, review of bridge design details, and review of bridge special provisions. Any significant differences between the initial design and the independent check will immediately be resolved between the two licensed engineers until substantial agreement on the final design is achieved. Any required changes will be made to the design and construction documents.

The Specifications will also require the Contractor to provide independent check calculations for the steel bridge superstructure.

Deliverables:

- *Bridge Foundation Design Calculations (*.pdf and 1-copy).*
- *Bridge Plans (Excludes steel bridge details) for 65%, 100%, and Final (*.pdf and 1-copy).*
- *Special Provisions and QA/QC (*.pdf and 1-copy).*
- *Bridge Quantities and Engineers Cost Estimate (*.pdf and 1-copy).*
- *Bridge Independent Design Check Calculations-Foundation (*.pdf and 1-copy).*

2.09.6 CALTRANS BRIDGE INVENTORY

CONSULTANT will prepare Request for Structure Number submittal package to request adding the new Indian Street Bridge to the Caltrans bridge inventory, along with assigning a Caltrans bridge number. This includes a completed special Caltrans form and supporting exhibits such as approved as-built drawings, photos and technical description of the bridge. The package would be submitted to Caltrans Structure Maintenance and Investigations. One focus meeting with Caltrans anticipated.

Deliverables:

- *Request for Structure Number submittal package.*
- *One (1) focus meeting with Caltrans.*

2.10 REGULATORY PERMITTING

2.10.1 MSHCP PRE-APPLICATION MEETING

CONSULTANT shall attend up to two (2) pre-application meetings with the Western Riverside County Resource Conservation Authority (RCA), Wildlife Agencies (CDFW and the U.S. Fish and Wildlife Service [USFWS]), Corps, and Regional Board to discuss project activities, impacts to riparian/riverine and State/Federal jurisdiction, mitigation options, and permit requirements. If mitigation is agreed to during the pre-application meeting, the City may be granted a 30-day review of the Determination of Biologically Equivalent or Superior Preservation (DBESP) Report by the Wildlife Agencies instead of the standard 60-day review. Should additional meetings be required, work will continue under an approved contract augmentation.

2.10.2 DETERMINATION OF BIOLOGICALLY EQUIVALENT OR SUPERIOR PRESERVATION (DBESP) REPORT

As defined under Section 6.1.2 of the MSHCP, riparian/riverine habitat are areas dominated by trees, shrubs, persistent emergent plants, or emergent mosses and lichens which occur close to or are dependent upon nearby freshwater, or areas with freshwater flowing during all or a portion of the year. Conservation of these areas is intended to protect habitat that is essential to a number of listed or sensitive water-dependent fish, amphibian, avian, and plant species. In accordance with Section 6.1.2 of the MSHCP, if a project will impact riparian/riverine habitat, no matter how small the acreage of impact and an avoidance alternative is not feasible, then a DBESP Report will need to be prepared to demonstrate that the proposed mitigation is biological equivalent or superior in replacement of the impacted resource.

CONSULTANT will prepare a DBESP Report consistent with the DBESP Report template issued by the RCA in December 2018. As required by the MSHCP, the DBESP Report will include the following information:

- Definition of the project site;
- A written project description, demonstrating why an avoidance alternative is not possible;
- A written description of biological information available for the project site including the results of resource mapping;
- Quantification of unavoidable direct and indirect impacts to riparian/riverine habitat associated with the project;
- A written description of project design features and mitigation measures that reduce indirect effects, such as edge treatments, landscaping, elevation difference, minimization, and/or compensation through restoration or enhancement;
- A finding demonstrating that although the proposed project would not avoid impacts, with proposed design and compensation measures, the project would be biologically equivalent or superior to that which would occur under an avoidance alternative without these measures, based on one or more of the following factors: 1) effects on Conserved Habitats; 2) effects on the listed species; and 3) effects on riparian linkages and function of the MSHCP Conservation Area.

2.10.3 PREPARATION OF REGULATORY PERMIT APPLICATIONS

CONSULTANT will concurrently prepare application packages for a Corps Section 404 Nationwide Permit, Regional Board Section 401 Water Quality Certification, and CDFW Section 1602 Streambed Alteration Agreement (SAA). Each submittal package will generally include the following key items:

- Application Cover Letter: The letter will be on CONSULTANT letterhead and introduce the project and define the submittal document.
- Standard Agency Forms: The most recent standard forms for each agency will be utilized. An attachment may be provided so that the complete project description and necessary detail is included. A detailed project description for improvements within jurisdictional areas will also be provided (including a discussion on best management practices).
- Project Figures and Site Photographs: Site Photographs and figures will illustrate key project features and help clarify written text. Anticipated figures include: Regional Vicinity Map, Site Vicinity Map, USDA Soils Map, Site Photos, Jurisdictional Map, Vegetation Map, and Project Site

Plans.

- Environmental Documentation: The environmental documentation section of the application package will include the Delineation of Jurisdictional Waters, Habitat Assessment and MSHCP Consistency Analysis, Cultural Resources Report, and California Environmental Quality Act Documentation.
- CD of Electronic Files: A CD containing electronic files will be submitted with each application package.

Exclusions:

- 1) Encroachment Permits are not included. It is assumed the City will be responsible for the Encroachment Permit application and processing.
- 2) State Application Fees: To be provided by the City and submitted to the Regional Board and CDFW.

2.10.4 REGULATORY APPROVAL PROCESSING

CONSULTANT will provide regulatory services for the processing of the applications through the Corps, Regional Board, and CDFW. The processing will include required correspondence or telephone calls between the reviewing staff related to the permit applications or points of clarification, if necessary.

Typically, agency comments are responded to via email and telephone; however, this task includes one (1) round of formal (written and hard copy submittal) response to comments per each application package. This task also includes the preparation of bi-weekly permit tracking logs for the City throughout the permit process. Finally, an electronic Permit Summary Report will be submitted to the City once the agency approvals are obtained.

This task excludes the processing of a Standard Individual Permit through the Corps, Federal Endangered Species Act Section 7 Consultation with USFWS, or the processing of a California Endangered Species Act Section 2081 Incidental Take Permit with the CDFW. Should additional time for processing be required, the City will be notified, and work will continue under an approved contract augmentation.

Exclusions: Encroachment Permits are not included. It is assumed the City will be responsible for the Encroachment Permit application and processing.

2.11 RIGHT OF WAY

Based upon the selected Alternative and Phase, OPC believes the project is impacting 16 parcels of developed or undeveloped residential and commercial properties. For determining the scope of work and cost, OPC consolidated the number of properties requiring acquisition by identifying the parcels that would be considered a legal larger parcel, due to their contiguous positions, common use, and common ownership. Based on this analysis of the 16 parcels identified, OPC believes approximately 5 legal larger parcels result in 5 acquisition cases for this project of either a permanent and/or temporary right (fee or easement). Refer to the table below for OPC's understanding of the 5 partial acquisitions necessary for the project:

APN	OWNER	LAND USE	ASSUMED PROPERTY IMPACTS
316-170-018 316-170-020 316-170-023 316-170-025 316-170-026	I 215 Logistics	Amazon Fulfillment Center	<u>RCFC Access Ramp Easement & TCE</u> An access ramp is needed for the transition of their maintenance road to the newly constructed road/bridgeway; It is assumed a TCE is necessary for the construction of this access ramp; assumed relocation of any utilities will be within street right of way and no replacement easements needed.
316-100-009 316-100-031 316-170-012 316-160-007 316-160-015 316-190-001 316-190-033	Riverside County Flood Control	Perris Valley Storm Drain Lateral A Facility	<u>Aerial/Bridge Easement & TCE</u> Assumes TCE is necessary for access underneath/adjacent to the bridge structure during construction; assumed relocation of any utilities will be within street right of way and no replacement easements needed.
316-100-057 316-100-058	Prologis LP	Vacant Land in Entitlement Process	<u>Street Easement, RCFC Access Ramp Easement & TCE</u> Previously into the City with an Industrial Plot Plan Development. Although City will or already has conditioned developer to dedicate to the City, acquisition/appraisal/ r/w engineering services still necessary in the event the project is ready to construct before the dedication occurs; assumed relocation of any utilities will be within street right of way and no replacement easements needed.
316-190-047	O'Reilly Auto Enterprises, Inc.	Improved Industrial – Warehouse Facility	<u>RCFC Access Ramp Easement & TCE</u> An access ramp is needed for the transition of their maintenance road to the newly constructed road/bridgeway; It is assumed a TCE is necessary for the construction of this access ramp; potential utility relocations may be necessary.
316-160-014	Eduardo/Victoria Marquez	Vacant Residential Land	<u>TCE</u> TCE necessary for grading and access reconfiguration; assumes existing ingress egress will be maintained for owner and dominant tenement (316-160-012) if existing; no access ramp for RCFC needed in this proposed Alternative Phase 1.

PLANNING

OPC will secure preliminary design plans, as well as a list of impacted parcels and the square footages associated with each right of way impact. Because of the early phase for which this estimate will be provided, a conservative approach to potential impacts will be taken, including working closely with the design staff to identify and avoid potential costly right of way impacts through alternative design methods. OPC believes this is important to maintaining a realistic understanding of potential costs going forward. Property values for these parcels will be estimated using traditionally accepted property valuation techniques for full and partial acquisitions, as well as permanent and temporary easement

Attachment: Second Amendment with Michael Baker International [Revision 1] (4437 : APPROVE SECOND AMENDMENT TO AGREEMENT FOR

interests. Once a general understanding of market values determined for the subject properties, the cost study will estimate the probable values of land and any impacted improvements, including associated damages and cost-to-cure remediation costs, if applicable. OPC will then work closely with the project team to complete the Preliminary Right of Way Cost Estimate and identify all applicable findings.

The following scope of services is associated in the development of a Preliminary Right of Way Cost Estimate:

1. Inventory of affected properties.
2. Perform as necessary research with the City and County of Riverside to and obtain available record maps, assessor's parcel map, vesting ownership deeds, and easement documents to provide to the Project Team and identify existing rights of way.
3. Secure preliminary parcel information from online database sources and investigate current ownerships. Utilizing this information and Assessor's Roll information, determine other valuation considerations such as zoning, lot and building size, current usage, and other relevant factors.
4. Visually inspect each property (aerial and street-level views) and note the effects of all proposed acquisitions.
5. Sort each property into product types to determine the set of real estate data to be researched and create valuation data sets for each product type.
6. Prepare an estimate of the probable cost of each partial acquisition, as well as permanent and temporary easement interests, including (for partial acquisitions) damages to the remaining parcel.
7. Prepare an estimate of the probable relocation assistance (if applicable) for each residential or nonresidential occupant located on each property.
8. Prepare an estimate of the total probable loss of business goodwill (if applicable) attributable to each operating business.
9. Prepare an estimate of the inspection and demolition costs (if applicable) associated with delivering each cleared site.
10. Prepare an estimate of the total services and incidental costs associated with each real estate acquisition (appraisals, acquisition and relocation consultants, title/escrow, legal services, etc.).
11. Summarize all findings into a Preliminary Cost Estimate deliverable and corresponding abstract illustrating all key issues, assumptions, and findings associated with the estimate.
12. Provide QA/QC of final work product, submit to client and other Project Team members, and respond to inquiries.
13. If necessary, provide two sets of revisions assuming that any changes to alternative designs are minimal, do not result in a changes to the type of acquisition (i.e. temporary easement only to permanent partial fee, etc.), and that revisions are performed no later than 6 months following the original estimate.

Deliverable:

- *Preliminary Right of Way Cost Estimate.*

FINAL DESIGN

OPC shall prepare a proposed right of way map illustrating existing/proposed project right of way, areas associated with the acquisition, assessor's parcel numbers, zoning, owner's names, addresses, types of businesses, property lines, approximate building footprints based on Google Earth aerial imagery, zoning setbacks, and existing topographic surveys.

Utilizing the field land net boundary retracement survey prepared, OPC shall prepare legal descriptions and plat map exhibits for necessary permanent and temporary construction easements for up to five (5) larger parcels (14 assessor's parcels) based upon proposed design files. All legal descriptions shall be signed by a California Registered Professional Land Surveyor.

Assumptions/Exclusions

1. *Up to ten (10) acquisition interests needed (permanent and temporary).*
2. *No more than two (2) updates shall be required based upon revisions by the Client.*
3. *Michael Baker Survey team will research record maps/surveys/field notes with the County of Riverside and/or the City of Moreno Valley for available information not included or referenced in the preliminary title reports.*
4. *Michael Baker Survey team will locate all existing monuments within the project vicinity and provide control report containing the basis of bearings, basis of elevations, datum descriptions, control monuments, hardcopy photos of any set control monuments, and final adjusted coordinate and elevation values. Michael Baker Survey team shall perform boundary analysis for all impacted properties and establish existing right of way based on found monuments.*
5. **Exclusion:** Encroachment Permits are not included. It is assumed the City will be responsible for the Encroachment Permit application and processing.

Deliverables:

- *Proposed Right of Way Requirements Maps.*
- *Up to ten (10) Legal Descriptions Plat Map Exhibits signed by a California Registered Professional Land Surveyor.*

2.12 NEPA CLEARANCE

CONSULTANT understands the City intends to pursue Federal funding for the proposed project, administered via the Federal Highway Administration. This will require clearance under the National Environmental Policy Act (NEPA) through Caltrans District 8. The task provided below reflects additions to the scope of work reflected above that would be necessary to obtain NEPA clearance from Caltrans for the proposed project. The work described below, and the associated fee, would be above and beyond that established for Task 2.3, above.

This task assumes that Caltrans District 8 will be the NEPA lead agency, and that a Categorical Exclusion will be the appropriate form of NEPA clearance for the project. Preparation of an Environmental Assessment or Environmental Impact Statement is specifically excluded. Preparation of any technical studies required under NEPA not specifically described below are also excluded.

CONSULTANT anticipates that a CatEx with supporting technical studies will be required by Caltrans District 8 Local Assistance in order to complete the NEPA process. To support the CatEx, Consultant proposes to prepare a Preliminary Environmental Study (PES) Form in addition to technical documentation as described above.

The PES Form, technical studies, and CatEx will address the project's potential environmental effects in accordance with Caltrans standards. The NEPA clearance process will be a key component of the environmental process. Based upon CONSULTANT'S experience with similar projects and familiarity with the Local Assistance process and District 8, the CONSULTANT will act as an extension of staff to expedite the NEPA process while preparing a defensible, thorough analysis.

2.12.1 TECHNICAL STUDIES

2.12.1.1 UPDATES TO BIOLOGICAL RESOURCES STUDIES TO MEET CALTRANS REQUIREMENTS

CONSULTANT will utilize the U.S. Fish and Wildlife Service (USFWS) Information for Planning and Consultation (IPaC) project planning tool and Critical Habitat online mapper to obtain a preliminary list of federally listed species known to occur on and within the general vicinity of the Biological Study Area. Using information obtained during the literature review and field assessment, Michael Baker will prepare a Natural Environment Study (Minimal Impact) (NES[MI]) report in accordance with Volume 3 of the Caltrans Standard Environmental Reference and California Environmental Quality Act/National Environmental Policy Act guidelines. Specifically, the NES(MI) report will summarize the information and results obtained during the literature review, document all plant, wildlife, and vegetation communities observed during the field survey, and determine the potential for any special-status species to occur on or within the vicinity of the project site. In addition, the NES(MI) report will provide an analysis of anticipated project-related impacts to biological resources, documentation to demonstrate consistency with the MSHCP, and identify any additional biological surveys, mitigation measures, and/or regulatory approvals that may be required prior to implementation of the proposed project.

Deliverables:

- *NES(MI) (One electronic file).*

2.12.1.2 UPDATES TO CULTURAL RESOURCES STUDY TO MEET CALTRANS REQUIREMENTS

This task accounts for additional services above and beyond those provided in Task 2.3, above, to adjust the cultural and paleontological documentation to meet Caltrans NEPA requirements. As part of this task, Cogstone will obtain approval by Caltrans of an Area of Potential Effects (APE) Map, Section 106 Native American consultations, geomorphology analysis, preparation of an Archaeological Survey Report (ASR), a Historic Resources Evaluation Report (HRER), a Historic Property Survey Report (HPSR), and a combined Paleontological Identification and Evaluation Report (PIR/PER). Key elements of the work program are as follows:

- **APE Map**
 - Cogstone will prepare a draft Area of Potential Effects (APE) Map in coordination with the City and respond to three rounds of comments from Caltrans.
 - o Develop appropriate APE maps in coordination with the City.
 - o Prepare and submit draft APE map for review and approval by Caltrans District 8
 - o Obtain Caltrans signatures on draft APE map.
- **HPSR**
 - Cogstone will prepare the HPSR which summarizes the ASR and HRER in accordance with Caltrans' SER Volume 2.
 - o One round of response to comments from the City is included.
 - o Three rounds of response to Caltrans comments and revisions are included.
- **ASR**
 - Cogstone will expand the cultural records search radius to a one-mile buffer around the APE in order to meet Section 106 compliance.
 - Native American Consultations: Cogstone will conduct consultations to meet the requirements of Section 106. Tasks will include assistance in communicating with the Native American individuals, groups or tribes provided by the NAHC regarding the project and maintain a log of a minimum of three attempts to obtain comments. All letters will be sent via USPS Certified Mail.
 - Geomorphology Analysis: Cogstone will conduct a geomorphology analysis to determine the sensitivity for subsurface archaeological deposits.
 - Cogstone will prepare the Archaeological Survey Report (ASR)
 - o One round of response to comments from the City is included.
 - o Three rounds of response to Caltrans comments and revisions are included.
- **HRER**
 - Cogstone will prepare the HRER which includes the evaluation of two historic built environment resources.
 - o One round of response to comments from the City is included.
 - o Three rounds of response to Caltrans comments and revisions are included.
- **PIR/PER**
 - Cogstone will prepare a combined PIR/PER.
 - o One round of response to comments from the City is included.
 - o Two rounds of response to Caltrans comments and revisions are included.

For purposes of this proposal it is assumed that Cogstone will not be required to attend meetings. It is assumed that two cultural resources will require recording or updating and that an evaluation of built environment resources will be required. Extended Phase I study and finding of effect reports are not included.

Deliverables:

- *HPSR, ASR, and HRER (One electronic file).*
- *PIR/PER (One electronic file)*

2.12.1.3 UPDATES TO PHASE I ENVIRONMENTAL SITE ASSESSMENT TO MEET CALTRANS REQUIREMENTS

CONSULTANT is currently scoped to prepare a Phase I Environmental Site Assessment (ESA) for the Indian Street Bridge Project (the subject site) for the purposes of compliance with the California Environmental Quality Act (CEQA). This scope of work assumes that a Phase I Initial Site Assessment (ISA) will be required by Caltrans and prepared, instead of a Phase I ESA. This scope of work assumes no changes in permanent right-of-way acquisition assumptions compared to that scoped in December 2017. The Phase I ISA will be prepared, using methods consistent with the ASTM International (ASTM) E 1527-13 Standard Practice for Environmental Site Assessments, which complies with 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule) [the current scope of work], as well as the California Department of Transportation's (Caltrans') Standard Environmental Reference (SER). It should be noted that the completion of the Phase I ISA is only one component of the process required to satisfy the AAI Rule.

Deliverables:

- *Phase I ISA (One electronic file).*

2.12.1.4 AIR QUALITY REPORT

Preparation of an Air Quality Report will be required to satisfy Caltrans NEPA requirements for the proposed project. CONSULTANT has retained Terry A. Hayes and Associates (TAHA) for assistance with this task. TAHA will prepare the Air Quality Report based on methodology provided by Caltrans in the Standard Environmental Reference. The Report will summarize existing conditions and discuss applicable air quality regulations. Regional construction criteria pollutant and greenhouse gas (GHG) emissions will be quantified using the Roadway Construction Emissions Model and information provided by the project team. Criteria pollutant emissions will be estimated based on equipment exhaust, fugitive dust emissions, and truck trips. Regional operational criteria pollutant and GHG emissions will be quantified using emission factors from CT-EMFAC and traffic data provided by the project team (i.e., vehicle miles traveled and vehicle speeds). On a localized level, the Air Quality Report will assess the potential for carbon monoxide hot-spots using the Transportation Project-Level Carbon Monoxide Protocol and mobile source air toxics (MSAT) using the Federal Highway Administration Interim Guidance Update on Mobile Source Air Toxic Analysis in NEPA. Mitigation measures for potentially significant and/or adverse impacts will be recommended when appropriate to reduce air quality emissions. This scope includes responding to team and public comments.

As part of this task, TAHA will prepare the Air Quality Conformity Assessment (AQCA). This includes presenting the proposed project during the Interagency Consultation process. Based on experience with the Transportation Conformity Working Group, it is not anticipated that the project will be designated as a Project of Air Quality Concern. This scope of work and associated cost does not include a detailed particulate matter hot-spot analysis. The AQCA will document the Interagency Consultation process and the conformity determination. The scope of work includes responding to one round of team comments and two rounds of Caltrans comments.

Deliverables:

- *AQR (One electronic file).*

2.12.1.5 NOISE STUDY REPORT

TAHA will prepare a Noise Study consistent with the Caltrans Traffic Noise Analysis Protocol (April 2020). This process will begin with the preparation of a Work Plan to be approved by Caltrans. The Work Plan will identify traffic data, sensitive receptors (e.g., residences), noise monitoring locations, and methodology. The scope includes a series of short-term 20-minute measurements and up to two long-term 24-hour measurements. Construction noise will be assessed based on maximum equipment levels and frequency of occurrence near sensitive receptors. The noise levels will consider construction phase, engine type (diesel or gasoline), horsepower, load factor, and percentage of time in use. The construction section will discuss Caltrans Standard Specifications and local noise regulations. If necessary, avoidance and/or mitigation measures will be included to minimize or eliminate adverse construction noise impacts. Changes in operational noise levels will be assessed using Traffic Noise Model (TNM). The baseline noise condition will be estimated using traffic counts and speed information obtained during monitoring activities. No Build and Build Alternatives will be modeled using traffic conditions that generate the highest noise levels, vehicle mix, speed, and roadway configuration. The roadway configuration will be precisely based on engineering drawings. Noise abatement measures (soundwalls) will be evaluated based on benefits to receptors, acoustical feasibility, and reasonableness allowances. The Work Plan will set the framework for the analysis and minimize the potential for complications. TAHA will use the Work Plan to coordinate extensively with Caltrans staff to discuss and quickly resolve complications.

As part of this task, TAHA will prepare a Draft Noise Abatement Decision Report (NADR) using information from the Noise Study Report, other relevant environmental studies, and design considerations. The NADR will include:

- Noise abatement reasonableness allowances presented in the Noise Study Report.
- Acoustical feasibility of noise abatement presented in the Noise Study Report.
- Locations and dimensions of evaluated noise barriers.
- Approved cost estimates of acoustically feasible noise abatement.
- Non-acoustical feasibility issues of proposed noise abatement based on the best available design information available.
- Effects of abatement, including effects on cultural resources, scenic views, hazardous materials, biological resources, and other known social, economic, legal, and technical factors.

The NADR summarizes key information from the Noise Study Report and provides recommendations for soundwalls based on feasibility, number of benefited receptors, and cost. Complications are not anticipated as the Noise Study will be approved by Caltrans prior to preparation of the NADR. The Final NADR will be signed by the project engineer after completion of the Noise Study and prior to publication of the draft environmental document. The scope of work includes responding to one round of team comments and two rounds of Caltrans comments.

Deliverables:

- *NSR (One electronic file).*
- *NADR (One electronic file)*

2.12.1.6 WATER QUALITY TECHNICAL MEMORANDUM

A Water Quality Technical Memorandum (WQTM) document will be developed for use in the NEPA/CEQA document. The WQTM will qualitatively discuss the project's impacts on receiving water quality during construction and post-construction conditions based on the region's applicable stormwater regulations and consistent with the City of Moreno Valley's National Pollutant Discharge Elimination System (NPDES) (Order Number R8-2010-0033) permit requirements. It will characterize the baseline water quality conditions, identify the potential water quality issues from developing the project, and identify applicable mitigation measures (Best Management Practices). The memo will discuss the following:

- The evaluation of the potential impacts related to implementing the project.
 - Regional Hydrology, Local Hydrology, Floodplains, Groundwater Resources, Topography, Climate, Soils/Erosion Potential, and Existing Water Quality.
 - The applicable requirements of the Federal Clean Water Act (CWA), State Water Quality Regulations (Statewide General Construction Permit), State Requirements under Section 402 of the Federal CWA, Beneficial Uses, Groundwater and Surface Water Quality Objectives, and Impaired Waters. A risk analysis will be conducted consistent with the California Statewide General Construction Permit (Order Number 2009-0009-DWQ).
 - Potential stormwater quality mitigation measures (Best Management Practices) that may be needed per the water quality requirements applicable to the project.

One round of review and comments on the technical memorandum are anticipated, and one revised technical memorandum will be prepared with a response to comments matrix.

Deliverables:

- *WQTM (One electronic file).*

2.12.1.7 VISUAL IMPACT ASSESSMENT

CONSULTANT will prepare an Abbreviated Visual Impact Assessment (VIA) in accordance with the annotated outline for a Minor VIA recommended by the Caltrans Landscape Architecture Program. CONSULTANT staff will conduct a field reconnaissance, at which time on-site and adjacent visual resources will be documented. Per the FHWA Guidelines for the VIA of Highway Projects, visual simulations are unlikely for an Abbreviated VIA. Visual simulations and viewshed mapping are not included in this scope of work. This task will be overseen by a licensed Landscape Architect. Avoidance, minimization, and/or mitigation measures will be recommended to reduce the visual impacts from the project.

Deliverables:

- *Abbreviated VIA (One electronic file).*

2.12.1.8 FARMLAND AD-1006 ANALYSIS

As part of the Agriculture and Food Act, the Farmland Protection Policy Act (FPPA) was passed by Congress in 1981 to minimize the impact federal programs have on unnecessary and irreversible conversion of farmland to nonagricultural uses. The FPPA requires federal agencies, such as the FHWA, to coordinate

with the National Resources Conservation Services (NRCS) branch of the United States Department of Agriculture (USDA) if their activities may irreversibly convert farmland (directly or indirectly) to nonagricultural use.

Compliance with the FPPA must be achieved as part of the NEPA process (7 CFR 658.4[e]). Federal agencies are required to complete an NRCS Farmland Conversion Impact Rating Form (Form AD-1006) for projects that may have adverse effects to farmlands. Based on the California Department of Conservation, *California Important Farmland Finder*, Farmland of Local Importance occurs on-site and within the project vicinity. In accordance with the FPPA, CONSULTANT will map, analyze, calculate, and rate the extent of farmland impacts relative to federally established criteria (7 CFR Part 658.5[b]). The results will be summarized in the NRCS Form AD-1006 and a memorandum will be prepared to document the analysis and elaborate on the methodology and conclusions. The Form AD-1006 and memorandum will be submitted to the City and Caltrans for review and approval. Once approved, CONSULTANT will coordinate with Caltrans to submit the Form AD-1006 to NRCS for review, final scoring, and approval.

Deliverables:

- *Farmland AD-1006 Analysis (One electronic file).*

2.12.1.9 LOCATION HYDRAULICS STUDY/SUMMARY FLOODPLAIN ENCROACHMENT REPORT

CONSULTANT will submit and process the Location Hydraulic Study (LHS) and a Summary Floodplain Evaluation Report (SFER) with Caltrans District 8. The LHS/SFER will evaluate impacts to channel hydraulics and the FEMA floodplain in accordance with NEPA. The conclusions within the LHS/SFER will be utilized to support the findings of the Categorical Exclusion.

Deliverables:

- *LHS/SFER (One electronic file).*

2.12.2.1 PRELIMINARY ENVIRONMENTAL STUDY FORM

CONSULTANT will prepare a PES Form in accordance with the Caltrans Local Assistance Procedures Manual (LAPM) environmental reporting criteria. The PES Form will provide a preliminary analysis of potential environmental impacts associated with the project and identify environmental issues that may require further detailed study. The PES Form will be submitted to the City/Caltrans for concurrence prior to the initiation of the technical study work program. Caltrans will be responsible for a determination of the appropriate scope of work for the project. A final determination regarding the range of technical studies and appropriate NEPA action cannot be made until Caltrans approves the PES Form for the project. However, based upon CONSULTANT's experience on similar Caltrans Local Assistance projects and our knowledge of the project area, it is anticipated that a CatEx (with appropriate technical studies as outlined above) will apply to the project.

Deliverables:

- *PES Form (One electronic file).*

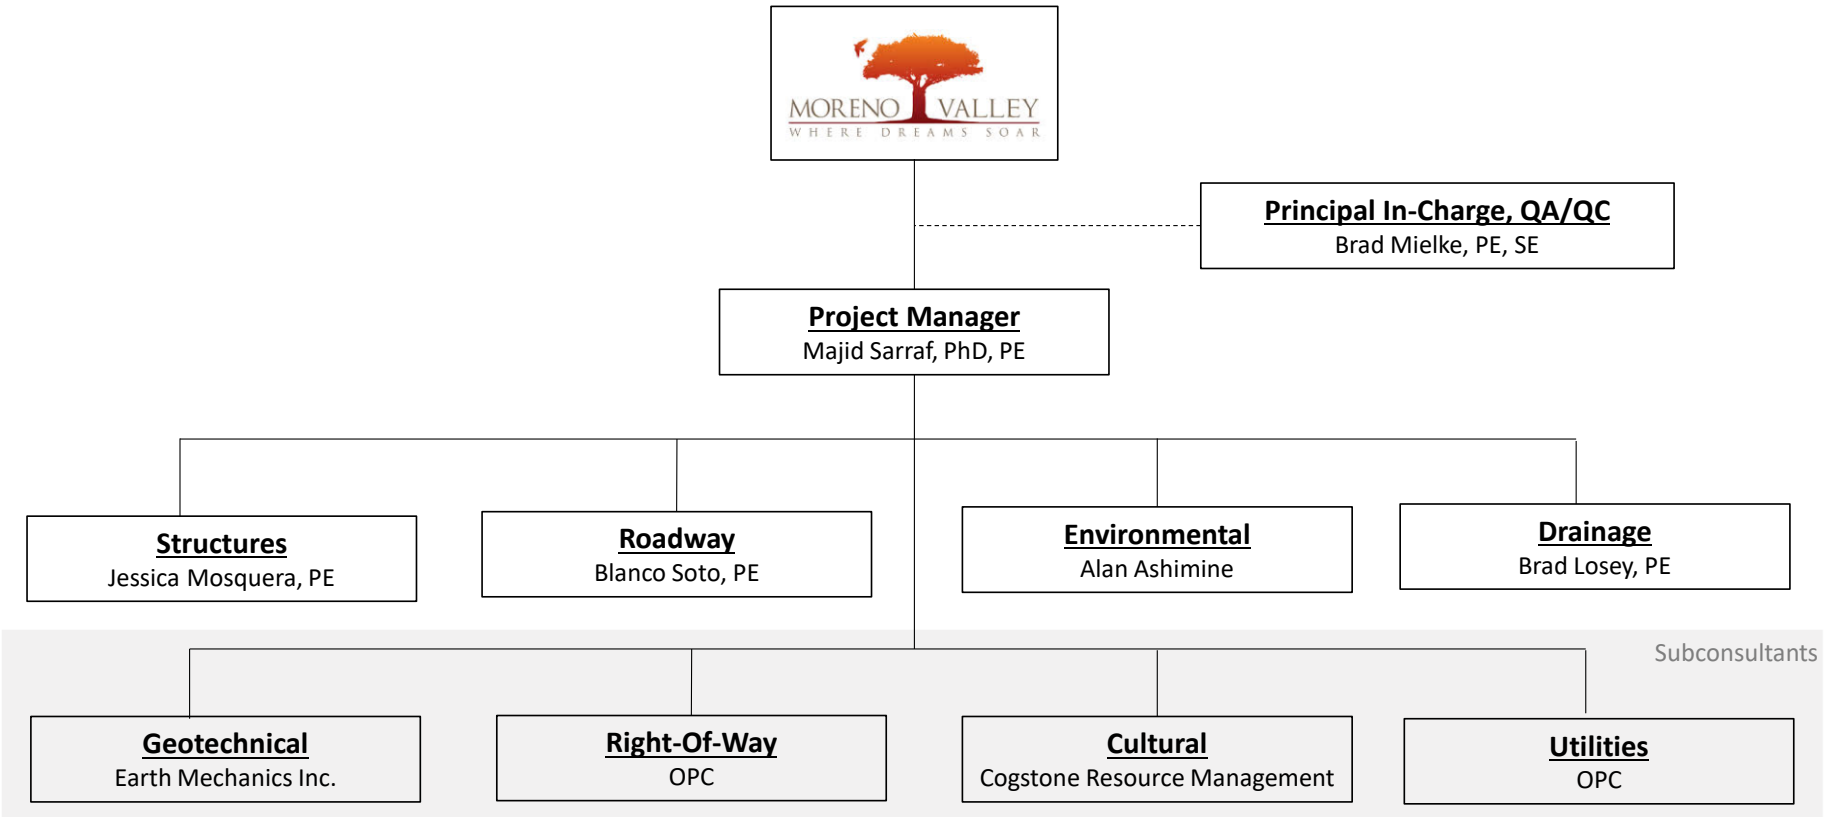

2.12.2.2 CATEGORICAL EXCLUSION

On behalf of the City, CONSULTANT will forward all supporting NEPA technical studies and preliminary engineering documentation demonstrating that significant environmental effects will not result with project implementation. This submittal will consist of a draft CE and technical study package with formal request to Caltrans for approval. As stated above, it is assumed that the project will qualify for a CE under 23 CFR 771 Activity c(28).

Deliverables:

- *Categorical Exclusion (One electronic file).*

Attachment: Second Amendment with Michael Baker International [Revision 1] (4437 : APPROVE SECOND AMENDMENT TO AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES FOR THE INDIAN STREET)

Report to City Council

TO: Mayor and City Council

FROM: Michael Lloyd, Public Works Director/City Engineer

AGENDA DATE: October 5, 2021

TITLE: AUTHORIZATION TO AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO TRANSTECH ENGINEERS, INC. FOR THE STATE ROUTE 60/ REDLANDS BOULEVARD INTERCHANGE IMPROVEMENTS, PROJECT NO. 801 0064

RECOMMENDED ACTION

Recommendations:

1. Award an Agreement for Professional Consultant Services to Transtech Engineers, Inc. to perform professional services for the Project Approval and Environmental Document (PA/ED) Phase for State Route 60/Redlands Blvd Interchange Improvements project , funded by Transportation Uniform Mitigation Fee (TUMF) Program funds;
2. Authorize the issuance of a Purchase Order to Transtech Engineers, Inc., in the amount of \$2,536,589 when the contract has been signed by all parties;
3. Authorize the City Manager to execute the contract with Transtech Engineers, Inc., subject to the approval by the City Attorney; and
4. Authorize the Public Works Director to execute any subsequent related amendments to the Agreement for Professional Consultant Services with Transtech Engineers, Inc., not to exceed the total Purchase Order amount, subject to the approval by the City Attorney

SUMMARY

This report recommends approval of an agreement with Transtech Engineers, Inc. to complete the Project Approval and Environmental Document (PA/ED) and Engineering Design Services associated with the interchange improvements for the State Route 60

(SR-60) at Redlands Boulevard (“Project”). The major scope areas consist of completing the PA/ED Phase including Project Approval (PA), Geometric Approval Drawing (GAD), and Final Environmental Document (FED). Undertaking these efforts during this PA/ED phase will result in a more flexible environmental document, more streamlined approvals, and substantial future cost savings.

DISCUSSION

The City submitted a request to the Western Riverside Council of Governments (WRCOG) to include funding for the PA/ED phase of the Project in WRCOG’s annual 5-year Transportation Improvement Program (TIP). Earlier this year, the WRCOG Executive Committee approved the 2021 Central Zone 5-year TIP, which included the funding request of \$3,500,000 for the PA&ED phase of the Project. On June 15, 2021, the City Council accepted the TUMF Program reimbursement agreement between WRCOG and the City for the PA&ED phase of the Project.

The purpose of the Project is to improve existing interchange geometrics including increasing bridge height to meet Caltrans standards; enhance freeway access and regional goods movement; improve traffic operations to support the forecast travel demand for the 2045 design year; and accommodate a multimodal facility that has harmony with the community and preserves the value of the area.

The Project has completed the Preliminary Study Report (PSR) phase as required by Caltrans and is ready for the next phase, which is the PA&ED phase. As proposed, the PA&ED phase will include Project Approvals, Geometric Approval Drawing, and Environmental Document. The Project’s Geometric Approval Drawing (GAD) and Final Environmental Document (FED) are included now to provide project flexibility, a more streamlined approval process, and substantial future cost savings. This approach has been very successful in other City interchange projects.

Requests for Proposals (RFP) for Professional Consultant Services were distributed and advertised in accordance with City’s processes in February 2021. The City received four proposals in response to the RFP. Following a competitive selection process, Transtech Engineers, Inc. was selected as the most qualified consultant to perform the work consisting of full service for PA&ED Phase. The selection process was pursuant to the City’s Municipal Code requirements for professional services procurement.

Staff recommends the award of the design contract to Transtech Engineers, Inc. to perform Professional Consultant Services for the Project Approval and Environmental Document (PA/ED) Phase for State Route 60 (SR-60) / Redlands Blvd Interchange Improvements project. Additionally, completion of the PA/ED phase allows the project to be more competitive for grants funds.

Approval of the recommended actions would support Objective 4 of the *Momentum MoVal* Strategic Plan: “Manage and maximize Moreno Valley’s public infrastructure to ensure an excellent quality of life, develop and implement innovative, cost effective

infrastructure maintenance programs, public facilities management strategies, and capital improvement programming and project delivery.”

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *This alternative will allow the City to move forward with the project and completion of the PA/ED phase.*
2. Do not approve and authorize the recommended actions as presented in this staff report. *This alternative will not allow the PA/ED phase of the project to be completed which inevitably will delay the timeliness and increase the cost of the needed improvements at the referenced interchange.*

FISCAL IMPACT

The PA/ED phase of the project is funded by the Transportation Uniform Mitigation Fee (TUMF) Program. There is no impact to the General Fund.

AVAILABLE BUDGET:

Transportation Uniform Mitigation Fee TUMF (Account No. 3003-70-77-80001) (Project No. 801 0064-3003).....	\$3,500,000
Total.....	\$3,500,000

ESTIMATED BUDGET FOR PA&ED PHASE:

Design Contract (Transtech Engineers)	\$2,536,589
Project Administration*	\$ 700,000
Total Estimated Cost.....	\$ 3,236,589

**Includes City project administration, application fees, and other related miscellaneous costs.*

ANTICIPATED PROJECT SCHEDULE:

Start PA/ED	Fall 2021
Complete PA/ED.....	Fall 2023

CITY COUNCIL GOALS

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES FOR
SR-60 INTERCHANGE / REDLANDS BOULEVARD INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

This SR-60 Interchange / Redlands Boulevard Interchange Improvements Agreement (hereinafter, this "Agreement") is made and entered into this ____ day of _____ 2021 ("Effective Date"), by and between the City of Moreno Valley, a municipal corporation in the County of Riverside, State of California, hereinafter referred to as the "City," and Transtech Engineers, Inc., a (California corporation), hereinafter referred to as "Consultant."

RECITALS

WHEREAS, the City has determined it is in the public interest to proceed with the professional work hereinafter described as "Project"; and

WHEREAS, the City has determined the Project involves the performance of professional and technical services of a temporary nature as more specifically described in Exhibit "A" (City's Request for Proposal) and Exhibit "B" (Consultant's Proposal) hereto; and

WHEREAS, the City does not have available employees to perform the services for the Project; and

WHEREAS, the City has requested the Consultant to perform such services for the Project; and

WHEREAS, the Consultant is professionally qualified in California to perform the professional and technical services required for the Project, and hereby represents that it desires to and is professionally and legally capable of performing the services called for by this Agreement;

THEREFORE, the City and the Consultant, for the consideration hereinafter described, mutually agree as follows:

Attachment: Agreement with Transtech Engineers, Inc (5472 : AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

DESCRIPTION OF PROJECT

1. The Project is described as SR-60 Interchange / Redlands Boulevard Interchange Improvements, Project No. 801 0064.

SCOPE OF SERVICES

2. The Consultant's scope of service is described on Exhibit "B" attached hereto and incorporated herein by this reference. In the event of a conflict, the City's Request for Proposal shall take precedence over the Consultant's Proposal.

3. The City's responsibility is described on Exhibit "C" attached hereto and incorporated herein by this reference.

PAYMENT TERMS

4. The City agrees to pay the Consultant and the Consultant agrees to receive a "Not-to-Exceed" fee of \$2,536,589.00 in accordance with the payment terms provided on Exhibit "D" attached hereto and incorporated herein by this reference.

TIME FOR PERFORMANCE

5. The Consultant shall commence services upon receipt of written direction to proceed from the City.

6. The Consultant shall perform the work described on Exhibit "A" in accordance with the schedule as included in Exhibit "B" attached hereto and incorporated by this reference.

7. This Agreement shall be effective from effective date and shall continue in full force and effect date through December 31, 2023, subject to any earlier termination in accordance with this Agreement. The services of Consultant shall be completed in a sequence assuring expeditious completion, but in any event, all such services shall be completed prior to expiration of this Agreement.

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

8. (a) The Consultant agrees that the personnel, including the principal Project manager, and all subconsultants assigned to the Project by the Consultant, shall be subject to the prior approval of the City.

(b) No change in subconsultants or key personnel shall be made by the Consultant without written prior approval of the City.

SPECIAL PROVISIONS

9. It is understood and agreed that the Consultant is, and at all times shall be, an independent contractor and nothing contained herein shall be construed as making the Consultant or any individual whose compensation for services is paid by the Consultant, an agent or employee of the City, or authorizing the Consultant to create or assume any obligation or liability for or on behalf of the City.

10. The Consultant may also retain or subcontract for the services of other necessary consultants with the prior written approval of the City. Payment for such services shall be the responsibility of the Consultant. Any and all subconsultants employed by the Consultant shall be subject to the terms and conditions of this Agreement, except that the City shall have no obligation to pay any subconsultant for services rendered on the Project.

11. The Consultant and the City agree to use reasonable care and diligence to perform their respective services under this Agreement.

12. The Consultant shall comply with applicable federal, state, and local laws in the performance of work under this Agreement.

13. To the extent required by controlling federal, state and local law, Consultant shall not employ discriminatory practices in the provision of services, employment of personnel, or in any other respect on the basis of race, religious creed, color, national origin, ancestry, physical

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES

disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era. Subject to the foregoing and during the performance of this Agreement, Consultant agrees as follows:

(a) Consultant will comply with all applicable laws and regulations providing that no person shall, on the grounds of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity made possible by or resulting from this Agreement.

(b) Consultant will not discriminate against any employee or applicant for employment because of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era. Consultant shall ensure that applicants are employed, and the employees are treated during employment, without regard to their race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era. Such requirement shall apply to Consultant's employment practices including, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Consultant agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provision of this nondiscrimination clause.

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

(c) Consultant will, in all solicitations or advertisements for employees placed by or on behalf of Consultant in pursuit hereof, state that all qualified applicants will receive consideration for employment without regard to race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, ethnicity, status as a disabled veteran or veteran of the Vietnam era.

(d) If Consultant should subcontract all or any portion of the services to be performed under this Agreement, Consultant shall cause each subcontractor to also comply with the requirements of this Section 13.

14. To the furthest extent allowed by law (including California Civil Code section 2782.8 if applicable), Consultant shall indemnify, hold harmless and defend the City, the Moreno Valley Community Services District (“CSD”), the Moreno Valley Housing Authority (“Housing Authority”) and each of their officers, officials, employees, agents and volunteers from any and all loss, liability, fines, penalties, forfeitures, costs and damages (whether in contract, tort or strict liability, including but not limited to personal injury, death at any time and property damage), and from any and all claims, demands and actions in law or equity (including reasonable attorney's fees and litigation expenses) that arise out of, pertain to, or relate to the negligence, recklessness or willful misconduct of Consultant, its principals, officers, employees, agents or volunteers in the performance of this Agreement.

If Consultant should subcontract all or any portion of the services to be performed under this Agreement, Consultant shall require each subcontractor to indemnify, hold harmless and defend City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers in accordance with the terms of the preceding paragraph.

This section shall survive termination or expiration of this Agreement.

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

15. Insurance.

(a) Throughout the life of this Agreement, Consultant shall pay for and maintain in full force and effect all insurance as required in **Exhibit E** or as may be authorized in writing by the City Manager or his/her designee at any time and in his/her sole discretion.

(b) If at any time during the life of the Agreement or any extension, Consultant or any of its subcontractors fail to maintain any required insurance in full force and effect, all services and work under this Agreement shall be discontinued immediately, and all payments due or that become due to Consultant shall be withheld until notice is received by City that the required insurance has been restored to full force and effect and that the premiums therefore have been paid for a period satisfactory to City. Any failure to maintain the required insurance shall be sufficient cause for City to terminate this Agreement. No action taken by City pursuant to this section shall in any way relieve Consultant of its responsibilities under this Agreement. The phrase "fail to maintain any required insurance" shall include, without limitation, notification received by City that an insurer has commenced proceedings, or has had proceedings commenced against it, indicating that the insurer is insolvent.

(c) The fact that insurance is obtained by Consultant shall not be deemed to release or diminish the liability of Consultant, including, without limitation, liability under the indemnity provisions of this Agreement. The duty to indemnify City shall apply to all claims and liability regardless of whether any insurance policies are applicable. The policy limits do not act as a limitation upon the amount of indemnification to be provided by Consultant. Approval or purchase of any insurance contracts or policies shall in no way relieve from liability nor limit the liability of Consultant, its principals, officers, agents, employees, persons under the supervision of Consultant, vendors, suppliers, invitees, consultants, sub-consultants, subcontractors, or

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

anyone employed directly or indirectly by any of them.

(d) Upon request of City, Consultant shall immediately furnish City with a complete copy of any insurance policy required under this Agreement, including all endorsements, with said copy certified by the underwriter to be a true and correct copy of the original policy. This requirement shall survive expiration or termination of this Agreement.

(e) If Consultant should subcontract all or any portion of the services to be performed under this Agreement, Consultant shall require each subcontractor to provide insurance protection in favor of City and each of its officers, officials, employees, agents and volunteers in accordance with the terms of this section, except that any required certificates and applicable endorsements shall be on file with Consultant and City prior to the commencement of any services by the subcontractor.

16. The waiver by either party of a breach by the other of any provision of this Agreement shall not constitute a continuing waiver or a waiver of any subsequent breach of either the same or a different provision of this Agreement. No provisions of this Agreement may be waived unless in writing and signed by all parties to this Agreement. Waiver of any one provision herein shall not be deemed to be a waiver of any other provision herein.

17. Consultant and subconsultants shall pay prevailing wage rates when required by the Labor Laws of the State of California.

18. (a) The Consultant shall deliver to the Public Works Director/City Engineer of the City or his designated representative, fully completed and detailed project-related documents which shall become the property of the City. The Consultant may retain, for its files, copies of any and all material, including drawings, documents, and specifications, produced by the Consultant in performance of this Agreement.

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

(b) The Consultant shall be entitled to copies of all furnished materials for his files and his subconsultants, if any.

(c) The City agrees to hold the Consultant free and harmless from any claim arising from any unauthorized use of computations, maps, and other documents prepared or provided by the Consultant under this Agreement, if used by the City on other work without the permission of the Consultant. Consultant acknowledges that Consultant work product produced under this agreement may be public record under State law.

19. (a) This Agreement shall terminate without any liability of City to Consultant upon the earlier of: (i) Consultant's filing for protection under the federal bankruptcy laws, or any bankruptcy petition or petition for receiver commenced by a third party against Consultant; (ii) 10 calendar days prior written notice with or without cause by City to Consultant; (iii) City's non-appropriation of funds sufficient to meet its obligations hereunder during any City fiscal year of this Agreement, or insufficient funding for the Project; or (iv) expiration of this Agreement. The written notice shall specify the date of termination. Upon receipt of such notice, the Consultant may continue services on the project through the date of termination, provided that no service(s) shall be commenced or continued after receipt of the notice, which is not intended to protect the interest of the City. The City shall pay the Consultant within thirty (30) days after the date of termination for all non-objected to services performed by the Consultant in accordance herewith through the date of termination. Consultant shall not be paid for any work or services performed or costs incurred which reasonably could have been avoided.

(b) In the event of termination due to failure of Consultant to satisfactorily perform in accordance with the terms of this Agreement, City may withhold an amount that would otherwise be payable as an offset to, but not in excess of, City's damages caused by such failure. In no

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

event shall any payment by City pursuant to this Agreement constitute a waiver by City of any breach of this Agreement which may then exist on the part of Consultant, nor shall such payment impair or prejudice any remedy available to City with respect to the breach.

(c) Upon any breach of this Agreement by Consultant, City may (i) exercise any right, remedy (in contract, law or equity), or privilege which may be available to it under applicable laws of the State of California or any other applicable law; and/or (ii) proceed by appropriate court action to enforce the terms of the Agreement. If it is determined that City improperly terminated this Agreement for default, such termination shall be deemed a termination for convenience.

(d) Consultant shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of Consultant and without its fault or negligence such as, acts of God or the public enemy, acts of City in its contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. Consultant shall notify City in writing as soon as it is reasonably possible after the commencement of any excusable delay, setting forth the full particulars in connection therewith, and shall remedy such occurrence with all reasonable dispatch, and shall promptly give written notice to Administrator of the cessation of such occurrence.

20. This Agreement is binding upon the City and the Consultant and their successors and assigns. Except as otherwise provided herein, neither the City nor the Consultant shall assign, sublet, or transfer its interest in this Agreement or any part thereof without the prior written consent of the other.

21. A City representative shall be designated by the City and a Consultant representative shall be designated by the Consultant. The City representative and the

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

Consultant representative shall be the primary contact person for each party regarding performance of this Agreement. The City representative shall cooperate with the Consultant, and the Consultant's representative shall cooperate with the City in all matters regarding this Agreement and in such a manner as will result in the performance of the services in a timely and expeditious fashion.

22. This Agreement represents the entire and integrated Agreement between the City and the Consultant, and supersedes all prior negotiations, representations or Agreements, either written or oral. This Agreement may be modified or amended only by a subsequent written Agreement signed by both parties.

23. Where the payment terms provide for compensation on a time and materials basis, the Consultant shall maintain adequate records to permit inspection and audit of the Consultant's time and materials charges under this Agreement. The Consultant shall make such records available to the City at the Consultant's office during normal business hours upon reasonable notice. Nothing herein shall convert such records into public records. Except as may be otherwise required by law, such records will be available only to the City. Such records shall be maintained by the Consultant for three (3) years following completion of the services under this Agreement.

24. The City and the Consultant agree, that to the extent permitted by law, until final approval by the City, all data shall be treated as confidential and will not be released to third parties without the prior written consent of both parties.

25. (a) Consultant shall comply, and require its subcontractors to comply, with all applicable (i) professional canons and requirements governing avoidance of impermissible client conflicts; and (ii) federal, state and local conflict of interest laws and regulations including, without

INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

limitation, California Government Code Section 1090 et. seq., the California Political Reform Act (California Government Code Section 87100 et. seq.) and the regulations of the Fair Political Practices Commission concerning disclosure and disqualification (2 California Code of Regulations Section 18700 et. seq.). At any time, upon written request of City, Consultant shall provide a written opinion of its legal counsel and that of any subcontractor that, after a due diligent inquiry, Consultant and the respective subcontractor(s) are in full compliance with all laws and regulations. Consultant shall take, and require its subcontractors to take, reasonable steps to avoid any appearance of a conflict of interest. Upon discovery of any facts giving rise to the appearance of a conflict of interest, Consultant shall immediately notify City of these facts in writing.

(b) In performing the work or services to be provided hereunder, Consultant shall not employ or retain the services of any person while such person either is employed by City or is a member of any City council, commission, board, committee, or similar City body. This requirement may be waived in writing by the City Manager, if no actual or potential conflict is involved.

(c) Consultant represents and warrants that it has not paid or agreed to pay any compensation, contingent or otherwise, direct or indirect, to solicit or procure this Agreement or any rights/benefits hereunder.

(d) Neither Consultant, nor any of Consultant's subcontractors performing any services on this Project, shall bid for, assist anyone in the preparation of a bid for, or perform any services pursuant to, any other contract in connection with this Project unless fully disclosed to and approved by the City Manager, in advance and in writing. Consultant and any of its subcontractors shall have no interest, direct or indirect, in any other contract with a third party in

**AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES
SR-60 INTERCHANGE / REDLANDS BOULEVARD
INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064**

connection with this Project unless such interest is in accordance with all applicable law and fully disclosed to and approved by the City Manager, in advance and in writing. Notwithstanding any approval given by the City Manager under this provision, Consultant shall remain responsible for complying with Section 25(a), above.

(e) If Consultant should subcontract all or any portion of the work to be performed or services to be provided under this Agreement, Consultant shall include the provisions of this Section 25 in each subcontract and require its subcontractors to comply therewith.

(f) This Section 25 shall survive expiration or termination of this Agreement.

26. All Plans, drawings, Specifications, reports, logs, and other documents prepared by the Consultant in its performance under this Agreement shall, upon completion of the project, be delivered to and be the property of the City, provided that the Consultant shall be entitled, at its own expense, to make copies thereof for its own use.

27. The laws of the State of California shall govern the rights, obligations, duties, and liabilities of the parties to this Agreement, and shall also govern the interpretation of this Agreement. Venue shall be vested in the Superior Court of the State of California, County of Riverside.

**REQUEST FOR PROPOSAL
PROFESSIONAL CONSULTANT SERVICES FOR
STATE ROUTE 60/REDLAND BOULEVARD INTERCHANGE IMPROVEMENTS
PROJECT NO. 801 0064 70 77**

I. INVITATION

You are hereby invited to submit a Proposal for Professional Consultant Services for Project Approval and Environmental Document (PA/ED); and Engineering Design Services associated with the interchange improvements for State Route 60 (SR 60) at Redlands Boulevard as shown on the enclosed Location Map.

Interested parties may register and download copies of the RFP by visiting the City's web site, www.moval.org, selecting "City Bids and RFP's" under the "City Hall" Resources link at the home page and selecting the "Bid & Vendor Portal" link. All documents associated with this RFP will be downloadable at no fee from the City's web site. Once the prospective Bidder downloads any documents relative to a solicitation, that Bidder's name will appear on the Prospective Bidders List.

Proposals will be accepted until 5:00 p.m. on March 22, 2021.

Proposals shall be submitted electronically (in PDF format) via the City's vendor portal website, located at <http://www.planetbids.com/portal/portal.cfm?CompanyID=24660>. The proposer shall provide a separate electronic file for their technical proposal and cost proposal.

The proposer is solely responsible for "on time" submission of their electronic proposal. The City will only consider proposals that have been transmitted successfully and have been issued an ebid confirmation number with a time stamp from the Bid Management System indicating that bid was submitted successfully. Transmission of proposals by any other means will not be accepted. Proposer shall be solely responsible for informing itself with respect to the proper utilization of the proposal management system, for ensuring the capability of their computer system to upload the required documents, and for the stability of their internet service. Failure of the proposer to successfully submit an electronic proposal shall be at the proposer's sole risk and no relief will be given for late and/or improperly submitted proposals. Proposers experiencing any technical difficulties with the proposal submission process may contact PlanetBids at (818) 992-1771. Neither the City nor PlanetBids makes any guarantee as to the timely availability of assistance, or assurance that any given problem will be resolved by the proposal submission deadline.

All questions regarding this RFP must be submitted through the vendor portal noted above and must be submitted no later than March 4, 2021 at 5:00 p.m.

II. PROJECT DESCRIPTION

The SR-60/Redlands Boulevard interchange was constructed in 1964. The existing interchange consists of the Redlands Boulevard overcrossing with eastbound and westbound entrance and exit ramps. Both ramp intersections are signalized. The entrance ramps are currently not metered. The Redlands Boulevard overcrossing (PM 20.37, Bridge Number 56-0487) has four spans, with precast girders that are simply supported by two-column bents and open-ended diaphragm abutments. The bents and abutments are on Cast

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

in Drilled Hole (CIDH) piles. The bridge is approximately 236 feet long, 34 feet wide, and spans four through lanes and both entrance ramps on SR- 60.

The purpose of the project is to alleviate congestion, enhance freeway access and regional goods movement, provide increased interchange capacity, improve traffic operations to support the forecast travel demand for the 2045 design year; improve existing interchange geometric including bridge height to meet Caltrans standards; and accommodate a multimodal facility that has harmony with the community and preserves the value of the area.

The proposed project includes: 1) reconstruction and realignment of SR 60/Redlands Blvd ramps, 2) widening of Redlands Blvd, and replacement of the overcrossing structure, 3) realignment of Spruce Street on the north side of SR - 60 @ Redlands Boulevard, 4) provision for California Highway Patrol (CHP) enforcement areas as required, 5) addition of ramp metering as required, 6) provision for truck operations, 7) coordination of utility relocations, 8) provision for landscaping and irrigation, and/or hardscape, to the extent required, and 9) related improvements as required by the City and Caltrans.

The project scope of work is to complete the PA/ED Phase including Project Approval (PA), Geometric Approval Drawing (GAD); and Final Environmental Document (FED).

Project Study Report-Project Development Support (PSR-PDS) has been approved by Caltrans in June 2016.

III. PROJECT FUNDING AND SCHEDULE

The City is currently funding the planning PA/ED Phase through Transportation Uniform Mitigation Fee (TUMF). City will continue to pursue grant opportunity to get funding for Design (PE) and Construction Phases. The Consultant must prepare all applicable documents in a manner that assumes at least partial federal funds will be utilized during the design and construction phases.

The City intends to have the selected consultant complete the PA/ED Phase first. Design, Right-of-Way/Utility relocation, and Construction phases will be considered pending available funding.

The Consultant shall provide proposed schedule to meet the following timeline for this project:

Consultant selection/Award	April 2021
Notice to Proceed:	April 2021
PA/ED approval by Caltrans	June 2023

IV. SCOPE OF PROFESSIONAL CONSULTANT SERVICES

The scope of work of Professional Consultant Services for this project consists of:

PA/ED Phase: completion of Project Approval and Environmental Document Phase. The work includes Project Approval (PA), Geometric Approval Drawing (GAD); and Final Environmental Document (FED). The FED includes preparation of environmental analyses leading to Caltrans approved environmental documentation

REQUEST FOR PROPOSAL FOR
 PROFESSIONAL CONSULTANT SERVICES
 PROJECT NO. 801 0064 70 77

in accordance with National Environmental Protection Act (NEPA)/California Environmental Quality Act (CEQA) guidelines. It is anticipated that minimum three build alternatives will be analyzed, along with the “no-build” alternative.

A. PLANNING/PROJECT APPROVAL AND ENVIRONMENTAL DOCUMENT (PA&ED) PHASE

1. Project Report (PR), Geometric Approval Drawing (GAD), and Structures

The Consultant shall prepare a PR document according to current Caltrans requirements, as shown in Caltrans Project Development Procedures Manual, and in accordance with District 8 requirements. The PR will include existing and forecasted traffic, design volumes, and accident data; current cost estimate; Right-of-Way Data Sheets; Design Standard Decision Documents; and all information in accordance with current Caltrans and District requirements and procedures. In addition, the Consultant shall prepare Advance Planning Studies consisting of up to two alternative structure types. All alternatives shall provide the required minimum vertical clearance and thorough accommodation of truck operations. The Consultant shall prepare all structure-related design and submittals in accordance with Caltrans requirements.

The Consultant shall prepare required engineering studies to support the PR and the environmental document preparation including development of horizontal and vertical geometry, typical section, and cost. To support the engineering effort, the Consultant will study geology, conceptual bridge structure types, utilities, drainage, traffic capacity, traffic operations, truck operations, and traffic management, including partial or full closure of the interchange to facilitate construction.

The Consultant shall evaluate structure types and prepare up to two bridge architecture aesthetic renderings for build alternatives.

The Consultant shall prepare the Right-of-Way Data Sheets, along with supporting documentation to facilitate review. Data Sheets will include a detailed utility relocation estimate for affected facilities. Caltrans will review and approve the Right-of-Way Data Sheets along with any other right-of-way and survey-related deliverables.

2. Environmental Documentation

The Consultant shall prepare environmental documentation in accordance with State and Federal guidelines and procedures. The Consultant shall prepare Purpose and Need, and other required documents. The Consultant shall prepare all required technical reports and analyses to address, as appropriate, traffic (including interchange closure feasibility during construction), noise impacts, air quality, lighting, wetlands, floodplains, wildlife and plants, relocation impacts, historic and cultural resources, archaeological resources, paleontological resources, social and economic changes, park lands and recreational areas, farm lands, tribal consultation,

REQUEST FOR PROPOSAL FOR
 PROFESSIONAL CONSULTANT SERVICES
 PROJECT NO. 801 0064 70 77

hazardous waste, aerially deposited lead, geological, water quality, energy, and visual effects. The Consultant shall prepare all required technical reports to meet Caltrans' requirements for approval of the PA/ED phase. The Consultant shall identify permits, and shall coordinate with permitting agencies. Caltrans will make the final NEPA and CEQA determinations.

3. Surveying and Mapping

- a. The Consultant shall perform aerial photography surveys at PA/ED-level to conform to the Caltrans Surveys Manual. The Consultant shall perform aerial photography to cover all potential impacted intersections and interchanges. Consultant shall also provide an optional task for survey at design-level to the required accuracy for contours to perform the design, establish the limits of the new right-of-way, and locate all existing utilities and the future location of the relocated utilities. The Consultant shall confirm required survey accuracy with Caltrans. Caltrans will review and approve all survey-related work and deliverables.
- b. The Consultant shall provide base mapping suitable for the design of the project, in English units and in digital format. Horizontal datum will be verified with Caltrans. Consultant shall retain aerial photography in the event that the selected alternative requires additional base mapping during the course of PS&E.
- c. The Consultant shall provide cross-sections at a scale and frequency approved by Caltrans within the limits described. Topography shall include, but not be limited to, all features within the right-of-way. Topography shall extend a minimum of three hundred feet (300 foot) beyond the existing and future join points and curb returns at intersections.

4. Research of Record Information

- a. The Consultant shall perform all research of agency records, as necessary, to secure the information, clearances, and/or plan review services required to identify, locate, and accurately lay out all underground improvements and easements, centerline, right-of-way, and private property lines.
- b. The Consultant shall perform all research of private development plans adjacent to or affecting the project site, as necessary, to secure the information, clearances, and/or plan review services required to identify, locate, and accurately lay out all underground improvements and easements, centerline, right-of-way, and private property lines.
- c. The City will provide copies of available pertinent City records such as survey ties, benchmarks, and street plans that the City knowingly has in its possession.

REQUEST FOR PROPOSAL FOR
 PROFESSIONAL CONSULTANT SERVICES
 PROJECT NO. 801 0064 70 77

5. Existing Utilities Research and Potholing
 - a. The Consultant shall conduct existing utility research for all utilities within the project limits to identify, locate, and accurately lay out all underground improvements.
 - b. The Consultant shall provide preliminary notification letters to the utilities and request current information. The Consultant shall provide additional notification letters to the utilities and/or call utilities, as necessary, until a written response is received from the utility. The City will provide the required format in the current version of Microsoft Word for Windows. The Consultant is responsible to complete and mail the document, and provide the City with a copy. The City will be responsible for printing all letters on City letterhead.
 - c. The Consultant shall measure the height of the existing overhead utility lines for freeway, ramp, traffic signal, safety lighting, and street light vertical and horizontal clearances.
 - d. The Consultant shall positively locate all utilities in accordance with Caltrans' policy on High and Low Risk Utilities. The Consultant shall pothole all underground utilities to determine the depth for clearance and connection points or conflicts for any underground improvements such as gas lines, sewer lines, storm drains, aqueducts, or waterlines. The Consultant shall submit to each utility company a preliminary set of Plans that provide the location, elevation of the utility, and the elevation of the improvement with the conflict area clouded to show the utility companies the areas of conflict with the proposed improvement. The potholing information and plan shall be submitted to the City after completion of this task. If an area of possible conflict was not potholed, the Consultant shall pothole the area to verify no conflicts, at no additional cost to the City.

6. Geotechnical
 - a. The Consultant shall submit a geotechnical exploration plan for City and Caltrans review, reflecting location and type of boring. The Consultant shall identify owners and agencies from which right-of-entry permits are required, and shall submit a list to the City, with mailing addresses. The Consultant shall prepare and the City will mail right-of-entry letters. The Consultant shall evaluate whether appropriate environmental clearance is needed, and obtain if needed.
 - b. A qualified geotechnical engineer shall prepare a draft Geotechnical Design Report (GDR), preliminary Foundation Report, preliminary Materials Report, and preliminary Life Cycle Cost Analysis (LCCA). All reports shall be in accordance with Caltrans procedures, regulations, manuals, standards, policies, and format. The pavement structural sections shall be determined by a qualified Geotechnical

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

Engineer in accordance with Caltrans policies and procedures. Consultant shall identify known faults and evaluate risks, if any.

- c. The Consultant shall propose Traffic Indices (TI) for the auxiliary lanes, ramps, and freeway mainline, and obtain Caltrans approval.

A proposed TI of 12 shall be used for Redlands Boulevard per new City standard.

- d. It will be the responsibility of the Consultant to notify Underground Service Alert and provide traffic control.

7. GAD Approval

The Consultant shall prepare final GAD, including preliminary right-of-way requirements, and submit for City and Caltrans review. The Consultant shall conduct a GAD review meeting.

8. Project Management, Coordination, and Public Meeting

- a. Project Management and Coordination

The Consultant shall aggressively pursue project approvals, and provide proactive project management for the project, including: 1) management of the work, 2) coordination with the City, Caltrans, and all affected and involved agencies, 3) establishing schedule and budget conformance, 4) provide progress reporting, 5) completing other duties as required to obtain Caltrans approval, 6) conduct regular Project Development Team (PDT) meetings, 7) schedule and lead additional meetings, 8) coordinate with developers, utilities, and adjacent owners as directed by the City, and 9) prepare meeting agendas and minutes for all meetings. The minutes shall be distributed within five working days after the meeting to all attendees, and invitees, including the City's project manager. The minutes shall include, but not be limited to, a list of attendees with phone numbers and e-mail, a synopsis of discussion items, any pertinent information, the action items, and all follow-ups to the action items.

The Consultant shall monitor quality on all deliverables, calculations, and other work products. The Consultant shall prepare a Quality Control Plan for use during this phase of the project, and submit a copy to the City within thirty (30) calendar days of Notice-to-Proceed. This is not a separate task, but shall be included as part of project management.

- b. Public Meeting

The Consultant shall provide materials, prepare presentations, conduct public meetings, and prepare responses to comments for

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

- inclusion in the Final Environmental Document in compliance with Caltrans requirements.
- c. Project Schedule

The Consultant shall provide a digital version of the project schedule in Microsoft Project format and a hard copy. The project schedule shall be updated regularly and distributed during the PDT Meetings.

A MS Project Schedule shall be required in conformance with the Caltrans Work Breakdown Structure (WBS) for the project phases. The project schedule shall be divided into tasks and subtasks in detail including, but not limited to, City function timeline, Caltrans function timeline, and other outside sources such as agencies or utilities. Some of the tasks shall be, but are not limited to, major milestones, deliverables, critical path items, and stakeholder meetings.

V. CONSULTANT'S PROPOSAL AND COMPENSATION

Consultant's Proposal shall be no more than forty (25 pages, excluding a cover letter of up to two pages, dividers, and certificates. Proposal shall clearly segregate the scope, schedule, and DBE utilization for the bridge overcrossing and the landscaping contracts. Proposals failing to provide sufficient information and assurances of performance to accurately assess each category of the required services and failing to comply with requirements and conditions of the RFP will not be given further consideration. The Consultant's Proposal shall include the following:

- A. A statement that this Request for Proposal shall be incorporated in its entirety as a part of the Consultant's Proposal.
- B. A statement that this Request for Proposal and the Consultant's Proposal will jointly become part of the Agreement for Professional Consultant Services for this project when said Agreement is fully executed by the Consultant and the Mayor or City Manager of Moreno Valley.
- C. A statement that the Consultant's Services to be provided, and fees therefore, will be in accordance with the City's Request For Proposal except as otherwise specified in the Consultant's Proposal under the heading "ADDITIONS OR EXCEPTIONS TO THE CITY'S REQUEST FOR PROPOSAL."
- D. A single and separate section with the heading "ADDITIONS OR EXCEPTIONS TO THE CITY'S REQUEST FOR PROPOSAL" containing a complete and detailed description of all of the exceptions to the provisions and conditions of this Request for Proposal upon which the Consultant's Proposal is contingent and which shall take precedence over this Request for Proposal.
- E. A statement of qualifications applicable to this project including the names, qualifications and proposed duties of the Consultant's Staff to be assigned to this project; a listing of recent similar projects completed including the names, titles, addresses and telephone numbers of the appropriate persons whom the City could

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

contact. If one or more of the Consultant's staff should become unavailable, the Consultant may substitute other staff of at least equal competence only after prior written approval by the City.

- F. A resource allocation matrix must be submitted with the Proposal. The resource allocation matrix shall list detailed tasks in rows and the appropriate individual (Job Title Only) as well as the number of hours that these individuals will be working on each task listed, included in adjacent columns. The resource allocation matrix is required of both the primary consultant, as well as any sub-consultant. The resource allocation matrix, in addition to any tasks the consultant chooses to list, shall include but not limited to meetings, specific deliverables, and other relevant milestones.
- G. A statement of sub-consultant's qualifications (including relief personnel) applicable to this project, including the names, qualifications and proposed duties of the sub-consultant's staff to be assigned to this project; a listing of recent similar projects completed including the names, titles, addresses, and telephone numbers of the appropriate persons whom the City could contact.
- A statement that the Consultant acknowledges and understands that the consultant will not be allowed to change any sub-consultant without written permission from the City.**
- H. A statement that the Consultant will document and provide the results of the work to the satisfaction of the City. This may include preparation of field and final reports, or similar evidence of attainment of the Agreement objectives.
- I. A statement that the Consultant will immediately document and notify the City of any defects or hazardous conditions observed in the vicinity of the project site prior, during, or after the construction work.
- J. A copy of the Consultant's hourly rate schedule and a statement that said hourly rate schedule is part of the Consultant's Proposal for use in invoicing for progress payments and for extra work incurred that is not part of this Request for Proposal. **An itemized cost breakdown for the work described herein must be submitted in a separate sealed envelope as part of your Proposal submittal.** All extra work will require prior approval from the City. The City requests the consultant to provide in the proposal the number of hours on the job, in addition to the cost proposal. The Cost Proposal must be in a sealed envelope.
- K. A statement that the Consultant will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.
- L. A statement that all federal laws and regulations shall be adhered to notwithstanding any state or local laws and regulations. In a case of conflict between federal, state or local laws or regulations the strictest shall be adhered to.
- M. A statement that the Consultant shall allow all authorized federal, state, county, and City officials access to place of work, books, documents, papers, fiscal, payroll,

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

materials, and other relevant contract records pertinent to this special project. All relevant records shall be retained for at least three years.

- N. A statement that the Consultant shall comply with the Davis-Bacon Fair Labor Standards Act (40 USC 276-a through a-7), and the implementation regulations issued pursuant thereto (29 CFR Section 1, 5), any amendments thereof and the California Labor Code. Pursuant to the said regulations, entitled "Federal Labor Standards Provisions," Federal Prevailing Wage Decision" and State of California prevailing wage rates, respectively.
- O. A statement that the Consultant shall comply with the Copeland Anti-Kickback Act (18 USC 874) and the Implementation Regulation (29 CFR 3) issued pursuant thereto, and any amendments thereof.
- P. A statement that the Consultant offers and agrees to assign to the City all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 USC Sec. 15) or under the Cartwright Act (Chapter 2 [commencing with Section 16700] of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works or the subcontract. This assignment shall be made and become effective at the time the City tenders final payment to the Consultant, without further acknowledgment by the parties.
- Q. This solicitation and resultant Contract is not financed in whole or part with federal funds, but the City encourages Bidders to follow Title 49, Code of Federal Regulations, Part 26 (49 CFR 26) entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs." Bidders who obtain DBE participation on this Contract will assist the City in meeting its DBE goals for the Project.

DBEs and other small businesses are strongly encouraged to participate in the performance of this Contract. The City encourages Bidders to give DBEs and other small businesses the opportunity to participate in the performance of the Work that is the subject of this solicitation and to take all necessary and reasonable steps for this assurance. The Bidder shall not discriminate on the basis of race, color, national origin, sex, age, or physical or mental disability, sexual orientation or retaliation in the award and performance of subcontracts.

A Race Neutral program is one that, while benefiting DBEs, is not solely focused on DBE firms. A Race Neutral program utilizes measures that can assist a wide variety of small businesses, including DBEs, such as arranging solicitations, times for the presentation of proposals, quantities, specifications, and delivery schedules in ways that facilitate DBE and other small business participation (e.g., unbundling large contracts to make them more accessible to small businesses, requiring or encouraging prime contractors to subcontract portions of work that they might otherwise perform with their own forces). Race Neutral DBE participation includes: a DBE obtaining a prime contract through customary competitive procurement procedures; a DBE being awarded a subcontract on a prime contract, whether or not the prime contract has a DBE goal; and a DBE being awarded a subcontract from a prime contractor that did not consider its DBE status in making the award.

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

The Consultant is encouraged to include DBE firms in the proposal. Complete the forms listed in "Attachments" at the end of this RFP.

VI. GENERAL COMPLIANCE WITH LAWS AND WAGE RATES

- A. The Consultant shall be required to comply with all federal, state, and local laws and ordinances applicable to the work. This includes compliance with prevailing wage rates and their payment in accordance with California Labor Code, Section 1775.
- B. The Consultant is required to submit certified payrolls weekly. This applies to all applicable field personnel working on the project. In accordance with Section 1771.5 (b) (5) of the California Labor Code, the City will withhold payments when the payroll records are delinquent or inadequate.

VII. FEDERAL EMPLOYEE BENEFIT

No member of, or delegate to, the Congress of the United States, and no Resident Commissioner shall be admitted to any share or part of the Agreement to the said project or to any benefit to arise from the same.

The Consultant shall complete and include the "Certification for Contracts, Grants, Loans, and Cooperative Agreements" and "Disclosure of Lobbying Activities" forms with the Proposal.

VIII. PAYMENT TO CONSULTANT

- A. This work is to be performed for a "Not-to-Exceed Fixed Fee This method of payment is similar to the Cost per Unit Work, which is defined in Chapter 10 of the Caltrans Local Assistance and Procedures Manual, as follows: The Consultant is paid based on the work performed."
- B. The Consultant shall provide a "Project Fee Schedule" indicating the fee for individual tasks with a "Not-to-Exceed Fixed Fee" which shall be the sum of all tasks, by part, phase, and milestone and shall be submitted in a separate sealed envelope with cost proposal.
- C. Tasks shall include, but not be limited to, all Professional Consultant Services necessary to complete the work covered by this Proposal.
- D. The City will process invoices and pay the Consultant for the applicable work completed based on milestones achieved. These milestones are:
 - 1. Draft and Final Project Reports complete and approved by Caltrans.
 - 2. Design Standard Decision Document approved by Caltrans.
 - 3. Technical Studies approved by Caltrans.
 - 4. Public Hearings conducted.
 - 5. Draft Environmental Document circulated.
 - 6. Environmental Clearance (Notice of Determination) obtained.

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

7. GAD complete and approved by Caltrans.
 8. Mapping complete.
 9. Any other additional authorized work on a task successfully completed and accepted basis.
- E. Monthly progress payments may be submitted based on ongoing tasks performed as identified in the milestone schedule. Invoices will specifically identify job title, person-hours, and costs incurred by each task.
 - F. Reimbursement costs such as mileage, printing, telephone, photographs, postage and delivery, are to be included in the "Not-to-Exceed Fixed Fee."
 - G. All tasks including labor and reimbursable costs such as mileage, printing, telephone, photographs, postage, and delivery shall be supporting documentation presented at the time payment is requested.
 - H. The City will pay the Consultant for all acceptable services rendered in accordance with the "Agreement for Professional Consultant Services."
 - I. When the Consultant is performing, or is requested to perform, work beyond the scope of service in the "Agreement for Professional Consultant Services," an "Amendment to the Agreement" will be executed between the City and Consultant.
 - J. The Consultant shall receive no compensation for any re-work necessary as result of the Consultant's errors or oversight.
 - K. The Consultant shall include a reasonable assumption for salary cost escalation beyond the current year.
 - L. The Consultant shall provide Errors and Omissions Professional Insurance. Such coverage limits shall not be less than \$1,000,000 per claim and aggregate.
 - M. The Consultant shall have Insurance, Public Liability and Property Damage Insurance coverage for owned and non-owned automotive equipment, and Workers' Compensation Insurance in the amounts as will fully comply with the laws of the State of California, per City Standard Agreement.
 - N. A Certificate of Insurance or an appropriate binder shall bear an endorsement containing the following provisions:

"Solely as respect to services done by or on behalf of the named insured for the City of Moreno Valley, it is agreed that the City of Moreno Valley, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District, its officers, employees and agents are included as additional insured under this general liability policy and the coverage(s) provided shall be primary insurance and not contributing with any other insurance available to the City of Moreno Valley, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District, its officers and employees and agents, under any third

REQUEST FOR PROPOSAL FOR
 PROFESSIONAL CONSULTANT SERVICES
 PROJECT NO. 801 0064 70 77

party liability policy."

- O. Insurance companies providing insurance hereunder shall be rated (A minus: VII - Admitted) or better in Best's Insurance Rating Guide and shall be legally licensed and qualified to conduct insurance business in the State of California.
- P. The terms of the insurance policy or policies issued to provide the above insurance coverage shall not be amended to reduce the above required insurance limits and coverage's nor shall such policies be canceled by the carrier without thirty (30) days prior written notice by certified or registered mail of amendment or cancellation to the Agency, except that cancellation for non-payment of premium shall require ten (10) days prior written notice by certified or registered mail. In the event the said insurance is canceled, the Consultant shall, prior to the cancellation date, submit to the City Clerk new evidence of insurance in the amount established.

IX. INDEMNIFICATION - CITY WILL NOT ACCEPT ANY EXCEPTION TO THIS CLAUSE OF THE CONTRACT/AGREEMENT.

- A. To the maximum extent allowable by law, the Consultant, when functioning in the capacity of a design professional, agrees to indemnify, defend, and save the City, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD), their officers, agents and employees harmless from any and all liability, claims, demands, damages, or injuries to any person, including injury to the Consultant's employees and all claims that arise out of, pertain to, or relate to the negligence, recklessness or willful misconduct of the Consultant, its officers, agents or employees, or its subconsultant(s) or any person acting for the Consultant or under its control or direction; provided, however, that this indemnification and hold harmless shall not include claims arising from the negligence or willful misconduct of the City, MVHA and CDS, their officers, agents or employees.
- B. The consultant, when not functioning in the capacity of a design professional, agrees to indemnify, defend, and save the City, the Moreno Valley Housing Authority (MVHA), and the Moreno Valley Community Services District (CSD), their officers, agents and employees harmless from any and all liability, claims, demands, damages, or injuries to any person, including injury to the Consultant's employees and all claims which arise from or are connected with the negligent performance of or failure to perform the work or other obligations of the Consultant under this Agreement, or are caused or claim to be caused by the negligent acts of the Consultant, its officers, agents or employees, or its subconsultant(s) or any person acting for the Consultant or under its control or direction; provided, however, that this indemnification and hold harmless shall not include claims arising from the sole negligence or willful misconduct of the City, MVHA, and CSD, their officers, agents or employees.
- C. The City agrees to indemnify, defend and save the Consultant and their officers, agents and employees harmless from any and all liability, claims, damages or injuries to any person, including injury to the City's, MVHA's and CSD's employees and all claims which arise from or are connected with the negligent performance or failure to perform the services or other obligations of the City under this Agreement, or are caused or claim to be caused by the negligent acts of the City, MVHA and CSD, their officers, agents or employees, or its subcontractor(s) or any person acting

PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

for the City or under its control or direction; provided, however, that this indemnification and hold harmless shall not include any claims arising from the negligence or willful misconduct of the Consultant, its officers, agents or employees.

X. TERMINATION FOR CONVENIENCE OF THE CITY - CITY WILL NOT ACCEPT ANY EXCEPTION TO THIS CLAUSE OF THE CONTRACT/AGREEMENT.

The City reserves the right to terminate the "Agreement for Professional Consultant Services" for the "convenience of the City" at any time by giving ten (10) days written notice to the Consultant of such termination and specifying the effective date thereof. All finished or unfinished drawings, maps, documents, field notes and other materials produced and procured by the Consultant under the said aforementioned Agreement is, at the option of the City, City property and shall be delivered to the City by the Consultant within ten (10) working days from the date of such termination. The City will reimburse the Consultant for all acceptable work performed as set forth in the executed Agreement.

XI. INDEPENDENT CONTRACTOR

The Consultant's relationship to the City in the performance of the Consultant's services for this project is that of an independent Contractor. The personnel performing the said Services shall at all times be under the Consultant's exclusive direction and control and shall be employees of the Consultant and not employees of the City. The Consultant shall pay all wages, salaries and other amounts due his employees in connection with the performance of said work shall be responsible for all employee reports and obligations, including but not necessarily restricted to, social security, income tax withholding, unemployment compensation, and Workers' Compensation.

XII. CONTRACT

The Contract includes the Agreement for Professional Consultant Services, City's Request for Proposal, Consultant's Proposal, and Exhibits.

The Political Reform Act and the City's Conflict of Interest Code require that consultants be considered as potential filers of Statements of Economic Interest. Consultants, as defined by Section 18701, may be required to file an Economic Interest Statement (Form 700) within 30 days of signing a Consultant Agreement with the City, on an annual basis thereafter if the contract is still in place, and within 30 days of completion of the contract.

XIII. GENERAL CONDITIONS

- A. Pre-contractual expenses are defined as expenses incurred by the Consultant in: (1) preparing the Proposal; (2) submitting the Proposal to the City; (3) presentation during selection interview; (4) negotiating with the City any matter related to this Proposal; (5) any other expenses incurred by the Consultant prior to an executed Agreement.

The City shall not, in any event, be liable for any pre-contractual expenses incurred by the Consultant.

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

- B. The City reserves the right to withdraw this RFP at any time without prior notice. Further, the City makes no representations that any Agreement will be awarded to any Consultant responding to this RFP. The City expressly reserves the right to postpone reviewing the Proposal for its own convenience and to reject any and all Proposals responding to this RFP without indicating any reasons for such rejection(s).
- C. The City reserves the right to reject any or all Proposals submitted. Any Contract awarded for these Consultant engagements will be made to the Consultant who, in the opinion of the City, is best qualified.

XIV. Other Requirements

The following requirements are mandatory:

- A. The Agreement is subject to pre-award audit by Caltrans, which is estimated to take a minimum of thirty (30) calendar days from the time Caltrans receives the pre-award audit submittal. After the pre-award audit recommendations are received, the Consultant's Proposal shall be adjusted by the Contract Manager to conform to the audit recommendations. The Consultant agrees that any audit recommendations regarding the contract amount, the Consultant's Proposal, or individual items of cost may be incorporated into the contract at the State's sole discretion. Refusal by the Consultant to incorporate the audit recommendations will be considered a breach of contract terms and cause for termination of the contract or rejection for consideration of contract.
- B. The Consultant shall provide its complete name and address, including whether the Consultant is an individual, a partnership, or a corporation. The Consultant shall list the location of the office where the Consultant's work will be available for inspection by local agency and State representatives.
- C. This work is to be performed for a "Not-to-Exceed Fixed Fee." This method of payment is similar to the Cost per Unit Work, which is defined in Chapter 10 of the Caltrans Local Assistance and Procedures Manual, as follows: The Consultant is paid based on the work performed.
- D. The Consultant shall commence services upon written direction to proceed from the City. No charges are to be incurred prior to the Notice to Proceed.
- E. For the purpose of determining compliance with Public Contract Code 10115, et seq. and Title 21, California Code Regulations, Chapter 21, Section 2500et seq., when applicable or other matters connected with the performance of the contract pursuant to Government Code 8546.7; the Consultant and subcontractors shall maintain all books, documents, papers, accounting records, and other evidence pertaining to the performance of the contract. All parties shall make such materials available at their respective offices at all reasonable times during the contract period and for three years from the date of final payment under the contract. The State, the State Auditor, City, Federal Highway Administration, or any duly authorized representative of the federal government shall have access to any books, records, and documents of the Consultant that are pertinent to the contract for audit, examination, excerpts, and

REQUEST FOR PROPOSAL FOR
 PROFESSIONAL CONSULTANT SERVICES
 PROJECT NO. 801 0064 70 77

transactions, and copies thereof shall be furnished if requested. Subcontracts in excess of \$25,000 shall contain this provision.

- F. Cost Principles - Title 48 Code of Federal Regulations (CFR) Chapter 1, Part 31 and Uniform Administrative Requirements, Title 49 CFR, Part 18 are incorporated herein by reference. Any costs for which payment has been made to the Consultant that are determined by subsequent audit to be unallowable under 48 CFR, Federal Acquisition Regulations System, Chapter 1, Part 31 et seq. or 49 CFR, Part 18, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments, are subject to repayment by the Consultant to the City.
- G. The Consultant warrants that he/she has not employed or retained any company or person, other than a bona fide employee working for the Consultant, to solicit or secure this agreement, and that he/she has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift, or any other consideration, contingent upon or resulting from the award or formation of this agreement. For breach or violation of this warranty, the City shall have the right to annul this agreement without liability, or at its discretion to deduct from the agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift, or contingent fee. Consultant shall complete and return LAPM Exhibit 10-F, "Certification of Consultant, Commissions, and Fees," to City, prior to starting work.
- H. Subcontractors, Assignment and Transfer - Consultant services are considered to be a personal relationship between the City and the Consultant; therefore, subcontracting, assignment, or transfer of any of the work except as otherwise provided for in the executed agreement is expressly prohibited. All subcontracts exceeding \$25,000 in cost shall contain all required provisions of the prime contract.
- I. The responsible Consultant shall sign all plans, specifications, estimates, and engineering data furnished by Consultant and where appropriate, indicate his/her registration number.
- J. Conflict of Interest
1. The Consultant shall disclose any financial, business, or other relationship with City that may have an impact upon the outcome of this contract, or any ensuing City Construction project. The Consultant shall also list current clients who may have financial interest in the outcome of this Agreement, or any ensuing City construction project, which will follow.
 2. The Consultant hereby certifies that it does not now have, nor shall it acquire any financial or business interest that would conflict with the performance of services under this Agreement.
 3. Any subcontract in excess of \$25,000 entered into as a result of this Agreement, shall contain all of the provisions of this Agreement.

REQUEST FOR PROPOSAL FOR
 PROFESSIONAL CONSULTANT SERVICES
 PROJECT NO. 801 0064 70 77

4. The Consultant hereby certifies that neither the Consultant, its employees, nor any firm affiliated with the Consultant providing services on this project, prepared the Plans, Specifications, and Estimates for any construction project included within this contract. An affiliated firm is one, which is subject to the control of the same persons through joint-ownership, or otherwise.
5. The Consultant further certifies that neither Consultant, nor any firm affiliated with the Consultant, will bid on any construction subcontracts included within the construction contract. Additionally, Consultant certifies that no person working under this Agreement is also employed by the construction contractor for any project included within this agreement.
6. Except for subcontractors whose services are limited to materials testing, no subcontractor who is providing services on this Agreement shall have provided services on the design of any project within this contract.

Attachments (incorporated by reference):

Attachment 2	PSR-PDS – SR-60/Redland Blvd Interchange Improvements
Attachment 3	Traffic Engineering Performance Assessment (TEPA)
Attachment 4	City Standard Agreement (no changes to this agreement will be allowed)

XV. SELECTION CRITERIA

The Proposals will be rated/ranked according to the following criteria:

- A. The Firm’s General Experience and Qualification Information (20 points) – Information about the company (and all sub-consultants) including professional licenses held; ability to furnish required insurance and meet stipulations of the City’s “boiler plate” agreement; details about comparable projects completed by the firm, as well as local experience; and its ability to provide the required services.
- B. Experience of Key Personnel (40 points) – Background on key personnel (including all sub-consultants) qualifications, abilities, familiarity with state and federal procedures, local experience on comparable projects shown in Criteria Number 1 above, length of service with the firm, and reference information preferably with municipal agencies; and proven track record and depth of understanding/ knowledge of the proposed Professional Consultant Services for PA/ED phase for Caltrans oversight interchange project.
- C. Project Approach/Understanding (40 points) – A project approach that reassures the City that the Consultant will deliver this project on time and within budget because they have an excellent grasp of the issues associated with this specific project and can obtain the necessary approvals. Project approach will include a proposed schedule and understanding of project and scope of work. Discussion of major issues identified on the project and how Consultant team plans to address them; the management approach and organization necessary to complete the specific project; and outline of quality control measures to ensure delivery of a quality product on time

REQUEST FOR PROPOSAL FOR
PROFESSIONAL CONSULTANT SERVICES
PROJECT NO. 801 0064 70 77

and within budget.

Consultant may participate in a selection interview process, subsequence to review of the written proposal.

Upon identification of the topped ranked firm, the City will enter into negotiations for all services at a fair and reasonable cost. If negotiations with the topped ranked firm cannot be concluded at a fair and reasonable cost as determined by the City, the City will start negotiations with the second ranked firm and so on until finalized.

We are pleased to present the Transtech Team, a well experienced and seasoned Team with proven track record in similar project

1. Prime Consultant: Transtech Engineers, Inc. (www.transtech.org)
2. Sub-Consultant: Civil Works Engineers, Inc. (DBE Firm) (Civil Engineering) (www.civilworksengeers.com)
3. Sub-Consultant: LSA Associates, Inc. (Environmental) (www.lsa.net)
4. Sub-Consultant: Epic Land Solutions, Inc. (ROW and Utility) (www.epicland.com)
5. Sub-Consultant: The Altum Group (Surveying) (www.thealtumgroup.com)
6. Sub-Consultant: IDC Consulting Eng., Inc. (Structural Engineering) (DBE Firm) (www.idcconsultingengineersinc.wordpress.com)
7. Sub-Consultant: Leighton Consulting, Inc. (Geotechnical & Hazardous Waste) (www.leightongroup.com)
8. Sub-Consultant: Estrada Land Planning (Landscape Architecture) (DBE Firm) (www.estradalandplan.com)
9. Sub-Consultant: Value Management Strategies, Inc. (VA Studies) (www.vms-inc.com)

Our Team member firms have extensive experience in similar projects, including projects in Moreno Valley and with Caltrans District 8. Examples of projects representative of our team's similar experience include:

- Cactus Avenue and Nason Street Improvements and 135' Span Bridge Project. TRANSTECH).
- SR-210 Pepper Avenue New Interchange and Pepper Extension in Rialto. (Civil Works)
- SR-60 World Logistics Center Parkway Interchange Project in the City of Moreno Valley (LSA)
- SR 60 Redlands Boulevard Interchange Project in the City of Moreno Valley (LSA).
- Juan Bautista De Anza Multi-Use Trail Project - ROW and Utility Coordination Services for the City of Moreno Valley (EPIC)
- On-Call Surveying Services; ADA Cycle 6 Pedestrian Ramp Improvements Project Construction Staking (ALTUM)
- Geotech Services, Caltrans Distr 8/Moreno Valley/RCTD/RCTC, SR-60 World Logistics Cntr Pkwy I/C project (LEIGHTON)
- VA studies for Caltrans (VCA)

Also, our Project Manager, Ahmad Ansari, is very familiar with the City, as well as with this project, as he served as the City's PW Director/City Engineer from 2011 to 2017.

One of our unique qualifications is that we serve a number of public agencies as municipal contract service providers and serve as Contract City Engineer, City Traffic Engineer, CIP Manager, PW Director, Building Official, Construction Manager, Federally Funded Project Manager. We have a good understanding of public agency procedures, and policies, preparing staff reports, making presentations to City Council and public. We understand the importance of an effective public relations. We have managed large projects, which involved multiple agencies and jurisdictions. Our services are founded on the principals of **Total Quality Management for Total Customer Care and Satisfaction. We believe our team is well qualified to perform the services requested:**

- ✓ **A well experienced and seasoned Team with proven track record in similar projects**
- ✓ Experience with the City of Moreno Valley and Caltrans District 8.
- ✓ Our lead engineer has performed **41 projects at PA/ED phase** and has worked on Caltrans projects for 38 years.
- ✓ Prime Consultant (Transtech) is successfully providing **municipal services to approximately 50 agencies** for over 30 years.
- ✓ Proven track record in **on time** and **within budget** project delivery.
- ✓ Our **Multi-disciplinary** Team will provide all required services.
- ✓ Ability to **work collaboratively** with agencies, project applicants, and other stake holders, and **communicate effectively** with diverse audiences and stakeholders at public forums.
- ✓ Committed to producing a **high-quality work product and delivering a high level of customer care**
- ✓ We understand the importance of an **effective public relations and information program**, and have managed large projects, which involved multiple agencies and jurisdictions.
- ✓ **Understanding of public agencies procedures, and policies**, and extensive experience in preparing staff reports, and **presentations to City Council, Boards and public.**
- ✓ Commitment of **principal level management** throughout the contract duration.
- ✓ Well experienced **staff readily available** to commence with the services upon City's authorization

Thank you for the opportunity to submit this proposal. If you have any questions or need additional information, please contact us.

Respectfully submitted

Ahmad Ansari, PE, Principal

E: ahmad.ansari@transtech.org; C: 949.702.5612; O: 909.595.8599

Project Team Member Firms' Qualifications

Our project Team includes firms with extensive experience and proven track record in completing similar projects, including project in Moreno Valley and with Caltrans District 8. We are pleased to present the Transtech Team.

1. **Prime Consultant: Transtech Engineers, Inc. (TRANSTECH) (www.transtech.org)**. Established in 1989, Transtech is a multi-disciplinary engineering consulting firm. Our staff and resources include approximately 100 engineers, building officials, project manager: designers, plan checkers, inspectors, construction managers, traffic and transportation analysts, technicians, planners, and support personnel. Transtech is currently providing municipal services to approximately 50 agencies.
 - **Experience with the City of Moreno Valley:** Transtech provided construction management, resident engineer, inspection, and office engineer services for the Cactus Avenue and Nason Street Improvements and 135' Span Bridge Project. The project was managed in compliance with Caltrans LAPM. The project also received an award from the Construction Management Association of America for Construction Management Services.
 - **Experience with Caltrans:** We interact with Caltrans on many projects. Recently, we completed the Washington Blvd Widening, Reconstruction and Beautification project in the City of Commerce. At a total cost of \$50m, this project was one of the largest local projects in the region, included improvements to ramps at 710 and 5 Freeways, and required close coordination with Caltrans. Transtech served as the Program and Project Manager, Construction Manager Inspector, Resident Engineer, Federal Fund Manager.
2. **Sub-Consultant: Civil Works Engineers, Inc. (DBE Firm) (Civil Engineering) (www.civilworksenineers.com)**. Civil Works Engineers, Inc. (CWE) is a professional civil engineering consulting firm specializing in four areas of planning and design: transportation engineering, traffic engineering design, drainage engineering and civil site improvements. CWE has extensive Caltrans experience.
 - **SR-210 Pepper Avenue New Interchange and Pepper Avenue Extension PA/ED and PS&E:** Civil Works Engineers prepared the planning and design for a new interchange on SR-210 at Pepper Avenue. As prime consultant, responsibilities include preparation of a combine PSR/PR, an environmental document, and PS&E for a new interchange on SR-210 and extension of Pepper Avenue.
 - **I-15 Cajalco Road Interchange Reconstruction PS&E:** Prepared a Storm Water Data Report, the Bedford Wash Bridge Hydraulics Report hydrology and hydraulic studies, drainage report, drainage PS&E, and responses to City and Caltrans District 8 comments. Our plan included 36 sheets including the drainage plan, profiles, details, and quantities.
 - **Southbound I-605 Beverly Blvd Interchange Reconstruction PA/ED and PS&E:** As prime consultant, prepared a Project Report and PS&E for an interchange reconfiguration. CWE plan sheets include title, typical sections, layout, profiles, construction details, drainage plan profiles, details, water pollution control, quantities, sound wall, and retaining wall. The PA/ED was completed in March 2020 and 9 PS&E is currently underway.
 - **Project Management for I-10 Riverside Avenue Interchange PS&E:** Provided project management services for SBCTA for this \$34 million interchange reconstruction of the existing diamond interchange. The existing overcrossing structure was replaced with an aesthetic configuration resembling the ancient Rialto structure and all four ramps were reconstructed.
3. **Sub-Consultant: LSA Associates, Inc. (Environmental) (www.lsa.net)**. LSA is a diversified environmental, transportation, and community planning firm designed to meet the need for environmental evaluation related to the California Environmental Quality Act (CEQA). LSA has completed several similar projects, including projects in Moreno Valley.
 - **SR-60 World Logistics Center Parkway Interchange Project:** Project involved interchange reconstruction to correct existing geometric deficiencies, increase capacity, and improve operations. Improvements included removal and replacement of the overcrossing, auxiliary lanes, and new entrance and exit ramps.
 - **SR-60 Redlands Blvd Interchange PEAR:** Prepared the PEAR in support of interchange reconstruction.
4. **Sub-Consultant: Epic Land Solutions, Inc. (ROW and Utility) (www.epicland.com)** Epic Land Solutions is a full-service right of way and real property consulting firm and they represent public agencies, utilities, engineering firms, and construction authorities. The firm also worked on projects in Moreno Valley.
 - **Juan Bautista De Anza Multi-Use Trail project:** Performed right of way cost estimation and preliminary utility research and relocation coordination. EPIC identified utility owners, obtained as-builts plans from utility owners and prepared map exhibits in a GIS and lists of Assessor's Parcel Numbers of properties impacted.
5. **Sub-Consultant: The Altum Group (Surveying) (www.thealtumgroup.com)**. The Altum Group is a multi-disciplinary consulting firm offering expertise in surveying and geographical information systems. Altum has provided services on several projects in Moreno Valley.
 - **On-Call Surveying Services:** ADA Cycle 6 Pedestrian Ramp Improvements Project Construction Staking; Woodland Park Pedestrian Hybrid Beacon Program Construction Staking.

6. **Sub-Consultant: IDC Consulting Eng, Inc. (Structural Eng) (DBE Firm) (www.idcconsultingengineersinc.wordpress.com)**. IDC Consulting Engineers, Inc. is a professional transportation engineering firm that designs and manages multi-modal facility and infrastructure projects. IDC specializes in engineering complex structures and supporting the full management and delivery of transportation projects. IDC has similar projects:
- **Pennsylvania Avenue Grade Separation**, City of Beaumont: PA/ED and PS&E services to construct a grade separation that will lower Pennsylvania Avenue under the existing Union Pacific Railroad mainline tracks.
7. **Sub-Consultant: Leighton Consulting, Inc. (Geotechnical Engineering & Hazardous Waste) (www.leightongroup.com)**. Leighton is an engineering firm with 60 years of providing geotechnical, environmental, and materials testing and inspection services to public/municipal agencies, and transportation agencies throughout southern California. From freeway widenings and interchange improvements to commuter rail extensions to new pedestrian walkways and bikeways, Leighton has a strong reputation in providing geotechnical and environmental services in support of planning and design of major transportation projects.
- Under Caltrans District 8, City of Moreno Valley, RCTD, and RCTC, contributed to **more than 20 highway projects in support of the PA/E phase**, including the SR-60 World Logistics Center Parkway interchange project.
8. **Sub-Consultant: Estrada Land Planning (Landscape Architecture) (DBE Firm) (www.estradalandplan.com)**. Estrada Land Planning is a landscape architecture firm that designs places that are fun, creative, sustainable, ecologically sound, cost effective and responsive to the clients' needs. Estrada has completed similar projects:
- SR-78 Urban Design Plan; I-5/Lomas Santa Fe Interchange Landscape Construction Documents; SR 78 Corridor Enhancement (Highway Planting)
9. **Sub-Consultant: Value Management Strategies, Inc. (VA Studies) (www.vms-inc.com)**. Value Management Strategies, Inc. (VMS) is a California small business consulting firm specializing in Value Analysis (VA) services.
- VMS routinely facilitates VA studies for Caltrans, works with Caltrans' major transportation partners at the city, county, and RTPA/MP level, and routinely performs VA studies for projects involving the state highway system and local roadway infrastructure. Some of these projects include bridge replacement, reconstruction, widening, and realignment to improve traffic operations, enhance safety and ride quality, and accommodate the public.

Project Understanding

The City issued an RFP for consulting services to complete the PA/ED Phase, including Project Approval (PA), Geometric Approval Drawings (GAD), and a Final Environmental Document (FED) for the State Route 60 (SR 60) at Redlands Boulevard Interchange ("Project"). The Project Study Report-Project Development Support (PSR-PDS) was approved by Caltrans in 2016.

A large component to a successful project is having the knowledge, understanding, and experience of the processes required. Being the project is on the state highway system, the Caltrans three-phase project development process must be followed. Our Team has an extensive background in preparing documents for all three phases of Caltrans' project development process for freeway improvement projects. We understand Caltrans standards, their project development process, and can readily identify Caltrans' and the locals' concerns. The three phases are:

Phase 1 Conceptual Development (Project Initiation Document)

Phase 2 Environmental Clearance (Draft Project Report, Environmental Document, Project Report)

Phase 3 Construction Documents (Plans, Specifications, & Estimates) and Bid Package

The first phase, the PSR-PDR is complete. The PSR-PDS identified a no build alternative and three build alternatives and provided scope approval. The next phase is the preparation of the Project Approval/Environmental Document (PA/ED) which will provide a preferred alternative, project approval, and environmental clearance such that the third phase of the project development process, the Plans, Specifications and Estimates (PS&E) can begin. Following PS&E, construction can begin.

The SR-60/Redlands Boulevard interchange was constructed in 1964 and consists of an overcrossing with eastbound and westbound entrance and exit ramps. Both ramp intersections are signalized. The entrance ramps are not metered. The Redlands Boulevard overcrossing (PM 20.37, Bridge Number 56-0487) has four spans, with precast girders that are simply supported by two-column bents and open-ended diaphragm abutments on Cast in Drilled Hole (CIDH) piles. The bridge is approximately 236 feet long, 34 feet wide, and spans four through lanes and both entrance ramps on SR- 60 and has non-standard vertical clearance.

The purpose of the project is to alleviate congestion, enhance freeway access and regional goods movement, provide increased interchange capacity, improve traffic operations to support the forecast travel demand for the 2045 design year; improve existing interchange geometric including bridge clearance to meet Caltrans standards; and accommodate a multimodal facility that has harmony with the community and preserves the value of the area.

The proposed project includes: 1) ramp reconfiguration, 2) Redlands Blvd widening, 3) overcrossing replacement, 4) Spruce Street realignment, 5) provision for California Highway Patrol (CHP) enforcement areas, 6) ramp metering, 7) provisions for truck operations, 8) utility relocations, 9) landscaping and irrigation, and 10) related improvements as required by the City and Caltrans.

With this Project Approach we demonstrate to the City of Moreno Valley our project understanding, the project issues, and our knowledge of successfully preparing Caltrans' project development process requirements. We have developed the following Project objectives:

1. **Prepare Project Report to Identify All Design Concerns for Subsequent PS&E**
2. **Prepare Defensible Environmental Documentation**
3. **Ensure Appropriate Processes and Criteria are Utilized Throughout PA/ED**

The Preliminary Environmental Analysis Report (PEAR) identified the level of environmental clearance of the Project under both CEQA and NEPA to be an Initial Study/ Environmental Assessment (IS/EA) leading to an MND/FONSI. Due to recent Caltrans guidance updates related to greenhouse gas emissions and based on the team's recent experience with how this guidance was applied to the SR-60/World Logistics Center Parkway interchange project, however, we anticipate the Project level of environmental clearance to be an Environmental Impact Report/Environmental Assessment (EIR/EA) leading to an EIR/FONSI. This is because although the Project would improve traffic operations and reduce greenhouse gas emissions compared to the No Build Alternative, it would not reduce greenhouse gas emissions compared to the existing condition and therefore, would not contribute to achieving statewide greenhouse gas emissions reduction goals. The greenhouse gas emissions impact would be potentially significant and unavoidable under CEQA for all the Build Alternatives triggering the need for an EIR to comply with CEQA.

Key Concerns

Type of PA Document

Because the Phase 1 document is nearing 5 years old, Caltrans may request the PSR-PDS be updated. At this time, we do not know precisely what Caltrans will require. We have assumed Caltrans will accept the previously prepared PID since it is within the 5-year limit. The Project Report process essentially updates everything prepared during the PID phase and goes into more detail and as such, preparing another PID would result in unnecessary costs and schedule delays. If Caltrans does want the PID document updated, a potential option resulting in essentially the same level of effort as preparation of a PR would be to assume the Project Study Report-Project Report (PSR-PR) process can be used. It can be used for a project funded by others (not the state) when the project is non-complex and costs more than \$1 million and cannot be used if the project is a new or modified interstate access or requires approval of a route adoption by CTC. The format generally follows that of a Project Report and includes the same types and level of information. This document would satisfy the Phase 1 and Phase 2 project development. If using the previously prepared PSR-PDS document or the PSR-PR option is not viable to Caltrans, we will need further discussions. For proposal purposes, we assume a PSR update is unnecessary and that either the PR or PSR-PR process will be used.

SR-60 Redlands Boulevard Interchange FTIP Description

The PSR-PDS provides the FTIP description which indicates the on- and off-ramps are to be two lanes at the merge/diverge with the freeway and four lanes (3 SOV, 1 HOV) at Redlands. According to the Caltrans HDM, 1,000-foot-long auxiliary lanes are needed when ramp volumes exceed 1,500 vehicles per hour (vph). It also states that when volumes exceed 1,500 vph, a two-lane exit ramp should be provided and that two-lane entrance ramps are to be discouraged and must be consulted with the District Traffic Engineer. According to the TEPA prepared during the PSR-PDS, volumes in year 2045 are as follows (am/pm):

WB On-Ramp	380 / 410	EB On-Ramp	490 / 1,460
WB Off-Ramp	910 / 650	EB Off-Ramp	260 / 510

Given these volumes, only the eastbound on-ramp would require a two lane on-ramp and auxiliary lane and as such, it would need to be conceptually approved by the District. The Traffic Study prepared for the PR may yield different volumes which would have to be examined with respect to the interchange geometrics required, but this indicates the need to coordinate the proposed geometrics with the traffic operations. It should also be pointed out that the concept plans as included in the PSR-PDS do not show the four-lane sections of the ramps at the Redlands approach or auxiliary lanes on the freeway. The text of the report also states improvements on the freeway east and west of the interchange would extend 1,800 feet which disagrees with the FTIP.

Ongoing Roadway Construction on Redlands Boulevard Near Skechers

A roundabout construction is underway on Redlands south of the freeway. This intersection will be located between the existing EB ramps and Redlands /Eucalyptus intersections. Caltrans boldface standard requires 500' intersection spacing and underline standard requires 400' from curb return to curb return. We will need to examine the design plans for this intersection to ensure the proposed new EB ramps intersection location has adequate spacing to meet Caltrans design requirements without becoming a design exception for which approval is needed.

Multimodal Corridor

The PSR-PDS document identifies one purpose of the project is to accommodate a multimodal facility. It also identifies equestrian facilities as a recommended design features and the typical sections indicate an 11-foot-wide multi-use trail separate from the 8-foot sidewalk on the west side of Redlands. Separately, the typical section also identifies an 8-foot bike lane/shoulder on each side. No sidewalk or trail is shown on the east side. We will need to discuss with the City the intentions of multimodal corridor and whether it includes all or some of these uses: motorized vehicles, bicyclists, pedestrians, and horses. It is a significant expense to have a separate trail across the bridge to accommodate horses separated by only a barrier with screening from the sidewalk and roadway. Since horses do not always fare well adjacent to traffic, this needs to be vetted early in the process to determine the City's intention. It is also somewhat unusual to provide sidewalk on only one side of the bridge.

EMWD New Sewer Line

The PSR-PDS states that EMWD is planning to construct a new sewer line within the vicinity of the Project. As such, coordination with EMWD will be needed so that it can best be accommodated. To obtain gravity flow the sewer would likely need to be jacked

Attachment: Agreement with Transtech Engineers, Inc (5472 : AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO

under the freeway rather than being within the overcrossing. We need to identify the preferred sewer alignment to ensure the future roadway slopes and pavement would not hinder maintenance access to the sewer.

Utility Potholing & Surveying of Existing Overhead Utilities

The RFP identifies positive location of existing utilities in accordance with Caltrans policy. We suggest this be deferred in the PA/ED process until such time that the preferred alternative has been selected and the utility impacts can be identified. Otherwise, there may be added costs for potholing of facilities that would not ultimately be involved in the Project.

Similarly, the RFP’s request to survey the existing overhead facilities (utility lines, signal, lighting) should be deferred until the preferred alternative is selected and the best locations of these measurements can be ascertained.

Environmental Revisions Through Workshops

A key issue is the environmental documentation processing. This will be addressed through three specific approaches. First, we will meet with Caltrans prior to the initiation of the technical studies to ensure all issues and areas are clearly outlined at the outset of the project to help streamline the agency review process and minimize schedule impacts. Second, we will work with the City and Caltrans to develop an agreement whereby concurrent reviews will be conducted by the two agencies. Third, we will work to forge an agreement early with Caltrans, with the approval of the City, to address document revisions through workshops. In the workshops the LSA document preparers and the City and Caltrans commenters will be in one room, either at Caltrans’ offices or in a virtual meeting room if COVID-19 safety protocols are still in effect. A projector will be setup and each technical study will be projected on the screen. The team will go through each report and make the necessary revisions as a group during the workshop. This process reduces the review/revision cycle significantly as all revisions are made to the satisfaction of each reviewer in real time and technical issues can be resolved as a team. This approach eliminates several months of review and revision time compared to the standard submittal/review/revision process and eliminates potential misunderstandings.

Project Approach / Scope of Work

Project Development Steps

After confirming the process, we will set forth on the Project Approval / Environmental Document through development of the PR or PSR-PR and environmental document. Caltrans Work Breakdown Structure (WBS) codes for Phase 2 are:

- WBS 160 – Engineering Studies, GAD, and Draft Project Report Related Tasks
- WBS 165 – Environmental Studies and Draft Environmental Document
- WBS 170 – Permits
- WBS 175 - Circulate Draft Environmental Studies and Select Preferred Alternative
- WBS 180 - Final Project Report and Final Environmental Document

For the above WBS codes, we have identified the project tasks as follows:

- | | | | |
|----------|--|----------|--|
| Task 1. | Project Management, Quality Control | Task 13. | Preliminary Materials Report |
| Task 2. | Data Collection | Task 14. | Preliminary Geotechnical Design Report |
| Task 3. | Survey, Aerial Mapping | Task 15. | Preliminary Foundation Report |
| Task 4. | Traffic Study and Analysis | Task 16. | Initial Site Assessment, Site Investigation |
| Task 5. | Intersection Control Evaluation | Task 17. | Life Cycle Cost Analysis |
| Task 6. | Utility Research, Identification of Conflicts, and Potholing | Task 18. | Landscape Concept Plan |
| Task 7. | Right-of-Way and Utility Studies (Right of Way Data Sheet) | Task 19. | Conceptual Drainage Study |
| Task 8. | Alternatives Analysis, Geometrics, Design Standard Decision Document | Task 20. | Water Quality Management Program |
| Task 9. | Construction Staging, Traffic Handling Concepts | Task 21. | Storm Water Data Report |
| Task 10. | Fiber Optics and ITS Concept | Task 22. | Location Hydraulic Study, Summary Floodplain Encroachment Report |
| Task 11. | Transportation Management Plan Data sheet | Task 23. | Advanced Planning Studies |
| Task 12. | Value Analysis Study | Task 24. | Cost Estimates |
| | | Task 25. | Draft Project Report |
| | | Task 26. | Environmental Documentation |
| | | Task 27. | Project Report |

Attachment: Agreement with Transtech Engineers, Inc (5472 : AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO

Task 1 Project Management, Quality Control

The common element of successful projects is strong project management. From project inception through completion, clients need to rest assured their consultant's project manager and management team will drive the schedule, effectively manage project costs, anticipate problems before they occur and respond promptly to issues as they arise during the course of their project. Transtech provides a thorough project management plan with demonstrated success on previous assignments and the right project manager and project team to deliver the SR-60 Redlands Boulevard interchange project. The TT team is led by Mr. Ahmad Ansari and is supported by two discipline leads (Marie Marston and Rob McCann) who are highly proficient and experienced in the development of planning documents for freeway interchange projects working with Caltrans and local agencies. Our Team is focused on providing service and our assigned leads have built a reputation for outstanding and innovative planning and design for highway improvements.

Schedule Control

A critical path method (CPM) schedule with discrete tasks and deliverables will be prepared. We will produce a schedule showing the tasks and durations and logic required to fulfill the Project. The schedule will be tracked based on the WBS tasks. We will utilize Microsoft Project as the scheduling software. Updates will be made to the schedule as the project progresses. Upon holding the kickoff meeting, we will discuss the schedule to ensure that all parties, including the reviewing entities, can meet the time frames for their components of the work as defined. The schedule will show the critical path and appropriate milestones. Once the project schedule is agreed upon, we will work to meet it. We can utilize the schedule to ascertain our progress at any given point during the project. Upon the realization of a project delay for any reason, we will need to examine the schedule and constraints to identify what means can be taken to ensure the project remains on track with the programming.

Document Control

We will manage project documents such that information is properly retained and shared among the members of our team as well as with Caltrans and the City. We can also maintain a document log indicating key points in each documents' life cycle such as dates of preparation, submittals, reviews/comments, resubmittals, etc.

Cost Control

The consultant fee is established with the project tasks and the appropriate personnel and hours. We can monitor our internal costs on a weekly basis, if necessary. As such, we can make staffing changes as necessary to adjust the resources being utilized versus the effort required. On a monthly basis, we will summarize the expenditures in the invoice along with a progress report if the City desires. At that time, the percent of the project completed will be compared to the percent expended. Our Project Manager will review the project costs regularly which will indicate the time and charges spent per task to validate the cost reported in the WBS report. He will also review the monthly progress report according to the roll-up of the weekly labor and cost report, and the work in progress and percent complete. We will submit a monthly progress report that contains a narrative of work progress achieved by task during the reporting period, work planned for the next period, problems encountered, solutions achieved, outstanding issues, and financial reporting on budget and anticipated cost to complete.

Quality Control

The key to our QA/QC procedure is that it is implemented throughout the life of a project, not simply before a final submittal. Our Team will accept responsibility for the integrity and accuracy and completeness of all documents prepared. Our QC plan will include checking the documents for agency requirements. The QC plan will include methods to review initial documents including concept plans, calculations, cost estimates, and reports. The review will compare the documents to the appropriate outline or format in the Caltrans' or other pertinent manuals. Before submittal, the project manager will approve the documents and ensure the QC has been performed.

The produced documents will be of a quality acceptable for approval. The QC Program will be in effect throughout the entire contract to ensure the documents conform to engineering industry standards. Our quality control plan includes measures to independently check and back-check documents, distributes correspondence to those involved and then places them in an archive file. All comments we receive from the agencies review of the draft documents will be addressed and incorporated into the final documents as appropriate. The submitted documents will be checked and initialed by the original designer and the checker.

Our review includes:

- **Internal Review** – Review by internal independent staff.
- **Inter-Disciplinary Review** – Managers of each applicable discipline will review the plans, design and/or reports.

- **Coordination Review** – The project manager, discipline managers and subconsultants review the plans, specifications and reports for proper coordination, accuracy, and submittal standards.
- **Submittal Review** – An independent review of the plans, specifications and reports will be completed by the QA/QC manager prior to submittal to City and Caltrans.

Project Contact List

Our project manager, Ahmad Ansari, will be the primary point of contact. To facilitate communication, we will develop a “list” of project stakeholders. A project contact list of the PDT members will be developed and distributed. These lists will be customized for internal and external use as appropriate.

Meetings

We will schedule monthly Project Development Team (PDT) meetings at a minimum as needed. The purpose of the meetings would be to discuss progress, general and specific project issues, exchange information, resolve issues, receive guidance and direction, review the project schedule, and facilitate coordination. We will prepare agendas in advance of the meetings and following the meeting we will prepare meeting minutes. We have found close team coordination and regular meetings facilitate the required communication.

Task 2 Data Collection

We will collect data as required for the preparation of the Project Report and Environmental Document. We will coordinate with Caltrans and the City to gather existing documents related to the Project. This will include street and freeway as-builts, survey control information, right of way maps, previously prepared documents, traffic information, drainage information, etc. We will also perform a field review to take photos and document existing conditions within and adjacent to existing state right of way, particularly those areas which will likely be involved with the proposed improvement plans. Surface features from the aerial mapping will be verified.

Task 3 Survey, Aerial Mapping

Altum will provide 1"=40' scale aerial mapping for the project site to conform with the Caltrans Surveys Manual. Said mapping will have 1' contours and 0.1' spot elevations. The digital aerial topography will be accurate so that 90% of all contours will be within half the contour interval and the spot elevations will be within one-quarter the contour interval. The horizontal accuracy of 90% of planimetric features shall be better than 1/30th of an inch at the mapping scale. The task includes providing the required office support, setting control, and the aerial premarks.

Additional field and office time is needed to supplement the aerial and provide more detailed “tie-in” information. We will locate and tie into a local benchmark for vertical control, cross-section the site per Caltrans standards, providing sufficient ground shots of surrounding topography for the base map. Additional information may include, but is not limited to, edge of pavement/curb and sidewalk elevations, location of above ground utilities, and other features which are directly adjacent to the project site. The topographic map will extend a minimum of 300 feet beyond the existing and future join points and curb returns at intersections. We will prepare a digital topography file (AutoCAD format) which includes the site with overlap, including adjacent street frontage.

Research of Record Information

Altum will perform a records search with the applicable governing agencies for right-of-way and record map information and review an open and current preliminary title report and all exceptions (to be provided by others) in preparation of a digital paper boundary. The digital base file will include a boundary created from record documents only and does not include the field location of existing monuments, along with plotted easements of record.

Existing Utilities Research and Potholing (Surveying Only)

Altum will provide surveying support services as needed. This includes locating and measuring all visible above ground utilities (horizontal and vertical) identified during the field cross section work and within the same limits. Vertical includes the height of existing overhead utility lines for freeway, ramp, traffic signal, safety lighting, and street light vertical and horizontal clearances. This also includes surveying of potholes.

Task 4 Traffic Study and Analysis

The Traffic Study Report (TSR) will be prepared based on discussion with City staff and will meet the requirements for disclosure of project impacts pursuant to CEQA. The TSR will be prepared consistent with Caltrans *Transportation Analysis Framework* (TAF)

and *Transportation Analysis under CEQA (TAC)* guidelines for transportation analysis as well as the City's *Traffic Impact Analysis Preparation Guide for Vehicles Miles Traveled and Level of Service Assessment*, dated June 2020.

The TSR will evaluate existing traffic conditions, opening year conditions, and design year conditions for all project alternatives. The analysis will be prepared for review and approval by the City and Caltrans and will examine traffic operations under the following analysis scenarios:

- Existing conditions
- Opening Year No Build Alternative conditions
- Opening Year with Build Alternative conditions (Three Build Alternatives and up to three design variations)
- Design Year No Build Alternative conditions
- Design Year with Build Alternative conditions (Three Build Alternatives and up to three design variations)

Based on the approved PSR-PDS, the has design exception features per the Caltrans HDM. Based on the Caltrans' *Design Information Bulletin Number 77 (DIB 77)*, dated January 1995, the TSR will need to examine traffic and operational analyses for the proposed interchange improvements, as well as the adjacent interchanges since the existing Redlands Boulevard interchange has design exceptions. Therefore, a freeway analysis will be conducted at the proposed interchange and the adjacent interchanges at Moreno Beach Drive and Theodore Street. The freeway analysis will examine the mainline segments along the SR-60 corridor from the Moreno Beach Drive interchange to the Theodore Street interchange. Additionally, the analysis will include evaluation of the ramp merge/diverge areas without and with the proposed interchange improvements. Additionally, 13 study intersections affected due to the Project need to be evaluated to demonstrate adequacy in intersection capacity. The TSR will also examine collision data along the SR-60 corridor within the study area using recent collision data from the Caltrans Traffic Accident Surveillance and Analysis System (TASAS). The Riverside County Model (RIVCOM) will be utilized for developing opening year and design year traffic volumes. The TSR will also include a ramp metering analysis for the build alternatives and a Vehicle Miles Traveled (VMT) analysis in accordance with TAC and TAF. Both the anticipated RIVCOM Future Year and Project Design Year are same (2045). Therefore, the VMT under Future Build Conditions for each alternative will be compared to the VMT under Future No-Build Conditions to estimate the VMT attributable to the project. The region for VMT estimation purposes will be decided based on discussion with the City staff and Caltrans.

Deliverables: Traffic Volume Report, Traffic Study Report

LSA will prepare an Interchange and Ramp Closure Study (IRCS) Report as a supplemental document to the TSR. The IRCS will examine the conditions associated with the interchange and ramp closures associated with construction and improvements of the Redlands Boulevard interchange. It is estimated the traffic at the Redlands Boulevard interchange will be rerouted to the two adjacent interchanges along SR-60 during construction. Therefore, LSA will evaluate the intersections adjacent to these interchanges, along with the intersections adjacent to the Redlands Boulevard interchange for the effect of traffic re-routing. As such, it is estimated that approximately twelve intersections will be evaluated as part of this study. LSA will prepare the IRCS summarizing all the topics previously covered.

Deliverable: Interchange and Ramp Closure Study Report

Task 5 Intersection Control Evaluation

Intersection Control Evaluation (ICE) is a data-driven, performance-based framework and approach used to determine the addition, expansion, or full control of major intersections (including interchange ramp termini). For purposes of this Project, the ICE methodology will be used to evaluate three different design variations (roundabout, single-point urban interchange, and diverging diamond interchange, pictured below) for the proposed interchange improvements and to determine the feasibility of each design variation as it applies to each Build Alternative. LSA will prepare an ICE Memorandum (Memo) summarizing the operational impacts of all three interchange configuration alternatives. The Memo will be submitted to City and Caltrans staff for review. This scope and budget includes one round of revision to the Memo to respond to City and Caltrans comments.

Deliverable: Intersection Control Evaluation Memorandum**Task 6 Utility Research, Identification of Conflicts, and Potholing**

The goal of the utility task is to determine the existing facilities size, type and location, prior rights and liabilities, identify potentially prohibitive utility facility relocations, and coordinate the utility clearance process for on-time project certification. Seven utility owners have been identified within the project limits by preliminary conflict exhibits, DigAlert, and field observation:

- | | |
|---------------------------------------|------------------|
| 1. Eastern Municipal Water District | 5. Spectrum |
| 2. MCI (Verizon Business) | 6. SCE- District |
| 3. City of Moreno Valley – Electric | 7. Frontier |
| 4. Southern California Gas – District | |

At the Notice to Proceed, EPIC will start early identification and verification of utilities in the project area and will obtain confirmation from the utility owners. To identify all utility locations in the project area, EPIC will prepare and mail utility verification requests to utility owners and follow-up letters requesting current information on any existing facilities. Epic will also request information from utility companies on upcoming projects within the project limits.

Upon receipt of utility as-builts, Civil Works will add them to the Project basemap to create utility sheets. When the alternatives are developed, Civil Works will determine conflicts the proposed improvements have upon the existing utilities. A utility conflict matrix will be prepared such that Epic can make determinations about liability for the protection/relocation costs and prepare the Utility Information Sheet and utility cost estimate. Civil Works will prepare the concept U sheets. As part of the mapping and determination of conflicts, Civil Works will prepare a pothole location map for the preferred alternative.

EPIC will coordinate the potholing services to determine positive horizontal and vertical locations of underground utility facilities in accordance with Caltrans' High and Low Risk Policies and Procedures. EPIC will draft and send the notification letters to each utility company affected. EPIC will work with the project team engineers, contractor, and utility companies to perform potholing to verify underground utilities. EPIC, with the help of design, will have the contractor pothole all identified underground utilities that may be affected by the proposed alignment and/or proposed utility construction. EPIC's positive utility identification firm will hold certification authorizing the firm to perform work in the public right-of-way and provide all required traffic control and surface repair necessary for potholing work. The contractor would also need to obtain a Caltrans encroachment permit to perform the work. Following the completion of the potholing, Civil Works will add the information on the U sheets. For purposes of this proposal, we have assumed 8 potholes would be needed however, the actual number could vary. This cannot be determined with certainty at this proposal time and would need to be re-evaluated later during the actual work.

Deliverable: Utility Matrix, Utility Base Map, Conflict Matrix, Concept U Sheets, Utility Potholing Records

Task 7 Right-of-Way and Utility Studies (Right of Way Data Sheet)

EPIC will review the right of way impacts identified in the PSR-PDS including the Conceptual Cost Estimate – Right of Way Component to confirm impacts identified at that phase. Additionally, EPIC will provide updated information about existing conditions including ownership, land use, tenants, and existing encumbrances on affected properties. Epic will work with the design team to evaluate potential right of way impacts based on the Project geometrics. Providing feedback on potential right of way issues early in design development will allow the Team to avoid unnecessary acquisition and displacement which could otherwise result in increased cost and protracted acquisition/relocation timeframes.

Based on right of way requirements and utility conflicts identified as part of the right of way impact assessment, Epic will prepare a Right of Way Data Sheet for each of the three build alternatives. The Data Sheets will identify the number and type of proposed acquisitions, resulting relocations, and the probable cost to acquire and relocate the affected uses. The Data Sheets will take the form of Exhibit 17-EX-21 from the Caltrans Right of Way Manual and will be prepared in accordance with the guidance in that manual. Specifically, EPIC will:

- Review impacts to parcels as identified by the proposed design
- Calculate the fee or easement area that will need to be acquired for each impacted property
- Estimate the total cost of acquisition for all parcels including real estate acquisition costs, relocation assistance, appraisal fees, title and escrow fees, ROW engineering costs, condemnation costs, and other support fees as necessary
- Provide estimates of utility relocation costs based on utilities identified and mapped by the design team.
- Escalate costs to anticipated right of way certification date
- Provide a draft Data Sheet to the design team for review and consistency check
- Submit a draft Data Sheet for review
- Update Data Sheet based on the City's comments and submit to Caltrans
- Review and incorporate Caltrans comments on the Data Sheet and submit a final version in conjunction with the final Project Report

Right of Way information gathered during preparation of the Data Sheets will also be used to supply information for the Project Report and Environmental Document as necessary.

Deliverables: ROW Data Sheet for three Build Alternatives including Utility Information Sheet

Task 8 Alternatives Analysis, Geometrics, Design Standard Decision Document

The alternatives development is the key process in the PSR-PDS which will determine the actual project improvement alternatives which will facilitate meeting the project purpose and need. A no build alternative will be included as a means for comparison of costs, impact, and level of improvements of the identified build alternatives. The PSR-PDS identified three build alternatives. Additional alternatives may result as a product of the ICE study which will include a roundabout, a single point urban interchange, and a diverging diamond interchange. Other variations of the alternatives already identified could also result. The alternatives analysis will weigh a number of factors in the decision as to which alternatives are included in the environmental document and which are rejected. The evaluation of the alternatives will consist of a review of:

- | | |
|---|---|
| <ul style="list-style-type: none"> • Design exceptions / compliance with Caltrans design standards • Traffic operations • Impact to adjacent properties • Impact to utilities • Purpose and need fulfillment | <ul style="list-style-type: none"> • Structure considerations • Space for BMPs • Constructability • Schedule • Agency acceptance • Public input |
|---|---|

We anticipate the identification of three build alternatives. We anticipate the alternatives development will include input from the stakeholders such that consistency in planning assumptions is made and the PA/ED can be developed with minimized risk.

During the geometric development we will determine the basic project elements (structures, roadway alignments, roadway widths) and which alternatives are studied. We will work iteratively with the traffic study to refine the previously prepared conceptual geometrics for the identified, viable alternatives. This would include developing lane configurations, storage requirements, vertical and horizontal alignment, etc. Geometrics will be prepared in enough detail to establish the amount of right of way needed to be acquired, to ensure constructability, to identify what nonstandard design features are included, and to determine realistic construction cost estimates. Ultimately, the geometric development will allow the PDT to recommend the preferred alternative to be included in the Final Environmental Document and Final Project Report and to advance to PS&E.

As part of this task, we need to identify proposed nonstandard design features and prepare a Design Standard Decision Document (DSDD) for their approval by Caltrans. During the geometric preparation, we will prepare the geometrics with the intent to minimize the non-standard design features to the extent possible, however, some non-standard features are likely unavoidable. Design exceptions are difficult to obtain approval for and thus the alternative with the fewest and/or most approvable design exceptions would likely be preferred. During the alternatives' development, we would identify the non-standard design features associated with each. It is recommended the DSDD be prepared only for the preferred alternative after it is selected. The DSDD

will include each non-standard design exception being sought. As part of this work, we will also need to develop a full standard alternative to compare the extent of impact and cost to the proposed alternative.

Deliverable: Geometrics for three alternatives, DSDD for preferred alternative

Task 9 Construction Staging, Traffic Handling Concepts

Fine tuning the construction cost for stage construction, traffic handling, and detouring is important to secure a sufficient budget for construction, to ensure the project is constructable, and to ensure that traffic can be maintained during construction. During the preparation of PA/ED, CWE will determine the strategies of the stage construction, traffic handling, and detouring, needs for PS&E, and actual construction stages. The keys of the strategies include:

1. Provide a safe environment for construction workers and road users (vehicle, bicycle, pedestrian, etc.)
2. Maintain the SR-60 Redlands Boulevard on and off ramps and Redlands Boulevard traffic as much as possible
3. Provide viable segments of work and work areas to facilitate ease of construction
4. Identify if detours or temporary facilities are necessary

Based on our review of the Project Alternative 3 (diamond configuration), we have developed a preliminary concept as follows:

Stage 1:

- Construct east half of new Redlands Blvd overcrossing and roadway between EB and WB ramps intersections
- Construct east portion of two new on/off ramps intersections not conflicting with existing
- Construct eastbound on-ramp up to SR-60
- Construct portions of new off-ramps not in conflict with existing on/off ramps and SR-60
- Construct Hemlock Ave and other adjacent side streets in northwest quadrant including Hemlock/Redlands intersection
- Construct east side of the Redlands Blvd between the WB ramps intersection to north of Hemlock Ave and between the EB ramps intersection to Eucalyptus Ave

Stage 2:

- Put traffic on new east half of Redlands Blvd overcrossing
- Demolish existing Redlands Blvd overcrossing
- Construct west half of new Redlands Blvd overcrossing and roadway between EB and WB ramps intersections
- Construct west portion of two new on/off ramps intersections
- Close Spruce Avenue and construct westbound on-ramp up to SR-60
- Construct west side of Redlands Blvd between the WB ramps intersection to north of Hemlock Ave

Stage 3:

- Construct eastbound and westbound on-ramp gore areas and auxiliary lanes on SR-60

Stage 4:

- Close existing ramps
- Construct mainline shoulder in locations of existing (now removed) ramps
- Construct remaining sections of eastbound and westbound off-ramps across existing ramps

The construction staging concept plans will be developed for up to three alternatives. These concepts will be useful in determining the alternatives' constructability, the scope and identified measures to be used in the TMP Data Sheet, and the cost of traffic handling during construction.

Deliverables: Construction Staging Concept Plans for three alternatives

Task 10 Fiber Optics and ITS Concept

A fiber optic conduit system is the skeleton of the Caltrans' Intelligent Transportation System (ITS) program. A successful fiber optic conduit system will establish the communication between the SR-60/Redlands Boulevard interchange and Caltrans' Traffic Management Center (TMC). CWE will provide the preliminary concept and cost estimate for the fiber optic conduit system during the preparation of PA/ED. Other than the fiber optic conduit system, the following ITS components will also be considered and included in the PA/ED.

1. Video detection cameras at 4 intersections on Redlands Blvd

2. New Definition-Internet Protocol (HD-IP Closed-Circuit Television (CCTV) cameras for freeway mainline and on-ramp/off-ramp intersections
3. New traffic signal controller cabinet with Dedicated Short-Range Communication (DSRC) Roadside Unit (RSU) inside for connected vehicle communications
4. Existing call box relocations

Deliverable: Concept study and cost estimates for fiber optics and ITS items

Task 11 Transportation Management Plan Data Sheet

We will prepare a Transportation Management Plan Data Sheet (TMPDS) that identifies the TMP strategies and elements to be implemented as part of the Project to minimize potential traffic and circulation impacts due to construction. We will coordinate with the Caltrans TMP Team and City throughout the preparation of the TMPDS. Work for this task will be coordinated with the construction staging/traffic handling concepts.

We will prepare the TMPDS and consider a variety of strategies such as:

Public Information –	Brochures/mailers, social internet, paid advertising
Motorist Information –	changeable message signs, ground mounted signs, Caltrans Highway Information Network (CHIN)
Incident Management –	Construction Zone Enhanced Enforcement Program (COZEEP), Traffic Management Team
Construction –	Lane requirement charts, reduced speed zone, short-duration ramp/freeway closure Demand Management
Alternative Routes –	Traffic control officers, detours

The TMPDS will identify the strategies to be included and the associated costs. A TMP or plans will not be prepared as part of this task. No traffic modeling will be performed as part of this task.

Deliverable: TMP Data Sheet

Task 12 Value Analysis Study

VA studies identify and evaluate alternative project solutions and provide recommendations to decision-makers. A Value Analysis will be completed utilizing a Certified Value Specialist from VMS to lead the study. The VA study will be documented in accordance with Caltrans VA Report Guide. The VA study will be scheduled in accordance with the guidelines established by Caltrans and will include participants from the design team, City, outside project stakeholders, and Caltrans. The Preliminary VA Study Report will be prepared following the Initial VA presentation. Subsequently, there will be an implementation meeting to resolve the disposition of the VA alternatives and to finalize the VA study cost, performance, and value indices. The final VA Study Report will be submitted following the final presentation.

Deliverable: Preliminary and Final VA Study Reports

Task 13 Preliminary Materials Report

Leighton will prepare a preliminary materials report addressing the materials conditions and pavement design aspects based on existing information and previous data performed by Leighton for adjacent Skechers Building. The report will generally follow the requirements of Topic 114 and Chapter 600 of HDM and organized in general accordance with California Test 130 (Caltrans, 2000). The report will be signed by a California licensed Geotechnical Engineer.

Deliverable: Preliminary Materials Report

Task 14 Preliminary Geotechnical Design Report

Leighton will prepare a preliminary geotechnical design report (GDR) based on existing in-house data and as-built information. The collected information will be evaluated and provided in this preliminary GDR, including site geology, subsurface conditions, faulting and seismicity, corrosion potential, earthwork and grading (including slope gradients), roadway structural sections/pavement design, excavations, lateral earth pressures, *slope stability*, material specifications, material sources and disposal. This report will be signed by a California licensed Geotechnical Engineer and a Certified Engineering Geologist.

Deliverable: Preliminary Geotechnical Design Report

Task 15 Preliminary Foundation Report

Leighton will prepare a preliminary foundation report (FR) based on existing information including existing LOTB and in-house geotechnical data collected during construction of adjacent Skechers building. The collected information will be evaluated and provided in the preliminary FR, including site geology, fault rupture, and the selection of specific foundation type for the bridge. Our report will be prepared in general accordance with Caltrans Guidelines and signed by a California licensed Geotechnical Engineer and a Certified Engineering Geologist.

Deliverable: Preliminary Foundation Report

Task 16 Initial Site Assessment, Site Investigation

The geoenvironmental scope of work is expected to include the following tasks: Initial Site Assessment (ISA), aerially deposited lead (ADL) survey, site investigation (SI), and asbestos and lead.

The ISA will be prepared in general accordance with the current ASTM "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessments (ESA) Process E 1527-13*" as modified in Caltrans *Project Development Procedures Manual*, Chapter 18 (Interim), dated February 28, 2006. The following items are included under the ISA task:

Records Review:

A search of selected government databases will be ordered from an environmental database company. This search report will meet government records search requirements of ASTM E 1527-13. These database listings will be reviewed within the specified minimum search distances established by ASTM E 1527-13 and include NPL, CERCLIS, RCRA, IC/EC Registries, ERNS, State and Tribal landfill and/or solid waste disposal sites, leaking storage tank lists, registered storage tank lists, IC/EC control registries, voluntary cleanup sites, and Brownfield sites. ISA activities will be required for acquired parcels; however, the environmental database report can be reviewed for the easement areas as well, if requested.

In addition, reasonably ascertainable historical sources of information will be reviewed that may include aerial photographs, fire insurance maps, USGS 15 and/or 7.5 Minute Topographic Maps, local street directories, building department records, zoning/land use records, and other historical sources. Appropriate city, county, state, and federal agencies may be contacted who may have information regarding occurrence of hazardous materials/waste at this site, including registered aboveground and underground storage tanks, landfills, contaminated sites, records of emergency release response reports, contaminated public wells.

Site Reconnaissance:

An observational reconnaissance of the site (with emphasis on proposed right-of-way acquisitions) will be performed for visual indications of environmental conditions including that which may suggest presence of hazardous materials. Site conditions will be photo documented. The site reconnaissance will be conducted by a qualified environmental professional as defined in ASTM E 1527-13 and Federal All Appropriate Inquiry (AAI) criteria.

Interviews:

For properties adjacent to Caltrans right-of-way within the project limits and particularly for proposed "take" properties/parcels for expanded right-of-way, a reasonable attempt will be made to interview present and/or past owners, lessees, key site manager, occupant, and employees and adjacent tenants (provided they are cooperative) for additional information about past and present site usage. A Phase I Environmental Site Assessment Owner/Site Contact Interview Form will be provided and should be completed by owners or other persons familiar with properties along the alignment and returned to us.

ISA Report Preparation:

Upon completion of records review, reconnaissance and interviews, an illustrated draft report will be issued. Once we have received and addressed the comments, an illustrated final report will summarize our findings, conclusions, and recommendations.

SI: Historically, the land around this interchange was used for agriculture. The ISA will identify which acquisition parcels and/or temporary construction easements (TCEs) will require investigation. The exact number of parcel takes is not known at this time, and some SI may be required on some of these parcels to look for pesticides, heavy metals, and/or other hazardous materials.

ADL: Based on the age of SR-60, there is a potential for ADL to exist. Caltrans will require an ADL survey for the sections of SR-60 that will be modified. An ADL survey was previously performed for the eastern portion of SR-60 within the Project area. Leighton will conduct a supplemental ADL survey for western portion of the Project area. ADL is the result of the use of tetraethyl lead which was added to gasoline to prevent gasoline engine knocking for many years. Lead was present in the vehicle exhaust

emissions and is now found in the soils adjacent to major thoroughfares. This sampling and testing will be used to assess if lead-impacted soil is present and to evaluate the appropriate disposal method of impacted soils disturbed during construction.

Independent of the ADL survey, but mobilized simultaneously with ADL fieldwork to reduce cost, a limited SI will be required to sample shallow soils on parcel "takes" to assess potential for hazardous waste in soil associated with agricultural and possibly industrial activity. Our ADL and limited SI scope will consist of pre-field activities, field sampling, laboratory testing, statistical analysis, and report preparation.

Asbestos and Lead: An asbestos and lead-based-paint survey should be conducted on any structures (including the Redlands Blvd overcrossing) that are proposed to be demolished and/or modified. An asbestos and lead-based-paint survey will be required. In addition, sampling and analysis of existing roadway traffic striping should be performed in accordance with Construction Program Procedure Bulletin 99-2 (Department, 2006).

Deliverable: ISA Report, ADL and Limited SI Report, Asbestos and Lead Survey

Task 17 Life Cycle Cost Analysis

Leighton will perform a Life Cycle Cost Analysis (LCCA) to compare long-term economic efficiency of various pavement types that are feasible. The pavement types considered may include flexible pavement consisting of hot mix asphalt with or without rubberized asphalt surfacing underlain by asphalt treated permeable base, aggregate base and/or aggregate subbase; and concrete pavement consisting of Jointed Plain Concrete Pavement and Continuously Reinforced Concrete Pavement. Applicable data for LCCA will be the traffic data and the estimated initial construction cost. The data along with the recommended pavement sections will be analyzed using the software *RealCost, V2.54CA*, to identify the lowest cost alternative that accomplishes the project objectives and to evaluate long-term alternative investment options.

Deliverable: LCCA Report

Task 18 Landscape Concept Plan

Estrada will prepare a Landscape Concept Plan (LCP), indicating the type, size, and general location of existing and new landscape improvements within the proposed project limits, including retaining or sound walls, overhead utilities, and general conditions. The proposed landscape improvements will generally show the plant materials, type of planting themes, view shed mitigation measures (based on final visual assessment document), and tree massing locations. Detailed written descriptions of landscape themes or concepts shall be provided with the overall LCP drawing. The LCP shall be a colored site plan. The LCP will incorporate any SR-60 landscape concepts previously identified by the City or Caltrans.

Deliverable: Landscape Concept Plan

Task 19 Preliminary Drainage Study

A preliminary drainage study will be prepared to address existing and proposed hydrology and hydraulic design. The study will be prepared per Caltrans Highway Design Manual Chapter 810 to summarize the review of available information and evaluate impacts to drainage areas and existing drainage facilities. It will include a hydrology study for the existing condition and proposed alternatives with assessment of impacts to the area drainage features and recommendations for the drainage plans. Previously prepared hydrology and hydraulic studies for the existing systems from Caltrans will be obtained if available and used to determine the on-site flows. The drainage report will include hydraulic analysis of on-site improvements only. With respect to the mainline SR-60, the drainage study will be limited to the study of the impact of removing the existing ramps and construction of the new ramps and the associated grading changes. We will study the mainline to the extent to determine the flows relative to the effect on the existing and reconstructed ramps. This study will be the basis of the final drainage study to be prepared in PS&E.

Analysis of existing run-on drainage and corresponding drainage systems of the City of Moreno Valley and RCFCDD will be conducted only within the project limits. An existing drainage system parallel and in between Spruce Avenue and Redlands Boulevard flows in a southerly direction, joining RCFCDD facility Moreno MDP Line F-2 in Redlands Boulevard just north of Eucalyptus Avenue. This system will be studied with respect to potential impacts from the proposed project alternatives.

Deliverable: Preliminary Drainage Study Report

Task 20 Water Quality Management Plan

The City of Moreno Valley requires a Water Quality Management Plan (WQMP) to be compliant with the Riverside County NPDES Permit, R8-2010-0033. The WQMP will address stormwater outside Caltrans ROW. The project is within the Santa Ana Watershed

region of Riverside County. The WQMP will address specific project and site information and, how the project proposes to optimize site utilization with respect to water quality. The WQMP will delineate drainage management areas, address hydromodification analyzing hydrologic conditions of concern along with mitigation, alternative compliance, and demonstration how the project will implement low impact development BMPs and temporary construction BMPs. The WQMP design of source control BMPs along with a section to discuss operation and maintenance plan for source control BMPs. If LID BMPs are infeasible on site, the WQMP will discuss alternative compliance and stormwater credits.

Deliverable: Water Quality Management Plan

Task 21 Storm Water Data Report (SWDR)

The Storm Water Data Report (SWDR) will be prepared per Caltrans' latest Project Planning and Design Guide (PPDG), updating the Draft SWDR which was approved during the PSR-PDS phase. This form-report must be prepared to address storm water quality planning activities describing the approach to incorporate stormwater Design Pollution Prevention (DPP), Treatment, and Construction Site Management (CSM) BMPs into the project. Section 6 of the Caltrans PPDG describes the during the PA/ED phase. A determination for potential storm water quality impacts and issues for the various alternatives would need to be made. Various sources of data and regulatory agencies are contacted to complete this. For those project site areas which are expected to result in unavoidable impacts to receiving waters, the DPP BMPs and permanent treatment BMPs which are intended to be used on the Project must be identified and evaluated. The report includes an evaluation of the potential impacts from storm water runoff both during and after construction. It includes impact reduction measures, DPP measures, and treatment measures. Permanent treatment BMPs will be proposed per Caltrans Statewide Stormwater Management Plan, July 2016 and Caltrans BMP Technology Report, October 2018. The area's soil types are shown as Hydrologic Group A, per Caltrans Water Quality Planning Tool (WQPT). Soils within this group tend to have good infiltration rates, making BMPs such as infiltration bioswales and basins feasible.

This project is within the Santa Ana Regional Water Quality Control Board, South Coast Hydrologic Region and San Jacinto Valley Hydrologic Unit Sub Area # 802.11. Drainage flow from the Lower San Jacinto River watershed flows southerly towards the receiving waterbody, Reach 3 of the San Jacinto River and Canyon Lake (Railroad Canyon Reservoir), a 303(d) waterbody which has the pollutant, nutrients, listed as being addressed with USEPA approved TMDL. It is anticipated to be a Risk Level 2 project per the PSR-PDS. The SWDR will document the following:

- Define storm water design issues
- Risk Level – determined using Caltrans' two-part process of sediment risk and receiving water risk. Project phasing must be considered when determining the risk as a longer time period increases the sediment risk
- Receiving water bodies and their TMDLs, Caltrans pollutants of concern, and watersheds will be confirmed and updated with the latest water quality objectives utilizing the WQPT
- Identification of potential DPP, treatment BMPs, and CSM BMP strategy
- Identify existing BMPs along the corridor and impact to them
- Receiving water bodies and their TMDLs, Caltrans pollutants of concern, and watersheds
- Identification if right of way required for implementation of BMPs
- Discussion of preferred alternative
- Preparation of stormwater cost estimates

Deliverable: Storm Water Data Report

Task 22 Location Hydraulic Study, Summary Floodplain Encroachment Report

A Location Hydraulic Study (LHS) is required by Caltrans when a floodplain encroachment is anticipated. This preliminary study of base (100 year) floodplain encroachments is needed to determine the amount of increase in the base floodplain elevation anticipated. The LHS provides documentation necessary to support a finding on floodplain encroachment impacts anticipated from the proposed project. This LHS term, obtained from 23CFR, Section 650.111, refers to the preliminary investigative study to be made of base floodplain encroachments by a proposed highway action. This initial hydrology study will be consistent with Federal Aid Highway Program (FHPM) (6-7-3-2) format. Specifically, existing water courses will be located and the project proximity to potential flood plain evaluated. The pertinent FEMA Flood Insurance Rate Map for the area have been obtained and reviewed for information relative to the floodplain Zone. The FEMA FIRMette for this project indicates the entire area is within Zone X which means the areas have been determined to be outside of the 0.2% annual chance floodplain.

A LHS will be prepared to address changes in the hydraulic grade level in existing and proposed culverts and slope stabilization due to impacts of flow and proposed grading. If the study concludes that there is no encroachment and/or minimal impact, a Summary Floodplain Evaluation Report or a Summary Floodplain Encroachment Report will be completed.

For federally funded projects on the State Highway System a Summary Floodplain Encroachment Report (SFER) is required to assess the six key items identified in the LHS: hydraulic data, map of floodplain showing base Q_{100} flood and record flood, base flood potential impacts, traffic, duration of traffic interruption for base flood, and value of base flood damages. Specifically, we will prepare the form contained in the Highway Design Manual, Figure 804.7A, "Technical Information for Location Hydraulic Study" and Figure 804.7B, "Floodplain Evaluation Report Summary", following our study for inclusion in the Project Report.

Deliverable: Location Hydraulic Study, Summary Floodplain Encroachment Report

Task 23 Advanced Planning Studies

The existing bridge was constructed in 1964 and has inadequate vertical clearance of 15'-6" and will need to be replaced. An evaluation of the existing structure is not included in our proposal. IDC will work closely with the Caltrans' Office of Special Funded Project to ensure seamless project reviews and timely approval of Structures Advanced Planning Study (APS). We will provide two structure alternatives to be included in the PAED. The PSR-PDS identified the following two alternatives:

1. Alternative 2 and 3 (Modified Spread Diamond, Spread Diamond). Replace existing bridge with a 282-foot long and 130-foot-wide bridge
2. Alternative 4 (Modified Partial Cloverleaf). Replace existing bridge with a 282-foot long and 138-foot-wide bridge

Based on our recent experience, we will likely propose one of two bridge structure types as described below.

1. Precast/prestressed Post-Tensioned California Wide Flange (WF) Girder

Recently, WF girders have been widely used for many reconstruction projects. This type of girder can accommodate long spans up to 200'. The precast girder can reduce construction duration and minimize traffic impact during construction. However, the pre-cast girders are more costly as compared with the traditional cast-in-place pre-stressed girders. Other girder types include Bulb-Tee or I-girders.

2. Cast-In-Place Box Girder

The CIP box girder is a typical Caltrans' preferred girder type. This type of girder provides a full range of flexibility in accommodating various design concepts and it is also cost effective. It can accommodate a variety of bridge aesthetic designs. If it is the City's desire to utilize the project to create a gateway feature, this type of structure would be most desirable. The aesthetic treatment can be embedded into the entire structure design from railing to exterior girder surface. However, CIP Box Girder requires falsework during construction and construction duration is longer than for precast structures.

The APS will be prepared for bridges and nonstandard retaining walls to ensure that cost estimates for the proposed structural improvements are based on feasible and constructible design. APS are required to document the scope and cost of structure work. We will prepare one plan sheet for each structure showing the basic structure layout details and cost estimate. We will include all structure work including the overcrossing and retaining walls.

We will prepare the APS in accordance with guidelines set forth in Caltrans Memo to Designers. We will be responsible for developing feasible structure alternatives, costs, and controls appropriate and will be coordinated with civil, traffic and geotechnical. We will incorporate City's concerns such as construction impact, aesthetic requirements, the future facility needs and cost constraints as part of our alternative considerations.

The APS will include proposed of span geometry, vertical clearance, alternative structure types, foundation and seismic evaluation (if needed), construction methodology, falsework, traffic impacts, construction staging and preliminary construct cost estimates. We will use the most recent Caltrans approved APS template. APS will include a Bridge General Plan include the following information:

- Bridge Geometry
- Structure Types (superstructure and substructures)
- Foundation Types

- Minimum Clearance
- Bridge Cost Estimate
- Preliminary Foundation Recommendation (Foundation type and Seismic Design Parameters)

Deliverable: Advanced Planning Study

Task 24 Cost Estimates

The overall project cost will be developed using the Caltrans standard 11-page cost estimating summary form (Caltrans Project Cost Estimate Summary Format) using the latest available unit price information. We will base the cost estimates upon our knowledge, which includes keeping abreast of current bid prices, reviewing the Caltrans cost data book, monitoring construction techniques, conversations with the City and Caltrans, relationships with contractors, and other recognized cost estimating publications. We will prepare preliminary quantity and cost estimates for each feasible alternative. Unit prices will be assigned to each item and cost estimates will be generated. Caltrans standard 20% contingency at the PR level will be included.

Deliverable: 11-Page Cost Estimate Summary Form for three alternatives

Task 25 Draft Project Report

We will prepare a Draft Project Report (DPR) as outlined in the Caltrans Project Development Procedures Manual, Appendix A. The report will include the alternatives, geometrics, cost estimates, traffic documentation supporting the proposed alternatives, an updated accident review, a TMP checklist, an updated utility study, updated right-of-way studies, and updated R/W Data Sheet, bridge/retaining wall Advanced Planning Study, Site Investigation, if necessary, an updated SWDR, a preliminary geotechnical analysis, and a location hydraulic study. In general, the preparation of the DPR results in an approved engineering report serving as the transmittal document for the circulation of the draft environmental document. We will obtain information from Caltrans regarding other projects in the vicinity. We will also check with the cities and County to determine future plans which should be considered during the geometric development.

As mentioned above in the Traffic Study Task, DIB 77 regarding interchange spacing must be addressed for the interchange spacing between Redlands Boulevard interchange and Logistics Center Drive interchange as the existing spacing is one-mile and the standard outside of urban areas is two-miles. On a previous project with District 12 on the SR-210, Caltrans District 8 required the conditions of DIB 77 be included in the PR. As such, we believe Caltrans will want the Project to also address DIB 77 topics within the PR. This will include a discussion of the following topics: consideration of alternatives, interchange spacing, no significant adverse impact, connection to public road, meets local planning, and coordination with development.

A milestone schedule and a Caltrans supplied PYPSCAN exhibit indicating the Bridge Site Data, Maps to Right-of-Way, PS&E, and Right-of-Way Certification to be used for programming purposes and cost estimate escalation to the proposed program year will be prepared and included in the DPR. We will review the project's consistency with Caltrans' Transportation Concept Report, District System Management Plan, Regional Transportation Plan, Congestion Management Plan, and City's traffic planning and circulation concepts.

We anticipate preparation of three DPR submittals. The DPR will be forwarded to the City and Caltrans for review. All reasonable and non-conflicting comments from the agencies will be incorporated into the report prior to the next submittal. Upon submittal of the final DPR, we will obtain their approval.

Deliverable: Draft Project Report

Task 26 Environmental Documentation

LSA prepared the PEAR for the approved PSR for the SR-60/Redlands Boulevard project. The scope of work presented below is based on the team's extensive knowledge of the project area from our work on the PEAR and on the recently approved EIR/FONSI for the SR-60/World Logistics Center Parkway interchange project. (PEAR identified the level of environmental clearance of the SR-60/Redlands Boulevard project under both CEQA and NEPA to be an Initial Study/ Environmental Assessment (IS/EA) leading to an MND/FONSI. Due to recent Caltrans guidance updates related to greenhouse gas emissions and based on the team's recent experience with how this guidance was applied to the SR-60/World Logistics Center Parkway interchange project, however, we anticipate the level of environmental clearance to be an Environmental Impact Report/Environmental Assessment (EIR/EA) leading to an EIR/FONSI. This is because although the proposed project would improve traffic operations and reduce greenhouse gas emissions compared to the No Build Alternative, it would not reduce greenhouse gas emissions compared to the existing condition and therefore would not contribute to achieving statewide greenhouse gas emissions reduction goals. Therefore, the

greenhouse gas emissions impact would be potentially significant and unavoidable under CEQA for all the Build Alternatives triggering the need for an EIR to comply with CEQA.

Environmental analyses will be performed for three build alternatives to meet CEQA and NEPA requirements, and in accordance with the environmental review process for transportation projects, FHWA guidelines, and the Caltrans Standard Environmental Reference (SER). The scope of work is based upon the SER requirements as of March 29, 2021. For purposes of this scope, one round of City of Moreno Valley review and two rounds of Caltrans review are anticipated for each deliverable. The level of effort for the technical studies and the environmental document assumes providing no more than two bound hard copies, one unbound hard copy, and the remainder of the copies electronically (via a file sharing program or on CD) for each final Caltrans submittal. Screen checks and interim drafts will be provided in electronic format only.

LSA shall prepare, as separate deliverables in advance of the screen check draft ED Caltrans approval, the project Purpose and Need and the Project Description. The Purpose and Need and Project Description that will be circulated to Caltrans for review and approval will be a concise document that is appropriate for use in the technical studies.

Task 26-1.0 Project Management

Task 26-1.1 Task Management and Meetings

LSA's key staff will attend bi-weekly conference calls with the project team to discuss work progress, issues, upcoming meetings, etc. It may also be necessary, at times, to meet with Caltrans technical staff to discuss technical issues outside the PDT meetings.

Task 26-2.0 Environmental Technical Studies

Task 26-2.1 Water Quality Assessment Report (WQAR)

LSA will prepare a Water Quality Assessment Report (WQAR) that follows the Caltrans October 2017 Water Quality Assessment Report Content and Recommended Format. The WQAR will discuss watershed and drainage characteristics, surface receiving waters, groundwater hydrology, regulatory requirements, pollutants of concern, receiving waters conditions, objectives, and beneficial uses, and floodplains. The report will also discuss construction site, DPP, and Treatment BMPs that are applicable to the project per Caltrans' Storm Water Quality Handbooks PPDG. The WQAR will also discuss any Low Impact Development features that are included to address water quality impacts. The project's impacts on water quality will be evaluated and avoidance, minimization, and/or mitigation measures necessary to prevent adverse water quality impacts will be identified.

Task 26-2.2 Noise Study Report

LSA will prepare a noise study work plan prior to the commencement of the Noise Study Report (NSR). Upon approval of the noise study work plan, LSA will prepare a NSR consistent with the April 2020 Caltrans Noise Analysis Protocol, September 2013 Technical Noise Supplement (TeNS), specific Caltrans District 8 requirements, and the annotated outline provided by the Caltrans Standard Environmental Reference. Short-term (15-minute) noise level measurements will be conducted at up to 14 locations with concurrent traffic counts to document the existing noise environment and to calibrate the traffic noise model. Long-term 24-hour noise level measurements will be conducted at up to 3 locations to identify the peak traffic noise hour. The Federal Highway Administration (FHWA) Traffic Noise Model (TNM) version 2.5 will be used to evaluate the traffic noise levels associated with the Existing, Future No Build, and three Future Build Alternatives. Traffic noise impacts will be determined based on the design-year with project traffic noise levels and the corresponding NAC for each land use. Noise abatement measures (noise barriers) designed to reduce long-term traffic noise impacts by 5 dBA or more, as required to be feasible, will be evaluated. A reasonable allowance per receptor and total reasonable allowance will be calculated for each feasible noise barrier height.

Task 26-2.3 Noise Abatement Decision Report (NADR)

If feasible noise barriers are identified in the NSR, LSA will prepare a NADR consistent with the April 2020 Caltrans Traffic Noise Analysis Protocol, Caltrans District 8 requirements, and the annotated outline provided by the Caltrans SER. The report will summarize key information presented in the NSR, determine reasonableness of the feasible noise barriers, and will provide the preliminary noise abatement decision and secondary effects of abatement. The engineer's cost estimate to construct noise barriers and non-acoustical factors related to feasibility will be provided to LSA for the completion of the NADR.

Task 26-2.3.1 Optional Task: Noise Barrier Survey

If reasonable noise barriers are identified, LSA will conduct a noise barrier survey consistent with the Caltrans April 2020 Traffic Noise Analysis Protocol and Caltrans District 8 requirements to determine whether or not properties benefiting from any feasible and reasonable noise barrier are in favor. In addition, a noise barrier survey may be conducted for properties located behind noise barriers resulting from noise impacts under CEQA. The City will provide LSA property information for the noise barrier survey. LSA

will prepare the noise barrier survey letters. The results of the survey will be summarized in a memorandum. Efforts will include coordination with the City, Caltrans, and up to two rounds of follow-up for properties not responding to the original noise barrier survey letter.

Task 26-2.4 Visual Impact Assessment

A Visual Impact Assessment (VIA) analysis will be prepared by Estrada Land Planning. The Visual Impact Assessment will be prepared in accordance FHWA Guidelines for the Visual Impact Assessment of Highway Projects (January 2015). The VIA will be prepared for the specific project area based upon the three proposed Build Alternatives. The VIA will include documenting existing setting visual quality and character of the project. It will also include a description of proposed changes to visual resources and will include predicted viewer responses to these changes. Potential impacts to visual resources will be documented and proposed mitigation measures will be developed and evaluated. Estrada will make appropriate revisions to the Draft VIA based on comments provided by Caltrans.

Task 26-2.5 Draft Relocation Impact Memorandum (DRIM)

A Draft Relocation Impact Memorandum (DRIM) will be prepared in accordance with Chapter 10, Relocation Assistance, of the Caltrans Right of Way Manual. This task includes a site visit, research, and preparation of the DRIM, including exhibits. The study will include the following items for the three build alternatives. After a preferred alternative has been selected, if required, a Final Relocation Impact Memorandum (FRIM) will be prepared in conjunction with the final environmental document.

Task 26-2.6 Community Impact Assessment

LSA will prepare a CIA in accordance with the Caltrans Community Impact Assessment Handbook (2011). The CIA will evaluate the proposed project's socioeconomic impacts utilizing the most recent available demographic data compiled by the United States Census Bureau and parcel data available from the County Assessor's Office. The CIA would evaluate up to four alternatives (three build alternatives and one build alternative). The CIA will evaluate the potential community impacts resulting from closures of the interchange and any traffic detours during construction. Recommendations to avoid, minimize, or mitigate any potential project-related community impacts will be identified.

Task 26-2.7 Farmland Impact Analysis

LSA will complete a farmland impact analysis to be included within the Community Impact Assessment (CIA). The farmland impact analysis will evaluate the impacts to Farmland, in accordance with Caltrans' SER Guidelines, including coordination with Natural Resource Conservation Service (NRCS). This will also include evaluation of potential impacts from temporary construction areas. According to the California Department of Conservation's Farmland Mapping and Monitoring Program, portions of the Project site are designated Farmland of Local Importance. The Project site does not contain any Williamson Act contract land nor is it zoned for agricultural uses. NEPA requires the federal agency to complete a Farmland Conversion Impact Rating Form (AD-1006) as well as coordinate with the NRCS if project activities will irreversibly convert farmland to non-agricultural use. Therefore, as an integral part of cataloguing the type, location, and amount of Farmland to be both permanently and temporarily impacted by the project, LSA will complete the Farmland Conversation Impact Rating Form and coordinate with the NRCS. LSA will also determine if the Project will involve other changes to the environment that could result in the indirect conversion of agricultural land to a non-agricultural use.

Task 26-2.8 Air Quality/GHG Analysis

LSA will perform all activities related to air quality and greenhouse gas (GHG) emissions impact analyses and will prepare an Air Quality Report that documents the study results. Construction related air pollutant emissions will be quantified using California Emission Estimator Model (CalEEMod) or another appropriate model as directed by Caltrans commensurate with available Project specific information. Caltrans Standard Specifications for Construction, as well as mitigation measures if necessary, will be recommended to reduce short-term construction related impacts. Operational air pollutant emissions will also be quantified using CalEEMod or another appropriate model as directed by Caltrans. It is assumed the air pollutant emissions will be modeled for the following conditions: "existing", "existing plus Project", "forecast", and "forecast plus Project".

An Air Quality Conformity Checklist and an Air Quality Conformity Report will be required to make project-level air quality conformity determination. This scope assumes the preparation of a quantitative PM10 and PM2.5 Hot-Spot assessment would not be required. A qualitative Mobile Source Air Toxic (MSAT) analysis will be prepared according to FHWA Updated Interim Guidance on Mobile Source Air Toxic Analysis in NEPA Documents.

The GHG analysis would be based on the Caltrans Climate Action Program and will require coordination with District Headquarters staff on the final methodology. It is assumed GHG emissions will be modeled for the following conditions: "existing", "existing

plus Project”, “forecast”, and “forecast plus Project”.

Task 26-2.9 Energy Impact Assessment

LSA will prepare an energy impact assessment showing the project’s energy use for all phases and components, including transportation related energy, during both construction and operation. It is assumed the energy use will be modeled for the following conditions: “existing”, “existing plus Project”, “forecast”, and “forecast plus Project”. The energy section will address both energy issues identified in the checklist in Appendix G of the State California Environmental Quality Act (CEQA) Guidelines.

Task 26-2.10 Paleontological Identification Report and Paleontological Evaluation Report (PIR/PER)

As the Project PEAR noted the project area contains geologic units are sensitive for paleontological resources, a combined Paleontological Identification Report/Paleontological Evaluation Report (PIR/PER) will be prepared to document the potential to impact important paleontological resources and make the appropriate mitigation recommendations. Completion of the PIR/PER will include a fossil locality searches through the Natural History Museum of Los Angeles County (NHMLAC) and the San Bernardino County Museum. LSA will examine current geologic maps of the project area and review relevant geological and paleontological literature, including geotechnical reports, if available, to document the geologic units present, where they are exposed, and where they may be encountered at depth. A systematic on-site pedestrian survey of the project site will be conducted to determine the presence of paleontological resources, and to note exposures of bedrock or native sediments. The PIR/PER will assess whether there are known or reasonably anticipated paleontological resources within the project area based on the proposed work and excavation, determine whether project excavation may impact those resources. If this research indicates that significant resources may be impacted, the PIR/PER will make recommendations regarding mitigation efforts and the preparation of a Paleontological Mitigation Plan (PMP). The PMP is not part of this scope and is usually prepared during PS&E.

Task 26-2.11 Cultural/Archaeological Resources

- **Native American Consultation.** Per the direction of Caltrans, LSA will initiate Native American (NA) consultation per Section 106 of the National Historic Preservation Act (Section 106). LSA will contact the Native American Heritage Commission (NAHC) to request a search of the Sacred Lands File for the APE. Results of this search will be accompanied by a contact list of the tribes, groups, and individuals with ancestral ties to the project vicinity. LSA will contact all parties designated by Caltrans via emailed letter, describing the project and inviting comments. Each unanswered letter will be followed by up to two emails to ensure each party received the letter and had opportunity to comment. A consultation record will be attached to the Caltrans reports. Because compliance with AB 52 is also required, LSA will include Caltrans’ solicitation in the Section 106 letters.
- **Records Search.** LSA will conduct an archaeological and historical records review and literature search through the Eastern Information Center (EIC) of the California Historical Resources Information System, located at UCR. The records search includes a 1/2-mile radius search area around the Area of Potential Effects (APE).
- **Area of Potential Effects Map.** An LSA architectural historian will develop an APE map based upon complete data provided by the project engineer that meets Caltrans requirements. The map identifies the entire area that has the potential to be directly (i.e. physically) or indirectly impacted by the proposed undertaking. The field surveys cannot occur until the APE has been delineated and Caltrans has given preliminary approval of the APE.
- **Field Surveys.** A pedestrian archaeological field survey will be conducted of the areas of direct impact not obscured by pavement or development within the APE. The archaeological survey will be completed in one day. An architectural survey of all properties with buildings that are 45 years of age or older will also be conducted. Based on preliminary research, it appears there are eight properties with historic-period buildings and that at least six of these will require significance evaluations. The surveys will be performed from public rights of way unless the City can provide safe access to the properties. The architectural surveys will include digital photography of building exteriors and property overviews.
- **Archaeological Survey Report (ASR).** The ASR provides the documentation for prehistoric archaeological resources. Tasks required to prepare the ASR include a records search at the EIC, a pedestrian field survey of the areas of direct impact within the APE, and assistance with NA consultation. The ASR will include a detailed summary of resources identified within the APE and 1-mile records search radius, a summary of the NA consultation, and the results of the field survey, and will provide the natural and cultural setting.
- **Historical Resources Evaluation Report (HRER).** The HRER is the documentation and evaluation report for historic-period (45 years of age or older) archaeological and built environment resources in the APE. It includes a project description, research and field methods and results, a summary of historic outreach efforts, historic contexts/themes associated with the APE and the evaluated resources, descriptions of the resources evaluated, findings and conclusions, and an attachment with the significance evaluations for each resource on Department of Parks and Recreation forms. This scope stipulates evaluation of a maximum of six individual resources.
- **Historic Property Survey Report (HPSR).** The HPSR is the summary/cover document for the cultural resources study. It

summarizes all archaeological, built environment, historical, and NA concerns. Attachments to the HPSR include the APE map, ASR, HRER, NA consultation, historic bridge inventory sheets, and summary of historic outreach. If resources are determined eligible for listing in the National Register, a Finding of Effect may be required. In that event, a separate scope will be prepared for the City's approval prior to conducting the work.

Task 26-2.12 Biological Resources

Task 26-2.12.1 Natural Environmental Study (NES)

LSA biologists will perform literature review followed by a reconnaissance-level field survey of the Biological Study Area to assess the plants, animals, and habitats present and to document (via vegetation mapping and representative site photographs) existing site conditions. LSA anticipates the need to conduct the subsequent focused biological studies including a jurisdictional delineation and burrowing owl focused survey in support of the NES as described below. Based upon our experience on the SR-60/World Logistics Center Parkway project, LSA does not anticipate the need to conduct Section 7 consultation with the USFWS, and/or any other biological consulting services not included herein.

Task 26-2.12.2 Jurisdictional Delineation (JD) Report

LSA biologist(s) will conduct a routine jurisdictional delineation (JD). LSA biologists will prepare a JD report. Regulatory permitting is not included in this scope because it is typically performed during PS&E. USACE concurrence on a JD is not required for an EA.

Task 26-2.12.3 Focused Burrowing Owl Surveys

The project site lies within a MSHCP burrowing owl (*Athene cunicularia hypugaea*) survey area. During the biological field survey, we will determine whether the site has suitable habitat for the burrowing owl and if so, a qualified LSA biologist will conduct a focused survey in accordance with the Burrowing Owl Survey Instructions for the MSHCP. Due to the unknown amount of suitable habitat, scope and estimated cost for the burrowing owl focused survey will cover a total of up to 20 acres. Upon completion of the survey, LSA will prepare a letter report describing the survey methodologies and results of the focused survey. A copy of the report will be provided to the Western Riverside County MSHCP Biological Monitoring Program as required under the MSHCP.

Task 26-2.12.4 MSHCP Consistency Analysis

LSA will prepare a MSHCP Consistency Analysis report. The MSHCP Consistency Analysis will consist of a literature review, biological resources survey, and preparation of a MSHCP Consistency Report. A copy of the final report will be sent to the Western Riverside County MSHCP Biological Monitoring Program as required under the MSHCP.

Task 26-2.12.5 Determination of Biologically Equivalent or Superior Preservation Report (DBESP)

If burrowing owl, narrow endemic plant species, fairy shrimp or vernal pools are found to be present on site and would be impacted by the project, the MSHCP requires preparation of a DBESP. The DBESP would be reviewed by the CDFW and USFWS during a 60-day review and response period. Upon receipt of comments, LSA will revise the draft DBESP and submit a final DBESP. This task includes responses to two rounds of consolidated comments from CDFW and USFWS. No additional MSHCP-related services are provided with the scope in this proposal (i.e., Joint Project Review).

Task 26-3.0 Categorical Exemption/Categorical Exclusion for Geotechnical Borings

To provide information needed for preliminary design, geotechnical boring activities will need to be conducted. LSA will prepare a Class 6 Categorical Exemption pursuant to Section 15306 of the CEQA Guidelines for Caltrans approval and a Federal Categorical Exclusion pursuant to SAFETEA-LU Section 6004 for approval by Caltrans. LSA will provide Caltrans 6 copies of the CE/CE. Once the CE/CE is approved LSA will file it with the State Clearinghouse and Riverside County Clerk.

Task 26-4.0 Prepare and Circulate Draft Environmental Document

Task 4.1 Issuance of Environmental Notices and Public Information Meeting Notice

LSA will initiate the environmental process by preparing a Notice of Preparation (NOP), coordinate with the Team, City, and Caltrans to assist in preparation of a public information meeting and the appropriate public notice. The NOP is the first step in the EIR process. The Consultant must prepare the NOP to obtain early comments on the Project, alternatives and potential environmental impacts. The NOP must be sent out to responsible agencies, to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected. LSA will prepare the NOP and public notice distribution list. A meaningful and constructive relationship with the local community is always advisable and therefore, comments will be requested from stakeholders and interested parties. LSA will prepare the public notice for the public information meeting and will work with Transtech to prepare for and attend the public information meeting. LSA shall coordinate with City

and Caltrans to ensure that the notices are properly posted (e.g., newspaper, mass mailers). Caltrans will serve as the designated main point of contact with interested parties during the public information meeting process.

Deliverables: Public Notices for the Public Information Meeting (preparation support), Notice of Preparation, Agency letters/notifications

Task 26-4.2 Screencheck Draft EIR/EA

A Screencheck Draft EIR/EA shall be prepared in accordance with the SER and Caltrans Environmental Handbook (latest Annotated Outline), and Council on Environmental Quality (CEQ) guidance. Concurrent with the aforementioned technical analyses, LSA shall prepare the Screencheck Draft EIR/EA incorporating the environmental checklist, technical analyses, a discussion of critical environmental issues identified, an analysis of the cumulative and indirect effects of the Project, proposed avoidance, minimization and/or mitigation measures, an environmental commitment record (ECR) and a listing of environmental (and related) permits required for implementation of the Project.

The screencheck Draft EIR/EA is prepared after technical studies have been approved. This will be accompanied by the completed Environmental Document Preparation and Review Tool and External QC Certification Sheet. Once the City and Caltrans provide comments on the document, LSA shall revise the document. The revised screencheck Draft EIR/EA will then be resubmitted to Caltrans for approval. LSA shall prepare a response-to-comments matrix demonstrating how and where the comments have been addressed in the Screencheck Draft EIR/EA. Coordination with the Caltrans Environmental Planning unit will be critical to the timely completion. Once Caltrans District is satisfied, the next round of reviews would commence, i.e., NEPA QC. Once all reviews have been completed, the District 8 Environmental Branch Chief will certify the document is ready for public circulation.

Task 26-4.3 Draft Environmental Impact Report (EIR) / Environmental Assessment (EA)

The Draft EIR/EA with an updated Environmental Document Preparation and Review Tool and External QC Certification Sheet will be submitted to Caltrans for signature. Because the project is an interchange improvement project, it is anticipated that a Routine EIR/EA will be applicable as opposed to a Complex EIR/EA. A Routine EIR/EA would be approved by the District Director for circulation and would not be submitted to Caltrans Headquarters. Per the SER, legal review is only required for Draft EISs and individual Section 4(f) Evaluations; therefore, this scope does not include responding to Caltrans legal review comments. The environmental document will be routed to the Caltrans District Director for approval to publicly circulate. Following Caltrans approval, the approved Draft EIR/EA will be distributed for review and comment. LSA shall update the distribution list.

Deliverables: Approved Draft EIR/EA, ED Preparation and Review Tool, External QC Certification Sheet

Task 26-4.4 Obtain Approval to Circulate

Concurrent with the Draft EIR/EA Task above, LSA will work in close coordination with the Caltrans Environmental Coordinator to prepare all required notices to circulate the Draft EIR/EA. Tasks to be completed by LSA include preparing the Notice of Completion (NOC) to be transmitted to the Office of Planning and Research (OPR) and preparing the Notice of Availability (NOA, including the Notice of Public Hearing) of the Draft EIR/EA, Submit all notices to Caltrans for approval

Task 26-4.5 Circulate Draft Environmental Impact Report (EIR) / Environmental Assessment (EA)

Following the Draft EIR/EA approval, the NOA will be prepared for publication. The notices will be placed in general-circulation newspapers, posted on and off site, and mailed directly to owners and occupants of contiguous properties. When approval to circulate has been obtained from Caltrans, LSA will circulate the Draft EIR/EA with an unsigned EIR/FONSI in accordance with the requirements of the Caltrans' SER. Before the Draft EIR/EA is circulated, the DPR must be approved to ensure both documents are consistent. The Draft EIR/EA will be circulated to responsible agencies; trustee agencies; State, federal, and local agencies with jurisdiction by law; bordering cities and counties; and other applicable entities as suggested in Caltrans SER.

The California Transportation Commission (CTC) must review all projects that receive State highway funds. LSA will coordinate with Caltrans District 8 Environmental staff for transmittal of the Draft EIR/EA to the CTC. Tasks to be completed by LSA include:

- Prepare up to 10 hard copies of the Draft EIR/EA and up to 50 CD-ROMs containing electronic files of the Draft EIR/EA
- Submit an NOC and copies of Draft EIR/EA to the State Clearinghouse
- Distribute the Draft EIR/EA to federal, State, and local agencies, as well as interested parties contained on the Master Distribution list for review and comments
- File an NOA with the State Clearinghouse and County Clerk

Deliverables: Draft EIR/EA (10 hard copies), 50 CD-ROMs (electronic files of the Draft EIR/EA), Distribute up to 200 copies of the NOA to the addresses on the Master Distribution List

Task 26-5.0 Public Meetings and Outreach Conducted

LSA staff will provide limited assistance to plan and coordinate the public information meeting to be conducted during public review of the Draft IS/EA. The LSA Environmental Principal and the Project Manager will attend the public meeting. LSA will provide up to 4 additional staff to attend the public meeting and staff the environmental stations during the meeting.

Task 26-6.0 PREPARE FINAL ENVIRONMENTAL DOCUMENT AND OBTAIN ENVIRONMENTAL CLEARANCE

Task 26-6.1 Prepare Response to Comments Matrix

LSA will maintain documentation and provide responses to internal and public comments on the Draft EIR/EA. A response-to-comments matrix outlining how and where the revisions have been made will be included in the revised Draft and Final EIR/EAs. The response-to-comments matrix will be provided to Caltrans for review and concurrence prior to finalization of the Final EIR/EA.

Task 26-6.2 Select Preferred Project Alternative

Functioning as the PDT, Caltrans and the City shall select the Preferred Alternative. This is not included in LSA's scope of services. LSA will incorporate the selected Preferred Alternative into the Final Environmental Document under Task 26-6.3 below.

Task 26-6.3 Final Environmental Document

After public distribution of the Draft ED, LSA will prepare a Final ED to document the selection of the preferred alternative and address public comments on the Draft EIR/EA. The Final ED will be reviewed by Caltrans. Comments will be resolved in a workshop.

Environmental Commitment Record. LSA will develop an ECR. The plan will identify avoidance, minimization, and/or mitigation measures necessary to reduce potential significant environmental impacts to a less than significant level (except where unavoidable significant impacts are determined for climate change). The ECR will identify all design, construction, and post-regulatory mitigation requirements, the responsible party, timing, and verification.

Final ED (EIR/EA). Following the ECR, the Draft Final EIR/EA will be prepared. The proposed EIR Findings and Statement of Overriding Considerations will be prepared. Following Caltrans review, comments will be addressed and the Final EIR/EA will be submitted for approval along with the Checklist for Final Documents and a request to issue a FONSI. Caltrans District 8 Environmental staff will be responsible for all activities required for transmittal of the approved EIR/FONSI and EIR/EA to the CTC.

Deliverables: Draft Final EIR/EA, (electronic), Final EIR/EA (up to 5 hard copies and 20 CD-ROMs), Draft Findings and Statement of Overriding Considerations (SOC)

Task 26-6.4 Notice of Determination (NOD)

Filing of the NOD completes the CEQA ED process. A Draft NOD will be prepared and submitted to Caltrans for review and comment. Following this review, a final NOD will be prepared and submitted to Caltrans for approval concurrent with the submittal of the Final EIR/EA for approval of the FONSI. Caltrans is responsible for submitting a copy of the NOD to the OPR along with proof of payment of an environmental filing fee to the CDFW. The filing fees will be paid directly by the City and will include the CDFW environmental filing fee and a County filing fee. LSA will also prepare a draft Statute of Limitations notice for submittal to Caltrans for its review and transmittal to the FHWA for publication in the Federal Register.

Deliverables: Draft/Final Notice of Determination (NOD), Draft Statute of Limitations Notice

Task 27 Project Report

The Project Report (PR) is prepared following the clearance of the environmental document. This is a separate report from the DPR. The PR is prepared to describe and subsequently obtain approval for any engineering related project changes that were made to the preferred alternative after the environmental process was completed. It is generally a smaller document than the DPR and would include the basic DPR data in addition to the changes. We anticipate preparing the PR for submittal and review. Following the comments from the City and Caltrans, we would finalize the PR for its subsequent approval.

City Required Statements *(required per the RFP)*

Following are City required Statements.

The statements include additional statements issued as part of Addendum 2.

- A. Trantech's proposal shall be incorporated in its entirety as a part of the Consultant's Proposal.
- B. Trantech's proposal will jointly become part of the Agreement for Professional Consultant Services for this project when said Agreement is fully executed by Trantech and the Mayor or City Manager of Moreno Valley.
- C. Trantech's services to be provided, and fees, therefore, will be in accordance with the City's Request for Proposal.
- D. Trantech's proposal includes a single and separate section with the heading "ADDITIONS OR EXCEPTIONS TO THE CITY'S REQUEST FOR PROPOSAL" containing a complete and detailed description of all of the exceptions to the provisions and conditions of this Request for Proposal upon which Trantech's proposal is contingent and which shall take precedence over this Request for Proposal.
- E. Trantech includes a statement of qualifications applicable to this project including the names, qualifications and proposed duties of Trantech's Staff to be assigned to this project.
- F. Trantech's proposal includes a resource allocation matrix within the Proposal.
- G. Trantech's proposal includes statement of sub-consultant's qualifications (including relief personnel) applicable to this project.
- H. **Trantech acknowledges and understands that they will not be allowed to change any sub-consultant without written permission from the City.**
- I. Trantech will document and provide the results of the work to the satisfaction of the City.
- J. Trantech will immediately document and notify the City of any defects or hazardous conditions observed in the vicinity of the project site prior, during, or after the construction work.
- K. A copy of Trantech's hourly rate schedule and a statement that said hourly rate schedule is part of Trantech's proposal for use in invoicing for progress payments and for extra work incurred that is not part of this Request for Proposal. **An itemized cost breakdown for the work described herein is submitted in a separate sealed envelope as part of Trantech's proposal submittal.** Trantech has provided, in the proposal, the number of hours on the job, in addition to the cost proposal. The Cost Proposal is in a sealed envelope.
- L. Trantech does not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.
- M. Trantech affirms that all federal laws and regulations shall be adhered to notwithstanding any state or local laws and regulations.
- N. Trantech shall allow all authorized federal, state, county, and City officials access to place of work, books, documents, papers, fiscal, payroll, materials, and other relevant contract records pertinent to this special project.
- O. Trantech shall comply with the Davis-Bacon Fair Labor Standards Act (40 USC 276-a through a-7), and the implementation regulations issued pursuant thereto (29 CFR Section 1, 5), any amendments thereof and the California Labor Code. Pursuant to the said regulations, entitled "Federal Labor Standards Provisions," Federal Prevailing Wage Decision" and State of California prevailing wage rates, respectively.
- P. Trantech shall comply with the Copeland Anti-Kickback Act (18 USC 874) and the Implementation Regulation (29 CFR 3) issued pursuant thereto, and any amendments thereof.
- Q. Trantech offers and agrees to assign to the City all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 USC Sec. 15) or under the Cartwright Act (Chapter 2 [commencing with Section 16700] of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works or the subcontract.
- R. Trantech is including DBE firms in the proposal.

Additions or Exceptions to City's RFP

Contract:

Transtech currently has an on-call services contract with the City. If selected by the City, we will appreciate an opportunity to discuss with the City's contract administrator the final contract language for a similar contract format and language that we have already signed.

14. To the furthest extent allowed by law (including California Civil Code section 2782.8 if applicable), Consultant shall indemnify, hold harmless ~~and defend~~ the City, the Moreno Valley Community Services District ("CSD"), the Moreno Valley Housing Authority ("Housing Authority") and each of their officers, officials, employees, agents and volunteers from any and all loss, liability, ~~fin~~es, ~~penalties~~, ~~forfeitures~~, costs and damages (whether in contract, tort or strict liability, including but not limited to personal injury, death at any time and property damage), ~~and from any and all claims, demands and actions in law or equity (including reasonable attorney's fees and litigation expenses)~~ ^{reimbursement of} that arise out of, pertain to, or relate to the negligence, recklessness or willful misconduct of Consultant, its principals, officers, employees, agents or volunteers in the performance of this Agreement.

All policies of insurance required hereunder shall be endorsed to provide that the coverage shall not be cancelled ^{or} non-renewed, ~~reduced in coverage or in limits~~ except after 30 calendar day written notice by ^{U.S. First Class} certified mail, ~~return receipt requested~~, has been given to City. Upon issuance by the insurer, broker, or agent of a notice of cancellation, non-renewal, or reduction in coverage or in limits, Consultant shall furnish City with a new certificate and applicable endorsements for such policy(ies). In the event any policy is due to expire during the work to be performed for City, Consultant shall provide a new certificate, and applicable endorsements, evidencing renewal of such policy not less than 15 calendar days prior to the expiration date of the expiring policy.

A ten (10) day written notice to City shall apply to non-payment of premium. Consultant shall provide thirty (30) days written notice to City prior to implementation of a reduction of limits or material change of insurance coverage as specified herein.

Attachment: Agreement with Transtech Engineers, Inc (5472 : AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO

EXHIBIT "C"CITY - SERVICES TO BE PROVIDED
TO CONSULTANT

1. Furnish the Consultant all in-house data which is pertinent to services to be performed by the Consultant and which is within the custody or control of the City, including, but not limited to, copies of record and off-record maps and other record and off-record property data, right-of-way maps and other right-of-way data, pending or proposed subject property land division and development application data, all newly developed and pertinent design and project specification data, and such other pertinent data which may become available to the City.
2. Provide timely review, processing, and reasonably expeditious approval of all submittals by the Consultant.
3. Provide timely City staff liaison with the Consultant when requested and when reasonably needed.

EXHIBIT "D"

TERMS OF PAYMENT

1. The Consultant's compensation shall not exceed \$2,536,589.00.
2. The Consultant will obtain, and keep current during the term of this Agreement, the required City of Moreno Valley business license. Proof of a current City of Moreno Valley business license will be required prior to any payments by the City. Any invoice not paid because the proof of a current City of Moreno Valley business license has not been provided will not incur any fees, late charges, or other penalties. Complete instructions for obtaining a City of Moreno Valley business license are located at: <http://www.moval.org/biz-lic>.
3. The Consultant will electronically submit an invoice to the City along with documentation evidencing services completed to date as specified in the Request for Proposal. Progress payments will be made in accordance with the payment schedule outlined in the Request for Proposal, but in no case will progress payments be made to the Consultant more frequently than once per month. The progress payment is based on actual time and materials expended in furnishing authorized professional services during the preceding calendar month. At no time will the City pay for more services than have been satisfactorily completed and the City Engineer's determination of the amount due for any progress payment shall be final. The consultant will submit all original invoices to Accounts Payable staff at TechInfo-CapProj@moval.org. Accounts Payable questions can be directed to (951) 413-3130.
4. The Consultant agrees that City payments will be received via Automated Clearing House (ACH) Direct Deposit and that the required ACH Authorization form will be

completed prior to any payments by the City. Any invoice not paid because the completed ACH Authorization Form has not been provided will not incur any fees, late charges, or other penalties. The ACH Authorization Form is located at:

http://www.moval.org/city_hall/forms.shtml#bf

5. The minimum information required on all invoices is:
 - A. Vendor Name, Mailing Address, and Phone Number
 - B. Invoice Date
 - C. Vendor Invoice Number
 - D. City-provided Reference Number (e.g. Project, Activity)
 - E. Detailed work hours by class title (e.g. Manager, Technician, or Specialist), services performed and rates, explicit portion of a contract amount, or detailed billing information that is sufficient to justify the invoice amount; single, lump amounts without detail are not acceptable.
6. The City shall pay the Consultant for all invoiced, authorized professional services within thirty (30) days of receipt of the invoice for same.

EXHIBIT "E"

INSURANCE REQUIREMENTS

Minimum Scope of Insurance

Coverage shall be at least as broad as:

1. The most current version of Insurance Services Office (ISO) Commercial General Liability Coverage Form CG 00 01, which shall include insurance for "bodily injury," "property damage" and "personal and advertising injury" with coverage for premises and operations, products and completed operations, and contractual liability.
2. The most current version of Insurance Service Office (ISO) Business Auto Coverage Form CA 00 01, which shall include coverage for all owned, hired, and non-owned automobiles or other licensed vehicles (Code 1- Any Auto).
3. Workers' Compensation insurance as required by the California Labor Code and Employer's Liability Insurance.
4. Professional Liability (Errors and Omissions) insurance appropriate to Consultant's profession.

Minimum Limits of Insurance

Consultant shall maintain limits of liability of not less than:

1. General Liability:
 - \$1,000,000 per occurrence for bodily injury and property damage
 - \$1,000,000 per occurrence for personal and advertising injury
 - \$2,000,000 aggregate for products and completed operations
 - \$2,000,000 general aggregate
2. Automobile Liability:
 - \$1,000,000 per accident for bodily injury and property damage
3. Employer's Liability:
 - \$1,000,000 each accident for bodily injury
 - \$1,000,000 disease each employee
 - \$1,000,000 disease policy limit

Attachment: Agreement with Transtech Engineers, Inc (5472 : AWARD A PROFESSIONAL CONSULTANT SERVICES AGREEMENT TO

4. Professional Liability (Errors and Omissions):

\$1,000,000 per claim/occurrence
\$2,000,000 policy aggregate

Umbrella or Excess Insurance

In the event Consultant purchases an Umbrella or Excess insurance policy(ies) to meet the "Minimum Limits of Insurance," this insurance policy(ies) shall "follow form" and afford no less coverage than the primary insurance policy(ies).

Deductibles and Self-Insured Retentions

Consultant shall be responsible for payment of any deductibles contained in any insurance policy(ies) required hereunder and Consultant shall also be responsible for payment of any self-insured retentions. Any deductibles or self-insured retentions must be declared to, and approved by, the City Manager or his/her designee. At the option of the City Manager or his/her designee, either (i) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers; or (ii) Consultant shall provide a financial guarantee, satisfactory to the City Manager or his/her designee, guaranteeing payment of losses and related investigations, claim administration and defense expenses. At no time shall City be responsible for the payment of any deductibles or self-insured retentions.

Other Insurance Provisions

The General Liability and Automobile Liability insurance policies are to contain, or be endorsed to contain, the following provisions:

1. City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers are to be covered as additional insureds.
2. The coverage shall contain no special limitations on the scope of protection afforded to City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers.
3. Consultant's insurance coverage shall be primary and no contribution shall be required of City.

The Workers' Compensation insurance policy is to contain, or be endorsed to contain, the following provision: Consultant and its insurer shall waive any right of subrogation against City, CSD, Housing Authority and each of their officers, officials, employees, agents and volunteers.

If the Professional Liability (Errors and Omissions) insurance policy is written on a claims-made form:

1. The retroactive date must be shown, and must be before the effective date of the Agreement or the commencement of work by Consultant.
2. Insurance must be maintained and evidence of insurance must be provided for at least 3 years after any expiration or termination of the Agreement or, in the alternative, the policy shall be endorsed to provide not less than a 3-year discovery period.
3. If coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a retroactive date prior to the effective date of the Agreement or the commencement of work by Consultant, Consultant must purchase extended reporting coverage for a minimum of 3 years following the expiration or termination of the Agreement.
4. A copy of the claims reporting requirements must be submitted to City for review.
5. These requirements shall survive expiration or termination of the Agreement.

All policies of insurance required hereunder shall be endorsed to provide that the coverage shall not be cancelled, non-renewed, reduced in coverage or in limits except after 30 calendar day written notice by certified mail, return receipt requested, has been given to City. Upon issuance by the insurer, broker, or agent of a notice of cancellation, non-renewal, or reduction in coverage or in limits, Consultant shall furnish City with a new certificate and applicable endorsements for such policy(ies). In the event any policy is due to expire during the work to be performed for City, Consultant shall provide a new certificate, and applicable endorsements, evidencing renewal of such policy not less than 15 calendar days prior to the expiration date of the expiring policy.

Acceptability of Insurers

All policies of insurance required hereunder shall be placed with an insurance company(ies) admitted by the California Insurance Commissioner to do business in the State of California and rated not less than "A-VII" in Best's Insurance Rating Guide; or authorized by the City Manager or his/her designee.

Verification of Coverage

Consultant shall furnish City with all certificate(s) and **applicable endorsements** effecting coverage required hereunder. All certificates and **applicable endorsements** are to be received and approved by the City Manager or his/her designee prior to City's execution of the Agreement and before work commences.

Report to City Council

TO: Mayor and City Council

FROM: Michael Lloyd, Public Works Director/City Engineer

AGENDA DATE: October 5, 2021

TITLE: AUTHORIZE A PURCHASE ORDER TO ONESOURCE DISTRIBUTORS FOR THE PURCHASE OF EMERGENCY STOCK FOR MORENO VALLEY UTILITY (MVU)

RECOMMENDED ACTION

Recommendations:

1. Authorize a Purchase Order to OneSource Distributors for the purchase of various electrical items used for emergency response by Moreno Valley Utility, funded by MVU's operating fund; and
2. Authorize the purchase of various electrical items as needed for emergency response in an amount not to exceed a total of \$250,000 for fiscal year 2021/2022.

SUMMARY

This report recommends authorizing a purchase order to OneSource Distributors for the purchase of various electrical items used during emergency response for the replacement of streetlights, switches, transformers, and fuses for Moreno Valley Utility. The purchase of these items will allow Moreno Valley Utility to replace MVU infrastructure as needed during an emergency response, ensuring the reliability of the system. MVU operating funds will fund equipment purchases up to the amount authorized for Fiscal Year 2021-2022.

DISCUSSION

Electric utilities across the state, both investor-owned and publicly owned, keep on-hand an inventory of items needed to make timely repairs or replacement of equipment that are part of the infrastructure system. The timely repairs or replacement of equipment helps to maintain reliability of the electrical distribution system and are key to the

continuous emergency response operations of the utility.

A Request for Quote (RFQ) was placed in Planet Bids, the City's online bidding portal, from August 6, 2021 through August 27, 2021. All RFQ Questions and Answers were posted on Planet Bids.

OneSource Distributors was the only respondent. Staff suspects that the single response is due to volatility in the market caused by supply chain issues affecting manufacturers of electrical equipment related to the pandemic and Hurricane Ida. The pricing provided by OneSource is reasonable compared to prior year's pricing, accounting for market fluctuations and is within the original engineer's estimate for these pieces of equipment. As such, staff recommends issuing a Purchase Order to OneSource, which will only be for Fiscal Year 2021/2022.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *Staff recommends this alternative because it will allow the utility to offer timely and needed repairs or replacement to the infrastructure system that serves MVU customers.*
2. Do not approve and authorize the recommended actions as presented in this staff report. *Staff does not recommend this alternative because it will delay the repair or replacement of infrastructure needed to serve MVU customers.*

FISCAL IMPACT

The equipment purchases will be paid from MVU operating funds. There is no impact to the General Fund.

Funds are available in account number 6010-70-80-45510-710134 for Fiscal Year 2021/2022.

NOTIFICATION

Publication of the Agenda.

PREPARATION OF STAFF REPORT

Prepared By:
Lesia Bowers
Sr. Accountant

Department Head Approval:
Michael Lloyd, P.E.
Public Works Director/City Engineer

Concurred By:
Jeannette Olko
Electric Utility Division Manager

CITY COUNCIL GOALS

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

CITY COUNCIL STRATEGIC PRIORITIES

- 1. Economic Development
- 2. Public Safety
- 3. Library
- 4. Infrastructure
- 5. Beautification, Community Engagement, and Quality of Life
- 6. Youth Programs

Objective 4.1: Develop a Moreno Valley Utility Strategic Plan to prepare for the 2022 expiration of the ENCO Utility Systems agreement.

Report to City Council

TO: Mayor and City Council

FROM: Michael Lloyd, Public Works Director/City Engineer

AGENDA DATE: October 5, 2021

TITLE: APPROVE THE 2022 ANNUAL SYSTEM RESOURCE ADEQUACY PLAN FOR MORENO VALLEY UTILITY

RECOMMENDED ACTION

Recommendations:

1. Approve the Annual System Resource Adequacy Plan (“Plan”) for calendar year 2022 and authorize the City Manager to make minor adjustments to the Plan as necessary to meet State requirements; and
2. Authorize filing of the 2022 Annual System Resource Adequacy Plan with the California Independent System Operator (CAISO) in compliance with Section 40 of its tariff.

SUMMARY

This report recommends that the City Council approve the Moreno Valley Utility (MVU) Annual Resource Adequacy Plan (Plan) for calendar year 2022. The Plan represents the amount of capacity needed to not only meet the requirement of the California Independent System Operator (CAISO), but also projected electricity requirements (including a reserve) of MVU customers.

DISCUSSION

The CAISO is the agency responsible for the reliable operation of the electric transmission system in California. Section 40 of the CAISO tariff governs the Resource Adequacy program requirements for load serving entities (such as MVU) participating in CAISO markets. Section 40 requires utilities to have a plan in place ensuring that utilities will have enough capacity available to meet customer demands for electricity. An annual report showing the utilities’ purchases of adequate capacity, known as Resource Adequacy (RA), is to be approved by their governing boards and submitted to

the CAISO by October 31 of each year for the following calendar year.

The capacity requirement is calculated based upon a percentage of the utility's monthly forecasted peak demand. The capacity requirement needed to comply with the CAISO Tariff for 2022 is set at 115% of MVU's forecasted monthly peak demand.

MVU has secured capacity through existing contracts to meet a majority of the Resource Adequacy requirement under the CAISO Tariff. However, multiple statewide energy issues such as the drought and delays in permitting of new capacity resources have led to a substantial shortfall in supply for 2022. In fact, the CAISO itself was unable to secure sufficient resources recently. Despite the significant supply shortage, MVU has developed the attached draft Plan and will continue to solicit RA for arrangements that are reasonable and consistent with MVU's Energy Risk Management Policy.

Staff recommends that the City Council approve the draft Annual Plan as presented in order to meet the October 31 State deadline. Final supply plans from some existing suppliers detailing expected capacity for the year have not yet been finalized as they complete calculations of net qualifying capacity for calendar year 2022. As such, staff is seeking Council authorization for the City Manager to make minor adjustments to the Plan, should they be needed, prior to submittal to the CAISO.

ALTERNATIVES

1. Approve the 2022 Annual Resource Adequacy Plan as described above for Moreno Valley Utility. Staff recommends this alternative as the Plan will keep Moreno Valley Utility in compliance with CAISO requirements.
2. Do not approve the 2022 Annual Resource Adequacy Plan for Moreno Valley Utility. Staff does not recommend this alternative as MVU will not have a calendar year 2022 Annual Plan in place to comply with the CAISO Reliability Requirement Tariff.

FISCAL IMPACT

There is no fiscal impact to submit the Annual Resource Adequacy Plan for calendar year 2022.

Attachment: MVU 2022 RA Plan (5518 : APPROVE 2022 ANNUAL SYSTEM RA PLAN)

Report to City Council

TO: Mayor and City Council

FROM: Michael Lloyd, Public Works Director/City Engineer

AGENDA DATE: October 5, 2021

TITLE: ADOPTION OF A RESOLUTION AUTHORIZING THE ACCEPTANCE OF THE REAL PROPERTY DONATION FOR APN 487-370-015 LOCATED ON THE WEST SIDE OF MORRISON STREET, NORTH OF COTTONWOOD AVENUE

RECOMMENDED ACTION

Recommendation:

1. Adopt Resolution No. 2021-XXX authorizing the acceptance of real property and allowing the City Manager to execute all documents necessary for the transaction of the real property donation of parcel APN 487-370-015

SUMMARY

This report recommends the Adoption of Resolution No. 2021-XXX accepting the real property donation of APN 487-370-015 to the City. The report also recommends delegating the authority to accept and execute all necessary transaction documents to the City Manager.

DISCUSSION

The subject property is generally located on the east side of Morrison Street, south of Dracaea Avenue and north of Cottonwood Avenue. The property is just north of and adjacent to City-owned Fire Station 99 and is surrounded to the east and north by Morrison Park. The property fronts Morrison Street to the west. The total area is approximately 4.25 acres and is zoned Open Space (OS).

The current owner of parcel APN 487-370-015 has approached the City and offered to donate the property to the City without any restrictions in an as-is condition. The property owner's offer letter is attached for reference. Staff has reviewed the offer and

the property data. There are three existing Code/Fire citations recorded against the property for prior violations. These will be resolved by City staff once the property has been accepted by the City.

Staff recommends that the City Council accept the property pursuant to Government Code Section 37354. Additionally, the Government Code provides that an agency may authorize an agent or officer to accept deeds or grants conveying easements or real property to the agency. Staff recommends to adopt the Resolution No. 2021-XXX and accept the real property donation of parcel APN 487-370-015 to the City.

ALTERNATIVES

1. Approve and direct the recommended actions as presented in this staff report. *This alternative will allow for property APN 487-370-015 to be dedicated (gifted) to the City.*
2. Do not approve and direct the recommended actions as presented in this staff report. *This alternative will result in property APN 487-370-015 not being dedicated (gifted) to the City.*

FISCAL IMPACT

The City will cover any costs associated with the transfer of title of property APN 487-370-015 to the City, which is estimated to be \$5,000. The City will forgive approximately \$3,400 in accumulated liens currently attached to the property. The City will be responsible for future maintenance of the property.

NOTIFICATION

Publication of agenda.

PREPARATION OF STAFF REPORT

Prepared By:
Josh Frohman
Senior Engineer, P.E.

CITY COUNCIL GOALS

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

RESOLUTION NO. 2021-XXX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING ACCEPTANCE OF THE REAL PROPERTY DONATION FOR APN 487-370-015

WHEREAS, the City has received an offer from Park Emerald LLC (“Emerald”) to donate to the City a 4.25-acre parcel of vacant land located at the northeast corner of Cottonwood Avenue and Morrison Street (APN 487-370-015) (the “Property”); and

WHEREAS, the offer of donation contains an express disclaimer of any restrictions, intentions, conditions, or specific purpose of the donation, other than as a gift to the City; and

WHEREAS, Section 37354 of the Government Code Authorizes the City to “accept or reject any gift, bequest, or devise made to or for the city, or to or for any of its officers in their official capacity or in trust for any public purpose”; and

WHEREAS, Section 27281 of the Government Code provides that deeds or grants conveying any interest in or easement upon real estate to a political corporation or governmental agency for public purposes shall not be accepted for recordation without the consent of the grantee evidenced by its certificate or resolution of acceptance attached to or printed upon the deed or grant.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Moreno Valley, California, as follows:

1. The City Manager of the City of Moreno Valley is authorized to accept and consent to the gift and donation of the real property located at the northeast corner of Cottonwood Avenue and Morrison Street (APN 487-370-015).
2. The City Manager or his designee shall execute such instruments and take such other actions as are necessary or appropriate to accomplish the City’s acquisition of the property, including without limitation paying the City’s share of any fees and charges related to escrow, title, recording and taxes if applicable.

RESOLUTION PASSED AND ADOPTED, at the regular meeting of the City Council of the City of Moreno Valley on the 5th day of October, 2021.

Dear Assistant City Manager Wolfe:

As the manager of Park Emerald LLC (“Emerald”), we are writing to notify the City of Moreno Valley (the “City”) that, pursuant to our discussions with the City, Emerald intends to donate to the City at no cost, a ±4.25-acre parcel of vacant land located at the northeast corner of Cottonwood Avenue and Morrison Street (APN 487-370-015) (the “Property”) which immediately adjacent to Morrison Park.

The donation, dedication and/or transfer of the Property is not directly or indirectly related to the satisfaction or fulfillment of any obligations related to any past, present, or future real estate development project, subdivision, or master planned community. Further, Emerald is not receiving any direct benefit, including monetary compensation, fee credits, or reimbursements, for its donation of the Property to the City.

Emerald is transferring its Property to the City without requiring from the City any guarantees or restrictions related to the current land use or future land use of the Property.

The City shall accept the Property in an as-is, where-is condition, which includes all items currently reported on the property’s Title Report. Upon the transfer of the Property, the City shall be responsible for all future costs and obligations related to the property.

Emerald will need to complete the transfer of the Property to the City prior to December 31, 2021.

We look forward to working with the City to complete the donation of the Property.

Regards,

Bob Bakshi
Park Emerald LLC

Attachment: 2021.09.20_Cottonwood_City Donation Letter (5524 : APPROVE AGREEMENT AND ADOPTION OF RESOLUTION FOR ACCEPTING

Report to City Council

TO: Mayor and City Council

FROM: Michael Lloyd, Public Works Director/City Engineer

AGENDA DATE: October 5, 2021

TITLE: AUTHORIZE THE AWARD OF PROFESSIONAL SERVICES AGREEMENTS TO ACCO, F.M. THOMAS, AND HASCO FOR HEATING, VENTILATION, AND AIR-CONDITIONING (HVAC) SERVICES AT CITY FACILITIES AND SITES

RECOMMENDED ACTION

Recommendations:

1. Award a five-year contract to ACCO for a total not-to-exceed amount of \$800,000 for professional heating, ventilation, air conditioning, and related equipment maintenance and repair; and authorize the City Manager to execute contracts in conformance with the attached Agreement using fund 7310, Facilities Maintenance;
2. Award a five-year contract to F.M. Thomas and a five-year contract with HASCO each for a total not-to-exceed amount of \$100,000 for professional heating, ventilation, air conditioning, and related equipment maintenance and repair; and authorize the City Manager to execute contracts in conformance with the attached Agreements using fund 7310, Facilities Maintenance;
3. Authorize the issuance of annual purchase orders for ACCO, F.M. Thomas, and HASCO on an as needed basis each year of the Agreement term subject to funds available in the City Council approved Operating Budget; and
4. Authorize the Director of Public Works/City Engineer to execute any amendments, purchase orders and/ or change orders not-to-exceed the authorized amounts, contingent upon approved budget and approval of the City Attorney.

SUMMARY

This report recommends approval of a \$800,000 contract with one contractor (ACCO) and \$100,000 contracts to two contractors (F.M. Thomas and HASCO) for professional HVAC services over a five-year term to provide timely professional services for the testing, maintenance, repair, replacement, certification and/ or service, and regular maintenance and repair services for City owned HVAC related equipment. Thirty-seven of thirty-eight City facilities require HVAC services, including Police and Fire Stations.

DISCUSSION

The City is responsible for ensuring that public facilities are safe and properly operational for the general public and employees, including fire stations, the Public Safety Building, and the Emergency Operations Center. Properly functioning HVAC systems are an essential part of the City's buildings. Required HVAC services range from routine weekly maintenance items to emergency responses as several of the City's buildings are operational 24-hours per day. As such, the need for several licensed on-call HVAC service providers, with the ability to perform a wide variety of scheduled maintenance and on-call emergency repair services, is critical.

Requests for Proposal for testing, maintenance, repair, replacement, certification, and/or service of heating, ventilation, air conditioning (HVAC), boiler, refrigeration, ice machine equipment, and associated controls systems and components went out for bid on May 20, 2021. Formal bidding procedures were followed in conformance with the Public Contract Code. Bids were received via the electronic bid management system, PlanetBids, by June 17, 2021, and three bids were received.

Staff reviewed the bid proposals and found all three to be responsible bidders in possession of valid licenses and certifications with costs within the expected amount. No outstanding issues were identified through review of the references submitted by the bidders. All bidders have been notified by a Notice of Intent to Award letter.

Staff recommends awarding contracts in the following manner to allow for additional service flexibility with full coverage; and maximizing trade expertise and response times for these critical services:

- ACCO as the primary contractor as the proposal results indicate that they are the best value as determined by ability to perform and reasonableness of fees; and
- F.M. Thomas and HASCO as secondary contractors to provide additional service and response on an as needed basis.

There is an aggregate not-to-exceed amount of \$1,000,00.00 projected for these Agreements based on a trend analysis covering five years of related expenses and potential cost escalations due to inflation. The services will be utilized on a regular basis for prescribed maintenance; and on an as needed basis for emergency repair under direction from the Public Works Department.

Approval of the recommended actions would support Objective 4 of the *Momentum MoVal* Strategic Plan: “Manage and maximize Moreno Valley’s public Infrastructure to ensure an excellent quality of life, develop and implement innovative, cost effective infrastructure maintenance programs, public facilities management strategies, and capital improvement programming and project delivery.”

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. *This alternative will provide for the maintenance and repair of HVAC systems in all City facilities and sites.*
2. Do not approve and authorize the recommended actions as presented in this staff report. *This alternative will delay the timely testing, certification, maintenance and repair of HVAC and related equipment and components, which would result in a lapse in properly operating equipment, equipment deterioration and potential increased costs.*

FISCAL IMPACT

Funding is available in the approved two-year Operating Budget for Fiscal Year 2021/22 and 2022/23. The aggregate average annual cost of \$200,000 will be allocated each fiscal year for required services, subject to change based on changing needs; and are subject to the City Council approval of future Operating Budget.

CITY COUNCIL GOALS

Advocacy. Develop cooperative intergovernmental relationships and be a forceful advocate of City policies, objectives, and goals to appropriate external governments, agencies and corporations.

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

Positive Environment. Create a positive environment for the development of Moreno Valley's future.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

- 1. Economic Development
- 2. Public Safety
- 3. Library
- 4. Infrastructure
- 5. Beautification, Community Engagement, and Quality of Life
- 6. Youth Programs

City of Moreno Valley

AGREEMENT FOR ON-SITE AND/OR PROFESSIONAL SERVICES

This Agreement is made by and between the City of Moreno Valley, California, a municipal corporation, with its principal place of business at 14177 Frederick Street, Moreno Valley, CA 92552, hereinafter referred to as the “City”, and **ACCO Engineered Systems, a California Corporation**, with its principal place of business at **888 East Walnut Street, Pasadena, CA 91101** hereinafter referred to as the “Contractor,” based upon City policies and the following legal citations:

RECITALS

- A. Government Code Section 53060 authorizes the engagement of persons to perform special services as independent contractors;
- B. Contractor desires to perform and assume responsibility for the provision of **professional heating, ventilation, air conditioning, and related equipment maintenance and repair** contracting services required by the City on the terms and conditions set forth in this Agreement. Contractor represents that it is experienced in providing professional **heating, ventilation, air conditioning, and related equipment maintenance and repair** contracting services, is licensed in the State of California, if applicable;
- C. City desires to engage Contractor to render such services for **professional heating, ventilation, air conditioning, and related equipment maintenance and repair** as set forth in this Agreement;
- D. The public interest, convenience, necessity and general welfare will be served by this Agreement; and
- E. This Agreement is made and entered into effect October 19, 2021.

TERMS

1. CONTRACTOR INFORMATION:

Contractor’s Name: AACO Engineered Systems
 Address: 888 East Walnut Street
 City: Pasadena State: CA Zip: 91101
 Business Phone: 424-394-8559
 Other Contact Number: N/A
 Business License Number: 120696
 Federal Tax I.D. Number: 954873822

2. CONTRACTOR SERVICES, FEES, AND RELEVANT DATES:

- A. The Contractor’s scope of service is described in Exhibit “A” attached hereto and incorporated herein by this reference, as needed and as directed any and all

services rendered without prior written authorization of the City shall be performed at Contractors' risk and expense.

- B. The City's responsibilities, other than payment, are described in Exhibit "B" attached hereto and incorporated herein by this reference.
 - C. Payment terms are provided in Exhibit "C" attached hereto and incorporated herein by this reference.
 - D. The term of this Agreement shall be from **October 19, 2021 to June 30, 2026** unless terminated earlier as provided herein, subject to allocation of funds pursuant to a duly adopted City budget. The City acknowledges that it will not unreasonably withhold approval of the Contractor's requests for extensions of time in which to complete the work required. The Contractor shall not be responsible for performance delays caused by others or delays beyond the Contractor's reasonable control (excluding delays caused by non-performance or unjustified delay by Contractor, his/her/its employees, or subcontractors), and such delays shall extend the time for performance of the work by the Contractor.
3. **STANDARD TERMS AND CONDITIONS:**

- A. Control of Work. Contractor is solely responsible for the content and sequence of the work, and will not be subject to control and direction as to the details and means for accomplishing the anticipated results of services. The City will not provide any training to Contractor or his/her/its employees.
- B. Intent of Parties. Contractor is, and at all times shall be, an independent contractor and nothing contained herein shall be construed as making the Contractor or any individual whose compensation for services is paid by the Contractor, an agent or employee of the City, or authorizing the Contractor to create or assume any obligation or liability for or on behalf of the City, or entitling the Contractor to any right, benefit, or privilege applicable to any officer or employee of the City.
- C. Labor Laws and Prevailing Wages; Subcontracting. Contractor may retain or subcontract for the services of other necessary contractors with the prior written approval of the City. Payment for such services shall be the responsibility of the Contractor. Any and all subcontractors shall be subject to the terms and conditions of this Agreement, with the exception that the City shall have no obligation to pay for any subcontractor services rendered. Contractor shall be responsible for paying prevailing wages where required by law [See California Labor Code Sections 1770 through 1777.7].

All work or services performed within the State of California pursuant to this Agreement by Contractor, Contractor's employees and independent contractors, or Contractor's subcontractors and its subcontractors' employees and independent contractors shall be performed by individuals lawfully permitted to perform such work or services in the State of California and/ or Federal labor laws, rules and regulations including, but not limited to, any State or Federal law, rule or regulation prohibiting the employment of undocumented

workers or any other person not lawfully permitted to perform said work or services in the State of California or the United States of America.

Contractor represents that it is an equal opportunity employer and shall not discriminate against any subcontractor, employee, or applicant (“person”) for employment because of denial of family and medical care leave; race; religious creed (including religious dress and grooming practices); color; national origin (including language use restrictions); ancestry; physical disability or mental disability (including HIV and Aids); medical condition (cancer and genetic characteristics); genetic information; military or veterans status; marital status; gender, gender identity, and gender expression; sex (which includes pregnancy, childbirth, breastfeeding and medical conditions related to pregnancy, childbirth or breastfeeding); age or sexual orientation. Unless otherwise permitted under the law, Contractor shall not refuse to hire or employ any such person or refuse to select any such person for a training program leading to employment, or bar or discharge any such person from employment or from a training program leading to employment, or otherwise discriminate against any such person in compensation or in terms, conditions, or privileges of employment.

Contractor and all of Contractor’s subcontractors, if any, shall pay each employee engaged in all applicable trades or occupation not less than the prevailing hourly wage rate for work of a similar character in the locality in which the public work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work. In accordance with the provisions of Section 1770 of the California Labor Code (“Labor Code”), the Director of Department of Industrial Relations of the State of California has determined the general prevailing rates of wages and employer payments for health and welfare, pension, vacation, travel time, and subsistence pay as provided for in Labor Code Section 1773.8, apprenticeship or other training programs authorized by Labor Code Section 3093 and similar purposes applicable to the work to be done. Said wages are available through the State of California Department of Industrial Relations’ Internet website at <http://www.dir.ca.gov/dlsr/PWD/index.htm> and are on file at City Hall, as provided in Section 1773.2 of the Labor Code. Said rates shall be posted at the Project site where work is to be performed, in accordance with Labor Code Section 1773.2. Contractor shall access a copy of the wage rate determination and shall make all subcontractors, if any, aware of the determination. As the wage determination for each craft reflects and expiration date, it shall be the Contractor’s responsibility to ensure that the prevailing wage rates of concern are current and paid. Subject to the safe harbor provisions of Labor Code Section 1775, Contractor shall forfeit to the CITY an amount not to exceed two hundred dollars (\$200) for each calendar day or portion thereof, as set by the Labor Commissioner in accordance with the terms of Labor Code section 1775, for each laborer, workmen or mechanics employed that is paid less than the general prevailing rate of wages herein referred to and stipulated for any work done under the proposed contract, by him or by any subcontractor under him, in violation of the provisions of the Labor Code, and in particular, Sections

1170 to 1781 inclusive. Contractor and any and all or its subcontractors shall forfeit to the CITY twenty-five dollars (\$25) for each worker employed in the performance of this Agreement for each calendar day during which the worker is required or permitted to work more than eight (8) hours in any one calendar day and forty (40) hours in any one calendar week in violation of the provisions of Section 1813 of the Labor Code. In the event the total cost of the Project is thirty thousand dollars (\$30,000.00) or more, Contractor shall further comply with provisions set forth in Labor Code Section 1777.5 pertaining to employment of properly registered apprentices, including without limitation the obligation to (i) pay employed apprentices the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered and shall be employed only at the work of craft or trade to which he or she is registered; (ii) employ apprentices in at least the ratio as set forth in said section; (iii) submit contract award information to an applicable apprenticeship program; and (iv) contribute to California Apprenticeship Council.

Contractor and all subcontractors hired to perform any work under the Project shall keep accurate payroll record, including the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each worker, in accordance with Section 1776 of the Labor Code. Payroll records shall be on forms provided by the Division of Labor Standards Enforcement (“DLSE”) or in a manner containing the same information as the forms provided by the DLSE. Failure to comply with the above may result in monetary penalties to the Contractor or affected subcontractor. Payroll records shall be verified by written declaration made under penalty of perjury, that the information contained in the records is true and correct. Contractor and any and all subcontractors shall make a certified copy of all payroll records available for inspection by DLSE, The CITY or any member of the public and otherwise provide certified copies of such records to any of the foregoing within ten (10) days of Contractor’s and subcontractor’s receipt of written request therefor. Failure to comply with the above may result in monetary penalties, in accordance with Labor Code Section 1776(d) and (h).

Notwithstanding anything else to the contrary, Contractor hereby acknowledges that all contractors must be registered with the Department of Industrial Relations (“Department”) pursuant to Labor Code Section 1725.5 in order to be qualified to bid on be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any public work contract, including the Agreement, that is subject to the payment of prevailing wages. Contractor represents and warrants that Contractor is registered with the Department in the manner prescribed by the Department and has paid the requisite application fee, as required by Labor Code Section 1725.5. Moreover, prior to Contractor entering into any contracts with any subcontractor, Contractor shall obtain proof that all such subcontractors have also registered with the Department in accordance with Section 1725.5.

- D. Conformance to Applicable Requirements. All work prepared by Contractor shall be subject to the approval of City.

- E. Substitution of Key Personnel. Contractor has represented to City that certain key personnel will perform and coordinate the services under this Agreement. Should one or more of such personnel become unavailable, Contractor may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Contractor cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. As discussed below, any personnel who fail or refuse to perform the services in a manner acceptable to the City, or who are determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the project or a threat to the safety of persons or property, shall be promptly removed from the project by the Contractor at the request of the City. The key personnel for performance of this Agreement are as follows: **Oscar Villalobos**.
- F. City's Representative. The City hereby designates the City Manager, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). Contractor shall not accept direction or orders from any person other than the City's Representative or his or her designee.
- G. Contractor's Representative. Contractor hereby designates **Oscar Villalobos**, or his or her designee, to act as its representative for the performance of this Agreement ("Contractor's Representative"). Contractor's Representative shall have full authority to represent and act on behalf of the Contractor for all purposes under this Agreement. The Contractor's Representative shall supervise and direct the services, using his or her best skill and attention, and shall be responsible for all means, methods, techniques, sequences and procedures and for the satisfactory coordination of all portions of the services under this Agreement.
- H. Legal Considerations. The Contractor shall comply with applicable federal, state, and local laws in the performance of this Agreement. Contractor shall be liable for all violations of such laws and regulations in connection with services. If the Contractor performs any work knowing it to be contrary to such laws, rules and regulations and without giving written notice to the City, Contractor shall be solely responsible for all costs arising therefrom. Contractor shall defend, indemnify and hold City, its officials, directors, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.
- I. Standard of Care; Performance of Employees. Contractor shall perform all services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Contractor represents and maintains that it is skilled in the profession necessary to perform the services. Contractor warrants that all employees and subcontractor shall have sufficient skill and experience to perform the services assigned to them. Finally, Contractor represents that it, its employees and subcontractors have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the services and that such licenses and approvals shall be maintained throughout the term of this Agreement. Any employee of the

Contractor or its subcontractors who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the services in a manner acceptable to the City, shall be promptly removed from the project by the Contractor and shall not be re-employed to perform any of the services or to work on the project.

- J. Contractor Indemnification. Contractor shall indemnify, defend and hold the City, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District (CSD), their officers, agents and employees harmless from any and all claims, damages, losses, causes of action and demands, including, without limitation, the payment of all consequential damages, expert witness fees, reasonable attorney's fees and other related costs and expenses, incurred in connection with or in any manner arising out of Contractor's performance of the work contemplated by this Agreement, except for any such claim arising out of the sole and/or active negligence or willful misconduct of the City. Acceptance of this Agreement signifies that the Contractor is not covered under the City's general liability insurance, employee benefits, or worker's compensation. It further establishes that the Contractor shall be fully responsible for such coverage. Contractor's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees.
- K. Additional Indemnity Obligations. Contractor shall defend, with counsel of City's choosing and at Contractor's own cost, expense and risk, any and all claims, suits, actions or other proceedings of every kind covered by Section "J" that may be brought or instituted against City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees. Contractor shall pay and satisfy any judgment, award or decree that may be rendered against City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees as part of any such claim, suit, action or other proceeding. Contractor shall also reimburse City for the cost of any settlement paid by City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees as part of any such claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Contractor shall reimburse City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided.
- L. Insurance Requirements. the Contractor will comply with the following insurance requirements at its sole expense. Insurance companies shall be rated (A Minus: VII—Admitted) or better in Best's Insurance Rating Guide and shall be legally licensed and qualified to conduct business in the State of California:

The Contractor shall procure and maintain, at its sole expense:

X Workers' Compensation Insurance in such amounts as will fully comply with the laws of the State of California and which shall indemnify, insure and provide legal defense for the Contractor and the City, the Housing Authority and CSD against any loss, claim, or damage arising from any injuries or occupational diseases happening to any worker employed by the Contractor in the course of carrying out the Agreement. This coverage may be waived if the Contractor is determined to be functioning as a sole proprietor and the city provided form "Exception to Worker's Compensation Coverage" is signed, notarized and attached to this Agreement.

I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this contract.

Signature, Title

X General Liability Insurance—to protect against loss from liability imposed by law for damages on account of bodily injury, including death, and/or property damage suffered or alleged to be suffered by any person or persons whomever, resulting directly or indirectly from any act or activities of the Contractor, sub-Contractor, or any person acting for the Contractor or under its control or direction. Such insurance shall be maintained in full force and effect throughout the terms of the Agreement and any extension thereof in the minimum amounts provided below:

Bodily Injury	\$1,000,000 per occurrence/ \$2,000,000 aggregate
Property Damage	\$1,000,000 per occurrence/ \$2,000,000 aggregate

X Liability and Property Damage Insurance coverage for owned and non-owned automotive equipment operated on City/CSD/Housing Authority premises. Such coverage limits shall not be less than \$1,000,000 combined single limit.

X A Certificate of Insurance and appropriate additional insured endorsement evidencing the above applicable insurance coverage shall be submitted to the City prior to the execution of this Agreement. In addition to providing such insurance documentation prior to entering into the agreement, contractor shall deliver a current certificate of insurance and applicable endorsement annually upon request of city and as may otherwise be reasonably requested by the City.

The Certificate of Insurance or an appropriate binder shall bear an endorsement containing the following provisions:

Solely as respect to services done by or on behalf of the named insured for the City of Moreno Valley, it is agreed that the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, their officers, employees and agents are included as additional insured under this policy and the coverage(s) provided shall be primary insurance and not contributing with any other insurance available to the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, its officers, employees and agents, under any third party liability policy

The terms of the insurance policy or policies issued to provide the above coverage shall neither be amended to reduce the required insurance limits and coverages nor shall such policies be canceled by the carrier without thirty (30) days prior written notice by certified or registered mail of amendment or cancellation to the City, except that cancellation for non-payment of premium shall require ten (10) days prior written notice by certified or registered mail. In the event the insurance is canceled, the Contractor shall, prior to the cancellation date, submit new evidence of insurance in the amounts established.

- M. Payment Bond. A bond in an amount at least equal to one hundred percent (100%) of the Total Agreement as security for payment of persons performing labor and/or furnishing materials in connection with the Agreement.

In conformance with the State of California Public Contract Code, Part 5, Section 22300, Contractor may substitute securities for any monies withheld by the City to ensure performance under this Agreement.

At the request and expense of Contractor, Contractor has the option of establishing an escrow account with a state or federally chartered bank which shall serve as an escrow agent, for Contractor's direct deposit of securities as a substitute for retention earnings required to be withheld by the City. Upon Contractor's completion of its obligations hereunder, the escrow agent shall return the securities to Contractor. The escrow agent shall notify the City within ten (10) days after deposit of the securities. The market value of the securities at the time of the substitution shall be at least equal to the cash amount then required to be withheld as retention. Securities shall be held in the name of the City and shall designate Contractor as the beneficial owner. Alternatively, on written request of Contractor, the City shall make payments of the retention earnings directly to the escrow account.

- N. Intellectual Property. Any system or documents developed, produced or provided under this Agreement, including any intellectual property discovered or developed by Contractor in the course of performing or otherwise as a result of its work, shall become the sole property of the City unless explicitly stated

otherwise in this Agreement. The Contractor may retain copies of any and all material, including drawings, documents, and specifications, produced by the Contractor in performance of this Agreement. The City and the Contractor agree that to the extent permitted by law, until final approval by the City, all data shall be treated as confidential and will not be released to third parties without the prior written consent of both parties.

- O. Entire Agreement. This Agreement constitutes the entire agreement between the parties. There are no understandings, agreements, or representations of warranties, expressed or implied, not specified in this Agreement. This Agreement applies only to the current proposal as attached. This Agreement may be modified or amended only by a subsequent written Agreement signed by both parties. Assignment of this Agreement is prohibited without prior written consent.
- P. (a) The City may terminate the whole or any part of this Agreement at any time without cause by giving at least ten (10) days written notice to the Contractor. The written notice shall specify the date of termination. Upon receipt of such notice, the Contractor may continue work through the date of termination, provided that no work or service(s) shall be commenced or continued after receipt of the notice which is not intended to protect the interest of the City. The City shall pay the Contractor within thirty (30) days after receiving any invoice after the date of termination for all non-objected to services performed by the Contractor in accordance herewith through the date of termination.
- (b) Either party may terminate this Agreement for cause. In the event the City terminates this Agreement for cause, the Contractor shall perform no further work or service(s) under the Agreement unless the notice of termination authorizes such further work.
- (c) If this Agreement is terminated as provided herein, City may require Contractor to provide all finished or unfinished documents and data and other information of any kind prepared by Contractor in connection with the performance of services under this Agreement. Contractor shall be required to provide such documents and other information within fifteen (15) days of the request.
- (d) In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, similar to those terminated.
- Q. Payment. Payments to the Contractor pursuant to this Agreement will be reported to Federal and State taxing authorities as required. The City will not withhold any sums from compensation payable to Contractor. Contractor is independently responsible for the payment of all applicable taxes. Where the payment terms provide for compensation on a time and materials basis, the Contractor shall maintain adequate records to permit inspection and audit of the Contractor's time and materials charges under the Agreement. Such records shall be retained by the Contractor for three (3) years following completion of the services under the Agreement.

- R. Restrictions on City Employees. The Contractor shall not employ any City employee or official in the work performed pursuant to this Agreement. No officer or employee of the City shall have any financial interest in this Agreement in violation of federal, state, or local law.
- S. Choice of Law and Venue. The laws of the State of California shall govern the rights, obligations, duties, and liabilities of the parties to this Agreement, and shall govern the interpretation of this Agreement. Any legal proceeding arising from this Agreement shall be brought in the appropriate court located in Riverside County, State of California.
- T. Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Contractor:

ACCO Engineered Systems
 888 East Walnut Street
 Pasadena, CA 91101
 Attn: Oscar Villalobos

City:

City of Moreno Valley
 14177 Frederick Street
 P.O. Box 88005
 Moreno Valley, CA 92552
 Attn: Fleet & Facilities Supervisor

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

- U. Time of Essence. Time is of the essence for each and every provision of this Agreement.
- V. City's Right to Employ Other Contractors. City reserves right to employ other contractors in connection with this project.
- W. Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both parties.
- X. Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a party shall give the other party any contractual rights by custom, estoppel, or otherwise.

- Y. No Third Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the parties.
- Z. Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.
- AA. Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.
- BB. Assignment or Transfer. Contractor shall not assign, hypothecate, or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of the City. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.
- CC. Supplementary General Conditions. (for projects that are funded by Federal programs). The following provisions, pursuant to 44 Code of Federal Regulations, Part 13, Subpart C, Section 13.36, as it may be amended from time to time, are included in the Agreement and are required to be included in all subcontracts entered into by Contractor for work pursuant to the Agreement, unless otherwise expressly provided herein. These provisions supersede any conflicting provisions in the General Conditions and shall take precedence over the General Conditions for purposes of interpretation of the General Conditions. These provisions do not otherwise modify or replace General Conditions not in direct conflict with these provisions. Definitions used in these provisions are as contained in the General Conditions.
1. Contractor shall be subject to the administrative, contractual, and legal remedies provided in the General Conditions in the event Contractor violates or breaches terms of the Agreement.
 2. City may terminate the Agreement for cause or for convenience, and Contractor may terminate the Agreement, as provided the General Conditions.
 3. Contractor shall comply with Executive Order 11246 of September 24, 1965, entitled Equal Employment Opportunity, as amended by Executive Order 11375 of October 13, 1967, and as supplemented in Department of Labor regulations (41 CFR chapter 60). (All construction contracts awarded in excess of \$10,000 by City and/or subcontracts in excess of \$10,000 entered into by Contractor.)
 4. Contractor shall comply with the Copeland Anti-Kickback Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3) (All contracts and subcontracts for construction or repair.)
 5. Contractor shall comply with the Davis-Bacon Act (40 U.S.C. 276a to 276a7) as supplemented by Department of Labor regulations (29 CFR Part 5).
 6. Contractor shall comply with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327330) as supplemented by Department of Labor regulations (29 CFR Part 5).

7. Contractor shall observe CITY requirements and regulations pertaining to reporting included in the General Conditions.
8. Patent rights with respect to any discovery or invention which arises or is developed in the course of or under the Agreement shall be retained by the City.
9. Copyrights and rights in data developed in the course of or under the Agreement shall be the property of the City. FEMA/CalOES reserve a royalty-free, nonexclusive, irrevocable license to reproduce, publish or otherwise use or authorize to others to use for federal purposes a copyright in any work developed under the Agreement and/or subcontracts for work pursuant to the Agreement.
10. Contractor shall provide access by the City, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives to any books, documents, papers, and records of the contractor which are directly pertinent to that specific contract for the purpose of making audit, examination, excerpts, and transcriptions.
11. Contractor shall retain all required records for three years after City makes final payments and all other pending matters relating to the Agreement are closed.
12. Contractor shall comply with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15). (This provision applies to contracts exceeding \$100,000 and to subcontracts entered into pursuant to such contracts.)
13. Contractor shall comply with mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94163, 89 Stat. 871).

DD. Civil Code Section 1542 Waiver

- a. Contractor expressly waives any and all rights and benefits conferred upon it by the provisions of Section 1542 of the California Civil Code which reads as follows:

“A general release does not extend to claims that the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release and that, if known by him or her, would have materially affected his or her settlement with the debtor or released party.”

- b. This waiver shall be effective as a bar to any and all actions, fees, damages, losses, claims, liabilities and demands of whatsoever character, nature and kind that are known or unknown, or suspected or unsuspected, including, without limitation, claims of entitlements under the California Public Employees’ Retirement System (CalPERS) that are only afforded to

employees and not independent contractors. Contractor further represents and warrants that it understands this waiver and that if it does not understand this waiver, it shall seek the advice of a qualified attorney before executing this Agreement.

Initials

EE. Substitution of Subcontractors: Pursuant to Synergy Project Management v. the City and County of San Francisco, 33 Cal.App.5th 21 (2019), City may initiate substitution proceedings and direct Contractor to remove any subcontractor from performing any work on the Project, in the event City deems such subcontractor’s performance to be substantially unsatisfactory and not in substantial accordance with the Project’s plans and specifications.

Attachment: Agreement for Services - ACCO Engineered Systems Inc - (09.16.21) (5537 : AUTHORIZATION TO AWARD PROFESSIONAL

EXHIBIT A

CONTRACTOR SCOPE OF SERVICES

- A. This Agreement between the City of Moreno Valley and Contractor is for professional services for the testing, maintenance, repair, replacement, certification, and/or service of heating, ventilation, air conditioning, boiler, refrigeration, ice machine equipment, and associated controls systems and components at various City of Moreno Valley facilities and sites to include labor, tax, and materials for emergency and routine repairs.
- B. Requests for service will be conveyed from the City via telephone or email requesting an informal or formal quote or proposal. There is no minimum or maximum number of service calls.
- C. Quotes and proposals must be prepared in accordance with the request for service and be submitted to the City prior to work being performed unless otherwise directed. Jobs valued in excess of \$1,000 will be quoted at prevailing wage. .
- D. All work is to be performed in accordance with manufacturers' recommendations, as well as all federal, state, country, and local regulations.
- E. This scope of work excludes any work other than incidental (less than 10 square feet) of any material containing asbestos. The contractor will immediately stop work if any encountered material is suspected to be asbestos and report the finding to the Fleet & Facilities Supervisor.
- F. All materials and completed work must meet local, county, state, and federal codes and regulations.
- G. Submission of Material Safety Data Sheets (MSDS) are mandatory for any supply or material used on the job or supplied in the course of this Agreement prior to receipt of or with the first shipment of hazardous material. Also, at any time the content of an MSDS is revised, the Contractor is required to provide new information relevant to the specific material.
- H. The Contractor shall provide manufacturer's warranties and warranty workmanship, operation and performance as described within this Agreement.

EXHIBIT B**CITY RESPONSIBILITIES**

The City of Moreno Valley is responsible for the following:

- A. Providing requests for service, access to sites to perform evaluations for estimates and/ or project work, and coordinating site visits;
- B. Providing escorts at sites that require the presence of a City employee during work periods;
- C. Providing purchase orders or other written authorization to confirm the approval of work;
- D. Providing materials when the scope of work so indicates; and
- E. Funding all required City permits, excluding a City of Moreno Valley business license.

EXHIBIT C

TERMS OF PAYMENT

1. The Contractor's compensation shall not exceed \$800,000.00 over the five-year term of the Agreement.

2. Fees:

ACCO				
Trade Type	Normal Business Hours Rate*		Emergency / After Hours Rate**	
	Non-Prevailing Wage Rate	Prevailing Wage Rate	Non-Prevailing Wage Rate	Prevailing Wage Rate
HVAC	\$ 140.00	\$ 140.00	\$ 182.00	\$ 182.00
Controls	\$ 140.00	\$ 140.00	\$ 182.00	\$ 182.00
Boiler	\$ 140.00	\$ 140.00	\$ 182.00	\$ 182.00
Refrigeration	\$ 140.00	\$ 140.00	\$ 182.00	\$ 182.00
Ice Machine	\$ 140.00	\$ 140.00	\$ 182.00	\$ 182.00
Vent Hood	\$ 140.00	\$ 140.00	\$ 182.00	\$ 182.00

- a. There shall be no charge for quotes or proposals.
- b. There shall be no trip charge.
- c. There shall be no fuel surcharge.
- d. Parts shall be charged at no more than 15% above list price
- e. All labor shall be warranted for 90 days.
- f. All parts shall be warranted per the manufacturer’s implied warranty.
- g. Regular business hours are Monday through Friday, 7:30 a.m. – 4:30 p.m.
- h. There is no minimum number of hours required or charged.
- i. Billing occurs at 15-minute increments after the first hour.

3. The Contractor will obtain, and keep current during the term of this Agreement, the required City of Moreno Valley business license. Proof of a current City of Moreno Valley business license will be required prior to any payments by the City. Any invoice not paid because the proof of a current City of Moreno Valley business license has not been provided will not incur any fees, late charges, or other penalties. Complete instructions

for obtaining a City of Moreno Valley business license are located at:
http://www.moval.org/do_biz/biz-license.shtml

4. The Contractor will electronically submit an invoice to the City on a monthly basis for progress payments along with documentation evidencing services completed to date. The progress payment is based on actual time and materials expended in furnishing authorized professional services since the last invoice. At no time will the City pay for more services than have been satisfactorily completed and the City's determination of the amount due for any progress payment shall be final. The Contractor will submit all original invoices to Accounts Payable staff at FacilitiesAP@moval.org

Accounts Payable questions can be directed to (951) 413-3740.

5. The Contractor agrees that City payments will be received via Automated Clearing House (ACH) Direct Deposit and that the required ACH Authorization form will be completed prior to any payments by the City. Any invoice not paid because the completed ACH Authorization Form has not been provided will not incur any fees, late charges, or other penalties. The ACH Authorization Form is located at:

http://www.moval.org/city_hall/forms.shtml#bf

The minimum information required on all invoices is:

- A. Vendor Name, Mailing Address, and Phone Number
 - B. Invoice Date
 - C. Vendor Invoice Number
 - D. City-provided Reference Number (e.g. Project, Activity)
 - E. Detailed work hours by class title (e.g. Manager, Technician, or Specialist), services performed and rates, explicit portion of a contract amount, or detailed billing information that is sufficient to justify the invoice amount; single, lump amounts without detail are not acceptable.
6. The City shall pay the Contractor for all invoiced, authorized professional services within thirty (30) days of receipt of the invoice for same.
 7. Reimbursement for Expenses. Contractor shall not be reimbursed for any expenses unless authorized in writing by City.
 8. Maintenance and Inspection. Contractor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Contractor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Contractor shall allow

inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

City of Moreno Valley

AGREEMENT FOR ON-SITE AND/OR PROFESSIONAL SERVICES

This Agreement is made by and between the City of Moreno Valley, California, a municipal corporation, with its principal place of business at 14177 Frederick Street, Moreno Valley, CA 92552, hereinafter referred to as the “City”, and **F.M. Thomas Air Conditioning, Inc., a California Corporation**, with its principal place of business at **231 Gemini Ave., Brea, CA 92821** hereinafter referred to as the “Contractor,” based upon City policies and the following legal citations:

RECITALS

- A. Government Code Section 53060 authorizes the engagement of persons to perform special services as independent contractors;
- B. Contractor desires to perform and assume responsibility for the provision of **professional heating, ventilation, air conditioning, and related equipment maintenance and repair** contracting services required by the City on the terms and conditions set forth in this Agreement. Contractor represents that it is experienced in providing professional **heating, ventilation, air conditioning, and related equipment maintenance and repair** contracting services, is licensed in the State of California, if applicable;
- C. City desires to engage Contractor to render such services for **professional heating, ventilation, air conditioning, and related equipment maintenance and repair** as set forth in this Agreement;
- D. The public interest, convenience, necessity and general welfare will be served by this Agreement; and
- E. This Agreement is made and entered into effect October 19, 2021.

TERMS

1. CONTRACTOR INFORMATION:

Contractor’s Name: F.M. Thomas Air Conditioning, Inc.
 Address: 231 Gemini Ave.
 City: Brea, State: CA Zip: 92821
 Business Phone: 424-394-8559
 Other Contact Number: N/A
 Business License Number: _____
 Federal Tax I.D. Number: _____

2. CONTRACTOR SERVICES, FEES, AND RELEVANT DATES:

- A. The Contractor’s scope of service is described in Exhibit “A” attached hereto and incorporated herein by this reference, as needed and as directed any and all

Attachment: Agreement for Services - F.M. Thomas Air Conditioning, Inc. - (09.16.21) (5537 : AUTHORIZATION TO AWARD PROFESSIONAL

services rendered without prior written authorization of the City shall be performed at Contractors' risk and expense.

- B. The City's responsibilities, other than payment, are described in Exhibit "B" attached hereto and incorporated herein by this reference.
- C. Payment terms are provided in Exhibit "C" attached hereto and incorporated herein by this reference.
- D. The term of this Agreement shall be from **October 19, 2021 to June 30, 2026** unless terminated earlier as provided herein, subject to allocation of funds pursuant to a duly adopted City budget. The City acknowledges that it will not unreasonably withhold approval of the Contractor's requests for extensions of time in which to complete the work required. The Contractor shall not be responsible for performance delays caused by others or delays beyond the Contractor's reasonable control (excluding delays caused by non-performance or unjustified delay by Contractor, his/her/its employees, or subcontractors), and such delays shall extend the time for performance of the work by the Contractor.

3. **STANDARD TERMS AND CONDITIONS:**

- A. Control of Work. Contractor is solely responsible for the content and sequence of the work, and will not be subject to control and direction as to the details and means for accomplishing the anticipated results of services. The City will not provide any training to Contractor or his/her/its employees.
- B. Intent of Parties. Contractor is, and at all times shall be, an independent contractor and nothing contained herein shall be construed as making the Contractor or any individual whose compensation for services is paid by the Contractor, an agent or employee of the City, or authorizing the Contractor to create or assume any obligation or liability for or on behalf of the City, or entitling the Contractor to any right, benefit, or privilege applicable to any officer or employee of the City.
- C. Labor Laws and Prevailing Wages; Subcontracting. Contractor may retain or subcontract for the services of other necessary contractors with the prior written approval of the City. Payment for such services shall be the responsibility of the Contractor. Any and all subcontractors shall be subject to the terms and conditions of this Agreement, with the exception that the City shall have no obligation to pay for any subcontractor services rendered. Contractor shall be responsible for paying prevailing wages where required by law [See California Labor Code Sections 1770 through 1777.7].

All work or services performed within the State of California pursuant to this Agreement by Contractor, Contractor's employees and independent contractors, or Contractor's subcontractors and its subcontractors' employees and independent contractors shall be performed by individuals lawfully permitted to perform such work or services in the State of California and/ or Federal labor laws, rules and regulations including, but not limited to, any State or Federal law, rule or regulation prohibiting the employment of undocumented

workers or any other person not lawfully permitted to perform said work or services in the State of California or the United States of America.

Contractor represents that it is an equal opportunity employer and shall not discriminate against any subcontractor, employee, or applicant (“person”) for employment because of denial of family and medical care leave; race; religious creed (including religious dress and grooming practices); color; national origin (including language use restrictions); ancestry; physical disability or mental disability (including HIV and Aids); medical condition (cancer and genetic characteristics); genetic information; military or veterans status; marital status; gender, gender identity, and gender expression; sex (which includes pregnancy, childbirth, breastfeeding and medical conditions related to pregnancy, childbirth or breastfeeding); age or sexual orientation. Unless otherwise permitted under the law, Contractor shall not refuse to hire or employ any such person or refuse to select any such person for a training program leading to employment, or bar or discharge any such person from employment or from a training program leading to employment, or otherwise discriminate against any such person in compensation or in terms, conditions, or privileges of employment.

Contractor and all of Contractor’s subcontractors, if any, shall pay each employee engaged in all applicable trades or occupation not less than the prevailing hourly wage rate for work of a similar character in the locality in which the public work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work. In accordance with the provisions of Section 1770 of the California Labor Code (“Labor Code”), the Director of Department of Industrial Relations of the State of California has determined the general prevailing rates of wages and employer payments for health and welfare, pension, vacation, travel time, and subsistence pay as provided for in Labor Code Section 1773.8, apprenticeship or other training programs authorized by Labor Code Section 3093 and similar purposes applicable to the work to be done. Said wages are available through the State of California Department of Industrial Relations’ Internet website at <http://www.dir.ca.gov/dlsr/PWD/index.htm> and are on file at City Hall, as provided in Section 1773.2 of the Labor Code. Said rates shall be posted at the Project site where work is to be performed, in accordance with Labor Code Section 1773.2. Contractor shall access a copy of the wage rate determination and shall make all subcontractors, if any, aware of the determination. As the wage determination for each craft reflects and expiration date, it shall be the Contractor’s responsibility to ensure that the prevailing wage rates of concern are current and paid. Subject to the safe harbor provisions of Labor Code Section 1775, Contractor shall forfeit to the CITY an amount not to exceed two hundred dollars (\$200) for each calendar day or portion thereof, as set by the Labor Commissioner in accordance with the terms of Labor Code section 1775, for each laborer, workmen or mechanics employed that is paid less than the general prevailing rate of wages herein referred to and stipulated for any work done under the proposed contract, by him or by any subcontractor under him, in violation of the provisions of the Labor Code, and in particular, Sections

1170 to 1781 inclusive. Contractor and any and all or its subcontractors shall forfeit to the CITY twenty-five dollars (\$25) for each worker employed in the performance of this Agreement for each calendar day during which the worker is required or permitted to work more than eight (8) hours in any one calendar day and forty (40) hours in any one calendar week in violation of the provisions of Section 1813 of the Labor Code. In the event the total cost of the Project is thirty thousand dollars (\$30,000.00) or more, Contractor shall further comply with provisions set forth in Labor Code Section 1777.5 pertaining to employment of properly registered apprentices, including without limitation the obligation to (i) pay employed apprentices the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered and shall be employed only at the work of craft or trade to which he or she is registered; (ii) employ apprentices in at least the ratio as set forth in said section; (iii) submit contract award information to an applicable apprenticeship program; and (iv) contribute to California Apprenticeship Council.

Contractor and all subcontractors hired to perform any work under the Project shall keep accurate payroll record, including the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each worker, in accordance with Section 1776 of the Labor Code. Payroll records shall be on forms provided by the Division of Labor Standards Enforcement (“DLSE”) or in a manner containing the same information as the forms provided by the DLSE. Failure to comply with the above may result in monetary penalties to the Contractor or affected subcontractor. Payroll records shall be verified by written declaration made under penalty of perjury, that the information contained in the records is true and correct. Contractor and any and all subcontractors shall make a certified copy of all payroll records available for inspection by DLSE, The CITY or any member of the public and otherwise provide certified copies of such records to any of the foregoing within ten (10) days of Contractor’s and subcontractor’s receipt of written request therefor. Failure to comply with the above may result in monetary penalties, in accordance with Labor Code Section 1776(d) and (h).

Notwithstanding anything else to the contrary, Contractor hereby acknowledges that all contractors must be registered with the Department of Industrial Relations (“Department”) pursuant to Labor Code Section 1725.5 in order to be qualified to bid on be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any public work contract, including the Agreement, that is subject to the payment of prevailing wages. Contractor represents and warrants that Contractor is registered with the Department in the manner prescribed by the Department and has paid the requisite application fee, as required by Labor Code Section 1725.5. Moreover, prior to Contractor entering into any contracts with any subcontractor, Contractor shall obtain proof that all such subcontractors have also registered with the Department in accordance with Section 1725.5.

- D. Conformance to Applicable Requirements. All work prepared by Contractor shall be subject to the approval of City.

- E. Substitution of Key Personnel. Contractor has represented to City that certain key personnel will perform and coordinate the services under this Agreement. Should one or more of such personnel become unavailable, Contractor may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Contractor cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. As discussed below, any personnel who fail or refuse to perform the services in a manner acceptable to the City, or who are determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the project or a threat to the safety of persons or property, shall be promptly removed from the project by the Contractor at the request of the City. The key personnel for performance of this Agreement are as follows: **Thomas Feyka**.
- F. City's Representative. The City hereby designates the City Manager, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). Contractor shall not accept direction or orders from any person other than the City's Representative or his or her designee.
- G. Contractor's Representative. Contractor hereby designates **Thomas Feyka**, or his or her designee, to act as its representative for the performance of this Agreement ("Contractor's Representative"). Contractor's Representative shall have full authority to represent and act on behalf of the Contractor for all purposes under this Agreement. The Contractor's Representative shall supervise and direct the services, using his or her best skill and attention, and shall be responsible for all means, methods, techniques, sequences and procedures and for the satisfactory coordination of all portions of the services under this Agreement.
- H. Legal Considerations. The Contractor shall comply with applicable federal, state, and local laws in the performance of this Agreement. Contractor shall be liable for all violations of such laws and regulations in connection with services. If the Contractor performs any work knowing it to be contrary to such laws, rules and regulations and without giving written notice to the City, Contractor shall be solely responsible for all costs arising therefrom. Contractor shall defend, indemnify and hold City, its officials, directors, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.
- I. Standard of Care; Performance of Employees. Contractor shall perform all services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Contractor represents and maintains that it is skilled in the profession necessary to perform the services. Contractor warrants that all employees and subcontractor shall have sufficient skill and experience to perform the services assigned to them. Finally, Contractor represents that it, its employees and subcontractors have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the services and that such licenses and approvals shall be maintained throughout the term of this Agreement. Any employee of the

Contractor or its subcontractors who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the services in a manner acceptable to the City, shall be promptly removed from the project by the Contractor and shall not be re-employed to perform any of the services or to work on the project.

- J. Contractor Indemnification. Contractor shall indemnify, defend and hold the City, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District (CSD), their officers, agents and employees harmless from any and all claims, damages, losses, causes of action and demands, including, without limitation, the payment of all consequential damages, expert witness fees, reasonable attorney's fees and other related costs and expenses, incurred in connection with or in any manner arising out of Contractor's performance of the work contemplated by this Agreement, except for any such claim arising out of the sole and/or active negligence or willful misconduct of the City. Acceptance of this Agreement signifies that the Contractor is not covered under the City's general liability insurance, employee benefits, or worker's compensation. It further establishes that the Contractor shall be fully responsible for such coverage. Contractor's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees.
- K. Additional Indemnity Obligations. Contractor shall defend, with counsel of City's choosing and at Contractor's own cost, expense and risk, any and all claims, suits, actions or other proceedings of every kind covered by Section "J" that may be brought or instituted against City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees. Contractor shall pay and satisfy any judgment, award or decree that may be rendered against City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees as part of any such claim, suit, action or other proceeding. Contractor shall also reimburse City for the cost of any settlement paid by City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees as part of any such claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Contractor shall reimburse City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided.
- L. Insurance Requirements. the Contractor will comply with the following insurance requirements at its sole expense. Insurance companies shall be rated (A Minus: VII—Admitted) or better in Best's Insurance Rating Guide and shall be legally licensed and qualified to conduct business in the State of California:

The Contractor shall procure and maintain, at its sole expense:

X Workers' Compensation Insurance in such amounts as will fully comply with the laws of the State of California and which shall indemnify, insure and provide legal defense for the Contractor and the City, the Housing Authority and CSD against any loss, claim, or damage arising from any injuries or occupational diseases happening to any worker employed by the Contractor in the course of carrying out the Agreement. This coverage may be waived if the Contractor is determined to be functioning as a sole proprietor and the city provided form "Exception to Worker's Compensation Coverage" is signed, notarized and attached to this Agreement.

I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this contract.

Signature, Title

X General Liability Insurance—to protect against loss from liability imposed by law for damages on account of bodily injury, including death, and/or property damage suffered or alleged to be suffered by any person or persons whomever, resulting directly or indirectly from any act or activities of the Contractor, sub-Contractor, or any person acting for the Contractor or under its control or direction. Such insurance shall be maintained in full force and effect throughout the terms of the Agreement and any extension thereof in the minimum amounts provided below:

Bodily Injury	\$1,000,000 per occurrence/ \$2,000,000 aggregate
Property Damage	\$1,000,000 per occurrence/ \$2,000,000 aggregate

X Liability and Property Damage Insurance coverage for owned and non-owned automotive equipment operated on City/CSD/Housing Authority premises. Such coverage limits shall not be less than \$1,000,000 combined single limit.

X A Certificate of Insurance and appropriate additional insured endorsement evidencing the above applicable insurance coverage shall be submitted to the City prior to the execution of this Agreement. In addition to providing such insurance documentation prior to entering into the agreement, contractor shall deliver a current certificate of insurance and applicable endorsement annually upon request of city and as may otherwise be reasonably requested by the City.

The Certificate of Insurance or an appropriate binder shall bear an endorsement containing the following provisions:

Solely as respect to services done by or on behalf of the named insured for the City of Moreno Valley, it is agreed that the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, their officers, employees and agents are included as additional insured under this policy and the coverage(s) provided shall be primary insurance and not contributing with any other insurance available to the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, its officers, employees and agents, under any third party liability policy

The terms of the insurance policy or policies issued to provide the above coverage shall neither be amended to reduce the required insurance limits and coverages nor shall such policies be canceled by the carrier without thirty (30) days prior written notice by certified or registered mail of amendment or cancellation to the City, except that cancellation for non-payment of premium shall require ten (10) days prior written notice by certified or registered mail. In the event the insurance is canceled, the Contractor shall, prior to the cancellation date, submit new evidence of insurance in the amounts established.

- M. Payment Bond. A bond in an amount at least equal to one hundred percent (100%) of the Total Agreement as security for payment of persons performing labor and/or furnishing materials in connection with the Agreement.

In conformance with the State of California Public Contract Code, Part 5, Section 22300, Contractor may substitute securities for any monies withheld by the City to ensure performance under this Agreement.

At the request and expense of Contractor, Contractor has the option of establishing an escrow account with a state or federally chartered bank which shall serve as an escrow agent, for Contractor's direct deposit of securities as a substitute for retention earnings required to be withheld by the City. Upon Contractor's completion of its obligations hereunder, the escrow agent shall return the securities to Contractor. The escrow agent shall notify the City within ten (10) days after deposit of the securities. The market value of the securities at the time of the substitution shall be at least equal to the cash amount then required to be withheld as retention. Securities shall be held in the name of the City and shall designate Contractor as the beneficial owner. Alternatively, on written request of Contractor, the City shall make payments of the retention earnings directly to the escrow account.

- N. Intellectual Property. Any system or documents developed, produced or provided under this Agreement, including any intellectual property discovered or developed by Contractor in the course of performing or otherwise as a result of its work, shall become the sole property of the City unless explicitly stated

otherwise in this Agreement. The Contractor may retain copies of any and all material, including drawings, documents, and specifications, produced by the Contractor in performance of this Agreement. The City and the Contractor agree that to the extent permitted by law, until final approval by the City, all data shall be treated as confidential and will not be released to third parties without the prior written consent of both parties.

- O. Entire Agreement. This Agreement constitutes the entire agreement between the parties. There are no understandings, agreements, or representations of warranties, expressed or implied, not specified in this Agreement. This Agreement applies only to the current proposal as attached. This Agreement may be modified or amended only by a subsequent written Agreement signed by both parties. Assignment of this Agreement is prohibited without prior written consent.
- P. (a) The City may terminate the whole or any part of this Agreement at any time without cause by giving at least ten (10) days written notice to the Contractor. The written notice shall specify the date of termination. Upon receipt of such notice, the Contractor may continue work through the date of termination, provided that no work or service(s) shall be commenced or continued after receipt of the notice which is not intended to protect the interest of the City. The City shall pay the Contractor within thirty (30) days after receiving any invoice after the date of termination for all non-objected to services performed by the Contractor in accordance herewith through the date of termination.
- (b) Either party may terminate this Agreement for cause. In the event the City terminates this Agreement for cause, the Contractor shall perform no further work or service(s) under the Agreement unless the notice of termination authorizes such further work.
- (c) If this Agreement is terminated as provided herein, City may require Contractor to provide all finished or unfinished documents and data and other information of any kind prepared by Contractor in connection with the performance of services under this Agreement. Contractor shall be required to provide such documents and other information within fifteen (15) days of the request.
- (d) In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, similar to those terminated.
- Q. Payment. Payments to the Contractor pursuant to this Agreement will be reported to Federal and State taxing authorities as required. The City will not withhold any sums from compensation payable to Contractor. Contractor is independently responsible for the payment of all applicable taxes. Where the payment terms provide for compensation on a time and materials basis, the Contractor shall maintain adequate records to permit inspection and audit of the Contractor's time and materials charges under the Agreement. Such records shall be retained by the Contractor for three (3) years following completion of the services under the Agreement.

- R. Restrictions on City Employees. The Contractor shall not employ any City employee or official in the work performed pursuant to this Agreement. No officer or employee of the City shall have any financial interest in this Agreement in violation of federal, state, or local law.
- S. Choice of Law and Venue. The laws of the State of California shall govern the rights, obligations, duties, and liabilities of the parties to this Agreement, and shall govern the interpretation of this Agreement. Any legal proceeding arising from this Agreement shall be brought in the appropriate court located in Riverside County, State of California.
- T. Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Contractor:

F.M. Thomas Air Conditioning, Inc.
 231 Gemini Ave.
 Brea, CA 92821
 Attn: Thomas Feyka, President

City:

City of Moreno Valley
 14177 Frederick Street
 P.O. Box 88005
 Moreno Valley, CA 92552
 Attn: Fleet & Facilities Supervisor

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

- U. Time of Essence. Time is of the essence for each and every provision of this Agreement.
- V. City's Right to Employ Other Contractors. City reserves right to employ other contractors in connection with this project.
- W. Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both parties.
- X. Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a party shall give the other party any contractual rights by custom, estoppel, or otherwise.

- Y. No Third Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the parties.
- Z. Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.
- AA. Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.
- BB. Assignment or Transfer. Contractor shall not assign, hypothecate, or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of the City. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.
- CC. Supplementary General Conditions. (for projects that are funded by Federal programs). The following provisions, pursuant to 44 Code of Federal Regulations, Part 13, Subpart C, Section 13.36, as it may be amended from time to time, are included in the Agreement and are required to be included in all subcontracts entered into by Contractor for work pursuant to the Agreement, unless otherwise expressly provided herein. These provisions supersede any conflicting provisions in the General Conditions and shall take precedence over the General Conditions for purposes of interpretation of the General Conditions. These provisions do not otherwise modify or replace General Conditions not in direct conflict with these provisions. Definitions used in these provisions are as contained in the General Conditions.
1. Contractor shall be subject to the administrative, contractual, and legal remedies provided in the General Conditions in the event Contractor violates or breaches terms of the Agreement.
 2. City may terminate the Agreement for cause or for convenience, and Contractor may terminate the Agreement, as provided the General Conditions.
 3. Contractor shall comply with Executive Order 11246 of September 24, 1965, entitled Equal Employment Opportunity, as amended by Executive Order 11375 of October 13, 1967, and as supplemented in Department of Labor regulations (41 CFR chapter 60). (All construction contracts awarded in excess of \$10,000 by City and/or subcontracts in excess of \$10,000 entered into by Contractor.)
 4. Contractor shall comply with the Copeland Anti-Kickback Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3) (All contracts and subcontracts for construction or repair.)
 5. Contractor shall comply with the Davis-Bacon Act (40 U.S.C. 276a to 276a7) as supplemented by Department of Labor regulations (29 CFR Part 5).
 6. Contractor shall comply with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327330) as supplemented by Department of Labor regulations (29 CFR Part 5).

7. Contractor shall observe CITY requirements and regulations pertaining to reporting included in the General Conditions.
8. Patent rights with respect to any discovery or invention which arises or is developed in the course of or under the Agreement shall be retained by the City.
9. Copyrights and rights in data developed in the course of or under the Agreement shall be the property of the City. FEMA/CalOES reserve a royalty-free, nonexclusive, irrevocable license to reproduce, publish or otherwise use or authorize to others to use for federal purposes a copyright in any work developed under the Agreement and/or subcontracts for work pursuant to the Agreement.
10. Contractor shall provide access by the City, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives to any books, documents, papers, and records of the contractor which are directly pertinent to that specific contract for the purpose of making audit, examination, excerpts, and transcriptions.
11. Contractor shall retain all required records for three years after City makes final payments and all other pending matters relating to the Agreement are closed.
12. Contractor shall comply with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15). (This provision applies to contracts exceeding \$100,000 and to subcontracts entered into pursuant to such contracts.)
13. Contractor shall comply with mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94163, 89 Stat. 871).

DD. Civil Code Section 1542 Waiver

- a. Contractor expressly waives any and all rights and benefits conferred upon it by the provisions of Section 1542 of the California Civil Code which reads as follows:

“A general release does not extend to claims that the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release and that, if known by him or her, would have materially affected his or her settlement with the debtor or released party.”

- b. This waiver shall be effective as a bar to any and all actions, fees, damages, losses, claims, liabilities and demands of whatsoever character, nature and kind that are known or unknown, or suspected or unsuspected, including, without limitation, claims of entitlements under the California Public Employees’ Retirement System (CalPERS) that are only afforded to

employees and not independent contractors. Contractor further represents and warrants that it understands this waiver and that if it does not understand this waiver, it shall seek the advice of a qualified attorney before executing this Agreement.

Initials

EE. Substitution of Subcontractors: Pursuant to Synergy Project Management v. the City and County of San Francisco, 33 Cal.App.5th 21 (2019), City may initiate substitution proceedings and direct Contractor to remove any subcontractor from performing any work on the Project, in the event City deems such subcontractor’s performance to be substantially unsatisfactory and not in substantial accordance with the Project’s plans and specifications.

EXHIBIT A

CONTRACTOR SCOPE OF SERVICES

- A. This Agreement between the City of Moreno Valley and Contractor is for professional services for the testing, maintenance, repair, replacement, certification, and/or service of heating, ventilation, air conditioning, boiler, refrigeration, ice machine equipment, and associated controls systems and components at various City of Moreno Valley facilities and sites to include labor, tax, and materials for emergency and routine repairs.
- B. Requests for service will be conveyed from the City via telephone or email requesting an informal or formal quote or proposal. There is no minimum or maximum number of service calls.
- C. Quotes and proposals must be prepared in accordance with the request for service and be submitted to the City prior to work being performed unless otherwise directed. Jobs valued in excess of \$1,000 will be quoted at prevailing wage. .
- D. All work is to be performed in accordance with manufacturers' recommendations, as well as all federal, state, country, and local regulations.
- E. This scope of work excludes any work other than incidental (less than 10 square feet) of any material containing asbestos. The contractor will immediately stop work if any encountered material is suspected to be asbestos and report the finding to the Fleet & Facilities Supervisor.
- F. All materials and completed work must meet local, county, state, and federal codes and regulations.
- G. Submission of Material Safety Data Sheets (MSDS) are mandatory for any supply or material used on the job or supplied in the course of this Agreement prior to receipt of or with the first shipment of hazardous material. Also, at any time the content of an MSDS is revised, the Contractor is required to provide new information relevant to the specific material.
- H. The Contractor shall provide manufacturer's warranties and warranty workmanship, operation and performance as described within this Agreement.

EXHIBIT B**CITY RESPONSIBILITIES**

The City of Moreno Valley is responsible for the following:

- A. Providing requests for service, access to sites to perform evaluations for estimates and/ or project work, and coordinating site visits;
- B. Providing escorts at sites that require the presence of a City employee during work periods;
- C. Providing purchase orders or other written authorization to confirm the approval of work;
- D. Providing materials when the scope of work so indicates; and
- E. Funding all required City permits, excluding a City of Moreno Valley business license.

EXHIBIT C

TERMS OF PAYMENT

1. The Contractor's compensation shall not exceed \$100,000.00 over the five-year term of the Agreement.
2. Fees:

F.M. Thomas				
Trade Type	Normal Business Hours Rate*		Emergency / After Hours Rate**	
	Non-Prevailing Wage Rate	Prevailing Wage Rate	Non-Prevailing Wage Rate	Prevailing Wage Rate

Vent Hood	\$ 120.00	\$ 120.00	\$ 180.00	\$ 180.00

- a. There shall be no charge for quotes or proposals.
- b. There shall be no trip charge.
- c. There shall be no fuel surcharge.
- d. Parts shall be charged at no more than 20% above list price
- e. All labor shall be warranted for 90 days.
- f. All parts shall be warranted per the manufacturer's implied warranty.
- g. Regular business hours are Monday through Friday, 7:30 a.m. – 4:30 p.m.
- h. There is no minimum number of hours required or charged.
- i. Billing occurs at 15-minute increments after the first hour.

3. The Contractor will obtain, and keep current during the term of this Agreement, the required City of Moreno Valley business license. Proof of a current City of Moreno Valley business license will be required prior to any payments by the City. Any invoice not paid because the proof of a current City of Moreno Valley business license has not been provided will not incur any fees, late charges, or other penalties. Complete instructions for obtaining a City of Moreno Valley business license are located at: http://www.moval.org/do_biz/biz-license.shtml

Attachment: Agreement for Services - F.M. Thomas Air Conditioning, Inc. - (09.16.21) (5537 : AUTHORIZATION TO AWARD PROFESSIONAL

4. The Contractor will electronically submit an invoice to the City on a monthly basis for progress payments along with documentation evidencing services completed to date. The progress payment is based on actual time and materials expended in furnishing authorized professional services since the last invoice. At no time will the City pay for more services than have been satisfactorily completed and the City's determination of the amount due for any progress payment shall be final. The Contractor will submit all original invoices to Accounts Payable staff at FacilitiesAP@moval.org

Accounts Payable questions can be directed to (951) 413-3740.

5. The Contractor agrees that City payments will be received via Automated Clearing House (ACH) Direct Deposit and that the required ACH Authorization form will be completed prior to any payments by the City. Any invoice not paid because the completed ACH Authorization Form has not been provided will not incur any fees, late charges, or other penalties. The ACH Authorization Form is located at:

http://www.moval.org/city_hall/forms.shtml#bf

The minimum information required on all invoices is:

- A. Vendor Name, Mailing Address, and Phone Number
 - B. Invoice Date
 - C. Vendor Invoice Number
 - D. City-provided Reference Number (e.g. Project, Activity)
 - E. Detailed work hours by class title (e.g. Manager, Technician, or Specialist), services performed and rates, explicit portion of a contract amount, or detailed billing information that is sufficient to justify the invoice amount; single, lump amounts without detail are not acceptable.
6. The City shall pay the Contractor for all invoiced, authorized professional services within thirty (30) days of receipt of the invoice for same.
7. Reimbursement for Expenses. Contractor shall not be reimbursed for any expenses unless authorized in writing by City.
8. Maintenance and Inspection. Contractor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Contractor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Contractor shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

City of Moreno Valley

AGREEMENT FOR ON-SITE AND/OR PROFESSIONAL SERVICES

This Agreement is made by and between the City of Moreno Valley, California, a municipal corporation, with its principal place of business at 14177 Frederick Street, Moreno Valley, CA 92552, hereinafter referred to as the “City”, and **HASCO Heating Airconditioning Service Company, Inc., a California Corporation**, with its principal place of business at **3015 Durahart Street, Riverside, CA 92507** hereinafter referred to as the “Contractor,” based upon City policies and the following legal citations:

RECITALS

- A. Government Code Section 53060 authorizes the engagement of persons to perform special services as independent contractors;
- B. Contractor desires to perform and assume responsibility for the provision of **professional heating, ventilation, air conditioning, and related equipment maintenance and repair** contracting services required by the City on the terms and conditions set forth in this Agreement. Contractor represents that it is experienced in providing professional **heating, ventilation, air conditioning, and related equipment maintenance and repair** contracting services, is licensed in the State of California, if applicable;
- C. City desires to engage Contractor to render such services for **professional heating, ventilation, air conditioning, and related equipment maintenance and repair** as set forth in this Agreement;
- D. The public interest, convenience, necessity and general welfare will be served by this Agreement; and
- E. This Agreement is made and entered into effect October 19, 2021.

TERMS

1. **CONTRACTOR INFORMATION:**

Contractor’s Name: HASCO Heating Airconditioning Service Company, Inc.
 Address: 3015 Durahart Street.
 City: Riverside, State: CA Zip: 92507
 Business Phone: 951-682-3336
 Other Contact Number: N/A
 Business License Number: 519360
 Federal Tax I.D. Number: 33-0239529

2. **CONTRACTOR SERVICES, FEES, AND RELEVANT DATES:**

- A. The Contractor’s scope of service is described in Exhibit “A” attached hereto and incorporated herein by this reference, as needed and as directed any and all

services rendered without prior written authorization of the City shall be performed at Contractors' risk and expense.

- B. The City's responsibilities, other than payment, are described in Exhibit "B" attached hereto and incorporated herein by this reference.
 - C. Payment terms are provided in Exhibit "C" attached hereto and incorporated herein by this reference.
 - D. The term of this Agreement shall be from **October 19, 2021 to June 30, 2026** unless terminated earlier as provided herein, subject to allocation of funds pursuant to a duly adopted City budget. The City acknowledges that it will not unreasonably withhold approval of the Contractor's requests for extensions of time in which to complete the work required. The Contractor shall not be responsible for performance delays caused by others or delays beyond the Contractor's reasonable control (excluding delays caused by non-performance or unjustified delay by Contractor, his/her/its employees, or subcontractors), and such delays shall extend the time for performance of the work by the Contractor.
3. **STANDARD TERMS AND CONDITIONS:**

- A. Control of Work. Contractor is solely responsible for the content and sequence of the work, and will not be subject to control and direction as to the details and means for accomplishing the anticipated results of services. The City will not provide any training to Contractor or his/her/its employees.
- B. Intent of Parties. Contractor is, and at all times shall be, an independent contractor and nothing contained herein shall be construed as making the Contractor or any individual whose compensation for services is paid by the Contractor, an agent or employee of the City, or authorizing the Contractor to create or assume any obligation or liability for or on behalf of the City, or entitling the Contractor to any right, benefit, or privilege applicable to any officer or employee of the City.
- C. Labor Laws and Prevailing Wages; Subcontracting. Contractor may retain or subcontract for the services of other necessary contractors with the prior written approval of the City. Payment for such services shall be the responsibility of the Contractor. Any and all subcontractors shall be subject to the terms and conditions of this Agreement, with the exception that the City shall have no obligation to pay for any subcontractor services rendered. Contractor shall be responsible for paying prevailing wages where required by law [See California Labor Code Sections 1770 through 1777.7].

All work or services performed within the State of California pursuant to this Agreement by Contractor, Contractor's employees and independent contractors, or Contractor's subcontractors and its subcontractors' employees and independent contractors shall be performed by individuals lawfully permitted to perform such work or services in the State of California and/ or Federal labor laws, rules and regulations including, but not limited to, any State or Federal law, rule or regulation prohibiting the employment of undocumented

workers or any other person not lawfully permitted to perform said work or services in the State of California or the United States of America.

Contractor represents that it is an equal opportunity employer and shall not discriminate against any subcontractor, employee, or applicant (“person”) for employment because of denial of family and medical care leave; race; religious creed (including religious dress and grooming practices); color; national origin (including language use restrictions); ancestry; physical disability or mental disability (including HIV and Aids); medical condition (cancer and genetic characteristics); genetic information; military or veterans status; marital status; gender, gender identity, and gender expression; sex (which includes pregnancy, childbirth, breastfeeding and medical conditions related to pregnancy, childbirth or breastfeeding); age or sexual orientation. Unless otherwise permitted under the law, Contractor shall not refuse to hire or employ any such person or refuse to select any such person for a training program leading to employment, or bar or discharge any such person from employment or from a training program leading to employment, or otherwise discriminate against any such person in compensation or in terms, conditions, or privileges of employment.

Contractor and all of Contractor’s subcontractors, if any, shall pay each employee engaged in all applicable trades or occupation not less than the prevailing hourly wage rate for work of a similar character in the locality in which the public work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work. In accordance with the provisions of Section 1770 of the California Labor Code (“Labor Code”), the Director of Department of Industrial Relations of the State of California has determined the general prevailing rates of wages and employer payments for health and welfare, pension, vacation, travel time, and subsistence pay as provided for in Labor Code Section 1773.8, apprenticeship or other training programs authorized by Labor Code Section 3093 and similar purposes applicable to the work to be done. Said wages are available through the State of California Department of Industrial Relations’ Internet website at <http://www.dir.ca.gov/dlsr/PWD/index.htm> and are on file at City Hall, as provided in Section 1773.2 of the Labor Code. Said rates shall be posted at the Project site where work is to be performed, in accordance with Labor Code Section 1773.2. Contractor shall access a copy of the wage rate determination and shall make all subcontractors, if any, aware of the determination. As the wage determination for each craft reflects and expiration date, it shall be the Contractor’s responsibility to ensure that the prevailing wage rates of concern are current and paid. Subject to the safe harbor provisions of Labor Code Section 1775, Contractor shall forfeit to the CITY an amount not to exceed two hundred dollars (\$200) for each calendar day or portion thereof, as set by the Labor Commissioner in accordance with the terms of Labor Code section 1775, for each laborer, workmen or mechanics employed that is paid less than the general prevailing rate of wages herein referred to and stipulated for any work done under the proposed contract, by him or by any subcontractor under him, in violation of the provisions of the Labor Code, and in particular, Sections

1170 to 1781 inclusive. Contractor and any and all or its subcontractors shall forfeit to the CITY twenty-five dollars (\$25) for each worker employed in the performance of this Agreement for each calendar day during which the worker is required or permitted to work more than eight (8) hours in any one calendar day and forty (40) hours in any one calendar week in violation of the provisions of Section 1813 of the Labor Code. In the event the total cost of the Project is thirty thousand dollars (\$30,000.00) or more, Contractor shall further comply with provisions set forth in Labor Code Section 1777.5 pertaining to employment of properly registered apprentices, including without limitation the obligation to (i) pay employed apprentices the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered and shall be employed only at the work of craft or trade to which he or she is registered; (ii) employ apprentices in at least the ratio as set forth in said section; (iii) submit contract award information to an applicable apprenticeship program; and (iv) contribute to California Apprenticeship Council.

Contractor and all subcontractors hired to perform any work under the Project shall keep accurate payroll record, including the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each worker, in accordance with Section 1776 of the Labor Code. Payroll records shall be on forms provided by the Division of Labor Standards Enforcement (“DLSE”) or in a manner containing the same information as the forms provided by the DLSE. Failure to comply with the above may result in monetary penalties to the Contractor or affected subcontractor. Payroll records shall be verified by written declaration made under penalty of perjury, that the information contained in the records is true and correct. Contractor and any and all subcontractors shall make a certified copy of all payroll records available for inspection by DLSE, The CITY or any member of the public and otherwise provide certified copies of such records to any of the foregoing within ten (10) days of Contractor’s and subcontractor’s receipt of written request therefor. Failure to comply with the above may result in monetary penalties, in accordance with Labor Code Section 1776(d) and (h).

Notwithstanding anything else to the contrary, Contractor hereby acknowledges that all contractors must be registered with the Department of Industrial Relations (“Department”) pursuant to Labor Code Section 1725.5 in order to be qualified to bid on be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any public work contract, including the Agreement, that is subject to the payment of prevailing wages. Contractor represents and warrants that Contractor is registered with the Department in the manner prescribed by the Department and has paid the requisite application fee, as required by Labor Code Section 1725.5. Moreover, prior to Contractor entering into any contracts with any subcontractor, Contractor shall obtain proof that all such subcontractors have also registered with the Department in accordance with Section 1725.5.

- D. Conformance to Applicable Requirements. All work prepared by Contractor shall be subject to the approval of City.

- E. Substitution of Key Personnel. Contractor has represented to City that certain key personnel will perform and coordinate the services under this Agreement. Should one or more of such personnel become unavailable, Contractor may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Contractor cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. As discussed below, any personnel who fail or refuse to perform the services in a manner acceptable to the City, or who are determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the project or a threat to the safety of persons or property, shall be promptly removed from the project by the Contractor at the request of the City. The key personnel for performance of this Agreement are as follows: **Michael Minor, Jr.**
- F. City's Representative. The City hereby designates the City Manager, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). Contractor shall not accept direction or orders from any person other than the City's Representative or his or her designee.
- G. Contractor's Representative. Contractor hereby designates **Michael Minor, Jr.**, or his or her designee, to act as its representative for the performance of this Agreement ("Contractor's Representative"). Contractor's Representative shall have full authority to represent and act on behalf of the Contractor for all purposes under this Agreement. The Contractor's Representative shall supervise and direct the services, using his or her best skill and attention, and shall be responsible for all means, methods, techniques, sequences and procedures and for the satisfactory coordination of all portions of the services under this Agreement.
- H. Legal Considerations. The Contractor shall comply with applicable federal, state, and local laws in the performance of this Agreement. Contractor shall be liable for all violations of such laws and regulations in connection with services. If the Contractor performs any work knowing it to be contrary to such laws, rules and regulations and without giving written notice to the City, Contractor shall be solely responsible for all costs arising therefrom. Contractor shall defend, indemnify and hold City, its officials, directors, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.
- I. Standard of Care; Performance of Employees. Contractor shall perform all services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Contractor represents and maintains that it is skilled in the profession necessary to perform the services. Contractor warrants that all employees and subcontractor shall have sufficient skill and experience to perform the services assigned to them. Finally, Contractor represents that it, its employees and subcontractors have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the services and that such licenses and approvals shall be

maintained throughout the term of this Agreement. Any employee of the Contractor or its subcontractors who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the services in a manner acceptable to the City, shall be promptly removed from the project by the Contractor and shall not be re-employed to perform any of the services or to work on the project.

- J. Contractor Indemnification. Contractor shall indemnify, defend and hold the City, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District (CSD), their officers, agents and employees harmless from any and all claims, damages, losses, causes of action and demands, including, without limitation, the payment of all consequential damages, expert witness fees, reasonable attorney's fees and other related costs and expenses, incurred in connection with or in any manner arising out of Contractor's performance of the work contemplated by this Agreement, except for any such claim arising out of the sole and/or active negligence or willful misconduct of the City. Acceptance of this Agreement signifies that the Contractor is not covered under the City's general liability insurance, employee benefits, or worker's compensation. It further establishes that the Contractor shall be fully responsible for such coverage. Contractor's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees.
- K. Additional Indemnity Obligations. Contractor shall defend, with counsel of City's choosing and at Contractor's own cost, expense and risk, any and all claims, suits, actions or other proceedings of every kind covered by Section "J" that may be brought or instituted against City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees. Contractor shall pay and satisfy any judgment, award or decree that may be rendered against City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees as part of any such claim, suit, action or other proceeding. Contractor shall also reimburse City for the cost of any settlement paid by City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees as part of any such claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Contractor shall reimburse City, the Moreno Valley Housing Authority, and the CSD, and their officers, agents and employees for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided.
- L. Insurance Requirements. the Contractor will comply with the following insurance requirements at its sole expense. Insurance companies shall be rated (A Minus: VII—Admitted) or better in Best's Insurance Rating Guide and shall be legally licensed and qualified to conduct business in the State of California:

The Contractor shall procure and maintain, at its sole expense:

X Workers' Compensation Insurance in such amounts as will fully comply with the laws of the State of California and which shall indemnify, insure and provide legal defense for the Contractor and the City, the Housing Authority and CSD against any loss, claim, or damage arising from any injuries or occupational diseases happening to any worker employed by the Contractor in the course of carrying out the Agreement. This coverage may be waived if the Contractor is determined to be functioning as a sole proprietor and the city provided form "Exception to Worker's Compensation Coverage" is signed, notarized and attached to this Agreement.

I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this contract.

Signature, Title

X General Liability Insurance—to protect against loss from liability imposed by law for damages on account of bodily injury, including death, and/or property damage suffered or alleged to be suffered by any person or persons whomever, resulting directly or indirectly from any act or activities of the Contractor, sub-Contractor, or any person acting for the Contractor or under its control or direction. Such insurance shall be maintained in full force and effect throughout the terms of the Agreement and any extension thereof in the minimum amounts provided below:

Bodily Injury	\$1,000,000 per occurrence/ \$2,000,000 aggregate
Property Damage	\$1,000,000 per occurrence/ \$2,000,000 aggregate

X Liability and Property Damage Insurance coverage for owned and non-owned automotive equipment operated on City/CSD/Housing Authority premises. Such coverage limits shall not be less than \$1,000,000 combined single limit.

X A Certificate of Insurance and appropriate additional insured endorsement evidencing the above applicable insurance coverage shall be submitted to the City prior to the execution of this Agreement. In addition to providing such insurance documentation prior to entering into the agreement, contractor shall deliver a current certificate of insurance and applicable endorsement annually upon request of city and as may otherwise be reasonably requested by the City.

The Certificate of Insurance or an appropriate binder shall bear an endorsement containing the following provisions:

Solely as respect to services done by or on behalf of the named insured for the City of Moreno Valley, it is agreed that the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, their officers, employees and agents are included as additional insured under this policy and the coverage(s) provided shall be primary insurance and not contributing with any other insurance available to the City of Moreno Valley, the Moreno Valley Housing Authority, and the Moreno Valley Community Services District, its officers, employees and agents, under any third party liability policy

The terms of the insurance policy or policies issued to provide the above coverage shall neither be amended to reduce the required insurance limits and coverages nor shall such policies be canceled by the carrier without thirty (30) days prior written notice by certified or registered mail of amendment or cancellation to the City, except that cancellation for non-payment of premium shall require ten (10) days prior written notice by certified or registered mail. In the event the insurance is canceled, the Contractor shall, prior to the cancellation date, submit new evidence of insurance in the amounts established.

- M. Payment Bond. A bond in an amount at least equal to one hundred percent (100%) of the Total Agreement as security for payment of persons performing labor and/or furnishing materials in connection with the Agreement.

In conformance with the State of California Public Contract Code, Part 5, Section 22300, Contractor may substitute securities for any monies withheld by the City to ensure performance under this Agreement.

At the request and expense of Contractor, Contractor has the option of establishing an escrow account with a state or federally chartered bank which shall serve as an escrow agent, for Contractor's direct deposit of securities as a substitute for retention earnings required to be withheld by the City. Upon Contractor's completion of its obligations hereunder, the escrow agent shall return the securities to Contractor. The escrow agent shall notify the City within ten (10) days after deposit of the securities. The market value of the securities at the time of the substitution shall be at least equal to the cash amount then required to be withheld as retention. Securities shall be held in the name of the City and shall designate Contractor as the beneficial owner. Alternatively, on written request of Contractor, the City shall make payments of the retention earnings directly to the escrow account.

- N. Intellectual Property. Any system or documents developed, produced or provided under this Agreement, including any intellectual property discovered or developed by Contractor in the course of performing or otherwise as a result of its work, shall become the sole property of the City unless explicitly stated

otherwise in this Agreement. The Contractor may retain copies of any and all material, including drawings, documents, and specifications, produced by the Contractor in performance of this Agreement. The City and the Contractor agree that to the extent permitted by law, until final approval by the City, all data shall be treated as confidential and will not be released to third parties without the prior written consent of both parties.

- O. Entire Agreement. This Agreement constitutes the entire agreement between the parties. There are no understandings, agreements, or representations of warranties, expressed or implied, not specified in this Agreement. This Agreement applies only to the current proposal as attached. This Agreement may be modified or amended only by a subsequent written Agreement signed by both parties. Assignment of this Agreement is prohibited without prior written consent.
- P. (a) The City may terminate the whole or any part of this Agreement at any time without cause by giving at least ten (10) days written notice to the Contractor. The written notice shall specify the date of termination. Upon receipt of such notice, the Contractor may continue work through the date of termination, provided that no work or service(s) shall be commenced or continued after receipt of the notice which is not intended to protect the interest of the City. The City shall pay the Contractor within thirty (30) days after receiving any invoice after the date of termination for all non-objected to services performed by the Contractor in accordance herewith through the date of termination.
- (b) Either party may terminate this Agreement for cause. In the event the City terminates this Agreement for cause, the Contractor shall perform no further work or service(s) under the Agreement unless the notice of termination authorizes such further work.
- (c) If this Agreement is terminated as provided herein, City may require Contractor to provide all finished or unfinished documents and data and other information of any kind prepared by Contractor in connection with the performance of services under this Agreement. Contractor shall be required to provide such documents and other information within fifteen (15) days of the request.
- (d) In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, similar to those terminated.
- Q. Payment. Payments to the Contractor pursuant to this Agreement will be reported to Federal and State taxing authorities as required. The City will not withhold any sums from compensation payable to Contractor. Contractor is independently responsible for the payment of all applicable taxes. Where the payment terms provide for compensation on a time and materials basis, the Contractor shall maintain adequate records to permit inspection and audit of the Contractor's time and materials charges under the Agreement. Such records shall be retained by the Contractor for three (3) years following completion of the services under the Agreement.

- R. Restrictions on City Employees. The Contractor shall not employ any City employee or official in the work performed pursuant to this Agreement. No officer or employee of the City shall have any financial interest in this Agreement in violation of federal, state, or local law.
- S. Choice of Law and Venue. The laws of the State of California shall govern the rights, obligations, duties, and liabilities of the parties to this Agreement, and shall govern the interpretation of this Agreement. Any legal proceeding arising from this Agreement shall be brought in the appropriate court located in Riverside County, State of California.
- T. Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Contractor:

HASCO Heating Airconditioning Service Company, Inc.
 3015 Drahart Street
 Riverside, CA 92507
 Attn: Michael A. Minor, Jr., Vice-President

City:

City of Moreno Valley
 14177 Frederick Street
 P.O. Box 88005
 Moreno Valley, CA 92552
 Attn: Fleet & Facilities Supervisor

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

- U. Time of Essence. Time is of the essence for each and every provision of this Agreement.
- V. City's Right to Employ Other Contractors. City reserves right to employ other contractors in connection with this project.
- W. Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both parties.
- X. Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a party shall give the other party any contractual rights by custom, estoppel, or otherwise.

- Y. No Third Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the parties.
- Z. Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.
- AA. Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.
- BB. Assignment or Transfer. Contractor shall not assign, hypothecate, or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of the City. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.
- CC. Supplementary General Conditions. (for projects that are funded by Federal programs). The following provisions, pursuant to 44 Code of Federal Regulations, Part 13, Subpart C, Section 13.36, as it may be amended from time to time, are included in the Agreement and are required to be included in all subcontracts entered into by Contractor for work pursuant to the Agreement, unless otherwise expressly provided herein. These provisions supersede any conflicting provisions in the General Conditions and shall take precedence over the General Conditions for purposes of interpretation of the General Conditions. These provisions do not otherwise modify or replace General Conditions not in direct conflict with these provisions. Definitions used in these provisions are as contained in the General Conditions.
1. Contractor shall be subject to the administrative, contractual, and legal remedies provided in the General Conditions in the event Contractor violates or breaches terms of the Agreement.
 2. City may terminate the Agreement for cause or for convenience, and Contractor may terminate the Agreement, as provided the General Conditions.
 3. Contractor shall comply with Executive Order 11246 of September 24, 1965, entitled Equal Employment Opportunity, as amended by Executive Order 11375 of October 13, 1967, and as supplemented in Department of Labor regulations (41 CFR chapter 60). (All construction contracts awarded in excess of \$10,000 by City and/or subcontracts in excess of \$10,000 entered into by Contractor.)
 4. Contractor shall comply with the Copeland Anti-Kickback Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3) (All contracts and subcontracts for construction or repair.)
 5. Contractor shall comply with the Davis-Bacon Act (40 U.S.C. 276a to 276a7) as supplemented by Department of Labor regulations (29 CFR Part 5).
 6. Contractor shall comply with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327330) as supplemented by Department of Labor regulations (29 CFR Part 5).

7. Contractor shall observe CITY requirements and regulations pertaining to reporting included in the General Conditions.
8. Patent rights with respect to any discovery or invention which arises or is developed in the course of or under the Agreement shall be retained by the City.
9. Copyrights and rights in data developed in the course of or under the Agreement shall be the property of the City. FEMA/CalOES reserve a royalty-free, nonexclusive, irrevocable license to reproduce, publish or otherwise use or authorize to others to use for federal purposes a copyright in any work developed under the Agreement and/or subcontracts for work pursuant to the Agreement.
10. Contractor shall provide access by the City, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives to any books, documents, papers, and records of the contractor which are directly pertinent to that specific contract for the purpose of making audit, examination, excerpts, and transcriptions.
11. Contractor shall retain all required records for three years after City makes final payments and all other pending matters relating to the Agreement are closed.
12. Contractor shall comply with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15). (This provision applies to contracts exceeding \$100,000 and to subcontracts entered into pursuant to such contracts.)
13. Contractor shall comply with mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94163, 89 Stat. 871).

DD. Civil Code Section 1542 Waiver

- a. Contractor expressly waives any and all rights and benefits conferred upon it by the provisions of Section 1542 of the California Civil Code which reads as follows:

“A general release does not extend to claims that the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release and that, if known by him or her, would have materially affected his or her settlement with the debtor or released party.”

- b. This waiver shall be effective as a bar to any and all actions, fees, damages, losses, claims, liabilities and demands of whatsoever character, nature and kind that are known or unknown, or suspected or unsuspected, including, without limitation, claims of entitlements under the California Public Employees’ Retirement System (CalPERS) that are only afforded to

employees and not independent contractors. Contractor further represents and warrants that it understands this waiver and that if it does not understand this waiver, it shall seek the advice of a qualified attorney before executing this Agreement.

Initials

EE. Substitution of Subcontractors: Pursuant to Synergy Project Management v. the City and County of San Francisco, 33 Cal.App.5th 21 (2019), City may initiate substitution proceedings and direct Contractor to remove any subcontractor from performing any work on the Project, in the event City deems such subcontractor’s performance to be substantially unsatisfactory and not in substantial accordance with the Project’s plans and specifications.

Attachment: Agreement for Services - HASCO Heating Airconditioning Service Company, Inc. (09.16.21) (5537 : AUTHORIZATION TO AWARD

EXHIBIT A

CONTRACTOR SCOPE OF SERVICES

- A. This Agreement between the City of Moreno Valley and Contractor is for professional services for the testing, maintenance, repair, replacement, certification, and/or service of heating, ventilation, air conditioning, boiler, refrigeration, ice machine equipment, and associated controls systems and components at various City of Moreno Valley facilities and sites to include labor, tax, and materials for emergency and routine repairs.
- B. Requests for service will be conveyed from the City via telephone or email requesting an informal or formal quote or proposal. There is no minimum or maximum number of service calls.
- C. Quotes and proposals must be prepared in accordance with the request for service and be submitted to the City prior to work being performed unless otherwise directed. Jobs valued in excess of \$1,000 will be quoted at prevailing wage. .
- D. All work is to be performed in accordance with manufacturers' recommendations, as well as all federal, state, country, and local regulations.
- E. This scope of work excludes any work other than incidental (less than 10 square feet) of any material containing asbestos. The contractor will immediately stop work if any encountered material is suspected to be asbestos and report the finding to the Fleet & Facilities Supervisor.
- F. All materials and completed work must meet local, county, state, and federal codes and regulations.
- G. Submission of Material Safety Data Sheets (MSDS) are mandatory for any supply or material used on the job or supplied in the course of this Agreement prior to receipt of or with the first shipment of hazardous material. Also, at any time the content of an MSDS is revised, the Contractor is required to provide new information relevant to the specific material.
- H. The Contractor shall provide manufacturer's warranties and warranty workmanship, operation and performance as described within this Agreement.

EXHIBIT B**CITY RESPONSIBILITIES**

The City of Moreno Valley is responsible for the following:

- A. Providing requests for service, access to sites to perform evaluations for estimates and/ or project work, and coordinating site visits;
- B. Providing escorts at sites that require the presence of a City employee during work periods;
- C. Providing purchase orders or other written authorization to confirm the approval of work;
- D. Providing materials when the scope of work so indicates; and
- E. Funding all required City permits, excluding a City of Moreno Valley business license.

EXHIBIT C

TERMS OF PAYMENT

1. The Contractor's compensation shall not exceed \$100,000.00 over the five-year term of the Agreement.

2. Fees:

HASCO				
Trade Type	Normal Business Hours Rate*		Emergency / After Hours Rate**	
	Non-Prevailing Wage Rate	Prevailing Wage Rate	Non-Prevailing Wage Rate	Prevailing Wage Rate
HVAC	\$ 135.00	\$ 195.00	\$ 175.00	\$ 235.00
Controls	\$ 135.00	\$ 195.00	\$ 175.00	\$ 235.00
Boiler	\$ 135.00	\$ 195.00	\$ 175.00	\$ 235.00
Refrigeration	\$ 135.00	\$ 195.00	\$ 175.00	\$ 235.00
Ice Machine	\$ 135.00	\$ 195.00	\$ 175.00	\$ 235.00
Vent Hood	\$ 135.00	\$ 195.00	\$ 175.00	\$ 235.00

- a. There shall be no charge for quotes or proposals.
- b. There shall be no trip charge.
- c. There shall be no fuel surcharge.
- d. Parts shall be charged at no more than 15% above list price
- e. All labor shall be warranted for 90 days.
- f. All parts shall be warranted per the manufacturer’s implied warranty.
- g. Regular business hours are Monday through Friday, 7:30 a.m. – 4:30 p.m.
- h. There is no minimum number of hours required or charged.
- i. Billing occurs at 15-minute increments after the first hour.

2. The Contractor will obtain, and keep current during the term of this Agreement, the required City of Moreno Valley business license. Proof of a current City of Moreno Valley business license will be required prior to any payments by the City. Any invoice not paid because the proof of a current City of Moreno Valley business license has not been provided will not incur any fees, late charges, or other penalties. Complete instructions for obtaining a City of Moreno Valley business license are located at: http://www.moval.org/do_biz/biz-license.shtml

3. The Contractor will electronically submit an invoice to the City on a monthly basis for progress payments along with documentation evidencing services completed to date. The progress payment is based on actual time and materials expended in furnishing authorized professional services since the last invoice. At no time will the City pay for more services than have been satisfactorily completed and the City's determination of the amount due for any progress payment shall be final. The Contractor will submit all original invoices to Accounts Payable staff at FacilitiesAP@moval.org

Accounts Payable questions can be directed to (951) 413-3740.

4. The Contractor agrees that City payments will be received via Automated Clearing House (ACH) Direct Deposit and that the required ACH Authorization form will be completed prior to any payments by the City. Any invoice not paid because the completed ACH Authorization Form has not been provided will not incur any fees, late charges, or other penalties. The ACH Authorization Form is located at:

http://www.moval.org/city_hall/forms.shtml#bf

The minimum information required on all invoices is:

- A. Vendor Name, Mailing Address, and Phone Number
 - B. Invoice Date
 - C. Vendor Invoice Number
 - D. City-provided Reference Number (e.g. Project, Activity)
 - E. Detailed work hours by class title (e.g. Manager, Technician, or Specialist), services performed and rates, explicit portion of a contract amount, or detailed billing information that is sufficient to justify the invoice amount; single, lump amounts without detail are not acceptable.
5. The City shall pay the Contractor for all invoiced, authorized professional services within thirty (30) days of receipt of the invoice for same.
6. Reimbursement for Expenses. Contractor shall not be reimbursed for any expenses unless authorized in writing by City.
7. Maintenance and Inspection. Contractor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Contractor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Contractor shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

Report to City Council

TO: Mayor and City Council

FROM: Manuel A. Mancha, Community Development Director

AGENDA DATE: October 5, 2021

TITLE: PROPOSED GENERAL PLAN AMENDMENT AND CHANGE OF ZONE AMENDING "MAP LCC-4: GENERAL PLAN LAND USE" OF THE MORENO VALLEY GENERAL PLAN AND THE CITY ZONING ATLAS, RESPECTIVELY, PROPOSED TENTATIVE PARCEL MAP 37944 FOR TWO (2) LOTS, A PLOT PLAN FOR AN APPROXIMATELY 290,726 SQUARE FOOT LIGHT INDUSTRIAL BUILDING, AND A PLOT PLAN FOR AN APPROXIMATELY 98,877 SQUARE FOOT LIGHT INDUSTRIAL BUILDING

RECOMMENDED ACTION

Recommendations: That the City Council:

1. **ADOPT** Resolution 2021-XX: A Resolution of the City Council of the City of Moreno Valley **CERTIFYING** that the Initial Study/Mitigated Negative Declaration prepared for General Plan Amendment PEN20-0118, Change of Zone PEN20-0119, Tentative Parcel Map PEN20-0120, and Plot Plans PEN20-0121 and PEN20-0124 on file with the Community Development Department, and incorporated herein by this reference, was completed in compliance with the California Environmental Quality Act and the CEQA Guidelines, that the City Council reviewed and considered the information contained in the Initial Study/Mitigated Negative Declaration and that the document reflects the City's independent judgment and analysis, and **ADOPTING** the Mitigation Monitoring and Reporting Program prepared for the above-referenced Mitigated Negative Declaration; and
2. **ADOPT** Resolution 2021-XX: A Resolution of the City Council of the City of Moreno Valley approving a General Plan Amendment based on the Recitals and Evidence contained in the Administrative Record and Findings as set for in the Resolution No. 2021-XX to amend the General Plan Land Use Map as described

in the Resolution, based on the findings contained in the Resolution, and the revised Land Use Map; and

3. **INTRODUCE** and conduct the first reading by title only of Ordinance No. XXX, approving a Change of Zone PEN20-0119 to amend the City Zoning Atlas based on the Recitals, Evidence contained in the Administrative Records and Findings as set forth in Ordinance No. XXX; and
4. **ADOPT** Resolution No. 2021-XX, A Resolution of the City Council of the City of Moreno Valley approving Tentative Parcel Map 37944, PEN20-0120 based on the findings contained in this Resolution, and subject to the conditions of approval included as Exhibit A; and
5. **ADOPT** Resolution No. 2021-XX, A Resolution of the City of the City of Moreno Valley approving Plot Plans PEN20-0121 and PEN20-0124 based on the findings contained in this Resolution, and subject to the conditions of approval included as Exhibit A; and
6. **SCHEDULE** the second reading and adoption of Ordinance No. XXX for the next regular meeting.

SUMMARY

This staff report recommends approval of development applications for the Compass Danbe Project for the development of two light industrial buildings located on the south side of Alessandro Boulevard west of Frederick Street and east of Graham Street.

The recommended actions for the project also include a General Plan Amendment, Change of Zone, Tentative Parcel Map and two Plot Plans for light industrial development.

BACKGROUND

As provided for in the California Government Code, a mandatory element of the General Plan may be amended no more than four times during one calendar year. The recommended action is for the City Council to approve the General Plan Amendment to change the Land Use Element covering the land use designation change. This change will be the third amendment to the Land Use Element of the General Plan for the 2021 calendar year.

Planning Commission Recommendation

At its August 26, 2021 meeting, the Planning Commission held a public hearing and voted to recommend that the City Council certify the Mitigated Negative Declaration, adopt a Mitigation Monitoring and Reporting Program, and approve the General Plan Amendment, Change of Zone, Tentative Parcel Map 37944, and two Plot Plans for the Compass Danbe project.

Prior to the Planning Commission meeting five (5) comment letters were received regarding the Project. Three did not raise any opposition to the Project. Two, one from South Coast Air Quality Management District (SCAQMD) and one from Golden State Environmental Justice Alliance (GSEJA) discussed concerns relating to several categories including air quality and truck traffic. A response to each comment submitted in the SCAQMD letter has been prepared and published. A response to comments for the GSEJA was not prepared, since the City received a withdrawal of the comment letter on September 2, 2021. The letters and response to comments are included in the attachments.

During the Planning Commission public hearing, there were seven commenters, six were in support and one was in opposition to the Project.

DISCUSSION

Project

The Applicant CDRE Holding 17, LLC (“Applicant”) is requesting approval of the following: a General Plan Amendment (PEN20-0118), to change the land use designation of the Project site from Commercial to Business Park/Light Industrial, a Change of Zone (PEN20-0119), to amend the Zoning Atlas from Community Commercial District (CC) to Light Industrial (LI), a Tentative Parcel Map 37944 (PEN20-0120) for two parcels, a Plot Plan (PEN20-0121) for a 290,726 square foot light industrial building and a Plot Plan (PEN20-0124), a Plot Plan for a 98,877 square foot light industrial building located on the south side of Alessandro Boulevard between Frederick Street and Graham Street, on parcels identified as Assessor Parcel Nos. 297-170-002 and 003.

General Plan Amendment

The City’s General Plan is a comprehensive, long-term plan for the development of the City of Moreno Valley. The General Plan is at the top of the hierarchy of the City’s land use regulations, which means that the City’s zoning and other land use decisions must conform to the General Plan. A General Plan’s Land Use Element, which is referred to as the “Land Use & Community Character Element” in the City’s General Plan, must designate the proposed general distribution, location, and extent of land uses for housing; business; industry; open space, including agriculture, natural resources, recreation, and enjoyment of scenic beauty; education; public buildings and grounds; waste disposal facilities; and other categories of public and private uses.

Under the General Plan, the Project Site’s land use designation is Commercial. The primary purpose of the Commercial land use designation is to allow for the development of land for business purposes, including but not limited to, retail stores, restaurants, banks, hotels, professional offices, personal services and repair services.

The Applicant is requesting, via A General Plan Amendment, that the Commercial land use designation be changed to Business Park/Light Industrial. The primary purpose of the Business Park/Light Industrial land use designation is to allow for the development

of land for manufacturing, research and development, warehousing and distribution, office uses and other uses that support commercial activities. If the proposed General Plan Amendment is approved, the land use designation of the Project Site will remain consistent with adjacent parcels to the south and east, which fall within the Business Park/Light Industrial land use designation. On balance, the General Plan Amendment will increase the amount of land in the City with a Business Park/Light Industrial land use designation by approximately 17.67-acres, with a corresponding decrease in the amount of land within the City with a Commercial land use designation.

Change of Zone

In contrast to planning goals and objectives of the General Plan, which has a much broader connotation, zoning is a separation of the City into zoning districts, and includes the regulation of buildings and structures, according to their construction, and the nature and extent of their use.

Consistent with the Project Site's General Plan Commercial land use designation, the Project Site is currently zoned Community Commercial (CC). The Applicant, however, want to also change the Project Site's zoning to Light Industrial (LI). The primary purpose of the Light Industrial (LI) zone is to provide for the development of light manufacturing, light industrial, research and development, warehousing and distribution and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial on a limited basis. While the purpose of the two zoning districts are different, the proposed Change of Zone will be consistent with adjacent parcels to the south since those parcels are developed with light industrial buildings and zoned Light Industrial District (LI).

Tentative Parcel Map

The Applicant is also requesting the approval of a Tentative Parcel Map 37944 to subdivide a single parcel into two separate parcels for Building #1 and Building #2.

The Subdivision Map Act distinguishes between a subdivision consisting of five or more parcels, which requires a tentative and final map, and a subdivision consisting of only four or fewer parcels, which merely requires a parcel map. However, local ordinances may require a tentative map for subdivisions of four or fewer parcels, which is what is required under the City's Municipal Code. When a tentative map is involved, no grading or construction work shall be performed until the tentative map and the improvement plans for such work have been approved by the appropriate approving authority of the City.

Plot Plans

The Applicant is requesting approval of two separate Plot Plans. The purpose of a Plot Plan is to provide a mechanism by which new construction and design of industrial, commercial or multiple-family residential projects can be reviewed.

The Applicant is proposing the construction of two light industrial buildings, one

approximately 290,726 square feet in size and one approximately 98,877 square feet in size (“Project”) with associated parking, landscape improvements and off-site public improvements.

The current proposal anticipates both buildings will be constructed in conjunction with each other. However, should one building be delayed, all on-site and off-site improvements shall be constructed with the first building.

In approving a plot plan, the approving authority shall impose conditions of approval for the project regarding on-site improvements, off-site improvements, the manner in which the site is used and any other conditions as may be deemed necessary to protect the public health, safety and welfare and ensure that the project will be developed in accordance with the purpose and intent of the City’s regulations as set forth in Title 9 (Planning and Zoning).

Surrounding Vicinity

The Project Site is located in the center of the block on the southside of Alessandro Boulevard between Frederick Street and Graham Street.

The property across the street from the Project Site on the northside of Alessandro Boulevard is zoned Neighborhood Commercial (NC), Residential 20 (R20), and Residential 5 (R5), and is developed as such. The property west of the Project Site is vacant and unimproved and it is zoned Community Commercial (CC). The property south of the Project Site is developed with light industrial buildings and zoned Light Industrial District (LI). To the east of the Project Site, the land is vacant and unimproved and zoned Business Park-Mixed Use District (BPX) and Community Commercial (CC).

Access/Parking

Access to the Project Site will be from three new driveways along Alessandro Boulevard. All three driveways will be right-in and right-out, with only two driveways designed to accommodate truck traffic.

The Project’s proposed truck and automobile parking exceed the Municipal Code’s parking standards for such projects. Overall, a total of 217 parking spaces will be provided for both buildings which include standard automobile, ADA, EV, EVCS and Clean Air spaces, with 44-truck stalls in the truck court. Bicycle parking will also be provided as required by the City’s applicable standards.

Design/Landscaping

The proposed light industrial type buildings incorporate a contemporary architectural design. Dark bronze metal tower elements at the building corners provide a focal point with textured concrete sections, glass, tile and various awning types, bringing an office aesthetic to the buildings. The elements are included on the side elevations for continuity of the buildings. The colors of off-white, taupe and warm grey provide the background for the dark bronze metal tower and brown metal window treatments, which

include flat awnings above the pained windows and elongated awnings at intervals, which break up the massing of the buildings.

Extensive landscaping is provided along the building frontage in addition to the required front set back and right-of-way landscaping which includes plant, ground covers, street trees and on-site trees.

Environmental

An Initial Study was prepared by T&B Planning, Inc., in compliance with the California Environmental Quality Act (CEQA) and the CEQA Guidelines. The Initial Study examined the potential Project impacts on the environment. The Initial Study/Mitigation Negative Declaration (IS/MND) provides information in support of the finding that a Mitigated Negative Declaration serves as the appropriate CEQA documentation for the proposed Project in that the proposed Project, with the implementation of the proposed mitigation measures, will not have a significant effect on the environment.

Technical studies prepared in support of the IS/MND include the following: Air Quality Impact Analysis, Mobile Source Health Risk Assessment, MSHCP General Biological Resources Assessment & Compliance Analysis, Jurisdictional Delineation Report and Impact Analysis, MSHCP Determination of Biologically Equivalent or Superior Preservation, Burrowing Owl Focused Survey Report, Least Bell's Vireo Focused Survey Report, Phase I Cultural Resources Survey, Energy Analysis, Geotechnical Engineering Investigation, Greenhouse Gas Analysis, Phase I Environmental Site Assessment Report, Paleontological Assessment, Preliminary Water Quality Management Plan, Preliminary Drainage Study, Noise Impact Analysis, Traffic Analysis, and Vehicle Miles Traveled (VMT) Analysis. The electronic files for the IS/MND with appendices are attached to this staff report.

Public Notices

The City provided the requisite notices related to the Project's Mitigated Negative Declaration as required under the California Environmental Quality Act ("CEQA") (Public Res. Code, § 21000 *et seq.*), the State CEQA Guidelines (14 CCR § 15000 *et seq.*, and the City of Moreno Valley's "Rules and Procedures for the Implementation of CEQA," as discussed below.

There was no notice requirement for an Initial Study until the City determined that it would prepare either a Negative Declaration or an Environmental Impact Report. If the City concluded that a Negative Declaration was required, it was required to immediately send out a Notice of Intent to Adopt a Negative Declaration or Mitigated Negative Declaration. (14 Cal Code Regs. § 15072.) The City was required provide the Notice by:

1. Mailing the Notice to the last known name and address of all organizations and individuals who have previously requested such notice in writing;
and
2. Giving notice by at least one of the following:

- a. Publication at least one time in a newspaper of general circulation in the area;
- b. Posting of notice on and off site in the area where the project is to be located;
- or
- c. Direct mailing to the owners and occupants of property contiguous to the project, with the owners of such property being identified as shown on the latest equalized assessment roll.

The City was also required to send a copy of the Notice of Intent to each responsible agency. (14 Cal. Code Regs. 15073.) The review period must be at least 20 days, but the City provided 30 days. If any agency provided comments, the City was required to also give notice of any public hearing on the project to the commenting agency.

Moreno Valley Municipal Code Section 9.02.200 (Public Hearing and Notification Procedures) provides in part that the public review period for a proposed negative declaration or mitigated negative declaration shall be not less than twenty (20) days. However, when a proposed negative declaration or mitigated negative declaration is submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than thirty (30) days, unless a shorter period, not less than twenty (20) days, is approved by the State Clearinghouse.

The following records, which are available to review in the Planning Division and which are part of the Administrative Record for the Project, demonstrate that the City complied with all the aforementioned notice requirement under CEQA and the CEQA Guidelines: 1) Public Agency Mailing List; 2) Notice of Availability/Notice of Intent; 3) Notice of Availability/Notice of Intent filed with the County; 4) Notice of Availability/Notice of Intent filed with the Department of Fish & Game; 5) Notice of Availability/Notice of Intent submitted to Press Enterprise Newspaper; 6) State Clearinghouse confirmation of receipt; 7) San Manuel Band of Mission Indians Comment Letter, dated 08/25/2021; 8) South Coast Air Quality Management District Comment Letter dated 08/17/2021; 9) March Joint Powers Authority Comment Letter dated 08/05/2021; 10) Golden State Environmental Justice Alliance Comments Letters, dated 02/20/2021, 08/26/2021 and 09/02/2021, respectively; 11) Planning Commission Public Hearing Notice; 12) Property Owner List; 13) Planning Commission Staff Report; and 14) City Council Public Hearing Notice.

Because the City is a local agency, within five working days after the approval of the project for which the Mitigated Negative Declaration was prepared becomes final, a Notice of Determination must be filed with the County Clerk. (Pub Res C § 21152; 14 Cal Code Regs. § 15075.) Since this Project has not received final approval, there is currently no Notice of Determination.

Moreover, the Project Application, Planning Commission Meeting Agenda, Planning Commission Staff Report and this Staff Report indicate that Project includes applications for the following entitlements: 1) General Plan Amendment; 2) Zone Change; 3) Tentative Tract Map; and 4) Plot Plans.

In addition to providing the notices required under CEQA and/or the CEQA Guidelines, the Moreno Valley Municipal Code requires that public notice be provided for the above entitlement applications as follows:

Section 9.02.040 – General Plan Amendments

For General Plan Amendments, the Planning Commission must conduct a public hearing which requires notice of the Public Hearing to be provided in accordance with Section 9.02.200 (Public Hearing and Notification Procedures).

Section 9.02.050 – Amendments to Zoning Districts or Other Provisions of Title 9

For Amendment to Zoning Districts (Zone Changes), the Planning Commission must conduct a public hearing which requires notice of the Public Hearing to be provided in accordance with Section 9.02.200 (Public Hearing and Notification Procedures).

Section 9.02.070 – Plot Plan

Except as otherwise provided, authority for approval of plot plans is vested with the Planning Commission. Plot plan applications shall be subject to major development review procedures pursuant to Section 9.02.200 (Public Hearing and Notification Procedures).

Section 9.14.050 – Processing of Tentative Maps

For tract maps, a public hearing shall be held before the Planning Commission with notice of the public hearing being provided pursuant to Section 9.02.200 (Public Hearing and Notification Procedures), as amended by Ordinance No. 959.

Section 9.02.20 - Public Hearing and Notification Procedures

Section 9.02.20, as amended by Ordinance No. 959, provides in relevant part that whenever a public hearing is required, notice of public hearings shall be given by: 1) Publication in a newspaper of general circulation within the city at least ten (10) calendar days prior to the public hearing; 2) Mailing, at least ten (10) calendar days prior to the public hearing, to all owners of property within a radius of six hundred (600) feet from the exterior boundaries of the property involved in the application. For this purpose, the last known name and address of each property owner, as contained in the records of the latest equalized Riverside County assessor rolls, shall be used. If the number of owners to whom notice would be mailed or delivered pursuant to this subsection is greater than one thousand (1,000), in lieu of mailed or delivered notice, notice may be provided by placing a display advertisement of at least one-eighth page in at least one newspaper of general circulation in the city at least ten (10) days prior to the hearing.

In addition, Section 9.02.200 provides notice of the public hearing must be mailed at least ten (10) calendar days prior to the public hearing, or delivering at least ten (10) calendar days prior to the public hearing, to each local agency expected to provide

water, sewer, schools, or other essential services or facilities to the project whose ability to provide those facilities and services may be significantly affected.

The notice of the public hearing must also be mailed, at least ten (10) calendar days prior to the public hearing, to any person who has filed a written request with the community development director and has provided the community development director with a self-addressed stamped envelope for that purpose.

Notice of both the Planning Commission Public Hearing and City Council Public Hearing was provided pursuant to Section 9.02.200.

The following records, which are available to review in the Planning Division and which are part of the Administrative Record for the Project, demonstrate that the City complied with all the aforementioned notice requirements set forth in the Municipal Code: 1) Public Agency Mailing List; 2) Public Hearing Notices; 3) Property Owner List; and 4) Planning Commission Staff Report.

ALTERNATIVES

1. Conduct a public hearing and take action to certify the Initial Study/Mitigated Negative Declaration and Mitigated Monitoring and Reporting Program, approve the General Plan Amendment, Change of Zone, Tentative Parcel Map 37944 and approve both Plot Plans consistent with the Staff recommendations to the Planning Commission. Staff recommends this alternative.
2. Conduct a public hearing on the Project and do not approve the applications. Staff does not recommend this alternative.

FISCAL IMPACT

Not applicable

NOTIFICATION

The public hearing notice was published on September 24, 2021 in the local Press Enterprise newspaper. Public notices were sent to all property owners within 600 feet of the project site on September 23, 2021, and posted on the site September 24, 2021.

CITY COUNCIL GOALS

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 1.1: Proactively attract high-quality businesses.

Objective 1.3: Promote local hiring through the expansion of local, quality, high paying jobs, and workforce development efforts.

Objective 1.5: Showcase Moreno Valley's unique assets.

Objective 2.5: Develop partnerships with local businesses and warehouse operators to reduce traffic related issues.

RESOLUTION NUMBER 2021-

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, ADOPTING A MITIGATED NEGATIVE DECLARATION AND MITIGATION MONITORING AND REPORTING PROGRAM FOR THE COMPASS DANBE CENTERPOINTE PROJECT LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and the lead agency for the preparation and consideration of environmental documents for local projects that are subject to requirements of the California Environmental Quality Act (CEQA) and CEQA Guidelines; and

WHEREAS, CDRE Holdings, LLC., ("Developer") is seeking approval for the development of the Compass Danbe Centerpointe project, a two building light industrial complex on a 17.67-acre site that includes: 1) a General Plan Amendment (GPA) (PEN20-0118) amending the "Land Use Map" (Map LCC-4) of the Moreno Valley General Plan to change the land use designation of the Project site from Commercial to Business Park; 2) a Change of Zone (PEN20-0119) to change the zoning designation of the site from Community Commercial District (CC) to Light Industrial District (LI); 3) a Tentative Parcel Map (PEN20-0120) for two lots; 4) a Plot Plan (PEN20-0121) for an approximately 290,726 square foot light industrial building; 5) a Plot Plan (PEN21-0124) for an approximately 98,877 square foot light industrial building with associated public improvements located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN'S 297-170-002-003); and

WHEREAS, the proposed "Project" shall include not only the General Plan Amendment (GPA) (PEN20-0118), Change of Zone (PEN20-0119), Tentative Parcel Map (PEN20-0120), and two Plot Plans (PEN20-0121 and PEN20-0124), but also a corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment; and

WHEREAS, Planning Division Staff completed an environmental assessment for the proposed Project, and, based on the assessment, decided to prepare an Initial Study ("IS") and a Mitigated Negative Declaration ("MND") in accordance with Section 6 (ND Procedures) of the City's Rules and Procedures for the Implementation of the California Environmental Quality Act and the requirements of the CEQA Guidelines Sections 15070 – 15075; and

WHEREAS, a Notice of Intent to Adopt a Mitigated Negative Declaration was duly noticed and circulated for public review for a period of 30 days commencing on July 26, 2021, through August 25, 2021; and

WHEREAS, in conformance with CEQA and the CEQA Guidelines, a Mitigation Monitoring and Reporting Program (“MMRP”) that includes a program for reporting on and monitoring Project mitigation measures was prepared for the proposed Project and noticed with the Mitigated Negative Declaration; and

WHEREAS, on August 26, 2021 a hearing was conducted by the Planning Commission whereby the Planning Commission approved Planning Commission Resolution 2021-24, a recommendation that the City Council approve the Mitigated Negative Declaration and the Mitigation Monitoring Plan and approve the proposed Project; and

WHEREAS, on October 5, 2021, a hearing was conducted by the City Council to approve the Mitigated Negative Declaration and the Mitigation Monitoring and Reporting Program and approve the proposed Project; and

WHEREAS, at the conclusion of the public hearing, in the exercise of its own independent judgment, the City Council has determined that the Mitigated Negative Declaration and the Mitigation Monitoring and Reporting Program will reduce the environmental impacts of the Project to levels of insignificance and that there is no substantial evidence supporting a fair argument that the Project will have a significant effect on the environment.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Evidence

That the City Council has considered all the evidence submitted into the Administrative Record for the Mitigated Negative Declaration and Mitigation Monitoring Plan, including, but not limited to, the following:

- (a) Mitigated Negative Declaration/Initial Study prepared for the proposed Project, attached hereto as Exhibit A;
- (b) Notice of Intent to Adopt a Mitigated Negative Declaration/Newspaper Notice, attached hereto as Exhibit B;
- (c) Mitigation Monitoring and Reporting Program, attached hereto as Exhibit C;
- (d) Staff Report prepared for the City Council’s consideration and all documents, records and references related thereto, and Staff’s presentation at the public hearing; and
- (e) Testimony, comments and correspondence from all persons that were provided at, or prior to, the public hearing.

Section 3. Findings

That based on the content of the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the City Council makes the following findings:

- (a) That the City has independently reviewed, analyzed, and considered the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program, and the whole record before it, including, the Initial Study and comments received;
- (b) That the proposed mitigation measures will reduce all environmental impacts of the proposed Project to levels of insignificance and there is no substantial evidence supporting a fair argument that the Project will have a significant effect on the environment;
- (c) That the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program have been completed in compliance with CEQA and the CEQA Guidelines consistent the City's Rules and Procedures for the Implementation of the California Environmental Quality Act.
- (d) That the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program reflect the independent judgment and analysis of the City as lead agency for the proposed Project; and
- (e) That the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program are adequate to serve as the required CEQA environmental documentation for the proposed Project.

Section 4. Adoption

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings, as set forth herein, the City Council hereby adopts the Mitigated Negative Declaration/Initial Study attached hereto as Exhibit A and the Mitigation Monitoring and Reporting Program attached hereto as Exhibit C.

Section 5. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 6. Severability

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 7. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 8. Certification

That the City Clerk for the City Council shall certify to the passage of this Resolution.

MITIGATED NEGATIVE DECLARATION FOR COMPASS DANBE CENTERPOINTE PROJECT

Project Description:

The Compass Danbe Centerpointe project comprises a proposal for a General Plan Amendment (PEN20-0118); Change of Zone (PEN20-0119); Tentative Parcel Map No. 37944 (PEN20-0120); and two Plot Plans (PEN20-0121 and PEN20-0124) that provide for the development of an approximately 17.7-acre property with two light industrial buildings with a total combined building floor area of 389,603 square feet. The Project also would include cargo loading areas at each building (within an enclosed truck court with loading docks on the south sides of the proposed buildings), parking areas, landscaping, signage, and lighting.

Project Location:

The Project site is located south of Alessandro Boulevard, between Frederick Street and Graham Street, in the City of Moreno Valley, Riverside County, California (APNs: 297-170-002 and -003).

Project Proponent:

Mark Bachli
CDRE Holdings 17 LLC
523 Main Street
El Segundo, CA 90245

Findings:

It is hereby determined that, based on the information contained in the attached Initial Study, the Project would not have a significant adverse effect on the environment.

Mitigation Measures:

No.	Mitigation Measure
BR-1	<p>Within 30 days prior to grading, a qualified biologist shall conduct a survey of suitable habitat on site and make a determination regarding the presence or absence of the burrowing owl. The determination shall be documented in a report and shall be submitted, reviewed, and accepted by the City of Moreno Valley prior to the issuance of a grading permit and subject to the following provisions:</p> <ul style="list-style-type: none"> a) In the event that the pre-construction survey identifies no burrowing owls on the property a grading permit may be issued without restriction. b) In the event that the pre-construction survey identifies the presence of at least one individual but less than three (3) mating pairs of burrowing owl, then prior to the issuance of a grading permit and prior to the commencement of ground-disturbing activities on the property, the qualified biologist shall passively or actively relocate any burrowing owls. Passive relocation, including the required use of one-way doors to exclude owls from the site and the collapsing of burrows, will occur if the biologist determines that the proximity and availability of alternate habitat is suitable for successful passive relocation. Passive relocation shall follow CDFW relocation protocol and shall only occur between September 15 and February 1. If proximate alternate habitat is not present as determined by the biologist, active relocation shall follow CDFW relocation protocol. The biologist shall confirm in writing that the species has fledged the site or been relocated prior to the issuance of a grading permit. c) In the event that the pre-construction survey identifies the presence of three (3) or more mating pairs of burrowing owl, the requirements of MSCHP Species-

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

No.	Mitigation Measure
	<p>Specific Conservation Objectives 5 for the burrowing owl shall be followed. Objective 5 states that if the site (including adjacent areas) supports three (3) or more pairs of burrowing owls and supports greater than 35 acres of suitable habitat, at least 90 percent of the area with long-term conservation value and burrowing owl pairs will be conserved onsite until it is demonstrated that Objectives 1-4 have been met. A grading permit shall be issued, either:</p> <ul style="list-style-type: none"> i) Upon approval and implementation of a property-specific Determination of Biologically Superior Preservation (DBESP) report for the burrowing owl by the CDFW; or ii) A determination by the biologist that the site is part of an area supporting less than 35 acres of suitable Habitat, and upon passive or active relocation of the species following accepted CDFW protocols. Passive relocation, including the required use of one-way doors to exclude owls from the site and the collapsing of burrows, will occur if the biologist determines that the proximity and availability of alternate habitat is suitable for successful passive relocation. Passive relocation shall follow CDFW relocation protocol and shall only occur between September 15 and February 1. If proximate alternate habitat is not present as determined by the biologist, active relocation shall follow CDFW relocation protocol. The biologist shall confirm in writing that the species has fledged the site or been relocated prior to the issuance of a grading permit.
BR-2	<p>All vegetation clearing and ground disturbance shall be prohibited during the bird nesting season (February 1 through September 15), unless a nesting bird survey is completed in accordance with the following requirements:</p> <ul style="list-style-type: none"> a) A bird nesting survey of the Project Site, including suitable habitat within a 100-foot radius, shall be conducted by a qualified biologist within five (5) days prior to initiating vegetation clearing or ground disturbance at the respective property. A copy of the nesting bird survey results report shall be provided to the City of Moreno Valley. b) If the survey does not identify the presence of any active nests, then construction activities can proceed without restriction. c) If the survey identifies the presence of active nests, then the qualified biologist shall provide the City with a copy of maps showing the location of all nests and a species-appropriate buffer zone around each nest sufficient to protect the nest from substantial adverse direct and/or indirect impacts. The size and location of all buffer zones, if required, shall be subject to review and approval by the City but shall be no less than a 100-foot radius around the nest for non-raptor species and no more than a 500-foot radius around the nest for raptor species and any endangered, threatened, or candidate species. <ul style="list-style-type: none"> i) The nests and buffer zones shall be field checked weekly by a qualified biological monitor. The approved buffer zone shall be marked in the field with construction fencing. No construction vehicles shall be permitted within restricted areas (i.e., bird protection zones), unless directly related to the management or protection of the legally protected species, until after the nest becomes inactive (or the nest has failed), the young have fledged, the young are no longer being fed by the parents, the young have left the area, or the young will no longer be impacted by the activities. ii) In the event that a nest is abandoned despite efforts to minimize disturbance and, if the nestlings are still alive, the Project Applicant/Developer shall contact the California Department of Fish and

No.	Mitigation Measure
	Wildlife (CDFW) and, subject to CDFW approval, fund the recovery and hacking (controlled release of captive reared young) of the nestling(s).
BR-3	Prior to the issuance of grading permits, the Project Applicant shall obtain all applicable permits for impacts to jurisdictional features, which may include a 1602 Streambed Alteration Agreement from CDFW and a 401 Certification issued by the RWQCB pursuant to the California Water Code Section 13260. In addition, the Project Applicant shall purchase a minimum of 0.81-acre of re-establishment credits (a 1:1 mitigation-to-impact ratio for impacts to wetland meadow habitat) and 0.82-acre of rehabilitation credits (a 2:1 mitigation-to-impact ratio for impacts to black willow riparian woodland and disturbed wetland-cattail habitats). Habitat mitigation credits can be purchased either at an approved Habitat Mitigation Bank (e.g., Riverpark Mitigation Bank) or via an In-Lieu Fee Program (e.g., Riverside-Corona Resource Conservation District and the Southwest Resource Management Association Santa Ana River Watershed In-Lieu Fee Program). Approval to purchase the mitigation credits must be granted in advance by the resource agencies. The Project Applicant shall provide evidence to the City of Moreno Valley that the applicable permits have been obtained and that the required habitat mitigation credits have been purchased prior to issuance of grading permits.
GEO-1	Prior to the issuance of a grading permit, the Project Applicant shall provide evidence to the City of Moreno Valley that a qualified paleontologist has been retained by the Project Applicant to conduct monitoring of excavation activities and has the authority to halt and redirect earthmoving activities in the event that suspected paleontological resources are unearthed.
GEO-2	The paleontological monitor shall conduct full-time monitoring during grading and excavation operations in undisturbed, very old alluvial fan sediments at depths exceeding five feet below the existing ground surface and shall be equipped to salvage fossils if they are unearthed to avoid construction delays and to remove samples of sediments that are likely to contain the remains of small fossil invertebrates and vertebrates. The paleontological monitor shall be empowered to temporarily halt or divert equipment to allow of removal of abundant and large specimens in a timely manner. Monitoring may be reduced if the potentially fossiliferous units are not present in the subsurface, or if present, are determined upon exposure and examination by qualified paleontological personnel to have a low potential to contain or yield fossil resources.
GEO-3	Recovered specimens shall be properly prepared to a point of identification and permanent preservation, including screen washing sediments to recover small invertebrates and vertebrates, if necessary. Identification and curation of specimens into a professional, accredited public museum repository with a commitment to archival conservation and permanent retrievable storage, such as the Western Science Museum in Hemet, California, is required for significant discoveries.
GEO-4	A final monitoring and mitigation report of findings and significance shall be prepared, including lists of all fossils recovered, if any, and necessary maps and graphics to accurately record the original location of the specimens. The report shall be submitted to the City of Moreno Valley prior to building final.
TCR-1	Prior to the issuance of a grading permit, the Developer shall retain a professional archaeologist to conduct monitoring of all mass grading and trenching activities. The Project Archaeologist shall have the authority to temporarily redirect earthmoving activities in the event that suspected archaeological resources are unearthed during Project construction. The Project Archaeologist, in consultation with the Consulting Tribe(s), the contractor, and the City, shall develop a Cultural Resources Management Plan (CRMP) in consultation pursuant to the definition in

No.	Mitigation Measure
	<p>AB52 to address the details, timing and responsibility of all archaeological and cultural activities that will occur on the project site. A consulting tribe is defined as a tribe that initiated the AB 52 tribal consultation process for the Project, has not opted out of the AB52 consultation process, and has completed AB 52 consultation with the City as provided for in Cal Pub Res Code Section 21080.3.2(b)(1) of AB52. Details in the Plan shall include:</p> <ul style="list-style-type: none"> a) Project grading and development scheduling; b) The Project archeologist and the Consulting Tribes(s) as defined in MM TCR-1 shall attend the pre-grading meeting with the City, the construction manager and any contractors and will conduct a mandatory Cultural Resources Worker Sensitivity Training to those in attendance. The Training will include a brief review of the cultural sensitivity of the Project and the surrounding area; what resources could potentially be identified during earthmoving activities; the requirements of the monitoring program; the protocols that apply in the event inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols. All new construction personnel that will conduct earthwork or grading activities that begin work on the Project following the initial Training must take the Cultural Sensitivity Training prior to beginning work and the Project archaeologist and Consulting Tribe(s) shall make themselves available to provide the training on an as-needed basis; c) The protocols and stipulations that the contractor, City, Consulting Tribe(s) and Project archaeologist will follow in the event of inadvertent cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation.
TCR-2	<p>Prior to the issuance of a grading permit, the Developer shall secure agreements with the Pechanga Band of Luiseño Indians and Soboba Band of Luiseño Indians for tribal monitoring. The Developer is also required to provide a minimum of 30 days advance notice to the tribes of all mass grading and trenching activities. The Native American Tribal Representatives shall have the authority to temporarily halt and redirect earth moving activities in the affected area in the event that suspected archaeological resources are unearthed. If the Native American Tribal Representatives suspect that an archaeological resource may have been unearthed, the Project Archaeologist or the Tribal Representatives shall immediately redirect grading operations in a 100-foot radius around the find to allow identification and evaluation of the suspected resource. In consultation with the Native American Tribal Representatives, the Project Archaeologist shall evaluate the suspected resource and make a determination of significance pursuant to California Public Resources Code Section 21083.2.</p>
TCR-3	<p>In the event that Native American cultural resources are discovered during the course of grading (inadvertent discoveries), the following procedures shall be carried out for final disposition of the discoveries:</p> <ul style="list-style-type: none"> a) One or more of the following treatments, in order of preference, shall be employed with the tribes. Evidence of such shall be provided to the City of Moreno Valley Planning Division: <ul style="list-style-type: none"> i. Preservation-In-Place of the cultural resources, if feasible. Preservation in place means avoiding the resources, leaving them in the place they were found with no development affecting the integrity of the resources.

No.	Mitigation Measure
	ii. Onsite reburial of the discovered items as detailed in the treatment plan required pursuant to MM TCR-1. This shall include measures and provisions to protect the future reburial area from any future impacts in perpetuity. Reburial shall not occur until all legally required cataloging and basic recordation have been completed. No recordation of sacred items is permitted without the written consent of all Consulting Native American Tribal Governments as defined in MM TCR-1.
TCR-4	The City shall verify that the following note is included on the Grading Plan: "If any suspected archaeological resources are discovered during ground-disturbing activities and the Project Archaeologist or Native American Tribal Representatives are not present, the construction supervisor is obligated to halt work in a 100-foot radius around the find and call the Project Archaeologist and the Tribal Representatives to the site to assess the significance of the find."
TCR-5	If potential historic or cultural resources are uncovered during excavation or construction activities at the project site, work in the affected area must cease immediately and a qualified person meeting the Secretary of the Interior's standards (36 CFR 61), Tribal Representatives, and all site monitors per the Mitigation Measures, shall be consulted by the City to evaluate the find, and as appropriate recommend alternative measures to avoid, minimize or mitigate negative effects on the historic, or prehistoric resource. Determinations and recommendations by the consultant shall be immediately submitted to the Planning Division for consideration, and implemented as deemed appropriate by the Community Development Director, in consultation with the State Historic Preservation Officer (SHPO) and any and all Consulting Native American Tribes as defined in MM TCR-1 before any further work commences in the affected area.
TCR-6	If human remains are discovered, no further disturbance shall occur in the affected area until the County Coroner has made necessary findings as to origin. If the County Coroner determines that the remains are potentially Native American, the California Native American Heritage Commission shall be notified within 24 hours of the published finding to be given a reasonable opportunity to identify the "most likely descendant". The "most likely descendant" shall then make recommendations, and engage in consultations concerning the treatment of the remains (California Public Resources Code 5097.98).

--	--
8. **Project Location:** The Project site is located in the central-western portion of the City of Moreno Valley, Riverside County, California. The Project site is located south of Alessandro Boulevard, between Frederick Street and Graham Street (APNs: 297-170-002 and -003). Refer to Figure 1, *Regional Map*; Figure 2, *Vicinity Map*; and Figure 3, *USGS Topographic Map*.
9. **General Plan Designation:** Commercial. Refer to Figure 4, *Existing General Plan*.
10. **Specific Plan Name and Designation:** N/A

- 11. **Existing Zoning:** Community Commercial. Refer to Figure 5, *Existing Zoning*.
- 12. **Surrounding Land Uses and Setting** (Refer to Figure 6, *Aerial Photograph* and Figure 7, *Site Photographs*):

	Land Use	General Plan	Zoning
Project Site	Undeveloped	Commercial	Community Commercial
North	Residential	Residential: Max 5 du/ac; Residential: Max 20 du/ac	Residential 5; Residential 20
South	Industrial	Business Park/Light Industrial	Light Industrial
East	Commercial and Undeveloped	Business Park/Light Industrial; Commercial	Business Park-Mixed Use; Community Commercial
West	Undeveloped	Commercial	Community Commercial with Mixed-Use Institutional Anchor Overlay

- 13. **Project Description:** The Compass Danbe Centerpointe project (hereafter, “Project”) comprises a proposal for a General Plan Amendment (PEN20-0118); Change of Zone (PEN20-0119); Tentative Parcel Map No. 37944 (PEN20-0120); and Plot Plans (PEN20-0121 and PEN20-0124) that provides for the development of two light industrial buildings located south of Alessandro Boulevard, between Frederick Street and Graham Street. The components of the proposed Project are summarized on the following pages.

General Plan Amendment (PEN20-0118) would amend the City of Moreno Valley General Plan Land Use Map to change the land use designation for the entire Project site from “Commercial” to “Business Park/Light Industrial.” Refer to Figure 8, *General Plan Amendment (PEN20-0118)*.

Change of Zone (PEN20-0119) would amend the City of Moreno Valley Zoning Map to change the zoning designation for the entire Project site from “Community Commercial” to “Light Industrial.” Refer to Figure 9, *Change of Zone (PEN20-0119)*.

Tentative Parcel Map No. 37944 (PEN20-0120) would relocate the existing property line so that Building 1 and Building 2 would be placed upon separate parcels and, also, would grant various easements for public access (i.e., public sidewalks) and public utilities. Refer to Figure 10, *Tentative Parcel Map No. 37944 (PEN20-0120)*.

Plot Plans (PEN20-0121 and PEN20-0124) provide specific development plans for two industrial warehouse buildings (Buildings 1 and 2). Building 1, located on the western portion of the Project site, contains approximately 290,726 square feet (s.f.) of building floor area, including 280,726 s.f. of warehouse space, 5,000 s.f. of office space, and 5,000 s.f. of mezzanine. Building 2, located on the eastern portion of the Project site, contains approximately 98,877 s.f. of building floor area, including 93,77 s.f. of warehouse space, 2,500 s.f. of office space, and 2,500 s.f. of mezzanine. The total combined building floor area for Building 1 and Building 2 is approximately 389,603 s.f. Both buildings include outdoor employee break areas with tables and seating; provided along the eastern side of Building 1 and along the western side of Building 2. The site plan for the Project is illustrated on Figure 11, *Site Plan*.

Vehicular access to the Project site is provided by three proposed driveways onto Alessandro Boulevard. The middle driveway would be accessible to only passenger vehicles and the westernmost driveway and easternmost driveway would be accessible to both passenger vehicles and trucks. All driveways would be restricted to right turn movements when entering/exiting the site. Sight distance at each Project driveway will be reviewed by the City of Moreno Valley at the time of preparation of final grading, landscape and street improvement plans to ensure that standard Caltrans and City of Moreno Valley sight distance standards are met.

Parking and Loading

The Project provides a range of parking and loading options across the Project site. Buildings 1 and 2 both provide enclosed truck courts on the south sides of the respective buildings. The truck court for Building 1 includes 32 loading bays and 34 truck trailer parking stalls; the truck court for Building 2 includes 10 loading bays and 10 truck trailer parking stalls. Neither truck court would be visible from Alessandro Boulevard. Building 1 also provides 144 passenger vehicle parking spaces (distributed along the north and east side and southeast corner of the building) while Building 2 provides 73 passenger vehicle parking spaces along the north and west sides and southeast corner of the building). Bicycle parking spaces (“racks”) would be provided at the northeast corners of Building 1 (4 racks) and Building 2 (2 racks) in conformance with Moreno Valley Municipal Code Section 9.11.060(B)(1) which requires bicycle parking spaces be provided at a rate equal to five percent of the total required parking spaces.

Architecture

Figure 12, *Architectural Elevations*, depicts the Project’s architectural design. Building 1 would have a maximum height of approximately 46 feet (measured from finished floor to the top of the parapets) and Building 2 would have a maximum height of approximately 46 feet (measured from finished grade to the top of the parapets). Both buildings are proposed to be constructed with painted concrete tilt-up panels and low reflective, blue-glazed glass. Articulated building elements, include parapets with a varied roofline, wall recesses, awnings, and mullions are proposed as decorative elements. The exterior color palette for Buildings 1 and 2 are comprised of various neutral, earth-toned colors, including shades of white, beige, gray, and dark brown.

Prior to the issuance of building permits to construct the Project, the Project Applicant would be required to submit construction architecture documents/plans to the City of Moreno Valley for review and approval. The construction documents/plans would be required to comply with the City of Moreno Valley Building Code, which is based on the California Building Code and is included in Chapter 8.20 of the City of Moreno Valley Municipal Code.

Landscaping

Figure 13, *Conceptual Landscape Plan*, depicts the proposed landscape design for the Project. Proposed landscaping would be ornamental in nature and would feature trees, shrubs, and drought-tolerant accent plants in addition to a variety of groundcovers. Trees and groundcover would be concentrated along the Project site’s frontage with Alessandro Boulevard and along the Project site’s eastern and western boundaries. Landscaping also is massed at driveways, around the buildings, and in and around automobile parking areas.

Prior to the issuance of a building permit to construct the proposed building, the Project Applicant would be required to submit final planting and irrigation plans to the City of Moreno Valley for review and approval. The plans are required to comply with Chapter 9.17 of the Moreno Valley Municipal Code, which establishes requirements for landscape design, automatic irrigation system design, and water-use efficiency.

Project Improvements

Public Roadway Improvements

The Project includes the following public roadway improvements in conjunction with development of the Project site:

1. The Project Applicant would improve the south side of Alessandro Boulevard to its ultimate half-section width as a Divided Major Arterial along the Project site's frontage. With proposed improvements, the south side of the street would feature: a 55-foot-wide travel way (including the existing raised median), new curb and gutter, a 6-foot-wide sidewalk abutting the curb, and a bioretention swale.
2. The Project Applicant would construct three driveways along the northern Project site boundary onto Alessandro Boulevard (which would require striping for lane transitions).
3. The Project Applicant would remove an existing bus stop along the south side of Alessandro Boulevard at the approximate midpoint of the northern Project site boundary. The bus stop would not be replaced as the Project site does not meet City's design requirements for a bus stop (the City's standard for bus stops/turnouts is at the far side of an intersection near a controlled crosswalk, not mid-block which is where the Project site is located).

Water Infrastructure

Eastern Municipal Water District (EMWD) would provide water service to the Project site. As depicted on Figure 14, numerous connection points are proposed to the existing water line installed beneath Alessandro Boulevard for indoor, outdoor (i.e., landscape irrigation), and fire protection (i.e., fire hydrant) services. All proposed water facilities would be designed and constructed in accordance with EMWD standards.

Sanitary Sewer Service

EMWD would provide wastewater conveyance services to the Project site. As shown on Figure 14, the Project would connect to the existing sewer line beneath the southern Project site boundary. All proposed wastewater facilities would be designed and constructed in accordance with EMWD's standards.

Stormwater Drainage Infrastructure

As shown in Figure 14, *Conceptual Drainage Plan*, the Project's on-site stormwater drainage system would consist of catch basins, underground storm drain pipes, bioretention swales, two underground detention basins, two modular wetlands units, and two sump pumps. Runoff from the proposed Building 1 area would drain to a proposed underground detention system located in the southwest corner of the Project site, which would then be pumped to a proposed modular wetlands unit for water quality treatment purposes. Flows would then be conveyed westerly and then southerly via an existing 54-inch storm drain beneath the southwest corner of the Project site. Runoff from the proposed Building 2 area of the Project site would drain to a proposed underground detention system located in the southeast corner of the Project site, which would then be pumped to another proposed modular wetlands unit before being conveyed easterly to an existing 36-inch storm drain beneath the southeast corner of the Project site.

The Project also includes connections to the existing storm drain beneath Alessandro Boulevard to convey storm drain runoff from off-site tributary areas to the north through the Project site. Stormwater runoff from Alessandro Boulevard also would be conveyed through the Project site – after flowing through proposed bioretention swales abutting Alessandro

Boulevard. Off-site runoff flows conveyed through the Project site would discharge to existing storm drains at the southwest and southeast corners of the Project site.

Dry Utilities

Implementation of the Project would result in the installation of conduit for communications cabling along the Project site's frontage with Alessandro Boulevard. Existing wooden power poles along the Project site would be removed as part of Project construction and the overhead electric transmission lines suspended on these poles would be undergrounded. The removal of the power poles and the undergrounding of the transmission lines would be performed in coordination with Moreno Valley Utility.

Earthwork and Grading

Physical disturbances necessary to implement the Project include grading of the entire Project site. As shown on Figure 15, *Conceptual Grading Plan*, the proposed Project would result in approximately 30,500 cubic yards of cut and 26,000 cubic yards of fill. Based on the expected shrinkage and compaction of on-site soils, earthwork activities are expected to balance and no import or export of soil materials would be required. When grading is complete, the Project site would have a slight downward slope from north to southeast. No manufactured slopes and no retaining walls are needed to implement the Project.

Construction Characteristics

Based on information provided by the Project Applicant, the Project is expected to be constructed over a period of approximately 190 work days (8 months). Site preparation would occur first, followed by mass-grading and installation of underground infrastructure. Next, fine grading would occur, surface materials would be poured, and the proposed building would be erected, connected to the underground utility system, and painted. Lastly, landscaping, fencing, screen walls, lighting, signage, and other site improvements would be installed. For purposes of analysis in this MND, construction is assumed to commence in October 2021 and finish in June 2022. The estimated Project construction schedule, organized by construction stage, is summarized in Table 1, *Estimated Construction Schedule*.

Table 1: Estimated Construction Schedule

Phase Name	Start Date	End Date	Days
Site Preparation	10/04/2021	10/15/2021	10
Grading	10/16/2021	11/26/2021	30
Building Construction	11/27/2021	06/24/2022	150
Paving	05/28/2022	06/24/2022	20
Architectural Coating	05/01/2022	06/24/2022	40

Source: (Urban Crossroads, 2020a, Table 3-2)

Construction workers would travel to the site by passenger vehicle and materials deliveries would occur by medium- and heavy-duty trucks. Construction equipment is expected to operate on the Project site up to eight hours per day, six days per week. Even though construction activities are permitted to occur between 7:00 a.m. to 8:00 p.m. on Mondays through Saturdays pursuant to Moreno Valley Municipal Code Section 11.80.030(D)(7), construction equipment is not in continual use and some pieces of equipment are used only periodically throughout a typical day of construction. Thus, eight hours of daily use per piece of equipment is a reasonable assumption. Should construction activities need to occur at night (such as concrete pouring activities which benefit from air temperatures that are lower than daytime temperatures), the Project Applicant would be required to obtain authorization

for nighttime work from the City of Moreno Valley as specified in Moreno Valley Municipal Code Section 11.80.030(D)(7).

The composition of the construction equipment fleet that the Project Applicant intends to use to construct the warehouse building, which also is used for purposes of analysis is in this IS/MND, is summarized in Table 2, *Estimated Construction Equipment Fleet*.

Table 2: Estimated Construction Equipment Fleet

Phase Name	Equipment	Amount	Hours Per Day
Site Preparation	Crawler Tractors	4	8
	Rubber Tired Dozers	3	8
	Water Trucks	1	4
Grading	Crawler Tractors	2	8
	Excavators	2	8
	Graders	1	8
	Rubber Tired Dozers	1	8
	Scrapers	2	8
	Water Trucks	1	4
Building Construction	Cranes	1	8
	Forklifts	3	8
	Generator Sets	1	8
	Tractors/Loaders/Backhoes	3	8
	Welders	1	8
	Water Trucks	1	4
Paving	Pavers	2	8
	Paving Equipment	2	8
	Rollers	2	8
	Water Trucks	1	4
Architectural Coating	Air Compressors	1	8

Source: (Urban Crossroads, 2020a, Table 3-3)

Operational Characteristics

At this time, the future occupant(s) of the Project is unknown. The Project Applicant expects that the building primarily would be occupied by warehouse distribution operators. The proposed buildings are designed with the potential to utilize up to 30 percent of their floor area for cold storage or refrigerated uses. The Project is expected to be operational 24 hours per day, seven days per week, with exterior loading and parking areas illuminated at night. Lighting would be subject to compliance with Moreno Valley Municipal Code Section 9.08.100, which states that all outdoor lighting associated with nonresidential uses shall be fully shielded and directed away from surrounding residential uses to reduce glare and light trespass, and shall not exceed one-quarter-foot-candle minimum maintained lighting measured from within five (5) feet of any property line.

The proposed warehouse buildings are designed such that business operations would be conducted within the enclosed building, with the exception of traffic movement, parking, and

the loading and unloading of tractor trailers at designated loading bays. As a practical matter, dock doors on industrial buildings are not occupied by a truck at all times of the day. There are typically more dock door positions on industrial buildings than are needed for receiving and shipping volumes. The dock doors that are in use at any given time are usually selected based on interior building operation efficiencies. In other words, trucks ideally dock in the position closest to where the goods to be carried by the truck are inside the building. As a result, many dock door positions are frequently inactive throughout the day. The City of Moreno Valley will condition the Project to use outdoor cargo handling equipment (e.g., yard trucks, hostlers, yard goats, pallet jacks, forklifts) that is only powered by non-diesel engines (e.g., gasoline, natural gas, electric).

During operation, employees, visitors, and vehicles hauling goods will travel to and from the Project site on a daily basis. Project operations are calculated by a trip generation calculation study to generate approximately 742 vehicle trips per day, including 518 passenger vehicle trips and 224 truck trips. Pursuant to State law, on-road diesel-fueled trucks that would service the Project are required to comply with various air quality and greenhouse gas emission standards, including but not limited to the type of fuel used, engine model year stipulations, aerodynamic features, and idling time restrictions. Compliance with State law is mandatory and inspections of on-road diesel trucks subject to applicable State laws are conducted by the California Air Resources Board (CARB).

Project operations are expected to demand approximately 9,735 gallons of water per day and 30,090 gallons of wastewater per day (EMWD's standard demand rates for industrial warehouse/distribution land uses are 550 gallons of water per acre per day and 1,700 gallons of wastewater per acre per day, respectively); 5,261,115 kilowatt hours (kWh) of electricity per year; and 6,438,204 kilo-British thermal units (kBTU) of natural gas per year.

14. **Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?**

The City of Moreno Valley is required to consult with interested California Native American tribes regarding the Project pursuant to Assembly Bill 52 (AB 52). The City contacted California Native American Tribes with traditional use areas that encompass or are in the vicinity of the Project site. The Project received requests for consultation from Soboba Band of Luiseno Indians, Pechanga Band of Luiseno Indians, Rincon Band of Luiseno Indians, Agua Caliente Band of Cahuilla Indians, and San Manuel Band of Mission Indians. The City concluded consultation on June 16, 2021.

15. **Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):**

Riverside County Airport Land Use Commission (Airport Land Use Plan Consistency Determination); Santa Ana Regional Water Quality Control Board (NPDES Permit), Riverside County Flood Control and Water Conservation District (drainage infrastructure design); and Eastern Municipal Water District (domestic water and sewer system design/connections).

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- | | | |
|--|---|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agriculture & Forestry Resources | <input type="checkbox"/> Air Quality |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Energy |
| <input type="checkbox"/> Geology & Soils | <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Hazards & Hazardous Materials |
| <input type="checkbox"/> Hydrology & Water Quality | <input type="checkbox"/> Land Use & Planning | <input type="checkbox"/> Mineral Resources |
| <input type="checkbox"/> Noise | <input type="checkbox"/> Population & Housing | <input type="checkbox"/> Public Services |
| <input type="checkbox"/> Recreation | <input type="checkbox"/> Transportation | <input type="checkbox"/> Tribal Cultural Resources |
| <input type="checkbox"/> Utilities & Service Systems | <input type="checkbox"/> Wildfire | <input type="checkbox"/> Mandatory Findings of Significance |

DETERMINATION (To be completed by the Lead Agency):

On the basis of this initial evaluation:

- I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- I find that the proposed project MAY have a "potentially significant" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a Lead Agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the Lead Agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect is significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Less Than Significant with Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The Lead Agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or another CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analyses Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g. general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources. A source list should be attached, and other sources used, or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
I. AESTHETICS – Except as provided in Public Resources Code § 21099 – Modernization of Transportation Analysis for Transit-Oriented Infill Projects – Would the project:				
a) Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: Scenic resources within the City of Moreno Valley are identified as Box Springs Mountains, the Foothills, the Badlands, and Mount Russell and its foothills. According to General Plan Figure 7-2, <i>Major Scenic Resources</i>, the Project site is not located within or adjacent to a designated scenic resource or within a view corridor for any of the designated scenic resources in the City (Moreno Valley, 2006a, Figure 7-2).</p> <p>Scenic resources visible (at least partially) from public viewpoints adjacent to the Project site include Mount Russell (approximately 4.0 miles to the southeast and partially visible from Alessandro Boulevard) (Google Earth Pro, 2020). Under existing conditions, views of Mount Russell are largely obscured from Alessandro Boulevard due to intervening development and landscaping, topography, and atmospheric haze that is common in the Inland Empire throughout the year. The Project would not substantially alter any existing views of Mount Russell from Alessandro Boulevard. As stated above, views of Mount Russell from Alessandro Boulevard are largely obscured from the Project site by the existing warehouse abutting the southern Project site boundary and on-site landscaping (and, for parts of the year, atmospheric haze). The Project would construct buildings up to 46-feet-tall and install new landscaping on the Project site. The proposed building and site improvements would partially obscure views of Mount Russell from Alessandro Boulevard – although not substantially more than views are obscured under existing conditions – and views of the Mountains would continue to be available above the building.</p> <p>Implementation of the Project would not result in any impacts to view corridors as identified in the City of Moreno Valley General Plan (Moreno Valley, 2006a, Figure 7-2). Additionally, implementation of the Project would not result in a substantial adverse impact to the general viewsheds of the scenic resources within the City. Therefore, the Project would result in a less-than-significant impact associated with an adverse effect on a scenic vista.</p>				
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project site is not located within or adjacent to a scenic highway corridor and there are no State-designated or eligible scenic highways within the vicinity of the Project site (Caltrans, 2019). Additionally, the City of Moreno General Plan does not identify any Scenic Route within proximity to the Project site (Moreno Valley, 2006a, Figure 7-2). The nearest State-designated scenic highway to the Project site is a segment of State Route (SR-) 74 located approximately 9.3 miles southeast of the Project site; the Project site would not be visible from this SR-74 segment due to distance and intervening development/topography (Caltrans, 2019; Google Earth Pro, 2020). It should be noted, also, that an area of Interstate (I-) 15 near the above-named segment of SR-74 is eligible for consideration as a State scenic highway; however, the Project site would not be visible from this portion of I-15 due to distance and intervening development/topography (Caltrans, 2019; Google Earth Pro, 2020). Accordingly, the Project site is not located within a State scenic highway corridor and implementation of the proposed Project would not have a substantial effect on scenic resources within a State scenic highway corridor. Thus, no impact to a State scenic highway would occur from implementation of the Project.</p>				
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project site is located within an urbanized area, as defined by U.S. Census Bureau, and determined as part of the 2010 Census (U.S. Census Bureau, 2012). Thus, pursuant to this threshold,</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>a potentially significant impact to visual character only would occur if the Project were to conflict with applicable zoning and/or other City of Moreno Valley regulations governing scenic quality. Implementation of the proposed Project would result in the visual conversion of the site from vacant, undeveloped land to two industrial warehouse buildings with associated improvements including parking lots, drive aisles, utility infrastructure, landscaping, exterior lighting, and signage. The Project would be compatible with the size, scale, and aesthetic/decorative architectural and landscaping features of other existing light industrial/warehouse buildings constructed to the south and southwest of the Project site. Furthermore, the Project would be required to comply with the applicable development standards and design guidelines contained in the Moreno Valley Zoning Ordinance, which regulates the visual quality of new development and ensure that new development does not detract from any scenic attributes/qualities in the surrounding area. Because the Project site is located in an urbanized area and because the Project would not conflict with applicable regulations governing scenic quality, a less-than-significant impact would occur from implementation of the Project.</p>				
<p>d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: Under existing conditions, the Project site contains no sources of artificial lighting; however, street lights are present along the Project site's frontage with Alessandro Boulevard. The Project Applicant proposes to develop the site with two industrial warehouse buildings and would introduce new lighting elements on-site to illuminate the parking areas, truck docking areas, and building entrances.</p> <p>The Project Applicant would be required to comply with lighting requirements as set forth in the City of Moreno Valley Municipal Code Sections 9.10.110 and 9.16.280. The Municipal Code lighting standards govern the placement and design of outdoor lighting fixtures to ensure adequate lighting for public safety while also minimizing light pollution and glare and precluding public nuisances (e.g., blinking/flashing lights, unusually high intensity, or needlessly bright lighting). The City would confirm compliance with applicable lighting requirements during future review of building permit applications/plans. Mandatory compliance with the Municipal Code would ensure that the Project would not introduce any permanent design features that would adversely affect day or nighttime views in the area. This impact would be less than significant.</p> <p>With respect to glare, a majority of Project building materials would consist of concrete panels, which are non-reflective. While window glazing has a potential to result in minor glare effects, such effects would not adversely affect daytime views of surrounding properties, including motorists along adjacent roadways, because the glass proposed for the Project would be low-reflective, proposed buildings would be set back from adjacent roadways at a distance, and proposed landscaping would provide a buffer between all proposed glass surfaces and the public right of way. Thus, glare impacts from proposed building elements would be less than significant.</p>

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>II. AGRICULTURE AND FOREST RESOURCES – In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state’s inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest protocols adopted by the California Air Resources Board. Would the project:</p>				
<p>a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project site is not utilized for agricultural purposes under existing conditions. According to mapping information available from the California Department of Conservation’s (CDC) Farmland Mapping and Monitoring Program (FMMP), the Project site is classified as “Farmland of Local Importance” (CDC, 2016). Accordingly, the Project site does not contain any lands mapped by the FMMP as “Prime Farmland,” “Unique Farmland,” or “Farmland of Statewide Importance” and, thus, implementation of the Project would not convert such Farmland to a non-agricultural use. No impact would occur.</p>				
<p>b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project site is zoned for “Community Commercial” under existing conditions and would be re-zoned to “Light Industrial” as part of the Project; therefore, implementation of the Project would not conflict with zoning for agricultural use. Additionally, as disclosed in the City of Moreno Valley General Plan Final EIR, no land within the City – including the Project site – is under a Williamson Act Contract (Moreno Valley, 2006b, p. 5.8-6). Accordingly, implementation of the Project would not conflict with existing (or proposed) zoning for agricultural use or a Williamson Act contract. No impact would occur.</p>				
<p>c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project site is not zoned as forest land, timberland, or Timberland Production, nor is it surrounded by forest land, timberland, or Timberland Production land. According to the City of Moreno Valley Zoning Map, there are no lands located within the City of Moreno Valley that are zoned for forest land, timberland, or timberland zoned Timberland Production. Therefore, the Project has no potential to conflict with any areas currently zoned as forest, timberland, or Timberland Production and would not result in the rezoning of any such lands. As such, no impact would occur.</p>				
<p>d) Result in the loss of forest land or conversion of forest land to non-forest use?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project site does not contain a forest and is not designated as forest land; therefore, the Project would not result in the loss of forest land or the conversion of forest land to non-forest use. As such, no impact would occur.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>e) Involve other changes in the existing environment which, due to their location or nature, could result in the conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: “Farmland” is defined in Section II (a) of Appendix G of the State CEQA Guidelines as “Prime Farmland,” “Unique Farmland” or “Farmland of Statewide Importance” (“Farmland”). As disclosed above under Response II(a), the Project would not result in the conversion of Farmland to non-agricultural use.</p> <p>As discussed under Responses II(c) and II(d), the Project would not convert forest land to non-forest use. No impact would occur.</p>				
<p>Sources:</p> <ol style="list-style-type: none"> 1. Final Environmental Impact Report City of Moreno Valley General Plan, certified July 11, 2006 <ul style="list-style-type: none"> • Section 5.8 – Agricultural Resources 2. Title 9 – Planning and Zoning of the Moreno Valley Municipal Code <ul style="list-style-type: none"> • Chapter 9.03 – Residential District 3. Moreno Valley Zoning Map, http://www.moreno-valley.ca.us/cdd/pdfs/ZoningMap.pdf 4. California Department of Conservation – California Important Farmland Finder, https://maps.conservation.ca.gov/DLRP/CIFF/ 				
<p>III. AIR QUALITY – Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. Would the project:</p>				
<p>a) Conflict with or obstruct implementation of the applicable air quality plan?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project site is located within the South Coast Air Basin (SCAB or “Basin”). The SCAB encompasses approximately 6,745 square miles and includes Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino counties. The SCAB is bound by the Pacific Ocean to the west; the San Gabriel, San Bernardino, and San Jacinto Mountains to the north and east, respectively; and the San Diego County line to the south. In these areas, the South Coast Air Quality Management District (SCAQMD) is principally responsible for air pollution control, and works directly with the Southern California Association of Governments (SCAG), county transportation commissions, local governments, as well as state and federal agencies to reduce emissions from stationary, mobile, and indirect sources to meet state and federal ambient air quality standards.</p> <p>Historically and presently, State and federal air quality standards are exceeded in most parts of the SCAB. In response, the SCAQMD has adopted a series of Air Quality Management Plans (AQMPs) to meet the State and federal ambient air quality standards. AQMPs are updated regularly in order to more effectively reduce emissions, accommodate growth, and to minimize any negative fiscal impacts of air pollution control on the economy. The current AQMP, the 2016 AQMP, was adopted by SCAQMD in March 2017. Criteria for determining consistency with the AQMP are defined in Chapter 12 of the SCAQMD’s <i>CEQA Air Quality Handbook (1993)</i>. The Project’s consistency with these criteria is discussed below.</p> <p><i>Consistency Criterion No. 1: The Project will not result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations, or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.</i></p> <p>Consistency Criterion No. 1 refers to violations of the California Ambient Air Quality Standards (CAAQS) and National Ambient Air Quality Standards (NAAQS). As evaluated under Response III(c), below, the Project would not exceed the SCAQMD localized emissions threshold for any criteria pollutant during any construction phase of the Project. Accordingly, localized criteria pollutant emissions from Project construction would not increase the frequency or severity of existing air quality violations, cause or contribute to new violations, and/or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>The Project's operational emissions would not exceed SCAQMD localized emissions thresholds (refer to Response III(c), below); thus, long-term operation of the Project would not increase the frequency or severity of existing NAAQS and/or CAAQS violations, cause or contribute to new violations, and/or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.</p> <p>Therefore, construction and operation of the Project is determined to be consistent with the first criterion and the impact would be less than significant.</p> <p><u>Consistency Criterion No. 2:</u> <i>The Project will not exceed the assumptions in the AQMP based on the years of Project build-out phase.</i></p> <p>The growth forecasts used in the AQMP to project future emissions levels are based in part on land use data provided by lead agency general plan documentation. Projects that propose to increase the intensity of use on a subject property may result in increased stationary area source emissions and/or vehicle source emissions when compared to the AQMP assumptions. If a project does not exceed the growth projections in the applicable local general plan, then the project is considered to be consistent with the growth assumptions in the AQMP. The prevailing planning documents for the Project site is the City of Moreno Valley General Plan. The City of Moreno Valley General Plan Land Use Map designates the Project site for Commercial land use. The Project includes a request to change the existing General Plan land use designation for the Project site from Commercial to Business Park/Light Industrial, which, if approved, would result in a land use and development intensity that was not anticipated by the General Plan, and, by extension, the growth models that were used in the AQMP. Although the Project would not be consistent with the land use assumptions used in the AQMP, Project construction and operation would not exceed applicable SCAQMD regional or localized air quality significance thresholds. As such, the Project's inconsistency with Consistency Criterion No. 2 would not result in a substantial adverse environmental impact.</p> <p>For the reasons stated above, the Project would not result in a substantial adverse environmental impact due to an increase in the frequency or severity of existing air quality violations, the creation creation of new violations, the delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP, or the exceedance of growth assumptions in the AQMP. As such, impacts would be less-than-significant.</p>				
<p>b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The proposed Project has the potential to generate substantial pollutant concentrations during both construction activities and long-term operation. An <i>Air Quality Impact Analysis</i> (Urban Crossroads, 2020a) and a <i>Mobile Source Health Risk Assessment</i> (Urban Crossroads, 2020b) were prepared for the Project by Urban Crossroads, Inc. to evaluate potential criteria and hazardous air pollutant emissions that could result from the Project's construction and operation. These reports are included as <i>Technical Appendices A1 and A2</i> to this IS/MND and their findings are incorporated into the analysis presented herein.</p> <p>The following analysis is based on the applicable significance thresholds established by the SCAQMD for regional criteria pollutant emissions (as summarized in Table 3-1 of <i>Technical Appendix A1</i>). This analysis assumes that the Project would comply with applicable, mandatory regional air quality standards, including: SCAQMD Rule 403, "Fugitive Dust;" SCAQMD Rule 431.2, "Sulfur Content of Liquid Fuels;" SCAQMD Rule 1113, "Architectural Coatings;" SCAQMD Rule 1186, "PM₁₀ Emissions from Paved and Unpaved Roads, and Livestock Operations;" SCAQMD Rule 1186.1, "Less-Polluting Street Sweepers," and Title 13, Chapter 10, Section 2485, Division 3 of the California Code of Regulations "Airborne Toxic Control Measure."</p> <p>For a detailed description of the health effects of air pollutants refer to Section 2.4 of the Project's Air Quality Impact Analysis (<i>Technical Appendix A1</i>). In general, air pollutants have adverse effects to human health including, but not limited to, respiratory illness and carcinogenic effects; however, based</p>

on available modeling it is not feasible to correlate regional criteria pollutant emissions from development projects of the scale of the proposed Project to adverse health effects on a SCAB-wide level (Urban Crossroads, 2020a, pp. 10-16, 56-58). The potential for the Project to result in substantial adverse health effects from toxic air contaminant emissions is addressed under Response III(c), below.

Impact Analysis for Construction Emissions

For purposes of the construction emissions analysis, construction was conservatively expected to occur between October 2021 and June 2022. The California Emissions Estimator Model (CalEEMod) accounts for the implementation and enforcement of California's progressively more restrictive regulatory requirements for construction equipment and the ongoing replacement of older construction fleet equipment with newer, less-polluting equipment. Thus, according to the CalEEMod, construction activities that occur in the near future are expected to generate more air pollutant emissions than the same activities that may occur farther into the future. Accordingly, in the event that the Project's construction occurs at a later date than assumed in this air quality analysis, Project-related construction emissions are not expected to exceed the values presented herein (Urban Crossroads, 2020a, p. 38).

The calculated maximum daily emissions associated with Project construction are presented in Table 3, *Summary of Construction-Related Emissions*. The Project's construction characteristics and construction equipment fleet assumptions used in the analysis were previously described above in the Project Description (see Tables 1 and 2).

Table 3: Summary of Construction-Related Emissions

Year	Emissions (lbs/day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Summer						
2021	5.43	61.02	32.00	0.10	14.04	6.81

Maximum Daily Emissions	54.69	61.02	50.18	0.13	14.04	6.81
SCAQMD Regional Threshold	75	100	550	150	150	55
Threshold Exceeded?	NO	NO	NO	NO	NO	NO

Source: (Urban Crossroads, 2020a, Table 3-4)

As shown in Table 3, the Project's daily construction emissions of volatile organic compounds (VOCs), nitrogen oxides (NO_x) carbon monoxide (CO), sulfur oxides (SO_x), and particulate matter (PM₁₀ and PM_{2.5}) would not exceed SCAQMD regional criteria thresholds and, thus, would be less than significant. The SCAQMD considers any project-specific criteria pollutant emissions that exceed applicable SCAQMD significance thresholds also to be cumulatively-considerable. To put it another way, if a project does not exceed the SCAQMD regional thresholds, then SCAQMD considers that project's air pollutant emissions to not be cumulatively-considerable. Thus, because Project construction would not exceed the SCAQMD regional criteria significance thresholds, implementation of the Project would not result in a cumulatively-considerable net increase of any criteria pollutant, including any pollutants for which the SCAB does not attain applicable federal or State ambient air quality standards during construction.

Impact Analysis for Operational Emissions

Operational activities associated with the Project are expected to generate air pollutant emissions from the operation of motor vehicles (including trucks), landscape maintenance activities, application of architectural coatings, and the use of electricity and natural gas. Long term operational emissions associated with the Project are presented in Table 4, *Summary of Peak Operational Emissions*.

As summarized in Table 4, Project operational emissions of VOCs, NO_x, CO, SO_x, PM₁₀ and PM_{2.5} would not exceed SCAQMD regional criteria thresholds. Accordingly, the Project would not emit substantial concentrations of these pollutants during long-term operation and would not contribute to an existing or projected air quality violation. The Project's long-term emissions of VOCs, NO_x, CO, SO_x, PM₁₀ and PM_{2.5} would be less than significant.

c) Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The following analysis addresses the Project’s potential to expose sensitive receptors in the immediate vicinity of the Project site to substantial pollutant concentrations during Project construction and long-term operation. The following analysis is based on the applicable significance thresholds established by the SCAQMD (as summarized in Tables 3-9 and 3-11 of *Technical Appendix A1*).

Impact Analysis for Construction Localized Emissions

As summarized in Table 5, *Summary of Construction Localized Emissions*, localized emissions of NO_x, CO, and particulate matter (PM₁₀ and PM_{2.5}) would not exceed applicable SCAQMD thresholds during peak Project construction activities. Accordingly, Project construction would not expose any sensitive receptors to substantial concentrations of criteria pollutants. Impacts would be less than significant.

Impact Analysis for Operational Localized Emissions

The Project’s operational localized emissions are presented in Table 6, *Summary of Operational Localized Emissions*. As shown, the Project’s peak operational emissions would not exceed the localized thresholds established by the SCAQMD. Accordingly, long-term operation of the Project would not result in the exposure of any sensitive receptors to substantial pollutant concentrations. Impacts would be less than significant.

Impact Analysis for CO “Hot Spots”

Localized areas where ambient CO concentrations exceed the CAAQS and/or NAAQS are termed CO “hot spots.” Emissions of CO are produced in greatest quantities from motor vehicle combustion and are usually concentrated at or near ground level because they do not readily disperse into the atmosphere, particularly under cool, stable (i.e., low or no wind) atmospheric conditions. Consequently, the highest CO concentrations are generally found within close proximity to congested intersection locations.

For purposes of providing a conservative, worst-case impact analysis, the Project’s potential to cause or contribute to CO hotspots was evaluated by comparing study area intersections that would receive Project traffic (both intersection geometry and traffic volumes) with prior studies conducted by the SCAQMD in support of their AQMPs. In the 2003 AQMP, the SCAQMD evaluated CO concentrations at

four (4) busy intersections in the City of Los Angeles that were determined to be the most congested intersections in the SCAB. Each of the evaluated intersections were primary thoroughfares, some of which were located near major freeway on/off ramps, and experienced traffic volumes of approximately 100,000 vehicles per day. The SCAQMD’s analysis at these busy intersections did not identify any CO hotspots. Based on an analysis of the intersections in the Project’s study area, Urban Crossroads determined that none of the intersections in the Project’s study area would be subject to the extreme traffic volumes and vehicle congestion of the intersections modeled by the SCAQMD in the 2003 AQMP (Urban Crossroads, 2020a, pp. 52-53). Therefore, Project-related vehicular emissions would not create a CO hot spot and would not substantially contribute to an existing or projected CO hot spot. Impacts would be less than significant.

Impact Analysis for Diesel Particulate Emissions

Diesel-fueled trucks would travel to/from the Project site during operation of the Project. Diesel trucks produce diesel particulate matter (DPM), which is known to be associated with health hazards, including cancer. To evaluate the Project’s potential to expose sensitive receptors within ¼-mile of the Project site and the Project’s primary truck travel routes to substantial amounts of DPM during long-term operation, a *Mobile Source Health Risk Assessment* was prepared for the proposed Project (*Technical Appendix A2*). Project-related DPM health risks are summarized below. Detailed air dispersion model outputs and risk calculations are presented in Appendices 2.1 and 2.2, respectively, of *Technical Appendix A2*.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>At the maximally exposed individual receptor (MEIR) – the existing residential home located approximately 152 feet north of the Project site – the maximum cancer risk attributable to the Project’s DPM emissions is calculated to be 4.48 in one million. The cancer risk attributable to the Project at the MEIR would not exceed the SCAQMD cancer risk threshold of 10 in one million. At the MEIR, the non-cancer health risk index attributable to the Project would be 0.002, which would not exceed the SCAQMD non-cancer health risk index of 1.0 (Urban Crossroads, 2020b, p. 1). Accordingly, long-term operations at the Project site would not directly cause or contribute in a cumulatively-considerable manner to the exposure of residential receptors to substantial DPM emissions. Therefore, implementation of the Project would result in a less-than-significant impact.</p> <p>At the maximally exposed individual worker (MEIW) – the office building located approximately 744 feet west of the Project site – the maximum cancer risk attributable to the Project’s DPM emissions is calculated to be 0.18 in one million. The cancer risk attributable to the Project at the MEIW would not exceed the SCAQMD cancer risk threshold of 10 in one million. At the MEIW, the non-cancer health risk index attributable to the proposed Project would be 0.0006, which would not exceed the SCAQMD non-cancer health risk index of 1.0 (Urban Crossroads, 2020b, p. 1). Therefore, the Project would result in a less-than-significant impact.</p> <p>There are no schools located within a ¼ mile of the Project site, which is the distance from the Project site with the highest concentration of Project-related DPM emissions. Proximity to sources of toxics is critical to determining the impact. Based on California Air Resources Board and SCAQMD emissions and modeling analyses, particulate matter pollutant concentrations drop by 70 percent at approximately 500 feet from the emissions source and by 80 percent at approximately 1,000 feet from the emissions source (Urban Crossroads, 2020b, p. 2). Because there are no schools located within at least 1,320 feet of the Project site, implementation of the Project would not expose any school child receptors to substantial concentrations of diesel particulate matter emissions. Project-related truck traffic would travel off-site along public streets (traffic to/from I-215 is expected to travel along Alessandro Boulevard and Cactus Avenue). There are no schools located within ¼ mile of Alessandro Boulevard and Cactus Avenue between the Project site and I-215; therefore, the Project-related traffic traveling to/from I-215 would not expose school children receptors to substantial DPM concentrations. Based on the foregoing analysis, implementation of the Project would not expose school child receptors to substantial DPM concentrations. This impact is less than significant.</p>				
<p>d) Result in other emissions (such as those leading to odors adversely affecting a substantial number of people?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project could produce odors during proposed construction activities resulting from construction equipment exhaust, application of asphalt, and/or the application of architectural coatings; however, standard construction practices would minimize the odor emissions and their associated impacts. Furthermore, any odors emitted during construction would be temporary, short-term, and intermittent in nature, and would cease upon the completion of the respective phase of construction. In addition, construction activities on the Project site would be required to comply with SCAQMD Rule 402, which prohibits the discharge of odorous emissions that would create a public nuisance (Urban Crossroads, 2020a, pp. 58-59). Accordingly, the proposed Project would not create objectionable odors affecting a substantial number of people during construction, and short-term impacts would be less than significant.</p> <p>During long-term operation, the Project would include a warehouse land use, which is not typically associated with objectionable odors. The temporary storage of refuse associated with the proposed Project’s long-term operational use could be a potential source of odor; however, Project-generated refuse is required to be stored in covered containers and removed at regular intervals in compliance with the City’s solid waste regulations, thereby precluding any significant odor impact. Furthermore, the proposed Project would be required to comply with SCAQMD Rule 402, which prohibits the discharge of odorous emissions that would create a public nuisance, during long-term operation (Urban Crossroads, 2020b, pp. 58-59) As such, long-term operation of the proposed Project would not create objectionable odors affecting a substantial number of people and impacts would be less than significant.</p>

IV. BIOLOGICAL RESOURCES – Would the project:

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	-------------------------------------	--------------------------	--------------------------

Response: A *Multiple Species Habitat Conservation Plan (MSHCP) Compliance Analysis* was prepared for the Project by MIG. The MSHCP compliance analysis addresses potential impacts to candidate, sensitive, or special status species due to implementation of the Project and is included as *Technical Appendix B1* to this IS/MND (MIG, 2020a). Focused burrowing owl and least Bell’s vireo survey reports address the potential for the respective species to occur on the Project site and are included as *Technical Appendices B4* and *B5* (MIG, 2020b; MIG, 2020c). The analysis presented below is based on the findings of the abovementioned reports.

Special-Status Plant Species

All special-status plant species that have potential to occur within the Project survey area are adequately covered by the Western Riverside County MSHCP (MIG, 2020a, p. 15). Furthermore, the Project survey area is not located within a Narrow Endemic Plant Special Survey Area (NEPSSA) or Criteria Area Plant Special Survey Area (CAPSSA) and, thus, is not considered to be in an area with a high likelihood of supporting populations of sensitive native plant species (MIG, 2020a, p. 15). Implementation of the Project would not result in substantial adverse impacts to special-status plants and mitigation is not required.

Special-Status Wildlife Species

The Project site supports suitable habitat for the burrowing owl and least Bell’s vireo; however, neither species was observed on the Project site during focused species surveys (MIG, 2020a, pp. 15-16; MIG 2020b, p. 4; MIG 2020c, p. 5). All other special-status wildlife species that have the potential to occur within the Project survey area are adequately covered by the Western Riverside County MSHCP (MIG, 2020a, pp. 15-16). The Project’s consistency with the MSHCP is addressed under Response IV(f).

Notwithstanding the information presented above, the burrowing owl is a nomadic species and there is the potential that the species could migrate onto the Project site prior to construction. If burrowing owls are present on the Project site during grading activities, the Project’s impact to the species would be significant and mitigation would be required, as discussed below.

Additionally, implementation of Project would result in removal of vegetation across the Project site that has the potential to support nesting and/or migratory birds that are granted special status by federal and State regulations. The Project’s potential to impact nesting birds and migratory birds is a significant direct impact for which mitigation is required, as discussed below.

MM BR-1 and MM BR-2 would reduce potential impacts to the burrowing owl and nesting/migratory birds to less-than-significant levels by ensuring that pre-construction surveys are conducted to determine the presence or absence on the Project site of the burrowing owl and/or protected nesting bird species prior to the commencement of construction activities. If the burrowing owl or protected nesting bird species are present, the mitigation measures provide performance criteria that require avoidance and/or relocation of the species in accordance with accepted protocols.

Based on the foregoing analysis, the proposed Project would result in less-than-significant impacts to candidate, sensitive, or special status species with the implementation of mitigation.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<u>Mitigation</u>				
MM BR-1	<p>Within 30 days prior to grading, a qualified biologist shall conduct a survey of suitable habitat on site and make a determination regarding the presence or absence of the burrowing owl. The determination shall be documented in a report and shall be submitted, reviewed, and accepted by the City of Moreno Valley prior to the issuance of a grading permit and subject to the following provisions:</p> <ol style="list-style-type: none"> a) In the event that the pre-construction survey identifies no burrowing owls on the property a grading permit may be issued without restriction. b) In the event that the pre-construction survey identifies the presence of at least one individual but less than three (3) mating pairs of burrowing owl, then prior to the issuance of a grading permit and prior to the commencement of ground-disturbing activities on the property, the qualified biologist shall passively or actively relocate any burrowing owls. Passive relocation, including the required use of one-way doors to exclude owls from the site and the collapsing of burrows, will occur if the biologist determines that the proximity and availability of alternate habitat is suitable for successful passive relocation. Passive relocation shall follow CDFW relocation protocol and shall only occur between September 15 and February 1. If proximate alternate habitat is not present as determined by the biologist, active relocation shall follow CDFW relocation protocol. The biologist shall confirm in writing that the species has fledged the site or been relocated prior to the issuance of a grading permit. c) In the event that the pre-construction survey identifies the presence of three (3) or more mating pairs of burrowing owl, the requirements of MSCHP Species-Specific Conservation Objectives 5 for the burrowing owl shall be followed. Objective 5 states that if the site (including adjacent areas) supports three (3) or more pairs of burrowing owls and supports greater than 35 acres of suitable habitat, at least 90 percent of the area with long-term conservation value and burrowing owl pairs will be conserved onsite until it is demonstrated that Objectives 1-4 have been met. A grading permit shall be issued, either: <ol style="list-style-type: none"> i) Upon approval and implementation of a property-specific Determination of Biologically Superior Preservation (DBESP) report for the burrowing owl by the CDFW; or ii) A determination by the biologist that the site is part of an area supporting less than 35 acres of suitable Habitat, and upon passive or active relocation of the species following accepted CDFW protocols. Passive relocation, including the required use of one-way doors to exclude owls from the site and the collapsing of burrows, will occur if the biologist determines that the proximity and availability of alternate habitat is suitable for successful passive relocation. Passive relocation shall follow CDFW relocation protocol and shall only occur between September 15 and February 1. If proximate alternate habitat is not present as determined by the biologist, active relocation shall follow CDFW relocation protocol. The biologist shall confirm in writing that the species has fledged the site or been relocated prior to the issuance of a grading permit. 			
MM BR-2	<p>All vegetation clearing and ground disturbance shall be prohibited during the bird nesting season (February 1 through September 15), unless a nesting bird survey is completed in accordance with the following requirements:</p> <ol style="list-style-type: none"> a) A bird nesting survey of the Project Site, including suitable habitat within a 100-foot radius, shall be conducted by a qualified biologist within five (5) days prior to initiating 			

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>vegetation clearing or ground disturbance at the respective property. A copy of the nesting bird survey results report shall be provided to the City of Moreno Valley.</p> <p>b) If the survey does not identify the presence of any active nests, then construction activities can proceed without restriction.</p> <p>c) If the survey identifies the presence of active nests, then the qualified biologist shall provide the City with a copy of maps showing the location of all nests and a species-appropriate buffer zone around each nest sufficient to protect the nest from substantial adverse direct and/or indirect impacts. The size and location of all buffer zones, if required, shall be subject to review and approval by the City but shall be no less than a 100-foot radius around the nest for non-raptor species and no more than a 500-foot radius around the nest for raptor species and any endangered, threatened, or candidate species.</p> <p>i) The nests and buffer zones shall be field checked weekly by a qualified biological monitor. The approved buffer zone shall be marked in the field with construction fencing. No construction vehicles shall be permitted within restricted areas (i.e., bird protection zones), unless directly related to the management or protection of the legally protected species, until after the nest becomes inactive (or the nest has failed), the young have fledged, the young are no longer being fed by the parents, the young have left the area, or the young will no longer be impacted by the activities.</p> <p>ii) In the event that a nest is abandoned despite efforts to minimize disturbance and, if the nestlings are still alive, the Project Applicant/Developer shall contact the California Department of Fish and Wildlife (CDFW) and, subject to CDFW approval, fund the recovery and hacking (controlled release of captive reared young) of the nestling(s).</p>				
<p>b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?</p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>Response: A jurisdictional delineation report was prepared for the Project. The jurisdictional delineation identifies potential jurisdictional waters and wetlands located on and abutting the Project site and is included as <i>Technical Appendix B2</i> to this IS/MND (MIG, 2021a). Additionally, a DBESP report was prepared to address potential MSHCP riparian/riverine areas located on and abutting the Project site. The DBESP report is included as <i>Technical Appendix B3</i> (MIG, 2021b).</p> <p>The Project would permanently impact approximately 0.61-acre of riparian and riverine habitats subject to CDFW jurisdiction, which are located within the black willow riparian woodland habitat (0.39-acre), disturbed wetland-cattail (0.02-acre), and wetland meadow along two ephemeral drainage courses (Drainages A and B, totaling 0.81-acre) on the Project site (MIG, 2021a, pp. 25-26). Accordingly, the Project would have a direct significant impact on riparian/riverine habitat and sensitive natural community for which mitigation is required.</p> <p>MM BR-3 would reduce potential impacts to less-than-significant impacts by ensuring that the Project Applicant obtains all applicable permits for impacts to jurisdictional features and fully compensates for the permanent impacts to riparian/riverine habitat through the purchase of habitat mitigation credits at an approved mitigation bank. With implementation of MM BR-3, the proposed Project would result in less-than-significant impacts to riparian/riverine habitats and sensitive natural communities (MIG, 2021b, pp. 10-11).</p>				

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>MM BR-3 Prior to the issuance of grading permits, the Project Applicant shall obtain all applicable permits for impacts to jurisdictional features, which may include a 1602 Streambed Alteration Agreement from CDFW and a 401 Certification issued by the RWQCB pursuant to the California Water Code Section 13260. In addition, the Project Applicant shall purchase a minimum of 0.81-acre of re-establishment credits (a 1:1 mitigation-to-impact ratio for impacts to wetland meadow habitat) and 0.82-acre of rehabilitation credits (a 2:1 mitigation-to-impact ratio for impacts to black willow riparian woodland and disturbed wetland-cattail habitats). Habitat mitigation credits can be purchased either at an approved Habitat Mitigation Bank (e.g., Riverpark Mitigation Bank) or via an In-Lieu Fee Program (e.g., Riverside-Corona Resource Conservation District and the Southwest Resource Management Association Santa Ana River Watershed In-Lieu Fee Program). Approval to purchase the mitigation credits must be granted in advance by the resource agencies. The Project Applicant shall provide evidence to the City of Moreno Valley that the applicable permits have been obtained and that the required habitat mitigation credits have been purchased prior to issuance of grading permits.</p>				
<p>c) Have a substantial adverse effect on State or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?</p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>Response: Implementation of the Project would permanently impact 0.02-acre of Wetland Waters of the State, associated with the on-site disturbed wetland-cattail habitat (MIG, 2021a, pp. 25, 27). No other federal or State-protected wetland waters, including vernal pools, are present on the Project site (MIG, 2021a, p. 22). Accordingly, the Project would have a direct significant impact on State-protected wetlands for which mitigation is required.</p>				
<p>MM BR-3 would reduce Project impacts to State-protected wetlands to a less-than-significant level by ensuring that the Project Applicant obtains all applicable permits for impacts to jurisdictional features and fully compensates for the permanent impacts to State wetlands through the purchase of habitat mitigation credits at an approved mitigation bank. With implementation of MM BR-3, the proposed Project would result in less-than-significant impacts to State-protected wetlands (MIG, 2021b, pp. 10-11).</p>				
<p>d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with an established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?</p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>Response: Wildlife movement corridors link together areas of suitable habitat that are otherwise separated by rugged terrain, changes in vegetation, or human disturbances. The Project site was evaluated for its function as a wildlife corridor that species would use to move between wildlife habitat zones as part of the MSHCP Compliance Analysis. Generally, mountain canyons and/or riparian corridors are used by wildlife as corridors; the Project site does not contain either of these features. Furthermore, the Project site is substantially surrounded by human activity in the form of industrial land uses and roadways. Lastly, the Project site is not identified for conservation or designated as a wildlife movement corridor as part of the MSHCP and the Project would be consistent with the MSHCP and, thus, would not interfere with or affect any MSHCP-designated wildlife movement corridor. (MIG, 2020a, p. 17) Therefore, no impact to a wildlife corridor would occur from implementation of the Project.</p>				
<p>Wildlife nurseries are sites where wildlife concentrate for hatching and/or raising young, such as rookeries, spawning areas, and bat colonies. Although no nesting birds or remnant nests were observed on the Project site by MIG, implementation of the Project could potentially result in significant impacts to biological resources (i.e., avian species and their nests) that are protected by the MBTA and CFGC if active nests are present within or adjacent to the site during construction. Implementation of MM BR-2 would reduce potential impacts to nesting birds to less-than-significant levels by ensuring that pre-construction surveys are conducted to determine the presence or absence of nesting birds on or adjacent to the Project site prior to the commencement of construction activities. If active nests are discovered,</p>				

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

this mitigation measure establishes performance criteria that requires avoidance of the nests until it can be determined the nest is no longer active or that the juveniles from the occupied nests are capable of surviving independently of the nest.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: Implementation of the Project would result in the removal of trees on the Project site. The removal of trees is regulated by City of Moreno Valley Municipal Code Chapter 9.17.030, which requires development projects to conduct a tree survey prior to construction and, if any mature significant trees are to be removed, to replace each removed tree at defined ratios (as specified in Municipal Code Chapter 9.17.030). Prior to removal of any mature significant trees from the Project survey area, the Project Applicant would be required to comply with the provisions of Chapter 9.17.030 of the City of Moreno Valley Municipal Code. Mandatory compliance with the requirements of the Municipal Code would ensure the Project would not conflict with the City of Moreno Valley’s ordinance regulating tree removal.

In addition, the City of Moreno Valley Municipal Code contains provisions for the protection of the Stephens’ Kangaroo Rat (refer to Title 8, Chapter 8.60 of the Municipal Code). The Project site is not located within an identified reserve area for the Stephens’ Kangaroo Rat and the species was not observed during biological surveys of the Project site (MIG, 2020a, p. 16). Accordingly, the Project is exempt from the focused survey requirements for the Stephens’ Kangaroo Rat established by the City’s Municipal Code. The Project Applicant is required by the Municipal Code to contribute a local development impact and mitigation fee, which requires a fee payment to assist the City in implementing the habitat conservation plan for the Stephens’ Kangaroo Rat. With mandatory compliance with standard regulatory requirements (i.e., development impact and mitigation fee payment), the proposed Project would not conflict with any City policies or ordinances related to the protection of the Stephens’ Kangaroo Rat. (The Project’s consistency with applicable provisions of the Stephens’ Kangaroo Rat HCP are addressed in Response IV(f).)

The City of Moreno Valley Municipal Code also contains provisions for the collection of mitigation fees to further the implementation of the Western Riverside County MSHCP (refer to Title 3, Chapter 3.48 of the Municipal Code). The Project Applicant is required by the Municipal Code to contribute a local mitigation fee, which requires a fee payment to assist the City in implementing the Western Riverside County MSHCP reserve system (including the acquisition, management, and long-term maintenance of sensitive habitat areas). With mandatory compliance with standard regulatory requirements (i.e., mitigation fee payment), the proposed Project would not conflict with any City policies or ordinances related to the mitigation fee program associated with Western Riverside County MSHCP. (The Project’s consistency with applicable provisions of the MSHCP are addressed in Response IV(f).)

The City of Moreno Valley does not have any additional policies or ordinances in place to protect biological resources that are applicable to the Project. Mandatory compliance with the above referenced Moreno Valley Municipal Code Chapters would ensure that implementation of the Project would result in a less than significant impact associated with local policies and ordinances.

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or another approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	-------------------------------------	--------------------------	--------------------------

Response: The Project site is subject to the provisions of the Western Riverside County MSHCP; however, the Project site is not located in a criteria cell or area plan subunit. The following analysis evaluates the Project’s compliance with the Western Riverside County MSHCP requirements pursuant to the following sections of the MSHCP that are applicable to the Project site: Section 6.1.2, *Protection of Species Associated with Riparian/Riverine areas and Vernal Pools*; Section 6.1.3, *Protection of Narrow Endemic Plant Species*; Section 6.1.4, *Guidelines Pertaining to the Urban/Wildland Interface*; and Section 6.3.2, *Additional Survey Needs and Procedures*.

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p><u>Section 6.1.2 Species Associated with Riparian/Riverine Habitat and Vernal Pools</u> The Project survey area does not contain any MSHCP vernal pools or seasonal pools. The Project site does contain 0.59-acre of MSHCP riparian/riverine habitat, all of which would be removed by the Project (MIG, 2021b, p. 1). As required by the MSHCP, a Determination of Biologically Equivalent or Superior Preservation (DBESP) report is required in all instances where MSHCP riparian/riverine areas would be impacted by a development project. The goal of the DBESP report is to demonstrate that the development project provides mitigation that is biologically equivalent or superior to the existing conditions on a development site if left undisturbed. The Project’s DBESP report is provided as <i>Technical Appendix B3</i>.</p> <p>According to the Project’s DBESP report, the purchase of habitat re-establishment and rehabilitation mitigation credits would be considered superior mitigation as compared to the preservation of the 0.59-acre of on-site MSHCP riparian/riverine habitat because the mitigation bank where the habitat credits would be purchased provide high quality habitat areas with habitat functions that are superior to the existing conditions at the Project site (MIG, 2021b, pp. 10-11). As such, with implementation of MM BR-3, the Project’s significant impacts to MSHCP riverine and riparian areas would be reduced to less than significant and the Project would not conflict with Section 6.1.2 of the Western Riverside County MSHCP.</p> <p><u>Section 6.1.3 Protection of Narrow Endemic Plants</u> The Project site is not located within the Western Riverside County MSHCP Narrow Endemic Plant Species Survey Area (NEPSSA); therefore, the NEPSSA requirements are not applicable to the Project and the Project is consistent with the Western Riverside County MSHCP narrow endemic plant species policies (MIG, 2020a, pp. 17-18).</p> <p><u>Section 6.1.4 Urban/Wildlands Interface Guidelines</u> The Project site is not located within or adjacent to a Western Riverside County MSHCP Conservation Area; therefore, the Project site is not required to address Section 6.1.4 of the Western Riverside County MSHCP (MIG, 2020a, pp. 18-19).</p> <p><u>Section 6.3.2 Additional Surveys and Procedures</u> The Project site is not located within the Western Riverside County MSHCP Criteria Area Plant Species Survey Area (CAPSSA); therefore, the CAPSSA requirements are not applicable to the Project. Additionally, the Project site is not located within the Western Riverside County MSHCP additional survey areas for amphibians, survey areas for mammals, or any special linkage areas; however, the Project site is located within the Western Riverside County MSHCP burrowing owl survey area (MIG, 2020a, pp. 17-18).</p> <p>No evidence of use of the site by burrowing mammals was present and no burrows suitable for use by the owl was observed. The species is considered absent from the Project site and potential occurrence is low; however, a preconstruction burrowing owl survey in accordance with the Western Riverside County MSHCP Burrowing Owl Survey Requirements is required to ensure compliance with the Plan’s provisions for protecting the burrowing owl (see MM BR-1). With implementation of MM BR-1, implementation of the Project would result in a less-than-significant impact to the burrowing owl. (MIG, 2020a, p. 18)</p> <p>Additionally, the Project site is located within the Stephens’ Kangaroo Rat Habitat Conservation Plan Fee Area, which is administered by the Riverside County Habitat Conservation Agency. The Project Applicant would be required to pay the Stephens’ Kangaroo Rat, which is established at \$500 per acre (MIG, 2020a, pp. 19-20; Riverside County, 1996, p. 53). Payment of the Stephens’ Kangaroo Rat HCP fee is required – as noted in the analysis under Response IV(e) – and would ensure the Project is consistent with the Stephens’ Kangaroo Rat HCP and the Western Riverside County MSHCP.</p>

V. CULTURAL RESOURCES – Would the project:

a) Cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
---	--------------------------	--------------------------	--------------------------	-------------------------------------

Response: A cultural resources survey conducted for the Project site by Brian F. Smith and Associates (BFSA), which included a comprehensive site survey and archival records search, identified no historic resources on the Project site (BFSA, 2020a, p. 1.0-1). Additionally, the Project site is not identified as containing a historic resource by the City of Moreno Valley General Plan FEIR, Exhibit 5.10-1, *Locations of Listed Historic Resource Inventory Structures* (Moreno Valley, 2006b). Accordingly, the Project has no potential to impact a historical resource as defined by California Code of Regulations Section 15064.5.

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: According to the cultural resources survey conducted by BFSA, no prehistoric archaeological resources were observed on the Project site during a comprehensive field survey and no prehistoric archaeological resources are known to exist within a one-mile radius of the Project site based on an archival records search conducted with the Eastern Information Center at the University of California, Riverside (BFSA, 2020a, pp. 5.0-1 to 5.0-5). Based on the findings of the field survey and archival research and due to historic disturbances on the Project site, BFSA concluded the Project site had a low likelihood for containing prehistoric archaeological resources (BFSA, 2020a, pp. 1.0-1 and 6.0-1). Based on the foregoing, the Project would result in less-than-significant impact to prehistoric archaeological resources defined by California Code of Regulations Section 15064.5.

c) Disturb any human remains, including those interred outside of formally dedicated cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The Project site does not contain a cemetery, and no known formal cemeteries are located within the immediate site vicinity (Moreno Valley, 2006b, p. 1.0-1). Nevertheless, the remote potential exists that human remains may be unearthed during grading and excavation activities associated with Project construction. If human remains are unearthed during Project construction, the construction contractor would be required by law to comply with California Health and Safety Code, Section 7050.5 "Disturbance of Human Remains." According to Subsections 7050.5(b) and (c), if human remains are discovered, the County Coroner must be contacted and if the Coroner recognizes the human remains to be those of a Native American, or has reason to believe that they are those of a Native American, the Coroner is required to contact, by telephone within 24 hours, the Native American Heritage Commission

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

(NAHC). Pursuant to California Public Resources Code Section 5097.98, whenever the NAHC receives notification of a discovery of Native American human remains from a county coroner, the NAHC is required to immediately notify those persons it believes to be most likely descended from the deceased Native American. The descendants may, with the permission of the owner of the land, or his or her authorized representative, inspect the site of the discovery of the Native American human remains and may recommend to the owner or the person responsible for the excavation work means for treatment or disposition, with appropriate dignity, of the human remains and any associated grave goods. The descendants shall complete their inspection and make recommendations or preferences for treatment within 48 hours of being granted access to the site. According to Public Resources Code Section 5097.94(k), the NAHC is authorized to mediate disputes arising between landowners and known descendants relating to the treatment and disposition of Native American human burials, skeletal remains, and items associated with Native American burials.

With mandatory compliance to California Health and Safety Code Section 7050.5 and Public Resources Code Section 5097.98, any potential impacts to human remains, including human remains of Native American descent, would be reduced to less than significant and mitigation is not required.

VI. ENERGY – Would the project:

a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The analysis below is based on the *Energy Analysis* (included as *Technical Appendix D* to this IS/MND) prepared for the proposed Project by Urban Crossroads and demonstrates that implementation of the Project would not result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation.

Energy Use During Construction

The Project’s construction process would consume electricity and fuel. Project-related construction activities would represent a “single-event” demand and would not require on-going or permanent commitment of energy resources. Project construction is estimated to consume approximately 85,609 kWh of electricity, approximately 36,736 gallons of diesel fuel from operation of construction equipment, 15,941 gallons of diesel fuel from construction vendor trips, and 26,278 gallons of fuel from construction worker trips (Urban Crossroads, 2020c, p. 36). The amount of energy and fuel use anticipated by the Project’s construction activities are typical for the type of scale of construction proposed by the Project and there are no aspects of the Project’s proposed construction process that are unusual or energy-intensive. Furthermore, construction equipment would be required to conform to the applicable CARB emissions standards, acting to promote equipment fuel efficiencies. For example, CCR Title 13, Motor Vehicles, Section 2449(d)(3) Idling, limits idling times of construction vehicles to no more than five minutes, thereby precluding unnecessary and wasteful consumption of fuel due to unproductive idling of construction equipment. As supported by the preceding discussion, the Project’s construction energy consumption would not be considered inefficient, wasteful, or otherwise unnecessary. (Urban Crossroads, 2020c, p. 31) Impacts during Project construction would be less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p><u>Energy Use Project Operations</u></p> <p>Energy that would be consumed by Project-related traffic is a function of total vehicle miles traveled and the estimated vehicle fuel economies of vehicles accessing the Project site. The Project would result in 5,292,177 annual vehicle miles traveled and an estimated annual fuel consumption of 405,743 gallons of fuel (Urban Crossroads, 2020c, p. 34). The number of daily trips and miles traveled by Project traffic are consistent with other industrial uses of similar scale and configuration in the Inland Empire. That is, the Project does not propose uses or operations that would inherently result in excessive and wasteful vehicle trips and/or vehicle miles traveled, nor associated excess and wasteful vehicle energy consumption (Urban Crossroads, 2020c, p. 37). Enhanced fuel economies realized pursuant to federal and State regulatory actions, and related transition of passenger vehicles to alternative energy sources (e.g., electricity, natural gas, bio fuels, hydrogen cells) would likely decrease future gasoline fuel demands per mile traveled. The location of the Project site proximate to regional and local arterial roadways (e.g., I-215 and SR-60) is expected to minimize the Project vehicle miles traveled within the region. Based on the foregoing, Project transportation energy consumption would not be considered inefficient, wasteful, or otherwise unnecessary (Urban Crossroads, 2020c, p. 38).</p> <p>Building operations and site maintenance activities associated with the Project would result in the consumption of natural gas and electricity. Natural gas would be supplied to the Project by Southern California Gas Company; electricity would be supplied to the Project by Moreno Valley Utility (MVU). Energy demands resulting from Project operations are estimated at 6,438,204 kilo-British thermal units (kBTU) per year of natural gas and 5,261,115 Kilowatt-hour (kWh) per year of electricity (Urban Crossroads, 2020c, p. 35). The Project provides conventional industrial buildings uses reflecting contemporary energy efficient/energy conserving designs and operational programs. Uses proposed by the Project are not inherently energy intensive, and the Project energy demands in total would be comparable to, or less than, other industrial projects of similar scale and configuration (Urban Crossroads, 2020c, pp. 37-38). Additionally, the Project would be required to comply with Title 24 standards, which would ensure that the Project's energy demand would not be considered inefficient, wasteful, or otherwise unnecessary (ibid.).</p> <p>Based on the foregoing analysis, Project operations would result in a less-than-significant impact to energy resources.</p>				
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The following section analyzes the Project's consistency with the applicable federal and State regulations. As supported by the proceeding analysis, the Project would not conflict with or obstruct a State or local plan for renewable energy or energy efficiency and a less-than-significant impact would occur.</p>				
<p><u>Consistency with Federal Energy Regulations</u></p> <p><i>Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA)</i></p> <p>Transportation and access to the Project site is provided primarily by the local and regional roadway systems, which includes I-215, SR-60, and Alessandro Boulevard. Implementation of the Project would not interfere with, nor otherwise obstruct intermodal transportation plans or projects that may be realized pursuant to the ISTEA because SCAG is not planning for intermodal facilities on or through the Project site (Urban Crossroads, 2020c, p. 39).</p> <p><i>The Transportation Act for the 21st Century (TEA-21)</i></p> <p>The Project site is located along major transportation corridors with proximate access to the interstate freeway system (i.e., I-215). The site selected for the Project facilitates access, acts to reduce vehicle miles traveled (VMT), takes advantage of existing infrastructure systems, and promotes land use compatibilities through collocation of similar uses. The Project supports the strong planning processes emphasized under TEA-21. The Project is therefore consistent with, and would not otherwise interfere with, nor obstruct implementation of TEA-21 (Urban Crossroads, 2020c, p. 39).</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

Consistency with State Energy Regulations

Integrated Energy Policy Report (IEPR)

Electricity would be provided to the Project by MVU and natural gas would be provided by SoCalGas. The MVU and SoCal Gas energy supplies comply with and build off existing State programs and policies. As such, the Project is consistent with, and would not otherwise interfere with, nor obstruct implementation the goals presented in the IEPR (Urban Crossroads, 2020c, p. 39).

State of California Energy Plan

The Project site is located along Alessandro Boulevard, east of Frederick Street, with proximate access to Interstate 215. The location of the Project site facilitates access, acts to reduce VMT, takes advantage of existing infrastructure systems, and promotes land use compatibilities through the introduction of industrial uses on a site surrounded by industrial and commercial uses. Therefore, the Project supports urban design and planning processes identified under the State of California Energy Plan, is consistent with, and would not otherwise interfere with, nor obstruct implementation of the State of California Energy Plan (Urban Crossroads, 2020c, p. 39).

California Code Title 24, Part 6, Energy Efficiency Standards

The Project would design building shells and building components, such as windows; roof systems: electrical and lighting systems: and heating, ventilating, and air conditioning systems to meet 2019 Title 24 Standards. The Project also is required by State law to be designed, constructed, and operated to meet or exceed Title 24 Energy Efficiency Standards. On this basis, the Project is determined to be consistent with, and would not interfere with, nor otherwise obstruct implementation of Title 24 Energy Efficiency Standards

Pavley Fuel Efficiency Standards (AB 1493)

AB 1493 is applicable to the Project because model year 2009-2016 passenger cars and light duty truck vehicles traveling to and from the Project site are required by law to comply with the legislation’s fuel efficiency requirements. On this basis, the Project is determined to be consistent, with, and would not interfere with, nor otherwise obstruct implementation of AB 1493.

Advanced Clean Cars Program

The Advanced Clean Cars Program is applicable to the Project because model year 2017-2025 passenger car vehicles traveling to and from the Project site are required by law to comply with the legislation’s fuel efficiency requirements. On this basis, the Project is determined to be consistent, with, and would not interfere with, nor otherwise obstruct implementation of California’s Advanced Clean Cars Program.

California Renewable Portfolio Standards (SB 1078)

Energy directly or indirectly supplied to the Project site by electric corporations is required by law to comply with SB 1078.

1. Urban Crossroads, 2020c, Compass Danbe Centerpointe Energy Analysis, *Technical Appendix D*

VII. GEOLOGY AND SOILS – Would the project:

a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving:

i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to https://www.conservation.ca.gov/cgs/Document s/SP_042.pdf	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--	--------------------------	--------------------------	--------------------------	-------------------------------------

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>Response: There are no Alquist-Priolo Earthquake Fault Zones affecting the Project site (NorCal Engineering, 2020, p. 4). The nearest Earthquake Fault Zone is the San Jacinto Fault, which occurs approximately 3.7 miles southeast of the Project site (Google Earth Pro, 2020; Moreno Valley, 2006a, Figure 6-3). Because there are no known faults located on the Project site, there is no potential for the Project to expose people or structures to adverse effects related to ground rupture. No impact would occur.</p>				
<p>ii) Strong seismic ground shaking?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project site is located in a seismically active area of southern California and is expected to experience moderate to severe ground shaking during the lifetime of the Project. This risk is not considered substantially different than that of other similar properties in the southern California area. As a mandatory condition of Project approval, the Project would be required to construct the proposed warehouse buildings in accordance with the California Building Standards Code (CBSC), also known as California Code of Regulations (CCR), Title 24 (Part 2), and the City of Moreno Valley Building Code, which is based on the CBSC with local amendments. The CBSC and City of Moreno Valley Building Code (Moreno Valley Municipal Code, Chapter 8.20) provide standards that must be met to safeguard life or limb, health, property, and public welfare by regulating and controlling the design, construction, quality of materials, use and occupancy, location, and maintenance of all buildings and structures, and have been specifically tailored for California earthquake conditions. In addition, the CBSC (Chapter 18) and the City of Moreno Valley Building Code (Chapter 8.21) require development projects to prepare geologic engineering reports to identify site-specific geologic and seismic conditions and implement the site-specific recommendations contained therein to preclude adverse effects involving unstable soils and strong seismic ground-shaking, including, but not limited to, recommendations related to ground stabilization, selection of appropriate foundation type and depths, selection of appropriate structural systems. The Project Applicant has commissioned such a report titled, <i>Geotechnical Investigation – Proposed Warehouse Building Development</i> (NorCal Engineering, 2020), which is included as <i>Technical Appendix E</i> to this IS/MND, and the City would condition the Project to comply with the site-specific ground preparation and construction recommendations contained in the report. With mandatory compliance with these standards and site-specific design and construction measures set forth in the Project's geotechnical report, potential impacts related to seismic ground shaking would be less than significant. As such, implementation of the Project would not expose people or structures to substantial adverse effects, including loss, injury, or death, involving seismic ground shaking. Impacts would be less-than-significant.</p>				
<p>iii) Seismic-related ground failure, including liquefaction?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: According to General Plan FEIR Figure 5.6-2, <i>Seismic Hazards</i>, the Project site is not located in an area with the potential for liquefaction. The geotechnical investigation prepared for the Project site concludes that based on observed subsurface conditions, the potential for liquefaction at the Project site is low due to the characteristics of on-site soils and the depth of the groundwater table beneath the site (greater than 50 feet below the surface) (NorCal Engineering, 2020, pp. 5-6). Regardless, the City of Moreno Valley will require that the property be developed in accordance with the latest applicable seismic safety guidelines, including the standard requirements of the CBSC and the City of Moreno Valley Municipal Code Building Code, to minimize potential liquefaction hazards. Therefore, implementation of the Project would not directly or indirectly expose people or structures to substantial hazards associated with seismic-related ground failure and/or liquefaction hazards. Impacts would be less than significant.</p>				
<p>iv) Landslides?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project site is generally flat and contains no substantial natural or man-made slopes under existing conditions. There are no substantial natural or man-made slopes in the Project site vicinity, either. Accordingly, development on the subject property would not be exposed to landslide risks, and the Project would not pose a landslide risk to surrounding properties; a less-than-significant impact would occur.</p>				
<p>b) Result in substantial soil erosion or the loss of topsoil?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The analysis below summarizes the likelihood of the Project to result in substantial soil erosion during temporary construction activities and/or long-term operation.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p><u>Construction-Related Impacts</u></p> <p>Construction of the Project would involve grading, paving, utility installation, building construction, and landscaping installation, which has the potential to temporarily expose on-site soils that would be subject to erosion during rainfall events or high winds. Pursuant to State Water Resources Control Board requirements, the Project Applicant is required to obtain a National Pollutant Discharge Elimination System (NPDES) permit for construction activities, including proposed grading. The NPDES permit is required for all projects that include construction activities, such as clearing, grading, and/or excavation that disturb at least one (1) acre of total land area. In addition, the Project would be required to comply with the Santa Ana RWQCB's <i>Santa Ana River Basin Water Quality Control Program</i>. Compliance with the NPDES permit and the Santa Ana River Basin Water Quality Control Program involves the preparation and implementation of a SWPPP for construction-related activities. The SWPPP will specify the Best Management Practices (BMPs) that would be required to be implemented during construction activities to ensure that waterborne pollution – including erosion/sedimentation – is prevented, minimized, and/or otherwise appropriately treated prior to surface runoff being discharged from the subject property. Examples of BMPs that may be utilized during construction include, but are not limited to, sandbag barriers, geotextiles, storm drain inlet protection, sediment traps, rip rap soil stabilizers, and hydro-seeding. In addition, the Project would be required to comply with SCAQMD Rule 403, which would reduce the amount of particulate matter in the air and minimize the potential for wind erosion (SCAQMD, 2005). With mandatory compliance to the requirements noted in the Project's SWPPP, as well as applicable regulatory requirements, the potential for water and/or wind erosion impacts during Project construction would be less than significant and mitigation is not required.</p> <p><u>Long-Term Operational Activities</u></p> <p>Following construction, wind and water erosion on the Project site would be minimized, because the areas disturbed during construction would be landscaped or covered with impervious surfaces and drainage would be controlled through a storm drain system. Implementation of the Project would result in less long-term erosion and loss of topsoil than occurs under the site's existing conditions.</p> <p>The City's MS4 NPDES Permit requires the Project Applicant to prepare and submit to the City for approval a Water Quality Management Plan (WQMP) (refer to Moreno Valley Municipal Code Section 8.21.170). The WQMP is required to identify an effective combination of erosion control and sediment control measures (i.e., BMPs) to reduce or eliminate sediment discharge to surface water from storm water and non-storm water discharges. The WQMP also is required to establish a post-construction implementation and maintenance plan to ensure on-going, long-term erosion protection. Compliance with the WQMP will be required as a condition of approval for the Project, as would the long-term maintenance of erosion and sediment control features. The preliminary WQMP for the Project prepared by Thatcher Engineering and Associates, Inc. (Thatcher) (attached hereto as <i>Technical Appendix I1</i>) incorporates design features would be effective at removing silt and sediment from storm water runoff. Because the Project would be required to utilize erosion and sediment control measures to preclude substantial, long-term soil erosion and loss of topsoil, the Project would result in less-than-significant impacts related to soil erosion.</p>				
<p>c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project's geotechnical report (<i>Technical Appendix E</i>) indicates that the settlement potential would be attenuated through the proposed removal of near surface soils down to competent materials and replacement with properly compacted fill, which is included as a recommendation in the Project's geotechnical report. Additionally, only minor ground subsidence (±0.2 feet) is expected to occur in the soils below the zone of removal, due to earthwork operations (NorCal Engineering, 2020, p. 9). Through standard conditions of approval in accordance with Moreno Valley Municipal Code Section 8.21.050, the proposed Project would be required by the City to incorporate the recommendations contained within the Project geotechnical report into the grading plan for the Project (Moreno Valley, n.d.). As such, implementation of the Project would result in less-than-significant impacts associated with soil shrinkage/subsidence and collapse.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
As discussed in Responses VII (a), (iii) and (iv), development of the property as proposed by the Project would result in a less than significant impact involving ground failure, including liquefaction and landslide, and a less-than-significant impact involving landslides.				
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Response: According to USDA's Web Soil Survey, the Project site is underlain with Monserate sandy loam 0 to 5 percent slopes, and expansion potential is "very low" to "medium" (USDA, n.d.; NorCal Engineering, 2020, Table II). The expansive characteristics of on-site soils would be attenuated by implementation of the foundation and floor slab design recommendations included in the Project's geotechnical report, which the City will require as a condition of approval pursuant to Section 9.08.080 of the Moreno Valley Municipal Code (NorCal Engineering, 2020, pp. 7-14). According to the above, implementation of the Project would result in less-than-significant impacts associated with expansive soils and would not create substantial risks to life or property.				
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Response: The Project does not propose the use of septic tanks or alternative waste water disposal systems. Accordingly, no impact would occur.				
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Response: The Project site does not contain any known unique geologic features (BFSA, 2020b, p. 6). However, the Project site is underlain by lower Pleistocene (approximately 1.8 million to 200,000 years old), very old, sandy alluvial fan deposits that have a high paleontological sensitivity for fossils of large, terrestrial Ice Age vertebrates (BFSA, 2020b, p. 6). In the event that Project grading and excavation activities encroach into previously undisturbed Pleistocene-age alluvial deposits, the Project could result in impacts to important paleontological resources that may exist below the ground surface if they are unearthed and not properly protected. Therefore, the Project's potential to directly or indirectly destroy a unique paleontological resource buried beneath the ground surface is determined to be a significant impact and mitigation is required.				
Implementation of MM GEO-1 through MM GEO-4 would ensure the proper identification and subsequent treatment of any paleontological resources that may be encountered during ground-disturbing activities associated with implementation of the proposed Project. Therefore, with implementation of MM GEO-1 through MM GEO-4, the Project's potential impacts related to paleontological resources would be reduced to a less-than-significant level.				
Mitigation				
MM GEO-1	Prior to the issuance of a grading permit, the Project Applicant shall provide evidence to the City of Moreno Valley that a qualified paleontologist has been retained by the Project Applicant to conduct monitoring of excavation activities and has the authority to halt and redirect earthmoving activities in the event that suspected paleontological resources are unearthed.			
MM GEO-2	The paleontological monitor shall conduct full-time monitoring during grading and excavation operations in undisturbed, very old alluvial fan sediments at depths exceeding five feet below the existing ground surface and shall be equipped to salvage fossils if they are unearthed to avoid construction delays and to remove samples of sediments that are likely to contain the remains of small fossil invertebrates and vertebrates. The paleontological monitor shall be empowered to temporarily halt or divert equipment to allow of removal of abundant and large specimens in a timely manner. Monitoring may be			

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>reduced if the potentially fossiliferous units are not present in the subsurface, or if present, are determined upon exposure and examination by qualified paleontological personnel to have a low potential to contain or yield fossil resources.</p> <p>MM GEO-3 Recovered specimens shall be properly prepared to a point of identification and permanent preservation, including screen washing sediments to recover small invertebrates and vertebrates, if necessary. Identification and curation of specimens into a professional, accredited public museum repository with a commitment to archival conservation and permanent retrievable storage, such as the Western Science Museum in Hemet, California, is required for significant discoveries.</p> <p>MM GEO-4 A final monitoring and mitigation report of findings and significance shall be prepared, including lists of all fossils recovered, if any, and necessary maps and graphics to accurately record the original location of the specimens. The report shall be submitted to the City of Moreno Valley prior to building final.</p>

VIII. GREENHOUSE GAS EMISSIONS – Would the project:

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: A *Greenhouse Gas Analysis* (Urban Crossroads, 2020d) was prepared for the Project by Urban Crossroads to quantify the greenhouse gas (GHG) emissions that would result from Project-related construction and operational activities. This report is included as *Technical Appendix F* to this IS/MND and its findings are incorporated into the analysis presented herein.

While estimated Project-related GHG emissions can be calculated, the direct impacts of such emissions on Global Climate Change (GCC) and global warming cannot be determined on the basis of available science because global climate change is a global phenomenon and not limited to a specific locale such as the Project site and its immediate vicinity. Furthermore, there is no evidence that would indicate that the emissions from a project the size of the proposed Project could directly or indirectly affect the global climate. Because global climate change is the result of GHG emissions, and GHGs are emitted by innumerable sources worldwide, the proposed Project would not result in a direct impact to global climate change; rather, Project-related impacts to global climate change only could be potentially significant on a cumulative basis. (Urban Crossroads, 2020d, p. 8) Therefore, the analysis below focuses on the Project’s potential to contribute to global climate change in a cumulatively-considerable way.

The City of Moreno Valley has not adopted a numerical threshold for determining the significance of GHG emissions; however, the City has discretion to select an appropriate significance criterion used by other agencies, based on substantial evidence (Urban Crossroads, 2020d, p. 39). Specifically, the City has selected to compare Project-related GHG emissions against the draft 10,000 metric tons of carbon dioxide equivalent (MTCO_{2e}) per year threshold recommended by SCAQMD staff for industrial projects against where SCAQMD is the lead agency. The industrial threshold utilized by SCAQMD is a widely accepted threshold used by numerous lead agencies in the South Coast Air Basin (SCAB) and was established based on the recommendations from California Air Pollution Control Officers Association

ISSUES & SUPPORTING INFORMATION SOURCES:

Potentially Significant Impact

Less Than Significant with Mitigation Incorporated

Less Than Significant Impact

No Impact

(CAPCOA) contained in a report titled “CEQA and Climate Change” (dated January 2008), which serves as a resource for public agencies as they establish agency procedures for reviewing GHG emissions from projects under CEQA. The CAPCOA report provides three recommendations for evaluating a development project’s GHG emissions. When establishing their significance threshold, SCAQMD selected the CAPCOA non-zero approach which establishes a numerical threshold based on capture of approximately 90 percent of emissions from future development (Approach 2, Threshold 2.5). A 90 percent emission capture rate means that 90 percent of total emissions from all new or modified projects would be subject to evaluation under CEQA. Based on SCAQMD’s research of 1,297 major, industrial source point (i.e., stationary) emission sources in the SCAB, SCAQMD found that source point industrial facilities that generate at least 10,000 MTCO_{2e} per year produce approximately 90 percent of the carbon dioxide equivalent emissions in the SCAB per year. As such, SCAQMD established their significance criterion at 10,000 MTCO_{2e} as that threshold would capture 90 percent of total emissions from future industrial development in accordance with CAPCOA recommendations. (CAPCOA, 2008, pp. 46-47) If Project-related GHG emissions do not exceed the 10,000 MTCO_{2e} per year threshold, then Project-related GHG emissions would clearly have a less-than-significant impact. On the other hand, if Project-related GHG emissions exceed 10,000 MTCO_{2e} per year, the Project would be considered a substantial source of GHG emissions.

The Project’s annual GHG emissions are summarized in Table 7, *Total Annual Project Greenhouse Gas Emissions*. The methodology used to calculate the Project’s GHG emissions is described in detail in *Technical Appendix F*.

Table 7: Total Annual Project Greenhouse Gas Emissions

Emission Source	Emissions (MT/yr)			
	CO ₂	CH ₄	N ₂ O	Total CO _{2e}
Annual construction-related emissions amortized over 30 years	26.37	0.00	0.00	26.46
Area Source	0.02	5.00E-05	0.00	0.02
Energy Source	2,019.87	0.08	0.02	2,027.91
Mobile Source (Passenger Cars)	758.61	0.02	0.00	759.02
Mobile Source (Trucks)	3,038.11	0.05	0.00	3,039.35
On-Site Equipment Source	101.58	0.03	0.00	102.41
Waste	75.66	4.47	0.00	187.44
Water Usage	409.48	3.00	0.07	506.56
Total CO_{2e} (All Sources)	6,649.16			

Source: (Urban Crossroads, 2020d, Table 3-6)

As shown in Table 7, the Project is estimated to generate approximately 6,649.16 MTCO_{2e} annually, which is less than the significance threshold of 10,000 MTCO_{2e} (Urban Crossroads, 2020d, p. 48). Because the Project’s total annual GHG emissions would not exceed 10,000 MTCO_{2e}, the Project would not generate substantial GHG emissions – either directly or indirectly – that would have a significant impact on the environment. Impacts would be less than significant.

b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emission of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The Project would comply with a number of regulations, policies, plans, and policy goals that would reduce GHG emissions, including the Assembly Bill 32 (AB 32), and Senate Bill 32 (SB 32), which are regulations applicable to the Project. For more information on these regulations as well as other state-wide plans, policies, and regulations associated with GHG emissions that are not applicable to the Project, refer to *Technical Appendix F* of this IS/MND.

On October 9, 2012, the Moreno Valley City Council approved an Energy Efficiency and Climate Action Strategy and related GHG analysis. The Energy Efficiency and Climate Action Strategy document identifies potential programs and policies to reduce overall City energy consumption and increase the use of renewable energy. The majority of the policies are directed at municipal operations of the City,

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
---	--------------------------------	--	------------------------------	-----------

but the document also contains recommended policies for the community at large (including private development projects). These recommended policies include but are not limited to: energy efficiency, water use reduction, trip reduction, solid waste diversion, and educational policies. The overall goal of the Energy Efficiency and Climate Action Strategy is to ensure that the City is consistent with and would not otherwise conflict with the provisions of AB 32. As demonstrated by the analysis below, the Project would not conflict with the provisions of AB 32 and, therefore, would not obstruct implementation of the components of the City's Energy Efficiency and Climate Action Strategy that are applicable to the Project.

CARB identified measures in their 2017 Scoping Plan Update to identify the measures that would achieve the emissions reductions goals of SB 32. As explained in point-by-point detail in Section 3.8 of *Technical Appendix F* (refer to Table 3-7), the Project would not conflict with applicable measures of the 2017 Scoping Plan Update and would not preclude/obstruct implementation of the Scoping Plan Update (Urban Crossroads, 2020d, Table 3-8).

In April 2015, Governor Edmund Brown Jr. signed Executive Order B-30-15, which advocated for a statewide GHG-reduction target of 40 percent below year 1990 levels by 2030 and 80 percent below 1990 levels by 2050. In September 2016, Governor Brown signed the Senate Bill (SB) 32. SB 32 formally established a statewide goal to reduce GHG emissions to 40 percent below year 1990 levels by 2030. To date, no statutes or regulations have been adopted to translate the year 2050 GHG reduction goal into comparable, scientifically-based statewide emission reduction targets.

According to research conducted by the Lawrence Berkeley National Laboratory and supported by the CARB, California, under its existing and proposed GHG reduction policies (i.e., CARB Scoping Plan), is on track to meet the years 2020 and 2030 reduction targets established by AB 32 and SB 32, respectively (Urban Crossroads, 2020d, p. 27). As described above, the Project would not conflict with or obstruct implementation of the CARB Scoping Plan; therefore, the Project would not interfere with the State's ability to achieve the year 2030 GHG-reduction target established by SB 32.

Rendering a significance determination for year 2050 GHG emissions relative to EO B-30-15 would be speculative because EO B-30-15 establishes a goal more than three decades into the future; no agency with GHG subject matter expertise has adopted regulations to achieve these statewide goals at the project-level; and, available analytical models cannot presently quantify all project-related emissions in those future years. Further, due to the technological shifts anticipated and the unknown parameters of the regulatory framework in 2050, available GHG models and the corresponding technical analyses are subject to limitations for purposes of quantitatively estimating the Project's emissions in 2050.

As described above, the Project would not conflict with the State's ability to achieve the State-wide GHG reduction mandates and would be consistent with applicable policies and plans related to GHG emissions reductions. Impacts would be less than significant.

IX. HAZARDS AND HAZARDOUS MATERIALS – Would the project:

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: A Phase I Environmental Site Assessment (ESA) was prepared for the Project site by Partner Engineering and Science, Inc. (Partner) and is included as *Technical Appendix G* to this IS/MND. As part of the Phase I ESA efforts, Partner conducted a visual inspection of the Project site, researched regulatory hazardous materials databases, reviewed historical reference materials (including aerial photographs, topographic maps, and City of Moreno Valley directories), and interviewed people with historical links to the Project site; the findings of this research are incorporated into the analysis presented herein.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p><u>Existing Site Conditions Impacts</u></p> <p>There were no underground or aboveground storage tanks, drain lines, sumps, ponds, pits, lagoons, stressed vegetation, wells, transformers, or mold found on the Project site (Partner, 2019, pp. 17-18). Based on a review of historic regulatory agency hazardous materials databases, historic site aerial photographs, interviews with current property owners, and a reconnaissance of the Project site, Partner determined that the Project site does not contain any recognized environmental conditions (RECs), historic recognized environmental conditions, or other environmental issues (Partner, 2019, p. 21). A REC is defined as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment” (ibid.). A HREC is defined as “past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the application regulatory authority” (ibid).</p> <p>Based on the foregoing analysis, the Project would not create significant hazard to the public or the environment through routine transport, use, or disposal of hazardous materials from the Project site under existing conditions. A less-than-significant impact would occur.</p> <p><u>Construction-Related Impacts</u></p> <p>Heavy equipment (e.g., dozers, excavators, tractors) would be operated on the subject property during construction of the Project. Heavy equipment is typically fueled and maintained by petroleum-based substances such as diesel fuel, gasoline, oil, and hydraulic fluid, which is considered hazardous if improperly stored or handled. In addition, materials such as paints, adhesives, solvents, and other substances typically used in building construction would be located on the Project site during construction. Improper use, storage, or transportation of hazardous materials can result in accidental releases or spills, potentially posing health risks to workers, the public, and the environment. This is a standard risk on all construction sites, and there would be no greater risk for improper handling, transportation, or spills associated with the proposed Project than would occur on any other similar construction site. Construction contractors would be required to comply with all applicable federal, state, and local laws and regulations regarding the transport, use, and storage of hazardous construction-related materials, including but not limited requirements imposed by the Environmental Protection Agency (EPA), California Department of Toxic Substances Control (DTSC), South Coast Air Quality Management District (SCAQMD), and Santa Ana RWQCB. With mandatory compliance with applicable hazardous materials regulations, the Project would not create a significant hazard to the public or the environment through routine transport, use, or disposal of hazardous materials during the construction phase. Impacts would be less than significant.</p> <p><u>Long-Term Operational Impacts</u></p> <p>The future building occupant(s) for the Project site are not yet identified; however, the Project is designed to house warehouse distribution occupants and it is possible that hazardous materials could be used during the course of a future building user’s daily operations. State and federal Community-Right-to-Know laws allow the public access to information about the amounts and types of chemicals in use at local businesses. Laws also are in place that requires businesses to plan and prepare for possible chemical emergencies. Any business that occupies a building on the Project site and that handles hazardous materials (as defined in Section 25500 of California Health and Safety Code, Division 20, Chapter 6.95) will require a permit from the Moreno Valley County Fire Department Hazardous Materials Division in order to register the business as a hazardous materials handler. Such businesses also are required to comply with California’s Hazardous Materials Release Response Plans and Inventory Law, which requires immediate reporting to the County of Riverside Fire Department and the State Office of Emergency Services regarding any release or threatened release of a hazardous material, regardless of the amount handled by the business. In addition, any business handling at any one time, greater than 500 pounds of solid, 55 gallons of liquid, or 200 cubic feet of gaseous hazardous material, is required, under Assembly Bill 2185 (AB 2185), to file a Hazardous Materials Business Emergency Plan (HMBEP). A HMBEP is a written set of procedures and information created to help minimize the effects and extent of a release or threatened release of a hazardous material. The intent of the HMBEP is to satisfy federal and State Community Right-To-Know laws and to provide detailed information for use by emergency responders.</p>				

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>If businesses that use or store hazardous materials occupy the Project, the business owners and operators would be required to comply with all applicable federal, state, and local regulations to ensure proper use, storage, use, emission, and disposal of hazardous substances (as described above). With mandatory regulatory compliance, the Project is not expected to pose a significant hazard to the public or the environment through the routine transport, use, storage, emission, or disposal of hazardous materials, nor would the Project increase the potential for accident conditions which could result in the release of hazardous materials into the environment.</p> <p>With mandatory regulatory compliance, potential hazardous materials impacts associated with long-term operation of the Project are determined to be less than significant and mitigation is not required.</p>				
<p>b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: Accidents involving hazardous materials that could pose a significant hazard to the public or the environment would be highly unlikely during the construction and long-term operation of the Project and are not reasonably foreseeable. As discussed above under Response IX(a), the transport, use, and handling of hazardous materials on the Project site during construction is a standard risk on all construction sites, and there would be no greater risk for upset and accidents than would occur on any other similar construction site. Upon buildout, the Project site would operate as a warehouse distribution center. Based on the operational characteristics of warehouse distribution centers, it is possible that hazardous materials could be used during the course of a future occupant's daily operations; however, as discussed above under Response IX(a), the Project Applicant would be required to comply with all applicable local, State, and federal regulations related to the transport, handling, and usage of hazardous material. Accordingly, impacts associated with the accidental release of hazardous materials would be less than significant during both construction and long-term operation of the Project and mitigation would not be required.</p>				
<p>c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: There are no schools located within 0.25-mile of the Project site (Google Earth Pro, 2020). Thus, the Project would not have a significant effect in emitting hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school. No impact would occur.</p>				
<p>d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Phase I ESA (<i>Technical Appendix G</i> to this IS/MND) prepared for the Project site included a search of regulatory databases, including the California EPA's Regulated Site Portal, the Santa Ana RWQCB's Geotracker database, and DTSC's EnviroStor database (EDR). The Project site is identified on the EDR database as situated within the former Department of Defense (DOD) boundary of March Air Force Base; however, the Project site is not mapped within a national priority list (NPL) or area of concern associated with the Base (Partner, 2019, p. 13). Accordingly, this listing is not expected to represent a significant environmental concern to the Project site and would not create a significant hazard to the public or the environment. The Project site is not included on any other list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. Impacts would be less than significant.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project site is located approximately 1.1 miles southwest of the March Air Reserve Base/Inland Port Airport (MARB/IPA). Pursuant to the March Air Reserve Base Compatible Use Zone Study commissioned by the United States Air Force and as depicted on Figure 6-5, <i>Air Crash Hazards</i>, of the Moreno Valley General Plan, the Project site is not located within a zone subject to hazards related to air crashes (Moreno Valley, 2006a). According to the March Air Reserve Base/Inland Port Airport Land Use Compatibility Plan, the western portion of the Project site is located in Compatibility Zone E and the eastern portion of the Project site is located within Compatibility Zone D (RCALUC, 2014, Map MA-1). Properties located in Zone D and E are subject to safety risks associated with aircraft operations, but the potential hazards are sufficiently minimal that land use restrictions are generally unnecessary (RCALUC, 2014, Table MA-1). Thus, the light industrial land uses proposed by the Project are permitted in Zone D and E by the March Air Reserve Base/Inland Port Airport Land Use Compatibility Plan (ALUCP) and were determined by the ALUC to be consistent with the ALUCP during their January 14, 2021 public meeting. The industrial warehouse buildings proposed by the Project would be no greater than 50 feet tall and does not include an air travel component (e.g., runway, helipad); therefore, would not interfere with flight operations at the March Air Reserve Base. The Project would not result in safety hazards for people residing or working in the Project area. Impacts would be less than significant, and mitigation is not required.</p>				
<p>f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project site does not contain any emergency facilities under existing conditions nor does it serve as an emergency evacuation route, so there is no potential for the Project to adversely affect an existing emergency response or evacuation plan. During construction and at Project buildout, the proposed Project would be required to maintain adequate emergency access for emergency vehicles as required by the City. As part of the City's discretionary review process, the City of Moreno Valley reviewed the Project to ensure that appropriate emergency ingress and egress would be available to-and-from the proposed warehouse buildings for public safety, and determined that the Project would not substantially impede emergency response times in the local area. Accordingly, implementation of the proposed Project would not impair implementation of or physically interfere with an adopted emergency response plan or an emergency evacuation plan, and no impact would occur.</p>				
<p>g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: According to City of Moreno Valley General Plan FEIR Figure 5.5-2, <i>Floodplains and High Fire Hazard Areas</i>, the Project site is not located in an area of substantial or high fire risk (Moreno Valley, 2006b). Additionally, the California Department of Forestry and Fire Protection (CalFire) identifies the Project site location as within a Non-Very High Fire Hazard Severity Zone (CalFire, 2009). The Project site is located in an area that has been largely developed. No wildlands are located on or adjacent to the Project site and the Project site is largely disturbed or devoid of vegetation and surrounded on all sides by developed or maintained properties and a paved road. Thus, implementation of the proposed Project would not expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands. Impacts would be less than significant.</p>

X. HYDROLOGY AND WATER QUALITY – Would the project:

a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The Project would be required to comply with Section 402 of the Clean Water Act, which authorizes the National Pollution Discharge Elimination System (NPDES) permit program that covers point sources of pollution discharging to a water body. The NPDES program also requires operators of construction sites one-acre or larger to prepare a Storm Water Pollution Prevention Plan (SWPPP) and obtain authorization to discharge stormwater under an NPDES construction stormwater permit. The Project Applicant also would be required to comply with the California Porter-Cologne Water Quality Control Act (Section 13000 et seq., of the California Water Code), which requires that comprehensive water quality control plans be developed for all waters within the State of California. The Project site is located within the jurisdiction of the Santa Ana Regional Water Quality Control Board (RWQCB).

Construction-Related Impacts

Construction of the proposed Project would involve clearing, grading, paving, utility installation, building construction, and landscaping activities. Construction activities would result in the generation of potential water quality pollutants such as silt, debris, chemicals, paints, and solvents, and other chemicals with the potential to adversely affect water quality. As such, short-term water quality impacts have the potential to occur during construction of the Project in the absence of any protective or avoidance measures.

Pursuant to the requirements of the Santa Ana RWQCB and the City Moreno Valley (Municipal Code Chapter 8.10 et seq. and Section 8.21.170), the Project would be required to obtain coverage under the State's General Construction Storm Water Permit (NPDES Permit). The NPDES permit is required for all projects that include construction activities, such as clearing, soil stockpiling, grading, and/or excavation that disturb at least one (1) acre of total land area. In addition, the Project would be required to comply with the Santa Ana RWQCB's *Santa Ana River Basin Water Quality Control Program*. Compliance with the NPDES permit and the *Santa Ana River Basin Water Quality Control Program* involves the preparation and implementation of a SWPPP for construction-related activities, including grading. The SWPPP will specify the Best Management Practices (BMPs) that the Project would be required to implement during construction activities to ensure that all potential pollutants of concern are prevented, minimized, and/or otherwise appropriately treated prior to being discharged from the subject property. Examples of BMPs that may be utilized during construction include, but are not limited to, sandbag barriers, geotextiles, storm drain inlet protection, sediment traps, rip rap soil stabilizers, and hydro-seeding. Mandatory compliance with the SWPPP would ensure that the Project's construction does not violate any water quality standards or waste discharge requirements. Therefore, water quality impacts associated with construction activities would be less than significant and no mitigation measures would be required.

Post-Development Water Quality Impacts

Stormwater pollutants commonly associated with the land uses proposed by the Project include bacterial indicators, metals, nutrients, pesticides, toxic organic compounds, sediments, trash and debris, and oil and grease. Based on current receiving water impairments (pursuant to the Clean Water Act's (CWA)

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

Section 303(d) list), the Project’s pollutants of concern are bacterial indicators, nutrients, pesticides, and sediments (Thatcher, 2020, Table E.1).

Pursuant to the Moreno Valley Municipal Code (Chapter 8.10 *et seq.* and Section 8.21.170), the Project Applicant would be required to implement a Water Quality Management Plan (WQMP) to demonstrate compliance with the City’s NPDES municipal stormwater permit, and to minimize the release of potential waterborne pollutants, including pollutants of concern for downstream receiving waters. The WQMP is a site-specific post-construction water quality management program designed to address the pollutants of concern of a development project via BMPs, implementation of which ensures the on-going protection of the watershed basin. The Project’s Preliminary WQMP, prepared by Thatcher, is included as *Technical Appendix 11* appended to this IS/MND. As identified in the Project’s Preliminary WQMP, the proposed Project is designed to include structural source control BMPs (including bioretention swales, two underground detention systems and two modular wetlands units) as well as operational source controls (including but not limited to: drainage system maintenance, storm drain system stenciling and signage, and implementation of minimal pesticide use) to minimize, prevent, and/or otherwise appropriately treat stormwater runoff flows before they are discharged from the site. Compliance with the WQMP would be required as a condition of Project approval pursuant to Municipal Code Chapter 8.10 and Municipal Code Section 8.21.170, and long-term maintenance of on-site BMPs would be required to ensure their long-term effectiveness. Therefore, water quality impacts associated with long-term operational activities would be less than significant.

In addition to the WQMP, the NDPES program also requires certain land uses, including industrial land uses as proposed by the Project, to prepare a SWPPP for operational activities and to implement a long-term water quality sampling and monitoring program, unless an exemption has been granted. On April 1, 2014, the California State Water Resources Control Board adopted an updated new NPDES permit for stormwater discharge associated with industrial activities (referred to as the “Industrial General Permit”). The new Industrial General Permit, which is more stringent than the existing Industrial General Permit, became effective on July 1, 2015. Under the effective NPDES Industrial General Permit, the Project would be required to prepare a SWPPP for operational activities and implement a long-term water quality sampling and monitoring program or receive an exemption. Because the permit is dependent upon the operational activities of the buildings, and the Project’s future building occupants and their operations are not known at this time, details of the SWPPP (including BMPs) or potential exemption to the SWPPP operational activities requirement cannot be determined at this time. However, based on the requirements of the NPDES Industrial General Permit, it is anticipated that the Project’s mandatory compliance with all applicable regulations would further reduce potential water quality impacts during long-term operation.

Based on the foregoing analysis, the Project would not violate any water quality standards or waste discharge requirements during long-term operation. Impacts would be less than significant.

b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: No potable groundwater wells are proposed by the Project. The proposed Project would be served with potable water by the Eastern Municipal Water District (EMWD). The EMWD relies on local potable groundwater as a source of its water supply (in addition to imported water from the Metropolitan Water District of Southern California, desalted ground water, and recycled water). The EMWD has indicated it has sufficient available water resources, including groundwater resources, to adequately serve the Project in addition to past, present, and future commitments to supply water (EMWD, 2016a, pp. XIV-XVI). Therefore, the proposed Project would not substantially deplete groundwater supplies and the Project’s impact to groundwater supplies would be less than significant.

Development of the Project would increase impervious surface coverage on the property, which would reduce the amount of water percolating down into the underground aquifer that underlies the Project site and a majority of the City. However, and as noted in the City’s General Plan EIR, “the impact of an incremental reduction in groundwater would not be significant as domestic water supplies are not reliant

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>on groundwater as a primary source” (Moreno Valley, 2006b, p. 5.7-12). Additionally, water captured by the proposed Project’s underground detention systems and landscaped areas would have the opportunity to percolate into the ground. With buildout of the Project, the local groundwater levels would not be substantially adversely affected. Accordingly, buildout of the Project would not interfere substantially with groundwater recharge.</p> <p>For the reasons stated above, the Project would neither substantially deplete groundwater supplies nor interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level. Impacts would be less than significant.</p>				
<p>c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:</p>				
<p>i) Result in substantial erosion or siltation on- or off-site?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: Under existing conditions, the Project site primarily drains in southerly direction, ultimately discharging to two existing storm drains at the southwest and southeast corners of the Project site (Thatcher, 2021, p. 6).</p>				
<p>The Project would mass grade the entire property and construct two industrial warehouse buildings and associated improvements, which would change the site’s existing ground contours and alter the existing drainage patterns interior to the Project site. However, upon buildout of the Project, stormwater flow generated on the Project site would continue to be conveyed to the two existing storm drains adjacent south of the southern Project site boundary.</p>				
<p>Although the Project would alter the subject property’s internal drainage patterns, such changes would not result in substantial erosion or siltation on- or off-site. Under post-development conditions, a majority of the site would be covered with impervious surfaces and, therefore, the amount of exposed soils on the Project site would be minimal. Also, as discussed under Response X(a), the Project would construct an integrated storm drain system on-site with BMPs to minimize the amount of water-borne pollutants carried from the Project site. The BMPs proposed by the Project, including bioretention swales, two underground detention systems, and two modular wetlands units are highly effective at removing sediment from stormwater runoff flows. Therefore, stormwater runoff flows leaving the Project site would not carry substantial amounts of sediment. Once stormwater runoff leaves the Project site, it would be discharged into two existing storm drains located immediately southeast and southwest of the site. Because there are no exposed soils at the Project’s discharge points, there is no potential for the Project’s stormwater runoff to result in erosion as it leaves the Project site. Accordingly, the Project would not result in substantial erosion or siltation on- site or off-site, and a less-than-significant impact would occur.</p>				
<p>ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: As described above under Response X(c(i)), proposed grading and earthwork activities on the Project site would alter the site’s existing drainage patterns but would not substantially alter the drainage pattern of the local area. Under long-term development conditions, and with on-site detention, the peak storm water runoff flows discharged from the Project site would be equal to or less than under existing conditions (Thatcher, 2021, pp. 8-9). Accordingly, implementation of the Project would not substantially increase the rate or amount of surface water runoff discharged from the site in a manner that would result in flooding on- or off-site. Impacts would be less than significant.</p>				
<p>iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: As discussed above under Response X(c(ii)), the amount of runoff discharged to the two existing storm drains adjacent south of the southern Project site boundary would be either reduced or equal to existing conditions. Furthermore, the Project’s storm drain system would be sized and designed</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>in accordance with the area’s master drainage plan to ensure that off-site flows that are conveyed through the Project site and flows originating off-site are discharged from the site at a volume and rate that can be accommodated by existing and planned downstream storm drain facilities (Thatcher, 2021, pp. 2-3, 8-9). Accordingly, the Project would not create or contribute runoff which would exceed the capacity of any existing or planned storm water drainage system, and impacts would be less than significant.</p> <p>As discussed under Response X(a), the proposed Project would be required to comply with a future SWPPP and the Project’s WQMP (<i>Technical Appendix I1</i>), which identify required BMPs to be incorporated into the Project to ensure that near-term construction activities and long-term post-development activities of the proposed Project would not result in substantial amounts of polluted runoff. Therefore, with mandatory compliance with the Project’s SWPPP and WQMP, the proposed Project would not create or contribute substantial additional sources of polluted runoff, and impacts would be less than significant.</p>				
iv) Impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: According to FEMA Flood Insurance Rate Map (FIRM) No. 06065C0745G, the Project site is located within “Zone X (unshaded)”, which are areas determined to be an area with a 0.2% chance of annual flood (FEMA, 2008). The Zone X (unshaded) designation is considered to be an area of minimal flood hazard and is not considered a special flood hazard area. Accordingly, the Project site is not expected to be inundated by flood flows during the lifetime of the Project and the Project would not impede flood flows. No impact would occur.</p>				
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Pacific Ocean is located over 40 miles southwest of the Project site (Google Earth Pro, 2020); consequently, there is no potential for the Project site to be impacted by a tsunami as tsunamis typically only reach up to a few miles inland. The nearest large body of water to the Project site is Lake Perris, with the dam located approximately 5.3 miles southeast of the Project site. According to City of Moreno Valley General Plan FEIR Figure 5.5-2, <i>Floodplains, and High Fire Hazard Areas</i>, the Project site is not located in an identified inundation area (Moreno Valley, 2006b); therefore, risk of inundation by dam failure or seiche is low. Additionally, there are no levees in the vicinity of the Project site. Impacts would be less than significant.</p>				
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: As discussed under Response X(a) above, the Project site is located within the Santa Ana River Basin and Project-related construction and operational activities would be required to comply with the Santa Ana RWQCB’s <i>Santa Ana River Basin Water Quality Control Plan</i> by preparing and adhering to a SWPPP and WQMP. Implementation of the Project would not conflict with or obstruct the <i>Santa Ana River Basin Water Quality Control Plan</i> and impacts would be less than significant.</p> <p>Additionally, as discussed under Response X(a) above, the Project would not substantially decrease groundwater supplies nor interfere substantially with groundwater recharge and, therefore, is not expected to conflict with or obstruct a sustainable groundwater management plan. Further, EMWD produces potable groundwater from the San Jacinto Groundwater Basin, which is an adjudicated basin (DWR, n.d.). Adjudicated basins are exempt from the 2014 Sustainable Groundwater Management Act (SGMA) requirement to develop Groundwater Sustainability Plan because such basins already operate under a court-ordered water management plan to ensure their long-term sustainability. No component of the Project would obstruct with or prevent implementation of the management plan for the San Jacinto Groundwater Basin. As such, the Project’s construction and operation would not conflict with any sustainable groundwater management plan. Impacts would be less than significant.</p>				
<p>Sources:</p> <ol style="list-style-type: none"> 1. Thatcher, 2020, Project Specific Water Quality Management Plan, <i>Technical Appendix I1</i> 2. Thatcher, 2021, Preliminary Drainage Study, <i>Technical Appendix I2</i>.

XI. LAND USE AND PLANNING – Would the project:				
a) Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: Development of the Project would not physically disrupt or divide the arrangement of an established community. Under existing conditions, the Project site is bordered by Alessandro Boulevard to the north and bordered by vacant, undeveloped land to the east and west. The properties to the immediate south and southwest of the Project site are developed with warehouses; therefore, the Project would serve as an extension of the existing development patterns in the area. No impact would occur.</p>				
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project includes an amendment to the City of Moreno Valley General Plan Land Use Map that would change the Project site’s land use designation from “Commercial” to “Business Park/Light Industrial.” Approval of the requested General Plan Amendment would eliminate any potential inconsistency between proposed land use and the site’s existing land use designation. Impacts to the environment associated with the Project’s proposed General Plan Amendment are evaluated throughout this IS/MND, and where significant impacts are identified, mitigation measures are imposed to reduce impacts to less than significant levels. There are no environmental impacts that would result as a specific consequence of the proposed changes to the site’s General Plan land use designation, beyond what is already evaluated and disclosed by this IS/MND.</p> <p>The Project would not conflict with any applicable goals, objectives, and policies of the SCAQMD’s AQMP, SCAG’s Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) (including the tentatively approved <i>Connect SoCal 2020-2045 RTP/SCS</i>), and SCAG’s <i>Regional Comprehensive Plan</i>. Impacts would be less than significant.</p>

XII. MINERAL RESOURCES – Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project site is not located within an area known to be underlain by regionally- or locally-important mineral resources (Moreno Valley, 2006b, p. 5.14-2). Implementation of the proposed Project would not result in the loss of availability of a known mineral resource that would be of value to the region or the residents of the State of California. In addition, the City’s General Plan EIR does not identify any locally-important mineral resource recovery sites on-site or within proximity to the Project site (Moreno Valley, 2006b, p. 5.14-2). Accordingly, no impact would occur.</p>				

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Response: Refer to Response XII(a), above. Implementation of the proposed Project would not result in the loss of a locally-important mineral resource recovery site. No impact would occur.

XIII. NOISE – Would the project result in:				
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: A <i>Noise Impact Analysis</i> (Urban Crossroads, 2020e) was prepared for the Project by Urban Crossroads to evaluate Project-related long-term operational and short-term construction noise impacts. This report is included as <i>Technical Appendix J</i> to this IS/MND and its findings are incorporated into the analysis presented herein.</p> <p>The analysis presented below summarizes the Project’s potential construction noise levels and operational noise levels. The detailed noise calculations for the analysis presented here are provided in Appendices 7.1, 9.1, and 10.1 of <i>Technical Appendix J</i>.</p> <p><u>Construction Noise Impact Analysis</u> Construction activities on the Project site would create temporary periods of noise when heavy construction equipment is in operation and would cause a short-term increase in ambient noise levels. Maximum daytime construction noise levels at representative sensitive receptor locations near the Project site are summarized in Table 8, <i>Daytime Construction Equipment Noise Level Summary</i>.</p>				

Table 8: Daytime Construction Equipment Noise Level Summary

Receiver Location ¹	Construction Noise Levels (dBA L _{eq})					
	Site Preparation	Grading	Building Construction	Paving	Architectural Coating	Highest Levels ²
R1	61.0	61.9	60.0	56.5	53.6	61.9
R2	55.4	56.3	54.4	50.9	48.0	56.3
R3	57.0	57.9	56.0	52.5	49.6	57.9
R4	56.4	57.3	55.4	52.3	49.0	57.3
R5	59.0	59.9	58.0	54.7	51.6	59.9
at 200'	62.8	63.7	61.8	57.6	55.4	63.7

¹Noise receiver locations are shown on Exhibit 10-A of *Technical Appendix J*.

²Construction noise level calculations based on distance from the project site boundaries (construction activity area) to the nearest receiver locations. CadnaA construction noise model inputs are included in Appendix 10.1 of *Technical Appendix J*.

Source: (Urban Crossroads, 2020e, Table 10-2)

As shown on Table 8, the Project’s daytime construction noise levels are expected to range from 48.0 to 61.9 A-weighted decibels (dBA) equivalent sound level (L_{eq}) at the nearby receiver locations and range from 55.4 to 63.7 dBA L_{eq} at 200 feet from the Project site. Project construction noise levels are considered exempt from the noise limits specified in the City of Moreno Valley’s Municipal Code if

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

activities occur within the hours of 7:00 a.m. to 8:00 p.m. (Municipal Code Section 11.80.030(D)(7)). Because Project-related construction activities are expected to occur during daylight hours, Project construction would not exceed the standards established by the City of Moreno Valley Municipal Code and impacts would be less than significant.

Notwithstanding, there is the potential that specific Project construction activities could occur outside of the construction hours permitted by right in the Municipal Code. Pursuant to Municipal Code Section 11.80.030(D)(7), the City of Moreno Valley would be required to approve any nighttime construction activities. If nighttime construction activities were to occur, noise levels above 60 dBA L_{eq} during the nighttime hours would exceed the standards established in the City’s Municipal Code Section 11.80.030(C). The only Project construction activities that have a reasonable potential to occur during nighttime hours are concrete pouring. As shown in Table 9, nighttime concrete pouring activities would not exceed 56.5 dBA L_{eq} at the nearby sensitive receiver locations or 57.6 dBA L_{eq} at a distance of 200 feet from the Project site; neither noise level would exceed the standard established by the City of Moreno Valley Municipal Code. Impacts during potential nighttime concrete pouring activities would be less than significant.

Table 9: Nighttime Construction Equipment Noise Level Summary

Receiver Location ¹	Construction Noise Levels (dBA L_{eq})		
	Paving Construction ²	Nighttime Construction Standard ³	Threshold Exceeded? ⁴
R1	56.5	60	No
R2	50.9	60	No

³Per Moreno Valley Municipal Code Section 11.80.030(C).
⁴Is the applicable standard exceeded?
 Source: (Urban Crossroads, 2020e, Table 10-4)

Operational Noise Impact Analysis

Stationary (on-site) noise sources associated with long-term Project operation are expected to include idling trucks, delivery truck and automobile parking, delivery truck backup alarms, roof-mounted equipment (e.g., heating/ventilation equipment), as well as noise associated with the loading and unloading of dry goods. The daytime and nighttime stationary maximum noise levels associated with Project operation at nearby sensitive receptor locations (the same receptor locations used for the construction analysis, above) and at a distance of 200 feet from the Project site are summarized in Table 10, *Operational Noise Level Compliance*.

As shown in Table 10, Project operations would not expose any nearby receptor to noise levels during daytime or nighttime hours in excess of City standards. The Project’s operational noise would contribute a maximum of 0.6 dBA L_{eq} and 0.8 dBA L_{eq} to the existing daytime and nighttime ambient noise environment, respectively in the Project area (Urban Crossroads, 2020e, pp. 48-49). Accordingly, implementation of the Project would not result in the exposure of receivers near the Project site to stationary noise levels that exceed the standards established in the City of Moreno Valley Municipal Code. Impacts would be less than significant.

Operational Noise Impact Analysis – Traffic Noise

To evaluate permanent, off-site noise increases that could result from Project-related traffic, noise levels were modeled for the following traffic scenarios:

- Existing: This scenario refers to the existing traffic noise conditions without and with the proposed Project.
- Existing plus Ambient Growth plus Project (EAP): This scenario refers to the existing traffic noise conditions plus ambient growth without and with the proposed Project.

Traffic noise contours and noise levels were established based on existing and projected future traffic conditions on off-site roadway segments within the Project's study area, and do not take into account the effect of any existing noise barriers or topography that may affect ambient noise levels. Refer to *Technical Appendix J* for a detailed description of the methodology used to evaluate the Project's traffic-related noise effects.

Table 11, *Existing plus Project Traffic Noise Impacts*, presents a comparison of the existing noise conditions along Project study area roadway segments and the noise levels that would result with addition of Project-related traffic. Under Existing plus Project conditions, noise levels along roadway segments within the Project study area would increase between 0.0 and 2.0 dBA CNEL, which would not exceed the applicable significance thresholds. Therefore, the Project's contribution to off-site traffic noise would not result in a substantial permanent increase in ambient noise levels and Project-related impacts would be less than significant.

Table 12, *Existing plus Ambient Growth plus Project Traffic Noise Impacts*, presents a comparison of the existing noise conditions along Project study area roadway segments and the noise levels that would result with addition of ambient growth and Project-related traffic. Under Existing plus Ambient Growth plus Project, noise levels along roadway segments within the Project study area would increase between 0.0 and 1.9 dBA CNEL, which would not exceed the applicable significance thresholds. Therefore, the Project's contribution to off-site traffic noise would not result in a substantial permanent increase in ambient noise levels and Project-related impacts would be less than significant.

b) Generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The analysis presented below demonstrates that implementation of the Project would not generate excessive groundborne vibration or groundborne noise levels.

Construction Analysis

Construction activities on the Project site would utilize construction equipment that has the potential to generate vibration. Table 13, *Construction Equipment Vibration Levels*, below, summarizes Project construction vibration levels at receiver locations near the Project site. As shown in Table 12, all receiver locations in the vicinity of the Project site would be exposed to vibration levels that fall below the City of Moreno Valley's significance threshold (i.e., 78 vibration decibels (VdB) for daytime residential uses, 84 VdB for daytime office use at all receiver locations and at 200 feet from the property line of the source). Accordingly, Project construction would not generate temporary, excessive groundborne vibration or noise levels and a less than significant impact would occur.

Operational Analysis

Under long-term conditions, the proposed Project would not include nor require equipment, facilities, or activities that would result in substantial or perceptible groundborne vibration. Trucks would travel to-and-from the Project site during long-term operation; however, vibration levels for heavy trucks operating

Source: (Urban Crossroads, 2020e, Table 10-6)

at low-to-normal speeds on smooth, paved surfaces – as is expected on the Project site and along surrounding roadways – typically do not exceed 65 VdB. Truck deliveries transiting on-site would travel at very low speeds, so it is expected long-term operations at the Project site would not exceed the City’s allowable levels. Accordingly, long-term operation of the Project would not expose persons to or generate excessive groundborne vibration or groundborne noise levels, and a less-than-significant impact would occur.

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The Project site is located approximately 1.0-mile northeast of the March Air Reserve Base/Inland Port Airport (MARB/IPA). Based on the Airport Land Use Compatibility Plan (ALUCP) for the MARB/IPA, the Project is located outside of the Airport’s 60 dBA CNEL noise level contours (RCALUC, 2014, Map MA-4), and therefore, represents a moderate to low risk with regard to airport noise. Additionally, the proposed use for the site would not conflict with the allowable uses described in the ALUCP (RCALUC, 2014, Table MA-2). Accordingly, the proposed Project would not expose people residing or working the Project area to excessive noise levels from a public airport; therefore, impacts would be less than significant.

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XIV. POPULATION AND HOUSING – Would the project:				
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of road or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The proposed Project would result in development of the subject property with industrial land uses that would add employment opportunities to the area. It is anticipated that the employment base for both the construction and operational phases of the Project would come from the existing population in the Inland Empire, which comprises western Riverside County and southwestern San Bernardino County. According to the Bureau of Labor Statistics, the Riverside-San Bernardino-Ontario region's civilian labor force contains approximately 2,032,794 persons with approximately 1,809,690 people employed and an unemployment rate of approximately 11.0% (approximately 223,607 persons) (USBLS, 2020). Accordingly, the Project region already contains an ample supply of potential employees under existing conditions and the Project's labor demand is not expected to draw substantial numbers of new residents to the area. Furthermore, approximately 86% of City of Moreno Valley residents commute outside of the City for work (SCAG, 2019, p. 21); therefore, the Project would provide job opportunities closer to home for existing and future Moreno Valley residents.</p> <p>There are no components of the Project that would reasonably result in indirect or unplanned population growth because the surrounding area is mostly developed under existing conditions or approved for development. The Project would install new/expanded infrastructure; however, this infrastructure would either be master-planned facilities (meaning the facilities would be installed with or without the Project) or would be private facilities for the sole use of the Project (meaning they would not be available for general public use). Accordingly, no significant indirect impacts associated with population growth would result from any Project-related improvements because the Project and its required improvements would not induce substantial growth on surrounding properties.</p> <p>Based on the foregoing analysis, neither the Project nor any Project-related component would result in substantial, direct, or indirect population growth that would cause a significant direct or indirect impact to the environment. This impact is less than significant.</p>				
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project site does not contain any residential structures and no people live on the site under existing conditions. Accordingly, implementation of the Project would not displace substantial numbers of existing housing or people and would not necessitate the construction of replacement housing elsewhere. No impact would occur.</p>				
<p>Sources:</p> <ol style="list-style-type: none"> 1. Google Earth Pro 2. Southern California Association of Governments (SCAG) – Profile of the City of Moreno Valley, https://www.scag.ca.gov/Documents/MorenoValley.pdf 3. United States Bureau of Labor Statistics – Riverside-San Bernardino-Ontario, CA Economy at a Glance on August 2020, https://data.bls.gov/timeseries/LAUMT064014000000006?amp%253bdata_tool=XGtable&output_view=data&include_graphs=true 				
XV. PUBLIC SERVICES – Would the project:				
a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
i) Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: Fire protection services to the Project site are provided by the Moreno Valley Fire Department (MVFD). The Project site is served by the Kennedy Park Fire Station (Station No. 65) located</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>at 15111 Indian Avenue, approximately 2.0 roadway miles to the southeast of the Project site, and the Towngate Fire Station (Station No. 6) located at 22250 Eucalyptus Avenue, approximately 2.5 roadway miles to the northwest of the Project site. Based on the Project site's proximity to the two existing fire stations, the Project would be adequately served by fire protection services, and no new or expanded unplanned facilities would be required. The Project Applicant is required to comply with the provisions of the City of Moreno Valley's Development Impact Fee (DIF) Ordinance (Ordinance No. 695), which requires a fee payment that the City applies to the funding of public facilities, including fire protection facilities. Mandatory compliance with the DIF Ordinance would be required prior to the issuance of a building permit.</p> <p>The Project would feature a minimum of fire safety and fire suppression activities, including type of building construction, fire sprinklers, a fire hydrant system, and paved access. The proposed buildings would be of concrete tilt-up construction that contain a low fire hazard risk rating. In addition, a fire alarm system is proposed to be installed, as well as ceiling-mounted sprinklers that are designed to suppress a fire. To suppress a fire does not necessarily mean it will extinguish the fire but rather it is meant to "knock" the fire back down to its source, making it more manageable for the MVFD to extinguish.</p> <p>Based on the foregoing, the proposed Project would receive adequate fire protection service and would not result in the need for new or physically altered fire protection facilities. Impacts to fire protection facilities would be less than significant.</p>				
ii) Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project would introduce two new building structures and employees to the Project site, which would result in an incremental increase in demand for police protection services, but is not anticipated to require or result in the construction of new or physically altered police facilities. Furthermore, the Project Applicant would be required to comply with the provisions of Moreno Valley's Development Impact Fee (DIF) Ordinance (Ordinance No. 695), which requires a fee payment that the City applies to the funding of public facilities, including police protection facilities. Mandatory compliance with the DIF Ordinance would be required prior to the issuance of a building permit. Based on the foregoing, the proposed Project would receive adequate police protection service, and would not result in the need for new or physically altered fire protection facilities. Impacts to police protection facilities would therefore be less than significant.</p>				
iii) Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: Implementation of the Project would not create a direct demand for public school services, as the subject property would contain non-residential uses and would not generate any school-aged children requiring public education. The addition of employment-generating uses on the Project site would assist the City in achieving its goal to provide a better jobs/housing balance within the City and the larger western Riverside County region (Moreno Valley, 2006b, pp. 5.12-1). The proposed Project is not expected to draw a substantial number of new residents to the region and would therefore not indirectly generate school-aged students requiring public education. Because the proposed Project would not directly generate students and is not expected to indirectly draw students to the area, the proposed Project would not cause or contribute to a need to construct new or physically altered public school facilities. Although the Project would not create a demand for additional public school services, the Project Applicant would be required to contribute development impact fees to the Moreno Valley Unified School District in compliance with California Senate Bill 50 (Greene), which allows school districts to collect fees from new developments to offset the costs associated with increasing school capacity needs. Mandatory payment of school fees would be required prior to the issuance of building permits. Impacts to public schools would be less than significant.</p>				
iv) Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: As discussed under Responses XVI(a) and XV(b) below, the Project would not create a demand for public park facilities and would not result in the need to modify existing or construct new park facilities. Accordingly, implementation of the Project would not adversely affect any park facility. Thus, no impact would occur.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
v) Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project is not expected to result in a demand for other public facilities/services, including libraries, community recreation centers, post offices, and/or animal shelters. As such, implementation of the Project would not adversely affect other public facilities or require the construction of new or modified public facilities and no impact would occur.</p>

<p>XVI. RECREATION – Would the project:</p>				
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project would develop the subject property with industrial land uses. The Project does not propose any type of residential use or other land use that may generate a population that would increase the use of existing neighborhood and regional parks or other recreational facilities. Accordingly, implementation of the proposed Project would not result in the increased use or substantial physical deterioration of an existing neighborhood or regional park, thus, no impact would occur.</p>				
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Response: The Project does not propose to construct any new on- or off-site recreation facilities. Additionally, the Project would not expand any existing off-site recreational facilities. Therefore, environmental effects related to the construction or expansion of recreational facilities would not occur.</p>				
<p>Sources:</p> <ol style="list-style-type: none"> 1. Project Application Materials – Site Plan 				
<p>XVII. TRANSPORTATION – Would the project:</p>				
a) Conflict with program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project would not conflict with applicable objectives from the Moreno Valley General Plan Circulation Element, including Objective 5.1, 5.2, 5.3 (discussed in more detail below), 5.4, 5.5, 5.8, 5.9, 5.10, and 5.11. In addition, Project would not conflict with the City’s Bicycle Master Plan nor with the vehicular and non-vehicular goals from SCAG’s 2016-2040 RTP/SCS, including goals to: 1) maximize mobility and accessibility for all people and goods in the region; 2) ensure travel safety and reliability for all people and goods in the region; 3) preserve and ensure a sustainable regional transportation system; 4) protect the environment and health of residents by improving air quality and encouraging active transportation; and 5) encouraging land use and growth patterns that facilitate transit and active transportation.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:

Potentially Significant Impact

Less Than Significant with Mitigation Incorporated

Less Than Significant Impact

No Impact

In accordance with Senate Bill (SB) 743, the California Natural Resources Agency (CNRA) adopted changes to the CEQA Guidelines in December 2018, which identify that starting on July 1, 2020, vehicle miles traveled (VMT) is the appropriate metric to evaluate a project’s transportation impacts. As of December 2018, when the revised CEQA Guidelines were adopted, automobile delay, as measured by “level of service” (LOS) and other similar metrics, no longer constitutes a significant environmental effect under CEQA. Lead agencies in California are required to use VMT to evaluate project-related transportation impacts. The VMT analysis for the Project is provided in Response XVII(b) below.

Notwithstanding, the City of Moreno Valley traffic study guidelines requires a traffic analysis based on LOS, which the City uses in part to demonstrate compliance with General Plan Circulation Element Objective 5.3, which states that the City shall maintain LOS C on roadway links wherever possible and LOS D in the vicinity of SR-60 and employment centers, and to determine transportation improvement obligations of development projects. For this reason, although LOS cannot be used to make a conclusion of a significant environmental effect, the Project’s impact to transportation facilities based on LOS is provided herein for informational purposes. The LOS analysis provided on the following pages is based on a traffic impact analysis report prepared by the consulting firm Urban Crossroads and included as *Technical Appendix K1* to this IS/MND (Urban Crossroads, 2021a). The traffic impact analysis was prepared in conformance with the City of Moreno Valley’s *Transportation Impact Analysis Preparation Guide for Vehicle Miles Traveled and Level of Service Assessment* (June 2020).

Project Study Area

The Project’s traffic study area (hereafter “Project study area” or “study area”) was devised based on the City of Moreno Valley traffic impact analysis guidelines and consultation with City of Moreno Valley staff via the City’s standard scoping process. The study area includes the intersections listed in Table 14, *Intersection Analysis Locations*.

Table 14: Intersection Analysis Locations

ID	Intersection Location	Jurisdiction	CMP?
1	Frederick St. & Alessandro Bl.	City of Moreno Valley	No
2	Driveway 1 & Alessandro Bl. – Future Intersection	City of Moreno Valley	No
3	Driveway 2 & Alessandro Bl. – Future Intersection	City of Moreno Valley	No
4	Driveway 3 & Alessandro Bl. – Future Intersection	City of Moreno Valley	No
5	Graham St. & Alessandro Bl.	City of Moreno Valley	No

Source: (Urban Crossroads, 2021a, Table 1-1)

Due to the ongoing COVID-19 pandemic, historic traffic counts from 2018 were used in conjunction with a 4.04 percent growth factor to reflect expected “normal” 2020 traffic conditions (Urban Crossroads, 2021a, p. 22). Based on the collected data, all existing intersections in the Project study area operate at a level of service (LOS) of “C” or better during the AM and PM peak hours (7:00-9:00am and 4:00-6:00pm, respectively) (Urban Crossroads, 2021a, p. 22). Refer to *Technical Appendix K1* for more information about existing traffic conditions in the Project study area.

Thresholds of Significance

The Project would result in a conflict with General Plan Circulation Element Objective 5.3 if, under Opening Year traffic conditions, Project traffic would:

- Cause a signalized intersection to degrade from either LOS C or better or LOS D or better to LOS D/E/F or LOS E/F, respectively; or increase the delay by 5.0 or more seconds at a signalized intersection that operates at an unacceptable level of service (i.e., LOS D or LOS E/F) without the Project (Urban Crossroads, 2021a, p. 14).
- Cause an unsignalized intersection to degrade from either LOS C or better or LOS D or better to LOS D/E/F or LOS E/F, respectively; or increase the delay by 5.0 or more seconds at an unsignalized intersection that operates at an unacceptable level of service (i.e., LOS D or LOS E/F) without the Project and the intersection meets the peak hour traffic signal warrant after the addition of Project traffic (Urban Crossroads, 2021a, p. 14).

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
---	--------------------------------	--	------------------------------	-----------

Project Trip Generation and Distribution

Trip generation represents the amount of traffic that is attracted to and produced by a development project. Buildings 1 and 2 are evaluated as 70 percent warehouse use and 30 percent high-cube cold storage warehouse use each. The Institute of Transportation Engineers (ITE) Trip Generation Manual (2017) includes a trip generation rate for warehouse uses (ITE land use code 150) and high-cube cold storage warehouse uses (ITE land use code 157). The assumptions for the mix of trucks, by axle type, relies on recommendations from the SCAQMD Warehouse Truck Trip Study Data Results and Usage (2014). Based on the guidance from the SCAQMD, the following truck fleet mix under ITE land use code 150 was utilized for the purposes of estimating the truck trip generation for Buildings 1 and 2: 16.7% of the total trucks as 2-axle trucks, 20.7% of the total trucks as 3-axle trucks, and 62.6% of the total trucks as 4+-axle trucks (Urban Crossroads, 2021a, p. 29). The following truck fleet mix under ITE land use code 157 was utilized for the purposes of estimating the truck trip generation for Buildings 1 and 2: 34.7% of the total trucks as 2-axle trucks, 11.0% of the total trucks as 3-axle trucks, and 54.3% of the total trucks as 4+-axle trucks (Urban Crossroads, 2021a, p. 29).

Based on the assumptions described above, the Project is calculated to generate approximately 742 total vehicle trips per day, including 59 vehicle trips during the AM peak hour (7:00-9:00am) and 64 vehicle trips during the PM peak hour (4:00-6:00pm) (Urban Crossroads, 2021a, p. 31). Of the Project's 742 daily vehicle trips, 224 would be from trucks with two or more axles (ibid.). In conformance with standard traffic engineering practices in Southern California, the Project's daily vehicle trips were converted to a passenger car equivalent (PCE). PCE factors allow the typical "real-world" mix of vehicle types to be represented as a single, standardized unit (i.e., the passenger car). A PCE factor of 1.5 was applied to two-axle truck trips, a factor of 2.0 was applied to three-axle truck trips, and a factor of 3.0 was applied to four plus-axle truck trips (Urban Crossroads, 2021a, pp. 31, 33). The Project is anticipated to generate approximately 1,062 daily PCE trips, including 21 PCE trips during the AM peak hour and 81 PCE trips during the PM peak hour (ibid.). The Project's PCE vehicle trips were used for purposes of the LOS analysis. For more information about the Project's trip generation, refer to *Technical Appendix K1*.

Trip distribution is the process of identifying the probable destinations, directions, or traffic routes that would be utilized by Project traffic. The potential interaction between the planned land uses and surrounding regional access routes are considered to identify the routes where Project traffic would distribute. The trip distribution for the Project was developed based on anticipated passenger car and truck travel patterns to-and-from the Project site. The total volume on each roadway was divided by the Project's total traffic generation to indicate the percentage of Project traffic that would use each component of the roadway system in each relevant direction.

The assignment of traffic from the Project area to the adjoining roadway system is based on the Project trip generation, trip distribution, and the arterial highway and local street system improvements that would be in place by the time of initial occupancy of the Project. Based on the identified Project traffic generation and trip distribution patterns, PCE factored Project average daily traffic (ADT) volumes for the weekday are shown on Exhibit 4-3 in *Technical Appendix K1*.

Analysis Scenarios

The Project contribution of traffic to the local circulation network were assessed for each of the following conditions:

- Near-term Construction; and
- Opening Year (2022)

The Near-Term Construction conditions analysis determines the potential for the Project's construction-related traffic to result in an adverse effect to the local roadway system. Types of traffic anticipated during construction include construction workers traveling to/from the Project site as well as deliveries of construction materials to the Project site.

The Opening Year (2022) analysis includes an evaluation of traffic conditions at the Project's "opening year." The Opening Year (2022) analysis considers existing traffic + ambient growth + Project traffic.

ISSUES & SUPPORTING INFORMATION SOURCES:

Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Near-term Construction Traffic Conditions

During the Project’s construction phase, traffic to-and-from the subject property would be generated by construction employee trips, delivery of construction materials, and delivery/use of heavy equipment.

Vehicular traffic from construction employees would be substantially less than daily and peak hour traffic volumes generated during Project operational activities because construction activities typically begin/end outside of the peak hour; therefore, a most – if not all – construction employees would not be driving to/from the Project site during hours of peak congestion. Because Project operations would not conflict with the LOS standards from Circulation Element Objective 5.3 under Opening Year (2022) traffic conditions (see “Opening Year (2022) Traffic Conditions,” below) and because construction worker peak hour trips would be substantially less than the peak hour trips generated by Project operations, traffic from construction workers is not expected to conflict with the LOS performance standards of Circulation Element Objective 5.3.

Deliveries of construction materials to the Project site also would make nominal traffic contributions to the local roadway network because most trips would occur during non-peak hours and the total volume of trips would be less than the Project’s operational trips, which are shown below to not conflict with Circulation Element Objective 5.3. Furthermore, construction materials would be delivered to the site throughout the construction phase based on need and would not occur on an everyday basis. Heavy equipment would be utilized on the Project site during the construction phase. As most heavy equipment is not authorized to be driven on public roadways, most equipment would be delivered and removed from the site via flatbed trucks. As with the delivery of construction materials, the delivery of heavy equipment to the Project site would not occur on a daily basis, but would occur periodically throughout the construction phase based on need.

Based on the foregoing analysis, traffic generated by the Project’s construction phase would not result in a conflict with the LOS performance standards contained in Circulation Element Objective 5.3.

Opening Year (2022) Traffic Conditions

As shown in Table 15, all Project study area intersections would operate at acceptable LOS under Opening Year (2022) traffic conditions. Therefore, the Project would not cause or contribute to an exceedance of the LOS performance standards contained in Circulation Element Objective 5.3.

Table 15: Intersection Analysis for Opening Year (2022) Traffic Conditions

#	Intersection	Traffic Control ²	Existing (2020)				EAP (2022)			
			Delay ¹ (secs.)		Level of Service		Delay ¹ (secs.)		Level of Service	
			AM	PM	AM	PM	AM	PM	AM	PM
1	Frederick St. & Alessandro Bl.	TS	22.4	30.7	C	C	23.4	33.8	C	C
2	Driveway 1 & Alessandro Bl.	CSS	Future Intersection				11.8	21.0	B	C
3	Driveway 2 & Alessandro Bl.	CSS	Future Intersection				11.8	22.3	B	C
4	Driveway 3 & Alessandro Bl.	CSS	Future Intersection				11.7	21.8	B	C
5	Graham St. & Alessandro Bl.	TS	20.4	32.6	C	C	22.0	34.0	C	C

¹Per the Highway Capacity Manual (6th Edition), overall average intersection delay and level of service are shown for intersections with a traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

²CSS = Cross-street Stop; TS = Traffic Signal; **CSS** = Improvement
Source: (Urban Crossroads, 2021a, Table 5-1)

b) Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: As previously discussed, SB 743, which approved in 2013, was intended to change the way transportation impacts are determined according to CEQA. Updates to the CEQA Guidelines that were adopted in December 2018 included the addition of CEQA Guidelines Section 15064.3, of which

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
---	--------------------------------	--	------------------------------	-----------

Subdivision “b” establishes criteria for evaluating a project’s transportation impacts based on project type and using automobile VMT as the metric. As a component of OPR’s revisions to the CEQA Guidelines, lead agencies were required to adopt VMT thresholds of significance by July 1, 2020. The City of Moreno Valley adopted its *Transportation Impact Analysis Preparation Guide for Vehicle Miles Traveled and Level of Service Assessment* in June 2020, which is used in this analysis to determine the significance of Project-related VMT.

According to the VMT analysis prepared by Urban Crossroads (*Technical Appendix K2*), the Project’s VMT per employee would exceed the City’s VMT per employee threshold by approximately 11.7% under baseline (Year 2020) traffic conditions when the Project’s location and Project design features are not considered (Urban Crossroads, 2021b, p. 5). With consideration of the Project’s location and Project design features, including: 1) the Project’s geographic location as an employment use in proximity to existing residential and commercial service land uses – which would reduce Project-related employee VMT from employee commutes, errands during break periods, etc.; and 2) sidewalks along the Project site frontage with Alessandro Boulevard which would facilitate pedestrian and bicycle travel to the site, the Project-related VMT would be reduced by approximately 15% and would fall below the City’s significance threshold (Urban Crossroads, 2021b, p. 8). Therefore, based on the City’s VMT significance guidelines, the Project would have a less-than-significant direct VMT impact and, therefore, would not conflict with or be inconsistent with CEQA Guidelines section 15064.3(b).

c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The types of traffic generated during operation of the Project (i.e., passenger cars and trucks) would be compatible with the type of traffic observed along Project study area roadways under existing conditions. In addition, all proposed improvements within the public right-of-way would be installed in conformance with City of Moreno Valley design standards. The City reviewed the Project’s application materials and determined that no hazardous transportation design features would be introduced through implementation of the Project. Accordingly, the Project’s construction and operation would not create or substantially increase safety hazards due to a design feature or incompatible use. Implementation of the Project would result in a less-than-significant impact.

d) Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The Project would result in the construction of two warehouse buildings on the Project site, which would require the need for emergency access to-and-from the site. During the course of the City of Moreno Valley’s review of the proposed Project, the Project’s design was reviewed to ensure that adequate access to-and-from the site is provided for emergency vehicles. The City of Moreno Valley also will require the Project to provide adequate paved access to-and-from the site as a condition of Project approval. The Project’s proposed driveways would connect directly to Alessandro Boulevard, and the Project does not propose any changes to public roads other than frontage improvements along Alessandro Boulevard that would improve local circulation/access. Furthermore, the City of Moreno Valley will review all future Project construction drawings to ensure that adequate emergency access is maintained along abutting public streets during temporary construction activities. With required adherence to City requirements for emergency vehicle access, impacts would be less than significant.

XVIII. TRIBAL CULTURAL RESOURCES – Would the project:

a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k), or ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Response: A Phase I Cultural Resources Study (*Technical Appendix C*) was prepared for the Project site by BFSa. The Phase I Cultural Resources Study included a records search with the Eastern Information Center (EIC) at University of California Riverside in order to assess previous archaeological studies and identify any previously recorded tribal cultural resources within the Project site. Additionally, as part of preparation of the Phase I Cultural Resources Study, BFSa also requested a records search of the Native American Heritage Commission (NAHC) Sacred Lands Files (SLF). According to BFSa's search of EIC records and NAHC SLFs, no tribal cultural resources listed or eligible for listing in the California Register of Historical Resources or in a local register of historical resources are present on the Project site or previously recorded on the Project site. In addition, the Project site is highly disturbed and no tribal cultural resources were observed on the Project site or in the Project site's immediate vicinity. (BFSa, 2020a, p. 1.0-1)

As part of the SB 18/AB 52 consultation process required by State law, the City of Moreno Valley sent notification of the Project to Native American tribes with possible traditional or cultural affiliation to the Project area. In response to the AB 52 consultation invitation, five tribes contacted the City to request formal consultation. The City met with each tribe and concluded tribal consultation on June 16, 2021. During the course of the tribal consultation process, no Native American tribe provided the City with substantial evidence indicating that tribal cultural resources, as defined in Public Resources Code section 21074, are present on the Project site or have been found previously on the Project site. Notwithstanding, due to the Project site's location in an area where multiple Native American tribes are known to have a cultural affiliation, there is the possibility that prehistoric archaeological resources, including tribal cultural resources, could be encountered during ground-disturbing construction activities – although this is considered unlikely due to the pervasive, historic and on-going disturbances that have occurred on the Project site. Were a tribal cultural resource, as defined in Public Resources Code Section 21074, to be found on the Project site during construction – and not protected – a significant impact would occur.

Implementation of MMs TCR-1 through TCR-6, would ensure the proper identification and subsequent treatment of any significant tribal cultural resources that may be encountered during ground-disturbing activities associated with Project development. With implementation of the required mitigation, the Project's potential impact to significant tribal cultural resources would be reduced to less-than-significant.

Mitigation

MM TCR-1 Prior to the issuance of a grading permit, the Developer shall retain a professional archaeologist to conduct monitoring of all mass grading and trenching activities. The Project Archaeologist shall have the authority to temporarily redirect earthmoving activities in the event that suspected archaeological resources are unearthed during Project construction. The Project Archaeologist, in consultation with the Consulting Tribe(s), the contractor, and the City, shall develop a Cultural Resources Management Plan (CRMP) in consultation pursuant to the definition in AB52 to address the details, timing and responsibility of all archaeological and cultural activities that will occur on the project site. A consulting tribe is defined as a tribe that initiated the AB 52 tribal consultation process

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>for the Project, has not opted out of the AB52 consultation process, and has completed AB 52 consultation with the City as provided for in Cal Pub Res Code Section 21080.3.2(b)(1) of AB52. Details in the Plan shall include:</p> <p>a) Project grading and development scheduling;</p> <p>b) The Project archeologist and the Consulting Tribes(s) as defined in MM TCR-1 shall attend the pre-grading meeting with the City, the construction manager and any contractors and will conduct a mandatory Cultural Resources Worker Sensitivity Training to those in attendance. The Training will include a brief review of the cultural sensitivity of the Project and the surrounding area; what resources could potentially be identified during earthmoving activities; the requirements of the monitoring program; the protocols that apply in the event inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols. All new construction personnel that will conduct earthwork or grading activities that begin work on the Project following the initial Training must take the Cultural Sensitivity Training prior to beginning work and the Project archaeologist and Consulting Tribe(s) shall make themselves available to provide the training on an as-needed basis;</p> <p>c) The protocols and stipulations that the contractor, City, Consulting Tribe(s) and Project archaeologist will follow in the event of inadvertent cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation.</p> <p>MM TCR-2 Prior to the issuance of a grading permit, the Developer shall secure agreements with the Pechanga Band of Luiseño Indians and Soboba Band of Luiseño Indians for tribal monitoring. The Developer is also required to provide a minimum of 30 days advance notice to the tribes of all mass grading and trenching activities. The Native American Tribal Representatives shall have the authority to temporarily halt and redirect earth moving activities in the affected area in the event that suspected archaeological resources are unearthed. If the Native American Tribal Representatives suspect that an archaeological resource may have been unearthed, the Project Archaeologist or the Tribal Representatives shall immediately redirect grading operations in a 100-foot radius around the find to allow identification and evaluation of the suspected resource. In consultation with the Native American Tribal Representatives, the Project Archaeologist shall evaluate the suspected resource and make a determination of significance pursuant to California Public Resources Code Section 21083.2.</p> <p>MM TCR-3 In the event that Native American cultural resources are discovered during the course of grading (inadvertent discoveries), the following procedures shall be carried out for final disposition of the discoveries:</p> <p>a) One or more of the following treatments, in order of preference, shall be employed with the tribes. Evidence of such shall be provided to the City of Moreno Valley Planning Division:</p> <p>i. Preservation-In-Place of the cultural resources, if feasible. Preservation in place means avoiding the resources, leaving them in the place they were found with no development affecting the integrity of the resources.</p> <p>ii. Onsite reburial of the discovered items as detailed in the treatment plan required pursuant to MM TCR-1. This shall include measures and provisions to protect the future reburial area from any future impacts in perpetuity. Reburial shall not occur until all legally required cataloging and basic recordation have been completed. No recordation of sacred items is permitted without the written consent of all Consulting Native American Tribal Governments as defined in MM TCR-1.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>MM TCR-4 The City shall verify that the following note is included on the Grading Plan:</p> <p>"If any suspected archaeological resources are discovered during ground-disturbing activities and the Project Archaeologist or Native American Tribal Representatives are not present, the construction supervisor is obligated to halt work in a 100-foot radius around the find and call the Project Archaeologist and the Tribal Representatives to the site to assess the significance of the find."</p>				
<p>MM TCR-5 If potential historic or cultural resources are uncovered during excavation or construction activities at the project site, work in the affected area must cease immediately and a qualified person meeting the Secretary of the Interior's standards (36 CFR 61), Tribal Representatives, and all site monitors per the Mitigation Measures, shall be consulted by the City to evaluate the find, and as appropriate recommend alternative measures to avoid, minimize or mitigate negative effects on the historic, or prehistoric resource. Determinations and recommendations by the consultant shall be immediately submitted to the Planning Division for consideration, and implemented as deemed appropriate by the Community Development Director, in consultation with the State Historic Preservation Officer (SHPO) and any and all Consulting Native American Tribes as defined in MM TCR-1 before any further work commences in the affected area.</p>				
<p>MM TCR-6 If human remains are discovered, no further disturbance shall occur in the affected area until the County Coroner has made necessary findings as to origin. If the County Coroner determines that the remains are potentially Native American, the California Native American Heritage Commission shall be notified within 24 hours of the published finding to be given a reasonable opportunity to identify the "most likely descendant". The "most likely descendant" shall then make recommendations, and engage in consultations concerning the treatment of the remains (California Public Resources Code 5097.98).</p>

XIX. UTILITIES AND SERVICE SYSTEMS – Would the project:

<p>a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
---	--------------------------	--------------------------	-------------------------------------	--------------------------

Response: The Project would construct an on-site network of water and sewer pipes and stormwater facilities that would connect to existing water, sewer, and storm drain lines beneath Alessandro Boulevard and along the southern Project site boundary. The Project also would remove existing wooden power poles and underground existing overhead power lines (less than 115kV) along the south side of Alessandro Boulevard abutting the Project site and install connections to existing electricity, natural gas, and communications infrastructure that already exist in the area, and all such connections would be accomplished in conformance with the rules and standards enforced by the applicable service provider. The installation of water and sewer line connections, stormwater drainage facilities, electricity, natural gas, and communications infrastructure as proposed by the Project would result in physical impacts to the environment; however, these impacts are considered to be part of the Project's construction phase and are evaluated throughout this IS/MND accordingly. In instances where significant environmental impacts have been identified for the Project's construction phase, mitigation measures are recommended in each applicable subsection of this IS/MND to reduce impacts to less-than-significant levels. The construction of utility infrastructure necessary to serve the proposed Project would not result in any significant physical effects on the environment that are not already identified and disclosed as part of this IS/MND. Accordingly, additional mitigation measures beyond those identified throughout this IS/MND would not be required.

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: EMWD is responsible for supplying potable water to the Project site and its region. As discussed in the <i>2015 EMWD Urban Water Management Plan</i>, herein incorporated by reference as the “UWMP,” which applies to and was adopted by the EMWD, adequate water supplies are projected to be available to meet EMWD’s estimated water demand through 2040 under normal, historic single-dry and historic multiple-dry year conditions (EMWD, 2016a, p. XV). EMWD forecasts for projected water demand are based on the population projections of SCAG, which rely on the adopted land use designations contained within the general plans that cover the geographic area within EMWD’s service. The water use projections utilized in the <i>2015 EMWD UWMP</i> were based on the site’s existing “Commercial” land use designation on the City of Moreno Valley Land Use Map. The Project would change the site’s land use designation to “Business Park/Light Industrial” and would operate the site as a light industrial land use (i.e., warehousing). According to EMWD’s Water System Planning & Design manual, commercial and industrial development have the same average daily water demand rate (2,000 gpd per acre) (EMWD, 2007, p. 4). Because the Project’s water demand would be identical to the projection for the site’s existing land use designation (as mentioned above), the determination of the <i>2015 EMWD UWMP</i> remains valid and EMWD would have sufficient water supplies available to serve the Project from existing entitlements/resources and no new or expanded entitlements are needed. The Project’s impact would be less than significant.</p>				
<p>c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project’s projected demand in addition to the provider’s existing commitments?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: Wastewater generated by the Project would be treated by the EMWD, which operates the Moreno Valley Regional Water Reclamation Facility. Based upon EMWD’s wastewater generation rate of 1,700 gallons per day (gpd) per acre for industrial light land uses, the proposed Project would generate approximately 30,090 gallons of wastewater per day (1,700 gpd per acre × 17.7 Project acres = 30,090 gpd). Under existing conditions, the Moreno Valley Regional Water Reclamation Facility has an excess treatment capacity of approximately 5.4 million gallons per day (mgpd). Implementation of the Project would utilize approximately 0.6% of the Moreno Valley Regional Water Reclamation Facility daily excess treatment capacity (EMWD, 2016b). Accordingly, the Moreno Valley Regional Water Reclamation Facility has sufficient capacity to treat wastewater generated by the Project in addition to existing commitments. The Project would not create the need for any new or expanded wastewater facility (such as conveyance lines, treatment facilities, or lift stations). Because there is adequate capacity at existing treatment facilities to serve the Project’s projected sewer demand, impacts would be less than significant.</p>				
<p>d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: Implementation of the Project would generate an incremental increase in solid waste volumes requiring off-site disposal during short-term construction and long-term operational activities. Solid waste generated by the Project would be disposed at the El Sobrante Landfill and/or the Badlands Sanitary Landfill.</p> <p>The El Sobrante Landfill is permitted to receive 16,054 tons of refuse per day and has a total capacity of 209,910,000 cubic yards. According the CalRecycle, the El Sobrante Landfill has a total remaining capacity of 143,977,170 cubic yards. The El Sobrante Landfill is estimated to reach capacity, at the earliest time, in the year 2051 (CalRecycle, 2019a). In July 2020 (the most recent period for which disposal volumes are available), the average daily disposal at the El Sobrante Landfill was approximately 11,003 tons, which correlates to an excess daily disposal capacity of approximately 5,051 tons (CalRecycle, 2020a).</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>The Badlands Sanitary landfill is permitted to accept a maximum of 4,800 tons of solid waste per day. In July 2020, the most recent time period for which disposal data was publicly available, the Badlands Sanitary Landfill was receiving an average of 2,709 tons of waste per day, which correlates to an excess daily disposal capacity of approximately 2,091 tons (CalRecycle, 2020b). The Badlands Sanitary Landfill has available capacity until at least the year 2021; however, future landfill expansion opportunities may exist at this site. (CalRecycle, 2019b)</p> <p>The analysis below summarizes the Project’s potential to generate solid waste during construction and/or operation that would exceed the disposal capacity of local landfill facilities. As demonstrated in the analysis below, the Project would generate less-than-significant volumes of solid waste.</p> <p><u>Construction Impact Analysis</u> Based on the United States Environmental Protection Agency’s (U.S. EPA) construction waste generation factor of 4.34 pounds of solid waste generated for the construction of every 1 s.f. for non-residential uses, Project construction is estimated to generate approximately 860.4 tons of solid waste. $([396,275 \text{ s.f.} \times 4.34 \text{ pounds per s.f.}] \div 2,000 \text{ pounds per ton} = 860 \text{ tons})$ (EPA, 2009, Table A-2). CalGreen requires a minimum of 65% of all construction waste be diverted from landfills (by recycling, reusing, and other waste reduction strategies); therefore, the Project is estimated to generate approximately 301.1 tons of construction waste requiring landfill disposal $(860 \text{ tons} \times 0.35 = 301 \text{ tons})$. The Project’s construction phase is estimated to last for up to 190 working days; therefore, the Project is estimated to generate approximately 1.58 tons of solid waste per day $(301 \text{ tons} \div 190 \text{ days} = 1.58 \text{ tons per day})$ requiring landfill during construction.</p> <p>Non-recyclable construction waste generated by the Project would be disposed at the El Sobrante Landfill or Badlands Sanitary Landfill. As described above, these landfills receive well below their maximum permitted daily disposal volume; thus, the relatively minimal construction waste generated by the Project is not anticipated to cause the landfills to exceed their maximum permitted daily disposal volume. (Project construction waste would represent approximately 0.03% of the excess disposal capacity at the El Sobrante Landfill and approximately 0.08% of the excess disposal capacity at the Badlands Sanitary Landfill.) Furthermore, the El Sobrante Landfill and Badlands Sanitary Landfill are not expected to reach its total maximum permitted disposal capacities during the Project’s construction period. The El Sobrante Landfill and Badlands Sanitary Landfill have sufficient daily capacity to accept solid waste generated by the Project’s construction phase; therefore, impacts to landfill capacity associated with the Project’s near-term construction activities would be less than significant.</p> <p><u>Operational Impact Analysis</u> Based on a daily waste generation factor of 1.42 pounds of waste per 100 square feet of industrial building area obtained from CalRecycle, long-term, on-going operation of the Project would generate approximately 2.81 tons of solid waste per day $([1.42 \text{ pounds} \div 100 \text{ s.f.}] \times 396,275 \text{ s.f.}] \div 2,000 \text{ pounds} = 2.81 \text{ tons per day})$ (CalRecycle, 2019c). Pursuant to AB 939, at least 50 percent of the Project’s solid waste is required to be diverted from landfills; therefore, the Project would generate approximately 1.41 tons of solid waste per day requiring landfilling $(2.81 \text{ tons per day} \times 50\% = 1.41 \text{ tons per day})$.</p> <p>Non-recyclable solid waste generated during long-term operation of the Project would be disposed at the El Sobrante Landfill and the Badlands Sanitary Landfill. As described above, these landfills receive well below their maximum permitted daily disposal volume; thus, waste generated by the Project’s operation is not anticipated to cause the landfills to exceed their maximum permitted daily disposal volume. (Project operational rate would represent approximately 0.03% of the daily excess disposal capacity at the El Sobrante Landfill and approximately 0.07% of the daily excess disposal capacity at the Badlands Sanitary Landfill.) Because the Project would generate a relatively small amount of solid waste per day as compared to the permitted daily capacities at the receiving landfills, impacts to the El Sobrante Landfill and Badlands Sanitary Landfill facilities during the Project’s long-term operational activities would be less than significant.</p>				
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

Response: The California Integrated Waste Management Act (AB 939), signed into law in 1989, established an integrated waste management system that focused on source reduction, recycling, composting, and land disposal of waste. In addition, the bill established a 50 percent waste reduction requirement for cities and counties by the year 2000, along with a process to ensure environmentally safe disposal of waste that could not be diverted. Per the requirements of the Integrated Waste Management Act, the Riverside County Board of Supervisors adopted the County of Riverside Countywide Integrated Waste Management Plan (CIWMP), which outlines the goals, policies, and programs the County and its cities implement to create an integrated and cost-effective waste management system that complies with the provisions of AB 939 and its diversion mandates. (RCDWR, 2020)

In order to assist the City of Moreno Valley and the County of Riverside in achieving the mandated goals of the Integrated Waste Management Act, the Project’s building user(s) would be required to work with future refuse haulers to develop and implement feasible waste reduction programs, including source reduction, recycling, and composting. Additionally, in accordance with the California Solid Waste Reuse and Recycling Act of 1991 (Cal Pub Res. Code § 42911), the Project is required to provide adequate areas for collecting and loading recyclable materials where solid waste is collected. The collection areas are required to be shown on construction drawings and be in place before occupancy permits are issued. (CA Legislative Information, 2005) Additionally, in compliance with AB 341 (Mandatory Commercial Recycling Program), the future occupant(s) of the proposed Project would be required to arrange for recycling services, if the occupant generates four (4) or more cubic yards of solid waste per week (CA Legislative Information, 2011). The implementation of these mandatory requirements would reduce the amount of solid waste generated by the Project and diverted to landfills, which in turn will aid in the extension of the life of affected disposal sites. The Project Applicant would be required to comply with all applicable solid waste statutes and regulations; as such, impacts related to solid waste statutes and regulations would be less than significant.

XX. WILDFIRE – If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:				
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Response: The Project site is not located in or near state responsibility areas (SRA) or lands within a very high fire hazard severity zone (CalFire, 2007); therefore, the Project would not exacerbate wildfire hazard risks or expose people or the environment to adverse environmental effects related to wildfires. As such, no impact would occur.				
Sources: 1. California Department of Forestry and Fire Protection – Western Riverside County Fire Hazard Severity Zones in SRA, Adopted on November 7, 2007, https://osfm.fire.ca.gov/media/6752/fhszs_map60.pdf				
XXI. MANDATORY FINDINGS OF SIGNIFICANCE				
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Response: All impacts to the environment, including impacts to habitat for fish and wildlife species, fish and wildlife populations, plant and animal communities, rare and endangered plants and animals, and historical and pre-historical resources were evaluated as part of this IS/MND. Throughout this IS/MND, where impacts were determined to be potentially significant, mitigation measures have been imposed to reduce those impacts to less-than-significant levels. Accordingly, with incorporation of the mitigation measures imposed throughout this IS/MND, the Project would not substantially degrade the quality of the environment and impacts would be less than significant.				
b) Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current project, and the effects of probable future projects.)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>Response: As discussed throughout this IS/MND, implementation of the proposed Project has the potential to result in effects to the environment that are individually limited, but cumulatively considerable. In all instances where the Project has the potential to contribute to a cumulatively considerable impact to the environment, mitigation measures have been imposed to reduce potential effects to less-than-significant levels.</p>				
<p><u>Aesthetics</u></p>				
<p>New development on the Project site and in the surrounding area would change the existing character of the Project's viewshed; however, all development in the immediate vicinity of the Project would be required to comply with the development regulations and design standards contained in the City's Development Code, which would ensure that minimum standards related to visual character and quality are met to preclude adverse aesthetic effects (e.g., size, scale, building materials, lighting). Accordingly, the Project's aesthetic impacts would not be cumulatively considerable.</p>				
<p><u>Agriculture and Forestry Resources</u></p>				
<p>The Project would have no impact on agricultural resources. Therefore, there is no potential for the Project to contribute to a cumulatively considerable impact under this topic.</p>				
<p><u>Air Quality</u></p>				
<p>Based on SCAQMD guidance, any direct exceedance of a regional or localized threshold also is considered to be a cumulatively-considerable effect, while air pollutant emissions below applicable regional and/or localized thresholds are not considered cumulatively considerable. As discussed in the preceding analysis, the Project would not exceed SCAQMD's regional threshold for criteria pollutants during construction or operation of the Project. Therefore, Project-related construction and operation emissions are not considered cumulatively-considerable.</p>				
<p><u>Biological Resources</u></p>				
<p>The Project site does not support any sensitive plant or wildlife species; therefore, there is no potential for the Project to contribute to a cumulatively-considerable impact under these resources. Although the Project site is highly disturbed and fragmented from other open space areas under existing conditions, the site does contain quality habitat for nesting birds and contains habitat that could be used by the burrowing owl. Therefore, there is the potential that nesting birds and/or the burrowing owl could be present on the Project site prior to construction and there also is the potential that other development projects in the Riverside area could support bird nests and/or the burrowing owl. The Project's potential impacts to nesting birds and the burrowing owl would be cumulatively considerable. MMs BR-1 and BR-2 would reduce the Project's cumulative effects to less-than-significant levels by ensuring that no direct take of nesting birds occurs during construction.</p>				
<p>The Project would permanently impact habitat that is classified as: sensitive natural community, riparian/riverine habitat, and a State-protected wetland. Accordingly, the Project would contribute to a cumulatively-considerable impact under these resources. MM BR-3 would reduce the Project's cumulative effects to less-than-significant levels by ensuring that these impacts would be fully compensated through the purchasing of habitat mitigation credits.</p>				
<p><u>Cultural Resources</u></p>				
<p>The Project site does not contain historic or prehistoric archaeological resources and mandatory compliance with State law would preclude impacts to human remains; therefore, there is no potential for the Project to contribute to a cumulatively considerable impact to these resources.</p>				
<p><u>Energy</u></p>				
<p>The Project's construction and operation energy consumption would not be considered inefficient, wasteful, or otherwise unnecessary and would not obstruct a state or local plan for renewable energy or energy efficiency. In addition, all cumulative projects would also be required to comply with the California Building Standards Code, which establishes standards for energy efficiency and "green" construction. Therefore, implementation of the Project would result in a less-than-significant cumulative impact to energy.</p>				

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p><u>Geology and Soils</u> Potential effects related to geology and soils are inherently site-specific; therefore, there is no potential for the Project to contribute to a cumulatively considerable impact under this topic. Furthermore, all development proposals would be required to comply with applicable federal, State, and local regulations that are in place to preclude adverse geology and soils effects, including effects related to strong seismic ground shaking, fault rupture, soil erosion, and hazardous soil conditions (e.g., liquefaction, expansive soils, landslides).</p> <p>Notwithstanding, there is remote potential that paleontological resources are buried beneath the surface of the Project site and could be impacted during construction. Other projects within region would similarly have the potential to impact unknown, subsurface paleontological resources during ground-disturbing activities. Therefore, the potential for development on the Project site to impact subsurface paleontological resource deposits is a cumulatively considerable impact. Application of MMs GEO-1 through GEO-4 would reduce the Project’s cumulative impacts to less-than-significant levels.</p> <p><u>Greenhouse Gas Emissions</u> As described in the preceding analysis, global climate change (GCC) occurs as the result of global emissions of GHGs. An individual development project does not have the potential to result in direct and significant GCC-related effects in the absence of cumulative sources of GHGs. The CEQA Guidelines also emphasize that the effects of GHG emissions are cumulative, and should be analyzed in the context of CEQA’s requirements for cumulative impacts analysis (See CEQA Guidelines § 15130[f]). Accordingly, the preceding analysis reflects a cumulative impact analysis of the GHG emissions related to the Project. As concluded under Response VIII(a) and (b), the Project would not result in a cumulatively considerable impact related to GHG emissions.</p> <p><u>Hazards and Hazardous Materials</u> Potential effects related to hazards and hazardous materials are inherently site-specific; therefore, there is no potential for the Project to contribute to a cumulatively considerable impact under this topic.</p> <p><u>Hydrology and Water Quality</u> Construction and operation of the Project and other projects in the Santa Ana River watershed would have the potential to result in a cumulative water quality impact, including erosion and sedimentation. However, in accordance with applicable federal, State, and local regulations, all development projects would be required to implement plans during construction and operation (e.g., SWPPP and WQMP) to minimize adverse effects to water quality, which would avoid a cumulatively considerable impact.</p> <p>The Project and other projects in the Santa Ana River Basin would be required to comply with federal, State, and local regulations in order to preclude flood hazards both on- and off-site. Compliance with federal, State, and local regulations would require on-site areas to be protected, at a minimum, from flooding during peak storm events (i.e., 100-year storm) and that proposed development would not expose downstream properties to increased flooding risks during peak storm events. Accordingly, a cumulatively considerable effect related to flooding would not occur.</p> <p><u>Land Use and Planning</u> The Project would not physically divide an established community, or conflict with applicable land use/planning documents; therefore, there is no potential for the Project to contribute to a cumulatively-considerable impact related to land use and planning.</p> <p><u>Mineral Resources</u> The Project would have no impact on mineral resources. Therefore, there is no potential for the Project to contribute to a cumulatively considerable impact under this topic.</p> <p><u>Noise</u> Noise levels diminish rapidly with distance; therefore, for a development project to contribute to a noise-related cumulative impact it must be located in close proximity to another development project or source of substantial noise. There are no construction projects in the immediate vicinity of the Project site that would overlap with Project-related construction activities. Accordingly, cumulatively-considerable impacts related to periodic noise and construction-related vibration would not occur. Under long-term</p>				

Attachment: Exhibit A to IS Resolution Initial Study - MND [Revision 1] (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>operating conditions the Project would comply with the City of Moreno Valley noise ordinance and would not produce noticeable levels of vibration; therefore, cumulatively considerable impacts related to these issue areas would not occur. The analysis provided under Response XIII(a) demonstrates that the Project would not result in a cumulatively-considerable impact related to transportation noise under long-term conditions.</p>				
<p><u>Population and Housing</u></p>				
<p>The Project would not implement land uses that generate new residents and would not require the construction of replacement housing. Accordingly, the City has anticipated – and planned for – the growth that would occur on the Project site and there is no potential for the Project to result in an adverse, cumulatively considerable environmental effect related to population and housing.</p>				
<p><u>Public Services</u></p>				
<p>All development projects in the City of Moreno Valley, including the Project, would be required to pay development impact fees, a portion of which would be used by the City for the provision of public services, to offset the incremental increase in demand for fire protection and police protection services. Furthermore, future development would generate an on-going stream of property tax revenue and sales tax revenue, which would provide funds that could be used by the City of Moreno Valley for the provision of fire and police protection services. The Project would not directly result in the introduction of new residents to the City and, therefore, would have no potential to result in cumulatively considerable impacts to resident-serving public facilities such as schools, parks, libraries, and other public facilities or services.</p>				
<p><u>Recreation</u></p>				
<p>The Project would have no impact to recreation facilities. Therefore, there is no potential for the Project to contribute to a cumulatively considerable impact under this topic.</p>				
<p><u>Transportation</u></p>				
<p>The Project would not conflict with any City policies addressing the circulation network and would not generate substantial VMT. Therefore, the Project would not contribute to any cumulatively-considerable adverse transportation effects.</p>				
<p><u>Tribal Cultural Resource</u></p>				
<p>Development activities on the Project site would not impact any known tribal cultural resources. However, there is the remote potential that such resources are buried beneath the surface of the Project site and could be impacted during construction. Other projects within region would similarly have the potential to impact unknown, subsurface tribal cultural resources during ground-disturbing activities. Therefore, the potential for development on the Project site to impact subsurface tribal cultural resource deposits is a cumulatively considerable impact. Application of MMs TCR-1 through TCR-6 would reduce the Project’s cumulative impacts to less-than-significant levels.</p>				
<p><u>Utilities and Service Systems</u></p>				
<p>The Project would require water and wastewater infrastructure, as well as solid waste disposal for building operation. Development of public utility infrastructure is part of an extensive planning process involving utility providers and jurisdictions with discretionary review authority. The coordination process associated with the preparation of infrastructure plans is intended to ensure that adequate public utility services and resources are available to serve both individual development projects and cumulative growth in the region. Each individual development project is subject to review for utility capacity to avoid unanticipated interruptions in service or inadequate supplies. Coordination with the utility providers would allow for the provision of utility services to the Project and other developments. The Project and other planned projects are subject to connection and service fees to offset increased demand and assist in facility expansion and service improvements (at the time of need). Because of the utility planning and coordination activities described above, cumulatively considerable impacts to utilities and service systems would not occur.</p>				
<p><u>Wildfire</u></p>				
<p>The Project site is not located in a SRA or very high fire hazard area. Therefore, implementation of the Project would result in no adverse impacts associated with wildfire.</p>

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>Response: The Project's potential to result in environmental effects that could adversely affect human beings, either directly or indirectly, has been discussed throughout this IS/MND. As demonstrated by this analysis, construction and operation of the Project would not involve any activities that would result in environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly.</p>

EXECUTIVE SUMMARY

ES.1 SUMMARY OF FINDINGS

The results of this *Compass Danbe Centerpointe Air Quality Impact Analysis* are summarized below based on the significance criteria in Section 3 of this report consistent with Appendix G of the *2019 California Environmental Quality Act (CEQA) Guidelines (CEQA Guidelines)* (1). Table ES-1 shows the findings of significance for each potential air quality impact under CEQA before and after any required mitigation measures described below.

TABLE ES-1: SUMMARY OF CEQA SIGNIFICANCE FINDINGS

Analysis	Report Section	Significance Findings	
		Unmitigated	Mitigated
Regional Construction Emissions	3.4	<i>Less Than Significant</i>	<i>n/a</i>
Localized Construction Emissions	3.6	<i>Less Than Significant</i>	<i>n/a</i>
Regional Operational Emissions	3.5	<i>Less Than Significant</i>	<i>n/a</i>
Localized Operational Emissions	3.7	<i>Less Than Significant</i>	<i>n/a</i>
CO "Hot Spot" Analysis	3.8	<i>Less Than Significant</i>	<i>n/a</i>
Air Quality Management Plan	3.9	<i>Less Than Significant</i>	<i>n/a</i>
Sensitive Receptors	3.10	<i>Less Than Significant</i>	<i>n/a</i>
Odors	3.11	<i>Less Than Significant</i>	<i>n/a</i>
Cumulative Impacts	3.12	<i>Less Than Significant</i>	<i>n/a</i>

ES.2 STANDARD REGULATORY REQUIREMENTS

There are numerous requirements that development projects must comply with by law, and that were put in place by federal, State, and local regulatory agencies for the improvement of air quality. The two most pertinent regulatory requirements that apply to the proposed Project and which are required by South Coast Air Quality Management District (SCAQMD) Rules that are currently applicable during construction activity for this Project are Rule 403 (Fugitive Dust) (2)

and Rule 1113 (Architectural Coatings) (3). Because they are required by law, credit for Rule 403 and Rule 1113 have been taken in the analysis.

SCAQMD RULE 403

This rule is intended to reduce the amount of particulate matter entrained in the ambient air as a result of anthropogenic (human-made) fugitive dust sources by requiring actions to prevent and reduce fugitive dust emissions. Rule 403 applies to any activity or human-made condition capable of generating fugitive dust and requires best available control measures to be applied to earth moving and grading activities.

SCAQMD RULE 1113

This rule serves to limit the Volatile Organic Compound (VOC) content of architectural coatings used on projects in the SCAQMD. Any person who supplies, sells, offers for sale, or manufactures any architectural coating for use on projects in the SCAQMD must comply with the current VOC standards set in this rule.

ES.3 CONSTRUCTION AND OPERATIONAL-SOURCE MITIGATION MEASURES

The Project would not result in an exceedance of any regional or localized construction or operational-source emissions thresholds. As such, the Project would not result in any significant impacts and no MMs are required.

This page intentionally left blank

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

1 INTRODUCTION

This report presents the results of the air quality impact analysis (AQIA) prepared by Urban Crossroads, Inc., for the proposed Compass Danbe Centerpointe (Project). The purpose of this AQIA is to evaluate the potential impacts to air quality associated with construction and operation of the proposed Project and recommend measures to mitigate impacts considered potentially significant in comparison to thresholds established by the SCAQMD.

1.1 SITE LOCATION

The proposed project is located south of Alessandro Boulevard on either side of Chagall Court in the City of Moreno Valley as shown on Exhibit 1-A. The March Air Reserve Base/Inland Port Airport (MARB/IPA) is located approximately 0.9 miles south of the Project site. The Project site is bordered to the west by vacant land, to the east by vacant land, to the north by commercial and residential uses, and to the south are existing industrial buildings.

This proposed Project includes a General Plan Amendment (GPA) and a Zone Change (ZC). The site is currently designated as Commercial in the City's General Plan, which would require a land use and zoning change to Light Industrial use. The proposed changes are consistent with the zones to the west, south and east of the subject site and adjacent properties. The amendment is in keeping with the uses surrounding the project site.

1.2 PROJECT DESCRIPTION

Exhibit 1-B illustrates a preliminary site plan for the Project. The Project is anticipated to be developed within a single phase with an anticipated opening year of 2022. The proposed Project consists of the following uses:

- Building 1: 206,665 square feet (sf) of warehousing (70% of total building sf) and 88,571 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 295,236 sf for Building 1
- Building 2: 70,876 sf of warehousing (70% of total building sf) and 30,376 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 101,252 sf for Building 2

This analysis includes a conservative assumption of on-site Project-related emission sources for potential future tenants, including architectural coatings, consumer products, landscape maintenance equipment, emissions associated with natural gas and electricity, and mobile source emissions. This analysis is intended to describe air impacts associated with the expected operational activities at the Project site. This report assumes the Project will operate 24-hours daily for seven days per week. At the time this air quality impact analysis was prepared, the future tenants of the proposed Project were unknown however any tenant would operate consistent with a high-cube warehouse.

2 AIR QUALITY SETTING

This section provides an overview of the existing air quality conditions in the Project area and region.

2.1 SOUTH COAST AIR BASIN

The Project site is located in the South Coast Air Basin (SCAB) within the jurisdiction of SCAQMD (4). The SCAQMD was created by the 1977 Lewis-Presley Air Quality Management Act, which merged four county air pollution control bodies into one regional district. Under the Act, the SCAQMD is responsible for bringing air quality in areas under its jurisdiction into conformity with federal and state air quality standards. As previously stated, the Project site is located within the SCAB, a 6,745-square mile subregion of the SCAQMD, which includes portions of Los Angeles, Riverside, and San Bernardino Counties, and all of Orange County.

The SCAB is bounded by the Pacific Ocean to the west and the San Gabriel, San Bernardino, and San Jacinto Mountains to the north and east. The Los Angeles County portion of the Mojave Desert Air Basin is bounded by the San Gabriel Mountains to the south and west, the Los Angeles/Kern County border to the north, and the Los Angeles/San Bernardino County border to the east. The Riverside County portion of the Salton Sea Air Basin is bounded by the San Jacinto Mountains in the west and spans eastward up to the Palo Verde Valley.

2.2 REGIONAL CLIMATE

The regional climate has a substantial influence on air quality in the SCAB. In addition, the temperature, wind, humidity, precipitation, and amount of sunshine influence the air quality.

The annual average temperatures throughout the SCAB vary from the low to middle 60s degrees Fahrenheit (°F). Due to a decreased marine influence, the eastern portion of the SCAB shows greater variability in average annual minimum and maximum temperatures. January is the coldest month throughout the SCAB, with average minimum temperatures of 47°F in downtown Los Angeles and 36°F in San Bernardino. All portions of the SCAB have recorded maximum temperatures above 100°F.

Although the climate of the SCAB can be characterized as semi-arid, the air near the land surface is quite moist on most days because of the presence of a marine layer. This shallow layer of sea air is an important modifier of SCAB climate. Humidity restricts visibility in the SCAB, and the conversion of sulfur dioxide (SO₂) to sulfates (SO₄) is heightened in air with high relative humidity. The marine layer provides an environment for that conversion process, especially during the spring and summer months. The annual average relative humidity within the SCAB is 71% along the coast and 59% inland. Since the ocean effect is dominant, periods of heavy early morning fog are frequent and low stratus clouds are a characteristic feature. These effects decrease with distance from the coast.

More than 90% of the SCAB's rainfall occurs from November through April. The annual average rainfall varies from approximately nine inches in Riverside to fourteen inches in downtown Los

Angeles. Monthly and yearly rainfall totals are extremely variable. Summer rainfall usually consists of widely scattered thunderstorms near the coast and slightly heavier shower activity in the eastern portion of the SCAB with frequency being higher near the coast.

Due to its generally clear weather, about three-quarters of available sunshine is received in the SCAB. The remaining one-quarter is absorbed by clouds. The ultraviolet portion of this abundant radiation is a key factor in photochemical reactions. On the shortest day of the year there are approximately 10 hours of possible sunshine, and on the longest day of the year there are approximately 14½ hours of possible sunshine.

The importance of wind to air pollution is considerable. The direction and speed of the wind determines the horizontal dispersion and transport of the air pollutants. During the late autumn to early spring rainy season, the SCAB is subjected to wind flows associated with the traveling storms moving through the region from the northwest. This period also brings five to ten periods of strong, dry offshore winds, locally termed “Santa Anas” each year. During the dry season, which coincides with the months of maximum photochemical smog concentrations, the wind flow is bimodal, typified by a daytime onshore sea breeze and a nighttime offshore drainage wind. Summer wind flows are created by the pressure differences between the relatively cold ocean and the unevenly heated and cooled land surfaces that modify the general northwesterly wind circulation over southern California. Nighttime drainage begins with the radiational cooling of the mountain slopes. Heavy, cool air descends the slopes and flows through the mountain passes and canyons as it follows the lowering terrain toward the ocean. Another characteristic wind regime in the SCAB is the “Catalina Eddy,” a low level cyclonic (counterclockwise) flow centered over Santa Catalina Island which results in an offshore flow to the southwest. On most spring and summer days, some indication of an eddy is apparent in coastal sections.

In the SCAB, there are two distinct temperature inversion structures that control vertical mixing of air pollution. During the summer, warm high-pressure descending (subsiding) air is undercut by a shallow layer of cool marine air. The boundary between these two layers of air is a persistent marine subsidence/inversion. This boundary prevents vertical mixing which effectively acts as an impervious lid to pollutants over the entire SCAB. The mixing height for the inversion structure is normally situated 1,000 to 1,500 feet above mean sea level.

A second inversion-type forms in conjunction with the drainage of cool air off the surrounding mountains at night followed by the seaward drift of this pool of cool air. The top of this layer forms a sharp boundary with the warmer air aloft and creates nocturnal radiation inversions. These inversions occur primarily in the winter when nights are longer and onshore flow is weakest. They are typically only a few hundred feet above mean sea level. These inversions effectively trap pollutants, such as Nitrogen Oxides (NO_x) and carbon monoxide (CO) from vehicles, as the pool of cool air drifts seaward. Winter is therefore a period of high levels of primary pollutants along the coastline.

2.3 WIND PATTERNS AND PROJECT LOCATION

The distinctive climate of the Project area and the SCAB is determined by its terrain and geographical location. The SCAB is located in a coastal plain with connecting broad valleys and

low hills, bounded by the Pacific Ocean in the southwest quadrant with high mountains forming the remainder of the perimeter.

Wind patterns across the south coastal region are characterized by westerly and southwesterly onshore winds during the day and easterly or northeasterly breezes at night. Winds are characteristically light although the speed is somewhat greater during the dry summer months than during the rainy winter season.

2.4 CRITERIA POLLUTANTS

Criteria pollutants are pollutants that are regulated through the development of human health based and/or environmentally based criteria for setting permissible levels. Criteria pollutants, their typical sources, and health effects are identified below (5):

TABLE 2-1: CRITERIA POLLUTANTS

Criteria Pollutant	Description	Sources	Health Effects
CO	CO is a colorless, odorless gas produced by the incomplete combustion of carbon-containing fuels, such as gasoline or wood. CO concentrations tend to be the highest during the winter morning, when little to no wind and surface-based inversions trap the pollutant at ground levels. Because CO is emitted directly from internal combustion engines, unlike ozone (O ₃), motor vehicles operating at slow speeds are the primary source of CO in the SCAB. The highest ambient CO concentrations are generally found near congested transportation corridors and intersections.	Any source that burns fuel such as automobiles, trucks, heavy construction equipment, farming equipment and residential heating.	Individuals with a deficient blood supply to the heart are the most susceptible to the adverse effects of CO exposure. The effects observed include earlier onset of chest pain with exercise, and electrocardiograph changes indicative of decreased oxygen (O ₂) supply to the heart. Inhaled CO has no direct toxic effect on the lungs but exerts its effect on tissues by interfering with O ₂ transport and competing with O ₂ to combine with hemoglobin present in the blood to form carboxyhemoglobin (COHb). Hence, conditions with an increased demand for O ₂ supply can be adversely affected by exposure to CO. Individuals most at risk include fetuses, patients with diseases involving heart and blood vessels, and patients with chronic hypoxemia (O ₂ deficiency) as seen at high altitudes.

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Criteria Pollutant	Description	Sources	Health Effects
SO ₂	SO ₂ is a colorless, extremely irritating gas or liquid. It enters the atmosphere as a pollutant mainly as a result of burning high sulfur-content fuel oils and coal and from chemical processes occurring at chemical plants and refineries. When SO ₂ oxidizes in the atmosphere, it forms SO ₄ . Collectively, these pollutants are referred to as sulfur oxides (SO _x).	Coal or oil burning power plants and industries, refineries, diesel engines	<p>A few minutes of exposure to low levels of SO₂ can result in airway constriction in some asthmatics, all of whom are sensitive to its effects. In asthmatics, increase in resistance to air flow, as well as reduction in breathing capacity leading to severe breathing difficulties, are observed after acute exposure to SO₂. In contrast, healthy individuals do not exhibit similar acute responses even after exposure to higher concentrations of SO₂.</p> <p>Animal studies suggest that despite SO₂ being a respiratory irritant, it does not cause substantial lung injury at ambient concentrations. However, very high levels of exposure can cause lung edema (fluid accumulation), lung tissue damage, and sloughing off of cells lining the respiratory tract.</p> <p>Some population-based studies indicate that the mortality and morbidity effects associated with fine particles show a similar association with ambient SO₂ levels. In these studies, efforts to separate the effects of SO₂ from those of fine particles have not been successful. It is not clear whether the two pollutants act synergistically, or one pollutant alone is the predominant factor.</p>

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Criteria Pollutant	Description	Sources	Health Effects
NO _x	NO _x consist of nitric oxide (NO), nitrogen dioxide (NO ₂) and nitrous oxide (N ₂ O) and are formed when nitrogen (N ₂) combines with O ₂ . Their lifespan in the atmosphere ranges from one to seven days for nitric oxide and nitrogen dioxide, to 170 years for nitrous oxide. NO _x is typically created during combustion processes and are major contributors to smog formation and acid deposition. NO ₂ is a criteria air pollutant and may result in numerous adverse health effects; it absorbs blue light, resulting in a brownish-red cast to the atmosphere and reduced visibility. Of the seven types of nitrogen oxide compounds, NO ₂ is the most abundant in the atmosphere. As ambient concentrations of NO ₂ are related to traffic density, commuters in heavy traffic may be exposed to higher concentrations of NO ₂ than those indicated by regional monitoring station.	Any source that burns fuel such as automobiles, trucks, heavy construction equipment, farming equipment and residential heating.	<p>Population-based studies suggest that an increase in acute respiratory illness, including infections and respiratory symptoms in children (not infants), is associated with long-term exposure to NO₂ at levels found in homes with gas stoves, which are higher than ambient levels found in Southern California. Increase in resistance to air flow and airway contraction is observed after short-term exposure to NO₂ in healthy subjects. Larger decreases in lung functions are observed in individuals with asthma or chronic obstructive pulmonary disease (e.g., chronic bronchitis, emphysema) than in healthy individuals, indicating a greater susceptibility of these sub-groups.</p> <p>In animals, exposure to levels of NO₂ considerably higher than ambient concentrations result in increased susceptibility to infections, possibly due to the observed changes in cells involved in maintaining immune functions. The severity of lung tissue damage associated with high levels of O₃ exposure increases when animals are exposed to a combination of O₃ and NO₂.</p>
O ₃	O ₃ is a highly reactive and unstable gas that is formed when VOCs and NO _x , both byproducts of internal combustion engine exhaust, undergo slow photochemical reactions in the presence of sunlight. O ₃ concentrations are generally highest during the summer	Formed when reactive organic gases (ROG) and NO _x react in the presence of sunlight. ROG sources include any source	Individuals exercising outdoors, children, and people with preexisting lung disease, such as asthma and chronic pulmonary lung disease, are considered to be the most susceptible sub-groups for O ₃ effects. Short-term exposure (lasting for a

Criteria Pollutant	Description	Sources	Health Effects
	<p>months when direct sunlight, light wind, and warm temperature conditions are favorable to the formation of this pollutant.</p>	<p>that burns fuels, (e.g., gasoline, natural gas, wood, oil) solvents, petroleum processing and storage and pesticides.</p>	<p>few hours) to O₃ at levels typically observed in Southern California can result in breathing pattern changes, reduction of breathing capacity, increased susceptibility to infections, inflammation of the lung tissue, and some immunological changes. Elevated O₃ levels are associated with increased school absences. In recent years, a correlation between elevated ambient O₃ levels and increases in daily hospital admission rates, as well as mortality, has also been reported. An increased risk for asthma has been found in children who participate in multiple outdoor sports and live in communities with high O₃ levels.</p> <p>O₃ exposure under exercising conditions is known to increase the severity of the responses described above. Animal studies suggest that exposure to a combination of pollutants that includes O₃ may be more toxic than exposure to O₃ alone. Although lung volume and resistance changes observed after a single exposure diminish with repeated exposures, biochemical and cellular changes appear to persist, which can lead to subsequent lung structural changes.</p>
<p>Particulate Matter</p>	<p>PM₁₀: A major air pollutant consisting of tiny solid or liquid particles of soot, dust, smoke, fumes, and aerosols. Particulate matter pollution is a major cause of reduce visibility (haze) which is caused by the scattering of light</p>	<p>Sources of PM₁₀ include road dust, windblown dust and construction. Also formed from other pollutants (acid rain, NO_x, SO_x,</p>	<p>A consistent correlation between elevated ambient fine particulate matter (PM₁₀ and PM_{2.5}) levels and an increase in mortality rates, respiratory infections, number and severity of</p>

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Criteria Pollutant	Description	Sources	Health Effects
	<p>and consequently the significant reduction air clarity. The size of the particles (10 microns or smaller, about 0.0004 inches or less) allows them to easily enter the lungs where they may be deposited, resulting in adverse health effects. Additionally, it should be noted that PM₁₀ is considered a criteria air pollutant.</p> <p>PM_{2.5}: A similar air pollutant to PM₁₀ consisting of tiny solid or liquid particles which are 2.5 microns or smaller (which is often referred to as fine particles). These particles are formed in the atmosphere from primary gaseous emissions that include SO₄ formed from SO₂ release from power plants and industrial facilities and nitrates that are formed from NO_x release from power plants, automobiles and other types of combustion sources. The chemical composition of fine particles highly depends on location, time of year, and weather conditions. PM_{2.5} is a criteria air pollutant.</p>	<p>organics). Incomplete combustion of any fuel.</p> <p>PM_{2.5} comes from fuel combustion in motor vehicles, equipment and industrial sources, residential and agricultural burning. Also formed from reaction of other pollutants (acid rain, NO_x, SO_x, organics).</p>	<p>asthma attacks and the number of hospital admissions has been observed in different parts of the United States and various areas around the world. In recent years, some studies have reported an association between long-term exposure to air pollution dominated by fine particles and increased mortality, reduction in lifespan, and an increased mortality from lung cancer.</p> <p>Daily fluctuations in PM_{2.5} concentration levels have also been related to hospital admissions for acute respiratory conditions in children, to school and kindergarten absences, to a decrease in respiratory lung volumes in normal children, and to increased medication use in children and adults with asthma. Recent studies show lung function growth in children is reduced with long term exposure to particulate matter.</p> <p>The elderly, people with pre-existing respiratory or cardiovascular disease, and children appear to be more susceptible to the effects of high levels of PM₁₀ and PM_{2.5}.</p>
VOC	<p>VOCs are hydrocarbon compounds (any compound containing various combinations of hydrogen and carbon atoms) that exist in the ambient air. VOCs contribute to the formation of smog through atmospheric photochemical reactions and/or may be toxic. Compounds of carbon (also known as organic compounds) have different levels of reactivity; that is, they do not react at the same speed or do not</p>	<p>Organic chemicals are widely used as ingredients in household products. Paints, varnishes and wax all contain organic solvents, as do many cleaning, disinfecting, cosmetic, degreasing and hobby products.</p>	<p>Breathing VOCs can irritate the eyes, nose and throat, can cause difficulty breathing and nausea, and can damage the central nervous system as well as other organs. Some VOCs can cause cancer. Not all VOCs have all these health effects, though many have several.</p>

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Criteria Pollutant	Description	Sources	Health Effects
	<p>form O₃ to the same extent when exposed to photochemical processes. VOCs often have an odor, and some examples include gasoline, alcohol, and the solvents used in paints. Exceptions to the VOC designation include CO, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate. VOCs are a criteria pollutant since they are a precursor to O₃, which is a criteria pollutant. The terms VOC and ROG (see below) interchangeably.</p>	<p>Fuels are made up of organic chemicals. All of these products can release organic compounds while you are using them, and, to some degree, when they are stored.</p>	
<p>ROG</p>	<p>Similar to VOC, ROGs are also precursors in forming O₃ and consist of compounds containing methane, ethane, propane, butane, and longer chain hydrocarbons, which are typically the result of some type of combustion/decomposition process. Smog is formed when ROG and NO_x react in the presence of sunlight. ROGs are a criteria pollutant since they are a precursor to O₃, which is a criteria pollutant. The terms ROG and VOC (see previous) interchangeably.</p>	<p>Sources similar to VOCs.</p>	<p>Health effects similar to VOCs.</p>
<p>Lead (Pb)</p>	<p>Pb is a heavy metal that is highly persistent in the environment and is considered a criteria pollutant. In the past, the primary source of Pb in the air was emissions from vehicles burning leaded gasoline. The major sources of Pb emissions are ore and metals processing, particularly Pb smelters, and piston-engine aircraft operating on leaded aviation gasoline. Other stationary sources include waste incinerators, utilities, and lead-acid battery manufacturers. It should be noted that the Project does not include</p>	<p>Metal smelters, resource recovery, leaded gasoline, deterioration of Pb paint.</p>	<p>Fetuses, infants, and children are more sensitive than others to the adverse effects of Pb exposure. Exposure to low levels of Pb can adversely affect the development and function of the central nervous system, leading to learning disorders, distractibility, inability to follow simple commands, and lower intelligence quotient. In adults, increased Pb levels are associated with increased blood pressure.</p>

Criteria Pollutant	Description	Sources	Health Effects
	operational activities such as metal processing or Pb acid battery manufacturing. As such, the Project is not anticipated to generate a quantifiable amount of Pb emissions.		Pb poisoning can cause anemia, lethargy, seizures, and death; although it appears that there are no direct effects of Pb on the respiratory system. Pb can be stored in the bone from early age environmental exposure, and elevated blood Pb levels can occur due to breakdown of bone tissue during pregnancy, hyperthyroidism (increased secretion of hormones from the thyroid gland) and osteoporosis (breakdown of bony tissue). Fetuses and breast-fed babies can be exposed to higher levels of Pb because of previous environmental Pb exposure of their mothers.
Odor	Odor means the perception experienced by a person when one or more chemical substances in the air come into contact with the human olfactory nerves (6).	Odors can come from many sources including animals, human activities, industry, natures, and vehicles.	Offensive odors can potentially affect human health in several ways. First, odorant compounds can irritate the eye, nose, and throat, which can reduce respiratory volume. Second, studies have shown that the VOCs that cause odors can stimulate sensory nerves to cause neurochemical changes that might influence health, for instance, by compromising the immune system. Finally, unpleasant odors can trigger memories or attitudes linked to unpleasant odors, causing cognitive and emotional effects such as stress.

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

2.5 EXISTING AIR QUALITY

Existing air quality is measured at established SCAQMD air quality monitoring stations. Monitored air quality is evaluated in the context of ambient air quality standards. These standards are the levels of air quality that are considered safe, with an adequate margin of safety, to protect the public health and welfare. National Ambient Air Quality Standards (NAAQS) and California Ambient Air Quality Standards (CAAQS) currently in effect are shown in Table 2-2 (7).

The determination of whether a region's air quality is healthful or unhealthful is determined by comparing contaminant levels in ambient air samples to the state and federal standards. At the time of this AQIA, the most recent state and federal standards were updated by CARB on May 4, 2016 and are presented in Table 2-2. The air quality in a region is considered to be in attainment by the state if the measured ambient air pollutant levels for O₃, CO, SO₂ (1 and 24 hour), NO₂, PM₁₀, and PM_{2.5} do not exceed standards. All others are not to be equaled or exceeded. It should be noted that the three-year period is presented for informational purposes and is not the basis for how the State assigns attainment status. Attainment status for a pollutant means that the SCAQMD meets the standards set by the Environmental Protection Agency (EPA) or the California EPA (CalEPA). Conversely, nonattainment means that an area has monitored air quality that does not meet the NAAQS or CAAQS standards. In order to improve air quality in nonattainment areas, CARB has implemented a State Implementation Plan (SIP). The SIP outlines the measures that the state will take to improve air quality. Once nonattainment areas meet the standards and additional redesignation requirements, the EPA will designate the area as a maintenance area (8).

TABLE 2-2: AMBIENT AIR QUALITY STANDARDS (1 OF 2)

Ambient Air Quality Standards						
Pollutant	Averaging Time	California Standards ¹		National Standards ²		
		Concentration ³	Method ⁴	Primary ^{3,5}	Secondary ^{3,8}	Method ⁷
Ozone (O ₃) ⁸	1 Hour	0.09 ppm (180 µg/m ³)	Ultraviolet Photometry	—	Same as Primary Standard	Ultraviolet Photometry
	8 Hour	0.070 ppm (137 µg/m ³)		0.070 ppm (137 µg/m ³)		
Respirable Particulate Matter (PM10) ⁹	24 Hour	50 µg/m ³	Gravimetric or Beta Attenuation	150 µg/m ³	Same as Primary Standard	Inertial Separation and Gravimetric Analysis
	Annual Arithmetic Mean	20 µg/m ³		—		
Fine Particulate Matter (PM2.5) ⁹	24 Hour	—	—	35 µg/m ³	Same as Primary Standard	Inertial Separation and Gravimetric Analysis
	Annual Arithmetic Mean	12 µg/m ³	Gravimetric or Beta Attenuation	12.0 µg/m ³		
Carbon Monoxide (CO)	1 Hour	20 ppm (23 mg/m ³)	Non-Dispersive Infrared Photometry (NDIR)	35 ppm (40 mg/m ³)	—	Non-Dispersive Infrared Photometry (NDIR)
	8 Hour	9.0 ppm (10 mg/m ³)		9 ppm (10 mg/m ³)	—	
	8 Hour (Lake Tahoe)	6 ppm (7 mg/m ³)		—	—	
Nitrogen Dioxide (NO ₂) ¹⁰	1 Hour	0.18 ppm (339 µg/m ³)	Gas Phase Chemiluminescence	100 ppb (188 µg/m ³)	—	Gas Phase Chemiluminescence
	Annual Arithmetic Mean	0.030 ppm (57 µg/m ³)		0.053 ppm (100 µg/m ³)	Same as Primary Standard	
Sulfur Dioxide (SO ₂) ¹¹	1 Hour	0.25 ppm (655 µg/m ³)	Ultraviolet Fluorescence	75 ppb (196 µg/m ³)	—	Ultraviolet Fluorescence; Spectrophotometry (Pararosaniline Method)
	3 Hour	—		—	0.5 ppm (1300 µg/m ³)	
	24 Hour	0.04 ppm (105 µg/m ³)		0.14 ppm (for certain areas) ¹¹	—	
	Annual Arithmetic Mean	—		0.030 ppm (for certain areas) ¹¹	—	
Lead ^{12,13}	30 Day Average	1.5 µg/m ³	Atomic Absorption	—	—	High Volume Sampler and Atomic Absorption
	Calendar Quarter	—		1.5 µg/m ³ (for certain areas) ¹²	Same as Primary Standard	
	Rolling 3-Month Average	—		0.15 µg/m ³		
Visibility Reducing Particles ¹⁴	8 Hour	See footnote 14	Beta Attenuation and Transmittance through Filter Tape	No National Standards		
Sulfates	24 Hour	25 µg/m ³	Ion Chromatography			
Hydrogen Sulfide	1 Hour	0.03 ppm (42 µg/m ³)	Ultraviolet Fluorescence			
Vinyl Chloride ¹²	24 Hour	0.01 ppm (26 µg/m ³)	Gas Chromatography

California Air Resources Board (5/4/16)

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

TABLE 2-2: AMBIENT AIR QUALITY STANDARDS (2 OF 2)

1. California standards for ozone, carbon monoxide (except 8-hour Lake Tahoe), sulfur dioxide (1 and 24 hour), nitrogen dioxide, and particulate matter (PM10, PM2.5, and visibility reducing particles), are values that are not to be exceeded. All others are not to be equaled or exceeded. California ambient air quality standards are listed in the Table of Standards in Section 70200 of Title 17 of the California Code of Regulations.
2. National standards (other than ozone, particulate matter, and those based on annual arithmetic mean) are not to be exceeded more than once a year. The ozone standard is attained when the fourth highest 8-hour concentration measured at each site in a year, averaged over three years, is equal to or less than the standard. For PM10, the 24 hour standard is attained when the expected number of days per calendar year with a 24-hour average concentration above $150 \mu\text{g}/\text{m}^3$ is equal to or less than one. For PM2.5, the 24 hour standard is attained when 98 percent of the daily concentrations, averaged over three years, are equal to or less than the standard. Contact the U.S. EPA for further clarification and current national policies.
3. Concentration expressed first in units in which it was promulgated. Equivalent units given in parentheses are based upon a reference temperature of 25°C and a reference pressure of 760 torr. Most measurements of air quality are to be corrected to a reference temperature of 25°C and a reference pressure of 760 torr; ppm in this table refers to ppm by volume, or micromoles of pollutant per mole of gas.
4. Any equivalent measurement method which can be shown to the satisfaction of the ARB to give equivalent results at or near the level of the air quality standard may be used.
5. National Primary Standards: The levels of air quality necessary, with an adequate margin of safety to protect the public health.
6. National Secondary Standards: The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.
7. Reference method as described by the U.S. EPA. An "equivalent method" of measurement may be used but must have a "consistent relationship to the reference method" and must be approved by the U.S. EPA.
8. On October 1, 2015, the national 8-hour ozone primary and secondary standards were lowered from 0.075 to 0.070 ppm.
9. On December 14, 2012, the national annual PM2.5 primary standard was lowered from $15 \mu\text{g}/\text{m}^3$ to $12.0 \mu\text{g}/\text{m}^3$. The existing national 24-hour PM2.5 standards (primary and secondary) were retained at $35 \mu\text{g}/\text{m}^3$, as was the annual secondary standard of $15 \mu\text{g}/\text{m}^3$. The existing 24-hour PM10 standards (primary and secondary) of $150 \mu\text{g}/\text{m}^3$ also were retained. The form of the annual primary and secondary standards is the annual mean, averaged over 3 years.
10. To attain the 1-hour national standard, the 3-year average of the annual 98th percentile of the 1-hour daily maximum concentrations at each site must not exceed 100 ppb. Note that the national 1-hour standard is in units of parts per billion (ppb). California standards are in units of parts per million (ppm). To directly compare the national 1-hour standard to the California standards the units can be converted from ppb to ppm. In this case, the national standard of 100 ppb is identical to 0.100 ppm.
11. On June 2, 2010, a new 1-hour SO_2 standard was established and the existing 24-hour and annual primary standards were revoked. To attain the 1-hour national standard, the 3-year average of the annual 99th percentile of the 1-hour daily maximum concentrations at each site must not exceed 75 ppb. The 1971 SO_2 national standards (24-hour and annual) remain in effect until one year after an area is designated for the 2010 standard, except that in areas designated nonattainment for the 1971 standards, the 1971 standards remain in effect until implementation plans to attain or maintain the 2010 standards are approved.
Note that the 1-hour national standard is in units of parts per billion (ppb). California standards are in units of parts per million (ppm). To directly compare the 1-hour national standard to the California standard the units can be converted to ppm. In this case, the national standard of 75 ppb is identical to 0.075 ppm.
12. The ARB has identified lead and vinyl chloride as 'toxic air contaminants' with no threshold level of exposure for adverse health effects determined. These actions allow for the implementation of control measures at levels below the ambient concentrations specified for these pollutants.
13. The national standard for lead was revised on October 15, 2008 to a rolling 3-month average. The 1978 lead standard ($1.5 \mu\text{g}/\text{m}^3$ as a quarterly average) remains in effect until one year after an area is designated for the 2008 standard, except that in areas designated nonattainment for the 1978 standard, the 1978 standard remains in effect until implementation plans to attain or maintain the 2008 standard are approved.
14. In 1989, the ARB converted both the general statewide 10-mile visibility standard and the Lake Tahoe 30-mile visibility standard to instrumental equivalents, which are "extinction of 0.23 per kilometer" and "extinction of 0.07 per kilometer" for the statewide and Lake Tahoe Air Basin standards, respectively.

For more information please call ARB-PIO at (916) 322-2990

California Air Resources Board (5/4/16)

2.6 REGIONAL AIR QUALITY

Air pollution contributes to a wide variety of adverse health effects. The EPA has established NAAQS for six of the most common air pollutants: CO, Pb, O₃, particulate matter (PM₁₀ and PM_{2.5}), NO₂, and SO₂ which are known as criteria pollutants. The SCAQMD monitors levels of various criteria pollutants at 37 permanent monitoring stations and 5 single-pollutant source Pb air monitoring sites throughout the air district (9). On February 21, 2019, CARB posted the 2018 amendments to the state and national area designations. See Table 2-3 for attainment designations for the SCAB (10). Appendix 2.1 provides geographic representation of the state and federal attainment status for applicable criteria pollutants within the SCAB.

TABLE 2-3: ATTAINMENT STATUS OF CRITERIA POLLUTANTS IN THE SCAB

Criteria Pollutant	State Designation	Federal Designation
O ₃ – 1-hour standard	Nonattainment	--
O ₃ – 8-hour standard	Nonattainment	Nonattainment
PM ₁₀	Nonattainment	Attainment
PM _{2.5}	Nonattainment	Nonattainment
CO	Attainment	Unclassifiable/Attainment
NO ₂	Attainment	Unclassifiable/Attainment
SO ₂	Unclassifiable/Attainment	Unclassifiable/Attainment
Pb ¹	Attainment	Unclassifiable/Attainment

 "--" = The national 1-hour O₃ standard was revoked effective June 15, 2005.

2.7 LOCAL AIR QUALITY

The SCAQMD has designated general forecast areas and air monitoring areas (referred to as Source Receptor Areas [SRA]) throughout the district in order to provide Southern California residents about the air quality conditions. The Project site is located within the Perris Valley area (SRA 24). The Perris Valley monitoring station is located approximately 8.5 miles southeast of the Project site and reports air quality statistics for O₃ and PM₁₀. As the Perris Valley monitoring station does not include statistics for CO, NO₂, and PM_{2.5}, the next nearest station will be used. The Metropolitan Riverside County (SRA 23) monitoring station, located approximately 10.7 miles northwest of the Project, is the next nearest monitoring stations that reports air quality statistics for CO, NO₂, and PM_{2.5}. It should be noted that the Metropolitan Riverside County monitoring station was utilized in lieu of the Perris Valley monitoring station only in instances where data was not available.

The most recent three (3) years of data available is shown on Table 2-4 and identifies the number of days ambient air quality standards were exceeded for the study area, which is considered to be representative of the local air quality at the Project site. Data for O₃, CO, NO₂, PM₁₀, and PM_{2.5}

¹ The Federal nonattainment designation for lead is only applicable towards the Los Angeles County portion of the SCAB.

for 2017 through 2019 was obtained from the SCAQMD Air Quality Data Tables (11). Additionally, data for SO₂ has been omitted as attainment is regularly met in the SCAB and few monitoring stations measure SO₂ concentrations.

TABLE 2-4: PROJECT AREA AIR QUALITY MONITORING SUMMARY 2017-2019

Pollutant	Standard	Year		
		2017	2018	2019
O ₃				
Maximum Federal 1-Hour Concentration (ppm)		0.120	0.117	0.118
Maximum Federal 8-Hour Concentration (ppm)		0.105	0.103	0.095
Number of Days Exceeding State 1-Hour Standard	> 0.09 ppm	33	31	26
Number of Days Exceeding State/Federal 8-Hour Standard	> 0.070 ppm	80	67	64
CO				
Maximum Federal 1-Hour Concentration	> 35 ppm	1.9	2.2	1.5
Maximum Federal 8-Hour Concentration	> 20 ppm	1.7	2.0	1.2
NO ₂				
Maximum Federal 1-Hour Concentration	> 0.100 ppm	0.063	0.055	0.056
Annual Federal Standard Design Value		0.015	0.014	0.014

Maximum Federal 24-Hour Concentration (µg/m ³)	> 35 µg/m ³	50.30	50.70	46.70
Annual Federal Arithmetic Mean (µg/m ³)	> 12 µg/m ³	12.18	12.41	11.13
Number of Days Exceeding Federal 24-Hour Standard	> 35 µg/m ³	6	2	4

ppm= Parts Per Million

Source: Data for O₃, CO, NO₂, PM₁₀, and PM_{2.5} was obtained from SCAQMD Air Quality Data Tables.

2.8 REGULATORY BACKGROUND

2.8.1 FEDERAL REGULATIONS

The EPA is responsible for setting and enforcing the NAAQS for O₃, CO, NO_x, SO₂, PM₁₀, and Pb (12). The EPA has jurisdiction over emissions sources that are under the authority of the federal government including aircraft, locomotives, and emissions sources outside state waters (Outer Continental Shelf). The EPA also establishes emission standards for vehicles sold in states other than California. Automobiles sold in California must meet the stricter emission requirements of CARB.

The Federal Clean Air Act (CAA) was first enacted in 1955 and has been amended numerous times in subsequent years (1963, 1965, 1967, 1970, 1977, and 1990). The CAA establishes the federal air quality standards, the NAAQS, and specifies future dates for achieving compliance (13). The CAA also mandates that states submit and implement SIPs for local areas not meeting these standards. These plans must include pollution control measures that demonstrate how the standards will be met.

The 1990 amendments to the CAA that identify specific emission reduction goals for areas not meeting the NAAQS require a demonstration of reasonable further progress toward attainment and incorporate additional sanctions for failure to attain or to meet interim milestones. The sections of the CAA most directly applicable to the development of the Project site include Title I (Non-Attainment Provisions) and Title II (Mobile Source Provisions) (14) (15). Title I provisions were established with the goal of attaining the NAAQS for the following criteria pollutants O₃, NO₂, SO₂, PM₁₀, CO, PM_{2.5}, and Pb. The NAAQS were amended in July 1997 to include an additional standard for O₃ and to adopt a NAAQS for PM_{2.5}. Table 2-3 (previously presented) provides the NAAQS within the SCAB.

Mobile source emissions are regulated in accordance with Title II provisions. These provisions require the use of cleaner burning gasoline and other cleaner burning fuels such as methanol and natural gas. Automobile manufacturers are also required to reduce tailpipe emissions of hydrocarbons and NO_x. NO_x is a collective term that includes all forms of NO_x which are emitted as byproducts of the combustion process.

2.8.2 CALIFORNIA REGULATIONS

CARB

CARB, which became part of the CalEPA in 1991, is responsible for ensuring implementation of the California Clean Air Act (AB 2595), responding to the federal CAA, and for regulating emissions from consumer products and motor vehicles. AB 2595 mandates achievement of the maximum degree of emissions reductions possible from vehicular and other mobile sources in order to attain the state ambient air quality standards by the earliest practical date. CARB established the CAAQS for all pollutants for which the federal government has NAAQS and, in addition, establishes standards for SO₄, visibility, hydrogen sulfide (H₂S), and vinyl chloride (C₂H₃Cl). However, at this time, H₂S and C₂H₃Cl are not measured at any monitoring stations in the SCAB because they are not considered to be a regional air quality problem. Generally, the CAAQS are more stringent than the NAAQS (16) (12).

Local air quality management districts, such as the SCAQMD, regulate air emissions from stationary sources such as commercial and industrial facilities. All air pollution control districts have been formally designated as attainment or non-attainment for each CAAQS.

Serious non-attainment areas are required to prepare Air Quality Management Plans (AQMP) that include specified emission reduction strategies in an effort to meet clean air goals. These plans are required to include:

- Application of Best Available Retrofit Control Technology to existing sources;

- Developing control programs for area sources (e.g., architectural coatings and solvents) and indirect sources (e.g. motor vehicle use generated by residential and commercial development);
- A District permitting system designed to allow no net increase in emissions from any new or modified permitted sources of emissions;
- Implementing reasonably available transportation control measures and assuring a substantial reduction in growth rate of vehicle trips and miles traveled;
- Significant use of low emissions vehicles by fleet operators;
- Sufficient control strategies to achieve a 5% or more annual reduction in emissions or 15% or more in a period of three years for ROG_s, NO_x, CO and PM₁₀. However, air basins may use alternative emission reduction strategy that achieves a reduction of less than 5% per year under certain circumstances.

TITLE 24 ENERGY EFFICIENCY STANDARDS AND CALIFORNIA GREEN BUILDING STANDARDS

California Code of Regulations (CCR) Title 24 Part 6: The California Energy Code was first adopted in 1978 in response to a legislative mandate to reduce California's energy consumption.

The standards are updated periodically to allow consideration and possible incorporation of new energy efficient technologies and methods. CCR, Title 24, Part 11: California Green Building Standards Code (CALGreen) is a comprehensive and uniform regulatory code for all residential, commercial, and school buildings that went in effect on January 1, 2009, and is administered by the California Building Standards Commission.

CALGreen is updated on a regular basis, with the most recent approved update consisting of the 2019 California Green Building Code Standards that became effective January 1, 2020.

Local jurisdictions are permitted to adopt more stringent requirements, as state law provides methods for local enhancements. CALGreen recognizes that many jurisdictions have developed existing construction waste and demolition ordinances and defers to them as the ruling guidance provided they establish a minimum 65% diversion requirement.

The code also provides exemptions for areas not served by construction waste and demolition recycling infrastructure. The State Building Code provides the minimum standard that buildings must meet in order to be certified for occupancy, which is generally enforced by the local building official.

Energy efficient buildings require less electricity; therefore, increased energy efficiency reduces fossil fuel consumption and decreases greenhouse gas (GHG) emissions. The 2019 version of Title 24 was adopted by the California Energy Commission (CEC) and became effective on January 1, 2020.

The 2019 Title 24 standards will result in less energy use, thereby reducing air pollutant emissions associated with energy consumption in the SCAB and across the State of California. For example, the 2019 Title 24 standards require solar photovoltaic systems for new homes, establish requirements for newly constructed healthcare facilities, encourage demand responsive technologies for residential buildings, and update indoor and outdoor lighting requirements for nonresidential buildings.

The CEC anticipates that single-family homes built with the 2019 standards will use approximately 7% less energy compared to the residential homes built under the 2016 standards. Additionally, after implementation of solar photovoltaic systems, homes built under the 2019 standards will use about 53% less energy than homes built under the 2016 standards. Nonresidential buildings (such as the Project) will use approximately 30% less energy due to lighting upgrade requirements (18).

Because the Project will be constructed after January 1, 2020, the 2019 CALGreen standards are applicable to the Project and require, among other items (19):

- Short-term bicycle parking. If the new project or an additional alteration is anticipated to generate visitor traffic, provide permanently anchored bicycle racks within 200 feet of the visitors' entrance, readily visible to passers-by, for 5% of new visitor motorized vehicle parking spaces being added, with a minimum of one two-bike capacity rack (5.106.4.1.1).
- Long-term bicycle parking. For new buildings with tenant spaces that have 10 or more tenant-occupants, provide secure bicycle parking for 5% of the tenant-occupant vehicular parking spaces with a minimum of one bicycle parking facility (5.106.4.1.2).
- Designated parking for clean air vehicles. In new projects or additions to alterations that add 10 or more vehicular parking spaces, provide designated parking for any combination of low-emitting, fuel-efficient and carpool/van pool vehicles as shown in Table 5.106.5.2 (5.106.5.2).
- Electric vehicle (EV) charging stations. New construction shall facilitate the future installation of EV supply equipment. The compliance requires empty raceways for future conduit and documentation that the electrical system has adequate capacity for the future load. The number of spaces to be provided for is contained in Table 5.106. 5.3.3 (5.106.5.3).
- Outdoor light pollution reduction. Outdoor lighting systems shall be designed to meet the backlight, upright and glare ratings per Table 5.106.8 (5.106.8)
- Construction waste management. Recycle and/or salvage for reuse a minimum of 65% of the nonhazardous construction and demolition waste in accordance with Section
- 5.408.1.1. 5.405.1.2, or 5.408.1.3; or meet a local construction and demolition waste management ordinance, whichever is more stringent (5.408.1).
- Excavated soil and land clearing debris. 100% of trees, stumps, rocks and associated vegetation and soils resulting primarily from land clearing shall be reused or recycled. For a phased project, such material may be stockpiled on site until the storage site is developed (5.408.3).
- Recycling by Occupants. Provide readily accessible areas that serve the entire building and are identified for the depositing, storage and collection of non-hazardous materials for recycling, including (at a minimum) paper, corrugated cardboard, glass, plastics, organic waste, and metals or meet a lawfully enacted local recycling ordinance, if more restrictive (5.410.1).
- Water conserving plumbing fixtures and fittings. Plumbing fixtures (water closets and urinals) and fittings (faucets and showerheads) shall comply with the following:
 - Water Closets. The effective flush volume of all water closets shall not exceed 1.28 gallons per flush (5.303.3.1)
 - Urinals. The effective flush volume of wall-mounted urinals shall not exceed 0.125 gallons per flush (5.303.3.2.1). The effective flush volume of floor-mounted or other urinals shall not exceed 0.5 gallons per flush (5.303.3.2.2).

- Showerheads. Single showerheads shall have a minimum flow rate of not more than 1.8 gallons per minute and 80 psi (5.303.3.3.1). When a shower is served by more than one showerhead, the combine flow rate of all showerheads and/or other shower outlets controlled by a single valve shall not exceed 1.8 gallons per minute at 80 psi (5.303.3.3.2).
- Faucets and fountains. Nonresidential lavatory faucets shall have a maximum flow rate of not more than 0.5 gallons per minute at 60 psi (5.303.3.4.1). Kitchen faucets shall have a maximum flow rate of not more than 1.8 gallons per minute of 60 psi (5.303.3.4.2). Wash fountains shall have a maximum flow rate of not more than 1.8 gallons per minute (5.303.3.4.3). Metering faucets shall not deliver more than 0.20 gallons per cycle (5.303.3.4.4). Metering faucets for wash fountains shall have a maximum flow rate not more than 0.20 gallons per cycle (5.303.3.4.5).
- Outdoor portable water use in landscaped areas. Nonresidential developments shall comply with a local water efficient landscape ordinance or the current California Department of Water Resources' Model Water Efficient (MWELO), whichever is more stringent (5.304.1).
- Water meters. Separate submeters or metering devices shall be installed for new buildings or additions in excess of 50,000 sf or for excess consumption where any tenant within a new building or within an addition that is project to consume more than 1,000 gallons per day (5.303.1.1 and 5.303.1.2).
- Outdoor water use in rehabilitated landscape projects equal or greater than 2,500 sf. Rehabilitated landscape projects with an aggregate landscape area equal to or greater than 2,500 sf requiring a building or landscape permit (5.304.3).
- Commissioning. For new buildings 10,000 sf and over, building commissioning shall be included in the design and construction processes of the building project to verify that the building systems and components meet the owner's or owner representative's project requirements (5.410.2).

2.8.3 AQMP

Currently, the NAAQS and CAAQS are exceeded in most parts of the SCAB. In response, the SCAQMD has adopted a series of AQMP to meet the state and federal ambient air quality standards (17). AQMPs are updated regularly in order to more effectively reduce emissions, accommodate growth, and to minimize any negative fiscal impacts of air pollution control on the economy. A detailed discussion on the AQMP and Project consistency with the AQMP is provided in Section 3.10.

2.9 REGIONAL AIR QUALITY IMPROVEMENT

The Project is within the jurisdiction of the SCAQMD. In 1976, California adopted the Lewis Air Quality Management Act which created SCAQMD from a voluntary association of air pollution control districts in Los Angeles, Orange, Riverside, and San Bernardino counties. The geographic area of which SCAQMD consists is known as the SCAB. SCAQMD develops comprehensive plans and regulatory programs for the region to attain federal standards by dates specified in federal law. The agency is also responsible for meeting state standards by the earliest date achievable, using reasonably available control measures.

SCAQMD rule development through the 1970s and 1980s resulted in dramatic improvement in SCAB air quality. Nearly all control programs developed through the early 1990s relied on (i) the

development and application of cleaner technology; (ii) add-on emission controls, and (iii) uniform CEQA review throughout the SCAB. Industrial emission sources have been significantly reduced by this approach and vehicular emissions have been reduced by technologies implemented at the state level by CARB.

As discussed above, the SCAQMD is the lead agency charged with regulating air quality emission reductions for the entire SCAB. SCAQMD created AQMPs which represent a regional blueprint for achieving healthful air on behalf of the 16 million residents of the SCAB. The 2012 AQMP states, “the remarkable historical improvement in air quality since the 1970’s is the direct result of Southern California’s comprehensive, multiyear strategy of reducing air pollution from all sources as outlined in its AQMPs,” (18).

Emissions of O₃, NO_x, VOC, and CO have been decreasing in the SCAB since 1975 and are projected to continue to decrease through 2020 (19). These decreases result primarily from motor vehicle controls and reductions in evaporative emissions. Although vehicle miles traveled (VMT) in the SCAB continue to increase, NO_x and VOC levels are decreasing because of the mandated controls on motor vehicles and the replacement of older polluting vehicles with lower-emitting vehicles. NO_x emissions from electric utilities have also decreased due to use of cleaner fuels and renewable energy. O₃ contour maps show that the number of days exceeding the 8-hour NAAQS has generally decreased between 1980 and 2019. For 2019, there was an overall decrease in exceedance days compared with the 1980 period. However, as shown on Table 2-5, O₃ levels have increased in the past three years due to higher temperatures and stagnant weather conditions. Notwithstanding, O₃ levels in the SCAB have decreased substantially over the last 30 years with the current maximum measured concentrations being approximately one-third of concentrations within the late 70’s (20).

TABLE 2-5: SCAB O₃ TREND

Source: 2020 SCAQMD, Historical O₃ Air Quality Trends (1976-2018)

The overall trends of PM₁₀ and PM_{2.5} levels in the air (not emissions) show an overall improvement since 1975. Direct emissions of PM₁₀ have remained somewhat constant in the SCAB and direct emissions of PM_{2.5} have decreased slightly since 1975. Area wide sources (fugitive dust from roads, dust from construction and demolition, and other sources) contribute the greatest amount of direct particulate matter emissions.

As with other pollutants, the most recent PM₁₀ statistics show an overall improvement as illustrated in Tables 2-6 and 2-7. During the period for which data are available, the 24-hour national annual average concentration for PM₁₀ decreased by approximately 48%, from 103.7 microgram per cubic meter (µg/m³) in 1988 to 53.5 µg/m³ in 2018 (21). Although the values are below the federal standard, it should be noted that there are days within the year where the concentrations will exceed the threshold. The 24-hour state annual average for emissions for PM₁₀, have decreased by approximately 53% since 1988 (21). Although data in the late 1990's show some variability, this is probably due to the advances in meteorological science rather than a change in emissions. Similar to the ambient concentrations, the calculated number of days above the 24-hour PM₁₀ standards has also shown an overall drop.

TABLE 2-6: SCAB AVERAGE 24-HOUR CONCENTRATION PM₁₀ TREND (BASED ON FEDERAL STANDARD)¹

¹ Some year have been omitted from the table as insufficient data (or no) data has been reported. Years with reported value of "0" have also been omitted.

Tables 2-8 and 2-9 shows the most recent 24-hour average PM_{2.5} concentrations in the SCAB from 1999 through 2018. Overall, the national and state annual average concentrations have decreased by almost 52% and 33% respectively (21). It should be noted that the SCAB is currently designated as nonattainment for the state and federal PM_{2.5} standards.

TABLE 2-9: SCAB ANNUAL AVERAGE CONCENTRATION PM_{2.5} TREND (BASED ON STATE STANDARD)¹

Source: 2020 CARB, iADAM: Top Four Summary: PM_{2.5} 24-Hour Averages (1999-2018)

¹ Some year have been omitted from the table as insufficient data (or no) data has been reported. Years with reported value of "0" have also been omitted.

While the 2012 AQMP PM₁₀ attainment demonstration and the 2015 associated supplemental SIP submission indicated that attainment of the 24-hour standard was predicted to occur by the end of 2015, it could not anticipate the effect of the ongoing drought on the measured PM_{2.5}.

The 2006 to 2010 base period used for the 2012 attainment demonstration had near-normal rainfall. While the trend of PM_{2.5}-equivalent emission reductions continued through 2015, the severe drought conditions contributed to the PM_{2.5} increases observed after 2012. As a result of the disrupted progress toward attainment of the federal 24-hour PM_{2.5} standard, SCAQMD submitted a request and the EPA approved, in January 2016, a "bump up" to the nonattainment classification from "moderate" to "serious," with a new attainment deadline as soon as practicable, but not beyond December 31, 2019. As of March 14, 2019, the EPA approved portions of a SIP revision submitted by California to address CAA requirements for the 2006 24-hour PM_{2.5} NAAQS in the Los Angeles-SCAB Serious PM_{2.5} nonattainment area. The EPA also approved 2017 and 2019 motor vehicle emissions budgets for transportation conformity purposes and inter-pollutant trading ratios for use in transportation conformity analyses (22).

In March 2017, the SCAQMD released the Final 2016 AQMP. The 2016 AQMP continues to evaluate current integrated strategies and control measures to meet the NAAQS, as well as, explore new and innovative methods to reach its goals. Some of these approaches include utilizing incentive programs, recognizing existing co-benefit programs from other sectors, and developing a strategy with fair-share reductions at the federal, state, and local levels (23). Similar to the 2012 AQMP, the 2016 AQMP incorporates scientific and technological information and planning assumptions, including the 2016-2040 Regional Transportation Plan/Sustainable Communities Strategy (2016-2040 RTP/SCS) and updated emission inventory methodologies for various source categories (17).

The 2022 AQMP is currently being developed by SCAQMD to address the EPA’s strengthened ozone standard. Development of the 2022 AQMP is in its early stages and no formal timeline for completion and adoption is currently known.

The most recent CO concentrations in the SCAB are shown in Table 2-10 (21). CO concentrations in the SCAB have decreased markedly — a total decrease of more about 80% in the peak 8-hour concentration from 1986 to 2012. It should be noted 2012 is the most recent year where 8-hour CO averages and related statistics are available in the SCAB. The number of exceedance days has also declined. The entire SCAB is now designated as attainment for both the state and national CO standards. Ongoing reductions from motor vehicle control programs should continue the downward trend in ambient CO concentrations.

TABLE 2-10: SCAB 8-HOUR AVERAGE CONCENTRATION CO TREND¹

Source: 2020 CARB, iADAM: Top Four Summary: CO 8-Hour Averages (1999-2018)

¹ The most recent year where 8-hour concentration data is available is 2012.

Part of the control process of the SCAQMD’s duty to greatly improve the air quality in the SCAB is the uniform CEQA review procedures required by SCAQMD’s *CEQA Air Quality Handbook (1993) (1993 CEQA Handbook)* (24). The single threshold of significance used to assess Project direct and cumulative impacts has in fact “worked” as evidenced by the track record of the air quality in the SCAB dramatically improving over the course of the past decades. As stated by the SCAQMD, the District’s thresholds of significance are based on factual and scientific data and are therefore appropriate thresholds of significance to use for this Project.

The most recent NO₂ data for the SCAB is shown in Tables 2-11 and 2-12 (21). Over the last 50 years, NO₂ values have decreased significantly; the peak 1-hour national and state averages for 2018 is approximately 82% lower than what it was during 1963. The SCAB attained the State 1-hour NO₂ standard in 1994, bringing the entire state into attainment. A new state annual average standard of 0.030 ppm was adopted by the ARB in February 2007 (25). The new standard is just barely exceeded in the SCAQMD. NO₂ is formed from NO_x emissions, which also contribute to O₃.

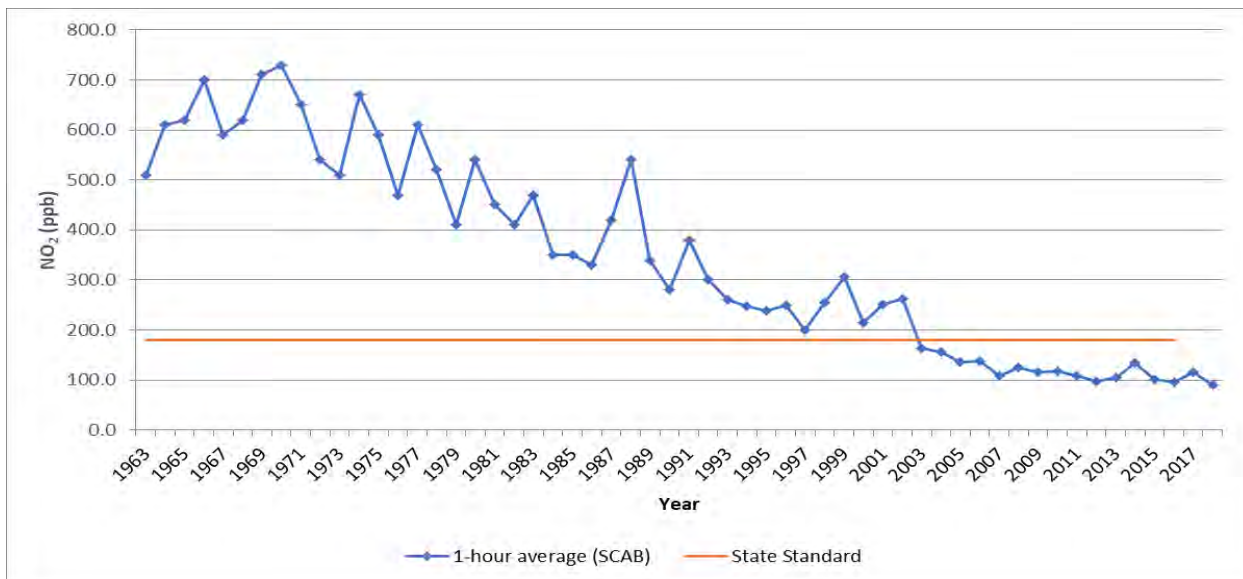

As a result, the majority of the future emission control measures will be implemented as part of the overall O₃ control strategy. Many of these control measures will target mobile sources, which account for more than three-quarters of California’s NO_x emissions. These measures are expected to bring the SCAQMD into attainment of the state annual average standard.

2.9.1 TOXIC AIR CONTAMINANTS (TAC) TRENDS

In 1984, as a result of public concern for exposure to airborne carcinogens, CARB adopted regulations to reduce the amount of TAC emissions resulting from mobile and area sources, such as cars, trucks, stationary products, and consumer products. According to the *Ambient and Emission Trends of Toxic Air Contaminants in California* journal article (26) which was prepared for CARB, results show that between 1990-2012, ambient concentration and emission trends for the seven TACs responsible for most of the known cancer risk associated with airborne exposure in California have declined significantly (between 1990 and 2012). The seven TACs studied include those that are derived from mobile sources: diesel particulate matter (DPM), benzene (C₆H₆), and 1,3-butadiene (C₄H₆); those that are derived from stationary sources: perchloroethylene (C₂Cl₄) and hexavalent chromium (Cr(VI)); and those derived from photochemical reactions of emitted VOCs: formaldehyde (CH₂O) and acetaldehyde (C₂H₄O)². The decline in ambient concentration and emission trends of these TACs are a result of various regulations CARB has implemented to address cancer risk.

MOBILE SOURCE TACS

CARB introduced two programs that aimed at reducing mobile emissions for light and medium duty vehicles through vehicle emissions controls and cleaner fuel. In California, light-duty vehicles sold after 1996 are equipped with California's second-generation On-Board Diagnostic (OBD-II) system. The OBD-II system monitors virtually every component that can affect the emission performance of the vehicle to ensure that the vehicle remains as clean as possible over its entire life and assists repair technicians in diagnosing and fixing problems with the computerized engine controls. If a problem is detected, the OBD-II system illuminates a warning lamp on the vehicle instrument panel to alert the driver. This warning lamp typically contains the phrase "Check Engine" or "Service Engine Soon". The system will also store important information about the detected malfunction so that a repair technician can accurately find and fix the problem. CARB has recently developed similar OBD requirements for heavy-duty vehicles over 14,000 pounds (lbs). CARB's phase II Reformulated Gasoline Regulation (RFG-2), adopted in 1996, also led to a reduction of mobile source emissions. Through such regulations, benzene levels declined 88% from 1990-2012. 1,3-Butadiene concentrations also declined 85% from 1990-2012 as a result of the use of reformulated gasoline and motor vehicle regulations (26).

In 2000, CARB's Diesel Risk Reduction Plan (DRRP) recommended the replacement and retrofit of diesel-fueled engines and the use of ultra-low-sulfur (<15 ppm) diesel fuel. As a result of these measures, DPM concentrations have declined 68% since 2000, even though the state's population increased 31% and the amount of diesel vehicles miles traveled increased 81%, as shown on Exhibit 2-B. With the implementation of these diesel-related control regulations, CARB expects a DPM decline of 71% for 2000-2020.

² It should be noted that ambient DPM concentrations are not measured directly. Rather, a surrogate method using the coefficient of haze (COH) and elemental carbon (EC) is used to estimate DPM concentrations.

EXHIBIT 2-A: DPM AND DIESEL VEHICLE MILES TREND

California Population, Gross State Product (GSP),
Diesel Cancer Risk, Diesel Vehicle-Miles-Traveled (VMT)

Source: 2020 CARB

DIESEL REGULATIONS

CARB and the Ports of Los Angeles and Long Beach (POLA and POLB) have adopted several iterations of regulations for diesel trucks that are aimed at reducing DPM. More specifically, CARB Drayage Truck Regulation (27), CARB statewide On-road Truck and Bus Regulation (28), and the Ports of Los Angeles and Long Beach Clean Truck Program (CTP) require accelerated implementation of “clean trucks” into the statewide truck fleet (29). In other words, older more polluting trucks will be replaced with newer, cleaner trucks as a function of these regulatory requirements.

Moreover, the average statewide DPM emissions for Heavy Duty Trucks (HDT), in terms of grams of DPM generated per mile traveled, will dramatically be reduced due to the aforementioned regulatory requirements.

Diesel emissions identified in this analysis would therefore overstate future DPM emissions since not all the regulatory requirements are reflected in the modeling.

CANCER RISK TRENDS

Based on information available from CARB, overall cancer risk throughout the SCAB has had a declining trend since 1990. In 1998, following an exhaustive 10-year scientific assessment process, CARB identified particulate matter from diesel-fueled engines as a toxic air contaminant. The SCAQMD initiated a comprehensive urban toxic air pollution study called the Multiple Air Toxics Exposure Study (MATES). DPM accounts for more than 70% of the cancer risk.

In 2008 the SCAQMD prepared an update to the MATES-II study, referred to as MATES-III. MATES-III estimates the average excess cancer risk level from exposure to TACs is an approximately 17% decrease in comparison to the MATES-II study.

In 2015, the SCAQMD published an in-depth analysis of the toxic air contaminants and the resulting health risks for all of Southern California. The *Multiple Air Toxics Exposure Study in the SCAB, MATES IV* shows that cancer risk decreased less than 50% between 2005 and 2015 (30).

MATES-IV study represents the baseline health risk for a cumulative analysis. MATES-IV calculated cancer risks based on monitoring data collected at ten fixed sites within the SCAB. None of the fixed monitoring sites are within the local area of the Project site. However, MATES-IV has extrapolated the excess cancer risk levels throughout the SCAB by modeling the specific grids. MATES-IV modeling predicted an excess cancer risk of 587.29 in one million for the geographic grid containing the Project site. DPM is included in this cancer risk along with all other TAC sources. DPM accounts for 68% of the total risk shown in MATES-IV. Cumulative Project generated TACs are limited to DPM.

In January 2018, as part of the overall effort to reduce air toxics exposure in the SCAB, SCAQMD began conducting the MATES V Program. MATES V field measurements were conducted at ten fixed sites (the same sites selected for MATES III and IV) to assess trends in air toxics levels. MATES V also included measurements of ultrafine particles (UFP) and black carbon (BC) concentrations, which can be compared to the UFP levels measured in MATES IV (31). The final report for the MATES V study was expected to be available in Fall 2019, however it is not yet available and no definitive date for its release has been provided by SCAQMD.

3 PROJECT AIR QUALITY IMPACT

3.1 INTRODUCTION

This study quantifies air quality emissions generated by construction and operation of the Project and addresses whether the Project conflicts with implementation of the SCAQMD's AQMP. The analysis of Project-generated air emissions determines whether the Project would result in a cumulatively considerable net increase of any criteria pollutant for which the SCAB is in non-attainment under an applicable NAAQS and CAAQS. Additionally, the Project has been evaluated to determine whether the Project would expose sensitive receptors to substantial pollutant concentrations and the impacts of odors. The significance of these potential impacts is described in the following section.

3.2 STANDARDS OF SIGNIFICANCE

The criteria used to determine the significance of potential Project-related air quality impacts are taken from the *CEQA Guidelines* (14 CCR §§15000, et seq.). Based on these thresholds, a project would result in a significant impact related to air quality if it would (1):

- Conflict with or obstruct implementation of the applicable air quality plan.
- Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in non-attainment under an applicable federal or state ambient air quality standard.
- Expose sensitive receptors to substantial pollutant concentrations.
- Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

The SCAQMD has also developed regional significance thresholds for other regulated pollutants, as summarized at Table 3-1 (32). The SCAQMD's *CEQA Air Quality Significance Thresholds* (April 2019) indicate that any projects in the SCAB with daily emissions that exceed any of the indicated thresholds should be considered as having an individually and cumulatively significant air quality impact.

TABLE 3-1: MAXIMUM DAILY REGIONAL EMISSIONS THRESHOLDS

Pollutant	Regional Construction Threshold	Regional Operational Thresholds
NO _x	100 lbs/day	55 lbs/day
VOC	75 lbs/day	55 lbs/day
PM ₁₀	150 lbs/day	150 lbs/day
PM _{2.5}	55 lbs/day	55 lbs/day
SO _x	150 lbs/day	150 lbs/day
CO	550 lbs/day	550 lbs/day
Pb	3 lbs/day	3 lbs/day

lbs/day = Pounds Per Day

3.3 MODELS EMPLOYED TO ANALYZE AIR QUALITY

3.3.1 CALIFORNIA EMISSIONS ESTIMATOR MODEL (CALEEMOD)

Land uses such as the Project affect air quality through construction-source and operational-source emissions.

On October 17, 2017, the SCAQMD in conjunction with the California Air Pollution Control Officers Association (CAPCOA) and other California air districts, released the latest version of the CalEEMod Version 2016.3.2. The purpose of this model is to calculate construction-source and operational-source criteria pollutant (VOCs, NO_x, SO_x, CO, PM₁₀, and PM_{2.5}) and GHG emissions from direct and indirect sources; and quantify applicable air quality and GHG reductions achieved from MMs (33). Accordingly, the latest version of CalEEMod has been used for this Project to determine construction and operational air quality emissions. Output from the model runs for both construction and operational activity are provided in Appendices 3.1 through 3.3.

3.3.2 EMISSION FACTORS MODEL

On August 19, 2019, the EPA approved the 2017 version of the EMISSIONS FACTOR model (EMFAC) web database for use in SIP and transportation conformity analyses. EMFAC2017 is a mathematical model that was developed to calculate emission rates, fuel consumption, VMT from motor vehicles that operate on highways, freeways, and local roads in California and is commonly used by the CARB to project changes in future emissions from on-road mobile sources (34). This AQIA utilizes summer, winter, and annual EMFAC2017 emission factors in order to derive vehicle emissions associated with Project operational activities, which vary by season.

Because the EMFAC2017 emission rates are associated with vehicle fuel types while CalEEMod vehicle emission factors are aggregated to include all fuel types for each individual vehicle class, the EMFAC2017 emission rates for different fuel types of a vehicle class are averaged by activity or by population and activity to derive CalEEMod emission factors. The equations applied to obtain CalEEMod vehicle emission factors for each emission type are detailed in CalEEMod User's Guide *Appendix A: Calculation Details for CalEEMod* (35).

3.4 CONSTRUCTION EMISSIONS

3.4.1 CONSTRUCTION ACTIVITIES

Construction activities associated with the Project will result in emissions of VOCs, NO_x, SO_x, CO, PM₁₀, and PM_{2.5}. Construction related emissions are expected from the following construction activities:

- Site Preparation
- Grading
- Building Construction
- Paving
- Architectural Coating

GRADING ACTIVITIES

Dust is typically a major concern during grading activities. Because such emissions are not amenable to collection and discharge through a controlled source, they are called “fugitive emissions”. Fugitive dust emissions rates vary as a function of many parameters (soil silt, soil moisture, wind speed, area disturbed, number of vehicles, depth of disturbance or excavation, etc.). CalEEMod was utilized to calculate fugitive dust emissions resulting from this phase of activity. This analysis assumes that earthwork activities are expected to balance on site and no import or export of soils would be required.

CONSTRUCTION WORKER VEHICLE TRIPS

Construction emissions for construction worker vehicles traveling to and from the Project site, as well as vendor trips (construction materials delivered to the Project site) were estimated based on information from CalEEMod model defaults.

3.4.2 CONSTRUCTION DURATION

Construction is expected to commence in October 2021 and will last through June 2022. The construction schedule utilized in the analysis, shown in Table 3-2, represents a “worst-case” analysis scenario should construction occur any time after the respective dates since emission factors for construction decrease as time passes and the analysis year increases due to emission regulations becoming more stringent.³ The duration of construction activity and associated equipment represents a reasonable approximation of the expected construction fleet as required per *CEQA Guidelines* (1). The duration of construction activity was based on the 2022 opening year.

TABLE 3-2: CONSTRUCTION DURATION

Phase Name	Start Date	End Date	Days
Site Preparation	10/04/2021	10/15/2021	10
Grading	10/16/2021	11/26/2021	30
Building Construction	11/27/2021	06/24/2022	150
Paving	05/28/2022	06/24/2022	20
Architectural Coating	05/01/2022	06/24/2022	40

Source: Construction activity based the 2022 opening year.

3.4.3 CONSTRUCTION EQUIPMENT

Consistent with industry standards and typical construction practices, each piece of equipment listed in Table 3-3 will operate up to a total of eight (8) hours per day, or more than two-thirds of the period during which construction activities are allowed pursuant to the code. It should be

³ As shown in the CalEEMod User’s Guide Version 2016.3.2, Section 4.3 “OFFROAD Equipment” as the analysis year increases, emission factors for the same equipment pieces decrease due to the natural turnover of older equipment being replaced by newer less polluting equipment and new regulatory requirements.

noted that most pieces of equipment would likely operate for fewer hours per day. A summary of construction equipment assumptions by phase is provided at Table 3-3.

TABLE 3-3: CONSTRUCTION EQUIPMENT ASSUMPTIONS

Phase Name	Equipment ^{A,B}	Amount	Hours Per Day
Site Preparation	Crawler Tractors	4	8
	Rubber Tired Dozers	3	8
	Water Trucks	1	4
Grading	Crawler Tractors	2	8
	Excavators	2	8
	Graders	1	8
	Rubber Tired Dozers	1	8
	Scrapers	2	8
	Water Trucks	1	4
Building Construction	Cranes	1	8
	Forklifts	3	8
	Generator Sets	1	8
	Tractors/Loaders/Backhoes	3	8
	Welders	1	8
	Water Trucks	1	4
Paving	Pavers	2	8
	Paving Equipment	2	8
	Rollers	2	8
	Water Trucks	1	4
Architectural Coating	Air Compressors	1	8

^A In order to account for fugitive dust emissions associated with Site Preparation and Grading activities, Crawler Tractors were used in lieu of Tractors/Loaders/Backhoes.

^B As Water Trucks are driven on-road, emissions associated with the operations of Water Trucks have been modeled as additional trips (two 2-way trips per Water Truck).

3.4.4 CONSTRUCTION EMISSIONS SUMMARY

IMPACTS WITHOUT MITIGATION

CalEEMod calculates maximum daily emissions for summer and winter periods. As such, the estimated maximum daily construction emissions without mitigation for both summer and winter periods are summarized on Table 3-4. Detailed construction model outputs are presented in Appendix 3.1. Under the assumed scenarios, emissions resulting from the Project construction would not exceed criteria pollutant thresholds established by the SCAQMD for emissions of any criteria pollutant.

TABLE 3-4: PROJECT CONSTRUCTION EMISSIONS SUMMARY – WITHOUT MITIGATION

Year	Emissions (lbs/day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Summer						
2021	5.43	61.02	32.00	0.10	14.04	6.81
2022	54.69	42.10	50.18	0.13	6.92	2.92
Winter						
2021	5.43	61.02	31.86	0.09	14.04	6.81
2022	54.68	42.02	47.88	0.13	6.39	2.92
Maximum Daily Emissions	54.69	61.02	50.18	0.13	14.04	6.81
SCAQMD Regional Threshold	75	100	550	150	150	55
Threshold Exceeded?	NO	NO	NO	NO	NO	NO

Source: CalEEMod unmitigated regional construction-source emissions are presented in Appendix 3.1.

3.5 OPERATIONAL EMISSIONS

Operational activities associated with the Project will result in emissions of VOCs, NO_x, SO_x, CO, PM₁₀, and PM_{2.5}. Operational emissions would be expected from the following primary sources:

- Area Source Emissions
- Energy Source Emissions
- Mobile Source Emissions
- On-Site Cargo Handling Equipment Emissions

3.5.1 AREA SOURCE EMISSIONS

ARCHITECTURAL COATINGS

Over a period of time the buildings that are part of this Project will require maintenance and will therefore produce emissions resulting from the evaporation of solvents contained in paints, varnishes, primers, and other surface coatings. The emissions associated with architectural coatings were calculated using CalEEMod.

CONSUMER PRODUCTS

Consumer products include, but are not limited to detergents, cleaning compounds, polishes, personal care products, and lawn and garden products. Many of these products contain organic compounds which when released in the atmosphere can react to form ozone and other photochemically reactive pollutants. The emissions associated with use of consumer products were calculated based on defaults provided within CalEEMod.

LANDSCAPE MAINTENANCE EQUIPMENT

Landscape maintenance equipment would generate emissions from fuel combustion and evaporation of unburned fuel. Equipment in this category would include lawnmowers, shredders/grinders, blowers, trimmers, chain saws, and hedge trimmers used to maintain the landscaping of the Project. The emissions associated with landscape maintenance equipment were calculated based on assumptions provided in CalEEMod.

3.5.2 ENERGY SOURCE EMISSIONS

COMBUSTION EMISSIONS ASSOCIATED WITH NATURAL GAS AND ELECTRICITY

Criteria pollutant emissions are emitted through the generation of electricity and consumption of natural gas.

When combustion of natural gas occurs within a building, the building is considered a direct emission source and CalEEMod will calculate emissions of all criteria pollutants (35). For purposes of analysis, the emissions associated with natural gas use were calculated using CalEEMod.

CalEEMod also calculates criteria pollutants from generation of electricity associated with a building. It should be noted that when electricity is used in buildings, the electricity generation typically takes place offsite (i.e. power plants). Because power plants are existing stationary sources, criteria pollutant emissions are generally associated with the power plants and not the individual buildings or electricity users (35). Since electricity will be provided to the Project by Southern California Edison, Project-related electricity generation is considered to take place offsite and therefore criteria pollutant emissions are not accounted for.

TITLE 24 ENERGY EFFICIENCY STANDARDS

California's Energy Efficiency Standards for Residential and Nonresidential Buildings was first adopted in 1978 in response to a legislative mandate to reduce California's energy consumption. The standards are updated periodically to allow consideration and possible incorporation of new energy efficient technologies and methods. Energy efficient buildings require less electricity. The 2019 version of Title 24 was adopted by the CEC and became effective on January 1, 2020. The CEC anticipates that nonresidential buildings will use approximately 30% less energy compared to the prior code (36). The CalEEMod defaults for Title 24 – Electricity and Lighting Energy were reduced by 30% in order to reflect consistency with the 2019 Title 24 standard.

3.5.3 MOBILE SOURCE EMISSIONS

The Project related operational air quality emissions derive primarily from vehicle trips generated by the Project, including employee and driver trips to and from the site and truck trips associated with the proposed uses. Trip characteristics available from the *Alessandro Warehouse Traffic Analysis* (TA) report were utilized in this analysis. Per the TA, the Project would generate a total of approximately 742 two-way vehicular trips per day (371 inbound and 371 outbound), including 224 two-way truck trips per day (112 inbound and 112 outbound) (37).

3.5.3.1 APPROACH FOR ESTIMATE OF MOBILE SOURCE EMISSIONS

Two separate model runs were utilized to accurately analyze emissions resulting from passenger car and truck operations.

PASSENGER CAR

For purposes of analysis, the CalEEMod default trip length of 16.6 miles was utilized along with an assumption of 100% primary trips. It is important to note that although the TA does not breakdown passenger cars by type, this analysis assumes that passenger cars include Light-Duty-Auto vehicles (LDA), Light-Duty-Trucks (LDT1⁴ & LDT2⁵), and Medium-Duty-Vehicles (MDV) vehicle types. In order to account for emissions generated by employees, the fleet mix presented in Table 3-5 was utilized in this analysis. Additional details on the use of the applicable fleet mix can be found in the footnote to Table 3-5.

TABLE 3-5: PASSENGER CAR FLEET MIX⁶

Land Use	Vehicle Type	%
Building 1		
Warehouse/ High-Cube Cold Storage Warehouse	LDA	61.73
	LDT1	4.17
	LDT2	21.05
	MDV	13.05
Building 2		
Warehouse/ High-Cube Cold Storage Warehouse	LDA	61.73
	LDT1	4.17
	LDT2	21.05
	MDV	13.05

TRUCKS

The second run analyzed truck emissions, incorporated the SCAQMD recommended truck trip length of 40 miles⁷ and an assumption of 100% primary trips. In order to be consistent with the TA, trucks are broken down by truck type. The trucks are comprised of 2-axle/Light-Heavy-Duty Trucks (LHDT), 3-axle/Medium-Heavy-Duty Trucks (MHDT), and 4+-axle/Heavy-Heavy-Duty Trucks (HHDT). In order to account for emissions generated by trucks, the fleet mix presented in

⁴ Vehicles under the LDT1 category have a gross vehicle weight rating (GVWR) of less than 6,000 lbs. and equivalent test weight (ETW) of less than or equal to 3,750 lbs.

⁵ Vehicles under the LDT2 category have a GVWR of less than 6,000 lbs. and ETW between 3,751 lbs. and 5,750 lbs.

⁶ The Project-specific employee and driver fleet mix used in this analysis is based on a proportional split utilizing the CalEEMod default percentage assigned to LDA, LDT1, LDT2, and MDV vehicle types.

⁷ The average trip length for heavy trucks were based on the SCAQMD documents for the implementation of the Facility Based Mobile Source Measures (FBMSMs) adopted in the 2016 AQMP. SCAQMD's "Preliminary Warehouse Emission Calculations" cites 39.9-mile trip length for heavy-heavy trucks (41). As a conservative measure, a trip length of 40 miles has been utilized for all trucks for the purpose of this analysis.

Table 3-6 was utilized in this analysis. Additional details on the use of the applicable fleet mix can be found in the footnote to Table 3-6.

TABLE 3-6: TRUCK FLEET MIX⁸

Land Use	Vehicle Type	%
Building 1		
Warehouse	LHDT	16.32
	MHDT	20.41
	HHDT	63.27
High-Cube Cold Storage Warehouse	LHDT	35.30
	MHDT	11.76
	HHDT	52.94
Building 2		
Warehouse	LHDT	16.67
	MHDT	22.22
	HHDT	61.11
High-Cube Cold Storage Warehouse	LHDT	36.36
	MHDT	9.09
	HHDT	54.55

FUGITIVE DUST RELATED TO VEHICULAR TRAVEL

Vehicles traveling on paved roads would be a source of fugitive emissions due to the generation of road dust inclusive of break and tire wear particulates. The emissions estimates for travel on paved roads were calculated using CalEEMod.

3.5.4 ON-SITE CARGO HANDLING EQUIPMENT EMISSIONS

It is common for industrial warehouse buildings to require cargo handling equipment to move empty containers and empty chassis to and from the various pieces of cargo handling equipment that receive and distribute containers. The most common type of cargo handling equipment is the yard truck which is designed for moving cargo containers. Yard trucks are also known as yard goats, utility tractors (UTRs), hustlers, yard hostlers, and yard tractors. The cargo handling equipment is assumed to have a horsepower (hp) range of approximately 175 hp to 200 hp. Based on the latest available information from SCAQMD (38); for example, high-cube warehouse projects typically have 3.6 yard trucks per million sf of building space. For this particular Project, based on the maximum square footage of each building space, on-site modeled operational equipment includes up to two (2) 200 hp, compressed natural gas or gasoline-powered yard tractors operating at 4 hours a day for 365 days of the year.

⁸ Project-specific truck fleet mix is based on the number of trips generated by each truck type (LHDT, MHDT, HHDT) relative to the total number of truck trips generated by the Project.

3.5.5 OPERATIONAL EMISSIONS SUMMARY

IMPACTS WITHOUT MITIGATION

As previously stated, CalEEMod utilizes summer and winter EMFAC2017 emission factors in order to derive vehicle emissions associated with Project operational activities, which vary by season. The estimated operational-source emissions are summarized on Tables 3-7. Detailed operation model outputs for the Project are presented in Appendices 3.2 through 3.3. As shown on Table 3-7, the Project's daily regional emissions from on-going operations will not exceed any of the thresholds of significance.

TABLE 3-7: SUMMARY OF PEAK OPERATIONAL EMISSIONS– WITHOUT MITIGATION

Source	Emissions (lbs/day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Summer						
Area Source	9.02	7.20E-04	0.08	0.00	2.80E-04	2.80E-04

3.6 LOCALIZED SIGNIFICANCE

BACKGROUND ON LOCALIZED SIGNIFICANCE THRESHOLD (LST) DEVELOPMENT

The analysis makes use of methodology included in the SCAQMD *Final Localized Significance Threshold Methodology* (LST Methodology) (39). The SCAQMD has established that impacts to air quality are significant if there is a potential to contribute or cause localized exceedances of the federal and/or state ambient air quality standards (NAAQS/CAAQS). Collectively, these are referred to as Localized Significance Thresholds (LSTs).

The SCAQMD established LSTs in response to the SCAQMD Governing Board's Environmental Justice Initiative I-4⁹. LSTs represent the maximum emissions from a project that will not cause or contribute to an exceedance of the most stringent applicable federal or state ambient air quality standard at the nearest residence or sensitive receptor. The SCAQMD states that lead agencies can use the LSTs as another indicator of significance in its air quality impact analyses.

LSTs were developed in response to environmental justice and health concerns raised by the public regarding exposure of individuals to criteria pollutants in local communities. To address the issue of localized significance, the SCAQMD adopted LSTs that show whether a project would cause or contribute to localized air quality impacts and thereby cause or contribute to potential localized adverse health effects. The analysis makes use of methodology included in the LST Methodology (40).

APPLICABILITY OF LSTs FOR THE PROJECT

For this Project, the appropriate SRA for the LST analysis is the SCAQMD Perris Valley (SRA 24). LSTs apply to CO, NO₂, PM₁₀, and PM_{2.5}. The SCAQMD produced look-up tables for projects less than or equal to 5 acres in size.

In order to determine the appropriate methodology for determining localized impacts that could occur as a result of Project-related construction, the following process is undertaken:

- Identify the maximum daily on-site emissions that will occur during construction activity:
 - The maximum daily on-site emissions could be based on information provided by the Project Applicant; or
 - The SCAQMD's *Fact Sheet for Applying CalEEMod to Localized Significance Thresholds* and *CalEEMod User's Guide Appendix A: Calculation Details for CalEEMod* can be used to determine the maximum site acreage that is actively disturbed based on the construction equipment fleet and equipment hours as estimated in CalEEMod (41) (35).
- If the total acreage disturbed is less than or equal to 5 acres per day, then the SCAQMD's screening look-up tables are utilized to determine if a Project has the potential to result in a significant impact. The look-up tables establish a maximum daily emissions threshold in lbs/day that can be compared to CalEEMod outputs.

⁹ The purpose of SCAQMD's Environmental Justice program is to ensure that everyone has the right to equal protection from air pollution and fair access to the decision-making process that works to improve the quality of air within their communities. Further, the SCAQMD defines Environmental Justice as "...equitable environmental policymaking and enforcement to protect the health of all residents, regardless of age, culture, ethnicity, gender, race, socioeconomic status, or geographic location, from the health effects of air pollution."

- If the total acreage disturbed is greater than 5 acres per day, then LST impacts may still be conservatively evaluated using the LST look-up tables for a 5-acre disturbance area. Use of the 5-acre disturbance area thresholds can be used to show that even if the daily emissions from all construction activity were emitted within a 5-acre area, and therefore concentrated over a smaller area which would result in greater site adjacent concentrations, the impacts would still be less than significant if the applicable 5-acre thresholds are utilized.
- The LST Methodology presents mass emission rates for each SRA, project sizes of 1, 2, and 5 acres, and nearest receptor distances of 25, 50, 100, 200, and 500 meters. For project sizes between the values given, or with receptors at distances between the given receptors, the methodology uses linear interpolation to determine the thresholds.

EMISSIONS CONSIDERED

SCAQMD's LST Methodology clearly states that "off-site mobile emissions from the Project should not be included in the emissions compared to LSTs (39)." Therefore, for purposes of the construction LST analysis, only emissions included in the CalEEMod "on-site" emissions outputs were considered.

MAXIMUM DAILY DISTURBED-ACREAGE

As a conservative measure, it is assumed that a maximum of 10 acres per day can be actively disturbed. As such, the "Total Acres Graded" field in CalEEMod has been revised to 100 acres for site preparation (10 acres disturbed per day x 10 working days) and 300 acres for grading activities (10 acres disturbed per day x 30 working days)¹⁰.

SENSITIVE RECEPTORS

As previously stated, LSTs represent the maximum emissions from a project that will not cause or contribute to an exceedance of the most stringent applicable NAAQS and CAAQS at the nearest residence or sensitive receptor. Receptor locations are off-site locations where individuals may be exposed to emissions from Project activities.

RESIDENTIAL RECEPTORS

Some people are especially sensitive to air pollution and are given special consideration when evaluating air quality impacts from projects. These groups of people include children, the elderly, individuals with pre-existing respiratory or cardiovascular illness, and athletes and others who engage in frequent exercise. Structures that house these persons or places where they gather to exercise are defined as "sensitive receptors". These structures typically include residences, hotels, hospitals, etc. as they are also known to be locations where an individual can remain for 24 hours. Consistent with the LST Methodology, the nearest land use where an individual could remain for 24 hours to the Project site (in this case the nearest residential land use) has been used to determine construction and operational air quality impacts for emissions of PM₁₀ and PM_{2.5}, since PM₁₀ and PM_{2.5} thresholds are based on a 24 hour averaging time.

¹⁰ CalEEMod does not provide a "Total Acres Graded" field for Building Construction, Paving, or Architectural Coating activities.

NON-RESIDENTIAL RECEPTORS

As per the LST Methodology, commercial and industrial facilities are not included in the definition of sensitive receptor because employees and patrons do not typically remain onsite for a full 24 hours but are typically onsite for 8 hours or less. The LST Methodology explicitly states that “LSTs based on shorter averaging periods, such as the NO₂ and CO LSTs, could also be applied to receptors such as industrial or commercial facilities since it is reasonable to assume that a worker at these sites could be present for periods of one to eight hours (39).” For purposes of analysis, if an industrial/commercial use is located at a closer distance to the Project site than the nearest residential use, the nearest industrial/commercial use will be utilized to determine construction and operational LST air impacts for emissions of NO₂ and CO an individual could be present at these sites for periods of 1 to 8 hours.

PROJECT-RELATED SENSITIVE RECEPTORS

Receptors in the Project study area are described below and shown on Exhibit 3-A. Localized air quality impacts were evaluated at sensitive receptor land uses nearest the Project site. Consistent with the *Compass Danbe Centerpointe Noise Impact Analysis*, prepared by Urban Crossroads, Inc., all distances are measured from the Project site boundary to the outdoor living areas (e.g., backyards) or at the building façade, whichever is closer to the Project site.

- R1: Location R1 represents the existing residence at 13994 Chagall Court, approximately 152 feet north of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receptor R1 is placed at the residential building façade.
- R2: Location R2 represents the Motel 6 at 23581 Alessandro Blvd, approximately 1,023 feet east of the Project site. Receptor R2 is placed at the building façade.
- R3: Location R3 represents the Moreno Valley City Hall at 14177 Frederick Street, approximately 744 feet west of the Project site. Receptor R3 is placed at the building façade.
- R4: Location R4 represents the existing residence at 13979 Frederick Street, approximately 784 feet northwest of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receptor R4 is placed at the residential building façade.
- R5: Location R5 represents the existing residences at 13933 Chagall Court, approximately 217 feet north of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receptor R5 is placed at the residential building façade.

The SCAQMD recommends that the nearest sensitive receptor be considered when determining the Project’s potential to cause an individual a cumulatively significant impact. The nearest land use where an individual could remain for 24 hours to the Project site has been used to determine localized construction and operational air quality impacts for emissions of PM₁₀ and PM_{2.5} (since PM₁₀ and PM_{2.5} thresholds are based on a 24 hour averaging time). The nearest receptor used for evaluation of localized impacts of PM₁₀ and PM_{2.5} is represented by location R1 which represents the existing residence at 13994 Chagall Court, approximately 152 feet/ 46 meters north of the Project site.

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

As previously stated, and consistent with *LST Methodology*, the nearest industrial/commercial use to the Project site is used to determine construction and operational LST air impacts for emissions of NO_x and CO as the averaging periods for these pollutants are shorter (8 hours or less) and it is reasonable to assumed that an individual could be present at these sites for periods of one to 8 hours. It should be noted that the existing residence (R1) is located at a closer distance than the nearest industrial/commercial use. As such, same receptor will be used for evaluation of localized NO_x and CO.

3.7 CONSTRUCTION-SOURCE EMISSIONS LST ANALYSIS

3.7.1 LOCALIZED THRESHOLDS FOR CONSTRUCTION ACTIVITY

As previously stated, approximately 10 acres can be disturbed per day. For the purposes of this analysis, and as a conservative measure, the SCAQMD look-up tables of 5 acres are used to determine localized significance thresholds. The LST lookup tables can be used as a conservative measure to show that even if the daily emissions from all project construction were emitted on a 5-acre site (and therefore concentrated over a smaller area which would result in greater site adjacent concentrations), if the impacts are less than significant, then a more detailed evaluation is not necessary. The thresholds presented in Table 3-8 were calculated by interpolating the threshold values for a 5-acre site and a 46-meter distance for localized PM₁₀, PM_{2.5}, NO_x, and CO evaluation.

TABLE 3-8: MAXIMUM DAILY LOCALIZED EMISSIONS THRESHOLDS

Pollutant	Construction Localized Thresholds
NO _x	297 lbs/day
CO	2,082 lbs/day
PM ₁₀	36 lbs/day
PM _{2.5}	10 lbs/day

Source: Localized Thresholds presented in this table are based on the SCAQMD Final LST Methodology, July 2008

3.7.2 LOCALIZED CONSTRUCTION-SOURCE EMISSIONS

IMPACTS WITHOUT MITIGATION

In order to estimate on-site emissions from each building area, the total on-site construction emissions were weighed based on the ratio of each building area relative to the entire Project site. Table 3-9 identifies the localized impacts at the nearest receptor location in the vicinity of the Project. Without mitigation, localized construction emissions would not exceed the applicable SCAQMD LSTs for emissions of any criteria pollutant.

TABLE 3-9: PROJECT LOCALIZED CONSTRUCTION EMISSIONS – WITHOUT MITIGATION

On-Site Emissions	Emissions (lbs/day)			
	NO _x	CO	PM ₁₀	PM _{2.5}
Site Preparation				
Maximum Daily Emissions	60.79	21.85	13.83	6.75
SCAQMD Localized Threshold	297	2,082	36	10
Threshold Exceeded?	NO	NO	NO	NO
Grading				
Maximum Daily Emissions	56.54	31.23	8.77	3.84
SCAQMD Localized Threshold	297	2,082	36	10

3.8 LOCALIZED SIGNIFICANCE – LONG-TERM OPERATIONAL ACTIVITY

The Project is located on an approximately 17.65-net acre parcel. As noted previously, the LST Methodology provides look-up tables for sites with an area with daily disturbance of 5 acres or less. For projects that exceed 5 acres, the 5-acre LST look-up tables can be used as a screening tool to determine whether pollutants require additional detailed analysis. This approach is conservative as it assumes that all on-site emissions associated with the project would occur within a concentrated 5-acre area. This screening method would therefore over-predict potential localized impacts, because by assuming that on-site operational activities are occurring over a smaller area, the resulting concentrations of air pollutants are more highly concentrated once they reach the smaller site boundary than they would be for activities if they were spread out

over a larger surface area. On a larger site, the same amount of air pollutants generated would disperse over a larger surface area and would result in a lower concentration once emissions reach the project-site boundary. As such, LSTs for a 5-acre site during operations are used as a screening tool to determine if further detailed analysis is required.

The LST analysis generally includes on-site sources (area, energy, mobile, and on-site cargo handling equipment are previously discussed in Section 3.5 of this report). However, it should be noted that the CalEEMod outputs do not separate on-site and off-site emissions from mobile sources. In an effort to establish a maximum potential impact scenario for analytic purposes, the emissions shown on Table 3-11 represent all on-site Project-related stationary (area) sources and 5% of the Project-related mobile sources. Considering that the trip length used in CalEEMod for the Project is approximately 16.60 miles for passenger cars and 40.00 miles for all trucks, 5% of this total would represent an on-site travel distance of approximately 0.83 miles/4,382.40 feet for passenger cars and 2.00 miles/10,560.00 feet for trucks.

It should be noted that the longest on-site distance, is less than 0.5 mile for both trucks and passenger cars (entry into Driveway 1 and exit out of Driveway 3). As such, the 5% assumption is conservative and would tend to overstate the actual impact because it is not likely that a passenger car would drive 0.83 miles on the site or that a truck would drive 2.00 miles on the site. Modeling based on these assumptions demonstrates that even within broad encompassing parameters, Project operational-source emissions would not exceed applicable LSTs.

3.8.1 LOCALIZED THRESHOLDS FOR OPERATIONAL ACTIVITY

As previously stated, LSTs for a 5-acre site during operations are used as a screening tool to determine if further detailed analysis is required. As such, the threshold values presented in Table 3-10, were calculated by interpolating the threshold values for a 5-acre site and a 46-meter distance for localized PM₁₀, PM_{2.5}, NO_x, and CO evaluation.

TABLE 3-10: MAXIMUM DAILY LOCALIZED OPERATIONAL EMISSIONS THRESHOLDS

Pollutant	Operational Localized Thresholds
NO _x	297 lbs/day
CO	2,082 lbs/day
PM ₁₀	9 lbs/day
PM _{2.5}	3 lbs/day

Source: Localized Thresholds presented in this table are based on the SCAQMD Final LST Methodology, July 2008

3.8.2 OPERATIONAL-SOURCE LOCALIZED EMISSIONS

IMPACTS WITHOUT MITIGATION

As shown on Table 3-11 operational emissions will not exceed the LST thresholds for the nearest sensitive receptor. Therefore, the Project will have a less than significant localized impact during operational activity.

TABLE 3-11: LOCALIZED SIGNIFICANCE SUMMARY OF OPERATIONS – WITHOUT MITIGATION

Operational Activity	Emissions (lbs/day)			
	NO _x	CO	PM ₁₀	PM _{2.5}
Maximum Daily Emissions	6.69	4.48	0.97	0.44
SCAQMD Localized Threshold	297	2,082	9	3
Threshold Exceeded?	NO	NO	NO	NO

Source: CalEEMod localized operational-source emissions are presented in Appendices 3.2 through 3.3.

3.9 CO “HOT SPOT” ANALYSIS

As discussed below, the Project would not result in potentially adverse CO concentrations or “hot spots.” Further, detailed modeling of Project-specific carbon monoxide (CO) “hot spots” is not needed to reach this conclusion.

An adverse CO concentration, known as a “hot spot”, would occur if an exceedance of the state one-hour standard of 20 ppm or the eight-hour standard of 9 ppm were to occur. At the time of the 1993 Handbook, the SCAB was designated nonattainment under the California AAQS and National AAQS for CO (42).

It has long been recognized that CO hotspots are caused by vehicular emissions, primarily when idling at congested intersections. In response, vehicle emissions standards have become increasingly stringent in the last twenty years. Currently, the allowable CO emissions standard in California is a maximum of 3.4 grams/mile for passenger cars (there are requirements for certain vehicles that are more stringent). With the turnover of older vehicles, introduction of cleaner fuels, and implementation of increasingly sophisticated and efficient emissions control technologies, CO concentration in the SCAB is now designated as attainment, as previously noted in Table 2-3.

To establish a more accurate record of baseline CO concentrations affecting the SCAB, a CO “hot spot” analysis was conducted in 2003 for four busy intersections in Los Angeles at the peak morning and afternoon time periods. This “hot spot” analysis did not predict any violation of CO standards, as shown on Table 3-12.

TABLE 3-12: CO MODEL RESULTS

Intersection Location	CO Concentrations (ppm)		
	Morning 1-hour	Afternoon 1-hour	8-hour
Wilshire Boulevard/Veteran Avenue	4.6	3.5	4.2
Sunset Boulevard/Highland Avenue	4	4.5	3.9
La Cienega Boulevard/Century Boulevard	3.7	3.1	5.8
Long Beach Boulevard/Imperial Highway	3	3.1	9.3

Source: 2003 AQMP, Appendix V: Modeling and Attainment Demonstrations

Notes: Federal 1-hour standard is 35 ppm and the deferral 8-hour standard is 9.0 ppm.

Based on the SCAQMD's 2003 AQMP and the 1992 Federal Attainment Plan for Carbon Monoxide (1992 CO Plan), peak CO concentrations in the SCAB were a result of unusual meteorological and topographical conditions and not a result of traffic volumes and congestion at a particular intersection. As evidence of this, for example, 9.3 ppm 8-hour CO concentration measured at the Long Beach Boulevard and Imperial Highway intersection (highest CO generating intersection within the “hot spot” analysis), only 0.7 ppm was attributable to the traffic volumes and congestion at this intersection; the remaining 8.6 ppm were due to the ambient air measurements at the time the 2003 AQMP was prepared (43). In contrast, the ambient 8-hour CO concentration within the Project study area is estimated at 1.4 ppm—1.6 ppm. Therefore, even if the traffic volumes for the Project were double or even triple of the traffic volumes generated at the Long Beach Boulevard and Imperial Highway intersection, coupled with the on-going improvements in ambient air quality, the Project would not be capable of resulting in a CO “hot spot” at any study area intersections. Similar considerations are also employed by other Air Districts when evaluating potential CO concentration impacts. More specifically, the Bay Area Air Quality Management District (BAAQMD) concludes that under existing and future vehicle emission rates, a given project would have to increase traffic volumes at a single intersection by more than 44,000 vehicles per hour (vph) —or 24,000 vph where vertical and/or horizontal air does not mix—in order to generate a significant CO impact (44).

The 2003 AQMP, and as previously shown in Table 3-12, estimated that the 1-hour concentration for this intersection was 4.6 ppm; this indicates that, should the daily traffic volume increase four times to 400,000 vehicles per day, CO concentrations ($4.6 \text{ ppm} \times 4 = 18.4 \text{ ppm}$) would still not likely exceed the most stringent 1-hour CO standard (20.0 ppm)¹¹. As shown in TA on Exhibit 5-1, EAP¹² (2022) Traffic Volumes (In PCE¹³), the highest trips on a segment of is 43,500 vph on east Graham Street and Alessandro Boulevard (37).

Traffic volumes generating the CO concentrations for the “hot spot” analysis is shown on Table 3-13. The busiest intersection evaluated for traffic volumes was at La Cienega Boulevard and Century Boulevard, which has an traffic volume of approximately 8,674 vph (45). As shown on Table 3-14, the highest trips on a segment of road for the proposed Project is 4,070 vph on Frederick Street and Alessandro Boulevard. As such, Project-related traffic volumes are less than the traffic volumes identified in the 2003 AQMP. The Project considered herein would not produce the volume of traffic required to generate a CO “hot spot” either in the context of the 2003 Los Angeles hot spot study or based on representative BAAQMD CO threshold considerations. Therefore, CO “hot spots” are not an environmental impact of concern for the Project. Localized air quality impacts related to mobile-source emissions would therefore be less than significant.

¹¹ Based on the ratio of the CO standard (20.0 ppm) and the modeled value (4.6 ppm).

3.10 AIR QUALITY MANAGEMENT PLANNING

The Project site is located within the SCAB, which is characterized by relatively poor air quality. The SCAQMD has jurisdiction over an approximately 10,743 square-mile area consisting of the four-county Basin and the Los Angeles County and Riverside County portions of what use to be referred to as the Southeast Desert Air Basin. In these areas, the SCAQMD is principally responsible for air pollution control, and works directly with the Southern California Association of Governments (SCAG), county transportation commissions, local governments, as well as state and federal agencies to reduce emissions from stationary, mobile, and indirect sources to meet state and federal ambient air quality standards.

Currently, these state and federal air quality standards are exceeded in most parts of the SCAB. In response, the SCAQMD has adopted a series of AQMPs to meet the state and federal ambient air quality standards. AQMPs are updated regularly in order to more effectively reduce emissions, accommodate growth, and to minimize any negative fiscal impacts of air pollution control on the economy.

In March 2017, the AQMD released the Final 2016 AQMP. The 2016 AQMP continues to evaluate current integrated strategies and control measures to meet the NAAQS and explores new and innovative methods to reach its goals. Some of these approaches include utilizing incentive programs, recognizing existing co-benefit programs from other sectors, and developing a strategy with fair-share reductions at the federal, state, and local levels (46). Similar to the 2012 AQMP,

the 2016 AQMP incorporates scientific and technological information and planning assumptions, including the 2016-2040 RTP/SCS, a planning document that supports the integration of land use and transportation to help the region meet the federal Clean Air Act requirements (17). The Project's consistency with the AQMP will be determined using the 2016 AQMP as discussed below.

Criteria for determining consistency with the AQMP are defined in Chapter 12, Section 12.2 and Section 12.3 of the SCAQMD's CEQA Air Quality Handbook (1993) (47). These indicators are discussed below:

3.10.1 CONSISTENCY CRITERION No. 1

The proposed Project will not result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.

The violations that Consistency Criterion No. 1 refers to are the CAAQS and NAAQS. CAAQS and NAAQS violations would occur if regional or localized significance thresholds were exceeded.

Construction Impacts – Consistency Criterion 1

Consistency Criterion No. 1 refers to violations of the CAAQS and NAAQS. CAAQS and NAAQS violations would occur if LSTs or regional significance thresholds were exceeded. As evaluated, the Project's regional and localized construction-source emissions would not exceed applicable regional significance threshold and LST thresholds. As such, a less than significant impact is expected.

Operational Impacts – Consistency Criterion 1

As evaluated, and when taking into consideration existing emissions, the Project's operational emissions would not exceed the applicable regional significance thresholds and LST thresholds for operational activity. Therefore, the Project would not conflict with the AQMP according to this criterion.

On the basis of the preceding discussion, the Project is determined to be consistent with the first criterion.

3.10.2 CONSISTENCY CRITERION No. 2

The Project will not exceed the assumptions in the AQMP based on the years of Project build-out phase.

The 2016 AQMP demonstrates that the applicable ambient air quality standards can be achieved within the timeframes required under federal law. Growth projections from local general plans adopted by cities in the district are provided to the SCAG, which develops regional growth forecasts, which are then used to develop future air quality forecasts for the AQMP. Development consistent with the growth projections in City of Moreno Valley General Plan is considered to be consistent with the AQMP.

Construction Impacts – Consistency Criterion 2

Peak day emissions generated by construction activities are largely independent of land use assignments, but rather are a function of development scope and maximum area of disturbance. Irrespective of the site's land use designation, development of the site to its maximum potential would likely occur, with disturbance of the entire site occurring during construction activities.

Operational Impacts – Consistency Criterion 2

Per the City's General Plan, the Project site is designated for Commercial uses. The primary purpose of areas designated Commercial is to provide property for business purposes, including, but not limited to, retail stores, restaurants, banks, hotels, professional offices, personal services and repair services. The zoning regulations shall identify the particular uses permitted on each parcel of land, which could include compatible noncommercial uses (48).

The proposed Project will consist of 206,665 sf of warehousing (70% of total building sf) and 88,571 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 295,236 sf for Building 1 and 70,876 sf of warehousing (70% of total building sf) and 30,376 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 101,252 sf for Building 2. As such, even though the Project involves a GPA and ZC to change the land use designation to Light Industrial use. The proposed changes are consistent with the zones to the west, south and east of the subject site and adjacent properties. The amendment is in keeping with the uses surrounding the Project site. Furthermore, the Project, as evaluated herein would not exceed the regional or localized air quality significance thresholds.

On the basis of the preceding discussion, the Project is determined to be consistent with the second criterion

AQMP CONSISTENCY CONCLUSION

The Project would not have the potential to result in or cause NAAQS or CAAQS violations. Additionally, Project construction and operational-source emissions would not exceed the regional or localized significance thresholds. The Project is therefore considered to be consistent with the AQMP.

3.11 POTENTIAL IMPACTS TO SENSITIVE RECEPTORS

The potential impact of Project-generated air pollutant emissions at sensitive receptors has also been considered. Sensitive receptors can include uses such as long-term health care facilities, rehabilitation centers, and retirement homes. Residences, schools, playgrounds, childcare centers, and athletic facilities can also be considered as sensitive receptors.

Results of the LST analysis indicate that the Project will not exceed the SCAQMD localized significance thresholds during construction. Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations during Project construction.

Additionally, the Project will not exceed the SCAQMD localized significance thresholds during operational activity. Further Project traffic would not create or result in a CO "hotspot."

Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations as the result of Project operations.

3.11.1 FRIANT RANCH CASE

In December 2018, in the case of *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, the California Supreme Court held that an Environmental Impact Report's (EIR) air quality analysis must meaningfully connect the identified air quality impacts to the human health consequences of those impacts, or meaningfully explain why that analysis cannot be provided.

As discussed in briefs filed in the Friant Ranch case, correlating a project's criteria air pollutant emissions to specific health impacts is challenging. Health effects caused by criteria pollutant emissions are dependent on a variety of interrelated variables. In particular, ozone precursors (VOCs and NO_x) affect air quality on a regional scale. The SCAQMD, which has among the most sophisticated air quality modeling and health impact evaluation capability of any of the air districts in the State, and thus it is uniquely situated to express an opinion on how lead agencies should correlate air quality impacts with specific health outcomes noted that it may be "difficult to quantify health impacts for criteria pollutants." (49).

As noted in the *Brief*, the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) ties the difficulty of correlating the emission of criteria pollutants to health impacts to how ozone and particulate matter are formed, stating that "[b]ecause of the complexity of ozone formation, a specific tonnage amount of NO_x or VOCs emitted in a particular area does not equate to a particular concentration of ozone in that area." (50). Similarly, the tonnage of PM "emitted does not always equate to the local PM concentration because it can be transported long distances by wind," and "[s]econdary PM, like ozone, is formed via complex chemical reactions in the atmosphere between precursor chemicals such as sulfur dioxides (SO_x) and NO_x," meaning that "the tonnage of PM-forming precursor emissions in an area does not necessarily result in an equivalent concentration of secondary PM in that area." (50). The disconnect between the amount of precursor pollutants and the concentration of ozone or PM formed makes it difficult to determine potential health impacts, which are related to the concentration of ozone and PM experienced by the receptor rather than levels of NO_x, SO_x, and VOCs produced by a source.

Health effects related to ozone are therefore the product of emissions generated by numerous sources throughout a region. SCAQMD's *Brief of Amicus Curiae (Brief)* goes on to state that "it takes a large amount of additional precursor emissions (NO_x and VOCs) to cause a modeled increase in ambient ozone levels over an entire region,". The SCAQMD states that based on their own modeling in the SCAQMD's 2012 AQMP, a reduction of "NO_x by 432 tons per day (157,680 tons/year) and reducing VOC by 187 tons per day (68,255 tons/year) would reduce ozone levels at the SCAQMD's monitor site with the highest levels by only 9 parts per billion." As such, the SCAQMD concludes that it is not currently possible "to accurately quantify ozone-related health impacts caused by NO_x or VOC emissions from relatively small projects." (51).

Most local agencies, including the City of Moreno Valley, lack the data to do their own assessment of potential health impacts from criteria air pollutant emissions, as would be required to establish customized, locally-specific thresholds of significance based on potential health impacts from an

individual development project. The use of national or “generic” data to fill the gap of missing local data would not yield accurate results because such data does not capture local air patterns, local background conditions, or local population characteristics, all of which play a role in how a population experiences air pollution. Because it is impracticable to accurately isolate the exact cause of a human disease (for example, the role a particular air pollutant plays compared to the role of other allergens and genetics in cause asthma), the City has determined that existing scientific tools cannot accurately estimate health impacts of the Project’s air emissions without undue speculation. Instead, readers are directed to the Project’s air quality impact analysis above, which provides extensive information concerning the quantifiable and non-quantifiable health risks related to the Project’s construction and long-term operation.

Notwithstanding, this AQIA does evaluate the proposed Project’s localized impact to air quality for emissions of CO, NO_x, PM₁₀, and PM_{2.5} by comparing the proposed project’s on-site emissions to the SCAQMD’s applicable LST thresholds. The LST analysis above determined that the project would not result in emissions exceeding SCAQMD’s LSTs. Therefore, the proposed Project would not be expected to exceed the most stringent applicable federal or state ambient air quality standards for emissions of CO, NO_x, PM₁₀, and PM_{2.5}.

As the Project’s emissions will comply with federal, state, and local air quality standards, the proposed Project’s emissions are not sufficiently high enough to use a regional modeling program to correlate health effects on a basin-wide level, and would not provide a reliable indicator of health effects if modeled.

3.11.2 HEALTH RISK ASSESSMENT

A Health Risk Assessment (HRA) has been prepared by Urban Crossroads, Inc. under a separate cover. The results of the *Compass Danbe Centerpointe Mobile Source Health Risk Assessment* (Urban Crossroads, Inc. 2020) indicate that the proposed Project would not result in any significant health risk impacts from exposure to TACs resulting from the proposed Project.

3.12 ODORS

The potential for the proposed Project to generate objectionable odors has also been considered. Land uses generally associated with odor complaints include:

- Agricultural uses (livestock and farming)
- Wastewater treatment plants
- Food processing plants
- Chemical plants
- Composting operations
- Refineries
- Landfills
- Dairies
- Fiberglass molding facilities

The proposed Project does not contain land uses typically associated with emitting objectionable odors. Potential odor sources associated with the proposed Project may result from construction equipment exhaust and the application of asphalt and architectural coatings during construction activities and the temporary storage of typical solid waste (refuse) associated with the proposed Project's (long-term operational) uses. Standard construction requirements would minimize odor impacts from construction. The construction odor emissions would be temporary, short-term, and intermittent in nature and would cease upon completion of the respective phase of construction and is thus considered less than significant. It is expected that Project-generated refuse would be stored in covered containers and removed at regular intervals in compliance with the City's solid waste regulations. The proposed Project would also be required to comply with SCAQMD Rule 402 to prevent occurrences of public nuisances. Therefore, odors associated with the proposed Project construction and operations would be less than significant and no mitigation is required (52).

3.13 CUMULATIVE IMPACTS

The proposed Project site area is designated as an extreme non-attainment area for ozone, and a non-attainment area for PM₁₀, PM_{2.5}, and lead.

The AQMD has published a report on how to address cumulative impacts from air pollution: *White Paper on Potential Control Strategies to Address Cumulative Impacts from Air Pollution* (53). In this report the AQMD clearly states (Page D-3):

"...the AQMD uses the same significance thresholds for project specific and cumulative impacts for all environmental topics analyzed in an Environmental Assessment or EIR. The only case where the significance thresholds for project specific and cumulative impacts differ is the Hazard Index (HI) significance threshold for toxic air contaminant (TAC) emissions. The project specific (project increment) significance threshold is HI > 1.0 while the cumulative (facility-wide) is HI > 3.0. It should be noted that the HI is only one of three TAC emission significance thresholds considered (when applicable) in a CEQA analysis. The other two are the maximum individual cancer risk (MICR) and the cancer burden, both of which use the same significance thresholds (MICR of 10 in 1 million and cancer burden of 0.5) for project specific and cumulative impacts.

Projects that exceed the project-specific significance thresholds are considered by the SCAQMD to be cumulatively considerable. This is the reason project-specific and cumulative significance thresholds are the same. Conversely, projects that do not exceed the project-specific thresholds are generally not considered to be cumulatively significant."

Therefore, this analysis assumes that individual projects that do not generate operational or construction emissions that exceed the SCAQMD's recommended daily thresholds for project-specific impacts would also not cause a cumulatively considerable increase in emissions for those pollutants for which the Basin is in nonattainment, and, therefore, would not be considered to have a significant, adverse air quality impact. Alternatively, individual project-related

construction and operational emissions that exceed SCAQMD thresholds for project-specific impacts would be considered cumulatively considerable.

CONSTRUCTION IMPACTS

The Project-specific evaluation of emissions presented in the preceding analysis demonstrates that proposed Project construction-source air pollutant emissions would not result in exceedances of regional thresholds. Therefore, proposed Project construction-source emissions would be considered less than significant on a project-specific and cumulative basis.

OPERATIONAL IMPACTS

The Project-specific evaluation of emissions presented in the preceding analysis demonstrates that proposed Project operational-source air pollutant emissions would not result in exceedances of regional thresholds. Therefore, proposed Project operational-source emissions would be considered less than significant on a project-specific and cumulative basis.

STATE AND NATIONAL AMBIENT AIR QUALITY STANDARDS***

[This page intentionally left blank]

APPENDIX C

MAPS AND TABLES OF AREA DESIGNATIONS FOR STATE AND NATIONAL AMBIENT AIR QUALITY STANDARDS

This attachment fulfills the requirement of Health and Safety Code section 40718 for CARB to publish maps that identify areas where one or more violations of any State ambient air quality standard (State standard) or national ambient air quality standard (national standard) have been measured. The national standards are those promulgated under section 109 of the federal Clean Air Act (42 U.S.C. 7409).

This attachment is divided into three parts. The first part comprises a table showing the levels, averaging times, and measurement methods for each of the State and national standards. This is followed by a section containing maps and tables showing the area designations for each pollutant for which there is a State standard in the California Code of Regulations, title 17, section 70200. The last section contains maps and tables showing the most current area designations for the national standards.

<h2 style="text-align: center;">Ambient Air Quality Standards</h2> <p style="text-align: center;">(Updated 5/4/16)</p>						
Pollutant	Averaging Time	California Standards ¹		National Standards ²		
		Concentration ³	Method ⁴	Primary ^{3,5}	Secondary ^{3,6}	Method ⁷
Ozone (O ₃) ⁸	1 Hour	0.09 ppm (180 µg/m ³)	Ultraviolet Photometry	—	Same as Primary Standard	Ultraviolet Photometry
	8 Hour	0.070 ppm (137 µg/m ³)		0.070 ppm (137 µg/m ³)		
Respirable Particulate Matter (PM ₁₀) ⁹	24 Hour	50 µg/m ³	Gravimetric or Beta Attenuation	150 µg/m ³	Same as Primary Standard	Inertial Separation and Gravimetric Analysis
	Annual Arithmetic Mean	20 µg/m ³		—		
Fine Particulate Matter (PM _{2.5}) ⁹	24 Hour	—	—	35 µg/m ³	Same as Primary Standard	Inertial Separation and Gravimetric Analysis
	Annual Arithmetic Mean	12 µg/m ³	Gravimetric or Beta Attenuation	12.0 µg/m ³	15 µg/m ³	
Carbon Monoxide (CO)	1 Hour	20 ppm (23 mg/m ³)	Non-Dispersive Infrared Photometry (NDIR)	35 ppm (40 mg/m ³)	—	Non-Dispersive Infrared Photometry (NDIR)
	8 Hour	9.0 ppm (10 mg/m ³)		9 ppm (10 mg/m ³)	—	
	8 Hour (Lake Tahoe)	6 ppm (7 mg/m ³)		—	—	
Nitrogen Dioxide (NO ₂) ¹⁰	1 Hour	0.18 ppm (339 µg/m ³)	Gas Phase Chemiluminescence	100 ppb (188 µg/m ³)	—	Gas Phase Chemiluminescence
	Annual Arithmetic Mean	0.030 ppm (57 µg/m ³)		0.053 ppm (100 µg/m ³)	Same as Primary Standard	
Sulfur Dioxide (SO ₂) ¹¹	1 Hour	0.25 ppm (655 µg/m ³)	Ultraviolet Fluorescence	75 ppb (196 µg/m ³)	—	Ultraviolet Fluorescence; Spectrophotometry (Pararosaniline Method)
	3 Hour	—		—	0.5 ppm (1300 µg/m ³)	
	24 Hour	0.04 ppm (105 µg/m ³)		0.14 ppm (for certain areas) ¹¹	—	
	Annual Arithmetic Mean	—		0.030 ppm (for certain areas) ¹¹	—	
Lead ^{12,13}	30 Day Average	1.5 µg/m ³	Atomic Absorption	—	—	High Volume Sampler and Atomic Absorption
	Calendar Quarter	—		1.5 µg/m ³ (for certain areas) ¹²	Same as Primary Standard	
	Rolling 3-Month Average	—		0.15 µg/m ³		
Visibility Reducing Particles ¹⁴	8 Hour	See footnote 14	Beta Attenuation and Transmittance through Filter Tape	No National Standards		
Sulfates	24 Hour	25 µg/m ³	Ion Chromatography			
Hydrogen Sulfide	1 Hour	0.03 ppm (42 µg/m ³)	Ultraviolet Fluorescence			
Vinyl Chloride ¹²	24 Hour	0.01 ppm (26 µg/m ³)	Gas Chromatography			

See footnotes on next page ...

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

1. California standards for ozone, carbon monoxide (except 8-hour Lake Tahoe), sulfur dioxide (1- and 24-hour), nitrogen dioxide, and particulate matter (PM10, PM2.5, and visibility reducing particles), are values that are not to be exceeded. All others are not to be equaled or exceeded. California ambient air quality standards are listed in the Table of Standards in Section 70200 of Title 17 of the California Code of Regulations.
2. National standards (other than ozone, particulate matter, and those based on annual arithmetic mean) are not to be exceeded more than once a year. The ozone standard is attained when the fourth highest 8-hour concentration measured at each site in a year, averaged over three years, is equal to or less than the standard. For PM10, the 24-hour standard is attained when the expected number of days per calendar year with a 24-hour average concentration above $150 \mu\text{g}/\text{m}^3$ is equal to or less than one. For PM2.5, the 24-hour standard is attained when 98 percent of the daily concentrations, averaged over three years, are equal to or less than the standard. Contact the U.S. EPA for further clarification and current national policies.
3. Concentration expressed first in units in which it was promulgated. Equivalent units given in parentheses are based upon a reference temperature of 25°C and a reference pressure of 760 torr. Most measurements of air quality are to be corrected to a reference temperature of 25°C and a reference pressure of 760 torr; ppm in this table refers to ppm by volume, or micromoles of pollutant per mole of gas.
4. Any equivalent measurement method which can be shown to the satisfaction of the CARB to give equivalent results at or near the level of the air quality standard may be used.
5. National Primary Standards: The levels of air quality necessary, with an adequate margin of safety to protect the public health.
6. National Secondary Standards: The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.
7. Reference method as described by the U.S. EPA. An "equivalent method" of measurement may be used but must have a "consistent relationship to the reference method" and must be approved by the U.S. EPA.
8. On October 1, 2015, the national 8-hour ozone primary and secondary standards were lowered from 0.075 to 0.070 ppm.
9. On December 14, 2012, the national annual PM2.5 primary standard was lowered from $15 \mu\text{g}/\text{m}^3$ to $12.0 \mu\text{g}/\text{m}^3$. The existing national 24-hour PM2.5 standards (primary and secondary) were retained at $35 \mu\text{g}/\text{m}^3$, as was the annual secondary standard of $15 \mu\text{g}/\text{m}^3$. The existing 24-hour PM10 standards (primary and secondary) of $150 \mu\text{g}/\text{m}^3$ also were retained. The form of the annual primary and secondary standards is the annual mean, averaged over 3 years.
10. To attain the 1-hour national standard, the 3-year average of the annual 98th percentile of the 1-hour daily maximum concentrations at each site must not exceed 100 ppb. Note that the national 1-hour standard is in units of parts per billion (ppb). California standards are in units of parts per million (ppm). To directly compare the national 1-hour standard to the California standards the units can be converted from ppb to ppm. In this case, the national standard of 100 ppb is identical to 0.100 ppm.

Note that the 1-hour national standard is in units of parts per billion (ppb). California standards are in units of parts per million (ppm). To directly compare the 1-hour national standard to the California standard the units can be converted to ppm. In this case, the national standard of 75 ppb is identical to 0.075 ppm.
12. The CARB has identified lead and vinyl chloride as 'toxic air contaminants' with no threshold level of exposure for adverse health effects determined. These actions allow for the implementation of control measures at levels below the ambient concentrations specified for these pollutants.
13. The national standard for lead was revised on October 15, 2008 to a rolling 3-month average. The 1978 lead standard ($1.5 \mu\text{g}/\text{m}^3$ as a quarterly average) remains in effect until one year after an area is designated for the 2008 standard, except that in areas designated nonattainment for the 1978 standard, the 1978 standard remains in effect until implementation plans to attain or maintain the 2008 standard are approved.
14. In 1989, the CARB converted both the general statewide 10-mile visibility standard and the Lake Tahoe 30-mile visibility standard to instrumental equivalents, which are "extinction of 0.23 per kilometer" and "extinction of 0.07 per kilometer" for the statewide and Lake Tahoe Air Basin standards, respectively.

[This page intentionally left blank]

Area Designations for the State Ambient Air Quality Standards

The following maps and tables show the area designations for each pollutant with a State standard set forth in the California Code of Regulations, title 17, section 60200. Each area is identified as attainment, nonattainment, nonattainment-transitional, or unclassified for each pollutant, as shown below:

Attainment	A
Nonattainment	N
Nonattainment-Transitional	NA-T
Unclassified	U

In general, CARB designates areas by air basin for pollutants with a regional impact and by county for pollutants with a more local impact. However, when there are areas within an air basin or county with distinctly different air quality deriving from sources and conditions not affecting the entire air basin or county, CARB may designate a smaller area. Generally, when boundaries of the designated area differ from the air basin or county boundaries, the description of the specific area is referenced at the bottom of the summary table.

(1) AB 3048 (Olberg) and AB 2525 (Miller) signed into law in 1996, made changes to Health and Safety Code, section 40925.5. One of the changes allows nonattainment districts to become nonattainment-transitional for ozone by operation of law.

Area Designations for the National Ambient Air Quality Standards

The following maps and tables show the area designations for each pollutant with a national ambient air quality standard. Additional information about the federal area designations is available on the U.S. EPA website:

<https://www.epa.gov/green-book>

Over the last several years, U.S. EPA has been reviewing the levels of the various national standards. The agency has already promulgated new standard levels for some pollutants and is considering revising the levels for others. Information about the status of these reviews is available on the U.S. EPA website:

<https://www.epa.gov/criteria-air-pollutants>

Designation Categories

Suspended Particulate Matter (PM₁₀). The U.S. EPA uses three categories to designate areas with respect to PM₁₀:

- Attainment
- Nonattainment
- Unclassifiable

Ozone, Fine Suspended Particulate Matter (PM_{2.5}), Carbon Monoxide (CO), and Nitrogen Dioxide (NO₂). The U.S. EPA uses two categories to designate areas with respect to these standards:

- Nonattainment
- Unclassifiable/Attainment

The national 1-hour ozone standard was revoked effective June 15, 2005, and the area designations map reflects the 2015 national 8-hour ozone standard of 0.070 ppm. Original designations were finalized on August 3, 2018.

On December 14, 2012, the U.S. EPA established a new national annual primary PM_{2.5} standard of 12.0 µg/m³. New area designations reflecting this revised standard became final in December 2014. The current designation map reflects the most recently revised (2012) annual average standard of 12.0 µg/m³ as well as the 24-hour standard of 35 µg/m³, revised in 2006.

On January 22, 2010, the U.S. EPA established a new national 1-hour NO₂ standard of 100 parts per billion (ppb) and retained the annual average standard of 53 ppb. Designations for the primary NO₂ standard became effective on February 29, 2012. All areas of California meet this standard.

Sulfur Dioxide (SO₂). The U.S. EPA uses three categories to designate areas with respect to the 24-hour and annual average sulfur dioxide standards. These designation categories are:

- Nonattainment,
- Unclassifiable, and
- Attainment/Unclassifiable.

On June 2, 2010, the U.S. EPA established a new primary 1-hour SO₂ standard of 75 parts per billion (ppb). At the same time, U.S. EPA revoked the 24-hour and annual

average standards. Area designations for the 1-hour SO₂ standard were finalized on December 21, 2017 and are reflected in the area designations map.

Lead (particulate). The U.S. EPA promulgated a new rolling 3-month average lead standard in October 2008 of 0.15 µg/m³. Designations were made for this standard in November 2010.

Designation Areas

From time to time, the boundaries of the California air basins have been changed to facilitate the planning process. CARB generally initiates these changes, and they are not always reflected in the U.S. EPA's area designations. For purposes of consistency, the maps in this attachment reflect area designation boundaries and nomenclature as promulgated by the U.S. EPA. In some cases, these may not be the same as those adopted by CARB. For example, the national area designations reflect the former Southeast Desert Air Basin. In accordance with Health and Safety Code section 39606.1, CARB redefined this area in 1996 to be the Mojave Desert Air Basin and Salton Sea Air Basin. The definitions and boundaries for all areas designated for the national standards can be found in Title 40, Code of Federal Regulations (CFR), Chapter I, Subchapter C, Part 81.305. They are available on the web at:

https://ecfr.io/Title-40/se40.20.81_1305

* Definitions and references for all areas can be found in 40 CFR, Chapter I, Part 81.305.

NOTE: This map and table reflect the 2015 8-hour ozone standard of 0.070 ppm.

(1) South Central Coast Air Basin Channel Islands:

Santa Barbara County includes Santa Cruz, San Miguel, Santa Rosa, and Santa Barbara Islands.

Ventura County includes Anacapa and San Nicolas Islands.

South Coast Air Basin:

Los Angeles County includes San Clemente and Santa Catalina Islands.

(2) For this purpose, the Sacramento Metro Area comprises all of Sacramento and Yolo Counties, the Sacramento Valley Air Basin portion of Solano County, the southern portion of Sutter County, and the Sacramento Valley and Mountain Counties Air Basins portions of Placer and El Dorado counties.

(1) Air quality in Sacramento County meets the national PM10 standards. The request for redesignation to attainment was approved by U.S. EPA in September 2013.

(2) U.S. EPA designation puts the Sacramento Valley Air Basin portion of Placer County in the Mountain Counties Air Basin.

(3) Air quality in Coachella Valley meets the national PM10 standards. A request for redesignation to attainment has been submitted to U.S. EPA.

(1) For this purpose, Sacramento Metro Area comprises all of Sacramento and portions of El Dorado, Placer, Solano, and Yolo Counties. Air quality in this area meets the national PM2.5 standards. A Determination of Attainment for the 2006 24-hour PM2.5 standard was made by U.S. EPA in June 2017.

(2) Air quality in this area meets the national PM2.5 standards. A Determination of Attainment for the 2006 24-hour PM2.5 standard was made by U.S. EPA in June 2017.

(3) Those lands of the Santa Rosa Band of Cahulla Mission Indians in Riverside County are designated Unclassifiable/Attainment.

(4) That portion of Imperial County encompassing the urban and surrounding areas of Brawley, Calexico, El Centro, Heber, Holtville, Imperial, Seeley, and Westmorland. Air quality in this area meets the national PM2.5 standards. A Determination of Attainment for the 2006 24-hour PM2.5 standard was made by U.S. EPA in June 2017.

Off-road Equipment -

Off-road Equipment - Crawler Tractors used in lieu of Tractors/Loaders/Backhoes.

Trips and VMT - Vendor Trips have been adjusted to account for Water Trucks.

Grading - This analysis conservatively assumes that up to 10 acres will be disturbed per day.

Architectural Coating - Rule 1113

Vehicle Trips - Construction Run Only.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - Construction Run Only.

Water And Wastewater - Construction Run Only.

Solid Waste - Construction Run Only.

Construction Off-road Equipment Mitigation - Rule 403

Compass Danbe Center (Building 1 Operations - Passenger Cars) - Riverside-South Coast County, Summer

Project Characteristics -

Land Use - Total Building 1 Area is 12.47 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Traffic Analysis report prepared by Urban Crossroads, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Business Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the CalEEMod default fleet mix and the ratio of the vehicle classes (LDA, LDT1, LDT2, and MDV).

Compass Danbe Center (Building 1 Operations - Passenger Cars) - Riverside-South Coast County, Winter

Project Characteristics -

Land Use - Total Building 1 Area is 12.47 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Traffic Analysis report prepared by Urban Crossroads, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Business Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the CalEEMod default fleet mix and the ratio of the vehicle classes (LDA, LDT1, LDT2, and MDV).

Compass Danbe Centerpointe (Building 2 Operations - Passenger Cars) - Riverside-South Coast County, Summer

Project Characteristics -

Land Use - Total Building 2 Area is 5.18 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Traffic Analysis report prepared by Urban Crossroads, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Business Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the CalEEMod default fleet mix and the ratio of the vehicle classes (LDA, LDT1, LDT2, and MDV).

Compass Danbe Centerpointe (Building 2 Operations - Passenger Cars) - Riverside-South Coast County, Winter

Project Characteristics -

Land Use - Total Building 2 Area is 5.18 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Traffic Analysis report prepared by Urban Crossroads, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Business Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the CalEEMod default fleet mix and the ratio of the vehicle classes (LDA, LDT1, LDT2, and MDV).

Compass Danbe Center (Building 1 Operations - Trucks) - Riverside-South Coast County, Summer

Project Characteristics -

Land Use - Total Building 1 Area is 12.47 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Traffic Analysis report prepared by Urban Crossroads, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Business Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Analysis.

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Refrigerated Warehouse-No Rail	88.57	1000sqft	2.03	88,571.00	0
Unrefrigerated Warehouse-No Rail	206.67	1000sqft	4.75	206,665.00	0
Other Non-Asphalt Surfaces	45.03	1000sqft	1.03	45,032.00	0
Parking Lot	202.77	1000sqft	4.66	202,767.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.4	Precipitation Freq (Days)	28
Climate Zone	10			Operational Year	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-

Compass Danbe Center (Building 1 Operations - Trucks) - Riverside-South Coast County, Winter

Project Characteristics -

Land Use - Total Building 1 Area is 12.47 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Traffic Analysis report prepared by Urban Crossroads, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Business Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Analysis.

Compass Danbe Centerpointe (Building 2 Operations - Trucks) - Riverside-South Coast County, Summer

Project Characteristics -

Land Use - Total Building 2 Area is 5.18 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Traffic Analysis report prepared by Urban Crossroads, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Business Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Analysis.

Compass Danbe Centerpointe (Building 2 Operations - Trucks) - Riverside-South Coast County, Winter

Project Characteristics -

Land Use - Total Building 2 Area is 5.18 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Traffic Analysis report prepared by Urban Crossroads, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Business Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Analysis.

2 Unless otherwise noted, per CalEEMod methodology, the calculated CalEEMod emission rates are derived from the emission rates obtained using the EMFAC2017 Web Database for the Riverside (SC) region.

3 Because EMFAC2017 provides vehicle trips data for MHDT and HHDT diesel trucks, the formula provided in Appendix A of the CalEEMod User's Guide in calculating the NO_x STREX emission rates are utilized.

TABLE OF CONTENTS

APPLICATION FOR LEAVE TO FILE *amicus curiae* brief..... App-1

HOW THIS BRIEF WILL ASSIST THE COURT App-1

STATEMENT OF INTEREST OF *AMICUS CURIAE*..... App-3

CERTIFICATION REGARDING AUTHORSHIP & FUNDING App-4

BRIEF OF AMICUS CURIAE 1

SUMMARY OF ARGUMENT 1

ARGUMENT 2

I. RELEVANT FACTUAL AND LEGAL FRAMEWORK. 2

 A. Air Quality Regulatory Background2

 B. The SCAQMD's Role Under CEQA..... 6

II. THIS COURT SHOULD NOT SET A HARD-AND-FAST
RULE CONCERNING THE EXTENT TO WHICH AN EIR
MUST CORRELATE A PROJECT'S EMISSION OF
POLLUTANTS WITH RESULTING HEALTH IMPACTS..... 8

III. THE QUESTION OF WHETHER AN EIR CONTAINS
SUFFICIENT ANALYSIS TO MEET CEQA'S
REQUIREMENTS IS A MIXED QUESTION OF FACT
AND LAW GOVERNED BY TWO DIFFERENT
STANDARDS OF REVIEW..... 16

 A. Standard of Review for Feasibility Determination and
Sufficiency as an Informative Document 16

 B. Friant Ranch's Rationale for Rejecting the Independent
Judgment Standard of Review is Unsupported by Case
Law..... 23

IV. COURTS MUST SCRUPULOUSLY ENFORCE THE
REQUIREMENTS THAT LEAD AGENCIES CONSULT
WITH AND OBTAIN COMMENTS FROM AIR
DISTRICTS..... 26

CONCLUSION 29

Attachment: Appendix A1-Air Quality Impact Analysis (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

**TO THE HONORABLE CHIEF JUSTICE AND JUSTICES OF THE
SUPREME COURT:**

APPLICATION FOR LEAVE TO FILE *AMICUS CURIAE* BRIEF

Pursuant to Rule 8.520(f) of the California Rules of Court, the South Coast Air Quality Management District (SCAQMD) respectfully requests leave to file the attached *amicus curiae* brief. Because SCAQMD's position differs from that of either party, we request leave to submit this amicus brief in support of neither party.

HOW THIS BRIEF WILL ASSIST THE COURT

SCAQMD's proposed amicus brief takes a position on two of the issues in this case. In both instances, its position differs from that of either party. The issues are:

- 1) Does the California Environmental Quality Act (CEQA) require an environmental impact report (EIR) to correlate a project's air pollution emissions with specific levels of health impacts?
- 2) What is the proper standard of review for determining whether an EIR provides sufficient information on the health impacts caused by a project's emission of air pollutants?

This brief will assist the Court by discussing the practical realities of correlating identified air quality impacts with specific health outcomes. In short, CEQA requires agencies to provide detailed information about a project's air quality impacts that is sufficient for the public and decisionmakers to adequately evaluate the project and meaningfully understand its impacts. However, the level of analysis is governed by a rule of reason; CEQA only requires agencies to conduct analysis if it is reasonably feasible to do so.

With regard to health-related air quality impacts, an analysis that correlates a project's air pollution emissions with specific levels of health impacts will be feasible in some cases but not others. Whether it is feasible depends on a variety of factors, including the nature of the project and the nature of the analysis under consideration. The feasibility of analysis may also change over time as air districts and others develop new tools for measuring projects' air quality related health impacts. Because SCAQMD has among the most sophisticated air quality modeling and health impact evaluation capability of any of the air districts in the State, it is uniquely situated to express an opinion on the extent to which the Court should hold that CEQA requires lead agencies to correlate air quality impacts with specific health outcomes.

SCAQMD can also offer a unique perspective on the question of the appropriate standard of review. SCAQMD submits that the proper standard of review for determining whether an EIR is sufficient as an informational document is more nuanced than argued by either party. In our view, this is a mixed question of fact and law. It includes determining whether additional analysis is feasible, which is primarily a factual question that should be reviewed under the substantial evidence standard. However, it also involves determining whether the omission of a particular analysis renders an EIR insufficient to serve CEQA's purpose as a meaningful, informational document. If a lead agency has not determined that a requested analysis is infeasible, it is the court's role to determine whether the EIR nevertheless meets CEQA's purposes, and courts should not defer to the lead agency's conclusions regarding the legal sufficiency of an EIR's analysis. The ultimate question of whether an EIR's analysis is "sufficient" to serve CEQA's informational purposes is predominately a question of law that courts should review de novo.

This brief will explain the rationale for these arguments and may assist the Court in reaching a conclusion that accords proper respect to a lead agency's factual conclusions while maintaining judicial authority over the ultimate question of what level of analysis CEQA requires.

STATEMENT OF INTEREST OF *AMICUS CURIAE*

The SCAQMD is the regional agency primarily responsible for air pollution control in the South Coast Air Basin, which consists of all of Orange County and the non-desert portions of the Los Angeles, Riverside, and San Bernardino Counties. (Health & Saf. Code § 40410; Cal. Code Regs., tit. 17, § 60104.) The SCAQMD participates in the CEQA process in several ways. Sometimes it acts as a lead agency that prepares CEQA documents for projects. Other times it acts as a responsible agency when it has permit authority over some part of a project that is undergoing CEQA review by a different lead agency. Finally, SCAQMD also acts as a commenting agency for CEQA documents that it receives because it is a public agency with jurisdiction by law over natural resources affected by the project.

In all of these capacities, SCAQMD will be affected by the decision in this case. SCAQMD sometimes submits comments requesting that a lead agency perform an additional type of air quality or health impacts analysis. On the other hand, SCAQMD sometimes determines that a particular type of health impact analysis is not feasible or would not produce reliable and informative results. Thus, SCAQMD will be affected by the Court's resolution of the extent to which CEQA requires EIRs to correlate emissions and health impacts, and its resolution of the proper standard of review.

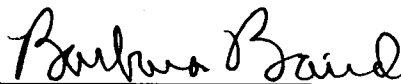

CERTIFICATION REGARDING AUTHORSHIP AND FUNDING

No party or counsel in the pending case authored the proposed amicus curiae brief in whole or in part, or made any monetary contribution intended to fund the preparation or submission of the brief. No person or entity other than the proposed *Amicus Curiae* made any monetary contribution intended to fund the preparation or submission of the brief.

Respectfully submitted,

DATED: April 3, 2015

SOUTH COAST AIR QUALITY
MANAGEMENT DISTRICT
KURT R. WIESE, GENERAL COUNSEL
BARBARA BAIRD, CHIEF DEPUTY COUNSEL

By: 
Barbara Baird

Attorneys for [proposed] Amicus Curiae
SOUTH COAST AIR QUALITY
MANAGEMENT DISTRICT

BRIEF OF AMICUS CURIAE

SUMMARY OF ARGUMENT

The South Coast Air Quality Management District (SCAQMD) submits that this Court should not try to establish a hard-and-fast rule concerning whether lead agencies are required to correlate emissions of air pollutants with specific health consequences in their environmental impact reports (EIR). The level of detail required in EIRs is governed by a few, core CEQA (California Environmental Quality Act) principles. As this Court has stated, “[a]n EIR must include detail sufficient to enable those who did not participate in its preparation to understand and to consider meaningfully the issues raised by the proposed project.” (*Laurel Heights Improvement Assn. v. Regents of the Univ of Cal.* (1988) 47 Cal.3d 376, 405 [“*Laurel Heights I*”]) Accordingly, “an agency must use its best efforts to find out and disclose all that it reasonably can.” (*Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 428 (quoting CEQA Guidelines § 15144)¹). However, “[a]nalysis of environmental effects need not be exhaustive, but will be judged in light of what is reasonably feasible.” (*Association of Irrigated Residents v. County of Madera* (2003) 107 Cal.App.4th 1383, 1390; CEQA Guidelines §§ 15151, 15204(a).)

With regard to analysis of air quality related health impacts, EIRs must generally quantify a project’s pollutant emissions, but in some cases it is not feasible to correlate these emissions to specific, quantifiable health impacts (e.g., premature mortality; hospital admissions). In such cases, a general description of the adverse health impacts resulting from the pollutants at issue may be sufficient. In other cases, due to the magnitude

¹ The CEQA Guidelines are found at Cal. Code Regs., tit. 14 §§ 15000, *et seq.*

or nature of the pollution emissions, as well as the specificity of the project involved, it may be feasible to quantify health impacts. Or there may be a less exacting, but still meaningful analysis of health impacts that can feasibly be performed. In these instances, agencies should disclose those impacts.

SCAQMD also submits that whether or not an EIR complies with CEQA's informational mandates by providing sufficient, feasible analysis is a mixed question of fact and law. Pertinent here, the question of whether an EIR's discussion of health impacts from air pollution is sufficient to allow the public to understand and consider meaningfully the issues involves two inquiries: (1) Is it feasible to provide the information or analysis that a commenter is requesting or a petitioner is arguing should be required?; and (2) Even if it is feasible, is the agency relying on other policy or legal considerations to justify not preparing the requested analysis? The first question of whether an analysis is feasible is primarily a question of fact that should be judged by the substantial evidence standard. The second inquiry involves evaluating CEQA's information disclosure purposes against the asserted reasons to not perform the requested analysis. For example, an agency might believe that its EIR meets CEQA's informational disclosure standards even without a particular analysis, and therefore choose not to conduct that analysis. SCAQMD submits that this is more of a legal question, which should be reviewed de novo as a question of law.

ARGUMENT

I. RELEVANT FACTUAL AND LEGAL FRAMEWORK.

A. Air Quality Regulatory Background

The South Coast Air Quality Management District (SCAQMD) is one of the local and regional air pollution control districts and air quality

management districts in California. The SCAQMD is the regional air pollution agency for the South Coast Air Basin, which consists of all of Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties. (Health & Saf. Code § 40410, 17 Cal. Code Reg. § 60104.) The SCAQMD also includes the Coachella Valley in Riverside County (Palm Springs area to the Salton Sea). (SCAQMD, *Final 2012 AQMP (Feb. 2013)*, <http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan>; then follow “chapter 7” hyperlink; pp 7-1, 7-3 (last visited Apr. 1, 2015).) The SCAQMD's jurisdiction includes over 16 million residents and has the worst or nearly the worst air pollution levels in the country for ozone and fine particulate matter. (SCAQMD, *Final 2012 AQMP (Feb. 2013)*, <http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan>; then follow “Executive Summary” hyperlink p. ES-1 (last visited Apr. 1, 2015).)

Under California law, the local and regional districts are primarily responsible for controlling air pollution from all sources except motor vehicles. (Health & Saf. Code § 40000.) The California Air Resources Board (CARB), part of the California Environmental Protection Agency, is primarily responsible for controlling pollution from motor vehicles. (*Id.*) The air districts must adopt rules to achieve and maintain the state and federal ambient air quality standards within their jurisdictions. (Health & Saf. Code § 40001.)

The federal Clean Air Act (CAA) requires the United States Environmental Protection Agency (EPA) to identify pollutants that are widely distributed and pose a threat to human health, developing a so-called “criteria” document. (42 U.S.C. § 7408; CAA § 108.) These pollutants are frequently called “criteria pollutants.” EPA must then establish “national ambient air quality standards” at levels “requisite to protect public health”,

allowing “an adequate margin of safety.” (42 U.S.C. § 7409; CAA § 109.) EPA has set standards for six identified pollutants: ozone, nitrogen dioxide, sulfur dioxide, carbon monoxide, particulate matter (PM), and lead. (U.S. EPA, National Ambient Air Quality Standards (NAAQS), <http://www.epa.gov/air/criteria.html> (last updated Oct. 21, 2014).)²

Under the Clean Air Act, EPA sets emission standards for motor vehicles and “nonroad engines” (mobile farm and construction equipment, marine vessels, locomotives, aircraft, etc.). (42 U.S.C. §§ 7521, 7547; CAA §§ 202, 213.) California is the only state allowed to establish emission standards for motor vehicles and most nonroad sources; however, it may only do so with EPA's approval. (42 U.S.C. §§ 7543(b), 7543(e); CAA §§ 209(b), 209(c).) Sources such as manufacturing facilities, power plants and refineries that are not mobile are often referred to as “stationary sources.” The Clean Air Act charges state and local agencies with the primary responsibility to attain the national ambient air quality standards. (42 U.S.C. § 7401(a)(3); CAA § 101(a)(3).) Each state must adopt and implement a plan including enforceable measures to achieve and maintain the national ambient air quality standards. (42 U.S.C. § 7410; CAA § 110.) The SCAQMD and CARB jointly prepare portion of the plan for the South Coast Air Basin and submit it for approval by EPA. (Health & Saf. Code §§ 40460, et seq.)

The Clean Air Act also requires state and local agencies to adopt a permit program requiring, among other things, that new or modified “major” stationary sources use technology to achieve the “lowest achievable emission rate,” and to control minor stationary sources as

² Particulate matter (PM) is further divided into two categories: fine particulate or PM_{2.5} (particles with a diameter of less than or equal to 2.5 microns) and coarse particulate (PM₁₀) (particles with a diameter of 10 microns or less). (U.S. EPA, Particulate Matter (PM), <http://www.epa.gov/airquality/particulatepollution/> (last visited Apr. 1, 2015).)

needed to help attain the standards. (42 U.S.C. §§ 7502(c)(5), 7503(a)(2), 7410(a)(2)(C); CAA §§ 172(c)(5), 173(a)(2), 110(a)(2)(C).) The air districts implement these permit programs in California. (Health & Saf. Code §§ 42300, et seq.)

The Clean Air Act also sets out a regulatory structure for over 100 so-called “hazardous air pollutants” calling for EPA to establish “maximum achievable control technology” (MACT) for sources of these pollutants. (42 U.S.C. § 7412(d)(2); CAA § 112(d)(2).) California refers to these pollutants as “toxic air contaminants” (TACs) which are subject to two state-required programs. The first program requires “air toxics control measures” for specific categories of sources. (Health & Saf. Code § 39666.) The other program requires larger stationary sources and sources identified by air districts to prepare “health risk assessments” for impacts of toxic air contaminants. (Health & Saf. Code §§ 44320(b), 44322, 44360.) If the health risk exceeds levels identified by the district as “significant,” the facility must implement a “risk reduction plan” to bring its risk levels below “significant” levels. Air districts may adopt additional more stringent requirements than those required by state law, including requirements for toxic air contaminants. (Health & Saf. Code § 41508; *Western Oil & Gas Assn. v. Monterey Bay Unified APCD* (1989) 49 Cal.3d 408, 414.) For example, SCAQMD has adopted a rule requiring new or modified sources to keep their risks below specified levels and use best available control technology (BACT) for toxics. (SCAQMD, *Rule 1401-New Source Review of Toxic Air Contaminants*, <http://www.aqmd.gov/home/regulations/rules/scaqmd-rule-book/regulation-xiv>; then follow “Rule 1401” hyperlink (last visited Apr. 1, 2015).)

B. The SCAQMD's Role Under CEQA

The California Environmental Quality Act (CEQA) requires public agencies to perform an environmental review and appropriate analysis for projects that they implement or approve. (Pub. Resources Code § 21080(a).) The agency with primary approval authority for a particular project is generally the “lead agency” that prepares the appropriate CEQA document. (CEQA Guidelines §§ 15050, 15051.) Other agencies having a subsequent approval authority over all or part of a project are called “responsible” agencies that must determine whether the CEQA document is adequate for their use. (CEQA Guidelines §§ 15096(c), 15381.) Lead agencies must also consult with and circulate their environmental impact reports to “trustee agencies” and agencies “with jurisdiction by law” including “authority over resources which may be affected by the project.” (Pub. Resources Code §§ 21104(a), 21153; CEQA Guidelines §§ 15086(a)(3), 15073(c).) The SCAQMD has a role in all these aspects of CEQA.

Fulfilling its responsibilities to implement its air quality plan and adopt rules to attain the national ambient air quality standards, SCAQMD adopts a dozen or more rules each year to require pollution reductions from a wide variety of sources. The SCAQMD staff evaluates each rule for any adverse environmental impact and prepares the appropriate CEQA document. Although most rules reduce air emissions, they may have secondary environmental impacts such as use of water or energy or disposal of waste—e.g., spent catalyst from control equipment.³

³ The SCAQMD's CEQA program for its rules is a “Certified Regulatory Program” under which it prepares a “functionally equivalent” document in lieu of a negative declaration or EIR. (Pub. Resources Code § 21080.5, CEQA Guidelines § 15251(l).)

The SCAQMD also approves a large number of permits every year to construct new, modified, or replacement facilities that emit regulated air pollutants. The majority of these air pollutant sources have already been included in an earlier CEQA evaluation for a larger project, are currently being evaluated by a local government as lead agency, or qualify for an exemption. However, the SCAQMD sometimes acts as lead agency for major projects where the local government does not have a discretionary approval. In such cases, SCAQMD prepares and certifies a negative declaration or environmental impact report (EIR) as appropriate.⁴ SCAQMD evaluates perhaps a dozen such permit projects under CEQA each year. SCAQMD is often also a “responsible agency” for many projects since it must issue a permit for part of the projects (e.g., a boiler used to provide heat in a commercial building). For permit projects evaluated by another lead agency under CEQA, SCAQMD has the right to determine that the CEQA document is inadequate for its purposes as a responsible agency, but it may not do so because its permit program already requires all permitted sources to use the best available air pollution control technology. (SCAQMD, *Rule 1303(a)(1) – Requirements*, <http://www.aqmd.gov/home/regulations/rules/scaqmd-rule-book/regulation-xiii>; then follow “Rule 1303” hyperlink (last visited Apr. 1, 2015).)

Finally, SCAQMD receives as many as 60 or more CEQA documents each month (around 500 per year) in its role as commenting agency or an agency with “jurisdiction by law” over air quality—a natural resource affected by the project. (Pub. Resources Code §§ 21104(a), 21153; CEQA Guidelines § 15366(a)(3).) The SCAQMD staff provides comments on as many as 25 or 30 such documents each month.

⁴ The SCAQMD's permit projects are not included in its Certified Regulatory Program, and are evaluated under the traditional local government CEQA analysis. (Pub. Resources Code §§ 21150-21154.)

(SCAQMD Governing Board Agenda, Apr. 3, 2015, Agenda Item 16, Attachment A, <http://www.aqmd.gov/home/library/meeting-agendas-minutes/agenda?title=governing-board-meeting-agenda-april-3-2015>; then follow “16. Lead Agency Projects and Environmental Documents Received by SCAQMD” hyperlink (last visited Apr. 1, 2015).) Of course, SCAQMD focuses its commenting efforts on the more significant projects.

Typically, SCAQMD comments on the adequacy of air quality analysis, appropriateness of assumptions and methodology, and completeness of the recommended air quality mitigation measures. Staff may comment on the need to prepare a health risk assessment detailing the projected cancer and noncancer risks from toxic air contaminants resulting from the project, particularly the impacts of diesel particulate matter, which CARB has identified as a toxic air contaminant based on its carcinogenic effects. (California Air Resources Board, Resolution 98-35, Aug. 27, 1998, <http://www.arb.ca.gov/regact/diesltac/diesltac.htm>; then follow Resolution 98-35 hyperlink (last visited Apr. 1, 2015).) Because SCAQMD already requires new or modified stationary sources of toxic air contaminants to use the best available control technology for toxics and to keep their risks below specified levels, (SCAQMD Rule 1401, *supra*, note 15), the greatest opportunity to further mitigate toxic impacts through the CEQA process is by reducing emissions—particularly diesel emissions—from vehicles.

II. THIS COURT SHOULD NOT SET A HARD-AND-FAST RULE CONCERNING THE EXTENT TO WHICH AN EIR MUST CORRELATE A PROJECT’S EMISSION OF POLLUTANTS WITH RESULTING HEALTH IMPACTS.

Numerous cases hold that courts do not review the correctness of an EIR’s conclusions but rather its sufficiency as an informative document. (*Laurel Heights 1*, *supra*, 47 Cal.3d at p. 392; *Citizens of Goleta Valley v.*

Bd. of Supervisors (1990) 52 Cal.3d 553, 569; *Bakersfield Citizens for Local Control v. City of Bakersfield* (2004) 124 Cal.App.4th 1184, 1197.)

As stated by the Court of Appeal in this case, where an EIR has addressed a topic, but the petitioner claims that the information provided about that topic is insufficient, courts must “draw[] a line that divides *sufficient* discussions from those that are *insufficient*.” (*Sierra Club v. County of Fresno* (2014) 226 Cal.App.4th 704 (superseded by grant of review) 172 Cal.Rptr.3d 271, 290.) The Court of Appeal readily admitted that “[t]he terms themselves – sufficient and insufficient – provide little, if any, guidance as to where the line should be drawn. They are simply labels applied once the court has completed its analysis.” (*Id.*)

The CEQA Guidelines, however, provide guidance regarding what constitutes a sufficient discussion of impacts. Section 15151 states that “the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible.” Case law reflects this: “Analysis of environmental effects need not be exhaustive, but will be judged in light of what was reasonably feasible.” (*Association of Irrigated Residents v. County of Madera, supra*, 107 Cal.App.4th at p. 1390; see also CEQA Guidelines § 15204(a).)

Applying this test, this Court cannot realistically establish a hard-and-fast rule that an analysis correlating air pollution impacts of a project to quantified resulting health impacts is always required, or indeed that it is never required. Simply put, in some cases such an analysis will be “feasible”; in some cases it will not.

For example, air pollution control districts often require a proposed new source of toxic air contaminants to prepare a “health risk assessment” before issuing a permit to construct. District rules often limit the allowable cancer risk the new source may cause to the “maximally exposed individual” (worker and residence exposures). (*See, e.g.*, SCAQMD Rule 1401(c)(8); 1401(d)(1), *supra* note 15.) In order to perform this analysis, it

is necessary to have data regarding the sources and types of air toxic contaminants, location of emission points, velocity of emissions, the meteorology and topography of the area, and the location of receptors (worker and residence). (SCAQMD, *Supplemental Guidelines for Preparing Risk Assessments for the Air Toxics "Hot Spots" Information and Assessment Act (AB2588)*, pp. 11-16; (last visited Apr. 1, 2015) <http://www.aqmd.gov/home/library/documents-support-material;> "Guidelines" hyperlink; AB2588; then follow AB2588 Risk Assessment Guidelines hyperlink.)

Thus, it is feasible to determine the health risk posed by a new gas station locating at an intersection in a mixed use area, where receptor locations are known. On the other hand, it may not be feasible to perform a health risk assessment for airborne toxics that will be emitted by a generic industrial building that was built on "speculation" (i.e., without knowing the future tenant(s)). Even where a health risk assessment can be prepared, however, the resulting maximum health risk value is only a calculation of risk—it does not necessarily mean anyone will contract cancer as a result of the project.

In order to find the "cancer burden" or expected additional cases of cancer resulting from the project, it is also necessary to know the numbers and location of individuals living within the "zone of impact" of the project: i.e., those living in areas where the projected cancer risk from the project exceeds one in a million. (SCAQMD, Health Risk Assessment Summary form, <http://www.aqmd.gov/home/forms>; filter by "AB2588" category; then "Health Risk Assessment" hyperlink (last visited Apr. 1, 2015).) The affected population is divided into bands of those exposed to at least 1 in a million risk, those exposed to at least 10 in a million risk, etc. up to those exposed at the highest levels. (*Id.*) This data allows agencies to calculate an approximate number of additional cancer cases expected from

the project. However, it is not possible to predict which particular individuals will be affected.

For the so-called criteria pollutants⁵, such as ozone, it may be more difficult to quantify health impacts. Ozone is formed in the atmosphere from the chemical reaction of the nitrogen oxides (NO_x) and volatile organic compounds (VOC) in the presence of sunlight. (U.S. EPA, Ground Level Ozone, <http://www.epa.gov/airquality/ozonepollution/> (last updated Mar. 25, 2015).) It takes time and the influence of meteorological conditions for these reactions to occur, so ozone may be formed at a distance downwind from the sources. (U.S. EPA, *Guideline on Ozone Monitoring Site Selection* (Aug. 1998) EPA-454/R-98-002 § 5.1.2, <http://www.epa.gov/ttnamti1/archive/cpreldoc.html> (last visited Apr. 1, 2015).) NO_x and VOC are known as “precursors” of ozone.

Scientifically, health effects from ozone are correlated with increases in the ambient level of ozone in the air a person breathes. (U.S. EPA, *Health Effects of Ozone in the General Population*, Figure 9, <http://www.epa.gov/apti/ozonehealth/population.html#levels> (last visited Apr. 1, 2015).) However, it takes a large amount of additional precursor emissions to cause a modeled increase in ambient ozone levels over an entire region. For example, the SCAQMD's 2012 AQMP showed that reducing NO_x by 432 tons per day (157,680 tons/year) and reducing VOC by 187 tons per day (68,255 tons/year) would reduce ozone levels at the SCAQMD's monitor site with the highest levels by only 9 parts per billion. (South Coast Air Quality Management District, *Final 2012 AQMP (February 2013)*, <http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan>; then follow “Appendix V: Modeling & Attainment Demonstrations” hyperlink,

⁵ See discussion of types of pollutants, supra, Part I.A.

pp. v-4-2, v-7-4, v-7-24.) SCAQMD staff does not currently know of a way to accurately quantify ozone-related health impacts caused by NO_x or VOC emissions from relatively small projects.

On the other hand, this type of analysis may be feasible for projects on a regional scale with very high emissions of NO_x and VOCs, where impacts are regional. For example, in 2011 the SCAQMD performed a health impact analysis in its CEQA document for proposed Rule 1315, which authorized various newly-permitted sources to use offsets from the districts “internal bank” of emission reductions. This CEQA analysis accounted for essentially *all* the increases in emissions due to new or modified sources in the District between 2010 and 2030.⁶ The SCAQMD was able to correlate this very large emissions increase (e.g., 6,620 pounds per day NO_x (1,208 tons per year), 89,180 pounds per day VOC (16,275 tons per year)) to expected health outcomes from ozone and particulate matter (e.g., 20 premature deaths per year and 89,947 school absences in the year 2030 due to ozone).⁷ (SCAQMD Governing Board Agenda, February 4, 2011, Agenda Item 26, *Assessment for: Re-adoption of Proposed Rule 1315 – Federal New Source Review Tracking System* (see hyperlink in fn 6) at p. 4.1-35, Table 4.1-29.)

⁶ (SCAQMD Governing Board Agenda, February 4, 2011, Agenda Item 26, Attachment G, *Assessment for: Re-adoption of Proposed Rule 1315 – Federal New Source Review Tracking System, Vol. 1, p.4.0-6*, <http://www.aqmd.gov/home/library/meeting-agendas-minutes/agenda?title=governing-board-meeting-agenda-february-4-2011>; the follow “26. Adopt Proposed Rule 1315 – Federal New Source Review Tracking System” (last visited April 1, 2015).)

⁷ The SCAQMD was able to establish the location of future NO_x and VOC emissions by assuming that new projects would be built in the same locations and proportions as existing stationary sources. This CEQA document was upheld by the Los Angeles County Superior Court in *Natural Res. Def. Council v SCAQMD*, Los Angeles Superior Court No. BS110792).

However, a project emitting only 10 tons per year of NO_x or VOC is small enough that its regional impact on ambient ozone levels may not be detected in the regional air quality models that are currently used to determine ozone levels. Thus, in this case it would not be feasible to directly correlate project emissions of VOC or NO_x with specific health impacts from ozone. This is in part because ozone formation is not linearly related to emissions. Ozone impacts vary depending on the location of the emissions, the location of other precursor emissions, meteorology and seasonal impacts, and because ozone is formed some time later and downwind from the actual emission. (EPA Guideline on Ozone Monitoring Site Selection (Aug. 1998) EPA-454/R-98-002, § 5.1.2; <https://www.epa.gov/ttnamti1/archive/cpreldoc.html>; then search “Guideline on Ozone Monitoring Site Selection” click on pdf) (last viewed Apr. 1, 2015).)

SCAQMD has set its CEQA “significance” threshold for NO_x and VOC at 10 tons per year (expressed as 55 lb/day). (SCAQMD, *Air Quality Analysis Handbook*, <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook>; then follow “SCAQMD Air Quality Significance Thresholds” hyperlink (last visited Apr. 1, 2015).) This is because the federal Clean Air Act defines a “major” stationary source for “extreme” ozone nonattainment areas such as SCAQMD as one emitting 10 tons/year. (42 U.S.C. §§ 7511a(e), 7511a(f); CAA §§ 182(e), 182(f).) Under the Clean Air Act, such sources are subject to enhanced control requirements (42 U.S.C. §§ 7502(c)(5), 7503; CAA §§ 172(c)(5), 173), so SCAQMD decided this was an appropriate threshold for making a CEQA “significance” finding and requiring feasible mitigation. Essentially, SCAQMD takes the position that a source that emits 10 tons/year of NO_x or VOC would contribute cumulatively to ozone formation. Therefore, lead agencies that use SCAQMD’s thresholds of significance may determine

that many projects have “significant” air quality impacts and must apply all feasible mitigation measures, yet will not be able to precisely correlate the project to quantifiable health impacts, unless the emissions are sufficiently high to use a regional modeling program.

In the case of particulate matter (PM_{2.5})⁸, another “criteria” pollutant, SCAQMD staff is aware of two possible methods of analysis. SCAQMD used regional modeling to predict expected health impacts from its proposed Rule 1315, as mentioned above. Also, the California Air Resources Board (CARB) has developed a methodology that can predict expected mortality (premature deaths) from large amounts of PM_{2.5}. (California Air Resources Board, *Health Impacts Analysis: PM Premature Death Relationship*, http://www.arb.ca.gov/research/health/pm-mort/pm-mort_arch.htm (last reviewed Jan. 19, 2012).) SCAQMD used the CARB methodology to predict impacts from three very large power plants (e.g., 731-1837 lbs/day). (Final Environmental Assessment for Rule 1315, *supra*, pp 4.0-12, 4.1-13, 4.1-37 (e.g., 125 premature deaths in the entire SCAQMD in 2030), 4.1-39 (0.05 to 1.77 annual premature deaths from power plants.) Again, this project involved large amounts of additional PM_{2.5} in the District, up to 2.82 tons/day (5,650 lbs/day of PM_{2.5}, or, or 1029 tons/year. (*Id.* at table 4.1-4, p. 4.1-10.)

However, the primary author of the CARB methodology has reported that this PM_{2.5} health impact methodology is not suited for small projects and may yield unreliable results due to various uncertainties.⁹ (SCAQMD, *Final Subsequent Mitigated Negative Declaration for: Warren*

⁸ SCAQMD has not attained the latest annual or 24-hour national ambient air quality standards for “PM_{2.5}” or particulate matter less than 2.5 microns in diameter.

⁹ Among these uncertainties are the representativeness of the population used in the methodology, and the specific source of PM and the corresponding health impacts. (*Id.* at p. 2-24.)

E&P, Inc. WTU Central Facility, New Equipment Project (certified July 19, 2011), <http://www.aqmd.gov/home/library/documents-support-material/lead-agency-permit-projects/permit-project-documents---year-2011>; then follow “Final Subsequent Mitigated Negative Declaration for Warren E&P Inc. WTU Central Facility, New Equipment Project” hyperlink, pp. 2-22, 2-23 (last visited Apr. 1, 2015).) Therefore, when SCAQMD prepared a CEQA document for the expansion of an existing oil production facility, with very small PM_{2.5} increases (3.8 lb/day) and a very small affected population, staff elected not to use the CARB methodology for using estimated PM_{2.5} emissions to derive a projected premature mortality number and explained why it would be inappropriate to do so. (*Id.* at pp 2-22 to 2-24.) SCAQMD staff concluded that use of this methodology for such a small source could result in unreliable findings and would not provide meaningful information. (*Id.* at pp. 2-23, 2-25.) This CEQA document was not challenged in court.

In the above case, while it may have been technically possible to plug the data into the methodology, the results would not have been reliable or meaningful. SCAQMD believes that an agency should not be required to perform analyses that do not produce reliable or meaningful results. This Court has already held that an agency may decline to use even the “normal” “existing conditions” CEQA baseline where to do so would be misleading or without informational value. (*Neighbors for Smart Rail v. Exposition Metro Line* (2013) 57 Cal.4th 439, 448, 457.) The same should be true for a decision that a particular study or analysis would not provide reliable or meaningful results.¹⁰

¹⁰ Whether a particular study would result in “informational value” is a part of deciding whether it is “feasible.” CEQA defines “feasible” as “capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and

Therefore, it is not possible to set a hard-and-fast rule on whether a correlation of air quality impacts with specific quantifiable health impacts is required in all cases. Instead, the result turns on whether such an analysis is reasonably feasible in the particular case.¹¹ Moreover, what is reasonably feasible may change over time as scientists and regulatory agencies continually seek to improve their ability to predict health impacts. For example, CARB staff has been directed by its Governing Board to reassess and improve the methodology for estimating premature deaths. (California Air Resources Board, *Health Impacts Analysis: PM Mortality Relationship*, <http://www.arb.ca.gov/research/health/pm-mort/pm-mort.htm> (last reviewed Dec. 29, 2010).) This factor also counsels against setting any hard-and-fast rule in this case.

III. THE QUESTION OF WHETHER AN EIR CONTAINS SUFFICIENT ANALYSIS TO MEET CEQA'S REQUIREMENTS IS A MIXED QUESTION OF FACT AND LAW GOVERNED BY TWO DIFFERENT STANDARDS OF REVIEW.

A. Standard of Review for Feasibility Determination and Sufficiency as an Informative Document

A second issue in this case is whether courts should review an EIR's informational sufficiency under the “substantial evidence” test as argued by Friant Ranch or the “independent judgment” test as argued by Sierra Club.

technological factors.” (Pub. Resources Code § 21061.1.) A study cannot be “accomplished in a *successful* manner” if it produces unreliable or misleading results.

¹¹ In this case, the lead agency did not have an opportunity to determine whether the requested analysis was feasible because the comment was non-specific. Therefore, SCAQMD suggests that this Court, after resolving the legal issues in the case, direct the Court of Appeal to remand the case to the lead agency for a determination of whether the requested analysis is feasible. Because Fresno County, the lead agency, did not seek review in this Court, it seems likely that the County has concluded that at least some level of correlation of air pollution with health impacts is feasible.

As this Court has explained, “a reviewing court must adjust its scrutiny to the nature of the alleged defect, depending on whether the claim is predominantly one of improper procedure or a dispute over the facts.” (*Vineyard Area Citizens v. City of Rancho Cordova, supra*, 40 Cal.4th at 435.) For questions regarding compliance with proper procedure or other legal questions, courts review an agency’s action de novo under the “independent judgment” test. (*Id.*) On the other hand, courts review factual disputes only for substantial evidence, thereby “accord[ing] greater deference to the agency’s substantive factual conclusions.” (*Id.*)

Here, Friant Ranch and Sierra Club agree that the case involves the question of whether an EIR includes sufficient information regarding a project’s impacts. However, they disagree on the proper standard of review for answering this question: Sierra Club contends that courts use the independent judgment standard to determine whether an EIR’s analysis is sufficient to meet CEQA’s informational purposes,¹² while Friant Ranch contends that the substantial evidence standard applies to this question.

///
 ///
 ///
 ///
 ///
 ///
 ///
 ///
 ///
 ///

¹² Sierra Club acknowledges that courts use the substantial evidence standard when reviewing predicate factual issues, but argues that courts ultimately decide as a matter of law what CEQA requires. (Answering Brief, pp. 14, 23.)

SCAQMD submits that the issue is more nuanced than either party contends. We submit that, whether a CEQA document includes sufficient analysis to satisfy CEQA's informational mandates is a mixed question of fact and law,¹³ containing two levels of inquiry that should be judged by different standards.¹⁴

The state CEQA Guidelines set forth standards for the adequacy of environmental analysis. Guidelines Section 15151 states:

An EIR should be prepared with a sufficient degree of analysis to provide decision makers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate, but the EIR should summarize the main points of disagreement among the experts. The courts have looked not for perfection, but for adequacy, completeness, and a good-faith effort at full disclosure.

In this case, the basic question is whether the underlying analysis of air quality impacts made the EIR "sufficient" as an informative document. However, whether the EIR's analysis was sufficient is judged in light of what was reasonably feasible. This represents a mixed question of fact and law that is governed by two different standards of review.

¹³ Friant Ranch actually states that the claim that an EIR lacks sufficient relevant information is, "most properly thought of as raising mixed questions of fact and law." (Opening Brief, p. 27.) However, the remainder of its argument claims that the court should apply the substantial evidence standard of review to all aspects of the issue.

¹⁴ Mixed questions of fact and law issues may implicate predominantly factual subordinate questions that are reviewed under the substantial evidence test even though the ultimate question may be reviewed by the independent judgment test. *Crocker National Bank v. City and County of San Francisco* (1989) 49 Cal.3d 881, 888-889.

SCAQMD submits that an EIR’s sufficiency as an informational document is ultimately a legal question that courts should determine using their independent judgment. This Court’s language in *Laurel Heights I* supports this position. As this Court explained: “The court does not pass upon the correctness of the EIR’s environmental conclusions, but only upon its *sufficiency as an informative document*.” (*Laurel Heights I, supra*, 47 Cal.3d at 392-393) (emphasis added.) As described above, the Court in *Vineyard Area Citizens v. City of Rancho Cordova, supra*, 40 Cal.4th at 431, also used its independent judgment to determine what level of analysis CEQA requires for water supply impacts. The Court did not defer to the lead agency’s opinion regarding the law’s requirements; rather, it determined for itself what level of analysis was necessary to meet “[t]he law’s informational demands.” (*Id.* at p. 432.) Further, existing case law also holds that where an agency fails to comply with CEQA’s information disclosure requirements, the agency has “failed to proceed in the manner required by law.” (*Save Our Peninsula Comm. v. Monterey County Bd. of Supervisors* (2001) 87 Cal.App.4th 99, 118.)

However, whether an EIR satisfies CEQA’s requirements depends in part on whether it was reasonably feasible for an agency to conduct additional or more thorough analysis. EIRs must contain “a detailed statement” of a project’s impacts (Pub. Res. Code § 21061), and an agency must “use its best efforts to find out and disclose all that it reasonably can.” (CEQA Guidelines § 15144.) Nevertheless, “the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible.” (CEQA Guidelines § 15151.)

SCAQMD submits that the question of whether additional analysis or a particular study suggested by a commenter is “feasible” is generally a question of fact. Courts have already held that whether a particular alternative is “feasible” is reviewed by the substantial evidence test.
