The subject property at Assessor's Parcel Number 297-170-002 and 297-170-003 in Moreno Valley, California is located on the south side of Alessandro Boulevard. According to the Riverside County Assessor, the subject property is legally described as Lot 2 and 3 of Bear Valley & Alessandro Development Co. Block 242, Map Book 11, Page 11.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently unimproved tilled vacant land. No operations are currently performed on site. Two concrete pipes were observed on the north-northwest and northeast which distribute public right of way stormwater runoff onto the subject property. Partner further observed overhead electrical power lines on the north boundary, communication utility boxes on the north boundary, and municipal stormwater drains on the south boundary.

The subject property is designated for commercial development by the City of Moreno Valley.

The subject property was not identified in the regulatory database report of Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial, industrial, undeveloped, and residential area of Riverside County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Alessandro Boulevard followed by Plaza Del Sol, Plaza Car Wash (23100 Alessandro Boulevard), Sienna Pointe Apartments (13933 Chagall Court), and residential homes

South: Prologis Logistics Center (23450 Brodiaea Avenue)

East: Undeveloped vacant land

West: Undeveloped vacant land

The adjacent property to the northwest was identified as an Underground Storage Tank (UST), Leaking Underground Storage Tank (LUST), and California Environmental Reporting System (CERS) site in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Riverside East, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 1,565 to 1,570-feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping moderately toward the south. Improvements, with the exceptions of roadways, are not depicted on the 2018 map.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the south. The nearest surface water in the vicinity of the subject property is an unnamed channel located approximately 0.45-miles west of the subject property. Additionally, a drainage extends across the subject property from north to south. The feature appears to have been a former natural drainage and now appears to be an engineered flood control measure with storm water entering the property from a culvert on its northern portion. As such, regulations pertaining to wetlands may be applicable to future development plans in the vicinity of this drainage feature. No other settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

No potable water is currently supplied to the subject property. According to available information, a public water system operated by the Eastern Municipal Water District (EMWD) serves the subject property vicinity. According to available information, shallow groundwater directly beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Moreno Valley are surface water imported from northern California through the State Water Project, two Moreno Valley wells, three Perris Valley wells, treated water from the Colorado River, and groundwater from the Menifee, North Canyon Lake and Quail Valley communities.

According to a previous subsurface investigation conducted on a nearby property (23100 Alessandro Boulevard and Closed Case #200521458), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 46 to 48 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the Peninsular ranges of the geomorphic province of the State of California. The Peninsular range is a series of ranges separated by northwest trending valleys and traversed by several major active faults. The Whittier-Elsinore, San Jacinto, Newport-Inglewood, and San Andreas faults are major active fault systems located in the vicinity of the subject property. The Peninsular ranges extend into lower California, are bound to the east by the Colorado River, and extend into the Los Angeles Basin and the island group surrounding the continental shelf.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Monserate sandy loam (MmB). The Monserate series consists of very deep and well drained soils that formed in linear and tread alluvial fans derived from granite. The typical MmB profile is sandy loam at 0 to 10 inches; sandy clay loam at 10 to 28 inches; indurated at 28 to 45 inches; cemented at 45 to 57 inches; and loamy coarse sand, coarse sandy loam at 57 to 70 inches on slopes ranging between 0 and 5 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06065C0745G, dated August 28, 2008, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is included in Appendix B of this report.

Attachment: Appendix G-Phase I ESA (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

<i>Historical Use Information</i>		
Period/Date	Source	Description/Use
1901-Present	Aerial Photographs, Topographic Maps, Onsite Observations	Undeveloped

According to available historical sources, the subject property has been undeveloped from as early as 1901 to the present. Intermittent streams and stormwater runoff appear to flow across the subject property (trending south) from as early as 1949.

No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on November 26, 2019. The following was observed on the subject property and adjacent properties during the aerial photograph review:

<i>Date:</i>	<i>1938, 1949, 1953, 1959, 1967, 1978</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	Undeveloped; an intermittent stream is present on the east and west boundaries trending south		
North:	Undeveloped across Alessandro Boulevard		
South:	Undeveloped		
East:	Undeveloped		
West:	Undeveloped		

<i>Date:</i>	<i>1985</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	Undeveloped; a stream is present on the west		
North:	Appears to be under construction of the current commercial and residential properties across Alessandro Boulevard		
South:	Undeveloped		
East:	Undeveloped		
West:	Undeveloped		

<i>Date:</i>	<i>1989</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	Undeveloped; a stream is present on the east and west		
North:	Developed with the current residential properties across Alessandro Boulevard		
South:	Undeveloped		
East:	Undeveloped		
West:	Undeveloped		

Attachment: Appendix G-Phase I ESA (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Date:	1994, 2006	Scale:	1"=500'
Subject Property:	Undeveloped; a stream is present on the east and west		
North:	Developed with the current residential and commercial properties across Alessandro Boulevard		
South:	Undeveloped		
East:	Undeveloped		
West:	Undeveloped		

Date:	2009	Scale:	1"=500'
Subject Property:	Undeveloped; a stream is present on the east and west		
North:	Developed with the current residential and commercial properties across Alessandro Boulevard		
South:	Vacant land and developed with a new road		
East:	Undeveloped		
West:	Undeveloped		

Date:	2012, 2016	Scale:	1"=500'
Subject Property:	Undeveloped; a stream is present on the east and west		
North:	Developed with the current residential and commercial properties across Alessandro Boulevard		
South:	Vacant land and developed and occupied with a truck trailer storage yard		
East:	Undeveloped		
West:	Undeveloped		

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on November 26, 2019. Sanborn map coverage was not available for the subject property.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on December 5, 2019 for past names and businesses that were listed for the subject property and adjacent properties. City directories were not identified for the subject property. The adjacent property findings are presented in the following table:

City Directory Search for Adjacent Properties	
Year(s)	Occupant Listed
1975	No listings
1981	No listings
1985	No listings
1992	No listings
1995	Gogo China, Plaza Car Wash (23100 Alessandro Boulevard)
2000	Gogo China, Plaza Del Sol Hand Carwash, Ebony Hair, Fraser Rod Enterprises Inc. (23100 Alessandro Boulevard)
2005	Gogo China, Plaza Hand Carwash Inc., Ebony Hair, Rod Fraser Enterprises Inc. (23100 Alessandro Boulevard)
2010	Gogo China, Rod Fraser Enterprises Inc., Amkusk Investments LLC, Ebony Hair (23100 Alessandro Boulevard)

City Directory Search for Adjacent Properties

Year(s) Occupant Listed

2014 Ebony Hair, Gogo China, M and M Cleaners (23100 Alessandro Boulevard)

According to the city directory review, the adjacent properties have been occupied by commercial businesses from as early as 1995. The adjacent properties to the northwest (23100 Alessandro Boulevard) across Alessandro Boulevard, were identified on the EDR regulatory database as further discussed in section 4.2.3.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on November 26, 2019. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1901, 1942, 1947, 1953, 1967, 1980

Subject Property: Undeveloped
North: Undeveloped across Alessandro Boulevard
South: Undeveloped
East: Undeveloped
West: Undeveloped

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data

Name of Agency:	Riverside County Health Department of Environmental Health (RCDEH)
Point of Contact:	Records Management Department
Agency Address:	4065 County Circle Drive, Room 104, Riverside, CA
Agency Phone Number:	(951) 358-7018
Date of Contact:	November 26, 2019 and December 4, 2019
Method of Communication:	Email, Mail Response
Summary of Communication:	The RCDEH records department cannot locate or research a request without a physical address. As of this date, the subject property has not been issued an address.

4.1.2 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency:	Air Quality Management District (AQMD)
Point of Contact:	http://www3.aqmd.gov/webappl/fim/prog/search.aspx
Agency Address:	21865 Copley Drive, Diamond Bar, California
Agency Phone Number:	(909) 396-2000
Date of Contact:	November 26, 2019 and December 10, 2019
Method of Communication:	Online Database
Summary of Communication:	No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD.

4.1.3 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency:	State Water Resources Control Board (SWRCB) Santa Ana Regional Water Quality Control Board (RWQCB)
Agency Address:	http://geotracker.waterboards.ca.gov/
Agency Phone Number:	(951) 782-4130
Date of Contact:	November 26, 2019 and December 10, 2019
Method of Communication:	Online Database
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.4 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency:	California Department of Toxic Substances Control (DTSC)
Agency Address:	http://www.envirostor.dtsc.ca.gov/public/ http://hwts.dtsc.ca.gov/report_search.cfm?id=5
Agency Phone Number:	(877) 786-9427
Date of Contact:	November 26, 2019 and December 10, 2019
Method of Communication:	Online Database
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC.

4.1.5 Building Department

Regulatory Agency Data

Name of Agency:	Moreno Valley Building and Safety Division
Point of Contact:	City Clerk and http://www.moreno-valley.ca.us/cdd/departament/divisions-building-safety.html
Agency Address:	14177 Frederick Street, Moreno Valley, California
Agency Phone Number:	(951) 413-3350
Date of Contact:	November 26, 2019 and December 10, 2019
Method of Communication:	Online Research and Telephone
Summary of Communication:	No records for the subject property were available from the Division.

4.1.6 Planning Department

Regulatory Agency Data

Name of Agency:	Planning Division, Moreno Valley Community Development Department
Point of Contact:	http://www.moreno-valley.ca.us/city_hall/city_maps.shtml
Agency Address:	14177 Frederick Street, Moreno Valley, California
Agency Phone Number:	(951) 413-3380
Date of Contact:	November 26, 2019 and December 10, 2019
Method of Communication:	Online Database
Summary of Communication:	According to records reviewed, the subject property is zoned CC for commercial development by the City of Moreno Valley.

4.1.7 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	http://maps.conservation.ca.gov/doms/doms-app.html
Agency Phone Number:	(916) 322-1080
Date of Contact:	November 26, 2019
Method of Communication:	Online Database
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.8 Assessor's Office

Regulatory Agency Data

Name of Agency:	Riverside County Assessor (RCA)
Point of Contact:	https://gis.countyofriverside.us/Html5Viewer/?viewer=MMC_Public http://pic.asrclkrec.com/
Agency Address:	4080 Lemon Street, 1st Floor Riverside, California
Agency Phone Number:	(951) 955-9553
Date of Contact:	November 26, 2019 and December 10, 2019
Method of Communication:	Online Database
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Numbers (APNs) 297-170-002 and 297-170-003 and totals 17.77 acres. No records regarding property ownership and utility information for the subject property was on file with the Assessor.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSD Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	N	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N/A	N/A
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	Y	N

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	Y	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
California Environmental Reporting System (CERS)	0.25	N	Y	N
Department of Defense (DOD)	1.00	Y	Y	N
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	N	N
EDR US Hist Cleaners	Varies	N	N	N

4.2.2 Subject Property Listings

The subject property and adjacent properties to the north, south, east, and west were identified on the EDR regulatory database as situated within the former March Air Force Base Department of Defense (DOD) boundary. The DOD database listing identifies March Air Force Base as a closed site. March Air Force Base is currently bounded by Cactus Avenue on the north, approximately 0.40-miles south (hydrologically down-gradient) of the subject property. The subject property not mapped within an NPL or Area of Concern (AOC) associated with the closed base. Based on the subject property and adjacent properties being historically undeveloped, and the down-gradient location of known impacted soil and groundwater associated with March Air Force Base, this listing is not expected to represent a significant environmental concern to the subject property.

4.2.3 Adjacent Property Listings

The adjacent property to the northwest is identified as an EDR Historical Cleaner site in the regulatory database report, as discussed below:

- M and M Cleaners at 23100 Alessandro Boulevard was historically located adjacent to the northwest (hydrologically up to cross-gradient) of the subject property, across Alessandro Boulevard. M and M Cleaners is listed on the EDR Historical Cleaner database as a dry-cleaning plant between 2012 and 2014. No additional information for this site was provided in the regulatory database. Furthermore, no RCRA, CERS, or HAZNET database listings were included for this site which indicates the facility was presumably a drop off agency. Based on the apparent limited duration of operations, and lack of reported releases or violations, this listing is not expected to represent a significant environmental concern to the subject property.

The adjacent property to the northwest is identified as an Underground Storage Tank (UST), Leaking Underground Storage Tank (LUST), and California Environmental Reporting System (CERS) site in the regulatory database report, as discussed below:

- Plaza Hand Car Wash at 23100 Alessandro Boulevard is located adjacent to the northwest (hydrologically up to cross-gradient) of the subject property, across Alessandro Boulevard. Plaza

Hand Car Wash is listed on the SWEEPS UST database with one 10,000-gallon regular unleaded gasoline tank and two 5,000-gallon premium unleaded gasoline tanks in 1994. The USTs are listed as registered with the State Water Resources Control Board (SWRCB) as tank identification site 33-000-000300-000001; 33-000-000300-000002; and 33-000-000300-000003. The UST database lists Plaza Hand Car Wash as permitted UST facility identification number 593. The CERS database lists Plaza Hand Car Wash as a chemical storage facility with permitted oversight provided by Riverside County Department of Environmental Health (RCDEH). No open violations were noted on the CERS database. On March 2005 during the removal of the USTs soils and shallow groundwater beneath the tanks and dispensers were determined to be impacted with methyl tert-butyl ether (MTBE), total petroleum hydrocarbons as gasoline (TPHg), benzene, toluene, ethylbenzene, xylenes (BTEX), tertiary-Amyl methyl ether (TAME), and volatile organic compounds (VOCs). As a result, three groundwater monitoring were installed to a depth of 48 to 50 feet below ground surface (bgs). Groundwater monitored after five quarters was returned with non-detected results of TPHg, BTEX, Oxygenates, MTBE, TAME, and VOCs. On December 31, 2008 the RCDEH issued a completion of site investigation and corrective action letter with no further action to Plaza Hand Car Wash. Based on the regulatory permitted oversight, regulatory closure, and tank removal with agency oversight, this site is not expected to represent a significant environmental concern to the subject property.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Compass Danbe Real Estate Partner LLC (User of this report).

User Responsibilities				
Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire		X		
Title Records, Environmental Liens, and AULs			X	
Specialized Knowledge			X	
Actual Knowledge			X	
Valuation Reduction for Environmental Issues			X	
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports		X		
Other				X

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property was not available to be interviewed.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

5.1.3 Interview with Key Site Manager

A key site manager was not provided.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was provided with an ALTA Commitment for Title Insurance for the subject property dated November 1, 2019 and prepared by First American Title company for review as part of this assessment.

According to the report, the title search describes the subject property as assessor parcel number 297-170-002 and 297-170-003 and vested in Moreno Valley Centerpointe LLC. A drainage easement agreement was recorded December 2, 1987 as instrument number 341821 and a flood control and drainage offer of dedication was recorded December 23, 2009 as instrument number 2009-0657601. The title search did not identify any additional environmental noteworthy matters.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By:	Ramiro Vejar
Site Assessment Conducted On:	December 6, 2019

Partner was not accompanied during the field reconnaissance activities.

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste is not currently generated at the subject property. A small concrete mound and three four foot steel lids were observed as illegally dumped on the south-southwest of the subject property. No additional evidence of illegal dumping or solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges are not currently generated at the subject property. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water directly infiltrates unpaved onsite soils and flows south towards stormwater drains.

The subject property does not appear to be a designated/mapped wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. A drainage extends across the subject property from north to south. The feature appears to have been a former natural drainage and now appears to be an engineered flood control measure with storm water entering the property from a culvert on its northern portion. As such, regulations pertaining to wetlands may be applicable to future development plans in the vicinity of this drainage feature. No other surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

No heating or cooling equipment was observed on the subject property.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. Construction materials including, but not limited to, thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building and that have not been appropriately tested may be considered "presumed asbestos-containing material" (PACM).

No buildings or structures are located on the subject property. As such, an asbestos evaluation was not required by the scope of services.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

No buildings or structures are located on the subject property. As such, an LBP evaluation was not required by the scope of services.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones

EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location.

However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Eastern Municipal Water District (EMWD) serves the subject property vicinity. According to available information, shallow groundwater directly beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Perris are surface water imported from northern California through the State Water Project, two Moreno Valley wells, three Perris Valley wells, treated water from the Colorado River, and groundwater from the Menifee, North Canyon Lake and Quail Valley communities.

According to the EMWD and the 2017 Annual Water Quality Report, water supplied to the subject property vicinity is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

At the time of Partner's site visit, the subject property was observed to be vacant land; therefore, an evaluation of mold was not included in the scope of this assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner did not identify any environmental issues during the course of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of Assessor's Parcel Number 297-170-002 and 297-170-003 in Moreno Valley, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at Assessor's Parcel Number 297-170-002 and 297-170-003 in Moreno Valley, Riverside County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

ALTA Commitment for Title Insurance

F.1.n

ISSUED BY

First American Title Insurance Company

File No: NCS-988766-SA1

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT-READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, **First American Title Insurance Company**, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

First American Title Insurance Company

Dennis J. Gilmore
President

Jeffrey S. Robinson
Secretary

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

Attachment: Appendix G-Phase I ESA (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

1. DEFINITIONS

- (a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
- (b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
- (c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
- (d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
- (e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
- (f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
- (g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
- (h) "Title": The estate or interest described in Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

- (a) the Notice;
- (b) the Commitment to Issue Policy;
- (c) the Commitment Conditions;
- (d) Schedule A;
- (e) Schedule B, Part I—Requirements; and
- (f) Schedule B, Part II—Exceptions.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

- (a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
 - (i) comply with the Schedule B, Part I—Requirements;
 - (ii) eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
 - (iii) acquire the Title or create the Mortgage covered by this Commitment.
- (b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
- (c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
- (d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
- (e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
- (f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
- (g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

Attachment: Appendix G-Phase I ESA (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

- (a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
- (b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
- (c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
- (d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
- (e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
- (f) **When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.**

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION

Arbitration provision intentionally removed.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

ISSUED BY

First American Title Insurance Company

File No: NCS-988766-SA1

Commitment No.: NCS-988766-SA1

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

- A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.
- B. Pay the agreed amount for the estate or interest to be insured.
- C. Pay the premiums, fees, and charges for the Policy to the Company.
- D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.
- E. Releases(s) or Reconveyance(s) of Item(s): None
- F. Other: None
- G. You must give us the following information:
 - a. Any off record leases, surveys, etc.
 - b. Statement(s) of Identity, all parties.
 - c. Other: None

The following additional requirements, as indicated by "X", must be met:

- H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form (as provided by the company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

- I. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

- [X] J. The following LLC documentation is required from:
- (i) a copy of the Articles of Organization
 - (ii) a copy of the Operating Agreement, if applicable
 - (iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iv) express Company Consent to the current transaction
- [] K. The following partnership documentation is required :
- (i) a copy of the partnership agreement, including all applicable amendments thereto
 - (ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iii) express Partnership Consent to the current transaction
- [] L. The following corporation documentation is required:
- (i) a copy of the Articles of Incorporation
 - (ii) a copy of the Bylaws, including all applicable Amendments thereto
 - (iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iv) express Corporate Resolution consenting to the current transaction
- [X] M. Based upon the Company's review of that certain partnership/operating agreement dated **Not disclosed** for the proposed insured herein, the following requirements must be met: Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.
- [] N. A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review, along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.
- [X] O. Approval from the Company's Underwriting Department must be obtained for issuance of the policy contemplated herein and any endorsements requested thereunder. This Commitment will then be subject to such further requirements as may be required to obtain such approval.
- [] P. Potential additional requirements, if ALTA Extended coverage is contemplated hereunder, and work on the land has commenced prior to close, some or all of the following requirements, and any other requirements which may be deemed necessary, may need to be met:
- [] Q. The Company's "Indemnity Agreement I" must be executed by the appropriate parties.

Schedule BI & BII (Cont.)

ALTA Commitment for Title Insurance

F.1.n

ISSUED BY

First American Title Insurance Company

File No: NCS-988766-SA1

Commitment No.: NCS-988766-SA1

SCHEDULE B, PART II

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met.
2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
7. General and special taxes and assessments for the fiscal year 2019-2020.

First Installment:	\$3,386.96, OPEN
Penalty:	\$0.00
Second Installment:	\$3,386.96, OPEN
Penalty:	\$0.00
Tax Rate Area:	021-332

8. General and special taxes and assessments for the fiscal year 2019-2020.

First Installment: \$8,689.56, OPEN
 Penalty: \$0.00
 Second Installment: \$8,689.56, OPEN
 Penalty: \$0.00
 Tax Rate Area: 021-332
 A. P. No.: 297-170-002-6

(Affects Parcel 2)

9. The land lies within the boundaries of proposed community facilities District No. 91-1, as disclosed by a map filed August 08, 1991 in [Book 33, Page 41](#) and August 30, 1991 in [Book 33, Pages 53-61](#), both of maps of assessment and community facilities districts.
10. The land lies within the boundaries of proposed community facilities District No. 4, as disclosed by a map filed September 22, 2005 in [Book 64, Page 19](#) of maps of assessment and community facilities districts.
11. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.
12. Covenants, conditions, restrictions and easements in the document recorded September 24, 1969 as Instrument No. [98071](#) of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, sexual orientation, familial status, disability, handicap, national origin, genetic information, gender, gender identity, gender expression, source of income (as defined in California Government Code § 12955(p)) or ancestry, to the extent such covenants, conditions or restrictions violation 42 U.S.C. § 3604(c) or California Government Code § 12955. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

(Affects Both Parcels)

Document(s) declaring modifications thereof recorded April 05, 1972 as Instrument No. [44054](#) of Official Records.

13. Covenants, conditions, restrictions and easements in the document recorded January 07, 1971 as Instrument No. [1391](#) of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, sexual orientation, familial status, disability, handicap, national origin, genetic information, gender, gender identity, gender expression, source of income (as defined in California Government Code § 12955(p)) or ancestry, to the extent such covenants, conditions or restrictions violation 42 U.S.C. § 3604(c) or California Government Code § 12955. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

(Affects Both Parcels)

- 14. Matters in a document entitled "Drainage Easement Agreement", executed by and between Wilma Pacific Inc. and The Centennial Group Inc., recorded December 02, 1987 as Instrument No. [341821](#) of Official Records, including but not limited to covenants, conditions, restrictions, easements, assessments, liens and charges.

(Affects Both Parcels)

- 15. The fact that the land lies within the boundaries of the Moreno Valley Redevelopment Project Area, as disclosed by the document recorded December 29, 1987 as Instrument No. [365197](#) of Official Records.

(Affects Both Parcels)

- 16. A document entitled "Resolution No. CPAB-88-2" recorded January 13, 1989 as Instrument No. [12874](#) of Official Records.

(Affects Both Parcels)

- 17. The terms, provisions and easement(s) contained in the document entitled "Temporary Declaration of Easement for Acceptance of Drainage Waters" recorded January 22, 2009 as Instrument No. [2009-0029343](#) of Official Records.

(Affects Both Parcels)

- 18. An offer of dedication for flood control and drainage and incidental purposes, recorded December 23, 2009 as Instrument No. [2009-0657601](#) of Official Records.
To: Riverside County Flood Control and Water Conservation District

(Affects Parcel 2)

Said offer was accepted by resolution, a certified copy of which was recorded January 31, 2011 as Instrument No. [2011-0049024](#), Official Records.

The effect of a document entitled "Quitclaim Deed", recorded January 31, 2011 as Instrument No. [2011-0049025](#) of Official Records.

Said document was not executed by the correct parties of record.

- 19. We find no outstanding voluntary liens of record affecting subject property. An inquiry should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any security interest in the subject property.

(Affects Both Parcels)

- 20. Water rights, claims or title to water, whether or not shown by the public records.

(Affects Both Parcels)

ALERT - CA Senate Bill 2 imposes an additional fee of \$75 up to \$225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. The property covered by this report is vacant land.

(Affects Both Parcels)
2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

None
3. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

The map attached, if any, may or may not be a survey of the land depicted thereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of this Commitment or the Policy, if any, to which the map is attached.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MARCH AIR FORCE BASE Cerclis ID:: 902761 EPA Id: CA4570024527	22 CSG/CC	S 1/4 - 1/2 (0.363 mi.)	0	8

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MARCH AIR FORCE BASE Site ID: 0902761 EPA Id: CA4570024527	22 CSG/CC	S 1/4 - 1/2 (0.363 mi.)	0	8

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 08/19/2019 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EPA ID:: CA4570024527				

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 08/19/2019 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there are

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAL000260330

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 05/15/2019 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MARCH FIELD		SW 1/8 - 1/4 (0.207 mi.)	E34	112

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 12/31/2005 has revealed that there is 1 DOD site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MARCH AIR FORCE BASE		0 - 1/8 (0.000 mi.)	0	8

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MARCH AIR FORCE BASE EPA ID:: CA4570024527	22 CSG/CC	S 1/4 - 1/2 (0.363 mi.)	0	8

UXO: A listing of unexploded ordnance site locations

A review of the UXO list, as provided by EDR, and dated 12/31/2017 has revealed that there is 1 UXO site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MARCH FIELD SKEET RA		SW 1/8 - 1/4 (0.207 mi.)	E33	112

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholstery cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 7 DRYCLEANERS sites

HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the HWT list, as provided by EDR, and dated 10/07/2019 has revealed that there is 1 HWT site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

EPA ID: CA4570024527
 Summary: Conditions at proposal July 14, 1989): March Air Force Base (MAFB) covers approximately 7,000 acres near Riverside in the Moreno Valley in Riverside County, California. MAFB is adjacent to light industrial, agricultural, and residential are

EPA ID: CA4570024527
 Summary: as. Established in 1918 as the Alessandro Aviation Field, MAFB has served as a training base and refueling operations base. Industrial operations (including aircraft maintenance and repair) involved use of solvents and disposal of solvent wast

EPA ID: CA4570024527
 Summary: es. MAFB is participating in the Installation Restoration Program (IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from hazardous materials. As part of

EPA ID: CA4570024527
 Summary: IRP, the Air Force investigated 28 potentially contaminated disposal areas. MAFB Well No. 1 on-base was found to be contaminated with trichloroethylene, tetrachloroethylene, and cis-1,2-dichloroethylene

- . Waste code: F005
- . Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

- . Waste code: P098
- . Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

- . Waste code: U188
- . Waste name: PHENOL

- . Waste code: U227
- . Waste name: 1,1,2-TRICHLOROETHANE (OR) ETHANE, 1,1,2-TRICHLORO-

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 15899.4

- Waste code: D002
- Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 186

- Waste code: D003
- Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Amount (Lbs): 1

- Waste code: D005
- Waste name: BARIUM
- Amount (Lbs): 8

- Waste code: D006
- Waste name: CADMIUM
- Amount (Lbs): 843

of the dry cleaning solvent, tetrachloroethene (also known as perchloroethylene or PCE), in soil and groundwater under the M&M Cleaners, the alley located north of the Property, and under the parking lot located to the south. However, these initial investigations have not been able to determine how far the PCE may have migrated since it was released. Soil gas investigations that were conducted in 2013 and early 2014 detected the presence of elevated concentrations of PCE in the soil vapor beneath the dry cleaners, adjacent units of the shopping center, the alley behind the shopping center, and the parking area of the Sienna Pointe apartments. Mitigation of the soil vapor intrusion risk is a driving factor in the selection of remediation technologies and is the current focus of work at the Site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,?2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October?1,?2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Citation: 23 CCR 16 2632(c)(2)(A)&(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(A)&(B)
 Violation Description: Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.
 Violation Notes: Returned to compliance on 04/16/2019. OBSERVATION: Observed the L1 87 Main Annular 407 sensor fail to activate an audible and visual alarm when tested. After todays inspection and reviewing work order from 9/4/2018 it appears that there may be potential liquid/fuel in the annular space. CORRECTIVE ACTION: Owner/operator shall repair/replace inoperable L1 87 Main Annular 407 sensor and certify that sensor will activate an audible visual alarm when a leak is detected. Due to potential liquid/fuel in the annular space owner/operator will need to conduct a tank integrity test to verify if there is a leak in the primary and submit results to this department.

prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes:

Returned to compliance on 06/27/2019. OBSERVATION: An overfill equipment inspection was not completed by the October 13, 2018 deadline. CORRECTIVE ACTION: Owner/operator shall immediately schedule and complete an overfill equipment inspection providing the required 48 hour notification prior to conducting the inspection. Inspection results and all supporting documentation (inspection procedures used, tank charts, printouts, etc.) must be submitted to this Department within 30 days upon completion of the inspection. Testing is being conducted today.

Hazardous Waste Summary:

. Waste code: 214
 . Waste name: Unspecified solvent mixture

. Waste code: D001
 . Waste name: IGNITABLE WASTE

. Waste code: F003
 . Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
 . Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: N/A
Date Made Active in Reports: 11/20/2019	Last EDR Contact: 11/07/2019
Number of Days to Update: 13	Next Scheduled EDR Contact: 01/13/2020
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: N/A
Date Made Active in Reports: 11/20/2019	Last EDR Contact: 11/07/2019
Number of Days to Update: 13	Next Scheduled EDR Contact: 01/13/2020
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019
 Date Data Arrived at EDR: 04/05/2019
 Date Made Active in Reports: 05/14/2019

 Next Scheduled EDR Contact: 01/13/2020
 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

 Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

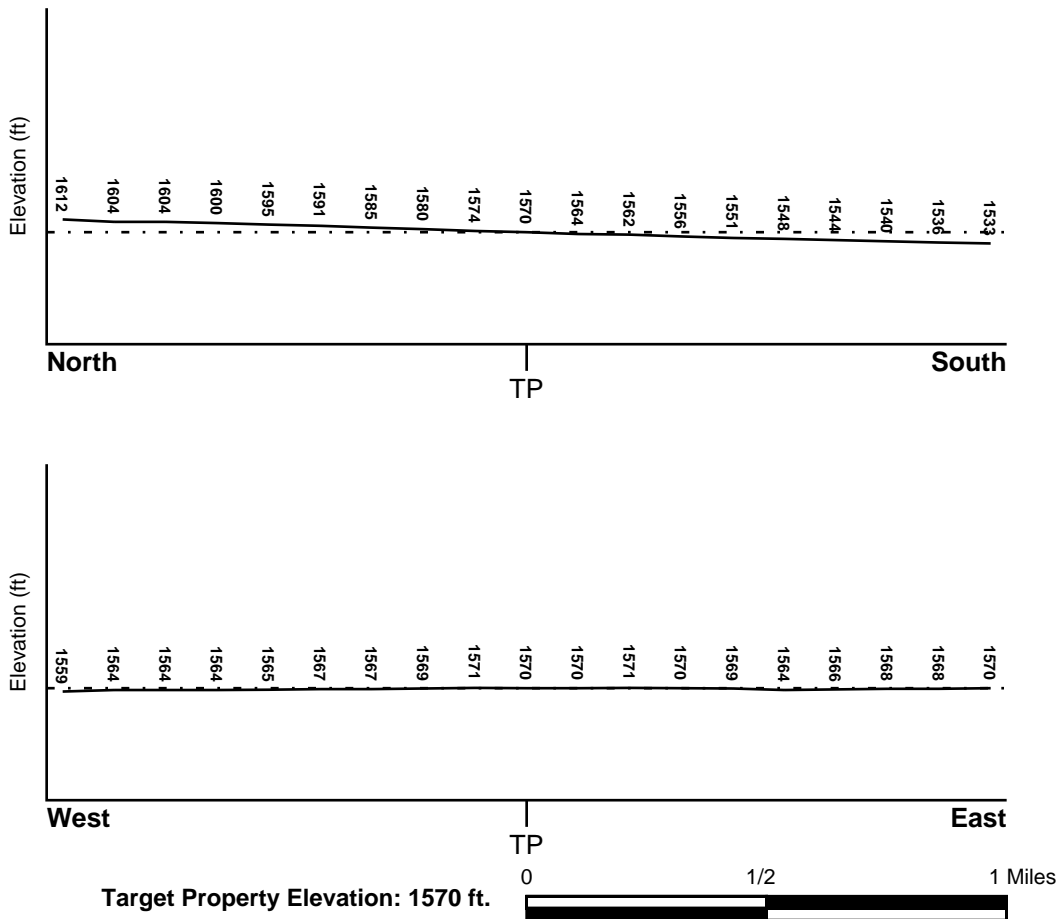

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

Attachment: Appendix G-Phase I ESA (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06065C0745G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
 Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MONSERATE

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	9 inches	27 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
3	27 inches	44 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
4	44 inches	57 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Attachment: Appendix G-Phase I ESA (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Highlights

7 years of experience in the environmental consulting industry

Phase I Environmental Site Assessments

Records Search Risk Assessment Reports

Experience Summary

Mr. Vejar has over 7 years of experience in the environmental consulting industry conducting Database Reviews (DR), Records Search Risk Assessment Reports (RSRA), Historical Records Review (HRR), Historical Records and Database Review (HRDR), Extended Database Search (EDS), Environmental Transaction Screen (ETS), Phase I Environmental Site Assessments (ESA), Asbestos Sampling and Radon Screenings and other related environmental assessments. He is knowledgeable with various property types, including apartment buildings/complexes, commercial office buildings, shopping centers, multi-tenant commercial complexes, industrial warehouses, manufacturing facilities, gasoline service stations, and dry cleaning operations.

Project Experience

Phase I ESA, Santa Fe Springs Marketplace, Santa Fe Springs, California. A 100,133 SF retail center on 13.07 acres including restaurants, retail, and an active drycleaner release site with ongoing remediation.

Phase I ESA, Harbor Auto Care Center, Santa Ana, California. An eleven tenant automotive repair and service center with storage of hazardous materials and generated hazardous waste.

Phase I ESA, Mass Kansas, Riverside, California. A 102,742 SF fiberglass and composite manufacturing of below ground enclosures on a 14.42 acre facility. Impacted with volatile organic compounds (VOCs) from historic manufacturing an industrial operations that operated from the facility since the 1940s.

Phase I ESA, Park @ VNY, Van Nuys, California. A 37.34 acre historic Former Used Defense Site during World War II occupied by the United States Army between 1942 and 1946 and by the California Air National Guard between 1954 and 1989.

Phase I ESA, Montclair, California. A 1.24 acre property with a gasoline service station and car wash building. The site was identified with an open release case and ongoing Santa Ana Regional Water Quality Control Board (RWQCB) oversight.

Ramiro Vejar

Phase I ESA, Bellflower, California. A six parcel commercial property with three multistory buildings which was historically occupied by two gasoline stations in the 1920s and 1930s prior to the redevelopment of the retail structures in 1946 and 1957. Phase II subsurface investigation was recommended which included advancing borings for soil analysis and geophysical surveys to identify potential Underground Storage Tanks (USTs) or backfill anomalies.

Phase I ESA, Moon Valley Nursery, Hemet, California. An 80 acre nursery property with barns, residential living, pesticide and herbicide storage, and related horticultural activities.

Phase I ESA, Gasser Olds Bronze, Vernon, California. A 24,375SF bronze foundry and metal plaque manufacturing facility operating since 1982 from a building which has been historically occupied for industrial use since it was constructed in 1941.

Sarah Vosovic
Project Manager

Education

B.S., Environmental Science, California State University, Chico

Registrations

OSHA 40-Hour HAZWOPER

AHERA Building Inspector training

California Department of Health Services/USEPA Lead Inspector/Assessor training

Summary of Professional Experience

Ms. Vosovic has more than 14 years of experience in the environmental consulting field and has worked in various disciplines, including environmental due diligence, NEPA compliance, lead-based paint and asbestos assessment, and LUST monitoring and reporting. Ms. Vosovic has performed hundreds of Phase I ESAs. She has also served as senior reviewer for NEPA compliance documents, with thousands of reports reviewed. She has tracked and managed the regulatory compliance for hundreds of microwave sites for a major telecommunications carrier.

Ms. Vosovic is well versed in EPA's All Appropriate Inquiry and ASTM E1527-13. She is knowledgeable in due diligence reporting standards, including Fannie Mae DUS, Freddie Mac, and HUD. Ms. Vosovic has conducted Phase I ESAs on a wide range of properties. Site assessment experience includes agricultural properties, semiconductor manufacturing facilities, fueling and automobile repair facilities, chemical distribution facilities, landfills, oil well fields, telecommunications sites, and shopping centers with dry cleaning facilities. She has scoped projects, mentored field personnel, identified environmental risks, and regularly provides detailed reports within demanding deadlines.

Ms. Vosovic is responsible for conducting all aspects of Phase I Environmental Site Assessments including proposal writing, staffing projects, client liaison, site reconnaissance and record reviews. Ms. Vosovic also provides management and QA/QC review of Phase I ESAs and Transaction Screens, and is focused on providing exemplary client service. Ms. Vosovic is responsible for ensuring consistency and quality of due diligence services and ensuring that client-specific requirements are met, as well as the requirements of ASTM and AAI standards. Ms. Vosovic displays excellent technical writing and editing skills, attention to detail, and excels at providing concise, logical conclusions and recommendations.

Project experience for Ms. Vosovic includes the following:

- Provided senior review for thousands of NEPA Screening Reports, Environmental Assessments, Section 106 Reports, SHPO consultation packets, NEPA Audit Reports, and

Sarah Vosovic

other related documents for various telecommunications industry clients. NEPA Technical Manager for multiple telecommunications industry clients in the western United States. Served as the primary point of contact with multiple state and federal agencies.

- Assisted in subsurface investigations at heavily industrialized and commercially developed properties. Subsurface investigations included the installation of soil borings, characterization of soils, and subsequent sampling of soil and groundwater. Oversaw geophysical surveys.
- Evaluated proposed microwave installations, LTE installations and underlying support structures for compliance with environmental, FAA, and FCC regulations. Tracked and managed over 700 microwave sites in two markets. Worked closely with the client, construction managers, turf vendors, engineers, and RF safety engineers to obtain and track regulatory compliance documentation.
- Managed a database and scheduled quarterly reporting for 45 leaking underground storage tank (LUST) cases under regulatory direction. Prepared Groundwater Monitoring Reports, NPDES Quarterly Reports, Subsurface Investigation Reports, Remediation Work Plans, Sensitive Receptor Surveys, and UST Cleanup Fund submittals. Collected soil and groundwater samples for laboratory analysis.
- Performed regulatory compliance audits for a major telecommunications carrier. Provided solutions and established protocols for ensuring compliance.
- Laboratory Instructor for Introductory Geology and Environmental Science courses at California State University, Chico.

Education

Bachelor of Arts, Public Administration & Economics, San Diego State University
Executive MBA Program, 2000-2003

Highlights

Over 20 years of experience in the environmental and engineering consulting industry
Property Condition Assessments (PCAs)
Fannie Mae, Freddie Mac, and HUD due diligence

Experience Summary

Mr. Lambson is a true veteran of the commercial real estate services industry. He has over 20 years of experience managing and performing environmental and engineering consulting projects on a national level. Mr. Lambson serves as a Principal for Partner and is located in Partner's San Diego County office. Mr. Lambson currently provides client management and consulting to a nationwide client base and specializes in advising "equity" clients during the acquisition phase of commercial property transactions in the U.S., Mexico, and Canada.

Mr. Lambson has assisted clients on over 10,000 commercial real estate transactions throughout his career. His due diligence resume includes experience at all levels, and includes advising REITs, developers, property managers, retail companies, commercial real estate brokers, mortgage brokers, attorneys, lenders, universities, and real estate investment groups with the following nationwide services:

- Property Condition Assessments (PCAs)
- Individual Building System Inspections for Roof, Mechanical Electrical Plumbing (MEP), Elevator, Structure, Façade, and ADA/Accessibility
- Phase I Environmental Site Assessments (ESAs)
- Phase II Subsurface Investigations (Soil and groundwater sampling and analysis)
- Phase III Environmental Remediation Services
- Asbestos, Lead, Radon, Mold Sampling
- Seismic and Structural Assessments (PMLs)
- Energy Audits, Benchmarking, AB1103 Energy Disclosure, and LEED-related services
- Hydrology, Water Conservation and Efficiency
- Fannie Mae / Freddie Mac / HUD Due Diligence
- Geotechnical and Soils Reports
- Zoning Reports
- ALTA Surveys

I. INTRODUCTION AND LOCATION

This paleontological assessment report has been completed for the Compass Danbe Centerpointe Project, identified as Assessor's Parcel Numbers 297-170-002 and -003, is located along the south side of Alessandro Boulevard between Frederick and Graham streets in the city of Moreno Valley, Riverside County, California (Figures 1 and 2). On the U.S. Geological Survey, 7.5-minute, 1:24,000-scale *Riverside East, California* topographic quadrangle map, the project is located in the northeast quarter of Section 13, Township 3 South, Range 4 West, San Bernardino Base and Meridian, at an elevation of approximately 1,570 feet. Proposed improvements, which will cover approximately 17.7 acres of the project, include the construction of two industrial warehouse buildings with associated parking and infrastructure.

II. REGULATORY SETTING

The California Environmental Quality Act (CEQA), which is patterned after the National Environmental Policy Act, is the overriding environmental document that sets the requirement for protecting California's cultural and paleontological resources. The document does not establish specific rules that must be followed but mandates that governing permitting agencies (lead agencies) set their own guidelines for the protection of nonrenewable paleontological resources under their jurisdiction.

State of California

Under the Guidelines for the Implementation of CEQA, as amended March 29, 1999 (Title 1, Chapter 3, California Code of Regulations: 15000 et seq.), procedures define the type of activities, persons, and public agencies required to comply with CEQA. In the Environmental Checklist, one of the questions to answer is, "Will the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?" (Section 15023, Appendix G, Section XIV, Part a). California Public Resources Code Section 5097.5 states:

- a) No person shall knowingly and willfully excavate upon, or remove, destroy, injure or deface any historic or prehistoric ruins, burial grounds, archaeological or vertebrate paleontological site, including fossilized footprints, inscriptions made by human agency, rock art, or any other archaeological, paleontological or historical feature, situated on public lands, except with the express permission of the public agency having jurisdiction over such lands. Violation of this section is a misdemeanor.
- b) As used in this section, "public lands" means lands owned by, or under the jurisdiction of, the state, or any city, county, district, authority, or public corporation, or any agency thereof.

City of Moreno Valley

The treatment of paleontological resources and applicable mitigation measures are outlined in Section 5.10 of the City of Moreno Valley’s Final Environmental Impact Report (FEIR) (City of Moreno Valley 2006). In the FEIR, “Paleontological Resource Sensitive Areas” are presented as Figure 5.10-3. In Figure 5.10-3, all areas west of Gilman Springs Road, and therefore most of the city limits including the project property, are shown as having a “low potential” for fossil resources; however, what constitutes an area of “low potential” is not provided. The areas with a “high potential” are limited to the outcrops of the fossiliferous Mt. Eden Formation and San Timoteo Formation, which occur in the San Timoteo Badlands (*i.e.*, east of Gilman Springs Road). Since significant impacts to paleontological resources could potentially occur if the City of Moreno Valley’s General Plan is implemented, the FEIR presents a mitigation measure that would reduce impacts to a level below that of significant. This measure is presented in Section VI of this report.

III. GEOLOGY

The geology mapped underlying the project and immediate area indicates that the property is underlain by lower Pleistocene (approximately 1.8 million- to perhaps 200,000- to 300,000-year-old), very old, sandy alluvial fan deposits (areas labeled “Qvof_a” and shown in brown on Figure 3 [after Morton and Cox 2001; Morton and Matti 2001]). These sedimentary deposits are described as:

... mostly well dissected, well-indurated, reddish-brown sand deposits. Commonly contains duripans and locally silcretes. Forms widespread deposits north and south of Moreno Valley, flanking bedrock areas. Deposits on older erosion surfaces lack diagnostic features, and may or may not be alluvial fan deposits. (Morton and Matti 2001)

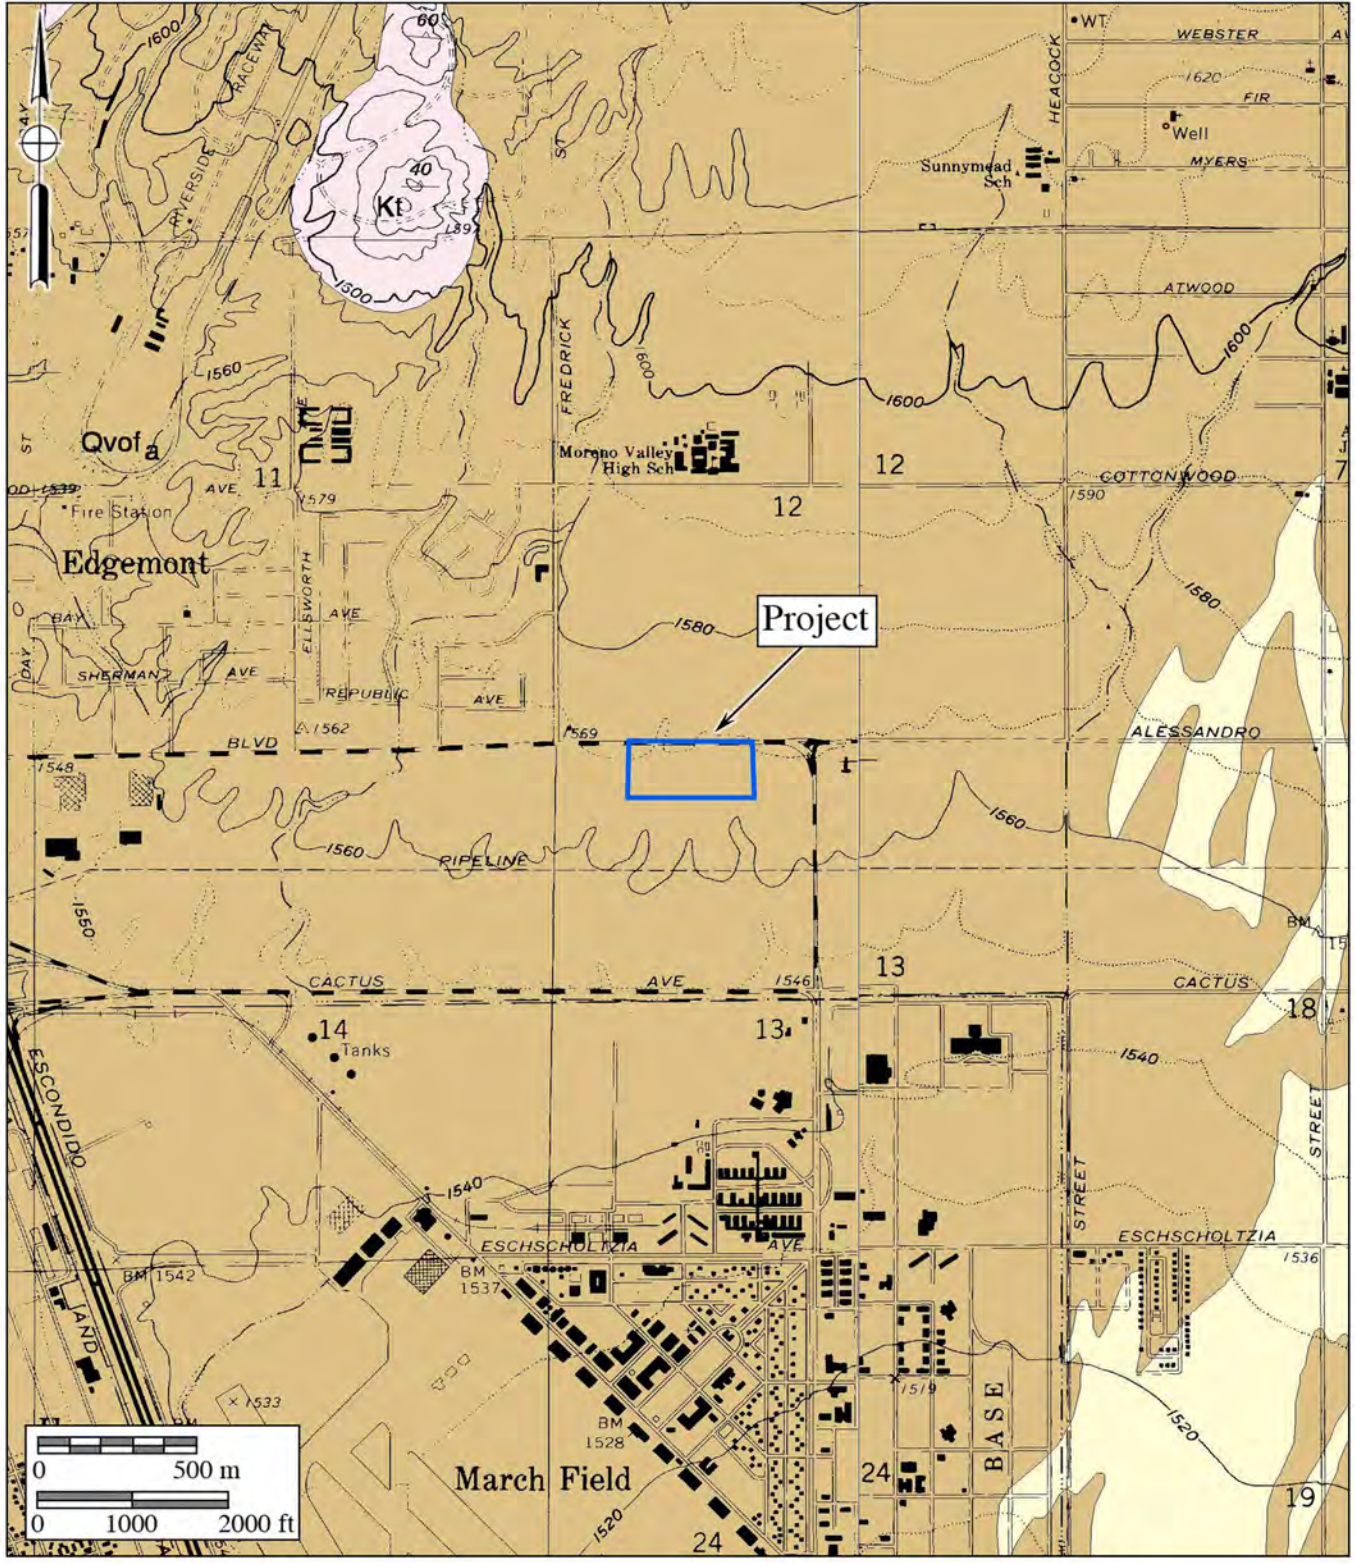

Figure 3

IV. PALEONTOLOGICAL RESOURCES

Definition

Paleontological resources are the remains of prehistoric life that have been preserved in geologic strata. These remains are called fossils and include bones, shells, teeth, and plant remains (including their impressions, casts, and molds) in the sedimentary matrix, as well as trace fossils such as footprints and burrows. Fossils are considered older than 5,000 years of age (Society of Vertebrate Paleontology 2010), but may include younger remains (subfossils), for example, when viewed in the context of local extinction of the organism or habitat. Fossils are considered a nonrenewable resource under state, county, and city guidelines (see Section II of this report).

Fossil Records Search

Based upon a paleontological literature review and a collections and records search conducted by the Geological Sciences Division of the San Bernardino County Museum in Redlands, California for the nearby Moreno Valley Logistics Center Project, older Pleistocene alluvial fan deposits (“Qvof_a” on Figure 3) have a high potential to contain significant nonrenewable paleontological resources (*i.e.*, fossils) and were assigned a “high paleontological resource sensitivity” (see Scott 2015 in Appendix B). Similar older Pleistocene sediments throughout the lowland (valley) areas of western Riverside County and the Inland Empire have been reported to yield significant fossils of extinct terrestrial mammals from the last Ice Age (see references in Scott 2015), such as mammoths, mastodons, giant ground sloths, dire wolves, short-faced bears, saber-toothed cats, large and small horses, camels, and bison.

A fossil records search for the Canyon Steele Industrial Building Project, which is about 4.5 miles south of the subject property in the city of Perris, was performed by the Western Science Center (WSC) in Hemet, California, as part of a paleontological assessment conducted by CRM Tech (Radford 2018). Radford (2018) indicates that the closest WSC fossil localities to the Canyon Steele Industrial Building Project are from the Aldi Distribution Center, which is located southwest of Highway 60 and Redlands Boulevard in Moreno Valley, approximately five and a half miles east-northeast of the Compass Danbe Centerpointe Project. These localities include WSC locs. 192, 193, and 194, all of late Pleistocene age, which consist of the remains of a horse (*Equus* sp.), a giant ground sloth (*Megalonyx jeffersonii*), and a llama (*Hemiauchenia* sp.), animals that became extinct in North America at or soon after the end of the Pleistocene epoch, about 11,700 years ago (Darla Radford, personal communication 2020). The depths of the fossils ranged from approximately 11 to 13 feet below the surface. On the geologic map of Morton and Matti (2001), these fossil localities are situated in an area mapped as Quaternary (Holocene and late Pleistocene), sandy, gravely, young alluvial fan deposits (“Qyf”) at the surface, which suggests deposits of late Pleistocene age and older (greater than 11,700 years) are present beginning at a depth of less than 11 feet below the surface.

V. PALEONTOLOGICAL SENSITIVITY

Overview

The degree of paleontological sensitivity of any particular area is based on a number of factors, including the documented presence of fossiliferous resources on a site or in nearby areas, the presence of documented fossils within a particular geologic formation or lithostratigraphic unit, and whether or not the original depositional environment of the sediments is one that might have been conducive to the accumulation of organic remains that might have become fossilized over time. Late Quaternary (Holocene, or “modern”) alluvium is generally considered to be geologically too young to contain significant, nonrenewable paleontological resources (*i.e.*, fossils), and is thus typically assigned a Low paleontological sensitivity. Older Pleistocene (greater than 11,700 years old) alluvial and alluvial fan deposits in the Inland Empire, however, often yield important Ice Age terrestrial vertebrate fossils, such as extinct mammoths, mastodons, giant ground sloths, extinct species of horse, bison, and camel, saber-toothed cats, and others (Scott 2015). These Pleistocene sediments are thus accorded a High paleontological resource sensitivity.

Professional Standard

The Society of Vertebrate Paleontology (2010) drafted guidelines outlining procedures that include:

[E]valuating the potential for impacts of a proposed action on paleontological resources and for mitigating those impacts. Impact mitigation includes pre-project survey and salvage, monitoring and screen washing during excavation to salvage fossils, conservation and inventory, and final reports and specimen curation. The objective of these procedures is to offer standard methods for assessing potential impacts to fossils and mitigating these impacts.

The guidelines include four categories of paleontological sensitivity for geologic units (formations) that might be impacted by a proposed project, as listed below:

- High Potential: Rock units from which vertebrate or significant invertebrate, plant, or trace fossils have been recovered.
- Undetermined Potential: Rock units for which little information is available concerning their paleontological content, geologic age, and depositional environment, and that further study is needed to determine the potential of the rock unit.
- Low Potential: Rock units that are poorly represented by fossil specimens in institutional collections or based upon a general scientific consensus that only preserve fossils in rare circumstances.
- No Potential: Rock units that have no potential to contain significant paleontological

resources, such as high-grade metamorphic rocks and plutonic igneous rocks.

Riverside County Assessment

A “paleontological sensitivity map” generated by the Riverside County Transportation and Land Management Agency in September 2020 (see Figure 4) ranks the entire project as having a High Paleontological Potential/Sensitivity (High B), which is:

[E]quivalent to High A, but is based on the occurrence of fossils at a specified depth below the surface. The category High B indicates that fossils are likely to be encountered at or below four feet of depth, and may be impacted during excavation by construction activities. (County of Riverside 2020)

The category “High B” indicates that fossils are likely to be encountered at or below four feet of depth and may be impacted during excavation by construction activities. Alluvial valley sediments and very old alluvial fan sediments with a High Potential/Sensitivity (High B) to yield nonrenewable paleontological resources (*i.e.*, fossils) are shown in amber tint on Figure 4.

City of Moreno Valley Assessment

The City of Moreno Valley General Plan acknowledges that significant impacts to paleontological resources could potentially occur as a result of development within the city limits (City of Moreno Valley 2006). As a result, Mitigation Measure C1 (City of Moreno Valley 2006:5.10-15; see Section VI, below) is provided to reduce potential impacts to fossil resources (as well as historic and prehistoric archeological sites) to a level below significant during earth disturbance activities. However, the FEIR’s statement addressing potential impacts to paleontological resources is not entirely clear as to whether the mitigation measures are stipulated exclusively for the fossiliferous, geologic formations that occur in the Badlands areas at the far eastern extent of the city limits (specifically, the Mt. Eden Formation and San Timoteo Formation), or for the greater Moreno Valley area. In addition, the FEIR seems to state that the Mt. Eden Formation and San Timoteo Formation underlie the alluvium found across much of the city, when it is most likely granitic rocks, such as the outcrop of tonalite about a mile north of the project, that comprise the bedrock formation. Furthermore, the FEIR assumes the age of the surficial alluvial deposits is “recent,” which is incorrect (see Section III, above).

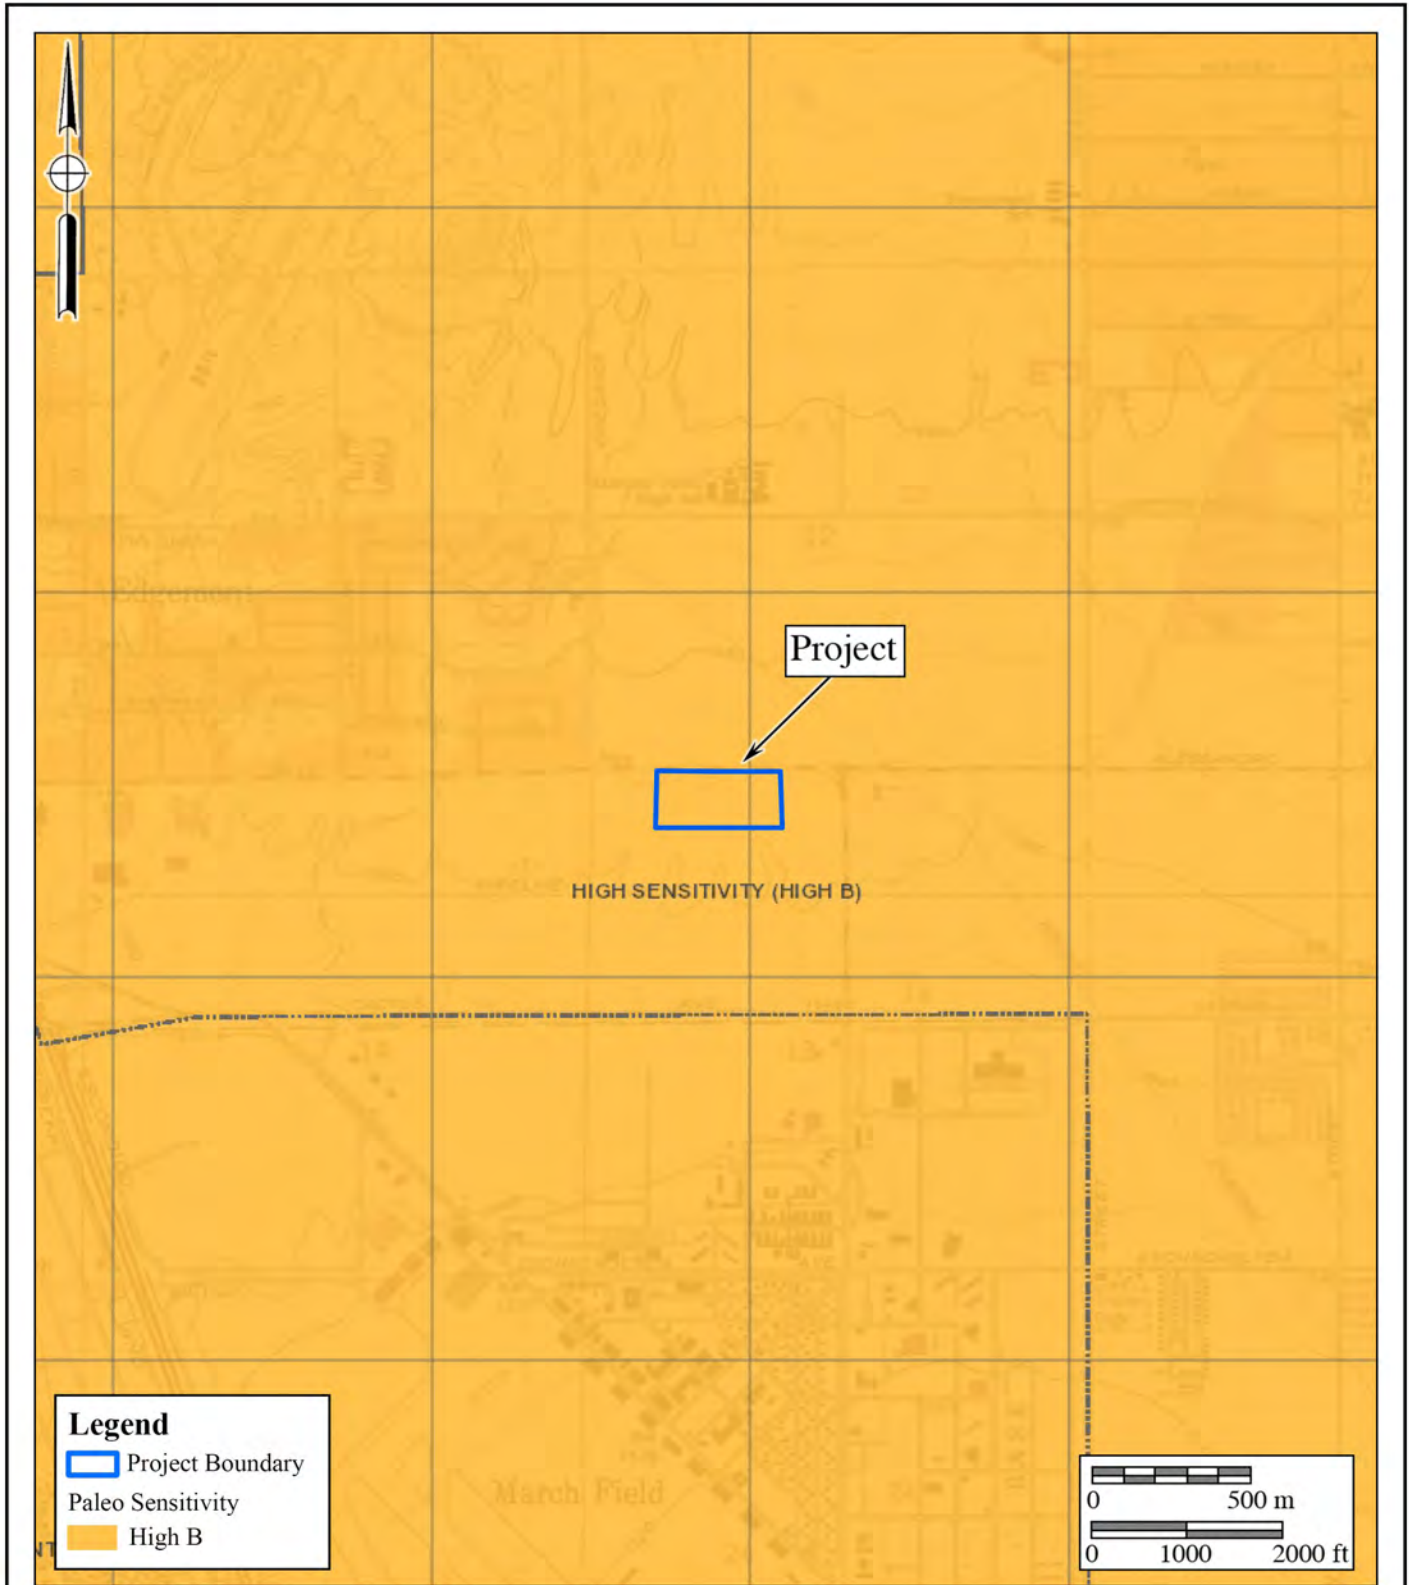

Figure 4

Paleontological Sensitivity Map

The Compass Danbe Centerpointe Project
After Riverside County Land Information System

VI. RECOMMENDATIONS

The existence of potentially fossiliferous Quaternary very old alluvial fan deposits mapped across the project (Qvof_a on Figure 3 in Appendix B); the known occurrence of terrestrial vertebrate fossils at relatively shallow depths from Quaternary older alluvial fan sediments across the Inland Empire of western Riverside County; and the High Paleontological Potential/Sensitivity (High B) typically assigned to Quaternary older alluvial fan sediments all support the recommendation that paleontological monitoring be required during mass grading, trenching, and excavation activities in undisturbed, Quaternary, older alluvial fan sediments in order to mitigate any adverse impacts (loss or destruction) to potential nonrenewable paleontological resources. Monitoring is recommended on a full-time basis for excavations exceeding five feet in depth in undisturbed deposits at the Compass Danbe Centerpointe Project. Mitigation Measure C1 listed in the City of Moreno Valley's FEIR is presented below:

- C1.** Prior to the approval of a project, the City will assess potential impacts to significant historic, prehistoric archaeological, and paleontological [*sic*] resources, including impacts to human remains, pursuant to Section 15064.5 of the California Environmental Quality Act Guidelines. If significant impacts are identified, the City will require the project to be modified to avoid the impacts, or require measures to mitigate the impacts. Mitigation may involve monitoring, resource recovery, documentation or other measures. (City of Moreno Valley 2006:5.10-16)

Should the City of Moreno Valley Planning Division identify a potential for impacts to paleontological resources at a level above significant at the project, a proposed Mitigation Monitoring and Reporting Program (MMRP) is proposed below. When implemented with the provisions of CEQA, Scott (2015), the City of Moreno Valley (2006), and the Society of Vertebrate Paleontology (2010), this proposed MMRP would mitigate any adverse impacts (loss or destruction) to potential nonrenewable paleontological resources (fossils), if present, to a level below significant. The proposed MMRP is as follows:

- 1) Monitoring of mass grading and excavation activities in areas identified as likely to contain paleontological resources by a qualified paleontologist or paleontological monitor. Full-time monitoring will be conducted in areas of grading or excavation in undisturbed, very old alluvial fan sediments (Qvof_a on Figure 3), starting at a depth of five feet below the surface. Paleontological monitors will be equipped to salvage fossils as they are unearthed to avoid construction delays and to remove samples of sediments that are likely to contain the remains of small fossil invertebrates and vertebrates. The monitor must be empowered to temporarily halt or divert equipment

- to allow for the removal of abundant or large specimens in a timely manner. Monitoring may be reduced if the potentially fossiliferous units are not present in the subsurface, or if present, are determined upon exposure and examination by qualified paleontological personnel to have a low potential to contain or yield fossil resources.
- 2) Paleontological salvage during trenching and boring activities is typically from the generated spoils and does not delay the trenching or drilling activities. Fossils are collected and placed in cardboard flats or plastic buckets and identified by field number, collector, and date collected. Notes are taken on the map location and stratigraphy of the site, and the site is photographed before it is vacated and the fossils are removed to a safe place. On mass grading projects, any discovered fossil site is protected by red flagging to prevent it from being overrun by earthmovers (scrapers) before salvage begins. Fossils are collected in a similar manner, with notes and photographs being taken before removing the fossils. Precise location of the site is determined with the use of handheld Global Positioning System units. If the site involves a large terrestrial vertebrate, such as large bone(s) or a mammoth tusk, that is/are too large to be easily removed by a single monitor, Brian F. Smith and Associates, Inc. (BFSA) will send a fossil recovery crew in to excavate around the find, encase the find within a plaster jacket, and remove it after the plaster is set. For large fossils, use of the contractor's construction equipment is solicited to help remove the jacket to a safe location before it is returned to the BFSA laboratory facility for preparation.
 - 3) Particularly small invertebrate fossils typically represent multiple specimens of a limited number of organisms, and a scientifically suitable sample can be obtained from one to several five-gallon buckets of fossiliferous sediment. If it is possible to dry-screen the sediment in the field, a concentrated sample may consist of one or two buckets of material. For vertebrate fossils, the test is usually the observed presence of small pieces of bones within the sediments. If present, as many as 20 to 40 five-gallon buckets of sediment can be collected and returned to a separate facility to wet-screen the sediment. In the laboratory, individual fossils are cleaned of extraneous matrix, any breaks are repaired, and the specimen, if needed, is stabilized by soaking in an archivally approved acrylic hardener (*e.g.*, a solution of acetone and Paraloid B-72).
 - 4) Preparation of recovered specimens to a point of identification and permanent preservation, including screen washing sediments to recover small invertebrates and vertebrates, if necessary. Preparation of individual vertebrate fossils is often more time-consuming than for accumulations of invertebrate fossils.
 - 5) Identification and curation of specimens into a professional, accredited public museum repository with a commitment to archival conservation and permanent retrievable storage (*e.g.*, the WSC, 2345 Searl Parkway, Hemet, California 92543). The paleontological program should include a written repository agreement prior to the initiation of mitigation activities.

- 6) Preparation of a final monitoring and mitigation report of findings and significance, including lists of all fossils recovered and necessary maps and graphics to accurately record their original location. The report, when submitted to the appropriate lead agency (City of Moreno Valley), will signify satisfactory completion of the project program to mitigate impacts to any paleontological resources.
- 7) Decisions regarding the intensity of the MMRP will be made by the project paleontologist based upon the significance of the paleontological resources and their biostratigraphic, biochronologic, paleoecologic, taphonomic, and taxonomic attributes, not upon the ability of a project proponent to fund the MMRP.

VII. CERTIFICATION

I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this paleontological report, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief, and have been compiled in accordance with CEQA criteria.

re: **PALEONTOLOGY LITERATURE AND RECORDS REVIEW, MORENO VALLEY LOGISTICS CENTER, CITY OF MORENO VALLEY, RIVERSIDE COUNTY, CALIFORNIA**

Dear Dr. Kennedy,

The Division of Geological Sciences of the San Bernardino County Museum (SBCM) has completed a literature review and records search for the above-named project in the City of Moreno Valley, Riverside County, California. Specifically, the proposed study area is located in the southwestern quadrant of section 30, Township 3 South, Range 3 West, San Bernardino Base and Meridian, as seen on the Perris, California and the Sunnymead, California 7.5' United States Geological Survey topographic quadrangle maps (1967 editions, photorevised 1973 and 1980, respectively).

Previous mapping of the proposed property (Rogers, 1965; Morton and Matti, 2001; Morton, 2003) indicates that the study area is situated entirely upon surface exposures of early Pleistocene alluvial fan deposits (= unit **Qvof_a**). These Pleistocene fan deposits may have high paleontologic sensitivity, depending upon their lithology. Pleistocene alluvium elsewhere throughout Riverside County and the Inland Empire has repeatedly been reported to yield significant fossils of extinct animals from the Ice Age (Jefferson, 1991; Reynolds, 1991; Anderson and others, 2002; Scott and Cox, 2008; Springer and others, 2009, 2010; Scott, 2010). Fossils recovered from these Pleistocene sediments represent extinct taxa including mammoths, mastodons, ground sloths, dire wolves, sabre-toothed cats, large and small horses, large and small camels, and bison (Jefferson, 1991; Reynolds, 1991; Scott and Cox, 2008; Springer and others, 2009, 2010; Scott, 2010), as well as plant macro- and microfossils (Anderson and others, 2002). If not previously disturbed by development, and depending upon the lithology exhibited, these sediments have high potential to contain significant nonrenewable paleontologic resources.

For this review, I conducted a search of the Regional Paleontologic Locality Inventory (RPLI) at the SBCM. The results of this search indicate that no previously-recorded fossil resource

localities from Pleistocene older alluvium are present within the boundaries of the proposed development property, nor from at least within one mile in any direction.

Recommendations

The results of the literature review and the search of the RPLI at the SBCM demonstrate that the proposed study area is situated upon Pleistocene older alluvial deposits that, if not previously disturbed by development and depending upon their lithology, have high potential to contain paleontologic resources. Excavation in this older alluvium therefore has high potential to impact paleontologic resources. A qualified vertebrate paleontologist must develop a program to mitigate impacts to nonrenewable paleontologic resources. This mitigation program must be consistent with the provisions of the California Environmental Quality Act (Scott and Springer, 2003), as well as with regulations currently implemented by the County of Riverside. This program should include, but not be limited to:

1. Monitoring of excavation in areas identified as likely to contain paleontologic resources by a qualified paleontologic monitor. Areas requiring monitoring include all previously-undisturbed Pleistocene older alluvial sediments present, at the surface or at depth, within the boundaries of the property. Paleontologic monitors should be equipped to salvage fossils as they are unearthed, to avoid construction delays, and to remove samples of sediments that are likely to contain the remains of small fossil invertebrates and vertebrates. Monitors must be empowered to temporarily halt or divert equipment to allow removal of abundant or large specimens. Monitoring may be reduced or eliminated if the potentially-fossiliferous units described herein are determined upon exposure and examination by qualified paleontologic personnel to have low potential to contain fossil resources.
2. Preparation of recovered specimens to a point of identification and permanent preservation, including washing of sediments to recover small invertebrates and vertebrates. Preparation and stabilization of all recovered fossils are essential in order to fully mitigate adverse impacts to the resources (Scott and others, 2004).
3. Identification and curation of specimens into an established, accredited museum repository with permanent retrievable paleontologic storage. These procedures are also essential steps in effective paleontologic mitigation (Scott and others, 2004) and CEQA compliance (Scott and Springer, 2003). The paleontologist must have a written repository agreement in hand prior to the initiation of mitigation activities. Mitigation of adverse impacts to significant paleontologic resources is not complete until such curation into an established, accredited museum repository has been fully completed and documented.
4. Preparation of a report of findings with an appended itemized inventory of specimens. The report and inventory, when submitted to the appropriate Lead Agency along with confirmation of the curation of recovered specimens into an established, accredited museum

repository, would signify completion of the program to mitigate impacts to paleontologic resources.

A Brief Introduction

This Project-Specific WQMP Template for the **Santa Ana Region** has been prepared to help guide you in documenting compliance for your project. Because this document has been designed to specifically document compliance, you will need to utilize the WQMP Guidance Document as your “how-to” manual to help guide you through this process. Both the Template and Guidance Document go hand-in-hand, and will help facilitate a well prepared Project-Specific WQMP. Below is a flowchart for the layout of this Template that will provide the steps required to document compliance.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

OWNER’S CERTIFICATION

This Project-Specific Water Quality Management Plan (WQMP) has been prepared for CDRE HOLDINGS 17 LLC by Thatcher Engineering and Associates, Inc. for Compass Danbe Centerpointe.

This WQMP is intended to comply with the requirements of City of Moreno Valley for Water Quality Ordinance (Municipal code Section 9.10.080) which includes the requirement for the preparation and implementation of a Project-Specific WQMP.

The undersigned, while owning the property/project described in the preceding paragraph, shall be responsible for the implementation and funding of this WQMP and will ensure that this WQMP is amended as appropriate to reflect up-to-date conditions on the site. In addition, the property owner accepts responsibility for interim operation and maintenance of Stormwater BMPs until such time as this responsibility is formally transferred to a subsequent owner. This WQMP will be reviewed with the facility operator, facility supervisors, employees, tenants, maintenance and service contractors, or any other party (or parties) having responsibility for implementing portions of this WQMP. At least one copy of this WQMP will be maintained at the project site or project office in perpetuity. The undersigned is authorized to certify and to approve implementation of this WQMP. The undersigned is aware that implementation of this WQMP is enforceable under City of Moreno Valley Water Quality Ordinance (Municipal Code Section 9.10.080).

"I, the undersigned, certify under penalty of law that the provisions of this WQMP have been reviewed and accepted and that the WQMP will be transferred to future successors in interest."

The project site is currently vacant, and consists of two parcels. The site is located on the south side of Alessandro Blvd. between Frederick Street and Graham Street in the City of Moreno Valley. The site generally drains from north to south.

The project proposes to develop the site as an industrial warehouse facility with related access from Alessandro Blvd. and landscape improvements. The development will also include street improvements along Alessandro Boulevard.

The total existing net area of the site is approximately 17.67 acres. After dedication for public right of way, the proposed net area of the site is approximately 17.65 acres. The project area, including proposed offsite improvements and vacant area runoff, and existing offsite improvements tributary to the project's BMPs is 995,188 SF.

Drainage Area 1 includes Parcel 1 onsite areas and offsite tributary runoff totaling 558,536 SF. Flows generated onsite from Parcel 1 and offsite tributary runoff will be directed to an underground detention tank. From here the required treatment volume will be pumped to Biotreatment Device 1 (a Modular Wetland). Treated flows will discharge (gravity flow) to the City of Moreno Valley's storm drain system. Flows from larger storms in excess of water quality treatment volume will be pumped out at rates less than pre-development rates from the detention tank to the storm drain. From here, flows continue via City of Moreno Valley Storm Drain to Perris Valley Channel and Canyon Lake as they do historically.

Drainage Area 2 includes Parcel 2 onsite areas and offsite tributary runoff totaling 346,029 SF. Flows generated onsite from Parcel 2 and offsite tributary runoff will be directed to an underground detention tank. From here the required treatment volume will be pumped to Biotreatment Device 2 (a Modular Wetland). Treated flows will discharge (gravity flow) to the City of Moreno Valley's storm drain system. Flows from larger storms in excess of water quality treatment volume will be pumped out at rates less than pre-development rates from the detention tank to the storm drain. From here, flows continue via City of Moreno Valley Storm Drain to Perris Valley Channel and Canyon Lake as they do historically.

Drainage Area 3 includes the westerly portion of the Alessandro frontage, adjacent and adjacent parkway totaling 27,680 SF. Bioretention Swale 3 is proposed to provide treatment of the area. Runoff from Alessandro Boulevard will be directed to the swale via curb openings. Once treated in the soil media, runoff will enter an underdrain, ultimately directing flows to a proposed catch basin and into a City of Moreno Valley storm drain which is proposed to be routed through the site. From here, flows continue via City of Moreno Valley Storm Drain to Perris Valley Channel and Canyon Lake as they do historically.

Drainage Area 4 includes the center portion of the Alessandro frontage, adjacent and adjacent parkway totaling 27,994 SF. Bioretention Swale 4 is proposed to provide treatment of the area. Runoff from Alessandro Boulevard will be directed to the swale via curb openings. Once treated in the soil media, runoff will enter an underdrain, ultimately directing flows to a proposed catch basin and into a City of Moreno Valley storm drain which is proposed to be routed through the site. From here, flows continue via City of Moreno Valley Storm Drain to Perris Valley Channel and Canyon Lake as they do historically.

Drainage Area 5 includes the easterly portion of the Alessandro frontage, adjacent and adjacent parkway totaling 34,949 SF. Bioretention Swale 5 is proposed to provide treatment of the area. Runoff from Alessandro Boulevard will be directed to the swale via curb openings. Once treated in the soil media, runoff will enter an underdrain, ultimately directing flows to a proposed catch basin and into a City of Moreno Valley storm drain which is proposed to be routed through the site. From here, flows continue via City of Moreno Valley Storm Drain to Perris Valley Channel and Canyon Lake as they do historically.

The Owner will maintain all BMPs including onsite biotreatment devices and offsite bioretention swales.

A.1 Maps and Site Plans

When completing your Project-Specific WQMP, include a map of the local vicinity and existing site. In addition, include all grading, drainage, landscape/plant palette and other pertinent construction plans in Appendix 2. At a minimum, your WQMP Site Plan should include the following:

- Drainage Management Areas
- Proposed Structural BMPs
- Drainage Path
- Drainage Infrastructure, Inlets, Overflows
- Source Control BMPs
- Buildings, Roof Lines, Downspouts
- Impervious Surfaces
- Standard Labeling

Use your discretion on whether or not you may need to create multiple sheets or can appropriately accommodate these features on one or two sheets. Keep in mind that the Co-Permittee plan reviewer must be able to easily analyze your project utilizing this template and its associated site plans and maps.

A.2 Identify Receiving Waters

Using Table A.1 below, list in order of upstream to downstream, the receiving waters that the project site is tributary to. Continue to fill each row with the Receiving Water’s 303(d) listed impairments (if any), designated beneficial uses, and proximity, if any, to a RARE beneficial use. Include a map of the receiving waters in Appendix 1.

Table A.1 Identification of Receiving Waters

Receiving Waters	EPA Approved 303(d) List Impairments	Designated Beneficial Uses	Proximity to RARE Beneficial Use
Perris Valley Channel	None	None	N/A
San Jacinto River (Reach 3)	None	MUN-AGR-GWR-REC1-REC2-WARM-WILD-RARE	11.6 Miles
Canyon Lake (aka San Jacinto River Reach 2)	Nutrients	MUN-AGR-GWR-REC1-REC2-WARM-WILD	N/A
San Jacinto River (Reach 1)	None	MUN-AGR-GWR-REC1-REC2-WARM-WILD-RARE	18.8 Miles
Lake Elsinore	Nutrients, DDT, PCBs, Organic Enrichment/Low Dissolved Oxygen	REC1-REC2-WARM-WILD	N/A
Temescal Creek (Reach 5)	None	AGR-GWR-REC1-REC2-WARM-WILD-RARE	24.4 Miles
Temescal Creek (Reach 4)	None	AGR-GWR-REC1-REC2-WARM-WILD-RARE	37.3 Miles
Temescal Creek (Reach 3)	None	AGR-IND-GWR-REC1-REC2-WARM-WILD	N/A
Temescal Creek (Reach 2)	None	AGR-IND-GWR-REC1-REC2-WARM-LWRM	N/A
Temescal Creek (Reach 1)	pH	REC1-REC2-WARM-WILD	N/A
Santa Ana River (Reach 3)	Copper, Lead, Pathogens	AGR-GWR-REC1-REC2-WARM-WILD-RARE-SPWN	60.7 Miles
Prado Basin Management Zone	pH	REC1-REC2-WARM-WILD-RARE	46.3 Miles
Santa Ana River (Reach 2)	None	AGR-GWR-REC1-REC2-WARM-WILD-RARE	65.7 Miles
Santa Ana River (Reach 1)	None	REC1-REC2-WARM-WILD	N/A
Tidal Prism of Santa Ana River (to within 1000' of Victoria Street) and Newport Slough	None	None	N/A

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

A.3 Additional Permits/Approvals required for the Project:

Table A.2 Other Applicable Permits

Agency	Permit Required	
State Department of Fish and Game, 1602 Streambed Alteration Agreement	<input checked="" type="checkbox"/> Y	<input type="checkbox"/> N
State Water Resources Control Board, Clean Water Act (CWA) Section 401 Water Quality Cert.	<input checked="" type="checkbox"/> Y	<input type="checkbox"/> N
US Army Corps of Engineers, CWA Section 404 Permit	<input type="checkbox"/> Y	<input checked="" type="checkbox"/> N
US Fish and Wildlife, Endangered Species Act Section 7 Biological Opinion	<input type="checkbox"/> Y	<input checked="" type="checkbox"/> N
Statewide Construction General Permit Coverage	<input checked="" type="checkbox"/> Y	<input type="checkbox"/> N
Statewide Industrial General Permit Coverage	<input checked="" type="checkbox"/> Y	<input type="checkbox"/> N
Western Riverside MSHCP Consistency Approval (e.g., JPR, DBESP)	<input checked="" type="checkbox"/> Y	<input type="checkbox"/> N
Other <i>(please list in the space below as required)</i> City of Moreno Valley Permits	<input checked="" type="checkbox"/> Y	<input type="checkbox"/> N

If yes is answered to any of the questions above, the Co-Permittee may require proof of approval/coverage from those agencies as applicable including documentation of any associated requirements that may affect this Project-Specific WQMP.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section B: Optimize Site Utilization (LID Principles)

Review of the information collected in Section 'A' will aid in identifying the principal constraints on site design and selection of LID BMPs as well as opportunities to reduce imperviousness and incorporate LID Principles into the site and landscape design. For example, **constraints** might include impermeable soils, high groundwater, groundwater pollution or contaminated soils, steep slopes, geotechnical instability, high-intensity land use, heavy pedestrian or vehicular traffic, utility locations or safety concerns. **Opportunities** might include existing natural areas, low areas, oddly configured or otherwise unbuildable parcels, easements and landscape amenities including open space and buffers (which can double as locations for bioretention BMPs), and differences in elevation (which can provide hydraulic head). Prepare a brief narrative for each of the site optimization strategies described below. This narrative will help you as you proceed with your LID design and explain your design decisions to others.

The 2010 Santa Ana MS4 Permit further requires that LID Retention BMPs (Infiltration Only or Harvest and Use) be used unless it can be shown that those BMPs are infeasible. Therefore, it is important that your narrative identify and justify if there are any constraints that would prevent the use of those categories of LID BMPs. Similarly, you should also note opportunities that exist which will be utilized during project design. Upon completion of identifying Constraints and Opportunities, include these on your WQMP Site plan in Appendix 1.

Site Optimization

The following questions are based upon Section 3.2 of the WQMP Guidance Document. Review of the WQMP Guidance Document will help you determine how best to optimize your site and subsequently identify opportunities and/or constraints, and document compliance.

Did you identify and preserve existing drainage patterns? If so, how? If not, why?

No. The entire site will be mass graded. Runoff from onsite areas is directed to one of the biotreatment devices for treatment, prior to exiting the site to the City storm drain as it does historically.

Did you identify and protect existing vegetation? If so, how? If not, why?

No. The entire site will be mass graded to accommodate the development, so it is not feasible to protect existing vegetation.

Did you identify and preserve natural infiltration capacity? If so, how? If not, why?

No. The measured infiltration rates were too low to allow for the use of an infiltration BMP. Instead, biotreatment BMPs are proposed.

Did you identify and minimize impervious area? If so, how? If not, why?

Yes. Impervious areas are limited to required streets, sidewalks and buildings. No decorative hardscape is proposed.

Did you identify and disperse runoff to adjacent pervious areas? If so, how? If not, why?

Yes. Alessandro Boulevard runoff will be directed to bioretention swales for treatment.

Section C: Delineate Drainage Management Areas (DMAs)

Utilizing the procedure in Section 3.3 of the WQMP Guidance Document which discusses the methods of delineating and mapping your project site into individual DMAs, complete Table C.1 below to appropriately categorize the types of classification (e.g., Type A, Type B, etc.) per DMA for your project site. Upon completion of this table, this information will then be used to populate and tabulate the corresponding tables for their respective DMA classifications.

Table C.1 DMA Classifications

DMA Name or ID	Surface Type(s) ¹	Area (Sq. Ft.)	DMA Type
1A	Concrete /Asphalt/ Roof	502,471	Type D
1B	Ornamental Landscaping	40,593	Type D
1C	Natural	15,472	Type D
2A	Concrete /Asphalt/ Roof	221,281	Type D
2B	Ornamental Landscaping	24,599	Type D
2C	Natural	100,149	Type D
3A	Concrete /Asphalt	21,819	Type D
3B	Ornamental Landscaping	5,861	Type D
4A	Concrete /Asphalt	21,407	Type D
4B	Ornamental Landscaping	6,587	Type D
5A	Concrete /Asphalt	26,789	Type D
5B	Ornamental Landscaping	8,160	Type D

¹Reference Table 2-1 in the WQMP Guidance Document to populate this column

Table C.2 Type 'A', Self-Treating Areas

DMA Name or ID	Area (Sq. Ft.)	Stabilization Type	Irrigation Type (if any)
N/A	N/A	N/A	N/A

Table C.3 Type 'B', Self-Retaining Areas

Self-Retaining Area				Type 'C' DMAs that are draining to the Self-Retaining Area		
DMA Name/ ID	Post-project surface type	Area (square feet) [A]	Storm Depth (inches) [B]	DMA Name / ID	[C] from Table C.4 [C]	Required Retention Depth (inches) [D]
N/A	N/A	N/A	N/A	N/A	N/A	N/A

$$[D] = [B] + \frac{[B] \cdot [C]}{[A]}$$

Table C.4 Type 'C', Areas that Drain to Self-Retaining Areas

DMA					Receiving Self-Retaining DMA		
DMA Name/ ID	Area (square feet) [A]	Post-project surface type	Runoff factor [B]	Product [C] = [A] x [B]	DMA name /ID	Area (square feet) [D]	Ratio [C]/[D]
N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Table C.5 Type 'D', Areas Draining to BMPs

DMA Name or ID	BMP Name or ID
1A and 1B	Underground Detention and Biotreatment Device 1
2A and 2B	Underground Detention and Biotreatment Device 2
3A and 3B	Bioretention Swale 3
4A and 4B	Bioretention Swale 4
5A and 5B	Bioretention Swale 5

Note: More than one drainage management area can drain to a single LID BMP, however, one drainage management area may not drain to more than one BMP.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section D: Implement LID BMPs

D.1 Infiltration Applicability

Is there an approved downstream ‘Highest and Best Use’ for stormwater runoff (see discussion in Chapter 2.4.4 of the WQMP Guidance Document for further details)? Y N

If yes has been checked, Infiltration BMPs shall not be used for the site. If no, continue working through this section to implement your LID BMPs. It is recommended that you contact your Co-Permittee to verify whether or not your project discharges to an approved downstream ‘Highest and Best Use’ feature.

Geotechnical Report

A Geotechnical Report or Phase I Environmental Site Assessment may be required by the Copermitee to confirm present and past site characteristics that may affect the use of Infiltration BMPs. In addition, the Co-Permittee, at their discretion, may not require a geotechnical report for small projects as described in Chapter 2 of the WQMP Guidance Document. If a geotechnical report has been prepared, include it in Appendix 3. In addition, if a Phase I Environmental Site Assessment has been prepared, include it in Appendix 4.

Is this project classified as a small project consistent with the requirements of Chapter 2 of the WQMP Guidance Document? Y N

Infiltration Feasibility

Table D.1 below is meant to provide a simple means of assessing which DMAs on your site support Infiltration BMPs and is discussed in the WQMP Guidance Document in Chapter 2.4.5. Check the appropriate box for each question and then list affected DMAs as applicable. If additional space is needed, add a row below the corresponding answer.

Table D.1 Infiltration Feasibility

Does the project site...	YES	NO
...have any DMAs with a seasonal high groundwater mark shallower than 10 feet? If Yes, list affected DMAs:		X
...have any DMAs located within 100 feet of a water supply well? If Yes, list affected DMAs:		X
...have any areas identified by the geotechnical report as posing a public safety risk where infiltration of stormwater could have a negative impact? If Yes, list affected DMAs:		X
...have measured in-situ infiltration rates of less than 1.6 inches / hour? If Yes, list affected DMAs: ALL	X	
...have significant cut and/or fill conditions that would preclude in-situ testing of infiltration rates at the final infiltration surface? If Yes, list affected DMAs:		X
...geotechnical report identify other site-specific factors that would preclude effective and safe infiltration? Describe here:		X

If you answered “Yes” to any of the questions above for any DMA, Infiltration BMPs should not be used for those DMAs and you should proceed to the assessment for Harvest and Use below.

D.2 Harvest and Use Assessment

Please check what applies: None of the below apply. Therefore, Harvest and Use has been assessed.

- Reclaimed water will be used for the non-potable water demands for the project.
- Downstream water rights may be impacted by Harvest and Use as approved by the Regional Board (verify with the Copermittee).
- The Design Capture Volume will be addressed using Infiltration Only BMPs. In such a case, Harvest and Use BMPs are still encouraged, but it would not be required if the Design Capture Volume will be infiltrated or evapotranspired.

If any of the above boxes have been checked, Harvest and Use BMPs need not be assessed for the site. If neither of the above criteria applies, follow the steps below to assess the feasibility of irrigation use, toilet use and other non-potable uses (e.g., industrial use).

Irrigation Use Feasibility

Complete the following steps to determine the feasibility of harvesting stormwater runoff for Irrigation Use BMPs on your site:

- Step 1: Identify the total area of irrigated landscape on the site, and the type of landscaping used.
Total Area of Irrigated Landscape: 2.01 acres
Type of Landscaping (Conservation Design or Active Turf): Conservation Design
- Step 2: Identify the planned total of all impervious areas on the proposed project from which runoff might be feasibly captured and stored for irrigation use. Depending on the configuration of buildings and other impervious areas on the site, you may consider the site as a whole, or parts of the site, to evaluate reasonable scenarios for capturing and storing runoff and directing the stored runoff to the potential use(s) identified in Step 1 above.
Total Area of Impervious Surfaces: 18.22 acres
- Step 3: Cross reference the Design Storm depth for the project site (see Exhibit A of the WQMP Guidance Document) with the left column of Table 2-3 in Chapter 2 to determine the minimum area of Effective Irrigated Area per Tributary Impervious Area (EIATIA).
Enter your EIATIA factor: 1.158
- Step 4: Multiply the unit value obtained from Step 3 by the total of impervious areas from Step 2 to develop the minimum irrigated area that would be required.
Minimum required irrigated area: 21.10
- Step 5: Determine if harvesting stormwater runoff for irrigation use is feasible for the project by comparing the total area of irrigated landscape (Step 1) to the minimum required irrigated area (Step 4).

Minimum required irrigated area (Step 4)	Available Irrigated Landscape (Step 1)
21.10	2.01

Toilet Use Feasibility

Complete the following steps to determine the feasibility of harvesting stormwater runoff for toilet flushing uses on your site:

Step 1: Identify the projected total number of daily toilet users during the wet season, and account for any periodic shut downs or other lapses in occupancy:

Projected Number of Daily Toilet Users:

Project Type: Industrial

Step 2: Identify the planned total of all impervious areas on the proposed project from which runoff might be feasibly captured and stored for toilet use. Depending on the configuration of buildings and other impervious areas on the site, you may consider the site as a whole, or parts of the site, to evaluate reasonable scenarios for capturing and storing runoff and directing the stored runoff to the potential use(s) identified in Step 1 above.

Total Area of Impervious Surfaces: 18.22 acres

Step 3: Enter the Design Storm depth for the project site (see Exhibit A) into the left column of Table 2-1 in Chapter 2 to determine the minimum number of toilet users per tributary impervious acre (TUTIA).

Enter your TUTIA factor: 190

Step 4: Multiply the unit value obtained from Step 3 by the total of impervious areas from Step 2 to develop the minimum number of toilet users that would be required.

Minimum number of toilet users: 3,462

Step 5: Determine if harvesting stormwater runoff for toilet flushing use is feasible for the project by comparing the Number of Daily Toilet Users (Step 1) to the minimum required number of toilet users (Step 4).

<u>Minimum required Toilet Users (Step 4)</u>	<u>Projected number of toilet users (Step 1)</u>
3,462	914

Other Non-Potable Use Feasibility

Are there other non-potable uses for stormwater runoff on the site (e.g. industrial use)? See Chapter 2 of the Guidance for further information. If yes, describe below. If no, write N/A.

N/A

Step 1: Identify the projected average daily non-potable demand, in gallons per day, during the wet season and accounting for any periodic shut downs or other lapses in occupancy or operation.

Average Daily Demand:

Step 2: Identify the planned total of all impervious areas on the proposed project from which runoff might be feasibly captured and stored for the identified non-potable use. Depending on the configuration of buildings and other impervious areas on the site, you may consider the site as a whole, or parts of the site, to evaluate reasonable scenarios for capturing and storing runoff and directing the stored runoff to the potential use(s) identified in Step 1 above.

Total Area of Impervious Surfaces:

Step 3: Enter the Design Storm depth for the project site (see Exhibit A) into the left column of Table 2-3 in Chapter 2 to determine the minimum demand for non-potable uses per tributary impervious acre.

Enter the factor from Table 2-3:

Step 4: Multiply the unit value obtained from Step 4 by the total of impervious areas from Step 3 to develop the minimum number of gallons per day of non-potable use that would be required.

Minimum required use:

Step 5: Determine if harvesting stormwater runoff for other non-potable use is feasible for the project by comparing the Number of Daily Toilet Users (Step 1) to the minimum required number of toilet users (Step 4).

<u>Minimum required non-potable use (Step 4)</u>	<u>Projected average daily use (Step 1)</u>
--	---

If Irrigation, Toilet and Other Use feasibility anticipated demands are less than the applicable minimum values, Harvest and Use BMPs are not required and you should proceed to utilize LID Bioretention and Biotreatment, unless a site-specific analysis has been completed that demonstrates technical infeasibility as noted in D.3 below.

D.3 Bioretention and Biotreatment Assessment

Other LID Bioretention and Biotreatment BMPs as described in Chapter 2.4.7 of the WQMP Guidance Document are feasible on nearly all development sites with sufficient advance planning.

Select one of the following:

- LID Bioretention/Biotreatment BMPs will be used for some or all DMAs of the project as noted below in Section D.4 (note the requirements of Section 3.4.2 in the WQMP Guidance Document).
- A site-specific analysis demonstrating the technical infeasibility of all LID BMPs has been performed and is included in Appendix 5. If you plan to submit an analysis demonstrating the technical infeasibility of LID BMPs, request a pre-submittal meeting with the Copermittee to discuss this option. Proceed to Section E to document your alternative compliance measures.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

D.4 Feasibility Assessment Summaries

From the Infiltration, Harvest and Use, Bioretention and Biotreatment Sections above, complete Table D.2 below to summarize which LID BMPs are technically feasible, and which are not, based upon the established hierarchy.

Table D.2 LID Prioritization Summary Matrix

DMA Name/ID	LID BMP Hierarchy				No LID (Alternative Compliance)
	1. Infiltration	2. Harvest and use	3. Bioretention	4. Biotreatment	
1A	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
1B	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2A	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2B	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3A	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3B	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4A	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4B	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5A	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5B	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

For those DMAs where LID BMPs are not feasible, provide a brief narrative below summarizing why they are not feasible, include your technical infeasibility criteria in Appendix 5, and proceed to Section E below to document Alternative Compliance measures for those DMAs. Recall that each proposed DMA must pass through the LID BMP hierarchy before alternative compliance measures may be considered.

All DMAs are treated using a LID BMP. No alternative compliance is required or proposed.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

D.5 LID BMP Sizing

Each LID BMP must be designed to ensure that the Design Capture Volume will be addressed by the selected BMPs. First, calculate the Design Capture Volume for each LID BMP using the V_{BMP} worksheet in Appendix F of the LID BMP Design Handbook. Second, design the LID BMP to meet the required V_{BMP} using a method approved by the Copermittee. Utilize the worksheets found in the LID BMP Design Handbook or consult with your Copermittee to assist you in correctly sizing your LID BMPs. Complete Table D.3 below to document the Design Capture Volume and the Proposed Volume for each LID BMP. Provide the completed design procedure sheets for each LID BMP in Appendix 6. You may add additional rows to the table below as needed.

Table D.3 DCV Calculations for LID BMPs

DMA Type/ID	DMA Area (square feet) [A]	Post-Project Surface Type	Effective Impervious Fraction, I_f [B]	DMA Runoff Factor [C]	DMA Areas x Runoff Factor [A] x [C]	<i>Bioretention Device 1</i>

[B], [C] is obtained as described in Section 2.3.1 of the WQMP Guidance Document

[E] is obtained from Exhibit A in the WQMP Guidance Document

[G] is obtained from a design procedure sheet, such as in LID BMP Design Handbook and placed in Appendix 6

Section E: Alternative Compliance (LID Waiver Program)

LID BMPs are expected to be feasible on virtually all projects. Where LID BMPs have been demonstrated to be infeasible as documented in Section D, other Treatment Control BMPs must be used (subject to LID waiver approval by the Copermittee). Check one of the following Boxes:

LID Principles and LID BMPs have been incorporated into the site design to fully address all Drainage Management Areas. No alternative compliance measures are required for this project and thus this Section is not required to be completed.

- Or -

The following Drainage Management Areas are unable to be addressed using LID BMPs. A site-specific analysis demonstrating technical infeasibility of LID BMPs has been approved by the Co-Permittee and included in Appendix 5. Additionally, no downstream regional and/or sub-regional LID BMPs exist or are available for use by the project. The following alternative compliance measures on the following pages are being implemented to ensure that any pollutant loads expected to be discharged by not incorporating LID BMPs, are fully mitigated.

E.1 Identify Pollutants of Concern

Utilizing Table A.1 from Section A above which noted your project’s receiving waters and their associated EPA approved 303(d) listed impairments, cross reference this information with that of your selected Priority Development Project Category in Table E.1 below. If the identified General Pollutant Categories are the same as those listed for your receiving waters, then these will be your Pollutants of Concern and the appropriate box or boxes will be checked on the last row. The purpose of this is to document compliance and to help you appropriately plan for mitigating your Pollutants of Concern in lieu of implementing LID BMPs.

Table E.1 Potential Pollutants by Land Use Type

Priority Development Project Categories and/or Project Features (check those that apply)	General Pollutant Categories							
	Bacterial Indicators	Metals	Nutrients	Pesticides	Toxic Organic Compounds	Sediments	Trash & Debris	Oil & Grease
<input type="checkbox"/> Detached Residential Development	P	N	P	P	N	P	P	P
<input type="checkbox"/> Attached Residential Development	P	N	P	P	N	P	P	P ⁽²⁾
<input checked="" type="checkbox"/> Commercial/Industrial Development	P ⁽³⁾	P	P ⁽¹⁾	P ⁽¹⁾	P ⁽⁵⁾	P ⁽¹⁾	P	P
<input type="checkbox"/> Automotive Repair Shops	N	P	N	N	P ^(4, 5)	N	P	P
<input type="checkbox"/> Restaurants (>5,000 ft ²)	P	N	N	N	N	N	P	P

P = Potential

N = Not Potential

⁽¹⁾ A potential Pollutant if non-native landscaping exists or is proposed onsite; otherwise not expected

⁽²⁾ A potential Pollutant if the project includes uncovered parking areas; otherwise not expected

⁽³⁾ A potential Pollutant is land use involving animal waste

⁽⁴⁾ Specifically petroleum hydrocarbons

⁽⁵⁾ Specifically solvents

⁽⁶⁾ Bacterial indicators are routinely detected in pavement runoff

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

E.2 Stormwater Credits

Projects that cannot implement LID BMPs but nevertheless implement smart growth principles are potentially eligible for Stormwater Credits. Utilize Table 3-8 within the WQMP Guidance Document to identify your Project Category and its associated Water Quality Credit. If not applicable, write N/A.

N/A

Table E.2 Water Quality Credits

Qualifying Project Categories	Credit Percentage ²
<i>Total Credit Percentage¹</i>	

¹Cannot Exceed 50%

²Obtain corresponding data from Table 3-8 in the WQMP Guidance Document

E.3 Sizing Criteria

After you appropriately considered Stormwater Credits for your project, utilize Table E.3 below to appropriately size them to the DCV, or Design Flow Rate, as applicable. Please reference Chapter 3.5.2 of the WQMP Guidance Document for further information.

N/A

Table E.3 Treatment Control BMP Sizing

DMA Type/ID	DMA Area (square feet) [A]	Post-Project Surface Type	Effective Impervious Fraction, I _f [B]	DMA Runoff Factor [C]	DMA Area x Runoff Factor [A] x [C]	Enter BMP Name / Identifier Here
$A_T = \sum[A]$						$[F] = \frac{[D] \times [E]}{[G]} [F] \times (1-[H]) [I]$

[B], [C] is obtained as described in Section 2.3.1 from the WQMP Guidance Document

[E] is obtained from Exhibit A in the WQMP Guidance Document

[G] is for Flow-Based Treatment Control BMPs [G] = 43,560, for Volume-Based Control Treatment BMPs, [G] = 12

[H] is from the Total Credit Percentage as Calculated from Table E.2 above

[I] as obtained from a design procedure sheet from the BMP manufacturer and should be included in Appendix 6

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

E.4 Treatment Control BMP Selection

Treatment Control BMPs typically provide proprietary treatment mechanisms to treat potential pollutants in runoff, but do not sustain significant biological processes. Treatment Control BMPs must have a removal efficiency of a medium or high effectiveness as quantified below:

- **High:** equal to or greater than 80% removal efficiency
- **Medium:** between 40% and 80% removal efficiency

Such removal efficiency documentation (e.g., studies, reports, etc.) as further discussed in Chapter 3.5.2 of the WQMP Guidance Document, must be included in Appendix 6. In addition, ensure that proposed Treatment Control BMPs are properly identified on the WQMP Site Plan in Appendix 1.

N/A

Table E.4 Treatment Control BMP Selection

Selected Treatment Control BMP Name or ID ¹	Priority Pollutant(s) of Concern to Mitigate ²	Removal Efficiency Percentage ³

¹ Treatment Control BMPs must not be constructed within Receiving Waters. In addition, a proposed Treatment Control BMP may be listed more than once if they possess more than one qualifying pollutant removal efficiency.

² Cross Reference Table E.1 above to populate this column.

³ As documented in a Co-Permittee Approved Study and provided in Appendix 6.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section F: Hydromodification

F.1 Hydrologic Conditions of Concern (HCOC) Analysis

Once you have determined that the LID design is adequate to address water quality requirements, you will need to assess if the proposed LID Design may still create a HCOC. Review Chapters 2 and 3 (including Figure 3-7) of the WQMP Guidance Document to determine if your project must mitigate for Hydromodification impacts. If your project meets one of the following criteria which will be indicated by the check boxes below, you do not need to address Hydromodification at this time. However, if the project does not qualify for Exemptions 1, 2 or 3, then additional measures must be added to the design to comply with HCOC criteria. This is discussed in further detail below in Section F.2.

HCOC EXEMPTION 1: The Priority Development Project disturbs less than one acre. The Copermittee has the discretion to require a Project-Specific WQMP to address HCOCs on projects less than one acre on a case by case basis. The disturbed area calculation should include all disturbances associated with larger common plans of development.

Does the project qualify for this HCOC Exemption? Y N

If Yes, HCOC criteria do not apply.

HCOC EXEMPTION 2: The volume and time of concentration¹ of storm water runoff for the post-development condition is not significantly different from the pre-development condition for a 2-year return frequency storm (a difference of 5% or less is considered insignificant) using one of the following methods to calculate:

- Riverside County Hydrology Manual
- Technical Release 55 (TR-55): Urban Hydrology for Small Watersheds (NRCS 1986), or derivatives thereof, such as the Santa Barbara Urban Hydrograph Method
- Other methods acceptable to the Co-Permittee

Does the project qualify for this HCOC Exemption? Y N

If Yes, report results in Table F.1 below and provide your substantiated hydrologic analysis in Appendix 7.

Table F.1 Hydrologic Conditions of Concern Summary (DA 1)

	2 year – 24 hour		
	Pre-condition	Post-condition	% Difference
Time of Concentration			
Volume (Cubic Feet)			

Table F.2 Hydrologic Conditions of Concern Summary (DA 2)

	2 year – 24 hour		
	Pre-condition	Post-condition	% Difference
Time of Concentration			
Volume (Cubic Feet)			

Table F.3 Hydrologic Conditions of Concern Summary (DA 3)

	2 year – 24 hour		
	Pre-condition	Post-condition	% Difference
Time of Concentration			
Volume (Cubic Feet)			

Table F.4 Hydrologic Conditions of Concern Summary (DA 4)

	2 year – 24 hour		
	Pre-condition	Post-condition	% Difference
Time of Concentration			
Volume (Cubic Feet)			

Table F.5 Hydrologic Conditions of Concern Summary (DA 5)

	2 year – 24 hour		
	Pre-condition	Post-condition	% Difference
Time of Concentration			
Volume (Cubic Feet)			

¹ Time of concentration is defined as the time after the beginning of the rainfall when all portions of the drainage basin are contributing to flow at the outlet.

HCOC EXEMPTION 3: All downstream conveyance channels to an adequate sump (for example, Prado Dam, Lake Elsinore, Canyon Lake, Santa Ana River, or other lake, reservoir or naturally erosion resistant feature) that will receive runoff from the project are engineered and regularly maintained to ensure design flow capacity; no sensitive stream habitat areas will be adversely affected; or are not identified on the Co-Permittees Hydromodification Sensitivity Maps.

Does the project qualify for this HCOC Exemption? Y N

If Yes, HCOC criteria do not apply and note below which adequate sump applies to this HCOC qualifier:

F.2 HCOC Mitigation

If none of the above HCOC Exemption Criteria are applicable, HCOC criteria is considered mitigated if they meet one of the following conditions:

- a. Additional LID BMPS are implemented onsite or offsite to mitigate potential erosion or habitat impacts as a result of HCOCs. This can be conducted by an evaluation of site-specific conditions utilizing accepted professional methodologies published by entities such as the California Stormwater Quality Association (CASQA), the Southern California Coastal Water Research Project (SCCRWP), or other Co-Permittee approved methodologies for site-specific HCOC analysis.
- b. The project is developed consistent with an approved Watershed Action Plan that addresses HCOC in Receiving Waters.
- C.** Mimicking the pre-development hydrograph with the post-development hydrograph, for a 2-year return frequency storm. Generally, the hydrologic conditions of concern are not significant, if the post-development hydrograph is no more than 10% greater than pre-development hydrograph. In cases where excess volume cannot be infiltrated or captured and reused, discharge from the site must be limited to a flow rate no greater than 110% of the pre-development 2-year peak flow.

Be sure to include all pertinent documentation used in your analysis of the items a, b or c in Appendix 7.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section G: Source Control BMPs

Source control BMPs include permanent, structural features that may be required in your project plans — such as roofs over and berms around trash and recycling areas — and Operational BMPs, such as regular sweeping and “housekeeping”, that must be implemented by the site’s occupant or user. The MEP standard typically requires both types of BMPs. In general, Operational BMPs cannot be substituted for a feasible and effective permanent BMP. Using the Pollutant Sources/Source Control Checklist in Appendix 8, review the following procedure to specify Source Control BMPs for your site:

1. **Identify Pollutant Sources:** Review Column 1 in the Pollutant Sources/Source Control Checklist. Check off the potential sources of Pollutants that apply to your site.
2. **Note Locations on Project-Specific WQMP Exhibit:** Note the corresponding requirements listed in Column 2 of the Pollutant Sources/Source Control Checklist. Show the location of each Pollutant source and each permanent Source Control BMP in your Project-Specific WQMP Exhibit located in Appendix 1.
3. **Prepare a Table and Narrative:** Check off the corresponding requirements listed in Column 3 in the Pollutant Sources/Source Control Checklist. In the left column of Table G.1 below, list each potential source of runoff Pollutants on your site (from those that you checked in the Pollutant Sources/Source Control Checklist). In the middle column, list the corresponding permanent, Structural Source Control BMPs (from Columns 2 and 3 of the Pollutant Sources/Source Control Checklist) used to prevent Pollutants from entering runoff. **Add additional narrative** in this column that explains any special features, materials or methods of construction that will be used to implement these permanent, Structural Source Control BMPs.
4. **Identify Operational Source Control BMPs:** To complete your table, refer once again to the Pollutant Sources/Source Control Checklist. List in the right column of your table the Operational BMPs that should be implemented as long as the anticipated activities continue at the site. Copermittee stormwater ordinances require that applicable Source Control BMPs be implemented; the same BMPs may also be required as a condition of a use permit or other revocable Discretionary Approval for use of the site.

Table G.1 Permanent and Operational Source Control Measures

Potential Sources of Runoff pollutants	Permanent Structural Source Control BMPs	Operational Source Control BMPs
Landscape/Outdoor Pesticide Use	Project plan designs maximize natural water storage and infiltration opportunities, and protect slopes and channels. Plants are grouped with similar water requirements in order to reduce excess irrigation runoff and promote surface infiltration. Landscaping correlates to the climate,	Landscape maintenance will begin upon construction completion and will occur on a monthly basis (or more frequently if desired) for all common areas. The Owners will be responsible for servicing all site landscaping and irrigation in common areas. Site trees

	<p>soil, related natural resources and existing vegetation of the site, as well as the type of development proposed. Irrigation methods will be utilized to minimize runoff of excess irrigation water across impervious surfaces. Such measures will include employing rain-triggered shutoff devices to eliminate or reduce irrigation during and immediately after precipitation, using mulches (such as wood chips) to minimize sediment in runoff and to maintain soil infiltration capacity, and coordinating design of the irrigation system and landscape to minimize overspray and runoff. Irrigation systems will use flow reducers or shutoff valves triggered by pressure drop to control water loss in the event of broken sprinkler heads or water supply lines. Water conservation devices such as programmable irrigation timers will be used.</p>	<p>and shrubs are to be trimmed as necessary and all wastes disposed of offsite. Wood mulch that has been disturbed is to be replaced. Ongoing maintenance shall be consistent with local guidelines, and fertilizer and pesticide usage shall be consistent with the instructions contained on product labels and with the regulations administered by the State Department of Pesticide Regulation. Clippings and yard waste shall be composted. Any adjustments to ensure that sprinklers are not overspraying should be made in a timely manner. Any breaks or leaks in piping must be repaired within 5 business days of report to the landscaper. Scrap pipe and extra materials shall be recycled if possible. All non-recyclable wastes shall be landfilled. Hazardous wastes shall be disposed of per County hazardous material disposal regulations.</p>
Refuse Area	<p>Drainage is not directed to the trash enclosures but away from it. The enclosures will be roofed.</p>	<p>This BMP will begin upon construction completion and will occur on a monthly basis or more frequently as dictated by volume of trash. The Owners will be responsible for having staff or contracting with a landscape maintenance service that will be responsible for litter control. They are to ensure that the entire site is trash free. Trash is to be removed and placed in bins. "No hazardous materials" signs will be posted in the trash enclosure areas.</p>
Loading Docks	<p>Loading docks drain to the biotreatment devices for treatment which will include pre-treatment.</p>	<p>Items shall be unloaded and loaded from docks as quickly as possible.</p>

<p>Sweeping of Sidewalks and Parking Lots</p>		<p>This BMP will begin upon construction completion and will occur on a bi-annual basis. The Owners will contract with a sweeping service to sweep the lot every every six months.</p>
<p>Roofing, Gutters, Trim</p>	<p>Roofing, gutters and trim made of copper or other unprotected metals will not be used.</p>	
<p>On-site Storm Drain Inlets</p>	<p>Stenciling adjacent to drop inlets will be provided.</p>	<p>This BMP will begin upon construction completion. Inspections will be done by Owner’s staff after the first storm of the rainy season and bi-monthly thereafter for the duration of the rainy season. The inspector is also required to clean the facility as needed or when filled to 25% capacity. Cleaning can be by pump or chopvac or by hand. Debris and trash shall be placed inside bins. Stenciling shall be refreshed as needed . The Owners shall provide stormwater pollution prevention information to new site owners, lessees and operators, and shall include the following language on the lease agreement: “Tenant shall not allow anyone to discharge anything to storm drains or to store or deposit materials so as to create a potential discharge to storm drains.”</p>

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section H: Construction Plan Checklist

Populate Table H.1 below to assist the plan checker in an expeditious review of your project. The first two columns will contain information that was prepared in previous steps, while the last column will be populated with the corresponding plan sheets. This table is to be completed with the submittal of your final Project-Specific WQMP.

Table H.1 Construction Plan Cross-reference

BMP No. or ID	BMP Identifier and Description	Corresponding Plan Sheet(s)
1	Bioretention Device 1	Conceptual Grading Plan
2	Bioretention Device 2	Conceptual Grading Plan
3	Bioretention Swale 3	Conceptual Grading Plan
4	Bioretention Swale 4	Conceptual Grading Plan
5	Bioretention Swale 5	Conceptual Grading Plan

Note that the updated table — or Construction Plan WQMP Checklist — is **only a reference tool** to facilitate an easy comparison of the construction plans to your Project-Specific WQMP. Co-Permittee staff can advise you regarding the process required to propose changes to the approved Project-Specific WQMP.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section I: Operation, Maintenance and Funding

The Copermittee will periodically verify that Stormwater BMPs on your site are maintained and continue to operate as designed. To make this possible, your Copermittee will require that you include in Appendix 9 of this Project-Specific WQMP:

1. A means to finance and implement facility maintenance in perpetuity, including replacement cost.
2. Acceptance of responsibility for maintenance from the time the BMPs are constructed until responsibility for operation and maintenance is legally transferred. A warranty covering a period following construction may also be required.
3. An outline of general maintenance requirements for the Stormwater BMPs you have selected.
4. Figures delineating and designating pervious and impervious areas, location, and type of Stormwater BMP, and tables of pervious and impervious areas served by each facility. Geolocating the BMPs using a coordinate system of latitude and longitude is recommended to help facilitate a future statewide database system.
5. A separate list and location of self-retaining areas or areas addressed by LID Principles that do not require specialized O&M or inspections but will require typical landscape maintenance as noted in Chapter 5, pages 85-86, in the WQMP Guidance. Include a brief description of typical landscape maintenance for these areas.

Your local Co-Permittee will also require that you prepare and submit a detailed Stormwater BMP Operation and Maintenance Plan that sets forth a maintenance schedule for each of the Stormwater BMPs built on your site. An agreement assigning responsibility for maintenance and providing for inspections and certification may also be required.

Details of these requirements and instructions for preparing a Stormwater BMP Operation and Maintenance Plan are in Chapter 5 of the WQMP Guidance Document.

Maintenance Mechanism: The Owners will maintain all BMPs including the offsite bioretention swales and onsite biotreatment devices.

Will the proposed BMPs be maintained by a Home Owners' Association (HOA) or Property Owners Association (POA)?

Y N

Include your Operation and Maintenance Plan and Maintenance Mechanism in Appendix 9. Additionally, include all pertinent forms of educational materials for those personnel that will be maintaining the proposed BMPs within this Project-Specific WQMP in Appendix 10.

Operation and Maintenance Plan and Maintenance Mechanism will be provided in the Final WQMP.

Appendix 1: Maps and Site Plans

WQMP Site Plan (includes Location Map) and Receiving Waters Map

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

INSTALLATION NOTES:

- CONTRACTOR TO PROVIDE ALL LABOR, EQUIPMENT, MATERIALS AND INCIDENTALS REQUIRED TO OFFLOAD AND INSTALL THE SYSTEM AND APPURTENANCES IN ACCORDANCE WITH THIS DRAWING AND THE MANUFACTURER'S SPECIFICATIONS, UNLESS OTHERWISE STATED IN MANUFACTURER'S CONTRACT.
- UNIT MUST BE INSTALLED ON LEVEL. MANUFACTURER RECOMMENDS A MINIMUM 6" LEVEL ROCK BASE UNLESS SPECIFIED BY THE PROJECT ENGINEER. CONTRACTOR IS RESPONSIBLE TO VERIFY PROJECT ENGINEER'S RECOMMENDED BASE SPECIFICATIONS.
- ALL PIPES MUST BE FLUSH WITH INSIDE SURFACE OF CONCRETE. (PIPES CANNOT WITHSTAND BEYOND FLUSH) - HEIGHT OF OUTFLOW PIPE MUST BE FLUSH WITH DISCHARGE CHAMBER FLOOR. ALL GAPS AROUND PIPES SHALL BE SEALED WATER TIGHT WITH A NON-SHRINK GROUT PER MANUFACTURER'S STANDING CONNECTION DETAIL AND SHALL MEET OR EXCEED REGIONAL PIPE CONNECTION STANDARDS.
- CONTRACTOR TO SUPPLY AND INSTALL ALL EXTERNAL CONNECTING PIPES.
- CONTRACTOR RESPONSIBLE FOR INSTALLATION OF ALL RISERS, MANHOLES, AND HATCHES. CONTRACTOR TO GROUT ALL MANHOLES AND HATCHES TO MATCH FINISHED SURFACE UNLESS SPECIFIED OTHERWISE. DRIP OR STAIN PROTECTION REQUIRED ON ALL UNITS WITH REGISTRATION.
- CONTRACTOR RESPONSIBLE FOR CONTACTING MODULAR METHODS FOR ACTIVATION OF UNIT. MANUFACTURER WARRANTY IS VOID WITH PROPER ACTIVATION BY A MODULAR METHODS REPRESENTATIVE.

GENERAL NOTES:

- MANUFACTURER TO PROVIDE ALL MATERIALS UNLESS OTHERWISE NOTED.
- ALL DIMENSIONS, ELEVATIONS, SPECIFICATIONS AND CAPACITIES ARE SUBJECT TO CHANGE. FOR PROJECT SPECIFICATIONS DETAILING EXACT DIMENSIONS, WEIGHTS AND ACCESSORIES PLEASE CONTACT MANUFACTURER.

CALIFORNIA STATE WATER RESOURCES CONTROL BOARD
 DIVISION OF WATER QUALITY- MUNICIPAL STORM WATER UNIT
 TRASH IMPLEMENTATION PROGRAM

**EXECUTIVE DIRECTOR DESIGNEE
 CERTIFICATION of TRASH FULL CAPTURE SYSTEMS**

<p>The Executive Director Designee of the State Water Resources Control Board certified¹ the initial Full Capture Systems List of Trash Treatment Control Devices on:</p>	<p>April 27, 2017</p>
<p>The Executive Director Designee of the State Water Resources Control Board certified the following:</p> <ul style="list-style-type: none"> • AquaShield was added to the Certified Full Capture Systems List of Trash Treatment Control Devices; and • The new Certified Trash Full Capture Systems List of Multi-Benefit Treatment Systems on: 	<p>August 4, 2017</p>
<p>The Executive Director Designee of the State Water Resources Control Board certified the following new Full Capture System Devices:</p> <ul style="list-style-type: none"> • Inventive Resources -Water Decontaminator (WD) • ADS FlexStorm - Full Capture Inserts • Bio Clean - Inlet and Grate Inlet Filters • Jensen Stormwater Systems - Jensen Deflective Separator (JDS) • Bio Clean - Debris Separating Baffle Box (DSBB) • CleanWay - Curb Inlet Filtration System • CleanWay - Drop Inlet Device • StormTrap - SiteSaver 	<p>March 15, 2018</p>
<p>The Executive Director Designee of the State Water Resources Control Board certified the following new Full Capture System Devices:</p> <ul style="list-style-type: none"> • Hydro International - Hydro DryScreen • Hydro International - Up-Flo Filter • Revel Environmental Manufacturing Inc. - Triton CPS-FTC • Revel Environmental Manufacturing Inc. - Triton PERF-FTC Insert Cartridge • Hydro International - Downstream Defender • BioClean - Modular Wetland System 	<p>July 10, 2018</p>

In accordance with the Trash Amendments², I do hereby certify that the Trash Treatment Control Devices/Systems in the Certified Full Capture Systems lists of Trash Treatment Control Devices and of Multi-Benefit Treatment Systems meet the Full Capture System definition, provided the device or system meets the conditions stated within these lists.

 Karen Mogus, Deputy Director of Water Quality
 Executive Director Designee

¹ Prior to installation, Full Capture Systems must be certified by the Executive Director, or designee, of the State Water Board. (See definition of Full Capture System in Trash Amendments Glossary)
² Amendment to the Water Quality Control Plan for Ocean Waters of California to Control Trash (Ocean Plan) and Part 1 Trash Provisions of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, And Estuaries Of California (ISWEBE Plan) adopted by the State Water Board.

RE: **Evaluation of Soils Infiltration Study** - Proposed Industrial Warehouse Development - Located at the Southeast and Southwest Corners of Alessandro Boulevard and Chagall Court, in the City of Moreno Valley, California

Dear Mr. Bachli:

Pursuant to your request, this firm has performed an evaluation of our soil infiltration study at the above referenced project. Based upon the results of our field testing as described in our Updated Soils Infiltration Study dated April 27, 2020, the soils have infiltration rates less than 0.8 in/hr in 7 of 8 pits, as listed below.

Test No.	Depth	Minimum Field Percolation Rate (in/hr)	Design Infiltration Rate (in/hr)
1	5'	4.72	1.57
2	2'	0.16	0.05
3	5'	0.16	0.05
4	3'	0.63	0.21
5	6'	0.79	0.26
6	7'	0.16	0.05
7	7'	0.16	0.05
8	4'	0.32	0.11

The actual water drop verses time was plotted by this firm for eight (8) percolation tests with the results shown in Appendix A. The minimum field percolation rate was computed based on the lowest water drop over a 3 hour testing period. For field percolation tests up to 6 hours long, lower percolation rates would typically occur. Since 7 out of 8 tests yield very low percolation rates, our final design recommendations are these fine-grained soils should not be used for percolation pits.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Based on a safety factor of 3.0, the subsurface soils encountered in the proposed on-site drainage disposal system have a design infiltration rate of less than 0.3 in/hr in 7 of 8 pits. Thus, these fine grained soils are not acceptable for percolation pits at the site.

Our Test No. 1 encountered an isolated area of sandy soil which did provide a favorable infiltration rate. It is our professional opinion, that the proposed on-site drainage disposal system shall not be utilized based on the predominately very stiff clayey conditions.

We appreciate this opportunity to be of service to you. If you have any further questions, please do not hesitate to contact the undersigned.

Respectfully submitted,
NORCAL ENGINEERING

RE: Geotechnical Engineering Investigation - Proposed Industrial Warehouse Development - Located at the Southeast and Southwest Corners of Alessandro Boulevard and Chagall Court, in the City of Moreno Valley, California

Dear Mr. Bachli:

Pursuant to your request, this firm has performed a Geotechnical Engineering Investigation for the above referenced project in accordance with your approval of our proposal dated January 13, 2020. The purpose of this investigation is to evaluate the geotechnical conditions of the subject site and to provide recommendations for the proposed industrial warehouse development.

The scope of work included the following: 1) site reconnaissance; 2) subsurface geotechnical exploration and sampling; 3) laboratory testing; 4) soil infiltration testing; 5) engineering analysis of field and laboratory data; 5) preparation of a geotechnical engineering report. It is the opinion of this firm that the proposed development is feasible from a geotechnical standpoint provided that the recommendations presented in this report are followed in the design and construction of the project.

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

1.0 Project Description

It is proposed to construct an industrial warehouse development consisting of a 102,669 and 295,470 square feet buildings as shown on the attached Site Plan by Herdman Architecture + Design dated December 18, 2019. The proposed concrete tilt-up buildings will be supported by a conventional slab-on-grade foundation system with perimeter-spread footings and isolated interior footings. Other improvements will include asphalt and concrete pavement areas, hardscape and landscaping.

It is assumed that the proposed grading for the development will include cut and fill procedures on the order of a few feet to achieve finished grade elevations. Final building plans shall be reviewed by this firm prior to submittal for city approval to determine the need for any additional study and revised recommendations pertinent to the proposed development, if necessary.

2.0 Site Description

The 18.05-acre subject property is located at the southeast and southwest corners of Alessandro Boulevard and Chagall Court, in the City of Moreno Valley. The generally rectangular-shaped parcel is elongated in an east to west direction with topography of the relatively level descending slightly from a north to south direction on the order of a few feet. The site is undeveloped parcel covered with a low vegetation growth of natural grasses and weeds.

3.0 Site Exploration

The investigation consisted of the placement of ten (10) subsurface exploratory trenches by a backhoe to depths ranging between 5 and 15 feet and two (2) exploratory borings by a truck mounted drill rig both to a depth of 50 feet below current ground elevations. The explorations were visually classified and logged by a field engineer with locations of the subsurface explorations shown on the attached plan. The exploratory trenches/borings revealed the existing earth materials to consist of fill and natural soil. Detailed descriptions of the subsurface conditions are listed on the trench and boring logs in Appendix A.

It should be noted that the transition from one soil type to another as shown on the trench logs is approximate and may in fact be a gradual transition. The soils encountered are described as follows:

Fill: A fill soil classifying as a brown, fine to medium grained, silty to clayey SAND was encountered across the site to depths ranging from 1 to 1½ feet below ground surface. These soils were noted to be loose and moist.

Natural: A natural undisturbed soil classifying as a brown, fine to medium grained, clayey to silty SAND to sandy CLAY was encountered beneath the upper fill soils. The native soils as encountered were observed to be dense/stiff to very dense/stiff and moist.

The overall engineering characteristics of the earth material were relatively uniform with each excavation. Groundwater was encountered to the depth of 33 and 39 feet ground surface in Borings B-1 and B-2 respectively, and no caving occurred.

4.0 Laboratory Tests

Relatively undisturbed samples of the subsurface soils were obtained to perform laboratory testing and analysis for direct shear, consolidation tests, and to determine in-place moisture/densities. These relatively undisturbed ring samples were obtained by driving a thin-walled steel sampler lined with one-inch long brass rings with an inside diameter of 2.42 inches into the undisturbed soils. Bulk bag samples were obtained in the upper soils for expansion index tests and maximum density tests. All test results are included in Appendix B, unless otherwise noted.

- 4.1 **Field Moisture Content** (ASTM: D 2216) and the dry density of the ring samples were determined in the laboratory. This data is listed on the logs of explorations.
- 4.2 **Maximum Density tests** (ASTM: D 1557) were performed on typical samples of the upper soils. Results of these tests are shown on Table I.

- 4.3 **Expansion Index tests** (ASTM: D 4829) were performed on remolded samples of the upper soils to determine expansive characteristics. Results of these tests are provided on Table II.
- 4.4 **Atterberg Limits** (ASTM: D 4318) consisting of liquid limit, plastic limit and plasticity index were performed on representative soil samples. Results are shown on Table III.
- 4.5 **Corrosion tests** consisting of sulfate, pH, resistivity and chloride analysis to determine potential corrosive effects of soils on concrete and underground utilities. Test results are provided on Table IV.
- 4.6 **R-Value test** per California Test Method 301 was performed on a representative sample, which may be anticipated to be near subgrade to determine pavement design. Results are provided within the pavement design section of the report.
- 4.7 **Direct Shear tests** (ASTM: D 3080) were performed on undisturbed and/or remolded samples of the subsurface soils. The test is performed under saturated conditions at loads of 1,000 lbs./sq.ft., 2,000 lbs./sq.ft., and 3,000 lbs./sq.ft. with results shown on Plates A and B.
- 4.8 **Consolidation tests** (ASTM: D 2435) were performed on undisturbed samples to determine the differential and total settlement which may be anticipated based upon the proposed loads. Water was added to the samples at a surcharge of one KSF and the settlement curves are plotted on Plates C to E.

5.0 Seismicity Evaluation

The proposed development lies outside of any Alquist Priolo Special Studies Zone and the potential for damage due to direct fault rupture is considered unlikely. The site is situated in an area of high regional seismicity and the San Jacinto (San Jacinto Valley) fault is located about 6 kilometers from the site. Ground shaking originating from earthquakes along other active faults in the region is expected to induce lower horizontal accelerations due to smaller anticipated earthquakes and/or greater distances to other faults.

NorCal Engineering

The seismic design parameters are provided below and are based on the 2019 California Building Code (CBC) Standard ASCE/SEI 7-16. The data was obtained from the American Society of Civil Engineers (ASCE) website, <https://asce7hazardtool.online/>. The ASCE 7 Hazards Report is attached in Appendix C.

Seismic Design Acceleration Parameters

Latitude	33.916
Longitude	-117.257
Site Class	D
Risk Category	I/II/III
Mapped Spectral Response Acceleration	$S_s = 1.500$ $S_1 = 0.600$
Adjusted Maximum Acceleration	$S_{MS} = 1.500$
Design Spectral Response Acceleration Parameters	$S_{DS} = 1.000$
Peak Ground Acceleration	$PGA_M = 0.674$

6.0 Liquefaction Evaluation

The site is expected to experience ground shaking and earthquake activity that is typical of Southern California area. It is during severe ground shaking that loose, granular soils below the groundwater table can liquefy. A review of the exploratory boring log and the laboratory test results on selected soil samples obtained indicate the following soil classifications, field blowcounts and amounts of fines passing through the No. 200 sieve.

Field Blowcount and Gradation Data

Boring No.	Classification	Blowcounts (blows/ft)	Relative Density	% Passing No. 200 Sieve
B-1 @ 5'	SC	>50	Very Dense	47
B-1 @ 10'	ML/CL	>50	Very Stiff	62
B-1 @ 15'	SC	82	Very Dense	45
B-1 @ 20'	SC	76	Very Dense	44
B-1 @ 25'	SC	>50	Very Dense	42
B-1 @ 30'	SC	34	Dense	42
B-1 @ 35'	SM	32	Dense	37
B-1 @ 40'	CL	65	Very Stiff	60
B-1 @ 45'	CL	42	Dense	61
B-1 @ 50'	CL	36	Stiff	56

NorCal Engineering

Boring No.	Classification	Blowcounts (blows/ft)	Relative Density	% Passing No. 200 Sieve
B-2 @ 5'	SM	>50	Very Dense	21
B-2 @ 10'	SC	36	Very Dense	47
B-2 @ 15'	SM	52	Very Dense	33
B-2 @ 20'	SM	30	Dense	14
B-2 @ 25'	SC	>50	Very Dense	46
B-2 @ 30'	SC	41	Very Dense	45
B-2 @ 35'	SC	42	Very Dense	40
B-2 @ 40'	SC	56	Very Dense	48
B-2 @ 45'	SC	46	Very Dense	47
B-2 @ 50'	SM	37	Dense	29

The analysis indicates the potential for liquefaction at this site to be low based on the density of the subsurface soils. The associated seismic-induced settlements would be on the order of less than 3/4 inch and would occur rather uniformly across the site. Differential settlements would be on the order of 1/2 inch over a 50-foot (horizontal) distance. Thus, the design of the proposed construction in conformance with the latest Building Code provisions for earthquake design is expected to provide mitigation of ground shaking hazards that are typical to Southern California.

7.0 Infiltration Characteristics

Infiltration tests within the site were performed to provide preliminary infiltration rates for the purpose of planning and design of an on-site water disposal system. The infiltration tests consisted of the double ring infiltration test per ASTM Method D 3385. The field infiltration rate was computed using a reduction factor – R_f based on the field measurements with our calculations given in Appendix D. Based upon the results of our testing, the soils encountered in the planned on-site drainage disposal system area exhibit the following infiltration rates.

Test No.	Depth	Soil Classification	Infiltration Rate
T-1	5'	Silty SAND	26.8 in/hr
T-2	7.5'	Sandy CLAY	0.1 in/hr
T-3	10'	Sandy CLAY	0.7 in/hr

NorCal Engineering

The correction factors CF_t , CF_v and CF_s are given below based on soils at 5 to 10 feet from our field tests.

- a) $CF_t = R_f = 1.0$ for our double ring infiltration test holes.
- b) $CF_v = 1.0$ based on uniform soils encountered in three (3) trenches for infiltration tests.
- c) $CF_s = 3.0$ for long-term siltation, plugging and maintenance. The subsurface soils are likely to have some plugging and regular maintenance of storm water discharge devices is required.

Based on the results of our field testing, the subsurface soils encountered in the proposed on-site drainage disposal system at 5 feet below ground surface and into sandy soils shall utilize a design infiltration rate of 8 in/hr. The infiltration rate at a depth below 5 feet to 10 feet indicates the very stiff fine-grained clayey soils which are not suitable for seepage pits at the site. All systems must meet the latest county specifications and the California Regional Water Quality Control Board (CRWQCB) requirements.

It is recommended that foundations shall be setback a minimum distance of 10 feet from the drainage disposal system and the bottom of footing shall be a minimum of 10 feet from the expected zone of saturation. The boundary of the zone of saturation may be assumed to project downward from the top of the permeable portion of the disposal system at an inclination of 1 to 1 or flatter, as determined by the geotechnical engineer.

8.0 Conclusions and Recommendations

Based upon our evaluations, the proposed development is acceptable from a geotechnical engineering standpoint. By following the recommendations and guidelines set forth in our report, the structures will be safe from excessive settlements under the anticipated design loadings and conditions. The proposed development shall meet all requirements of the City Building Ordinance and will not impose any adverse effect on existing adjacent structures.

NorCal Engineering

The following recommendations are based upon soil conditions encountered in our field investigation; these near-surface soil conditions could vary across the site. Variations in the soil conditions may not become evident until the commencement of grading operations for the proposed development and revised recommendations from the soils engineer may be necessary based upon the conditions encountered.

It is recommended that site inspections be performed by a representative of this firm during all grading and construction of the development to verify the findings and recommendations documented in this report. Any unusual conditions which may be encountered in the course of the project development may require the need for additional study and revised recommendations.

8.1 **Site Grading Recommendations**

Any vegetation and/or demolition debris shall be removed and hauled from proposed grading areas prior to the start of grading operations. Existing vegetation shall not be mixed or disced into the soils. Any removed soils may be reutilized as compacted fill once any deleterious material or oversized materials (in excess of eight inches) is removed. Grading operations shall be performed in accordance with the attached *Specifications for Placement of Compacted Fill*.

8.1.1 **Removal and Recompaction Recommendations**

All disturbed soils and/or fill (about 1 to 1½ feet below ground surface) shall be removed to competent native material, the exposed surface scarified to a depth of 12 inches, brought to within 2% of optimum moisture content and compacted to a minimum of 90% of the laboratory standard (ASTM: D 1557) prior to placement of any additional compacted fill soils, foundations, slabs-on-grade and pavement. Grading shall extend a minimum of five horizontal feet outside the edges of foundations or equidistant to the depth of fill placed, whichever is greater.

It is possible that isolated areas of undiscovered fill not described in this report are present on site; if found, these areas should be treated as discussed earlier. A diligent search shall also be conducted during grading operations in an effort to uncover any underground structures, irrigation or utility lines. If encountered, these structures and lines shall be either removed or properly abandoned prior to the proposed construction.

NorCal Engineering

Any imported fill material should be preferably soil similar to the upper soils encountered at the subject site. All soils shall be approved by this firm prior to importing at the site and will be subjected to additional laboratory testing to assure concurrence with the recommendations stated in this report.

If placement of slabs-on-grade and pavement is not completed immediately upon completion of grading operations, additional testing and grading of the areas may be necessary prior to continuation of construction operations. Likewise, if adverse weather conditions occur which may damage the subgrade soils, additional assessment by the soils engineer as to the suitability of the supporting soils may be needed.

Care should be taken to provide or maintain adequate lateral support for all adjacent improvements and structures at all times during the grading operations and construction phase. Adequate drainage away from the structures, pavement and slopes should be provided at all times.

8.1.2 **Fill Blanket Recommendations**

Due to the potential for differential settlement of foundations placed on compacted fill and native materials, it is recommended that all foundations including floor slab areas be underlain by a uniform compacted fill blanket at least two feet in thickness. This fill blanket shall extend a minimum of five horizontal feet outside the edges of foundations or equidistant to the depth of fill placed, whichever is greater.

8.2 **Shrinkage and Subsidence**

Results of our in-place density tests reveal that the soil shrinkage will be less than 5% due to excavation and recompaction, based upon the assumption that the fill is compacted to 92% of the maximum dry density per ASTM standards. Subsidence should be 0.2 feet due to earthwork operations. The volume change does not include any allowance for vegetation or organic stripping, removal of subsurface improvements, or topographic approximations.

NorCal Engineering

Although these values are only approximate, they represent our best estimate of lost yardage, which will likely occur during grading. If more accurate shrinkage and subsidence factors are needed, it is recommended that field testing the actual equipment and grading techniques should be conducted.

8.3 Temporary Excavations

Temporary unshored excavations in the existing site materials may be made at vertical inclinations up to 4 feet in height unless cohesionless soils are encountered. In areas where soils with little or no binder are encountered, where adverse geological conditions are exposed, or where excavations are adjacent to existing structures, shoring or flatter excavations may be required. The temporary cut slope gradients given above do not preclude local raveling and sloughing. All excavations shall be made in accordance with the requirements of the soils engineer, CAL-OSHA and other public agencies having jurisdiction. Care should be taken to provide or maintain adequate lateral support for all adjacent improvements and structures at all times during the grading operations and construction phase.

8.4 Foundation Design

All foundations may be designed utilizing the following allowable bearing capacities for an embedded depth of 24 inches into approved engineered fill with the corresponding widths:

Allowable Bearing Capacity (psf)		
Width (feet)	Continuous Foundation	Isolated Foundation
1.5	2000	2500
2.0	2075	2575
4.0	2375	2875
6.0	2500	3000

The bearing value may be increased by 500 psf for each additional foot of depth in excess of the 18-inch minimum depth, up to a maximum of 4,000 psf. A one-third increase may be used when considering short-term loading and seismic forces. Any foundations located along property line may utilize an allowable bearing capacity of 1,500 psf and embedded into competent native soils. All foundations shall be reinforced a minimum of one, No. 4 bar, top and bottom. A representative of this firm shall inspect all foundation excavations prior to pouring concrete.

NorCal Engineering

8.5 Settlement Analysis

Resultant pressure curves for the consolidation tests are shown on Plates C and D. Computations utilizing these curves and the recommended allowable soil bearing capacities reveal that the foundations will experience settlements on the order of $\frac{3}{4}$ inch and differential settlements of less than $\frac{1}{4}$ inch.

8.6 Lateral Resistance

The following values may be utilized in resisting lateral loads imposed on the structure. Requirements of the California Building Code should be adhered to when the coefficient of friction and passive pressures are combined.

Coefficient of Friction - 0.35

Equivalent Passive Fluid Pressure = 200 lbs./cu.ft.

Maximum Passive Pressure = 2,000 lbs./cu.ft.

The passive pressure recommendations are valid only for approved compacted fill soils or competent native materials.

8.7 Retaining Wall Design Parameters

Active earth pressures against retaining walls will be equal to the pressures developed by the following fluid densities. These values are for **approved granular backfill material** placed behind the walls at various ground slopes above the walls.

Surface Slope of Retained Materials (Horizontal to Vertical)	Equivalent Fluid Density (lb./cu.ft.)
Level	30
5 to 1	35
4 to 1	38
3 to 1	40
2 to 1	45

Any applicable short-term construction surcharges and seismic forces should be added to the above lateral pressure values. An equivalent fluid pressure of 45 pcf may be utilized for the restrained wall condition with a level grade behind the wall.

The seismic-induced lateral soil pressure for walls greater than 6 feet may be computed using a triangular pressure distribution with the maximum value at the top of the wall. The maximum lateral pressure of $(20 \text{ pcf}) H$ where H is the height of the retained soils above the wall footing should be used in final design of retaining walls. Sliding resistance values and passive fluid pressure values may be increased by $1/3$ during short-term wind and seismic loading conditions.

All walls shall be waterproofed as needed and protected from hydrostatic pressure by a reliable permanent subdrain system. The granular backfill to be utilized immediately adjacent to retaining walls shall consist of an approved select granular soil with a sand equivalency greater than 30. This backfill zone of free draining material shall consist of a wedge beginning a minimum of one horizontal foot from the base of the wall extending upward at an inclination of no less than $3/4$ to 1 (horizontal to vertical).

8.8 Slab Design

All concrete slabs shall be a minimum of six inches in thickness in the proposed warehouse areas and four inches in office and hardscape both reinforced a minimum of No. 3 bars, sixteen inches in each direction and positioned in the center of slab and placed on approved subgrade soils. Additional reinforcement requirements and an increase in thickness of the slabs-on-grade may be necessary based upon soils expansion potential and proposed loading conditions in the structures and should be evaluated further by the project engineers and/or architect. All subgrade soils shall be moisture conditioned to 3% over optimum moisture content to a depth eighteen inches.

A vapor retarder (10-mil minimum thickness) should be utilized in areas which would be sensitive to the infiltration of moisture. This retarder shall meet requirements of ASTM E 96, *Water Vapor Transmission of Materials* and ASTM E 1745, *Standard Specification for Water Vapor Retarders used in Contact with Soil or Granular Fill Under Concrete Slabs*. The vapor retarder shall be installed in accordance with procedures stated in ASTM E 1643, *Standard practice for Installation of Water Vapor Retarders used in Contact with Earth or Granular Fill Under Concrete Slabs*.

The moisture retarder may be placed directly upon compacted subgrade soils conditioned to near optimum moisture levels, although one to two inches of sand beneath the membrane is desirable. The subgrade upon which the retarder is placed shall be smooth and free of rocks, gravel or other protrusions which may damage the retarder. Use of sand above the retarder is under the purview of the structural engineer; if sand is used over the retarder, it should be placed in a dry condition.

8.9 Pavement Section Design

The table on the following page provides a preliminary pavement design based upon an R-Value of 16 for the subgrade soils for the proposed pavement areas. Final pavement design may need to be based on R-Value testing of the subgrade soils near the conclusion of site grading to assure that these soils are consistent with those assumed in this preliminary design.

The recommendations are based upon estimated traffic loads. Client should submit any other anticipated traffic loadings to the geotechnical engineer, if necessary, so that pavement sections may be reviewed to determine adequacy to support the proposed loadings.

Type of Traffic	Traffic Index	Asphalt (in.)	Base Material (in.)
Automobile Parking Stalls	4.0	3.0	6.0
Light Vehicle Circulation Areas	5.5	3.5	9.5
Heavy Truck Access Areas	7.0	4.0	14.0

Any concrete slab-on-grade in pavement areas shall be a minimum of seven inches in thickness and may be placed on approved subgrade soils. All pavement areas shall have positive drainage toward an approved outlet from the site. Drain lines behind curbs and/or adjacent to landscape areas should be considered by client and the appropriate design engineers to prevent water from infiltrating beneath pavement. If such infiltration occurs, damage to pavement, curbs and flow lines, especially on sites with expansive soils, may occur during the life of the project.

Any approved base material shall consist of a Class II aggregate or equivalent and should be compacted to a minimum of 95% relative compaction. All pavement materials shall conform to the requirements set forth by the City of Moreno Valley. The base material; and asphaltic concrete should be tested prior to delivery to the site and during placement to determine conformance with the project specifications. A pavement engineer shall designate the specific asphalt mix design to meet the required project specifications.

8.10 Utility Trench and Excavation Backfill

Trenches from installation of utility lines and other excavations may be backfilled with on-site soils or approved imported soils compacted to a minimum of 90% relative compaction. All utility lines shall be properly bedded with clean sand having a sand equivalency rating of 30 or more. This bedding material shall be thoroughly water jetted around the pipe structure prior to placement of compacted backfill soils.

8.11 Corrosion Design Criteria

Representative samples of the surficial soils, typical of the subgrade soils expected to be encountered within foundation excavations and underground utilities were tested for corrosion potential. The minimum resistivity value obtained for the samples tested is representative of an environment that may be severely corrosive to metals. The soil pH value was considered mildly alkaline and may not have a significant effect on soil corrosivity. Consideration should be given to corrosion protection systems for buried metal such as protective coatings, wrappings or the use of PVC where permitted by local building codes.

NorCal Engineering

According to Table 4.3.1 of ACI 318 Building Code and Commentary, these contents revealed negligible sulfate concentrations. Therefore, a Type II cement according to latest CBC specifications may be utilized for building foundations at this time. It is recommended that additional sulfate tests be performed at the completion of site grading to assure that the as graded conditions are consistent with the recommendations stated in this design. Corrosion test results may be found on the attached Table IV.

8.12 Expansive Soil

Since expansive soils were encountered, special attention should be given to the project design and maintenance. The attached *Expansive Soil Guidelines* should be reviewed by the engineers, architects, owner, maintenance personnel and other interested parties and considered during the design of the project and future property maintenance.

9.0 Closure

The recommendations and conclusions contained in this report are based upon the soil conditions uncovered in our test excavations. No warranty of the soil condition between our excavations is implied. NorCal Engineering should be notified for possible further recommendations if unexpected to unfavorable conditions are encountered during construction phase. It is the responsibility of the owner to ensure that all information within this report is submitted to the Architect and appropriate Engineers for the project.

A preconstruction conference should be held between the developer, general contractor, grading contractor, city inspector, architect, and geotechnical engineer to clarify any questions relating to the grading operations and subsequent construction. Our representative should be present during the grading operations and construction phase to certify that such recommendations are complied within the field.

NorCal Engineering

This geotechnical investigation has been conducted in a manner consistent with the level of care and skill exercised by members of our profession currently practicing under similar conditions in the Southern California area. No other warranty, expressed or implied is made.

We appreciate this opportunity to be of service to you. If you have any further questions, please do not hesitate to contact the undersigned.

Respectfully submitted,
NORCAL ENGINEERING

Keith D. Tucker
Project Engineer

NorCal Engineering

SPECIFICATIONS FOR PLACEMENT OF COMPACTED FILL

Excavation

Any existing low-density soils and/or saturated soils shall be removed to competent natural soil under the inspection of the Geotechnical Engineering Firm. After the exposed surface has been cleansed of debris and/or vegetation, it shall be scarified until it is uniform in consistency, brought to the proper moisture content and compacted to a minimum of 90% relative compaction (in accordance with ASTM: D 1557).

In any area where a transition between fill and native soil or between bedrock and soil are encountered, additional excavation beneath foundations and slabs will be necessary in order to provide uniform support and avoid differential settlement of the structure.

Material for Fill

The on-site soils or approved import soils may be utilized for the compacted fill provided they are free of any deleterious materials and shall not contain any rocks, brick, asphaltic concrete, concrete or other hard materials greater than eight inches in maximum dimensions. Any import soil must be approved by the Geotechnical Engineering firm a minimum of 72 hours prior to importation of site.

Placement of Compacted Fill Soils

The approved fill soils shall be placed in layers not excess of six inches in thickness. Each lift shall be uniform in thickness and thoroughly blended. The fill soils shall be brought to within 2% of the optimum moisture content, unless otherwise specified by the Soils Engineering firm. Each lift shall be compacted to a minimum of 90% relative compaction (in accordance with ASTM: D 1557) and approved prior to the placement of the next layer of soil. Compaction tests shall be obtained at the discretion of the Geotechnical Engineering firm but to a minimum of one test for every 500 cubic yards placed and/or for every 2 feet of compacted fill placed.

NorCal Engineering

The minimum relative compaction shall be obtained in accordance with accepted methods in the construction industry. The final grade of the structural areas shall be in a dense and smooth condition prior to placement of slabs-on-grade or pavement areas. No fill soils shall be placed, spread or compacted during unfavorable weather conditions. When the grading is interrupted by heavy rains, compaction operations shall not be resumed until approved by the Geotechnical Engineering firm.

Grading Observations

The controlling governmental agencies should be notified prior to commencement of any grading operations. This firm recommends that the grading operations be conducted under the observation of a Soils Engineering firm as deemed necessary. A 24-hour notice must be provided to this firm prior to the time of our initial inspection.

Observation shall include the clearing and grubbing operations to assure that all unsuitable materials have been properly removed; approve the exposed subgrade in areas to receive fill and in areas where excavation has resulted in the desired finished grade and designate areas of overexcavation; and perform field compaction tests to determine relative compaction achieved during fill placement. In addition, all foundation excavations shall be observed by the Geotechnical Engineering firm to confirm that appropriate bearing materials are present at the design grades and recommend any modifications to construct footings.

EXPANSIVE SOIL GUIDELINES

The following expansive soil guidelines are provided for your project. The intent of these guidelines is to inform you, the client, of the importance of proper design and maintenance of projects supported on expansive soils. ***You, as the owner or other interested party, should be warned that you have a duty to provide the information contained in the soil report including these guidelines to your design engineers, architects, landscapers and other design parties in order to enable them to provide a design that takes into consideration expansive soils.***

In addition, you should provide the soil report with these guidelines to any property manager, lessee, property purchaser or other interested party that will have or assume the responsibility of maintaining the development in the future.

Expansive soils are fine-grained silts and clays which are subject to swelling and contracting. The amount of this swelling and contracting is subject to the amount of fine-grained clay materials present in the soils and the amount of moisture either introduced or extracted from the soils. Expansive soils are divided into five categories ranging from “very low” to “very high”. Expansion indices are assigned to each classification and are included in the laboratory testing section of this report. *If the expansion index of the soils on your site, as stated in this report, is 21 or higher, you have expansive soils.* The classifications of expansive soils are as follows:

Classification of Expansive Soil*

Expansion Index	Potential Expansion
0-20	Very Low
21-50	Low
51-90	Medium
91-130	High
Above 130	Very High

*From Table 18A-I-B of California Building Code (1988)

When expansive soils are compacted during site grading operations, care is taken to place the materials at or slightly above optimum moisture levels and perform proper compaction operations. Any subsequent excessive wetting and/or drying of expansive soils will cause the soil materials to expand and/or contract. These actions are likely to cause distress of foundations, structures, slabs-on-grade, sidewalks and pavement over the life of the structure. ***It is therefore imperative that even after construction of improvements, the moisture contents are maintained at relatively constant levels, allowing neither excessive wetting or drying of soils.***

Evidence of excessive wetting of expansive soils may be seen in concrete slabs, both interior and exterior. Slabs may lift at construction joints producing a trip hazard or may crack from the pressure of soil expansion. Wet clays in foundation areas may result in lifting of the structure causing difficulty in the opening and closing of doors and windows, as well as cracking in exterior and interior wall surfaces. In extreme wetting of soils to depth, settlement of the structure may eventually result. Excessive wetting of soils in landscape areas adjacent to concrete or asphaltic pavement areas may also result in expansion of soils beneath pavement and resultant distress to the pavement surface.

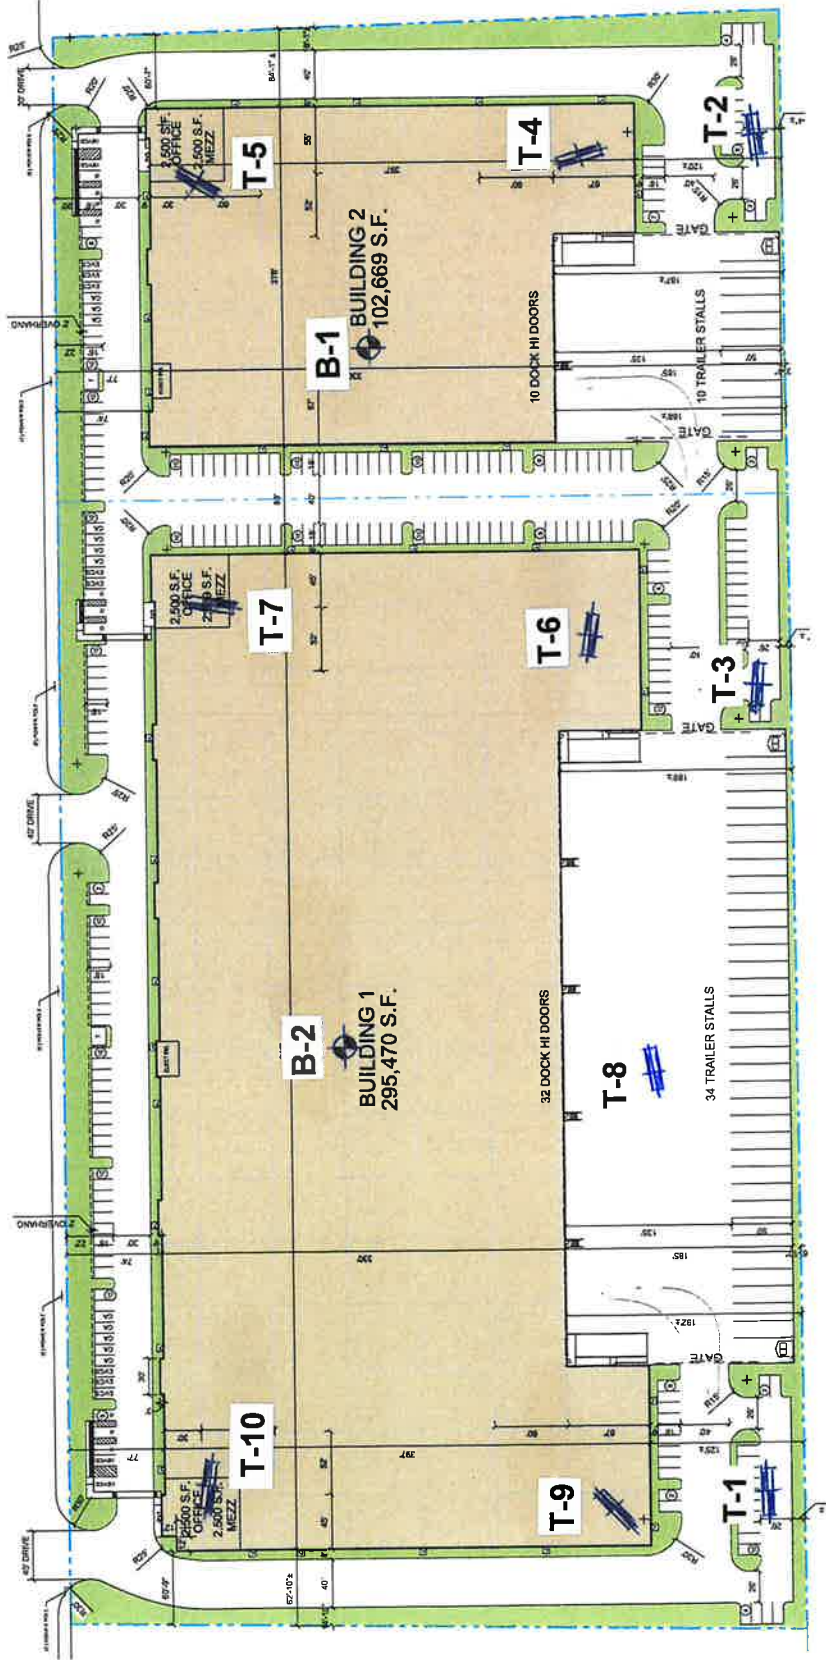

Excessive drying of expansive soils is initially evidenced by cracking in the surface of the soils due to contraction. Settlement of structures and on-grade slabs may also eventually result along with problems in the operation of doors and windows.

Projects located in areas of expansive clay soils will be subject to more movement and "hairline" cracking of walls and slabs than similar projects situated on non-expansive sandy soils. There are, however, measures that developers and property owners may take to reduce the amount of movement over the life the development. The following guidelines are provided to assist you in both design and maintenance of projects on expansive soils:

- Drainage away from structures and pavement is essential to prevent excessive wetting of expansive soils. Grades should be designed to the latest building code and maintained to allow flow of irrigation and rain water to approved drainage devices or to the street. Any “ponding” of water adjacent to buildings, slabs and pavement after rains is evidence of poor drainage; the installation of drainage devices or regrading of the area may be required to assure proper drainage. Installation of rain gutters is also recommended to control the introduction of moisture next to buildings. Gutters should discharge into a drainage device or onto pavement which drains to roadways.
- Irrigation should be strictly controlled around building foundations, slabs and pavement and may need to be adjusted depending upon season. This control is essential to maintain a relatively uniform moisture content in the expansive soils and to prevent swelling and contracting. Over-watering adjacent to improvements may result in damage to those improvements. NorCal Engineering makes no specific recommendations regarding landscape irrigation schedules.
- Planting schemes for landscaping around structures and pavement should be analyzed carefully. Plants (including sod) requiring high amounts of water may result in excessive wetting of soils. Trees and large shrubs may actually extract moisture from the expansive soils, thus causing contraction of the fine-grained soils.
- Thickened edges on exterior slabs will assist in keeping excessive moisture from entering directly beneath the concrete. A six-inch thick or greater deepened edge on slabs may be considered. Underlying interior and exterior slabs with 6 to 12 inches or more of non-expansive soils and providing presaturation of the underlying clayey soils as recommended in the soil report will improve the overall performance of on-grade slabs.

- Increase the amount of steel reinforcing in concrete slabs, foundations and other structures to resist the forces of expansive soils. The precise amount of reinforcing should be determined by the appropriate design engineers and/or architects.
- Recommendations of the soil report should always be followed in the development of the project. Any recommendations regarding presaturation of the upper subgrade soils in slab areas should be performed in the field and verified by the Soil Engineer.

RE: Updated Soils Infiltration Study - Proposed Industrial Warehouse Development - Located at the Southeast and Southwest Corners of Alessandro Boulevard and Chagall Court, in the City of Moreno Valley, California

Dear Mr. Bachli:

Pursuant to your request, this firm has performed an Updated Soils Infiltration Study in accordance with our proposal dated April 10, 2020 for the above referenced project. The purpose of this study is to provide additional testing to evaluate the feasibility of an on-site water disposal system for the proposed industrial development. The scope of work included the following: 1) site reconnaissance; 2) subsurface geotechnical exploration; 3) soil infiltration testing; 4) engineering analysis of field and laboratory data; and 5) preparation of a report.

The 18.05-acre subject property is located at the southeast and southwest corners of Alessandro Boulevard and Chagall Court, in the City of Moreno Valley. The generally rectangular-shaped parcel is elongated in an east to west direction with topography of the relatively level descending slightly from a north to south direction on the order of a few feet. The site is undeveloped parcel covered with a low vegetation growth of natural grasses and weeds.

It is proposed to construct an industrial warehouse development consisting of a 102,669 and 295,470 square feet building as shown on the plan by Herdman Architecture + Design dated December 18, 2019. The proposed concrete tilt-up building will be supported by a conventional slab-on-grade foundation system with perimeter-spread footings and isolated interior footings. Other improvements will include asphalt and concrete pavement areas, hardscape and landscaping.

It is assumed that the proposed grading for the development will include cut and fill procedures on the order of a few feet to achieve finished grade elevations. Final building plans shall be reviewed by this firm prior to submittal for city approval to determine the need for any additional study and revised recommendations pertinent to the proposed development, if necessary.

Field Exploration and Testing

The field exploration consisted of eight (8) additional exploratory trenches by a backhoe to depths ranging between 2 and 7 feet below ground surface (bgs) to determine the subsurface soil conditions. The explorations were visually classified and logged by a field engineer with locations of the subsurface explorations shown on the attached Site Plan. The exploratory trenches revealed the existing earth materials to consist of fill and natural soil. Detailed descriptions of the subsurface conditions are listed on the trench logs in Appendix A. It should be noted that the transition from one soil type to another as shown on the trench logs is approximate and may in fact be a gradual transition. The soils encountered are described as follows:

Fill: A fill soil classifying as a brown, fine to medium grained, silty to clayey SAND was encountered across the site to depths ranging from 1 to 2 feet below ground surface. These soils were noted to be loose and moist.

Natural: A natural undisturbed soil classifying as a brown, fine to medium grained, clayey to silty SAND to sandy CLAY was encountered beneath the upper fill soils. The native soils as encountered were observed to be dense/stiff to very dense/very stiff and moist.

The overall engineering characteristics of the earth material were relatively uniform with each trench and no caving occurred. Groundwater was encountered at a depth of 33 and 39 feet ground surface as encountered from our deep borings in our “Geotechnical Engineering Investigation” report dated January 31, 2020.

Results of Field Infiltration Tests

Infiltration tests within the site were performed to provide preliminary infiltration rates for the purpose of planning and design of an on-site water disposal system. The infiltration tests consisted of the double ring infiltration test per ASTM Method D 3385. The field infiltration rate was computed using a reduction factor – R_f based on the field measurements with our calculations given in Appendix D. Based upon the results of our testing, the soils encountered in the planned on-site drainage disposal system area exhibit the following infiltration rates.

Test No.	Depth	Soil Classification	Field Infiltration Rate	Design Rate
T-1	5'	Silty Sand	5.12 in/hr	1.707
T-2	2'	Sandy Clay	0.05 in/hr	0.017
T-3	5'	Sandy Clay	0.26 in/hr	0.087
T-4	3'	Clayey Sand	0.83 in/hr	0.277
T-5	6'	Clayey Sand	0.87 in/hr	0.290
T-6	7'	Sandy Clay	0.08 in/hr	0.027
T-7	7'	Sandy Clay	0.08 in/hr	0.027
T-8	4'	Sandy Clay	0.35 in/hr	0.117

The correction factors CF_t , CF_v and CF_s are given below based on soils from 2 to 7 feet from our field tests.

- a) $CF_t = R_f = 1.0$ for our double ring infiltration test holes.
- b) $CF_v = 1.0$ based on uniform soils encountered in eight trenches.
- c) $CF_s = 3.0$ for long-term siltation, plugging and maintenance. The subsurface soils are likely to have some plugging and regular maintenance of storm water discharge devices is required.

Based on the results of our field testing, the subsurface soils encountered in the proposed on-site drainage disposal system shall utilize the design infiltration rates based on the County of Riverside safety factor. These infiltration rates were found to be low representing very stiff fine-grained clayey soils which may not suitable for seepage at the site. Our referenced preliminary geotechnical report stated that deeper soils were clayey soils with increasing density with depth, indicating unfavorable conditions for infiltration. All systems must meet the latest county specifications and the California Regional Water Quality Control Board (CRWQCB) requirements.

It is recommended that foundations shall be setback a minimum distance of 10 feet from the drainage disposal system and the bottom of footing shall be a minimum of 10 feet from the expected zone of saturation. The boundary of the zone of saturation may be assumed to project downward from the top of the permeable portion of the disposal system at an inclination of 1 to 1 or flatter, as determined by the geotechnical engineer.

Closure

The recommendations and conclusions contained in this report are based upon the soil conditions uncovered in our test excavation. No warranty of the soil condition between our excavations is implied. NorCal Engineering should be notified for possible further recommendations if unexpected to unfavorable conditions are encountered during construction phase.

This firm should have the opportunity to review the final plans to verify that all our recommendations are incorporated. This report and all conclusions are subject to the review of the controlling authorities for the project. Our representative should be present during the grading operations and construction phase to certify that such recommendations are complied within the field.

This geotechnical investigation has been conducted in a manner consistent with the level of care and skill exercised by members of our profession currently practicing under similar conditions in the Southern California area. No other warranty, expressed or implied is made.

NorCal Engineering

We appreciate this opportunity to be of service to you. If you have any further questions, please do not hesitate to contact the undersigned.

Respectfully submitted,
NORCAL ENGINEERING

Log of Trench T-3

Boring Location: Alessandro & Chagall, Moreno Valley	
Date of Drilling: 4/21/2020	Groundwater Depth: None Encountered
Drilling Method: Backhoe	
Hammer Weight:	Drop:
Surface Elevation: Not Measured	

Depth (feet)	Lith-ology	Material Description	Samples		Laboratory		
			Type	Blow Counts	Moisture	Dry Density	Fines
0		FILL Silty SAND Brown, loose, moist					
		NATURAL Silty SAND Brown, dense to very dense, moist					
5		Clayey SAND to Sandy CLAY Brown, dense to stiff, damp					
		Trench completed at depth of 5'

HCOG Narrative
Compass Danbe Centerpointe
Proposed Industrial Warehouse Facility
APN 297-170-002 & 003
South Side of Alessandro Boulevard
City of Moreno Valley
October 6, 2020
PEN20-0120 & PEN20-0121

Alessandro Boulevard is currently a partially improved roadway with a paved roadway, curb, gutter, and sidewalk along the north side. The street is divided by an existing raised center median. The south side of the street, adjacent to the project site, is currently unimproved. Flows from the south side of Alessandro Boulevard currently drain south onto the subject site, and these tributary flows are included in this study. The development proposes to improve Alessandro Boulevard across the project frontage with curb, gutter, and sidewalk. The improvements will nearly mirror the improvements on the north side of the street, which contains two separate catch basins. The improvements will include modified under sidewalk drains, which will allow street flows to enter a proposed bioretention swale sized for water quality treatment purposes. The proposed bioretention swales will discharge treated flows to two proposed catch basins connected to the city's storm drain system, which will be extended as part of this development. The two proposed catch basins will also act as an overflow for the bioretention swale.

The proposed development of the site includes the construction of two industrial warehouse buildings with related parking, paved access, and landscaping. Post-development flows from the property will be directed via sheet flow, ribbon gutter, curb and gutter, and an underground storm drain system to one of two proposed underground detention tanks onsite. A proposed sump and pump will pump flows from the detention tank to a proposed Modular Wetland biotreatment unit for water quality treatment. The Modular Wetland biotreatment units will discharge treated flows into the city's storm drain system that is being installed as part of this development. Each of the two parcels will have its own Modular Wetlands unit and detention tank, and both are located on the south side of the proposed buildings. A separate proposed sump and pump will discharge flows in excess of water quality volumes from the detention tank to the city's storm drain system. There will be no increase in flows or intensity from historic storm events.

PRE-DEVELOPMENT DA5
2-YEAR STORM EVENT

=====

*** NON-HOMOGENEOUS WATERSHED AREA-AVERAGED LOSS RATE (Fm)
AND LOW LOSS FRACTION ESTIMATIONS FOR AMC I:

TOTAL 24-HOUR DURATION RAINFALL DEPTH = 1.83 (inches)

Table with 7 columns: SOIL-COVER TYPE, AREA (Acres), PERCENT OF PERVIOUS AREA, SCS CURVE NUMBER, LOSS RATE Fp (in./hr.), YIELD. Rows include soil types 1 and 2 with their respective area, pervious area percentage, SCS curve numbers, loss rates, and yields.

TOTAL AREA (Acres) = 0.80

AREA-AVERAGED LOSS RATE, Fm (in./hr.) = 0.167

AREA-AVERAGED LOW LOSS FRACTION, Y = 0.404

SMALL AREA UNIT HYDROGRAPH MODEL

=====

(C) Copyright 1989-2016 Advanced Engineering Software (aes)
Ver. 23.0 Release Date: 07/01/2016 License ID 1533

Analysis prepared by:

THATCHER ENGINEERING & ASSOCIATES, INC.
1461 FORD STREET, SUITE 105
REDLANDS, CA 92373
PHONE: (909) 748-7777 FAX: (909) 748-7776

Problem Descriptions:
APN 297-170-002 & 003
PRE-DEVELOPMENT DA4
2-YEAR STORM EVENT

RATIONAL METHOD CALIBRATION COEFFICIENT = 0.90
TOTAL CATCHMENT AREA (ACRES) = 0.64
SOIL-LOSS RATE, Fm, (INCH/HR) = 0.179
LOW LOSS FRACTION = 0.425
TIME OF CONCENTRATION (MIN.) = 5.36
SMALL AREA PEAK Q COMPUTED USING PEAK FLOW RATE FORMULA
USER SPECIFIED RAINFALL VALUES ARE USED
RETURN FREQUENCY (YEARS) = 2
5-MINUTE POINT RAINFALL VALUE (INCHES) = 0.12
30-MINUTE POINT RAINFALL VALUE (INCHES) = 0.32
1-HOUR POINT RAINFALL VALUE (INCHES) = 0.45
3-HOUR POINT RAINFALL VALUE (INCHES) = 0.78
6-HOUR POINT RAINFALL VALUE (INCHES) = 1.07
24-HOUR POINT RAINFALL VALUE (INCHES) = 1.83

TOTAL CATCHMENT RUNOFF VOLUME (ACRE-FEET) = 0.05
TOTAL CATCHMENT SOIL-LOSS VOLUME (ACRE-FEET) = 0.05

TIME (HOURS)	VOLUME (AF)	Q (CFS)	0.	2.5	5.0	7.5	10.0

SMALL AREA UNIT HYDROGRAPH MODEL

=====

(C) Copyright 1989-2016 Advanced Engineering Software (aes)
Ver. 23.0 Release Date: 07/01/2016 License ID 1533

Analysis prepared by:

THATCHER ENGINEERING & ASSOCIATES, INC.
1461 FORD STREET, SUITE 105
REDLANDS, CA 92373
PHONE: (909) 748-7777 FAX: (909) 748-7776

Problem Descriptions:
APN 297-170-002 & 003
PRE-DEVELOPMENT DA5
2-YEAR STORM EVENT

RATIONAL METHOD CALIBRATION COEFFICIENT = 0.90
TOTAL CATCHMENT AREA (ACRES) = 0.80
SOIL-LOSS RATE, Fm, (INCH/HR) = 0.167
LOW LOSS FRACTION = 0.404
TIME OF CONCENTRATION (MIN.) = 5.00
SMALL AREA PEAK Q COMPUTED USING PEAK FLOW RATE FORMULA
USER SPECIFIED RAINFALL VALUES ARE USED
RETURN FREQUENCY (YEARS) = 2
5-MINUTE POINT RAINFALL VALUE (INCHES) = 0.12
30-MINUTE POINT RAINFALL VALUE (INCHES) = 0.32
1-HOUR POINT RAINFALL VALUE (INCHES) = 0.45
3-HOUR POINT RAINFALL VALUE (INCHES) = 0.78
6-HOUR POINT RAINFALL VALUE (INCHES) = 1.07
24-HOUR POINT RAINFALL VALUE (INCHES) = 1.83

TOTAL CATCHMENT RUNOFF VOLUME (ACRE-FEET) = 0.07
TOTAL CATCHMENT SOIL-LOSS VOLUME (ACRE-FEET) = 0.05

TIME (HOURS)	VOLUME (AF)	Q (CFS)	0.	2.5	5.0	7.5	10.0

*** NON-HOMOGENEOUS WATERSHED AREA-AVERAGED LOSS RATE (Fm)
AND LOW LOSS FRACTION ESTIMATIONS FOR AMC I:

TOTAL 24-HOUR DURATION RAINFALL DEPTH = 1.83 (inches)

Table with 7 columns: SOIL-COVER TYPE, AREA (Acres), PERCENT OF PERVIOUS AREA, SCS CURVE NUMBER, LOSS RATE Fp(in./hr.), YIELD. Rows 1 and 2.

TOTAL AREA (Acres) = 12.82

AREA-AVERAGED LOSS RATE, Fm (in./hr.) = 0.081

AREA-AVERAGED LOW LOSS FRACTION, Y = 0.210

=====

Problem Descriptions:
APN 297-170-002 & 003
POST-DEVELOPMENT DA5
2-YEAR STORM EVENT

RATIONAL METHOD CALIBRATION COEFFICIENT = 0.90
TOTAL CATCHMENT AREA(ACRES) = 0.80
SOIL-LOSS RATE, Fm, (INCH/HR) = 0.193
LOW LOSS FRACTION = 0.331
TIME OF CONCENTRATION(MIN.) = 10.74
SMALL AREA PEAK Q COMPUTED USING PEAK FLOW RATE FORMULA
USER SPECIFIED RAINFALL VALUES ARE USED
RETURN FREQUENCY(YEARS) = 2
5-MINUTE POINT RAINFALL VALUE(INCHES) = 0.12
30-MINUTE POINT RAINFALL VALUE(INCHES) = 0.32
1-HOUR POINT RAINFALL VALUE(INCHES) = 0.45
3-HOUR POINT RAINFALL VALUE(INCHES) = 0.78
6-HOUR POINT RAINFALL VALUE(INCHES) = 1.07
24-HOUR POINT RAINFALL VALUE(INCHES) = 1.83

TOTAL CATCHMENT RUNOFF VOLUME(ACRE-FEET) = 0.07
TOTAL CATCHMENT SOIL-LOSS VOLUME(ACRE-FEET) = 0.05

¹ Precipitation frequency (PF) estimates in this table are based on frequency analysis of partial duration series (PDS). Numbers in parenthesis are PF estimates at lower and upper bounds of the 90% confidence interval. The probability that precipitation frequency estimates (for a given duration and average recurrence interval) will be greater than the upper bound (or less than the lower bound) is 5%. Estimates at upper bounds are not checked against probable maximum precipitation (PMP) estimates and may be higher than currently valid PMP values. Please refer to NOAA Atlas 14 document for more information.

Appendix 8: Source Control

Pollutant Sources/Source Control Checklist

Attachment: Appendix I1-PWQMP (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

STORMWATER POLLUTANT SOURCES/SOURCE CONTROL CHECKLIST

How to use this worksheet (also see instructions in Section G of the WQMP Template):

1. Review Column 1 and identify which of these potential sources of stormwater pollutants apply to your site. Check each box that applies.
2. Review Column 2 and incorporate all of the corresponding applicable BMPs in your WQMP Exhibit.
3. Review Columns 3 and 4 and incorporate all of the corresponding applicable permanent controls and operational BMPs in your WQMP. Use the format shown in Table G.1 on page 23 of this WQMP Template. Describe your specific BMPs in an accompanying narrative, and explain any special conditions or situations that required omitting BMPs or substituting alternative BMPs for those shown here.

IF THESE SOURCES WILL BE ON THE PROJECT SITE THEN YOUR WQMP SHOULD INCLUDE THESE SOURCE CONTROL BMPs, AS APPLICABLE		
1 Potential Sources of Runoff Pollutants	2 Permanent Controls—Show on WQMP Drawings	3 Permanent Controls—List in WQMP Table and Narrative	4 Operational BMPs—Include in WQMP Table and Narrative
<input checked="" type="checkbox"/> A. On-site storm drain inlets	<input checked="" type="checkbox"/> Locations of inlets.	<input checked="" type="checkbox"/> Mark all inlets with the words “Only Rain Down the Storm Drain” or similar. Catch Basin Markers may be available from the Riverside County Flood Control and Water Conservation District, call 951.955.1200 to verify.	<input checked="" type="checkbox"/> Maintain and periodically repaint or replace inlet markings. <input checked="" type="checkbox"/> Provide stormwater pollution prevention information to new site owners, lessees, or operators. <input checked="" type="checkbox"/> See applicable operational BMPs in Fact Sheet SC-44, “Drainage System Maintenance,” in the CASQA Stormwater Quality Handbooks at www.cabmphandbooks.com <input checked="" type="checkbox"/> Include the following in lease agreements: “Tenant shall not allow anyone to discharge anything to storm drains or to store or deposit materials so as to create a potential discharge to storm drains.”
<input type="checkbox"/> B. Interior floor drains and elevator shaft sump pumps		<input type="checkbox"/> State that interior floor drains and elevator shaft sump pumps will be plumbed to sanitary sewer.	<input type="checkbox"/> Inspect and maintain drains to prevent blockages and overflow.
<input type="checkbox"/> C. Interior parking garages		<input type="checkbox"/> State that parking garage floor drains will be plumbed to the sanitary sewer.	<input type="checkbox"/> Inspect and maintain drains to prevent blockages and overflow.

STORMWATER POLLUTANT SOURCES/SOURCE CONTROL CHECKLIST

IF THESE SOURCES WILL BE ON THE PROJECT SITE THEN YOUR WQMP SHOULD INCLUDE THESE SOURCE CONTROL BMPs, AS APPLICABLE		
1 Potential Sources of Runoff Pollutants	2 Permanent Controls—Show on WQMP Drawings	3 Permanent Controls—List in WQMP Table and Narrative	4 Operational BMPs—Include in WQMP Table and Narrative
<input type="checkbox"/> D1. Need for future indoor & structural pest control		<input type="checkbox"/> Note building design features that discourage entry of pests.	<input type="checkbox"/> Provide Integrated Pest Management information to owners, lessees, and operators.
<input checked="" type="checkbox"/> D2. Landscape/ Outdoor Pesticide Use	<input type="checkbox"/> Show locations of native trees or areas of shrubs and ground cover to be undisturbed and retained. <input type="checkbox"/> Show self-retaining landscape areas, if any. <input checked="" type="checkbox"/> Show stormwater treatment and hydrograph modification management BMPs. (See instructions in Chapter 3, Step 5 and guidance in Chapter 5.)	State that final landscape plans will accomplish all of the following. <input type="checkbox"/> Preserve existing native trees, shrubs, and ground cover to the maximum extent possible. <input checked="" type="checkbox"/> Design landscaping to minimize irrigation and runoff, to promote surface infiltration where appropriate, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. <input checked="" type="checkbox"/> Where landscaped areas are used to retain or detain stormwater, specify plants that are tolerant of saturated soil conditions. <input checked="" type="checkbox"/> Consider using pest-resistant plants, especially adjacent to hardscape. <input checked="" type="checkbox"/> To insure successful establishment, select plants appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, and plant interactions.	<input checked="" type="checkbox"/> Maintain landscaping using minimum or no pesticides. <input checked="" type="checkbox"/> See applicable operational BMPs in “What you should know for.....Landscape and Gardening” at http://rcflood.org/stormwater/Error! Hyperlink reference not valid . Provide IPM information to new owners, lessees and operators. <input checked="" type="checkbox"/>

STORMWATER POLLUTANT SOURCES/SOURCE CONTROL CHECKLIST

IF THESE SOURCES WILL BE ON THE PROJECT SITE THEN YOUR WQMP SHOULD INCLUDE THESE SOURCE CONTROL BMPs, AS APPLICABLE		
1 Potential Sources of Runoff Pollutants	2 Permanent Controls—Show on WQMP Drawings	3 Permanent Controls—List in WQMP Table and Narrative	4 Operational BMPs—Include in WQMP Table and Narrative
<input type="checkbox"/> E. Pools, spas, ponds, decorative fountains, and other water features.	<input type="checkbox"/> Show location of water feature and a sanitary sewer cleanout in an accessible area within 10 feet. (Exception: Public pools must be plumbed according to County Department of Environmental Health Guidelines.)	If the Co-Permittee requires pools to be plumbed to the sanitary sewer, place a note on the plans and state in the narrative that this connection will be made according to local requirements.	<input checked="" type="checkbox"/> See applicable operational BMPs in "Guidelines for Maintaining Your Swimming Pool, Jacuzzi and Garden Fountain" at http://rcflood.org/stormwater/
<input type="checkbox"/> F. Food service	<input type="checkbox"/> For restaurants, grocery stores, and other food service operations, show location (indoors or in a covered area outdoors) of a floor sink or other area for cleaning floor mats, containers, and equipment. <input type="checkbox"/> On the drawing, show a note that this drain will be connected to a grease interceptor before discharging to the sanitary sewer.	<input type="checkbox"/> Describe the location and features of the designated cleaning area. <input type="checkbox"/> Describe the items to be cleaned in this facility and how it has been sized to insure that the largest items can be accommodated.	<input type="checkbox"/> See the brochure, "The Food Service Industry Best Management Practices for: Restaurants, Grocery Stores, Delicatessens and Bakeries" at http://rcflood.org/stormwater/ Provide this brochure to new site owners, lessees, and operators.
<input checked="" type="checkbox"/> G. Refuse areas	<input checked="" type="checkbox"/> Show where site refuse and recycled materials will be handled and stored for pickup. See local municipal requirements for sizes and other details of refuse areas. <input checked="" type="checkbox"/> If dumpsters or other receptacles are outdoors, show how the designated area will be covered, graded, and paved to prevent run-on and show locations of berms to prevent runoff from the area. <input type="checkbox"/> Any drains from dumpsters, compactors, and tallow bin areas shall be connected to a grease removal device before discharge to sanitary sewer.	<input checked="" type="checkbox"/> State how site refuse will be handled and provide supporting detail to what is shown on plans. <input checked="" type="checkbox"/> State that signs will be posted on or near dumpsters with the words "Do not dump hazardous materials here" or similar.	<input checked="" type="checkbox"/> State how the following will be implemented: Provide adequate number of receptacles. Inspect receptacles regularly; repair or replace leaky receptacles. Keep receptacles covered. Prohibit/prevent dumping of liquid or hazardous wastes. Post "no hazardous materials" signs. Inspect and pick up litter daily and clean up spills immediately. Keep spill control materials available on-site. See Fact Sheet SC-34, "Waste Handling and Disposal" in the CASQA Stormwater Quality Handbooks at www.cabmphandbooks.com

Site Design & Landscape Planning SD-10

Design Objectives

- Maximize Infiltration
- Provide Retention
- Slow Runoff
- Minimize Impervious Land Coverage
- Prohibit Dumping of Improper Materials
- Contain Pollutants
- Collect and Convey

Description

Each project site possesses unique topographic, hydrologic, and vegetative features, some of which are more suitable for development than others. Integrating and incorporating appropriate landscape planning methodologies into the project design is the most effective action that can be done to minimize surface and groundwater contamination from stormwater.

Approach

Landscape planning should couple consideration of land suitability for urban uses with consideration of community goals and projected growth. Project plan designs should conserve natural areas to the extent possible, maximize natural water storage and infiltration opportunities, and protect slopes and channels.

Suitable Applications

Appropriate applications include residential, commercial and industrial areas planned for development or redevelopment.

Design Considerations

Design requirements for site design and landscapes planning should conform to applicable standards and specifications of agencies with jurisdiction and be consistent with applicable General Plan and Local Area Plan policies.

SD-10 Site Design & Landscape Planning

Designing New Installations

Begin the development of a plan for the landscape unit with attention to the following general principles:

- Formulate the plan on the basis of clearly articulated community goals. Carefully identify conflicts and choices between retaining and protecting desired resources and community growth.
- Map and assess land suitability for urban uses. Include the following landscape features in the assessment: wooded land, open unwooded land, steep slopes, erosion-prone soils, foundation suitability, soil suitability for waste disposal, aquifers, aquifer recharge areas, wetlands, floodplains, surface waters, agricultural lands, and various categories of urban land use. When appropriate, the assessment can highlight outstanding local or regional resources that the community determines should be protected (e.g., a scenic area, recreational area, threatened species habitat, farmland, fish run). Mapping and assessment should recognize not only these resources but also additional areas needed for their sustenance.

Project plan designs should conserve natural areas to the extent possible, maximize natural water storage and infiltration opportunities, and protect slopes and channels.

Conserve Natural Areas during Landscape Planning

If applicable, the following items are required and must be implemented in the site layout during the subdivision design and approval process, consistent with applicable General Plan and Local Area Plan policies:

- Cluster development on least-sensitive portions of a site while leaving the remaining land in a natural undisturbed condition.
- Limit clearing and grading of native vegetation at a site to the minimum amount needed to build lots, allow access, and provide fire protection.
- Maximize trees and other vegetation at each site by planting additional vegetation, clustering tree areas, and promoting the use of native and/or drought tolerant plants.
- Promote natural vegetation by using parking lot islands and other landscaped areas.
- Preserve riparian areas and wetlands.

Maximize Natural Water Storage and Infiltration Opportunities Within the Landscape Unit

- Promote the conservation of forest cover. Building on land that is already deforested affects basin hydrology to a lesser extent than converting forested land. Loss of forest cover reduces interception storage, detention in the organic forest floor layer, and water losses by evapotranspiration, resulting in large peak runoff increases and either their negative effects or the expense of countering them with structural solutions.
- Maintain natural storage reservoirs and drainage corridors, including depressions, areas of permeable soils, swales, and intermittent streams. Develop and implement policies and

Site Design & Landscape Planning SD-10

regulations to discourage the clearing, filling, and channelization of these features. Utilize them in drainage networks in preference to pipes, culverts, and engineered ditches.

- Evaluating infiltration opportunities by referring to the stormwater management manual for the jurisdiction and pay particular attention to the selection criteria for avoiding groundwater contamination, poor soils, and hydrogeological conditions that cause these facilities to fail. If necessary, locate developments with large amounts of impervious surfaces or a potential to produce relatively contaminated runoff away from groundwater recharge areas.

Protection of Slopes and Channels during Landscape Design

- Convey runoff safely from the tops of slopes.
- Avoid disturbing steep or unstable slopes.
- Avoid disturbing natural channels.
- Stabilize disturbed slopes as quickly as possible.
- Vegetate slopes with native or drought tolerant vegetation.
- Control and treat flows in landscaping and/or other controls prior to reaching existing natural drainage systems.
- Stabilize temporary and permanent channel crossings as quickly as possible, and ensure that increases in run-off velocity and frequency caused by the project do not erode the channel.
- Install energy dissipaters, such as riprap, at the outlets of new storm drains, culverts, conduits, or channels that enter unlined channels in accordance with applicable specifications to minimize erosion. Energy dissipaters shall be installed in such a way as to minimize impacts to receiving waters.
- Line on-site conveyance channels where appropriate, to reduce erosion caused by increased flow velocity due to increases in tributary impervious area. The first choice for linings should be grass or some other vegetative surface; since these materials not only reduce runoff velocities, but also provide water quality benefits from filtration and infiltration. If velocities in the channel are high enough to erode grass or other vegetative linings, riprap, concrete, soil cement, or geo-grid stabilization are other alternatives.
- Consider other design principles that are comparable and equally effective.

Redeveloping Existing Installations

Various jurisdictional stormwater management and mitigation plans (SUSMP, WQMP, etc.) define “redevelopment” in terms of amounts of additional impervious area, increases in gross floor area and/or exterior construction, and land disturbing activities with structural or impervious surfaces. The definition of “redevelopment” must be consulted to determine whether or not the requirements for new development apply to areas intended for redevelopment. If the definition applies, the steps outlined under “designing new installations” above should be followed.

SD-10 Site Design & Landscape Planning

Redevelopment may present significant opportunity to add features which had not previously been implemented. Examples include incorporation of depressions, areas of permeable soils, and swales in newly redeveloped areas. While some site constraints may exist due to the status of already existing infrastructure, opportunities should not be missed to maximize infiltration, slow runoff, reduce impervious areas, disconnect directly connected impervious areas.

Efficient Irrigation

SD-12

Design Objectives

- Maximize Infiltration
- Provide Retention
- Slow Runoff
- Minimize Impervious Land Coverage
- Prohibit Dumping of Improper Materials
- Contain Pollutants
- Collect and Convey

Description

Irrigation water provided to landscaped areas may result in excess irrigation water being conveyed into stormwater drainage systems.

Approach

Project plan designs for development and redevelopment should include application methods of irrigation water that minimize runoff of excess irrigation water into the stormwater conveyance system.

Suitable Applications

Appropriate applications include residential, commercial and industrial areas planned for development or redevelopment. (Detached residential single-family homes are typically excluded from this requirement.)

Design Considerations

Designing New Installations

The following methods to reduce excessive irrigation runoff should be considered, and incorporated and implemented where determined applicable and feasible by the Permittee:

- Employ rain-triggered shutoff devices to prevent irrigation after precipitation.
- Design irrigation systems to each landscape area's specific water requirements.
- Include design featuring flow reducers or shutoff valves triggered by a pressure drop to control water loss in the event of broken sprinkler heads or lines.
- Implement landscape plans consistent with County or City water conservation resolutions, which may include provision of water sensors, programmable irrigation times (for short cycles), etc.

SD-12

Efficient Irrigation

- Design timing and application methods of irrigation water to minimize the runoff of excess irrigation water into the storm water drainage system.
- Group plants with similar water requirements in order to reduce excess irrigation runoff and promote surface filtration. Choose plants with low irrigation requirements (for example, native or drought tolerant species). Consider design features such as:
 - Using mulches (such as wood chips or bark) in planter areas without ground cover to minimize sediment in runoff
 - Installing appropriate plant materials for the location, in accordance with amount of sunlight and climate, and use native plant materials where possible and/or as recommended by the landscape architect
 - Leaving a vegetative barrier along the property boundary and interior watercourses, to act as a pollutant filter, where appropriate and feasible
 - Choosing plants that minimize or eliminate the use of fertilizer or pesticides to sustain growth
- Employ other comparable, equally effective methods to reduce irrigation water runoff.

Redeveloping Existing Installations

Various jurisdictional stormwater management and mitigation plans (SUSMP, WQMP, etc.) define “redevelopment” in terms of amounts of additional impervious area, increases in gross floor area and/or exterior construction, and land disturbing activities with structural or impervious surfaces. The definition of “redevelopment” must be consulted to determine whether or not the requirements for new development apply to areas intended for redevelopment. If the definition applies, the steps outlined under “designing new installations” above should be followed.

Alternative Building Materials

SD-21

Design Objectives

- Maximize Infiltration
- Provide Retention
- Source Control
- Minimize Impervious Land Coverage
- Prohibit Dumping of Improper Materials
- Contain Pollutant
- Collect and Convey

Description

Alternative building materials are selected instead of conventional materials for new construction and renovation. These materials reduce potential sources of pollutants in stormwater runoff by eliminating compounds that can leach into runoff, reducing the need for pesticide application, reducing the need for painting and other maintenance, or by reducing the volume of runoff.

Approach

Alternative building materials are available for use as lumber for decking, roofing materials, home siding, and paving for driveways, decks, and sidewalks.

Suitable Applications

Appropriate applications include residential, commercial and industrial areas planned for development or redevelopment.

Design Considerations

Designing New Installations

Decking

One of the most common materials for construction of decks and other outdoor construction has traditionally been pressure treated wood, which is now being phased out. The standard treatment is called CCA, for chromated copper arsenate. The key ingredients are arsenic (which kills termites, carpenter ants and other insects), copper (which kills the fungi that cause wood to rot) and chromium (which reacts with the other ingredients to bind them to the wood). The amount of arsenic is far from trivial. A deck just 8 feet x 10 feet contains more than 1 1/3 pounds of this highly potent poison. Replacement materials include a new type of pressure treated wood, plastic and composite lumber.

SD-21 **Alternative Building Materials**

There are currently over 20 products in the market consisting of plastic or plastic-wood composites. Plastic lumber is made from 100% recycled plastic, # 2 HDPE and polyethylene plastic milk jugs and soap bottles. Plastic-wood composites are a combination of plastic and wood fibers or sawdust. These materials are a long lasting exterior weather, insect, and chemical resistant wood lumber replacement for non structural applications. Use it for decks, docks, raised garden beds and planter boxes, pallets, hand railings, outdoor furniture, animal pens, boat decks, etc.

New pressure treated wood uses a much safer recipe, ACQ, which stands for ammoniacal copper quaternary. It contains no arsenic and no chromium. Yet the American Wood Preservers Association has found it to be just as effective as the standard formula. ACQ is common in Japan and Europe.

Roofing

Several studies have indicated that metal used as roofing material, flashing, or gutters can leach metals into the environment. The leaching occurs because rainfall is slightly acidic and slowly dissolved the exposed metals. Common traditional applications include copper sheathing and galvanized (zinc) gutters.

Coated metal products are available for both roofing and gutter applications. These products eliminate contact of bare metal with rainfall, eliminating one source of metals in runoff. There are also roofing materials made of recycled rubber and plastic that resemble traditional materials.

A less traditional approach is the use of green roofs. These roofs are not just green, they're alive. Planted with grasses and succulents, low- profile green roofs reduce the urban heat island effect, stormwater runoff, and cooling costs, while providing wildlife habitat and a connection to nature for building occupants. These roofs are widely used on industrial facilities in Europe and have been established as experimental installations in several locations in the US, including Portland, Oregon. Their feasibility is questionable in areas of California with prolonged, dry, hot weather.

Paved Areas

Traditionally, concrete is used for construction of patios, sidewalks, and driveways. Although it is non-toxic, these paved areas reduce stormwater infiltration and increase the volume and rate of runoff. This increase in the amount of runoff is the leading cause of stream channel degradation in urban areas.

There are a number of alternative materials that can be used in these applications, including porous concrete and asphalt, modular blocks, and crushed granite. These materials, especially modular paving blocks, are widely available and a well established method to reduce stormwater runoff.

Building Siding

Wood siding is commonly used on the exterior of residential construction. This material weathers fairly rapidly and requires repeated painting to prevent rotting. Alternative "new" products for this application include cement-fiber and vinyl. Cement-fiber siding is a masonry product made from Portland cement, sand, and cellulose and will not burn, cup, swell, or shrink.

Alternative Building Materials

SD-21

Pesticide Reduction

A common use of powerful pesticides is for the control of termites. Chlordane was used for many years for this purpose and is now found in urban streams and lakes nationwide. There are a number of physical barriers that can be installed during construction to help reduce the use of pesticides.

Sand barriers for subterranean termites are a physical deterrent because the termites cannot tunnel through it. Sand barriers can be applied in crawl spaces under pier and beam foundations, under slab foundations, and between the foundation and concrete porches, terraces, patios and steps. Other possible locations include under fence posts, underground electrical cables, water and gas lines, telephone and electrical poles, inside hollow tile cells and against retaining walls.

Metal termite shields are physical barriers to termites which prevent them from building invisible tunnels. In reality, metal shields function as a helpful termite detection device, forcing them to build tunnels on the outside of the shields which are easily seen. Metal termite shields also help prevent dampness from wicking to adjoining wood members which can result in rot, thus making the material more attractive to termites and other pests. Metal flashing and metal plates can also be used as a barrier between piers and beams of structures such as decks, which are particularly vulnerable to termite attack.

Redeveloping Existing Installations

Various jurisdictional stormwater management and mitigation plans (SUSMP, WQMP, etc.) define “redevelopment” in terms of amounts of additional impervious area, increases in gross floor area and/or exterior construction, and land disturbing activities with structural or impervious surfaces. The definition of “redevelopment” must be consulted to determine whether or not the requirements for new development apply to areas intended for redevelopment. If the definition applies, the steps outlined under “designing new installations” above should be followed.

Other Resources

There are no good, independent, comprehensive sources of information on alternative building materials for use in minimizing the impacts of stormwater runoff. Most websites or other references to “green” or “alternative” building materials focus on indoor applications, such as formaldehyde free plywood and low VOC paints, carpets, and pads. Some supplemental information on alternative materials is available from the manufacturers.

Fires are a source of concern in many areas of California. Information on the flammability of alternative decking materials is available from the University of California Forest Product Laboratory (UCFPL) website at: <http://www.ucfpl.ucop.edu/WDeckIntro.htm>

Bioretention

TC-32

Description

The bioretention best management practice (BMP) functions as a soil and plant-based filtration device that removes pollutants through a variety of physical, biological, and chemical treatment processes. These facilities normally consist of a grass buffer strip, sand bed, ponding area, organic layer or mulch layer, planting soil, and plants. The runoff's velocity is reduced by passing over or through buffer strip and subsequently distributed evenly along a ponding area. Exfiltration of the stored water in the bioretention area planting soil into the underlying soils occurs over a period of days.

California Experience

None documented. Bioretention has been used as a stormwater BMP since 1992. In addition to Prince George's County, MD and Alexandria, VA, bioretention has been used successfully at urban and suburban areas in Montgomery County, MD; Baltimore County, MD; Chesterfield County, VA; Prince William County, VA; Smith Mountain Lake State Park, VA; and Cary, NC.

Advantages

- Bioretention provides stormwater treatment that enhances the quality of downstream water bodies by temporarily storing runoff in the BMP and releasing it over a period of four days to the receiving water (EPA, 1999).
- The vegetation provides shade and wind breaks, absorbs noise, and improves an area's landscape.

Limitations

- The bioretention BMP is not recommended for areas with slopes greater than 20% or where mature tree removal would

Design Considerations

- Soil for Infiltration
- Tributary Area
- Slope
- Aesthetics
- Environmental Side-effects

<input checked="" type="checkbox"/>	Organics	■

Legend (Removal Effectiveness)

- Low
- High
- ▲ Medium

TC-32

Bioretention

be required since clogging may result, particularly if the BMP receives runoff with high sediment loads (EPA, 1999).

- Bioretention is not a suitable BMP at locations where the water table is within 6 feet of the ground surface and where the surrounding soil stratum is unstable.
- By design, bioretention BMPs have the potential to create very attractive habitats for mosquitoes and other vectors because of highly organic, often heavily vegetated areas mixed with shallow water.
- In cold climates the soil may freeze, preventing runoff from infiltrating into the planting soil.

Design and Sizing Guidelines

- The bioretention area should be sized to capture the design storm runoff.
- In areas where the native soil permeability is less than 0.5 in/hr an underdrain should be provided.
- Recommended minimum dimensions are 15 feet by 40 feet, although the preferred width is 25 feet. Excavated depth should be 4 feet.
- Area should drain completely within 72 hours.
- Approximately 1 tree or shrub per 50 ft² of bioretention area should be included.
- Cover area with about 3 inches of mulch.

Construction/Inspection Considerations

Bioretention area should not be established until contributing watershed is stabilized.

Performance

Bioretention removes stormwater pollutants through physical and biological processes, including adsorption, filtration, plant uptake, microbial activity, decomposition, sedimentation and volatilization (EPA, 1999). Adsorption is the process whereby particulate pollutants attach to soil (e.g., clay) or vegetation surfaces. Adequate contact time between the surface and pollutant must be provided for in the design of the system for this removal process to occur. Thus, the infiltration rate of the soils must not exceed those specified in the design criteria or pollutant removal may decrease. Pollutants removed by adsorption include metals, phosphorus, and hydrocarbons. Filtration occurs as runoff passes through the bioretention area media, such as the sand bed, ground cover, and planting soil.

Common particulates removed from stormwater include particulate organic matter, phosphorus, and suspended solids. Biological processes that occur in wetlands result in pollutant uptake by plants and microorganisms in the soil. Plant growth is sustained by the uptake of nutrients from the soils, with woody plants locking up these nutrients through the seasons. Microbial activity within the soil also contributes to the removal of nitrogen and organic matter. Nitrogen is removed by nitrifying and denitrifying bacteria, while aerobic bacteria are responsible for the decomposition of the organic matter. Microbial processes require oxygen and can result in depleted oxygen levels if the bioretention area is not adequately

Bioretention

TC-32

aerated. Sedimentation occurs in the swale or ponding area as the velocity slows and solids fall out of suspension.

The removal effectiveness of bioretention has been studied during field and laboratory studies conducted by the University of Maryland (Davis et al, 1998). During these experiments, synthetic stormwater runoff was pumped through several laboratory and field bioretention areas to simulate typical storm events in Prince George's County, MD. Removal rates for heavy metals and nutrients are shown in Table 1.

Pollutant	Removal Rate
Total Phosphorus	70-83%
Metals (Cu, Zn, Pb)	93-98%
TKN	68-80%
Total Suspended Solids	90%
Organics	90%
Bacteria	90%

Results for both the laboratory and field experiments were similar for each of the pollutants analyzed. Doubling or halving the influent pollutant levels had little effect on the effluent pollutants concentrations (Davis et al, 1998).

The microbial activity and plant uptake occurring in the bioretention area will likely result in higher removal rates than those determined for infiltration BMPs.

Siting Criteria

Bioretention BMPs are generally used to treat stormwater from impervious surfaces at commercial, residential, and industrial areas (EPA, 1999). Implementation of bioretention for stormwater management is ideal for median strips, parking lot islands, and swales. Moreover, the runoff in these areas can be designed to either divert directly into the bioretention area or convey into the bioretention area by a curb and gutter collection system.

The best location for bioretention areas is upland from inlets that receive sheet flow from graded areas and at areas that will be excavated (EPA, 1999). In order to maximize treatment effectiveness, the site must be graded in such a way that minimizes erosive conditions as sheet flow is conveyed to the treatment area. Locations where a bioretention area can be readily incorporated into the site plan without further environmental damage are preferred. Furthermore, to effectively minimize sediment loading in the treatment area, bioretention only should be used in stabilized drainage areas.

Additional Design Guidelines

The layout of the bioretention area is determined after site constraints such as location of utilities, underlying soils, existing vegetation, and drainage are considered (EPA, 1999). Sites with loamy sand soils are especially appropriate for bioretention because the excavated soil can be backfilled and used as the planting soil, thus eliminating the cost of importing planting soil.

The use of bioretention may not be feasible given an unstable surrounding soil stratum, soils with clay content greater than 25 percent, a site with slopes greater than 20 percent, and/or a site with mature trees that would be removed during construction of the BMP.

Bioretention can be designed to be off-line or on-line of the existing drainage system (EPA, 1999). The drainage area for a bioretention area should be between 0.1 and 0.4 hectares (0.25 and 1.0 acres). Larger drainage areas may require multiple bioretention areas. Furthermore, the maximum drainage area for a bioretention area is determined by the expected rainfall intensity and runoff rate. Stabilized areas may erode when velocities are greater than 5 feet per second (1.5 meter per second). The designer should determine the potential for erosive conditions at the site.

The size of the bioretention area, which is a function of the drainage area and the runoff generated from the area is sized to capture the water quality volume.

The recommended minimum dimensions of the bioretention area are 15 feet (4.6 meters) wide by 40 feet (12.2 meters) long, where the minimum width allows enough space for a dense, randomly-distributed area of trees and shrubs to become established. Thus replicating a natural forest and creating a microclimate, thereby enabling the bioretention area to tolerate the effects of heat stress, acid rain, runoff pollutants, and insect and disease infestations which landscaped areas in urban settings typically are unable to tolerate. The preferred width is 25 feet (7.6 meters), with a length of twice the width. Essentially, any facilities wider than 20 feet (6.1 meters) should be twice as long as they are wide, which promotes the distribution of flow and decreases the chances of concentrated flow.

In order to provide adequate storage and prevent water from standing for excessive periods of time the ponding depth of the bioretention area should not exceed 6 inches (15 centimeters). Water should not be left to stand for more than 72 hours. A restriction on the type of plants that can be used may be necessary due to some plants' water intolerance. Furthermore, if water is left standing for longer than 72 hours mosquitoes and other insects may start to breed.

The appropriate planting soil should be backfilled into the excavated bioretention area. Planting soils should be sandy loam, loamy sand, or loam texture with a clay content ranging from 10 to 25 percent.

Generally the soil should have infiltration rates greater than 0.5 inches (1.25 centimeters) per hour, which is typical of sandy loams, loamy sands, or loams. The pH of the soil should range between 5.5 and 6.5, where pollutants such as organic nitrogen and phosphorus can be adsorbed by the soil and microbial activity can flourish. Additional requirements for the planting soil include a 1.5 to 3 percent organic content and a maximum 500 ppm concentration of soluble salts.

Bioretention

TC-32

Soil tests should be performed for every 500 cubic yards (382 cubic meters) of planting soil, with the exception of pH and organic content tests, which are required only once per bioretention area (EPA, 1999). Planting soil should be 4 inches (10.1 centimeters) deeper than the bottom of the largest root ball and 4 feet (1.2 meters) altogether. This depth will provide adequate soil for the plants' root systems to become established, prevent plant damage due to severe wind, and provide adequate moisture capacity. Most sites will require excavation in order to obtain the recommended depth.

Planting soil depths of greater than 4 feet (1.2 meters) may require additional construction practices such as shoring measures (EPA, 1999). Planting soil should be placed in 18 inches or greater lifts and lightly compacted until the desired depth is reached. Since high canopy trees may be destroyed during maintenance the bioretention area should be vegetated to resemble a terrestrial forest community ecosystem that is dominated by understory trees. Three species each of both trees and shrubs are recommended to be planted at a rate of 2500 trees and shrubs per hectare (1000 per acre). For instance, a 15 foot (4.6 meter) by 40 foot (12.2 meter) bioretention area (600 square feet or 55.75 square meters) would require 14 trees and shrubs. The shrub-to-tree ratio should be 2:1 to 3:1.

Trees and shrubs should be planted when conditions are favorable. Vegetation should be watered at the end of each day for fourteen days following its planting. Plant species tolerant of pollutant loads and varying wet and dry conditions should be used in the bioretention area.

The designer should assess aesthetics, site layout, and maintenance requirements when selecting plant species. Adjacent non-native invasive species should be identified and the designer should take measures, such as providing a soil breach to eliminate the threat of these species invading the bioretention area. Regional landscaping manuals should be consulted to ensure that the planting of the bioretention area meets the landscaping requirements established by the local authorities. The designers should evaluate the best placement of vegetation within the bioretention area. Plants should be placed at irregular intervals to replicate a natural forest. Trees should be placed on the perimeter of the area to provide shade and shelter from the wind. Trees and shrubs can be sheltered from damaging flows if they are placed away from the path of the incoming runoff. In cold climates, species that are more tolerant to cold winds, such as evergreens, should be placed in windier areas of the site.

Following placement of the trees and shrubs, the ground cover and/or mulch should be established. Ground cover such as grasses or legumes can be planted at the beginning of the growing season. Mulch should be placed immediately after trees and shrubs are planted. Two to 3 inches (5 to 7.6 cm) of commercially-available fine shredded hardwood mulch or shredded hardwood chips should be applied to the bioretention area to protect from erosion.

Maintenance

The primary maintenance requirement for bioretention areas is that of inspection and repair or replacement of the treatment area's components. Generally, this involves nothing more than the routine periodic maintenance that is required of any landscaped area. Plants that are appropriate for the site, climatic, and watering conditions should be selected for use in the bioretention cell. Appropriately selected plants will aide in reducing fertilizer, pesticide, water, and overall maintenance requirements. Bioretention system components should blend over time through plant and root growth, organic decomposition, and the development of a natural

TC-32

Bioretention

soil horizon. These biologic and physical processes over time will lengthen the facility's life span and reduce the need for extensive maintenance.

Routine maintenance should include a biannual health evaluation of the trees and shrubs and subsequent removal of any dead or diseased vegetation (EPA, 1999). Diseased vegetation should be treated as needed using preventative and low-toxic measures to the extent possible. BMPs have the potential to create very attractive habitats for mosquitoes and other vectors because of highly organic, often heavily vegetated areas mixed with shallow water. Routine inspections for areas of standing water within the BMP and corrective measures to restore proper infiltration rates are necessary to prevent creating mosquito and other vector habitat. In addition, bioretention BMPs are susceptible to invasion by aggressive plant species such as cattails, which increase the chances of water standing and subsequent vector production if not routinely maintained.

In order to maintain the treatment area's appearance it may be necessary to prune and weed. Furthermore, mulch replacement is suggested when erosion is evident or when the site begins to look unattractive. Specifically, the entire area may require mulch replacement every two to three years, although spot mulching may be sufficient when there are random void areas. Mulch replacement should be done prior to the start of the wet season.

New Jersey's Department of Environmental Protection states in their bioretention systems standards that accumulated sediment and debris removal (especially at the inflow point) will normally be the primary maintenance function. Other potential tasks include replacement of dead vegetation, soil pH regulation, erosion repair at inflow points, mulch replenishment, unclogging the underdrain, and repairing overflow structures. There is also the possibility that the cation exchange capacity of the soils in the cell will be significantly reduced over time. Depending on pollutant loads, soils may need to be replaced within 5-10 years of construction (LID, 2000).

Cost

Construction Cost

Construction cost estimates for a bioretention area are slightly greater than those for the required landscaping for a new development (EPA, 1999). A general rule of thumb (Coffman, 1999) is that residential bioretention areas average about \$3 to \$4 per square foot, depending on soil conditions and the density and types of plants used. Commercial, industrial and institutional site costs can range between \$10 to \$40 per square foot, based on the need for control structures, curbing, storm drains and underdrains.

Retrofitting a site typically costs more, averaging \$6,500 per bioretention area. The higher costs are attributed to the demolition of existing concrete, asphalt, and existing structures and the replacement of fill material with planting soil. The costs of retrofitting a commercial site in Maryland, Kettering Development, with 15 bioretention areas were estimated at \$111,600.

In any bioretention area design, the cost of plants varies substantially and can account for a significant portion of the expenditures. While these cost estimates are slightly greater than those of typical landscaping treatment (due to the increased number of plantings, additional soil excavation, backfill material, use of underdrains etc.), those landscaping expenses that would be required regardless of the bioretention installation should be subtracted when determining the net cost.

Bioretention

TC-32

Perhaps of most importance, however, the cost savings compared to the use of traditional structural stormwater conveyance systems makes bioretention areas quite attractive financially. For example, the use of bioretention can decrease the cost required for constructing stormwater conveyance systems at a site. A medical office building in Maryland was able to reduce the amount of storm drain pipe that was needed from 800 to 230 feet - a cost savings of \$24,000 (PGDER, 1993). And a new residential development spent a total of approximately \$100,000 using bioretention cells on each lot instead of nearly \$400,000 for the traditional stormwater ponds that were originally planned (Rappahanock,). Also, in residential areas, stormwater management controls become a part of each property owner's landscape, reducing the public burden to maintain large centralized facilities.

Maintenance Cost

The operation and maintenance costs for a bioretention facility will be comparable to those of typical landscaping required for a site. Costs beyond the normal landscaping fees will include the cost for testing the soils and may include costs for a sand bed and planting soil.

Outdoor Loading/Unloading

SC-30

Description

The loading/unloading of materials usually takes place outside on docks or terminals; therefore, materials spilled, leaked, or lost during loading/unloading may collect in the soil or on other surfaces and have the potential to be carried away by stormwater runoff or when the area is cleaned. Additionally, rainfall may wash pollutants from machinery used to unload or move materials. Implementation of the following protocols will prevent or reduce the discharge of pollutants to stormwater from outdoor loading/unloading of materials.

Approach

Reduce potential for pollutant discharge through source control pollution prevention and BMP implementation. Successful implementation depends on effective training of employees on applicable BMPs and general pollution prevention strategies and objectives.

Pollution Prevention

- Keep accurate maintenance logs to evaluate materials removed and improvements made.
- Park tank trucks or delivery vehicles in designated areas so that spills or leaks can be contained.
- Limit exposure of material to rainfall whenever possible.
- Prevent stormwater run-on.
- Check equipment regularly for leaks.

Objectives

- Cover
- Contain
- Educate
- Reduce/Minimize
- Product Substitution

Targeted Constituents

Sediment	✓
Nutrients	✓
Trash	
Metals	✓
Bacteria	
Oil and Grease	✓
Organics	✓

SC-30**Outdoor Loading/Unloading*****Suggested Protocols******Loading and Unloading – General Guidelines***

- Develop an operations plan that describes procedures for loading and/or unloading.
- Conduct loading and unloading in dry weather if possible.
- Cover designated loading/unloading areas to reduce exposure of materials to rain.
- Consider placing a seal or door skirt between delivery vehicles and building to prevent exposure to rain.
- Design loading/unloading area to prevent stormwater run-on, which would include grading or berming the area, and position roof downspouts so they direct stormwater away from the loading/unloading areas.
- Have employees load and unload all materials and equipment in covered areas such as building overhangs at loading docks if feasible.
- Load/unload only at designated loading areas.
- Use drip pans underneath hose and pipe connections and other leak-prone spots during liquid transfer operations, and when making and breaking connections. Several drip pans should be stored in a covered location near the liquid transfer area so that they are always available, yet protected from precipitation when not in use. Drip pans can be made specifically for railroad tracks. Drip pans must be cleaned periodically, and drip collected materials must be disposed of properly.
- Pave loading areas with concrete instead of asphalt.
- Avoid placing storm drains in the area.
- Grade and/or berm the loading/unloading area to a drain that is connected to a deadend.

Inspection

- Check loading and unloading equipment regularly for leaks, including valves, pumps, flanges and connections.
- Look for dust or fumes during loading or unloading operations.

Training

- Train employees (e.g., fork lift operators) and contractors on proper spill containment and cleanup.
- Have employees trained in spill containment and cleanup present during loading/unloading.
- Train employees in proper handling techniques during liquid transfers to avoid spills.
- Make sure forklift operators are properly trained on loading and unloading procedures.

Outdoor Loading/Unloading

SC-30

Spill Response and Prevention

- Keep your Spill Prevention Control and Countermeasure (SPCC) Plan up-to-date.
- Contain leaks during transfer.
- Store and maintain appropriate spill cleanup materials in a location that is readily accessible and known to all and ensure that employees are familiar with the site's spill control plan and proper spill cleanup procedures.
- Have an emergency spill cleanup plan readily available.
- Use drip pans or comparable devices when transferring oils, solvents, and paints.

Other Considerations (Limitations and Regulations)

- Space and time limitations may preclude all transfers from being performed indoors or under cover.
- It may not be possible to conduct transfers only during dry weather.

Requirements

Costs

Costs should be low except when covering a large loading/unloading area.

Maintenance

- Conduct regular inspections and make repairs as necessary. The frequency of repairs will depend on the age of the facility.
- Check loading and unloading equipment regularly for leaks.
- Conduct regular broom dry-sweeping of area.

Supplemental Information

Further Detail of the BMP

Special Circumstances for Indoor Loading/Unloading of Materials

Loading or unloading of liquids should occur in the manufacturing building so that any spills that are not completely retained can be discharged to the sanitary sewer, treatment plant, or treated in a manner consistent with local sewer authorities and permit requirements.

- For loading and unloading tank trucks to above and below ground storage tanks, the following procedures should be used:
 - The area where the transfer takes place should be paved. If the liquid is reactive with the asphalt, Portland cement should be used to pave the area.
 - The transfer area should be designed to prevent run-on of stormwater from adjacent areas. Sloping the pad and using a curb, like a speed bump, around the uphill side of the transfer area should reduce run-on.

SC-30

Outdoor Loading/Unloading

- The transfer area should be designed to prevent runoff of spilled liquids from the area. Sloping the area to a drain should prevent runoff. The drain should be connected to a dead-end sump or to the sanitary sewer. A positive control valve should be installed on the drain.
- For transfer from rail cars to storage tanks that must occur outside, use the following procedures:
 - Drip pans should be placed at locations where spillage may occur, such as hose connections, hose reels, and filler nozzles. Use drip pans when making and breaking connections.
 - Drip pan systems should be installed between the rails to collect spillage from tank cars.

Parking/Storage Area Maintenance SC-43

Description

Parking lots and storage areas can contribute a number of substances, such as trash, suspended solids, hydrocarbons, oil and grease, and heavy metals that can enter receiving waters through stormwater runoff or non-stormwater discharges. The protocols in this fact sheet are intended to prevent or reduce the discharge of pollutants from parking/storage areas and include using good housekeeping practices, following appropriate cleaning BMPs, and training employees.

Approach

The goal of this program is to ensure stormwater pollution prevention practices are considered when conducting activities on or around parking areas and storage areas to reduce potential for pollutant discharge to receiving waters. Successful implementation depends on effective training of employees on applicable BMPs and general pollution prevention strategies and objectives.

Pollution Prevention

- Encourage alternative designs and maintenance strategies for impervious parking lots. (See New Development and Redevelopment BMP Handbook)
- Keep accurate maintenance logs to evaluate BMP implementation.

Objectives

- Cover
- Contain
- Educate
- Reduce/Minimize
- Product Substitution

Targeted Constituents

Sediment	✓
Nutrients	
Trash	✓
Metals	✓
Bacteria	
Oil and Grease	✓
Organics	✓

SC-43 Parking/Storage Area Maintenance

Suggested Protocols

General

- Keep the parking and storage areas clean and orderly. Remove debris in a timely fashion.
- Allow sheet runoff to flow into biofilters (vegetated strip and swale) and/or infiltration devices.
- Utilize sand filters or oleophilic collectors for oily waste in low quantities.
- Arrange rooftop drains to prevent drainage directly onto paved surfaces.
- Design lot to include semi-permeable hardscape.
- Discharge soapy water remaining in mop or wash buckets to the sanitary sewer through a sink, toilet, clean-out, or wash area with drain.

Controlling Litter

- Post "No Littering" signs and enforce anti-litter laws.
- Provide an adequate number of litter receptacles.
- Clean out and cover litter receptacles frequently to prevent spillage.
- Provide trash receptacles in parking lots to discourage litter.
- Routinely sweep, shovel, and dispose of litter in the trash.

Surface Cleaning

- Use dry cleaning methods (e.g., sweeping, vacuuming) to prevent the discharge of pollutants into the stormwater conveyance system if possible.
- Establish frequency of public parking lot sweeping based on usage and field observations of waste accumulation.
- Sweep all parking lots at least once before the onset of the wet season.
- Follow the procedures below if water is used to clean surfaces:
 - Block the storm drain or contain runoff.
 - Collect and pump wash water to the sanitary sewer or discharge to a pervious surface. Do not allow wash water to enter storm drains.
 - Dispose of parking lot sweeping debris and dirt at a landfill.
- Follow the procedures below when cleaning heavy oily deposits:
 - Clean oily spots with absorbent materials.
 - Use a screen or filter fabric over inlet, then wash surfaces.

Parking/Storage Area Maintenance SC-43

- Do not allow discharges to the storm drain.
- Vacuum/pump discharges to a tank or discharge to sanitary sewer.
- Appropriately dispose of spilled materials and absorbents.

Surface Repair

- Preheat, transfer or load hot bituminous material away from storm drain inlets.
- Apply concrete, asphalt, and seal coat during dry weather to prevent contamination from contacting stormwater runoff.
- Cover and seal nearby storm drain inlets where applicable (with waterproof material or mesh) and manholes before applying seal coat, slurry seal, etc. Leave covers in place until job is complete and all water from emulsified oil sealants has drained or evaporated. Clean any debris from these covered manholes and drains for proper disposal.
- Use only as much water as necessary for dust control, to avoid runoff.
- Catch drips from paving equipment that is not in use with pans or absorbent material placed under the machines. Dispose of collected material and absorbents properly.

Inspection

- Have designated personnel conduct inspections of parking facilities and stormwater conveyance systems associated with parking facilities on a regular basis.
- Inspect cleaning equipment/sweepers for leaks on a regular basis.

Training

- Provide regular training to field employees and/or contractors regarding cleaning of paved areas and proper operation of equipment.
- Train employees and contractors in proper techniques for spill containment and cleanup.

Spill Response and Prevention

- Keep your Spill Prevention Control and Countermeasure (SPCC) Plan up-to-date.
- Place a stockpile of spill cleanup materials where it will be readily accessible or at a central location.
- Clean up fluid spills immediately with absorbent rags or material.
- Dispose of spilled material and absorbents properly.

Other Considerations

Limitations related to sweeping activities at large parking facilities may include high equipment costs, the need for sweeper operator training, and the inability of current sweeper technology to remove oil and grease.

SC-43 Parking/Storage Area Maintenance

Requirements

Costs

Cleaning/sweeping costs can be quite large. Construction and maintenance of stormwater structural controls can be quite expensive as well.

Maintenance

- Sweep parking lot regularly to minimize cleaning with water.
- Clean out oil/water/sand separators regularly, especially after heavy storms.
- Clean parking facilities regularly to prevent accumulated wastes and pollutants from being discharged into conveyance systems during rainy conditions.

Supplemental Information

Further Detail of the BMP

Surface Repair

Apply concrete, asphalt, and seal coat during dry weather to prevent contamination from contacting stormwater runoff. Where applicable, cover and seal nearby storm drain inlets (with waterproof material or mesh) and manholes before applying seal coat, slurry seal, etc. Leave covers in place until job is complete and all water from emulsified oil sealants has drained or evaporated. Clean any debris from these covered manholes and drains for proper disposal. Only use only as much water as is necessary for dust control to avoid runoff.

Drainage System Maintenance

SC-44

Description

As a consequence of its function, the stormwater conveyance system collects and transports urban runoff and stormwater that may contain certain pollutants. The protocols in this fact sheet are intended to reduce pollutants reaching receiving waters through proper conveyance system operation and maintenance.

Approach

Pollution Prevention

Maintain catch basins, stormwater inlets, and other stormwater conveyance structures on a regular basis to remove pollutants, reduce high pollutant concentrations during the first flush of storms, prevent clogging of the downstream conveyance system, restore catch basins' sediment trapping capacity, and ensure the system functions properly hydraulically to avoid flooding.

Suggested Protocols

Catch Basins/Inlet Structures

- Staff should regularly inspect facilities to ensure compliance with the following:
 - Immediate repair of any deterioration threatening structural integrity.
 - Cleaning before the sump is 40% full. Catch basins should be cleaned as frequently as needed to meet this standard.
 - Stenciling of catch basins and inlets (see SC34 Waste Handling and Disposal).

Objectives

- Cover
- Contain
- Educate
- Reduce/Minimize

Targeted Constituents

Sediment	✓
Nutrients	
Trash	✓
Metals	
Bacteria	✓
Oil and Grease	
Organics	

SC-44 Drainage System Maintenance

- Clean catch basins, storm drain inlets, and other conveyance structures before the wet season to remove sediments and debris accumulated during the summer.
- Conduct inspections more frequently during the wet season for problem areas where sediment or trash accumulates more often. Clean and repair as needed.
- Keep accurate logs of the number of catch basins cleaned.
- Store wastes collected from cleaning activities of the drainage system in appropriate containers or temporary storage sites in a manner that prevents discharge to the storm drain.
- Dewater the wastes if necessary with outflow into the sanitary sewer if permitted. Water should be treated with an appropriate filtering device prior to discharge to the sanitary sewer. If discharge to the sanitary sewer is not allowed, water should be pumped or vacuumed to a tank and properly disposed. Do not dewater near a storm drain or stream.

Storm Drain Conveyance System

- Locate reaches of storm drain with deposit problems and develop a flushing schedule that keeps the pipe clear of excessive buildup.
- Collect and pump flushed effluent to the sanitary sewer for treatment whenever possible.

Pump Stations

- Clean all storm drain pump stations prior to the wet season to remove silt and trash.
- Do not allow discharge to reach the storm drain system when cleaning a storm drain pump station or other facility.
- Conduct routine maintenance at each pump station.
- Inspect, clean, and repair as necessary all outlet structures prior to the wet season.

Open Channel

- Modify storm channel characteristics to improve channel hydraulics, increase pollutant removals, and enhance channel/creek aesthetic and habitat value.
- Conduct channel modification/improvement in accordance with existing laws. Any person, government agency, or public utility proposing an activity that will change the natural (emphasis added) state of any river, stream, or lake in California, must enter into a Stream or Lake Alteration Agreement with the Department of Fish and Game. The developer-applicant should also contact local governments (city, county, special districts), other state agencies (SWRCB, RWQCB, Department of Forestry, Department of Water Resources), and Federal Corps of Engineers and USFWS.

Illicit Connections and Discharges

- Look for evidence of illegal discharges or illicit connections during routine maintenance of conveyance system and drainage structures:
 - Is there evidence of spills such as paints, discoloring, etc?

Drainage System Maintenance

SC-44

- Are there any odors associated with the drainage system?
- Record locations of apparent illegal discharges/illicit connections?
- Track flows back to potential dischargers and conduct aboveground inspections. This can be done through visual inspection of upgradient manholes or alternate techniques including zinc chloride smoke testing, fluorometric dye testing, physical inspection testing, or television camera inspection.
- Eliminate the discharge once the origin of flow is established.
- Stencil or demarcate storm drains, where applicable, to prevent illegal disposal of pollutants. Storm drain inlets should have messages such as “Dump No Waste Drains to Stream” stenciled next to them to warn against ignorant or intentional dumping of pollutants into the storm drainage system.
- Refer to fact sheet SC-10 Non-Stormwater Discharges.

Illegal Dumping

- Inspect and clean up hot spots and other storm drainage areas regularly where illegal dumping and disposal occurs.
- Establish a system for tracking incidents. The system should be designed to identify the following:
 - Illegal dumping hot spots
 - Types and quantities (in some cases) of wastes
 - Patterns in time of occurrence (time of day/night, month, or year)
 - Mode of dumping (abandoned containers, “midnight dumping” from moving vehicles, direct dumping of materials, accidents/spills)
 - Responsible parties
- Post “No Dumping” signs in problem areas with a phone number for reporting dumping and disposal. Signs should also indicate fines and penalties for illegal dumping.
- Refer to fact sheet SC-10 Non-Stormwater Discharges.

Training

- Train crews in proper maintenance activities, including record keeping and disposal.
- Allow only properly trained individuals to handle hazardous materials/wastes.
- Have staff involved in detection and removal of illicit connections trained in the following:
 - OSHA-required Health and Safety Training (29 CFR 1910.120) plus annual refresher training (as needed).

SC-44 Drainage System Maintenance

- OSHA Confined Space Entry training (Cal-OSHA Confined Space, Title 8 and Federal OSHA 29 CFR 1910.146).
- Procedural training (field screening, sampling, smoke/dye testing, TV inspection).

Spill Response and Prevention

- Investigate all reports of spills, leaks, and/or illegal dumping promptly.
- Clean up all spills and leaks using “dry” methods (with absorbent materials and/or rags) or dig up, remove, and properly dispose of contaminated soil.
- Refer to fact sheet SC-11 Spill Prevention, Control, and Cleanup.

Other Considerations (Limitations and Regulations)

- Clean-up activities may create a slight disturbance for local aquatic species. Access to items and material on private property may be limited. Trade-offs may exist between channel hydraulics and water quality/riparian habitat. If storm channels or basins are recognized as wetlands, many activities, including maintenance, may be subject to regulation and permitting.
- Storm drain flushing is most effective in small diameter pipes (36-inch diameter pipe or less, depending on water supply and sediment collection capacity). Other considerations associated with storm drain flushing may include the availability of a water source, finding a downstream area to collect sediments, liquid/sediment disposal, and prohibition against disposal of flushed effluent to sanitary sewer in some areas.
- Regulations may include adoption of substantial penalties for illegal dumping and disposal.
- Local municipal codes may include sections prohibiting discharge of soil, debris, refuse, hazardous wastes, and other pollutants into the storm drain system.

Requirements

Costs

- An aggressive catch basin cleaning program could require a significant capital and O&M budget.
- The elimination of illegal dumping is dependent on the availability, convenience, and cost of alternative means of disposal. The primary cost is for staff time. Cost depends on how aggressively a program is implemented. Other cost considerations for an illegal dumping program include:
 - Purchase and installation of signs.
 - Rental of vehicle(s) to haul illegally-disposed items and material to landfills.
 - Rental of heavy equipment to remove larger items (e.g., car bodies) from channels.
 - Purchase of landfill space to dispose of illegally-dumped items and material.

Drainage System Maintenance

SC-44

- Methods used for illicit connection detection (smoke testing, dye testing, visual inspection, and flow monitoring) can be costly and time-consuming. Site-specific factors, such as the level of impervious area, the density and ages of buildings, and type of land use will determine the level of investigation necessary.

Maintenance

- Two-person teams may be required to clean catch basins with vector trucks.
- Teams of at least two people plus administrative personnel are required to identify illicit discharges, depending on the complexity of the storm sewer system.
- Arrangements must be made for proper disposal of collected wastes.
- Technical staff are required to detect and investigate illegal dumping violations.

Supplemental Information

Further Detail of the BMP

Storm Drain Flushing

Flushing is a common maintenance activity used to improve pipe hydraulics and to remove pollutants in storm drainage systems. Flushing may be designed to hydraulically convey accumulated material to strategic locations, such as an open channel, another point where flushing will be initiated, or the sanitary sewer and the treatment facilities, thus preventing resuspension and overflow of a portion of the solids during storm events. Flushing prevents “plug flow” discharges of concentrated pollutant loadings and sediments. Deposits can hinder the designed conveyance capacity of the storm drain system and potentially cause backwater conditions in severe cases of clogging.

Storm drain flushing usually takes place along segments of pipe with grades that are too flat to maintain adequate velocity to keep particles in suspension. An upstream manhole is selected to place an inflatable device that temporarily plugs the pipe. Further upstream, water is pumped into the line to create a flushing wave. When the upstream reach of pipe is sufficiently full to cause a flushing wave, the inflated device is rapidly deflated with the assistance of a vacuum pump, thereby releasing the backed up water and resulting in the cleaning of the storm drain segment.

To further reduce impacts of stormwater pollution, a second inflatable device placed well downstream may be used to recollect the water after the force of the flushing wave has dissipated. A pump may then be used to transfer the water and accumulated material to the sanitary sewer for treatment. In some cases, an interceptor structure may be more practical or required to recollect the flushed waters.

It has been found that cleansing efficiency of periodic flush waves is dependent upon flush volume, flush discharge rate, sewer slope, sewer length, sewer flow rate, sewer diameter, and population density. As a rule of thumb, the length of line to be flushed should not exceed 700 feet. At this maximum recommended length, the percent removal efficiency ranges between 65-75% for organics and 55-65% for dry weather grit/inorganic material. The percent removal efficiency drops rapidly beyond that. Water is commonly supplied by a water truck, but fire hydrants can also supply water. To make the best use of water, it is recommended that reclaimed water be used or that fire hydrant line flushing coincide with storm sewer flushing.

EXECUTIVE SUMMARY

Urban Crossroads, Inc. has prepared this noise study to determine the potential noise impacts and the necessary noise mitigation measures, if any, for the proposed Compass Danbe Centerpointe development (“Project”). The Project site is located south of Alessandro Boulevard on either side of Chagall Court in the City of Moreno Valley. The Project is proposed to consist of up to 396,488 square feet (sf) of warehouse use. The site is currently designated as Commercial in the City’s General Plan, which would require a land use and zoning change to Light Industrial use.

The results of this Compass Danbe Centerpointe Noise Impact Analysis are summarized below based on the significance criteria in Section 4 of this report consistent with Appendix G of the California Environmental Quality Act (CEQA) Guidelines (1). Table ES-1 shows the findings of significance for each potential noise and/or vibration impact under CEQA. All impacts are considered less than significant without mitigation.

TABLE ES-1: SUMMARY OF CEQA SIGNIFICANCE FINDINGS

Analysis	Report Section	Significance Findings	
		Unmitigated	Mitigated
Off-Site Traffic Noise	7	<i>Less Than Significant</i>	-
Operational Noise	9	<i>Less Than Significant</i>	-
Construction Noise	10	<i>Less Than Significant</i>	-
Construction Vibration		<i>Less Than Significant</i>	-
Nighttime Concrete Pour		<i>Less Than Significant</i>	-

1 INTRODUCTION

This noise analysis has been completed to determine the noise impacts associated with the development of the proposed Compass Danbe Centerpointe (“Project”). This noise study briefly describes the proposed Project, provides information regarding noise fundamentals, sets out the local regulatory setting, presents the study methods and procedures for transportation related CNEL traffic noise analysis, and evaluates the future exterior noise environment. In addition, this study includes an analysis of the potential Project-related long-term stationary-source operational noise and short-term construction noise and vibration impacts.

1.1 SITE LOCATION

The proposed project is located south of Alessandro Boulevard on either side of Chagall Court in the City of Moreno Valley as shown on Exhibit 1-A. The March Air Reserve Base/Inland Port Airport (MARB/IPA) is located approximately 0.9 miles south of the Project site. The Project site is bordered to the west by vacant land, to the east by vacant land, to the north by commercial and residential uses, and to the south are existing industrial buildings.

This proposed Project includes a General Plan Amendment (GPA) and a Zone Change (ZC). The site is currently designated as Commercial in the City’s General Plan, which would require a land use and zoning change to Light Industrial use. The proposed changes are consistent with the zones to the west, south and east of the subject site and adjacent properties. The amendment is in keeping with the uses surrounding the project site.

1.2 PROJECT DESCRIPTION

Exhibit 1-B illustrates a preliminary site plan for the Project. The Project is anticipated to be developed within a single phase with an anticipated opening year of 2022. The proposed Project consists of the following uses:

- Building 1: 206,665 square feet (sf) of warehousing (70% of total building sf) and 88,571 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 295,236 sf for Building 1
- Building 2: 70,876 sf of warehousing (70% of total building sf) and 30,376 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 101,252 sf for Building 2

The on-site Project-related noise sources are expected to include: loading dock activity, entry gate & truck movements, roof-top air conditioning units, and trash enclosure activity. This noise analysis is intended to describe noise level impacts associated with the expected typical operational activities at the Project site. This report assumes the Project will operate 24-hours daily for seven days per week. At the time this noise analysis was prepared, the future tenants of the proposed Project were unknown however any tenant would operate consistent with a high-cube warehouse.

2 FUNDAMENTALS

Noise is simply defined as "unwanted sound." Sound becomes unwanted when it interferes with normal activities, when it causes actual physical harm or when it has adverse effects on health. Noise is measured on a logarithmic scale of sound pressure level known as a decibel (dB). A-weighted decibels (dBA) approximate the subjective response of the human ear to broad frequency noise source by discriminating against very low and very high frequencies of the audible spectrum. They are adjusted to reflect only those frequencies which are audible to the human ear. Exhibit 2-A presents a summary of the typical noise levels and their subjective loudness and effects that are described in more detail below.

EXHIBIT 2-A: TYPICAL NOISE LEVELS

COMMON OUTDOOR ACTIVITIES	COMMON INDOOR ACTIVITIES	A - WEIGHTED SOUND LEVEL dBA	SUBJECTIVE LOUDNESS	EFFECTS OF NOISE
THRESHOLD OF PAIN		140	INTOLERABLE OR DEAFENING	HEARING LOSS
NEAR JET ENGINE		130		
		120		
JET FLY-OVER AT 300m (1000 ft)	ROCK BAND	110		
LOUD AUTO HORN		100	VERY NOISY	SPEECH INTERFERENCE
GAS LAWN MOWER AT 1m (3 ft)		90		
DIESEL TRUCK AT 15m (50 ft), at 80 km/hr (50 mph)	FOOD BLENDER AT 1m (3 ft)	80	LOUD	
NOISY URBAN AREA, DAYTIME	VACUUM CLEANER AT 3m (10 ft)	70		
HEAVY TRAFFIC AT 90m (300 ft)	NORMAL SPEECH AT 1m (3 ft)	60	MODERATE	SLEEP DISTURBANCE
QUIET URBAN DAYTIME	LARGE BUSINESS OFFICE	50		
QUIET URBAN NIGHTTIME	THEATER, LARGE CONFERENCE ROOM (BACKGROUND)	40		
QUIET SUBURBAN NIGHTTIME	LIBRARY	30	FAINT	NO EFFECT

2.1 RANGE OF NOISE

Since the range of intensities that the human ear can detect is so large, the scale frequently used to measure intensity is a scale based on multiples of 10, the logarithmic scale. The scale for measuring intensity is the decibel scale. Each interval of 10 decibels indicates a sound energy ten times greater than before, which is perceived by the human ear as being roughly twice as loud (2). The most common sounds vary between 40 dBA (very quiet) to 100 dBA (very loud). Normal conversation at three feet is roughly at 60 dBA, while loud jet engine noises equate to 110 dBA

Attachment: Appendix J-Noise Study (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

at approximately 100 feet, which can cause serious discomfort (3). Another important aspect of noise is the duration of the sound and the way it is described and distributed in time.

2.2 NOISE DESCRIPTORS

Environmental noise descriptors are generally based on averages, rather than instantaneous, noise levels. The most used figure is the equivalent level (L_{eq}). Equivalent sound levels are not measured directly but are calculated from sound pressure levels typically measured in A-weighted decibels (dBA). The equivalent sound level (L_{eq}) represents a steady state sound level containing the same total energy as a time varying signal over a given sample period (typically one hour) and is commonly used to describe the “average” noise levels within the environment.

To describe the time-varying character of environmental noise, the City of Moreno Valley relies on the L_{25} , L_{17} , L_8 and L_{max} , percentile noise levels to describe the stationary source noise level limits. The percentile noise descriptors are the noise levels equaled or exceeded during 25 percent, 17 percent, and 8 percent of a stated time. Sound levels associated with the L_8 typically describe transient or short-term events, while levels associated with the L_{25} describe the base or typical noise conditions. The City of Moreno Valley relies on the percentile noise levels to describe the stationary source noise level limits. While the L_{25} describes the noise levels occurring 25 percent of the time, the L_{eq} accounts for the total energy (average) observed for the entire hour.

Peak hour or average noise levels, while useful, do not completely describe a given noise environment, however. Noise levels lower than peak hour may be disturbing if they occur during times when quiet is most desirable, namely evening and nighttime (sleeping) hours. To account for this, the Community Noise Equivalent Level (CNEL), representing a composite 24-hour noise level is utilized. The CNEL is the weighted average of the intensity of a sound, with corrections for time of day, and averaged over 24 hours. The time of day corrections require the addition of 5 decibels to dBA L_{eq} sound levels in the evening from 7:00 p.m. to 10:00 p.m., and the addition of 10 decibels to dBA L_{eq} sound levels at night between 10:00 p.m. and 7:00 a.m. These additions are made to account for the noise sensitive time periods during the evening and night hours when sound appears louder. CNEL does not represent the actual sound level heard at any time, but rather represents the total sound exposure. The City of Moreno Valley relies on the 24-hour CNEL level to assess land use compatibility with transportation related noise sources.

2.3 SOUND PROPAGATION

When sound propagates over a distance, it changes in level and frequency content. Based on guidance from the U.S. Department of Transportation, Federal Highway Administration (FHWA), Office of Environment and Planning, Noise and Air Quality Branch, the way noise reduces with distance depends on the following factors.

2.3.1 GEOMETRIC SPREADING

Sound from a localized source (i.e., a stationary point source) propagates uniformly outward in a spherical pattern. The sound level attenuates (or decreases) at a rate of 6 dB for each doubling

of distance from a point source. Highways consist of several localized noise sources on a defined path and hence can be treated as a line source, which approximates the effect of several point sources. Noise from a line source propagates outward in a cylindrical pattern, often referred to as cylindrical spreading. Sound levels attenuate at a rate of 3 dB for each doubling of distance from a line source (2).

2.3.2 GROUND ABSORPTION

The propagation path of noise from a highway to a receiver is usually very close to the ground. Noise attenuation from ground absorption and reflective wave canceling adds to the attenuation associated with geometric spreading. Traditionally, the excess attenuation has also been expressed in terms of attenuation per doubling of distance. This approximation is usually sufficiently accurate for distances of less than 200 feet. For acoustically hard sites (i.e., sites with a reflective surface between the source and the receiver, such as a parking lot or body of water), no excess ground attenuation is assumed. For acoustically absorptive or soft sites (i.e., those sites with an absorptive ground surface between the source and the receiver such as soft dirt, grass, or scattered bushes and trees), an excess ground attenuation value of 1.5 dB per doubling of distance is normally assumed. When added to the cylindrical spreading, the excess ground attenuation results in an overall drop-off rate of 4.5 dB per doubling of distance from a line source (4).

2.3.3 ATMOSPHERIC EFFECTS

Receivers located downwind from a source can be exposed to increased noise levels relative to calm conditions, whereas locations upwind can have lowered noise levels. Sound levels can be increased at large distances (e.g., more than 500 feet) due to atmospheric temperature inversion (i.e., increasing temperature with elevation). Other factors such as air temperature, humidity, and turbulence can also have significant effects (2).

2.3.4 SHIELDING

A large object or barrier in the path between a noise source and a receiver can substantially attenuate noise levels at the receiver. The amount of attenuation provided by shielding depends on the size of the object and the frequency content of the noise source. Shielding by trees and other such vegetation typically only has an “out of sight, out of mind” effect. That is, the perception of noise impact tends to decrease when vegetation blocks the line-of-sight to nearest residents. However, for vegetation to provide a substantial, or even noticeable, noise reduction, the vegetation area must be at least 15 feet in height, 100 feet wide and dense enough to completely obstruct the line-of-sight between the source and the receiver. This size of vegetation may provide up to 5 dBA of noise reduction. The Federal Highway Administration (FHWA) does not consider the planting of vegetation to be a noise abatement measure (4).

2.3.5 REFLECTION

Field studies conducted by the FHWA have shown that the reflection from barriers and buildings does not substantially increase noise levels (4). If all the noise striking a structure was reflected back to a given receiving point, the increase would be theoretically limited to 3 dBA. Further, not

all the acoustical energy is reflected back to same point. Some of the energy would go over the structure, some is reflected to points other than the given receiving point, some is scattered by ground coverings (e.g., grass and other plants), and some is blocked by intervening structures and/or obstacles (e.g., the noise source itself). Additionally, some of the reflected energy is lost due to the longer path that the noise must travel. FHWA measurements made to quantify reflective increases in traffic noise have not shown an increase of greater than 1-2 dBA; an increase that is not perceptible to the average human ear.

2.4 NOISE CONTROL

Noise control is the process of obtaining an acceptable noise environment for an observation point or receiver by controlling the noise source, transmission path, receiver, or all three. This concept is known as the source-path-receiver concept. In general, noise control measures can be applied to these three elements.

2.5 NOISE BARRIER ATTENUATION

Effective noise barriers can reduce noise levels by up to 10 to 15 dBA, cutting the loudness of traffic noise in half. A noise barrier is most effective when placed close to the noise source or receiver. Noise barriers, however, do have limitations. For a noise barrier to work, it must be high enough and long enough to block the path of the noise source (4).

2.6 LAND USE COMPATIBILITY WITH NOISE

Some land uses are more tolerant of noise than others. For example, schools, hospitals, churches, and residences are more sensitive to noise intrusion than are commercial or industrial developments and related activities. Sensitive receivers are generally defined as locations where people reside or where the presence of unwanted sound could otherwise adversely affect the use of the land. Noise-sensitive land uses are generally considered to include schools, hospitals, single-family dwellings, mobile home parks, churches, libraries, recreation areas or buildings where people normally sleep. Although the West Valley Detention Center is a temporary holding facility, there are beds at this facility for temporary stays. Therefore as a conservative measure, the individuals held at the West Valley Detention Center are considered sensitive receptors for the purposes of this analysis.

As ambient noise levels affect the perceived amenity or livability of a development, so too can the mismanagement of noise impacts impair the economic health and growth potential of a community by reducing the area's desirability as a place to live, shop and work. For this reason, land use compatibility with the noise environment is an important consideration in the planning and design process. The FHWA encourages State and Local government to regulate land development in such a way that noise-sensitive land uses are either prohibited from being located adjacent to a highway, or that the developments are planned, designed, and constructed in such a way that noise impacts are minimized (5).

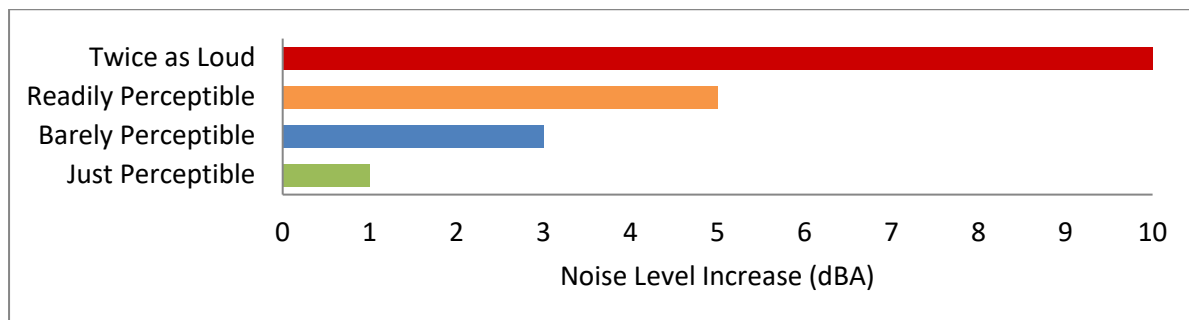

2.7 COMMUNITY RESPONSE TO NOISE

Community responses to noise varies depending upon everyone's susceptibility to noise and personal attitudes about noise. Several factors are related to the level of community annoyance including:

- Fear associated with noise producing activities;
- Socio-economic status and educational level;
- Perception that those affected are being unfairly treated;
- Attitudes regarding the usefulness of the noise-producing activity;
- Belief that the noise source can be controlled.

Approximately ten percent of the population has a very low tolerance for noise and will object to any noise not of their making. Consequently, even in the quietest environment, some complaints will occur. Twenty-five percent of the population will not complain even in very severe noise environments. Thus, a variety of reactions can be expected from people exposed to any given noise environment (6). Surveys have shown that about ten percent of the people exposed to traffic noise of 60 dBA will report being highly annoyed with the noise, and each increase of one dBA is associated with approximately two percent more people being highly annoyed. When traffic noise exceeds 60 dBA or aircraft noise exceeds 55 dBA, people may begin to complain (6). Despite this variability in behavior on an individual level, the population can be expected to exhibit the following responses to changes in noise levels as shown on Exhibit 2-B. A change of 3 dBA are considered *barely perceptible*, and changes of 5 dBA are considered *readily perceptible*. (4)

EXHIBIT 2-B: NOISE LEVEL INCREASE PERCEPTION

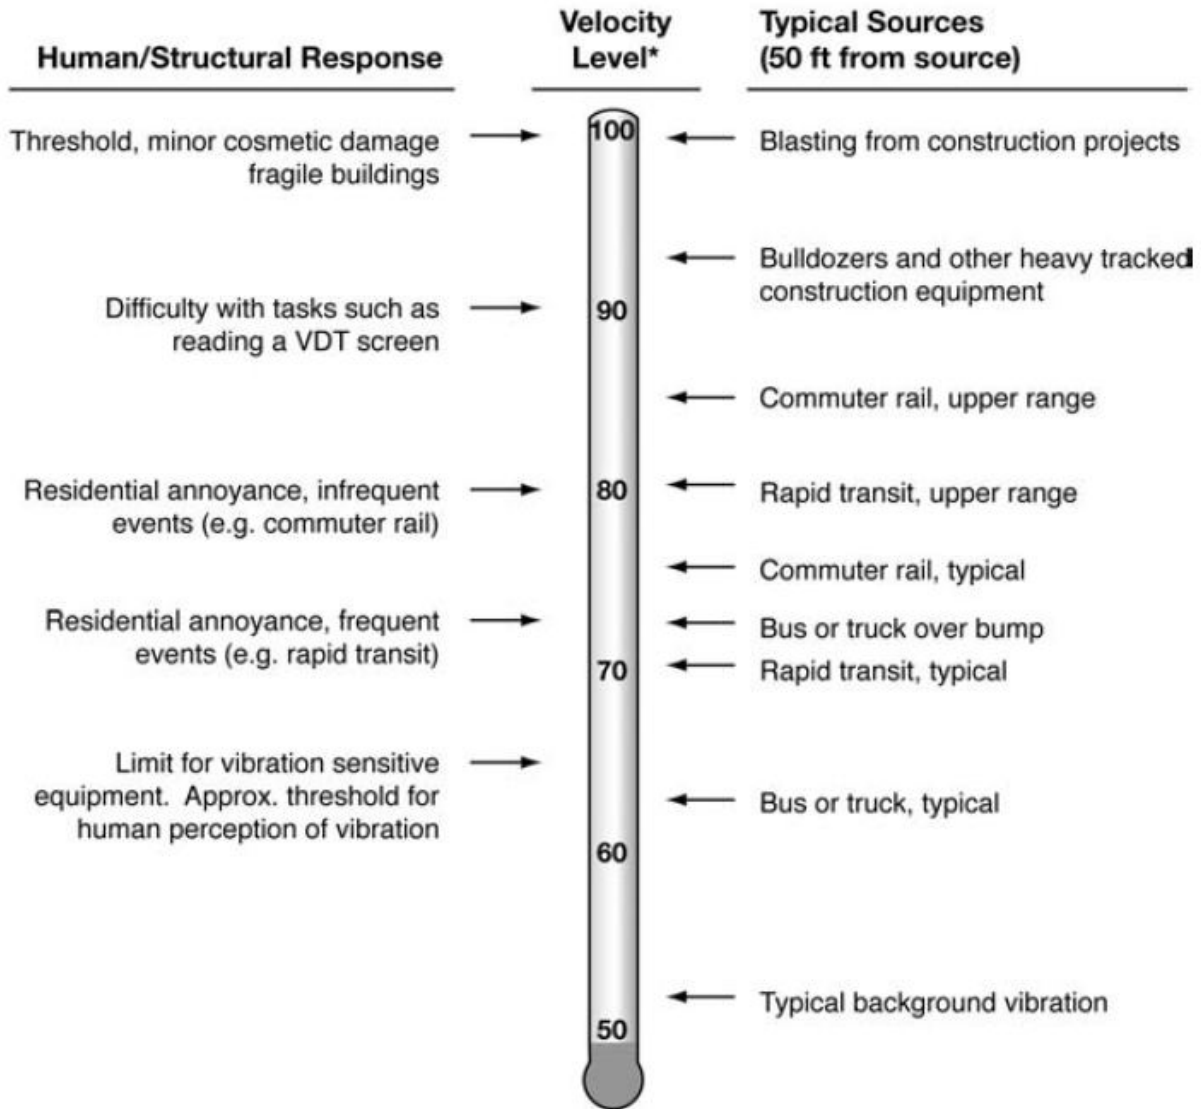

2.8 VIBRATION

Per the Federal Transit Administration (FTA) *Transit Noise and Vibration Impact Assessment Manual* (7), vibration is the periodic oscillation of a medium or object. The rumbling sound caused by the vibration of room surfaces is called structure-borne noise. Sources of ground-borne vibrations include natural phenomena (e.g., earthquakes, volcanic eruptions, sea waves, landslides) or human-made causes (e.g., explosions, machinery, traffic, trains, construction equipment). Vibration sources may be continuous, such as factory machinery, or transient, such as explosions. As is the case with airborne sound, ground-borne vibrations may be described by amplitude and frequency.

There are several different methods that are used to quantify vibration. The peak particle velocity (PPV) is defined as the maximum instantaneous peak of the vibration signal. The PPV is most frequently used to describe vibration impacts to buildings but is not always suitable for evaluating human response (annoyance) because it takes some time for the human body to respond to vibration signals. Instead, the human body responds to average vibration amplitude often described as the root mean square (RMS). The RMS amplitude is defined as the average of the squared amplitude of the signal and is most frequently used to describe the effect of vibration on the human body. Decibel notation (VdB) is commonly used to measure RMS. Decibel notation (VdB) serves to reduce the range of numbers used to describe human response to vibration. Typically, ground-borne vibration generated by man-made activities attenuates rapidly with distance from the source of the vibration. Sensitive receivers for vibration include structures (especially older masonry structures), people (especially residents, the elderly, and sick), and vibration-sensitive equipment and/or activities

The background vibration-velocity level in residential areas is generally 50 VdB. Ground-borne vibration is normally perceptible to humans at approximately 65 VdB. For most people, a vibration-velocity level of 75 VdB is the approximate dividing line between barely perceptible and distinctly perceptible levels. Typical outdoor sources of perceptible ground-borne vibration are construction equipment, steel-wheeled trains, and traffic on rough roads. If a roadway is smooth, the ground-borne vibration is rarely perceptible. The range of interest is from approximately 50 VdB, which is the typical background vibration-velocity level, to 100 VdB, which is the general threshold where minor damage can occur in fragile buildings. Exhibit 2-C illustrates common vibration sources and the human and structural response to ground-borne vibration.

3 REGULATORY SETTING

To limit population exposure to physically and/or psychologically damaging as well as intrusive noise levels, the federal government, the State of California, various county governments, and most municipalities in the state have established standards and ordinances to control noise. In most areas, automobile and truck traffic is the major source of environmental noise. Traffic activity generally produces an average sound level that remains constant with time. Air and rail traffic, and commercial and industrial activities are also major sources of noise in some areas. Federal, state, and local agencies regulate different aspects of environmental noise. Federal and state agencies generally set noise standards for mobile sources such as aircraft and motor vehicles, while regulation of stationary sources is left to local agencies.

3.1 STATE OF CALIFORNIA NOISE REQUIREMENTS

The State of California regulates freeway noise, sets standards for sound transmission, provides occupational noise control criteria, identifies noise standards, and provides guidance for local land use compatibility. State law requires that each county and city adopt a General Plan that includes a Noise Element which is to be prepared per guidelines adopted by the Governor's Office of Planning and Research (OPR). (8) The purpose of the Noise Element is to *limit the exposure of the community to excessive noise levels*. In addition, the California Environmental Quality Act (CEQA) requires that all known environmental effects of a project be analyzed, including environmental noise impacts.

3.2 STATE OF CALIFORNIA GREEN BUILDING STANDARDS CODE

The State of California's Green Building Standards Code contains mandatory measures for non-residential building construction in Section 5.507 on Environmental Comfort. (9) These noise standards are applied to new construction in California for controlling interior noise levels resulting from exterior noise sources. The regulations specify that acoustical studies must be prepared when non-residential structures are developed in areas where the exterior noise levels exceed 65 dBA CNEL, such as within a noise contour of an airport, freeway, railroad, and other areas where noise contours are not readily available. If the development falls within an airport or freeway 65 dBA CNEL noise contour, the combined sound transmission class (STC) rating of the wall and roof-ceiling assemblies must be at least 50. For those developments in areas where noise contours are not readily available and the noise level exceeds 65 dBA L_{eq} for any hour of operation, a wall and roof-ceiling combined STC rating of 45, and exterior windows with a minimum STC rating of 40 are required (Section 5.507.4.1).

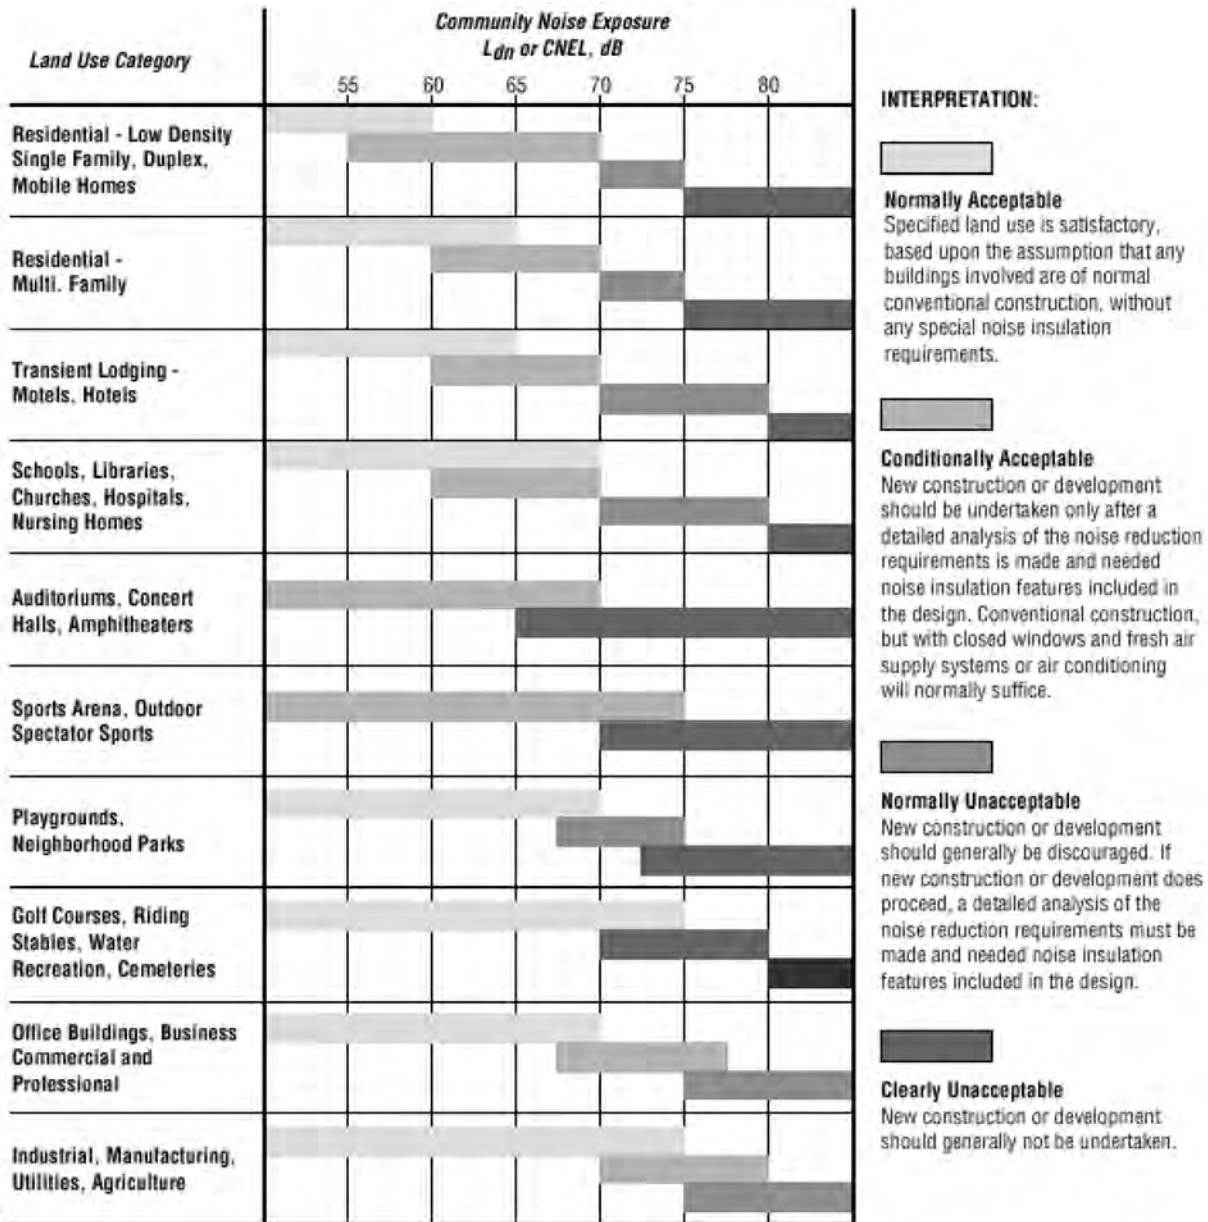

3.3 CITY OF MORENO VALLEY GENERAL PLAN NOISE ELEMENT

The City of Moreno Valley Noise Element typically provides the standards for land use compatibility for community noise exposure. However, the City of Moreno Valley General Plan does not include a noise element or specific transportation-related noise standards. Rather, noise is considered in the Environmental Safety section of the General Plan Safety Element. (10) While the General Plan provides background and noise fundamentals, it does not identify criteria to assess the impacts associated with off-site transportation-related noise impacts. Therefore, for this analysis, the transportation noise criteria are derived from standards contained in the California Office of Planning and Research (OPR) *General Plan Guidelines*. (8)

The OPR land use/noise compatibility standards are used by many California cities and counties and specify the maximum noise levels allowable for new developments impacted by transportation noise sources. The OPR land use/noise compatibility criteria, found in Figure 2 of the *General Plan Guidelines, Appendix D: Noise Element Guidelines*, identify the criteria for industrial land uses such as the Project, as shown on Exhibit 3-A. When the unmitigated exterior noise levels approach 70 dBA CNEL industrial land use is considered *normally acceptable*. With exterior noise levels ranging from 70 to 80 dBA CNEL, industrial land uses are considered *conditionally acceptable*, and with exterior noise levels greater than 80 dBA CNEL, they are considered *normally unacceptable*. For *normally unacceptable* land use, *new construction or development should generally be discouraged. If new construction or development does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design.* (8) For the purposes of this analysis, industrial land use such as the Project does not contain outdoor living areas requiring exterior noise mitigation as outlined in the OPR *General Plan Guidelines*, and therefore, only the interior noise levels experienced by employees at the Project site are evaluated against the appropriate noise level standards.

The purpose of the transportation noise criteria is to protect, create, and maintain an environment free from noise and vibration that may jeopardize the health or welfare of sensitive receptors, or degrade quality of life. City General Policies (City of Moreno Valley General Plan, pp.9-31, 9-32) act to ensure that when exterior noise levels exceed 65 dBA CNEL at sensitive receivers, mitigation is provided to ensure that interior noise levels of 45 dBA CNEL are maintained. General Plan Policies in this regard are consistent with, and support, the California Building Code interior noise standards.

3.4 OPERATIONAL NOISE STANDARDS

To analyze noise impacts originating from a designated fixed location or private property such as the Compass Danbe Centerpointe Project, stationary-source (operational) noise such as the expected loading dock activity, entry gate & truck movements, roof-top air conditioning units, and trash enclosure activity are typically evaluated against standards established under a City's Municipal Code.

The City of Moreno Valley Municipal Code, Chapter 11.80 *Noise Regulation*, provides performance standards and noise control guidelines for determining and mitigating non-transportation or stationary-source noise impacts from operations at private properties. The City of Moreno Valley Municipal Code defines *Maximum Sound Levels (in dB(A)) for Source Land Uses* in Table 11.80.030-2 for *Residential* and *Commercial* land uses. As defined by the Municipal Code, Section 11.80.020 *Definitions*, *Commercial* land use means all uses of land not otherwise classified as residential, and *Residential* land use means all uses of land primarily for dwelling units, as well as hospitals, schools, colleges and universities, and places of religious assembly. (11) For the purpose of this analysis, the Compass Danbe Centerpointe Project is considered *Commercial* land use since it is not classified as residential. Based on this standard, the operational noise level limits for commercial land use, from Table 11.80.030-2, of 65 dBA L_{eq} during the daytime (8:00 a.m. to 10:00 p.m.) hours and 60 dBA L_{eq} during the nighttime (10:01 p.m. to 7:59 a.m.) hours shall apply to the operational noise source activities from the Project.

Further, Section 11.80.030 (C) *Prohibited Acts, Nonimpulsive Sound Decibel Limits*, states: *No person shall maintain, create, operate or cause to be operated on private property any source of sound in such a manner as to create any nonimpulsive sound which exceeds the limits set forth for the source land use category (as defined in Section 11.80.020) in Table 11.80.030-2 when measured at a distance of two hundred (200) feet or more from the real property line of the source of the sound, if the sound occurs on a privately owned property...* (11) Therefore, at a distance of 200 feet from the property line, the Project's operational noise levels shall not exceed the 65 dBA L_{eq} daytime and 60 dBA L_{eq} nighttime noise level standards for commercial land uses, as shown on Table 3-1.

The City of Moreno Valley Municipal Code also identifies continuous sound level limits in Table 11.80.030-1 based on the Center for Disease Control and Prevention and the National Institute for Occupational Safety and Health (NIOSH) noise exposure guidelines. A division of the U.S. Department of Health and Human Services, NIOSH identifies a noise level threshold based on the duration of exposure to the source. The City of Moreno Valley noise level threshold starts at 90 dBA for more than eight hours per day, and for every increase, the exposure time is reduced. The City of Moreno Valley identifies noise level thresholds of 92 dBA for more than 6 hours per day, 95 dBA for more than 4 hour per day, 97 dBA for more than 3 hours per day, and up to 100 dBA for more than 2 hours per day. However, this noise study uses the more restrictive City of Moreno Valley commercial noise level limits identified on Table 11.80.030-2 for source land uses in the Municipal Code, shown on Table 3-1 of this report, to evaluate the potential operational noise levels due to the operation of the Project.

TABLE 3-1: OPERATIONAL NOISE STANDARDS AT 200 FEET FROM THE SOURCE

City	Source Land use	Noise Level Standards (dBA Leq) ¹	
		Daytime	Nighttime
Moreno Valley	Commercial	65	60

¹ City of Moreno Valley Municipal Code, Chapter 11.80 Noise Regulation, Table 11.80.030-2 Maximum Sound Levels (in dB(A)) for Source Land Uses when measured at a distance of 200 feet from the property line of the source land use (Appendix 3.1). Leq represents a steady state sound level containing the same total energy as a time varying signal over a given period. "Daytime" = 8:00 a.m. to 10:00 p.m.; "Nighttime" = 10:01 p.m. to 7:59 a.m.

3.5 CONSTRUCTION NOISE STANDARDS

To analyze noise impacts originating from the construction of the Compass Danbe Centerpointe site, noise from construction activities are typically evaluated against standards established under a City's Municipal Code. The Municipal Code noise standards for construction are described below for the City of Moreno Valley to determine the potential noise impacts at the nearest receiver locations. The construction-related noise standards are shown on Table 3-2.

The Municipal Code noise standards for construction are described below for the City of Moreno Valley to determine the potential noise impacts at the nearest sensitive receiver locations. As a subset of its stationary-source noise regulations, the City Municipal Code establishes permitted hours of construction activity. More specifically, Municipal Code Section 11.80.030 (D)(7), *Construction and Demolition*, provides the following:

No person shall operate, or cause operation of any tools or equipment used in construction, drilling, repair, alteration, or demolition work between the hours of eight p.m. and seven a.m. the following day such that the sound there from creates a noise disturbance, except for emergency work by public service utilities or for other work approved by the city manager or designee.

Therefore, based on the Section 11.80.030 (D)(7) construction regulations, a construction-related *noise disturbance* occurs if Project construction activity occurs outside of the permitted hours. However, for this analysis, the stationary-source noise level limits of 65 dBA Leq during the daytime hours and 60 dBA Leq during the nighttime hours are used as appropriate thresholds for the nearest sensitive land uses (e.g. residential homes) in the Project study area. In addition, grading operations shall be limited to the hours identified in Section 8.21.050 (O) of 7:00 a.m. to 6:00 p.m., Monday through Friday, and 8:00 a.m. to 4:00 p.m. on weekends and holidays or as approved by the City Engineer. The City of Moreno Valley construction noise standards are shown on Table 3-2 and included in Appendix 3.1. As previously discussed in Section 3.4, the construction noise level threshold used in this noise study represents a conservative approach, since it is more restrictive than the continuous sound level limits of Table 11.80.030-1 of the City of Moreno Valley Municipal Code.

TABLE 3-2: CONSTRUCTION NOISE STANDARDS FROM THE SOURCE LAND USE

		Daytime	Nighttime
Moreno Valley ¹	General Activity: 7:00 a.m. to 8:00 p.m. on any day. Grading is limited to 7:00 a.m. to 6:00 p.m. Monday to Friday; 8:00 a.m. to 4:00 p.m. on weekends and holidays.	65	60 ³

¹ City of Moreno Valley Municipal Code, Section 11.80.030 (D)(7) and Section 8.21.050 (O) (Appendix 3.1).

² Acceptable threshold for determining the relative significance of short-term Project construction noise levels, based on the City of Moreno Valley stationary noise standards shown on Table 3-1.

³ Any nighttime construction activity requires an exemption from the City of Moreno Valley Municipal Code as indicated in Section 11.80.030 (E)(8) for a special event permit (Section 11.80.040). The special event permit application shall be submitted to the City of Moreno Valley Planning Department for approval and meet the requirements of Municipal Code Section 11.80.040.

"Daytime" = 8:00 a.m. to 10:00 p.m.; "Nighttime" = 10:01 p.m. to 7:59 a.m.

3.5 VIBRATION STANDARDS

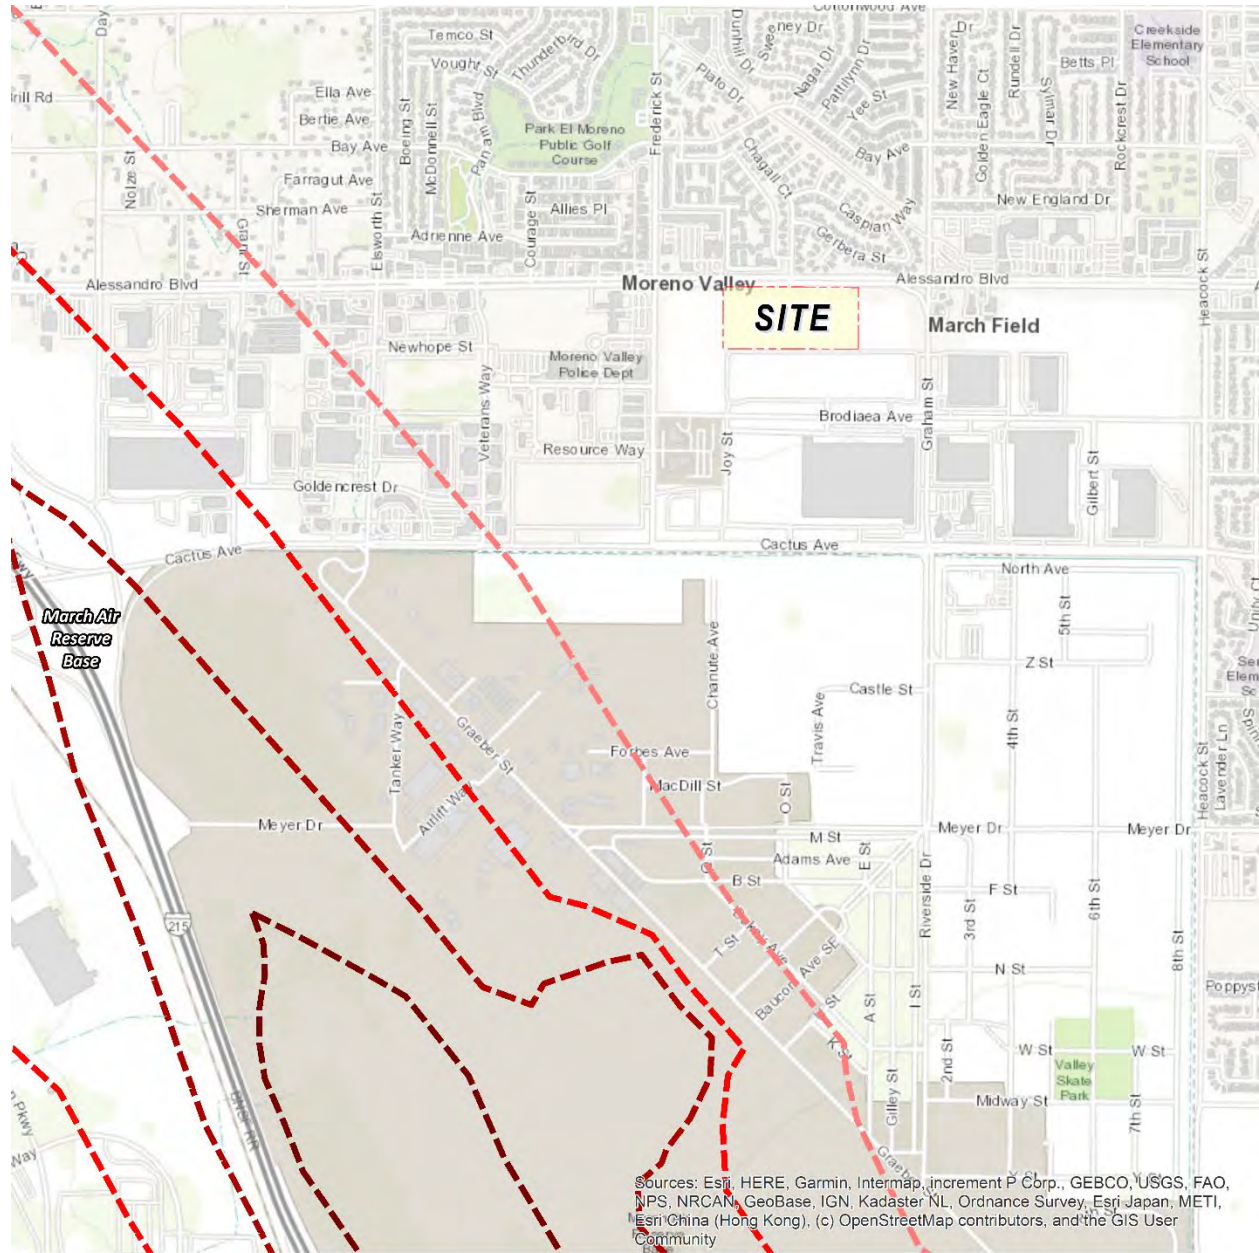

Construction activity can result in varying degrees of ground-borne vibration, depending on the equipment and methods used, distance to the affected structures and soil type. Construction vibration is generally associated with pile driving and rock blasting. Other construction equipment such as air compressors, light trucks, hydraulic loaders, etc., generates little or no ground vibration. (7) To analyze vibration impacts originating from the operation and construction of the Compass Danbe Centerpointe, vibration-generating activities are appropriately evaluated against standards established under a City's Municipal Code, if such standards exist. However, the City of Moreno Valley does not identify specific vibration level limits and instead relies on the Federal Transit Administration (FTA) methodology. The FTA *Transit Noise and Vibration Impact Assessment* methodology provides guidelines for the maximum-acceptable vibration criteria for different types of land uses. These guidelines allow 90 VdB for industrial (workshop) use, 84 VdB for office use and 78 VdB for daytime residential uses and 72 VdB for nighttime uses in buildings where people normally sleep. (7)

3.6 MARCH AIR RESERVE BASE/INLAND PORT AIRPORT LAND USE COMPATIBILITY

The March Air Reserve Base/Inland Port Airport (MARB/IPA) is located approximately 0.9-miles south of the Project site. The *March Air Reserve Base/Inland Port Airport Land Use Compatibility Plan* (MARB/IPA LUCP) includes the policies for determining the land use compatibility of the Project. The MARB/IPA, Map MA-1, indicates that the Project site is located within Compatibility Zone D and Zone E, which Table MA-1 Compatibility Zone Factors indicates is considered to have a *moderate to low* noise impact. Further, the Project site is located outside of the 60 dBA CNEL noise level contour boundary. Moreover, the Basic Compatibility Criteria, listed in Table MA-2 of the MARB/IPA LUCP identifies no prohibited uses for either zones. (12) The MARB/IPA LUCP does not identify industrial-use specific noise compatibility standards, and therefore, the City of Moreno Valley *Land Use Compatibility for Community Noise Exposure* matrix, previously discussed in Section 3.3, is used to assess potential aircraft-related noise levels at the Project site. The City of Moreno Valley guidelines indicate that industrial uses, such as the Project, are considered *normally acceptable* with exterior noise levels of up to 70 dBA CNEL. (13) The noise

contour boundaries of MARB/IPA are presented on Exhibit 3-B of this report and show that the Project is considered *normally acceptable* land use since it is located outside of the 60 dBA CNEL contour boundary. Further, Table MA-2 indicates that no uses are prohibited in this area.

4 SIGNIFICANCE CRITERIA

The following significance criteria are based on currently adopted guidance provided by Appendix G of the California Environmental Quality Act (CEQA) Guidelines. (14) For the purposes of this report, impacts would be potentially significant if the Project results in or causes:

- A. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
- B. Generation of excessive ground-borne vibration or ground-borne noise levels?
- C. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

While the City of Moreno Valley General Plan Guidelines provide direction on noise compatibility and establish noise standards by land use type that are sufficient to assess the significance of noise impacts, they do not define the levels at which increases are considered substantial for use under Guideline A. CEQA Appendix G Guideline C applies to nearby public and private airports, if any, and the Project's land use compatibility.

4.1 CEQA GUIDELINES NOT FURTHER ANALYZED

In Section 3.6, the noise contour boundaries of MARB/IPA are presented on Exhibit 3-B of this report and show that the Project is considered *normally acceptable* land use since it is located outside of the 60 dBA CNEL contour. Moreover, Table MA-2 of the MARB/IPA LUCP indicates that no uses are prohibited in this area, and therefore, impacts are considered *less than significant*, and no further noise analysis is provided under Guideline C.

4.2 NOISE-SENSITIVE RECEIVERS

Noise level increases resulting from the Project are evaluated based on the Appendix G CEQA Guidelines described above at the closest sensitive receiver locations. Under CEQA, consideration must be given to the magnitude of the increase, the existing ambient noise levels, and the location of noise-sensitive receivers to determine if a noise increase represents a significant adverse environmental impact. This approach recognizes *that there is no single noise increase that renders the noise impact significant*. (15)

Unfortunately, there is no completely satisfactory way to measure the subjective effects of noise or of the corresponding human reactions of annoyance and dissatisfaction. This is primarily because of the wide variation in individual thresholds of annoyance and differing individual experiences with noise. Thus, an important way of determining a person's subjective reaction to a new noise is the comparison of it to the existing environment to which one has adapted—the so-called *ambient* environment. In general, the more a new noise exceeds the previously existing ambient noise level, the less acceptable the new noise will typically be judged. The Federal Interagency Committee on Noise (FICON) (16) developed guidance to be used for the assessment

of project-generated increases in noise levels that consider the ambient noise level. The FICON recommendations are based on studies that relate aircraft noise levels to the percentage of persons highly annoyed by aircraft noise. Although the FICON recommendations were specifically developed to assess aircraft noise impacts, these recommendations are often used in environmental noise impact assessments involving the use of cumulative noise exposure metrics, such as the average-daily noise level (CNEL) and equivalent continuous noise level (L_{eq}).

As previously stated, the approach used in this noise study recognizes *that there is no single noise increase that renders the noise impact significant*, based on a 2008 California Court of Appeal ruling on Gray v. County of Madera. (15) For example, if the ambient noise environment is quiet (<60 dBA) and the new noise source greatly increases the noise levels, an impact may occur if the noise criteria may be exceeded. Therefore, for this analysis, FICON identifies a *readily perceptible* 5 dBA or greater project-related noise level increase is considered a significant impact when the noise criteria for a given land use is exceeded. Per the FICON, in areas where the without project noise levels range from 60 to 65 dBA, a 3 dBA *barely perceptible* noise level increase appears to be appropriate for most people. When the without project noise levels already exceed 65 dBA, any increase in community noise louder than 1.5 dBA or greater is considered a significant impact if the noise criteria for a given land use is exceeded, since it likely contributes to an existing noise exposure exceedance.

The FICON guidance provides an established source of criteria to assess the impacts of substantial temporary or permanent increase in ambient noise levels. Based on the FICON criteria, the amount to which a given noise level increase is considered acceptable is reduced when the without Project noise levels are already shown to exceed certain land-use specific exterior noise level criteria. The specific levels are based on typical responses to noise level increases of 5 dBA or *readily perceptible*, 3 dBA or *barely perceptible*, and 1.5 dBA depending on the underlying without Project noise levels for noise-sensitive uses. These levels of increases and their perceived acceptance are consistent with guidance provided by both the Federal Highway Administration (4 p. 9) and Caltrans (17 p. 2_48).

4.3 NON-NOISE-SENSITIVE RECEIVERS

Since the City of Moreno Valley General Plan Safety Element does not identify criteria to assess the impacts associated with off-site transportation-related noise impacts, the OPR land use/noise compatibility criteria, found in Figure 2 of the *General Plan Guidelines, Appendix D: Noise Element Guidelines* is used to determine potential impacts at adjacent land uses. As previously shown on Exhibit 3-A, the *normally acceptable* exterior noise level for non-noise-sensitive land use, such as industrial use, is 70 dBA CNEL. Noise levels greater than 70 dBA CNEL are considered *conditionally acceptable* according to the *Land Use Compatibility Criteria*. (8)

To determine if Project-related traffic noise level increases are significant at off-site non-noise-sensitive land uses, a *barely perceptible* 3 dBA criteria is used. When the without Project noise levels are greater than the *normally acceptable* 70 dBA CNEL land use compatibility criteria, a *barely perceptible* 3 dBA or greater noise level increase is considered a significant impact since the noise level criteria is already exceeded. The noise level increases used to determine significant impacts for non-noise-sensitive land uses is generally consistent with the FICON noise

level increase thresholds for noise-sensitive land uses but instead rely on the OPR land use/noise compatibility criteria, found in Figure 2 of the *General Plan Guidelines, Appendix D: Noise Element Guidelines normally acceptable 70 dBA CNEL exterior noise level criteria.*

4.4 SIGNIFICANCE CRITERIA SUMMARY

Noise impacts shall be considered significant if any of the following occur as a direct result of the proposed development. Table 4-1 shows the significance criteria summary matrix.

TABLE 4-1: SIGNIFICANCE CRITERIA SUMMARY

Analysis	Receiving Land Use	Condition(s)	Significance Criteria	
			Daytime	Nighttime
Off-Site	Noise-Sensitive ¹	if ambient is < 60 dBA CNEL	≥ 5 dBA CNEL Project increase	
		if ambient is 60 - 65 dBA CNEL	≥ 3 dBA CNEL Project increase	
		if ambient is > 65 dBA CNEL	≥ 1.5 dBA CNEL Project increase	
	Non-Noise-Sensitive ²	if ambient is > 70 dBA CNEL	≥ 3 dBA CNEL Project increase	
Operational	Noise-Sensitive ¹	At 200' from the property line of the source ³	65 dBA Leq	60 dBA Leq
		if ambient is < 60 dBA Leq ¹	≥ 5 dBA Leq Project increase	
		if ambient is 60 - 65 dBA Leq ¹	≥ 3 dBA Leq Project increase	
		if ambient is > 65 dBA Leq ¹	≥ 1.5 dBA Leq Project increase

5 EXISTING NOISE LEVEL MEASUREMENTS

To assess the existing noise level environment, 24-hour noise level measurements were taken at five locations in the Project study area. The receiver locations were selected to describe and document the existing noise environment within the Project study area. Exhibit 5-A provides the boundaries of the Project study area and the noise level measurement locations. To fully describe the existing noise conditions, noise level measurements were collected by Urban Crossroads, Inc. on Wednesday, September 16th, 2020. Appendix 5.1 includes study area photos.

5.1 MEASUREMENT PROCEDURE AND CRITERIA

To describe the existing noise environment, the hourly noise levels were measured during typical weekday conditions over a 24-hour period. By collecting individual hourly noise level measurements, it is possible to describe the daytime and nighttime hourly noise levels and calculate the 24-hour CNEL. The long-term noise readings were recorded using Piccolo Type 2 integrating sound level meter and dataloggers. The Piccolo sound level meters were calibrated using a Larson-Davis calibrator, Model CAL 150. All noise meters were programmed in "slow" mode to record noise levels in "A" weighted form. The sound level meters and microphones were equipped with a windscreen during all measurements. All noise level measurement equipment satisfies the American National Standards Institute (ANSI) standard specifications for sound level meters ANSI S1.4-2014/IEC 61672-1:2013. (18)

5.2 NOISE MEASUREMENT LOCATIONS

The long-term noise level measurements were positioned as close to the nearest sensitive receiver locations as possible to assess the existing ambient hourly noise levels surrounding the Project site. Both Caltrans and the FTA recognize that it is not reasonable to collect noise level measurements that can fully represent every part of a private yard, patio, deck, or balcony normally used for human activity when estimating impacts for new development projects. This is demonstrated in the Caltrans general site location guidelines which indicate that, *sites must be free of noise contamination by sources other than sources of interest. Avoid sites located near sources such as barking dogs, lawnmowers, pool pumps, and air conditioners unless it is the express intent of the analyst to measure these sources.* (2) Further, FTA guidance states, *that it is not necessary nor recommended that existing noise exposure be determined by measuring at every noise-sensitive location in the project area. Rather, the recommended approach is to characterize the noise environment for clusters of sites based on measurements or estimates at representative locations in the community.* (7)

Based on recommendations of Caltrans and the FTA, it is not necessary to collect measurements at each individual building or residence, because each receiver measurement represents a group of buildings that share acoustical equivalence. (7) In other words, the area represented by the receiver shares similar shielding, terrain, and geometric relationship to the reference noise source. Receivers represent a location of noise sensitive areas and are used to estimate the future noise level impacts. Collecting reference ambient noise level measurements at the nearest sensitive receiver locations allows for a comparison of the before and after Project noise levels

and is necessary to assess potential noise impacts due to the Project's contribution to the ambient noise levels.

5.3 NOISE MEASUREMENT RESULTS

The noise measurements presented below focus on the average or equivalent sound levels (L_{eq}). The equivalent sound level (L_{eq}) represents a steady state sound level containing the same total energy as a time varying signal over a given sample period. Table 5-1 identifies the hourly daytime (8:00 a.m. to 10:00 p.m.) and nighttime (10:00 p.m. to 8:00 a.m.) noise levels at each noise level measurement location.

Table 5-1 provides the (energy average) noise levels used to describe the daytime and nighttime ambient conditions. These daytime and nighttime energy average noise levels represent the average of all hourly noise levels observed during these time periods expressed as a single number. Appendix 5.2 provides summary worksheets of the noise levels for each hour as well as the minimum, maximum, L_1 , L_2 , L_5 , L_8 , L_{25} , L_{50} , L_{90} , L_{95} , and L_{99} percentile noise levels observed during the daytime and nighttime periods.

The background ambient noise levels in the Project study area are dominated by the transportation-related noise associated with surface streets. This includes the auto and heavy truck activities on study area roadway segments near the noise level measurement locations.

6 METHODS AND PROCEDURES

The following section outlines the methods and procedures used to model and analyze the future traffic noise environment. Consistent with the *Land Use Compatibility Criteria*, all transportation related noise levels are presented in terms of the 24-hour CNEL's.

6.1 FHWA TRAFFIC NOISE PREDICTION MODEL

The expected roadway noise level increases from vehicular traffic were calculated by Urban Crossroads, Inc. using a computer program that replicates the Federal Highway Administration (FHWA) Traffic Noise Prediction Model- FHWA-RD-77-108. (19) The FHWA Model arrives at a predicted noise level through a series of adjustments to the Reference Energy Mean Emission Level (REMEL). In California the national REMELs are substituted with the California Vehicle Noise (Calveno) Emission Levels. (20) Adjustments are then made to the REMEL to account for: the roadway classification (e.g., collector, secondary, major or arterial), the roadway active width (i.e., the distance between the center of the outermost travel lanes on each side of the roadway), the total average daily traffic (ADT), the travel speed, the percentages of automobiles, medium trucks, and heavy trucks in the traffic volume, the roadway grade, the angle of view (e.g., whether the roadway view is blocked), the site conditions ("hard" or "soft" relates to the absorption of the ground, pavement, or landscaping), and the percentage of total ADT which flows each hour throughout a 24-hour period. Research conducted by Caltrans has shown that the use of soft site conditions is appropriate for the application of the FHWA traffic noise prediction model used in this analysis. (21)

6.2 OFF-SITE TRAFFIC NOISE PREDICTION MODEL INPUTS

Table 6-1 presents the roadway parameters used to assess the Project's off-site dBA CNEL transportation noise impacts. Table 6-1 identifies the 4 study area roadway segments, the distance from the centerline to adjacent land use based on the functional roadway classifications per the City of Moreno Valley General Plan Circulation Element, and the posted vehicle speeds. The ADT volumes used in this study area presented on Table 6-2 are based on the *Alessandro Warehouse Traffic Analysis*, prepared by Urban Crossroads, Inc. for the following traffic scenarios under both Without and With Project alternatives: Existing (2020), and Existing plus Ambient Growth plus Project (EAP). (22)

The ADT volumes vary for each roadway segment based on the existing traffic volumes and the combination of project traffic distributions. This analysis relies on a comparative evaluation of the off-site traffic noise impacts, without and with project ADT traffic volumes from the Project traffic study.

¹ Alessandro Warehouse Traffic Analysis, Urban Crossroads, Inc.

To quantify the off-site noise levels, the Project related truck trips were added to the heavy truck category in the FHWA noise prediction model. The addition of the Project related truck trips increases the percentage of heavy trucks in the vehicle mix. This approach recognizes that the FHWA noise prediction model is significantly influenced by the number of heavy trucks in the vehicle mix.

Table 6-3 provides the time of day (daytime, evening, and nighttime) vehicle splits. The daily Project truck trip-ends were assigned to the individual off-site study area roadway segments based on the Project truck trip distribution percentages documented in the *Traffic Impact Analysis*. Using the Project truck trips in combination with the Project trip distribution, Urban Crossroads, Inc. calculated the number of additional Project truck trips and vehicle mix percentages for each of the study area roadway segments. Table 6-4 shows the traffic flow by vehicle type (vehicle mix) used for all without Project traffic scenarios, and Tables 6-5 and 6-6 show the vehicle mixes used for the with Project traffic scenarios.

TABLE 6-3: TIME OF DAY VEHICLE SPLITS

Vehicle Type	Time of Day Splits ¹			Total of Time of Day Splits
	Daytime	Evening	Nighttime	
Autos	77.50%	12.90%	9.60%	100.00%
Medium Trucks	84.80%	4.90%	10.30%	100.00%
Heavy Trucks	86.50%	2.70%	10.80%	100.00%

¹ County of Riverside Office of Industrial Hygiene. Values rounded to the nearest one-hundredth.

"Daytime" = 7:00 a.m. to 7:00 p.m.; "Evening" = 7:00 p.m. to 10:00 p.m.; "Nighttime" = 10:00 p.m. to 7:00 a.m.

TABLE 6-4: WITHOUT PROJECT VEHICLE MIX

Classification	Total % Traffic Flow			Total
	Autos	Medium Trucks	Heavy Trucks	
All Segments	98.89%	0.70%	0.42%	100.00%

Based on an existing vehicle count taken at Frederick Street and Alessandro Boulevard (Alessandro Warehouse Traffic Analysis, Urban Crossroads, Inc.). Vehicle mix percentage values rounded to the nearest one-hundredth.

Due to the added Project truck trips, the increase in Project traffic volumes and the distributions of trucks on the study area road segments, the percentage of autos, medium trucks and heavy trucks will vary for each of the traffic scenarios. This explains why the existing and future traffic volumes and vehicle mixes vary between seemingly identical study area roadway segments.

7 OFF-SITE TRANSPORTATION NOISE IMPACTS

To assess the off-site transportation CNEL noise level impacts associated with the proposed Project, noise contours were developed based on the *Alessandro Warehouse Traffic Analysis*. (22) Noise contour boundaries represent the equal levels of noise exposure and are measured in CNEL from the center of the roadway.

7.1 TRAFFIC NOISE CONTOURS

Noise contours were used to assess the Project's incremental 24-hour dBA CNEL traffic-related noise impacts at land uses adjacent to roadways conveying Project traffic. The noise contours represent the distance to noise levels of a constant value and are measured from the center of the roadway for the 70, 65, and 60 dBA CNEL noise levels. The noise contours do not consider the effect of any existing noise barriers or topography that may attenuate ambient noise levels. In addition, because the noise contours reflect modeling of vehicular noise on area roadways, they appropriately do not reflect noise contributions from the surrounding stationary noise sources within the Project study area.

Tables 7-1 through 7-4 present a summary of the exterior dBA CNEL traffic noise levels without barrier attenuation. Roadway segments are analyzed from the without Project to the with Project conditions in each of the following timeframes: Existing (2020), and Existing plus Ambient Growth plus Project (EAP). Appendix 7.1 includes a summary of the dBA CNEL traffic noise level contours for each of the traffic scenarios.

TABLE 7-1: EXISTING WITHOUT PROJECT NOISE CONTOURS

ID	Road	Segment	Receiving Existing Land Use ¹	CNEL at Receiving Land Use (dBA) ²	Distance to Contour from Centerline (Feet)

"RW" = Location of the respective noise contour falls within the right-of-way of the road.

7.2 EXISTING PROJECT TRAFFIC NOISE LEVEL INCREASES

An analysis of existing traffic noise levels plus traffic noise generated by the proposed Project has been included in this report to fully analyze all the existing traffic scenarios identified in the *Alessandro Warehouse Traffic Analysis*. This condition is provided solely for informational purposes and will not occur, since the Project will not be fully developed and occupied under Existing conditions. Table 7-1 shows the Existing without Project conditions CNEL noise levels. The Existing without Project exterior noise levels are expected to range from 66.9 to 73.1 dBA CNEL, without accounting for any noise attenuation features such as noise barriers or topography. Table 7-2 shows the Existing with Project conditions will range from 68.9 to 73.3 dBA CNEL. Table 7-5 shows that the Project off-site traffic noise level impacts will range from 0.0 to 2.0 dBA CNEL. Based on the significance criteria for off-site traffic noise presented in Table 4-1, land uses adjacent to the study area roadway segments would experience *less than significant* noise level increases on receiving land uses due to the Project-related traffic.

7.3 EXISTING PLUS AMBIENT GROWTH PROJECT TRAFFIC NOISE LEVEL INCREASES

Table 7-3 presents the Existing plus Ambient Growth without Project conditions CNEL noise levels. The Existing plus Ambient Growth without Project exterior noise levels are expected to range from 67.1 to 73.2 dBA CNEL, without accounting for any noise attenuation features such as noise barriers or topography. Table 7-4 shows the Existing plus Ambient Growth with Project conditions will range from 69.0 to 73.5 dBA CNEL. Table 7-6 shows that the Project off-site traffic noise level increases will range from 0.0 to 1.9 dBA CNEL. Based on the significance criteria for off-site traffic noise presented in Table 4-1, land uses adjacent to the study area roadway segments would experience *less than significant* noise level increases on receiving land uses due to the Project-related traffic.

TABLE 7-5: EXISTING WITH PROJECT TRAFFIC NOISE LEVEL INCREASES

8 SENSITIVE RECEIVER LOCATIONS

To assess the potential for long-term operational and short-term construction noise impacts, the following sensitive receiver locations, as shown on Exhibit 8-A, were identified as representative locations for analysis. Sensitive receivers are generally defined as locations where people reside or where the presence of unwanted sound could otherwise adversely affect the use of the land. Noise-sensitive land uses are generally considered to include schools, hospitals, single-family dwellings, mobile home parks, churches, libraries, and recreation areas. Moderately noise-sensitive land uses typically include multi-family dwellings, hotels, motels, dormitories, outpatient clinics, cemeteries, golf courses, country clubs, athletic/tennis clubs, and equestrian clubs. Land uses that are considered relatively insensitive to noise include business, commercial, and professional developments. Land uses that are typically not affected by noise include: industrial, manufacturing, utilities, agriculture, undeveloped land, parking lots, warehousing, liquid and solid waste facilities, salvage yards, and transit terminals.

To describe the potential off-site Project noise levels, five receiver locations in the vicinity of the Project site were identified. All distances are measured from the Project site boundary to the outdoor living areas (e.g., private backyards) or at the building façade, whichever is closer to the Project site. The selection of receiver locations is based on FHWA guidelines and is consistent with additional guidance provided by Caltrans and the FTA, as previously described in Section 5.2. Other sensitive land uses in the Project study area that are located at greater distances than those identified in this noise study will experience lower noise levels than those presented in this report due to the additional attenuation from distance and the shielding of intervening structures. Distance is measured in a straight line from the project boundary to each receiver location.

- R1: Location R1 represents the existing noise sensitive residence at 13994 Chagall Court, approximately 152 feet north of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receiver R1 is placed at the residential building façade. A 24-hour noise measurement was taken near this location, L1, to describe the existing ambient noise environment.
- R2: Location R2 represents the Motel 6 at 23581 Alessandro Blvd, approximately 1,023 feet east of the Project site. Receiver R2 is placed at the building façade. A 24-hour noise measurement was taken near this location, L2, to describe the existing ambient noise environment.
- R3: Location R3 represents the Moreno Valley City Hall at 14177 Frederick Street, approximately 744 feet west of the Project site. Receiver R3 is placed at the building façade. A 24-hour noise measurement near this location, L3, is used to describe the existing ambient noise environment.
- R4: Location R4 represents the existing noise sensitive residence at 13979 Frederick Street, approximately 784 feet northwest of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receiver R4 is placed at the residential building façade. A 24-hour noise measurement near this location, L4, is used to describe the existing ambient noise environment.

R5: Location R5 represents the existing noise sensitive residences at 13933 Chagall Court, approximately 217 feet north of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receiver R5 is placed at the residential building façade. A 24-hour noise measurement near this location, L5, is used to describe the existing ambient noise environment.

9 OPERATIONAL NOISE IMPACTS

This section analyzes the potential stationary-source operational noise impacts at the nearest receiver locations, identified in Section 8, resulting from the operation of the proposed Compass Danbe Centerpointe Project. Exhibit 9-A identifies the representative noise source locations used to assess the operational noise levels.

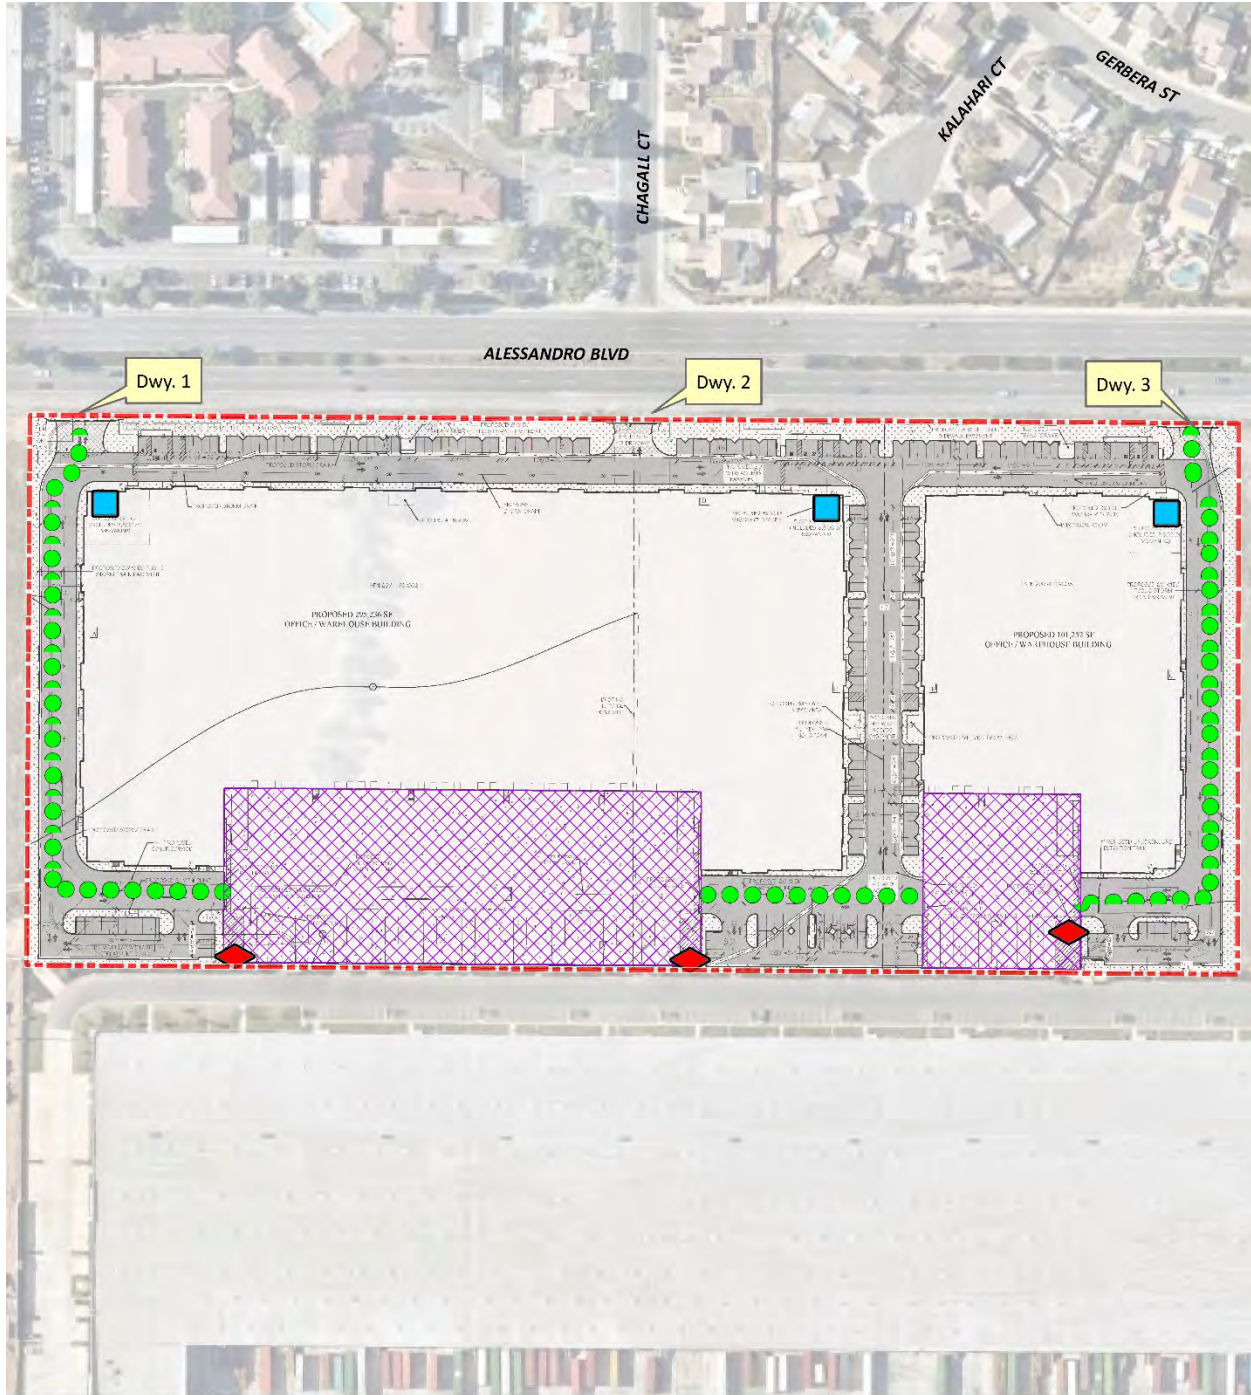

9.1 OPERATIONAL NOISE SOURCES

At the time this noise analysis was prepared the future tenants of the proposed Project were unknown. Therefore, this operational noise analysis is intended to describe noise level impacts associated with the expected typical of daytime and nighttime activities at the Project site. To present the potential worst-case noise conditions, this analysis assumes the Project would be operational 24 hours per day, seven days per week. Consistent with similar warehouse uses, the Project business operations would primarily be conducted within the enclosed buildings, except for traffic movement, parking, as well as loading and unloading of trucks at designated loading bays. The on-site Project-related noise sources are expected to include: loading dock activity, entry gate & truck movements, roof-top air conditioning units, and trash enclosure activity.

9.2 REFERENCE NOISE LEVELS

To estimate the Project operational noise impacts, reference noise level measurements were collected from similar types of activities to represent the noise levels expected with the development of the proposed Project. This section provides a detailed description of the reference noise level measurements shown on Table 9-1 used to estimate the Project operational noise impacts. It is important to note that the following projected noise levels assume the worst-case noise environment with the loading dock activity, entry gate & truck movements, roof-top air conditioning units, and trash enclosure activity all operating continuously. These sources of noise activity will likely vary throughout the day.

TABLE 9-1: REFERENCE NOISE LEVEL MEASUREMENTS

Noise Source ¹	Noise Source Height (Feet)	Min./Hour ²		Reference Noise Level (dBA Leq) @ 50 Feet	Sound Power Level (dBA) ³
		Day	Night		
Loading Dock Activity	8'	60	60	65.7	111.5
Entry Gate & Truck Movements	8'	- ⁴	- ⁴	58.0	89.7
Roof-Top Air Conditioning Units	5'	39	28	57.2	88.9
Trash Enclosure Activity	5'	5	5	57.3	89.0

¹ As measured by Urban Crossroads, Inc.

² Anticipated duration (minutes within the hour) of noise activity during typical hourly conditions expected at the Project site. "Daytime" = 8:00 a.m. - 10:00 p.m.; "Nighttime" = 10:01 p.m. - 7:59 a.m.

³ Sound power level represents the total amount of acoustical energy (noise level) produced by a sound source independent of distance or surroundings. Sound power levels calculated using the CadnaA noise model at the reference distance to the noise source. Numbers may vary due to size differences between point and area noise sources.

⁴ Entry Gate & Truck Movements are calculate based on the number of events by time of day (See Table 9-2).

9.2.1 MEASUREMENT PROCEDURES

The reference noise level measurements presented in this section were collected using a Larson Davis LxT Type 1 precisions sound level meter (serial number 01146). The LxT sound level meter was calibrated using a Larson-Davis calibrator, Model CAL 200, was programmed in "slow" mode to record noise levels in "A" weighted form and was located at approximately five feet above the ground elevation for each measurement. The sound level meters and microphones were equipped with a windscreen during all measurements. All noise level measurement equipment satisfies the American National Standards Institute (ANSI) standard specifications for sound level meters ANSI S1.4-2014/IEC 61672-1:2013. (18)

9.2.2 LOADING DOCK ACTIVITY

To describe the loading dock activities, a reference noise level measurement was collected to represent the truck activities. The reference noise level measurement was taken in the center of the loading dock activity area and represents multiple concurrent noise sources resulting in a combined noise level of 65.7 dBA Leq at a uniform distance of 50 feet. Specifically, the reference noise level measurement represents one truck located approximately 30 feet from the noise level meter with another truck passing by to park roughly 20 feet away, both with their engines idling. Throughout the reference noise level measurement, a separate docked and running reefer truck was located approximately 50 feet east of the measurement location. Additional background noise sources included truck pass-by noise, truck drivers talking to each other next to docked trucks, and air brake release noise when trucks parked.

9.2.3 ENTRY GATE & TRUCK MOVEMENTS

An entry gate and truck movements reference noise level measurement were taken over a 15-minute period and represents multiple noise sources producing a reference noise level of 58.0 dBA Leq at 50 feet. The noise sources included at this measurement location account for the

rattling and squeaking during normal opening and closing operations, the gate closure equipment, truck engines idling outside the entry gate, truck movements through the entry gate, and background truck court activities and forklift backup alarm noise.

Consistent with the *Alessandro Warehouse Traffic Analysis*, the Project is expected to generate a total of approximately 742 trip-ends per day (actual vehicles) and includes 224 truck trip-ends per day. (22) This noise study relies on the actual Project trips (as opposed to the passenger car equivalents) to accurately account for the effect of individual truck trips on the study area roadway network. Using the estimated number of truck trips in combination with time of day vehicle splits, the number of entry gate and truck movements by driveway location were calculated. As shown on Table 9-2, this information is then used to calculate the entry gate and truck movements operational noise source activity based on the number of events by time of day.

TABLE 9-2: ENTRY GATE & TRUCK MOVEMENTS BY LOCATION

Entry Gate & Truck Movement Location ¹	Total Project Truck Trips ²	Trip Dist. ³		Truck Trips by Location ⁴	Time of Day Vehicle Splits ⁵			Truck Movements ⁶		
		In	Out		Day	Evening	Night	Day	Evening	Night
Driveway 1	224	90%	10%	112	86.50%	2.70%	10.80%	97	3	12
Driveway 3		10%	90%	112	86.50%	2.70%	10.80%	97	3	12

¹ Driveway locations as shown on Exhibit 9-A.

² Total Project truck trips according to Table 4-2 of the Alessandro Warehouse Traffic Analysis.

³ Project truck trip distribution according to Exhibit 4-2 of the Alessandro Warehouse Traffic Analysis.

⁴ Calculated trip trucks per location represents the product of the total (inbound and outbound) project truck trips by and the trip distribution.

⁵ Heavy truck time of day vehicle splits as shown on Table 6-3.

⁶ Calculated time of day entry gate and truck movements by location.

9.2.4 ROOF-TOP AIR CONDITIONING UNITS

The noise level measurements describe a single mechanical roof-top air conditioning unit. The reference noise level represents a Lennox SCA120 series 10-ton model packaged air conditioning unit. At the uniform reference distance of 50 feet, the reference noise levels are 57.2 dBA L_{eq} . Based on the typical operating conditions observed over a four-day measurement period, the roof-top air conditioning units are estimated to operate for and average 39 minutes per hour during the daytime hours, and 28 minutes per hour during the nighttime hours. These operating conditions reflect peak summer cooling requirements with measured temperatures approaching 96 degrees Fahrenheit (°F) with average daytime temperatures of 82°F. For this noise analysis, the air conditioning units are expected to be located on the roof of the Project buildings.

9.2.5 TRASH ENCLOSURE ACTIVITY

The measured reference noise level at the uniform 50-foot reference distance is 57.3 dBA L_{eq} for the trash enclosure activity. The trash enclosure activity noise levels include two metal gates opening and closing, metal scraping against concrete floor sounds, dumpster movement on metal wheels, trash dropping into the metal dumpster, and background parking lot vehicle movements.

Noise associated with trash enclosure activities is conservatively expected to occur for 5 minutes per hour.

9.3 CADNAA NOISE PREDICTION MODEL

To fully describe the exterior operational noise levels from the Project, Urban Crossroads, Inc. developed a noise prediction model using the CadnaA (Computer Aided Noise Abatement) computer program. CadnaA can analyze multiple types of noise sources using the spatially accurate Project site plan, georeferenced Nearmap aerial imagery, topography, buildings, and barriers in its calculations to predict outdoor noise levels.

Using the ISO 9613 protocol, CadnaA will calculate the distance from each noise source to the noise receiver locations, using the ground absorption, distance, and barrier/building attenuation inputs to provide a summary of noise level at each receiver and the partial noise level contributions by noise source. Consistent with the ISO 9613 protocol, the CadnaA noise prediction model relies on the reference sound power level (L_w) to describe individual noise sources. While sound pressure levels (e.g. L_{eq}) quantify in decibels the intensity of given sound sources at a reference distance, sound power levels (L_w) are connected to the sound source and are independent of distance. Sound pressure levels vary substantially with distance from the source and diminish as a result of intervening obstacles and barriers, air absorption, wind, and other factors. Sound power is the acoustical energy emitted by the sound source and is an absolute value that is not affected by the environment.

The operational noise level calculations provided in this noise study account for the distance attenuation provided due to geometric spreading, when sound from a localized stationary source (i.e., a point source) propagates uniformly outward in a spherical pattern. A default ground attenuation factor of 0.5 was used in the noise analysis to account for mixed ground representing a combination of hard and soft surfaces. Appendix 9.1 includes the detailed noise model inputs used to estimate the Project operational noise levels presented in this section.

9.4 PROJECT OPERATIONAL NOISE LEVELS

Using the reference noise levels to represent the proposed Project operations that include loading dock activity, entry gate & truck movements, roof-top air conditioning units, and trash enclosure activity, Urban Crossroads, Inc. calculated the operational source noise levels that are expected to be generated at the Project site and the Project-related noise level increases that would be experienced at each of the sensitive receiver locations and at 200 feet from the property line of the source. Tables 9-3 shows the Project operational noise levels during the daytime hours of 8:00 a.m. to 10:00 p.m. The daytime hourly noise levels at the off-site receiver locations are expected to range from 35.1 to 55.6 dBA L_{eq} .

TABLE 9-3: DAYTIME PROJECT OPERATIONAL NOISE LEVELS

Noise Source ¹	Operational Noise Levels by Receiver Location (dBA Leq)					
	R1	R2	R3	R4	R5	at 200'
Loading Dock Activity	34.9	43.3	48.8	31.5	32.7	55.4
Entry Gate & Truck Movements	25.6	30.4	33.3	31.0	30.4	41.0
Roof-Top Air Conditioning Units	37.4	25.9	26.5	27.6	36.6	29.1
Trash Enclosure Activity	1.0	14.3	18.2	2.7	1.3	25.2
Total (All Noise Sources)	39.5	43.6	48.9	35.1	38.8	55.6

¹ See Exhibit 9-A for the noise source locations. CadnaA noise model calculations are included in Appendix 9.1.

Table 9-4 shows the Project operational noise levels during the nighttime hours of 10:01 p.m. to 7:59 a.m. The nighttime hourly noise levels at the off-site receiver locations are expected to range from 32.8 to 55.4 dBA L_{eq} . The differences between the daytime and nighttime noise levels is largely related to the duration of noise activity (Table 9-1).

TABLE 9-4: NIGHTTIME PROJECT OPERATIONAL NOISE LEVELS

Noise Source ¹	Operational Noise Levels by Receiver Location (dBA Leq)					
	R1	R2	R3	R4	R5	at 200'
Loading Dock Activity	34.9	43.3	48.8	31.5	32.7	55.4
Entry Gate & Truck Movements	16.5	21.3	24.2	21.9	21.3	32.0

Total (All Noise Sources)	38.0	43.4	48.8	32.8	36.7	55.4

¹ See Exhibit 9-A for the noise source locations. CadnaA noise model calculations are included in Appendix 9.1.

9.5 PROJECT OPERATIONAL NOISE LEVEL COMPLIANCE

To demonstrate compliance with local noise regulations, the Project-only operational noise levels are evaluated against exterior noise level thresholds based on the City of Moreno Valley exterior noise level standards at the nearest noise-sensitive receiver locations. Table 9-5 shows the operational noise levels associated with Compass Danbe Centerpointe Project will satisfy the City of Moreno Valley 65 dBA L_{eq} daytime and 60 dBA L_{eq} nighttime exterior noise level standards at all the nearest receiver locations and at 200 feet from the property line of the source. Therefore, the operational noise impacts are considered *less than significant* at the nearest noise-sensitive receiver locations.

TABLE 9-5: OPERATIONAL NOISE LEVEL COMPLIANCE

Receiver Location ¹	Project Operational Noise Levels (dBA Leq) ²		Noise Level Standards (dBA Leq) ³		Noise Level Standards Exceeded? ⁴	
	Daytime	Nighttime	Daytime	Nighttime	Daytime	Nighttime
R1	39.5	38.0	65	60	No	No
R2	43.6	43.4	65	60	No	No
R3	48.9	48.8	65	60	No	No
R4	35.1	32.8	65	60	No	No
R5	38.8	36.7	65	60	No	No
at 200'	55.6	55.4	65	60	No	No

¹ See Exhibit 8-A for the receiver locations.

² Proposed Project operational noise levels as shown on Tables 9-3 and 9-4.

³ Exterior noise level standards for source (commercial) land use, as shown on Table 4-1.

⁴ Do the estimated Project operational noise source activities exceed the noise level standards?

"Daytime" = 8:00 a.m. - 10:00 p.m.; "Nighttime" = 10:01 p.m. - 7:59 a.m.

9.6 PROJECT OPERATIONAL NOISE LEVEL INCREASES

To describe the Project operational noise level increases, the Project operational noise levels are combined with the existing ambient noise levels measurements for the nearest receiver locations potentially impacted by Project operational noise sources. Since the units used to measure noise, decibels (dB), are logarithmic units, the Project-operational and existing ambient noise levels cannot be combined using standard arithmetic equations. (2) Instead, they must be logarithmically added using the following base equation:

$$SPL_{Total} = 10\log_{10}[10^{SPL1/10} + 10^{SPL2/10} + \dots 10^{SPLn/10}]$$

Where "SPL1," "SPL2," etc. are equal to the sound pressure levels being combined, or in this case, the Project-operational and existing ambient noise levels. The difference between the combined Project and ambient noise levels describe the Project noise level increases to the existing ambient noise environment. As indicated on Tables 9-6 and 9-7, the Project is not expected to generate a measurable daytime and nighttime operational noise level increase dBA Leq at the nearest receiver locations and at 200 feet from the property line of the source. Project-related operational noise level increases will satisfy the operational noise level increase significance criteria presented in Table 4-1. Therefore, the incremental Project operational noise level increase is considered *less than significant* at all receiver locations.

TABLE 9-6: DAYTIME PROJECT OPERATIONAL NOISE LEVEL INCREASES

Receiver Location ¹	Total Project Operational Noise Level ²	Measurement Location ³	Reference Ambient Noise Levels ⁴	Combined Project and Ambient ⁵	Project Increase ⁶	Increase Criteria ⁷	Increase Criteria Exceeded?

10 CONSTRUCTION IMPACTS

This section analyzes potential impacts resulting from the short-term construction activities associated with the development of the Project. Exhibit 10-A shows the construction noise source locations in relation to the nearest sensitive receiver locations previously described in Section 8.

To prevent high levels of construction noise from impacting noise-sensitive land uses, City of Moreno Valley Municipal Code Section 11.80.030 (D)(7) limits general construction activities within 200 feet of residential uses to weekdays, between 7:00 a.m. and 8:00 p.m. In addition, grading operations shall be limited to the hours identified in Section 8.21.050 (O) of 7:00 a.m. to 6:00 p.m., Monday through Friday, and 8:00 a.m. to 4:00 p.m. on weekends and holidays or as approved by the City Engineer.

10.1 CONSTRUCTION NOISE LEVELS

Noise generated by the Project construction equipment will include a combination of trucks, power tools, concrete mixers, and portable generators that when combined can reach high levels. The number and mix of construction equipment is expected to occur in the following stages:

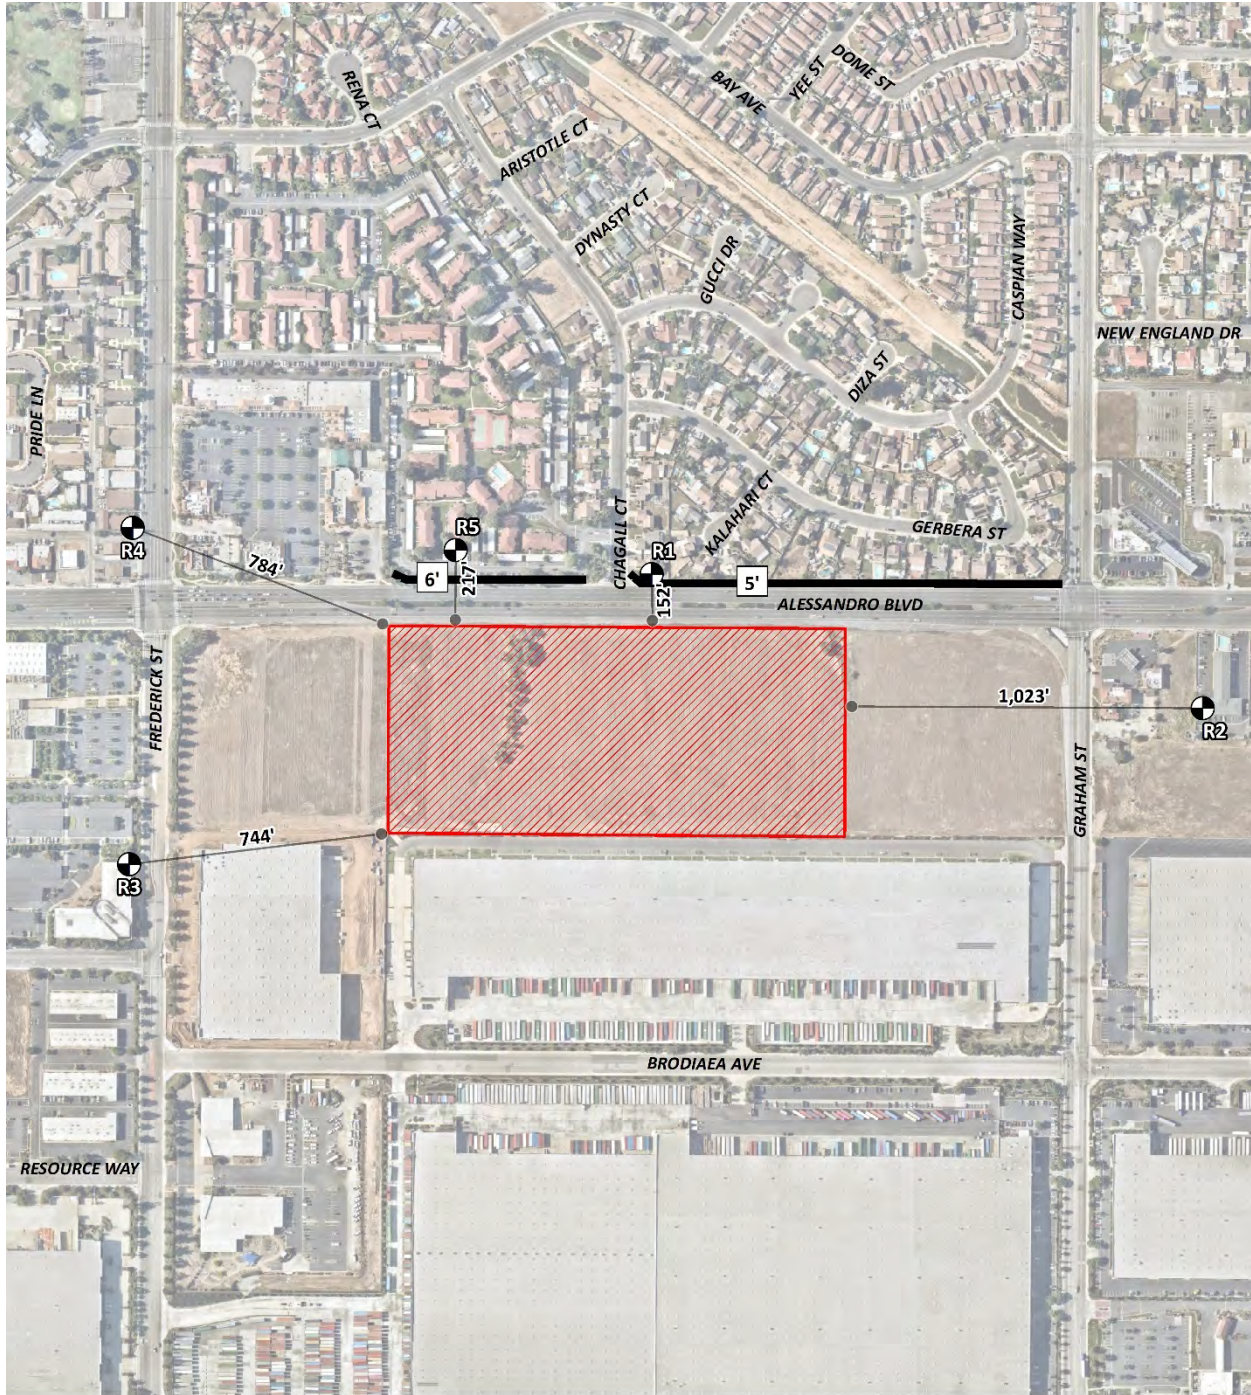

- Site Preparation
- Grading
- Building Construction
- Paving
- Architectural Coating

This construction noise analysis was prepared using reference noise level measurements taken by Urban Crossroads, Inc. to describe the typical construction activity noise levels for each stage of Project construction. The construction reference noise level measurements represent a list of typical construction activity noise levels.

10.2 CONSTRUCTION REFERENCE NOISE LEVELS

To describe the Project construction noise levels, measurements were collected for similar activities at several construction sites. Table 10-1 provides a summary of the construction reference noise level measurements. Since the reference noise levels were collected at varying distances of 30 feet and 50 feet, all construction noise level measurements presented on Table 10-1 have been adjusted for consistency to describe a uniform reference distance of 50 feet.

EXHIBIT 10-A: TYPICAL CONSTRUCTION NOISE SOURCE LOCATIONS

Architectural Coating	Air Compressors	65.2	65.2
	Generator	64.9	
	Crane	62.3	

¹ Reference construction noise level measurements taken by Urban Crossroads, Inc.

10.3 TYPICAL CONSTRUCTION NOISE ANALYSIS

Using the reference construction equipment noise levels and the CadnaA noise prediction model, calculations of the Project construction noise level impacts at the nearest sensitive receiver locations were completed. To assess the worst-case construction noise levels, the Project construction noise analysis relies on the highest noise level impacts when the equipment with the highest reference noise level is operating at the closest point from the edge of primary construction activity (Project site boundary) to each receiver location. As shown on Table 10-2, the construction noise levels are expected to range from 56.3 to 63.7 dBA Leq at the nearest receiver locations and at 200 feet from the property line of the source. Appendix 10.1 includes the detailed CadnaA construction noise model inputs.

TABLE 10-2: TYPICAL CONSTRUCTION EQUIPMENT NOISE LEVEL SUMMARY

Receiver Location ¹	Construction Noise Levels (dBA Leq)					
	Site Preparation	Grading	Building Construction	Paving	Architectural Coating	Highest Levels ²
R1	61.0	61.9	60.0	56.5	53.6	61.9
R2	55.4	56.3	54.4	50.9	48.0	56.3
R3	57.0	57.9	56.0	52.5	49.6	57.9
R4	56.4	57.3	55.4	52.3	49.0	57.3
R5	59.0	59.9	58.0	54.7	51.6	59.9
at 200'	62.8	63.7	61.8	57.6	55.4	63.7

¹ Noise receiver locations are shown on Exhibit 10-A.

² Construction noise level calculations based on distance from the project site boundaries (construction activity area) to the nearest receiver locations. CadnaA construction noise model inputs are included in Appendix 10.1.

10.4 TYPICAL CONSTRUCTION NOISE LEVEL COMPLIANCE

The construction noise analysis shows that the nearest receiver locations will satisfy the City of Moreno Valley daytime 65 dBA Leq significance threshold during Project construction activities as shown on Table 10-3. Therefore, the noise impacts due to Project construction noise is considered *less than significant* at all receiver locations and at 200 feet from the property line of the source.

TABLE 10-3: TYPICAL CONSTRUCTION NOISE LEVEL COMPLIANCE

Receiver Location ¹	Construction Noise Levels (dBA Leq)		
	Highest Construction Noise Levels ²	Threshold ³	Threshold Exceeded? ⁴
R1	61.9	65	No

³ Construction noise level thresholds as shown on Table 4-1.

⁴ Do the estimated Project construction noise levels exceed the construction noise level threshold?

10.5 NIGHTTIME CONCRETE POUR NOISE ANALYSIS

Nighttime concrete pouring activities may occur as a part of Project construction activities. Nighttime concrete pouring activities are often used to support reduced concrete mixer truck transit times and lower air temperatures than during the daytime hours and are generally limited to the actual buildings area as shown on Exhibit 10-B. Since the nighttime concrete pours may take place outside the permitted City of Moreno Valley Municipal Code, Section 11.80.030 (D)(7)

hours of 7:00 a.m. to 8:00 p.m. on any day and grading is limited to 7:00 a.m. to 6:00 p.m. Monday to Friday and 8:00 a.m. to 4:00 p.m. on weekends and holidays, the Project Applicant will be required to obtain authorization for nighttime work from the City of Moreno Valley. Table 10-4 shows the concrete pour activities (paving) noise will range from 50.9 to 57.6 dBA L_{eq} at the nearest sensitive receiver locations and at 200 feet from the property line of the source. Therefore, the unmitigated nighttime concrete pour noise level impacts are considered *less than significant* at the nearest noise-sensitive receiver locations and at 200 feet from the property line.

TABLE 10-4: NIGHTTIME CONCRETE POUR NOISE LEVEL COMPLIANCE

Receiver Location ¹	Construction Noise Levels (dBA L_{eq})		
	Paving Construction ²	Nighttime Construction Standard ³	Threshold Exceeded? ⁴
R1	56.5	60	No
R2	50.9	60	No
R3	52.5	60	No
R4	52.3	60	No
R5	54.7	60	No
at 200'	57.6	60	No

² Construction noise level calculations based on distance from the project building area to the property line of adjacent uses as shown on Table 10-4.

³ Construction noise level standards as shown on Table 3-2.

⁴ Do the estimated Project construction noise levels exceed the construction noise level threshold?

10.6 TYPICAL CONSTRUCTION VIBRATION IMPACTS

Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods used, distance to the affected structures and soil type. It is expected that ground-borne vibration from Project construction activities would cause only intermittent, localized intrusion. Ground-borne vibration levels resulting from typical construction activities occurring within the Project site were estimated by data published by the Federal Transit Administration (FTA). (7) However, while vehicular traffic is rarely perceptible, construction has the potential to result in varying degrees of temporary ground vibration, depending on the specific construction activities and equipment used. Ground vibration levels associated with various types of construction equipment are summarized on Table 10-5. Based on the representative vibration levels presented for various construction equipment types, it is possible to estimate the potential Project construction vibration levels using the following vibration assessment methods defined by the FTA. To describe the human response (annoyance) associated with vibration impacts the FTA provides the following equation: $L_{vdB}(D) = L_{vdB}(25 \text{ ft}) - 30\log(D/25)$

EXHIBIT 10-B: NIGHTTIME CONCRETE POUR NOISE SOURCE AND RECEIVER LOCATIONS

Attachment: Appendix J-Noise Study (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

TABLE 10-5: VIBRATION SOURCE LEVELS FOR CONSTRUCTION EQUIPMENT

Equipment	Vibration Decibels (VdB) at 25 feet
Small bulldozer	58
Jackhammer	79
Loaded Trucks	86
Large bulldozer	87

Federal Transit Administration, Transit Noise and Vibration Impact Assessment Manual

Table 10-6 presents the expected typical construction equipment vibration levels at the nearest receiver locations. At distances ranging from 152 feet to 1,023 feet from typical Project construction activities (at the Project site boundary), construction vibration levels are estimated to range from 38.6 to 63.5 VdB and will remain below the FTA Transit Noise and Vibration Impact Assessment maximum acceptable vibration criteria of 78 VdB for daytime residential uses, and 84 VdB for daytime office use at all receiver locations and at 200 feet from the property line of the source. Therefore, the Project-related vibration impacts are considered *less than significant* during typical construction activities at the Project site.

TABLE 10-6: TYPICAL CONSTRUCTION EQUIPMENT VIBRATION LEVELS

Receiver Location ¹	Distance to Construction Activity (Feet)	Receiver Vibration Levels (VdB) ²					Threshold VdB ³	Threshold Exceeded? ⁴
		Small Bulldozer	Jackhammer	Loaded Trucks	Large Bulldozer	Highest Vibration Levels		
R1	152'	34.5	55.5	62.5	63.5	63.5	78	No
R2	1,023'	9.6	30.6	37.6	38.6	38.6	78	No
R3	744'	13.8	34.8	41.8	42.8	42.8	84	No
R4	784'	13.1	34.1	41.1	42.1	42.1	78	No
R5	217'	29.8	50.8	57.8	58.8	58.8	78	No
at 200'	200'	30.9	51.9	58.9	59.9	59.9	78	No

¹ Noise receiver locations are shown on Exhibit 10-A.

² Based on the Vibration Source Levels of Construction Equipment included on Table 10-5.

³ FTA Transit Noise and Vibration Impact Assessment maximum acceptable vibration criteria as shown in Section 3.5.

⁴ Does the vibration level exceed the maximum acceptable vibration threshold?

Further, vibration levels at the site of the closest sensitive receiver are unlikely to be sustained during the entire construction period but will occur rather only during the times that heavy construction equipment is operating simultaneously adjacent to the Project site perimeter.

Chapter 11.80 NOISE REGULATION

11.80.010 Legislative findings.

It is found and declared that:

- A. Excessive sound within the limits of the city is a condition which has existed for some time, and the amount and intensity of such sound is increasing.
- B. Such excessive sound is a detriment to the public health, safety, and welfare and quality of life of the residents of the city.
- C. The necessity in the public interest for the provisions and prohibitions hereinafter contained and enacted is declared as a matter of legislative determination and public policy, and it is further declared that the provisions and prohibitions hereinafter contained and enacted are in pursuance of and for the purpose of securing and promoting the public health, safety, welfare and quality of life of the city and its inhabitants. (Ord. 740 § 1.2, 2007)

11.80.020 Definitions.

For purposes of this chapter, certain words and phrases used herein are defined as follows:

“A-weighted sound level” means the sound pressure level in decibels as measured with a sound level meter using the A-weighting network. The unit of measurement is the dB(A).

“Commercial” means all uses of land not otherwise classified as residential, as defined in this section.

“Construction” means any site preparation, and/or any assembly, erection, repair, or alteration, excluding demolition, of any structure, or improvements to real property.

“Continuous airborne sound” means sound that is measured by the slow-response setting of a meter manufactured to the specifications of ANSI Section 1.4-1983 (R2006) “Specification for Sound Level Meters,” or its successor.

“Daytime” means eight a.m. to ten p.m. the same day.

“Decibel” (dB) means a unit for measuring the amplitude of sound, equal to twenty (20) times the logarithm to the base ten (10) of the ratio of the pressure of the sound measured to the reference pressure, which is twenty (20) microPascals (twenty (20) microNewtons per square meter.)

“Demolition” means any dismantling, intentional destruction or removal of structures or other improvements to real property.

“Disturb” means to interrupt, interfere with, or hinder the enjoyment of peace or quiet or the normal listening activities or the sleep, rest or mental concentration of the hearer.

“Emergency” means any occurrence or set of circumstances involving actual or imminent physical trauma or significant property damage which necessitates immediate action. Economic loss alone shall not constitute an emergency. It shall be the burden of an alleged violator to prove an “emergency.”

“Emergency work” means any work made necessary to restore property to a safe condition following an emergency, or to protect persons or property threatened by an imminent emergency, to the extent such work is, in fact, necessary to protect persons or property from exposure to imminent danger or damage.

“Frequency” means the number of complete oscillation cycles per unit of time.

“Impulsive sound” means sound of short duration, usually less than one second, with an abrupt onset and rapid decay. Examples of sources of impulsive sound include explosions, drop forge impacts, and discharge of firearms.

“Nighttime” means 10:01 p.m. to 7:59 a.m. the following day.

“Noise disturbance” means any sound which:

1. Disturbs a reasonable person of normal sensitivities;

- 2. Exceeds the sound level limits set forth in this chapter; or
- 3. Is plainly audible as defined in this section. Where no specific distance is set forth for the determination of audibility, references to noise disturbance shall be deemed to mean plainly audible at a distance of two hundred (200) feet from the real property line of the source of the sound, if the sound occurs on privately owned property, or from the source of the sound, if the sound occurs on public right-of-way, public space or other publicly owned property.

“Person” means any person, person’s firm, association, copartnership, joint venture, corporation, or any entity public or private in nature.

“Plainly audible” means that the sound or noise produced or reproduced by any particular source, can be clearly distinguished from ambient noise by a person using his/her normal hearing faculties.

“Public right-of-way” means any street, avenue, boulevard, sidewalk, bike path or alley, or similar place normally accessible to the public which is owned or controlled by a governmental entity.

“Public space” means any park, recreational or community facility, or lot which contains at least one building that is open to the general public during its hours of operation.

“Residential” means all uses of land primarily for dwelling units, as well as hospitals, schools, colleges and universities, and places of religious assembly.

“Sound” means an oscillation in pressure, particle displacement, particle velocity or other physical parameter, in a medium with internal forces that causes compression and rarefaction of that medium capable of producing an auditory impression. The description of sound may include any characteristic of such sound, including duration, intensity and frequency.

“Sound level” means the weighted sound pressure level as measured in dB(A) by a sound level meter and as specified in American National Standards Institute (ANSI) specifications for sound-level meters (ANSI Section 1.4-1971 (R1976)). If the frequency weighting employed is not indicated, the A-weighting shall apply.

“Sound level meter” means an instrument, demonstrably capable of accurately measuring sound levels as defined above.

All technical definitions not defined above shall be in accordance with applicable publications and standards of the American National Standards Institute (ANSI). (Ord. 740 § 1.2, 2007)

11.80.030 Prohibited acts.

A. General Prohibition. It is unlawful and a violation of this chapter to maintain, make, cause, or allow the making of any sound that causes a noise disturbance, as defined in Section [11.80.020](#).

B. Sound causing permanent hearing loss.

1. Sound level limits. Based on statistics from the Center for Disease Control and Prevention and the National Institute for Occupational Safety and Health, Table 1 and Table 1-A specify sound level limits which, if exceeded, will have a high probability of producing permanent hearing loss in anyone in the area where the sound levels are being exceeded. No sound shall be permitted within the city which exceeds the parameters set forth in Tables 11.80.030-1 and 11.80.030-1-A of this chapter:

**Table 11.80.030-1
MAXIMUM CONTINUOUS SOUND LEVELS***

Duration per Day	
Continuous Hours	Sound level [db(A)]
8	90
6	92
4	95
3	97

2	100
1.5	102
1	105
0.5	110
0.25	115

* When the daily sound exposure is composed of two or more periods of sound exposure at different levels, the combined effect of all such periods shall constitute a violation of this section if the sum of the percent of allowed period of sound exposure at each level exceeds 100 percent

**Table 11.80.030-1A
MAXIMUM IMPULSIVE SOUND
LEVELS**

Number of Repetitions per 24-Hour Period	Sound level [dB(A)]
1	145
10	135
100	125

2. Exemptions. No violation shall exist if the only persons exposed to sound levels in excess of those listed in Tables 11.80.030-1 and 11.80.030-1A are exposed as a result of:

- a. Trespass;
- b. Invitation upon private property by the person causing or permitting the sound; or
- c. Employment by the person or a contractor of the person causing or permitting the sound.

C. Nonimpulsive Sound Decibel Limits. No person shall maintain, create, operate or cause to be operated on private property any source of sound in such a manner as to create any nonimpulsive sound which exceeds the limits set forth for the source land use category (as defined in Section 11.80.020) in Table 11.80.030-2 when measured at a distance of two hundred (200) feet or more from the real property line of the source of the sound, if the sound occurs on privately owned property, or from the source of the sound, if the sound occurs on public right-of-way, public space or other publicly owned property. Any source of sound in violation of this subsection shall be deemed prima facie to be a noise disturbance.

**Table 11.80.030-2
MAXIMUM SOUND LEVELS (IN dB(A)) FOR SOURCE LAND USES**

Residential		Commercial	
Daytime	Nighttime	Daytime	Nighttime
60	55	65	60

D. Specific Prohibitions. In addition to the general prohibitions set out in subsection A of this section, and unless otherwise exempted by this chapter, the following specific acts, or the causing or permitting thereof, are regulated as follows:

1. Motor Vehicles. No person shall operate or cause to be operated a public or private motor vehicle, or combination of vehicles towed by a motor vehicle, that creates a sound exceeding the sound level limits in Table 11.80.030-2 when the vehicle(s) are not otherwise subject to noise regulations provided for by the California [Vehicle Code](#).

2. Radios, Televisions, Electronic Audio Equipment, Musical Instruments or Similar Devices from a Stationary Source. No person shall operate, play or permit the operation or playing of any radio, tape player, television, electronic audio equipment, musical instrument, sound amplifier or other mechanical or electronic sound making device that produces, reproduces or amplifies sound in such a manner as to create a noise disturbance. However, this subsection shall not apply to any use or activity exempted in subsection E of this section and any use or activity for which a special permit has been issued pursuant to Section [11.80.040](#).

3. Radios, Electronic Audio Equipment, or Similar Devices from a Mobile Source Such as a Motor Vehicle. Sound amplification or reproduction equipment on or in a motor vehicle is subject to regulation in accordance with the California [Vehicle Code](#) when upon the public right-of-way. When upon public space or publicly owned property other than the public right-of-way or upon private property open to the public, sound amplification or reproduction equipment shall not be operated in such a manner that it is plainly audible at a distance of fifty (50) feet in any direction from the vehicle.

4. Portable, Hand-Held Music or Sound Amplification or Reproduction Equipment. Such equipment shall not be operated on a public right-of-way, public space or other publicly owned property in such a manner as to be plainly audible at a distance of fifty (50) feet in any direction from the operator.

5. Loudspeakers and Public Address Systems.

a. Except as permitted by Section [11.80.040](#), no person shall operate, or permit the operation of, any loudspeaker, public address system or similar device, for any commercial purpose:

1. Which produces, reproduces or amplifies sound in such a manner as to create a noise disturbance; or
2. During nighttime hours on a public right-of-way, public space or other publicly owned property.

b. No person shall operate, or permit the operation of, any loudspeaker, public address system or similar device, for any noncommercial purpose, during nighttime hours in such a manner as to create a noise disturbance.

6. Animals. No person shall own, possess or harbor an animal or bird that howls, barks, meows, squawks, or makes other sounds that:

- a. Create a noise disturbance;
- b. Are of frequent or continued duration for ten (10) or more consecutive minutes and are plainly audible at a distance of fifty (50) feet from the real property line of the source of the sound; or
- c. Are intermittent for a period of thirty (30) or more minutes and are plainly audible at a distance of fifty (50) feet from the real property line of the source of the sound.

7. Construction and Demolition. No person shall operate or cause the operation of any tools or equipment used in construction, drilling, repair, alteration or demolition work between the hours of eight p.m. and seven a.m. the following day such that the sound there from creates a noise disturbance, except for emergency work by public service utilities or for other work approved by the city manager or designee. This section shall not apply to the use of power tools as provided in subsection (D)(9) of this section.

8. Emergency Signaling Devices. No person shall intentionally sound or permit the sounding outdoors of any fire, burglar or civil defense alarm, siren or whistle, or similar stationary emergency signaling device, except for emergency purposes or for testing as follows:

- a. Testing of a stationary emergency signaling device shall not occur between seven p.m. and seven a.m. the following day;
- b. Testing of a stationary emergency signaling device shall use only the minimum cycle test time, in no case to exceed sixty (60) seconds;
- c. Testing of a complete emergency signaling system, including the functioning of the signaling device and the personnel response to the signaling device, shall not occur more than once in each calendar month. Such testing shall only occur only on weekdays between seven a.m. and seven p.m. and shall be exempt from the time limit specified in subsection (D)(8)(2) of this section.

9. Power Tools. No person shall operate or permit the operation of any mechanically, electrically or gasoline motor-driven tool during nighttime hours so as to cause a noise disturbance across a residential real property boundary.

10. Pumps, Air Conditioners, Air-Handling Equipment and Other Continuously Operating Equipment. Notwithstanding the general prohibitions of subsection a of this section, no person shall operate or permit the operation of any pump, air

conditioning, air-handling or other continuously operating motorized equipment in a state of disrepair or in a manner which otherwise creates a noise disturbance distinguishable from normal operating sounds.

E. Exemptions. The following uses and activities shall be exempt from the sound level regulations except the maximum sound levels provided in Tables 11.80.030-1 and 11.80.030-1A:

1. Sounds resulting from any authorized emergency vehicle when responding to an emergency call or acting in time of an emergency.
 2. Sounds resulting from emergency work as defined in Section [11.80.020](#)
 3. Any aircraft operated in conformity with, or pursuant to, federal law, federal air regulations and air traffic control instruction used pursuant to and within the duly adopted federal air regulations; and any aircraft operating under technical difficulties in any kind of distress, under emergency orders of air traffic control, or being operated pursuant to and subsequent to the declaration of an emergency under federal air regulations.
 4. All sounds coming from the normal operations of interstate motor and rail carriers, to the extent that local regulation of sound levels of such vehicles has been preempted by the Noise Control Act of 1972 (42 U.S.C. § 4901 et seq.) or other applicable federal laws or regulations
 5. Sounds from the operation of motor vehicles, to the extent they are regulated by the California [Vehicle Code](#).
 6. Any constitutionally protected noncommercial speech or expression conducted within or upon a any public right-of-way, public space or other publicly owned property constituting an open or a designated public forum in compliance with any applicable reasonable time, place and manner restrictions on such speech or expression or otherwise pursuant to legal authority.
 7. Sounds produced at otherwise lawful and permitted city-sponsored events, organized sporting events, school assemblies, school playground activities, by permitted fireworks, and by permitted parades on public right-of-way, public space or other publicly owned property.
 8. An event for which a temporary use permit or special event permit has been issued under other provisions of this code, where the provisions of Section [11.80.040](#) are met, the permit granted expressly grants an exemption from specific standards contained in this chapter, and the permittee and all persons under the permittee's reasonable control actually comply with all conditions of such permit. Violation of any condition of such a permit related to sound or sound equipment shall be a violation of this chapter and punishable as such.
- F. Nothing in this chapter shall be construed to limit, modify or repeal any other regulation elsewhere in this code relating to the regulation of noise sources, nor shall any such other regulation be read to permit the emission of noise in violation of any provision of this chapter. (Ord. 740 § 1.2, 2007)

11.80.040 Special provisions for temporary use and special event permits.

The exemption by permit set forth in Section [11.80.030](#)(E)(8) shall be subject to the following requirements and conditions:

- A. The permit application shall include the name, address and telephone number of the permit applicant; the date, hours and location for which the permit is requested; and the nature of the event or activity. It shall also specify the types of sounds and/or sound equipment to be permitted, the proposed duration of such sound, the specific standards from which the sound is to be exempted, and the reasons for each requested exemption.
- B. The permit shall be issued provided the proposed activity meets the requirements of this section and the issuing official determines that the sound to be emitted at the event as proposed would not be detrimental to the public health, safety or welfare, that the event cannot reasonably achieve its legitimate aims and purposes without the exemption and that the sound levels proposed will not unreasonably damage the peace and quiet enjoyment of the lawful users of surrounding properties, nor constitute a public nuisance.
- C. The official issuing the permit may prescribe any reasonable conditions or requirements he/she deems necessary to minimize noise disturbances upon the community or the surrounding neighborhood, and/or to protect the health, safety or welfare of the public, including participants in the permitted event, including use of mufflers, screens or other sound-attenuating devices.
- D. Any permit granted must be in writing and shall contain all conditions upon which the permit shall be effective.

E. No more than six events requiring a sound limit exemption may be held at any particular location upon privately owned or controlled property per calendar year, provided further that the number of events shall not exceed the number permitted under the regulations for the type of permit issued. For purposes of this subsection, “location” means a legal parcel of real property or a complete shopping or commercial center or mall sharing common parking and access even if comprised of multiple legal parcels.

F. The exemption from sound limits under such permit shall not exceed maximum period of four hours in one twenty-four (24) hour day.

G. The permit will only be granted for hours between nine a.m. and ten p.m. on all days other than Friday and Saturday; and, on Friday and Saturday, between the hours of nine a.m. and one a.m. of the following day, except in the following circumstances:

1. A permit may be granted for hours between nine a.m. on New Year’s Eve and one a.m. the following day (New Year’s Day).

2. A permit may be granted for hours between nine a.m. and two a.m. the following day if there are no residences, hospitals, or nursing homes within a 0.5 mile radius of the property where the function is taking place.

H. Functions for which the permits are issued shall be limited to a continuous airborne sound level not to exceed seventy (70) dB(A), as measured two hundred (200) feet from the real property boundary of the source property if on private property, or from the source if on public right-of-way, public space or other publicly owned property. (Ord. 740 § 1.2, 2007)

11.80.050 Measurement or assessment of sound.

A. Measurement With Sound Meter.

1. The measurement of sound shall be made with a sound level meter meeting the standards prescribed by ANSI Section 1.4-1983 (R2006). The instruments shall be maintained in calibration and good working order. A calibration check shall be made of the system at the time of any sound level measurement. Measurements recorded shall be taken so as to provide a proper representation of the source of the sound. The microphone during measurement shall be positioned so as not to create any unnatural enhancement or diminution of the measured sound. A windscreen for the microphone shall be used at all times. However, a violation of this chapter may occur without the occasion of the measurements being made as otherwise provided.

2. The slow meter response of the sound level meter shall be used in order to best determine the average amplitude.

3. The measurement shall be made at any point on the property into which the sound is being transmitted and shall be made at least three feet away from any ground, wall, floor, ceiling, roof and other plane surface.

4. In case of multiple occupancy of a property, the measurement may be made at any point inside the premises to which any complainant has right of legal private occupancy; provided that the measurement shall not be made within three feet of any ground, wall, floor, ceiling, roof or other plane surface.

5. All measurements of sound provided for in this chapter will be made by qualified officials of the city who are designated by the city manager or designee to operate the apparatus used to make the measurements.

B. Assessment Without Sound Level Meter. Any police officer, code enforcement officer, or other official designated by the city manager or designee who hears a noise or sound that is plainly audible, as defined in Section [11.80.020](#), in violation of this chapter, may enforce this chapter and shall assess the noise or sound according to the following standards:

1. The primary means of detection shall be by means of the official’s normal hearing faculties, not artificially enhanced.

2. The official shall first attempt to have a direct line of sight and hearing to the vehicle or real property from which the sound or noise emanates so that the official can readily identify the offending source of the sound or noise and the distance involved. If the official is unable to have a direct line of sight and hearing to the vehicle or real property from which the sound or noise emanates, then the official shall confirm the source of the sound or noise by approaching the suspected vehicle or real property until the official is able to obtain a direct line of sight and hearing, and confirm the source of the sound or noise that was heard at the place of the original assessment of the sound or noise.

3. The official need not be required to identify song titles, artists, or lyrics in order to establish a violation. (Ord. 740 § 1.2, 2007)

11.80.060 Violation.

A. **Violation of Sound Level Limits.** Any person violating any of the provisions of this chapter shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punishable by a fine not to exceed one thousand dollars (\$1,000.00) and/or six months in the county jail, or both. Notwithstanding the foregoing, any violation of the provisions of this chapter may, in the discretion of the citing officer or the city attorney, be cited and/or prosecuted as an infraction or be subject to civil citation pursuant to Chapter [1.10](#).

B. **Joint and Several Responsibility.** In addition to the person causing the offending sound, the owner, tenant or lessee of property, or a manager, overseer or agent, or any other person lawfully entitled to possess the property from which the offending sound is emitted at the time the offending sound is emitted, shall be responsible for compliance with this chapter if the additionally responsible party knows or should have known of the offending noise disturbance. It shall not be a lawful defense to assert that some other person caused the sound. The lawful possessor or operator of the premises shall be responsible for operating or maintaining the premises in compliance with this chapter and may be cited regardless of whether or not the person actually causing the sound is also cited.

C. **Violation May be Declared a Public Nuisance.** The operation or maintenance of any device, equipment, instrument, vehicle or machinery in violation of any provisions of this chapter which endangers the public health, safety and quality of life of residents in the area is declared to be a public nuisance, and may be subject to abatement summarily or by a restraining order or injunction issued

by a court of competent jurisdiction. (Ord. 824 § 1.2, 2011; Ord. 740 § 1.2, 2007)

24-Hour Noise Level Measurement Summary

Date: Wednesday, September 16, 2020
Project: Compass Danbe Centerpointe

Location: L2 - Located east of the Project site by existing Motel 6 at
23581 Alessandro Boulevard.

Meter: Piccolo II

JN: 13661
Analyst: P. Mara

24-Hour Noise Level Measurement Summary

Date: Wednesday, September 16, 2020
Project: Compass Danbe Centerpointe

Location: L5 - Located north of the Project site on Alessandro Boulevard near existing multi-family residential homes at 13933 Chagall Court.

Meter: Piccolo II

JN: 13661
Analyst: P. Mara

1 SUMMARY OF FINDINGS

This report presents the results of the traffic analysis (TA) for the proposed Alessandro Warehouse development (“Project”) located south of Alessandro Boulevard on either side of Chagall Court in the City of Moreno Valley as shown on Exhibit 1-1.

The purpose of this traffic analysis is to evaluate the potential circulation system deficiencies that may result from the development of the proposed Project, to recommend improvements to achieve acceptable circulation system operational conditions, and determine conformance with the General Plan goals and policies. This traffic study has been prepared in accordance with the City of Moreno Valley Transportation Engineering Division’s Traffic Impact Analysis Preparation Guide (June 2020) and consultation with City of Moreno Valley staff during the scoping process. (1) The approved Project Traffic Study Scoping agreement is provided in Appendix 1.1 of this TA.

1.1 SUMMARY OF FINDINGS

The Project is proposing to construct the following improvements as design features in conjunction with development of the site:

- Project to construct Alessandro Boulevard at its ultimate half-section width as a divided major arterial (134-foot right-of-way) between the Project’s western and eastern boundaries in compliance with applicable City of Moreno Valley standards.
- Project to construct Driveway 1, Driveway 2, and Driveway 3 with stop controls for the northbound traffic in order to facilitate site access. All driveways will be restricted to right-in/right-out access only. If receiving lanes are available to the west and east, the third eastbound through lane should also be striped per the ultimate roadway cross-section.
- The Project should modify the existing eastbound left turn pocket at the intersection of Graham Street and Alessandro Boulevard to accommodate a 250-foot left turn lane.

Additional details and intersection lane geometrics are provided in Section 1.6 *Recommended Improvements* of this report.

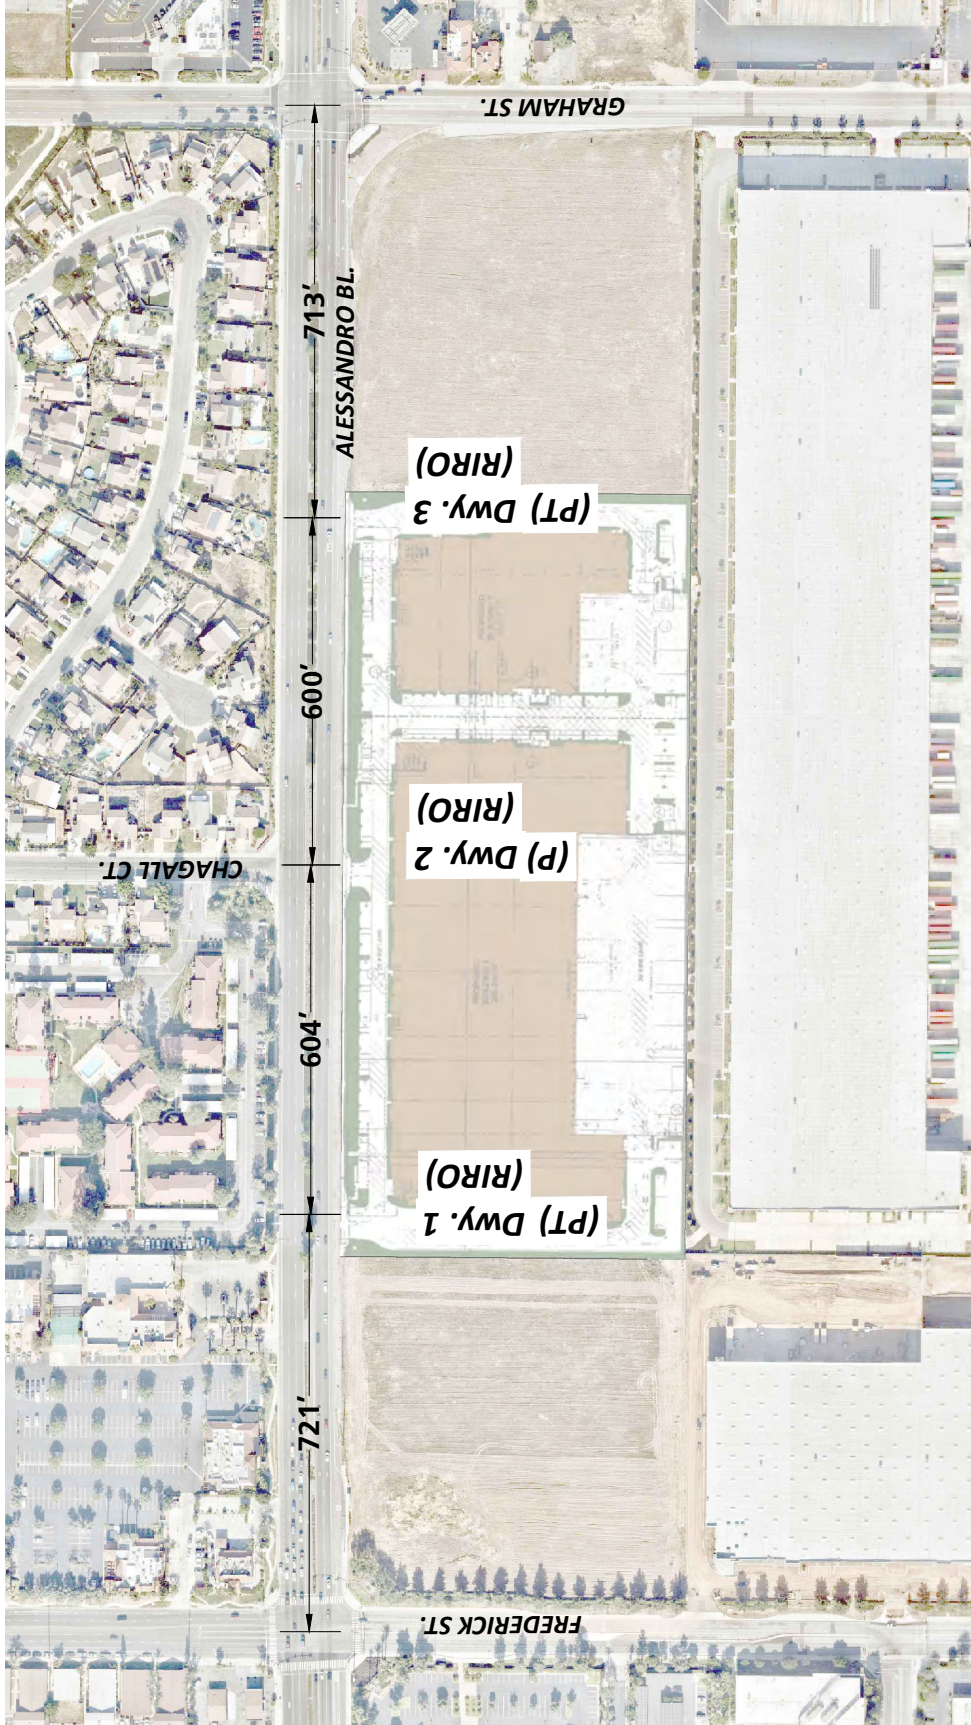

1.2 PROJECT OVERVIEW

In an effort to calculate and evaluate a conservative trip generation for the proposed Project, the following mix of uses have been evaluated for the Project:

- Building 1: 206,665 square feet (sf) of warehousing (70% of total building sf) and 88,571 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 295,236 sf for Building 1
- Building 2: 70,876 sf of warehousing (70% of total building sf) and 30,376 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 101,252 sf for Building 2

The Project will be developed in a single phase and has a projected Opening Year of 2022. Vehicular access will be provided via 3 driveways along Alessandro Boulevard (see Exhibit 1-1). All driveways are proposed to be restricted to right-in/right-out access only.

- P = PASSENGER CARS ONLY
- PT = PASSENGER CARS AND TRUCKS

13276 - siteplan.dwg

Trips generated by the Project's proposed land uses have been estimated based on trip generation rates collected by the Institute of Transportation Engineers (ITE) Trip Generation Manual, 10th Edition, 2017. (2) The Project is estimated to generate a net total of 742 trip-ends per day on a typical weekday with approximately 59 AM peak hour trips and 64 PM peak hour trips (actual vehicles). The assumptions and methods used to estimate the Project's trip generation characteristics are discussed in greater detail in Section 4.1 *Project Trip Generation* of this report.

1.2.1 SITE PLAN DRIVEWAY LOCATIONS

As shown on Exhibit 1-1 and based on the City of Moreno Valley General Plan classification as a Divided Major Arterial, all driveways are anticipated to meet the minimum required driveway spacing of 250-feet between driveways per the City of Moreno Valley Municipal Code (9.11.080-14). However, access at these driveways will be restricted to right-in/right-out access only due to the existing raised median between Frederick Street and Graham Street.

1.3 ANALYSIS SCENARIOS

For the purposes of this traffic study, potential deficiencies to traffic and circulation have been assessed for each of the following conditions:

- Existing (2020)
- Existing plus Ambient Growth plus Project (EAP)

1.3.1 EXISTING (2020) CONDITIONS

Information for Existing (2020) conditions is disclosed to represent the baseline traffic conditions as they existed at the time this report was prepared. Due to the currently ongoing COVID-19 pandemic, schools and businesses within the study area were closed or operating at less than full capacity at the time this study was prepared. As such, historic traffic counts from 2018 were utilized in conjunction with a 4.04% growth factor to reflect 2020 conditions (2% per year, compounded annually).

1.3.2 EAP (2022) CONDITIONS

To account for growth in traffic between Existing (2020) and EAP (2022) traffic conditions, a compounded annual traffic growth rate of 2.0 percent per year compounded annually was assumed (4.04 percent total aggregate growth in background traffic for the period from 2020 through 2022). The 2.0 percent annual growth rate is intended to capture non-specific ambient traffic growth. The purpose of this analysis scenario is to determine if the addition of Project traffic is anticipated to result in any new deficiencies.

1.4 STUDY AREA

To ensure that this TA satisfies the City of Moreno Valley’s traffic study requirements, Urban Crossroads, Inc. prepared a project traffic study scoping package for review by City of Moreno Valley staff prior to the preparation of this report.

The 5 study area intersections shown on Exhibit 1-2 and listed in Table 1-1 were selected for this TA based on the City of Moreno Valley’s Traffic Study Guidelines and in consultation with City of Moreno Valley staff. Pursuant to the Traffic Study Guidelines, the City requires analysis of intersections where the Project would contribute 50 or more peak hour trips.¹ In an effort to conduct a conservative analysis, the trip generation for the proposed Project has been utilized to determine if the 50 peak hour trip criteria has been met at the study area intersections.

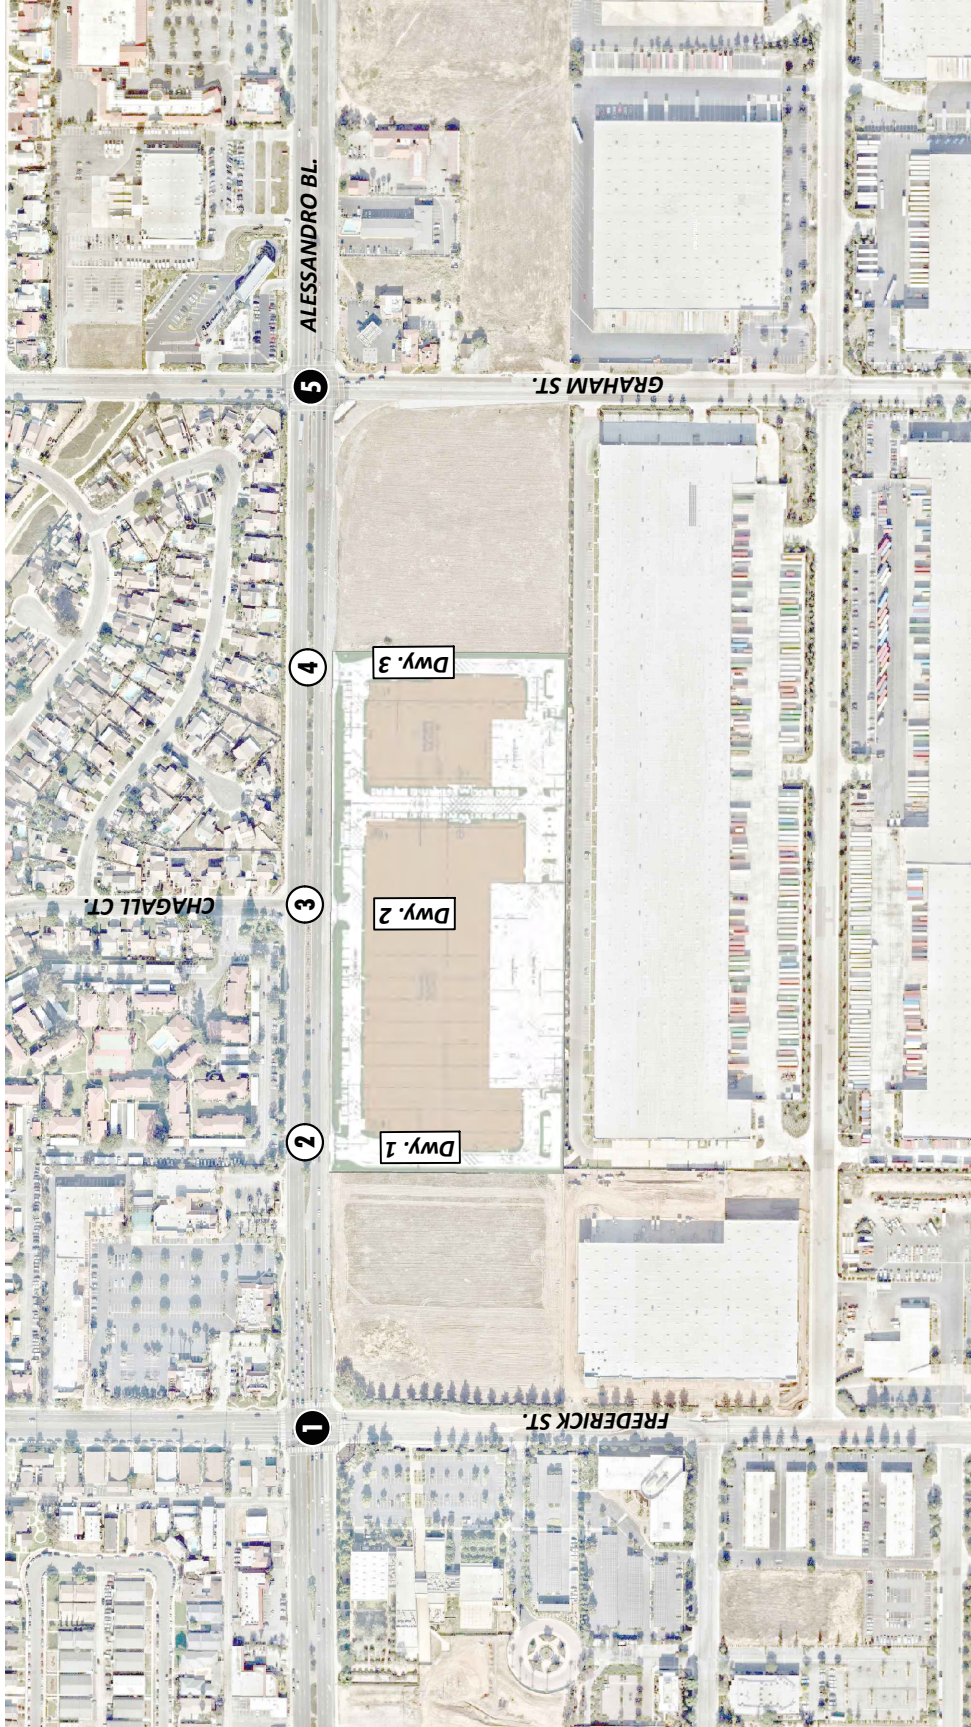

TABLE 1-1: INTERSECTION ANALYSIS LOCATIONS

ID	Intersection Location	Jurisdiction	CMP?
1	Frederick St. & Alessandro Bl.	City of Moreno Valley	No
2	Driveway 1 & Alessandro Bl. – Future Intersection	City of Moreno Valley	No
3	Driveway 2 & Alessandro Bl. – Future Intersection	City of Moreno Valley	No
4	Driveway 3 & Alessandro Bl. – Future Intersection	City of Moreno Valley	No
5	Graham St. & Alessandro Bl.	City of Moreno Valley	No

The intent of a Congestion Management Program (CMP) is to more directly link land use, transportation, and air quality, thereby prompting reasonable growth management programs that will effectively utilize new transportation funds, alleviate traffic congestion and related deficiencies, and improve air quality. Counties within California have developed CMPs with varying methods and strategies to meet the intent of the CMP legislation. The County of Riverside CMP became effective with the passage of Proposition 111 in 1990 and updated most recently in 2011. The Riverside County Transportation Commission (RCTC) adopted the 2011 CMP for the County of Riverside in December 2011. (3) There are no CMP intersections in this study area.

¹ The “50 or more peak hour trips” intersection analytic protocol stipulated in the City’s Traffic Study Guidelines is consistent with standard industry practice. It is noted further that the 50 peak hour trip threshold is employed by other agencies throughout Southern California including the County of Riverside, County of San Bernardino, and the County of Orange.

13276 - locmap.dwg

1.5 ANALYSIS FINDINGS

This section provides a summary of analysis findings. Section 2 *Methodologies* provides information on the methodologies used in the analysis and Section 5 *EAP (2022) Traffic Analysis* includes the detailed analysis. A summary of LOS results for all analysis scenarios is presented on Exhibit 1-3. Based on a comparison of Existing to EAP (2022) traffic conditions, the addition of Project traffic is not anticipated result in any deficiencies at the study area intersections. All study area intersections are anticipated to continue to operate at acceptable levels and no improvements are necessary for EAP (2022) traffic conditions.

1.6 RECOMMENDED IMPROVEMENTS

1.6.1 SITE ADJACENT ROADWAY IMPROVEMENTS

The recommended site-adjacent roadway improvements for the Project are described below. Exhibit 1-4 illustrates the site-adjacent roadway improvement recommendations.

Alessandro Boulevard – Alessandro Boulevard is an east-west oriented roadway located along the Project’s northern boundary. Construct Alessandro Boulevard at its ultimate half-section width as a Divided Major Arterial (134-foot right-of-way) between the Project’s western boundary and the Project’s eastern boundary in compliance with applicable City of Moreno Valley standards.

On-site traffic signing and striping should be implemented in conjunction with detailed construction plans for the Project site.

Sight distance at each project access point should be reviewed with respect to standard Caltrans and City of Moreno Valley sight distance standards at the time of preparation of final grading, landscape and street improvement plans.

EXHIBIT 1-3: SUMMARY OF LOS

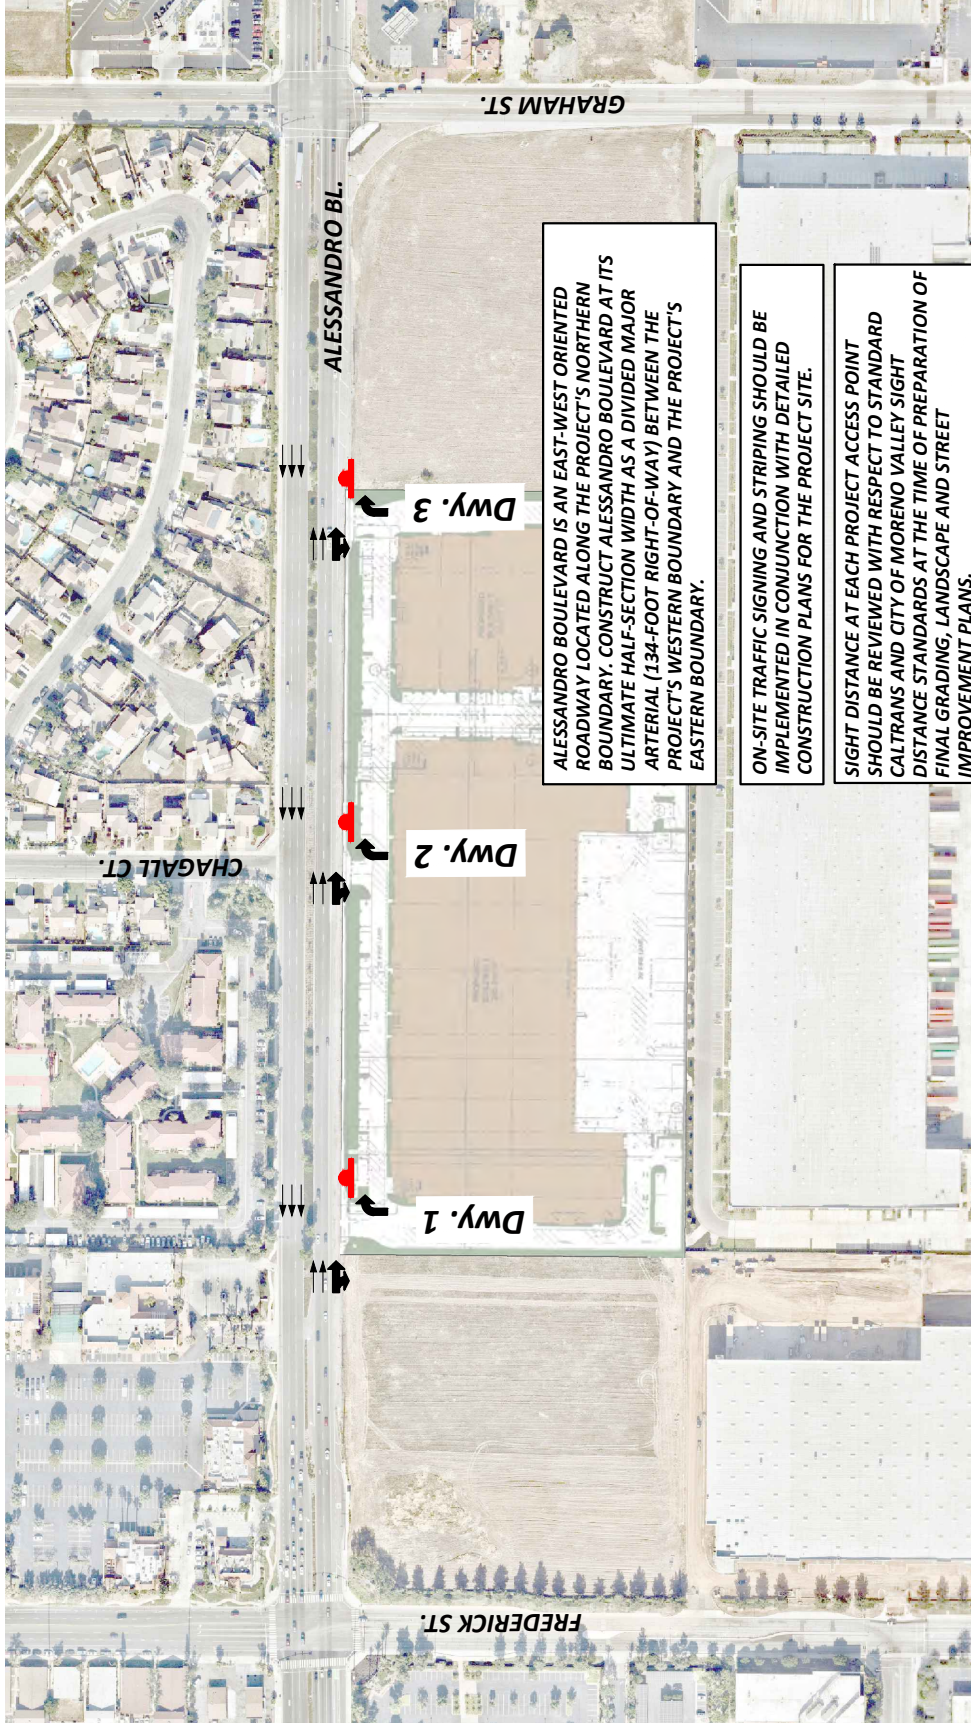

#	Intersection	Existing (2020)	EAP (2022)
1	Frederick St. & Alessandro Bl.		
2	Dwy. 1 & Alessandro Bl.	NA	
3	Dwy. 2 & Alessandro Bl.	NA	
4	Dwy. 3 & Alessandro Bl.	NA

- = LANE IMPROVEMENT

13276 - recs.dwg

1.6.2 SITE ACCESS IMPROVEMENTS

The recommended site access driveway improvements for the Project are described below. Exhibit 1-4 also illustrates the site access improvements. Construction of on-site and site adjacent improvements shall occur in conjunction with adjacent Project development activity or as needed for Project access purposes.

Driveway 1, Driveway 2, and Driveway 3 on Alessandro Boulevard – Install a stop control on the northbound approach and construct the intersection with the following geometrics:

- Northbound Approach: One right turn lane.
- Southbound Approach: Not Applicable (N/A)
- Eastbound Approach: Two through lanes and one shared through-right turn lane. 3rd shared through-right turn lane should be accommodated if the receiving lanes are in place on either side of the project between Frederick Street and Graham Street.
- Westbound Approach: Three through lanes.

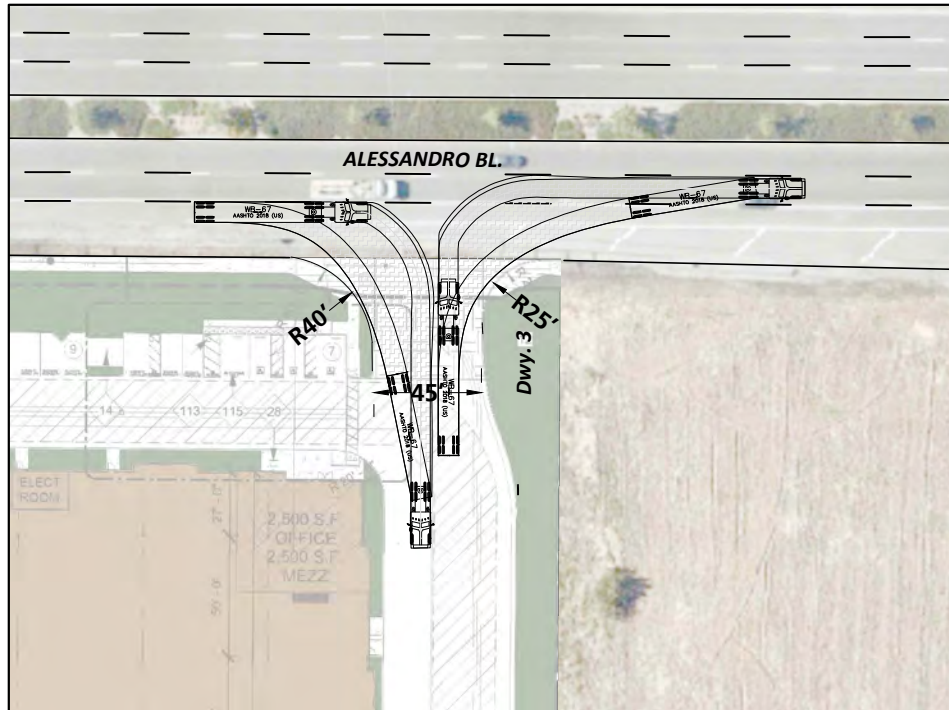

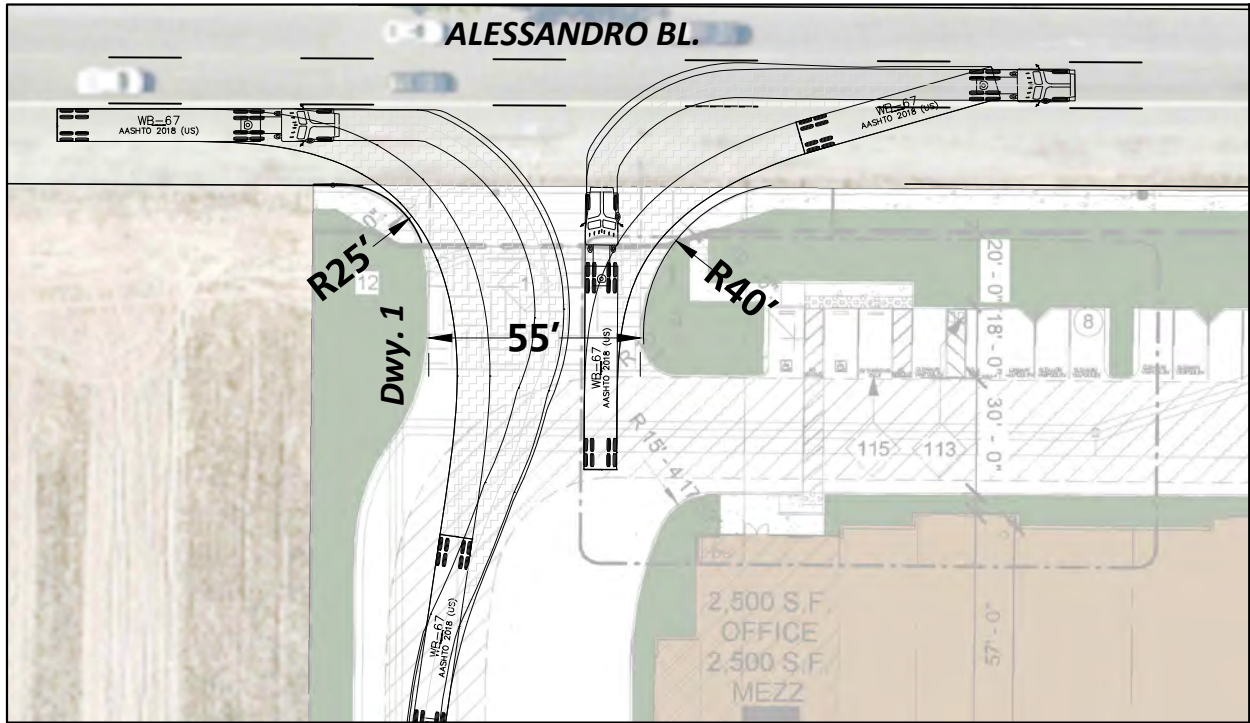

Graham Street at Alessandro Boulevard – A queueing analysis has been evaluated during the morning and evening peak hours at the intersection of Graham Street and Alessandro Boulevard to determine if there is sufficient stacking in the northbound and eastbound left turn pockets to accommodate Project traffic. The northbound left turn lane on Graham Street provides 185-feet of stacking while the eastbound left turn lane on Alessandro Boulevard provides 150-feet of stacking. Based on the queueing analysis, the existing northbound left turn pocket is anticipated to accommodate the 95th percentile peak hour queues under EAP (2022) traffic conditions with at most 105-feet of stacking required during the PM peak hour. The Project should modify the existing eastbound left turn pocket at the intersection of Graham Street and Alessandro Boulevard to accommodate a 250-foot left turn lane.

Wherever necessary, roadways adjacent to the Project, site access points and site-adjacent intersections will be constructed to be consistent with the identified roadway classifications and respective cross-sections in the City of Moreno Valley General Plan Circulation Element.

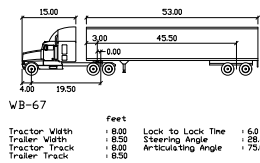

1.7 TRUCK ACCESS AND CIRCULATION

Due to the typical wide turning radius of large trucks, a truck turning template has been overlaid on the site plan at each applicable Project driveway and site adjacent intersection anticipated to be utilized by heavy trucks in order to determine appropriate curb radii and to verify that trucks will have sufficient space to execute turning maneuvers (see Exhibit 1-5). As shown, Driveway 1 and Driveway 3 on Alessandro Boulevard are anticipated to accommodate the wide turning radius of heavy trucks as currently designed.

2 METHODOLOGIES

This section of the report presents the methodologies used to perform the traffic analyses summarized in this report. The methodologies described are consistent with City of Moreno Valley's traffic study guidelines for LOS-based traffic operations analysis. (1)

2.1 LEVEL OF SERVICE

Traffic operations of roadway facilities are described using the term "Level of Service" (LOS). LOS is a qualitative description of traffic flow based on several factors such as speed, travel time, delay, and freedom to maneuver. Six levels are typically defined ranging from LOS A, representing completely free-flow conditions, to LOS F, representing breakdown in flow resulting in stop-and-go conditions. LOS E represents operations at or near capacity, an unstable level where vehicles are operating with the minimum spacing for maintaining uniform flow.

2.2 INTERSECTION CAPACITY ANALYSIS

The definitions of LOS for interrupted traffic flow (flow restrained by the existence of traffic signals and other traffic control devices) differ slightly depending on the type of traffic control. The LOS is typically dependent on the quality of traffic flow at the intersections along a roadway. The Highway Capacity Manual (HCM) methodology expresses the LOS at an intersection in terms of delay time for the various intersection approaches. (4) The HCM uses different procedures depending on the type of intersection control.

2.2.1 SIGNALIZED INTERSECTIONS

The City of Moreno Valley requires signalized intersection operations analysis based on the methodology described in the HCM. (4) Intersection LOS operations are based on an intersection's average control delay. Control delay includes initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay. For signalized intersections, LOS is directly related to the average control delay per vehicle and is correlated to a LOS designation as described in Table 2-1. Study area intersections have been evaluated using the Synchro (Version 10) analysis software package.

Synchro is a macroscopic traffic software program that is based on the signalized intersection capacity analysis as specified in the HCM. Macroscopic level models represent traffic in terms of aggregate measures for each movement at the study intersections. Equations are used to determine measures of effectiveness such as delay and queue length. The level of service and capacity analysis performed by Synchro takes into consideration optimization and coordination of signalized intersections within a network.

TABLE 2-1: SIGNALIZED INTERSECTION LOS THRESHOLDS

Description	Average Control Delay (Seconds), V/C ≤ 1.0	Level of Service, V/C ≤ 1.0	Level of Service, V/C > 1.0
Operations with very low delay occurring with favorable progression and/or short cycle length.	0 to 10.00	A	F
Operations with low delay occurring with good progression and/or short cycle lengths.	10.01 to 20.00	B	F
Operations with average delays resulting from fair progression and/or longer cycle lengths. Individual cycle failures begin to appear.	20.01 to 35.00	C	F
Operations with longer delays due to a combination of unfavorable progression, long cycle lengths, or high V/C ratios. Many vehicles stop and individual cycle failures are noticeable.	35.01 to 55.00	D	F
Operations with high delay values indicating poor progression, long cycle lengths, and high V/C ratios. Individual cycle failures are frequent occurrences. This is considered to be the limit of acceptable delay.	55.01 to 80.00	E	F
Operation with delays unacceptable to most drivers occurring due to over saturation, poor progression, or very long cycle lengths	80.01 and up	F	F

Source: HCM 6th Edition

The peak hour traffic volumes have been adjusted using a peak hour factor (PHF) to reflect peak 15-minute volumes. Common practice for LOS analysis is to use a peak 15-minute rate of flow. However, flow rates are typically expressed in vehicles per hour. The PHF is the relationship between the peak 15-minute flow rate and the full hourly volume (e.g. $PHF = \frac{\text{Hourly Volume}}{4 \times \text{Peak 15-minute Flow Rate}}$). The use of a 15-minute PHF produces a more detailed analysis as compared to analyzing vehicles per hour. Existing PHFs have been used for all analysis scenarios. Per the HCM, PHF values over 0.95 often are indicative of high traffic volumes with capacity constraints on peak hour flows, while lower PHF values are indicative of greater variability of flow during the peak hour. (4)

2.2.2 UNSIGNALIZED INTERSECTIONS

The City of Moreno Valley requires the operations of unsignalized intersections be evaluated using the methodology described in the HCM. (4) The LOS rating is based on the weighted average control delay expressed in seconds per vehicle (see Table 2-2).

TABLE 2-2: UNSIGNALIZED INTERSECTION LOS THRESHOLDS

Description	Average Control Delay Per Vehicle (Seconds)	Level of Service, V/C ≤ 1.0	Level of Service, V/C > 1.0
Little or no delays.	0 to 10.00	A	F
Short traffic delays.	10.01 to 15.00	B	F
Average traffic delays.	15.01 to 25.00	C	F
Long traffic delays.	25.01 to 35.00	D	F
Very long traffic delays.	35.01 to 50.00	E	F
Extreme traffic delays with intersection capacity exceeded.	> 50.00	F	F

Source: HCM 6th Edition

At two-way or side-street stop-controlled intersections, LOS is calculated for each controlled movement and for the left turn movement from the major street, as well as for the intersection as a whole. For approaches composed of a single lane, the delay is computed as the average of all movements in that lane. For all-way stop controlled intersections, LOS is computed for the intersection as a whole.

2.3 TRAFFIC SIGNAL WARRANT ANALYSIS METHODOLOGY

The term "signal warrants" refers to the list of established criteria used by the California Department of Transportation (Caltrans) and other public agencies to quantitatively justify or ascertain the potential need for installation of a traffic signal at an otherwise unsignalized intersection. The existing intersections are currently signalized and with the proposed access restrictions, the driveway locations would not be suitable for the implementation of a traffic signal. As such, no traffic signal warrant analysis has been prepared for this TA.

2.4 MINIMUM LEVEL OF SERVICE (LOS)

The definition of an intersection deficiency in the City of Moreno Valley is based on the City of Moreno Valley General Plan Circulation Element. The City of Moreno Valley General Plan states that target LOS C or LOS D be maintained along City roads (including intersections) wherever possible. Exhibit 2-1 depicts the level of service standards within the City. LOS D is applicable to intersections and roadway segments that are adjacent to freeway on/off ramps and/or adjacent to employment generating land uses. LOS C is applicable to all other intersections and roadway segments. Boundary intersections are assumed to be LOS D.

2.5 THRESHOLDS OF SIGNIFICANCE

This section outlines the methodology used in this analysis related to identifying circulation system deficiencies.

2.5.1 SIGNALIZED INTERSECTIONS

Per the City of Moreno Valley TA Guidelines, the following LOS will be utilized for signalized study area intersections:

- Any signalized study intersection operating at acceptable LOS without project traffic in which the addition of project traffic causes the intersection to degrade to unacceptable LOS shall identify improvements to provide acceptable LOS.
- Any signalized study intersection that is operating at unacceptable LOS without project traffic where the project increases delay by 5.0 or more seconds shall identify improvements to offset the increase in delay.

2.5.2 UNSIGNALIZED INTERSECTIONS

Per the City of Moreno Valley TA Guidelines, the following LOS will be utilized for unsignalized study area intersections:

- a) The addition of project related traffic causes the intersection to degrade from an acceptable LOS to unacceptable LOS.
OR
- b) The project adds 5.0 seconds or more of delay to an intersection that is already projected to operate without project traffic at unacceptable LOS,
AND
- c) The intersection meets the peak hour traffic signal warrant after the addition of project traffic.

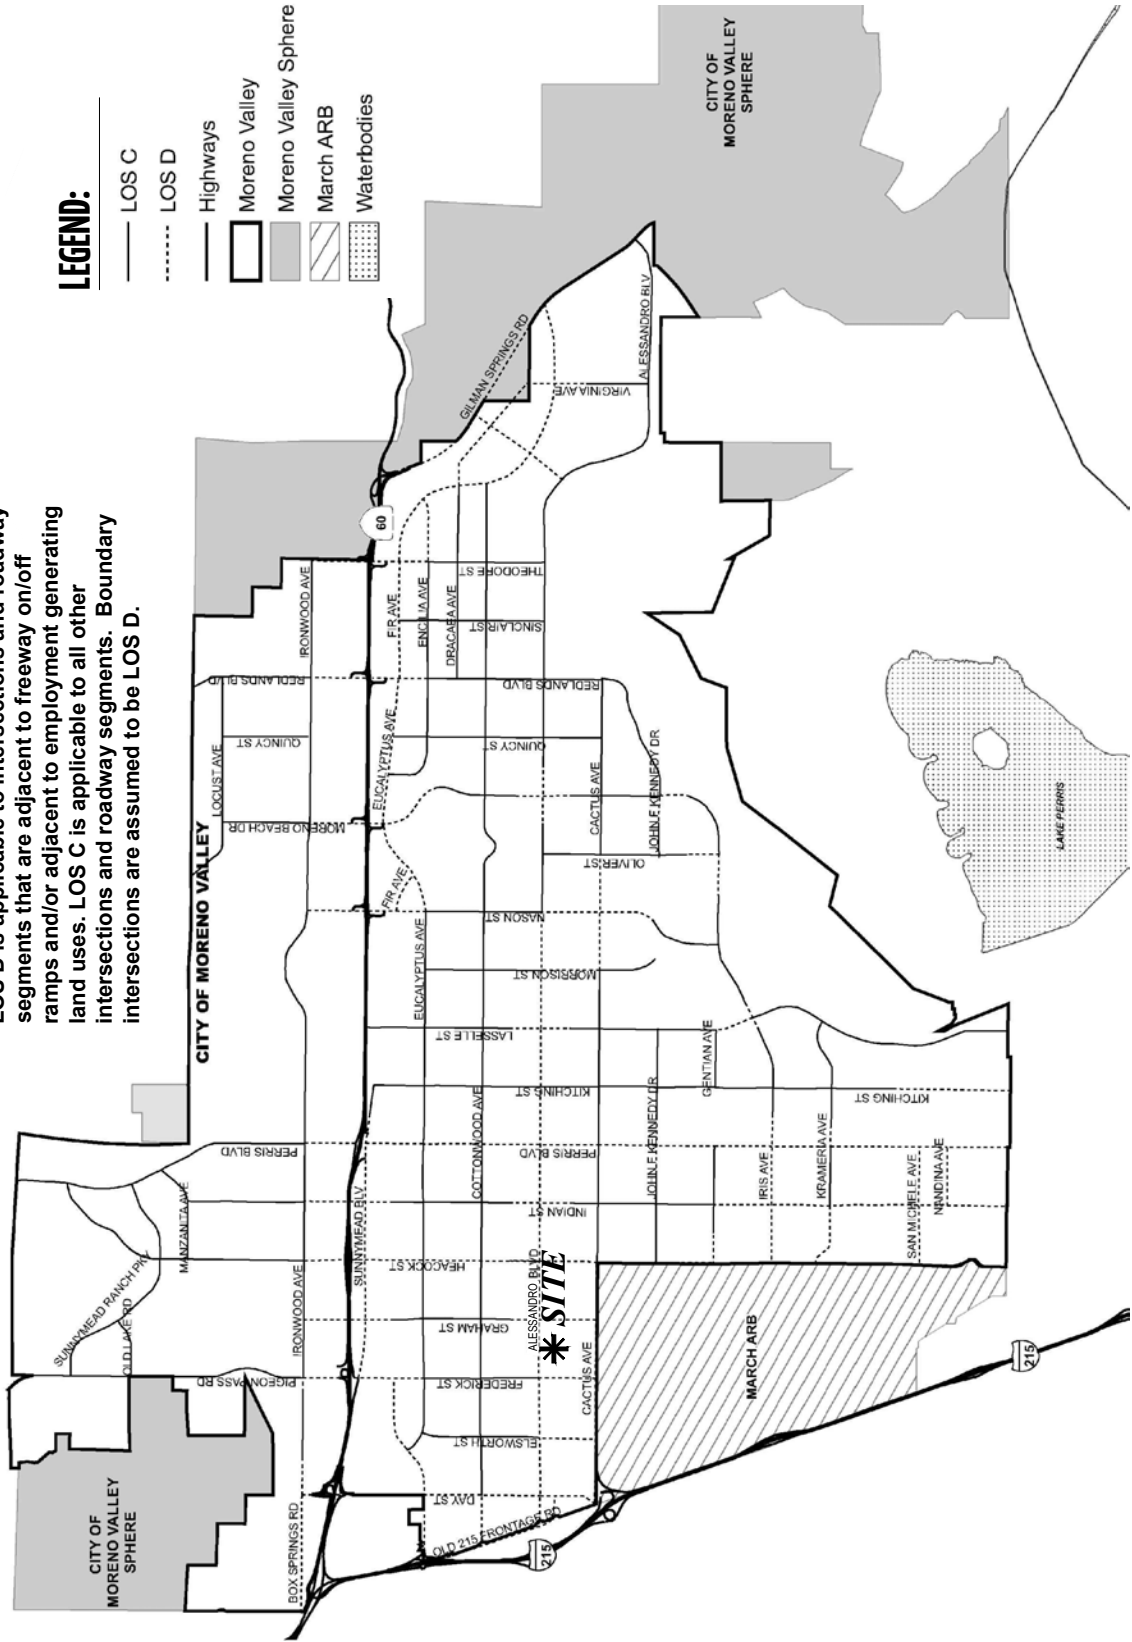

The proposed significance thresholds will be applied at study area intersections for the purposes of determining project-related impacts. If the conditions above are satisfied, improvements should be identified that achieve LOS D or better for a) above or to pre-project LOS and delay for case b) above.

EXHIBIT 2-1: CITY OF MORENO VALLEY LEVEL OF SERVICE (LOS) STANDARDS

LOS D is applicable to intersections and roadway segments that are adjacent to freeway on/off ramps and/or adjacent to employment generating land uses. LOS C is applicable to all other intersections and roadway segments. Boundary intersections are assumed to be LOS D.

3 AREA CONDITIONS

This section provides a summary of the existing circulation network, the City of Moreno Valley General Plan Circulation Network, and a review of existing peak hour intersection operations analysis.

3.1 EXISTING CIRCULATION NETWORK

Pursuant to the scoping agreement with City of Moreno Valley staff (Appendix 1.1), the study area includes a total of 5 existing and future intersections as shown previously on Exhibit 1-2. Exhibit 3-1 illustrates the study area intersections located near the proposed Project and identifies the number of through traffic lanes for existing roadways and intersection traffic controls.

3.2 CITY OF MORENO VALLEY GENERAL PLAN CIRCULATION ELEMENT

The roadway classifications and planned (ultimate) roadway cross-sections of the major roadways within the study area, as identified on the City of Moreno Valley General Plan Circulation Element, are described subsequently. Exhibit 3-2 shows the City of Moreno Valley General Plan Circulation Element and Exhibit 3-3 illustrates the City of Moreno Valley General Plan roadway cross-sections.

Divided Major Arterials can accommodate six travel lanes. These facilities typically provide access between the regional highway system and minor arterials. An example of a Divided Arterial within the study area includes:

- Alessandro Boulevard

Arterials can accommodate four travel lanes (with a 20-foot outer lane in each direction of travel). These facilities typically provide access between divided arterials and collector streets. An example of an Arterial within the study area includes:

- Frederick Street, north of Alessandro Boulevard

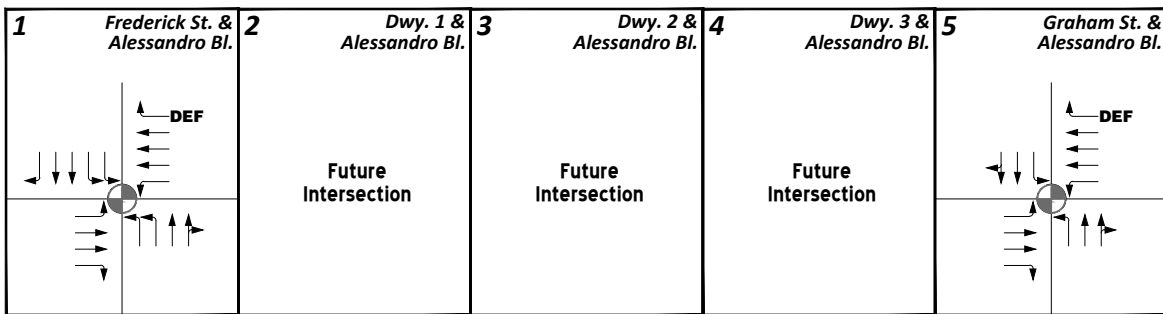

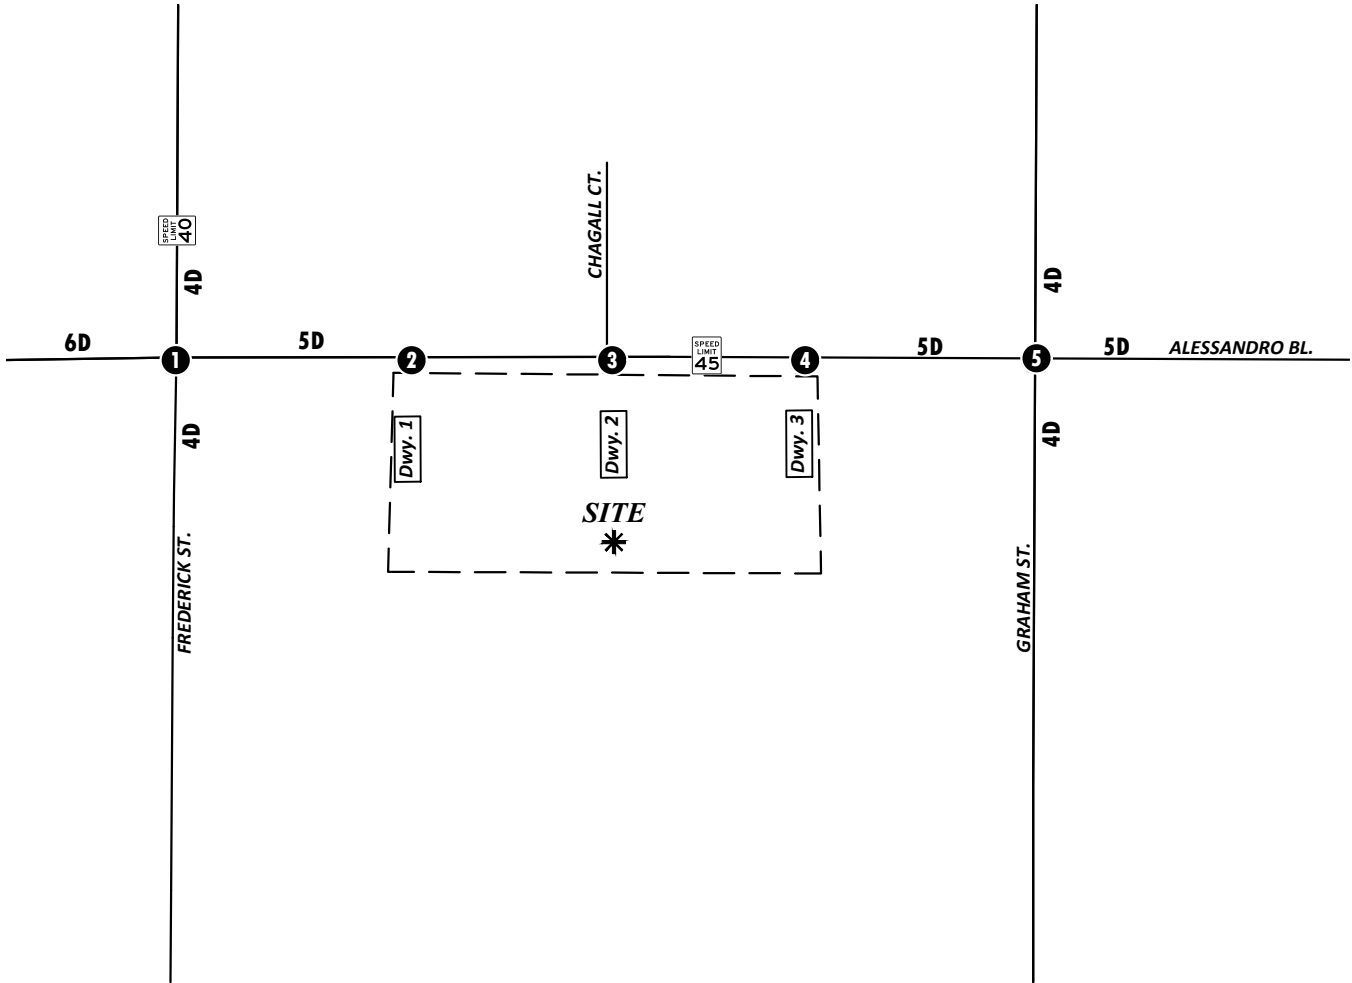

Minor Arterials can accommodate four travel lanes. These facilities typically provide access between divided arterials and collector streets. Examples of Minor Arterials within the study area includes:

- Frederick Street, south of Alessandro Boulevard
- Graham Street

3.3 TRUCK ROUTES

The City of Moreno Valley designated truck route map is shown on Exhibit 3-4. As shown on Exhibit 3-4, Alessandro Boulevard, Frederick Street, and Graham Street (between Alessandro Boulevard and Cactus Avenue only) are designated truck routes within the study area in City of Moreno Valley. The designated truck route map has been utilized to route truck traffic for Project trips throughout the study area.

3.4 TRANSIT SERVICE

The study area is currently served by the Riverside Transit Authority (RTA), a public transit agency serving the unincorporated Riverside County region. As shown on Exhibit 3-5, RTA Route 20 serves Alessandro Boulevard within the study area and would likely serve the Project site. There are existing bus stops on south side at Frederick Street, Chagall Court, and Graham Street along Alessandro Boulevard. RTA Route 11 also serves the study area and runs along Frederick Street. Transit service is reviewed and updated by RTA periodically to address ridership, budget, and community demands. Changes in land use can affect these periodic adjustments which may lead to either enhanced or reduced service where appropriate.

3.5 BICYCLE & PEDESTRIAN FACILITIES

Exhibit 3-6 illustrates the existing pedestrian facilities, including sidewalks and crosswalk locations. Bus stop locations are also identified, which are on both the north and south sides of Alessandro Boulevard at Frederick Street, Chagall Court, and Graham Street. Both intersections on Alessandro Boulevard at Frederick Street and Graham Street have crosswalks on all approaches. Alessandro Boulevard is currently striped with Class II (on-street) bike lanes. Sidewalks are in place along most of the study area roadways and intersections, with most of the southern side of Alessandro Boulevard between Frederick Street and Graham Street and also along the west side of Graham Street south of Alessandro Boulevard.

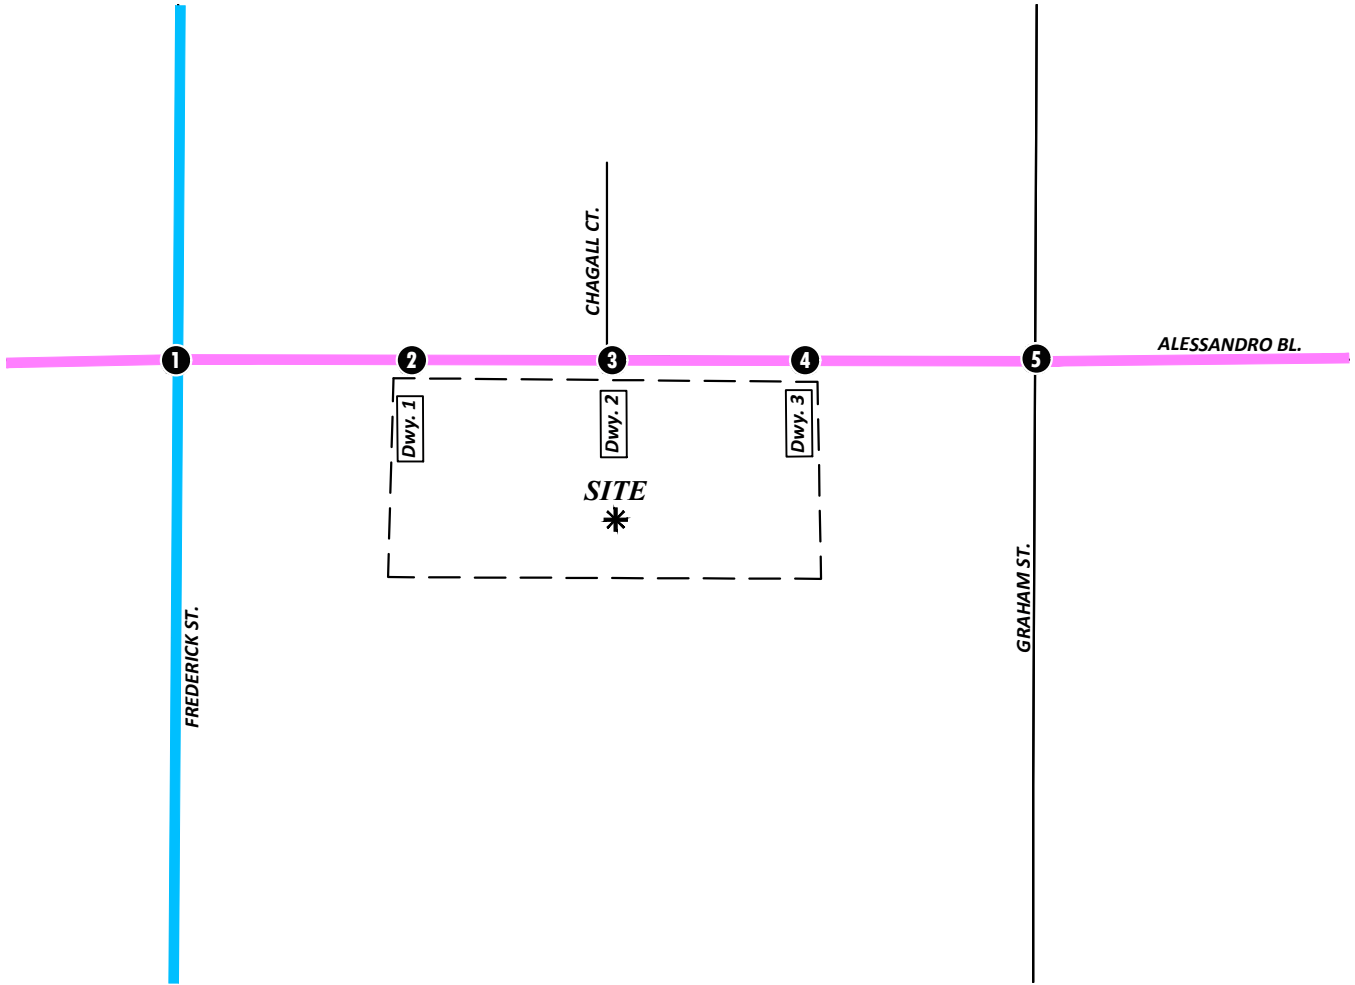

3.6 EXISTING (2020) TRAFFIC COUNTS

The intersection LOS analysis is based on the traffic volumes observed during the peak hour conditions using traffic count data collected in April and May of 2018. The following peak hours were selected for analysis:

- Weekday AM Peak Hour (peak hour between 7:00 AM and 9:00 AM)
- Weekday PM Peak Hour (peak hour between 4:00 PM and 6:00 PM)

Due to the currently ongoing COVID-19 pandemic, schools and businesses within the study area were closed or operating at less than full capacity at the time this study was prepared. As such, historic (2018) traffic counts were utilized in conjunction with a 4.04% growth factor to reflect 2020 conditions (2% per year, compounded annually). The 2018 weekday AM and weekday PM peak hour count data is representative of typical weekday peak hour traffic conditions in the study area. There were no observations made in the field that would indicate atypical traffic conditions on the count dates, such as construction activity or detour routes and near-by schools were in session and operating on normal schedules. The raw manual peak hour turning movement traffic count data sheets are included in Appendix 3.1.

13276 - peds.dwg

The traffic counts collected in April and May of 2018 include the following vehicle classifications: Passenger Cars, 2-Axle Trucks, 3-Axle Trucks, and 4 or More Axle Trucks. To represent the effects large trucks, buses and recreational vehicles have on traffic flow; all trucks were converted into passenger car equivalent (PCE). By their size alone, these vehicles occupy the same space as two or more passenger cars. In addition, the time it takes for them to accelerate and slow-down is much longer than for passenger cars and varies depending on the type of vehicle and number of axles. For the purpose of this analysis, a PCE factor of 1.5 has been applied to 2-axle trucks, 2.0 for 3-axle trucks, and 3.0 for 4+-axle trucks to estimate each turning movement. These factors are consistent with the City's traffic study guidelines.

Existing weekday ADT volumes are shown on Exhibit 3-7. Consistent with other projects in the area, Existing ADT volumes were based upon factored intersection peak hour counts collected by Urban Crossroads, Inc. using the following formula for each intersection leg:

$$\text{Weekday PM Peak Hour (Approach Volume + Exit Volume)} \times 14.32 = \text{Leg Volume}$$

A comparison of the PM peak hour and daily traffic volumes of various roadway segments within the study area indicated that the peak-to-daily relationship is approximately 6.98 percent. As such, the above equation utilizing a factor of 10.08 estimates the ADT volumes on the study area roadway segments assuming a peak-to-daily relationship of approximately 6.98 percent (i.e., $1/0.0698 = 14.32$) and was assumed to sufficiently estimate average daily traffic (ADT) volumes for planning-level analyses. Existing weekday AM and weekday PM peak hour intersection volumes (in PCE) are also shown on Exhibit 3-7.

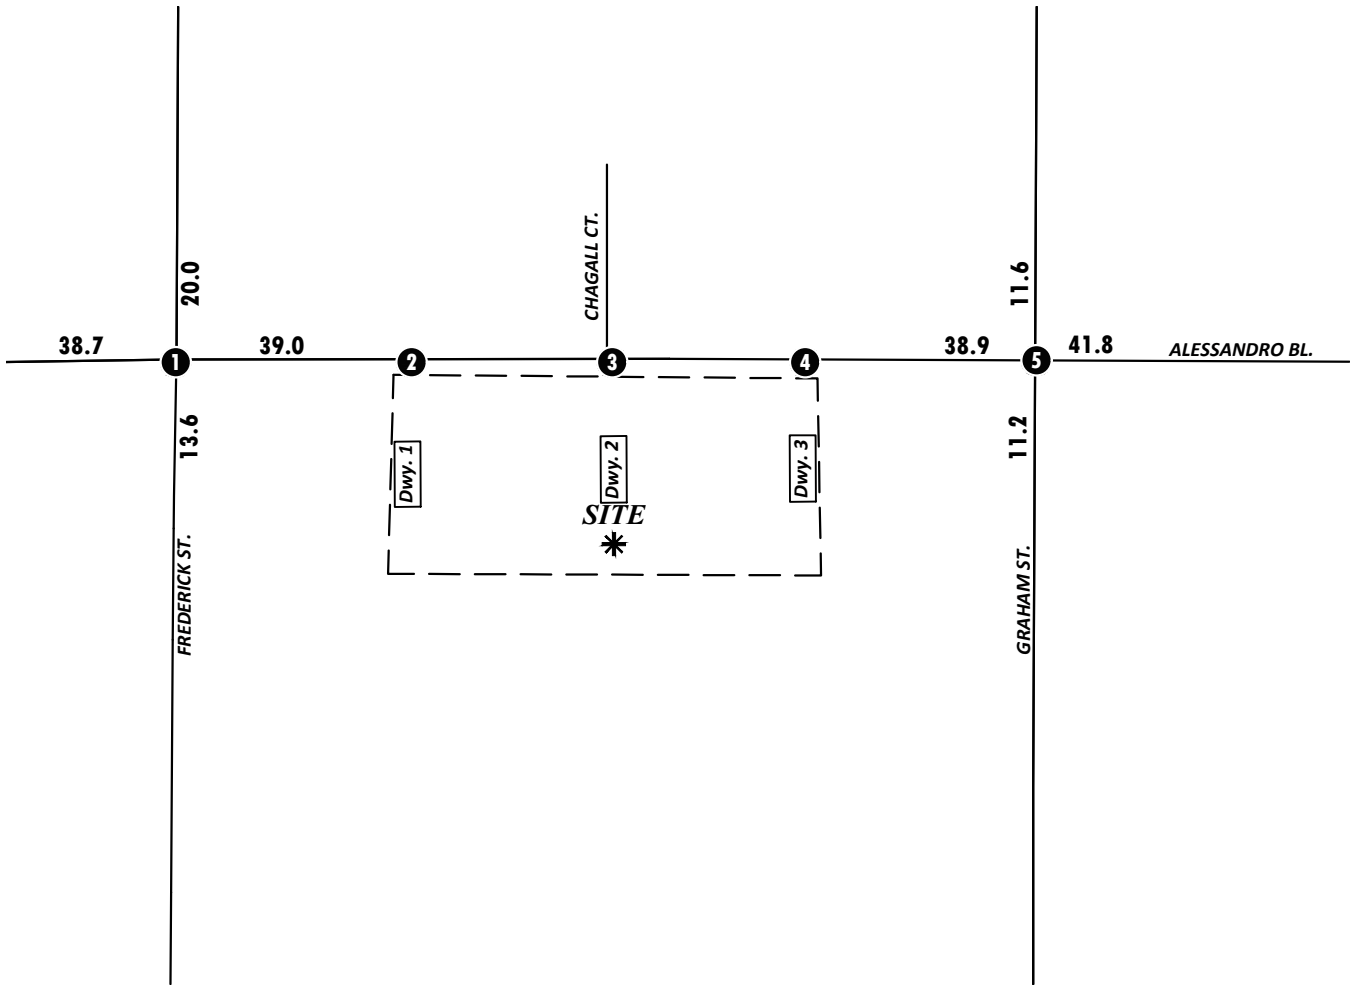

3.7 INTERSECTION OPERATIONS ANALYSIS

Existing peak hour traffic operations have been evaluated for the study area intersections based on the analysis methodologies presented in Section 2.2 *Intersection Capacity Analysis* of this report. The intersection operations analysis results are summarized in Table 3-1 which indicates that the existing study area intersections are currently operating at an acceptable LOS during the peak hours. Consistent with Table 3-1, a summary of the peak hour intersection LOS for Existing conditions is shown on Exhibit 3-8. The intersection operations analysis worksheets are included in Appendix 3.2 of this TA.

3.8 RECOMMENDED IMPROVEMENTS

All study area intersections are currently operating at an acceptable LOS for Existing (2020) traffic conditions. As such, no improvements have been recommended.

4 PROJECTED FUTURE TRAFFIC

This section presents the traffic volumes estimated to be generated by the Project, as well as the Project's trip assignment onto the study area roadway network. In an effort to calculate and evaluate a conservative trip generation for the proposed Project, the following mix of uses have been evaluated for the Project:

- Building 1: 206,665 sf of warehousing (70% of total building sf) and 88,571 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 295,236 sf for Building 1
- Building 2: 70,876 sf of warehousing (70% of total building sf) and 30,376 sf of high-cube cold storage warehouse use (30% of total building sf) for a total of 101,252 sf for Building 2

The Project will be developed in a single phase and has a projected Opening Year of 2022. Vehicular access will be provided via 3 driveways along Alessandro Boulevard. All driveways are proposed to be restricted to right-in/right-out access only. Regional access to the Project site is available from the I-215 Freeway via Alessandro Boulevard and Cactus Avenue interchanges. Frederick Street to the north also provides access to the SR-60 Freeway.

4.1 PROJECT TRIP GENERATION

Trip generation represents the amount of traffic that is attracted and produced by a development and is based upon the specific land uses planned for a given project. Trip generation rates (in actual vehicles and PCE) for the Project are shown in Table 4-1. The Project's trip generation has been calculated using the Institute of Transportation Engineers (ITE) Trip Generation Manual, 10th Edition, 2017, for the following land uses. (2)

- ITE land use code 150 (Warehousing) has been used to derive site specific trip generation estimates for up to 277,541 sf (70% of Buildings 1 and 2). The vehicle mix has been obtained from the ITE's Trip Generation Manual Supplement (dated February 2020). (5) This study provides the following vehicle mix: AM Peak Hour: 87.0% passenger cars and 13.0% trucks; PM Peak Hour: 85.0% passenger cars and 15.0% trucks; Weekday Daily: 73.0% passenger cars and 27.0% trucks. The truck percentages were further broken down by axle type per the following South Coast Air Quality Management District (SCAQMD) recommended truck mix: 2-Axle = 16.7%; 3-Axle = 20.7%; 4+-Axle = 62.6%. (6)
- ITE land use code 157 (High-Cube Cold Storage Warehouse) has been used to derive site specific trip generation estimates for up to 118,947 sf (30% of Buildings 1 and 2). High-cube cold storage warehouses include warehouses characterized by the storage and/or consolidation of manufactured goods (and to a lesser extent, raw materials) prior to their distribution to retail locations or other warehouses. High-cube cold storage warehouses are facilities typified by temperature-controlled environments for frozen food or other perishable products. The High-Cube Cold Storage Warehouse vehicle mix (passenger cars versus trucks) has been obtained from the ITE's Trip Generation Manual Supplement (dated February 2020). (5) This study provides the following vehicle mix: AM Peak Hour: 73.0% passenger cars and 27.0% trucks; PM Peak Hour: 77.0% passenger cars and 23.0% trucks; Weekday Daily: 65.0% passenger cars and 35.0% trucks. The truck percentages were further broken down by axle type per the following SCAQMD recommended truck mix: 2-Axle = 34.7%; 3-Axle = 11.0%; 4+-Axle = 54.3%. (6)

¹ Trip Generation Source: Institute of Transportation Engineers (ITE), Trip Generation Manual, Tenth Edition (2017).

² TSF = thousand square feet

³ Vehicle Mix Source: ITE Trip Generation Handbook Supplement (2020), Appendix C.

Truck Mix: South Coast Air Quality Management District's (SCAQMD) recommended truck mix, by axle type.

Normalized % - Without Cold Storage: 16.7% 2-Axle trucks, 20.7% 3-Axle trucks, 62.6% 4-Axle trucks.

Normalized % - With Cold Storage: 34.7% 2-Axle trucks, 11.0% 3-Axle trucks, 54.3% 4-Axle trucks.

⁴ PCE factors per City of Moreno Valley's TIA Guidelines: 2-axle = 1.5; 3-axle = 2.0; 4+-axle = 3.0.

PCE factors were applied to the trip generation rates for heavy trucks (large 2-axles, 3-axles, 4+-axles). PCEs allow the typical “real-world” mix of vehicle types to be represented as a single, standardized unit, such as the passenger car, to be used for the purposes of capacity and level of service analyses. The PCE factors are consistent with the recommended PCE factors in the City’s traffic study guidelines.

The trip generation summary illustrating daily, and peak hour trip generation estimates for the proposed Project in actual vehicles and PCE are shown in Table 4-2 and Table 4-3, respectively. The proposed Project is anticipated to generate 742 vehicle trip-ends per day with 59 AM peak hour trips and 64 PM peak hour trips (of which 224 trip-ends per day are associated with trucks with 8 AM peak hour truck trips and 9 PM peak hour truck trips) (see Table 4-2). The operations analyses utilize the PCE trip generation consistent with the City’s traffic study guidelines.

The site is currently zoned for commercial retail use (0.25 floor to area ratio which would allow 192,426 square feet of commercial retail use on 17.67 acres). As shown on Table 4-4, the proposed Project General Plan Amendment (light industrial) is anticipated to result in a reduction in trips as compared to the currently adopted General Plan Land Use (commercial).

4.2 PROJECT TRIP DISTRIBUTION

Trip distribution is the process of identifying the probable destinations, directions, or traffic routes that will be utilized by Project traffic. The potential interaction between the planned land uses and surrounding regional access routes are considered to identify the route where the Project traffic would distribute.

The Project trip distribution was developed based on anticipated travel patterns to and from the Project site for both passenger cars and truck traffic and are consistent with other similar projects that have been reviewed and approved by City of Moreno Valley staff. The Project trip distribution patterns for both passenger cars and trucks were developed based on an understanding of existing travel patterns in the area, the geographical location of the site, and the site’s proximity to the regional arterial and state highway system.

The Project passenger car trip distribution pattern is graphically depicted on Exhibit 4-1, while the Project truck trip distribution pattern is graphically depicted on Exhibit 4-2. Each of these distribution patterns was reviewed by the City of Moreno Valley as part of the traffic study scoping process (see Appendix 1.1).

4.3 MODAL SPLIT

The traffic reducing potential of public transit, walking, or bicycling have not been considered in this TA. Essentially, the traffic projections are "conservative" in that these alternative travel modes might be able to reduce the forecasted traffic volumes (employee trips only).

4.4 PROJECT TRIP ASSIGNMENT

The assignment of traffic from the Project area to the adjoining roadway system is based upon the Project trip generation, trip distribution, and the arterial highway and local street system improvements that would be in place by the time of initial occupancy of the Project. Based on the identified Project traffic generation and trip distribution patterns, Project ADT and peak hour intersection turning movements volumes in PCE are shown on Exhibit 4-3.

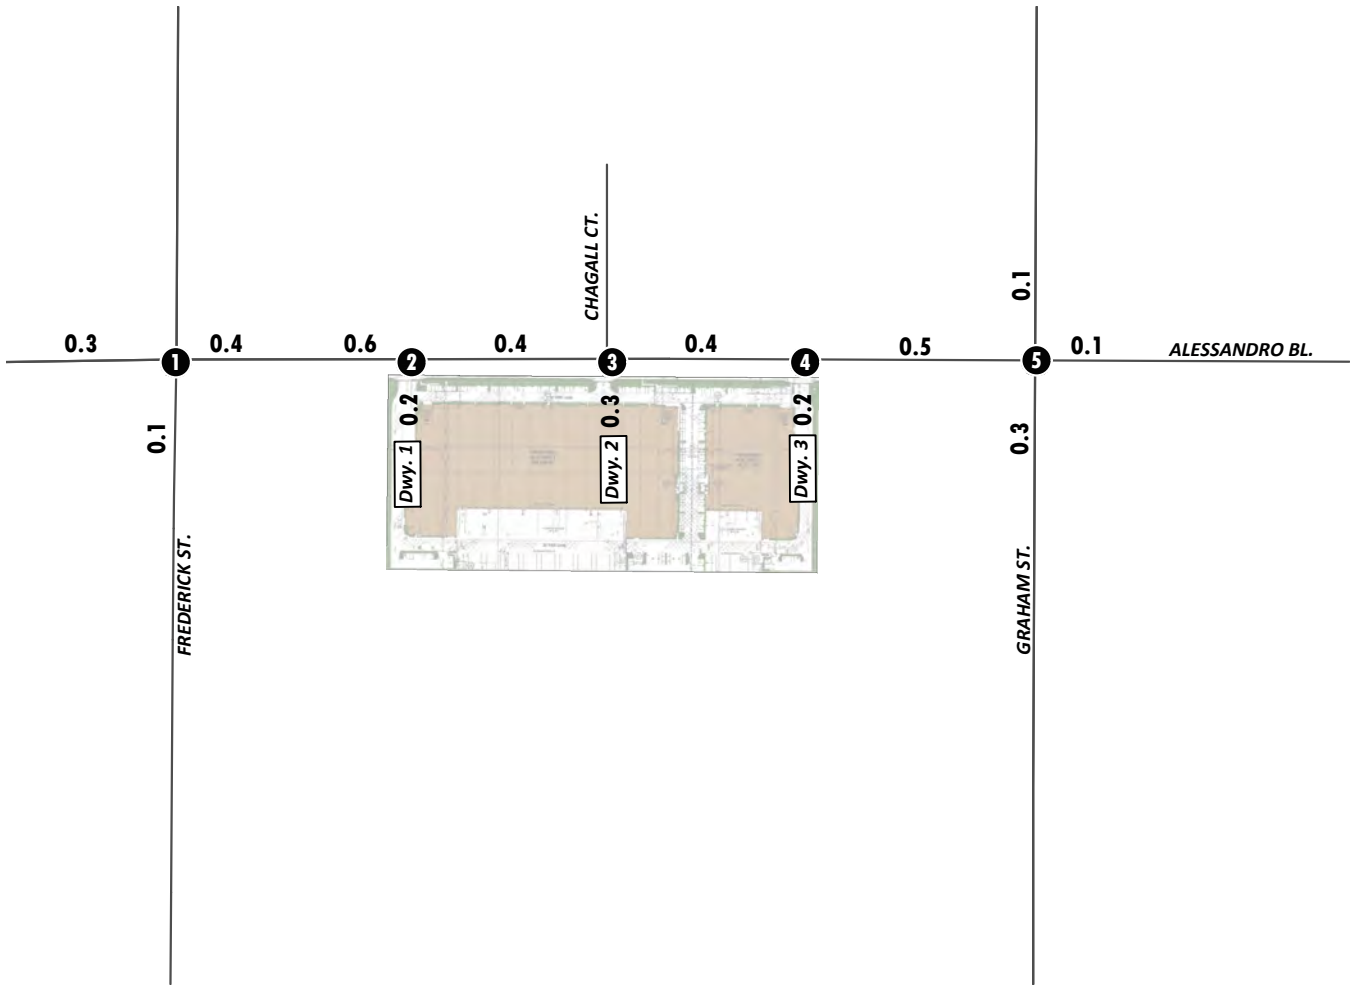

4.5 BACKGROUND TRAFFIC

To account for growth in traffic between Existing (2020) and EAP (2022) traffic conditions, an annual traffic growth rate of 2.0 percent per year, compounded annually, was assumed (4.04 percent total aggregate growth in background traffic for the period between 2020 and 2022). The 2.0 percent annual growth rate is intended to capture non-specific ambient traffic growth.

4.6 NEAR-TERM TRAFFIC FORECASTS

To provide a comprehensive assessment of potential transportation network deficiencies, a “buildup” analysis was performed in support of this work effort. The “buildup” method was used to approximate the EAP traffic forecasts and is intended to identify the deficiencies on both the existing and planned near-term circulation system. The “buildup” approach combines existing traffic counts with a background ambient growth factor to forecast the near-term 2022 traffic conditions. An ambient growth factor of 4.04% (2022) accounts for background (area-wide) traffic increases that occur over time, up to the year 2020 from the year 2020 (compounded two percent per year growth over a 2-year period). Traffic volumes generated by the Project are then added to assess the EAP (2022) traffic conditions. The 2022 roadway network is similar to the existing conditions roadway network with the exception of future roadways and intersections proposed to be developed by the Project.

5 EAP (2022) TRAFFIC CONDITIONS

This section discusses the traffic forecasts for Existing plus Ambient Growth plus Project (EAP) conditions and the resulting intersection operations analysis.

5.1 ROADWAY IMPROVEMENTS

The lane configurations and traffic controls assumed to be in place for EAP conditions are consistent with those shown previously on Exhibit 3-1, with the exception of the following:

- Project driveways and those facilities assumed to be constructed by the Project to provide site access are also assumed to be in place for EAP conditions only (e.g., intersection and roadway improvements at the Project's frontage and driveways).

5.2 EAP TRAFFIC VOLUME FORECASTS

This scenario includes Existing traffic volumes and ambient growth factor of 4.04% (2022) which accounts for background (area-wide) traffic plus Project traffic. Exhibit 5-1 shows the ADT and peak hour intersection turning movement volumes in PCE, which can be expected for EAP (2022) traffic conditions.

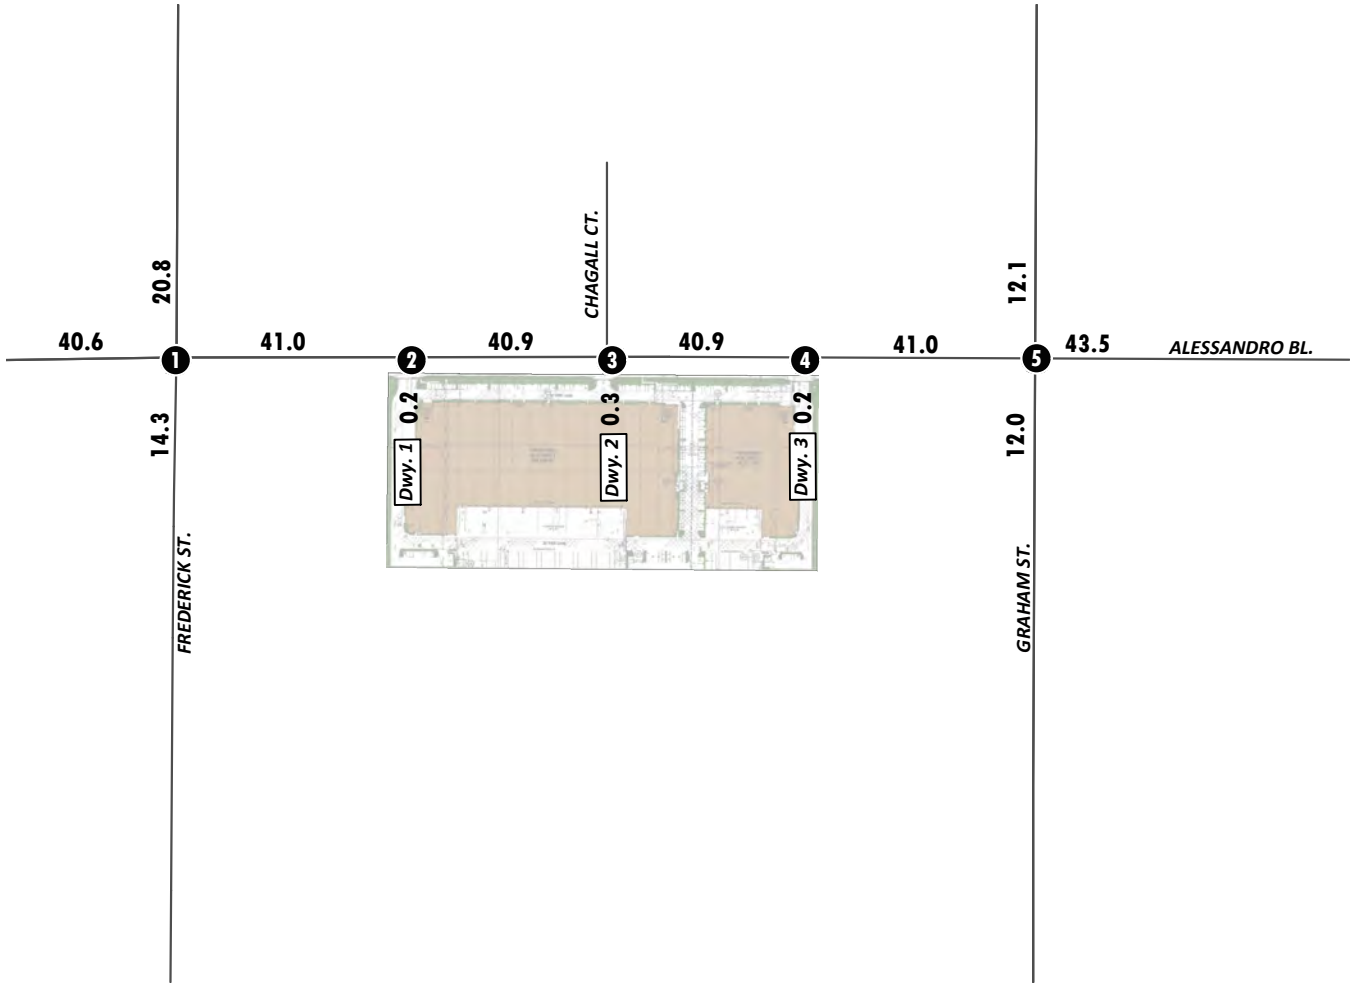

5.3 INTERSECTION OPERATIONS ANALYSIS

EAP peak hour traffic operations have been evaluated for the study area intersections based on the analysis methodologies presented in Section 2 *Methodologies* of this TA. The intersection analysis results are summarized in Table 5-1, which indicates all of the study area intersections are anticipated to continue to operate at an acceptable LOS during the peak hours with the addition of Project traffic, consistent with Existing (2020) traffic conditions. Exhibit 5-2 summarizes the weekday AM and PM peak hour study area intersection LOS under EAP (2022) traffic conditions, consistent with the results provided in Table 5-1. The intersection operations analysis worksheets are included in Appendix 5.1 of this TA.

5.4 QUEUEING ANALYSIS

A queueing analysis has been evaluated during the morning and evening peak hours at the intersection of Graham Street and Alessandro Boulevard to determine if there is sufficient stacking in the northbound and eastbound left turn pockets to accommodate Project traffic. The northbound left turn lane on Graham Street provides 185-feet of stacking while the eastbound left turn lane on Alessandro Boulevard provides 150-feet of stacking. Based on the queueing analysis, the existing northbound left turn pocket is anticipated to accommodate the 95th percentile peak hour queues under EAP (2022) traffic conditions with at most 105-feet during the PM peak hour, however, the eastbound left turn lane should be modified to accommodate a minimum of 250-feet of storage (see Appendix 5.2).

2	Driveway 1 & Alessandro Bl.	<u>CSS</u>	Future Intersection				11.8	21.0	B	C
3	Driveway 2 & Alessandro Bl.	<u>CSS</u>	Future Intersection				11.8	22.3	B	C
4	Driveway 3 & Alessandro Bl.	<u>CSS</u>	Future Intersection				11.7	21.8	B	C
5	Graham St. & Alessandro Bl.	TS	20.4	32.6	C	C	22.0	34.0	C	C

¹ Per the Highway Capacity Manual (6th Edition), overall average intersection delay and level of service are shown for intersections with a traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

² CSS = Cross-street Stop; TS = Traffic Signal; CSS = Improvement

5.5 RECOMMENDED IMPROVEMENTS

The study area intersections are anticipated to operate at an acceptable LOS under EAP (2022) traffic conditions. As such, no intersection improvements have been recommended.

6 LOCAL AND REGIONAL FUNDING MECHANISMS

Transportation improvements throughout the City of Moreno Valley are funded through a combination of project mitigation, fair share contributions or development impact fee programs, such as the Transportation Uniform Mitigation Fee (TUMF) program or the City's Development Impact Fee (DIF) program.

6.1 TRANSPORTATION UNIFORM MITIGATION FEE (TUMF) PROGRAM

The Western Riverside Council of Governments (WRCOG) is responsible for establishing and updating TUMF rates. The County may grant to developers a credit against the specific components of fees for the dedication of land or the construction of facilities identified in the list of improvements funded by each of these fee programs. Fees are based upon projected land uses and a related transportation need to address growth based upon a 2016 Nexus study.

TUMF is an ambitious regional program created to address cumulative impacts of growth throughout western Riverside County. Program guidelines are being handled on an iterative basis. Exemptions, credits, reimbursements and local administration are being deferred to primary agencies. The County of Riverside serves this function for the proposed Project. Fees submitted to the County are passed on to the WRCOG as the ultimate program administrator.

TUMF guidelines empower a local zone committee to prioritize and arbitrate certain projects. The Project is located in the Central Zone. The zone has developed a 5-year capital improvement program to prioritize public construction of certain roads. TUMF is focused on improvements necessitated by regional growth.

6.2 CITY OF MORENO VALLEY DEVELOPMENT IMPACT FEE (DIF) PROGRAM

The City of Moreno Valley has created its own local DIF program to impose and collect fees from new residential, commercial and industrial development for the purpose of funding roadways and intersections necessary to accommodate City growth as identified in the City's General Plan Circulation Element. The City's DIF program includes facilities that are not part of, or which may exceed improvements identified and covered by the TUMF program. As a result, the pairing of the regional and local fee programs provides a more comprehensive funding and implementation plan to ensure an adequate and interconnected transportation system. Under the City's DIF program, the City may grant to developers a credit against specific components of fees when those developers construct certain facilities and landscaped medians identified in the list of improvements funded by the DIF program.

The timing to use the DIF fees is established through periodic capital improvement programs which are overseen by the City's Public Works Department. Periodic traffic counts, review of traffic accidents, and a review of traffic trends throughout the City are also periodically performed by City staff and consultants. The City uses this data to determine the timing of implementing the improvements listed in its facilities list. The Project Applicant would pay requisite DIF pursuant to incumbent City ordinance requirements.

EXHIBIT A

Project Scoping Form

This scoping form shall be submitted to the Lead Agency to assist in identifying infrastructure improvements that may be required to support traffic from the proposed project.

Project Identification:

Approved
John Lj 9/14/20

Case Number:	PPA19-0025
Related Cases:	
SP No.	
EIR No.	
GPA No.	
CZ No.	
Project Name:	Alessandro Warehouse
Project Address:	South of Alessandro Boulevard on either side of Chagall Court
Project Opening Year:	2022
Project Description:	295,236 SF warehouse building (Building 1) & 101,252 SF warehouse building (Building 2). For the purposes of the traffic study, a mix of 30% high-cube cold storage warehouse (ITE 157) and 70% warehousing (ITE 150) is proposed.

	Consultant:	Developer: (Representative)
Name:	Charlene So, Urban Crossroads, Inc.	MIG
Address:		1650 Spruce Street, Suite 102 Riverside, CA 92507
Telephone:	949-861-0177	951-787-9222
Email:	cso@urbanxroads.com	

Trip Generation Information:

Trip Generation Data Source: ITE Trip Generation Manual, 10th Edition (2017)

Current General Plan Land Use:
Commercial

Proposed General Plan Land Use:
Business Park/Light Industrial

Current Zoning:
Community Commercial (CC)

Proposed Zoning:
Light Industrial

	Existing Trip Generation			Proposed Trip Generation (PCE)		
	In	Out	Total	In	Out	Total
AM Trips				55	16	71
PM Trips				21	60	81

Trip Internalization: Yes No (_____% Trip Discount)

Pass-By Allowance: Yes No (_____% Trip Discount)

Potential Screening Checks

Is your project screened from specific analyses (see Page 3 of the guidelines related to LOS assessment and Pages 22-23 for VMT screening criteria).

Is the project screened from LOS assessment? Yes No

LOS screening justification (see Page 3 of the guidelines): _____

Is the project screened from VMT assessment? Yes No

VMT screening justification (see Pages 22-23 of the guidelines): _____
Although the TAZ is a low VMT generating zone, the existing RivTAM inputs indicate that the existing employment within the zone consists of non-industrial employment.

Level of Service Scoping

- Proposed Trip Distribution (Attach Graphic for Detailed Distribution): See graphics

North	South	East	West
Varies %	Varies %	Varies %	Varies %

Link level of service and data collection:

X will be required Due to COVID-19, if there are no historic daily counts then we will estimate the ADT for the study area segments
 _____ will not be required

- Attach list of study intersections (and roadway segments if applicable) See Exhibit 2
- Attach site plan See Exhibit 1
- Other specific items to be addressed:
 - Site access
 - On-site circulation
 - Parking
 - Consistency with Plans supporting Bikes/Peds/Transit
 - Other Truck Turns at the Driveways
- Date of Traffic Counts We will obtain pre-COVID traffic counts and adjust using 2% per year
- Attach proposed analysis scenarios (years plus proposed forecasting approach)
- Attach proposed phasing approach (if the project is phased) No Phasing

VMT Scoping

For projects that are not screened, identify the following:

- Travel Demand Forecasting Model Used RivTAM
- Attach WRCOG Screening VMT Assessment output or describe why it is not appropriate for use
- Attach proposed Model Land Use Inputs and Assumed Conversion Factors (attach)

Analysis scenarios:

1. Existing (2020)
2. Existing plus Ambient Growth plus Project (2022)

As shown on Table 4, the proposed Project General Plan Amendment (light industrial) is anticipated to result in a reduction in trips as compared to the current General Plan Land Use (commercial). As such, no Horizon Year (2040) traffic conditions has been added.

VMT

Although TAZ 3712 is a low VMT generating zone based on home-based work VMT per worker, the existing RivTAM socioeconomic data indicate that the existing employment within the zone consists of non-industrial employment. As such, the Project is not screened out.

Assumed Conversion Factors

1,030 sf per employee (source: County of Riverside General Plan Appendix E Socioeconomic Build-Out Assumptions and Methodology)

Model Land Use Inputs

396,488 total sf / 1,030 sf per employee = 385 total employees (193 warehouse employees / 192 transportation employees)

EXHIBIT 1: PRELIMINARY SITE PLAN

LEGEND:

SUBJECT: ALESSANDRO WAREHOUSE VEHICLE MILES TRAVELLED (VMT) ANALYSIS

Dear Ms. Deirdre McCollister:

The following Vehicle Miles Travelled (VMT) Analysis has been prepared for the proposed Alessandro Warehouse (**Project**), which is located south of Alessandro Boulevard on either side of Chagall Court in the City of Moreno Valley.

PROJECT OVERVIEW

The Project is proposed to consist of up to 396,488 square feet (sf) of warehouse use. Trips generated by the Project's proposed land uses have been estimated based on trip generation rates collected by the Institute of Transportation Engineers (ITE) Trip Generation Manual, 10th Edition, 2017. (1) The proposed Project is anticipated to generate a total of 742 vehicle trip-ends per day (expressed in actual vehicles). (2) The site is currently designated as Commercial in the City's General Plan, which would require a land use and zoning change to Light Industrial use.

BACKGROUND

Changes to California Environmental Quality Act (CEQA) Guidelines were adopted in December 2018, which requires all lead agencies to adopt VMT as a replacement for automobile delay-based level of service (LOS) as the new measure for identifying transportation impacts for land use projects. This statewide mandate went into effect July 1, 2020. To aid in this transition, the Governor's Office of Planning and Research (OPR) released a Technical Advisory on Evaluating Transportation Impacts in CEQA (December of 2018) (**Technical Advisory**). (3) Based on OPR's Technical Advisory, the City of Moreno Valley has prepared their Transportation Impact Analysis Preparation Guide for Vehicle Miles Traveled and Level of Service Assessment (**City Guidelines**). (4) This analysis has been prepared based on the City Guidelines.

PROJECT SCREENING

Consistent with City Guidelines, projects that meet certain screening criteria based on their location and project type may be presumed to result in a less than significant transportation impact. Consistent with

Attachment: Appendix K2-VMT Assessment Compressed (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Ms. Deirdre McCollister
 MIG, Inc.
 June 15, 2021
 Page 2 of 9

the screening criteria recommended in City Guidelines, the City of Moreno Valley will utilize the following project screening thresholds that may be applicable to the Project:

- Transit Priority Area (TPA) Screening
- Low VMT Area Screening
- Project Type Screening

A land use project need only meet one of the above screening criteria to result in a less than significant impact.

TPA SCREENING

Consistent with guidance identified in the City Guidelines, projects located within a Transit Priority Area (TPA) (i.e., within ½ mile of an existing “major transit stop”¹ or an existing stop along a “high-quality transit corridor”²) may be presumed to have a less than significant impact absent substantial evidence to the contrary. However, the presumption may not be appropriate if a project:

- Has a Floor Area Ratio (FAR) of less than 0.75;
- Includes more parking for use by residents, customers, or employees of the project than required by the jurisdiction (if the jurisdiction requires the project to supply parking);
- Is inconsistent with the applicable Sustainable Communities Strategy (as determined by the lead agency, with input from the Metropolitan Planning Organization); or
- Replaces affordable residential units with a smaller number of moderate- or high-income residential units.

The Project is not located within ½ mile of an existing major transit stop, or along a high-quality transit corridor.

The TPA screening threshold is not met.

LOW VMT AREA SCREENING

The City Guidelines also states that, “residential and office projects located within a low VMT-generating area may be presumed to have a less than significant impact absent substantial evidence to the contrary. In addition, other employment-related and mixed-use land use projects may qualify for the use of screening if the project can reasonably be expected to generate VMT per resident, per worker, or per service population that is similar to the existing land uses in the low VMT area.”³

¹ Pub. Resources Code, § 21064.3 (“Major transit stop’ means a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.”).

² Pub. Resources Code, § 21155 (“For purposes of this section, a high-quality transit corridor means a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.”).

³ City Guidelines; page 23.

Ms. Deirdre McCollister
 MIG, Inc.
 June 15, 2021
 Page 3 of 9

Based on the Screening Tool results provided in Attachment A, the Project is located within a low VMT generating zone. The Project resides within TAZ 3712 and was shown to generate 10.64 VMT per worker whereas the City's impact threshold is 11.01 VMT per worker. As stated previously, the site is currently designated as Commercial in the City's General Plan, which would require a land use/zoning change to Light Industrial use. After further research into the TAZ, the socioeconomic area for TAZ 3712 consists primarily of retail employment and not industrial use.

The Low VMT Area screening threshold is not met.

PROJECT TYPE SCREENING

The City Guidelines identify that local serving retail with buildings less than 50,000 square feet or other local serving essential services (e.g., day care centers, public schools, medical/dental office buildings, etc.) are presumed to have a less than significant impact absent substantial evidence to the contrary. In addition, small projects anticipated to generate low traffic volumes and by association low greenhouse gas (GHG) emissions are also assumed to cause a less than significant impact. The City's small project threshold of 285,700 square feet of high cube transload and short-term storage warehouse land use would be exceeded by the proposed Project's total building square footage.

The Project Type screening threshold is not met.

PROJECT GENERATED VMT

Projects that do not meet one or more of the above described VMT screening criteria should prepare a project level VMT analysis. RIVTAM is a useful tool to estimate VMT as it considers interaction between different land uses based on socio-economic data such as population, households, and employment. RIVTAM is a travel forecasting model that represents a sub-area (Riverside County) of the Southern California Association of Governments (SCAG) regional traffic model. RIVTAM was designed to provide a greater level of detail and sensitivity in the Riverside County area as compared to the regional SCAG model. City Guidelines identifies RIVTAM as the appropriate tool for conducting VMT modeling for land use projects within the County of Riverside.

Project generated VMT has been calculated using the most current version of RIVTAM. Adjustments in socio-economic data (SED) (i.e., employment) for the Project have been made to a separate TAZ within the model to reflect the Project's industrial warehouse land use. A separate TAZ has been utilized to isolate vehicle trips to/from the Project. Table 1 summarizes the employment factors and employment estimates for the Project. As shown, the Project is estimated to generate 385 employees.

TABLE 1: EMPLOYMENT DENSITY FACTORS

	Project
Building Square Footage	396,488
Employment Density Factor ⁴	1 employee/1,030 SF
Employment	385

Adjustments to employment for the Project's TAZ were made to both the base year model (2012) and the cumulative year model (2040). The base year model and cumulative year model were both run inclusive of the Project's employment. Project-generated home-based work VMT was then calculated following the VMT calculation procedures identified in Exhibit C of the City Guidelines and includes home-based work trips that are both internal and external to the RIVTAM model boundaries. The home-based work VMT value is then normalized by dividing by the number of Project employees. Finally, the base year and cumulative VMT results were interpolated to derive the existing VMT. As shown in Table 2, the existing (2020) Project generated VMT per employee is 12.35.

TABLE 2: PROJECT VMT PER EMPLOYEE

	Base Year (2012)	Cumulative (2040)	Existing (2020)
Home-based Work VMT	4,754	5,234	4,891
Employment	385	385	385
VMT per Employee	12.35	13.59	12.71

Western Riverside Council of Governments (WRCOG) publishes VMT data for each of its member agencies as derived from the RIVTAM model for both the base year (2012) model and the cumulative year (2040) model. Urban Crossroads has obtained these published results and similar to the project generated VMT calculation used linear interpolation to determine the City's existing (2020) VMT per employee.

The adopted City Guidelines state that the City of Moreno Valley has selected a threshold based on the existing VMT performance in the City. More specifically, the City Guidelines state that a project would have a significant VMT impact if, in the Existing Plus Project scenario, its net VMT per capita (for residential projects) or per employee (for office and industrial projects) exceeds the per capita VMT for Moreno Valley. For all other uses, a net increase in VMT would be considered a significant impact.⁵

Table 3 illustrates a comparison between the baseline (2020) project generated VMT per employee to the existing (2020) City of Moreno Valley VMT per employee. As shown, project generated VMT per employee would be 11.69 percent above the existing City of Moreno Valley VMT per employee. As such, the Project's impact based on project generated VMT is potentially significant.

⁴ Employee Density Factor was obtained from the County of Riverside General Plan Appendix E-2: Socioeconomic Build-Out Assumptions and Methodology (see Table E-5, Commercial Employment Factors, Page 3).

TABLE 3: PROJECT VMT PER EMPLOYEE COMPARISON

	Existing (2020) City of Moreno Valley	Baseline (2020) Project
VMT per employee	11.38	12.71
Percent Change	+11.69%	
Potential Impact?	Yes	

PROJECT'S CUMULATIVE IMPACT ON VMT

The General Plan land use designations and zoning for the Project site are Commercial. The proposed Project results in jobs within the total number of jobs projected by the current Southern California Association of Governments (SCAG) Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS). However, the proposed Project is not consistent with the underlying employment assumptions upon which the current RTP/SCS was based. The adopted City Guidelines state that "if it is not consistent with the RTP/SCS, then it would have a significant VMT impact if for office and industrial projects its net VMT per employee exceeds the average VMT per employee for Moreno Valley in the RTP/SCS horizon year." ⁶

As presented in Table 4, the cumulative VMT per employee within the City of Moreno Valley does increase under the plus project condition. As such, the Project's contribution to cumulative impacts for VMT is considered potentially significant.

TABLE 4: CUMULATIVE VMT PER EMPLOYEE

Change in VMT	+1.28	
Percent Change	+10.40%	
Potential Impact?	Yes	

POTENTIAL VMT REDUCTION MEASURES

Transportation demand management (TDM) strategies have been evaluated for reducing VMT impacts determined to be potentially significant. The effectiveness of TDM strategies to reduce VMT has been

⁶ City Guidelines; page 26.

⁷ Obtained from WRCOG

Ms. Deirdre McCollister
 MIG, Inc.
 June 15, 2021
 Page 6 of 9

determined based on the SB 743 Implementation TDM Strategy Assessment (November 11, 2019 Fehr & Peers) (**WRCOG Report**) prepared for WRCOG and the Quantifying Greenhouse Gas Mitigation Measures (CAPCOA, 2010). The WRCOG Report indicates that of the 50 transportation measures presented by CAPCOA, only 41 are applicable at a building and site level. The remaining 9 measures are functions of, or depend on, site location and/or actions by local and regional agencies or funders.

The WRCOG Report goes on to provide a review of the 41 transportation measures identified by CAPCOA and determines that for areas within the WRCOG region only 7 of those measures may be effective at an individual project level. Evaluation of potentially applicable TDM strategies in the context of the proposed Project is summarized below.

- ***Measure 1: Increase Diversity of Land Uses (LUT-3).*** Having different types of land uses near one another can decrease VMT since trips between land use types are shorter and may be accommodated by non-auto modes of transportation. For example, when residential areas are in the same neighborhood as retail and office buildings, a resident does not need to travel outside of the neighborhood to meet his/her trip needs.

Remarks: The Project consists of the development of warehouse use with a combined building area of approximately 396,488 sf. In order for the above measure to apply, at least three of the following will be located within ¼ mile of the Project: Residential Development, Retail Development, Park, Open Space, or Office (or institutional uses). There is residential, retail, and office/institutional developments located off-site within ¼ mile of the Project. As noted by CAPCOA (Quantifying Greenhouse Gas Mitigation Measures, p. 162), the diversity of uses within close proximity of the Project can result in a VMT reduction between 9.0 and 30.0%. As the proposed Project does not include a mix of land uses within the development site, but is instead located within a sphere of influence to high density residential, retail, and office/institutional uses (i.e., walking distance), this particular TDM measure may be evaluated further as a means of providing a reduction in Project VMT. It should be noted that RIVTAM is a sub-regional travel demand model and is not designed to accurately capture all potential project-level interactions with local land uses and alternative transportation modes (i.e., walking and biking). Based on a review of the land uses within ¼ mile of the Project (walking distance), there is single family and multi-family residential, local serving retail, and other employment uses. As noted by CAPCOA, the proximity of these complementary land uses helps to further reduce VMT. Based on the calculations conducted for the ¼-mile area around the Project site (see Attachment B), the VMT reduction is estimated to be 37% or up to a maximum of 30%. As such, the diverse mix of land uses has the potential to reduce VMT by as much as 30%.

- ***Measure 2: Provide Pedestrian Network Improvements (SDT-1).*** Providing a pedestrian access network to link areas of the Project site encourages people to walk instead of drive assuming that desirable destinations are within walking distance of the Project. This mode shift results in people driving less and a reduction in VMT.

Remarks: Limited pedestrian access exists along the Project's frontage. The Project's implementation of this measure through the construction of on-site connections to the existing sidewalks off-site could provide for a nominal reduction in Project VMT. As noted by CAPCOA (Quantifying Greenhouse Gas Mitigation Measures, p. 187), the provision of sidewalks on-site that connect to off-site pedestrian walkways linking to other complementary land uses within a suburban center context can result in a VMT reduction between 0 and 2.0%. Given the complementary land uses within walking distance of the Project site, this particular TDM measure may be evaluated further as a means of providing a reduction in Project VMT. As the Project is to

Ms. Deirdre McCollister
 MIG, Inc.
 June 15, 2021
 Page 7 of 9

provide pedestrian accommodations along the Project's frontage, the improvement is estimated to provide a 1% VMT reduction. Supporting calculations are provided in Attachment B.

- Measure 3: Provide Traffic Calming Measure (SDT-2). Providing traffic calming measures encourages people to walk or bike instead of using a vehicle. This mode shift will result in a decrease in VMT. Traffic calming features may include: marked crosswalks, count-down signal timers, curb extensions, speed tables, raised crosswalks, raised intersections, median islands, tight corner radii, roundabouts or mini-circles, on-street parking, planter strips with street trees, chicanes/chokers, and others.

Remarks: There is limited opportunity for the Project to implement meaningful enhanced traffic calming measures in the area that would encourage a shift in travel mode to walking or biking. This measure is therefore not evaluated further as means of providing a reduction in Project VMT.

- Measure 4: Implement Car-Sharing Program (TRT-9). Implementing a car-sharing program would allow individuals to have on-demand access to a shared fleet of vehicles on an as-needed basis. User costs are typically determined through mileage or hourly rates, with deposits and/or annual membership fees.

Remarks: This particular TDM measure would be solely dependent on a future building tenant and may be considered as infeasible due to lack of available service providers in the area. For these reasons, the measure is not evaluated further as means of providing a reduction in Project VMT.

- Measure 5: Implement Transit Access Improvements (TST-2). This measure improves access to transit facilities through sidewalk/crosswalk safety enhancements and bus shelter improvements.

Remarks: The Riverside Transit Agency (RTA), a public transit agency serving various jurisdictions within Riverside County currently provides service in the area. RTA Routes 11 and 20 directly serves the study area with existing nearby bus stops located east of the intersection of Fredrick Street at Alessandro Boulevard and another located just east of the Graham Street at Alessandro Boulevard intersection. Although providing improved pedestrian access to these existing bus stops will help to increase usage by future Project employees, CAPCOA does not identify specific VMT reduction percentages based on this measure alone. As such, no additional VMT reduction amount is taken.

- Measure 6: Encourage Telecommuting and Alternative Work Schedule (TRT-6). Encouraging telecommuting and alternative work schedules reduces the number of commute trips and therefore VMT traveled by employees. Alternative work schedules could take the form of staggered starting times, flexible schedules, or compressed work weeks.

Remarks: The effectiveness of this measure is dependent on the ultimate building tenant(s) which are unknown currently. As such, this measure is therefore not evaluated further as means of providing a reduction in Project VMT.

- Measure 7: Provide Ride-Sharing Programs (TRT-3). This strategy focuses on encouraging carpooling and vanpooling but its ultimate implementation is limited as Measure 6 above.

Remarks: The effectiveness of this measure is dependent on the ultimate building tenant(s) which are unknown currently. As such, this measure is therefore not evaluated further as means of providing a reduction in Project VMT.

In total, the combined VMT reduction may be 31% between Mitigation Measures 1 and 2. As noted by CAPCOA, the maximum cross-category reduction for any combination of land use, neighborhood enhancements, parking and transit strategies for projects located within a suburban center context is

Ms. Deirdre McCollister
 MIG, Inc.
 June 15, 2021
 Page 8 of 9

15.0%.⁸ The suburban center serves the population of the suburb with office, retail and housing which is denser than the surrounding suburb. Table 5 provides justification for the suburban center classification:

TABLE 5: SUBURBAN CENTER CLASSIFICATION

Characteristic	Justification
Ratio or relationship between jobs and housing	The area includes multiple land uses which serves the population with office, retail, and housing. The suburban setting has a characteristic of having a poor job-to-housing ratio whereas the suburban center is classified as having a balanced ratio. CAPCOA defines a balanced job-to-population ratio as a ratio ranging from 0.9 to 1.2. In the RivTAM base model, it is estimated that the housing within 1 to 1 ½ miles is 3,893, the population within 1 to 1 ½ miles is 15,740, and the employment within 1 to 1 ½ miles is 14,426. The resulting job-to-housing ratio is 0.92. This would suggest that the ratio between jobs and housing are balanced and the location setting is a suburban center. Suburban settings have a poor job-to-housing ratio.
Transit availability	The City of Moreno Valley and nearby jurisdiction of City of Riverside operate in a typical grid street pattern. A commuter rail station exists within two miles to the west (i.e., Moreno Valley/March Field Metrolink Station) and the existing RTA Route 20 includes a direct route/bus stops from the study area to the Metrolink Station. The bus stop is located along Alessandro Boulevard 400 feet west of the Project frontage. Suburban settings have no immediate access to commuter rail stations.

Therefore, for the purposes of this evaluation, the VMT reduction strategies described previously (i.e., Measures 1 and 2) would combine for a maximum VMT reduction of 15.0%.

CONCLUSION

Project generated VMT per employee was found to exceed citywide baseline VMT per employee threshold by 11.69% and citywide cumulative VMT per employee threshold by 10.40%. With implementation of the aforementioned TDM measures (Measures 1 and 2), a maximum reduction in VMT of 15.0% could be achieved, which would reduce the Project’s impact to less than significant.

VMT REDUCTION MEASURES**

Attachment: Appendix K2-VMT Assessment Compressed (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Mitigation Method 1: Increase Diversity of Land Uses (LUT-3) Calculations

EXHIBIT A: LAND USE AREA MAP

Land Use	Area	Ratio
Single Family Residential	2,866,522	0.26
Multifamily Residential	876,712	0.08
Commercial	772,444	0.07
Industrial	5,269,701	0.48
Institutional/Office	1,141,629	0.10
Park	0	0
Total	10,927,007	1.00

Attachment: Appendix K2-VMT Assessment Compressed (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Mitigation Method:

$$\% \text{ VMT Reduction} = \text{Land Use} * B \text{ [not to exceed 30\%]}$$

Where

Land Use = Percentage increase in land use index versus single use development
= (land use index – 0.15)/0.15 (see Appendix C for detail)

$$\text{Land use index} = -a / \ln(6)$$

(from [2])

$$a = \sum_{i=1}^6 a_i \times \ln(a_i)$$

a_i = building floor area of land use i / total square feet of area considered

- residential a_1 = single family
- a_2 = multifamily residential
- a_3 = commercial
- a_4 = industrial
- a_5 = institutional
- a_6 = park

if land use is not present and a_i is equal to 0, set a_i equal to 0.01

B

= elasticity of VMT

with respect to land use index (0.09 from [1])

not to exceed 500%

increase

Mitigation Method 1 Calculation for the Project (based Exhibit A: Land Use Area Map):

a_1 = single family residential = 0.26

a_2 = multifamily residential = 0.08

a_3 = commercial = 0.07

a_4 = industrial = 0.48

a_5 = institutional/office = 0.10

a_6 = park = 0.01

$$\text{Land Use Index} = -[0.26*\ln(0.26) + 0.08*\ln(0.08) + 0.07*\ln(0.07) + 0.48*\ln(0.48) + 0.10*\ln(0.10) + 0.01*\ln(0.01)] / \ln(6) = 0.76$$

$$\text{Low Range \% VMT Reduction} = (0.76 - 0.15)/0.15 * 0.09 = 37\%$$

Mitigation Method 2: Provide Pedestrian Network Improvements (SDT-1) Mitigation Method Calculation for the Project:

Mitigation Method:

Estimated VMT Reduction	Extent of Pedestrian Accommodations	Context
2%	Within Project Site and Connecting Off-Site	Urban/Suburban
1%	Within Project Site	Urban/Suburban
< 1%	Within Project Site and Connecting Off-Site	Rural

The proposed Project is responsible for constructing Alessandro Boulevard at its ultimate half-section width. The site-adjacent improvement includes constructing pedestrian facilities along the Project's frontage. As such, the VMT reduction is estimated to be 1%.

CITY COUNCIL
NOTICE OF PUBLIC HEARING AND
ENVIRONMENTAL NOTICE TO ADOPT A MITIGATED NEGATIVE DECLARATION**

NOTICE IS HEREBY GIVEN that a Public Hearing will be held by the City Council of the City of Moreno Valley on the date and time set forth below:

Project: General Plan Amendment (PEN20-0118);
Change of Zone (PEN20-0119);
Tentative Parcel Map 37944 (PEN20-0120); and
Plot Plans (PEN20-0121) and (PEN20-0124)

Applicant: CDRE Holdings 17 LLC

Property Owner: Moreno Valley Centerpointe LLC

APN: 297-170-002 and 297-170-003

Location: Alessandro Boulevard east of Frederick Street, west of Graham Street

Proposal: Applicant is requesting approval of the following entitlements for the Compass Danbe Centerpointe project: 1) a General Plan Amendment (GPA) amending the City's General Plan from Commercial to Business Park, 2); a Change of Zone from Community Commercial District (CC) to Light Industrial District (LI); 3) a Plot Plan for an approximately 290,726 square foot light industrial building; and 4) a Plot Plan for an approximately 98,877 square foot light industrial warehouse building located on a 17.67-acre site.

Council District: 1

Environmental Determination: The project has been evaluated against the criteria set forth in the California Environmental Quality Act (CEQA) and CEQA Guidelines and staff has determined that a Mitigated Negative Declaration is the appropriate environmental document for the proposed project.

The Draft Initial Study/Mitigated Negative Declaration was circulated for public review by responsible and trustee agencies and other interested parties for a review period commencing July 26, 2021, through August 25, 2021. The documents can be obtained in electronic format via email by request. The final document may be inspected by appointment at the Community Development Department at 14177 Frederick Street, Moreno Valley, California by calling (951) 413-3206 during normal business hours (7:30 a.m. to 5:30 p.m., Monday through Thursday, 7:30a.m. to 4:30p.m. Friday).

PUBLIC TESTIMONY: All interested parties will be provided an opportunity to submit oral testimony during the Public Hearing and/or provide written testimony during or prior to the Public Hearing. The application file and related environmental documents may be inspected at the Community Development Department at 14177 Frederick Street, Moreno Valley, California by calling (951) 413-3206 during normal business hours (7:30 a.m. to 5:30 p.m., Monday through Thursday, and 7:30 a.m. to 4:30 p.m., Friday).

PLEASE NOTE: The City Council may consider and approve changes to the proposed items under consideration during the Public Hearing.

GOVERNMENT CODE § 65009 NOTICE: If you challenge any of the proposed actions taken by the City Council in court, you may be limited to raising only those issues you or someone else raised during the Public Hearing described in this notice, or in written correspondence delivered to the Planning Division of the City of Moreno Valley during or prior to the Public Hearing.

ACCESSIBILITY: Upon request and in compliance with the Americans with Disabilities Act of 1990, any person with a disability who requires a modification or accommodation in order to participate in a meeting should direct such request to James Verdugo, ADA Coordinator, at (951) 413-3350 at least 48 hours before the meeting. The 48-hour notification will enable the City to make reasonable arrangements to ensure accessibility to this meeting.

Date and Time: October 5, 2021 6:00 p.m.

RESOLUTION NUMBER 2021-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING GENERAL PLAN AMENDMENT PEN20-0118 TO AMEND THE GENERAL PLAN LAND USE MAP, CHANGING THE LAND USE DESIGNATION FROM COMMERCIAL TO BUSINESS PARK FOR THE PROPERTY LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003) AND THE NECESSARY AND CORRESPONDING AMENDMENTS TO THE CITY'S ZONING ATLAS

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and has the authority to approve amendments to the City's General Plan and the City's Zoning Atlas and;

WHEREAS, CDRE Holdings LLC., ("Developer") has filed an application for the approval of General Plan Amendment PEN20-0118 ("Application") to amend the Moreno Valley General Plan from Commercial to Business Park for the project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street, (APN's 297-170-002 and 003) ("Site"), which shall also require any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Moreno Valley Municipal Code and Government Code section 65905, a public hearing was scheduled for October 5, 2021, and notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Site; and

WHEREAS, on August 26, 2021, the public hearing to consider the Application was duly conducted by the Planning Commission at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, on August 26, 2021 a hearing was conducted by the Planning Commission to consider General Plan Amendment PEN20-0118, whereby the Planning Commission approved Planning Commission Resolution 2021-25, a recommendation that the City Council approve the General Plan Amendment; and

WHEREAS, on August 26, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA¹) and CEQA Guidelines,² the Planning Commission considered and approved Planning Commission Resolution 2021-24

¹ Public Resources Code §§ 21000-21177

² 14 California Code of Regulations §§15000-15387

recommending that the City Council adopt a Mitigated Negative Declaration and Mitigation Monitoring Plan for The District Moreno Valley project.

WHEREAS, on October 5, 2021, the public hearing to consider the Application was duly conducted by the City Council at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, on October 5, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the City Council considered and approved Resolution 2021-XX adopting a Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the Compass Danbe Centerpointe Project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and, 003).

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed Project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the City Council has considered all of the evidence submitted into the administrative record for the General Plan Amendment, including, but not limited to, the following:

- (a) Moreno Valley General Plan and all relevant provisions contained therein;
- (b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all relevant provisions referenced therein;
- (c) The Moreno Valley General Plan amendment changing the land use designation from Commercial to Business Park and all relevant provisions contained therein as shown on Exhibit A;
- (d) Application for the approval of a General Plan Amendment PEN20-0118 and all documents, records and references contained therein;
- (e) Staff Report prepared for the City Council's consideration and all documents, records and references related thereto, and Staff's presentation at the public hearing;
- (f) Testimony and/or comments from Applicant and its representatives during the public hearing; and

- (g) Testimony, comments and correspondence from all persons that were provided in written format or correspondence, at, or prior to, the public hearing.

Section 4. Findings

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the City Council makes the following findings:

- (a) The proposed General Plan amendment is consistent with the existing goals, objectives, policies and programs of the General Plan; and
- (b) The proposed General Plan amendment will not adversely affect the public health, safety or general welfare.

Section 5. Approval

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings, as set forth herein, the City Council hereby approves General Plan Amendment PEN20-0118 as depicted in the exhibit attached hereto as Exhibit A, and any necessary and corresponding amendment to the City’s Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment.

Section 6. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. Severability

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. Certification

That the City Clerk for the City Council shall certify to the passage of this Resolution.

ORDINANCE NO. 2021-

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING CHANGE OF ZONE PEN20-0119 TO AMEND THE LAND USE DESIGNATION OF THE 17.67-ACRE PROJECT SITE FROM COMMUNITY COMMERCIAL DISTRICT (CC) TO LIGHT INDUSTRIAL DISTRICT (LI) FOR THE COMPASS DANBE CENTERPOINTE PROJECT LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003)

The City Council of the City of Moreno Valley does ordain as follows:

SECTION 1 GENERAL:

1.1 CDRE Holdings, LLC., ("Developer") has filed an application for the approval of Change of Zone PEN20-0119 ("Application") to change the zoning designation of the site from Community Commercial District (CC) to Light Industrial District (LI) for the project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003) ("Site"), which shall also require any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the project site; and

1.2 At its August 26, 2021 meeting, the Planning Commission considered the Change of Zone for Compass Danbe Centerpointe project and recommended approval to the City Council; and

1.3 Pursuant to the provisions of the law, a public hearing was held before the City Council on October 5, 2021, for deliberations and decision.

1.4 The matter was fully discussed, and the public and other agencies were given opportunity to present testimony and documentation.

1.5 An Initial Study has been prepared for the Project for the purpose of compliance with the California Environmental Quality Act (CEQA). Based on the Initial Study including all supporting technical evidence, it was determined that the project impacts are expected to be less than significant with mitigation, and approval of a Mitigated Negative Declaration is an appropriate environmental determination for the Project.

SECTION 2 EVIDENCE:

That the City Council has considered all of the evidence submitted into the administrative record for Change of Zone PEN20-0119, including, but not limited to, the following:

1
Ordinance No. 2021-XX
Date Adopted: October __, 2021

- (a) Moreno Valley General Plan and all relevant provisions contained therein;
- (b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all relevant provisions referenced therein;
- (c) The change the zoning designation of the site from Community Commercial District (CC) to Light Industrial District (LI) and all other relevant provisions contained therein as shown on Exhibit A;
- (d) Application for the approval of Change of Zone PEN20-0119 and all documents, records and references contained therein;
- (e) Staff Report prepared for the City Council's consideration and all documents, records and references related thereto, and Staff's presentation at the public hearing;
- (f) Testimony and/or comments from Applicant and its representatives during the public hearing; and
- (g) Testimony comments and/or correspondence from all persons that were provided in written format or correspondence, at, or prior to, the public hearing.

SECTION 3 FINDINGS:

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the City Council hereby finds as follows:

- (a) The proposed amendment is consistent with the existing goals, objectives, policies and programs of the General Plan;
- (b) The proposed amendment will not adversely affect the public health, safety or general welfare; and
- (c) The proposed amendment is consistent with the purposes and intent of Title 9.

SECTION 4 AMENDMENT OF THE OFFICIAL ZONING ATLAS:

4.1 The City of Moreno Valley Official Zoning Atlas, as adopted by Ordinance No. 981, on August 3, 2021, of the City of Moreno Valley, and as amended thereafter from time to time by the City Council of the City of Moreno Valley, is further amended by placing in effect the zone or zone classification to page 96 of the Official Zoning Atlas as shown on the attached map marked "Exhibit A" and included herein by reference and on file in the office of the City Clerk.

SECTION 5 EFFECT OF ENACTMENT:

5.1 Except as specifically provided herein, nothing contained in this ordinance shall be deemed to modify or supersede any prior enactment of the City Council which addresses the same subject addressed herein.

SECTION 6 NOTICE OF ADOPTION:

6.1 Within fifteen days after the date of adoption hereof, the City Clerk shall certify to the adoption of this ordinance and cause it to be posted in three public places within the city.

SECTION 7 EFFECTIVE DATE:

7.1 This ordinance shall take effect thirty days after the date of its adoption.

APPROVED AND ADOPTED this _____ day of _____, _____.

RESOLUTION NUMBER 2021-

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY APPROVING TENTATIVE PARCEL MAP 37944 FOR THE COMPASS DANBE CENTERPOINTE PROJECT LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and the lead agency for the preparation and consideration of environmental documents for local projects that are subject to requirements of the California Environmental Quality Act (CEQA) and CEQA Guidelines; and

WHEREAS, CDRE Holdings LLC., ("Developer") has filed an application for the approval of Tentative Parcel Map 37944 PEN20-0122 ("Application") for the Compass Danbe Centerpointe Project, ("Project") located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003) ("Site"); and

WHEREAS, the Application has been evaluated in accordance with Chapter 9.14 (Land Divisions) of the Municipal Code with consideration given to the City's General Plan, Zoning Ordinance, and other applicable laws and regulations; and

WHEREAS, Chapter 9.14 of the Municipal Code imposes conditions of approval upon projects for which a Tentative Parcel Map is required, which conditions may be imposed by the City Council to address on-site improvements, off-site improvements, the manner in which the site is used and any other conditions as may be deemed necessary to protect the public health, safety and welfare and ensure that the proposed Project will be developed in accordance with the purpose and intent of Title 9 ("Planning and Zoning") of the Municipal Code; and

WHEREAS, Staff has presented for the City Council's consideration Conditions of Approval to be imposed upon Tentative Parcel Map 37944 PEN20-0122 (TPM), which conditions have been deemed necessary to protect the public health, safety and welfare and ensure that the proposed Project will be developed in accordance with the purpose and intent of Title 9 ("Planning and Zoning") of the Municipal Code; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Municipal Code and Government Code section 65905, a public hearing was scheduled for October 5, 2021 and notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Site; and

WHEREAS, on August 26, 2021, the public hearing to consider the Application was duly conducted by the Planning Commission at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, on August 26, 2021 a hearing was conducted by the Planning Commission to consider a recommendation that the City Council approve the Mitigated Negative Declaration and the Mitigation Monitoring Plan and approve the proposed Project; and

WHEREAS, on August 26, 2021 a hearing was conducted by the Planning Commission whereby the Planning Commission approved Planning Commission Resolution 2021-27, a recommendation that the City Council approve the Tentative Tract Map 37944; and

WHEREAS, on October 5, 2021, the public hearing to consider the Application was duly conducted by the City Council at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, consistent with the requirements of Chapter 9.14 (Land Divisions) of the Municipal Code, at the public hearing the City Council considered Conditions of Approval to be imposed upon Tentative Parcel Map 37944 PEN20-0122 , which conditions were prepared by Planning Division staff who deemed said conditions to be necessary to protect the public health, safety and welfare and to ensure the proposed Project will be developed in accordance with the purpose and intent of Title 9 (“Planning and Zoning”) of the Municipal Code; and

WHEREAS, at the public hearing, the City Council considered whether each of the requisite findings specified in Section 9.14.070 of the Municipal Code and set forth herein could be made with respect to the proposed Project as conditioned by Conditions of Approval; and

WHEREAS, on October 5, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the City Council approved Resolution 2021-XX adopting a Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the Compass Danbe Centerpointe Project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN’s 297-170-002 and 003).

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached Exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Attachment: Resolution for Tentative Parcel Map 37944 (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section 3. Evidence

That the City Council has considered all of the evidence submitted into the administrative record for the proposed Tentative Parcel Map 37944 PEN20-0122, including, but not limited to, the following:

- (a) Moreno Valley General Plan and all other relevant provisions contained therein;
- (b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein;
- (c) Application for the approval of Tentative Parcel Map 37944 PEN20-0122 and all documents, records and references contained therein;
- (d) Conditions of Approval for Tentative Parcel Map 37944 PEN20-0122, attached hereto as Exhibit A;
- (e) Staff Report prepared for the City Council's consideration and all documents, records and references related thereto, and Staff's presentation at the public hearing;
- (f) Testimony and/or comments from Applicant and its representatives during the public hearing; and
- (g) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the public hearing.

Section 4. Findings

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the City Council makes the following findings in approving Tentative Parcel Map 37944 PEN20-0122.

- (a) That the proposed map is consistent with applicable general and specific plans and the zoning ordinance;
- (b) That the design or improvement of the proposed subdivision is consistent with applicable general and specific plans;
- (c) That the site is physically suitable for the type of development;
- (d) That the site of the proposed land division is physically suitable for the proposed density of the development;
- (e) That the design of the subdivision or the proposed improvements are not likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat;
- (f) That the design of the subdivision or type of improvements is not likely to cause serious public health problems;
- (g) That the design of the subdivision or the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision;
- (h) That the proposed land division is not subject the Williamson Act pursuant to the California Land Conservation Act of 1965.
- (i) That the proposed land division and the associated design and improvements are not consistent with applicable ordinances of the city.

- (j) That the design of the land division provides, to the extent feasible, for future passive or natural heating and cooling opportunities in the subdivision.
- (k) That the effect of the proposed land division on the housing needs of the region were considered and balanced against the public service needs of the residents of Moreno Valley and available fiscal and environmental resources.

Section 5. Approval

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth above, the City Council hereby approves Tentative Parcel Map 37944 PEN20-0122 subject to the Conditions of Approval for Tentative Parcel Map 37944 PEN20-0122 attached hereto as Exhibit A.

Section 6. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. Severability

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. Certification

That the City Clerk for the City Council shall certify to the passage of this Resolution.

PASSED AND ADOPTED THIS ___ day of _____, 2021

CITY OF MORENO VALLEY
CITY COUNCIL

Dr. Yxstian A. Gutierrez,
Mayor of the City of Moreno Valley

ATTEST:

Attachment: Resolution for Tentative Parcel Map 37944 (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Pat Jacquez-Nares, City Clerk

APPROVED AS TO FORM:

Steven B. Quintanilla,
Interim City Attorney

Exhibits:
Exhibit A: Conditions of Approval PEN20-0122

Attachment: Resolution for Tentative Parcel Map 37944 (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

CITY OF MORENO VALLEY CONDITIONS OF APPROVAL
(PEN20-0120, PEN20-0121 & PEN20-0124)

EFFECTIVE DATE:

EXPIRATION DATE:

COMMUNITY DEVELOPMENT DEPARTMENT**Planning Division**

1. A change or modification to the land use or the approved site plans may require a separate approval. Prior to any change or modification, the property owner shall contact the City of Moreno Valley Community Development Department to determine if a separate approval is required.
2. Any expansion to this use or exterior alterations will require the submittal of a separate application(s) and shall be reviewed and approved under separate permit(s). (MC 9.02.080)
3. The developer, or the developer's successor-in-interest, shall be responsible for maintaining any undeveloped portion of the site in a manner that provides for the control of weeds, erosion and dust. (MC 9.02.030)
4. The site shall be developed in accordance with the approved plans on file in the Community Development Department - Planning Division, the Municipal Code regulations, General Plan, and the conditions contained herein. Prior to any use of the project site or business activity being commenced thereon, all Conditions of Approval shall be completed to the satisfaction of the Planning Official. (MC 9.14.020)
5. Any signs indicated on the submitted plans are not included with this approval. Any signs, whether permanent (e.g. wall, monument) or temporary (e.g. banner, flag), require separate application and approval by the Planning Division. No signs are permitted in the public right of way. (MC 9.12)

Special Conditions

6. All site plans, grading plans, landscape and irrigation plans, lighting plans and street improvement plans shall be coordinated for consistency with this approval.
7. This approval shall comply with all applicable requirements of the City of Moreno Valley Municipal Code.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 2

8. Prior to building final, the developer/owner or developer's/owner's successor-in-interest shall pay all applicable impact fees, including but not limited to Transportation Uniform Mitigation fees (TUMF), and the City's adopted Development Impact Fees. (Ord)
9. Prior to the issuance of grading permits, final erosion control landscape and irrigation plans for all cut or fill slopes over 3 feet in height shall be submitted to and approved by the Planning Division. The plans shall be designed in accordance with the slope erosion plan as required by the City Engineer. Man-made slopes greater than 10 feet in height shall be "land formed" to conform to the natural terrain and shall be landscaped and stabilized to minimize visual scarring. (GP Objective 1.5, MC 9.08.080, DG)
10. Prior to recordation of the final map, final median enhancement/landscape/irrigation plans shall be submitted to and approved by the Planning Division, and Public Works Department - Special Districts Division for review and approval by each division. (GP - Circulation Master Plan)
11. All landscaped areas in perpetuity shall be maintained in a healthy and thriving condition, free from weeds, trash and debris. (MC 9.02.030)
12. This tentative map and plot plans shall expire three years after the approval date of this tentative map unless extended as provided by the City of Moreno Valley Municipal Code; otherwise it shall become null and void and of no effect whatsoever in the event the applicant or any successor in interest fails to properly file a final map before the date of expiration. (MC 9.02.230, 9.14.050, 080)
13. Prior to the issuance of grading permits, mitigation measures contained in the Mitigation Monitoring Program approved with this project shall be implemented as provided therein.
14. Prior to any site disturbance and/or grading plan submittal, and or final map recordation, a mitigation monitoring fee, as provided by City ordinance, shall be paid by the applicant/owner. No City permit or approval shall be issued until such fee is paid. (CEQA)
15. Prior to issuance of a building permit, the developer/property owner or developer's successor-in-interest shall pay all applicable impact fees due at permit issuance, including but not limited to Multi-species Habitat Conservation Plan (MSHCP) mitigation fees. (Ord.)
16. Within thirty (30) days prior to any grading or other land disturbance, a pre-construction survey for Burrowing Owls shall be conducted pursuant to the established guidelines of Multiple Species Habitat Conservation Plan. The pre-construction survey shall be submitted to the Planning Division prior to any

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 3

disturbance of the site and/or grading permit issuance.

17. Prior to the issuance of grading permits, a temporary project identification sign shall be erected on the site in a secure and visible manner. The sign shall be conspicuously posted at the site and remain in place until occupancy of the project. The sign shall include the following: The name and address of the development and the developer's name and address to include a 24-hour emergency phone number.
18. Prior to approval of any grading permits, plans for any security gate system shall be submitted to and approved by to the Planning Division.
19. Prior to issuance of grading permits, the developer shall pay the applicable Stephen's' Kangaroo Rat (SKR) Habitat Conservation Plan mitigation fee.
20. Prior to the issuance of any grading permits and prior to any physical disturbance of any natural drainage course, or any wetland determined to contain riparian vegetation, the applicant shall obtain a stream bed alteration agreement or permit, or a written waiver of the requirement for such an agreement or permit, from both the California Department of Fish and Game and the U.S. Army Corps of Engineers. Written verification of such a permit or waiver shall be provided to both the Planning Division and the Public Works Department - Land Development Division. (CEQA, State and Federal codes)
21. Prior to recordation of the final subdivision map, the following documents shall be submitted to and approved by the Planning Division which shall demonstrate that the project will be developed and maintained in accordance with the intent and purpose of the approval:
 - a. The document to convey title
 - b. Deed restrictions, easements, or Covenants, Conditions and Restrictions to be recorded

The approved documents shall be recorded at the same time that the subdivision map is recorded. The documents shall contain provisions for general maintenance of the site, joint access to proposed parcels, open space use restrictions, conservation easements, parking, feeder trails, water quality basins, lighting, landscaping and common area use items such as general building maintenance. The approved documents shall also contain a provision, which provides that they may not be terminated and/or substantially amended without the consent of the City and the developer's successor-in-interest. (MC 9.14.090)

In addition, the following deed restrictions and disclosures shall be included within the document and grant deed of the properties:

- a. The developer shall promote the use of native plants and trees and drought

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 4

tolerant species.

b. All lots designated for open space and or detention basins, shall be included as an easement to, and maintained by a Homeowners Association (HOA) or other private maintenance entity. All reverse frontage landscape areas shall also be maintained by the onsite HOA. Language to this effect shall be included and reviewed within the required Covenant Conditions and Restrictions (CC&Rs) prior to the approval of the final map.

c. Maintenance of any and all common facilities.

22. Applicant/Developer shall defend, indemnify and hold harmless City, city council, commissions, boards, subcommittees and City's elected and appointed officials, commissioners, board members, officers, agents, consultants and employees ("City Parties") from and against any and all liabilities, demands, claims, actions or proceedings and costs and expenses incidental thereto (including costs of defense, settlement and reasonable attorneys' fees), which any or all of them may suffer, incur, be responsible for or pay out as a result of or in connection with any challenge to the legality, validity or adequacy of any of the following items: (i) any agreements by and among City and Developer including without limitation any Development Agreement, (ii) any and all permits, licenses and entitlements approved by City; (iii) any environmental determination made by City in connection with the Project Site or Project; and (iv) any proceedings or other actions undertaken by City in connection with the adoption or approval of any of the above.
23. The project shall be designed and constructed to meet LEED Silver Equivalent with evidence provided to the City. A change or modification shall require separate approval.
24. The site has been approved for a Tentative Parcel Map 37944 to subdivide the lots into two parcels and two light industrial warehouse buildings. Building 1 will be approximately 290,726 square feet and Building 2 will be approximately 98,877 square feet with associated on-site and off-site improvements designed per the approved plans.
25. This approval includes the Tentative Parcel Map 37944 and two Plot Plans for the construction of two light industrial buildings to be completed as one project. All improvements both on-site and off-site shall be completed prior to building shell final of any one building. If the construction of one building is postponed, the parcel/pad area shall be maintained with landscaping and screening as approved by the Community Development Director.
26. Should the applicant/property owner elect to not construct one of the buildings, the building pad shall be precise graded and hydroseeded to prevent dust and erosion.
27. Prior to the start of any construction, temporary security fencing shall be erected. The fencing shall be a minimum of six (6) feet high with locking, gated access and

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 5

shall remain through the duration of construction. Security shall remain in place until the project is completed or the above conditions no longer exist. (Security fencing is required if there is: construction, unsecured structures, unenclosed storage of materials and/or equipment, and/or the condition of the site constitutes a public hazard).

Prior to Building Permit

28. Prior to issuance of any building permits, final landscaping and irrigation plans shall be submitted for review and approved by the Planning Division. The plans shall be prepared in accordance with the City's Landscape Requirements to include a drought tolerant palette. (9.17)
29. Prior to issuance of any building permit, all Conditions of Approval, Mitigation Measures and Airport Land Use Commission Conditions of Approval shall be printed on the building plans.
30. Prior to the issuance of grading permits, decorative (e.g. colored/scored concrete or as approve by the Planning Official) pedestrian pathways across circulation aisles/paths shall be provided throughout the development to connect dwellings with open spaces and/or recreational uses or commercial/industrial buildings with open space and/or parking. and/or the public right-of-way. The pathways shall be shown on the precise grading plan. (GP Objective 46.8, DG)
31. Prior to issuance of building permits, the Planning Division shall review and approve the location and method of enclosure or screening of transformer cabinets, commercial gas meters and back flow preventers as shown on the final working drawings. Location and screening shall comply with the following criteria: transformer cabinets and commercial gas meters shall not be located within required setbacks and shall be screened from public view either by architectural treatment or landscaping; multiple electrical meters shall be fully enclosed and incorporated into the overall architectural design of the building(s); back-flow preventers shall be screened by landscaping. (GP Objective 43.30)
32. Prior to issuance of any grading permit, all Conditions of Approval, Mitigation Measures and Airport Land Use Commission Conditions of Approval shall be printed on the grading plans.
33. Prior to approval of any grading permits, plans for any security gate system shall be submitted to and approved by to the Planning Division.
34. Prior to issuance of grading permits, the developer shall submit fence/wall plans to be included in the Building and Safety submittal for review and approval consistent with the approved plans, the Landscape Requirements and the Municipal Code.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 6

35. Prior to the issuance of grading permits, a temporary project identification sign shall be erected on the site in a secure and visible manner. The sign shall be conspicuously posted at the site and remain in place until occupancy of the project. The sign shall include the following:
 - a. The name (if applicable) and address of the development.
 - b. The developer's name, address, and a 24-hour emergency telephone number.
36. Photometric Plans shall be submitted to the Building and Safety Division for review and approval as part of the lighting and electrical building plan submittal.
37. Prior to the issuance of grading permits, the site plan and grading plans shall show decorative hardscape (e.g. colored concrete, stamped concrete, pavers or as approved by the Planning Official) consistent and compatible with the design, color and materials of the proposed development for all driveway ingress/egress locations of the project.

Prior to Building Final or Occupancy

38. Prior to building final, all required landscaping and irrigation shall be installed per plan, certified by the Landscape Architect and inspected by the Planning Division. (MC 9.03.040, MC 9.17).
39. Prior to building final, all required and proposed fences and walls shall be constructed according to the approved plans on file in the Planning Division. (MC 9.080.070).

Building Division

40. The proposed non-residential project shall comply with the latest Federal Law, Americans with Disabilities Act, and State Law, California Code of Regulations, Title 24, Chapter 11B for accessibility standards for the disabled including access to the site, exits, bathrooms, work spaces, etc.
41. Building plans submitted shall be signed and sealed by a California licensed design professional as required by the State Business and Professions Code.
42. All new structures shall be designed in conformance to the latest design standards adopted by the State of California in the California Building Code, (CBC) Part 2, Title 24, California Code of Regulations including requirements for allowable area, occupancy separations, fire suppression systems, accessibility, etc.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 7

43. Prior to submittal, all new development, including residential second units, are required to obtain a valid property address prior to permit application. Addresses can be obtained by contacting the Building Safety Division at 951.413.3350.
44. Contact the Building Safety Division for permit application submittal requirements.
45. All new buildings 10,000 square feet and over, shall include building commissioning in the design and construction processes of the building project to verify that the building systems and components meet the owner's or owner representative's project requirements (OPR). All requirements in The 2016 California Green Building Standards Code, sections 5.410.2 - 5.410.2.6 must be met.
46. Any construction within the city shall only be as follows: Monday through Friday seven a.m. to seven p.m.(except for holidays which occur on weekdays), eight a.m. to four p.m.; weekends and holidays (as observed by the city and described in the Moreno Valley Municipal Code Chapter 2.55), unless written approval is first obtained from the Building Official or City Engineer.
47. The proposed development shall be subject to the payment of required development fees as required by the City's current Fee Ordinance at the time a building application is submitted or prior to the issuance of permits as determined by the City.
48. The proposed project will be subject to approval by the Eastern Municipal Water District and all applicable fees and charges shall be paid prior to permit issuance. Contact the water district at 951.928.3777 for specific details.
49. The proposed project's occupancy shall be classified by the Building Official and must comply with exiting, occupancy separation(s) and minimum plumbing fixture requirements. Minimum plumbing fixtures shall be provided per the 2016 California Plumbing Code, Table 422.1. The occupant load and occupancy classification shall be determined in accordance with the California Building Code.
50. Prior to permit issuance, every applicant shall submit a properly completed Waste Management Plan (WMP), as a portion of the building or demolition permit process. (MC 8.80.030)

ECONOMIC DEVELOPMENT DEPARTMENT (EDD)

51. New Moreno Valley businesses may work with the Economic Development Department to coordinate job recruitment fairs.
52. New Moreno Valley businesses may adopt a "First Source" approach to employee recruitment that gives notice of job openings to Moreno Valley residents for one

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 8

week in advance of public recruitment.

53. New Moreno Valley businesses are encouraged to hire local residents.
54. New Moreno Valley businesses are encouraged to provide a job fair flyer and/or web announcement to the City in advance of job recruitments, so that the City can assist in publicizing these events.
55. New Moreno Valley businesses may utilize the workforce recruitment services provided by the Moreno Valley Business & Employment Resource Center ("BERC").

The BERC offers free assistance to Moreno Valley businesses recruiting and training potential employees. Complimentary services include:

- Job Announcements
- Applicant testing / pre-screening
- Interviewing
- Job Fair support
- Training space

FIRE DEPARTMENT**Fire Prevention Bureau**

56. All Fire Department access roads or driveways shall not exceed 12 percent grade. (CFC 503.2.7 and MVMC 8.36.060[G])
57. The Fire Department emergency vehicular access road shall be (all weather surface) capable of sustaining an imposed load of 80,000 lbs. GVW, based on street standards approved by the Public Works Director and the Fire Prevention Bureau. The approved fire access road shall be in place during the time of construction. Temporary fire access roads shall be approved by the Fire Prevention Bureau. (CFC 501.4, and MV City Standard Engineering Plan 108d)
58. The angle of approach and departure for any means of Fire Department access shall not exceed 1 ft drop in 20 ft (0.3 m drop in 6 m), and the design limitations of the fire apparatus of the Fire Department shall be subject to approval by the AHJ. (CFC 503 and MVMC 8.36.060)
59. Prior to construction, all locations where structures are to be built shall have an approved Fire Department access based on street standards approved by the Public Works Director and the Fire Prevention Bureau. (CFC 501.4)
60. Prior to issuance of Building Permits, the applicant/developer shall provide the Fire

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 9

- Prevention Bureau with an approved site plan for Fire Lanes and signage. (CFC 501.3)
61. Prior to issuance of Certificate of Occupancy or Building Final, "Blue Reflective Markers" shall be installed to identify fire hydrant locations in accordance with City specifications. (CFC 509.1 and MVLT 440A-0 through MVLT 440C-0)
 62. Prior to issuance of building permits, plans specifying the required structural materials for building construction in high fire hazard severity zones shall be submitted to the Fire Prevention Bureau for approval. (CFC, 4905)
 63. Prior to issuance of Certificate of Occupancy or Building Final, all commercial buildings shall display street numbers in a prominent location on the street side and rear access locations. The numerals shall be a minimum of twelve inches in height. (CFC 505.1, MVMC 8.36.060[I])
 64. Existing fire hydrants on public streets are allowed to be considered available. Existing fire hydrants on adjacent properties shall not be considered available unless fire apparatus access roads extend between properties and easements are established to prevent obstruction of such roads. (CFC 507, 501.3) a - After the local water company signs the plans, the originals shall be presented to the Fire Prevention Bureau for signatures. The required water system, including fire hydrants, shall be installed, made serviceable, and be accepted by the Moreno Valley Fire Department prior to beginning construction. They shall be maintained accessible.
 65. Final fire and life safety conditions will be addressed when the Fire Prevention Bureau reviews building plans. These conditions will be based on occupancy, use, California Building Code (CBC), California Fire Code (CFC), and related codes, which are in effect at the time of building plan submittal.
 66. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire alarm system monitored by an approved Underwriters Laboratory listed central station based on a requirement for monitoring the sprinkler system, occupancy or use. Fire alarm panel shall be accessible from exterior of building in an approved location. Plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9 and MVMC 8.36.100)
 67. The Fire Code Official is authorized to enforce the fire safety during construction requirements of Chapter 33. (CFC Chapter 33 & CBC Chapter 33)
 68. Fire lanes and fire apparatus access roads shall have an unobstructed width of not less than twenty-four (24) feet and an unobstructed vertical clearance of not less than the thirteen (13) feet six (6) inches. (CFC 503.2.1 and MVMC 8.36.060[E])

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 10

69. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire sprinkler system based on square footage and type of construction, occupancy or use. Fire sprinkler plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9, MVMC 8.36.100[D])
70. Prior to issuance of the building permit for development, independent paved access to the nearest paved road, maintained by the City shall be designed and constructed by the developer within the public right of way in accordance with City Standards. (MVMC 8.36.060, CFC 501.4)
71. Prior to issuance of a Certificate of Occupancy or Building Final, a "Knox Box Rapid Entry System" shall be provided. The Knox-Box shall be installed in an accessible location approved by the Fire Code Official. All exterior security emergency access gates shall be electronically operated and be provided with Knox key switches for access by emergency personnel. (CFC 506.1)
72. The minimum number of fire hydrants required, as well as the location and spacing of fire hydrants, shall comply with the C.F.C., MVMC, and NFPA 24. Fire hydrants shall be located no closer than 40 feet to a building. A fire hydrant shall be located within 50 feet of the fire department connection for buildings protected with a fire sprinkler system. The size and number of outlets required for the approved fire hydrants are (6" x 4" x 2 ½" x 2 ½") (CFC 507.5.1, 507.5.7, Appendix C, NFPA 24-7.2.3, MVMC 912.2.1)
73. During phased construction, dead end roadways and streets which have not been completed shall have a turn-around capable of accommodating fire apparatus. (CFC 503.1 and 503.2.5)
74. If construction is phased, each phase shall provide an approved emergency vehicular access way for fire protection prior to any building construction. (CFC 501.4)
75. Plans for private water mains supplying fire sprinkler systems and/or private fire hydrants shall be submitted to the Fire Prevention Bureau for approval. (CFC 105 and CFC 3312.1)
76. The Fire Prevention Bureau is required to set a minimum fire flow for the remodel or construction of all commercial buildings per CFC Appendix B and Table B105.1. The applicant/developer shall provide documentation to show there exists a water system capable of delivering said waterflow for 2 hour(s) duration at 20-PSI residual operating pressure. The required fire flow may be adjusted during the approval process to reflect changes in design, construction type, or automatic fire protection measures as approved by the Fire Prevention Bureau. Specific requirements for

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 11

the project will be determined at time of submittal. (CFC 507.3, Appendix B)

77. Prior to construction, all traffic calming designs/devices must be approved by the Fire Marshal and City Engineer.
78. Prior to issuance of Building Permits, the applicant/developer shall furnish one copy of the water system plans to the Fire Prevention Bureau for review. Plans shall:
 - a. Be signed by a registered civil engineer or a certified fire protection engineer;
 - b. Contain a Fire Prevention Bureau approval signature block; and
 - c. Conform to hydrant type, location, spacing of new and existing hydrants and minimum fire flow required as determined by the Fire Prevention Bureau. The required water system, including fire hydrants, shall be installed, made serviceable, and be accepted by the Moreno Valley Fire Department prior to beginning construction. They shall be maintained accessible.

FINANCIAL & MANAGEMENT SERVICES DEPARTMENT**Moreno Valley Utility**

79. This project requires the installation of electric distribution facilities. A non-exclusive easement shall be provided to Moreno Valley Utility and shall include the rights of ingress and egress for the purpose of operation, maintenance, facility repair, and meter reading.
80. This project requires the installation of electric distribution facilities. The developer shall submit a detailed engineering plan showing design, location and schematics for the utility system to be approved by the City Engineer. In accordance with Government Code Section 66462, the Developer shall execute an agreement with the City providing for the installation, construction, improvement and dedication of the utility system following recordation of final map and/or concurrent with trenching operations and other improvements so long as said agreement incorporates the approved engineering plan and provides financial security to guarantee completion and dedication of the utility system.

The Developer shall coordinate and receive approval from the City Engineer to install, construct, improve, and dedicate to the City all utility infrastructure including but not limited to, conduit, equipment, vaults, ducts, wires (including fiber optic cable), switches, conductors, transformers, and “bring-up” facilities including electrical capacity to serve the identified development and other adjoining, abutting, or benefiting projects as determined by Moreno Valley Utility – collectively referred to as “utility system”, to and through the development, along with any appurtenant real property easements, as determined by the City Engineer necessary for the distribution and/or delivery of any and all “utility services” to and within the project.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 12

For purposes of this condition, “utility services” shall mean electric, cable television, telecommunication (including video, voice, and data) and other similar services designated by the City Engineer. “Utility services” shall not include sewer, water, and natural gas services, which are addressed by other conditions of approval.

The City, or the City’s designee, shall utilize dedicated utility facilities to ensure safe, reliable, sustainable and cost effective delivery of utility services and maintain the integrity of streets and other public infrastructure. Developer shall, at developer’s sole expense, install or cause the installation of such interconnection facilities as may be necessary to connect the electrical distribution infrastructure within the project to the Moreno Valley Utility owned and controlled electric distribution system.

81. Existing Moreno Valley Utility electrical infrastructure shall be preserved in place. The developer will be responsible, at developer’s expense, for any and all costs associated with the relocation of any of Moreno Valley Utility’s underground electrical distribution facilities, as determined by Moreno Valley Utility, which may be in conflict with any developer planned construction on the project site.
82. This project is subject to a Reimbursement Agreement. The Developer is responsible for a proportionate share of costs associated with electrical distribution infrastructure previously installed that directly benefits the project.

PUBLIC WORKS DEPARTMENT**Land Development**

83. Aggregate slurry, as defined in Section 203-5 of Standard Specifications for Public Works Construction, shall be required prior to 90% security reduction or the end of the one-year warranty period of the public streets as approved by the City Engineer. If slurry is required, a slurry mix design shall be submitted for review and approved by the City Engineer. The latex additive shall be Ultra Pave 70 (for anionic) or Ultra Pave 65 K (for cationic) or an approved equal per the geotechnical report. The latex shall be added at the emulsion plant after weighing the asphalt and before the addition of mixing water. The latex shall be added at a rate of two to two-and-one-half (2 to 2½) parts to one-hundred (100) parts of emulsion by volume. Any existing striping shall be removed prior to slurry application and replaced per City standards.
84. The developer shall comply with all applicable City ordinances and resolutions including the City’s Municipal Code (MC) and if subdividing land, the Government Code (GC) of the State of California, specifically Sections 66410 through 66499.58, said sections also referred to as the Subdivision Map Act (SMA). [MC 9.14.010]
85. The final approved conditions of approval (COAs) issued and any applicable

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 13

Mitigation Measures by the Planning Division shall be photographically or electronically placed on mylar sheets and included in the Grading and Street Improvement plans.

86. The developer shall monitor, supervise and control all construction related activities, so as to prevent these activities from causing a public nuisance, including but not limited to, insuring strict adherence to the following:
- (a) Removal of dirt, debris, or other construction material deposited on any public street no later than the end of each working day.
 - (b) Observance of working hours as stipulated on permits issued by the Land Development Division.
 - (c) The construction site shall accommodate the parking of all motor vehicles used by persons working at or providing deliveries to the site.
 - (d) All dust control measures per South Coast Air Quality Management District (SCAQMD) requirements during the grading operations.
- Violation of any condition, restriction or prohibition set forth in these conditions shall subject the owner, applicant, developer or contractor(s) to remedy as noted in City Municipal Code 8.14.090. In addition, the City Engineer or Building Official may suspend all construction related activities for violation of any condition, restriction or prohibition set forth in these conditions until such time as it has been determined that all operations and activities are in conformance with these conditions.
87. Drainage facilities (e.g., catch basins, water quality basins, etc.) with sump conditions shall be designed to convey the tributary 100-year storm flows. Secondary emergency escape shall also be provided.
88. In the event right-of-way or offsite easements are required to construct offsite improvements necessary for the orderly development of the surrounding area to meet the public health and safety needs, the developer shall make a good faith effort to acquire the needed right-of-way in accordance with the Land Development Division's administrative policy. If unsuccessful, the Developer shall enter into an agreement with the City to acquire the necessary right-of-way or offsite easements and complete the improvements at such time the City acquires the right-of-way or offsite easements which will permit the improvements to be made. The developer shall be responsible for all costs associated with the right-of-way or easement acquisition. [GC 66462.5]
89. If improvements associated with this project are not initiated within two (2) years of the date of approval of the Public Improvement Agreement (PIA), the City Engineer may require that the engineer's estimate for improvements associated with the project be modified to reflect current City construction costs in effect at the time of request for an extension of time for the PIA or issuance of a permit. [MC 9.14.210(B)(C)]

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 14

90. The developer shall protect downstream properties from damage caused by alteration of drainage patterns (i.e. concentration or diversion of flow, etc). Protection shall be provided by constructing adequate drainage facilities, including, but not limited to, modifying existing facilities or by securing a drainage easement. [MC 9.14.110]
91. Public drainage easements, when required, shall be a minimum of 25 feet wide and shall be shown on the map and plan, and noted as follows: "Drainage Easement – no structures, obstructions, or encroachments by land fills are allowed." In addition, the grade within the easement area shall not exceed a 3:1 (H:V) slope, unless approved by the City Engineer.
92. The maintenance responsibility of the proposed storm drain line shall be clearly identified. Unless otherwise noted on improvement plans, storm drain lines within private property will be privately maintained and those within public streets will be publicly maintained.
93. This project shall submit civil engineering design plans, reports and/or documents (prepared by a registered/licensed civil engineer) for review and approval by the City Engineer per the current submittal requirements, prior to the indicated threshold or as required by the City Engineer. The submittal consists of, but is not limited to, the following:
- a. Parcel Map (recordation prior to building permit issuance);
 - b. Rough grading w/ erosion control plan (prior to grading permit issuance);
 - c. Precise grading w/ erosion control plan (prior to building permit issuance);
 - d. Street improvement plan w/ Signing & Striping (prior to parcel map approval);
 - e. RCFC&WCD storm drain plans (prior to parcel map approval);
 - f. Cooperative Agreement between the City, RCFC&WCD and the developer (prior to RCFC&WCD storm drain plan approval);
 - g. Final drainage study (prior to rough grading plan and storm drain plan approval);
 - h. Final WQMP (prior to grading plan approval);
 - i. As-Built revision for all plans (prior to Occupancy release)
94. Water quality best management practices (BMPs) designed to meet Water Quality Management Plan (WQMP) requirements for single-family residential development shall not be used as a construction BMP. Water quality BMPs shall be maintained for the entire duration of the project construction and be used to treat runoff from those developed portions of the project. Water quality BMPs shall be protected from upstream construction related runoff by having proper best management practices in place and maintained. Water quality BMPs shall be graded per the approved design plans and once landscaping and irrigation has been installed, it and its maintenance shall be turned over to an established Homeowner's

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 15

Association (HOA). The Homeowner's Association shall enter into an agreement with the City for basin maintenance.

95. When any proposed private storm drain system connects to a public storm drain system, a storm drain manhole shall be placed at the right-of-way or property line to mark the beginning of the publicly maintained portion of the storm drain system.

Prior to Grading Plan Approval

96. Resolution of all drainage issues shall be as approved by the City Engineer.
97. A final detailed drainage study (prepared by a registered/licensed civil engineer) shall be submitted for review and approved by the City Engineer. The study shall include, but not be limited to: existing and proposed hydrologic conditions as well as hydraulic calculations for all drainage control devices and storm drain lines. The study shall analyze 1, 3, 6 and 24-hour duration events for the 2, 5, 10 and 100-year storm events [MC 9.14.110(A.1)]. A digital (pdf) copy of the approved drainage study shall be submitted to the Land Development Division.
98. Emergency overflow areas shall be shown at all applicable drainage improvement locations in the event that the drainage improvement fails or exceeds full capacity. This may include, but not be limited to, secondary storm drains, riser inlets, concrete spillways, or redundancy in pump systems.
99. A final project-specific Water Quality Management Plan (WQMP) shall be submitted for review and approved by the City Engineer, which:
- Addresses Site Design Best Management Practices (BMPs) such as minimizing impervious areas, maximizing permeability, minimizes directly connected impervious areas to the City's street and storm drain systems, and conserves natural areas;
 - Incorporates Source Control BMPs and provides a detailed description of their implementation;
 - Describes the long-term operation and maintenance requirements for BMPs requiring maintenance; and
 - Describes the mechanism for funding the long-term operation and maintenance of the BMPs.
- A copy of the final WQMP template can be obtained on the City's Website or by contacting the Land Development Division. A digital (pdf) copy of the approved final project-specific Water Quality Management Plan (WQMP) shall be submitted to the Land Development Division.
100. The final project-specific Water Quality Management Plan (WQMP) shall be consistent with the approved P-WQMP, as well as in full conformance with the document: "Water Quality Management Plan - A Guidance Document for the Santa Ana Region of Riverside County" dated October 22, 2012. The F-WQMP shall be

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 16

submitted and approved prior to application for and issuance of grading permits. At a minimum, the F-WQMP shall include the following: Site Design BMPs; Source Control BMPs, Treatment Control BMPs, Operation and Maintenance requirements for BMPs and sources of funding for BMP implementation.

a. The Applicant has proposed to incorporate the use of two (2) modular wetland systems along the southerly project boundary and three (3) bio-retention swales along the northerly project boundary . Final design and sizing details of all BMPs must be provided in the first submittal of the F-WQMP. The Applicant acknowledges that more area than currently shown on the plans may be required to treat site runoff as required by the WQMP guidance document.

b. The Applicant shall substantiate the applicable Hydrologic Condition of Concerns (HCOC) in Section F of the F-WQMP. <The HCOC designates that the project will be required to provide HCOC mitigation..

c. All proposed LID BMP's shall be designed in accordance with the RCFC&WCD's Design Handbook for Low Impact Development Best Management Practices, dated September 2011.

d. The proposed LID BMP's as identified in the project-specific P-WQMP shall be incorporated into the Final WQMP.

e. The NPDES notes per City Standard Drawing No. MVFE-350-0 shall be included in the grading plans.

f. Post-construction treatment control BMPs, once placed into operation for post-construction water quality control, shall not be used to treat runoff from construction sites or unstabilized areas of the site.

g. Prior to precise grading plan approval, the grading plan shall show any proposed trash enclosure to include a cover (roof) and sufficient size for dual bin (1 for trash and 1 for recyclables). The architecture shall be approved by the Planning Division and any structural approvals shall be made by the Building and Safety Division.

101. The developer shall ensure compliance with the City Grading ordinance, these Conditions of Approval and the following criteria:

a. The project street and lot grading shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage area and outlet points. Unless otherwise approved by the City Engineer, lot lines shall be located at the top of slopes.

b. Any grading that creates cut or fill slopes adjacent to the street shall provide erosion control, sight distance control, and slope easements as approved by the City Engineer.

c. All improvement plans are substantially complete and appropriate clearance letters are provided to the City.

d. A soils/geotechnical report (addressing the soil's stability and geological conditions of the site) shall be submitted to the Land Development Division for review. A digital (pdf) copy of the soils/geotechnical report shall be submitted to the Land Development Division.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 17

102. Grading plans (prepared by a registered/licensed civil engineer) shall be submitted for review and approved by the City Engineer per the current submittal requirements.
103. The developer shall select Low Impact Development (LID) Best Management Practices (BMPs) designed per the latest version of the Water Quality Management Plan (WQMP) - a guidance document for the Santa Ana region of Riverside County.
104. The developer shall pay all remaining plan check fees.
105. The proposed private storm drain Line "E" on Parcel 2 shall connect to the existing public storm drain lateral crossing Alessandro Boulevard and connect to storm drain Line "E" located on APN 297-170-089. Storm drain manholes shall be placed at the point of connections (at right of way or property line) to mark the separation of the publicly maintained storm drain and privately maintained storm drain.
106. A Storm Water Pollution Prevention Plan (SWPPP) shall be prepared in conformance with the State's current Construction Activities Storm Water General Permit. A copy of the current SWPPP shall be kept at the project site and be available for review upon request.
107. For projects that will result in discharges of storm water associated with construction with a soil disturbance of one or more acres of land, the developer shall submit a Notice of Intent (NOI) and obtain a Waste Discharger's Identification number (WDID#) from the State Water Quality Control Board (SWQCB) which shall be noted on the grading plans.

Prior to Grading Permit

108. A receipt showing payment of the Area Drainage Plan (ADP) fee to Riverside County Flood Control and Water Conservation District shall be submitted. [MC 9.14.100(O)]
109. For non-subdivision projects, a copy of the Covenants, Conditions and Restrictions (CC&Rs) shall be submitted for review by the City Engineer. The CC&Rs shall include, but not be limited to, access easements, reciprocal access, private and/or public utility easements as may be relevant to the project.
110. If the developer chooses to construct the project in phases, a Construction Phasing Plan for the construction of on-site public or private improvements shall be submitted for review and approved by the City Engineer.
111. Prior to the payment of the Development Impact Fee (DIF), the developer may enter

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 18

into a DIF Improvement Credit Agreement to secure credit for the construction of applicable improvements. If the developer fails to complete this agreement prior to the timing specified above, credits may not be given. The developer shall pay current DIF fees adopted by the City Council. [Ord. 695 § 1.1 (part), 2005] [MC 3.38.030, 040, 050]

112. A digital (pdf) copy of all approved grading plans shall be submitted to the Land Development Division.
113. Security, in the form of a cash deposit (preferable), bond or letter of credit shall be submitted as a guarantee of the implementation and maintenance of erosion control measures. At least twenty-five (25) percent of the required security shall be in the form of a cash deposit with the City. [MC 8.21.160(H)]
114. Security, in the form of a cash deposit (preferable), bond or letter of credit shall be submitted as a guarantee of the completion of the grading operations for the project. [MC 8.21.070]
115. The developer shall pay all applicable inspection fees.
116. Prior to the payment of the Transportation Uniform Mitigation Fee (TUMF), the developer may enter into a TUMF Improvement Credit Agreement to secure credit for the construction of applicable improvements. If the developer fails to complete this agreement by the timing specified above, credits may not be given. The developer shall pay current TUMF fees adopted by the City Council. [Ord. 835 § 2.1, 2012] [MC 3.44.060]

Prior to Map Approval

117. A copy of the Covenants, Conditions and Restrictions (CC&R's) shall be submitted for review and approved by the City Engineer. The CC&R's shall include, but not be limited to, access easements, reciprocal access, private and/or public utility easements as may be relevant to the project. Alternatively, access easements, reciprocal access, private and/or public utility easements may be submitted for review and approval by separate instruments that will be recorded once approved.
118. The developer shall enter into a Cooperative Agreement with the City and Riverside County Flood Control and Water Conservation District establishing the terms and conditions covering the inspection, operation and maintenance of Master Drainage Plan facilities required to be constructed as part of the project.
119. After recordation, a digital (pdf) copy of the recorded map shall be submitted to the Land Development Division.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 19

120. Resolution of all drainage issues shall be as approved by the City Engineer.
121. A parcel map (prepared by a registered civil engineer and/or licensed surveyor) shall be submitted for review and approved by the City Engineer per the current submittal requirements.
122. The developer shall guarantee the completion of all related improvements required for this project by executing a Public Improvement Agreement (PIA) with the City and posting the required security. [MC 9.14.220]
123. All public improvement plans required for this project shall be approved by the City Engineer in order to execute the Public Improvement Agreement (PIA).
124. The developer shall comply with the requirements of the City Engineer based on recommendations of the Riverside County Flood Control District regarding the construction of County Master Plan Facilities.
125. All street dedications shall be free of all encumbrances, irrevocably offered to the public and shall continue in force until the City accepts or abandons such offers, unless otherwise approved by the City Engineer.

Prior to Improvement Plan Approval

126. The developer is required to bring any existing access ramps adjacent to and fronting the project to current ADA (Americans with Disabilities Act) requirements. However, when work is required in an intersection that involves or impacts existing access ramps, all access ramps in that intersection shall be retrofitted to comply with current ADA requirements, unless otherwise approved by the City Engineer.
127. The developer shall submit clearances from all applicable agencies, and pay all applicable plan check fees.
128. The street improvement plans shall comply with current City policies, plans and applicable City standards (i.e. MVSI-160 series, etc.) throughout this project.
129. The design plan and profile shall be based upon a centerline, extending beyond the project boundaries a minimum distance of 300 feet at a grade and alignment approved by the City Engineer.
130. Drainage facilities (i.e. catch basins, etc.) with sump conditions shall be designed to convey the tributary 100-year storm flows. Secondary emergency escape shall also be provided.
131. The hydrology study shall be designed to accept and properly convey all off-site drainage flowing onto or through the site. In the event that the City Engineer permits

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 20

the use of streets for drainage purposes, the provisions of current City standards shall apply. Should the quantities exceed the street capacity or the use of streets be prohibited for drainage purposes, as in the case where one travel lane in each direction shall not be used for drainage conveyance for emergency vehicle access on streets classified as minor arterials and greater, the developer shall provide adequate facilities as approved by the City Engineer. [MC 9.14.110 A.2]

132. All public improvement plans (prepared by a licensed/registered civil engineer) shall be submitted for review and approved by the City Engineer per the current submittal requirements.
133. Any missing or deficient existing improvements along the project frontage within Alessandro Boulevard shall be constructed or secured for construction. The City Engineer may require the ultimate structural section for pavement to half-street width plus 18 feet or provide core test results confirming that the existing pavement section is per current City Standards; additional signing & striping to accommodate increased traffic imposed by the development, removal and replacement of improvements due to wear or damage from construction activity, or additional transitional improvements for the orderly development of public infrastructure..
134. Storm drain improvement plans for Sunnymead Broadiaea Avenue Storm Drain Line "A" Extension, from Alessandro Boulevard to the existing Line "A" located on APN 297-170-089, shall be submitted for review and approval by the City and RCFC&WCD. This storm drain has been identified as a future RCFC&WCD maintained facility as shown on Drawing No. 4-888, Sheet 8A (Preliminary Alignment Study) and referenced as Stage 3 of that certain Cooperative Agreement recorded on July 12, 2016 as Document No. 2016-0289060. This project will be required to satisfy all RCFC&WCD requirements for the acceptance and maintenance by RCFC&WCD including, but not limited to, the following:
 - a. Enter into a Cooperative Agreement between the City, RCFC&WCD, and the developer;
 - b. Provide storm drain improvement plans of Stage 3 storm drain;
 - c. Provide security for the construction of storm drain improvements; and
 - d. Upon commencement of Stage 3 storm drain improvements and to the satisfaction of the City and RCFC&WCD, inspect, clean, repair, and maintain the existing portion of Line "A" (also referred to as Stage 2) from the current inlet at the northerly property line of APN 297-170-089 to the point of connection located within Broadiaea Avenue.

In the event that Stage 3 does not meet the requirements and satisfaction of RCFC&WCD to assume maintenance responsibility, the storm drain shall be privately owned and maintained by the property owner.

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 21

135. For non-subdivision projects, all street dedications shall be free of encumbrances, irrevocably offered to the public and shall continue in force until the City accepts or abandons such offers, unless otherwise approved by the City Engineer.
136. The plans shall indicate any restrictions on trench repair pavement cuts to reflect the City's moratorium on disturbing newly-constructed pavement less than three (3) years old and recently slurry sealed streets less than one (1) year old. Pavement cuts may be allowed for emergency repairs or as specifically approved in writing by the City Engineer. Special requirements shall be imposed for repaving, limits to be determined by the City Engineer.
137. All dry and wet utilities shall be shown on the plans and any crossings shall be potholed to determine actual location and elevation. Any conflicts shall be identified and addressed on the plans. The pothole survey data shall be submitted to Land Development with the public improvement plans for reference purposes only. The developer is responsible to coordinate with all affected utility companies and bear all costs of any utility relocation.
138. Alessandro Boulevard, Major Divided Arterial, City Standard MVSI-101A (134-foot RW / 110-foot CC) shall be constructed to half-width plus an additional 18 feet north of the centerline, along the entire project's north frontage. At a minimum, the existing street shall receive a 1.5" grind and overlay (PG 64-16 ARHM-GG-C). Pavement core samples will be required to determine the extent of pavement rehabilitation of the existing pavement which may include the removal and replacement of the entire structural section. All 4-foot right-of-way dedications at the driveway approaches, per City Standard MVSI-112C-0, shall be shown on the parcel map. Improvements shall consist of, but not be limited to, pavement, base, curb, gutter, sidewalk, driveway approaches, removal and replacement of existing storm drain and catch basins, any necessary offsite improvement transition/joins to existing, streetlights, relocation of any power poles with electrical lines of 115,000 volts or greater to meet an 18 inch minimum distance from the face of curb to the face of pole, undergrounding of any power poles with overhead utility lines or electrical lines less than 115,000 volts, and dry and wet utilities.

Prior to Encroachment Permit

139. A digital (pdf) copy of all approved improvement plans shall be submitted to the Land Development Division.
140. All applicable inspection fees shall be paid.
141. For non-subdivision projects, execution of a Public Improvement Agreement (PIA) and/or security (in the form of a cash deposit or other approved means) may be required as determined by the City Engineer. [MC 9.14.220]

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 22

142. The plans shall indicate any restrictions on trench repair pavement cuts to reflect the City's moratorium on disturbing newly-constructed pavement less than three (3) years old and recently slurry sealed streets less than one (1) year old. Pavement cuts may be allowed for emergency repairs or as specifically approved in writing by the City Engineer. Special requirements shall be imposed for repaving, limits to be determined by the City Engineer.
143. Any work performed within public right-of-way requires an encroachment permit.

Prior to Occupancy

144. All outstanding fees shall be paid.
145. All required as-built plans (prepared by a registered/licensed civil engineer) shall be submitted for review and approved by the City Engineer per the current submittal requirements.
146. The final/precise grade certification shall be submitted for review and approved by the City Engineer.
147. For commercial, industrial and multi-family projects, in compliance with Proposition 218, the developer shall agree to approve the City of Moreno Valley NPDES Regulatory Rate Schedule that is in place at the time of certificate of occupancy issuance. Under the current permit for storm water activities required as part of the National Pollutant Discharge Elimination System (NPDES) as mandated by the Federal Clean Water Act, this project is subject to the following requirements:
- a. Select one of the following options to meet the financial responsibility to provide storm water utilities services for the required continuous operation, maintenance, monitoring system evaluations and enhancements, remediation and/or replacement, all in accordance with Resolution No. 2002-46.
 - i. Participate in the mail ballot proceeding in compliance with Proposition 218, for the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule and pay all associated costs with the ballot process; or
 - ii. Establish an endowment to cover future City costs as specified in the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule.
 - b. Notify the Special Districts Division of the intent to request building permits 90 days prior to their issuance and the financial option selected. The financial option selected shall be in place prior to the issuance of certificate of occupancy. [California Government Code & Municipal Code]
148. The developer shall complete all public improvements in conformance with current

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 23

City standards, except as noted in the Special Conditions, including but not limited to the following:

a. Street improvements including, but not limited to: pavement, base, curb and/or gutter, cross gutters, spandrel, sidewalks, drive approaches, pedestrian ramps, street lights (<MVU: SL-2 / SCE: LS-2>), signing, striping, under sidewalk drains, landscaping and irrigation, medians, pavement tapers/transitions and traffic control devices as appropriate.

b. Storm drain facilities including, but not limited to: storm drain pipe, storm drain laterals, open channels, catch basins and local depressions.

c. City-owned utilities.

d. Sewer and water systems including, but not limited to: sanitary sewer, potable water and recycled water.

e. Under grounding of all existing and proposed utilities adjacent to and on-site. [MC 9.14.130]

f. Relocation of overhead electrical utility lines including, but not limited to: electrical, cable and telephone.

149. All punch list work for off-site and on-site improvements shall be completed.
150. For commercial, industrial and multi-family projects, a Stormwater Treatment Device and Control Measure Access and Maintenance Covenant", "Maintenance Agreement for Water Quality Improvements located in the public right-of-way" and a "Declaration of Restrictive Covenants (encroachment on City easement)" shall be recorded to provide public notice of the maintenance requirements to be implemented per the approved final project-specific WQMP. A boilerplate copy of the covenants and agreements can be obtained by contacting the Land Development Division.
151. The applicant shall ensure the following, pursuant to Section XII. I. of the 2010 NPDES Permit:
- a. Field verification that structural Site Design, Source Control and Treatment Control BMPs are designed, constructed and functional in accordance with the approved Final Water Quality Management Plan (WQMP).
- b. Certification of best management practices (BMPs) from a state licensed civil engineer. An original WQMP BMP Certification shall be submitted for review and approved by the City Engineer.
152. The Developer shall comply with the following water quality related items:
- a. Notify the Land Development Division prior to construction and installation of all structural BMPs so that an inspection can be performed.
- b. Demonstrate that all structural BMPs described in the approved final project-specific WQMP have been constructed and installed in conformance with the approved plans and specifications;
- c. Demonstrate that Developer is prepared to implement all non-structural BMPs

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 24

described in the approved final project-specific WQMP; and

d. Demonstrate that an adequate number of copies of the approved final project-specific WQMP are available for future owners/occupants.

e. Clean and repair the water quality BMP's, including re-grading to approved civil drawing if necessary.

f. Obtain approval and complete installation of the irrigation and landscaping.

Special Districts Division

153. This project is located within the boundary of Community Facilities District No. 4–Maintenance (CFD No. 4-M) and is subject to hydrology study determination based upon the final tentative parcel map. The project is conditioned to provide a funding source which will be used for maintenance of stormwater and detention basin improvements. The Developer shall satisfy the condition with one of the financing options outlined below.

a. In compliance with Proposition 218, the property owner shall agree to approve the special election for annexation into CFD No. 4-M and pay all associated costs with the special election process and formation costs, if any; or

b. Establish an endowment fund which shall be used to cover future maintenance costs for storm water and detention basin improvements benefiting this project.

The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org of its selected financing option when submitting the application for building permit issuance. The option for participating in a special election requires 90 days to complete the special election process. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution.

The financial option selected shall be in place prior to the first issuance of certificate of occupancy for this project.

154. MAJOR INFRASTRUCTURE FINANCING DISTRICT. This project has been identified to potentially be included in the formation of a special financing district for the construction and maintenance of major infrastructure improvements which may include but are not limited to thoroughfares, bridges, and certain flood control improvements. The property owner(s) shall participate in such district and pay any special tax, assessment, or fee levied upon the project property for such district. At the time of the public hearing to consider formation of or annexation into the district, the qualified elector(s) will not protest the formation or annexation, but will retain the right to object to any eventual tax/assessment/fee that is not equitable should the financial burden of the tax/assessment/fee not be reasonably proportionate to the

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 25

benefit the affected property obtains from the improvements to be installed and/or maintained. The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org when submitting an application for the first building permit to determine whether the development will be subjected to this condition. If subject to the condition, the special election requires a minimum 90-day process in compliance with the provisions of Article 13C of the California Constitution.

155. The parcel(s) associated with this project have been incorporated into the Moreno Valley Community Services District Zone A (Parks & Community Services) and Zone C (Arterial Street Lighting). All assessable parcels therein shall be subject to annual parcel taxes for Zone A and Zone C for operations and capital improvements.
156. This project is conditioned to provide a funding source for the operation and maintenance of public improvements and/or services associated with new development in that territory. The Developer shall satisfy this condition with one of the options below.

a. Participate in a special election for maintenance/services and pay all associated costs of the election process and formation, if any. Financing may be structured through a Community Facilities District, Landscape and Lighting Maintenance District, or other financing structure as determined by the City; or

b. Establish an endowment fund to cover the future maintenance and/or service costs.

The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org of its selected financial option prior to City Council action authorizing recordation of the final map for the development. A minimum of 90 days is needed to complete the special election process. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution for conducting a special election.

The financial option selected shall be in place prior to the issuance of the first building permit for the project.

157. This project is conditioned to provide a funding source for the following special financing program(s):

a. Landscape Maintenance Services for parkway, open space, and/or median landscaping on Alessandro Blvd.

The Developer's responsibility is to provide a funding source for the capital

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 26

improvements and the continued maintenance of the landscaped area. The Developer shall satisfy this condition with one of the options below.

i. Participate in a special election (mail ballot proceeding) and pay all associated costs of the special election and formation, if any. Financing may be structured through a Community Services District zone, Community Facilities District, Landscape and Lighting Maintenance District, or other financing structure as determined by the City; or

ii. Establish a Property Owner's Association (POA) or Home Owner's Association (HOA) which will be responsible for any and all operation and maintenance costs.

The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org of its selected financial option prior to City Council action authorizing recordation of the final map for the development. The option for participating in a special election requires approximately 90 days to complete the special election process. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution for conducting a special election.

The financial option selected shall be in place prior to the issuance of the first building permit for this project.

158. Commercial (R) If Land Development, a Division of the Public Works Department, requires this project to supply a funding source necessary to provide for, but not limited to, stormwater utilities services for the continuous operation, remediation and/or replacement, maintenance, monitoring, systems evaluation and enhancements of on-site facilities and performing annual inspections of the affected areas to ensure compliance with state mandated stormwater regulations, a funding source needs to be established. The Developer must notify the Special Districts Division at 951.413.3480 or specialdistricts@moval.org of its selected financial option for the National Pollution Discharge Elimination System (NPDES) program (see Land Development's related condition) 90 days prior to City Council action authorizing recordation of the final map for the development and participate in a special election process. This allows adequate time to be in compliance with the provisions of Article 13D of the California Constitution. (California Health and Safety Code Sections 5473 through 5473.8 (Ord. 708 Section 3.1, 2006) & City of Moreno Valley Municipal Code Title 3, Section 3.50.050.)
159. This project has been identified to be included in the formation of a Community Facilities District for Public Safety services including but not limited to Police, Fire Protection, Paramedic Services, Park Rangers, and Animal Control services. The property owner(s) shall not protest the formation; however, they retain the right to

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 27

object to the rate and method of maximum special tax. In compliance with Proposition 218, the property owner shall agree to approve the mail ballot proceeding (special election) for either formation of the CFD or annexation into an existing district that may already be established. The Developer must notify the Special Districts Division at 951.413.3480 or specialdistricts@moval.org of its intent to record the final map for the development 90 days prior to City Council action authorizing recordation of the map. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution. (California Government Code Section 53313 et. seq.)

160. The existing parkway/median along the frontage of the project shall be brought to current City Standards. Improvements may include but are not limited to: plant material, irrigation, and hardscape.
161. The ongoing maintenance of any landscaping required to be installed behind the curb shall be the responsibility of the property owner.
162. Any damage to existing landscape areas maintained by the City of Moreno Valley due to project construction shall be repaired/replaced by the Developer, or Developer's successors in interest, at no cost to the City of Moreno Valley.
163. **PARKS MAINTENANCE FUNDING.** Prior to applying for the 1st Building Permit, the qualified elector (e.g. property owner) must initiate the process (i.e. pay the annexation fee or fund an endowment) to provide an ongoing funding source for the continued maintenance, enhancement, and or retrofit of parks, open spaces, linear parks, and/or trails systems, and programs.
- This condition must be fully satisfied prior to issuance of the 1st Certificate of Occupancy. This condition will be satisfied with the successful annexation/formation (i.e. special election process) into a special financing district and payment of all costs associated with the special election process. Annexation into a special financing district requires an annual payment of the annual special tax, assessment, or fee levied against the property tax bill, or other lawful means, of the parcels of the project for such district. At the time of the public hearing to consider annexation into or formation of the district, the qualified elector(s) will not protest the annexation or formation, but will retain the right to object to any eventual tax/assessment/fee that is not equitable should the financial burden of the tax/assessment/fee not be reasonably proportionate to the benefit the affected property receives from the improvements to be installed and/or maintained or services provided. The special election requires a minimum 90-day process in compliance with the provisions of Article 13C of the California Constitution, Proposition 218, or other applicable legislation, and consistent with the scheduling for City Council meetings.
- Alternatively, the condition can be satisfied by the Developer funding an endowment in an amount sufficient to yield an annual revenue stream that meets the annual obligation. The Developer must contact Special Districts Administration at

951.413.3470 or at SAdmin@moval.org to satisfy this condition.

Transportation Engineering Division

164. Conditions of approval may be modified or added if a phasing plan is submitted for this development.
165. All proposed on-site traffic signing and striping should be accordance with the latest California Manual on Uniform Traffic Control Devices (CAMUTCD).
166. Sight distance at the proposed roadways and driveways shall conform to City of Moreno Valley Standard No. MVSI-164A,B,C-0 at the time of preparation of final grading, landscape, and street improvement plans.
167. Communication conduit along Alessandro Boulevard shall be required per City Standard No. MVSI-186-0. Any improvements undertaken by this project shall be consistent with the City standards for this facility.
168. Alessandro Boulevard is designated as a 6-Lane Divided Arterial (134' RW/110'CC) per City Standard Plan No. MVSI-101A and shall be improved to its ultimate half-width plus 23' with median and necessary transition improvements. The existing eastbound left turn pocket at the intersection of Graham Street and Alessandro Boulevard shall be modified to provide 250 feet of vehicle storage. A Class II Bikeway shall be provided along project frontage.
169. Prior to issuance of an encroachment permit, construction traffic control plans shall be prepared by a qualified, registered Civil or Traffic engineer and submitted for plan approval.
170. Prior to final approval of any landscaping or monument sign plans, the project plans shall demonstrate that sight distance at the project driveways conforms to City Standard Plan No. MVSI-164A, B, C-0.
171. Prior to the final approval of the street improvement plans, a signing and striping plan shall be prepared per City of Moreno Valley Standard Plans - Section 4 for Alessandro Boulevard.
172. Prior to issuance of a Building Final or Certificate of Occupancy, all approved signing and striping shall be installed per current City Standards
173. All project driveways shall conform to Section 9.11.080, and Table 9.11.080-14 of the City's Development Code – Design Guidelines and City of Moreno Valley Standard Plans No. MVSI-112C-0 for commercial driveway approaches. Access at all driveways shall be right-in and right-out access only.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 29

174. Prior to final approval of the street improvement plans, a median modification plan shall be required to modify the existing raised, landscaped median on Alessandro Boulevard, west of Graham Street. The median shall be designed per current City Standards to extend the eastbound left-turn storage length to 250 feet at the Alessandro Boulevard/Graham Street intersection.
175. During construction activity, developer is responsible for regularly scheduled street sweeping per approved street sweeping schedule. Failure to provide regularly scheduled street sweeping during construction activity at the approved times shall result in re-inspection fees (amounts to be determined by City Engineer) and/or project suspension until street sweeping is provided.

RESOLUTION NUMBER 2021-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY APPROVING PLOT PLANS PEN20-0121 AND PEN20-0124 FOR THE COMPASS DANBE CENTERPOINTE PROJECT LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and

WHEREAS, CDRE Holdings LLC., ("Developer") has filed an application for the approval of the Compass Danbe Centerpointe Project, which includes the approval of Plot Plans PEN20-0121 and PEN20-0124 ("Applications") for the development of two light industrial buildings approximately 290,726 and 98,877 square feet in size with associated public improvements ("Project") located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003) ("Project Site"); and

WHEREAS, Section 9.02.070 (Plot Plan) of the Moreno Valley Municipal Code acknowledges that the purpose of plot plans is to provide a mechanism by which all new construction of industrial, commercial or multiple-family residential can be reviewed when not subject to other discretionary review processes which have review authority over project design; and

WHEREAS, the Application has been evaluated in accordance with Section 9.02.070 (Plot Plan) of the Municipal Code with consideration given to the City's General Plan, Zoning Ordinance, and other applicable laws and regulations; and

WHEREAS, Section 9.02.070 of the Municipal Code imposes conditions of approval upon projects for which a Plot Plan is required, which conditions may be imposed by the City to address on-site improvements, off-site improvements, the manner in which the site is used and any other conditions as may be deemed necessary to protect the public health, safety and welfare and ensure that the proposed Project will be developed in accordance with the purpose and intent of Title 9 (Planning and Zoning) of the Municipal Code; and

WHEREAS, Staff has presented for the City Council's consideration Conditions of Approval to be imposed upon Plot Plans PEN20-0121 and PEN20-0124, which conditions have been deemed necessary to protect the public health, safety and welfare and ensure that the proposed Project will be developed in accordance with the purpose and intent of Title 9 (Planning and Zoning) of the Municipal Code; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Municipal Code and Government Code section 65905, a public hearing before the Planning Commission was scheduled for August 26, 2021, and

notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Site; and

WHEREAS, on August 21, 2021, the public hearing to consider the Application was duly conducted by the Planning Commission at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, on August 21, 2021 a hearing was conducted by the Planning Commission to consider a recommendation that the City Council approve the Plot Plan; and

WHEREAS, on August 21, 2021 a hearing was conducted by the Planning Commission whereby the Planning Commission approved Planning Commission Resolution 2021-28, a recommendation that the City Council approve the Plot Plan; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Municipal Code and Government Code section 65905, a public hearing was scheduled for October 5, 2021 and notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Project Site; and

WHEREAS, on October 5, 2021, the public hearing to consider the Applications was duly conducted by the City Council at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, consistent with the requirements of Section 9.02.070 (Plot Plan) of the Municipal Code, at the public hearing the City Council considered Conditions of Approval to be imposed upon Plot Plans PEN20-0121 and PEN20-0124, which conditions were prepared by Planning Division staff who deemed said conditions to be necessary to protect the public health, safety and welfare and to ensure the proposed Project will be developed in accordance with the purpose and intent of Title 9 (Planning and Zoning) of the Municipal Code; and

WHEREAS, at the public hearing, the City Council considered whether each of the requisite findings specified in Section 9.02.070 of the Municipal Code and set forth herein could be made with respect to the proposed Project as conditioned by Conditions of Approval; and

WHEREAS, on October 5, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the City Council approved Resolution 2021-XX adopting a Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the Compass Danbe Centerpointe Project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003).

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached Exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the City Council has considered all of the evidence submitted into the administrative record for the proposed Plot Plans, including, but not limited to, the following:

- (a) Moreno Valley General Plan and all other relevant provisions contained therein;
- (b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein;
- (c) Application for the approval of Plot Plans PEN20-0121 and PEN20-0124 and all documents, records and references contained therein;
- (d) Conditions of Approval for Plot Plans PEN20-0121 and PEN20-0124, attached hereto as Exhibit A;
- (e) Staff Report prepared for the City Council's consideration and all documents, records and references related thereto, and Staff's presentation at the public hearing;
- (f) Testimony and/or comments from Applicant and its representatives during the public hearing; and
- (g) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the public hearing.

Section 4. Findings

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the City Council makes the following findings in approving Plot Plans PEN20-0121 and PEN20-0124

- (a) The proposed project is consistent with the goals, objectives, policies and programs of the general plan;
- (b) The proposed project complies with all applicable zoning and other regulations;
- (c) The proposed project will not be detrimental to the public health, safety or welfare or materially injurious to properties or improvements in the vicinity;
- (d) The location, design and operation of the proposed project will be compatible with existing and planned land uses in the vicinity.

Section 5. Approval

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth above, the City Council hereby approves Plot Plans PEN20-0121 and PEN20-0124 subject to the Conditions of Approval for Plot Plans PEN20-0121 and PEN20-0124 attached hereto as Exhibit A.

Section 6. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. Severability

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. Certification

That the City Clerk for the City Council shall certify to the passage of this Resolution.

PASSED AND ADOPTED THIS ____ day of _____, 2021

CITY OF MORENO VALLEY

COMMUNITY DEVELOPMENT DEPARTMENT**Planning Division**

1. A change or modification to the land use or the approved site plans may require a separate approval. Prior to any change or modification, the property owner shall contact the City of Moreno Valley Community Development Department to determine if a separate approval is required.
2. Any expansion to this use or exterior alterations will require the submittal of a separate application(s) and shall be reviewed and approved under separate permit(s). (MC 9.02.080)
3. The developer, or the developer's successor-in-interest, shall be responsible for maintaining any undeveloped portion of the site in a manner that provides for the control of weeds, erosion and dust. (MC 9.02.030)
4. The site shall be developed in accordance with the approved plans on file in the Community Development Department - Planning Division, the Municipal Code regulations, General Plan, and the conditions contained herein. Prior to any use of the project site or business activity being commenced thereon, all Conditions of Approval shall be completed to the satisfaction of the Planning Official. (MC 9.14.020)
5. Any signs indicated on the submitted plans are not included with this approval. Any signs, whether permanent (e.g. wall, monument) or temporary (e.g. banner, flag), require separate application and approval by the Planning Division. No signs are permitted in the public right of way. (MC 9.12)

Special Conditions

6. All site plans, grading plans, landscape and irrigation plans, lighting plans and street improvement plans shall be coordinated for consistency with this approval.
7. This approval shall comply with all applicable requirements of the City of Moreno Valley Municipal Code.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 2

8. Prior to building final, the developer/owner or developer's/owner's successor-in-interest shall pay all applicable impact fees, including but not limited to Transportation Uniform Mitigation fees (TUMF), and the City's adopted Development Impact Fees. (Ord)
9. Prior to the issuance of grading permits, final erosion control landscape and irrigation plans for all cut or fill slopes over 3 feet in height shall be submitted to and approved by the Planning Division. The plans shall be designed in accordance with the slope erosion plan as required by the City Engineer. Man-made slopes greater than 10 feet in height shall be "land formed" to conform to the natural terrain and shall be landscaped and stabilized to minimize visual scarring. (GP Objective 1.5, MC 9.08.080, DG)
10. Prior to recordation of the final map, final median enhancement/landscape/irrigation plans shall be submitted to and approved by the Planning Division, and Public Works Department - Special Districts Division for review and approval by each division. (GP - Circulation Master Plan)
11. All landscaped areas in perpetuity shall be maintained in a healthy and thriving condition, free from weeds, trash and debris. (MC 9.02.030)
12. This tentative map and plot plans shall expire three years after the approval date of this tentative map unless extended as provided by the City of Moreno Valley Municipal Code; otherwise it shall become null and void and of no effect whatsoever in the event the applicant or any successor in interest fails to properly file a final map before the date of expiration. (MC 9.02.230, 9.14.050, 080)
13. Prior to the issuance of grading permits, mitigation measures contained in the Mitigation Monitoring Program approved with this project shall be implemented as provided therein.
14. Prior to any site disturbance and/or grading plan submittal, and or final map recordation, a mitigation monitoring fee, as provided by City ordinance, shall be paid by the applicant/owner. No City permit or approval shall be issued until such fee is paid. (CEQA)
15. Prior to issuance of a building permit, the developer/property owner or developer's successor-in-interest shall pay all applicable impact fees due at permit issuance, including but not limited to Multi-species Habitat Conservation Plan (MSHCP) mitigation fees. (Ord.)
16. Within thirty (30) days prior to any grading or other land disturbance, a pre-construction survey for Burrowing Owls shall be conducted pursuant to the established guidelines of Multiple Species Habitat Conservation Plan. The pre-construction survey shall be submitted to the Planning Division prior to any

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 3

disturbance of the site and/or grading permit issuance.

17. Prior to the issuance of grading permits, a temporary project identification sign shall be erected on the site in a secure and visible manner. The sign shall be conspicuously posted at the site and remain in place until occupancy of the project. The sign shall include the following: The name and address of the development and the developer's name and address to include a 24-hour emergency phone number.
18. Prior to approval of any grading permits, plans for any security gate system shall be submitted to and approved by to the Planning Division.
19. Prior to issuance of grading permits, the developer shall pay the applicable Stephen's' Kangaroo Rat (SKR) Habitat Conservation Plan mitigation fee.
20. Prior to the issuance of any grading permits and prior to any physical disturbance of any natural drainage course, or any wetland determined to contain riparian vegetation, the applicant shall obtain a stream bed alteration agreement or permit, or a written waiver of the requirement for such an agreement or permit, from both the California Department of Fish and Game, the U.S. Army Corps of Engineers, and Regional Water Quality Control Board, as required. Written verification of such a permits or waivers shall be provided to both the Planning Division and the Public Works Department - Land Development Division. (CEQA, State and Federal codes)
21. Prior to recordation of the final subdivision map, the following documents shall be submitted to and approved by the Planning Division which shall demonstrate that the project will be developed and maintained in accordance with the intent and purpose of the approval:
 - a. The document to convey title
 - b. Deed restrictions, easements, or Covenants, Conditions and Restrictions to be recorded

The approved documents shall be recorded at the same time that the subdivision map is recorded. The documents shall contain provisions for general maintenance of the site, joint access to proposed parcels, open space use restrictions, conservation easements, parking, feeder trails, water quality basins, lighting, landscaping and common area use items such as general building maintenance. The approved documents shall also contain a provision, which provides that they may not be terminated and/or substantially amended without the consent of the City and the developer's successor-in-interest. (MC 9.14.090)

In addition, the following deed restrictions and disclosures shall be included within the document and grant deed of the properties:

- a. The developer shall promote the use of native plants and trees and drought

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 4

tolerant species.

b. All lots designated for open space and or detention basins, shall be included as an easement to, and maintained by a Homeowners Association (HOA) or other private maintenance entity. All reverse frontage landscape areas shall also be maintained by the onsite HOA. Language to this effect shall be included and reviewed within the required Covenant Conditions and Restrictions (CC&Rs) prior to the approval of the final map.

c. Maintenance of any and all common facilities.

22. Applicant/Developer shall defend, indemnify and hold harmless City, city council, commissions, boards, subcommittees and City's elected and appointed officials, commissioners, board members, officers, agents, consultants and employees ("City Parties") from and against any and all liabilities, demands, claims, actions or proceedings and costs and expenses incidental thereto (including costs of defense, settlement and reasonable attorneys' fees), which any or all of them may suffer, incur, be responsible for or pay out as a result of or in connection with any challenge to the legality, validity or adequacy of any of the following items: (i) any agreements by and among City and Developer including without limitation any Development Agreement, (ii) any and all permits, licenses and entitlements approved by City; (iii) any environmental determination made by City in connection with the Project Site or Project; and (iv) any proceedings or other actions undertaken by City in connection with the adoption or approval of any of the above.
23. The project shall be designed and constructed to meet LEED Silver Equivalent with evidence provided to the City. A change or modification shall require separate approval.
24. The site has been approved for a Tentative Parcel Map 37944 to subdivide the lots into two parcels and two light industrial warehouse buildings. Building 1 will be approximately 290,726 square feet and Building 2 will be approximately 98,877 square feet with associated on-site and off-site improvements designed per the approved plans.
25. This approval includes the Tentative Parcel Map 37944 and two Plot Plans for the construction of two light industrial buildings to be completed as one project. All improvements both on-site and off-site shall be completed prior to building shell final of any one building. If the construction of one building is postponed, the parcel/pad area shall be maintained with landscaping and screening as approved by the Community Development Director.
26. Should the applicant/property owner elect to not construct one of the buildings, the building pad shall be precise graded and hydroseeded to prevent dust and erosion.
27. Prior to the start of any construction, temporary security fencing shall be erected. The fencing shall be a minimum of six (6) feet high with locking, gated access and

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 5

shall remain through the duration of construction. Security shall remain in place until the project is completed or the above conditions no longer exist. (Security fencing is required if there is: construction, unsecured structures, unenclosed storage of materials and/or equipment, and/or the condition of the site constitutes a public hazard).

Prior to Building Permit

28. Prior to issuance of any building permits, final landscaping and irrigation plans shall be submitted for review and approved by the Planning Division. The plans shall be prepared in accordance with the City's Landscape Requirements to include a drought tolerant palette. (9.17)
29. Prior to issuance of any building permit, all Conditions of Approval, Mitigation Measures and Airport Land Use Commission Conditions of Approval shall be printed on the building plans.
30. Prior to the issuance of grading permits, decorative (e.g. colored/scored concrete or as approve by the Planning Official) pedestrian pathways across circulation aisles/paths shall be provided throughout the development to connect dwellings with open spaces and/or recreational uses or commercial/industrial buildings with open space and/or parking. and/or the public right-of-way. The pathways shall be shown on the precise grading plan. (GP Objective 46.8, DG)
31. Prior to issuance of building permits, the Planning Division shall review and approve the location and method of enclosure or screening of transformer cabinets, commercial gas meters and back flow preventers as shown on the final working drawings. Location and screening shall comply with the following criteria: transformer cabinets and commercial gas meters shall not be located within required setbacks and shall be screened from public view either by architectural treatment or landscaping; multiple electrical meters shall be fully enclosed and incorporated into the overall architectural design of the building(s); back-flow preventers shall be screened by landscaping. (GP Objective 43.30)
32. Prior to issuance of any grading permit, all Conditions of Approval, Mitigation Measures and Airport Land Use Commission Conditions of Approval shall be printed on the grading plans.
33. Prior to approval of any grading permits, plans for any security gate system shall be submitted to and approved by to the Planning Division.
34. Prior to issuance of grading permits, the developer shall submit fence/wall plans to be included in the Building and Safety submittal for review and approval consistent with the approved plans, the Landscape Requirements and the Municipal Code.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 6

35. Prior to the issuance of grading permits, a temporary project identification sign shall be erected on the site in a secure and visible manner. The sign shall be conspicuously posted at the site and remain in place until occupancy of the project. The sign shall include the following:
 - a. The name (if applicable) and address of the development.
 - b. The developer's name, address, and a 24-hour emergency telephone number.
36. Photometric Plans shall be submitted to the Building and Safety Division for review and approval as part of the lighting and electrical building plan submittal.
37. Prior to the issuance of grading permits, the site plan and grading plans shall show decorative hardscape (e.g. colored concrete, stamped concrete, pavers or as approved by the Planning Official) consistent and compatible with the design, color and materials of the proposed development for all driveway ingress/egress locations of the project.

Prior to Building Final or Occupancy

38. Prior to building final, all required landscaping and irrigation shall be installed per plan, certified by the Landscape Architect and inspected by the Planning Division. (MC 9.03.040, MC 9.17).
39. Prior to building final, all required and proposed fences and walls shall be constructed according to the approved plans on file in the Planning Division. (MC 9.080.070).

Building Division

40. The proposed non-residential project shall comply with the latest Federal Law, Americans with Disabilities Act, and State Law, California Code of Regulations, Title 24, Chapter 11B for accessibility standards for the disabled including access to the site, exits, bathrooms, work spaces, etc.
41. Building plans submitted shall be signed and sealed by a California licensed design professional as required by the State Business and Professions Code.
42. All new structures shall be designed in conformance to the latest design standards adopted by the State of California in the California Building Code, (CBC) Part 2, Title 24, California Code of Regulations including requirements for allowable area, occupancy separations, fire suppression systems, accessibility, etc.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 7

43. Prior to submittal, all new development, including residential second units, are required to obtain a valid property address prior to permit application. Addresses can be obtained by contacting the Building Safety Division at 951.413.3350.
44. Contact the Building Safety Division for permit application submittal requirements.
45. All new buildings 10,000 square feet and over, shall include building commissioning in the design and construction processes of the building project to verify that the building systems and components meet the owner's or owner representative's project requirements (OPR). All requirements in The 2016 California Green Building Standards Code, sections 5.410.2 - 5.410.2.6 must be met.
46. Any construction within the city shall only be as follows: Monday through Friday seven a.m. to seven p.m.(except for holidays which occur on weekdays), eight a.m. to four p.m.; weekends and holidays (as observed by the city and described in the Moreno Valley Municipal Code Chapter 2.55), unless written approval is first obtained from the Building Official or City Engineer.
47. The proposed development shall be subject to the payment of required development fees as required by the City's current Fee Ordinance at the time a building application is submitted or prior to the issuance of permits as determined by the City.
48. The proposed project will be subject to approval by the Eastern Municipal Water District and all applicable fees and charges shall be paid prior to permit issuance. Contact the water district at 951.928.3777 for specific details.
49. The proposed project's occupancy shall be classified by the Building Official and must comply with exiting, occupancy separation(s) and minimum plumbing fixture requirements. Minimum plumbing fixtures shall be provided per the 2016 California Plumbing Code, Table 422.1. The occupant load and occupancy classification shall be determined in accordance with the California Building Code.
50. Prior to permit issuance, every applicant shall submit a properly completed Waste Management Plan (WMP), as a portion of the building or demolition permit process. (MC 8.80.030)

ECONOMIC DEVELOPMENT DEPARTMENT (EDD)

51. New Moreno Valley businesses may work with the Economic Development Department to coordinate job recruitment fairs.
52. New Moreno Valley businesses may adopt a "First Source" approach to employee recruitment that gives notice of job openings to Moreno Valley residents for one

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 8

week in advance of public recruitment.

53. New Moreno Valley businesses are encouraged to hire local residents.
54. New Moreno Valley businesses are encouraged to provide a job fair flyer and/or web announcement to the City in advance of job recruitments, so that the City can assist in publicizing these events.
55. New Moreno Valley businesses may utilize the workforce recruitment services provided by the Moreno Valley Business & Employment Resource Center ("BERC").

The BERC offers free assistance to Moreno Valley businesses recruiting and training potential employees. Complimentary services include:

- Job Announcements
- Applicant testing / pre-screening
- Interviewing
- Job Fair support
- Training space

FIRE DEPARTMENT**Fire Prevention Bureau**

56. All Fire Department access roads or driveways shall not exceed 12 percent grade. (CFC 503.2.7 and MVMC 8.36.060[G])
57. The Fire Department emergency vehicular access road shall be (all weather surface) capable of sustaining an imposed load of 80,000 lbs. GVW, based on street standards approved by the Public Works Director and the Fire Prevention Bureau. The approved fire access road shall be in place during the time of construction. Temporary fire access roads shall be approved by the Fire Prevention Bureau. (CFC 501.4, and MV City Standard Engineering Plan 108d)
58. The angle of approach and departure for any means of Fire Department access shall not exceed 1 ft drop in 20 ft (0.3 m drop in 6 m), and the design limitations of the fire apparatus of the Fire Department shall be subject to approval by the AHJ. (CFC 503 and MVMC 8.36.060)
59. Prior to construction, all locations where structures are to be built shall have an approved Fire Department access based on street standards approved by the Public Works Director and the Fire Prevention Bureau. (CFC 501.4)
60. Prior to issuance of Building Permits, the applicant/developer shall provide the Fire

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 9

- Prevention Bureau with an approved site plan for Fire Lanes and signage. (CFC 501.3)
61. Prior to issuance of Certificate of Occupancy or Building Final, "Blue Reflective Markers" shall be installed to identify fire hydrant locations in accordance with City specifications. (CFC 509.1 and MVLT 440A-0 through MVLT 440C-0)
 62. Prior to issuance of building permits, plans specifying the required structural materials for building construction in high fire hazard severity zones shall be submitted to the Fire Prevention Bureau for approval. (CFC, 4905)
 63. Prior to issuance of Certificate of Occupancy or Building Final, all commercial buildings shall display street numbers in a prominent location on the street side and rear access locations. The numerals shall be a minimum of twelve inches in height. (CFC 505.1, MVMC 8.36.060[I])
 64. Existing fire hydrants on public streets are allowed to be considered available. Existing fire hydrants on adjacent properties shall not be considered available unless fire apparatus access roads extend between properties and easements are established to prevent obstruction of such roads. (CFC 507, 501.3) a - After the local water company signs the plans, the originals shall be presented to the Fire Prevention Bureau for signatures. The required water system, including fire hydrants, shall be installed, made serviceable, and be accepted by the Moreno Valley Fire Department prior to beginning construction. They shall be maintained accessible.
 65. Final fire and life safety conditions will be addressed when the Fire Prevention Bureau reviews building plans. These conditions will be based on occupancy, use, California Building Code (CBC), California Fire Code (CFC), and related codes, which are in effect at the time of building plan submittal.
 66. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire alarm system monitored by an approved Underwriters Laboratory listed central station based on a requirement for monitoring the sprinkler system, occupancy or use. Fire alarm panel shall be accessible from exterior of building in an approved location. Plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9 and MVMC 8.36.100)
 67. The Fire Code Official is authorized to enforce the fire safety during construction requirements of Chapter 33. (CFC Chapter 33 & CBC Chapter 33)
 68. Fire lanes and fire apparatus access roads shall have an unobstructed width of not less than twenty-four (24) feet and an unobstructed vertical clearance of not less than thirteen (13) feet six (6) inches. (CFC 503.2.1 and MVMC 8.36.060[E])

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 10

69. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire sprinkler system based on square footage and type of construction, occupancy or use. Fire sprinkler plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9, MVMC 8.36.100[D])
70. Prior to issuance of the building permit for development, independent paved access to the nearest paved road, maintained by the City shall be designed and constructed by the developer within the public right of way in accordance with City Standards. (MVMC 8.36.060, CFC 501.4)
71. Prior to issuance of a Certificate of Occupancy or Building Final, a "Knox Box Rapid Entry System" shall be provided. The Knox-Box shall be installed in an accessible location approved by the Fire Code Official. All exterior security emergency access gates shall be electronically operated and be provided with Knox key switches for access by emergency personnel. (CFC 506.1)
72. The minimum number of fire hydrants required, as well as the location and spacing of fire hydrants, shall comply with the C.F.C., MVMC, and NFPA 24. Fire hydrants shall be located no closer than 40 feet to a building. A fire hydrant shall be located within 50 feet of the fire department connection for buildings protected with a fire sprinkler system. The size and number of outlets required for the approved fire hydrants are (6" x 4" x 2 ½" x 2 ½") (CFC 507.5.1, 507.5.7, Appendix C, NFPA 24-7.2.3, MVMC 912.2.1)
73. During phased construction, dead end roadways and streets which have not been completed shall have a turn-around capable of accommodating fire apparatus. (CFC 503.1 and 503.2.5)
74. If construction is phased, each phase shall provide an approved emergency vehicular access way for fire protection prior to any building construction. (CFC 501.4)
75. Plans for private water mains supplying fire sprinkler systems and/or private fire hydrants shall be submitted to the Fire Prevention Bureau for approval. (CFC 105 and CFC 3312.1)
76. The Fire Prevention Bureau is required to set a minimum fire flow for the remodel or construction of all commercial buildings per CFC Appendix B and Table B105.1. The applicant/developer shall provide documentation to show there exists a water system capable of delivering said waterflow for 2 hour(s) duration at 20-PSI residual operating pressure. The required fire flow may be adjusted during the approval process to reflect changes in design, construction type, or automatic fire protection measures as approved by the Fire Prevention Bureau. Specific requirements for

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 11

the project will be determined at time of submittal. (CFC 507.3, Appendix B)

77. Prior to construction, all traffic calming designs/devices must be approved by the Fire Marshal and City Engineer.
78. Prior to issuance of Building Permits, the applicant/developer shall furnish one copy of the water system plans to the Fire Prevention Bureau for review. Plans shall:
 - a. Be signed by a registered civil engineer or a certified fire protection engineer;
 - b. Contain a Fire Prevention Bureau approval signature block; and
 - c. Conform to hydrant type, location, spacing of new and existing hydrants and minimum fire flow required as determined by the Fire Prevention Bureau. The required water system, including fire hydrants, shall be installed, made serviceable, and be accepted by the Moreno Valley Fire Department prior to beginning construction. They shall be maintained accessible.

FINANCIAL & MANAGEMENT SERVICES DEPARTMENT**Moreno Valley Utility**

79. This project requires the installation of electric distribution facilities. A non-exclusive easement shall be provided to Moreno Valley Utility and shall include the rights of ingress and egress for the purpose of operation, maintenance, facility repair, and meter reading.
80. This project requires the installation of electric distribution facilities. The developer shall submit a detailed engineering plan showing design, location and schematics for the utility system to be approved by the City Engineer. In accordance with Government Code Section 66462, the Developer shall execute an agreement with the City providing for the installation, construction, improvement and dedication of the utility system following recordation of final map and/or concurrent with trenching operations and other improvements so long as said agreement incorporates the approved engineering plan and provides financial security to guarantee completion and dedication of the utility system.

The Developer shall coordinate and receive approval from the City Engineer to install, construct, improve, and dedicate to the City all utility infrastructure including but not limited to, conduit, equipment, vaults, ducts, wires (including fiber optic cable), switches, conductors, transformers, and “bring-up” facilities including electrical capacity to serve the identified development and other adjoining, abutting, or benefiting projects as determined by Moreno Valley Utility – collectively referred to as “utility system”, to and through the development, along with any appurtenant real property easements, as determined by the City Engineer necessary for the distribution and/or delivery of any and all “utility services” to and within the project.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 12

For purposes of this condition, “utility services” shall mean electric, cable television, telecommunication (including video, voice, and data) and other similar services designated by the City Engineer. “Utility services” shall not include sewer, water, and natural gas services, which are addressed by other conditions of approval.

The City, or the City’s designee, shall utilize dedicated utility facilities to ensure safe, reliable, sustainable and cost effective delivery of utility services and maintain the integrity of streets and other public infrastructure. Developer shall, at developer’s sole expense, install or cause the installation of such interconnection facilities as may be necessary to connect the electrical distribution infrastructure within the project to the Moreno Valley Utility owned and controlled electric distribution system.

81. Existing Moreno Valley Utility electrical infrastructure shall be preserved in place. The developer will be responsible, at developer’s expense, for any and all costs associated with the relocation of any of Moreno Valley Utility’s underground electrical distribution facilities, as determined by Moreno Valley Utility, which may be in conflict with any developer planned construction on the project site.
82. This project is subject to a Reimbursement Agreement. The Developer is responsible for a proportionate share of costs associated with electrical distribution infrastructure previously installed that directly benefits the project.

PUBLIC WORKS DEPARTMENT**Land Development**

83. Aggregate slurry, as defined in Section 203-5 of Standard Specifications for Public Works Construction, shall be required prior to 90% security reduction or the end of the one-year warranty period of the public streets as approved by the City Engineer. If slurry is required, a slurry mix design shall be submitted for review and approved by the City Engineer. The latex additive shall be Ultra Pave 70 (for anionic) or Ultra Pave 65 K (for cationic) or an approved equal per the geotechnical report. The latex shall be added at the emulsion plant after weighing the asphalt and before the addition of mixing water. The latex shall be added at a rate of two to two-and-one-half (2 to 2½) parts to one-hundred (100) parts of emulsion by volume. Any existing striping shall be removed prior to slurry application and replaced per City standards.
84. The developer shall comply with all applicable City ordinances and resolutions including the City’s Municipal Code (MC) and if subdividing land, the Government Code (GC) of the State of California, specifically Sections 66410 through 66499.58, said sections also referred to as the Subdivision Map Act (SMA). [MC 9.14.010]
85. The final approved conditions of approval (COAs) issued and any applicable

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 13

Mitigation Measures by the Planning Division shall be photographically or electronically placed on mylar sheets and included in the Grading and Street Improvement plans.

86. The developer shall monitor, supervise and control all construction related activities, so as to prevent these activities from causing a public nuisance, including but not limited to, insuring strict adherence to the following:
- (a) Removal of dirt, debris, or other construction material deposited on any public street no later than the end of each working day.
 - (b) Observance of working hours as stipulated on permits issued by the Land Development Division.
 - (c) The construction site shall accommodate the parking of all motor vehicles used by persons working at or providing deliveries to the site.
 - (d) All dust control measures per South Coast Air Quality Management District (SCAQMD) requirements during the grading operations.
- Violation of any condition, restriction or prohibition set forth in these conditions shall subject the owner, applicant, developer or contractor(s) to remedy as noted in City Municipal Code 8.14.090. In addition, the City Engineer or Building Official may suspend all construction related activities for violation of any condition, restriction or prohibition set forth in these conditions until such time as it has been determined that all operations and activities are in conformance with these conditions.
87. Drainage facilities (e.g., catch basins, water quality basins, etc.) with sump conditions shall be designed to convey the tributary 100-year storm flows. Secondary emergency escape shall also be provided.
88. In the event right-of-way or offsite easements are required to construct offsite improvements necessary for the orderly development of the surrounding area to meet the public health and safety needs, the developer shall make a good faith effort to acquire the needed right-of-way in accordance with the Land Development Division's administrative policy. If unsuccessful, the Developer shall enter into an agreement with the City to acquire the necessary right-of-way or offsite easements and complete the improvements at such time the City acquires the right-of-way or offsite easements which will permit the improvements to be made. The developer shall be responsible for all costs associated with the right-of-way or easement acquisition. [GC 66462.5]
89. If improvements associated with this project are not initiated within two (2) years of the date of approval of the Public Improvement Agreement (PIA), the City Engineer may require that the engineer's estimate for improvements associated with the project be modified to reflect current City construction costs in effect at the time of request for an extension of time for the PIA or issuance of a permit. [MC 9.14.210(B)(C)]

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 14

90. The developer shall protect downstream properties from damage caused by alteration of drainage patterns (i.e. concentration or diversion of flow, etc). Protection shall be provided by constructing adequate drainage facilities, including, but not limited to, modifying existing facilities or by securing a drainage easement. [MC 9.14.110]
91. Public drainage easements, when required, shall be a minimum of 25 feet wide and shall be shown on the map and plan, and noted as follows: "Drainage Easement – no structures, obstructions, or encroachments by land fills are allowed." In addition, the grade within the easement area shall not exceed a 3:1 (H:V) slope, unless approved by the City Engineer.
92. The maintenance responsibility of the proposed storm drain line shall be clearly identified. Unless otherwise noted on improvement plans, storm drain lines within private property will be privately maintained and those within public streets will be publicly maintained.
93. This project shall submit civil engineering design plans, reports and/or documents (prepared by a registered/licensed civil engineer) for review and approval by the City Engineer per the current submittal requirements, prior to the indicated threshold or as required by the City Engineer. The submittal consists of, but is not limited to, the following:
- a. Parcel Map (recordation prior to building permit issuance);
 - b. Rough grading w/ erosion control plan (prior to grading permit issuance);
 - c. Precise grading w/ erosion control plan (prior to building permit issuance);
 - d. Street improvement plan w/ Signing & Striping (prior to parcel map approval);
 - e. RCFC&WCD storm drain plans (prior to parcel map approval);
 - f. Cooperative Agreement between the City, RCFC&WCD and the developer (prior to RCFC&WCD storm drain plan approval);
 - g. Final drainage study (prior to rough grading plan and storm drain plan approval);
 - h. Final WQMP (prior to grading plan approval);
 - i. As-Built revision for all plans (prior to Occupancy release)
94. Water quality best management practices (BMPs) designed to meet Water Quality Management Plan (WQMP) requirements for single-family residential development shall not be used as a construction BMP. Water quality BMPs shall be maintained for the entire duration of the project construction and be used to treat runoff from those developed portions of the project. Water quality BMPs shall be protected from upstream construction related runoff by having proper best management practices in place and maintained. Water quality BMPs shall be graded per the approved design plans and once landscaping and irrigation has been installed, it and its maintenance shall be turned over to an established Homeowner's

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 15

Association (HOA). The Homeowner's Association shall enter into an agreement with the City for basin maintenance.

95. When any proposed private storm drain system connects to a public storm drain system, a storm drain manhole shall be placed at the right-of-way or property line to mark the beginning of the publicly maintained portion of the storm drain system.

Prior to Grading Plan Approval

96. Resolution of all drainage issues shall be as approved by the City Engineer.
97. A final detailed drainage study (prepared by a registered/licensed civil engineer) shall be submitted for review and approved by the City Engineer. The study shall include, but not be limited to: existing and proposed hydrologic conditions as well as hydraulic calculations for all drainage control devices and storm drain lines. The study shall analyze 1, 3, 6 and 24-hour duration events for the 2, 5, 10 and 100-year storm events [MC 9.14.110(A.1)]. A digital (pdf) copy of the approved drainage study shall be submitted to the Land Development Division.
98. Emergency overflow areas shall be shown at all applicable drainage improvement locations in the event that the drainage improvement fails or exceeds full capacity. This may include, but not be limited to, secondary storm drains, riser inlets, concrete spillways, or redundancy in pump systems.
99. A final project-specific Water Quality Management Plan (WQMP) shall be submitted for review and approved by the City Engineer, which:
- a. Addresses Site Design Best Management Practices (BMPs) such as minimizing impervious areas, maximizing permeability, minimizes directly connected impervious areas to the City's street and storm drain systems, and conserves natural areas;
 - b. Incorporates Source Control BMPs and provides a detailed description of their implementation;
 - c. Describes the long-term operation and maintenance requirements for BMPs requiring maintenance; and
 - d. Describes the mechanism for funding the long-term operation and maintenance of the BMPs.
- A copy of the final WQMP template can be obtained on the City's Website or by contacting the Land Development Division. A digital (pdf) copy of the approved final project-specific Water Quality Management Plan (WQMP) shall be submitted to the Land Development Division.
100. The final project-specific Water Quality Management Plan (WQMP) shall be consistent with the approved P-WQMP, as well as in full conformance with the document: "Water Quality Management Plan - A Guidance Document for the Santa Ana Region of Riverside County" dated October 22, 2012. The F-WQMP shall be

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 16

submitted and approved prior to application for and issuance of grading permits. At a minimum, the F-WQMP shall include the following: Site Design BMPs; Source Control BMPs, Treatment Control BMPs, Operation and Maintenance requirements for BMPs and sources of funding for BMP implementation.

a. The Applicant has proposed to incorporate the use of two (2) modular wetland systems along the southerly project boundary and three (3) bio-retention swales along the northerly project boundary . Final design and sizing details of all BMPs must be provided in the first submittal of the F-WQMP. The Applicant acknowledges that more area than currently shown on the plans may be required to treat site runoff as required by the WQMP guidance document.

b. The Applicant shall substantiate the applicable Hydrologic Condition of Concerns (HCOC) in Section F of the F-WQMP. <The HCOC designates that the project will be required to provide HCOC mitigation..

c. All proposed LID BMP's shall be designed in accordance with the RCFC&WCD's Design Handbook for Low Impact Development Best Management Practices, dated September 2011.

d. The proposed LID BMP's as identified in the project-specific P-WQMP shall be incorporated into the Final WQMP.

e. The NPDES notes per City Standard Drawing No. MVFE-350-0 shall be included in the grading plans.

f. Post-construction treatment control BMPs, once placed into operation for post-construction water quality control, shall not be used to treat runoff from construction sites or unstabilized areas of the site.

g. Prior to precise grading plan approval, the grading plan shall show any proposed trash enclosure to include a cover (roof) and sufficient size for dual bin (1 for trash and 1 for recyclables). The architecture shall be approved by the Planning Division and any structural approvals shall be made by the Building and Safety Division.

101. The developer shall ensure compliance with the City Grading ordinance, these Conditions of Approval and the following criteria:

a. The project street and lot grading shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage area and outlet points. Unless otherwise approved by the City Engineer, lot lines shall be located at the top of slopes.

b. Any grading that creates cut or fill slopes adjacent to the street shall provide erosion control, sight distance control, and slope easements as approved by the City Engineer.

c. All improvement plans are substantially complete and appropriate clearance letters are provided to the City.

d. A soils/geotechnical report (addressing the soil's stability and geological conditions of the site) shall be submitted to the Land Development Division for review. A digital (pdf) copy of the soils/geotechnical report shall be submitted to the Land Development Division.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 17

102. Grading plans (prepared by a registered/licensed civil engineer) shall be submitted for review and approved by the City Engineer per the current submittal requirements.
103. The developer shall select Low Impact Development (LID) Best Management Practices (BMPs) designed per the latest version of the Water Quality Management Plan (WQMP) - a guidance document for the Santa Ana region of Riverside County.
104. The developer shall pay all remaining plan check fees.
105. The proposed private storm drain Line "E" on Parcel 2 shall connect to the existing public storm drain lateral crossing Alessandro Boulevard and connect to storm drain Line "E" located on APN 297-170-089. Storm drain manholes shall be placed at the point of connections (at right of way or property line) to mark the separation of the publicly maintained storm drain and privately maintained storm drain.
106. A Storm Water Pollution Prevention Plan (SWPPP) shall be prepared in conformance with the State's current Construction Activities Storm Water General Permit. A copy of the current SWPPP shall be kept at the project site and be available for review upon request.
107. For projects that will result in discharges of storm water associated with construction with a soil disturbance of one or more acres of land, the developer shall submit a Notice of Intent (NOI) and obtain a Waste Discharger's Identification number (WDID#) from the State Water Quality Control Board (SWQCB) which shall be noted on the grading plans.

Prior to Grading Permit

108. A receipt showing payment of the Area Drainage Plan (ADP) fee to Riverside County Flood Control and Water Conservation District shall be submitted. [MC 9.14.100(O)]
109. For non-subdivision projects, a copy of the Covenants, Conditions and Restrictions (CC&Rs) shall be submitted for review by the City Engineer. The CC&Rs shall include, but not be limited to, access easements, reciprocal access, private and/or public utility easements as may be relevant to the project.
110. If the developer chooses to construct the project in phases, a Construction Phasing Plan for the construction of on-site public or private improvements shall be submitted for review and approved by the City Engineer.
111. Prior to the payment of the Development Impact Fee (DIF), the developer may enter

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 18

into a DIF Improvement Credit Agreement to secure credit for the construction of applicable improvements. If the developer fails to complete this agreement prior to the timing specified above, credits may not be given. The developer shall pay current DIF fees adopted by the City Council. [Ord. 695 § 1.1 (part), 2005] [MC 3.38.030, 040, 050]

112. A digital (pdf) copy of all approved grading plans shall be submitted to the Land Development Division.
113. Security, in the form of a cash deposit (preferable), bond or letter of credit shall be submitted as a guarantee of the implementation and maintenance of erosion control measures. At least twenty-five (25) percent of the required security shall be in the form of a cash deposit with the City. [MC 8.21.160(H)]
114. Security, in the form of a cash deposit (preferable), bond or letter of credit shall be submitted as a guarantee of the completion of the grading operations for the project. [MC 8.21.070]
115. The developer shall pay all applicable inspection fees.
116. Prior to the payment of the Transportation Uniform Mitigation Fee (TUMF), the developer may enter into a TUMF Improvement Credit Agreement to secure credit for the construction of applicable improvements. If the developer fails to complete this agreement by the timing specified above, credits may not be given. The developer shall pay current TUMF fees adopted by the City Council. [Ord. 835 § 2.1, 2012] [MC 3.44.060]

Prior to Map Approval

117. A copy of the Covenants, Conditions and Restrictions (CC&R's) shall be submitted for review and approved by the City Engineer. The CC&R's shall include, but not be limited to, access easements, reciprocal access, private and/or public utility easements as may be relevant to the project. Alternatively, access easements, reciprocal access, private and/or public utility easements may be submitted for review and approval by separate instruments that will be recorded once approved.
118. The developer shall enter into a Cooperative Agreement with the City and Riverside County Flood Control and Water Conservation District establishing the terms and conditions covering the inspection, operation and maintenance of Master Drainage Plan facilities required to be constructed as part of the project.
119. After recordation, a digital (pdf) copy of the recorded map shall be submitted to the Land Development Division.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 19

120. Resolution of all drainage issues shall be as approved by the City Engineer.
121. A parcel map (prepared by a registered civil engineer and/or licensed surveyor) shall be submitted for review and approved by the City Engineer per the current submittal requirements.
122. The developer shall guarantee the completion of all related improvements required for this project by executing a Public Improvement Agreement (PIA) with the City and posting the required security. [MC 9.14.220]
123. All public improvement plans required for this project shall be approved by the City Engineer in order to execute the Public Improvement Agreement (PIA).
124. The developer shall comply with the requirements of the City Engineer based on recommendations of the Riverside County Flood Control District regarding the construction of County Master Plan Facilities.
125. All street dedications shall be free of all encumbrances, irrevocably offered to the public and shall continue in force until the City accepts or abandons such offers, unless otherwise approved by the City Engineer.

Prior to Improvement Plan Approval

126. The developer is required to bring any existing access ramps adjacent to and fronting the project to current ADA (Americans with Disabilities Act) requirements. However, when work is required in an intersection that involves or impacts existing access ramps, all access ramps in that intersection shall be retrofitted to comply with current ADA requirements, unless otherwise approved by the City Engineer.
127. The developer shall submit clearances from all applicable agencies, and pay all applicable plan check fees.
128. The street improvement plans shall comply with current City policies, plans and applicable City standards (i.e. MVS-160 series, etc.) throughout this project.
129. The design plan and profile shall be based upon a centerline, extending beyond the project boundaries a minimum distance of 300 feet at a grade and alignment approved by the City Engineer.
130. Drainage facilities (i.e. catch basins, etc.) with sump conditions shall be designed to convey the tributary 100-year storm flows. Secondary emergency escape shall also be provided.
131. The hydrology study shall be designed to accept and properly convey all off-site drainage flowing onto or through the site. In the event that the City Engineer permits

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 20

the use of streets for drainage purposes, the provisions of current City standards shall apply. Should the quantities exceed the street capacity or the use of streets be prohibited for drainage purposes, as in the case where one travel lane in each direction shall not be used for drainage conveyance for emergency vehicle access on streets classified as minor arterials and greater, the developer shall provide adequate facilities as approved by the City Engineer. [MC 9.14.110 A.2]

132. All public improvement plans (prepared by a licensed/registered civil engineer) shall be submitted for review and approved by the City Engineer per the current submittal requirements.
133. Any missing or deficient existing improvements along the project frontage within Alessandro Boulevard shall be constructed or secured for construction. The City Engineer may require the ultimate structural section for pavement to half-street width plus 18 feet or provide core test results confirming that the existing pavement section is per current City Standards; additional signing & striping to accommodate increased traffic imposed by the development, removal and replacement of improvements due to wear or damage from construction activity, or additional transitional improvements for the orderly development of public infrastructure..
134. Storm drain improvement plans for Sunnymead Broadiaaea Avenue Storm Drain Line "A" Extension, from Alessandro Boulevard to the existing Line "A" located on APN 297-170-089, shall be submitted for review and approval by the City and RCFC&WCD. This storm drain has been identified as a future RCFC&WCD maintained facility as shown on Drawing No. 4-888, Sheet 8A (Preliminary Alignment Study) and referenced as Stage 3 of that certain Cooperative Agreement recorded on July 12, 2016 as Document No. 2016-0289060. This project will be required to satisfy all RCFC&WCD requirements for the acceptance and maintenance by RCFC&WCD including, but not limited to, the following:
 - a. Enter into a Cooperative Agreement between the City, RCFC&WCD, and the developer;
 - b. Provide storm drain improvement plans of Stage 3 storm drain;
 - c. Provide security for the construction of storm drain improvements; and
 - d. Upon commencement of Stage 3 storm drain improvements and to the satisfaction of the City and RCFC&WCD, inspect, clean, repair, and maintain the existing portion of Line "A" (also referred to as Stage 2) from the current inlet at the northerly property line of APN 297-170-089 to the point of connection located within Broadiaaea Avenue.

In the event that Stage 3 does not meet the requirements and satisfaction of RCFC&WCD to assume maintenance responsibility, the storm drain shall be privately owned and maintained by the property owner.

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 21

135. For non-subdivision projects, all street dedications shall be free of encumbrances, irrevocably offered to the public and shall continue in force until the City accepts or abandons such offers, unless otherwise approved by the City Engineer.
136. The plans shall indicate any restrictions on trench repair pavement cuts to reflect the City's moratorium on disturbing newly-constructed pavement less than three (3) years old and recently slurry sealed streets less than one (1) year old. Pavement cuts may be allowed for emergency repairs or as specifically approved in writing by the City Engineer. Special requirements shall be imposed for repaving, limits to be determined by the City Engineer.
137. All dry and wet utilities shall be shown on the plans and any crossings shall be potholed to determine actual location and elevation. Any conflicts shall be identified and addressed on the plans. The pothole survey data shall be submitted to Land Development with the public improvement plans for reference purposes only. The developer is responsible to coordinate with all affected utility companies and bear all costs of any utility relocation.
138. Alessandro Boulevard, Major Divided Arterial, City Standard MVSI-101A (134-foot RW / 110-foot CC) shall be constructed to half-width plus an additional 18 feet north of the centerline, along the entire project's north frontage. At a minimum, the existing street shall receive a 1.5" grind and overlay (PG 64-16 ARHM-GG-C). Pavement core samples will be required to determine the extent of pavement rehabilitation of the existing pavement which may include the removal and replacement of the entire structural section. All 4-foot right-of-way dedications at the driveway approaches, per City Standard MVSI-112C-0, shall be shown on the parcel map. Improvements shall consist of, but not be limited to, pavement, base, curb, gutter, sidewalk, driveway approaches, removal and replacement of existing storm drain and catch basins, any necessary offsite improvement transition/joins to existing, streetlights, relocation of any power poles with electrical lines of 115,000 volts or greater to meet an 18 inch minimum distance from the face of curb to the face of pole, undergrounding of any power poles with overhead utility lines or electrical lines less than 115,000 volts, and dry and wet utilities.

Prior to Encroachment Permit

139. A digital (pdf) copy of all approved improvement plans shall be submitted to the Land Development Division.
140. All applicable inspection fees shall be paid.
141. For non-subdivision projects, execution of a Public Improvement Agreement (PIA) and/or security (in the form of a cash deposit or other approved means) may be required as determined by the City Engineer. [MC 9.14.220]

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 22

142. The plans shall indicate any restrictions on trench repair pavement cuts to reflect the City's moratorium on disturbing newly-constructed pavement less than three (3) years old and recently slurry sealed streets less than one (1) year old. Pavement cuts may be allowed for emergency repairs or as specifically approved in writing by the City Engineer. Special requirements shall be imposed for repaving, limits to be determined by the City Engineer.
143. Any work performed within public right-of-way requires an encroachment permit.

Prior to Occupancy

144. All outstanding fees shall be paid.
145. All required as-built plans (prepared by a registered/licensed civil engineer) shall be submitted for review and approved by the City Engineer per the current submittal requirements.
146. The final/precise grade certification shall be submitted for review and approved by the City Engineer.
147. For commercial, industrial and multi-family projects, in compliance with Proposition 218, the developer shall agree to approve the City of Moreno Valley NPDES Regulatory Rate Schedule that is in place at the time of certificate of occupancy issuance. Under the current permit for storm water activities required as part of the National Pollutant Discharge Elimination System (NPDES) as mandated by the Federal Clean Water Act, this project is subject to the following requirements:
- a. Select one of the following options to meet the financial responsibility to provide storm water utilities services for the required continuous operation, maintenance, monitoring system evaluations and enhancements, remediation and/or replacement, all in accordance with Resolution No. 2002-46.
 - i. Participate in the mail ballot proceeding in compliance with Proposition 218, for the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule and pay all associated costs with the ballot process; or
 - ii. Establish an endowment to cover future City costs as specified in the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule.
 - b. Notify the Special Districts Division of the intent to request building permits 90 days prior to their issuance and the financial option selected. The financial option selected shall be in place prior to the issuance of certificate of occupancy. [California Government Code & Municipal Code]
148. The developer shall complete all public improvements in conformance with current

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 23

City standards, except as noted in the Special Conditions, including but not limited to the following:

a. Street improvements including, but not limited to: pavement, base, curb and/or gutter, cross gutters, spandrel, sidewalks, drive approaches, pedestrian ramps, street lights (<MVU: SL-2 / SCE: LS-2>), signing, striping, under sidewalk drains, landscaping and irrigation, medians, pavement tapers/transitions and traffic control devices as appropriate.

b. Storm drain facilities including, but not limited to: storm drain pipe, storm drain laterals, open channels, catch basins and local depressions.

c. City-owned utilities.

d. Sewer and water systems including, but not limited to: sanitary sewer, potable water and recycled water.

e. Under grounding of all existing and proposed utilities adjacent to and on-site. [MC 9.14.130]

f. Relocation of overhead electrical utility lines including, but not limited to: electrical, cable and telephone.

149. All punch list work for off-site and on-site improvements shall be completed.
150. For commercial, industrial and multi-family projects, a Stormwater Treatment Device and Control Measure Access and Maintenance Covenant", "Maintenance Agreement for Water Quality Improvements located in the public right-of-way" and a "Declaration of Restrictive Covenants (encroachment on City easement)" shall be recorded to provide public notice of the maintenance requirements to be implemented per the approved final project-specific WQMP. A boilerplate copy of the covenants and agreements can be obtained by contacting the Land Development Division.
151. The applicant shall ensure the following, pursuant to Section XII. I. of the 2010 NPDES Permit:
- a. Field verification that structural Site Design, Source Control and Treatment Control BMPs are designed, constructed and functional in accordance with the approved Final Water Quality Management Plan (WQMP).
- b. Certification of best management practices (BMPs) from a state licensed civil engineer. An original WQMP BMP Certification shall be submitted for review and approved by the City Engineer.
152. The Developer shall comply with the following water quality related items:
- a. Notify the Land Development Division prior to construction and installation of all structural BMPs so that an inspection can be performed.
- b. Demonstrate that all structural BMPs described in the approved final project-specific WQMP have been constructed and installed in conformance with the approved plans and specifications;
- c. Demonstrate that Developer is prepared to implement all non-structural BMPs

CONDITIONS OF APPROVAL

(PEN20-0120)

Page 24

described in the approved final project-specific WQMP; and

d. Demonstrate that an adequate number of copies of the approved final project-specific WQMP are available for future owners/occupants.

e. Clean and repair the water quality BMP's, including re-grading to approved civil drawing if necessary.

f. Obtain approval and complete installation of the irrigation and landscaping.

Special Districts Division

153. This project is located within the boundary of Community Facilities District No. 4–Maintenance (CFD No. 4-M) and is subject to hydrology study determination based upon the final tentative parcel map. The project is conditioned to provide a funding source which will be used for maintenance of stormwater and detention basin improvements. The Developer shall satisfy the condition with one of the financing options outlined below.

a. In compliance with Proposition 218, the property owner shall agree to approve the special election for annexation into CFD No. 4-M and pay all associated costs with the special election process and formation costs, if any; or

b. Establish an endowment fund which shall be used to cover future maintenance costs for storm water and detention basin improvements benefiting this project.

The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org of its selected financing option when submitting the application for building permit issuance. The option for participating in a special election requires 90 days to complete the special election process. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution.

The financial option selected shall be in place prior to the first issuance of certificate of occupancy for this project.

154. MAJOR INFRASTRUCTURE FINANCING DISTRICT. This project has been identified to potentially be included in the formation of a special financing district for the construction and maintenance of major infrastructure improvements which may include but are not limited to thoroughfares, bridges, and certain flood control improvements. The property owner(s) shall participate in such district and pay any special tax, assessment, or fee levied upon the project property for such district. At the time of the public hearing to consider formation of or annexation into the district, the qualified elector(s) will not protest the formation or annexation, but will retain the right to object to any eventual tax/assessment/fee that is not equitable should the financial burden of the tax/assessment/fee not be reasonably proportionate to the

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 25

benefit the affected property obtains from the improvements to be installed and/or maintained. The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org when submitting an application for the first building permit to determine whether the development will be subjected to this condition. If subject to the condition, the special election requires a minimum 90-day process in compliance with the provisions of Article 13C of the California Constitution.

155. The parcel(s) associated with this project have been incorporated into the Moreno Valley Community Services District Zone A (Parks & Community Services) and Zone C (Arterial Street Lighting). All assessable parcels therein shall be subject to annual parcel taxes for Zone A and Zone C for operations and capital improvements.
156. This project is conditioned to provide a funding source for the operation and maintenance of public improvements and/or services associated with new development in that territory. The Developer shall satisfy this condition with one of the options below.

a. Participate in a special election for maintenance/services and pay all associated costs of the election process and formation, if any. Financing may be structured through a Community Facilities District, Landscape and Lighting Maintenance District, or other financing structure as determined by the City; or

b. Establish an endowment fund to cover the future maintenance and/or service costs.

The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org of its selected financial option prior to City Council action authorizing recordation of the final map for the development. A minimum of 90 days is needed to complete the special election process. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution for conducting a special election.

The financial option selected shall be in place prior to the issuance of the first building permit for the project.

157. This project is conditioned to provide a funding source for the following special financing program(s):

a. Landscape Maintenance Services for parkway, open space, and/or median landscaping on Alessandro Blvd.

The Developer's responsibility is to provide a funding source for the capital

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 26

improvements and the continued maintenance of the landscaped area. The Developer shall satisfy this condition with one of the options below.

i. Participate in a special election (mail ballot proceeding) and pay all associated costs of the special election and formation, if any. Financing may be structured through a Community Services District zone, Community Facilities District, Landscape and Lighting Maintenance District, or other financing structure as determined by the City; or

ii. Establish a Property Owner's Association (POA) or Home Owner's Association (HOA) which will be responsible for any and all operation and maintenance costs.

The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org of its selected financial option prior to City Council action authorizing recordation of the final map for the development. The option for participating in a special election requires approximately 90 days to complete the special election process. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution for conducting a special election.

The financial option selected shall be in place prior to the issuance of the first building permit for this project.

158. Commercial (R) If Land Development, a Division of the Public Works Department, requires this project to supply a funding source necessary to provide for, but not limited to, stormwater utilities services for the continuous operation, remediation and/or replacement, maintenance, monitoring, systems evaluation and enhancements of on-site facilities and performing annual inspections of the affected areas to ensure compliance with state mandated stormwater regulations, a funding source needs to be established. The Developer must notify the Special Districts Division at 951.413.3480 or specialdistricts@moval.org of its selected financial option for the National Pollution Discharge Elimination System (NPDES) program (see Land Development's related condition) 90 days prior to City Council action authorizing recordation of the final map for the development and participate in a special election process. This allows adequate time to be in compliance with the provisions of Article 13D of the California Constitution. (California Health and Safety Code Sections 5473 through 5473.8 (Ord. 708 Section 3.1, 2006) & City of Moreno Valley Municipal Code Title 3, Section 3.50.050.)
159. This project has been identified to be included in the formation of a Community Facilities District for Public Safety services including but not limited to Police, Fire Protection, Paramedic Services, Park Rangers, and Animal Control services. The property owner(s) shall not protest the formation; however, they retain the right to

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 27

object to the rate and method of maximum special tax. In compliance with Proposition 218, the property owner shall agree to approve the mail ballot proceeding (special election) for either formation of the CFD or annexation into an existing district that may already be established. The Developer must notify the Special Districts Division at 951.413.3480 or specialdistricts@moval.org of its intent to record the final map for the development 90 days prior to City Council action authorizing recordation of the map. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution. (California Government Code Section 53313 et. seq.)

160. The existing parkway/median along the frontage of the project shall be brought to current City Standards. Improvements may include but are not limited to: plant material, irrigation, and hardscape.
161. The ongoing maintenance of any landscaping required to be installed behind the curb shall be the responsibility of the property owner.
162. Any damage to existing landscape areas maintained by the City of Moreno Valley due to project construction shall be repaired/replaced by the Developer, or Developer's successors in interest, at no cost to the City of Moreno Valley.
163. **PARKS MAINTENANCE FUNDING.** Prior to applying for the 1st Building Permit, the qualified elector (e.g. property owner) must initiate the process (i.e. pay the annexation fee or fund an endowment) to provide an ongoing funding source for the continued maintenance, enhancement, and or retrofit of parks, open spaces, linear parks, and/or trails systems, and programs.
- This condition must be fully satisfied prior to issuance of the 1st Certificate of Occupancy. This condition will be satisfied with the successful annexation/formation (i.e. special election process) into a special financing district and payment of all costs associated with the special election process. Annexation into a special financing district requires an annual payment of the annual special tax, assessment, or fee levied against the property tax bill, or other lawful means, of the parcels of the project for such district. At the time of the public hearing to consider annexation into or formation of the district, the qualified elector(s) will not protest the annexation or formation, but will retain the right to object to any eventual tax/assessment/fee that is not equitable should the financial burden of the tax/assessment/fee not be reasonably proportionate to the benefit the affected property receives from the improvements to be installed and/or maintained or services provided. The special election requires a minimum 90-day process in compliance with the provisions of Article 13C of the California Constitution, Proposition 218, or other applicable legislation, and consistent with the scheduling for City Council meetings.
- Alternatively, the condition can be satisfied by the Developer funding an endowment in an amount sufficient to yield an annual revenue stream that meets the annual obligation. The Developer must contact Special Districts Administration at

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 28

951.413.3470 or at SAdmin@moval.org to satisfy this condition.

Transportation Engineering Division

164. Conditions of approval may be modified or added if a phasing plan is submitted for this development.
165. All proposed on-site traffic signing and striping should be accordance with the latest California Manual on Uniform Traffic Control Devices (CAMUTCD).
166. Sight distance at the proposed roadways and driveways shall conform to City of Moreno Valley Standard No. MVSI-164A,B,C-0 at the time of preparation of final grading, landscape, and street improvement plans.
167. Communication conduit along Alessandro Boulevard shall be required per City Standard No. MVSI-186-0. Any improvements undertaken by this project shall be consistent with the City standards for this facility.
168. Alessandro Boulevard is designated as a 6-Lane Divided Arterial (134' RW/110'CC) per City Standard Plan No. MVSI-101A and shall be improved to its ultimate half-width plus 23' with median and necessary transition improvements. The existing eastbound left turn pocket at the intersection of Graham Street and Alessandro Boulevard shall be modified to provide 250 feet of vehicle storage. A Class II Bikeway shall be provided along project frontage.
169. Prior to issuance of an encroachment permit, construction traffic control plans shall be prepared by a qualified, registered Civil or Traffic engineer and submitted for plan approval.
170. Prior to final approval of any landscaping or monument sign plans, the project plans shall demonstrate that sight distance at the project driveways conforms to City Standard Plan No. MVSI-164A, B, C-0.
171. Prior to the final approval of the street improvement plans, a signing and striping plan shall be prepared per City of Moreno Valley Standard Plans - Section 4 for Alessandro Boulevard.
172. Prior to issuance of a Building Final or Certificate of Occupancy, all approved signing and striping shall be installed per current City Standards
173. All project driveways shall conform to Section 9.11.080, and Table 9.11.080-14 of the City's Development Code – Design Guidelines and City of Moreno Valley Standard Plans No. MVSI-112C-0 for commercial driveway approaches. Access at all driveways shall be right-in and right-out access only.

CONDITIONS OF APPROVAL

(PEN20-0120, PEN20-0121 & PEN20-0124)

Page 29

174. Prior to final approval of the street improvement plans, a median modification plan shall be required to modify the existing raised, landscaped median on Alessandro Boulevard, west of Graham Street. The median shall be designed per current City Standards to extend the eastbound left-turn storage length to 250 feet at the Alessandro Boulevard/Graham Street intersection.
175. During construction activity, developer is responsible for regularly scheduled street sweeping per approved street sweeping schedule. Failure to provide regularly scheduled street sweeping during construction activity at the approved times shall result in re-inspection fees (amounts to be determined by City Engineer) and/or project suspension until street sweeping is provided.

NOTICE OF PUBLIC HEARING

F.1.ab

PROPOSAL: Applicant is requesting approval of the following entitlements for the Compass Danbe Centerpointe project: 1) a General Plan Amendment (GPA) amending the City's General Plan from Commercial to Business Park, 2); a Change of Zone from Community Commercial District (CC) to Light Industrial District (LI); 3) a Plot Plan for an approximately 290,726 square foot light industrial building; and, 4) a Plot Plan for a 98,877 square foot light industrial building located on a 17.67 acre site.

ENVIRONMENTAL DETERMINATION: The project has been evaluated against the criteria set forth in the California Environmental Quality Act (CEQA) and CEQA Guidelines and staff has determined that a Mitigated Negative Declaration is the appropriate environmental document for the proposed project.

The Draft Initial Study/Mitigated Negative Declaration was circulated for public review by responsible and trustee agencies and other interested parties for a review period commencing July 26, 2021 through August 25, 2021. The documents can be obtained in electronic format via email by request. The final document may be inspected by appointment at the Community Development Department at 14177 Frederick Street, Moreno Valley, California by calling (951) 413-3206 during normal business hours (7:30 a.m. to 5:30 p.m., Monday through Thursday, 7:30 a.m. to 4:30 p.m., Friday).

PUBLIC HEARING: All interested parties will be provided an opportunity to submit oral testimony during the Public Hearing and/or provide written testimony during or prior to the Public Hearing. The application file and related environmental documents may be inspected at the Community Development Department at 14177 Frederick Street, Moreno Valley, California during normal business hours (7:30 a.m. to 5:30 p.m., Monday through Thursday, and 7:30 a.m. to 4:30 p.m. Friday).

PLEASE NOTE: The City Council may consider and approve changes to the proposed items under consideration during the Public Hearing.

GOVERNMENT CODE § 65009 NOTICE: If you challenge any of the proposed actions taken by the City Council in court, you may be limited to raising only those issues you or someone else raised during the Public Hearing described in this notice, or in written correspondence delivered to the Planning Division of the City of Moreno Valley during or prior to, the Public Hearing.

Upon request and in compliance with the Americans with Disabilities Act of 1990, any person with a disability who requires a modification or accommodation in order to participate in a meeting should direct such request to James Verdugo, ADA Coordinator, at 951.413.3350 at least 48 hours before the meeting. The 48-hour notification will enable the City to make reasonable arrangements to ensure accessibility to this meeting.

PLANNING COMMISSION

STAFF REPORT

Meeting Date: August 26, 2021

PROPOSED GENERAL PLAN AMENDMENT AND CHANGE OF ZONE AMENDING "MAP LCC-4: GENERAL PLAN LAND USE" OF THE MORENO VALLEY GENERAL PLAN AND THE CITY ZONING ATLAS, RESPECTIVELY, PROPOSED TENTATIVE PARCEL MAP 37944 FOR TWO (2) LOTS, A PLOT PLAN FOR AN APPROXIMATELY 290,726 SQUARE FOOT LIGHT INDUSTRIAL BUILDING, AND A PLOT PLAN FOR AN APPROXIMATELY 98,877 SQUARE FOOT LIGHT INDUSTRIAL BUILDING

Case: PEN20-0118 General Plan Amendment
 PEN20-0119 Change of Zone
 PEN20-0120 Tentative Parcel Map 37944
 PEN20-0121 Plot Plan
 PEN20-0124 Plot Plan

Applicant: CDRE Holdings 17 LLC, Mark Bachli

Property Owner: Moreno Valley Centerpoint LLC

Representative: MIG, Inc., Pamela Steele

Location: South side of Alessandro Boulevard between Frederick Street and Graham Street (297-170-002 and 003)

Case Planner: Julia Descoteaux

Council District: 1

Proposal: The applicant requests approval of the following entitlements for a 17.67 acre site: 1) General Plan Amendment (GPA) amending "Map LCC-4: General Plan Land Use Map of the Moreno Valley General Plan to change the land use designation of the Project Site from Commercial (C) to Business Park (BP); 2)

Change of Zone amending the City of Moreno Valley Zoning Atlas to rezone the Project Site from Community Commercial District (CC) to Light Industrial District (LI); 3) Tentative Parcel Map 37944 for two (2) lots; 4) Plot Plan for an approximately 290,729 square foot light industrial building; and 5) Plot Plan for an approximately 98,877 square foot light industrial building with associated public improvements.

SUMMARY

CDRE Holdings 17, LLC (“Applicant”) is requesting approval of the following: a General Plan Amendment (PEN20-0118) to amend the General Plan land use designation from Commercial (C) to Business Park (BP), a Change of Zone (PEN20-0119) to amend the Zoning Atlas from Community Commercial District (CC) to Light Industrial District (LI), a Tentative Parcel Map (PEN20-0120) for two parcels, a Plot Plan (PEN20-0121) for a 290,726 square foot light industrial building and a Plot Plan (PEN20-0124), a Plot Plan for a 98,877 square foot light industrial building located on the south side of Alessandro Boulevard between Frederick Street and Graham Street, Assessor Parcel Nos. 297-170-002 and 003.

PROJECT DESCRIPTION

General Plan Amendment

The City of Moreno Valley General Plan Land Use Map designates the Project Site, as described in the Summary above, as Commercial (C) and the proposal would change this land use designation to Business Park (BP).

The primary purpose of areas designated Commercial (C) is to provide property for business purposes, including, but not limited to, retail stores, restaurants, banks, hotels, professional offices, personal services and repair services. The primary purpose of the Business Park (BP) is to provide for manufacturing, research and development, warehousing and distribution, as well as office and support for commercial activities. While the purpose of the two land use designations are different, the proposed General Plan Amendment will be consistent with adjacent parcels to the south and east, and would result in a total increase of approximately 17.67-acres of the Business Park (BP) land use designation and a corresponding reduction of approximately 17.67-acres of the Commercial (C) land use designation.

Change of Zone

The Project site is currently zoned Community Commercial District (CC), and the proposal would rezone it to Light Industrial District (LI).

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

The primary purpose of the Community Commercial District (CC) is to provide for the general shopping needs of area residents and workers with a variety of business, retail, personal and related or similar services.

The primary purpose of the Light Industrial District (LI) is to provide light manufacturing, light industrial, research and development, warehousing and distribution and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial on a limited basis. While the purpose of the two zoning designations are different the proposed Change of Zone will be consistent with adjacent parcels to the south.

Tentative Parcel Map

The Applicant is proposing a Tentative Parcel Map 37944 to relocate the existing property line to provide separate parcels for Building 1 and Building 2. Staff has reviewed the proposed Tentative Parcel Map and confirmed that the proposed lots comply with the City’s development standards.

Plot Plan

The Applicant is proposing the construction of two light industrial buildings, one approximately 290,726 square feet in size and one approximately 98,877 square feet in size (“Project”) with associated parking, landscape improvements and off-site public improvements.

The current proposal anticipates both buildings will be constructed in conjunction with each other. However, should one building be delayed, all on-site and off-site improvements shall be constructed with the first building, prior to building final. Conditions have been included to address the improvements and the maintenance of an unconstructed parcel should this situation arise.

Site/ Surrounding Area

The approximately 17.67-acre site is located on the south side of Alessandro Boulevard between Frederick Street and Graham Street in the center of the block.

The surrounding area includes existing Neighborhood Commercial District (NC), Residential 20 District (R20), and Residential 5 District (R5) to the north across Alessandro Boulevard. The property to the west is vacant land zoned Community Commercial District (CC), to the south are developed with industrial buildings within Light Industrial District (LI), and to the east are vacant land within the Business Park-Mixed Use District (BPX) and Community Commercial District (CC).

Access/Parking

Access to the Project site will be from three new driveways on Alessandro Boulevard. All driveways will be right-in right-out only, with two driveways designed to accommodate truck traffic.

Parking for both automobiles and trucks exceed the Municipal Code requirements. Overall, a total of 217 parking spaces are provided for both buildings which include standard automobile, ADA, EV, EVCS and Clean Air spaces, as well as, 44-truck space in the truck court areas. Bicycle parking is also included in the site design as required.

Design/Landscaping

The proposed light industrial type buildings incorporate a contemporary architectural design. Dark bronze metal tower elements at the building corners provide a focal point with textured concrete sections, glass, tile and various awning types, bringing an office aesthetic to the buildings. The elements are included on the side elevations for continuity of the buildings. The colors of off-white, taupe and warm grey provide the background for the dark bronze metal tower and brown metal window treatments, which include flat awnings above the pained windows and elongated awnings at intervals, which break up the massing of the buildings.

Extensive landscaping is provided along the building frontage in addition to the required front set back and right of way landscaping which includes plant, ground covers, street trees and on-site trees.

REVIEW PROCESS

The Project has been considered by all appropriate agencies within and outside of the City, consistent with the standard review process required for these types of development applications. The Project was reviewed by the Project Review Staff Committee as required by the Municipal Code. Following subsequent revisions and review by various staff, the Project's entitlement package was deemed complete for processing for Planning Commission review and consideration, and staff is recommending the Planning Commission recommend to the City Council approval of the Project as designed and conditioned.

ENVIRONMENTAL

An Initial Study was prepared by T&B Planning, Inc., in compliance with the California Environmental Quality Act (CEQA) and the CEQA Guidelines. The Initial Study examined the potential Project impacts on the environment. The Initial Study/Mitigation Negative Declaration (IS/MND) provides information in support of the finding that a Mitigated Negative Declaration serves as the appropriate CEQA documentation for the proposed Project in that the proposed Project, with the implementation of the proposed mitigation measures, will not have a significant effect on the environment. Technical studies prepared in support of the IS/MND include the following: Air Quality Impact Analysis, Mobile Source Health Risk Assessment, MSHCP General Biological Resources Assessment & Compliance Analysis, Jurisdictional Delineation Report and Impact Analysis, MSHCP Determination of Biologically Equivalent or Superior Preservation, Burrowing Owl Focused Survey Report, Least Bell's Vireo Focused Survey Report, Phase I Cultural Resources Survey, Energy Analysis, Geotechnical

Engineering Investigation, Greenhouse Gas Analysis, Phase I Environmental Site Assessment Report, Paleontological Assessment, Preliminary Water Quality Management Plan, Preliminary Drainage Study, Noise Impact Analysis, Traffic Analysis, and Vehicle Miles Traveled (VMT) Analysis. The electronic files for the IS/MND with appendices are attached to this staff report. Anyone wishing to view the documents can also do so at City Hall.

Mitigation Measures are recommended for the proposed Project in the following areas: Biological Resources, Geology and Soils, and Tribal Cultural Resources. The measures for Tribal resources have been included to address input from the Tribal governments. The measures are intended to ensure that potential resources that might be discovered are protected. However, these measures are not required to address a known significant impact. Based on the Initial Study, and the proposed mitigation measures, the Project will not cause any significant impacts or environmental damage.

The public comment period for the Notice of Availability for the Initial Study/Mitigated Negative Declaration began on July 26, 2021, and ends on August 25, 2021, which satisfies the required 30-day, review period. As of the preparation of this staff report, no comments have been received. Should comments regarding the Project be received prior to the Planning Commission they will be provided at the public hearing.

NOTIFICATION

Notice of the public hearing was sent to all property owners of record within 600 feet of the Project Site. The public hearing notice was also posted on the Project Site and published in the Press Enterprise newspaper.

REVIEW AGENCY COMMENTS

Staff has coordinated with outside trustee and responsible agencies where applicable, as is the standard review process with these types of development applications.

STAFF RECOMMENDATION

Staff recommends that the Planning Commission take the following actions:

- A. That the Planning Commission **ADOPT** Resolution No. 2021-24, attached hereto, **RECOMMENDING** that the City Council:
 - 1. **APPROVE** the Initial Study/Mitigated Negative Declaration prepared for General Plan Amendment PEN20-0118, Change of Zone PEN20-0119. Tentative Parcel Map 37944 PEN20-0120 and Plot Plans PEN20-0121 and PEN20-0124 on file with the Community Development Department, incorporated herein by this reference, and any necessary and corresponding amendment to the City’s Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment and Change of Zone, which was completed in compliance with CEQA and the CEQA Guidelines, and

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

reflects that the Planning Commission reviewed and considered the information contained in the Initial Study/Mitigated Negative Declaration, and exercised its independent judgment and analysis of the proposed Project's potential environmental impacts; and

2. **ADOPT** the Mitigation Monitoring and Reporting Program prepared for the Project, which consists of General Plan Amendment PEN20-0118, Change of Zone PEN20-0119, Tentative Parcel Map 37944 PEN20-0120, and Plot Plans PEN20-0121 and PEN20-0124 and any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment and Change of Zone pursuant to CEQA and the CEQA Guidelines.
- B. That the Planning Commission **ADOPT** Resolution No. 2021-25 attached hereto, **RECOMMENDING** that the City Council:
1. **APPROVE** PEN20-0118 General Plan Amendment based on the Recitals, Evidence contained in the Administrative Record and Findings set forth in Resolution No. 2021-25 and any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment.
- C. That the Planning Commission **ADOPT** Resolution No. 2021-26, attached hereto, **RECOMMENDING** that the City Council:
1. **APPROVE** PEN20-0119 Change of Zone based on the Recitals, Evidence contained in the Administrative Record and Findings as set forth in Resolution No. 2021-26 and any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed change in the zoning classification and/or redistricting associated with the Change of Zone.
- D. That the Planning Commission **ADOPT** Resolution No. 2021-27, attached hereto, **RECOMMENDING** that the City Council:
1. **APPROVE** Tentative Parcel Map PEN21-0120 based on the Recitals, Evidence contained in the Administrative Records and Findings as set forth in Resolution No. 2021-27.
- E. That the Planning Commission **ADOPT** Resolution No. 2021-28, attached hereto, **RECOMMENDING** that the City Council:
1. **APPROVE** Plot Plans PEN20-0121 and PEN20-0124 based on the Recitals, Evidence contained in the Administrative Records and Findings as set forth in Resolution No. 2021-28.

RESOLUTION NUMBER 2021-24

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, RECOMMENDING THAT THE CITY COUNCIL ADOPT A MITIGATED NEGATIVE DECLARATION AND MITIGATION MONITORING AND REPORTING PROGRAM FOR THE COMPASS DANBE CENTERPOINTE PROJECT LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003)

WHEREAS, the City of Moreno Valley (“City”) is a general law city and a municipal corporation of the State of California, and the lead agency for the preparation and consideration of environmental documents for local projects that are subject to requirements of the California Environmental Quality Act (CEQA) and CEQA Guidelines; and

WHEREAS, CDRE Holdings, LLC., (“Developer”) is seeking approval for the development of the Compass Danbe Centerpointe project, a two building light industrial complex on a 17.67-acre site that includes: 1) a General Plan Amendment (GPA) (PEN20-0118) amending the “Land Use Map” (Map LCC-4) of the Moreno Valley General Plan to change the land use designation of the Project site from Commercial to Business Park; 2) a Change of Zone (PEN20-0119) to change the zoning designation of the site from Community Commercial District (CC) to Light Industrial District (LI); 3) a Tentative Parcel Map (PEN20-0120) for two lots; 4) a Plot Plan (PEN20-0121) for an approximately 290,726 square foot light industrial building; 5) a Plot Plan (PEN21-0124) for an approximately 98,877 square foot light industrial building with associated public improvements located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN'S 297-170-002-003); and

WHEREAS, the proposed “Project” shall include not only the General Plan Amendment (GPA) (PEN20-0118), Change of Zone (PEN20-0119), Tentative Parcel Map (PEN20-0120), and two Plot Plans (PEN20-0121 and PEN20-0124), but also a corresponding amendment to the City’s Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment; and

WHEREAS, Planning Division Staff completed an environmental assessment for the proposed Project, and, based on the assessment, decided to prepare an Initial Study (“IS”) and a Mitigated Negative Declaration (“MND”) in accordance with Section 6 (ND Procedures) of the City’s Rules and Procedures for the Implementation of the California Environmental Quality Act and the requirements of the CEQA Guidelines Sections 15070 – 15075; and

WHEREAS, a Notice of Intent to Adopt a Mitigated Negative Declaration was duly noticed and circulated for public review for a period of 30 days commencing on July 26, 2021, through August 25, 2021; and

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

WHEREAS, in conformance with CEQA and the CEQA Guidelines, a Mitigation Monitoring and Reporting Program (“MMRP”) that includes a program for reporting on and monitoring Project mitigation measures was prepared for the proposed Project and noticed with the Mitigated Negative Declaration; and

WHEREAS, on August 26, 2021, a hearing was conducted by the Planning Commission to consider a recommendation that the City Council approve the Mitigated Negative Declaration and the Mitigation Monitoring and Reporting Program and approve the proposed Project; and

WHEREAS, at the conclusion of the public hearing, in the exercise of its own independent judgment, the Planning Commission recommends that the City Council determine that the Mitigated Negative Declaration and the Mitigation Monitoring and Reporting Program will reduce the environmental impacts of the Project to levels of insignificance and that there is no substantial evidence supporting a fair argument that the Project will have a significant effect on the environment.

NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Evidence

That the Planning Commission has considered all the evidence submitted into the Administrative Record for the Mitigated Negative Declaration and Mitigation Monitoring Plan, including, but not limited to, the following:

- (a) Mitigated Negative Declaration/Initial Study prepared for the proposed Project, attached hereto as Exhibit A;
- (b) Notice of Intent to Adopt a Mitigated Negative Declaration/Newspaper Notice, attached hereto as Exhibit B;
- (c) Mitigation Monitoring and Reporting Program, attached hereto as Exhibit C;
- (d) Staff Report prepared for the Planning Commission’s consideration and all documents, records and references related thereto, and Staff’s presentation at the public hearing; and
- (e) Testimony, comments and correspondence from all persons that were provided at, or prior to, the public hearing.

Section 3. Findings

That based on the content of the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the Planning Commission makes the following findings:

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

- (a) That the City has independently reviewed, analyzed, and considered the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program, and the whole record before it, including, the Initial Study and comments received;
- (b) That the proposed mitigation measures will reduce all environmental impacts of the proposed Project to levels of insignificance and there is no substantial evidence supporting a fair argument that the Project will have a significant effect on the environment;
- (c) That the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program have been completed in compliance with CEQA and the CEQA Guidelines consistent the City's Rules and Procedures for the Implementation of the California Environmental Quality Act.
- (d) That the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program reflect the independent judgment and analysis of the City as lead agency for the proposed Project; and
- (e) That the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program are adequate to serve as the required CEQA environmental documentation for the proposed Project.

Section 4. Adoption

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings, as set forth herein, the Planning Commission hereby recommends that the City Council adopt the Mitigated Negative Declaration/Initial Study attached hereto as Exhibit A and the Mitigation Monitoring and Reporting Program attached hereto as Exhibit C.

Section 5. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the Planning Commission that are in conflict with the provisions of this Resolution are hereby repealed.

Section 6. Severability

That the Planning Commission declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 7. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 8. Certification

That the Secretary of the Planning Commission shall certify to the passage of this Resolution.

RESOLUTION NUMBER 2021-25

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, RECOMMENDING THAT THE CITY COUNCIL APPROVE GENERAL PLAN AMENDMENT PEN20-0118 TO AMEND THE GENERAL PLAN LAND USE MAP, CHANGING THE LAND USE DESIGNATION FROM COMMERCIAL TO BUSINESS PARK FOR THE PROPERTY LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003) AND THE NECESSARY AND CORRESPONDING AMENDMENTS TO THE CITY'S ZONING ATLAS

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and has the authority to approve amendments to the City's General Plan and the City's Zoning Atlas; and

WHEREAS, CDRE Holdings LLC., ("Developer") has filed an application for the approval of General Plan Amendment PEN20-0118 ("Application") to amend the Moreno Valley General Plan from Commercial to Business Park for the project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street, (APN's 297-170-002 and 003) ("Site"), which shall also require any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Moreno Valley Municipal Code and Government Code section 65905, a public hearing was scheduled for August 26, 2021, and notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Site; and

WHEREAS, on August 26, 2021, the public hearing to consider the Application was duly conducted by the Planning Commission at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, on August 26, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA¹) and CEQA Guidelines,² the Planning Commission considered and recommended that the City Council approve Resolution 2021-24 recommending that the City Council adopt a Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the Compass Danbe Centerpointe Project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and, 003).

¹ Public Resources Code §§ 21000-21177

² 14 California Code of Regulations §§15000-15387

NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed Project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the Planning Commission has considered all of the evidence submitted into the administrative record for the General Plan Amendment, including, but not limited to, the following:

- (a) Moreno Valley General Plan and all relevant provisions contained therein;
- (b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all relevant provisions referenced therein;
- (c) The Moreno Valley General Plan amendment changing the land use designation from Commercial to Business Park and all relevant provisions contained therein as shown on Exhibit A;
- (d) Application for the approval of a General Plan Amendment PEN20-0118 and all documents, records and references contained therein;
- (e) Staff Report prepared for the Planning Commission’s consideration and all documents, records and references related thereto, and Staff’s presentation at the public hearing;
- (f) Testimony and/or comments from Applicant and its representatives during the public hearing; and
- (g) Testimony, comments and correspondence from all persons that were provided in written format or correspondence, at, or prior to, the public hearing.

Section 4. Findings

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the Planning Commission makes the following findings:

- (a) The proposed General Plan amendment is consistent with the existing goals, objectives, policies and programs of the General Plan; and
- (b) The proposed General Plan amendment will not adversely affect the public health, safety or general welfare.

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section 5. Approval

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings, as set forth herein, the Planning Commission hereby recommends that the City Council approve General Plan Amendment PEN20-0118 as depicted in the exhibit attached hereto as Exhibit A, and any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment.

Section 6. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the Planning Commission that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. Severability

That the Planning Commission declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. Certification

That the Secretary of the Planning Commission shall certify to the passage of this Resolution.

RESOLUTION NUMBER 2021-26

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, RECOMMENDING THAT THE CITY COUNCIL APPROVE CHANGE OF ZONE PEN20-0119 TO AMEND THE CITY ZONING ATLAS FROM COMMUNITY COMMERCIAL DISTRICT (CC) TO LIGHT INDUSTRIAL DISTRICT (LI), FOR THE PROPERTY LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and the lead agency for the preparation and consideration of environmental documents for local projects that are subject to requirements of the California Environmental Quality Act (CEQA) and CEQA Guidelines; and

WHEREAS, CDRE Holdings LLC., ("Developer") has filed an application for the approval of Change of Zone PEN20-0119 ("Application") a request to amend the City's Zoning Atlas from Community Commercial District (CC) to Light Industrial District (LI) for the property located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003) ("Site"); and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Moreno Valley Municipal Code and Government Code section 65905, a public hearing was scheduled for August 26, 2021, and notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Site; and

WHEREAS, on August 26, 2021, the public hearing to consider the Application was duly conducted by the Planning Commission at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, on August 26, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the Planning Commission considered and recommended that the City Council approve Resolution 2021-24 recommending that the City Council adopt a Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the Compass Danbe Centerpointe Project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003).

NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the Planning Commission has considered all of the evidence submitted into the administrative record for the General Plan Amendment, including, but not limited to, the following:

- (a) Moreno Valley General Plan and all other relevant provisions contained therein;
- (b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein;
- (c) The Change of Zone to amend the City’s Zoning Atlas from Community Commercial District (CC) to Light Industrial District (LI) and all other relevant provisions contained therein as shown on Exhibit A;
- (d) Application for the approval of a Change of Zone PEN20-0119 and all documents, records and references contained therein;
- (e) Staff Report prepared for the Planning Commission’s consideration and all documents, records and references related thereto, and Staff’s presentation at the public hearing;
- (f) Testimony and/or comments from Applicant and its representatives during the public hearing; and
- (g) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the public hearing.

Section 4. Findings

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the Planning Commission hereby finds as follows:

- (a) The proposed Change of Zone is consistent with the existing goals, objectives, policies and programs of the General Plan;
- (b) The proposed Change of Zone will not adversely affect the public health, safety or general welfare; and
- (c) The proposed Change of Zone is consistent with the purposes and intent of Title 9.

Section 5. Approval

That based on the foregoing Recitals, Evidence in the Administrative Record and Findings, the Planning Commission hereby recommends that the City Council approve Change of Zone PEN20-0119 attached hereto as Exhibit A.

Section 6. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the Planning Commission that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. Severability

That the Planning Commission declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. Certification

That the Secretary of the Planning Commission shall certify to the passage of this Resolution.

RESOLUTION NUMBER 2021-27

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, RECOMMENDING THAT THE CITY COUNCIL APPROVE TENTATIVE PARCEL MAP 37944 FOR THE COMPASS DANBE CENTERPOINTE PROJECT LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and the lead agency for the preparation and consideration of environmental documents for local projects that are subject to requirements of the California Environmental Quality Act (CEQA) and CEQA Guidelines; and

WHEREAS, CDRE Holdings LLC., ("Developer") has filed an application for the approval of Tentative Parcel Map 37944 PEN20-0122 ("Application") for the Compass Danbe Centerpointe Project, ("Project") located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003) ("Site"); and

WHEREAS, the Application has been evaluated in accordance with Chapter 9.14 (Land Divisions) of the Municipal Code with consideration given to the City's General Plan, Zoning Ordinance, and other applicable laws and regulations; and

WHEREAS, Chapter 9.14 of the Municipal Code imposes conditions of approval upon projects for which a Tentative Parcel Map is required, which conditions may be imposed by the Planning Commission to address on-site improvements, off-site improvements, the manner in which the site is used and any other conditions as may be deemed necessary to protect the public health, safety and welfare and ensure that the proposed Project will be developed in accordance with the purpose and intent of Title 9 ("Planning and Zoning") of the Municipal Code; and

WHEREAS, Staff has presented for the Planning Commission's consideration Conditions of Approval to be imposed upon Tentative Parcel Map 37944 PEN20-0122 (TPM), which conditions have been deemed necessary to protect the public health, safety and welfare and ensure that the proposed Project will be developed in accordance with the purpose and intent of Title 9 ("Planning and Zoning") of the Municipal Code; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Municipal Code and Government Code section 65905, a public hearing was scheduled for August 26, 2021 and notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Site; and

WHEREAS, on August 26, 2021, the public hearing to consider the Application was duly conducted by the Planning Commission at which time all interested persons were provided with an opportunity to testify and to present evidence; and

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

WHEREAS, consistent with the requirements of Chapter 9.14 (Land Divisions) of the Municipal Code, at the public hearing the Planning Commission considered Conditions of Approval to be imposed upon Tentative Parcel Map 37944 PEN20-0122 , which conditions were prepared by Planning Division staff who deemed said conditions to be necessary to protect the public health, safety and welfare and to ensure the proposed Project will be developed in accordance with the purpose and intent of Title 9 (“Planning and Zoning”) of the Municipal Code; and

WHEREAS, at the public hearing, the Planning Commission considered whether each of the requisite findings specified in Section 9.14.070 of the Municipal Code and set forth herein could be made with respect to the proposed Project as conditioned by Conditions of Approval; and

WHEREAS, on August 26, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA¹) and CEQA Guidelines, the Planning Commission considered and recommended that the City Council approve Resolution 2021-24 recommending that the City Council adopt a Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the Compass Danbe Centerpointe Project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN’s 297-170-002 and 003).

NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached Exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the Planning Commission has considered all of the evidence submitted into the administrative record for the proposed Tentative Parcel Map 37944 PEN20-0122, including, but not limited to, the following:

- (a) Moreno Valley General Plan and all other relevant provisions contained therein;
- (b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein;

- (c) Application for the approval of Tentative Parcel Map 37944 PEN20-0122 and all documents, records and references contained therein;
- (d) Conditions of Approval for Tentative Parcel Map 37944 PEN20-0122, attached hereto as Exhibit A;
- (e) Staff Report prepared for the Planning Commission's consideration and all documents, records and references related thereto, and Staff's presentation at the public hearing;
- (f) Testimony and/or comments from Applicant and its representatives during the public hearing; and
- (g) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the public hearing.

Section 4. Findings

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the Planning Commission makes the following findings in approving Tentative Parcel Map 37944 PEN20-0122.

- (a) That the proposed map is consistent with applicable general and specific plans and the zoning ordinance;
- (b) That the design or improvement of the proposed subdivision is consistent with applicable general and specific plans;
- (c) That the site is physically suitable for the type of development;
- (d) That the site of the proposed land division is physically suitable for the proposed density of the development;
- (e) That the design of the subdivision or the proposed improvements are not likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat;
- (f) That the design of the subdivision or type of improvements is not likely to cause serious public health problems;
- (g) That the design of the subdivision or the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision;
- (h) That the proposed land division is not subject the Williamson Act pursuant to the California Land Conservation Act of 1965.
- (i) That the proposed land division and the associated design and improvements are not consistent with applicable ordinances of the city.
- (j) That the design of the land division provides, to the extent feasible, for future passive or natural heating and cooling opportunities in the subdivision.
- (k) That the effect of the proposed land division on the housing needs of the region were considered and balanced against the public service needs of the residents of Moreno Valley and available fiscal and environmental resources.

Section 5. Approval

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth above, the Planning Commission hereby recommends that the City Council approve Tentative Parcel Map 37944 PEN20-0122 subject to the Conditions of Approval for Tentative Parcel Map 37944 PEN20-0122 attached hereto as Exhibit A.

Section 6. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the Planning Commission that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. Severability

That the Planning Commission declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. Certification

That the Secretary of the Planning Commission shall certify to the passage of this Resolution.

RESOLUTION NUMBER 2021-28

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, RECOMMENDING THAT THE CITY COUNCIL APPROVE PLOT PLANS PEN20-0121 AND PEN20-0124 FOR THE COMPASS DANBE CENTERPOINTE PROJECT LOCATED ON THE SOUTH SIDE OF ALESSANDRO BOULEVARD BETWEEN FREDERICK STREET AND GRAHAM STREET (APN'S 297-170-002 AND 003)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California; and

WHEREAS, CDRE Holdings LLC., ("Developer") has filed an application for the approval of the Compass Danbe Centerpointe Project, which includes the approval of Plot Plans PEN20-0121 and PEN20-0124 ("Applications") for the development of two light industrial buildings approximately 290,726 and 98,877 square feet in size with associated public improvements ("Project") located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003) ("Project Site"); and

WHEREAS, Section 9.02.070 (Plot Plan) of the Moreno Valley Municipal Code acknowledges that the purpose of plot plans is to provide a mechanism by which all new construction of industrial, commercial or multiple-family residential can be reviewed when not subject to other discretionary review processes which have review authority over project design; and

WHEREAS, the Application has been evaluated in accordance with Section 9.02.070 (Plot Plan) of the Municipal Code with consideration given to the City's General Plan, Zoning Ordinance, and other applicable laws and regulations; and

WHEREAS, Section 9.02.070 of the Municipal Code imposes conditions of approval upon projects for which a Plot Plan is required, which conditions may be imposed by the City to address on-site improvements, off-site improvements, the manner in which the site is used and any other conditions as may be deemed necessary to protect the public health, safety and welfare and ensure that the proposed Project will be developed in accordance with the purpose and intent of Title 9 (Planning and Zoning) of the Municipal Code; and

WHEREAS, Staff has presented for the Planning Commission's consideration Conditions of Approval to be imposed upon Plot Plans PEN20-0121 and PEN20-0124, which conditions have been deemed necessary to protect the public health, safety and welfare and ensure that the proposed Project will be developed in accordance with the purpose and intent of Title 9 (Planning and Zoning) of the Municipal Code; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Municipal Code and Government Code section 65905, a public hearing was scheduled for August 26, 2021, and notice thereof was duly published

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

and posted, and mailed to all property owners of record within 600 feet of the Project Site; and

WHEREAS, on August 26, 2021, the public hearing to consider the Applications was duly conducted by the Planning Commission at which time all interested persons were provided with an opportunity to testify and to present evidence; and

WHEREAS, consistent with the requirements of Section 9.02.070 (Plot Plan) of the Municipal Code, at the public hearing the Planning Commission considered Conditions of Approval to be imposed upon Plot Plans PEN20-0121 and PEN20-0124, which conditions were prepared by Planning Division staff who deemed said conditions to be necessary to protect the public health, safety and welfare and to ensure the proposed Project will be developed in accordance with the purpose and intent of Title 9 (Planning and Zoning) of the Municipal Code; and

WHEREAS, at the public hearing, the Planning Commission considered whether each of the requisite findings specified in Section 9.02.070 of the Municipal Code and set forth herein could be made with respect to the proposed Project as conditioned by Conditions of Approval; and

WHEREAS, on August 26, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the Planning Commission considered and recommended that the City Council approve Resolution 2021-24 recommending that the City Council adopt a Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the Compass Danbe Centerpointe Project located on the south side of Alessandro Boulevard between Frederick Street and Graham Street (APN's 297-170-002 and 003).

NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached Exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the Planning Commission has considered all of the evidence submitted into the administrative record for the proposed Plot Plans, including, but not limited to, the following:

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

- (a) Moreno Valley General Plan and all other relevant provisions contained therein;
- (b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein;
- (c) Application for the approval of Plot Plans PEN20-0121 and PEN20-0124 and all documents, records and references contained therein;
- (d) Conditions of Approval for Plot Plans PEN20-0121 and PEN20-0124, attached hereto as Exhibit A;
- (e) Staff Report prepared for the Planning Commission’s consideration and all documents, records and references related thereto, and Staff’s presentation at the public hearing;
- (f) Testimony and/or comments from Applicant and its representatives during the public hearing; and
- (g) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the public hearing.

Section 4. Findings

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the Planning Commission makes the following findings in approving Plot Plans PEN20-0121 and PEN20-0124

- (a) The proposed project is consistent with the goals, objectives, policies and programs of the general plan;
- (b) The proposed project complies with all applicable zoning and other regulations;
- (c) The proposed project will not be detrimental to the public health, safety or welfare or materially injurious to properties or improvements in the vicinity;
- (d) The location, design and operation of the proposed project will be compatible with existing and planned land uses in the vicinity.

Section 5. Approval

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth above, the Planning Commission hereby recommends that the City Council approve Plot Plans PEN20-0121 and PEN20-0124 subject to the Conditions of Approval for Plot Plans PEN20-0121 and PEN20-0124 attached hereto as Exhibit A.

Section 6. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the Planning Commission that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. Severability

That the Planning Commission declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any

Attachment: Planning Commission Staff Report and Resolutions (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. Certification

That the Secretary of the Planning Commission shall certify to the passage of this Resolution.

Warning: External Email – Watch for Email Red Flags!

Dear Julia,

Thank you for contacting the San Manuel Band of Mission Indians (SMBMI) regarding the above-referenced project. SMBMI appreciates the opportunity to review the project documentation, which was received by the Cultural Resources Management Department on July 28th. The proposed project is located outside of Serrano ancestral territory and, as such, SMBMI will not be requesting to receive consulting party status with the lead agency or to participate in the scoping, development, or review of documents created pursuant to legal and regulatory mandates.

Kind regards,

Ryan Nordness

Mitigated Negative Declaration (MND) for the Proposed Compass Danbe Centerpointe Project (Proposed Project)

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to comment on the above-mentioned document. The City of Moreno Valley is the California Environmental Quality Act (CEQA) Lead Agency for the Proposed Project. The following comments included recommended air quality mitigation measures and information on South Coast AQMD Rules 2305 and 316 that the Lead Agency should include in the Final MND.

Based on the MND, the Proposed Project consists of two warehouses totaling 389,603 square feet on 17.7 acres. The Proposed Project is located on the southeast corner of Alessandro Boulevard and Frederick Street in the City of Moreno Valley. Based on a review of aerial photographs, South Coast AQMD staff found that existing residential uses are located within 120 feet of the Proposed Project's northern boundary facing Alessandro Boulevard. Construction of the Proposed Project will occur in a nine-month period. At full buildout in June 2022, the Proposed Project will generate 742 vehicle trips per day, including 518 passenger vehicle trips and 224 truck trips. Forty-two loading docks will be located along the southern boundary of the Proposed Project away from residents¹. However, three truck entrances will be located at the Proposed Project's northern boundary directly facing the existing residential uses. Based on the technical appendix², trucks will be traveling on Alessandro Boulevard next to the existing residential uses.

South Coast AQMD Staff's Comments

Based on a review of the MND and supporting technical appendices, South Coast AQMD staff has two comments.

1. Recommended Air Quality Mitigation Measures during Operation

The Proposed Project will generate 224 truck trips per day, which is estimated by South Coast AQMD staff to be 102 trucks per day. These truck trips will be sharing the same Alessandro Boulevard as residents living north of the Proposed Project. The California Air Resources

¹ MND. Page 21.

² Appendix A2: Mobile Source Health Risk Assessment Technical. Exhibit 2-A. Page 12.

Board's (CARB) *Air Quality and Land Use Handbook: A Community Health Perspective*³ is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process. Based on the *Handbook*, CARB recommends a 1,000-foot separation between sensitive land uses and a distribution center that accommodates more than 100 trucks per day. To reduce the Proposed Project's air quality and health risk impacts on nearby residents, South Coast AQMD staff recommends that the Lead Agency include air quality mitigation measures in the Final MND.

Mitigation measures for operational air quality impacts from mobile sources that the Lead Agency should include in the Final MND consist of the following:

- Require zero-emissions (ZE) or near-zero emission (NZE) on-road haul trucks such as heavy-duty trucks with natural gas engines that meet the CARB's adopted optional NOx emissions standard at 0.02 grams per brake horsepower-hour (g/bhp-hr), if and when feasible. Given the state's clean truck rules and regulations aiming to accelerate the utilization and market penetration of ZE and NZE trucks such as the Advanced Clean Trucks Rule⁴ and the Heavy-Duty Low NOx Omnibus Regulation⁵, ZE and NZE trucks will become increasingly more available to use. The Lead Agency should require a phase-in schedule to incentive the use of these cleaner operating trucks to reduce any significant adverse air quality impacts. South Coast AQMD staff is available to discuss the availability of current and upcoming truck technologies and incentive programs with the Lead Agency. At a minimum, require the use of 2010 model year⁶ that meet CARB's 2010 engine emissions standards at 0.01 g/bhp-hr of particulate matter (PM) and 0.20 g/bhp-hr of NOx emissions or newer, cleaner trucks. Include environmental analyses to evaluate and identify sufficient electricity and supportive infrastructures in the Energy and Utilities and Service Systems Sections in the CEQA document, where appropriate. Include the requirement in applicable bid documents, purchase orders, and contracts. Operators shall maintain records of all trucks associated with project construction to document that each truck used meets these emission standards, and make the records available for inspection. The Lead Agency should conduct regular inspections to the maximum extent feasible to ensure compliance.
- Provide electric vehicle (EV) charging stations or at a minimum, provide the electrical infrastructure and electrical panels should be appropriately sized. Electrical hookups should be provided for truckers to plug in any onboard auxiliary equipment.

³ CARB's *Air Quality and Land Use Handbook: A Community Health Perspective* can be found at: <http://www.arb.ca.gov/ch/handbook.pdf>.

⁴ CARB. June 25, 2020. *Advanced Clean Trucks Rule*. Accessed at: <https://ww2.arb.ca.gov/our-work/programs/advanced-clean-trucks>.

⁵ CARB has recently passed a variety of new regulations that require new, cleaner heavy-duty truck technology to be sold and used in state. For example, on August 27, 2020, CARB approved the Heavy-Duty Low NOx Omnibus Regulation, which will require all trucks to meet the adopted emission standard of 0.05 g/hp-hr starting with engine model year 2024. Accessed at: <https://ww2.arb.ca.gov/rulemaking/2020/hdomnibuslownox>.

⁶ CARB adopted the statewide Truck and Bus Regulation in 2010. The Regulation requires diesel trucks and buses that operate in California to be upgraded to reduce emissions. Newer heavier trucks and buses must meet particulate matter filter requirements beginning January 1, 2012. Lighter and older heavier trucks must be replaced starting January 1, 2015. By January 1, 2023, nearly all trucks and buses will need to have 2010 model year engines or equivalent. More information on the CARB's Truck and Bus Regulation is available at: <https://www.arb.ca.gov/msprog/onrdiesel/onrdiesel.htm>.

Mitigation measures for operational air quality impacts from other area sources that the Lead Agency should include in the Final MND consist of the following:

- Maximize use of solar energy by installing solar energy arrays.
- Use light colored paving and roofing materials.
- Utilize only Energy Star heating, cooling, and lighting devices, and appliances.
- Use of water-based or low VOC cleaning products that go beyond the requirements of South Coast AQMD Rule 1113.

Design considerations for the Proposed Project that the Lead Agency should consider to further reduce air quality and health risk impacts include the following:

- Re-design the Proposed Project such that truck entry and exit points are not facing sensitive receptors and are not located along Alessandro Boulevard.
- Prohibit trucks from traveling on Alessandro Boulevard and passing next to sensitive land uses to enter or leave the Proposed Project site.
- Re-design the Proposed Project such that any check-in point for trucks is inside the Proposed Project site to ensure that there are no trucks queuing and/or idling outside on Alessandro Boulevard next to sensitive land uses (e.g., residences).
- Clearly mark truck routes with trailblazer signs, so that trucks will not travel next to or near sensitive land uses (e.g., residences).
- Design the Proposed Project to ensure that truck traffic inside the Proposed Project site is as far away as feasible from sensitive receptors.
- Restrict overnight truck parking in sensitive land uses by providing overnight truck parking inside the Proposed Project site.

2. South Coast AQMD Rule 2305 and Rule 316

On May 7, 2021, South Coast AQMD's Governing Board adopted Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program, and Rule 316 – Fees for Rule 2305. Rules 2305 and 316 are new rules that will reduce regional and local emissions of nitrogen oxides (NO_x) and particulate matter (PM), including diesel PM. These emission reductions will reduce public health impacts for communities located near warehouses from mobile sources that are associated with warehouse activities. Also, the emission reductions will help the region attain federal and state ambient air quality standards. Rule 2305 applies to owners and operators of warehouses greater than or equal to 100,000 square feet. Under Rule 2305, operators are subject to an annual WAIRE Points Compliance Obligation that is calculated based on the annual number of truck trips to the warehouse. WAIRE Points can be earned by implementing actions in a prescribed menu in Rule 2305, implementing a site-specific custom plan, or paying a mitigation fee. Warehouse owners are only required to submit limited information reports, but they can opt in to earn Points on behalf of their tenants if they so choose because certain actions to reduce emissions may be better achieved at the warehouse development phase, for instance the installation of solar and charging infrastructure. Rule 316 is a companion fee rule for Rule 2305 to allow South Coast AQMD to recover costs associated with Rule 2305 compliance activities. Since the Proposed Project consists of the development of 389,603 square feet that would be used for warehouse activities, the Proposed Project's warehouse owners and operators will be required to comply with Rule 2305 once the warehouse

Julia Descoteaux

August 17, 2021

is occupied. Therefore, South Coast AQMD staff recommends that the Lead Agency review South Coast AQMD Rule 2305 to determine the potential WAIRE Points Compliance Obligation for future operators and explore whether additional project requirements and CEQA mitigation measures can be identified and implemented at the Proposed Project that may help future warehouse operators meet their compliance obligation⁷. South Coast AQMD staff is available to answer questions concerning Rule 2305 implementation and compliance by phone or email at (909) 396-3140 or waire-program@aqmd.gov. For implementation guidance documents and compliance and reporting tools, please visit South Coast AQMD's WAIRE Program webpage⁸.

Conclusion

Pursuant to CEQA Guidelines Section 15074, prior to approving the Proposed Project, the Lead Agency shall consider the MND for adoption together with any comments received during the public review process. Please provide South Coast AQMD with written responses to all comments contained herein prior to the adoption of the Final MND. When responding to issues raised in the comments, responses should provide sufficient details giving reasons why specific comments and suggestions are not accepted. There should be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information do not facilitate the purpose and goal of CEQA on public disclosure and are not meaningful, informative, or useful to decision makers and the public who are interested in the Proposed Project. Further, when the Lead Agency makes the finding that the recommended air quality mitigation measures are not feasible, the Lead Agency should describe the specific reasons supported by substantial evidence for rejecting it in the Final MND (CEQA Guidelines Sections 15070 and 15074.1).

South Coast AQMD staff is available to work with the Lead Agency to address any air quality questions that may arise from this comment letter. Please contact me at lsun@aqmd.gov, should you have any questions.

Sincerely,

Lijin Sun

SUBJECT: COMMENTS ON COMPASS DANBE CENTERPOINTE MND (SCH NO. 2021070466)

To whom it may concern:

Thank you for the opportunity to comment on the Mitigated Negative Declaration (MND) for the proposed Compass Danbe Centerpointe Project. Please accept and consider these comments on behalf of Golden State Environmental Justice Alliance. Also, Golden State Environmental Justice Alliance formally requests to be added to the public interest list regarding any subsequent environmental documents, public notices, public hearings, and notices of determination for this project. Send all communications to Golden State Environmental Justice Alliance P.O. Box 79222 Corona, CA 92877.

1.0 Summary

The project proposes the construction and operation of two industrial warehouse buildings (Buildings 1 and 2). Building 1 proposes approximately 290,726 square feet (s.f.) of building floor area, including 280,726 s.f. of warehouse space, 5,000 s.f. of office space, and 5,000 s.f. of

mezzanine. Building 2 proposes approximately 98,877 s.f. of building floor area, including 93,77 s.f. of warehouse space, 2,500 s.f. of office space, and 2,500 s.f. of mezzanine. The total combined building floor area for Building 1 and Building 2 is approximately 389,603 s.f. Building 1 includes 32 loading docks, 34 truck trailer parking stalls, 144 passenger vehicle parking spaces. Building 2 includes 10 loading bays, 10 truck trailer parking stalls, and 73 passenger vehicle parking spaces. Both buildings are proposed at a maximum height of approximately 46 feet measured from finished floor to the highest point of the rooftop parapet walls.

The project requests a General Plan Amendment to change the existing land use designations from “Commercial” to “Business Park/Light Industrial” and a Change of Zone to change the existing Zoning designation from “Community Commercial” to “Light Industrial. The buildings are proposed as speculative and future occupants of the building are unknown. The Project Applicant expects that the building primarily would be occupied by warehouse distribution operators. The proposed buildings are designed with the potential to utilize up to 30 percent of their floor area for cold storage or refrigerated uses. The Project is expected to be operational 24 hours per day, seven days per week.

2.0 Project Description

It is notable that the MND does not include a floor plan for either of the buildings. The basic components of a Planning Application include a site plan, floor plan, and elevations. Additionally, the elevations provided in Figure 12 do not provide any detailed information such as the overall building height. The MND has excluded the proposed floor plans and detailed elevations from public review, which does not comply with CEQA’s requirements for adequate informational documents and meaningful disclosure (CEQA § 15121). An EIR must be prepared which includes these items.

III. Air Quality

The CalEEModeling includes manual changes to the default individual construction phase lengths. The architectural coating phase was increased by 100%, from the default value of 20 to 40 days. The building construction phase was reduced by 50%, from the default value of 300 to 150 days. The CalEEMod User’s Guide requires any changes to model defaults be justified¹. According to the “User Entered Comments & Non-Default Data” table, the justification provided

¹ CalEEMod User Guide <http://www.caleemod.com/>

for these changes is: “Construction is anticipated to occur over an 8-month timeframe” and “Rule 1113” for Architectural Coating. SCAQMD Rule 113² lists VOC limits for architectural coatings and colorants. It does not provide any timeframe parameters. As a result, the revised individual construction phase lengths are unsubstantiated.

These unsubstantiated changes present an issue, as the architectural coatings changes improperly spread out construction emissions over a longer period of time than is actually anticipated and the building construction changes improperly reduce the amount of construction emissions. Thus, by including unsubstantiated increases to the default individual construction phase lengths, the model may underestimate the Project’s construction-related emissions and should not be relied upon to determine the significance of the Project’s air quality impacts.

Further, the CalEEMod output sheets depict unsubstantiated reduced construction trip lengths during project construction. The commercial-nonwork (“C-NW”), commercial–customer (“C-C”), and commercial-work (“C-W”) operational vehicle trip lengths and trip types were manually reduced from their default values to 0.00-miles and 0 trips. As previously mentioned, the CalEEMod User’s Guide requires any changes to model defaults be justified. There is no justification given for these changes in the “User Entered Comments & Non-Default Data” table or in the MND. The Tentative Parcel Map depicts the project site as 1,320 feet in length, which is 0.25 miles. As such, the revised vehicle trip lengths are underestimated by *at least* 0.25 miles and this along with the reduced trip types are unsubstantiated. This presents an issue, as CalEEMod uses vehicle trip types and lengths to calculate motor vehicle emissions associated with Project construction. By relying upon an underestimated on-site construction vehicle trip length of 0.00 miles and 0 trips, the models underestimate the Project’s mobile-source construction emissions and should not be relied upon to determine Project significance.

The CalEEMod output sheets also depict unsubstantiated changes to the default energy use values for passenger car operations and truck operations modeling. The lighting energy intensity (“LightingElect”), Title 24 electricity energy intensity (“T24E”), and Title 24 natural gas energy intensity (“T24NG”) were each manually reduced in the model as seen below:

Table Name	Column Name	Default Value	New Value
tblEnergyUse	LightingElect	2.37	1.66
tblEnergyUse	LightingElect	1.17	0.82
tblEnergyUse	T24E	1.06	0.74
tblEnergyUse	T24E	0.37	0.26
tblEnergyUse	T24NG	3.25	2.28
tblEnergyUse	T24NG	2.00	1.40

Attachment: PC Comment Letters (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

According to the “User Entered Comments & Non-Default Data” table, the justification provided for these changes is that “The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses.” However, this justification is not adequate for analysis. The 2019 Title 24 standards may expect a reduction in building energy consumption; however, this expectation alone does not ensure that these reductions will be implemented on the project site. The MND has not provided additional information demonstrating that these reductions would be achieved through the implementation, monitoring, and enforcement of energy-related mitigation measures. It is not possible to verify the revised energy use values utilized for analysis in CalEEMod. Including these unsubstantiated reductions to the default energy use values serves to skew emissions downward and underestimate the project’s energy-source operational emissions.

Further, the Project Description lists offsite roadway improvements that are not included as part of the construction analysis. This includes improving the south side of Alessandro Boulevard to its ultimate half-section width as a Divided Major Arterial (a 55-foot- wide travel way, new curb and gutter, a 6-foot- wide sidewalk abutting the curb, and a bioretention swale), removing an existing bus stop along the south side of Alessandro Boulevard at the approximate midpoint of the northern Project site boundary, and construction of three driveways along the Northern Project site boundary onto Alessandro Boulevard (which would require striping for lane transitions). The construction analysis must be revised to include these improvements for analysis.

The Traffic Analysis (TA) uses a truck trip generation rate of 0.742-truck trips per 1,000 sf for Institute of Transportation Engineers (“ITE”) land use code 157. However, the 10th Edition ITE Trip Generation Manual lists the truck trip generation rate for land use code 157 is 0.75 truck trips per 1,000 sf. The truck trip generation rate used by the TA underestimate the actual project truck trips and the project’s mobile source emissions as well. All unsubstantiated changes in CalEEMod must be revised as part of a project EIR circulated for public review.

Additionally, Tables 4.2 - Trip Summary Information for each of the CalEEMod scenarios provided provides weekday, Saturday, and Sunday average daily trips (ADT) for passenger cars and trucks. However, Table 4.2 - Project Trip Generation Summary within the Traffic Analysis does not break down the ADT to varying weekday, Saturday, and Sunday rates. The ADT provided in the Traffic Analysis is only used as the weekday scenario for CalEEMod modeling. The Saturday and Sunday scenarios reduce ADT by approximately 54%-58% for each scenario

without providing meaningful evidence to support this change. All unsubstantiated changes in CalEEMod must be revised as part of a project EIR circulated for public review.

The MND does not include for analysis relevant environmental justice issues in reviewing potential impacts, including cumulative impacts from the proposed project. This is especially significant as the surrounding community is highly burdened by pollution. According to CalEnviroScreen 3.0, CalEPA's screening tool that ranks each census tract in the state for pollution and socioeconomic vulnerability, the proposed project's census tract (6065042512) ranks worse than 90 percent of the rest of the state overall. The project's census tract is in the 70th percentile for pollution burden, meaning it is among the most highly polluted ranks of all census tracts in the state of California. The surrounding community, including the apartments and single family residences to the north, bears the impact of multiple sources of pollution and is more polluted than average on every pollution indicator measured by CalEnviroScreen. For example, the project census tract has a higher burden of ozone than 98 percent of the state and more PM 2.5 impacts than 93 percent of the state, which are attributed to traffic and truck activity.

The project's census tract is a diverse community including 71 percent Hispanic residents and 14 percent African-American residents, which are especially vulnerable to the impacts of pollution. The community has a high rate of low educational attainment, meaning the census tract ranks in the 87th percentile for residents over age 25 that have not attained a high school diploma, which is an indication that they may lack health insurance or access to medical care. Additionally, the surrounding community ranks in the 88th percentile for poverty and 92nd percentile for housing burden, which further limit household funds available for medical care. The community ranks in the 85th percentile for incidence of cardiovascular disease and 82nd percentile for asthma, which are exacerbated by Air Quality and Greenhouse Gas impacts generated by increased vehicular traffic and the presence of truck traffic. The environmental burden is heightened further as the census tract is comprised of 21% children under the age of 10 compared to an average 13% children under the age of 10 per census tract in California. The surrounding community also has a higher proportion of babies born with low birth weights than 64% of the state, which makes those children more vulnerable to asthma and other health issues.

The Health Risk Assessment (Appendix A2) sources OEHHA Guidelines as the standard for residential, worker, and school child modeling analysis. It must be noted that the HRA is misleading as it only models detailed risk calculation scenarios for residential age bins -0.25 to 0, 0-2, 2-16, and 16-30 and the 25 year worker exposure averaged over a 70-year Lifetime Cancer

Risk, which is the maximum averaging time and serves to skew impacts downward. Notably, OEHHA's 2015 Guidance Manual for Preparation of Health Risk Assessments³ state that, "together, the 9-, 30-, and 70-year cancer risk calculations provide a useful presentation of cancer risk and the relationship to duration of residency and, thus, exposure to a facility's emissions." An EIR must be prepared to include modeling scenarios for the 9-, 30-, and 70-year cancer risk calculations in order to provide a useful presentation of cancer risk in accordance with the guidelines utilized for modeling. Additionally, the 16-70 age bin for sensitive receptors must be modeled as well.

The HRA provides no distinction as to whether the modeling scenarios are for construction or operations; both construction and operations must be analyzed. The MND is not a reliable informational document and does not present meaningful evidence to support the conclusion that the project will result in less than significant health impacts to sensitive receptors. An EIR must be prepared to include construction and operations modeling for all residential age bins including -0.25 - 0, 0-2, 2-16, 16-30, and 16 - 70 for operations and construction analysis, 9 year school child analysis for operations and construction, and 25 year worker exposure with all scenarios reflecting Package N exposure factors in the detailed risk calculations.

IV. Biological Resources

According to Appendix B4: Burrowing Owl Survey Report, a focused burrow survey was conducted on May 21, 2020 and focused burrowing owl/burrow surveys were conducted on June 20, July 10, and July 30, 2020. The May 21, 2020 survey concluded that burrowing owl habitat and burrows were present on the project site. The Western Riverside MSHCP Burrowing Owl Survey Instructions⁴ require that the "location of all suitable burrowing owl habitat, potential owl burrows, burrowing owl sign, and any owls observed should be recorded and mapped, including GPS coordinates." The MND does not include maps or photographs of this data and an EIR must be prepared to include this information in order to provide an accurate and adequate analysis in compliance with the Burrowing Owl Survey Instructions.

³ OEHHA 2015 Guidance Manual for Preparation of Health Risk Assessments <https://oehha.ca.gov/media/downloads/crn/2015guidancemanual.pdf>

⁴ Western Riverside MSHCP Burrowing Owl Survey Instructions https://www.rctlma.org/Portals/3/EPD/consultant/burrowing_owl_survey_instructions.pdf

VI. Energy

The State of California lists two approved compliance modeling softwares⁵ for non-residential buildings: CBECC-Com and EnergyPro. CalEEMod is not listed as an approved software. The modeling provided in the MND does not comply with the 2019 Building Energy Efficiency Standards and under reports the project's potentially significant GHG and Energy impacts to the public and decision makers. Since the MND did not accurately or adequately model the Energy impacts in compliance with Title 24, a finding of significance must be made. An EIR with modeling in one of the two approved software types must be prepared and circulated for public review in order to adequately analyze the project's potentially significant environmental impacts. This is vital as the MND utilizes the CalEEMod defaults for construction equipment/operational sources, which is clearly not one of the approved softwares.

VIII. Greenhouse Gas Emissions

There are discrepancies within the CalEEMod Output Sheets regarding CO₂e emissions and the emissions reported in the MND. It must first be noted that an annual CalEEMod analysis was not included for construction or operational phases; only winter and summer were modeled. The construction analysis determined the project will emit 13,020 MTCO₂e during the summer and 12,462 MTCO₂e during the winter.

The Building 1 summer analysis determined the project will emit 6,363 MTCO₂e during project operations (passenger cars) and 18,261 MTCO₂e during project operations (trucks). The Building 1 winter analysis determined the project will emit 6,014 MTCO₂e during project operations (passenger cars) and 18,103 MTCO₂e during project operations (trucks). The Building 2 summer analysis determined the project will emit 2,381 MTCO₂e during project operations (passenger cars) and 6,562 MTCO₂e during project operations (trucks). The Building 2 winter analysis determined the project will emit 2,262 MTCO₂e during project operations (passenger cars) and 6,508 MTCO₂e during project operations (trucks).

Table 7: Total Annual Project Greenhouse Gas Emissions within the MND states that the total annual project emissions are 6,649.16 MTCO₂e including both construction (amortized) and operational emissions. Table 7 attributes 759 MTCO₂e to mobile source emissions (passenger cars) and 3,039 MTCO₂e to mobile source emissions (trucks). Within the CalEEMod analysis, an annual emissions modeling scenario is not included. The MND's Table 7 is unsupported by

⁵ 2019 Building Energy Efficiency Standards Approved Computer Compliance Programs, California Energy Commission. <https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2019-building-energy-efficiency-2>

meaningful evidence within the technical appendices. Based on the CalEEMod output sheets, the combined summer analysis for Buildings 1 and 2 truck trips shows 24,823 MTCO₂e will be generated by the project. The annual analysis within Table 7 has reduced the trucks seasonal scenarios by approximately 87% to achieve the annual operational MTCO₂e. There is no explanation for the reductions given or the manner in which the reductions were achieved. These reductions serve to skew emissions downwards, specifically below the SCAQMD 10,000 MTCO₂e significance threshold for industrial projects. Additionally, modeling errors such as those noted in the Energy, Air Quality, and Transportation discussions must be corrected in order to adequately analyze the project's GHG emissions. An EIR must be prepared to present this for analysis and include a finding of significance.

IX. Hazards and Hazardous Materials

The MND states “there are no schools located within 0.25-mile of the Project site.” However, this is erroneous and misleading to the public and decision makers as SIATech Charter High School is located on the parcel approximately 150 feet to the north of the project site at 23080 Alessandro Blvd #232, Moreno Valley, CA 92553. An EIR must be prepared which includes this information for analysis in order to provide an adequate, accurate environmental analysis.

The proposed project site is within March Air Reserve Base (MARB)/Inland Port Airport Compatibility Zones D and E. The MND states that the project was “determined by the ALUC to be consistent with the ALUCP during their January 14, 2021 public meeting,” resulting in less than significant impacts. However, the MND does not include the Airport Land Use Commission (ALUC) or FAA determination reports as part of the MND. CEQA § 15150 (f) states that incorporation by reference is most appropriate for including long, descriptive, or technical materials that provide general background but do not contribute directly to the analysis of the problem at hand. The ALUC and FAA determination reports contribute directly to the analysis of the problem at hand. Not including the ALUC and FAA determination reports as an attachment for public review is in violation of CEQA § 15150 (f). An EIR must be prepared and circulated for public review including the ALUC and FAA determination reports. This is especially vital as the building elevations provided in Figure 12 do not include pertinent information such as the overall height of each building which would assist the public and decision makers in determining compliance with these requirements.

XI. Land Use and Planning

The Project requests an amendment to the City of Moreno Valley General Plan Land Use Map to change the Project site's land use designation from "Commercial" to "Business Park/Light Industrial." The MND concludes that the project will not result in any significant impacts because "approval of the requested General Plan Amendment would eliminate any potential inconsistency between proposed land use and the site's existing land use designation." This conclusion is not supported by meaningful evidence or any analysis, including a consistency analysis with General Plan policies. The MND has not provided any technical analysis to support the approval of a General Plan Amendment and Change of Zone, in violation of CEQA's requirements for meaningful disclosure (CEQA § 21003(b)). The MND is inadequate as an informational document and an EIR must be prepared with this technical analysis and a consistency analysis with all General Plan policies, including the following:

Policy 2.5.1 The primary purpose of areas designated Business Park/Industrial is to provide for manufacturing, research and development, warehousing and distribution, as well as office and support commercial activities. The zoning regulations shall identify the particular uses permitted on each parcel of land. Development intensity should not exceed a Floor Area Ratio of 1.00 and the average floor area ratio should be significantly less.

Policy 2.5.2 Locate manufacturing and industrial uses to avoid adverse impacts on surrounding land uses.

Policy 2.5.3 Screen manufacturing and industrial uses where necessary to reduce glare, noise, dust, vibrations and unsightly views.

Policy 2.5.4 Design industrial developments to discourage access through residential areas.

The MND also states that the project "would not conflict with any applicable goals, objectives, and policies of the SCAQMD's AQMP, SCAG's Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) (including the tentatively approved *Connect SoCal 2020-2045 RTP/SCS*)," resulting in less than significant impact. However, the MND does not provide any meaningful supporting evidence or consistency analysis with SCAG's 2020-2045 Connect SoCal RTP/SCS (which was adopted by SCAG's Regional Council on September 3, 2020) to support this conclusion, in violation of CEQA's requirements for meaningful disclosure (CEQA § 21003(b)). Due to errors in modeling and modeling without supporting evidence, as noted throughout this comment letter, the proposed project has significant potential for inconsistency

with Goal 5 to reduce greenhouse gas emissions and improve air quality, Goal 6 to support healthy and equitable communities, and Goal 7 to adapt to a changing climate. The CalEEMod output sheets modeling for Operational Mobile Source Assumptions Summary from Appendix A1: Air Quality concludes that the project will generate 5,292,179 vehicle miles traveled (VMT) annually with 2,555,502 VMT attributed to passenger cars and 2,736,677 to trucks. The total annual VMT for the project results in an average of 14,499 VMT per day. An EIR must be prepared to include revised Air Quality/HRA, Energy, and GHG modeling in order to accurately analyze potential consistency or inconsistency with the 2020-2045 RTP/SCS document.

Further, the Project Description states that “Sight distance at each Project driveway will be reviewed by the City of Moreno Valley *at the time of preparation of final grading, landscape and street improvement plans* to ensure that standard Caltrans and City of Moreno Valley sight distance standards are met.” The City’s General Plan includes the following requirement for sight distances:

Policy 5.5.10 Provide adequate sight distances for safe vehicular movement at all intersections and driveways.

Delaying sight distance review until the time of preparation of final grading, landscape, and street improvement plans represents deferred mitigation in violation of CEQA. The MND has not demonstrated that the project complies with this policy and a finding of significance must be made as part of an EIR.

XIV. Population and Housing

The MND utilizes uncertain language and does not provide any meaningful analysis or supporting evidence to substantiate the conclusion that there will be no significant impact to population and housing. The MND states that “it is *anticipated* that the employment base for both the construction and operational phases of the Project would come from the existing population in the Inland Empire, which comprises western Riverside County and southwestern San Bernardino County.” Relying on the workforce population of the entire Inland Empire region will increase project related VMT. The MND does not provide a calculation of jobs created by the project during construction or operations.

The MND has not provided any calculation of the jobs generated by the project or evidence that the Inland Empire region’s workforce population is qualified for or interested in work in the

industrial sector. SCAG's Employment Density Study⁶ provides the following applicable employment generation rates for Riverside County:

Warehouse: 1 employee per 581 square feet

Office: 1 employee per 481 square feet

Applying these ratios results in the following calculation:

Warehouse: $374,603 \text{ sf} / 581 = 645$

Office: $15,000 \text{ sf} / 481 \text{ sf} = 32$

Total: 677 employees

Utilizing SCAG's Employment Density Study ratios, the proposed project will generate 677 employees. The MND utilizes uncertain and misleading language which does not provide any meaningful analysis of the project's population and employment generation. In order to comply with CEQA's requirements for meaningful disclosure, an EIR must be prepared to provide an accurate estimate of employees generated by all uses of the proposed project. It must also provide demographic and geographic information on the location of qualified workers to fill these positions.

Additionally, the MND concludes "the project's labor demand is not expected to draw substantial numbers of new residents to the area" without providing any meaningful evidence to support this claim, such as the current number of residents or the anticipated increase in residents generated by approved projects or cumulative projects in the pipeline. The analysis must provide meaningful evidence to support the conclusion that the project will not induce unplanned indirect or direct population growth.

SCAG's Connect SoCal Demographics and Growth Forecast⁷ notes that the City will add 29,400 jobs between 2016 - 2045. Utilizing SCAG's Employment Density Study calculation of 677 employees, the project represents 2.3% of the City's employment growth from 2016 - 2045. SCAG's Growth Forecast notes that the City's population will increase by 61,100 residents

⁶ SCAG Employment Density Study <http://www.mwcog.org/file.aspx?A=QTTITR24POOOUIw5mPNzK8F4d8djdJe4LF9Exj6lXOU%3D>

⁷ SCAG Connect SoCal Demographics and Growth Forecast adopted September 3, 2020 https://scag.ca.gov/sites/main/files/file-attachments/0903fconnectsocial_demographics-and-growth-forecast.pdf?1606001579

between 2016 - 2045. Utilizing SCAG's Employment Density Study calculation of 677 employees, the project represents 1.1% of the City's population growth from 2016 - 2045. A single project accounting for more than 1% of the projected employment and/or population over 29 years represents a significant amount of growth. An EIR must be prepared to include this analysis, and also provide a cumulative analysis discussion of projects approved since 2016 and projects "in the pipeline" to determine if the project will exceed SCAG's employment growth forecast for the City. Additionally, an EIR must also provide demographic and geographic information on the location of qualified workers to fill these positions in order to provide an accurate environmental analysis.

XVII. Transportation

The study area for the MND is arbitrary and capricious in that it does not include for analysis all potentially significant impacts on the transportation facilities providing access to the site. The MND only analyzes five intersections, three of which are proposed future driveways for the site. This is not adequate as the project will generate 5,292,179 annual VMT according to the CalEEMod analysis utilized for air quality modeling. An EIR must be prepared and circulated for public review to include analysis of the following transportation facilities providing direct access to the project site:

Intersections

Alessandro Blvd. at Elsworth St.
 Alessandro Blvd. at Day St.
 Alessandro Blvd. at Old 215 Frontage Rd.
 Graham St. at Brodiaea Ave.
 Graham St. at Cactus Ave.
 Frederick St. at Cactus Ave.
 Frederick St. at Brodiaea Ave.
 Graham St. at Cottonwood Ave.
 Graham St. at Dracaea Ave.
 Graham St. at Eucalyptus Ave.
 Graham St. at Sunnymead Blvd.
 Frederick St. at Sunnymead Blvd.
 Frederick St. at Eucalyptus Ave.
 Frederick St. at Dracaea Ave.
 Frederick St. at Cottonwood Ave.

Freeway Merge/Diverge

I-215 at SR-60

I-215 at SR-91

I-215 at I-10

I-215 at SR-210

I-215 at I-15

Freeway On/Off Ramps

I-215 at Alessandro Blvd.

I-215 at Cactus Ave.

I-215 at Eucalyptus Ave.

SR-60 at Frederick St.

SR-60 at Heacock St.

This is especially vital for analysis since Exhibit 4-2 Project (Truck) Trip Distribution within Appendix K1 - Traffic Analysis depicts 100% of truck trips traveling eastbound on Alessandro Blvd. from the I-215 offramp to enter the project site. The exhibit also shows 100% of truck trips traveling eastbound on Alessandro Blvd. and turning right onto Graham St. In order to follow the City's truck routes, 100% of trucks exiting the site will need to then turn right on Cactus Ave., then turn right on Frederick St., then either proceed to turn left at the intersection of Frederick St. and Alessandro Blvd. to access the I-215 onramp or continue traveling northbound on Frederick St. to access the SR-60 onramp. Further, Heacock St. is a designated truck route. Trucks that exit the site onto eastbound Alessandro Blvd. also have the option to continue east one block to Heacock St., turn left onto northbound Heacock St., and continue north to access the I-215 onramp.

Exhibit 4-1 Project (Passenger Car) Trip Distribution within Appendix K1 - Traffic Analysis depicts 50% of passenger cars traveling eastbound on Alessandro Blvd. from the I-215 offramp to enter the project site. The exhibit also shows 60% of passenger cars traveling eastbound on Alessandro Blvd. and turning right onto Graham St. If the car continues southbound on Graham St., they will end up in the March Air Reserve Base once they pass Cactus Ave. It is nonsensical for the majority of passenger cars to travel this dead end route which does not access any freeways, arterial roads, or residential neighborhoods. An EIR must be prepared to provide a realistic passenger car trip distribution.

Additionally, the I-215 provides direct access to the project site from the Southern California Logistics Airport. An EIR must be prepared that includes analysis of all transportation facilities providing direct access to the project site.

Further, the Project Description states that “Sight distance at each Project driveway will be reviewed by the City of Moreno Valley *at the time of preparation of final grading, landscape and street improvement plans* to ensure that standard Caltrans and City of Moreno Valley sight distance standards are met.” The City’s General Plan includes the following requirement for sight distances:

Policy 5.5.10 Provide adequate sight distances for safe vehicular movement at all intersections and driveways.

Delaying sight distance review until the time of preparation of final grading, landscape, and street improvement plans represents deferred mitigation in violation of CEQA. The MND has not demonstrated that the project complies with this policy and a finding of significance must be made.

The Traffic Analysis (TA) uses a truck trip generation rate of 0.742-truck trips per 1,000 sf for Institute of Transportation Engineers (“ITE”) land use code 157. However, the 10th Edition ITE Trip Generation Manual lists the truck trip generation rate for land use code 157 is 0.75 truck trips per 1,000 sf. The truck trip generation rate used by the TA underestimate the actual project truck trips and the project’s mobile source emissions as well. All unsubstantiated changes in CalEEMod must be revised as part of a project EIR circulated for public review.

Appendix K2: VMT Assessment concludes that “Project generated VMT per employee was found to exceed citywide baseline VMT per employee threshold by 11.69% and citywide cumulative VMT per employee threshold by 10.40%. With implementation of the aforementioned TDM measures (Measures 1 and 2), a maximum reduction in VMT of 15.0% could be achieved, which would reduce the Project’s impact to less than significant.” However, the VMT analysis does not consider the significant annual truck traffic VMT generated by the project. Appendix A1 determined the project will generate 2,736,677 annual VMT from trucks and 2,555,502 annual VMT from passenger cars for a combined total of 5,292,179 annual VMT. The total annual VMT for the project results in an average of 14,499 VMT per day. Excluding truck VMT analysis does not comply with CEQA’s requirements for meaningful disclosure. Information regarding project truck VMT must be included for analysis as part of an EIR.

Conclusion

For the foregoing reasons, GSEJA believes the MND is flawed and an EIR must be prepared for the proposed project and circulated for public review. Golden State Environmental Justice Alliance requests to be added to the public interest list regarding any subsequent environmental documents, public notices, public hearings, and notices of determination for this project. Send all communications to Golden State Environmental Justice Alliance P.O. Box 79222 Corona, CA 92877.

Sincerely,

Board of Directors
Golden State Environmental Justice Alliance

To: City of Moreno Valley Planning Commission

From: Golden State Environmental Justice Alliance

Subject: Compass Danbe Centerpointe Project

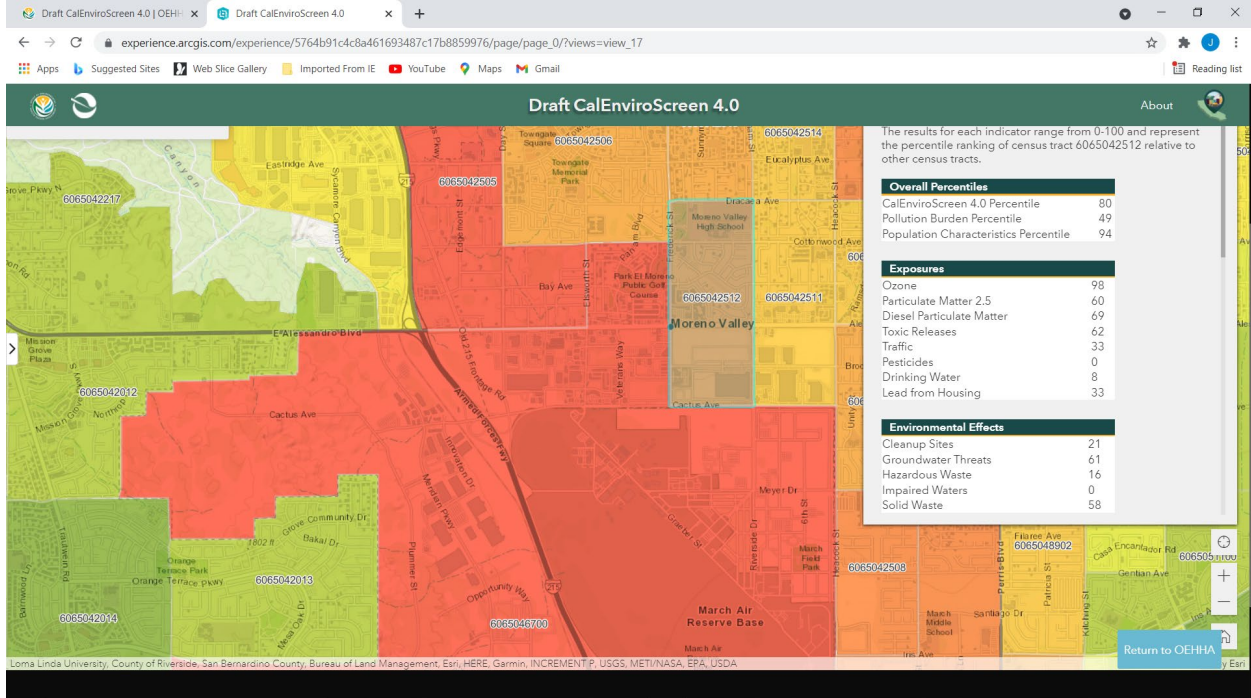

This letter is to serve as further comment in addition to all previously submitted comments and documents by Golden State Environmental Justice Alliance.

CalEnviroScreen 4.0 Information

CalEnviroScreen is a mapping tool that helps identify California communities that are most affected by many sources of pollution, and where people are often especially vulnerable to pollution's effects. CalEnviroScreen uses environmental, health, and socioeconomic information to produce scores for every census tract in the state. The scores are mapped so that different communities can be compared. An area with a high score is one that experiences a much higher pollution burden than areas with low scores. CalEnviroScreen ranks communities based on data that are available from state and federal government sources. CalEnviroScreen is updated and maintained by The Office of Environmental Health Hazard Assessment, on behalf of the California Environmental Protection Agency.

CalEnviroScreen Data on Compass Danbe Centerpointe Project Location/Area

The above listed project sits in the south east of census tract 6065042512. Overall, when compared to other census tracts, the project site census tract is in the 80th percentile regarding pollution. As far as pollution burden is concerned, this census tract is in the 49th percentile. In terms of Ozone, this census tract is in the 98th percentile, Particulate Matter 2.5 60th percentile, Diesel Particulate Matter 69th percentile, Toxic Releases 62nd percentile and Traffic 33rd percentile. Additionally, the census tract the project site shares its western border with and is to the immediate south of the project site (6065046700) has some of the worst pollution in the state; being in the 98th percentile for overall pollution and 94th in pollution burden on its residents. This data represents that only 2 percent of other census tracts have worse overall pollution, it also means this census tract has worse pollution burden on its population than 93 percent of the state. In terms of Ozone, this census tract is in the 97th percentile, Particulate Matter 2.5 60th percentile, Diesel Particulate Matter 40th percentile, Toxic Releases 61st percentile and Traffic 82nd percentile.

Conclusion

Consider the above referenced information when making this important decision. Realize that you and the citizens of this area face some of the WORST POLLUTION in the entire state of California.

It is the responsibility of the City’s elected and appointed officials to make environmentally responsible development decisions. Based on the CalEnviroScreen data, this is more than sufficient evidence of the further air quality impacts that the citizenry of Moreno Valley and its surrounding area will continue to encounter with further development of another warehouse/distribution center. We are not against development, as we believe it is necessary for further economic growth in our current society. Development needs to be conducted with the highest of expectations to ensure the local population does not suffer further air quality burdens.

We stand by our comments and believe the MND is flawed and a full Environmental Impact Report must be completed and circulated for public review.

Respectfully Submitted,

Steven Piepkorn

Glossary of Terms

Ozone - Amount of daily maximum 8-hour Ozone concentration

Particulate Matter 2.5 - Annual mean PM 2.5 concentrations

Diesel Particulate Matter - Diesel PM emissions from on-road and non-road sources

Toxic Releases - Toxicity-weighted concentrations of modeled chemical releases to air from facility emissions and off-site incineration.

Traffic -Traffic density, in vehicle-kilometers per hour per road length, within 150 meters of the census tract boundary.

RE: Compass Danbe Centerpointe Project - Responses to MND Comment Letters

T&B Planning, Inc. is the CEQA consultant for the Applicant of the Compass Danbe Centerpointe project. During the MND's public review period, which lasted from July 26 to August 25, 2021, the City of Moreno Valley received correspondence from three public agencies and interested parties. A list of agencies, organizations, and persons that submitted comments on the MND during the public review period is presented in Table 1, *Organizations, Persons, & Public Agencies that Commented on the MND*. In consultation with the Applicant's technical experts, we have prepared responses to each substantive comment raised by the individual agencies and interested parties which are provided on the following pages. Copies of each of the comment letters referenced in Table 1 are provided on the following pages, followed by responses to each individual comment. None of the comment letters submitted to the City of Moreno Valley regarding the MND have produced substantial new information requiring substantial revisions resulting in the need for recirculation or additional environmental review under CEQA Guidelines § 15073.5.

Warning: External Email – Watch for Email Red Flags!

Dear Julia,

Thank you for contacting the San Manuel Band of Mission Indians (SMBMI) regarding the above-referenced project. SMBMI appreciates the opportunity to review the project documentation, which was received by the Cultural Resources Management Department on July 28th. The proposed project is located outside of Serrano ancestral territory and, as such, SMBMI will not be requesting to receive consulting party status with the lead agency or to participate in the scoping, development, or review of documents created pursuant to legal and regulatory mandates.

Responses to Comment Letter A from San Manuel Band of Mission Indians (SMBMI)

A-1 The commenter states that the Project site is located outside of the Serrano ancestral territory and SMBMI will not be requesting to receive consulting party status with the lead agency or to participate in the scoping, development, or review of documents created pursuant to legal and regulatory mandates. The City of Moreno Valley acknowledges that this communication concludes SMBMI’s input on the Project and that no other consultation is required. Therefore, no further response is needed. No additions, revisions, or corrections to the MND are needed.

**Mitigated Negative Declaration (MND) for the Proposed
Compass Danbe Centerpointe Project (Proposed Project)**

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to comment on the above-mentioned document. The City of Moreno Valley is the California Environmental Quality Act (CEQA) Lead Agency for the Proposed Project. The following comments included recommended air quality mitigation measures and information on South Coast AQMD Rules 2305 and 316 that the Lead Agency should include in the Final MND.

C-1

Based on the MND, the Proposed Project consists of two warehouses totaling 389,603 square feet on 17.7 acres. The Proposed Project is located on the southeast corner of Alessandro Boulevard and Frederick Street in the City of Moreno Valley. Based on a review of aerial photographs, South Coast AQMD staff found that existing residential uses are located within 120 feet of the Proposed Project's northern boundary facing Alessandro Boulevard. Construction of the Proposed Project will occur in a nine-month period. At full buildout in June 2022, the Proposed Project will generate 742 vehicle trips per day, including 518 passenger vehicle trips and 224 truck trips. Forty-two loading docks will be located along the southern boundary of the Proposed Project away from residents¹. However, three truck entrances will be located at the Proposed Project's northern boundary directly facing the existing residential uses. Based on the technical appendix², trucks will be traveling on Alessandro Boulevard next to the existing residential uses.

C-2

South Coast AQMD Staff's Comments

Based on a review of the MND and supporting technical appendices, South Coast AQMD staff has two comments.

1. Recommended Air Quality Mitigation Measures during Operation

C-3

The Proposed Project will generate 224 truck trips per day, which is estimated by South Coast AQMD staff to be 102 trucks per day. These truck trips will be sharing the same Alessandro Boulevard as residents living north of the Proposed Project. The California Air Resources

August 17, 2021

Board's (CARB) *Air Quality and Land Use Handbook: A Community Health Perspective*³ is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process. Based on the *Handbook*, CARB recommends a 1,000-foot separation between sensitive land uses and a distribution center that accommodates more than 100 trucks per day. To reduce the Proposed Project's air quality and health risk impacts on nearby residents, South Coast AQMD staff recommends that the Lead Agency include air quality mitigation measures in the Final MND.

Mitigation measures for operational air quality impacts from mobile sources that the Lead Agency should include in the Final MND consist of the following:

- Require zero-emissions (ZE) or near-zero emission (NZE) on-road haul trucks such as heavy-duty trucks with natural gas engines that meet the CARB's adopted optional NOx emissions standard at 0.02 grams per brake horsepower-hour (g/bhp-hr), if and when feasible. Given the state's clean truck rules and regulations aiming to accelerate the utilization and market penetration of ZE and NZE trucks such as the Advanced Clean Trucks Rule⁴ and the Heavy-Duty Low NOx Omnibus Regulation⁵, ZE and NZE trucks will become increasingly more available to use. The Lead Agency should require a phase-in schedule to incentive the use of these cleaner operating trucks to reduce any significant adverse air quality impacts. South Coast AQMD staff is available to discuss the availability of current and upcoming truck technologies and incentive programs with the Lead Agency. At a minimum, require the use of 2010 model year⁶ that meet CARB's 2010 engine emissions standards at 0.01 g/bhp-hr of particulate matter (PM) and 0.20 g/bhp-hr of NOx emissions or newer, cleaner trucks. Include environmental analyses to evaluate and identify sufficient electricity and supportive infrastructures in the Energy and Utilities and Service Systems Sections in the CEQA document, where appropriate. Include the requirement in applicable bid documents, purchase orders, and contracts. Operators shall maintain records of all trucks associated with project construction to document that each truck used meets these emission standards, and make the records available for inspection. The Lead Agency should conduct regular inspections to the maximum extent feasible to ensure compliance.
- Provide electric vehicle (EV) charging stations or at a minimum, provide the electrical infrastructure and electrical panels should be appropriately sized. Electrical hookups should be provided for truckers to plug in any onboard auxiliary equipment.

³ CARB's *Air Quality and Land Use Handbook: A Community Health Perspective* can be found at:

<http://www.arb.ca.gov/ch/handbook.pdf>.

⁴ CARB. June 25, 2020. *Advanced Clean Trucks Rule*. Accessed at: <https://ww2.arb.ca.gov/our-work/programs/advanced-clean-trucks>.

⁵ CARB has recently passed a variety of new regulations that require new, cleaner heavy-duty truck technology to be sold and used in state. For example, on August 27, 2020, CARB approved the Heavy-Duty Low NOx Omnibus Regulation, which will require all trucks to meet the adopted emission standard of 0.05 g/hp-hr starting with engine model year 2024. Accessed at: <https://ww2.arb.ca.gov/rulemaking/2020/hdomibuslownox>.

⁶ CARB adopted the statewide Truck and Bus Regulation in 2010. The Regulation requires diesel trucks and buses that operate in California to be upgraded to reduce emissions. Newer heavier trucks and buses must meet particulate matter filter requirements beginning January 1, 2012. Lighter and older heavier trucks must be replaced starting January 1, 2015. By January 1, 2023, nearly all trucks and buses will need to have 2010 model year engines or equivalent. More information on the CARB's Truck and Bus Regulation is available at: <https://www.arb.ca.gov/msprog/onrdiesel/onrdiesel.htm>.

Letter C

Julia Descoteaux

August 17, 2021

Mitigation measures for operational air quality impacts from other area sources that the Lead Agency should include in the Final MND consist of the following:

- Maximize use of solar energy by installing solar energy arrays.
- Use light colored paving and roofing materials.
- Utilize only Energy Star heating, cooling, and lighting devices, and appliances.
- Use of water-based or low VOC cleaning products that go beyond the requirements of South Coast AQMD Rule 1113.

← C-6
 ← C-7
 ← C-8
 ↪ C-9

Design considerations for the Proposed Project that the Lead Agency should consider to further reduce air quality and health risk impacts include the following:

- Re-design the Proposed Project such that truck entry and exit points are not facing sensitive receptors and are not located along Alessandro Boulevard.
- Prohibit trucks from traveling on Alessandro Boulevard and passing next to sensitive land uses to enter or leave the Proposed Project site.
- Re-design the Proposed Project such that any check-in point for trucks is inside the Proposed Project site to ensure that there are no trucks queuing and/or idling outside on Alessandro Boulevard next to sensitive land uses (e.g., residences).
- Clearly mark truck routes with trailblazer signs, so that trucks will not travel next to or near sensitive land uses (e.g., residences).
- Design the Proposed Project to ensure that truck traffic inside the Proposed Project site is as far away as feasible from sensitive receptors.
- Restrict overnight truck parking in sensitive land uses by providing overnight truck parking inside the Proposed Project site.

 ← C-11
 ↪ C-12
 ← C-13
 ↪ C-14
 ↪ C-15

2. *South Coast AQMD Rule 2305 and Rule 316*

On May 7, 2021, South Coast AQMD’s Governing Board adopted Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program, and Rule 316 – Fees for Rule 2305. Rules 2305 and 316 are new rules that will reduce regional and local emissions of nitrogen oxides (NOx) and particulate matter (PM), including diesel PM. These emission reductions will reduce public health impacts for communities located near warehouses from mobile sources that are associated with warehouse activities. Also, the emission reductions will help the region attain federal and state ambient air quality standards. Rule 2305 applies to owners and operators of warehouses greater than or equal to 100,000 square feet. Under Rule 2305, operators are subject to an annual WAIRE Points Compliance Obligation that is calculated based on the annual number of truck trips to the warehouse. WAIRE Points can be earned by implementing actions in a prescribed menu in Rule 2305, implementing a site-specific custom plan, or paying a mitigation fee. Warehouse owners are only required to submit limited information reports, but they can opt in to earn Points on behalf of their tenants if they so choose because certain actions to reduce emissions may be better achieved at the warehouse development phase, for instance the installation of solar and charging infrastructure. Rule 316 is a companion fee rule for Rule 2305 to allow South Coast AQMD to recover costs associated with Rule 2305 compliance activities. Since the Proposed Project consists of the development of 389,603 square feet that would be used for warehouse activities, the Proposed Project’s warehouse owners and operators will be required to comply with Rule 2305 once the warehouse

↪ C-16

Letter C

Julia Descoteaux

August 17, 2021

is occupied. Therefore, South Coast AQMD staff recommends that the Lead Agency review South Coast AQMD Rule 2305 to determine the potential WAIRE Points Compliance Obligation for future operators and explore whether additional project requirements and CEQA mitigation measures can be identified and implemented at the Proposed Project that may help future warehouse operators meet their compliance obligation⁷. South Coast AQMD staff is available to answer questions concerning Rule 2305 implementation and compliance by phone or email at (909) 396-3140 or waire-program@aqmd.gov. For implementation guidance documents and compliance and reporting tools, please visit South Coast AQMD's WAIRE Program webpage⁸.

C-16
(cont)

Conclusion

Pursuant to CEQA Guidelines Section 15074, prior to approving the Proposed Project, the Lead Agency shall consider the MND for adoption together with any comments received during the public review process. Please provide South Coast AQMD with written responses to all comments contained herein prior to the adoption of the Final MND. When responding to issues raised in the comments, responses should provide sufficient details giving reasons why specific comments and suggestions are not accepted. There should be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information do not facilitate the purpose and goal of CEQA on public disclosure and are not meaningful, informative, or useful to decision makers and the public who are interested in the Proposed Project. Further, when the Lead Agency makes the finding that the recommended air quality mitigation measures are not feasible, the Lead Agency should describe the specific reasons supported by substantial evidence for rejecting it in the Final MND (CEQA Guidelines Sections 15070 and 15074.1).

C-17

South Coast AQMD staff is available to work with the Lead Agency to address any air quality questions that may arise from this comment letter. Please contact me at lsun@aqmd.gov, should you have any questions.

Attachment: PC Comment Letters (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Responses to Comment Letter C from South Coast Air Quality Management District (South Coast AQMD)

- C-1 This introductory comment is acknowledged; no response is required.
- C-2 The South Coast AQMD's provides a summary of the Project description. Contrary to the commenter's assertion that existing residential uses are located within 120 feet of the Project's northern boundary facing Alessandro Boulevard, the nearest existing residence is located at 13994 Chagall Court, approximately 152 feet north of the Project site (see the Air Quality Impact Analysis and Mobile Source Health Risk Assessment (*Technical Appendices A1 and A2*)). Note also that construction would occur over an 8-month period. With respect to the driveways along Alessandro Boulevard, the middle driveway would be accessible to only passenger vehicles and the westernmost driveway and easternmost driveway would be accessible to both passenger vehicles and trucks. All driveways would be restricted to right turn movements when entering/exiting the site.
- C-3 The commenter summarizes the truck trips generated by the Project and recommends mitigation measures to reduce the Project's air quality and health risk impacts on nearby residents that are further discussed below. As concluded in the MND (see p. 31-36) and the Air Quality Impact Analysis and Mobile Source Health Risk Assessment (*Technical Appendices A1 and A2*), air quality and health risk impacts were determined to be less than significant and no mitigation measures are required.
- C-4 The commenter asserts that the Project should be required to use zero-emission, near-zero-emission, or 2010 model year heavy-duty trucks to reduce ongoing and long-term NO_x emissions. Regarding a requirement for 2010 model year heavy duty trucks, all trucks registered in California were required to comply with this requirement per State law by January 1, 2023 (13 California Code of Regulations Section 2025; the "CARB Truck and Bus Regulation"). Therefore, the Project's future building users will be required to comply with the applicable phase-in timeline.

First, it was concluded in the MND that operational NO_x emissions are less than significant based on the South Coast AQMD's daily significance thresholds (see p. 33-35). Therefore, no mitigation measures are required.

At present, requiring zero-emission vehicles is economically and technologically infeasible; also, such vehicles are not available on a large enough scale to be relied upon. In a report titled "Transitioning to Zero-Emission Heavy Duty Freight Vehicles," the International Council on Clean Transportation (ICCT) provides an overview of advancing technologies (ICCT, September 2017)¹. The ICCT reports that although the technology is advancing and although at some point in the distant future non-diesel technology will likely be used in mass to power freight movement, "zero-emission vehicle technologies do present considerable challenges. They have a combination of near- and long-term barriers, issues, and questions that will have to be addressed before they can become widespread replacements for conventional trucks and tractor-trailers that are typically diesel fueled" (ICCT, p. 31). "Tesla's announced battery electric semi-tractor prototype is the only (emphasis added) battery electric project we found in our [world-wide]

¹ https://www.theicct.org/sites/default/files/publications/Zero-emission-freight-trucks_ICCT-white-paper_26092017_vF.pdf

assessment targeting long-haul heavy-duty applications” (ICCT, p. 31). Imposing extensive requirements on the proposed Project related to emerging technology, when the various types of technological advancements and their timeframes for common availability are not known with any certainty, is not a feasible mitigation measure.

It is also important to note that the analysis provided in the MND presents a “snapshot in time” of the Project’s worst-case air pollutant emissions under the current regulatory environment. The MND recognizes that by January 1, 2023, the CARB’s Truck and Bus Regulation will be in full effect and that all heavy-duty trucks traveling to and from the Project site will be required to comply with applicable engine standards to minimize air pollutant emissions. After the Truck and Bus Regulation becomes fully effective, the air pollutant emissions reported in the MND would be reduced commensurately once the more stringent engine requirements go into effect.

Further, the South Coast AQMD recently adopted a Warehouse Indirect Source Rule (ISR), Rule 2305, in May 2021. The ISR applies to warehouse operators and owners of warehouses greater than or equal to 100,000 square feet of indoor floor space within a single building that may be used for warehousing activities. The Project would be subject to compliance. In general, the Rule establishes the Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program, which is a points system that is based upon the actual number of trucks that come to and leave the warehouse. Each year the operator will be obligated to determine how many points the warehouse is required to achieve using a formula set out in the Rule. If the required number of points are not achieved, the warehouse operator would be required to pay a fee to the South Coast AQMD, which would use collected funds to improve air quality. Although compliance with Rule 2305 is not mitigation and the South Coast AQMD has not published a nexus study showing how the use of collected funds has nexus to the warehouse’s air quality impacts, the ISR program is intended to reduce air quality effects associated with the warehouse industry, including the Project, throughout the Air Basin.

- C-5 The commenter requests that electrical vehicle (EV) charging station or appropriately sized electrical infrastructure and electrical panels be provided. As shown in Figure 11, *Site Plan*, there are a total of 8 EV charging stations provided in the Project site. The Project Applicant or successor in interest is also required to provide documentation to the City of Moreno Valley demonstrating that the Project includes the energy efficiency design features such as installation of the minimum number of passenger vehicle EV charging stations and documentation that the electrical system has adequate capacity for the future load as required by Title 24. The MND adequately included electrical vehicle charging stations and accommodations for additional capacity in the future; thus, no additional mitigation measures are needed.
- C-6 The commenter requests that the Project maximize use of solar energy by the installation of solar panels to reduce area source emissions. As shown on Table 4 of the MND, only a small percentage of the Project’s air pollutant emissions are associated with energy use; as such, the installation of solar panels does not have a proportional nexus to a majority of the Project’s air pollutant emissions, which are attributed to area source (architectural coating, consumer products, and landscape maintenance equipment).

Additionally, as concluded in the MND, the Project would result in less than significant impacts related to air quality emissions. Therefore, no additional mitigation measures are needed.

- C-7 The commenter requests that light-colored paving materials be used. The Project applicant already proposes light-colored concrete materials, comprised of various neutral, earth-toned colors, including shades of white, beige, gray, and dark brown, as discussed in the Project Description of the MND, Figure 12, *Architectural Elevations*, of the MND, and indicated on the Project's site plans on file with the City of Moreno Valley. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-8 The commenter requests that the MND be revised to include a mitigation measure that requires the use of energy efficient heating and cooling equipment, appliances, and fixtures. The Project already will be required by the California Green Building Standards Code to comply with the Title 24 Building Energy Efficiency Standards (Nonresidential) published by the California Energy Commission which contain mandatory standards for mechanical systems, lighting (indoor and outdoor), and appliances to minimize energy use. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-9 The commenter requests the use of water-based or low VOC cleaning products. The Project's operational VOC emissions are less than significant (refer to p. 33-34); therefore, mitigation is not required to reduce the Project's operational VOC emissions. Furthermore, the City does not have an enforcement mechanism or the staffing resources to monitor and enforce the chemical composition of cleaning products used during the normal course of private business operations. CEQA Guidelines §15091 provides that mitigation measures must be within the responsibility and jurisdiction of the lead agency and have a proportional nexus to the Project's impact on the environment. Therefore, the City has determined that this recommendation is not feasible to require as a mitigation measure.
- C-10 The commenter suggests that the Project's truck entrances and exits be redesigned such that they do not face sensitive receptors and not located along Alessandro Boulevard. As shown in Figure 6, *Aerial Photograph*, the Project site is bounded by Alessandro Boulevard to the north, vacant land to the east and west, and industrial development to the south. Alessandro Boulevard is the only roadway providing access to the Project site. Therefore, Project entry and exit points must be located on Alessandro Boulevard.

The majority of emissions are generated in the truck courts/loading areas. As shown in Figure 11, *Site Plan*, the truck courts for both Buildings 1 and 2 would be located on the southern side of each building away from residences north of Alessandro Boulevard. Neither truck court would be visible from Alessandro Boulevard. As such, the truck courts/loading areas would be enclosed and screened from public viewing areas and sensitive receptors. Therefore, no additions, revisions, or corrections to the MND are needed.

- C-11 The commenter suggests that the Project's trucks not to travel on Alessandro Boulevard and pass next to sensitive land uses to enter or leave the Project site. As shown in the City of Moreno Valley designated truck route map (Exhibit 3-4 of Technical Appendix K1), Alessandro Boulevard, Frederick Street, and Graham Street (between Alessandro Boulevard and Cactus Avenue only) are designated truck routes in the City of Moreno Valley. Therefore, no additions, revisions, or corrections to the MND are needed.

- C-12 The commenter suggests that check-in points be placed well inside the Project site to prevent truck queuing and idling on public streets. As discussed above, the truck courts for both Buildings 1 and 2 would be located on the southern side of each building. Check-in gates for trucks at the Project site would be located at each end of the truck courts and away from Alessandro Boulevard to prevent queuing of trucks outside the property. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-13 The commenter suggests that truck routes be marked with trailblazer signs. The City of Moreno Valley has designated truck routes. As discussed above, in the vicinity of the Project site, Alessandro Boulevard, Frederick Street, and Graham Street (between Alessandro Boulevard and Cactus Avenue only) are designated truck routes in the City. Truck traffic, including trucks traveling to and from the Project site, are required to use legal truck routes. For these reasons, the commenter's suggestion is accommodated and no revisions to the DEIR are warranted.
- C-14 The commenter suggests that truck traffic inside the Project site is as far away as feasible from sensitive receptors. The existing residential homes located north of Alessandro Boulevard, approximately 152 feet north of the Project site, would be the closest sensitive receptors to the Project. As shown in Figure 11, Site Plan, the truck courts for both Buildings 1 and 2 would be located on the southern side of each building. Neither truck court would be visible from Alessandro Boulevard. As such, the truck courts/loading areas would be enclosed and screened from public viewing areas and sensitive receptors. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-15 The commenter suggests prohibiting trucks from parking in residential areas overnight. The Project's design provides off-street parking on the Project site in accordance with applicable provisions of the City of Moreno Valley Municipal Code. Furthermore, City of Moreno Valley Municipal Code Section 17-14, titled "Commercial vehicles and/or trailers prohibited from stopping, standing or parking on public streets or highway" prohibits commercial vehicles exceeding a manufacturer's gross vehicle weight (commonly referred to as GVW) rating of 10,000 pounds (as defined by California Vehicle Code § 390) from stopping, standing, or parking on any public street or highway, or any portion thereof. For these reasons, it is not reasonably foreseeable that vehicles accessing the Project site would park in residential areas overnight. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-16 The commenter states that the Project's warehouse owner and operators will be required to comply with the requirements of the South Coast AQMD Rule 2305 and provides information language on Rule 316. The City of Moreno Valley acknowledges that the Project will be subjected to the applicable provisions of Rule 2305 and 316. No further response is needed.
- C-17 Written responses to the South Coast AQMD's comments are included herein. As required by CEQA, these responses are included in the City's staff report and included in the City's consideration of the MND for adoption. No further response is needed.
- C-18 The City acknowledges Lijin Sun as the South Coast AQMD contact person; no response is required.

Re: Compass Danbe (APN 297-170-002 and 003)

Dear Members of the City of Moreno Valley City Council and Planning Commission:

On behalf of the Golden State Environmental Justice Alliance (“GSEJA”), I am writing to you regarding the Compass Danbe Project (“Project”).

GSEJA is withdrawing its comment letter and opposition to the Project. The Project’s developer has addressed GSEJA’s concerns about environmental mitigation.

Sincerely,

Joe Bourgeois
Executive Director

Subject: Compass Danbe Center Point Warehouse Project

Warning: External Email – Watch for Email Red Flags!

Dear Ms Descoteaux,

I am writing to voice my concerns regarding the Compass Danbe Center Point Warehouse Project, that would be located across the street from existing residential homes as well as a Charter Independent Study School, SIATech Moreno Valley, that holds classes on campus.

As a home owner, educator, parent and grandparent, the location of this warehouse and its close proximity to a school and homes makes the location unsuitable for Business Park/Light Industrial activity without significant reduction to air, noise, and light pollution, enhanced safe street design, and changes to the proposed project that incorporate the latest solar, electric truck/vehicle requirements, and on-site EV charging stations to reduce the project's carbon footprint to net zero.

Respectfully,
Keri Then

RE: Compass Danbe Centerpointe Project - Responses to MND Comment Letters

T&B Planning, Inc. is the CEQA consultant for the Applicant of the Compass Danbe Centerpointe project. During the MND’s public review period, which lasted from July 26 to August 25, 2021, the City of Morena Valley received correspondence from three public agencies and interested parties. A list of agencies, organizations, and persons that submitted comments on the MND during the public review period is presented in Table 1, *Organizations, Persons, & Public Agencies that Commented on the MND*. In consultation with the Applicant’s technical experts, we have prepared responses to each substantive comment raised by the individual agencies and interested parties which are provided on the following pages. Copies of each of the comment letters referenced in Table 1 are provided on the following pages, followed by responses to each individual comment. None of the comment letters submitted to the City of Moreno Valley regarding the MND have produced substantial new information requiring substantial revisions resulting in the need for recirculation or additional environmental review under CEQA Guidelines § 15073.5.

Subject: RE: MND for two light industrial buildings between Frederick St and Graham St., Moreno Valley

Warning: External Email – Watch for Email Red Flags!

Dear Julia,

Thank you for contacting the San Manuel Band of Mission Indians (SMBMI) regarding the above-referenced project. SMBMI appreciates the opportunity to review the project documentation, which was received by the Cultural Resources Management Department on July 28th. The proposed project is located outside of Serrano ancestral territory and, as such, SMBMI will not be requesting to receive consulting party status with the lead agency or to participate in the scoping, development, or review of documents created pursuant to legal and regulatory mandates.

**Mitigated Negative Declaration (MND) for the Proposed
Compass Danbe Centerpointe Project (Proposed Project)**

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to comment on the above-mentioned document. The City of Moreno Valley is the California Environmental Quality Act (CEQA) Lead Agency for the Proposed Project. The following comments included recommended air quality mitigation measures and information on South Coast AQMD Rules 2305 and 316 that the Lead Agency should include in the Final MND.

Based on the MND, the Proposed Project consists of two warehouses totaling 389,603 square feet on 17.7 acres. The Proposed Project is located on the southeast corner of Alessandro Boulevard and Frederick Street in the City of Moreno Valley. Based on a review of aerial photographs, South Coast AQMD staff found that existing residential uses are located within 120 feet of the Proposed Project's northern boundary facing Alessandro Boulevard. Construction of the Proposed Project will occur in a nine-month period. At full buildout in June 2022, the Proposed Project will generate 742 vehicle trips per day, including 518 passenger vehicle trips and 224 truck trips. Forty-two loading docks will be located along the southern boundary of the Proposed Project away from residents¹. However, three truck entrances will be located at the Proposed Project's northern boundary directly facing the existing residential uses. Based on the technical appendix², trucks will be traveling on Alessandro Boulevard next to the existing residential uses.

South Coast AQMD Staff's Comments

Based on a review of the MND and supporting technical appendices, South Coast AQMD staff has two comments.

1. Recommended Air Quality Mitigation Measures during Operation

The Proposed Project will generate 224 truck trips per day, which is estimated by South Coast AQMD staff to be 102 trucks per day. These truck trips will be sharing the same Alessandro Boulevard as residents living north of the Proposed Project. The California Air Resources

August 17, 2021

Board’s (CARB) *Air Quality and Land Use Handbook: A Community Health Perspective*³ is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process. Based on the *Handbook*, CARB recommends a 1,000-foot separation between sensitive land uses and a distribution center that accommodates more than 100 trucks per day. To reduce the Proposed Project’s air quality and health risk impacts on nearby residents, South Coast AQMD staff recommends that the Lead Agency include air quality mitigation measures in the Final MND.

Mitigation measures for operational air quality impacts from mobile sources that the Lead Agency should include in the Final MND consist of the following:

- Require zero-emissions (ZE) or near-zero emission (NZE) on-road haul trucks such as heavy-duty trucks with natural gas engines that meet the CARB’s adopted optional NOx emissions standard at 0.02 grams per brake horsepower-hour (g/bhp-hr), if and when feasible. Given the state’s clean truck rules and regulations aiming to accelerate the utilization and market penetration of ZE and NZE trucks such as the Advanced Clean Trucks Rule⁴ and the Heavy-Duty Low NOx Omnibus Regulation⁵, ZE and NZE trucks will become increasingly more available to use. The Lead Agency should require a phase-in schedule to incentive the use of these cleaner operating trucks to reduce any significant adverse air quality impacts. South Coast AQMD staff is available to discuss the availability of current and upcoming truck technologies and incentive programs with the Lead Agency. At a minimum, require the use of 2010 model year⁶ that meet CARB’s 2010 engine emissions standards at 0.01 g/bhp-hr of particulate matter (PM) and 0.20 g/bhp-hr of NOx emissions or newer, cleaner trucks. Include environmental analyses to evaluate and identify sufficient electricity and supportive infrastructures in the Energy and Utilities and Service Systems Sections in the CEQA document, where appropriate. Include the requirement in applicable bid documents, purchase orders, and contracts. Operators shall maintain records of all trucks associated with project construction to document that each truck used meets these emission standards, and make the records available for inspection. The Lead Agency should conduct regular inspections to the maximum extent feasible to ensure compliance.
- Provide electric vehicle (EV) charging stations or at a minimum, provide the electrical infrastructure and electrical panels should be appropriately sized. Electrical hookups should be provided for truckers to plug in any onboard auxiliary equipment.

³ CARB’s *Air Quality and Land Use Handbook: A Community Health Perspective* can be found at: <http://www.arb.ca.gov/ch/handbook.pdf>.

⁴ CARB. June 25, 2020. *Advanced Clean Trucks Rule*. Accessed at: <https://ww2.arb.ca.gov/our-work/programs/advanced-clean-trucks>.

⁵ CARB has recently passed a variety of new regulations that require new, cleaner heavy-duty truck technology to be sold and used in state. For example, on August 27, 2020, CARB approved the Heavy-Duty Low NOx Omnibus Regulation, which will require all trucks to meet the adopted emission standard of 0.05 g/hp-hr starting with engine model year 2024. Accessed at: <https://ww2.arb.ca.gov/rulemaking/2020/hdomibuslownox>.

⁶ CARB adopted the statewide Truck and Bus Regulation in 2010. The Regulation requires diesel trucks and buses that operate in California to be upgraded to reduce emissions. Newer heavier trucks and buses must meet particulate matter filter requirements beginning January 1, 2012. Lighter and older heavier trucks must be replaced starting January 1, 2015. By January 1, 2023, nearly all trucks and buses will need to have 2010 model year engines or equivalent. More information on the CARB’s Truck and Bus Regulation is available at: <https://www.arb.ca.gov/msprog/onrdiesel/onrdiesel.htm>.

Letter C

Julia Descoteaux

August 17, 2021

Mitigation measures for operational air quality impacts from other area sources that the Lead Agency should include in the Final MND consist of the following:

- Maximize use of solar energy by installing solar energy arrays.
- Use light colored paving and roofing materials.
- Utilize only Energy Star heating, cooling, and lighting devices, and appliances.
- Use of water-based or low VOC cleaning products that go beyond the requirements of South Coast AQMD Rule 1113.

← C-6
 ← C-7
 ← C-8
 ↪ C-9

Design considerations for the Proposed Project that the Lead Agency should consider to further reduce air quality and health risk impacts include the following:

- Re-design the Proposed Project such that truck entry and exit points are not facing sensitive receptors and are not located along Alessandro Boulevard.
- Prohibit trucks from traveling on Alessandro Boulevard and passing next to sensitive land uses to enter or leave the Proposed Project site.
- Re-design the Proposed Project such that any check-in point for trucks is inside the Proposed Project site to ensure that there are no trucks queuing and/or idling outside on Alessandro Boulevard next to sensitive land uses (e.g., residences).
- Clearly mark truck routes with trailblazer signs, so that trucks will not travel next to or near sensitive land uses (e.g., residences).
- Design the Proposed Project to ensure that truck traffic inside the Proposed Project site is as far away as feasible from sensitive receptors.
- Restrict overnight truck parking in sensitive land uses by providing overnight truck parking inside the Proposed Project site.

↪ C-10
 ↪ C-11
 ↪ C-12
 ↪ C-13
 ↪ C-14
 ↪ C-15

2. *South Coast AQMD Rule 2305 and Rule 316*

On May 7, 2021, South Coast AQMD’s Governing Board adopted Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program, and Rule 316 – Fees for Rule 2305. Rules 2305 and 316 are new rules that will reduce regional and local emissions of nitrogen oxides (NOx) and particulate matter (PM), including diesel PM. These emission reductions will reduce public health impacts for communities located near warehouses from mobile sources that are associated with warehouse activities. Also, the emission reductions will help the region attain federal and state ambient air quality standards. Rule 2305 applies to owners and operators of warehouses greater than or equal to 100,000 square feet. Under Rule 2305, operators are subject to an annual WAIRE Points Compliance Obligation that is calculated based on the annual number of truck trips to the warehouse. WAIRE Points can be earned by implementing actions in a prescribed menu in Rule 2305, implementing a site-specific custom plan, or paying a mitigation fee. Warehouse owners are only required to submit limited information reports, but they can opt in to earn Points on behalf of their tenants if they so choose because certain actions to reduce emissions may be better achieved at the warehouse development phase, for instance the installation of solar and charging infrastructure. Rule 316 is a companion fee rule for Rule 2305 to allow South Coast AQMD to recover costs associated with Rule 2305 compliance activities. Since the Proposed Project consists of the development of 389,603 square feet that would be used for warehouse activities, the Proposed Project’s warehouse owners and operators will be required to comply with Rule 2305 once the warehouse

↪ C-16

Attachment: SUPPLEMENTAL INFORMATION (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Julia Descoteaux

August 17, 2021

is occupied. Therefore, South Coast AQMD staff recommends that the Lead Agency review South Coast AQMD Rule 2305 to determine the potential WAIRE Points Compliance Obligation for future operators and explore whether additional project requirements and CEQA mitigation measures can be identified and implemented at the Proposed Project that may help future warehouse operators meet their compliance obligation⁷. South Coast AQMD staff is available to answer questions concerning Rule 2305 implementation and compliance by phone or email at (909) 396-3140 or waire-program@aqmd.gov. For implementation guidance documents and compliance and reporting tools, please visit South Coast AQMD's WAIRE Program webpage⁸.

C-16
(cont)

Conclusion

Pursuant to CEQA Guidelines Section 15074, prior to approving the Proposed Project, the Lead Agency shall consider the MND for adoption together with any comments received during the public review process. Please provide South Coast AQMD with written responses to all comments contained herein prior to the adoption of the Final MND. When responding to issues raised in the comments, responses should provide sufficient details giving reasons why specific comments and suggestions are not accepted. There should be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information do not facilitate the purpose and goal of CEQA on public disclosure and are not meaningful, informative, or useful to decision makers and the public who are interested in the Proposed Project. Further, when the Lead Agency makes the finding that the recommended air quality mitigation measures are not feasible, the Lead Agency should describe the specific reasons supported by substantial evidence for rejecting it in the Final MND (CEQA Guidelines Sections 15070 and 15074.1).

C-17

South Coast AQMD staff is available to work with the Lead Agency to address any air quality questions that may arise from this comment letter. Please contact me at lsun@aqmd.gov, should you have any questions.

Responses to Comment Letter C from South Coast Air Quality Management District (South Coast AQMD)

- C-1 This introductory comment is acknowledged; no response is required.
- C-2 The South Coast AQMD's provides a summary of the Project description. Contrary to the commenter's assertion that existing residential uses are located within 120 feet of the Project's northern boundary facing Alessandro Boulevard, the nearest existing residence is located at 13994 Chagall Court, approximately 152 feet north of the Project site (see the Air Quality Impact Analysis and Mobile Source Health Risk Assessment (*Technical Appendices A1 and A2*)). Note also that construction would occur over an 8-month period. With respect to the driveways along Alessandro Boulevard, the middle driveway would be accessible to only passenger vehicles and the westernmost driveway and easternmost driveway would be accessible to both passenger vehicles and trucks. All driveways would be restricted to right turn movements when entering/exiting the site.
- C-3 The commenter summarizes the truck trips generated by the Project and recommends mitigation measures to reduce the Project's air quality and health risk impacts on nearby residents that are further discussed below. As concluded in the MND (see p. 31-36) and the Air Quality Impact Analysis and Mobile Source Health Risk Assessment (*Technical Appendices A1 and A2*), air quality and health risk impacts were determined to be less than significant and no mitigation measures are required.
- C-4 The commenter asserts that the Project should be required to use zero-emission, near-zero-emission, or 2010 model year heavy-duty trucks to reduce ongoing and long-term NO_x emissions. Regarding a requirement for 2010 model year heavy duty trucks, all trucks registered in California were required to comply with this requirement per State law by January 1, 2023 (13 California Code of Regulations Section 2025; the "CARB Truck and Bus Regulation"). Therefore, the Project's future building users will be required to comply with the applicable phase-in timeline.

First, it was concluded in the MND that operational NO_x emissions are less than significant based on the South Coast AQMD's daily significance thresholds (see p. 33-35). Therefore, no mitigation measures are required.

At present, requiring zero-emission vehicles is economically and technologically infeasible; also, such vehicles are not available on a large enough scale to be relied upon. In a report titled "Transitioning to Zero-Emission Heavy Duty Freight Vehicles," the International Council on Clean Transportation (ICCT) provides an overview of advancing technologies (ICCT, September 2017)¹. The ICCT reports that although the technology is advancing and although at some point in the distant future non-diesel technology will likely be used in mass to power freight movement, "zero-emission vehicle technologies do present considerable challenges. They have a combination of near- and long-term barriers, issues, and questions that will have to be addressed before they can become widespread replacements for conventional trucks and tractor-trailers that are typically diesel fueled" (ICCT, p. 31). "Tesla's announced battery electric semi-tractor prototype is the only (emphasis added) battery electric project we found in our [world-wide]

¹ https://www.theicct.org/sites/default/files/publications/Zero-emission-freight-trucks_ICCT-white-paper_26092017_vF.pdf

assessment targeting long-haul heavy-duty applications” (ICCT, p. 31). Imposing extensive requirements on the proposed Project related to emerging technology, when the various types of technological advancements and their timeframes for common availability are not known with any certainty, is not a feasible mitigation measure.

It is also important to note that the analysis provided in the MND presents a “snapshot in time” of the Project’s worst-case air pollutant emissions under the current regulatory environment. The MND recognizes that by January 1, 2023, the CARB’s Truck and Bus Regulation will be in full effect and that all heavy-duty trucks traveling to and from the Project site will be required to comply with applicable engine standards to minimize air pollutant emissions. After the Truck and Bus Regulation becomes fully effective, the air pollutant emissions reported in the MND would be reduced commensurately once the more stringent engine requirements go into effect.

Further, the South Coast AQMD recently adopted a Warehouse Indirect Source Rule (ISR), Rule 2305, in May 2021. The ISR applies to warehouse operators and owners of warehouses greater than or equal to 100,000 square feet of indoor floor space within a single building that may be used for warehousing activities. The Project would be subject to compliance. In general, the Rule establishes the Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program, which is a points system that is based upon the actual number of trucks that come to and leave the warehouse. Each year the operator will be obligated to determine how many points the warehouse is required to achieve using a formula set out in the Rule. If the required number of points are not achieved, the warehouse operator would be required to pay a fee to the South Coast AQMD, which would use collected funds to improve air quality. Although compliance with Rule 2305 is not mitigation and the South Coast AQMD has not published a nexus study showing how the use of collected funds has nexus to the warehouse’s air quality impacts, the ISR program is intended to reduce air quality effects associated with the warehouse industry, including the Project, throughout the Air Basin.

- C-5 The commenter requests that electrical vehicle (EV) charging station or appropriately sized electrical infrastructure and electrical panels be provided. As shown in Figure 11, *Site Plan*, there are a total of 8 EV charging stations provided in the Project site. The Project Applicant or successor in interest is also required to provide documentation to the City of Moreno Valley demonstrating that the Project includes the energy efficiency design features such as installation of the minimum number of passenger vehicle EV charging stations and documentation that the electrical system has adequate capacity for the future load as required by Title 24. The MND adequately included electrical vehicle charging stations and accommodations for additional capacity in the future; thus, no additional mitigation measures are needed.
- C-6 The commenter requests that the Project maximize use of solar energy by the installation of solar panels to reduce area source emissions. As shown on Table 4 of the MND, only a small percentage of the Project’s air pollutant emissions are associated with energy use; as such, the installation of solar panels does not have a proportional nexus to a majority of the Project’s air pollutant emissions, which are attributed to area source (architectural coating, consumer products, and landscape maintenance equipment).

Additionally, as concluded in the MND, the Project would result in less than significant impacts related to air quality emissions. Therefore, no additional mitigation measures are needed.

- C-7 The commenter requests that light-colored paving materials be used. The Project applicant already proposes light-colored concrete materials, comprised of various neutral, earth-toned colors, including shades of white, beige, gray, and dark brown, as discussed in the Project Description of the MND, Figure 12, *Architectural Elevations*, of the MND, and indicated on the Project's site plans on file with the City of Moreno Valley. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-8 The commenter requests that the MND be revised to include a mitigation measure that requires the use of energy efficient heating and cooling equipment, appliances, and fixtures. The Project already will be required by the California Green Building Standards Code to comply with the Title 24 Building Energy Efficiency Standards (Nonresidential) published by the California Energy Commission which contain mandatory standards for mechanical systems, lighting (indoor and outdoor), and appliances to minimize energy use. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-9 The commenter requests the use of water-based or low VOC cleaning products. The Project's operational VOC emissions are less than significant (refer to p. 33-34); therefore, mitigation is not required to reduce the Project's operational VOC emissions. Furthermore, the City does not have an enforcement mechanism or the staffing resources to monitor and enforce the chemical composition of cleaning products used during the normal course of private business operations. CEQA Guidelines §15091 provides that mitigation measures must be within the responsibility and jurisdiction of the lead agency and have a proportional nexus to the Project's impact on the environment. Therefore, the City has determined that this recommendation is not feasible to require as a mitigation measure.
- C-10 The commenter suggests that the Project's truck entrances and exits be redesigned such that they do not face sensitive receptors and not located along Alessandro Boulevard. As shown in Figure 6, *Aerial Photograph*, the Project site is bounded by Alessandro Boulevard to the north, vacant land to the east and west, and industrial development to the south. Alessandro Boulevard is the only roadway providing access to the Project site. Therefore, Project entry and exit points must be located on Alessandro Boulevard.

The majority of emissions are generated in the truck courts/loading areas. As shown in Figure 11, *Site Plan*, the truck courts for both Buildings 1 and 2 would be located on the southern side of each building away from residences north of Alessandro Boulevard. Neither truck court would be visible from Alessandro Boulevard. As such, the truck courts/loading areas would be enclosed and screened from public viewing areas and sensitive receptors. Therefore, no additions, revisions, or corrections to the MND are needed.

- C-11 The commenter suggests that the Project's trucks not to travel on Alessandro Boulevard and pass next to sensitive land uses to enter or leave the Project site. As shown in the City of Moreno Valley designated truck route map (Exhibit 3-4 of Technical Appendix K1), Alessandro Boulevard, Frederick Street, and Graham Street (between Alessandro Boulevard and Cactus Avenue only) are designated truck routes in the City of Moreno Valley. Therefore, no additions, revisions, or corrections to the MND are needed.

- C-12 The commenter suggests that check-in points be placed well inside the Project site to prevent truck queuing and idling on public streets. As discussed above, the truck courts for both Buildings 1 and 2 would be located on the southern side of each building. Check-in gates for trucks at the Project site would be located at each end of the truck courts and away from Alessandro Boulevard to prevent queuing of trucks outside the property. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-13 The commenter suggests that truck routes be marked with trailblazer signs. The City of Moreno Valley has designated truck routes. As discussed above, in the vicinity of the Project site, Alessandro Boulevard, Frederick Street, and Graham Street (between Alessandro Boulevard and Cactus Avenue only) are designated truck routes in the City. Truck traffic, including trucks traveling to and from the Project site, are required to use legal truck routes. For these reasons, the commenter's suggestion is accommodated and no revisions to the DEIR are warranted.
- C-14 The commenter suggests that truck traffic inside the Project site is as far away as feasible from sensitive receptors. The existing residential homes located north of Alessandro Boulevard, approximately 152 feet north of the Project site, would be the closest sensitive receptors to the Project. As shown in Figure 11, Site Plan, the truck courts for both Buildings 1 and 2 would be located on the southern side of each building. Neither truck court would be visible from Alessandro Boulevard. As such, the truck courts/loading areas would be enclosed and screened from public viewing areas and sensitive receptors. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-15 The commenter suggests prohibiting trucks from parking in residential areas overnight. The Project's design provides off-street parking on the Project site in accordance with applicable provisions of the City of Moreno Valley Municipal Code. Furthermore, City of Moreno Valley Municipal Code Section 17-14, titled "Commercial vehicles and/or trailers prohibited from stopping, standing or parking on public streets or highway" prohibits commercial vehicles exceeding a manufacturer's gross vehicle weight (commonly referred to as GVW) rating of 10,000 pounds (as defined by California Vehicle Code § 390) from stopping, standing, or parking on any public street or highway, or any portion thereof. For these reasons, it is not reasonably foreseeable that vehicles accessing the Project site would park in residential areas overnight. Therefore, no additions, revisions, or corrections to the MND are needed.
- C-16 The commenter states that the Project's warehouse owner and operators will be required to comply with the requirements of the South Coast AQMD Rule 2305 and provides information language on Rule 316. The City of Moreno Valley acknowledges that the Project will be subjected to the applicable provisions of Rule 2305 and 316. No further response is needed.
- C-17 Written responses to the South Coast AQMD's comments are included herein. As required by CEQA, these responses are included in the City's staff report and included in the City's consideration of the MND for adoption. No further response is needed.
- C-18 The City acknowledges Lijin Sun as the South Coast AQMD contact person; no response is required.

RE: COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

Dear Ms. Descoteaux:

T&B Planning, Inc. (T&B Planning) is the environmental consulting firm that prepared the Initial Study/Mitigated Negative Declaration (IS/MND) for the Compass Danbe Centerpointe project. T&B Planning has prepared this letter in response to two letters sent to the City by Andrew Miller of Shute, Mihaly, and Weinberger LLP (hereinafter "Commenter") on behalf of the Moreno Valley Group Sierra Club. The responses provided below and on the following pages are numbered to correspond with the individual comments from the two comment letters.

Reponses to October 1, 2021 Comment Letter

I-A: Response to comment that "The Project is Vertically Inconsistent with the General Plan"

The Commenter states their general opinion that the Project is inconsistent with the City's General Plan based on statements in the General Plan that industrial uses and residential uses should not be located adjacent to each other. That is not the intent of the City's General Plan. Instead, all projects should be designed with existing land uses in mind. Warehouses and residential uses exist in harmony throughout the City.

Without specific examples, it is difficult to determine what land use conflicts the Commenter asserts to be present. The City's development standards and the Project's design ensure smooth transitions between the various land uses. The Project does, in fact, minimize potential health risks and the assertion that significant buffers between residential and nonresidential uses are required is significantly outdated.¹

A City's determination that a project is consistent with its general plan "carries a strong presumption of regularity. This determination can be overturned only if the [City] abused its discretion—that is, did not proceed legally, or if the determination is not supported by findings, or if the findings are not supported by substantial evidence." (*Sequoyah Hills Homeowners Assn. v. City of Oakland* (1993) 23 Cal.App.4th 704, 717). "State law does not require perfect conformity between a proposed project and the applicable general plan" because "it is nearly, if not absolutely, impossible for a project to be in perfect conformity with each and every policy set forth in the applicable plan." (*Pfeiffer v. City of Sunnyvale City Council* (2011) 200 Cal.App.4th 1552, 1563).

COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

October 5, 2021

Page 2 of 11

“A project is consistent with the general plan if, considering all its aspects, it will further the objectives and policies of the general plan and not obstruct their attainment.” (*Clover Valley Foundation v. City of Rocklin* (2011) 197 Cal.App.4th 200, 238, citing *Sequoyah Hills*, supra, 23 Cal.App.4th at 719. To be consistent, a project must simply be “compatible” with the objectives, policies, general land uses and programs specified. (*Sequoyah Hills*, supra, 23 Cal.App.4th at 717–718; *Families Unafraid to Uphold Rural etc. v. County v. Board of Supervisors* (“FUTURE”) (1998) 62 Cal.App.4th 1332, 1336).

Courts accord great deference to a City’s determination of general plan consistency, “because the body which adopted the general plan policies in its legislative capacity has unique competence to interpret those policies when applying them in its adjudicatory capacity. Because policies in a general plan reflect a range of competing interests, the governmental agency must be allowed to weigh and balance the plan’s policies when applying them, and it has broad discretion to construe its policies in light of the plan’s purposes. (*Pfeiffer*, supra, 200 Cal.App.4th 1552, 1563). The record demonstrates that the City considered all applicable land use plans, including the City’ General Plan and determined that the Project conformed to those policies.

Allowing business to develop and grow, and a resulting increase in truck traffic (or automobile traffic) in the City is not inconsistent with the General Plan. Warehouses and other non-residential uses are able to harmoniously coexist with residential uses throughout the City. Contrary to the assertion otherwise, the City did not flatly reject recommendations from the South Coast Air Quality Management District (SCAQMD). As an initial point, the Project does not result in any transportation or air quality significant impacts and mitigation is not required. In addition, the SCAQMD recently adopted a Warehouse Indirect Source Rule (ISR), Rule 2305, in May 2021, which is intended to reduce air quality effects associated with the warehouse industry throughout the South Coast Air Basin. The proposed Project would be subject to compliance with the ISR; the Project’s compliance with the ISR is not reflected in the air emissions totals presented in the IS/MND. In general, the Rule establishes the Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program, which is a points system that is based upon the actual number of trucks that come to and leave the warehouse. Each year the Project’s operator(s) will be obligated to determine how many points the warehouse is required to achieve using a formula set out in the Rule. If the required number of points is not achieved, the warehouse operator would be required to pay a fee to the SCAQMD, which would use collected funds to improve air quality in the South Coast Air Basin.

I-B: Response to comment that “The Project Would Create Horizontal Inconsistencies in the General Plan”

See Response to Comment I-B. The comment is based on the false premise that industrial and residential land uses are incompatible and that the General Plan “discourages” this type of development.

The policies listed in the General Plan do not discourage the Project or the Project being built at this site. Instead, the policies cited are intended to allow these various uses to coexist. As an example, Policy LCC.3-17 states an objective of “[s]creen[ing] and buffer[ing] nonresidential projects to protect adjacent residential property and other sensitive land uses when necessary to mitigate noise, glare and other adverse effects on adjacent uses.” As another example, Policy N.1-2 states an objective to “[g]uide the location and design of transportation facilities, industrial uses, and other potential noise generators to minimize the effects of noise on adjacent land uses.”

COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

October 5, 2021

Page 3 of 11

II-A: Response to comment that “The MND’s Transportation Analysis Is Inadequate, and There is a Fair Argument that the Project May Have Significant Transportation Impacts”

The Commenter asserts that the Project’s transportation analysis is inadequate because of various purported deficiencies with the forecasted distribution of truck trips to roadways in proximity of the Project site.

In response to the assertion that the transportation analysis is inadequate because it does not assign truck traffic trips to either Frederick Street or Heacock Street, both the City and the Project’s transportation engineer – Urban Crossroads, Inc., a professional transportation engineering firm and expert on traffic analyses in the Inland Empire – concurred that truck traffic is most likely to use Alessandro Boulevard to access the Project site from I-215 due to the lack of turns required upon exiting the freeway and that truck traffic leaving the Project site is most likely to return to I-215 from Cactus Avenue (via Graham Street) due to the ease of access to the freeway. Because left turns out of the Project site are not possible due to the raised median in Alessandro Boulevard, trucks would be required to make a loop with three right turns upon exiting the Project site to reach Frederick Street; this path of travel is considered highly unlikely because trucks avoid having to make excessive turns and vehicle miles traveled would be longer than simply returning to I-215. Similarly, trucks exiting the Project site are not considered likely to use Heacock Street to access SR-60 due to the extra turns and travel distance required. Accordingly, the truck travel routes used in the transportation analysis were devised in a good-faith effort at full disclosure based on reasoned analysis of the Project site’s location in the context of the regional transportation network and City of Moreno Valley truck routes. Notwithstanding the above, the Project Applicant is requesting a condition of approval from the City that will require outbound truck traffic from the Project site to proceed directly to I-215 via Graham Street and Cactus Avenue.

In response to the Commenter’s assertion that the Project’s transportation analysis should have assigned traffic to Cactus Avenue, as noted above, outbound Project truck traffic is expected to utilize Cactus Avenue because it is the quickest travel route from the Project site for outgoing trucks to reach the State highway system. The Project’s peak hour truck traffic volumes along Cactus Avenue would not meet the City’s standard for a quantitative transportation analysis and would not substantially cause or contribute to the need for additional improvements because they are relatively low would not be discernable from existing background traffic.

Lastly, the Commenter commits a fallacy of exclusion by asserting the Project’s transportation analysis is flawed because very few trucks utilize the travel route (i.e., south bound travel on Graham Street) that is forecasted to be used by the Project. The commenter excludes consideration of the primary consideration why Graham Street may be underutilized under existing conditions by trucks: there is no existing development on the south side of Alessandro Boulevard between Frederick Street and Graham Street, thusly, there is no need under existing conditions for trucks to return to I-215 from this location. If the Project site were to be developed, it is indisputable that truck usage of Graham Street would increase because Graham Street is the first southbound route upon exiting the Project site that connects to Cactus Avenue (and provides access to I-215).

COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

October 5, 2021

Page 4 of 11

II-B.1: Response to comment that "The MND Fails to Accurately Describe the Project's Setting in Relation to Sensitive Receptors"

The Commenter claims that the MND's air quality analysis is inadequate because it does not account for potential health risks at nine school locations in the general vicinity of the Project site and/or City-designated truck routes. Three (3) of the schools cited by the commenter are located adjacent to Frederick Street (north of Alessandro Boulevard). As explained in Response II-A, Project truck traffic is not expected to use Frederick Street because it is an inefficient path of travel from the Project site. Because Project trucks are not expected to use Frederick Street, the Project would not expose school receptors adjacent to Frederick Street to substantial adverse health effects from diesel particulate matter (DPM) emissions. Three (3) additional schools cited by the Commenter are located adjacent to Heacock Street (north of Alessandro Boulevard). As explained in Response II-A, Project truck traffic is not expected to use Heacock Street because it is an inefficient path of travel from the Project site. Because Project trucks are not expected to use Heacock Street, the Project would not expose school receptors adjacent to Heacock Street to substantial adverse health effects from diesel particulate matter (DPM) emissions. Further, it should be noted that the City's certified EIR for the Brodiaea Commerce Center (SCH No. 2017111042), which is herein incorporated by reference, found that truck travel along Heacock Street would not expose any of the schools adjacent to Heacock Street (north of Alessandro Boulevard) to substantial adverse health effects from DPM emissions. Based on the foregoing, the analysis in the MND was adequate and appropriately analyzed the Project's likely impacts. Notwithstanding, the Project Applicant is requesting a condition of approval from the City that will require outbound truck traffic from the Project site to proceed directly to I-215 via Graham Street and Cactus Avenue, and will ensure that Project trucks do not expose school receptors adjacent to Frederick Street and Heacock Street to DPM emissions.

The final three (3) schools cited by the Commenter are located adjacent to Alessandro Boulevard: SIATech Moreno Valley Independent Study High School, Pacific View Charter School, and Garvey/Allen Visual & Performing Arts Academy. For purposes of health risk assessments, a school-use sensitive receptor is a location where a school-aged child would remain for 8-hours per day throughout the course of a traditional school year. None of the schools cited by the Commenter meet this definition. SIATech Moreno Valley Independent Study High School is an online-based, independent study program where most assignments are completed from home with some in-person learning opportunities.² Pacific View Charter School is a home study program for elementary school students, a blended home study and in-person program for middle school, and a customizable (at home or blended) program for high school students.³ Garvey/Allen Visual & Performing Arts Academy offers a combination of online-based instruction and at-home independent study.⁴ Accordingly, the MND was not deficient by not evaluating potential health risks at these schools because students would not be present on-site for a substantial enough time period to even be subject to potential health risks associated from the proposed Project

Notwithstanding, a health risk assessment was performed for SIATech Moreno Valley Independent Study High School. This location was selected for analysis because it is the closest of the schools cited by the Commenter to the Project site and, therefore, would be exposed to the highest health hazard risks from trucks traveling to/from the Project site and from trucks idling on the Project site. Although only high school students have the potential to be present at SIATech Moreno Valley Independent Study High School, the health risk assessment assumed a

² <https://www.siatechschoools.org/schools/california-charter-schools/moreno-valley-charter-school/>

³ <https://pacificview.org/moreno-valley/>

⁴ <https://4.files.edl.io/d6b1/10/03/20/212848-b6bf9aad-2d8a-4caf-9592-acb3362b6bc3.pdf>

nine (9) year exposure duration as a conservative measure. Even with this conservative assumption, the maximum health risk at this location would be 0.33 in one million, which is less than the maximum risk already identified in the MND. Furthermore, any other school locations in the vicinity of the Project site or along the truck routes used by the Project, would experience a lesser concentration and consequently a lesser risk than what could occur at the SIATech Moreno Valley Independent Study High School location modeled. See Attachment A for additional details on the HRA calculation and modeling outputs.

II-B.2 Response to comment that “The MND Underestimates the Project’s Operational NO_x Impacts, Which Are Potentially Significant”

The Commenter alleges that the MND underestimates the Project’s Operational NO_x impacts and claims that they are potentially significant if emissions from transport refrigeration units (TRUs) and an emergency generator were included in the analysis. The Commenter attempts to calculate TRU emissions however makes several flawed assumptions. Although the Commenter correctly identifies that the refrigerated portions of the Project’s warehouse buildings would generate 90 trips per day, the Commenter goes on to conflate truck trips with the actual trucks on the Project site, essentially doubling the number of trucks equipped with TRUs. For example, 90 truck trips associated with the refrigerated portion of the Project’s warehouse buildings represents 45 trucks equipped with TRUs entering, then exiting the Project site per day. In other words, 90 truck trips (two-way) equals 45 inbound trucks (one-way) and 45 outbound trucks (one-way). Additionally, the Commenter attempts to overstate the truck trips and associated NO_x emissions by utilizing survey data from SCAQMD that identifies that there may be an increase in trucking activity during peak seasons. As stated in the MND, the Project’s truck trips, and associated emissions are based on survey data conducted by the Institute of Transportation Engineers for the subject land use types and represent reasonable assumptions for good-faith disclosure (also see Response I-A to the October 4, 2021 comment letter).

It should be noted that emissions from TRUs are not a consideration in the California Emissions Estimator Model (CalEEMod), which is the model recommended for use in CEQA analysis by various air districts, including SCAQMD, in which the Project is located, therefore inclusion of TRUs likely represents a negligible amount of emissions for most land-use development projects. When attempting to include emissions from TRUs the Commenter relies on the California Air Resources Board (CARB) emissions limits set for various engine sizes. When calculating emissions from TRUs it would be more appropriate to utilize the 2017 Off-road Emissions model, version 1.0.1 (Orion), developed by the CARB. Orion does not provide emission rates per hour or mile as with the on-road emission model and only provides emission inventories. Emission results are produced in tons per day while all activity, fuel consumption and horsepower hours were reported at annual levels. The emission inventory is based on specific assumptions including the average horsepower rating of specific types of equipment and the hours of operation annually. These assumptions are not always consistent with assumptions used in the modeling of project level emissions. Therefore, the emissions inventory was converted into emission rates to accurately calculate emissions from TRU operation associated with project level details. This was accomplished by converting the annual horsepower hours to daily operational characteristics and converting the daily emission levels into hourly emission rates based on the total emission of each criteria pollutant by equipment type and the average daily hours of operation. If the Project were to include TRU emissions associated with the cold-storage use, up to 45 trucks (one-way) or 90 truck trips (two-way) would include TRUs. Using CARB’s Orion model, and the 1.5 hours of operation cited by the commenter this would result in an additional 1.10 pounds of NO_x emissions per day, when added to

the 52.7 pounds of NO_x from the Project, as disclosed in the MND, the Project would result in no more than 53.8 pounds of NO_x emissions, which is still less than the threshold of 55 pounds per day for NO_x emissions, even if TRUs were manually added to the emissions total. See Attachment B for additional details on TRU emissions calculation.

With respect to the potential of emergency diesel generators, the Commenter assumes that one would exist, which is speculative in nature. Additionally, the function of an emergency generator is such that it would only operate in emergency situations, which is outside the scope of the CEQA-level analysis. Further, the “testing” that the commenter purportedly accounts for, based on a 1 hour per day estimate, is loosely derived by the Commenter’s misreading of the applicable SCAQMD rule which typically allows for up to 50 hours of operation for testing. This does not mean that every permitted generator operates for that time period, it is simply the upper limit allowed for testing purposes. The Commenter provides no substantial evidence to support its claim of 1 hour of operation.

II-B.3: Response to comment that “The MND Employs Faulty Construction Equipment Assumptions”

The Commenter claims that the MND employs faulty construction equipment assumptions simply because changes were made to the model defaults. As noted in the MND and the Air Quality Impact Analysis (Technical Appendix A1, see Page 38), the construction duration and schedule was based on the Project’s anticipated opening year and represents a reasonable approximation of the expected construction fleet as required by CEQA guidelines. Further, the Commenter’s claim that construction equipment often operates for 10 hours per day is unfounded and not supported by substantial evidence. To the contrary, the default assumptions in CalEEMod which are based on construction survey data, concludes that the equipment on average does not operate more than 8 hours per day, which is the assumptions that were utilized in the MND.

II-C: Response to the comment that “The MND’s Noise Analysis Is Inadequate, and There is a Fair Argument that the Project May Have Significant Noise Impacts”

The Commenter asserts that the MND’s noise analysis is inadequate because it does not account for Project-related truck traffic along Heacock Street, Frederick Street, or Cactus Avenue.

Refer to Response II-A for an explanation of why it is unlikely that Project truck traffic would utilize Heacock Street and Frederick Street. Because the Project is not expected to send truck traffic to Heacock Street or Frederick Street, it was appropriate for the noise analysis to omit an analysis of these street segments. Furthermore, as also noted in Response II-A, the Project Applicant is requesting a condition of approval from the City that will require outbound truck traffic from the Project site to proceed directly to I-215 via Graham Street and Cactus Avenue. With application of this condition of approval, there will be no potential for the Project to cause or contribute excessive traffic noise to sensitive receptors adjacent to Heacock Street or Frederick Street.

Also, as noted in Response II-A, the Project would contribute low numbers of truck traffic to Cactus Avenue; Project truck traffic – and its noise – would not be discernable from existing background levels. Furthermore, there are no existing sensitive receptors along Cactus Avenue between Graham Street and I-215 that could be adversely affected by traffic noise. Accordingly, there is no potential for Project truck traffic traveling along Cactus Avenue to expose sensitive receptors to excessive traffic noise.

Responses to October 4, 2021 Comment Letter

I-A: Response to the comment that “The MND Underestimates the Project’s Operational NO_x Impacts, Which Are Potentially Significant”

The Commenter asserts that the NO_x impacts disclosed in the MND underestimate the Project’s actual effect because truck trips are undercounted. Also, the Commenter reiterates comments from the October 1, 2021 comment letter related to the use of TRUs and emergency generator operation.

The Commenter’s assertion that truck trips are undercounted in the MND analysis is based on an incorrect application of peaking factors from a 2014 white paper published by SCAQMD. The Commenter applied seasonal peaking factors to traffic from Building 2. However, the SCAQMD white paper only identifies seasonal peaking factors for buildings in excess of 200,000 square feet and that utilize a high-cube warehouse land use code for traffic analysis. Proposed Building 2 has a floor area of less than 100,000 square feet; therefore, the peaking recommendations from the SCAQMD white paper are not applicable to Building 2. Additionally, the non-refrigerated portions of Buildings 1 and 2 were modeled as a standard warehouse use (ITE Land Use Code 150) and not as a high-cube warehouse use (ITE Land Use Code 154). The peaking recommendations in the SCAQMD white paper are not intended to apply to ITE Land Use Code 150. Because ITE Land Use Code 150 is more conservative than ITE Land Use Code 154, applying a peaking factor to Land Use Code 150 results in traffic volumes that were not supported by the SCAQMD white paper. Were the SCAQMD white paper peaking factors correctly applied to the Project – which also would require the entire Project to be modeled only with high-cube land use codes – the Project’s traffic would generate 200 truck trips per day, which is less than the 224 trucks trips disclosed in the MND and less than the 286 truck trips purported by the Commenter. Because the MND provides an analysis that is more conservative than the methodology from the SCAQMD white paper, the air quality analysis in the MND does not undercount NO_x emissions and no changes to the analysis are warranted.

Land Use	Project Bldg Area (TSF)	Average Daily Trip Rate (Trips/TSF)	Peak Season Trip Rate (Trips/TSF)	Average Daily Truck Trips (MND)	Peak Season Daily Truck Trips
Building 1:					
Non-Refrigerated High-Cube Warehouse	206.665	0.223	0.297	98	61
Refrigerated High-Cube Warehouse	88.571	0.742	0.890	68	79
Building 2:					
Non-Refrigerated Warehouse	70.876	0.469	0.469	36	33
Refrigerated High-Cube Warehouse	30.376	0.742	0.890	22	27
Total Trucks				224	200

Refer to Response II.B-2 from the October 1, 2021 comment letter for responses to the Commenter’s assertion related to emissions from TRUs and emergency generators.

I-B: Response to the comment that “The MND Fails to Analyze Fully the Project’s Health Risks

The Commenter alleges that the MND fails to fully analyze the Project’s health risks. The Commenter states that the MND should include potential impacts associated with emergency diesel generators and include construction-related health risks. See Response to Comment II-B.2 from the October 1, 2021 comment letter, above, for a rebuttal of the Commenter’s claims regarding emergency diesel generators.

Attachment: SUPPLEMENTAL INFORMATION (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

October 5, 2021

Page 8 of 11

The Commenter attempts to calculate construction health risks, however it appears that the underlying assumptions of the Commenter may be flawed; there are several references to the Sacramento Metropolitan Air Quality Management District (SMAQMD) in Attachment B of the Commenter's supporting calculation – it is unclear what relevance parameters from SMAQMD have for purposes of the Project's health risk analysis because the Project is located in a completely different air district, the SCAQMD. The MND concluded that construction emissions would not exceed SCAQMD thresholds established to protect public health and air quality, and therefore the health risk associated with construction emissions for the surrounding sensitive land uses would be less than significant. However, to address the commenter's concerns regarding construction emissions, a construction health risk has been prepared utilizing the appropriate AERMOD modeling software (the same model used in the MND for the Project's operational health risk assessment), which allows for calculation of annual average concentrations and allows for the geospatial placing of the source and receptors. The results of the construction health risk assessment identify a potential cancer risk associated with construction activity of 1.31 in one million at the nearest receptor, which is substantially below the applicable significance thresholds. Lastly, it is not appropriate to "stack" and add up the construction health risks with the operational health risks because the duration of exposure varies and the point of impact can also be different due to the location of the receptors relative to the source. See Attachment C for additional details on the construction HRA calculation and modeling outputs.

Conclusion

Based on the comments and the responses provided above, there are no changes needed to the analyses contained in the IS/MND. The IS/MND is fundamentally adequate, and all of the conclusions presented in the IS/MND are supported by evidence provided within the IS/MND, its Technical Appendices, and the administrative record for the proposed Project.

Sincerely,
T&B PLANNING, INC.

** Key to Toxicological Endpoints

Note: Exposure factors used to calculate contaminant intake

RESP	Respiratory System	exposure frequency (days/year)	180
CNS/PNS	Central/Peripheral Nervous System	exposure duration (years)	9
CV/BL	Cardiovascular/Blood System	inhalation rate (L/kg-day)	572
IMMUN	Immune System	inhalation absorption factor	1
KIDN	Kidney	averaging time (years)	70
GI/LV	Gastrointestinal System/Liver	age sensitivity factor (ages 4-13)	3
REPRO	Reproductive System (e.g. teratogenic and developmental effects)		
EYES	Eye irritation and/or other effects

*** MODELOPTs: RegDEFAULT CONC ELEV URBAN ADJ_U*
*** MODEL SETUP OPTIONS SUMMARY

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**NO GAS DEPOSITION Data Provided.
**NO PARTICLE DEPOSITION Data Provided.
**Model Uses NO DRY DEPLETION. DRYDPLT = F
**Model Uses NO WET DEPLETION. WETDPLT = F

**Model Uses URBAN Dispersion Algorithm for the SBL for 577 Source(s),
for Total of 1 Urban Area(s):
Urban Population = 2189641.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.

Attachment: SUPPLEMENTAL INFORMATION (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

- 3. Use Calms Processing Routine.
- 4. Use Missing Data Processing Routine.
- 5. No Exponential Decay.
- 6. Urban Roughness Length of 1.0 Meter Assumed.

**Other Options Specified:

ADJ_U* - Use ADJ_U* option for SBL in AERMET
 CCVR_Sub - Meteorological data includes CCVR substitutions
 TEMP_Sub - Meteorological data includes TEMP substitutions

**Model Assumes No FLAGPOLE Receptor Heights.

**The User Specified a Pollutant Type of: OTHER

**Model Calculates ANNUAL Averages Only

**This Run Includes: 577 Source(s); 1 Source Group(s); and 6
 Receptor(s)

with: 0 POINT(s), including
 0 POINTCAP(s) and 0 POINTHOR(s)
 and: 577 VOLUME source(s)
 and: 0 AREA type source(s)
 and: 0 LINE source(s)
 and: 0 RLINE/RLINEXT source(s)
 and: 0 OPENPIT source(s)
 and: 0 BUOYANT LINE source(s) with 0 line(s)

**Model Set To Continue RUNNING After the Setup Testing.

**The AERMET Input Meteorological Data Version Date: 16216

**Output Options Selected:

Model Outputs Tables of ANNUAL Averages by Receptor
 Model Outputs External File(s) of High Values for Plotting (PLOTFILE
 Keyword)
 Model Outputs Separate Summary File of High Ranked Values (SUMMFILE
 Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
 m for Missing
 Hours
 b for Both Calm
 and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 442.00 ; Decay
 Coef. = 0.000 ; Rot. Angle = 0.0
 Emission Units = GRAMS/SEC ;
 Emission Rate Unit Factor = 0.10000E+07

Attachment: SUPPLEMENTAL INFORMATION (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 3.7 MB of RAM.

**Input Runstream File: aermod.inp

**Output Print File: aermod.out

**Detailed Error/Message File: 13661 HRA (REV).ERR

**File for Summary of Results: 13661 HRA (REV).SUM

TRU Emission Calculation

The TRU calculations are based on the 2017 Offroad Emissions model, version 1.0.1 (Orion), developed by the California Air Resources Board. The following parameters were used to generate the emissions database:

Region: County

Scenario: All Adopted Rules – Exhaust

Vehicle Classification: Types – All TRU Types

Orion does not provide emission rates per hour or mile as with the on-road emission model and only provides emission inventories. Emission results are produced in tons per day while all activity, fuel consumption and horsepower hours were reported at annual levels. The emission inventory is based on specific assumptions including the average horsepower rating of specific types of equipment and the hours of operation annually. These assumptions are not always consistent with assumptions used in the modeling of project level emissions. Therefore, the emissions inventory was converted into emission rates to accurately calculate emissions from TRU operation associated with project level details. This was accomplished by converting the annual horsepower hours to daily operational characteristics and converting the daily emission levels into hourly emission rates based on the total emission of each criteria pollutant by equipment type and the average daily hours of operation.

Daily Emission Rates

*** MODELOPTs: RegDEFAULT CONC ELEV URBAN ADJ_U* PAGE 1

*** MODEL SETUP OPTIONS SUMMARY

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --

**NO GAS DEPOSITION Data Provided.

**NO PARTICLE DEPOSITION Data Provided.

**Model Uses NO DRY DEPLETION. DRYDPLT = F

**Model Uses NO WET DEPLETION. WETDPLT = F

**Model Uses URBAN Dispersion Algorithm for the SBL for 2 Source(s), for Total of 1 Urban Area(s): Urban Population = 2189641.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:

- 1. Stack-tip Downwash.
- 2. Model Accounts for ELEVated Terrain Effects.
- 3. Use Calms Processing Routine.
- 4. Use Missing Data Processing Routine.
- 5. No Exponential Decay.
- 6. Urban Roughness Length of 1.0 Meter Assumed.

**Other Options Specified:

- ADJ_U* - Use ADJ_U* option for SBL in AERMET
- CCVR_Sub - Meteorological data includes CCVR substitutions
- TEMP_Sub - Meteorological data includes TEMP substitutions

**Model Assumes No FLAGPOLE Receptor Heights.

**The User Specified a Pollutant Type of: OTHER

**Model Calculates ANNUAL Averages Only

**This Run Includes: 2 Source(s); 1 Source Group(s); and 5 Receptor(s)

with: 0 POINT(s), including

Attachment: SUPPLEMENTAL INFORMATION (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

```

and:      0 POINTCAP(s) and      0 POINTHOR(s)
and:      2 VOLUME source(s)
and:      0 AREA type source(s)
and:      0 LINE source(s)
and:      0 RLINE/RLINEXT source(s)
and:      0 OPENPIT source(s)
and:      0 BUOYANT LINE source(s) with      0 line(s)

```

**Model Set To Continue RUNNING After the Setup Testing.

**The AERMET Input Meteorological Data Version Date: 16216

**Output Options Selected:

```

Model Outputs Tables of ANNUAL Averages by Receptor
Model Outputs External File(s) of High Values for Plotting (PLOTFILE

```

Keyword)

```

Model Outputs Separate Summary File of High Ranked Values (SUMMFILE

```

Keyword)

```

**NOTE: The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                m for Missing

```

Hours

b for Both Calm

and Missing Hours

```

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 442.00 ; Decay
Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ;
Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

```

**Approximate Storage Requirements of Model = 3.5 MB of RAM.

**Input Runstream File: aermod.inp

**Output Print File: aermod.out

**Detailed Error/Message File: 13661 CONS HRA.ERR

**File for Summary of Results: 13661 CONS HRA.SUM

```

Julia Descoteaux, Associate Planner
 City of Moreno Valley
 Community Development Department, Planning Division
 14177 Frederick Street
 Moreno Valley, CA 92553

RE: COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

Dear Ms. Descoteaux:

T&B Planning, Inc. (T&B Planning) is the environmental consulting firm that prepared the Initial Study/Mitigated Negative Declaration (IS/MND) for the Compass Danbe Centerpointe project. T&B Planning has prepared this letter in response to two letters sent to the City by Andrew Miller of Shute, Mihaly, and Weinberger LLP (hereinafter "Commenter") on behalf of the Moreno Valley Group Sierra Club. The responses provided below and on the following pages are numbered to correspond with the individual comments from the two comment letters.

Reponses to October 1, 2021 Comment Letter

I-A: Response to comment that "The Project is Vertically Inconsistent with the General Plan"

The Commenter states their general opinion that the Project is inconsistent with the City's General Plan based on statements in the General Plan that industrial uses and residential uses should not be located adjacent to each other. That is not the intent of the City's General Plan. Instead, all projects should be designed with existing land uses in mind. Warehouses and residential uses exist in harmony throughout the City.

Without specific examples, it is difficult to determine what land use conflicts the Commenter asserts to be present. The City's development standards and the Project's design ensure smooth transitions between the various land uses. The Project does, in fact, minimize potential health risks and the assertion that significant buffers between residential and nonresidential uses are required is significantly outdated.¹

A City's determination that a project is consistent with its general plan "carries a strong presumption of regularity. This determination can be overturned only if the [City] abused its discretion—that is, did not proceed legally, or if the determination is not supported by findings, or if the findings are not supported by substantial evidence." (*Sequoyah Hills Homeowners Assn. v. City of Oakland* (1993) 23 Cal.App.4th 704, 717). "State law does not require perfect conformity between a proposed project and the applicable general plan" because "it is nearly, if not absolutely, impossible for a project to be in perfect conformity with each and every policy set forth in the applicable plan." (*Pfeiffer v. City of Sunnyvale City Council* (2011) 200 Cal.App.4th 1552, 1563).

COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

October 5, 2021

Page 2 of 11

“A project is consistent with the general plan if, considering all its aspects, it will further the objectives and policies of the general plan and not obstruct their attainment.” (*Clover Valley Foundation v. City of Rocklin* (2011) 197 Cal.App.4th 200, 238, citing *Sequoyah Hills*, supra, 23 Cal.App.4th at 719. To be consistent, a project must simply be “compatible” with the objectives, policies, general land uses and programs specified. (*Sequoyah Hills*, supra, 23 Cal.App.4th at 717–718; *Families Unafraid to Uphold Rural etc. v. County v. Board of Supervisors* (“FUTURE”) (1998) 62 Cal.App.4th 1332, 1336).

Courts accord great deference to a City’s determination of general plan consistency, “because the body which adopted the general plan policies in its legislative capacity has unique competence to interpret those policies when applying them in its adjudicatory capacity. Because policies in a general plan reflect a range of competing interests, the governmental agency must be allowed to weigh and balance the plan’s policies when applying them, and it has broad discretion to construe its policies in light of the plan’s purposes. (*Pfeiffer*, supra, 200 Cal.App.4th 1552, 1563). The record demonstrates that the City considered all applicable land use plans, including the City’ General Plan and determined that the Project conformed to those policies.

Allowing business to develop and grow, and a resulting increase in truck traffic (or automobile traffic) in the City is not inconsistent with the General Plan. Warehouses and other non-residential uses are able to harmoniously coexist with residential uses throughout the City. Contrary to the assertion otherwise, the City did not flatly reject recommendations from the South Coast Air Quality Management District (SCAQMD). As an initial point, the Project does not result in any transportation or air quality significant impacts and mitigation is not required. In addition, the SCAQMD recently adopted a Warehouse Indirect Source Rule (ISR), Rule 2305, in May 2021, which is intended to reduce air quality effects associated with the warehouse industry throughout the South Coast Air Basin. The proposed Project would be subject to compliance with the ISR; the Project’s compliance with the ISR is not reflected in the air emissions totals presented in the IS/MND. In general, the Rule establishes the Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program, which is a points system that is based upon the actual number of trucks that come to and leave the warehouse. Each year the Project’s operator(s) will be obligated to determine how many points the warehouse is required to achieve using a formula set out in the Rule. If the required number of points is not achieved, the warehouse operator would be required to pay a fee to the SCAQMD, which would use collected funds to improve air quality in the South Coast Air Basin.

I-B: Response to comment that “The Project Would Create Horizontal Inconsistencies in the General Plan”

See Response to Comment I-B. The comment is based on the false premise that industrial and residential land uses are incompatible and that the General Plan “discourages” this type of development.

The policies listed in the General Plan do not discourage the Project or the Project being built at this site. Instead, the policies cited are intended to allow these various uses to coexist. As an example, Policy LCC.3-17 states an objective of “[s]creen[ing] and buffer[ing] nonresidential projects to protect adjacent residential property and other sensitive land uses when necessary to mitigate noise, glare and other adverse effects on adjacent uses.” As another example, Policy N.1-2 states an objective to “[g]uide the location and design of transportation facilities, industrial uses, and other potential noise generators to minimize the effects of noise on adjacent land uses.”

PLANNING • DESIGN • ENVIRONMENTAL • GRAPHICS

II-A: Response to comment that “The MND’s Transportation Analysis Is Inadequate, and There is a Fair Argument that the Project May Have Significant Transportation Impacts”

The Commenter asserts that the Project’s transportation analysis is inadequate because of various purported deficiencies with the forecasted distribution of truck trips to roadways in proximity of the Project site.

In response to the assertion that the transportation analysis is inadequate because it does not assign truck traffic trips to either Frederick Street or Heacock Street, both the City and the Project’s transportation engineer – Urban Crossroads, Inc., a professional transportation engineering firm and expert on traffic analyses in the Inland Empire – concurred that truck traffic is most likely to use Alessandro Boulevard to access the Project site from I-215 due to the lack of turns required upon exiting the freeway and that truck traffic leaving the Project site is most likely to return to I-215 from Cactus Avenue (via Graham Street) due to the ease of access to the freeway. Because left turns out of the Project site are not possible due to the raised median in Alessandro Boulevard, trucks would be required to make a loop with three right turns upon exiting the Project site to reach Frederick Street; this path of travel is considered highly unlikely because trucks avoid having to make excessive turns and vehicle miles traveled would be longer than simply returning to I-215. Similarly, trucks exiting the Project site are not considered likely to use Heacock Street to access SR-60 due to the extra turns and travel distance required. Accordingly, the truck travel routes used in the transportation analysis were devised in a good-faith effort at full disclosure based on reasoned analysis of the Project site’s location in the context of the regional transportation network and City of Moreno Valley truck routes. Notwithstanding the above, the Project Applicant is requesting a condition of approval from the City that will require outbound truck traffic from the Project site to proceed directly to I-215 via Graham Street and Cactus Avenue.

In response to the Commenter’s assertion that the Project’s transportation analysis should have assigned traffic to Cactus Avenue, as noted above, outbound Project truck traffic is expected to utilize Cactus Avenue because it is the quickest travel route from the Project site for outgoing trucks to reach the State highway system. The Project’s peak hour truck traffic volumes along Cactus Avenue would not meet the City’s standard for a quantitative transportation analysis and would not substantially cause or contribute to the need for additional improvements because they are relatively low would not be discernable from existing background traffic.

Lastly, the Commenter commits a fallacy of exclusion by asserting the Project’s transportation analysis is flawed because very few trucks utilize the travel route (i.e., south bound travel on Graham Street) that is forecasted to be used by the Project. The commenter excludes consideration of the primary consideration why Graham Street may be underutilized under existing conditions by trucks: there is no existing development on the south side of Alessandro Boulevard between Frederick Street and Graham Street, thusly, there is no need under existing conditions for trucks to return to I-215 from this location. If the Project site were to be developed, it is indisputable that truck usage of Graham Street would increase because Graham Street is the first southbound route upon exiting the Project site that connects to Cactus Avenue (and provides access to I-215).

COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

October 5, 2021

Page 4 of 11

II-B.1: Response to comment that "The MND Fails to Accurately Describe the Project's Setting in Relation to Sensitive Receptors"

The Commenter claims that the MND's air quality analysis is inadequate because it does not account for potential health risks at nine school locations in the general vicinity of the Project site and/or City-designated truck routes. Three (3) of the schools cited by the commenter are located adjacent to Frederick Street (north of Alessandro Boulevard). As explained in Response II-A, Project truck traffic is not expected to use Frederick Street because it is an inefficient path of travel from the Project site. Because Project trucks are not expected to use Frederick Street, the Project would not expose school receptors adjacent to Frederick Street to substantial adverse health effects from diesel particulate matter (DPM) emissions. Three (3) additional schools cited by the Commenter are located adjacent to Heacock Street (north of Alessandro Boulevard). As explained in Response II-A, Project truck traffic is not expected to use Heacock Street because it is an inefficient path of travel from the Project site. Because Project trucks are not expected to use Heacock Street, the Project would not expose school receptors adjacent to Heacock Street to substantial adverse health effects from diesel particulate matter (DPM) emissions. Further, it should be noted that the City's certified EIR for the Brodiaea Commerce Center (SCH No. 2017111042), which is herein incorporated by reference, found that truck travel along Heacock Street would not expose any of the schools adjacent to Heacock Street (north of Alessandro Boulevard) to substantial adverse health effects from DPM emissions. Based on the foregoing, the analysis in the MND was adequate and appropriately analyzed the Project's likely impacts. Notwithstanding, the Project Applicant is requesting a condition of approval from the City that will require outbound truck traffic from the Project site to proceed directly to I-215 via Graham Street and Cactus Avenue, and will ensure that Project trucks do not expose school receptors adjacent to Frederick Street and Heacock Street to DPM emissions.

The final three (3) schools cited by the Commenter are located adjacent to Alessandro Boulevard: SIATech Moreno Valley Independent Study High School, Pacific View Charter School, and Garvey/Allen Visual & Performing Arts Academy. For purposes of health risk assessments, a school-use sensitive receptor is a location where a school-aged child would remain for 8-hours per day throughout the course of a traditional school year. None of the schools cited by the Commenter meet this definition. SIATech Moreno Valley Independent Study High School is an online-based, independent study program where most assignments are completed from home with some in-person learning opportunities.² Pacific View Charter School is a home study program for elementary school students, a blended home study and in-person program for middle school, and a customizable (at home or blended) program for high school students.³ Garvey/Allen Visual & Performing Arts Academy offers a combination of online-based instruction and at-home independent study.⁴ Accordingly, the MND was not deficient by not evaluating potential health risks at these schools because students would not be present on-site for a substantial enough time period to even be subject to potential health risks associated from the proposed Project

Notwithstanding, a health risk assessment was performed for SIATech Moreno Valley Independent Study High School. This location was selected for analysis because it is the closest of the schools cited by the Commenter to the Project site and, therefore, would be exposed to the highest health hazard risks from trucks traveling to/from the Project site and from trucks idling on the Project site. Although only high school students have the potential to be present at SIATech Moreno Valley Independent Study High School, the health risk assessment assumed a

² <https://www.siatechschoools.org/schools/california-charter-schools/moreno-valley-charter-school/>

³ <https://pacificview.org/moreno-valley/>

⁴ <https://4.files.edl.io/d6b1/10/03/20/212848-b6bf9aad-2d8a-4caf-9592-acb3362b6bc3.pdf>

nine (9) year exposure duration as a conservative measure. Even with this conservative assumption, the maximum health risk at this location would be 0.33 in one million, which is less than the maximum risk already identified in the MND. Furthermore, any other school locations in the vicinity of the Project site or along the truck routes used by the Project, would experience a lesser concentration and consequently a lesser risk than what could occur at the SIATech Moreno Valley Independent Study High School location modeled. See Attachment A for additional details on the HRA calculation and modeling outputs.

II-B.2 Response to comment that “The MND Underestimates the Project’s Operational NO_x Impacts, Which Are Potentially Significant”

The Commenter alleges that the MND underestimates the Project’s Operational NO_x impacts and claims that they are potentially significant if emissions from transport refrigeration units (TRUs) and an emergency generator were included in the analysis. The Commenter attempts to calculate TRU emissions however makes several flawed assumptions. Although the Commenter correctly identifies that the refrigerated portions of the Project’s warehouse buildings would generate 90 trips per day, the Commenter goes on to conflate truck trips with the actual trucks on the Project site, essentially doubling the number of trucks equipped with TRUs. For example, 90 truck trips associated with the refrigerated portion of the Project’s warehouse buildings represents 45 trucks equipped with TRUs entering, then exiting the Project site per day. In other words, 90 truck trips (two-way) equals 45 inbound trucks (one-way) and 45 outbound trucks (one-way). Additionally, the Commenter attempts to overstate the truck trips and associated NO_x emissions by utilizing survey data from SCAQMD that identifies that there may be an increase in trucking activity during peak seasons. As stated in the MND, the Project’s truck trips, and associated emissions are based on survey data conducted by the Institute of Transportation Engineers for the subject land use types and represent reasonable assumptions for good-faith disclosure (also see Response I-A to the October 4, 2021 comment letter).

It should be noted that emissions from TRUs are not a consideration in the California Emissions Estimator Model (CalEEMod), which is the model recommended for use in CEQA analysis by various air districts, including SCAQMD, in which the Project is located, therefore inclusion of TRUs likely represents a negligible amount of emissions for most land-use development projects. When attempting to include emissions from TRUs the Commenter relies on the California Air Resources Board (CARB) emissions limits set for various engine sizes. When calculating emissions from TRUs it would be more appropriate to utilize the 2017 Off-road Emissions model, version 1.0.1 (Orion), developed by the CARB. Orion does not provide emission rates per hour or mile as with the on-road emission model and only provides emission inventories. Emission results are produced in tons per day while all activity, fuel consumption and horsepower hours were reported at annual levels. The emission inventory is based on specific assumptions including the average horsepower rating of specific types of equipment and the hours of operation annually. These assumptions are not always consistent with assumptions used in the modeling of project level emissions. Therefore, the emissions inventory was converted into emission rates to accurately calculate emissions from TRU operation associated with project level details. This was accomplished by converting the annual horsepower hours to daily operational characteristics and converting the daily emission levels into hourly emission rates based on the total emission of each criteria pollutant by equipment type and the average daily hours of operation. If the Project were to include TRU emissions associated with the cold-storage use, up to 45 trucks (one-way) or 90 truck trips (two-way) would include TRUs. Using CARB’s Orion model, and the 1.5 hours of operation cited by the commenter this would result in an additional 1.10 pounds of NO_x emissions per day, when added to

the 52.7 pounds of NO_x from the Project, as disclosed in the MND, the Project would result in no more than 53.8 pounds of NO_x emissions, which is still less than the threshold of 55 pounds per day for NO_x emissions, even if TRUs were manually added to the emissions total. See Attachment B for additional details on TRU emissions calculation.

With respect to the potential of emergency diesel generators, the Commenter assumes that one would exist, which is speculative in nature. Additionally, the function of an emergency generator is such that it would only operate in emergency situations, which is outside the scope of the CEQA-level analysis. Further, the “testing” that the commenter purportedly accounts for, based on a 1 hour per day estimate, is loosely derived by the Commenter’s misreading of the applicable SCAQMD rule which typically allows for up to 50 hours of operation for testing. This does not mean that every permitted generator operates for that time period, it is simply the upper limit allowed for testing purposes. The Commenter provides no substantial evidence to support its claim of 1 hour of operation.

II-B.3: Response to comment that “The MND Employs Faulty Construction Equipment Assumptions”

The Commenter claims that the MND employs faulty construction equipment assumptions simply because changes were made to the model defaults. As noted in the MND and the Air Quality Impact Analysis (Technical Appendix A1, see Page 38), the construction duration and schedule was based on the Project’s anticipated opening year and represents a reasonable approximation of the expected construction fleet as required by CEQA guidelines. Further, the Commenter’s claim that construction equipment often operates for 10 hours per day is unfounded and not supported by substantial evidence. To the contrary, the default assumptions in CalEEMod which are based on construction survey data, concludes that the equipment on average does not operate more than 8 hours per day, which is the assumptions that were utilized in the MND.

II-C: Response to the comment that “The MND’s Noise Analysis Is Inadequate, and There is a Fair Argument that the Project May Have Significant Noise Impacts”

The Commenter asserts that the MND’s noise analysis is inadequate because it does not account for Project-related truck traffic along Heacock Street, Frederick Street, or Cactus Avenue.

Refer to Response II-A for an explanation of why it is unlikely that Project truck traffic would utilize Heacock Street and Frederick Street. Because the Project is not expected to send truck traffic to Heacock Street or Frederick Street, it was appropriate for the noise analysis to omit an analysis of these street segments. Furthermore, as also noted in Response II-A, the Project Applicant is requesting a condition of approval from the City that will require outbound truck traffic from the Project site to proceed directly to I-215 via Graham Street and Cactus Avenue. With application of this condition of approval, there will be no potential for the Project to cause or contribute excessive traffic noise to sensitive receptors adjacent to Heacock Street or Frederick Street.

Also, as noted in Response II-A, the Project would contribute low numbers of truck traffic to Cactus Avenue; Project truck traffic – and its noise – would not be discernable from existing background levels. Furthermore, there are no existing sensitive receptors along Cactus Avenue between Graham Street and I-215 that could be adversely affected by traffic noise. Accordingly, there is no potential for Project truck traffic traveling along Cactus Avenue to expose sensitive receptors to excessive traffic noise.

Responses to October 4, 2021 Comment Letter

I-A: Response to the comment that “The MND Underestimates the Project’s Operational NO_x Impacts, Which Are Potentially Significant”

The Commenter asserts that the NO_x impacts disclosed in the MND underestimate the Project’s actual effect because truck trips are undercounted. Also, the Commenter reiterates comments from the October 1, 2021 comment letter related to the use of TRUs and emergency generator operation.

The Commenter’s assertion that truck trips are undercounted in the MND analysis is based on an incorrect application of peaking factors from a 2014 white paper published by SCAQMD. The Commenter applied seasonal peaking factors to traffic from Building 2. However, the SCAQMD white paper only identifies seasonal peaking factors for buildings in excess of 200,000 square feet and that utilize a high-cube warehouse land use code for traffic analysis. Proposed Building 2 has a floor area of less than 100,000 square feet; therefore, the peaking recommendations from the SCAQMD white paper are not applicable to Building 2. Additionally, the non-refrigerated portions of Buildings 1 and 2 were modeled as a standard warehouse use (ITE Land Use Code 150) and not as a high-cube warehouse use (ITE Land Use Code 154). The peaking recommendations in the SCAQMD white paper are not intended to apply to ITE Land Use Code 150. Because ITE Land Use Code 150 is more conservative than ITE Land Use Code 154, applying a peaking factor to Land Use Code 150 results in traffic volumes that were not supported by the SCAQMD white paper. Were the SCAQMD white paper peaking factors correctly applied to the Project – which also would require the entire Project to be modeled only with high-cube land use codes – the Project’s traffic would generate 200 truck trips per day, which is less than the 224 trucks trips disclosed in the MND and less than the 286 truck trips purported by the Commenter. Because the MND provides an analysis that is more conservative than the methodology from the SCAQMD white paper, the air quality analysis in the MND does not undercount NO_x emissions and no changes to the analysis are warranted.

Land Use	Project Bldg Area (TSF)	Average Daily Trip Rate (Trips/TSF)	Peak Season Trip Rate (Trips/TSF)	Average Daily Truck Trips (MND)	Peak Season Daily Truck Trips
Building 1:					
Non-Refrigerated High-Cube Warehouse	206.665	0.223	0.297	98	61
Refrigerated High-Cube Warehouse	88.571	0.742	0.890	68	79
Building 2:					
Non-Refrigerated Warehouse	70.876	0.469	0.469	36	33
Refrigerated High-Cube Warehouse	30.376	0.742	0.890	22	27
Total Trucks				224	200

Refer to Response II.B-2 from the October 1, 2021 comment letter for responses to the Commenter’s assertion related to emissions from TRUs and emergency generators.

I-B: Response to the comment that “The MND Fails to Analyze Fully the Project’s Health Risks

The Commenter alleges that the MND fails to fully analyze the Project’s health risks. The Commenter states that the MND should include potential impacts associated with emergency diesel generators and include construction-related health risks. See Response to Comment II-B.2 from the October 1, 2021 comment letter, above, for a rebuttal of the Commenter’s claims regarding emergency diesel generators.

COMPASS DANBE CENTERPOINTE - RESPONSE TO SIERRA CLUB COMMENT LETTERS

October 5, 2021

Page 8 of 11

The Commenter attempts to calculate construction health risks, however it appears that the underlying assumptions of the Commenter may be flawed; there are several references to the Sacramento Metropolitan Air Quality Management District (SMAQMD) in Attachment B of the Commenter's supporting calculation – it is unclear what relevance parameters from SMAQMD have for purposes of the Project's health risk analysis because the Project is located in a completely different air district, the SCAQMD. The MND concluded that construction emissions would not exceed SCAQMD thresholds established to protect public health and air quality, and therefore the health risk associated with construction emissions for the surrounding sensitive land uses would be less than significant. However, to address the commenter's concerns regarding construction emissions, a construction health risk has been prepared utilizing the appropriate AERMOD modeling software (the same model used in the MND for the Project's operational health risk assessment), which allows for calculation of annual average concentrations and allows for the geospatial placing of the source and receptors. The results of the construction health risk assessment identify a potential cancer risk associated with construction activity of 1.31 in one million at the nearest receptor, which is substantially below the applicable significance thresholds. Lastly, it is not appropriate to "stack" and add up the construction health risks with the operational health risks because the duration of exposure varies and the point of impact can also be different due to the location of the receptors relative to the source. See Attachment C for additional details on the construction HRA calculation and modeling outputs.

Conclusion

Based on the comments and the responses provided above, there are no changes needed to the analyses contained in the IS/MND. The IS/MND is fundamentally adequate, and all of the conclusions presented in the IS/MND are supported by evidence provided within the IS/MND, its Technical Appendices, and the administrative record for the proposed Project.

Sincerely,
T&B PLANNING, INC.

David Ornelas

*** MODELOPTs: RegDEFAULT CONC ELEV URBAN ADJ_U*

*** MODEL SETUP OPTIONS SUMMARY

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --

**NO GAS DEPOSITION Data Provided.
**NO PARTICLE DEPOSITION Data Provided.
**Model Uses NO DRY DEPLETION. DRYDPLT = F
**Model Uses NO WET DEPLETION. WETDPLT = F

**Model Uses URBAN Dispersion Algorithm for the SBL for 577 Source(s),
for Total of 1 Urban Area(s):
Urban Population = 2189641.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.

Attachment: SUPPLEMENTAL INFORMATION (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

- 3. Use Calms Processing Routine.
- 4. Use Missing Data Processing Routine.
- 5. No Exponential Decay.
- 6. Urban Roughness Length of 1.0 Meter Assumed.

**Other Options Specified:

ADJ_U* - Use ADJ_U* option for SBL in AERMET
 CCVR_Sub - Meteorological data includes CCVR substitutions
 TEMP_Sub - Meteorological data includes TEMP substitutions

**Model Assumes No FLAGPOLE Receptor Heights.

**The User Specified a Pollutant Type of: OTHER

**Model Calculates ANNUAL Averages Only

**This Run Includes: 577 Source(s); 1 Source Group(s); and 6
 Receptor(s)

with: 0 POINT(s), including
 0 POINTCAP(s) and 0 POINTHOR(s)
 and: 577 VOLUME source(s)
 and: 0 AREA type source(s)
 and: 0 LINE source(s)
 and: 0 RLINE/RLINEXT source(s)
 and: 0 OPENPIT source(s)
 and: 0 BUOYANT LINE source(s) with 0 line(s)

**Model Set To Continue RUNNING After the Setup Testing.

**The AERMET Input Meteorological Data Version Date: 16216

**Output Options Selected:

Model Outputs Tables of ANNUAL Averages by Receptor
 Model Outputs External File(s) of High Values for Plotting (PLOTFILE
 Keyword)
 Model Outputs Separate Summary File of High Ranked Values (SUMMFILE
 Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
 m for Missing
 Hours
 b for Both Calm
 and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 442.00 ; Decay
 Coef. = 0.000 ; Rot. Angle = 0.0
 Emission Units = GRAMS/SEC ;
 Emission Rate Unit Factor = 0.10000E+07

Attachment: SUPPLEMENTAL INFORMATION (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 3.7 MB of RAM.

**Input Runstream File: aermod.inp

**Output Print File: aermod.out

**Detailed Error/Message File: 13661 HRA (REV).ERR

**File for Summary of Results: 13661 HRA (REV).SUM

TRU Emission Calculation

The TRU calculations are based on the 2017 Offroad Emissions model, version 1.0.1 (Orion), developed by the California Air Resources Board. The following parameters were used to generate the emissions database:

Region: County

Scenario: All Adopted Rules – Exhaust

Vehicle Classification: Types – All TRU Types

Orion does not provide emission rates per hour or mile as with the on-road emission model and only provides emission inventories. Emission results are produced in tons per day while all activity, fuel consumption and horsepower hours were reported at annual levels. The emission inventory is based on specific assumptions including the average horsepower rating of specific types of equipment and the hours of operation annually. These assumptions are not always consistent with assumptions used in the modeling of project level emissions. Therefore, the emissions inventory was converted into emission rates to accurately calculate emissions from TRU operation associated with project level details. This was accomplished by converting the annual horsepower hours to daily operational characteristics and converting the daily emission levels into hourly emission rates based on the total emission of each criteria pollutant by equipment type and the average daily hours of operation.

Daily Emission Rates

Year	Type	ROG	CO	NOX	CO2	PM10	PM2.5	SOX

*** MODEL SETUP OPTIONS SUMMARY

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --

**NO GAS DEPOSITION Data Provided.
**NO PARTICLE DEPOSITION Data Provided.
**Model Uses NO DRY DEPLETION. DRYDPLT = F
**Model Uses NO WET DEPLETION. WETDPLT = F

**Model Uses URBAN Dispersion Algorithm for the SBL for 2 Source(s),
for Total of 1 Urban Area(s):
Urban Population = 2189641.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. No Exponential Decay.
6. Urban Roughness Length of 1.0 Meter Assumed.

**Other Options Specified:
ADJ_U* - Use ADJ_U* option for SBL in AERMET
CCVR_Sub - Meteorological data includes CCVR substitutions
TEMP_Sub - Meteorological data includes TEMP substitutions

**Model Assumes No FLAGPOLE Receptor Heights.

**The User Specified a Pollutant Type of: OTHER

**Model Calculates ANNUAL Averages Only

**This Run Includes: 2 Source(s); 1 Source Group(s); and 5 Receptor(s)

with: 0 POINT(s), including

Attachment: SUPPLEMENTAL INFORMATION (5554 : PEN20-0118-0119, PEN20-0122 and PEN 20-0124 Compass Danbe)

```

and:      0 POINTCAP(s) and      0 POINTHOR(s)

and:      0 OPENPIT source(s)
and:      0 BUOYANT LINE source(s) with      0 line(s)

```

**Model Set To Continue RUNNING After the Setup Testing.

**The AERMET Input Meteorological Data Version Date: 16216

**Output Options Selected:

```

Model Outputs Tables of ANNUAL Averages by Receptor
Model Outputs External File(s) of High Values for Plotting (PLOTFILE

```

Keyword)

```

Model Outputs Separate Summary File of High Ranked Values (SUMMFILE

```

Keyword)

```

**NOTE: The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                m for Missing

```

Hours

b for Both Calm

and Missing Hours

```

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 442.00 ; Decay
Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ;
Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

```

**Approximate Storage Requirements of Model = 3.5 MB of RAM.

October 5, 2021

Julia Descoteaux, Associate Planner
 City of Moreno Valley
 Community Development Department, Planning Division
 14177 Frederick Street
 Moreno Valley, CA 92553

RE: COMPASS DANBE CENTERPOINTE - RESPONSE TO OSCAR ALVAREZ COMMENT LETTER

Dear Ms. Descoteaux:

T&B Planning, Inc. (T&B Planning) is the environmental consulting firm that prepared the Initial Study/Mitigated Negative Declaration (IS/MND) for the Compass Danbe Centerpointe project. T&B Planning has prepared this letter in response to a letter sent to the City on October 4, 2021 by Oscar Alvarez (hereinafter "Commenter"). The responses provided below and on the following pages are numbered to correspond with the individual comments from the comment letter

I: Response to comment that "The Compass Danbe Centerpointe fails to mitigate GHG and other gases emissions, worsening the already fragile local, regional, national and world-wide environment we live in. The should not be approved."

The Commenter provides general information related to global climate change and asserts that the Project will worsen the environment because it does not provide GHG mitigation measures. The IS/MND and the Project's Greenhouse Gas Analysis (Technical Appendix F) demonstrate that the Project is calculated to generate 6,649.16 metric tons of carbon dioxide equivalent per year (MTCO₂e/yr), which is below the level (10,000 MTCO₂e/yr) at which the SCAQMD determined an industrial project could substantially contribute to global climate change. The MND's conclusion that the Project would result in less than significant impacts related greenhouse gas emissions and that mitigation was not required was appropriate.

II. Response to comment that "The Compass Danbe Centerpointe fails to mitigate GHG and other gases emissions, making even worse the air quality in Riverside County, one of the highest polluted counties in the US. The project should not be approved."

III. Response to comment that "The Compass Danbe Centerpointe fails to mitigate GHG and other gases emissions, making even worse the current air contaminants that Moreno Valley is experiencing, and that contribute to residents' heart attacks and strokes. Project should not be approved."

The Commenter provides general information related to air quality conditions in Riverside County. The commenter also provides general information related to adverse health conditions associated with air pollutants. Potential health effects from exposure to air pollution resulting from the development proposed by the Project was disclosed

COMPASS DANBE CENTERPOINTE - RESPONSE TO OSCAR ALVAREZ COMMENT LETTER

October 5, 2021

Page 2 of 3

in the IS/MND, the Project's Air Quality Impact Analysis (Technical Appendix A1) and the Project's Mobile Source Health Risk Assessment (Technical Appendix A1). The Air Quality Impact Analysis and Mobile Source Health Risk Assessment were prepared by Urban Crossroads, Inc., a professional consulting firm and recognized expert in air quality pollutant emissions analysis. The IS/MND and Air Quality Impact Analysis demonstrate that the Project would not exceed the regional or localized significance thresholds established by the South Coast Air Quality Management District (SCAQMD) for any criteria air pollutant after mitigation. By not exceeding the regional or significance thresholds, the Project would not hinder the SCAQMD's ability to meet the National Ambient Air Quality Standards (NAAQS) or the California Ambient Air Quality Standards (CAAQS), which were developed to protect human health. Also, the IS/MND and Mobile Source Health Risk Assessment demonstrate that the Project would not expose sensitive receptors near the Project site and the Project's truck travel route to carcinogenic and non-carcinogenic (chronic) health hazard risks that exceed the SCAQMD's significance thresholds.

IV. Response to comment that "The Compass Danbe Centerpointe project fails to mitigate GHG and other gases emissions, making even worse the current air contaminants that Moreno Valley is already experiencing, and does not pursue mitigating measures as recommended by the Warehouse Indirect Source Rule (PR 2305), which include: acquiring zero-emissions or near-zero-emissions trucks, installing charging infrastructure, solar panels, and/or filter systems in schools, hospitals, community centers, and other locations. Project should not be approved."

The Commenter makes general statements regarding health effects associated with air pollution. The Commenter also provides a general summary of the SCAQMD Indirect Source Rule (ISR). Responses II and III, above, address the Commenter's comments related to health effects from air pollutant emissions.

The Commenter's assertion that the Project does not pursue measures recommended by the ISR is incorrect. As a matter of local regulation – not mitigation – the Project would be subject to compliance with the ISR which is intended to reduce air quality effects associated with the warehouse industry throughout the South Coast Air Basin. In general, the ISR establishes the Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program, which is a points system that is based upon the actual number of trucks that come to and leave the warehouse. Each year the operator of the Project will be obligated to determine how many points the warehouse is required to achieve using a formula set out in the Rule. If the required number of points is not achieved, the warehouse operator would be required to pay a fee to the SCAQMD, which would use collected funds to improve air quality in the South Coast Air Basin.

V. Response to the comment that "By reference, I support and fully concur with the comments provided by Shute, Mihaly and Weinberger LLP on this matter."

Without evidence, the Commenter makes general statements that an Environmental Impact Report (EIR) should be prepared for the Project. The Commenter also cites comments sent separately to the City by Shute, Mihaly and Weinberger LLP on behalf of the Sierra Club. Responses to the comment letter by Shute, Mihaly and Weinberger LLP were provided to the City under separate cover and are incorporated by reference herein. The responses to the Shute, Mihaly, and Weinberger LLP comment letter demonstrate that the IS/MND's conclusion that the Project would not result in a significant environmental effect (with incorporation of the mitigation measures listed in the IS/MND) is correct and based on substantial evidence. An EIR is not required for the Project.

COMPASS DANBE CENTERPOINTE - RESPONSE TO OSCAR ALVAREZ COMMENT LETTER

October 5, 2021

Page 3 of 3

VI. Response to comment that “These are some of the areas that the City of Moreno Valley needs to emphasize and build upon, as we fight the existential threat of Climate Change, and these tall commitments need to be taken into consideration as plans are laid out for the future of the City of Moreno Valley. Doing otherwise is not fulfilling your leadership role to protect and provide the Moreno Valley residents with a healthy, safe and clean-living environment for the present, and future generations.”

The Commenter lists goals to reduce GHG emissions, conserve energy, and support alternative forms of transportation. The Commenter does provide any comments specific to the Project or its environmental analysis. No further response is necessary.

Conclusion

Based on the comments and the responses provided above, there are no changes needed to the analyses contained in the IS/MND. The IS/MND is fundamentally adequate, and all of the conclusions presented in the IS/MND are supported by evidence provided within the IS/MND, its Technical Appendices, and the administrative record for the proposed Project.

Sincerely,
T&B PLANNING, INC.

David Ornelas
Senior Project Manager

Report to City Council

TO: Mayor and City Council

FROM: Manuel A. Mancha, Community Development Director
Chris Ormsby, Senior Planner

AGENDA DATE: October 19, 2021

TITLE: APPROVAL OF RESOLUTION AMENDING APPLICABLE
TRANSPORTATION UNIFORM MITIGATION FEES

RECOMMENDED ACTION

Recommendations: That the City Council:

1. **APPROVE** Resolution No. 2021-XX **APPROVING** the Transportation Uniform Mitigation Fee (TUMF) 2021 Construction Cost Index (CCI) increase of three percent.

SUMMARY

This report recommends that the Council convene a Public Hearing and consider the staff recommendation to approve a Resolution implementing the 2021 Construction Cost Index adjustment which was approved by the Western Riverside Council of Governments (WRCOG) Executive Committee on July 12, 2021. If approved, the fee increase of three percent will apply to all TUMF land-use types effective January 1, 2022.

BACKGROUND

The City is a Member Jurisdiction of the Western Riverside Council of Governments ("WRCOG"), a joint powers agency comprised of the County of Riverside and eighteen (18) cities located in Western Riverside County. In 2002-2003, WRCOG member jurisdictions developed a plan whereby the shortfall in funds needed to enlarge the capacity of the Regional System of Highways and Arterials due to new development in Western Riverside County could be made up in part by a Transportation Uniform Mitigation Fee ("TUMF") on future residential, commercial, and industrial development. As a member jurisdiction of WRCOG and as a TUMF participating jurisdiction, the City / County participated in the preparation of a certain "Western Riverside County Transportation Uniform Fee Nexus Study," ("2002 Nexus Study") later

adopted by the WRCOG Executive Committee. Based on the 2002 Nexus Study, the City / County adopted and implemented an ordinance authorizing the City's participation in a TUMF Program.

Pursuant to the Mitigation Fee Act (Gov. Code §§ 66000 *et seq.*), WRCOG prepared a Nexus Study ("2016 Nexus Study") to update the fees. On July 10, 2017, the WRCOG Executive Committee reviewed the 2016 Nexus Study and recommended TUMF participating jurisdictions update their fees by amending their applicable TUMF Ordinances to reflect changes in the TUMF Network and the cost of construction.

On July 12, 2021, the WRCOG Executive Committee approved a 2021 Construction Cost Index adjustment for all TUMF land-use types in the amount of three percent of the current fee.

DISCUSSION

The City's Municipal Code Section 3.44.040 (A), as most recently updated by Ordinance 950, provides the legal basis for a revised TUMF fee schedule. The actual TUMF schedule is established through Resolution. As provided for in Section 3.44.040 (C) of the Municipal Code, adjustments may be made to the TUMF fee schedule to increase or decrease fees to reflect the changes in actual and estimated costs of the Regional System. The adjustment of the fees may also reflect changes in the facilities required to be constructed, in estimated revenues received as well as the availability or lack thereof of other funds with which to construct the Regional System.

The current TUMF fee schedule was established through Resolution 2020-05 adopted on March 3, 2020. The fee schedule is as follows:

- (1) \$9,810.00 per single family residential unit
- (2) \$6,389.00 per multi-family residential unit
- (3) \$1.81 per square foot of an industrial project
- (4) \$7.50 per square foot of a retail commercial project
- (5) \$4.75 per square foot of a service commercial project
- (6) \$2.38 per square foot of a service Class A and B Office

This Resolution establishes the following Fee Schedule for TUMF representing a three percent increase to implement a Construction Cost Index adjustment across all categories as follows:

From January 1, 2022, the fee schedule shall be as follows:

- (1) \$10,104.00 per single family residential unit
- (2) \$6,580.00 per multi-family residential unit
- (3) \$1.86 per square foot of an industrial project
- (4) \$7.72 per square foot of a retail commercial project
- (5) \$4.89 per square foot of a service commercial project
- (6) \$2.45 per square foot of a service Class A and B Office

On September 28, 2021, the request was noticed before the Finance Subcommittee for the proposed changes to the TUMF Fee Schedule.

To remain in good standing with the TUMF program, staff recommends approving the attached resolution to implement WRCOG's Executive Committee changes to the TUMF Fee Schedule.

ALTERNATIVES

1. Approve and authorize the recommended actions as presented in this staff report. Staff recommends this alternative as it is consistent with the City's approved agreements pertaining to TUMF and will amend the applicable TUMF fee schedule per the 2016 TUMF Nexus Study.
2. Do not approve the proposed Resolution. Staff does not recommend this alternative as it would be inconsistent with agreements pertaining to the TUMF program and would create a potential financial liability for the City.

FISCAL IMPACT

Continuing to participation in the TUMF program will provide needed resources to enlarge the capacity of the Regional System of Highways and Arterials in the region. There is no impact on the General Fund.

NOTIFICATION

Notice is provided via publication of the agenda. The public hearing was published in the Press-Enterprise on Tuesday, October 5th.

RESOLUTION NO. 2021-_____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AMENDING THE APPLICABLE TRANSPORTATION UNIFORM MITIGATION FEE (TUMF) APPLICABLE TO ALL DEVELOPMENTS IN THE CITY OF MORENO VALLEY

WHEREAS, the City of Moreno Valley (“City”) is a member agency of the Western Riverside Council of Governments (“WRCOG”), a joint powers agency comprised of the County of Riverside and eighteen cities located in Western Riverside County; and

WHEREAS, the member agencies of WRCOG recognized that there was insufficient funding to address the impacts of new development on the regional system of highways and arterials in Western Riverside County (the “Regional System”); and

WHEREAS, in order to address this shortfall, the member agencies formulated a plan whereby a transportation mitigation fee would be assessed on new development and would be used to fund the necessary improvements for the Regional System; and

WHEREAS, WRCOG, with the assistance of TUMF Program participating jurisdictions, has prepared an updated Nexus Study entitled “Transportation Uniform Mitigation Fee Nexus Study: 2016 Update” (“2016 Nexus Study”) pursuant to California Government Code sections 66000 et seq. (the Mitigation Fee Act), for the purpose of updating the fees. On July 10, 2017, the WRCOG Executive Committee reviewed the 2016 Nexus Study and TUMF Program and recommended TUMF participating jurisdictions amend their applicable TUMF ordinances to reflect changes in the TUMF network and the cost of construction in order to update the TUMF Program; and

WHEREAS, consistent with its previous findings made in the adoption of Ordinance No. 925, the City Council has been informed and advised, and hereby finds, that if the capacity of the Regional System is not enlarged and unless development contributes to the cost of improving the Regional System, the result will be substantial traffic congestion in all parts of Western Riverside County, with unacceptable Levels of Service. Furthermore, the failure to mitigate growing traffic impacts on the Regional System will substantially impair the ability of public safety services (police and fire) to respond and, thus, adversely affect the public health, safety and welfare. Therefore, continuation of a TUMF Program is essential; and

WHEREAS, the City Council finds and determines that there is a reasonable and rational relationship between the use of the TUMF and the type of development projects on which the fees are imposed because the fees will be used to construct the transportation improvements that are necessary for the safety, health, and welfare of the residential and non-residential users of the development in which the TUMF will be levied; and

WHEREAS, the City Council finds and determines that there is a reasonable and rational relationship between the need for the improvements to the Regional System and the type of development projects on which the TUMF is imposed because it will be necessary for the residential and non-residential users of such projects to have access to the Regional system. Such development will benefit from the Regional System improvements and the burden of such developments will be mitigated in part by payment of the TUMF; and

WHEREAS, the City Council finds and determines that the cost estimates set forth in the new 2016 Nexus Study are reasonable cost estimates for constructing the Regional System improvements and the facilities that compromise the Regional System, and that the amount of the TUMF expected to be generated by new development will not exceed the total fair share cost to such development; and

WHEREAS, the fees collected pursuant to the TUMF Ordinance shall be used to help pay for the design, planning, construction of and real property acquisition for the Regional System improvements and its facilities as identified in the 2016 Nexus Study. The need for the improvements and facilities is related to new development because such development results in additional traffic and creates the demand for the improvements;

WHEREAS, by notice duly given and published, the City Council set the time and place for a public hearing on the 2016 Nexus Study and the fees proposed thereunder and at least ten (10) days prior to this hearing, the City Council made the 2016 Nexus Study available to the public; and

WHEREAS, at the time and place set for the hearing, the City Council duly considered data and information provided by the public relative to the cost of the improvements and facilities for which the fees are proposed and all other comments, whether written or oral, submitted prior to the conclusion of the hearing; and

WHEREAS, SECTION 3.44.040(C) of the Municipal Code authorizes periodic review and adjustment to the applicable TUMF in accordance with any adjustments made by the WRCOG Executive Committee; and

WHEREAS, the fees collected pursuant to this Resolution shall be used to finance the public facilities described or identified in the Nexus Study; and

WHEREAS, on July 12, 2021, the WRCOG Executive Committee approved a 2021 Construction Cost Index adjustment of three percent for all TUMF land use types; and

WHEREAS, the levying of TUMF has been reviewed by the City Council and staff in accordance with the California Environmental Quality Act ("CEQA") and the CEQA Guidelines and it has been determined that the adoption of this ordinance is exempt from CEQA pursuant to Section 15061(b)(3) of the CEQA Guidelines.

NOW, THEREFORE, the City Council of City of Moreno Valley does resolve as follows:

SECTION 1. Findings. The recitals set forth above are hereby adopted as findings in support of this Resolution. In addition, the City Council re-adopts the findings contained in Section 3.44.020 in support of the adjusted TUMF contained herein.

SECTION 2. TUMF Schedule. In accordance with Section 3.44.040(C) of the Moreno Valley Municipal Code, there is hereby adopted the following fee schedule for the TUMF which replaces the fee schedule set forth in Section 2 of Resolution No. 2020-05 in its entirety as of January 1, 2022:

- (1) \$10,104.00 per single family residential unit
- (2) \$6,580.00 per multi-family residential unit
- (3) \$1.86 per square foot of an industrial project

- (4) \$7.72 per square foot of a retail commercial project
- (5) \$4.89 per square foot of a service commercial project
- (6) \$2.45 per square foot of a service Class A and B Office

SECTION 3. CEQA Findings. The City Council hereby finds that in accordance with the California Environmental Quality Act ("CEQA") and the CEQA Guidelines the adoption of this Resolution is exempt from CEQA pursuant to Section 15061(b)(3).

SECTION 4. Effective Date. This Resolution shall become effective on January 1, 2022.

(Council Members, Mayor Pro Tem and Mayor)

PAT JACQUEZ-NARES, CITY CLERK

Report to City Council

TO: Mayor and City Council

FROM: Brian Mohan, Assistant City Manager

AGENDA DATE: October 19, 2021

TITLE: AUTHORIZATION TO REFINANCE COMMUNITY FACILITIES DISTRICT NO. 5 SPECIAL TAX REFUNDING BONDS

RECOMMENDED ACTION

Recommendation: That the City Council:

Adopt Resolution No. 2021-____, a Resolution of the City Council of the City of Moreno Valley, Acting as the Legislative Body of Community Facilities District No. 5 of the City of Moreno Valley, Approving the Issuance of its Special Tax Refunding Bonds, Series 2021 in a Principal Amount Not To Exceed Six Million Dollars (\$6,000,000) and Delivery of Related Documents.

SUMMARY

This report recommends adopting a resolution (Attachment 1) authorizing the issuance of up to \$6,000,000 in refunding bonds for Community Facilities District (CFD) No. 5 (the "District") and other related actions. With approval of this item, the City can take advantage of favorable interest rates, saving the property owners in the District an estimated \$57,000/year (or \$872,000 in total gross savings) in special taxes. **This action affects only the property owners included in the District, not the general citizens or taxpayers of the City.**

The Finance Subcommittee was scheduled to review this item at its September 28, 2021 meeting.

DISCUSSION

On October 25, 2005, the City Council formed CFD No. 5 at the request of the property owners developing the Stoneridge Center. The Stoneridge Center is located at the northeast corner of Nason St. and Eucalyptus Ave. With the formation of the District, the

City issued tax exempt bonds on May 31, 2007 (the "Prior Bonds") to finance the acquisition of certain public improvements (i.e. construction of certain streets and traffic signals and payment of EMWD's Connection Capacity Fees), which were required to develop the property.

The bonds are secured by a special tax lien recorded against those properties within the District. Those property owners pay a special tax as part of their annual property tax bill to fund the debt service payments on the Prior Bonds. The Prior Bonds are scheduled to mature on September 1, 2037 and can be optionally redeemed as early as March 1, 2022.

Tax exempt interest rates continue to be near historically low levels. Given the current market conditions and favorable interest rates, refinancing the Prior Bonds is advisable to achieve debt service savings for the property owners in the District. **Based on current estimates, the proposed refunding bonds (the "2021 Bonds") are projected to save an average of \$57,000/year or a total of approximately \$872,000.** The maturity date for the 2021 Bonds will be September 1, 2037, the same maturity date as the Prior Bonds. **The net present value savings are estimated at 13.11% as a percentage of the refunded principal amount, exceeding the industry's minimum refunding threshold of 3%-5%.**

Because interest rates will fluctuate up until the day the bonds are sold, a not-to-exceed amount for the 2021 Bonds is recommended at \$6,000,000 with a not-to-exceed interest rate of 5.00% per annum. Setting not-to-exceed amounts will provide the Financing Team, as defined below, flexibility to structure the 2021 Bonds appropriately for the market, achieving the best terms for the property owners in the District. The underwriter's discount is proposed to not-to-exceed 1.50% of the aggregate principal amount of the 2021 Bonds to accommodate any changes in investor structuring preferences and/or bond market conditions.

The 2021 Bonds are special obligations of the District and are payable solely from revenues derived from certain annual special taxes levied against taxable property within District. Additional bonds secured on a parity with the 2021 Bonds may be issued for refunding purposes only upon satisfaction of certain conditions set forth in the Bond Indenture. The 2021 Bonds are expected to price early November with an early December closing. After which, the Prior Bonds will be called from the current bondholders and redeemed on March 1, 2022.

Adoption of the Resolution will approve the financing documents, in substantial form as attached hereto (Attachments 2-6). A brief description of the documents is noted below. A boundary map of the District is included as Attachment 7.

Document	Prepared by	Description
Bond Indenture	Bond Counsel Stradling Yocca Carlson & Rauth	A contract between the District and Trustee (Wilmington Trust, National Association) that pledges the net special taxes for payment of the debt service, sets up required accounts, and outlines other terms and provisions relating to the 2021 Bonds.

Bond Purchase Agreement	Underwriter's Counsel Kutak Rock	An agreement between the District and the Underwriter (Stifel Nicolaus & Company) that specifies the terms whereby the City agrees to sell the bonds to the Underwriter and the Underwriter agrees to buy the bonds from the City and resell them to the public.
Continuing Disclosure Agreement	Disclosure Counsel Nixon Peabody	An Agreement (attached as an Appendix to the Preliminary Official Statement) whereby the City commits to provide annual reports and notices of certain events.
Escrow Agreement	Bond Counsel Stradling Yocca Carlson & Rauth	An agreement between the District and the Escrow Agent (Wells Fargo Bank, National Association,) that provides the terms and provisions relating to the refunding and redemption of the Prior Bonds.
Preliminary Official Statement	Disclosure Counsel Nixon Peabody	An offering statement used to inform the marketplace of the terms of the 2021 Bonds and contains all relevant information for the investors to decide whether to purchase the 2021 Bonds.

The Financing Team was selected after a formal Request for Proposal (RFP) process completed in late 2020. Willdan Financial Services was selected as part of a formal RFP process completed in mid-2021.

FINANCING TEAM	
Stradling, Yocca, Carlson & Rauth	Bond Counsel
Stifel, Nicolaus & Co., Inc.	Underwriter
Nixon Peabody	Disclosure Counsel
Wilmington Trust	Fiscal Agent/Trustee
Fieldman Rolapp & Associates	Financial Advisor
Willdan Financial Services	Special Tax Consultant

ALTERNATIVES

1. Adopt the resolution authorizing the issuance of the 2021 Bonds and related actions. *Staff recommends this alternative because it will decrease the special taxes for property owners in the District.*
2. Do not adopt the resolution. *Staff does not recommend this since it will not reduce expenses for the property owners.*
3. Do not adopt the resolution but continue the item. *Staff does not recommend this alternative as it may delay issuance of bonds, may negatively impact the terms of the financing, and may result in additional costs to update the bond documents.*

FISCAL IMPACT

Property owners in the District are projected to save \$57,000/year in special taxes for a total gross savings projected at \$872,000 through the 2021 Bonds maturity in 2037. The

special taxes are annually levied against the property tax roll of those parcels in the District to fund the debt service payments and administrative costs of the District. The debt service payments are projected to average \$415,000/annually with the total debt service projected at \$6,647,950.

Costs of Issuance fees, which includes fees for services provided by the Financing Team and other eligible reimbursements, will be paid from bond proceeds.

NOTIFICATION

The item has been posted as part of the normal agenda posting process.

RESOLUTION NO. _____

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, ACTING AS THE LEGISLATIVE BODY OF COMMUNITY FACILITIES DISTRICT NO. 5 OF THE CITY OF MORENO VALLEY, AUTHORIZING THE ISSUANCE OF ITS SPECIAL TAX REFUNDING BONDS, SERIES 2021 IN A PRINCIPAL AMOUNT NOT TO EXCEED SIX MILLION DOLLARS (\$6,000,000) AND APPROVING CERTAIN DOCUMENTS AND TAKING CERTAIN OTHER ACTIONS IN CONNECTION THEREWITH

WHEREAS, the City Council of the City of Moreno Valley (the “City Council”), located in Riverside County, California (hereinafter sometimes referred to as the “legislative body of the District”), has heretofore undertaken proceedings and declared the necessity of Community Facilities District No. 5 of the City of Moreno Valley (the “District”) to issue bonds pursuant to the terms and provisions of the Mello-Roos Community Facilities Act of 1982, as amended, being Chapter 2.5, Part 1, Division 2, Title 5 of the Government Code of the State of California (the “Act”) up to the amount of \$10,000,000 for the District; and

WHEREAS, pursuant to Resolution Nos. 2005-104 and 2005-105 adopted by the legislative body of the District on October 25, 2005, certain bond propositions were submitted to the qualified electors within the District, and were approved by more than two-thirds of the votes cast at the elections held within the District on October 25, 2005; and

WHEREAS, pursuant to the Act, the District previously issued its \$5,870,000 2007 Special Tax Bonds (the “2007 Bonds”), on May 31, 2007; and

WHEREAS, the District desires to refund the 2007 Bonds if such refunding results in net present value savings to the District of at least 3%; and

WHEREAS, in order to accomplish the refunding of the 2007 Bonds, the District desires to issue bonds in an aggregate principal amount not to exceed \$6,000,000 designated as the “Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021” (the “Bonds”); and

WHEREAS, in order to effect the issuance of the Bonds, the legislative body of the District desires to approve the form of a Preliminary Official Statement for the Bonds and to approve the forms of and authorize the execution and delivery of a Bond Indenture, a Bond Purchase Agreement, an Escrow Agreement (2007 Bonds), and a Continuing Disclosure Agreement for the Bonds, the forms of which are on file with the City Clerk; and

WHEREAS, to assist in issuing the Bonds, the legislative body of the District desires to retain Stradling Yocca Carlson & Rauth, a Professional Corporation, to act as Bond Counsel to the District, Nixon Peabody LLP to act as Disclosure Counsel to the District, and Fieldman, Rolapp & Associates, Inc., to act as municipal advisor to the District (the “Municipal Advisor”); and

WHEREAS, the legislative body of the District has determined in accordance with Government Code Section 53360.4 that a negotiated sale of the Bonds to Stifel, Nicolaus &

Company, Incorporated (the “Underwriter”), in accordance with the terms of the Bond Purchase Agreement for the Bonds to be entered into by the District and the Underwriter (the “Bond Purchase Agreement”) will result in a lower overall cost to the District than a public sale; and

WHEREAS, the legislative body of the District has determined that it is prudent in the management of its fiscal affairs to issue the Bonds; and

WHEREAS, Section 5852.1 of the California Government Code, which became effective on January 1, 2018, enacted pursuant to Senate Bill 450 (Chapter 625 of the 2017-2018 Session of the California Legislature) (“SB 450”), requires that the City Council, as legislative body of the District, obtain from an underwriter, municipal advisor or private lender and disclose, prior to authorization of the issuance of bonds, including debt instruments such as the Bonds, with a term of greater than 13 months, good faith estimates of the following information in a meeting open to the public: (a) the true interest cost of the Bonds; (b) the sum of all fees and charges to be paid to third parties with respect to the Bonds; (c) the amount of proceeds of the Bonds that is expected to be received net of the fees and charges to be paid to third parties and any reserves or capitalized interest paid or funded with proceeds of the Bonds; and (d) the sum total of all debt service payments on the Bonds calculated to the final maturity of the Bonds plus the fees and charges to be paid to third parties which are not paid from the proceeds of the Bonds; and

WHEREAS, in compliance with SB 450, the City Council, as legislative body of the District, has obtained from the Municipal Advisor and the Underwriter the required good faith estimates and such estimates are disclosed and set forth on Exhibit A; and

WHEREAS, the aggregate assessed value of the real property in the District that is subject to the special tax to pay debt service on the Bonds is not less than three times the principal amount of the Bonds and the principal amount of all other bonds outstanding that are secured by a special tax levied pursuant to the Act or a special assessment levied on property within the District, which fact is required as a precondition to the issuance of the Bonds; and

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Moreno Valley, acting as the legislative body of Community Facilities District No. 5 of the City of Moreno Valley, as follows:

Section 1. Each of the above recitals is true and correct and is adopted by the legislative body of the District.

Section 2. If the District is able to realize at least 3% net present value savings by refunding the 2007 Bonds, the issuance of the Bonds pursuant to the Act in a principal amount not to exceed \$6,000,000 is hereby authorized, with the exact principal amount of the Bonds to be determined by the official signing the Bond Purchase Agreement in accordance with Section 5 below. The legislative body of the District hereby determines that it is prudent in the management of its fiscal affairs to issue the Bonds. In satisfaction of the requirements contained in Section 53363.2 of the Act, the legislative body of the District hereby determines that:

(a) it is anticipated that the purchase of the Bonds will occur in or about December 2021 and that the refunding of the 2007 Bonds will occur on March 1, 2022, or as soon thereafter as practicable and permitted by the terms of the 2007 Bonds (subject to change at the discretion of any of the Authorized Officers (as such term is defined herein));

(b) the Bonds shall be dated their date of issuance, and be in the denominations, have the maturity dates (which do not exceed the latest maturity date of the 2007 Bonds being refunded), and be payable at the place and be in the form specified in the Bond Purchase Agreement to be executed on behalf of the District in accordance with Section 5 hereof;

(c) the aggregate principal amount of Bonds shall not exceed \$6,000,000;

(d) the Bonds shall not have a final maturity date later than September 1, 2037;

(e) the Bonds will bear interest at the minimum rate of 0.01% per annum;

(f) the Underwriter's discount for the Bonds shall not exceed 1.50% of the aggregate principal amount thereof; and

(g) the designated cost of issuing the Bonds being used to refund the 2007 Bonds, as defined by Section 53363.8 of the Act, shall include all of the costs specified in Section 53363.8(a) and (b)(2).

Section 3. The Bonds shall be governed by the terms and conditions of the Bond Indenture, by and between the District and Wilmington Trust, National Association, as trustee, relating to the Bonds. The Bond Indenture shall be prepared by Bond Counsel to the District and executed by any one of the City Manager, the Chief Financial Officer or the Financial and Management Services Director of the City of Moreno Valley, or the written designee of one of the foregoing (collectively the "Authorized Officers"), substantially in the form presented at this meeting, with such additions thereto and changes therein as the officer or officers executing the same deem necessary to cure any ambiguity or defect therein if such addition or change does not materially alter the substance or content thereof, to insert the offering price(s), interest rate(s), selling compensation, principal amount per maturity, redemption dates and prices and such other related terms and provisions as limited by Section 5 hereof, or to conform any provisions therein to the Bond Purchase Agreement and the Official Statement delivered to the purchasers of the Bonds. Approval of such changes shall be conclusively evidenced by the execution and delivery of the Bond Indenture by any one of the Authorized Officers. Capitalized terms used in this Resolution which are not defined herein have the meanings ascribed to them in the Bond Indenture.

Section 4. Wilmington Trust, National Association, is hereby appointed to act as trustee for the Bonds.

Section 5. The covenants set forth in the Bond Indenture, to be executed in accordance with Section 3 above, are hereby approved, shall be deemed to be covenants of the legislative body of the District and shall be complied with by the District and its officers.

Section 6. The form of the Bond Purchase Agreement presented at this meeting is hereby approved, and any one of the Authorized Officers is hereby authorized to execute the Bond Purchase Agreement, with such additions thereto and changes therein relating to dates and numbers as are necessary to conform the Bond Purchase Agreement to the dates, amounts and interest rates applicable to the Bonds as of the sale date. Approval of such additions and changes shall be conclusively evidenced by the execution and delivery of the Bond Purchase Agreement; provided, however, that the Bond Purchase Agreement shall be signed only if the Bonds are purchased by the Underwriter at a true interest cost that does not exceed 5.0%, the refunding of the 2007 Bonds results

in net present value savings to the District of at least 3% of the 2007 Bonds to be refunded (including the costs of issuing the Bonds), the interest rate on the Bonds is such that the principal and total interest cost to maturity of the Bonds is less than the principal and total interest cost to maturity of the 2007 Bonds, the last maturity date of the Bonds is not later than the last maturity date of the 2007 Bonds and the discount paid to the Underwriter (exclusive of original issue discount) does not exceed 1.50% of the principal amount of the Bonds. Each of the Authorized Officers is authorized to determine the day on which the Bonds are to be priced in order to attempt to produce the lowest borrowing cost for the District and may reject any terms presented by the Underwriter if determined not to be in the best interest of the District.

Section 7. The form of the Continuing Disclosure Agreement presented at this meeting is hereby approved, and any one of the Authorized Officers is hereby authorized and directed to execute the Continuing Disclosure Agreement in the form hereby approved, with such additions therein and changes thereto as the Authorized Officer or Authorized Officers executing the same deem necessary to cure any defect or ambiguity therein if such change does not materially alter the substance or content thereof, with such approval to be conclusively evidenced by the execution and delivery of the Continuing Disclosure Agreement.

Section 8. The form of the Escrow Agreement (2007 Bonds) presented at this meeting is hereby approved and any one of the Authorized Officers is hereby authorized and directed to execute the Escrow Agreement (2007 Bonds) in the form hereby approved, with such additions therein and changes thereto as the Authorized Officer or Authorized Officers executing the same deem necessary to cure any defect or ambiguity therein if such change does not materially alter the substance or content thereof, with such approval to be conclusively evidenced by the execution and delivery of the Escrow Agreement (2007 Bonds).

Section 9. The form of the Preliminary Official Statement presented at this meeting is hereby approved, and the Underwriter is hereby authorized to distribute the Preliminary Official Statement to prospective purchasers of the Bonds in the form hereby approved, together with such additions thereto and changes therein as are determined to be necessary by any one of the Authorized Officers to make the Preliminary Official Statement final as of its date. Each of the Authorized Officers is hereby authorized and directed to execute and deliver a certificate deeming the Preliminary Official Statement final as of its date in accordance with Rule 15c2-12 promulgated under the Securities Exchange Act of 1934. Each of the Authorized Officers is hereby authorized to execute a final Official Statement in the form of the Preliminary Official Statement, together with such changes as are determined necessary by the Authorized Officer executing the Official Statement to make such Official Statement complete and accurate as of its date. The Underwriter is further authorized to distribute the final Official Statement for the Bonds and any supplement thereto to the purchasers thereof upon its execution on behalf of the District as described above.

Section 10. In accordance with the requirements of Section 53345.8 of the Act, the legislative body of the District hereby determines that the aggregate assessed value of the real property in the District that is subject to the special tax to pay debt service on the Bonds is not less than three times the principal amount of the Bonds and the principal amount of all other bonds outstanding that are secured by a special tax levied pursuant to the Act or a special assessment levied on property within the District. This determination is based on the assessed value of a portion of the real property within the District as set forth in the fiscal year 2021-22 County Assessor's roll.

Section 11. Each of the Authorized Officers is authorized to provide for all services necessary to effect the issuance of the Bonds. Such services shall include, but not be limited to, obtaining legal services, trustee services, special tax consultant services and any other services deemed appropriate by an Authorized Officer. Any one of the Authorized Officers is authorized to pay for the cost of such services, together with other Costs of Issuance (as such term is defined in the Bond Indenture) from Bond proceeds.

Section 12. The Authorized Officers are authorized to execute contracts with Stradling Yocca Carlson & Rauth, a Professional Corporation, to act as Bond Counsel, Nixon Peabody LLP to act as Disclosure Counsel to the District, and Fieldman, Rolapp & Associates, Inc., to act as municipal advisor to the District.

Section 13. In accordance with SB 450, good faith estimates of the following have been obtained from the Municipal Advisor and the Underwriter and are set forth on Exhibit A: (a) the true interest cost of the Bonds; (b) the sum of all fees and charges to be paid to third parties with respect to the Bonds; (c) the amount of proceeds of the Bonds that is expected to be received net of the fees and charges to be paid to third parties and any reserves or capitalized interest paid or funded with proceeds of the Bonds; and (d) the sum total of all debt service payments on the Bonds calculated to the final maturity of the Bonds plus the fees and charges to be paid to third parties which are not paid with the proceeds of the Bonds.

Section 14. Each of the Authorized Officers and the other officers and staff of the City of Moreno Valley and the District who are responsible for the fiscal affairs of the District are hereby authorized and directed to take any actions and to execute and deliver any and all documents as are necessary to accomplish the issuance, sale and delivery of the Bonds in accordance with the provisions of this Resolution, and the fulfillment of the purposes of the Bonds as described in the Bond Indenture, including, but not limited to, providing certificates as to the accuracy of any information relating to the District which is included in the Official Statement and amendments to the Bond Indenture. Any document authorized herein to be signed by the City Clerk may be signed by a duly appointed deputy clerk.

Section 15. This Resolution shall take effect from and after its adoption and approval.

APPROVED AND ADOPTED this 19th day of October, 2021.

Mayor of the City of Moreno Valley

ATTEST:

City Clerk

APPROVED AS TO FORM:

City Attorney

Attachment: Resolution Authorizing Issuance of Bonds (5520 : AUTHORIZATION TO REFINANCE COMMUNITY FACILITIES DISTRICT NO. 5

**EXHIBIT A
GOOD FAITH ESTIMATES**

The following information was obtained from the District's Municipal Advisor and the Underwriter, and is provided in compliance with Section 5852.1 of the California Government Code with respect to the Bonds:

1. *True Interest Cost of the Bonds.* Assuming the principal amount of the Bonds issued by the District is \$4,755,000 (the "**Estimated Par Amount**"), and based on market interest rates prevailing at the time of preparation of this information, a good faith estimate of the true interest cost of the Bonds, which means the rate necessary to discount the amounts payable on the respective principal and interest payment dates to the purchase price received for the Bonds, is 2.71%.

2. *Finance Charge of the Bonds.* Assuming the Estimated Par Amount of the Bonds is sold, and based on market interest rates prevailing at the time of preparation of this information, a good faith estimate of the District's finance charge of the Bonds, which means the sum of all fees and charges paid to third parties (or costs associated with the Bonds), is \$277,658.

3. *Amount of Proceeds to be Received.* Assuming the Estimated Par Amount of the Bonds is sold, and based on market interest rates prevailing at the time of preparation of this information, a good faith estimate of the amount of proceeds expected to be received by the District following the sale of the Bonds, less the finance charge of the Bonds described in paragraph 2 above and any reserves or capitalized interest paid or funded with proceeds of the Bonds, is \$4,563,012.

4. *Total Payment Amount.* Assuming the Estimated Par Amount of the Bonds is sold, and based on market interest rates prevailing at the time of preparation of this information, a good faith estimate of the total payment amount, which means the sum total of all payments the District will make to pay debt service on the Bonds, plus the finance charge of the Bonds described in paragraph 2 above not paid with the proceeds of the Bonds, calculated to the final maturity of the Bonds, is \$6,582,453.

Attention is directed to the fact that the foregoing information constitutes good faith estimates only. The actual interest cost, finance charges, amount of proceeds and total payment amount may vary from those presently estimated due to variations from these estimates in the timing of the sale of the Bonds, the actual principal amount of Bonds sold, the amortization of the Bonds sold and market interest rates at the time of sale. The date of sale and the amount of Bonds sold will be determined by the District based on market conditions and other factors. The actual interest rates at which the Bonds will be sold will depend on the bond market at the time of sale. The actual amortization of the Bonds will also depend, in part, on market interest rates at the time of sale. Market interest rates are affected by economic and other factors beyond the District's control.

CLERK’S CERTIFICATE

The undersigned, City Clerk of the City of Moreno Valley, does hereby certify as follows:

The foregoing resolution is a full, true and correct copy of a resolution duly adopted by a vote of a majority of the City Council of the City of Moreno Valley at a regular meeting of said Council duly and regularly and legally held at the Council Chambers of the City Council, City Hall, 14177 Frederick Street, Moreno Valley, California, on October 19, 2021, of which all of such members had due notice, as follows:

AYES:

NOES:

ABSTAIN:

ABSENT:

An agenda of said meeting was posted at least 72 hours before said meeting at 14177 Frederick Street, Moreno Valley, California, a location freely accessible to members of the public, and a brief description of said resolution appeared on said agenda.

I have carefully compared the foregoing with the original minutes of said meeting on file and of record in my office, and the foregoing is a full, true and correct copy of the original resolution adopted at said meeting and entered in said minutes.

Said resolution has not been amended, modified or rescinded since the date of its adoption and the same is now in full force and effect.

Dated: _____, 2021

EXHIBIT A FORM OF SPECIAL TAX REFUNDING BOND, SERIES 2021 A-1

Attachment: Bond Indenture (5520 : AUTHORIZATION TO REFINANCE COMMUNITY FACILITIES DISTRICT NO. 5 SPECIAL TAX REFUNDING

BOND INDENTURE

THIS BOND INDENTURE, dated as of December 1, 2021 (the “**Indenture**”), by and between COMMUNITY FACILITIES DISTRICT NO. 5 OF THE CITY OF MORENO VALLEY (the “**District**”) and WILMINGTON TRUST, NATIONAL ASSOCIATION as trustee (the “**Trustee**”), governs the terms of the Special Tax Refunding Bonds, Series 2021 and any Parity Bonds issued in accordance herewith from time to time.

RECITALS

A. The City Council of the City of Moreno Valley, located in Riverside County, California (the “**legislative body of the District**” or the “**City**”), as the legislative body of the District, has previously undertaken proceedings and declared the necessity for the District to issue bonds pursuant to the terms and provisions of the Mello-Roos Community Facilities Act of 1982, as amended, being Chapter 2.5, Part 1, Division 2, Title 5, of the Government Code of the State of California (the “**Act**”).

B. Based upon certain resolutions adopted by the legislative body of the District and an election held on October 25, 2005 authorizing the levy of a special tax and the issuance of bonds by the District, the District was authorized to issue bonds for one or more series, pursuant to the Act, in an aggregate principal amount not to exceed \$10,000,000.

C. The District issued the \$5,870,000 Community Facilities District No. 5 of the City of Moreno Valley 2007 Special Tax Bonds (the “**2007 Bonds**”) for the purpose of financing certain public facilities within the District.

D. The legislative body of the District has determined to redeem the outstanding 2007 Bonds through the issuance of the \$_____ Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021 (the “**Bonds**”).

E. The District has determined that all requirements of the Act for the issuance of the Bonds have been satisfied.

In order to establish the terms and conditions upon and subject to which the Bonds are to be issued, and in consideration of the promises and the mutual covenants contained herein and the purchase and acceptance of the Bonds by the Owners thereof, and for other valuable consideration, the receipt of which is hereby acknowledged, the District does hereby covenant and agree, for the benefit of the Owners of the Bonds and any Parity Bonds (as such term is defined herein) which may be issued hereunder from time to time, as follows:

ARTICLE I

DEFINITIONS

Unless the context otherwise requires, the following terms shall have the following meanings:

“**Account**” means any account created pursuant to this Indenture.

“**Act**” means the Mello-Roos Community Facilities Act of 1982, as amended, being Sections 53311 *et seq.* of the California Government Code.

“**Administrative Expenses**” means the administrative costs with respect to the calculation and collection of the Special Taxes, including all attorneys’ fees and other costs related thereto, the fees and expenses of the Trustee, any fees and related costs for credit enhancement for the Bonds or any Parity Bonds which are not otherwise paid as Costs of Issuance, any costs related to the District’s compliance with state and federal laws requiring continuing disclosure of information concerning the Bonds and the District, and any other costs otherwise incurred by the City staff on behalf of the District in order to carry out the purposes of the District as set forth in the Resolution of Formation and any obligation of the District hereunder.

“**Administrative Expenses Account**” means the account by that name created and established in the Special Tax Fund pursuant to Section 3.1.

“**Alternative Penalty Account**” means the account by that name created and established in the Rebate Fund pursuant to Section 3.1.

“**Annual Debt Service**” means the principal amount of any Outstanding Bonds or Parity Bonds payable in a Bond Year either at maturity or pursuant to a Sinking Fund Payment and any interest payable on any Outstanding Bonds or Parity Bonds in such Bond Year, if the Bonds and any Parity Bonds are retired as scheduled.

“**Authorized Representative of the City**” means the Mayor of the City, the City Manager of the City, the Chief Financial Officer of the City and the Financial and Management Services Director of the City, or any other person or persons designated by the Mayor, the City Manager, the Chief Financial Officer or the Financial and Management Services Director by a written certificate signed by the Mayor, the City Manager, the Chief Financial Officer or the Financial and Management Services Director and containing the specimen signature of each such person.

“**Authorized Representative of the District**” means the Mayor of the City, the City Manager of the City, the Chief Financial Officer of the City and the Financial and Management Services Director of the City, or any other person or persons designated by the Mayor, the City Manager, the Chief Financial Officer or the Financial and Management Services Director by a written certificate signed by the Mayor, the City Manager, the Chief Financial Officer or the Financial and Management Services Director and containing the specimen signature of each such person.

“**Bond Counsel**” means an attorney at law or a firm of attorneys selected by the District of nationally recognized standing in matters pertaining to the tax-exempt nature of interest on bonds issued by states and their political subdivisions duly admitted to the practice of law before the highest court of any state of the United States of America or the District of Columbia.

“**Bond Register**” means the books which the Trustee shall keep or cause to be kept on which the registration and transfer of the Bonds and any Parity Bonds shall be recorded.

“**Bondowner**” or “**Owner**” means the person or persons in whose name or names any Bond or Parity Bond is registered on the Bond Register.

“**Bonds**” means the Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021 issued under this Indenture.

“**Bond Year**” means the twelve month period commencing on September 2 of each year and ending on September 1 of the following year, except that the first Bond Year for the Bonds or an issue of Parity Bonds shall begin on the Delivery Date and end on the first September 1 which is not more than 12 months after the Delivery Date.

“**Business Day**” means a day which is not a Saturday or Sunday or a day of the year on which banks or trust companies in New York, New York, Los Angeles, California, or the city where the corporate trust office of the Trustee is located are not required or authorized by law, regulation or executive order, to close or to remain closed.

“**Certificate of an Authorized Representative**” means a written certificate executed by an Authorized Representative of the City or an Authorized Representative of the District, as applicable.

“**City**” means the City of Moreno Valley, California.

“**Code**” means the Internal Revenue Code of 1986, as amended, and any Regulations, rulings, judicial decisions, and notices, announcements, and other releases of the United States Treasury Department or Internal Revenue Service interpreting and construing it.

“**Continuing Disclosure Agreement**” means the Continuing Disclosure Agreement, dated as of the date of this Indenture, by and between the District and the Dissemination Agent named therein, as amended.

“**Costs of Issuance**” means the costs and expenses incurred in connection with the issuance and sale of the Bonds or any Parity Bonds, including the acceptance and initial annual fees and expenses of the Trustee, legal fees and expenses, costs of printing the Bonds and Parity Bonds and the preliminary and final official statements for the Bonds and Parity Bonds, fees of financial consultants and all other related fees and expenses, as set forth in a Certificate of an Authorized Representative of the City.

“**Costs of Issuance Fund**” means the fund by that name established pursuant to Section 3.1.

“**Delivery Date**” means, with respect to the Bonds and each issue of Parity Bonds, the date on which the bonds of such issue were issued and delivered to the initial purchasers thereof.

“**Depository**” means The Depository Trust Company, New York, New York, and its successors and assigns as securities depository for the Bonds, or any other securities depository acting as Depository under Article II.

“**District**” means Community Facilities District No. 5 of the City of Moreno Valley established pursuant to the Act and the Resolution of Formation.

“**Escrow Agent**” means [Computershare Trust Company, N.A.] as escrow agent under the Escrow Agreement.

“**Escrow Agreement**” means the Escrow Agreement (2007 Bonds), dated as of the date of this Indenture, by and between the Escrow Agent and the District.

“**Escrow Fund**” means the fund by that name established under the Escrow Agreement.

“**Event of Default**” means an event described in Section 8.1.

“**Federal Securities**” means any of the following: (a) non-callable direct obligations of the United States of America (“**Treasuries**”); (b) evidence of ownership of proportionate interests in future interest and principal payments on Treasuries held by a bank or trust company as custodian, under which the owner of the investment is the real party in interest and has the right to proceed directly and individually against the obligor and the underlying Treasuries are not available to any person claiming through the custodian or to whom the custodian may be obligated; and (c) pre-refunded municipal obligations rated “AAA” and “Aaa” by Standard & Poor’s and Moody’s, respectively (or any combination thereof).

“**Fiscal Year**” means the period beginning on July 1 of each year and ending on June 30 of the following year.

“**Governmental Authority**” means any governmental or quasi-governmental entity, including any court, department, commission, board, bureau, agency, administration, central bank, service, district or other instrumentality of any governmental entity or other entity exercising executive, legislative, judicial, taxing, regulatory, fiscal, monetary or administrative powers or functions of or pertaining to government, or any arbitrator, mediator or other person with authority to bind a party at law.

“**Independent Financial Consultant**” means a financial consultant or firm of such consultants generally recognized to be well qualified in the financial consulting field, appointed and paid by the District, who, or each of whom: (a) is in fact independent and not under the domination of the District; (b) does not have any substantial interest, direct or indirect, in the District; and (c) is not connected with the District as a member, officer or employee of the District, but who may be regularly retained to make annual or other reports to the District.

“**Indenture**” means this Bond Indenture, together with any Supplemental Indenture approved pursuant to Article 6.

“**Interest Account**” means the account by that name created and established in the Special Tax Fund pursuant to Section 3.1.

“**Interest Payment Date**” means each March 1 and September 1, commencing March 1, 2022; provided, however, that, if any such day is not a Business Day, interest up to the Interest Payment Date will be paid on the following Business Day.

“**Maximum Annual Debt Service**” means the maximum sum obtained for any Bond Year prior to the final maturity of the Bonds and any Parity Bonds by adding the following for each Bond Year: (a) the principal amount of all Outstanding Bonds and Parity Bonds payable in such Bond Year either at maturity or pursuant to a Sinking Fund Payment; and (b) the interest payable on the aggregate principal amount of all Bonds and Parity Bonds Outstanding in such Bond Year if the Bonds and Parity Bonds are retired as scheduled.

“**Moody’s**” means Moody’s Investors Service, Inc., and its successors and assigns.

“**Net Taxes**” means Special Taxes less amounts set aside to pay Administrative Expenses.

“**Nominee**” means the nominee of the Depository, which may be the Depository, as determined from time to time pursuant to Article II.

“**Ordinance**” means Ordinance No. 701 adopted by the legislative body of the District on November 8, 2005, providing for the levying of the Special Tax.

“**Outstanding**” or “**Outstanding Bonds and Parity Bonds**” means all Bonds and Parity Bonds theretofore issued by the District, except: (a) Bonds and Parity Bonds cancelled or surrendered for cancellation in accordance with Section 10.1; (b) Bonds and Parity Bonds for the payment or redemption of which moneys shall have been deposited in trust (whether upon or prior to the maturity or the redemption date of such Bonds or Parity Bonds), provided that, if such Bonds or Parity Bonds are to be redeemed prior to the maturity thereof, notice of such redemption shall have been given as provided in this Indenture or any applicable Supplemental Indenture for Parity Bonds; and (c) Bonds and Parity Bonds that have been surrendered to the Trustee for transfer or exchange pursuant to Section 2.9 or for which a replacement has been issued pursuant to Section 2.10.

“**Parity Bonds**” means all bonds, notes or other similar evidences of indebtedness hereafter issued, payable out of the Net Taxes and which, as provided in this Indenture or any Supplemental Indenture, rank on a parity with the Bonds.

“**Participants**” means those broker-dealers, banks and other financial institutions from time to time for which the Depository holds Bonds or Parity Bonds as securities depository.

“**Permitted Investments**” means any of the following which at the time of investment are legal investments under the laws of the State for the moneys proposed to be invested therein:

(1) (A) Direct obligations (other than an obligation subject to variation in principal repayment) of the United States of America (“**United States Treasury Obligations**”); (B) obligations fully and unconditionally guaranteed as to timely payment of principal and interest by the United States of America; (C) obligations fully and unconditionally guaranteed as to timely payment of principal and interest by any agency or instrumentality of the United States of America when such obligations are backed by the full faith and credit of the United States of America; or (D) evidences of ownership of proportionate interests in future interest and principal payments on obligations described above held by a bank or trust company as custodian, under which the owner of the investment is the real party in interest and has the right to proceed directly and individually against the obligor and the underlying government obligations are not available to any person claiming through the custodian or to whom the custodian may be obligated.

(2) Federal Housing Administration debentures.

(3) The listed obligations of government-sponsored agencies which are not backed by the full faith and credit of the United States of America:

- Federal Home Loan Mortgage Corporation (FHLMC)

Participation certificates (excluded are stripped mortgage securities which are purchased at prices exceeding their principal amounts)

Senior Debt obligations

- Farm Credit Banks (formerly: Federal Land Banks, Federal Intermediate Credit Banks and Banks for Cooperatives)
Consolidated system-wide bonds and notes
- Federal Home Loan Banks (FHL Banks)
Consolidated debt obligations
- Federal National Mortgage Association (FNMA)
Senior debt obligations
Mortgage-backed securities (excluded are stripped mortgage securities which are purchased at prices exceeding their principal amounts)
- Student Loan Marketing Association (SLMA)
Senior debt obligations (excluded are securities that do not have a fixed par value and/or whose terms do not promise a fixed dollar amount at maturity or call date)
- Financing Corporation (FICO)
Debt obligations
- Resolution Funding Corporation (REFCORP)
Debt obligations

(4) Unsecured certificates of deposit, time deposits, and bankers' acceptances (having maturities of not more than 30 days) of any bank (including the Trustee and any affiliate) the short-term obligations of which are rated "A-1" or better by Standard & Poor's.

(5) Deposits the aggregate amount of which are fully insured by the Federal Deposit Insurance Corporation (FDIC), in banks (including the Trustee and any affiliate) which have capital and surplus of at least \$5 million.

(6) Commercial paper (having original maturities of not more than 270 days rated at the time of purchase "A-1+" by Standard & Poor's and "Prime-1" by Moody's.

(7) Money market funds rated "AAM" or "AAM-G" by Standard & Poor's, or better (including those for which the Trustee or its affiliates receive and retain a fee for services provided to the fund, whether as a custodian, transfer agent, investment advisor or otherwise).

(8) "State Obligations," which means:

(A) Direct general obligations of any state of the United States of America or any subdivision or agency thereof to which is pledged the full faith and credit of a state

the unsecured general obligation debt of which is rated “A3” by Moody’s and “A” by Standard & Poor’s, or better, or any obligation fully and unconditionally guaranteed by any state, subdivision or agency whose unsecured general obligation debt is so rated.

(B) Direct general short-term obligations of any state agency or subdivision or agency thereof described in (A) above and rated “A-1+” by Standard & Poor’s and “Prime-1” by Moody’s.

(C) Special Revenue Bonds (as defined in the United States Bankruptcy Code) of any state, state agency or subdivision described in (A) above and rated “AA” or better by Standard & Poor’s and “Aa” or better by Moody’s.

(9) Pre-refunded municipal obligations rated “AAA” by Standard & Poor’s and “Aaa” by Moody’s meeting the following requirements:

(A) the municipal obligations are: (1) not subject to redemption prior to maturity; or (2) the trustee for the municipal obligations has been given irrevocable instructions concerning their call and redemption and the issuer of the municipal obligations has covenanted not to redeem such municipal obligations other than as set forth in such instructions;

(B) the municipal obligations are secured by cash or United States Treasury Obligations which may be applied only to payment of the principal of, interest and premium on such municipal obligations;

(C) the principal of and interest on the United States Treasury Obligations (plus any cash in the escrow) has been verified by the report of independent certified public accountants to be sufficient to pay in full all principal of, interest, and premium, if any, due and to become due on the municipal obligations (“**Verification**”);

(D) the cash or United States Treasury Obligations serving as security for the municipal obligations are held by an escrow agent or trustee in trust for owners of the municipal obligations;

(E) no substitution of a United States Treasury Obligation shall be permitted except with another United States Treasury Obligation and upon delivery of a new Verification; and

(F) the cash or United States Treasury Obligations are not available to satisfy any other claims, including those by or against the trustee or escrow agent.

(10) Repurchase agreements:

(A) With: (1) any domestic bank, or domestic branch of a foreign bank, the long term debt of which is rated at least “A” by Standard & Poor’s and Moody’s; or (2) any broker-dealer with “retail customers” or a related affiliate thereof which broker-dealer has, or the parent company (which guarantees the provider) of which has, long-term debt rated at least “A” by Standard & Poor’s and Moody’s, which broker-dealer falls under the jurisdiction of the Securities Investors Protection Corporation; or (3) any other entity rated “A” or better by Standard & Poor’s and Moody’s, provided that:

(a) The market value of the collateral is maintained at levels equal to 104% of the amount of cash transferred by the Trustee to the provider of the repurchase agreement plus accrued interest with the collateral being valued weekly and marked-to-market at one current market price plus accrued interest;

(b) The Trustee or a third party acting solely as agent therefor or for the District (the “**Holder of the Collateral**”) has possession of the collateral or the collateral has been transferred to the Holder of the Collateral in accordance with applicable state and federal laws (other than by means of entries on the transferor’s books);

(c) The repurchase agreement shall state and an opinion of counsel shall be rendered at the time such collateral is delivered that the Holder of the Collateral has a perfected first priority security interest in the collateral, any substituted collateral and all proceeds thereof (in the case of bearer securities, this means the Holder of the Collateral is in possession); and

(d) The repurchase agreement shall provide that if during its term the provider’s rating by either Moody’s or Standard & Poor’s is withdrawn or suspended or falls below “A-” by Standard & Poor’s or “A3” by Moody’s, as appropriate, the provider must, at the direction of the District or the Trustee, within 10 days of receipt of such direction, repurchase all collateral and terminate the agreement, with no penalty or premium to the District or Trustee.

(B) Notwithstanding the above, if a repurchase agreement has a term of 270 days or less (with no evergreen provision), collateral levels need not be as specified in (a) above, so long as such collateral levels are 103% or better and the provider is rated at least “A” by Standard & Poor’s and Moody’s, respectively.

(11) Investment agreements with a domestic or foreign bank or corporation (other than a life or property casualty insurance company) the long-term debt of which or, in the case of a guaranteed corporation the long-term debt, or, in the case of a monoline financial guaranty insurance company, claims paying ability, of the guarantor is rated at least “AA” by Standard & Poor’s and “Aa” by Moody’s; provided that, by the terms of the investment agreement:

(A) interest payments are to be made to the Trustee at times and in amounts as necessary to pay debt service (or, if the investment agreement is for the Acquisition and Construction Fund, construction draws) on the Bonds;

(B) the invested funds are available for withdrawal without penalty or premium, at any time upon not more than seven days’ prior notice; the District and the Trustee hereby agree to give or cause to be given notice in accordance with the terms of the investment agreement so as to receive funds thereunder with no penalty or premium paid;

(C) the investment agreement shall state that is the unconditional and general obligation of, and is not subordinated to any other obligation of, the provider thereof, or, in the case of a bank, that the obligation of the bank to make payments under the agreement ranks *pari passu* with the obligations of the bank to its other depositors and its other unsecured and unsubordinated creditors;

(D) the District and the Trustee receives the opinion of domestic counsel (which opinion shall be addressed to the District and the Trustee) that such investment agreement is

legal, valid, binding and enforceable upon the provider in accordance with its terms and of foreign counsel (if applicable) in form and substance acceptable, and addressed to, the District;

(E) the investment agreement shall provide that if during its term:

(1) the provider's rating by either Standard & Poor's or Moody's falls below "AA-" or "Aa3", respectively, the provider shall, at its option, within 10 days of receipt of publication of such downgrade, either (i) collateralize the investment agreement by delivering or transferring in accordance with applicable state and federal laws (other than by means of entries on the provider's books) to the District, the Trustee or a third party acting solely as agent therefor (the "Holder of the Collateral") collateral free and clear of any third-party liens or claims the market value of which collateral is maintained at levels and upon such conditions as would be acceptable to Standard & Poor's and Moody's to maintain an "A" rating in an "A" rated structured financing (with a market value approach); or (ii) repay the principal of and accrued but unpaid interest on the investment; and

(2) the provider's rating by either Standard & Poor's or Moody's is withdrawn or suspended or falls below "A-" or "A3", respectively, the provider must, at the direction of the District or the Fiscal Agent, within 10 days of receipt of such direction, repay the principal of and accrued but unpaid interest on the investment, in either case with no penalty or premium to the District or Trustee;

(F) the investment agreement shall state and an opinion of counsel shall be rendered, in the event collateral is required to be pledged by the provider under the terms of the investment agreement at the time such collateral is delivered, that the Holder of the Collateral has a perfected first priority security interest in the collateral, any substituted collateral and all proceeds thereof (in the case of bearer securities, this means the Holder of the Collateral is in possession); and

(G) the investment agreement must provide that if during its term:

(1) the provider shall default in its payment obligations, the provider's obligations under the investment agreement shall, at the direction of the District or the Trustee, be accelerated and amounts invested and accrued but unpaid interest thereon shall be repaid to the District or Trustee, as appropriate, and

(2) the provider shall become insolvent, not pay its debts as they become due, be declared or petition to be declared bankrupt, etc. ("event of insolvency"), the provider's obligations shall automatically be accelerated and amounts invested and accrued but unpaid interest thereon shall be repaid to the District or Trustee, as appropriate.

(12) The State of California Local Agency Investment Fund; provided that the Trustee may restrict investments in such fund to the extent necessary to keep monies available for the purposes of this Indenture.

"Person" means natural persons, firms, corporations, partnerships, associations, trusts, public bodies and other entities.

“**Prepayments**” means any amounts paid by the District to the Trustee and designated by the District as a prepayment of Special Taxes for one or more parcels in the District made in accordance with the Rate and Method.

“**Principal Account**” means the account by that name created and established in the Special Tax Fund pursuant to Section 3.1.

“**Principal Office of the Trustee**” means the office of the Trustee located in Los Angeles, California, or such other office or offices as the Trustee may designate from time to time, or the office of any successor Trustee where it principally conducts its business of serving as trustee under indentures pursuant to which municipal or governmental obligations are issued.

“**Project**” means those public facilities described in the Resolution of Formation which were acquired or constructed within and outside of the District with the proceeds of the 2007 Bonds, including all engineering, planning and design services and other incidental expenses related to such facilities and other facilities, if any, authorized by the qualified electors within the District from time to time.

“**Rate and Method**” means the document by such name attached to the Resolution of Formation.

“**Rating Agency**” means Moody’s and Standard & Poor’s, or both, as the context requires.

“**Rebate Account**” means the account by that name created and established in the Rebate Fund pursuant to Section 3.1.

“**Rebate Fund**” means the fund by that name established pursuant to Section 3.1 in which there are established the Accounts described in Section 3.1.

“**Rebate Regulations**” means any final, temporary or proposed Regulations promulgated under Section 148(f) of the Code.

“**Record Date**” means the fifteenth day of the month preceding an Interest Payment Date, regardless of whether such day is a Business Day.

“**Redemption Account**” means the account by that name created and established in the Special Tax Fund pursuant to Section 3.1.

“**Regulations**” means the regulations adopted or proposed by the Department of Treasury from time to time with respect to obligations issued pursuant to Section 103 of the Code.

“**Representation Letter**” means the Blanket Representation Letter from the District to the Depository as described in Article II.

“**Reserve Account**” means the account by that name created and established in the Special Tax Fund pursuant to Section 3.1.

“**Reserve Requirement**” means, as of the date of calculation, an amount equal to the least of: (a) Maximum Annual Debt Service; (b) 125% of average Annual Debt Service on the

then-Outstanding Bonds and any Parity Bonds; or (c) ten percent (10%) of the initial outstanding principal amount of the Bonds and any Parity Bonds.

“**Resolution of Formation**” means Resolution No. 2005-104 adopted by the City Council of the City on October 25, 2005, pursuant to which the City formed the District.

“**Sinking Fund Payment**” means the annual payment to be deposited in the Redemption Account to redeem a portion of the Term Bonds in accordance with the schedules set forth in Section 4.1(b) and any annual sinking fund payment schedule to retire any Parity Bonds that are designated as Term Bonds.

“**Six-Month Period**” means the period of time beginning on the Delivery Date of each issue of Bonds or Parity Bonds, as applicable, and ending six consecutive months thereafter, and each six-month period thereafter until the latest maturity date of the Bonds and the Parity Bonds (and any obligations that refund an issue of the Bonds or Parity Bonds).

“**Special Tax Fund**” means the fund by that name created and established pursuant to Section 3.1.

“**Special Taxes**” means the taxes authorized to be levied by the District on property within the District in accordance with the Ordinance, the Resolution of Formation, the Act and the voter approval obtained at the October 25, 2005 election in the District, including any scheduled payments and any Prepayments thereof, and the net proceeds of the redemption or sale of property sold as a result of foreclosure of the lien of the Special Taxes to the amount of said lien and penalties and interest thereon.

“**Standard & Poor’s**” means S&P Global Ratings, a Standard & Poor’s Financial Services LLC business, and its successors and assigns.

“**Supplemental Indenture**” means any supplemental indenture amending or supplementing this Indenture.

“**Surplus Fund**” means the fund by that name created and established pursuant to Section 3.1.

“**Tax Certificate**” means the certificate by that name to be executed by the District on a Delivery Date to establish certain facts and expectations and which contains certain covenants relevant to compliance with the Code.

“**Tax-Exempt**” means, with reference to a Permitted Investment, a Permitted Investment the interest earnings on which are excludable from gross income for federal income tax purposes pursuant to Section 103(a) of the Code, other than one described in Section 57(a)(5)(C) of the Code.

“**Term Bonds**” means the Bonds maturing on September 1, 20__, and any term maturities of an issue of Parity Bonds as specified in a Supplemental Indenture.

“**Treasuries**” means non-callable direct obligations of the United States of America, including United States Treasury Notes, Certificates and Bonds and State and Local Government Series.

“**Trustee**” means Wilmington Trust, National Association, a national banking association duly organized and existing under and by virtue of the laws of the United States, having a principal corporate trust office in Costa Mesa, California, and its successors or assigns, or any other bank, national banking association or trust company which may at any time be substituted in its place as provided in Sections 7.2 or 7.3 and any successor thereto.

“**2007 Bonds**” means the Community Facilities District No. 5 of the City of Moreno Valley 2007 Special Tax Bonds issued on May 31, 2007 in the aggregate principal amount of \$5,870,000.

ARTICLE II

GENERAL AUTHORIZATION AND BOND TERMS

Section 2.1. Amount, Issuance, Purpose and Nature of Bonds and Parity Bonds. Under and pursuant to the Act, the Bonds in the aggregate principal amount of \$_____ shall be issued for the purpose of refunding the 2007 Bonds, funding a reserve fund for the Bonds and paying Costs of Issuance. The Bonds and any Parity Bonds shall be and are limited obligations of the District and shall be payable as to the principal thereof and interest thereon and any premiums upon the redemption thereof solely from the Net Taxes and the other amounts in the Special Tax Fund (other than amounts in the Administrative Expenses Account of the Special Tax Fund). The aggregate principal amount of the Bonds and any Parity Bonds shall not exceed the total indebtedness presently authorized or subsequently authorized by the qualified electors of the District in accordance with the Act.

Section 2.2. Type and Nature of Bonds and Parity Bonds. Neither the faith and credit nor the taxing power of the City, the State of California or any political subdivision thereof is pledged to the payment of the Bonds or any Parity Bonds. Except for the Net Taxes, no other taxes are pledged to the payment of the Bonds or any Parity Bonds. The Bonds and any Parity Bonds are neither general or special obligations of the City nor general obligations of the District, but are limited obligations of the District payable solely from certain amounts deposited by the District in the Special Tax Fund (exclusive of the Administrative Expenses Account), as more fully described herein. The District’s limited obligation to pay the principal of, premium, if any, and interest on the Bonds and any Parity Bonds from amounts in the Special Tax Fund (exclusive of the Administrative Expenses Account) is absolute and unconditional, free of deductions and without any abatement, offset, recoupment, diminution or set-off whatsoever. No Owner of the Bonds or any Parity Bonds may compel the exercise of the taxing power by the District (except as pertains to the Special Taxes) or the City or the forfeiture of any of their property. The principal of and interest on the Bonds and any Parity Bonds and premiums upon the redemption thereof, if any, are not a debt of the City, the State of California or any of its political subdivisions within the meaning of any constitutional or statutory limitation or restriction. The Bonds and any Parity Bonds are not a legal or equitable pledge, charge, lien or encumbrance upon any of the District’s property, or upon any of its income, receipts or revenues except the Net Taxes and other amounts in the Special Tax Fund (exclusive of the Administrative Expenses Account) which are, under the terms of this Indenture and the Act, set aside for the payment of the Bonds, any Parity Bonds and interest thereon. Neither the members of the legislative body of the District or the City Council of the City nor any persons executing the Bonds or any Parity Bonds are liable personally on the Bonds or any Parity Bonds by reason of their issuance.

Notwithstanding anything to the contrary contained in this Indenture, the District shall not be required to advance any money derived from any source of income other than the Net Taxes for the payment of the interest on or the principal of the Bonds and any Parity Bonds, or for the performance of any covenants contained herein. The District may, however, advance funds for any such purpose, provided that such funds are derived from a source legally available for such purpose.

Section 2.3. Equality of Bonds and Parity Bonds and Pledge of Net Taxes. Pursuant to the Act and this Indenture, the Bonds and any Parity Bonds shall be equally payable from and secured by a pledge and lien upon the Net Taxes and other amounts in the Special Tax Fund (exclusive of the Administrative Expenses Account), without priority for number, date of the Bonds or Parity Bonds, date of sale, date of execution or date of delivery, and the payment of the interest on and principal of the Bonds and any Parity Bonds and any premiums upon the redemption thereof shall be exclusively paid from the Net Taxes and other amounts in the Special Tax Fund (exclusive of the Administrative Expenses Account), which are hereby set aside for the payment of the Bonds and any Parity Bonds. Amounts in the Special Tax Fund (other than the Administrative Expenses Account therein) shall constitute a trust fund held for the benefit of the Owners to be applied to the payment of the interest on and principal of the Bonds and any Parity Bonds; and, so long as any of the Bonds and any Parity Bonds or interest thereon remains Outstanding, amounts in the Special Tax Fund shall not be used for any other purpose, except as permitted by this Indenture or any Supplemental Indenture. Notwithstanding any provision contained in this Indenture to the contrary, Net Taxes deposited in the Rebate Fund and the Surplus Fund shall no longer be considered to be pledged to the Bonds or any Parity Bonds, and none of the Rebate Fund, the Surplus Fund, the Costs of Issuance Fund or the Administrative Expenses Account of the Special Tax Fund shall be construed as a trust fund held for the benefit of the Owners.

Nothing in this Indenture or any Supplemental Indenture shall preclude: (a) subject to the limitations contained hereunder, the redemption prior to maturity of any Bonds or Parity Bonds subject to call and redemption, and the payment of said Bonds or Parity Bonds from proceeds of refunding bonds issued under the Act as the same now exists or as hereafter amended, or under any other law of the State of California; or (b) the issuance, subject to the limitations contained herein, of Parity Bonds which shall be payable from Net Taxes.

Section 2.4. Description of Bonds; Interest Rates. The Bonds and any Parity Bonds shall be issued in fully registered form in denominations of \$5,000 or any integral multiple thereof. The Bonds and any Parity Bonds shall be initially issued in the form of a single certificated fully registered bond for each maturity.

The Bonds shall be designated “Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021.” The Bonds shall be dated as of their Delivery Date and shall mature and be payable on September 1 in the years and in the aggregate principal amounts and shall be subject to and shall bear interest at the rates set forth in the table below payable on each Interest Payment Date:

2037		

* Term Bond.

The District and the Trustee may treat and consider the person in whose name each Bond is registered in the Bond Register as the holder and absolute owner of such Bond for the purpose of payment of principal, premium, if any, and interest on such Bond, for the purpose of giving notices of redemption and other matters with respect to such Bond, for the purpose of registering transfers with respect to such Bond, and for all other purposes whatsoever. The Trustee shall pay all principal of, premium, if any, and interest on the Bonds only to or upon the order of the respective Owners or their respective attorneys duly authorized in writing, and all such payments shall be valid and effective to fully satisfy and discharge the District’s obligations with respect to payment of principal of, premium, if any, and interest on the Bonds to the extent of the sum or sums so paid. No person other than an Owner shall receive a certificated Bond evidencing the obligation of the District to make payments of principal, premium, if any, and interest pursuant to this Indenture.

Interest shall be payable on each Bond and Parity Bond from the date established in accordance with Section 2.5 below on each Interest Payment Date thereafter until the principal sum of such Bond or Parity Bond has been paid; provided, however, that if at the maturity date of any Bond or Parity Bond (or if the same is redeemable and shall be duly called for redemption, then at the date fixed for redemption) funds are available for the payment or redemption thereof in full, in accordance with the terms of this Indenture, such Bonds and Parity Bonds shall then cease to bear interest. Interest due on the Bonds and Parity Bonds shall be calculated on the basis of a 360-day year comprised of twelve 30-day months.

Section 2.5. Place and Form of Payment. The Bonds and Parity Bonds shall be payable both as to principal and interest, and as to any premiums upon the redemption thereof, in lawful money of the United States of America. The principal of the Bonds and Parity Bonds and any premiums due upon the redemption thereof shall be payable upon presentation and surrender thereof at the Principal Office of the Trustee, or at the designated office of any successor Trustee. Interest on

any Bond or Parity Bond shall be payable from the Interest Payment Date next preceding the date of authentication of such Bond or Parity Bond, unless: (a) such date of authentication is an Interest Payment Date, in which event interest shall be payable from such date of authentication; (b) the date of authentication is after a Record Date but prior to the immediately succeeding Interest Payment Date, in which event interest shall be payable from the Interest Payment Date immediately succeeding the date of authentication; or (c) the date of authentication is prior to the close of business on the first Record Date occurring after the issuance of such Bond or Parity Bond, in which event interest shall be payable from the dated date of such Bond or Parity Bond, as applicable; provided, however, that if at the time of authentication of such Bond or Parity Bond, interest is in default, interest on such Bond or Parity Bond shall be payable from the last Interest Payment Date to which the interest has been paid or made available for payment or, if no interest has been paid or made available for payment on such Bond or Parity Bond, interest on such Bond or Parity Bond shall be payable from its dated date. Interest on any Bond or Parity Bond shall be paid to the person whose name shall appear in the Bond Register as the Owner of such Bond or Parity Bond as of the close of business on the Record Date. Such interest shall be paid by check of the Trustee mailed on the applicable Interest Payment Date by first class mail, postage prepaid, to such Bondowner at his or her address as it appears on the Bond Register. In addition, upon a request in writing received by the Trustee on or before the applicable Record Date from an Owner of \$1,000,000 or more in principal amount of the Bonds or of any issue of Parity Bonds, payment shall be made on the Interest Payment Date by wire transfer in immediately available funds to an account designated in writing by such Owner.

Section 2.6. Form of Bonds and Parity Bonds. The definitive Bonds may be printed from steel engraved or lithographic plates or may be typewritten. The Bonds and the certificate of authentication shall be substantially in the form set forth in Exhibit A, which form is hereby approved and adopted as the form of such Bonds and of the certificate of authentication. Each issue of Parity Bonds and the certificate of authentication therefor shall be in the form provided in the Supplemental Indenture for such issue of Parity Bonds.

Until definitive Bonds or Parity Bonds, as applicable, are prepared, the District may cause to be executed and delivered in lieu of such definitive Bonds or Parity Bonds temporary bonds in typed, printed, lithographed or engraved form and in fully registered form, subject to the same provisions, limitations and conditions as are applicable in the case of definitive Bonds or Parity Bonds, except that they may be in any denominations authorized by the District. Until exchanged for definitive Bonds or Parity Bonds, as applicable, any temporary bond shall be entitled and subject to the same benefits and provisions of this Indenture as definitive Bonds and Parity Bonds. If the District issues temporary Bonds or Parity Bonds, it shall execute and furnish definitive Bonds or Parity Bonds, as applicable, without unnecessary delay and thereupon any temporary Bond or Parity Bond may be surrendered to the Trustee at its office, without expense to the Owner, in exchange for a definitive Bond or Parity Bond of the same issue, maturity, interest rate and principal amount in any authorized denomination. All temporary Bonds or Parity Bonds so surrendered shall be cancelled by the Trustee and shall not be reissued.

Section 2.7. Execution and Authentication. The Bonds and Parity Bonds shall be signed on behalf of the District by the manual or facsimile signature of the Mayor of the City and countersigned by the manual or facsimile signature of the City Clerk of the City, or any duly appointed deputy City Clerk, in their capacity as officers of the District, and the seal of the District (or a facsimile thereof) may be impressed, imprinted, engraved or otherwise reproduced thereon, and attested by the signature of the City Clerk of the City Council. In case any one or more of the

officers who shall have signed or sealed any of the Bonds or Parity Bonds shall cease to be such officer before the Bonds or Parity Bonds so signed and sealed have been authenticated and delivered by the Trustee (including new Bonds or Parity Bonds delivered pursuant to the provisions hereof with reference to the transfer and exchange of Bonds or Parity Bonds or to lost, stolen, destroyed or mutilated Bonds or Parity Bonds), such Bonds and Parity Bonds shall nevertheless be valid and may be authenticated and delivered as herein provided, and may be issued as if the person who signed or sealed such Bonds or Parity Bonds had not ceased to hold such office.

Only the Bonds that bear a certificate of authentication in the form set forth in Exhibit A shall be entitled to any right or benefit under this Indenture, and no Bond shall be valid or obligatory for any purpose until such certificate of authentication shall have been duly executed by the Trustee.

Section 2.8. Bond Register. The Trustee will keep or cause to be kept, at its office, sufficient books for the registration and transfer of the Bonds and any Parity Bonds which shall upon reasonable prior notice be open to inspection by the District during all regular business hours, and, subject to the limitations set forth in Section 2.9 below, upon presentation for such purpose, the Trustee shall, under such reasonable regulations as it may prescribe, register, transfer or cause to be transferred on said Bond Register, Bonds and any Parity Bonds as herein provided.

The District and the Trustee may treat the Owner of any Bond or Parity Bond whose name appears on the Bond Register as the absolute Owner thereof for any and all purposes, and the District and the Trustee shall not be affected by any notice to the contrary. The District and the Trustee may rely on the address of the Bondowner as it appears in the Bond Register for any and all purposes. It shall be the duty of the Bondowner to give written notice to the Trustee of any change in the Bondowner's address so that the Bond Register may be revised accordingly.

Section 2.9. Registration of Exchange or Transfer. Subject to the limitations set forth in the following paragraph, the registration of any Bond or Parity Bond may, in accordance with its terms, be transferred upon the Bond Register by the person in whose name it is registered, in person or by his or her duly authorized attorney, upon surrender of such Bond or Parity Bond for cancellation at the Principal Office of the Trustee, accompanied by delivery of a written instrument of transfer in a form acceptable to the Trustee and duly executed by the Bondowner or his or her duly authorized attorney.

Bonds or Parity Bonds may be exchanged at the Principal Office of the Trustee for a like aggregate principal amount of Bonds or Parity Bonds for other authorized denominations of the same maturity and issue. The Trustee shall not collect from the Owner any charge for any new Bond or Parity Bond issued upon any exchange or transfer, but shall require the Bondowner requesting such exchange or transfer to pay any tax or other governmental charge required to be paid with respect to such exchange or transfer. Whenever any Bonds or Parity Bonds shall be surrendered for registration of transfer or exchange, the District shall execute and the Trustee shall authenticate and deliver a new Bond or Bonds or a new Parity Bond or Parity Bonds, as applicable, of the same issue and maturity, for a like aggregate principal amount; provided that the Trustee shall not be required to register transfers or make exchanges of: (a) Bonds or Parity Bonds for a period of 15 days next preceding any selection of the Bonds or Parity Bonds to be redeemed; or (b) any Bonds or Parity Bonds chosen for redemption.

Section 2.10. Mutilated, Lost, Destroyed or Stolen Bonds or Parity Bonds. If any Bond or Parity Bond shall become mutilated, the District shall execute, and the Trustee shall authenticate

and deliver, a new Bond or Parity Bond of like tenor, date, issue and maturity in exchange and substitution for the Bond or Parity Bond so mutilated, but only upon surrender to the Trustee of the Bond or Parity Bond so mutilated. Every mutilated Bond or Parity Bond so surrendered to the Trustee shall be cancelled by the Trustee pursuant to Section 10.1. If any Bond or Parity Bond is lost, destroyed or stolen, evidence of such loss, destruction or theft may be submitted to the Trustee and, if such evidence is satisfactory to the Trustee and, if any indemnity satisfactory to the Trustee shall be given, the District shall execute and the Trustee shall authenticate and deliver a new Bond or Parity Bond, as applicable, of like tenor, maturity and issue, numbered and dated as the Trustee shall determine in lieu of and in substitution for the Bond or Parity Bond so lost, destroyed or stolen. Any Bond or Parity Bond issued in lieu of any Bond or Parity Bond alleged to be mutilated, lost, destroyed or stolen, shall be equally and proportionately entitled to the benefits hereof with all other Bonds and Parity Bonds issued hereunder. The Trustee shall not treat both the original Bond or Parity Bond and any replacement Bond or Parity Bond as being Outstanding for the purpose of determining the principal amount of Bonds or Parity Bonds which may be executed, authenticated and delivered hereunder or for the purpose of determining any percentage of Bonds or Parity Bonds Outstanding hereunder, but both the original and replacement Bond or Parity Bond shall be treated as one and the same. Notwithstanding any other provision of this Section, in lieu of delivering a new Bond or Parity Bond which has been mutilated, lost, destroyed or stolen, and which has matured, the Trustee may make payment with respect to such Bonds or Parity Bonds.

Section 2.11. Validity of Bonds and Parity Bonds. The validity of the authorization and issuance of the Bonds and any Parity Bonds shall not be affected in any way by any defect in any proceedings taken by the District for the refunding of the 2007 Bonds, or by the invalidity, in whole or in part, of any contracts made by the District in connection therewith, and shall not be dependent upon the completion of the refunding of the 2007 Bonds or upon the performance by any Person of such Person's obligation with respect to the Project, and the recital contained in the Bonds or any Parity Bonds that the same are issued pursuant to the Act and other applicable laws of the State of California shall be conclusive evidence of their validity and of the regularity of their issuance.

Section 2.12. Book Entry System.

(a) Election of Book Entry System. Prior to the issuance of the Bonds and any Parity Bonds, the District may provide that such Bonds and Parity Bonds shall be initially issued as book entry bonds. If the District shall elect to deliver any Bonds or Parity Bonds in book entry form, then the District shall cause the delivery of a separate single fully registered bond (which may be typewritten) for each maturity date of such Bonds or Parity Bonds in an authorized denomination corresponding to that total principal amount of the Bonds or Parity Bonds designated to mature on such date. Upon initial issuance, the ownership of each such Bond or Parity Bond shall be registered in the Bond Register in the name of the Nominee, as nominee of the Depository, and ownership of the Bonds or Parity Bonds, or any portion thereof may not thereafter be transferred except as provided in subsection (e).

With respect to book entry Bonds or Parity Bonds, the District and the Trustee shall have no responsibility or obligation to any Participant or to any person on behalf of which such a Participant holds an interest in such book entry bonds. Without limiting the immediately preceding sentence, the District and the Trustee shall have no responsibility or obligation with respect to: (i) the accuracy of the records of the Depository, the Nominee, or any Participant with respect to any ownership interest in book entry bonds; (ii) the delivery to any Participant or any other person, other than an Owner as shown in the Bond Register, of any notice with respect to book entry bonds, including any notice of

redemption; (iii) the selection by the Depository and its Participants of the beneficial interests in book entry bonds to be redeemed in the event that the District redeems the Bonds or Parity in part; or (iv) the payment by the Depository or any Participant or any other person, of any amount of principal of, premium, if any, or interest on book entry bonds. The District and the Trustee may treat and consider the person in whose name each book entry bond is registered in the Bond Register as the absolute Owner of such book entry bond for the purpose of payment of principal of, premium and interest on such Bond or Parity Bond, for the purpose of giving notices of redemption and other matters with respect to such Bond or Parity Bond, for the purpose of registering transfers with respect to such Bond or Parity Bonds, and for all other purposes whatsoever. The Trustee shall pay all principal of, premium, if any, and interest on the Bonds or Parity Bonds only to or upon the order of the respective Owner, as shown in the Bond Register, or such Owner's respective attorney duly authorized in writing, and all such payments shall be valid and effective to fully satisfy and discharge the District's obligations with respect to payment of principal of, premium, if any, and interest on the Bonds or Parity Bonds to the extent of the sum or sums so paid. No person other than an Owner, as shown in the Bond Register, shall receive a Bond or Parity Bond evidencing the obligation to make payments of principal of, premium, if any, and interest on the Bonds or Parity Bonds. Upon delivery by the Depository to the District and the Trustee, of written notice to the effect that the Depository has determined to substitute a new nominee in place of the Nominee, and subject to the provisions herein with respect to Record Dates, the word Nominee in the Indenture shall refer to such nominee of the Depository.

(b) Delivery of Representation Letter. In order to qualify the book entry bonds for the Depository's book entry system, the District and the Trustee (if required by the Depository) shall execute and deliver to the Depository a Representation Letter. The execution and delivery of a Representation Letter shall not in any way impose upon the District or the Trustee any obligation whatsoever with respect to persons having interests in such book entry bonds other than the Owners, as shown on the Bond Register. By executing a Representation Letter, the Trustee shall agree to take all action necessary at all times so that the Trustee will be in compliance with all representations of the Trustee in such Representation Letter. In addition to the execution and delivery of a Representation Letter, the District and the Trustee shall take such other actions, not inconsistent with the Indenture, as are reasonably necessary to qualify book entry bonds for the Depository's book entry program.

(c) Selection of Depository. In the event that: (i) the Depository determines not to continue to act as securities depository for book entry bonds; or (ii) the District determines that continuation of the book entry system is not in the best interest of the beneficial owners of the Bonds, the Parity Bonds or the District, then the District will discontinue the book entry system with the Depository. If the District determines to replace the Depository with another qualified securities depository, the District shall prepare or direct the preparation of a new single, separate, fully registered bond for each of the maturity dates of such book entry bonds, registered in the name of such successor or substitute qualified securities depository or its Nominee as provided in subsection (e). If the District fails to identify another qualified securities depository to replace the Depository, then the Bonds or Parity Bonds shall no longer be restricted to being registered in such Bond Register in the name of the Nominee, but shall be registered in whatever name or names the Owners transferring or exchanging such Bonds or Parity Bonds shall designate, in accordance with the provisions of this Indenture.

(d) Payments To Depository. Notwithstanding any other provision of the Indenture to the contrary, so long as all Outstanding Bonds or Parity Bonds are held in book entry form and

registered in the name of the Nominee, all payments of principal of, redemption premium, if any, and interest on such Bonds or Parity Bonds and all notices with respect thereto shall be made and given, respectively to the Nominee, as provided in the Representation Letter or as otherwise instructed by the Depository and agreed to by the Trustee notwithstanding any inconsistent provisions herein.

(e) Transfer of Bonds to Substitute Depository.

(1) The Bonds shall be initially issued as provided in Section 2.1. Registered ownership of such Bonds, or any portions thereof, may not thereafter be transferred except:

(i) to any successor of the Depository or its nominee, or of any substitute depository designated pursuant to clause (ii) below (a “**Substitute Depository**”); provided that any successor of the Depository or Substitute Depository shall be qualified under any applicable laws to provide the service proposed to be provided by it;

(ii) to any Substitute Depository, upon: (I) the resignation of the Depository or its successor (or any Substitute Depository or its successor) from its functions as depository; or (II) a determination by the District that the Depository (or its successor) is no longer able to carry out its functions as depository; provided that any such Substitute Depository shall be qualified under any applicable laws to provide the services proposed to be provided by it; or

(iii) to any person as provided below, upon: (I) the resignation of the Depository or its successor (or any Substitute Depository or its successor) from its functions as depository; or (II) a determination by the District that the Depository or its successor (or Substitute Depository or its successor) is no longer able to carry out its functions as depository.

(2) In the case of any transfer pursuant to clauses (i) or (ii) of subsection (1), upon receipt of all Outstanding Bonds by the Trustee, together with a written request of the District to the Trustee designating the Substitute Depository, a single new Bond, which the District shall prepare or cause to be prepared, shall be issued for each maturity of Bonds then Outstanding, registered in the name of such successor or such Substitute Depository or their Nominees, as the case may be, all as specified in such written request of the District. In the case of any transfer pursuant to clause (iii) of subsection (1), upon receipt of all Outstanding Bonds by the Trustee, together with a written request of the District to the Trustee, new Bonds, which the District shall prepare or cause to be prepared, shall be issued in such denominations and registered in the names of such persons as are requested in such written request of the District, subject to the limitations of Section 2.1; provided that the Trustee shall not be required to deliver such new Bonds within a period of less than sixty (60) days from the date of receipt of such written request from the District.

(3) In the case of a partial redemption or an advance refunding of any Bonds evidencing a portion of the principal maturing in a particular year, the Depository or its successor (or any Substitute Depository or its successor) shall make an appropriate notation on such Bonds indicating the date and amounts of such reduction in principal, in form acceptable to the Trustee, all in accordance with the Representation Letter. The Trustee shall not be liable for such Depository’s failure to make such notations or errors in making such notations and the records of the Trustee as to the Outstanding principal amount of such Bonds shall be controlling.

(4) The District and the Trustee shall be entitled to treat the person in whose name any Bond is registered as the Owner thereof for all purposes of the Indenture and any applicable laws, notwithstanding any notice to the contrary received by the Trustee or the District; and the District and the Trustee shall not have responsibility for transmitting payments to, communicating with, notifying, or otherwise dealing with any beneficial owners of the Bonds. Neither the District nor the Trustee shall have any responsibility or obligation, legal or otherwise, to any such beneficial owners or to any other party, including the Depository or its successor (or Substitute Depository or its successor), except to the Owner of any Bonds, and the Trustee may rely conclusively on its records as to the identity of the Owners of the Bonds.

Section 2.13. Initial Depository and Nominee. The initial Depository under this Article shall be The Depository Trust Company, New York, New York. The initial Nominee shall be Cede & Co., as Nominee of The Depository Trust Company, New York, New York.

ARTICLE III

CREATION OF FUNDS AND APPLICATION OF PROCEEDS

Section 3.1. Creation of Funds; Application of Proceeds.

(a) There are hereby created and established and shall be maintained by the Trustee the following funds and accounts:

(1) The Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021 Special Tax Fund (the “**Special Tax Fund**”) (in which there shall be established and created an Interest Account, a Principal Account, a Redemption Account, a Reserve Account and an Administrative Expenses Account).

(2) The Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021 Rebate Fund (the “**Rebate Fund**”) (in which there shall be established a Rebate Account and an Alternative Penalty Account).

(3) The Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021 Costs of Issuance Fund (the “**Costs of Issuance Fund**”).

(4) Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021 Surplus Fund (the “**Surplus Fund**”).

The amounts on deposit in the foregoing funds, accounts and subaccounts shall be held by the Trustee and the Trustee shall invest and disburse the amounts in such funds, accounts and subaccounts in accordance with the provisions of this Article 3 and shall disburse investment earnings thereon in accordance with the provisions of Section 3.10 hereof. The Trustee may, in its discretion, establish temporary funds or accounts in its books and records to facilitate such transfers.

In connection with the issuance of any Parity Bonds, the Trustee, at the direction of an Authorized Representative of the District, may create new funds, accounts or subaccounts, or may create additional accounts and subaccounts within any of the foregoing funds and accounts for the purpose of separately accounting for the proceeds of the Bonds and any Parity Bonds.

(b) The proceeds of the sale of the Bonds in the amount of \$_____ shall be received by the Trustee on behalf of the District. Such amount equals the original principal amount of the Bonds in the amount of \$_____, plus original issue premium of \$_____, less underwriter's discount of \$_____ which has been paid to Stifel, Nicolaus & Company, Incorporated (the "Underwriter"), and less an amount of \$_____ wired to the Escrow Agent on the Closing Date for deposit in the Escrow Fund established under the Escrow Agreement. On behalf of the District, there shall be deposited the amounts as follows:

(1) \$_____ in the Costs of Issuance Fund to pay the Costs of Issuance of the Bonds; and

(2) \$_____ in the Reserve Account of the Special Tax Fund to fund the Reserve Requirement.

The Trustee may, in its discretion, establish temporary funds or accounts in its books and records to facilitate such transfers.

Section 3.2. Deposits to and Disbursements from Special Tax Fund.

(a) Except for the portion of any Prepayment to be deposited in the Redemption Account as specified in a Certificate of an Authorized Representative, the Trustee shall, on each date on which the Special Taxes are received from the District, deposit the Special Taxes in the Special Tax Fund to be held in trust for the Owners. The Trustee shall transfer the Special Taxes on deposit in the Special Tax Fund on the dates and in the amounts set forth in the following Sections, in the following order of priority, to:

- (1) the Administrative Expenses Account of the Special Tax Fund;
- (2) the Interest Account of the Special Tax Fund;
- (3) the Principal Account of the Special Tax Fund;
- (4) the Redemption Account of the Special Tax Fund;
- (5) the Reserve Account of the Special Tax Fund;
- (6) the Rebate Fund; and
- (7) the Surplus Fund.

(b) Upon the maturity of all of the Bonds and Parity Bonds and, after all principal and interest then due on the Bonds and Parity Bonds then Outstanding has been paid or provided for and any amounts owed to the Trustee have been paid in full, moneys in the Special Tax Fund and any accounts therein may be used by the District for any lawful purpose.

Section 3.3. Administrative Expenses Account of the Special Tax Fund. The Trustee shall transfer from the Special Tax Fund and deposit in the Administrative Expenses Account of the Special Tax Fund from time to time amounts necessary to make timely payment of Administrative Expenses as set forth in a Certificate of an Authorized Representative of the District. Moneys in the Administrative Expenses Account of the Special Tax Fund may be invested in any Permitted

Investments as directed in writing by an Authorized Representative of the District and shall be disbursed as directed in a Certificate of an Authorized Representative.

Section 3.4. Interest Account and Principal Account of the Special Tax Fund. The principal of (including any Sinking Fund Payment) and interest due on the Bonds and any Parity Bonds until maturity, other than principal due upon redemption under Sections 4.1(a) and (c), shall be paid by the Trustee from the Principal Account and the Interest Account of the Special Tax Fund, respectively. For the purpose of assuring that the payment of principal of (including any Sinking Fund Payment) and interest on the Bonds and any Parity Bonds will be made when due, after making the transfer required by Section 3.3, at least one Business Day prior to each March 1 and September 1, the Trustee shall make the following transfers from the Special Tax Fund first to the Interest Account and then to the Principal Account; provided, however, that to the extent that deposits have been made in the Interest Account or the Principal Account from the proceeds of the sale of an issue of the Bonds, any Parity Bonds, or otherwise, the transfer from the Special Tax Fund need not be made; and provided, further, that, if amounts in the Special Tax Fund (exclusive of the Reserve Account) are inadequate to make the foregoing transfers, then any deficiency shall be made up by an immediate transfer from the Reserve Account:

(a) To the Interest Account, an amount such that the balance in the Interest Account one Business Day prior to each Interest Payment Date shall be equal to the installment of interest due on the Bonds and any Parity Bonds on said Interest Payment Date and any installment of interest due on a previous Interest Payment Date that remains unpaid. Moneys in the Interest Account shall be used for the payment of interest on the Bonds and any Parity Bonds as the same become due.

(b) To the Principal Account, an amount such that the balance in the Principal Account one Business Day prior to September 1 of each year shall equal the principal payment (including any Sinking Fund Payment) due on the Bonds and any Parity Bonds maturing on such September 1 and any principal payment due on a previous September 1 which remains unpaid. Moneys in the Principal Account shall be used for the payment of the principal (including any Sinking Fund Payment) of such Bonds and any Parity Bonds as the same become due at maturity.

Section 3.5. Redemption Account of the Special Tax Fund.

(a) After making the deposits to the Administrative Expenses Account, the Interest Account and the Principal Account of the Special Tax Fund pursuant to Sections 3.3 and 3.4, or to call Parity Bonds for optional redemption as set forth in any Supplemental Indenture for Parity Bonds, the Trustee shall transfer from the Special Tax Fund and deposit in the Redemption Account moneys available for the purpose and sufficient to pay the principal and the premiums, if any, payable on the Bonds or Parity Bonds called for optional redemption; provided, however, that amounts in the Special Tax Fund (other than the Administrative Expenses Account therein) may be applied to optionally redeem Bonds and Parity Bonds only if immediately following such redemption the amount in the Reserve Account will equal the Reserve Requirement, as determined by the District.

(b) Prepayments deposited to the Redemption Account shall be applied on the redemption date established pursuant to Section 4.1(c) for the use of such Prepayments to the payment of the principal of, premium, and interest on the Bonds and Parity Bonds to be redeemed with such Prepayments.

(c) Moneys set aside in the Redemption Account shall be used solely for the purpose of redeeming Bonds and Parity Bonds, shall be applied on or after the redemption date to the payment of principal of and premium, if any, on the Bonds or Parity Bonds to be redeemed upon presentation and surrender (if required) of such Bonds or Parity Bonds and, in the case of an optional redemption or an extraordinary redemption from Prepayments, to pay the interest thereon; provided, however, that in lieu or partially in lieu of such call and redemption, moneys deposited in the Redemption Account may be used to purchase Outstanding Bonds or Parity Bonds in the manner hereinafter provided. Purchases of Outstanding Bonds or Parity Bonds may be made by the District at public or private sale as and when and at such prices as the District may in its discretion determine, but only at prices (including brokerage or other expenses) not more than par plus accrued interest, plus, in the case of moneys set aside for an optional redemption or an extraordinary redemption, the premium applicable at the next following call date according to the premium schedule established pursuant to Sections 4.1(a) or 4.1(d), as applicable, or in the case of Parity Bonds the premium established in any Supplemental Indenture. Any accrued interest payable upon the purchase of Bonds or Parity Bonds may be paid from the amount reserved in the Interest Account of the Special Tax Fund for the payment of interest on the next following Interest Payment Date.

Section 3.6. Reserve Account of the Special Tax Fund. There shall be maintained in the Reserve Account of the Special Tax Fund an amount equal to the Reserve Requirement. If funded, the amounts in the Reserve Account shall be applied as follows:

(a) Moneys in the Reserve Account shall be used solely for the purpose of paying the principal of, including Sinking Fund Payments, and interest on the Bonds and any Parity Bonds when due in the event that the moneys in the Interest Account and the Principal Account of the Special Tax Fund are insufficient therefor or moneys in the Redemption Account of the Special Tax Fund are insufficient to make a Sinking Fund Payment when due, and for the purpose of making any required transfer to the Rebate Fund pursuant to Section 3.7 upon written direction from the District. If the amounts in the Interest Account, the Principal Account or the Redemption Account of the Special Tax Fund are insufficient to pay the principal of, including Sinking Fund Payments, or interest on any Bonds and Parity Bonds when due, or amounts in the Special Tax Fund are insufficient to make transfers to the Rebate Fund when required, the Trustee shall withdraw from the Reserve Account for deposit in the Interest Account, the Principal Account or the Redemption Account of the Special Tax Fund or the Rebate Fund, as applicable, moneys necessary for such purposes.

(b) Whenever moneys are withdrawn from the Reserve Account, after making the required transfers referred to in Sections 3.3, 3.4 and 3.5, the Trustee shall transfer to the Reserve Account from available moneys in the Special Tax Fund, or from any other legally available funds that the District elects to apply to such purpose, the amount needed to restore the amount of such Reserve Account to the Reserve Requirement. Moneys in the Special Tax Fund shall be deemed available for transfer to the Reserve Account only if the Trustee determines that such amounts will not be needed to make the deposits required to be made to the Administrative Expenses Account, the Interest Account, the Principal Account or the Redemption Account of the Special Tax Fund on or before the next September 1. If amounts in the Special Tax Fund, together with any other amounts transferred to replenish the Reserve Account, are inadequate to restore the Reserve Account to the Reserve Requirement, then the District shall include the amount necessary fully to restore the Reserve Account to the Reserve Requirement in the next annual Special Tax levy to the extent of the maximum permitted Special Tax rates.

(c) In connection with a redemption of Bonds pursuant to Section 4.1(a) or (c) or Parity Bonds in accordance with any Supplemental Indenture, or a partial defeasance of Bonds or Parity Bonds in accordance with Section 9.1, amounts in the Reserve Account may be applied to such redemption or partial defeasance so long as the amount on deposit in the Reserve Account following such redemption or partial defeasance equals the Reserve Requirement. The District shall set forth in a Certificate of an Authorized Representative the amount in the Reserve Account to be transferred to the Redemption Account on a redemption date or to be transferred pursuant to Section 9.1(c) to partially defease Bonds, and the Trustee shall make such transfer on the applicable redemption or defeasance date, subject to the limitation in the preceding sentence.

(d) To the extent that the Reserve Account is at the Reserve Requirement as of the first day of the final Bond Year for the Bonds or an issue of Parity Bonds, amounts in the Reserve Account may be applied to pay the principal of and interest due on the Bonds and Parity Bonds, as applicable, in the final Bond Year for such issue. Moneys in the Reserve Account in excess of the Reserve Requirement that are not transferred in accordance with the preceding provisions of this section shall be withdrawn from the Reserve Account on the Business Day before each March 1 and September 1 and shall be transferred to the Interest Account of the Special Tax Fund.

(e) The Reserve Requirement may be satisfied in whole or part by the deposit of a reserve fund surety policy or similar instrument therein.

Section 3.7. Rebate Fund.

(a) The Trustee shall establish and maintain a fund separate from any other fund established and maintained hereunder designated as the Rebate Fund and shall establish a separate Rebate Account and Alternative Penalty Account therein. All money at any time deposited in the Rebate Account or the Alternative Penalty Account of the Rebate Fund shall be held by the Trustee in trust, for payment to the United States Treasury. A separate subaccount of the Rebate Account and the Alternative Penalty Account shall be established for the Bonds and each issue of Parity Bonds the interest on which is excluded from gross income for federal income tax purposes. All amounts on deposit in the Rebate Fund with respect to the Bonds or an issue of Parity Bonds shall be governed by this Section 3.7 and the Tax Certificate for such issue, unless the District obtains an opinion of Bond Counsel that the exclusion from gross income for federal income tax purposes of interest payments on the Bonds and Parity Bonds will not be adversely affected if such requirements are not satisfied.

(1) Rebate Account. The following requirements shall be satisfied with respect to each subaccount of the Rebate Account:

(i) Annual Computation. Within 55 days of the end of each Bond Year, the District shall calculate or cause to be calculated the amount of rebatable arbitrage for the Bonds and each issue of Parity Bonds to which this Section 3.7 is applicable, in accordance with Section 148(f)(2) of the Code and Section 1.148-3 of the Rebate Regulations (taking into account any applicable exceptions with respect to the computation of the rebatable arbitrage described in the Tax Certificate for each issue (e.g., the temporary investments exceptions of Section 148(f)(4)(B) and (C) of the Code), and taking into account whether the election pursuant to Section 148(f)(4)(C)(vii) of the Code (the “1½% Penalty”) has been made), for this purpose treating the last day of the applicable Bond Year as a computation date, within the meaning of Section 1.148-1(b) of the Rebate

Regulations (the “**Rebatable Arbitrage**”). The District shall obtain expert advice as to the amount of the Rebatable Arbitrage to comply with this Section.

(ii) Annual Transfer. Within 55 days of the end of each Bond Year for which Rebatable Arbitrage must be calculated as required by the Tax Certificate for each issue, upon the written direction of an Authorized Representative of the District, an amount shall be deposited to each subaccount of the Rebate Account by the Trustee from any funds so designated by the District if and to the extent required, so that the balance in the Rebate Account shall equal the amount of Rebatable Arbitrage so calculated by or on behalf of the District in accordance with subsection (a)(1)(i) with respect to the Bonds and each issue of Parity Bonds to which this Section 3.7 is applicable. In the event that immediately following any transfer required by the previous sentence, or the date on which the District determines that no transfer is required for such Bond Year, the amount then on deposit to the credit of the applicable subaccount of the Rebate Account exceeds the amount required to be on deposit therein, upon written instructions from an Authorized Representative of the District, the Trustee shall withdraw the excess from the appropriate subaccount of the Rebate Account and then credit the excess to the Special Tax Fund.

(iii) Payment to the Treasury. The Trustee shall pay, as directed in writing by an Authorized Representative of the District, to the United States Treasury, out of amounts in each subaccount of the Rebate Account: (X) not later than 60 days after the end of: (A) the fifth Bond Year for the Bonds and each issue of Parity Bonds to which this Section 3.7 is applicable; and (B) each applicable fifth Bond Year thereafter, an amount equal to at least 90% of the Rebatable Arbitrage calculated as of the end of such Bond Year for the Bonds and each issue of Parity Bonds, as applicable; and (Y) not later than 60 days after the payment or redemption of all of the Bonds or an issue of Parity Bonds, as applicable, an amount equal to 100% of the Rebatable Arbitrage calculated as of the end of such applicable Bond Year, and any income attributable to the Rebatable Arbitrage, computed in accordance with Section 148(f) of the Code.

In the event that, prior to the time that any payment is required to be made from the Rebate Account, the amount in the Rebate Account is not sufficient to make such payment when such payment is due, the District shall calculate or cause to be calculated the amount of such deficiency and deposit an amount received from any legally available source equal to such deficiency prior to the time such payment is due. Each payment required to be made pursuant to this subsection (a)(1) shall be made to the Internal Revenue Service Center, Ogden, Utah 84201 on or before the date on which such payment is due, and shall be accompanied by Internal Revenue Service Form 8038-T, or shall be made in such other manner as provided under the Code. The Trustee may rely conclusively upon the District’s determinations, calculations and certifications required by this Section. The Trustee shall have no responsibility to independently make any calculation or determination or to review the District’s calculations hereunder.

(2) Alternative Penalty Account.

(i) Six-Month Computation. If the 1½% Penalty has been elected for the Bonds or an issue of Parity Bonds, within 85 days of each particular Six-Month Period, the District shall determine or cause to be determined whether the 1½% Penalty is payable (and the amount of such penalty) as of the close of the applicable Six-Month Period. The District shall obtain expert advice in making such determinations.

(ii) Six-Month Transfer. Within 85 days of the close of each Six-Month Period, the Trustee, at the written direction of an Authorized Representative of the District, shall deposit an amount in the appropriate subaccounts of the Alternative Penalty Account from any source of funds held by the Trustee pursuant to this Indenture and designated by the District in such written directions or provided to it by the District, if and to the extent required, so that the balance in each subaccount of the Alternative Penalty Account equals the amount of 1½% Penalty due and payable to the United States Treasury determined as provided in subsection (a)(2)(i). In the event that immediately following any transfer provided for in the previous sentence, or the date on which the District determines that no transfer is required for such Bond Year, the amount then on deposit in a subaccount of the Alternative Penalty Account exceeds the amount required to be on deposit therein to make the payments required by subsection (a)(2)(iii), the Trustee, at the written direction of an Authorized Representative of the District, may withdraw the excess from the applicable subaccount of the Alternative Penalty Account and credit the excess to the Special Tax Fund.

(iii) Payment to the Treasury. The Trustee shall pay, as directed in writing by an Authorized Representative of the District, to the United States Treasury, out of amounts in a subaccount of the Alternative Penalty Account, not later than 90 days after the close of each Six-Month Period the 1½% Penalty, if applicable and payable, computed with respect to the Bonds and any issue of Parity Bonds in accordance with Section 148(f)(4) of the Code. In the event that, prior to the time that any payment is required to be made from a subaccount of the Alternative Penalty Account, the amount in such subaccount is not sufficient to make such payment when such payment is due, the District shall calculate the amount of such deficiency and direct the Trustee, in writing, to deposit an amount equal to such deficiency into such subaccount of the Alternative Penalty Account from any funds held by the Trustee pursuant to this Indenture and designated by the District in such written directions prior to the time such payment is due. Each payment required to be made pursuant to this subsection (a)(2) shall be made to the Internal Revenue Service, Ogden, Utah 84201 on or before the date on which such payment is due, and shall be accompanied by Internal Revenue Service Form 8038-T or shall be made in such other manner as provided under the Code.

(b) Disposition of Unexpended Funds. Any funds remaining in the Accounts of the Rebate Fund with respect to the Bonds or an issue of Parity Bonds after redemption and payment of such issue and after making the payments described in subsections (a)(1)(iii) or (a)(2)(iii) (whichever is applicable), may be withdrawn by the Trustee at the written direction of the District and utilized in any manner by the District.

(c) Survival of Defeasance and Final Payment. Notwithstanding anything in this Section or this Indenture to the contrary, the obligation to comply with the requirements of this Section shall survive the defeasance and final payment of the Bonds and any Parity Bonds with respect to which an Account has been created in the Rebate Fund.

(d) Amendment Without Consent of Owners. This Section 3.7 may be deleted or amended in any manner without the consent of the Owners, provided that prior to such event there is delivered to the District an opinion of Bond Counsel to the effect that such deletion or amendment will not adversely affect the exclusion from gross income for federal income tax purposes of interest on the Bonds and any issue of Parity Bonds issued on a tax-exempt basis.

Section 3.8. Surplus Fund. After making the transfers required by Sections 3.3, 3.4, 3.5, 3.6 and 3.7, as soon as practicable after each September 1, and in any event prior to each October 1,

the Trustee shall transfer all remaining amounts in the Special Tax Fund to the Surplus Fund, unless on or prior to such date, it has received a Certificate of an Authorized Representative of the District directing that certain amounts be retained in the Special Tax Fund because the District has included such amounts as being available in the Special Tax Fund in calculating the amount of the levy of Special Taxes for such Fiscal Year pursuant to Section 5.2(b). Moneys deposited in the Surplus Fund will be transferred by the Trustee at the direction of an Authorized Representative of the District: (a) to the Interest Account, the Principal Account or the Redemption Account of the Special Tax Fund to pay the principal of, including Sinking Fund Payments, premium, if any, and interest on the Bonds and any Parity Bonds when due in the event that moneys in the Special Tax Fund and the Reserve Account of the Special Tax Fund are insufficient therefor; (b) to the Reserve Account in order to replenish the Reserve Account to the Reserve Requirement; (c) to the Administrative Expenses Account of the Special Tax Fund to pay Administrative Expenses to the extent that the amounts on deposit in the Administrative Expenses Account of the Special Tax Fund are insufficient to pay Administrative Expenses; or (d) for any other lawful purpose of the District.

The amounts in the Surplus Fund are not pledged to the repayment of the Bonds or the Parity Bonds and may be used by the District for any lawful purpose. In the event that the District reasonably expects to use any portion of the moneys in the Surplus Fund to pay debt service on any Outstanding Bonds or Parity Bonds, the District will notify the Trustee in a Certificate of an Authorized Representative and the Trustee will segregate such amount into a separate subaccount and the moneys on deposit in such subaccount of the Surplus Fund shall be invested at the written direction of the District in Permitted Investments the interest on which is excludable from gross income under Section 103 of the Code (other than bonds the interest on which is a tax preference item for purposes of computing the alternative minimum tax of individuals and corporations under the Code) or in Permitted Investments at a yield not in excess of the yield on the issue of Bonds or Parity Bonds to which such amounts are to be applied, unless, in the opinion of Bond Counsel, investment at a higher yield will not adversely affect the exclusion from gross income for federal income tax purposes of interest on the Bonds or any Parity Bonds which were issued on a tax-exempt basis for federal income tax purposes.

Section 3.9. Costs of Issuance Fund. The moneys in the Costs of Issuance Fund shall be disbursed by the Trustee pursuant to a Certificate of an Authorized Representative of the District, and any balance therein shall be transferred by the Trustee to the Interest Account as directed in writing by an Authorized Representative of the District or 90 days following the issuance of the Bonds, whichever is earlier. The Costs of Issuance Fund shall thereafter be closed.

Section 3.10. Investments. Moneys held in any of the funds, Accounts and subaccounts under this Indenture shall be invested at the written direction of the District in accordance with the limitations set forth below only in Permitted Investments which shall be deemed at all times to be a part of such funds, Accounts and subaccounts. Any loss resulting from such Permitted Investments shall be credited or charged to the fund, Account or subaccount from which such investment was made, and any investment earnings on a fund, Account or subaccount shall be applied as follows: (i) investment earnings on all amounts deposited in the Costs of Issuance Fund, the Special Tax Fund, the Surplus Fund and the Rebate Fund and each Account therein (other than the Reserve Account of the Special Tax Fund) shall be deposited in those respective funds and Accounts; and (ii) investment earnings on all amounts deposited in the Reserve Account shall be deposited therein to be applied as set forth in Section 3.6. Moneys in the funds, Accounts and subaccounts held under this Indenture may be invested by the Trustee as directed in writing (filed by the District with the

Trustee two (2) Business Days in advance of the making of the investment), from time to time, in Permitted Investments subject to the following restrictions:

(a) Moneys in the Costs of Issuance Fund and the Interest Account, the Principal Account and the Redemption Account of the Special Tax Fund shall be invested only in Permitted Investments which will by their terms mature, or in the case of an investment agreement are available for withdrawal without penalty, on such dates so as to ensure the payment of principal of, premium, if any, and interest on the Bonds and any Parity Bonds as the same become due.

(b) Moneys in the Reserve Account of the Special Tax Fund may be invested only in Permitted Investments which, taken together, have a weighted average maturity not in excess of five years; provided that such amounts may be invested in an investment agreement to the later of the final maturity of the Bonds or any Parity Bonds so long as such amounts may be withdrawn at any time, without penalty, for application in accordance with Section 3.6; and provided that no such Permitted Investment of amounts in the Reserve Account allocable to the Bonds or an issue of Parity Bonds shall mature later than the respective final maturity date of the Bonds or the issue of Parity Bonds, as applicable.

(c) Moneys in the Rebate Fund shall be invested only in Permitted Investments of the type described in clause (a) of the definition thereof which by their terms will mature, as nearly as practicable, on the dates such amounts are needed to be paid to the United States Government pursuant to Section 3.7, or in Permitted Investments of the type described in clause (g) of the definition thereof.

(d) In the absence of written investment directions from the District, the Trustee shall hold such moneys uninvested.

The Trustee shall sell, or present for redemption, any Permitted Investment as directed in writing by the District whenever it may be necessary to do so in order to provide moneys to meet any payment or transfer to such funds and Accounts or from such funds and Accounts. For the purpose of determining at any given time the balance in any such funds and Accounts, any such investments constituting a part of such funds and Accounts shall be valued at their cost, except that amounts in the Reserve Account shall be valued at the market value thereof at least semiannually on or before each Interest Payment Date. In making any valuations hereunder, the Trustee may utilize such computerized securities pricing services as may be available to it, including, without limitation, those available through its regular accounting system, and conclusively rely thereon. Notwithstanding anything in this Indenture to the contrary, the Trustee shall not be responsible for any loss from investments, sales or transfers undertaken in accordance with the provisions of this Indenture.

The Trustee or an affiliate may act as principal or agent in the making or disposing of any investment and shall be entitled to its customary fee for such investment. The Trustee may sell, or present for redemption, any Permitted Investment so purchased whenever it shall be necessary to provide moneys to meet any required payment, transfer, withdrawal or disbursement from the fund or account to which such Permitted Investment is credited, and, subject to the provisions of Section 7.4, the Trustee shall not be liable or responsible for any loss resulting from such investment. For investment purposes, the Trustee may commingle the funds and accounts established hereunder, but shall account for each separately. The parties acknowledge that the Trustee is not providing investment supervision, recommendations, or advice.

The District acknowledges that, to the extent that regulations of the Comptroller of the Currency or other applicable regulatory entity grant the District the right to receive brokerage confirmations of security transactions as they occur, the District specifically waives receipt of such confirmations to the extent permitted by law. The Trustee will furnish the District periodic cash transaction statements which include detail for all investment transactions made by the Trustee hereunder.

ARTICLE IV

REDEMPTION OF BONDS AND PARITY BONDS

Section 4.1. Redemption of Bonds.

(a) Optional Redemption. The Bonds are subject to redemption, at the option of the District, from any source of funds in whole, or in part by lot, on any Interest Payment Date beginning on September 1, 20__ at the following redemption prices, expressed as a percentage of the principal amount to be redeemed, together with accrued interest to the redemption date:

<i>Redemption Date</i>	<i>Redemption Price</i>
September 1, 20__ and March 1, 20__	103%
September 1, 20__ and March 1, 20__	102
September 1, 20__ and March 1, 20__	101
September 1, 20__ and any Interest Payment Date thereafter	100

In the event that the District elects to redeem Bonds as provided above, the District shall, at least 45 days prior to the redemption date, give written notice to the Trustee of its election to so redeem, the redemption date and the principal amount of the Bonds, among maturities, to be redeemed. In the event of redemption pursuant to Section 4.1(a) or (c), or purchase pursuant to Section 4.1(b), the District shall provide the Trustee with a revised sinking fund schedule giving effect to the redemption so completed.

(b) Mandatory Sinking Fund Redemption. The Term Bonds shall be called before maturity and redeemed, from the Sinking Fund Payments that have been deposited into the Redemption Account, on September 1, 20__, and on each September 1 thereafter prior to maturity, in accordance with the schedule of Sinking Fund Payments set forth below. The Term Bonds so called for redemption shall be selected by the Trustee by lot and shall be redeemed at a redemption price for each redeemed Term Bond equal to the principal amount thereof, plus accrued interest to the redemption date, without premium, as follows:

TERM BONDS MATURING SEPTEMBER 1, 20__

<i>Redemption Date</i> <i>(September 1)</i>	<i>Principal Amount</i>
--	-------------------------

(maturity)

If, during the Fiscal Year immediately preceding one of the redemption dates specified above, the District purchases Bonds, at least 45 days prior to the redemption date the District shall notify the Trustee as to the principal amount purchased and the amount of Bonds so purchased shall be credited at the time of purchase, to the extent of the full principal amount thereof, to reduce such upcoming Sinking Fund Payment for the Bonds so purchased. All Bonds purchased pursuant to this subsection shall be cancelled pursuant to Section 10.1.

In the event of a partial optional redemption or extraordinary redemption of the Bonds, each of the remaining Sinking Fund Payments for such Bonds, as described above, will be reduced, as nearly as practicable, on a pro rata basis, in integral multiples of \$5,000, as directed by the District.

(c) Extraordinary Redemption.

The Bonds are subject to extraordinary redemption as a whole, or in part by lot, on any Interest Payment Date, and shall be redeemed by the Trustee, from Prepayments deposited to the Redemption Account pursuant to Section 3.5(b), plus amounts transferred from the Reserve Account pursuant to Section 3.6(c), among maturities as directed in writing by the District, at the following redemption prices, expressed as a percentage of the principal amount to be redeemed, together with accrued interest to the redemption date:

<i>Redemption Date</i>	<i>Redemption Price</i>
Any Interest Payment Date from (and including) September 1, 20__ through (and including) March 1, 20__	103%
September 1, 20__ and March 1, 20__	102
September 1, 20__ and March 1, 20__	101
September 1, 20__ and any Interest Payment Date thereafter	100

The District shall notify the Trustee of any extraordinary prepayment at least 45 days prior to the Interest Payment Date on which such prepayment shall occur.

(d) The redemption provisions for Parity Bonds shall be set forth in a Supplemental Indenture.

Section 4.2. Selection of Bonds and Parity Bonds for Redemption. If less than all of the Bonds or Parity Bonds Outstanding are to be redeemed, the portion of any Bond or Parity Bond of a denomination of more than \$5,000 to be redeemed shall be in the principal amount of \$5,000 or an integral multiple thereof. The Trustee shall promptly notify the District in writing of the Bonds or Parity Bonds, or portions thereof, selected for redemption.

Section 4.3. Notice of Redemption. When Bonds or Parity Bonds are due for redemption under Section 4.1 or the terms of a Supplemental Indenture, respectively, the Trustee shall give notice, in the name of the District, of the redemption of such Bonds or Parity Bonds; provided, however, that a notice of a redemption to be made from other than from Sinking Fund Payments shall be conditioned on there being on deposit on the redemption date sufficient money to pay the redemption price of the Bonds or Parity Bonds to be redeemed. Such notice of redemption shall: (a) specify the CUSIP numbers (if any) and the maturity date or dates of the Bonds or Parity Bonds selected for redemption; (b) state the date fixed for redemption and surrender of the Bonds or Parity Bonds to be redeemed; (c) state the redemption price; (d) state the place or places where the Bonds or Parity Bonds are to be redeemed; (e) in the case of Bonds or Parity Bonds to be redeemed only in

part, state the portion of such Bond or Parity Bond that is to be redeemed; (f) state the date of issue of the Bonds or Parity Bonds as originally issued; (g) state the rate of interest borne by each Bond or Parity Bond being redeemed; and (h) state any other descriptive information needed to identify accurately the Bonds or Parity Bonds being redeemed as shall be specified by the Trustee. Such notice shall further state that on the date fixed for redemption, there shall become due and payable on each Bond, Parity Bond or portion thereof called for redemption, the principal thereof, together with any premium, and interest accrued to the redemption date, and that from and after such date, interest thereon shall cease to accrue and be payable. At least 30 days but no more than 45 days prior to the redemption date, the Trustee shall mail a copy of such notice, by first class mail, postage prepaid, to the respective Owners thereof at their addresses appearing on the Bond Register. The actual receipt by the Owner of any Bond or Parity Bond or the original purchaser of any Bond or Parity Bond of notice of such redemption shall not be a condition precedent to redemption, and neither the failure to receive nor any defect in such notice shall affect the validity of the proceedings for the redemption of such Bonds or Parity Bonds, or the cessation of interest on the redemption date. A certificate by the Trustee that notice of such redemption has been given as herein provided shall be conclusive as against all parties, and the Owner shall not be entitled to show that he or she failed to receive notice of such redemption.

In addition to the foregoing notice, further notice shall be given by the Trustee as set out below, but no defect in said further notice nor any failure to give all or any portion of such further notice shall in any manner defeat the effectiveness of a call for redemption if notice thereof is given as above prescribed. In addition to providing any notice of redemption to the Bondowners, if the Bonds are held in book-entry form, each further notice of redemption shall be sent not later than the date that notice of redemption is mailed to the Bondowners by electronic, registered or certified mail or overnight delivery service to the Depository and by electronic notice to the Municipal Securities Rulemaking Board.

Upon the payment of the redemption price of any Bonds and Parity Bonds being redeemed, each check or other transfer of funds issued for such purpose shall to the extent practicable bear the CUSIP number (if any) identifying, by issue and maturity, the Bonds and Parity Bonds being redeemed with the proceeds of such check or other transfer.

With respect to any notice of optional redemption or extraordinary redemption of Bonds or Parity Bonds, such notice shall state that such redemption shall be conditional upon the receipt by the Trustee on or prior to the date fixed for such redemption of moneys sufficient to pay the principal of, premium, if any, and interest on such Bonds or Parity Bonds to be redeemed and that, if such moneys shall not have been so received, said notice shall be of no force and effect and the Trustee shall not be required to redeem such Bonds or Parity Bonds. In the event that such notice of redemption contains such a condition and such moneys are not so received, the redemption shall not be made, and the Trustee shall within a reasonable time thereafter give notice, in the manner in which the notice of redemption was given, that such moneys were not so received.

Section 4.4. Partial Redemption of Bonds or Parity Bonds. Upon surrender by the Owner of a Bond, at the option of such Owner, for mandatory redemption at the Principal Office of the Trustee, payment of such mandatory redemption of the principal amount of a Bond will be paid to such Owner. Upon surrender of any Bond or Parity Bond to be redeemed in part only, the District shall execute and the Trustee shall authenticate and deliver to the Bondowner, at the expense of the District, a new Bond or Bonds or a new Parity Bond or Parity Bonds of authorized denominations equal in aggregate principal amount to the unredeemed portion of the Bonds surrendered, with the

same interest rate and the same maturity or, in the case of surrender of a Parity Bond, a new Parity Bond or Parity Bonds subject to the foregoing limitations. Such mandatory redemption shall be valid upon payment of the amount thereby required to be paid to such Owner, and the District and the Trustee shall be released and discharged from all liability to the extent of such payment.

Section 4.5. Effect of Notice and Availability of Redemption Money. Notice of redemption having been duly given, as provided in Section 4.3, and the amount necessary for the redemption having been made available for that purpose and being available therefor on the date fixed for such redemption:

(a) the Bonds and Parity Bonds, or portions thereof, designated for redemption shall, on the date fixed for redemption, become due and payable at the redemption price thereof as provided in this Indenture or in any Supplemental Indenture with respect to any Parity Bonds, anything in this Indenture or in the Bonds or the Parity Bonds to the contrary notwithstanding;

(b) upon presentation and surrender thereof at the Principal Office of the Trustee, the redemption price of such Bonds and Parity Bonds shall be paid to the Owners thereof;

(c) as of the redemption date, the Bonds or the Parity Bonds, or portions thereof so designated for redemption shall be deemed to be no longer Outstanding and such Bonds or Parity Bonds, or portions thereof, shall cease to bear further interest; and

(d) as of the date fixed for redemption, no Owner of any of the Bonds, Parity Bonds or portions thereof so designated for redemption shall be entitled to any of the benefits of this Indenture or any Supplemental Indenture, or to any other rights, except with respect to payment of the redemption price and interest accrued to the redemption date from the amounts so made available.

ARTICLE V

COVENANTS AND WARRANTY

Section 5.1. Security. The District shall preserve and protect the security pledged hereunder to the Bonds and any Parity Bonds against all claims and demands of all persons.

Section 5.2. Covenants. So long as any of the Bonds or Parity Bonds issued hereunder are Outstanding and unpaid, the District makes the following covenants with the Bondowners under the provisions of the Act and this Indenture (to be performed by the District or its proper officers, agents or employees), which covenants are necessary and desirable to secure the Bonds and Parity Bonds and tend to make them more marketable; provided, however, that said covenants do not require the District to expend any funds or moneys other than the Special Taxes and other amounts deposited to the Special Tax Fund:

(a) Punctual Payment; Against Encumbrances. The District covenants that it will receive all Special Taxes in trust for the Owners and will instruct the City Treasurer to deposit all Special Taxes with the Trustee immediately upon their apportionment to the District, and the District shall have no beneficial right or interest in the amounts so deposited except as provided by this Indenture. All such Special Taxes shall be disbursed, allocated and applied solely to the uses and purposes set forth herein, and shall be accounted for separately and apart from all other money, funds, accounts or other resources of the District.

The District covenants that it will duly and punctually pay or cause to be paid the principal of and interest on every Bond and Parity Bond issued hereunder, together with the premium, if any, thereon on the date, at the place and in the manner set forth in the Bonds and the Parity Bonds and in accordance with this Indenture to the extent that Net Taxes and other amounts pledged hereunder are available therefor, and that the payments into the funds and Accounts created hereunder will be made, all in strict conformity with the terms of the Bonds, any Parity Bonds, this Indenture and any Supplemental Indenture, and that it will faithfully observe and perform all of the conditions, covenants and requirements of this Indenture and all Supplemental Indentures and of the Bonds and any Parity Bonds issued hereunder.

The District will not mortgage or otherwise encumber, pledge or place any charge upon any of the Net Taxes except as provided in this Indenture, and will not issue any obligation or security having a lien or charge upon the Net Taxes superior to or on a parity with the Bonds, other than Parity Bonds. Nothing herein shall prevent the District from issuing or incurring indebtedness that is payable from a pledge of Net Taxes which is subordinate in all respects to the pledge of Net Taxes to repay the Bonds and the Parity Bonds.

(b) Levy of Special Tax. Beginning in Fiscal Year 2021-22 and continuing so long as any Bonds or Parity Bonds issued under this Indenture are Outstanding, the legislative body of the District covenants to levy the Special Tax in an amount sufficient, together with other amounts on deposit in the Special Tax Fund and available for such purpose, to pay: (i) the principal of and interest on the Bonds and any Parity Bonds when due; (ii) the Administrative Expenses; and (iii) any amounts required to replenish the Reserve Account of the Special Tax Fund to the Reserve Requirement. The District further covenants that it will take no actions that would discontinue or cause the discontinuance of the Special Tax levy or the District's authority to levy the Special Tax for so long as the Bonds and any Parity Bonds are Outstanding.

(c) Commence Foreclosure Proceedings. The District covenants for the benefit of the Owners of the Bonds and any Parity Bonds that it will (i) commence judicial foreclosure proceedings against: (a) parcels with delinquent Special Taxes in excess of \$5,000 by the October 1 following the close of each Fiscal Year in which such Special Taxes were due, and (b) all parcels with delinquent Special Taxes by the October 1 following the close of each Fiscal Year in which it receives Special Taxes in an amount which is less than 95% of the total Special Tax levied and the amount on deposit in the Reserve Account is at less than the Reserve Requirement; and (ii) diligently pursue such foreclosure proceedings until the delinquent Special Taxes are paid.

The District covenants that it will deposit the net proceeds of any foreclosure to the Special Tax Fund and will apply such proceeds remaining after the payment of Administrative Expenses to make current payments of principal of and interest on the Bonds and any Parity Bonds, to bring the amount on deposit in the Reserve Account up to the Reserve Requirement and to pay any delinquent installments of principal or interest due on the Bonds and any Parity Bonds.

(d) Payment of Claims. The District will pay and discharge any and all lawful claims for labor, materials or supplies which, if unpaid, might become a lien or charge upon the Net Taxes or other funds in the Special Tax Fund (other than the Administrative Expenses Account therein), or which might impair the security of the Bonds or any Parity Bonds then Outstanding; provided, however, that nothing herein contained shall require the District to make any such payments so long as the District in good faith shall contest the validity of any such claims.

(e) Books and Accounts. The District will keep proper books of records and accounts, separate from all other records and accounts of the District, in which complete and correct entries shall be made of all transactions relating to the Project, the levy of the Special Tax and the deposits to the Special Tax Fund. Such books of records and accounts shall at all times during business hours be subject to the inspection of the Trustee, the Owners of not less than 10% of the principal amount of the Bonds or the Owners of not less than 10% of any issue of Parity Bonds then Outstanding or their representatives authorized in writing.

(f) Federal Tax Covenants. Notwithstanding any other provision of this Indenture, absent an opinion of Bond Counsel that the exclusion from gross income of interest on the Bonds and any Parity Bonds issued on a tax-exempt basis for federal income tax purposes will not be adversely affected for federal income tax purposes, the District covenants to comply with all applicable requirements of the Code necessary to preserve such exclusion from gross income and specifically covenants, without limiting the generality of the foregoing, as follows:

(1) Private Activity. The District will take no action or refrain from taking any action or make any use of the proceeds of the Bonds or any Parity Bonds or of any other moneys or property which would cause the Bonds or any Parity Bonds issued on a tax-exempt basis for federal income tax purposes to be “private activity bonds” within the meaning of Section 141 of the Code;

(2) Arbitrage. The District will make no use of the proceeds of the Bonds or any Parity Bonds or of any other amounts or property, regardless of the source, or take any action or refrain from taking any action which will cause the Bonds or any Parity Bonds issued on a tax-exempt basis for federal income tax purposes to be “arbitrage bonds” within the meaning of Section 148 of the Code;

(3) Federal Guaranty. The District will make no use of the proceeds of the Bonds or any Parity Bonds or take or omit to take any action that would cause the Bonds or any Parity Bonds issued on a tax-exempt basis for federal income tax purposes to be “federally guaranteed” within the meaning of Section 149(b) of the Code;

(4) Information Reporting. The District will take or cause to be taken all necessary action to comply with the informational reporting requirement of Section 149(e) of the Code;

(5) Hedge Bonds. The District will make no use of the proceeds of the Bonds or any Parity Bonds or any other amounts or property, regardless of the source, or take any action or refrain from taking any action that would cause the Bonds or any Parity Bonds issued on a tax-exempt basis for federal income tax purposes to be considered “hedge bonds” within the meaning of Section 149(g) of the Code unless the District takes all necessary action to assure compliance with the requirements of Section 149(g) of the Code to maintain the exclusion from gross income for federal income tax purposes of interest on the Bonds and any applicable Parity Bonds;

(6) Miscellaneous. The District will take no action or refrain from taking any action inconsistent with its expectations stated in the Tax Certificate executed on the Delivery Date by the District in connection with the Bonds and any issue of Parity Bonds and will comply with the covenants and requirements stated therein and incorporated by reference herein;

(7) Other Tax-Exempt Issues. The District will not use proceeds of other tax-exempt securities to redeem any Bonds or Parity Bonds without first obtaining the written opinion of Bond Counsel that doing so will not impair the exclusion from gross income for federal income tax purposes of interest on the Bonds and any Parity Bonds issued on a tax-exempt basis; and

(8) Subsequent Opinions. If the District obtains a subsequent opinion of Bond Counsel other than Stradling Yocca Carlson & Rauth, a Professional Corporation (“SYCR”), where such opinion is required in connection with a change or amendment to this Indenture or the procedures set forth in the Tax Certificate, it will obtain an opinion substantially to the effect originally delivered by SYCR that interest on the Bonds and Parity Bonds which are the subject of such change or amendment is excluded from gross income for federal income tax purposes.

(g) Reduction of Maximum Special Taxes. The District hereby finds and determines that, historically, delinquencies in the payment of special taxes authorized pursuant to the Act in community facilities districts in Southern California have from time to time been at levels that required the levy of special taxes at the maximum authorized rates in order to make timely payment of principal of and interest on the outstanding indebtedness of such community facilities districts. For this reason, the District hereby determines that a reduction in the maximum Special Tax rates authorized to be levied on parcels in the District below the levels provided in this Section 5.2(g) would interfere with the timely retirement of the Bonds and Parity Bonds. The District determines it to be necessary in order to preserve the security for the Bonds and Parity Bonds to covenant, and, to the maximum extent that the law permits it to do so, the District hereby does covenant, that it shall not initiate proceedings to reduce the maximum Special Tax rates for the District.

(h) Covenants to Defend. The District covenants that, in the event that any initiative is adopted by the qualified electors in the District which purports to reduce the maximum Special Tax below the levels specified in Section 5.2(g) above or to limit the power of the District to levy the Special Taxes for the purposes set forth in Section 5.2(b) above, it will commence and pursue legal action in order to preserve its ability to comply with such covenants.

(i) Limitation on Right to Tender Bonds. The District hereby covenants that it will not adopt any policy pursuant to Section 53341.1 of the Act permitting the tender of Bonds or Parity Bonds in full payment or partial payment of any Special Taxes unless the District shall have first received a certificate from an Independent Financial Consultant that the acceptance of such a tender will not result in the District having insufficient Special Tax revenues to pay the principal of and interest on the Bonds and Parity Bonds when due.

(j) Continuing Disclosures. The District covenants to comply with the terms of the Continuing Disclosure Agreement and with the terms of any continuing disclosure agreement executed by the District with respect to any Parity Bonds in order to assist the underwriter thereof in complying with Rule 15(c)2-12 adopted by the Securities and Exchange Commission.

(k) Further Assurances. The District shall make, execute and deliver any and all such further agreements, instruments and assurances as may be reasonably necessary or proper to carry out the intention or to facilitate the performance of this Indenture and for the better assuring and confirming unto the Owners of the Bonds and any Parity Bonds of the rights and benefits provided in this Indenture.

ARTICLE VI

AMENDMENTS TO INDENTURE**Section 6.1. Supplemental Indentures or Orders Not Requiring Bondowner Consent.**

The District may from time to time, and at any time, without notice to or consent of any of the Bondowners, adopt Supplemental Indentures for any of the following purposes:

(a) to cure any ambiguity, to correct or supplement any provisions herein which may be inconsistent with any other provision herein, or to make any other provision with respect to matters or questions arising under this Indenture or in any additional resolution or order, provided that such action is not materially adverse to the interests of the Bondowners;

(b) to add to the covenants and agreements of and the limitations and the restrictions upon the District contained in this Indenture, other covenants, agreements, limitations and restrictions to be observed by the District which are not contrary to or inconsistent with this Indenture as theretofore in effect or which further secure Bond or Parity Bond payments;

(c) to provide for the issuance of any Parity Bonds, and to provide the terms and conditions under which such Parity Bonds may be issued, subject to and in accordance with the provisions of this Indenture;

(d) to modify, amend or supplement this Indenture in such manner as to permit the qualification hereof under the Trust Indenture Act of 1939, as amended, or any similar federal statute hereafter in effect, or to comply with the Code or regulations issued thereunder, and to add such other terms, conditions and provisions as may be permitted by said act or similar federal statute, and which shall not materially adversely affect the interests of the Owners of the Bonds or any Parity Bonds then Outstanding;

(e) subject to the provisions of Section 5.2(g), to modify, alter or amend the Rate and Method in any manner with respect to the Bonds and Parity Bonds Outstanding as of the date of such amendment; or

(f) to modify, alter, amend or supplement this Indenture in any other respect which is not materially adverse to the Bondowners.

Section 6.2. Supplemental Indentures or Orders Requiring Bondowner Consent.

Exclusive of the Supplemental Indentures described in Section 6.1, the Owners of not less than a majority in aggregate principal amount of the Bonds and Parity Bonds Outstanding shall have the right to consent to and approve the adoption by the District of such Supplemental Indentures as shall be deemed necessary or desirable by the District for the purpose of waiving, modifying, altering, amending, adding to or rescinding, in any particular, any of the terms or provisions contained in this Indenture; provided, however, that nothing herein shall permit, or be construed as permitting: (a) an extension of the maturity date of the principal, or the payment date of interest on, any Bond or Parity Bond; (b) a reduction in the principal amount of, or redemption premium on, any Bond or Parity Bond or the rate of interest thereon; (c) a preference or priority of any Bond or Parity Bond over any other Bond or Parity Bond; or (d) a reduction in the aggregate principal amount of the Bonds and Parity Bonds the Owners of which are required to consent to such Supplemental Indenture, without the consent of the Owners of all Bonds and Parity Bonds then Outstanding.

If at any time the District shall desire to adopt a Supplemental Indenture, which pursuant to the terms of this Section shall require the consent of the Bondowners, the District shall so notify the Trustee and shall deliver to the Trustee a copy of the proposed Supplemental Indenture. The Trustee shall, at the expense of the District, cause notice of the proposed Supplemental Indenture to be mailed, by first class mail, postage prepaid, to all Bondowners at their addresses as they appear in the Bond Register. Such notice shall briefly set forth the nature of the proposed Supplemental Indenture and shall state that a copy thereof is on file at the Principal Office of the Trustee for inspection by all Bondowners. The failure of any Bondowners to receive such notice shall not affect the validity of such Supplemental Indenture when consented to and approved by the Owners of not less than a majority in aggregate principal amount of the Bonds and Parity Bonds Outstanding as required by this Section. Whenever at any time within one year after the date of the first mailing of such notice, the Trustee shall receive an instrument or instruments purporting to be executed by the Owners of not less than a majority in aggregate principal amount of the Bonds and Parity Bonds Outstanding, which instrument or instruments shall refer to the proposed Supplemental Indenture described in such notice, and shall specifically consent to and approve the adoption thereof by the District substantially in the form of the copy referred to in such notice as on file with the Trustee, such proposed Supplemental Indenture, when duly adopted by the District, shall thereafter become a part of the proceedings for the issuance of the Bonds and any Parity Bonds. In determining whether the Owners of a majority of the aggregate principal amount of the Bonds and Parity Bonds have consented to the adoption of any Supplemental Indenture, Bonds or Parity Bonds that are owned by the District, or by any person directly or indirectly controlling or controlled by or under the direct or indirect common control with the District, shall be disregarded and shall be treated as though they were not Outstanding for the purpose of any such determination.

Upon the adoption of any Supplemental Indenture and the receipt of consent to any such Supplemental Indenture from the Owners of not less than a majority in aggregate principal amount of the Outstanding Bonds and Parity Bonds in instances where such consent is required pursuant to the provisions of this Section, this Indenture shall be, and shall be deemed to be, modified and amended in accordance therewith, and the respective rights, duties and obligations under this Indenture of the District and all Owners of Outstanding Bonds and Parity Bonds shall thereafter be determined, exercised and enforced hereunder, subject in all respects to such modifications and amendments.

Section 6.3. Notation of Bonds or Parity Bonds; Delivery of Amended Bonds or Parity Bonds. After the effective date of any action taken as hereinabove provided, the District may determine that the Bonds or any Parity Bonds may bear a notation, by endorsement in form approved by the District, as to such action, and in that case upon demand of the Owner of any Outstanding Bond or Parity Bond at such effective date and presentation of such Owner's Bond or Parity Bond for the purpose at the Principal Office of the Trustee or at such additional offices as the Trustee may select and designate for that purpose, a suitable notation as to such action shall be made on such Bonds or Parity Bonds. If the District shall so determine, new Bonds or Parity Bonds so modified as, in the opinion of the District, shall be necessary to conform to such action shall be prepared and executed, and in that case upon demand of the Owner of any Outstanding Bond or Parity Bond at such effective date such new Bonds or Parity Bonds shall be exchanged at the Principal Office of the Trustee or at such additional offices as the Trustee may select and designate for that purpose, without cost to each Owner of Outstanding Bonds or Parity Bonds, upon surrender of such Outstanding Bonds or Parity Bonds.

In executing, or accepting the additional trusts created by any Supplemental Indenture permitted by this Article or the modification thereby of the trusts created by this Indenture, the

Trustee shall be entitled to receive, and shall be fully protected in relying upon, an opinion of counsel stating that the execution of such supplemental indenture is authorized or permitted by this Indenture and complies with the terms hereof. The Trustee may, but shall not be obligated to, enter into any such Supplemental Indenture which affects the Trustee's own rights, duties or immunities under this Indenture or otherwise.

ARTICLE VII

TRUSTEE

Section 7.1. Trustee. Wilmington Trust, National Association shall be the Trustee for the Bonds and any Parity Bonds unless and until another Trustee is appointed by the District hereunder. The District may, at any time, appoint a successor Trustee satisfying the requirements of Section 7.2 for the purpose of receiving all money that the District is required to deposit with the Trustee hereunder and to allocate, use and apply the same as provided in this Indenture.

The Trustee is hereby authorized to and shall mail by first class mail, postage prepaid, or wire transfer in accordance with Section 2.5, interest payments to the Bondowners, to select Bonds and Parity Bonds for redemption, and to maintain the Bond Register. The Trustee is hereby authorized to pay the principal of and premium, if any, on the Bonds and Parity Bonds when the same are duly presented to it for payment at maturity or on call and redemption, to provide for the registration of transfer and exchange of Bonds and Parity Bonds presented to it for such purposes, to provide for the cancellation of Bonds and Parity Bonds and to provide for the authentication of Bonds and Parity Bonds, and shall perform all other duties assigned to or imposed on it as provided in this Indenture. The Trustee shall keep accurate records of all funds administered by it and all Bonds and Parity Bonds paid, discharged and cancelled by it.

The Trustee is hereby authorized to redeem the Bonds and Parity Bonds when duly presented for payment at maturity, or on redemption prior to maturity. The Trustee shall cancel all Bonds and Parity Bonds upon payment thereof in accordance with the provisions of Section 10.1.

The District shall from time to time, subject to any agreement between the District and the Trustee then in force, pay to the Trustee compensation for its services, reimburse the Trustee for all of its advances and expenditures, including, but not limited to, advances to and fees and expenses of independent accountants or counsel employed by it in the exercise and performance of its powers and duties hereunder, and indemnify and save the Trustee, its officers, directors, employees and agents, harmless against costs, claims, expenses and liabilities, including, without limitation, fees and expenses of its attorneys, not arising from its own negligence or willful misconduct which it may incur in the exercise and performance of its powers and duties hereunder. The foregoing obligation of the District to indemnify the Trustee shall survive the removal or resignation of the Trustee or the discharge of the Bonds.

Section 7.2. Removal of Trustee. The District may at any time at its sole discretion, and shall at the direction of a majority of the Owners, remove the Trustee initially appointed, and any successor thereto, by delivering to the Trustee a 30-day written notice of its decision to remove the Trustee. The District shall appoint a successor or successors thereto, provided that any such successor shall be a bank, national banking association or trust company having a combined capital (exclusive of borrowed capital) and surplus of at least \$100,000,000, and subject to supervision or examination by federal or state authority. If any bank, national banking association or trust company

appointed as a successor publishes a report of condition at least annually, pursuant to law or to the requirements of any supervising or examining authority above referred to, then for the purposes of this Section the combined capital and surplus of such bank, national banking association or trust company shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. Any removal of the Trustee and appointment of a successor Trustee shall become effective only upon acceptance of appointment by the successor Trustee and notice being sent by the successor Trustee to the Bondowners of the successor Trustee's identity and address.

Section 7.3. Resignation of Trustee. The Trustee may at any time resign and be discharged from its duties and obligations hereunder by giving written notice to the District and by giving to the Owners notice of such resignation, which notice shall be mailed to the Owners at their addresses appearing in the registration books at the Principal Office of the Trustee. Upon receiving such notice of resignation, the District shall promptly appoint a successor Trustee satisfying the criteria in Section 7.2 by an instrument in writing. Any resignation or removal of the Trustee and appointment of a successor Trustee shall become effective only upon acceptance of appointment by the successor Trustee. If no successor Trustee shall have been appointed and have accepted appointment within thirty (30) calendar days of giving notice of removal or notice of resignation as aforesaid, the resigning Trustee, at the sole expense of the District, or any Bondowner (on behalf of itself and all other Bondowners) may petition any court of competent jurisdiction for the appointment of a successor Trustee and other appropriate relief, and such court may thereupon, after such notice (if any) as it may deem proper, appoint such successor Trustee or grant such other relief.

Section 7.4. Liability of Trustee. The recitals of fact and all promises, covenants and agreements contained herein and in the Bonds and any Parity Bonds shall be taken as statements, promises, covenants and agreements of the District, and the Trustee assumes no responsibility for the correctness of the same and makes no representations as to the validity or sufficiency of this Indenture, the Bonds or any Parity Bonds, and shall incur no responsibility in respect thereof, other than in connection with its duties or obligations specifically set forth herein, in the Bonds and any Parity Bonds, or in the certificate of authentication assigned to or imposed upon the Trustee. The Trustee shall be under no responsibility or duty with respect to the issuance of the Bonds or any Parity Bonds for value. The Trustee shall not be liable in connection with the performance of its duties hereunder, except for its own negligence or willful misconduct.

The Trustee shall be entitled to request and receive written instructions from the District and/or Owners and shall have no responsibility or liability for any losses or damages of any nature that may arise from any action taken or not taken by the Trustee in accordance with the written direction of any such party. The Trustee shall not be liable with respect to any action taken or omitted to be taken by it in accordance with the written direction of the Owners of not less than a majority in aggregate principal amount of the Bonds at the time Outstanding relating to the time, method and place of conducting any proceeding for any remedy available to the Trustee, or exercising any trust or power conferred upon the Trustee under this Indenture.

The Trustee shall be under no obligation to exercise any of the rights or powers vested in it by this Indenture at the request or direction of an Owner and/or the District, pursuant to the provisions of this Indenture, unless such party shall have offered to the Trustee security or indemnity (satisfactory to the Trustee in its sole and absolute discretion) against the costs, expenses and liabilities which may be incurred by it in compliance with such request or direction. The immunities extended to the Trustee also extend to its directors, officers, employees and agents (including its counsel).

Neither the Trustee nor any of its directors, officers, employees, agents or affiliates shall be responsible for nor have any duty to monitor the performance or any action of the District or any of its directors, members, officers, agents, affiliates or employee, nor shall it have any liability in connection with the malfeasance or nonfeasance by such party. The Trustee may assume performance by all such persons of their respective obligations. The Trustee shall have no enforcement or notification obligations relating to breaches of representations or warranties of any other person. The Trustee shall be conclusively protected in acting upon any notice, resolution, request, consent, order, judgment, decree, certificate, report, Bond, Parity Bond, facsimile transmission, electronic mail or other paper or document believed by it to be genuine and to have been signed or presented by the proper party or parties. The Trustee shall be entitled to rely on and shall not be liable for any action taken or omitted to be taken by the Trustee in accordance with the advice of counsel or other professionals retained or consulted by the Trustee. The Trustee may act through attorneys or agents and shall not be responsible for the acts or omissions of any such attorney or agent appointed with due care. The Trustee may consult with counsel, who may be counsel to the District, with regard to legal questions, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered hereunder in accordance therewith.

The Trustee shall not be bound to recognize any person as the Owner of a Bond or Parity Bond unless and until such Bond or Parity Bond is submitted for inspection, if required, and title thereto is satisfactorily established, if disputed.

Whenever in the administration of its duties under this Indenture the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action hereunder, the Trustee may, at the expense of the District, request, rely on and act in accordance with officer's certificates and/or opinions of counsel (unless other evidence in respect thereof be herein specifically prescribed), and shall incur no liability and shall be fully protected in acting or refraining from acting in accordance with such officer's certificates and opinions of counsel, but in its discretion the Trustee may, in lieu thereof, accept other evidence of such matter or may require such additional evidence as to it may seem reasonable.

The Trustee shall have no duty or obligation whatsoever to enforce the collection of Special Taxes or other funds to be deposited with it hereunder, or as to the correctness of any amounts received, but its liability shall be limited to the proper accounting for such funds as it shall actually receive. No provision in this Indenture shall require the Trustee to expend or risk its own funds or otherwise incur any financial liability in the performance of any of its duties hereunder, or in the exercise of its rights or powers.

The Trustee shall not be deemed to have knowledge of any events or other information, or default or Event of Default, until an officer at the Principal Office of the Trustee who is responsible for the administration of its duties hereunder shall have actual knowledge thereof or the Trustee shall have received written notice thereof at the Principal Office of the Trustee.

The Trustee shall not be considered in breach of or in default in its obligations hereunder and will not incur any liability for not performing any act or fulfilling any duty, obligation or responsibility hereunder, or progress in respect thereto in the event of enforced delay (“**unavoidable delay**”) in the performance of such obligations caused, directly or indirectly, by circumstances beyond its control, including without limitation, any act or provision of any present or future law or regulation or governmental authority; acts of God; earthquakes; fires; floods; wars; terrorism; civil or

military disturbances; sabotage; epidemics; quarantine restrictions; riots; interruptions, loss or malfunctions of utilities, computer (hardware or software) or communications service; accidents; labor disputes; acts of civil or military authority or governmental actions; or the unavailability of the Federal Reserve Bank wire or telex or other wire or communication facility. In no event shall the Trustee be liable for incidental, indirect, punitive, special or consequential loss or damage of any kind whatsoever (including, but not limited to, loss of profit), in connection with or arising out of the Project or this Indenture for the existence, furnishing, functioning or use and possession of the Project, irrespective of whether the Trustee has been advised of the likelihood of such loss or damage and regardless of the form of action

The Trustee shall be entitled to request and receive written instructions from the District or other parties and shall have no responsibility or liability for any losses or damages of any nature that may arise from any action taken or not taken by the Trustee in accordance with the written direction of the District or such other parties. The Trustee shall have the right to accept and act upon instructions, including funds transfer instructions (“**Instructions**”) given pursuant to this Indenture and delivered using Electronic Means. (“**Electronic Means**” shall mean the following communications methods: e-mail, facsimile transmission, secure electronic transmission containing applicable authorization codes, passwords and/or authentication keys issued by the Trustee, or another method or system specified by the Trustee as available for use in connection with its services hereunder). The District shall provide to the Trustee a Certificate of an Authorized Representative of the District listing officers with the authority to provide such Instructions (“**Authorized Officers**”) and containing specimen signatures of such Authorized Officers, which incumbency certificate shall be amended by the District whenever a person is to be added or deleted from the listing. If the District elects to give the Trustee Instructions using Electronic Means and the Trustee in its discretion elects to act upon such Instructions, the Trustee’s understanding of such Instructions shall be deemed controlling. The District understands and agrees that the Trustee cannot determine the identity of the actual sender of such Instructions and that the Trustee shall conclusively presume that directions that purport to have been sent by an Authorized Officer listed on the incumbency certificate provided to the Trustee have been sent by such Authorized Officer. The District shall be responsible for ensuring that only Authorized Officers transmit such Instructions to the Trustee and that the District and all Authorized Officers are solely responsible to safeguard the use and confidentiality of applicable user and authorization codes, passwords and/or authentication keys upon receipt by the District. The Trustee shall not be liable for any losses, costs or expenses arising directly or indirectly from the Trustee’s reliance upon and compliance with such Instructions notwithstanding the fact that such directions conflict or are inconsistent with a subsequent written instruction. The District agrees: (i) to assume all risks arising out of the use of Electronic Means to submit Instructions to the Trustee, including without limitation the risk of the Trustee acting on unauthorized Instructions, and the risk of interception and misuse by third parties; (ii) that it is fully informed of the protections and risks associated with the various methods of transmitting Instructions to the Trustee and that there may be more secure methods of transmitting Instructions than the method(s) selected by the District; (iii) that the security procedures (if any) to be followed in connection with its transmission of Instructions provide to it a commercially reasonable degree of protection in light of its particular needs and circumstances; and (iv) to notify the Trustee immediately upon learning of any compromise or unauthorized use of the security procedures.

The permissive right of the Trustee to do things enumerated in this Indenture shall not be construed as a duty and it shall not be answerable for other than its negligence or willful misconduct.

All immunities, indemnifications and releases from liability granted herein to the Trustee will extend to the directors, employees, officers and agents thereof.

The Trustee shall be under no obligation to exercise any of the rights or powers vested in it by this Indenture at the request, order or direction of any of the Owners pursuant to the provisions of this Indenture unless such Owners shall have offered to the Trustee reasonable security or indemnity against the costs, expenses and liabilities which may be incurred therein or thereby.

The Trustee shall not be responsible for or accountable to anyone for the subsequent use or application of any moneys which shall be released or withdrawn in accordance with the provisions hereof.

The Trustee may execute any of the trusts or powers hereof and perform the duties required of it hereunder either directly or by or through attorneys or agents, shall not be liable for the acts or omissions of such attorneys or agents appointed with due care, and shall be entitled to rely on advice of counsel concerning all matters of trust and its duty hereunder.

The Trustee, prior to the occurrence of an Event of Default and after the curing of all Events of Default which may have occurred, undertakes to perform such duties and only such duties as are specifically set forth in this Indenture, and no implied covenants, duties or obligations shall be read into this Indenture against the Trustee. These duties shall be deemed purely ministerial in nature, and the Trustee shall not be liable except for the performance of such duties, and no implied covenants or obligations shall be read into this Indenture against the Trustee. In case an Event of Default has occurred (which has not been cured) the Trustee shall exercise such of the rights and powers vested in it by this Indenture, and use the same degree of care and skill in their exercise, as a prudent person would exercise or use under the circumstances in the conduct of his own affairs.

The Trustee shall have no responsibility or liability with respect to any information, statements or recital in any offering memorandum or other disclosure material prepared or distributed with respect to the issuance of these Bonds.

The Trustee shall not be required to determine the legality of any investments.

Section 7.5. Merger or Consolidation. Any company into which the Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which the Trustee may sell or transfer all or substantially all of its corporate trust business, shall be the successor to the Trustee without the execution or filing of any paper or further act, anything herein to the contrary notwithstanding.

ARTICLE VIII

EVENTS OF DEFAULT; REMEDIES

Section 8.1. Events of Default. Any one or more of the following events shall constitute an “Event of Default”:

(a) default in the due and punctual payment of the principal of or redemption premium, if any, on any Bond or Parity Bond when and as the same shall become due and payable, whether at maturity as therein expressed, by declaration or otherwise;

(b) default in the due and punctual payment of the interest on any Bond or Parity Bond when and as the same shall become due and payable; or

(c) except as described in subsections (a) or (b), default by the District in the observance of any of the agreements, conditions or covenants on its part contained in this Indenture, the Bonds or any Parity Bonds, and such default shall have continued for a period of 30 days after the District shall have been given notice in writing of such default by the Trustee or the Owners of 25% in aggregate principal amount of the Outstanding Bonds and Parity Bonds; provided, however, that such default shall not constitute an Event of Default hereunder if the District shall commence to cure such default within said 30-day period and thereafter diligently and in good faith proceed to cure such default within a reasonable period of time not to exceed 90 days after such notice.

The Trustee agrees to give notice to the Owners as soon as practicable upon the occurrence of an Event of Default under subsections (a) or (b) above and within 30 days of the Trustee’s knowledge of an event of default under subsection (c) above.

Section 8.2. Remedies of Owners. Upon the occurrence of an Event of Default, the Trustee may pursue any available remedy at law or in equity to enforce the payment of the principal of, premium, if any, and interest on the Outstanding Bonds and Parity Bonds, and to enforce any rights of the Trustee under or with respect to this Indenture, including:

(a) by mandamus or other suit or proceeding at law or in equity to enforce the Trustee’s rights against the District and any of the members, officers and employees of the District, and to compel the District or any such members, officers or employees to perform and carry out their duties under the Act and their agreements with the Owners as provided in this Indenture;

(b) by suit in equity to enjoin any actions or things which are unlawful or violate the rights of the Owners; or

(c) by a suit in equity to require the District and its members, officers and employees to account as the trustee of an express trust.

If an Event of Default shall have occurred and be continuing and if requested so to do by the Owners of at least twenty-five percent (25%) in aggregate principal amount of Outstanding Bonds and Parity Bonds and if indemnified to its satisfaction, the Trustee shall be obligated to exercise such one or more of the rights and powers conferred by this Article VIII, as the Trustee, being advised by counsel, shall deem most expedient in the interests of the Owners of the Bonds and Parity Bonds.

No remedy herein conferred upon or reserved to the Trustee or to the Owners is intended to be exclusive of any other remedy. Every such remedy shall be cumulative and shall be in addition to every other remedy given hereunder or now or hereafter existing, at law or in equity or by statute or otherwise, and may be exercised without exhausting and without regard to any other remedy conferred by the Act or any other law.

Section 8.3. Application of Revenues and Other Funds After Default. All amounts received by the Trustee pursuant to any right given or action taken by the Trustee under the provisions of this Indenture relating to the Bonds and Parity Bonds shall be applied by the Trustee in the following order upon presentation of the several Bonds and Parity Bonds:

First, to the payment of the fees, costs and expenses of the Trustee in declaring such Event of Default and in carrying out the provisions of this Article VIII, including reasonable compensation to its agents, attorneys and counsel, and to the payment of all other outstanding fees and expenses of the Trustee; and

Second, to the payment of the whole amount of interest on and principal of the Bonds and Parity Bonds then due and unpaid, with interest on overdue installments of principal and interest to the extent permitted by law at the net effective rate of interest then borne by the Outstanding Bonds and Parity Bonds; provided, however, that in the event that such amounts shall be insufficient to pay the full amount of such interest and principal, then such amounts shall be applied in the following order of priority:

(a) first to the payment of all installments of interest on the Bonds and Parity Bonds then due and unpaid on a pro rata basis based on the total amount then due and owing,

(b) second, to the payment of all installments of principal, including Sinking Fund Payments, of the Bonds and Parity Bonds then due and unpaid on a pro rata basis based on the total amount then due and owing; and

(c) third, to the payment of interest on overdue installments of principal and interest on the Bonds and Parity Bonds on a pro rata basis based on the total amount then due and owing.

Section 8.4. Power of Trustee to Control Proceedings. In the event that the Trustee, upon the happening of an Event of Default, shall have taken any action, by judicial proceedings or otherwise, pursuant to its duties hereunder, whether upon its own discretion or upon the request of the Owners of twenty-five percent (25%) in aggregate principal amount of the Bonds and Parity Bonds then Outstanding, it shall have full power, in the exercise of its discretion for the best interests of the Owners of the Bonds and Parity Bonds, with respect to the continuance, discontinuance, withdrawal, compromise, settlement or other disposal of such action; provided, however, that the Trustee shall not, unless there no longer continues an Event of Default, discontinue, withdraw, compromise or settle, or otherwise dispose of any litigation pending at law or in equity, if at the time there has been filed with it a written request signed by the Owners of a majority in aggregate principal amount of the Outstanding Bonds and Parity Bonds hereunder opposing such discontinuance, withdrawal, compromise, settlement or other such litigation. Any suit, action or proceeding that any Owner of Bonds or Parity Bonds shall have the right to bring to enforce any right or remedy hereunder may be brought by the Trustee for the equal benefit and protection of all Owners of Bonds and Parity Bonds similarly situated and the Trustee is hereby appointed (and the

successive respective Owners of the Bonds and Parity Bonds issued hereunder, by taking and holding the same, shall be conclusively deemed so to have appointed it) the true and lawful attorney in fact of the respective Owners of the Bonds and Parity Bonds for the purposes of bringing any such suit, action or proceeding and to do and perform any and all acts and things for and on behalf of the respective Owners of the Bonds and Parity Bonds as a class or classes, as may be necessary or advisable in the opinion of the Trustee as such attorney-in-fact.

Section 8.5. Appointment of Receivers. Upon the occurrence of an Event of Default hereunder, and upon the filing of a suit or other commencement of judicial proceedings to enforce the rights of the Trustee and of the Owners of the Bonds and Parity Bonds under this Indenture, the Trustee shall be entitled, as a matter of right, to the appointment of a receiver or receivers of the Net Taxes and other amounts pledged hereunder, pending such proceedings, with such powers as the court making such appointment shall confer.

Section 8.6. Non-Waiver. Nothing in this Article VIII or in any other provision of this Indenture, or in the Bonds or the Parity Bonds, shall affect or impair the obligation of the District, which is absolute and unconditional, to pay the interest on and principal of the Bonds and Parity Bonds to the respective Owners of the Bonds and Parity Bonds at the respective dates of maturity, as herein provided, out of the Net Taxes and other moneys herein pledged for such payment.

A waiver of any default or breach of duty or contract by the Trustee or any Owners shall not affect any subsequent default or breach of duty or contract, or impair any rights or remedies on any such subsequent default or breach. No delay or omission of the Trustee or any Owner of any of the Bonds or Parity Bonds to exercise any right or power accruing upon any default shall impair any such right or power or shall be construed to be a waiver of any such default or an acquiescence therein; and every power and remedy conferred upon the Trustee or the Owners by the Act or by this Article VIII may be enforced and exercised from time to time and as often as shall be deemed expedient by the Trustee or the Owners, as the case may be.

Section 8.7. Limitations on Rights and Remedies of Owners. No Owner of any Bond or Parity Bond issued hereunder shall have the right to institute any suit, action or proceeding at law or in equity, for any remedy under or upon this Indenture, unless: (a) such Owner shall have previously given to the Trustee written notice of the occurrence of an Event of Default; (b) the Owners of a majority in aggregate principal amount of all the Bonds and Parity Bonds then Outstanding shall have made written request upon the Trustee to exercise the powers hereinbefore granted or to institute such action, suit or proceeding in its own name; (c) said Owners shall have tendered to the Trustee indemnity reasonably acceptable to the Trustee against the costs, expenses and liabilities to be incurred in compliance with such request; and (d) the Trustee shall have refused or omitted to comply with such request for a period of sixty (60) days after such written request shall have been received by, and said tender of indemnity shall have been made to, the Trustee.

Such notification, request, tender of indemnity and refusal or omission are hereby declared, in every case, to be conditions precedent to the exercise by any Owner of Bonds and Parity Bonds of any remedy hereunder; it being understood and intended that no one or more Owners of Bonds and Parity Bonds shall have any right in any manner whatever by their action to enforce any right under this Indenture, except in the manner herein provided, and that all proceedings at law or in equity to enforce any provision of this Indenture shall be instituted, had and maintained in the manner herein provided and for the equal benefit of all Owners of the Outstanding Bonds and Parity Bonds.

The right of any Owner of any Bond and Parity Bond to receive payment of the principal of and interest and premium (if any) on such Bond and Parity Bond as herein provided or to institute suit for the enforcement of any such payment, shall not be impaired or affected without the written consent of such Owner, notwithstanding the foregoing provisions of this Section or any other provision of this Indenture.

Section 8.8. Termination of Proceedings. In case the Trustee shall have proceeded to enforce any right under this Indenture by the appointment of a receiver or otherwise, and such proceedings shall have been discontinued or abandoned for any reason, or shall have been determined adversely, then and in every such case, the District, the Trustee and the Owners shall be restored to their former positions and rights hereunder, respectively, with regard to the property subject to this Indenture, and all rights, remedies and powers of the Trustee shall continue as if no such proceedings had been taken.

ARTICLE IX

DEFEASANCE AND PARITY BONDS

Section 9.1. Defeasance. If the District shall pay or cause to be paid, or there shall otherwise be paid, to the Owner of an Outstanding Bond or Parity Bond the interest due thereon and the principal thereof, at the times and in the manner stipulated in this Indenture or any Supplemental Indenture, then the Owner of such Bond or Parity Bond shall cease to be entitled to the pledge of Net Taxes, and, other than as set forth below, all covenants, agreements and other obligations of the District to the Owner of such Bond or Parity Bond under this Indenture and any Supplemental Indenture relating to such Parity Bond shall thereupon cease, terminate and become void and be discharged and satisfied. In the event of a defeasance of all Outstanding Bonds and Parity Bonds pursuant to this Section, the Trustee shall execute and deliver to the District all such instruments as may be desirable to evidence such discharge and satisfaction, and the Trustee shall pay over or deliver to the District's general fund all money or securities held by it pursuant to this Indenture which are not required for the payment of the principal of, premium, if any, and interest due on such Bonds and Parity Bonds.

Any Outstanding Bond or Parity Bond shall be deemed to have been paid within the meaning expressed in the first paragraph of this Section if such Bond or Parity Bond is paid in any one or more of the following ways:

(a) by paying or causing to be paid the principal of, premium, if any, and interest on such Bond or Parity Bond, as and when the same become due and payable;

(b) by depositing with the Trustee, in trust, at or before maturity, money which, together with the amounts then on deposit in the Special Tax Fund (exclusive of the Administrative Expenses Account) and available for such purpose, is fully sufficient to pay the principal of, premium, if any, and interest on such Bond or Parity Bond, as and when the same shall become due and payable; or

(c) by depositing with the Trustee or another escrow bank appointed by the District, in trust, Federal Securities, in which the District may lawfully invest its money, in such amount as will be sufficient, together with the interest to accrue thereon and moneys then on deposit in the Special Tax Fund (exclusive of the Administrative Expenses Account) and available for such purpose,

together with the interest to accrue thereon, to pay and discharge the principal of, premium, if any, and interest on such Bond or Parity Bond, as and when the same shall become due and payable.

If paid as provided above, then, at the election of the District, and notwithstanding that any Outstanding Bonds and Parity Bonds shall not have been surrendered for payment, all obligations of the District under this Indenture and any Supplemental Indenture with respect to such Bond or Parity Bond shall cease and terminate, except for the obligation of the Trustee to pay or cause to be paid to the Owners of any such Bond or Parity Bond not so surrendered and paid, all sums due thereon and except for the covenants of the District contained in Section 5.2(f) or any covenants in a Supplemental Indenture relating to compliance with the Code. Notice of such election shall be filed with the Trustee not less than ten days prior to the proposed defeasance date, or such shorter period of time as may be acceptable to the Trustee. In connection with a defeasance under clauses (b) or (c) above, there shall be provided to the District a verification report from an independent nationally recognized certified public accountant stating its opinion as to the sufficiency of the moneys or securities deposited with the Trustee or the escrow bank to pay and discharge the principal of, premium, if any, and interest on all Outstanding Bonds and Parity Bonds to be defeased in accordance with this Section, as and when the same shall become due and payable, and an opinion of Bond Counsel (which may rely upon the opinion of the certified public accountant) to the effect that the Bonds or Parity Bonds being defeased have been legally defeased in accordance with this Indenture and any applicable Supplemental Indenture.

Upon a defeasance, the Trustee, upon request of the District, shall release the rights of the Owners of such Bonds and Parity Bonds that have been defeased under this Indenture and any Supplemental Indenture and execute and deliver to the District all such instruments as may be desirable to evidence such release, discharge and satisfaction. In the case of a defeasance hereunder of all Outstanding Bonds and Parity Bonds, the Trustee shall pay over or deliver to the District any funds held by the Trustee at the time of a defeasance that are not required for the purpose of paying and discharging the principal of or interest on the Bonds and Parity Bonds when due. The Trustee shall, at the written direction of the District, mail, first class, postage prepaid, a notice to the Bondowners whose Bonds or Parity Bonds have been defeased, in the form directed by the District, stating that the defeasance has occurred.

Section 9.2. Conditions for the Issuance of Parity Bonds and Other Additional Indebtedness. The District may at any time after the issuance and delivery of the Bonds hereunder issue Parity Bonds payable from the Net Taxes and other amounts deposited in the Special Tax Fund (other than in the Administrative Expenses Account therein) and secured by a lien and charge upon such amounts equal to the lien and charge securing the Outstanding Bonds and any other Parity Bonds theretofore issued hereunder or under any Supplemental Indenture; provided, however, that Parity Bonds may only be issued for the purpose of refunding all or a portion of the Bonds or any Parity Bonds then Outstanding. Parity Bonds may be issued subject to the following additional specific conditions, which are hereby made conditions precedent to the issuance of any such Parity Bonds:

(a) The District shall be in compliance with all covenants set forth in this Indenture and any Supplemental Indenture then in effect, and a certificate of the District to that effect shall have been filed with the Trustee; provided, however, that Parity Bonds may be issued notwithstanding the fact that the District is not in compliance with all such covenants so long as immediately following the issuance of such Parity Bonds the District will be in compliance with all such covenants.

(b) The issuance of such Parity Bonds shall have been duly authorized pursuant to the Act and all applicable laws, and the issuance of such Parity Bonds shall have been provided for by a Supplemental Indenture duly adopted by the District which shall specify the following:

(1) the purpose for which such Parity Bonds are to be issued and the fund or funds into which the proceeds thereof are to be deposited, including a provision requiring the proceeds of such Parity Bonds to be applied solely for the purpose of refunding any Outstanding Bonds or Parity Bonds, including payment of all costs and the funding of all reserves incidental to or connected with such refunding;

(2) the authorized principal amount of such Parity Bonds;

(3) the date and the maturity date or dates of such Parity Bonds; provided that: (i) each maturity date shall fall on a September 1; (ii) all such Parity Bonds of like maturity shall be identical in all respects, except as to number; and (iii) fixed serial maturities or Sinking Fund Payments, or any combination thereof, shall be established to provide for the retirement of all such Parity Bonds on or before their respective maturity dates;

(4) the description of the Parity Bonds, the place of payment thereof and the procedure for execution and authentication;

(5) the denominations and method of numbering of such Parity Bonds;

(6) the amount and due date of each mandatory Sinking Fund Payment, if any, for such Parity Bonds;

(7) the amount, if any, to be deposited from the proceeds of such Parity Bonds in the Reserve Account of the Special Tax Fund to increase the amount therein to the Reserve Requirement;

(8) the form of such Parity Bonds; and

(9) such other provisions as are necessary or appropriate and not inconsistent with this Indenture.

(c) The Trustee shall have received the following documents or money or securities, all of such documents dated or certified, as the case may be, as of the Delivery Date of such Parity Bonds by the Trustee (unless the Trustee shall accept any of such documents bearing a prior date):

(1) a certified copy of the Supplemental Indenture authorizing the issuance of such Parity Bonds;

(2) a written request of the District as to the delivery of such Parity Bonds;

(3) an opinion of Bond Counsel to the effect that: (i) the District has the right and power under the Act to adopt this Indenture and the Supplemental Indentures relating to such Parity Bonds, and this Indenture and all such Supplemental Indentures have been duly and lawfully adopted by the District, are in full force and effect and are valid and binding upon the District and enforceable in accordance with their terms (except as enforcement may be limited by bankruptcy, insolvency, reorganization and other similar laws relating to the enforcement of creditors' rights); (ii) this Indenture creates the valid pledge which it purports to create of the Net Taxes and other amounts as provided in this Indenture, subject to the application thereof to the purposes and on the conditions

permitted by this Indenture; and (iii) such Parity Bonds are valid and binding limited obligations of the District, enforceable in accordance with their terms (except as enforcement may be limited by bankruptcy, insolvency, reorganization and other similar laws relating to the enforcement of creditors' rights) and the terms of this Indenture and all Supplemental Indentures thereto and entitled to the benefits of this Indenture and all such Supplemental Indentures, and such Parity Bonds have been duly and validly authorized and issued in accordance with the Act (or other applicable laws) and this Indenture and all such Supplemental Indentures; and a further opinion of Bond Counsel to the effect that, assuming compliance by the District with certain tax covenants, the issuance of the Parity Bonds will not adversely affect the exclusion from gross income for federal income tax purposes of interest on the Bonds and any Parity Bonds theretofore issued on a tax-exempt basis, or the exemption from State of California personal income taxation of interest on any Outstanding Bonds and Parity Bonds theretofore issued;

(4) a certificate of the District containing such statements as may be reasonably necessary to show compliance with the requirements of this Indenture; and

(5) such further documents, money and securities as are required by the provisions of this Indenture and the Supplemental Indenture providing for the issuance of such Parity Bonds.

ARTICLE X

MISCELLANEOUS

Section 10.1. Cancellation of Bonds and Parity Bonds. All Bonds and Parity Bonds surrendered to the Trustee for payment upon maturity or for redemption shall be upon payment therefor, and any Bond or Parity Bond purchased by the District as authorized herein and delivered to the Trustee for such purpose shall be, cancelled forthwith and shall not be reissued. The Trustee shall destroy such Bonds and Parity Bonds, as provided by law, and, upon request of the District, furnish to the District a certificate of such destruction.

Section 10.2. Execution of Documents and Proof of Ownership. Any request, direction, consent, revocation of consent, or other instrument in writing required or permitted by this Indenture to be signed or executed by Bondowners may be in any number of concurrent instruments of similar tenor and may be signed or executed by such Owners in person or by their attorneys appointed by an instrument in writing for that purpose, or by the bank, trust company or other depository for such Bonds. Proof of the execution of any such instrument, or of any instrument appointing any such attorney, and of the ownership of Bonds or Parity Bonds shall be sufficient for the purposes of this Indenture (except as otherwise herein provided), if made in the following manner:

(a) The fact and date of the execution by any Owner or his or her attorney of any such instrument and of any instrument appointing any such attorney, may be proved by a signature guarantee of any bank or trust company located within the United States of America. Where any such instrument is executed by an officer of a corporation or association or a member of a partnership on behalf of such corporation, association or partnership, such signature guarantee shall also constitute sufficient proof of his authority.

(b) As to any Bond or Parity Bond, the person in whose name the same shall be registered in the Bond Register shall be deemed and regarded as the absolute owner thereof for all purposes, and payment of or on account of the principal of any such Bond or Parity Bond, and the

interest thereon, shall be made only to or upon the order of the registered Owner thereof or his or her legal representative. All such payments shall be valid and effectual to satisfy and discharge the liability upon such Bond or Parity Bond and the interest thereon to the extent of the sum or sums to be paid. Neither the District nor the Trustee shall be affected by any notice to the contrary.

Nothing contained in this Indenture shall be construed as limiting the Trustee or the District to such proof, it being intended that the Trustee or the District may accept any other evidence of the matters herein stated which the Trustee or the District may deem sufficient. Any request or consent of the Owner of any Bond or Parity Bond shall bind every future Owner of the same Bond or Parity Bond in respect of anything done or suffered to be done by the Trustee or the District in pursuance of such request or consent.

Section 10.3. Unclaimed Moneys. Anything in this Indenture to the contrary notwithstanding, any money held by the Trustee in trust for the payment and discharge of any of the Outstanding Bonds and Parity Bonds that remains unclaimed for two years after the date when such Outstanding Bonds or Parity Bonds have become due and payable, if such money was held by the Trustee at such date, or for two years after the date of deposit of such money if deposited with the Trustee after the date when such Outstanding Bonds or Parity Bonds become due and payable, shall be repaid by the Trustee to the District, as its absolute property free from trust, and the Trustee shall thereupon be released and discharged with respect thereto and the Owners shall look only to the District for the payment of such Outstanding Bonds or Parity Bonds; provided, however, that, before being required to make any such payment to the District, the Trustee, at the expense of the District, shall cause to be mailed by first-class mail, postage prepaid, to the registered Owners of such Outstanding Bonds or Parity Bonds at their addresses as they appear on the registration books of the Trustee a notice that said money remains unclaimed and that, after a date named in said notice, which date shall not be less than 30 days after the date of the mailing of such notice, the balance of such money then unclaimed will be returned to the District.

Section 10.4. Provisions Constitute Contract. The provisions of this Indenture shall constitute a contract between the District and the Bondowners and the provisions hereof shall be construed in accordance with the laws of the State of California.

In case any suit, action or proceeding to enforce any right or exercise any remedy shall be brought or taken and, should said suit, action or proceeding be abandoned, or be determined adversely to the Bondowners or the Trustee, then the District, the Trustee and the Bondowners shall be restored to their former positions, rights and remedies as if such suit, action or proceeding had not been brought or taken.

After the issuance and delivery of the Bonds, this Indenture shall be irrevocable, but shall be subject to modifications to the extent and in the manner provided in this Indenture, but to no greater extent and in no other manner.

Section 10.5. Future Contracts. Nothing herein contained shall be deemed to restrict or prohibit the District from making contracts or creating bonded or other indebtedness payable from a pledge of the Net Taxes which is subordinate to the pledge hereunder, or which is payable from the general fund of the District or from taxes or any source other than the Net Taxes and other amounts pledged hereunder.

Section 10.6. Further Assurances. The District will adopt, make, execute and deliver any and all such further resolutions, instruments and assurances as may be reasonably necessary or proper to carry out the intention or to facilitate the performance of this Indenture, and for the better assuring and confirming unto the Owners of the Bonds or any Parity Bonds the rights and benefits provided in this Indenture.

Section 10.7. Entire Agreement; Severability. This Indenture and the exhibits hereto set forth the entire agreement and understanding of the parties related to this transaction and supersedes all prior agreements and understandings, oral or written. If any covenant, agreement or provision, or any portion thereof, contained in this Indenture, or the application thereof to any person or circumstance, is held to be unconstitutional, invalid or unenforceable, the remainder of this Indenture and the application of any such covenant, agreement or provision, or portion thereof, to other persons or circumstances, shall be deemed severable and shall not be affected thereby, and this Indenture, the Bonds and any Parity Bonds issued pursuant hereto shall remain valid and the Bondowners shall retain all valid rights and benefits accorded to them under the laws of the State of California.

Section 10.8. Notices. Any notices required to be given to the District with respect to the Bonds or this Indenture shall be mailed, first class, postage prepaid, or personally delivered to the Chief Financial Officer of the City of Moreno Valley, 14177 Frederick Street, Moreno Valley, California 92552, and all notices to the Trustee in its capacity as Trustee shall be mailed, first class, postage prepaid, or personally delivered to Wilmington Trust, National Association, 650 Town Center Drive, Suite 800, Costa Mesa, California 92626, Attention: Corporate Trust, Ref: Community Facilities District No. 5 of the City of Moreno Valley, Phone: (714) 384-4153.

Section 10.9. Governing Law; Jurisdiction. This Indenture shall be governed by and construed in accordance with the laws of the State of California. The parties hereby (i) irrevocably submit to the exclusive jurisdiction of any federal or state court sitting in the State of California, (ii) waive any objection to laying of venue in any such action or proceeding in such courts, and (iii) waive any objection that such courts are an inconvenient forum or do not have jurisdiction over any party.

IN WITNESS WHEREOF, the District has caused this Indenture to be signed by the Mayor of the City, acting as the legislative body of the District and attested thereto by the City Clerk of the City, and the Trustee, in token of its acceptance of the trust created hereunder, has caused this Indenture to be signed in its corporate name by its officer identified below, all as of the day and year first above written.

PRINCIPAL AMOUNT: _____ DOLLARS AND NO/100 DOLLARS

COMMUNITY FACILITIES DISTRICT NO. 5 OF THE CITY OF MORENO VALLEY (the "District") which was formed by the City of Moreno Valley (the "City") and is situated in the County of Riverside, State of California, FOR VALUE RECEIVED, hereby promises to pay, solely from certain amounts held under the Indenture (as such term is defined herein), to the Registered Owner named above, or registered assigns, on the Maturity Date set forth above, unless redeemed prior thereto as hereinafter provided, the Principal Amount set forth above, and to pay interest on such Principal Amount from the Interest Payment Date (as such term is defined herein) next preceding the date of authentication hereof, unless: (i) the date of authentication is an Interest Payment Date, in which event interest shall be payable from such date of authentication; (ii) the date of authentication is after a Record Date (as such term is defined herein) but prior to the immediately

succeeding Interest Payment Date, in which event interest shall be payable from the Interest Payment Date immediately succeeding the date of authentication; or (iii) the date of authentication is prior to the close of business on the first Record Date in which event interest shall be payable from the Dated Date set forth above. Notwithstanding the foregoing, if at the time of authentication of this Bond interest is in default, interest on this Bond shall be payable from the last Interest Payment Date to which the interest has been paid or made available for payment or, if no interest has been paid or made available for payment, interest on this Bond shall be payable from the Dated Date set forth above. Interest will be paid semiannually each March 1 and September 1, commencing March 1, 2022, at the Interest Rate set forth above, until the Principal Amount hereof is paid or made available for payment.

The principal of and premium, if any, on this Bond are payable to the Registered Owner hereof in lawful money of the United States of America upon presentation and surrender of this Bond at the Principal Office of the Trustee, initially Wilmington Trust, National Association, (the "Trustee"). Interest on this Bond shall be paid on each Interest Payment Date by check of the Trustee mailed by first class mail, postage prepaid, or in certain circumstances described in the Indenture by wire transfer to an account within the United States of America, to the Registered Owner hereof appearing on the registration books maintained by the Trustee as of the close of business on the fifteenth day of the month preceding the month in which the Interest Payment Date occurs (the "Record Date") at such Registered Owner's address as it appears on the registration books maintained by the Trustee.

Capitalized terms used herein and not defined shall have the meanings given them in the Indenture.

This Bond is one of a duly authorized issue of "Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021" (the "Bonds") issued in the aggregate principal amount of \$ _____ pursuant to the Mello-Roos Community Facilities Act of 1982, as amended, being Sections 53311, *et seq.*, of the California Government Code (the "Act") for the purpose of refunding the District's 2007 Special Tax Bonds, funding a reserve account and paying certain costs related to the issuance of the Bonds. The issuance of the Bonds and the terms and conditions thereof are provided for by a resolution adopted by the City Council of the City, acting in its capacity as the legislative body of the District (the "Legislative Body") on October 19, 2021 and a Bond Indenture dated as of December 1, 2021, by and between the District and the Trustee executed in connection therewith (the "Indenture"), and this reference incorporates the Indenture herein, and by acceptance hereof the Registered Owner of this Bond assents to said terms and conditions. The Indenture is executed under and this Bond is issued under, and both are to be construed in accordance with, the laws of the State of California.

Pursuant to the Act and the Indenture, the principal of, premium, if any, and interest on this Bond are payable solely from the portion of the annual special taxes authorized under the Act to be levied and collected within the District (the "Special Taxes") and certain other amounts pledged to the repayment of the Bonds as set forth in the Indenture. Any amounts for the payment hereof shall be limited to the Special Taxes pledged and collected or foreclosure proceeds received following a default in payment of the Special Taxes and other amounts deposited to the Special Tax Fund (other than the Administrative Expenses Account therein) established under the Indenture, except to the extent that other provision for payment has been made by the Legislative Body, as may be permitted by law. The District has covenanted for the benefit of the owners of the Bonds that under certain circumstances described in the Indenture it will commence and diligently pursue to completion

foreclosure proceedings in the event of delinquencies of Special Tax installments levied for payment of principal and interest on the Bonds.

The Bonds are subject to redemption, at the option of the District, from any source of funds in whole, or in part by lot, on any Interest Payment Date beginning on September 1, 20__, at the following redemption prices, expressed as a percentage of the principal amount to be redeemed, together with accrued interest to the redemption date:

<i>Redemption Date</i>	<i>Redemption Price</i>
September 1, 20__ and March 1, 20__	103%
September 1, 20__ and March 1, 20__	102
September 1, 20__ and March 1, 20__	101
September 1, 20__ and any Interest Payment Date thereafter	100

In the event that the District elects to redeem Bonds as provided above, the District shall, at least 45 days prior to the redemption date, give written notice to the Trustee of its election to so redeem, the redemption date and the principal amount of the Bonds, among maturities, to be redeemed. In the event of optional or extraordinary redemption pursuant to the Indenture, the District shall provide the Trustee with a revised sinking fund schedule giving effect to the redemption so completed.

The Term Bonds shall be called before maturity and redeemed, from the Sinking Fund Payments that have been deposited into the Redemption Account, on September 1, 20__, and on each September 1 thereafter prior to maturity, in accordance with the schedule of Sinking Fund Payments set forth below. The Term Bonds so called for redemption shall be selected by the Trustee by lot and shall be redeemed at a redemption price for each redeemed Term Bond equal to the principal amount thereof, plus accrued interest to the redemption date, without premium, as follows:

TERM BONDS MATURING SEPTEMBER 1, 20__

<i>Redemption Date</i> <i>(September 1)</i>	<i>Principal Amount</i>
--	-------------------------

(maturity)

If, during the Fiscal Year immediately preceding one of the redemption dates specified above, the District purchases Bonds, at least 45 days prior to the redemption date the District shall notify the Trustee as to the principal amount purchased and the amount of Bonds so purchased shall be credited at the time of purchase, to the extent of the full principal amount thereof, to reduce such upcoming Sinking Fund Payment for the Bonds so purchased. All Bonds purchased pursuant to the Indenture will shall be cancelled pursuant to the Indenture.

In the event of a partial optional redemption or extraordinary redemption of the Bonds, each of the remaining Sinking Fund Payments for such Bonds, as described above, will be reduced, as nearly as practicable, on a pro rata basis, in integral multiples of \$5,000, as directed by the District.

The Bonds are subject to extraordinary redemption as a whole, or in part by lot, on any Interest Payment Date, and shall be redeemed by the Trustee, from Prepayments deposited to the Redemption Account pursuant to the Indenture, plus amounts transferred from the Reserve Account pursuant to the Indenture, among maturities as directed in writing by the District, at the following redemption prices, expressed as a percentage of the principal amount to be redeemed, together with accrued interest to the redemption date:

<i>Redemption Date</i>	<i>Redemption Price</i>
Any Interest Payment Date from (and including) September 1, 20__ through (and including) March 1, 20__	103%
September 1, 20__ and March 1, 20__	102
September 1, 20__ and March 1, 20__	101
September 1, 20__ and any Interest Payment Date thereafter	100

The District shall notify the Trustee of any extraordinary prepayment at least 45 days prior to the Interest Payment Date on which such prepayment shall occur.

Notice of redemption with respect to the Bonds to be redeemed shall be mailed to the registered owners thereof not less than 30 nor more than 45 days prior to the redemption date by first class mail, postage prepaid, to the addresses set forth in the registration books. Neither a failure of the Registered Owner hereof to receive such notice nor any defect therein will affect the validity of the proceedings for redemption. All Bonds or portions thereof so called for redemption will cease to accrue interest on the specified redemption date, provided that funds for the redemption are on deposit with the Trustee on the redemption date. Thereafter, the registered owners of such Bonds shall have no rights except to receive payment of the redemption price upon the surrender of the Bonds.

This Bond shall be registered in the name of the Registered Owner hereof, as to both principal and interest, and the District and the Trustee may treat the Registered Owner hereof as the absolute owner for all purposes and shall not be affected by any notice to the contrary.

The Bonds are issuable only in fully registered form in the denomination of \$5,000 or any integral multiple thereof and may be exchanged for a like aggregate principal amount of Bonds of other authorized denominations of the same issue and maturity, all as more fully set forth in the Indenture. This Bond is transferable by the Registered Owner hereof, in person or by his attorney duly authorized in writing, at the Principal Office of the Trustee, but only in the manner, subject to the limitations and upon payment of the charges provided in the Indenture, upon surrender and cancellation of this Bond. Upon such transfer, a new registered Bond of authorized denomination or denominations for the same aggregate principal amount of the same issue and maturity will be issued to the transferee in exchange therefor. Notwithstanding the foregoing, an Owner may only transfer the Bonds so long as all Outstanding Bonds are transferred together to a new Owner who has delivered an Investor Letter to the District.

The Trustee shall not be required to register transfers or make exchanges of: (i) any Bonds for a period of 15 days next preceding any selection of the Bonds to be redeemed; or (ii) any Bonds chosen for redemption.

The rights and obligations of the District and of the registered owners of the Bonds may be amended at any time, and in certain cases without notice to or the consent of the registered owners, to the extent and upon the terms provided in the Indenture.

THE BONDS DO NOT CONSTITUTE OBLIGATIONS OF THE CITY OF MORENO VALLEY OR OF THE DISTRICT FOR WHICH THE CITY OF MORENO VALLEY OR THE DISTRICT IS OBLIGATED TO LEVY OR PLEDGE, OR HAS LEVIED OR PLEDGED, GENERAL OR SPECIAL TAXES, OTHER THAN THE SPECIAL TAXES REFERENCED HEREIN. THE BONDS ARE LIMITED OBLIGATIONS OF THE DISTRICT PAYABLE FROM THE PORTION OF THE SPECIAL TAXES AND OTHER AMOUNTS PLEDGED UNDER THE INDENTURE BUT ARE NOT A DEBT OF THE CITY OF MORENO VALLEY, THE STATE OF CALIFORNIA OR ANY OF ITS POLITICAL SUBDIVISIONS WITHIN THE MEANING OF ANY CONSTITUTIONAL OR STATUTORY LIMITATION OR RESTRICTION.

This Bond shall not become valid or obligatory for any purpose until the certificate of authentication and registration hereon endorsed shall have been dated and signed by the Trustee.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required by law to exist, happen and be performed precedent to and in the issuance of this Bond do exist, have happened and have been performed in due time, form and manner as required by law, and that the amount of this Bond, together with all other indebtedness of the District, does not exceed any debt limit prescribed by the laws or Constitution of the State of California.

IN WITNESS WHEREOF, the District has caused this Bond to be dated as of the Dated Date, to be signed on behalf of the District by the Mayor of the City by his facsimile signature and attested by the facsimile signature of the City Clerk of the City.

BOND PURCHASE AGREEMENT

_____, 2021

City of Moreno Valley
 Community Facilities District No. 5
 14177 Frederick Street
 P.O. Box 88005
 Moreno Valley, CA 92552-0805

Ladies and Gentlemen:

The undersigned, Stifel, Nicolaus & Company, Incorporated, as Underwriter (the “**Underwriter**”), offers to enter into this Bond Purchase Agreement (this “**Purchase Agreement**”) with Community Facilities District No. 5 of the City of Moreno Valley (the “**Community Facilities District**”), which upon acceptance will be binding upon the Underwriter and the Community Facilities District. The agreement of the Underwriter to purchase the Bonds (as hereinafter defined) is contingent upon the Community Facilities District satisfying all of the obligations imposed upon them under this Purchase Agreement. This offer is made subject to the Community Facilities District’s acceptance by the execution of this Purchase Agreement and its delivery to the Underwriter at or before 11:59 P.M., local time, on the date hereof, and, if not so accepted, will be subject to withdrawal by the Underwriter upon notice delivered to the Community Facilities District at any time prior to the acceptance hereof by the Community Facilities District. All capitalized terms used herein, which are not otherwise defined, shall have the meaning provided for such terms in the Bond Indenture, dated as of December 1, 2021 (the “**Indenture**”), by and between the Community Facilities District and Wilmington Trust, National Association, as trustee (the “**Trustee**”).

1. Purchase, Sale and Delivery of the Bonds.

Subject to the terms and conditions and in reliance upon the representations, warranties and agreements set forth herein: (i) the Underwriter hereby agrees to purchase from the Community Facilities District and the Community Facilities District hereby agrees to sell to the Underwriter all (but not less than all) of the \$_____ aggregate principal amount of the Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021 (the “**Bonds**”), dated the Closing Date (as hereinafter defined), bearing interest at the rates and maturing on the dates and in the principal amounts set forth in Exhibit A hereto. The purchase price for the Bonds shall be \$_____ (being 100% of the aggregate principal amount thereof, plus an original issue premium of \$_____ and less an Underwriter’s discount of \$_____).

The Underwriter agrees to make a bona fide public offering of all of the Bonds initially at the public offering prices (or yields) set forth in Exhibit A attached hereto and incorporated herein by reference. Subsequent to the initial public offering, the Underwriter reserves the right to change the public offering prices (or yields) as it deems necessary in connection with the marketing of the Bonds subject to Section 2 hereof, provided that the Underwriter shall not change the interest rates set forth in Exhibit A. The Bonds may be offered and sold to certain dealers at prices lower than such initial offering prices.

The Bonds shall be substantially in the form described in, shall be issued and secured under the provisions of, and shall be payable from the Net Taxes as provided in the Indenture, the Preliminary Official Statement (as hereinafter defined), and the Mello-Roos Community Facilities Act of 1982, as amended (Section 53311 *et seq.* of the Government Code of the State of California) (the “**Community Facilities District Act**”). The issuance of the Bonds has been duly authorized by the City Council of the City of Moreno Valley (the “**City**”), as the legislative body for the Community Facilities District, pursuant to Resolution No. _____ (the “**Community Facilities District Resolution of Issuance**”) adopted on October 19, 2021.

The proceeds of the Bonds will be used to: (i) to refund all of the Community Facilities District No. 5 of the City of Moreno Valley 2007 Special Tax Bonds (the “**Refunded Bonds**”); (ii) fund a deposit to the Reserve Account; and (iii) pay costs of issuance for the Bonds.

The Bonds shall be substantially in the form described in, shall be issued and secured under the provisions of, and shall be payable from special taxes as provided in the Indenture (the “**Special Taxes**”).

A. The Community Facilities District hereby acknowledges that the Underwriter is entering into this Purchase Agreement in reliance on the representations, warranties and agreements made by the Community Facilities District herein, and the Community Facilities District shall take all action necessary to enforce its rights hereunder for the benefit of the Underwriter and shall immediately notify the Underwriter if it becomes aware that any representation, warranty or agreement made by the Community Facilities District herein is incorrect in any material respect.

The Community Facilities District acknowledges and agrees that (i) the purchase and sale of the Bonds pursuant to this Purchase Agreement is an arm’s-length commercial transaction between the Community Facilities District and the Underwriter, (ii) in connection therewith and with the discussions, undertakings and procedures leading up to the consummation of such transaction, the Underwriter is and has been acting solely as principal and not as the agent or fiduciary of the Community Facilities District, (iii) the Underwriter has not assumed an advisory or fiduciary responsibility in favor of the Community Facilities District with respect to (a) the offering of the Bonds or the process leading thereto (whether or not the Underwriter, or any affiliate of the Underwriter, has advised or is currently advising the Community Facilities District on other matters) or (b) any other obligations to the Community Facilities District with respect to the offering contemplated hereby, except the obligations expressly set forth in this Purchase Agreement or otherwise imposed by law, (iv) the Underwriter has financial interests that differ from those of the Community Facilities District and (v) the Community Facilities District has consulted with their own legal, financial and other advisors to the extent they have deemed appropriate in connection with this transaction. The Community Facilities District acknowledges that it has previously provided the Underwriter with an acknowledgement of receipt of the required Underwriter disclosure under Rule G-17 of the Municipal Securities Rulemaking Board (“MSRB”). The Community Facilities District

acknowledges and represents that it has engaged Fieldman, Rolapp & Associates, Inc. as its municipal advisor (the “**Municipal Advisor**”) (as defined in Securities and Exchange Commission Rule 15Ba1) and will rely solely on the financial advice of Fieldman, Rolapp & Associates, Inc. with respect to the Bonds.

B. Pursuant to the authorization of the Community Facilities District, the Underwriter has distributed copies of the Preliminary Official Statement dated _____, 2021, relating to the Bonds, which, together with the cover page, inside cover page and appendices thereto is herein called the “Preliminary Official Statement.” By its acceptance of this Purchase Agreement, the Community Facilities District hereby ratifies the use by the Underwriter of the Preliminary Official Statement, and the Community Facilities District agrees to execute a final official statement relating to the Bonds (including any supplements and/or amendments thereto, the “**Official Statement**”) which will consist of the Preliminary Official Statement with such changes as may be made thereto, with the approval of Stradling Yocca Carlson & Rauth, a Professional Corporation, Bond Counsel (“**Bond Counsel**”), Nixon Peabody, LLP, Disclosure Counsel (“**Disclosure Counsel**”), and the Underwriter, and to provide copies thereof to the Underwriter as set forth herein. The Community Facilities District hereby authorizes and requires the Underwriter to use and promptly distribute, in connection with the offer and sale of the Bonds, the Preliminary Official Statement, the Official Statement and any supplement or amendment thereto. The Community Facilities District further authorizes the Underwriter to use and distribute, in connection with the offer and sale of the Bonds, the Indenture, the Continuing Disclosure Agreement executed by the Community Facilities District in connection with the Bonds and the dissemination agent named therein (the “**Continuing Disclosure Agreement**”), the Escrow Agreement, dated as of December 1, 2021 with regard to the Refunded Bonds (the “**Escrow Agreement**”), between the Community Facilities District and Computershare Trust Company, N.A., as escrow agent (the “**Escrow Agent**”), this Purchase Agreement and all information contained herein, and all other documents, certificates and statements furnished by or on behalf of the Community Facilities District to the Underwriter in connection with the transactions contemplated by this Purchase Agreement.

C. To assist the Underwriter in complying with Securities and Exchange Commission Rule 15c2-12(b)(5) (the “**Rule**”), the Community Facilities District will undertake pursuant to the Continuing Disclosure Agreement, in the form attached as an appendix to the Official Statement, to provide annual reports and notices of certain enumerated events. A description of this undertaking is set forth in the Preliminary Official Statement and will also be set forth in the Official Statement.

D. Except as the Underwriter and the Community Facilities District may otherwise agree, the Community Facilities District will deliver to the Underwriter, at the offices of Bond Counsel in Los Angeles, California, or at such other location as may be mutually agreed upon by the Underwriter and the Community Facilities District, the documents hereinafter mentioned; and the Community Facilities District will deliver to the Underwriter through the facilities of The Depository Trust Company (“**DTC**”), the Bonds, in definitive form (all Bonds bearing CUSIP numbers), duly executed by the Community Facilities District and authenticated by the Trustee in the manner provided for in the Indenture and the Community Facilities District Act at 8:30 a.m. California time, on _____, 2021 (the “**Closing Date**”), and the Underwriter will accept such delivery and pay the purchase price of the Bonds as set forth in Section 1 hereof by wire transfer, payable in federal or other immediately available funds (such delivery and payment being herein referred to as the “**Closing**”). The Bonds shall be in fully registered book-entry form (which may be typewritten) and shall be registered in the name of Cede & Co., as nominee of DTC.

2. Establishment of Issue Price.

A. The Underwriter agrees to assist the Community Facilities District in establishing the issue price of the Bonds and shall execute and deliver to the Community Facilities District at or before the Closing Date an “issue price” or similar certificate, together with the supporting pricing wires or equivalent communications, substantially in the form attached hereto as Exhibit B, with such modifications as may be appropriate or necessary, in the reasonable judgment of the Underwriter, the Community Facilities District and Bond Counsel, to accurately reflect, as applicable, the sales price or prices or the initial offering price or prices to the public of the Bonds.

B. With respect to Bonds of those maturities as to which at least 10% of the Bonds of the maturity has been sold to the public (defined in paragraph F below) at a single price (the “**10% test**”), based on reporting by the Underwriter to the Community Facilities District on the date hereof and prior to the execution of this Purchase Agreement, which maturities are indicated in Exhibit A attached hereto as having satisfied the 10% test (the “**10% Test Maturities**”), the Community Facilities District will treat the first price at which 10% of each such maturity of the Bonds was sold to the public as the issue price of that maturity. With respect to Bonds of those maturities as to which the 10% test has not been satisfied, based on reporting by the Underwriter to the Community Facilities District on the date hereof and prior to the execution of this Bond Purchase Agreement, which maturities are indicated in Exhibit A attached hereto as being subject to the “hold-the-offering-price rule,” defined below (the “**Hold-the-Offering-Price Maturities**”), the Underwriter and the Community Facilities District agree that the rules in paragraph C below shall apply. For purposes of this section, for Bonds maturing on the same date but having different interest rates, each separate group of Bonds having a different interest rate is subject to the 10% test or paragraph C below, as the case may be, as if such separate group of Bonds were a separate maturity.

C. The Underwriter confirms that it has offered the Bonds to the public on or before the date of this Purchase Agreement at the offering price or prices (the “**initial offering price**”), or at the corresponding yield or yields, set forth in Exhibit A attached hereto, except as otherwise set forth therein. Exhibit A also sets forth, as of the date of this Purchase Agreement, the maturities, if any, of the Bonds for which the Underwriter represents that (i) the 10% test has been satisfied (assuming orders are confirmed by the close of the business day immediately following the date of this Purchase Agreement), and (ii) the 10% test has not been satisfied and for which the Community Facilities District and the Underwriter agree that the restrictions set forth in the next sentence shall apply, which will allow the Community Facilities District to treat the initial offering price to the public of each such maturity as of the sale date as the issue price of that maturity (the “**hold-the-offering-price rule**”). So long as the hold-the-offering-price rule remains applicable to any maturity of the Bonds, the Underwriter will neither offer nor sell unsold Bonds of that maturity to any person at a price that is higher than the initial offering price to the public during the period starting on the sale date and ending on the earlier of the following:

1. the close of the fifth (5th) business day after the sale date; or
2. the date on which the Underwriter has sold at least 10% of that maturity of the Bonds to the public at a price that is no higher than the initial offering price to the public.

The Underwriter shall promptly advise the Community Facilities District, after the close of the fifth (5th) business day after the sale date, whether it has sold at least 10% of each Hold-the-

Offering-Price maturity to the public at a price that is no higher than the initial offering price to the public of that maturity, if such sale has occurred prior to the close of the fifth (5th) business day after the sale date.

D. The Underwriter confirms that:

(i) any selling group agreement and any retail or other third-party distribution agreement relating to the initial sale of the Bonds to the public, together with the related pricing wires, contains or will contain language obligating each dealer who is a member of the selling group and each broker-dealer that is a party to such retail or other third-party distribution agreement, as applicable:

(A) to comply with the hold-the-offering-price rule, if applicable, if and for so long as directed by the Underwriter,

(B) to promptly notify the Underwriter of any sales of Bonds that, to its knowledge, are made to a purchaser who is a related party to an underwriter participating in the initial sale of the Bonds to the public (each such term being used as defined below), and

(C) to acknowledge that, unless otherwise advised by the dealer or broker-dealer, the Underwriter shall assume that each order submitted by the dealer or broker-dealer is a sale to the public.

(ii) any selling group agreement relating to the initial sale of the Bonds to the public, together with the related pricing wires, contains or will contain language obligating each dealer that is a party to a retail or other third-party distribution agreement to be employed in connection with the initial sale of the Bonds to the public to require each broker-dealer that is a party to such retail or other third-party distribution agreement to comply with the hold-the-offering-price rule, if applicable, if and for so long as directed by the Underwriter or the dealer and as set forth in the related pricing wires.

E. The Community Facilities District acknowledges that, in making the representation set forth in this section, the Underwriter will rely on (i) in the event a selling group has been created in connection with the initial sale of the Bonds to the public, the agreement of each dealer who is a member of the selling group to comply with the requirements for establishing issue price of the Bonds, including, but not limited to, its agreement to comply with the hold-the-offering-price rule, if applicable to the Bonds, as set forth in a selling group agreement and the related pricing wires, and (ii) in the event that a retail or other third-party distribution agreement was employed in connection with the initial sale of the Bonds to the public, the agreement of each broker-dealer that is a party to such agreement to comply with the requirements for establishing issue price of the Bonds, including, but not limited to, its agreement to comply with the hold-the-offering-price rule, if applicable to the Bonds, as set forth in the retail or other third-party distribution agreement and the related pricing wires.

F. The Underwriter acknowledges that sales of any Bonds to any person that is a related party to an underwriter participating in the initial sale of the Bonds to the public (each such term being used as defined below) shall not constitute sales to the public for purposes of this section. Further, for purposes of this section:

1. “public” means any person other than an underwriter or a related party;

2. “underwriter” means (A) any person that agrees pursuant to a written contract with the Community Facilities District (or with the lead underwriter to form an underwriting syndicate) to participate in the initial sale of the Bonds to the public and (B) any person that agrees pursuant to a written contract directly or indirectly with a person described in clause (A) to participate in the initial sale of the Bonds to the public (including a member of a selling group or a party to a retail or other third-party distribution agreement participating in the initial sale of the Bonds to the public);

3. a purchaser of any of the Bonds is a “related party” to an underwriter if the underwriter and the purchaser are subject, directly or indirectly, to (A) more than 50% common ownership of the voting power or the total value of their stock, if both entities are corporations (including direct ownership by one corporation of another), (B) more than 50% common ownership of their capital interests or profits interests, if both entities are partnerships (including direct ownership by one partnership of another), or (C) more than 50% common ownership of the value of the outstanding stock of the corporation or the capital interests or profit interests of the partnership, as applicable, if one entity is a corporation and the other entity is a partnership (including direct ownership of the applicable stock or interests by one entity of the other); and

4. “sale date” means the date of execution of this Purchase Agreement by all parties.

3. Representations, Warranties and Covenants of the Community Facilities District. The Community Facilities District represents, warrants and covenants to the Underwriter on behalf of itself and the City that:

A. The City is duly organized and validly existing as a municipal corporation under the Constitution and laws of the State of California and has duly authorized the formation of the Community Facilities District pursuant to resolutions duly adopted by the City Council (the “**Community Facilities District Formation Resolution**” and, together with the Community Facilities District Resolution of Issuance, the “**Community Facilities District Resolutions**”) and the Community Facilities District Act. The City Council, as the legislative body of the City and the Community Facilities District, has duly adopted the Community Facilities District Formation Resolution, and has caused to be recorded in the real property records of the County of Riverside, notice of special tax lien, and any required amendments thereof (collectively, the “**Notice of Special Tax Lien**”) (the Community Facilities District Formation Resolution and Notice of Special Tax Lien being collectively referred to herein as the “**Formation Documents**”), and has duly adopted a Community Facilities District Resolution of Issuance. Each of its Formation Documents remains in full force and effect as of the date hereof and has not been amended. The Community Facilities District is duly organized and validly existing as a Community Facilities District under the laws of the State of California. The Community Facilities District has, and at the Closing Date will have, as the case may be, full legal right, power and authority: (i) to execute, deliver and perform its obligations under this Purchase Agreement, the Escrow Agreement, the Continuing Disclosure Agreement and the Indenture, and to carry out all transactions contemplated by each of such agreements; (ii) to issue, sell and deliver the Bonds as provided herein; and (iii) to carry out, give effect to and consummate the transactions contemplated by the Formation Documents, the Indenture,

the Bonds, the Escrow Agreement, the Continuing Disclosure Agreement, this Purchase Agreement and the Official Statement.

This Purchase Agreement, the Indenture, the Escrow Agreement, the Bonds and the Continuing Disclosure Agreement are collectively referred to herein as the “**Community Facilities District Documents.**”

B. The Community Facilities District and the City, as applicable, have each complied, and will at the Closing Date be in compliance in all material respects, with the Formation Documents and the Community Facilities District Documents, and any immaterial noncompliance by the Community Facilities District and the City, if any, will not impair the ability of the Community Facilities District and the City, as applicable, to carry out, give effect to or consummate the transactions contemplated by the foregoing. From and after the date of issuance of the Bonds, the Community Facilities District will continue to comply with the covenants of the Community Facilities District contained in the Community Facilities District Documents.

C. The information in the Preliminary Official Statement and in the Official Statement relating to the Community Facilities District and the Bonds (other than information under the caption “LEGAL MATTERS - Underwriting,” Appendix E and statements pertaining to the book entry system, as to which no view is expressed), is true and correct in all material respects and does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading; and, upon delivery and up to and including 25 days after the End of the Underwriting Period (as defined in paragraph (D) below), the Official Statement will be amended and supplemented so as to contain no misstatement of any material fact or omission of any statement necessary to make the statements contained therein, in the light of the circumstances in which such statements were made, not misleading.

D. Up to and including 25 days after the End of the Underwriting Period (as defined below), the Community Facilities District will advise the Underwriter promptly of any proposal to amend or supplement the Official Statement and will not effect or consent to any such amendment or supplement without the consent of the Underwriter, which consent will not be unreasonably withheld. The Community Facilities District will advise the Underwriter promptly of the institution of any proceedings known to it by any governmental agency prohibiting or otherwise materially affecting the use of the Official Statement in connection with the offering, sale or distribution of the Bonds. As used herein, the term “End of the Underwriting Period” means the later of such time as: (i) the Bonds are delivered to the Underwriter; or (ii) the Underwriter does not retain, directly or as a member of an underwriting syndicate, an unsold balance of the Bonds for sale to the public. Unless the Underwriter gives notice to the contrary, the End of the Underwriting Period shall be deemed to be the Closing Date. Any notice delivered pursuant to this provision shall be written notice delivered to the Community Facilities District at or prior to the Closing Date and shall specify a date (other than the Closing Date) to be deemed the “End of the Underwriting Period.”

E. Except as described in the Preliminary Official Statement and Official Statement, the Community Facilities District is not, in any respect material to the transactions referred to herein or contemplated hereby, in breach of or in default under, any law or administrative rule or regulation of the State of California, the United States of America, or of any department, division, agency or instrumentality of either thereof, or under any applicable court or administrative decree or order, or under any loan agreement, note, resolution, indenture, contract, agreement or

other instrument to which the Community Facilities District is a party or is otherwise subject or bound, and the performance of its obligations under the Community Facilities District Documents and compliance with the provisions of each thereof, or the performance of the conditions precedent to be performed by the Community Facilities District pursuant to this Purchase Agreement, will not conflict with or constitute a breach of or default under any applicable law or administrative rule or regulation of the State, the United States of America, or of any department, division, agency or instrumentality of either thereof, or under any applicable court or administrative decree or order, or under any loan agreement, note, resolution, indenture, contract, agreement or other instrument to which the Community Facilities District is a party or is otherwise subject or bound, in any manner which would materially and adversely affect the performance by the Community Facilities District of its obligations under the Community Facilities District Documents or the performance of the conditions precedent to be performed by the Community Facilities District pursuant to this Purchase Agreement.

F. Except as may be required under the “blue sky” or other securities laws of any jurisdiction, all approvals, consents, authorizations, elections and orders of, or filings or registrations with, any governmental authority, board, agency or commission having jurisdiction which would constitute a condition precedent to, or the absence of which would materially adversely affect, the performance by the Community Facilities District of its obligations under the Community Facilities District Documents, and the performance of the conditions precedent to be performed by the Community Facilities District pursuant to this Purchase Agreement, have been or will be obtained at the Closing Date and are or will be in full force and effect at the Closing Date.

G. The Community Facilities District Documents conform as to form and tenor to the descriptions thereof contained in the Official Statement.

H. The Bonds are payable from the Special Tax, as set forth in the Indenture, the levy of which has been duly and validly authorized pursuant to the Community Facilities District Act and the Community Facilities District will covenant in the Indenture to levy the Special Taxes within the Community Facilities District in an amount which, together with other available funds, is required for the payment of the principal of, and interest on, the Bonds when due and payable, all as provided in the Indenture.

I. The Indenture creates a valid pledge of, first lien upon and security interest in, the Net Taxes, and in the moneys in the Special Tax Fund (other than the Administrative Expense Account) established pursuant to the Indenture, on the terms and conditions set forth in the Indenture.

J. Except as disclosed in the Preliminary Official Statement, there are, to the best of the Community Facilities District’s knowledge, no entities with outstanding assessment liens against any of the properties within the Community Facilities District or which are senior to or on a parity with the Special Taxes of the Community Facilities District referred to in paragraph (I) hereof.

K. The Preliminary Official Statement was deemed final by a duly authorized officer of the Community Facilities District prior to its delivery to the Underwriter, except for the omission of such information as is permitted to be omitted in accordance with paragraph (b)(1) of the Rule. The Community Facilities District hereby covenants and agrees that, within seven (7) business days from the date hereof, or upon reasonable written notice from the Underwriter within sufficient time to accompany any confirmation requesting payment from any customers of the Underwriter, the Community Facilities District shall cause a final electronic form of the Official Statement to be

delivered to the Underwriter to comply with paragraph (b)(4) of the Rule and Rules G-12, G-15, G-32 and G-36 of the Municipal Securities Rulemaking Board.

L. At the time of acceptance hereof there is and as of the Closing there will be no action, suit, proceeding, inquiry or investigation, at law or in equity, before or by any court, government agency, public board or body (collectively and individually, an “**Action**”) pending (notice of which has been served on the Community Facilities District) or to the best knowledge of the Community Facilities District or the City threatened, in which any such Action: (i) in any way questions the existence of the Community Facilities District or the titles of the officers of the Community Facilities District to their respective offices; (ii) affects, contests or seeks to prohibit, restrain or enjoin the issuance or delivery of the Bonds or the payment or collection of Special Taxes or any amounts pledged or to be pledged to pay the principal of and interest on the Bonds, or in any way contests or affects the validity of the Community Facilities District Documents or the consummation of the transactions on the part of the Community Facilities District contemplated thereby; (iii) contests the exemption of interest on the Bonds from federal or State income taxation or contests the powers of the Community Facilities District which may result in any material adverse change relating to the financial condition of the Community Facilities District; or (iv) contests the completeness or accuracy of the Preliminary Official Statement or the Official Statement or any supplement or amendment thereto or asserts that the Preliminary Official Statement or the Official Statement contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; and as of the time of acceptance hereof there is and, as of the Closing Date, there will be no basis for any action, suit, proceeding, inquiry or investigation of the nature described in clauses (i) through (iv) of this sentence.

M. Any certificate signed on behalf of the Community Facilities District by any officer or employee of the Community Facilities District authorized to do so shall be deemed a representation and warranty by the Community Facilities District to the Underwriter on behalf of itself and the Community Facilities District as to the statements made therein.

N. At or prior to the Closing the Community Facilities District will have duly authorized, executed and delivered the Continuing Disclosure Agreement in substantially the form attached as Appendix C to the Official Statement. Based upon a review of its previous undertakings, and except as disclosed in the Preliminary Official Statement, the Community Facilities District has not failed to comply in all respects with any previous undertakings with regard to the Rule to provide annual reports or notices of enumerated events in the last five years.

O. The Community Facilities District will apply the proceeds of the Bonds in accordance with the Indenture and as described in the Official Statement.

P. Until such time as moneys have been set aside in an amount sufficient to pay all then outstanding Bonds at maturity or to the date of redemption if redeemed prior to maturity, plus unpaid interest thereon and premium, if any, to maturity or to the date of redemption if redeemed prior to maturity, the Community Facilities District will faithfully perform and abide by all of the covenants, undertakings and provisions contained in the Indenture.

Q. Between the date of this Purchase Agreement and the date of Closing, the Community Facilities District will not offer or issue any bonds, notes or other obligations for borrowed money not previously disclosed to the Underwriter.

The Community Facilities District hereby approves the preparation and distribution of the Official Statement, consisting of the Preliminary Official Statement with such changes as are noted thereon and as may be made thereto, with the approval of Bond Counsel, Disclosure Counsel and the Underwriter, from time to time prior to the Closing Date.

The execution and delivery of this Purchase Agreement by the Community Facilities District shall constitute a representation by the Community Facilities District to the Underwriter that the representations and warranties contained in this Section 3 with respect to the Community Facilities District are true as of the date hereof.

4. Conditions to the Obligations of the Underwriter. The obligation of the Underwriter to accept delivery of and pay for the Bonds on the Closing Date shall be subject, at the option of the Underwriter, to the accuracy in all material respects of the representations and warranties on the part of the Community Facilities District contained herein, to the accuracy in all material respects of the statements of the officers and other officials of the Community Facilities District made in any certificates or other documents furnished pursuant to the provisions hereof, to the performance by the Community Facilities District of their obligations to be performed hereunder at or prior to the Closing Date and to the following additional conditions:

A. At the Closing Date, the Community Facilities District Resolutions and the Community Facilities District Documents shall be in full force and effect, and shall not have been amended, modified or supplemented, except as may have been agreed to in writing by the Underwriter, and there shall have been taken in connection therewith, with the issuance of the Bonds and with the Bonds, and with the transactions contemplated thereby, and by this Purchase Agreement, all such actions as, in the opinion of Bond Counsel, shall be necessary and appropriate.

B. At the Closing Date, except as described in the Official Statement, the City shall not be, in any respect material to the transactions referred to herein or contemplated hereby, in breach of or in default under, any law or administrative rule or regulation of the State of California, the United States of America, or of any department, division, agency or instrumentality of either thereof, or under any applicable court or administrative decree or order, or under any loan agreement, note, resolution, indenture, contract, agreement or other instrument to which the City is a party or is otherwise subject or bound, and the performance of the conditions precedent to be performed hereunder will not conflict with or constitute a breach of or default under any applicable law or administrative rule or regulation of the State of California, the United States of America, or of any department, division, agency or instrumentality of either thereof, or under any applicable court or administrative decree or order, or under any loan agreement, note, resolution, indenture, contract, agreement or other instrument to which the City is a party or is otherwise subject or bound, in any manner which would materially and adversely affect the performance of the conditions precedent to be performed by the City hereunder.

C. At the Closing Date, except as described in the Official Statement, the Community Facilities District shall not be, in any respect material to the transactions referred to herein or contemplated hereby, in breach of or in default under, any law or administrative rule or regulation of the State of California, the United States of America, or of any department, division, agency or instrumentality of either thereof, or under any applicable court or administrative decree or order, or under any loan agreement, note, resolution, indenture, contract, agreement or other instrument to which the Community Facilities District is a party or is otherwise subject or bound, and the performance by the Community Facilities District of its obligations under the Bonds, the

Community Facilities District Resolutions, the Indenture, and any other instruments contemplated by any of such documents, and compliance with the provisions of each thereof, or the performance of the conditions precedent to be performed hereunder, will not conflict with or constitute a breach of or default under any applicable law or administrative rule or regulation of the State of California, the United States of America, or of any department, division, agency or instrumentality of either thereof, or under any applicable court or administrative decree or order, or under any loan agreement, note, resolution, indenture, contract, agreement or other instrument to which the Community Facilities District is a party or is otherwise subject or bound, in any manner which would materially and adversely affect the performance by the Community Facilities District of its obligations under the Indenture, the Bonds or the performance of the conditions precedent to be performed by the Community Facilities District hereunder.

D. The information contained in the Official Statement is, as of the Closing Date and as of the date of any supplement or amendment thereto pursuant hereto, true and correct in all material respects and does not, as of the Closing Date or as of the date of any supplement or amendment thereto, contain any untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading.

E. Between the date hereof and the Closing Date, the market price or marketability, at the initial offering prices set forth on the inside cover page of the Official Statement, of the Bonds or the ability of the Underwriter to enforce contracts for the sale of the Bonds, shall not have been materially adversely affected, in the judgment of the Underwriter (evidenced by a written notice to the Community Facilities District terminating the obligation of the Underwriter to accept delivery of and pay for the Bonds), by reason of any of the following:

1. Legislation introduced in or enacted (or resolution passed) by the Congress of the United States of America or recommended to the Congress by the President of the United States, the Department of the Treasury, the Internal Revenue Service, or any member of Congress, or favorably reported for passage to either House of Congress by any committee of such House to which such legislation had been referred for consideration, or a decision rendered by a court established under Article III of the Constitution of the United States of America or by the Tax Court of the United States of America, or an order, ruling, regulation (final, temporary or proposed), press release or other form of notice issued or made by or on behalf of the Treasury Department of the United States of America or the Internal Revenue Service, with the purpose or effect, directly or indirectly, of imposing federal income taxation upon such interest as would be received by any owners of the Bonds beyond the extent to which such interest is subject to taxation as of the date hereof; or

2. Legislation introduced in or enacted (or resolution passed) by the Congress or an order, decree or injunction issued by any court of competent jurisdiction, or an order, ruling, regulation (final, temporary or proposed), press release or other form of notice issued or made by or on behalf of the Securities and Exchange Commission, or any other governmental agency having jurisdiction of the subject matter, to the effect that obligations of the general character of the Bonds, including any or all underlying arrangements, are not exempt from registration under or other requirements of the Securities Act of 1933, as amended, or that the Indenture is not exempt from qualification under or other requirements of the Trust Indenture Act of 1939, as amended, or that the issuance, offering or sale of obligations of the general character of the Bonds, including any or all

underlying arrangements, as contemplated hereby or by the Official Statement or otherwise is or would be in violation of the federal securities laws as amended and then in effect; or

3. A general suspension of trading on the New York Stock Exchange or other major exchange shall be in force, or minimum or maximum prices for trading shall have been fixed and be in force, or maximum ranges for prices for securities shall have been required and be in force on any such exchange, whether by virtue of determination by that exchange or by order of the SEC or any other governmental authority having jurisdiction; or

4. The introduction, proposal or enactment of any amendment to the Federal or California Constitution or any action by any Federal or California court, legislative body, regulatory body or other authority materially adversely affecting the tax status of the Community Facilities District, its property, income, securities (or interest thereon), the validity or enforceability of Special Taxes, or the ability of the Community Facilities District to issue the Bonds as contemplated by the Indenture and the Official Statement; or

5. Any event occurring, or information becoming known which, in the judgment of the Underwriter, makes untrue in any material respect any statement or information contained in the Preliminary Official Statement or in the Official Statement, or has the effect that the Preliminary Official Statement or the Official Statement contains any untrue statement of a material fact or omits to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; or

6. Any national securities exchange, the Comptroller of the Currency, or any other governmental authority, shall impose as to the Bonds, or obligations of the general character of the Bonds, any material restrictions not now in force, or increase materially those now in force, with respect to the extension of credit by, or the charge to the net capital requirements of, the Underwriter; or

7. There shall have occurred (1) an outbreak or escalation of hostilities or the declaration by the United States of a national emergency or war or (2) any other calamity or crisis in the financial markets of the United States or elsewhere or the escalation of such calamity or crisis; or

8. Except as disclosed in or contemplated by the Official Statement, any material adverse change in the affairs of the City or Community Facilities District shall have occurred; or

9. Any event or circumstance shall exist that either makes untrue or incorrect in any material respect any statement or information in the Official Statement (other than any statement provided by the Underwriter) or is not reflected in the Official Statement but should be reflected therein in order to make the statements therein, in the light of the circumstances under which they were made, not misleading and, in either such event, the Community Facilities District refuses to permit the Official Statement to be supplemented to supply such statement or information, or the effect of the Official Statement as so supplemented is to materially adversely affect the market price or marketability of the Bonds or the ability of the Underwriter to enforce contracts for the sale of the Bonds; or

10. A general banking moratorium shall have been declared by federal or State authorities having jurisdiction and be in force; or

11. A material disruption in securities settlement, payment or clearance services affecting the Bonds shall have occurred; or

12. Any new restriction on transactions in securities materially affecting the market for securities (including the imposition of any limitation on interest rates) or the extension of credit by, or a charge to the net capital requirements of, underwriters shall have been established by the New York Stock Exchange, the SEC, any other federal or State agency or the Congress of the United States, or by Executive Order; or

13. A decision by a court of the United States shall be rendered, or a stop order, release, regulation or no-action letter by or on behalf of the SEC or any other governmental agency having jurisdiction of the subject matter shall have been issued or made, to the effect that the issuance, offering or sale of the Securities, including the underlying obligations as contemplated by this Purchase Agreement or by the Official Statement, or any document relating to the issuance, offering or sale of the Securities, is or would be in violation of any provision of the federal securities laws at the Closing Date, including the Securities Act, the Exchange Act and the Trust Indenture Act; or

14. Any proceeding shall have been commenced or be threatened in writing by the Securities and Exchange Commission against the City or the Community Facilities District; or

15. The commencement of any Action.

F. At or prior to the Closing Date, the Underwriter shall have received a counterpart original or certified copy of the following documents, in each case satisfactory in form and substance to the Underwriter:

1. The Official Statement, executed on behalf of the Community Facilities District by an authorized officer;

2. The Indenture, duly executed and delivered by the Community Facilities District and the Trustee;

3. The Community Facilities District Resolutions, the Community Facilities District Documents and the Formation Documents, together with a certificate dated as of the Closing Date of the City Clerk to the effect that the Community Facilities District Resolutions are true, correct and complete copies of the ones duly adopted by the City Council;

4. The Continuing Disclosure Agreement executed and delivered by an authorized officer the Community Facilities District;

5. An unqualified approving opinion for the Bonds, dated the Closing Date and addressed to the Community Facilities District, of Bond Counsel, to the effect that the Bonds are the valid, legal and binding obligations of the Community Facilities District and that the interest thereon is excluded from gross income for federal income tax purposes and exempt from personal income taxes of the State of California, in substantially the form included as Appendix D to

the Official Statement, together with a letter of Bond Counsel, dated the Closing Date and addressed to the Underwriter, to the effect that such opinion addressed to the Community Facilities District may be relied upon by the Underwriter to the same extent as if such opinion was addressed to it;

6. A supplemental opinion or opinions, dated the Closing Date and addressed to the Underwriter, of Bond Counsel, in substantially the form attached hereto as Exhibit C;

7. The letter of Disclosure Counsel, dated the Closing Date and addressed to the Community Facilities District and to the Underwriter, in substantially the form attached hereto as Exhibit D;

8. An opinion of Bond Counsel, addressed to the Community Facilities District, the Escrow Agent, and the Underwriter, dated the date of Closing, as to the effective defeasance of the Refunded Bonds in form and substance acceptable to the Underwriter;

9. A certificate dated the Closing Date and signed by an authorized representative of the Community Facilities District or an authorized designee, on behalf of the Community Facilities District to the effect that: (i) the representations and warranties made by the Community Facilities District contained herein are true and correct in all material respects on and as of the Closing Date with the same effect as if made on the Closing Date; (ii) to the best knowledge of such officer, no event has occurred since the date of the Official Statement which should be disclosed in the Official Statement for the purpose for which it is to be used or which it is necessary to disclose therein in order to make the statements and information therein not misleading in any material respect; and (iii) the Community Facilities District has complied with all the agreements and satisfied all the conditions on its part to be satisfied under this Purchase Agreement, the Community Facilities District Resolutions, and the Community Facilities District Documents at or prior to the Closing Date;

10. An opinion of the City Attorney dated the date of Closing and addressed to the Underwriter and the City in substantially the form attached hereto as Exhibit E;

11. A certificate dated the Closing Date from Willdan Financial Services to the effect that: (i) that the Special Taxes, if levied in accordance with the Rate and Method and collected will annually yield sufficient revenue to make timely payments of the Annual Debt Service on the Bonds, and annual Administrative Expenses related to the levy and collection of the Special Taxes and the expenses of the Trustee for the Bonds (no representation is made as to the actual amounts that will be collected in future years); (ii) that the Special Tax, if collected in the maximum amounts permitted pursuant to the Rate and Method on the Closing Date, after payment of annual Administrative Expenses related to the levy and collection of the Special Taxes and the expenses of the Trustee for the Bonds, would annually generate at least 110% of the Annual Debt Service payable with respect to the Bonds payable from such Special Taxes assuming the debt service schedule shown in the Official Statement is true and correct; and (iii) the statements in the Official Statement provided by Willdan Financial Services concerning Special Taxes in the Community Facilities District and all information supplied by it for use in the Official Statement were as of the date of the Official Statement and are as of the Closing Date true and correct, and do not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading;

12. Certified copies of the general resolution of the Trustee authorizing the execution and delivery of certain documents by certain officers of the Trustee, which resolution authorizes the execution of the Indenture and the authentication of the Bonds;

13. A certificate of the Trustee, dated the Closing Date, to the effect that: (i) the Trustee is authorized to carry out corporate trust powers, and have full power and authority to perform its duties under the Indenture; (ii) the Trustee is duly authorized to execute and deliver the Indenture, to accept the obligations created by the Indenture and to authenticate the Bonds pursuant to the terms of the Indenture; (iii) no consent, approval, authorization or other action by any governmental or regulatory authority having jurisdiction over the Trustee that has not been obtained is or will be required for the authentication of the Bonds or the consummation by the Trustee of the other transactions contemplated to be performed by the Trustee in connection with the authentication of the Bonds and the acceptance and performance of the obligations created by the Indenture; and (iv) to the best of its knowledge, compliance with the terms of the Indenture will not conflict with, or result in a violation or breach of, or constitute a default under, any loan agreement, indenture, bond, note, resolution or any other agreement or instrument to which the Trustee is a party or by which it is bound, or any law or any rule, regulation, order or decree of any court or governmental agency or body having jurisdiction over the Trustee or any of its activities or properties;

14. An opinion of counsel to the Trustee dated the Closing Date, addressed to the Underwriter, and the Community Facilities District to the effect that the Trustee is a national banking association duly organized and validly existing under the laws of the United States having full power and being qualified to enter into, accept and agree to the provisions of the Indenture, and that such documents has been duly authorized, executed and delivered by the Trustee, and, assuming due execution and delivery by the other parties thereto, constitutes the legal, valid and binding obligation of the Trustee, enforceable in accordance with its terms, subject to bankruptcy, insolvency, reorganization, moratorium and other laws affecting the enforcement of creditors' rights in general and except as such enforceability may be limited by the application of equitable principles if equitable remedies are sought;

15. A certificate or certificates of the Escrow Agent, dated the Closing Date, in form and substance acceptable to the Underwriter and Bond Counsel;

16. A certificate of the Community Facilities District dated the Closing Date, in a form acceptable to Bond Counsel and the Underwriter, that the Bonds are not arbitrage bonds within the meaning of Section 148 of the Internal Revenue Code of 1986, as amended;

17. An opinion of Kutak Rock LLP, counsel to the Underwriter ("**Underwriter's Counsel**"), dated the date of Closing and addressed to the Underwriter in form and substance acceptable to the Underwriter; and

18. The report of Causey Demgen & Moore P.C., (the "**Verification Agent**"), on the mathematical accuracy of certain computations, contained in schedules provided to them which were prepared for the Community Facilities District, relating to the sufficiency of cash deposited into the Escrow Fund to redeem the Refunded Bonds on March 1, 2022.

19. Such additional legal opinions, certificates, instruments and other documents as the Underwriter may reasonably request to evidence the truth and accuracy, as of the date hereof and as of the Closing Date, of the material representations and warranties of the

Community Facilities District contained herein, and of the statements and information contained in the Official Statement and the due performance or satisfaction by the Community Facilities District at or prior to the Closing of all agreements then to be performed and all conditions then to be satisfied by the Community Facilities District in connection with the transactions contemplated hereby and by the Indenture and the Official Statement.

If the Community Facilities District shall be unable to satisfy the conditions to the obligations of the Underwriter to purchase, accept delivery of and pay for the Bonds contained in this Purchase Agreement, or if the obligations of the Underwriter to purchase, accept delivery of and pay for the Bonds shall be terminated for any reason permitted by this Purchase Agreement, this Purchase Agreement shall terminate and neither the Community Facilities District nor the Underwriter shall be under any further obligation hereunder, except that the respective obligations of the Underwriter and the Community Facilities District set forth in Section 5 hereof shall continue in full force and effect.

5. Expenses. Whether or not the transactions contemplated by this Purchase Agreement are consummated, the Underwriter shall be under no obligation to pay, and the Community Facilities District shall pay only from the proceeds of the Bonds, or any other legally available funds of the City, or the Community Facilities District, but only as the Community Facilities District and such other party providing such services may agree, all expenses and costs of the Community Facilities District incident to the performance of its obligations in connection with the authorization, execution, sale and delivery of the Bonds to the Underwriter, including, without limitation, printing costs, rating agency fees and charges, initial fees of the Trustee and Escrow Agent, including fees and disbursements of their counsel, if any, fees and disbursements of Bond Counsel, Disclosure Counsel and other professional advisors employed by the City, costs of preparation, printing, signing, transportation, delivery and safekeeping of the Bonds and for expenses (included in the expense component of the spread) incurred by the Underwriter on behalf of the City's employees which are incidental to implementing this Purchase Agreement, including, but not limited to, meals, transportation, lodging, and entertainment of those employees. The Underwriter shall pay all out-of-pocket expenses of the Underwriter, including, without limitation, advertising expenses, the California Debt and Investment Advisory Commission fee, CUSIP Services Bureau charges, regulatory fees imposed on new securities issuers and any and all other expenses incurred by the Underwriter in connection with the public offering and distribution of the Bonds, including fees and disbursements of Underwriter's Counsel.

6. Notices. Any notice of other communication to be given to the Community Facilities District under this Purchase Agreement may be given by delivering the same in writing to such entity, at the addresses set forth on the cover page hereof; any notice or other communication to be given to the Underwriter under this Purchase Agreement may be given by delivering the same in writing to Stifel, Nicolaus & Company, Incorporated, 515 South Figueroa Street, Suite 1800, Los Angeles, California 90071, Attention: Public Finance.

7. Parties In Interest. This Purchase Agreement is made solely for the benefit of the Community Facilities District and Underwriter (including any successors or assignees of the Underwriter) and no other person shall acquire or have any right hereunder or by virtue hereof.

8. Survival of Representations and Warranties. The representations and warranties of the Community Facilities District under this Purchase Agreement shall not be deemed to have been discharged, satisfied or otherwise rendered void by reason of the Closing and regardless of any investigations made by or on behalf of the Underwriter (or statements as to the results of such

investigations) concerning such representations and statements of the Community Facilities District and regardless of delivery of and payment for the Bonds.

9. Execution in Counterparts. This Purchase Agreement may be executed by the parties hereto in separate counterparts, each of which when so executed and delivered shall be an original, but all such counterparts shall together constitute but one and the same instrument.

10. Effective. This Purchase Agreement shall become effective and binding upon the respective parties hereto upon the execution of the acceptance hereof by the Community Facilities District and shall be valid and enforceable as of the time of such acceptance.

11. No Prior Agreements. This Purchase Agreement supersedes and replaces all prior negotiations, agreements and understanding among the parties hereto in relation to the sale of the Bonds by the Community Facilities District.

12. Governing Law. This Purchase Agreement shall be governed by the laws of the State of California.

13. Effective Date. This Purchase Agreement shall become effective and binding upon the respective parties hereto upon the execution of the acceptance hereof by the Community Facilities District and shall be valid and enforceable as of the time of such acceptance.

Very truly yours,

 SPECIAL TAX REFUNDING BONDS
 SERIES 2021**

FORM OF ISSUE PRICE CERTIFICATE

The undersigned, on behalf of Stifel, Nicolaus & Company, Incorporated (“Stifel”) hereby certifies as set forth below with respect to the sale and issuance of the above-captioned bonds (the “Bonds”).

1. ***Sale of the General Rule Maturities.*** As of the date of this certificate, for each General Rule Maturity of the Bonds the first price at which at least 10% of each such Maturity was sold to the Public is the initial offering price listed in Schedule A.

2. ***Initial Offering Price of the Hold-the-Offering-Price Maturities.***

(a) Stifel offered the Hold-the-Offering-Price Maturities to the Public for purchase at the respective initial offering prices listed in Schedule A (the “Initial Offering Prices”) on or before the Sale Date.

(b) As set forth in the Bond Purchase Agreement, Stifel has agreed in writing that, (i) for each Maturity of the Hold-the-Offering-Price Maturities, they would neither offer nor sell any of the Bonds of such Maturity to any person at a price that is higher than the Initial Offering Price for such Maturity during the Holding Period for such Maturity (the “hold-the-offering-price rule”), and (ii) any selling group agreement shall contain the agreement of each dealer who is a member of the selling group, and any retail distribution agreement shall contain the agreement of each broker-dealer who is a party to the retail distribution agreement, to comply with the hold-the-offering-price rule. Pursuant to such agreement, no Underwriter (as defined below) has offered or sold any Maturity of the Hold-the-Offering-Price Maturities at a price that is higher than the respective Initial Offering Price for that Maturity of the Bonds during the Holding Period. Attached as Schedule B is the final pricing wire.

3. ***Defined Terms.***

(a) *General Rule Maturities* means those Maturities of the Bonds listed in Schedule A hereto as the “General Rule Maturities.”

(b) *Hold-the-Offering-Price Maturities* means those Maturities of the Bonds listed in Schedule A hereto as the “Hold-the-Offering-Price Maturities.”

(c) *Holding Period* means, with respect to a Hold-the-Offering-Price Maturity, the period starting on the Sale Date and ending on the earlier of (i) the close of the fifth business day after the Sale Date, or (ii) the date on which Stifel has sold at least 10% of such Hold-the-Offering-Price

Maturity to the Public at prices that are no higher than the Initial Offering Price for such Hold-the-Offering-Price Maturity.

(d) *Issuer* means the Community Facilities District No. 5 of the City of Moreno Valley.

(e) *Maturity* means Bonds with the same credit and payment terms. Bonds with different maturity dates, or Bonds with the same maturity date but different stated interest rates, are treated as separate maturities.

(f) *Public* means any person (including an individual, trust, estate, partnership, association, company, or corporation) other than an Underwriter or a related party to an Underwriter. The term “related party” for purposes of this certificate generally means any two or more persons who have greater than 50 percent common ownership, directly or indirectly.

(g) *Sale Date* means the first day on which there is a binding contract in writing for the sale of a Maturity of the Bonds. The Sale Date of the Bonds is _____, 2021.

(h) *Underwriter* means (i) any person that agrees pursuant to a written contract with the Issuer (or with the lead underwriter to form an underwriting syndicate) to participate in the initial sale of the Bonds to the Public, and (ii) any person that agrees pursuant to a written contract directly or indirectly with a person described in clause (i) of this paragraph to participate in the initial sale of the Bonds to the Public (including a member of a selling group or a party to a retail distribution agreement participating in the initial sale of the Bonds to the Public).

4. *Arbitrage Yield.*

We have provided the attached schedules to the Issuer with respect to the yield on the Bonds being _____%. Bond Counsel (as defined in the attached Tax Certificate) has advised that the issue price is determined based on the prices of each Maturity of the Bonds listed in Schedule A as described in paragraphs 1 and 2 above. To the extent that we provided the Issuer and Bond Counsel with certain computations that show a bond yield, issue price, weighted average maturity and certain other information with respect to the Bonds, these computations are based on our understanding of directions that we have received from Bond Counsel regarding interpretation of the applicable law. We express no view regarding the legal sufficiency of any such computations or the correctness of any legal interpretation made by Bond Counsel.

5. *Reserve Account.*

The establishment of the Reserve Account of the Special Tax Fund in the amount of the Reserve Requirement was vital to the marketing of the Bonds and reasonably required to assure the payment of debt service on the Bonds.

Stifel understands that Bond Counsel will rely upon the representations and certifications in this certificate, among other things, in reaching its conclusion that the Bonds do not constitute “arbitrage bonds” within the meaning of Section 148 of the Internal Revenue Code of 1986, as amended (the “Code”), provided, however, that nothing herein represents our interpretation of any laws, and, in particular, the Treasury Regulations issued under Section 148 of the Code.

The representations set forth in this certificate are limited to factual matters only. Nothing in this certificate represents Stifel’s interpretation of any laws, including specifically Sections 103 and

148 of the Code and the Treasury Regulations thereunder. The undersigned understands that the foregoing information will be relied upon by the Issuer with respect to certain of the representations set forth in the attached Tax Certificate and with respect to compliance with the federal income tax rules affecting the Bonds, and by Bond Counsel in connection with rendering its opinion that the interest on the Bonds is excluded from gross income for federal income tax purposes, the preparation of the Internal Revenue Service Form 8038-G, and other federal income tax advice that it may give to the Issuer from time to time relating to the Bonds.

December __, 2021

Stifel, Nicolaus, & Company, Incorporated
Los Angeles, California

Re: \$ _____ *Community Facilities District No. 5 of the City of Moreno Valley
Special Tax Refunding Bonds, Series 2021*

Ladies and Gentlemen:

Acting in our capacity as Bond Counsel for Community Facilities District No. 5 of the City of Moreno Valley (the “District”), we have examined certified copies of proceedings taken in connection with the sale and issuance of the above-referenced bonds (the “Bonds”) in the aggregate principal amount of \$ _____, and we have rendered our opinion to the legislative body of the District this day regarding the validity and enforceability of the Bonds (the “Approving Opinion”). The Bonds have been issued pursuant to the Mello-Roos Community Facilities Act of 1982, as amended, Sections 53311 *et seq.* of the Government Code of the State of California (the “Act”). You may rely upon our Approving Opinion as if it were addressed to you.

Capitalized terms not otherwise defined herein shall have the meanings set forth in the Bond Purchase Agreement dated December __, 2021 (the “Purchase Agreement”), by and between the District and Stifel, Nicolaus, & Company, Incorporated, as Underwriter.

In connection with the preparation of this opinion, we have examined originals or copies certified or otherwise identified to our satisfaction of (i) the Purchase Agreement, (ii) the Bond Indenture dated as of December 1, 2021 (the “Bond Indenture”), by and between Wilmington Trust, National Association, as Trustee, and the District, (iii) the Official Statement dated December __, 2021 relating to the Bonds (the “Official Statement”), (iv) the Continuing Disclosure Agreement dated as of December 1, 2021, by and between the District and _____, as Dissemination Agent, (v) the letters, certificates and opinions delivered to you pursuant to the provisions of Section 4(F) of the Purchase Agreement, and (vi) such other documents, certificates, instructions and records as we have considered necessary or appropriate as a basis for our opinion.

We have assumed the authenticity of all documents submitted to us as originals, the conformity with originals of all documents submitted to us as copies and the genuineness of all signatures. As to questions of fact material to our opinion, we have relied upon the representations of

each party made in the aforesaid documents, and we have made no independent investigation of such matters.

Based upon the foregoing and such other information and documents as we consider necessary to render this opinion, we are of the opinion that:

1. The Purchase Agreement has been duly authorized, executed and delivered by the District and, assuming due authorization, execution and delivery of the Underwriter, constitutes the legally valid and binding agreement of the District enforceable in accordance with its terms, except as enforcement may be limited by bankruptcy, insolvency or other laws relating to or affecting generally the enforcement of creditors' rights, by equitable principles, by the exercise of judicial discretion in appropriate cases and by the limitations on remedies against public agencies in the State of California.

2. The statements contained in the Official Statement on the cover page and under the captions "INTRODUCTION," "THE BONDS" (except under the subcaption "Book-Entry Only System"), "SOURCES OF PAYMENT FOR THE BONDS," "TAX EXEMPTION" and Appendices B and D thereto, insofar as such information purports to summarize certain provisions of the Bonds, the Bond Indenture and our Approving Opinion presents a fair and accurate summary of such provisions; provided that no opinion is expressed with respect to any financial or statistical data contained therein, or any information relating to the Depository Trust Company and its book-entry only system.

3. The Bonds are not subject to the registration requirements of the Securities Act of 1933, as amended, and the Bond Indenture is exempt from qualification under the Trust Indenture Act of 1939, as amended.

The foregoing opinions are based upon our analysis and interpretation of existing statutes, regulations, rulings and judicial decisions and cover certain matters not directly addressed by such authorities. In rendering these opinions, we have relied upon certain representations of fact and certifications made by the District, the City of Moreno Valley and others. We have not undertaken to verify through independent investigation the accuracy of the representations and certifications relied upon by us. The foregoing opinions are limited to matters governed by the laws of the State of California and federal securities laws, and we assume no responsibility with respect to the applicability or the effect of the laws of any other jurisdiction.

Except as expressly set forth in the Approving Opinion, we express no opinion regarding any tax consequences with respect to the Bonds. No opinion is expressed herein with respect to the compliance with, or applicability of, any "blue sky" laws of any state as they relate to the offer or sale of the Bonds.

This letter is furnished by us as Bond Counsel to the District. No attorney-client relationship has existed or exists between our firm and you in connection with the Bonds or by virtue of this letter. This letter is delivered to you as the Underwriter of the Bonds, is solely for your benefit as the Underwriter and is not to be used, circulated, quoted or otherwise referred to or relied upon for any other purpose or by any other person. This letter is not intended to be relied upon by holders of Bonds or the owners of any beneficial ownership interest in the Bonds nor is it intended to be relied upon by the District or its representatives as a basis for making the representations made by the District in any documents executed by the District in connection with the delivery of the Bonds.

We call attention to the fact that the foregoing opinions may be affected by actions taken (or not taken) or events occurring (or not occurring) after the date hereof. We have not undertaken to determine, or to inform any person, whether such actions or events are taken (or not taken) or occur (or do not occur). Our engagement with respect to the Bonds terminates as of the date hereof, and we have not undertaken any duty, and expressly disclaim any responsibility, to advise you as to events occurring after the date hereof with respect to the Bonds or other matters discussed herein or in the Official Statement.

Respectfully submitted,

[Closing Date]

Community Facilities District No. 5
of the City of Moreno Valley
Moreno Valley, California

Stifel, Nicolaus & Company, Incorporated,
Los Angeles, California

*Re: \$ _____ Community Facilities District No. 5 of the City of Moreno Valley Special
Tax Refunding Bonds, Series 2021*

Ladies and Gentlemen:

The Office of the City Attorney has served as counsel to the City of Moreno Valley, California (the “City”) and Community Facilities District No. 5 of the City of Moreno Valley (the “District”), in connection with the issuance of the District’s Special Tax Refunding Bonds, Series 2021, in the aggregate principal amount of \$ _____ (the “Bonds”). The Bonds are secured by a Bond Indenture, dated as of December 1, 2021 (the “Indenture”), by and between Wilmington Trust, National Association, as trustee (the “Trustee”) and the District, executed in connection with the issuance of the Bonds. All capitalized terms not defined herein shall have the meaning set forth in the Indenture and if not defined therein, in the Bond Purchase Agreement (as defined herein).

The Bonds are being purchased by Stifel, Nicolaus & Company, Incorporated, as underwriter (the “Underwriter”), pursuant to a Bond Purchase Agreement, dated _____, 2021 (the “Bond Purchase Agreement”), by and between the Underwriter and the District. The Indenture, the Continuing Disclosure Agreement, the Escrow Agreement and the Bond Purchase Agreement are hereafter referred to as the “Community Facilities District Documents.” The execution and delivery of the District Documents are authorized by Resolution No. _____ of the City Council of the City, acting in its capacity as the legislative body of the District, adopted on October 19, 2021 (the “Resolution of Issuance”).

The Bonds are issued under the authority of Chapter 2.5, Part 1, Division 2, Title 5 of the Government Code of the State of California (the “Act”), and all laws supplementary thereto and

amendatory thereof. The Official Statement dated ____, 2021 for the Bonds is hereinafter referred to as the “Official Statement.”

In rendering this Opinion, we have examined copies of proceedings for the issuance of the Bonds, including the (i) Resolution of Issuance, (ii) Continuing Disclosure Agreement, (iii) Indenture, (iv) Bond Purchase Agreement, (v) the Escrow Agreement, and (vi) the form of Bonds and such other records, documents, certificates, opinions and other matters as are in our judgment are necessary or appropriate to enable us to render the opinions expressed herein. We have assumed and relied upon the accuracy of the factual matters represented or warranted; by the District in the Formation Documents and the Community Facilities District Documents; by the City in the Resolution of Issuance; in the closing certificates and documents that the respective officers of the District and the City each executed and delivered in connection with the sale and closing of the Bonds; and on the Official Statement. Furthermore, we have assumed compliance with the covenants and agreements contained in the Indenture. The Resolution of Issuance is referred to as the “City Action.”

We have assumed the genuineness of all signatures, the authenticity of all documents submitted to us as originals and the conformity with originals of all documents submitted to us as copies. To the extent the District’s obligations depend on the enforceability of the Community Facilities District Documents against the other parties thereto, we have assumed that the Community Facilities District Documents are enforceable against such other parties.

From such examination, on the basis of our reliance upon the assumptions in this Opinion and our consideration of those questions of law we considered relevant, and subject to the limitations and qualifications in this Opinion, we are of the opinion that:

1. The City is a general law city, duly organized and existing under the Constitution and laws of the State of California.
2. The District is duly organized and validly existing under the Constitution and laws of the State as a community facilities district under the Act.
3. The District has full legal right, power, and authority to execute and deliver the Community Facilities District Documents.
4. The Community Facilities District Documents and the Official Statement have been duly authorized, executed, and delivered by the District and, assuming due authorization and execution by any other applicable parties thereto, the Community Facilities District Documents constitute the valid and binding obligations of the District, enforceable in accordance with their respective terms, subject to laws relating to bankruptcy, insolvency, or other laws relating to or affecting the enforcement of creditors’ rights generally, to the limitations on legal remedies against municipal corporations in the State of California, and to the application of equitable principles if equitable remedies are sought.
5. The City Council adopted the resolutions and ordinances forming the District and confirming the Special Taxes at meetings of the City Council which were called, held and conducted pursuant to law and with all public notice required by law and at which a quorum was present and acting throughout, and the City Council adopted the resolutions approving the Community Facilities District Documents and authorizing the sale and issuance of the Bonds at meetings of the City

Council which were called, held and conducted pursuant to law and with all public notice required by law at which a quorum was present and acting throughout, and such resolutions and ordinances are now in full force and effect and have not been amended, modified or rescinded.

6. To the best of our current, actual knowledge, after due inquiry, there are no actions, suits, proceedings, inquiries, or investigations, at law or in equity, before or by any court, governmental agency, public board, or body, pending or threatened against the District or the City, acting on behalf of the District, for which the District or the City has been served, to restrain or enjoin the issuance of the Bonds, the collection or application of the Special Taxes, or the payment of principal of and interest on the Bonds, or in any way contesting the validity of the formation of the District, the Bonds, or the Community Facilities District Documents.

7. The execution and delivery of the Community Facilities District Documents, and compliance with the provisions thereof and hereof, under the circumstances contemplated thereby, do not and will not in any material respect conflict with or constitute on the part of the District or the City, acting on behalf of the District, a breach of or default under any agreement or other instrument to which either is a party or by which either is bound, or by any existing law, regulation, court order or consent decree to which either is subject that we have, in the exercise of customary professional diligence, recognized as applicable to the District and the transactions contemplated by the Community Facilities District Documents and the Formation Documents, and with respect to such conflict, breach or default, would materially adversely affect the ability of the District to pay the principal or interest on the Bonds; and if any such agreement or instrument to which the City acting on behalf of the District or the District is a party is governed by the laws of a jurisdiction other than California, the City Attorney has assumed that such agreement or instrument is governed by the laws of California and the City Attorney expresses no opinion as to the effect of the District's performance of its obligations under the Community Facilities District Documents and the Formation Documents on the District's compliance with financial covenants in such other agreements or instruments.

8. The Special Taxes constituting the security for the Bonds have been duly and lawfully levied under and pursuant to the Act and constitute valid and legally binding liens on the properties on which they have been levied, subject to the effect of bankruptcy, insolvency, reorganization, arrangement, fraudulent conveyance, moratorium and other similar laws relating to or affecting creditors' rights generally, to the application of equitable principles, to the exercise of judicial discretion in appropriate cases and to the limitations on legal remedies against municipalities in the State of California.

The matters set forth in paragraphs 6 and 7 (other than with respect to conflicts) are factual confirmations and not legal opinions. For purposes of the matters set forth in paragraph 7, we have assumed that the District will not in the future take any discretionary action (including a decision not to act) permitted by the Community Facilities District Documents or Formation Documents that would cause the adoption by the Council of the City Action or the execution and delivery by the District of the Community Facilities District Documents or Formation Documents to violate any California constitutional provision, existing State law, charter, ordinance, regulation, decree, order or resolution, or conflict in any material respect with, or constitute a violation or breach of or default under any agreement, indenture, mortgage, lease or other instrument to which the District or the City is subject to or by which they are bound, or require an approval, consent or authorization to be obtained from a California governmental authority.

We express no opinion with respect to any indemnification, contribution, penalty, choice of law, choice of forum, choice of venue, severability or waiver provisions contained in the Community Facilities District Documents. Also, we express no opinion with respect to the interest in any of the revenue described in, or as subject to, the lien of the Indenture or the sufficiency of the descriptions contained therein.

We express no opinion as to any provision requiring written amendments or waivers insofar as it suggests that oral or other modifications, amendments or waivers could not be effectively agreed upon by the parties or that the doctrine of promissory estoppel might not apply.

A court may refuse to enforce a provision of the Community Facilities District Documents or the Formation Documents if it deems that such provision is in violation of public policy. No opinion is being given as to the availability of any particular remedy.

The law covered by this opinion is limited to the present laws of the State of California and we express no opinion as to the laws of any other jurisdiction.

The opinions expressed herein are matters of professional judgment and are not a guaranty or warranty of any result whatsoever.

This Opinion may be relied on by you only in connection with the issuance of the Bonds. It may not be used or relied upon for any other purpose or by any other person, nor may copies be delivered to any other person, without in each instance our prior written consent, provided however, that it may be included in the transcript of record of proceedings relating to the issuance of the Bonds. This Opinion is expressly limited to the matters set forth above, and we render no opinion, whether by implication or otherwise, as to any other matters. This letter speaks only as of the date hereof and we assume no obligation to update or supplement this opinion to reflect any facts or circumstances that arise after the date of this opinion and come to our attention, or any future changes in laws, rules or regulations.

This Opinion is given in an official capacity only, and not personally, and no personal liability shall derive or result from this opinion.

Sincerely yours,

CONTINUING DISCLOSURE AGREEMENT

This Continuing Disclosure Agreement, dated as of December 1, 2021 (the “**Disclosure Agreement**”) is executed and delivered by Community Facilities District No. 5 of the City of Moreno Valley (the “**Issuer**”) and Willdan Financial Services as dissemination agent (the “**Dissemination Agent**”), in connection with the issuance of the Issuer’s \$ _____ Special Tax Refunding Bonds, Series 2021 (the “**Bonds**”). The Bonds are being issued pursuant to a Bond Indenture, dated as of December 1, 2021 (the “**Bond Indenture**”), by and between the Issuer and the Wilmington Trust, National Association. The Issuer and the Dissemination Agent covenant as follows:

SECTION 1. Purpose of the Disclosure Agreement. This Disclosure Agreement is being executed and delivered by the Issuer and the Dissemination Agent, for the benefit of the Owners and Beneficial Owners of the Bonds and in order to assist the Underwriter in complying with the Rule.

SECTION 2. Definitions. In addition to the definitions set forth in the Bond Indenture, which apply to any capitalized term used in this Disclosure Agreement unless otherwise defined in this Section, the following capitalized terms shall have the following meanings:

“**Annual Report**” shall mean any report provided by the Issuer pursuant to, and as described in, Sections 3 and 4 of this Disclosure Agreement.

“**Beneficial Owner**” shall mean any person which: (a) has the power, directly or indirectly, to vote or consent with respect to, or to dispose of ownership of, any Bonds (including persons holding Bonds through nominees, depositories or other intermediaries); or (b) is treated as the owner of any Bonds for federal income tax purposes.

“**City**” shall mean the City of Moreno Valley, California.

“**Disclosure Representative**” shall mean the City Manager of the City, the Chief Financial Officer of the City, the Special Districts Division Manager of the City, or the designee thereof, or such other officer or employee as the Issuer shall designate in writing to the Dissemination Agent from time to time.

“**Dissemination Agent**” shall mean, initially, Willdan Financial Services, or any successor Dissemination Agent designated in writing by the Issuer and which has filed with the then current Dissemination Agent a written acceptance of such designation.

“**Fiscal Year**” shall mean the period from July 1 to June 30, or any other period selected by the Issuer as its fiscal year.

“**Listed Events**” shall mean any of the events listed in Section 5(a) and (b) of this Disclosure Agreement.

“**MSRB**” shall mean the Municipal Securities Rulemaking Board, which has been designated by the Securities and Exchange Commission as the sole repository of disclosure information for purposes of the Rule, or any other repository of disclosure information that may be designated by the Securities and Exchange Commission as such for purposes of the Rule in the future.

“**Official Statement**” shall mean the Official Statement relating to the Bonds, dated _____, 2021.

“**Rule**” shall mean Rule 15c2-12 adopted by the Securities and Exchange Commission under the Securities Exchange Act of 1934, as the same may be amended from time to time.

“**State**” shall mean the State of California.

“**Underwriter**” shall mean the original underwriters of the Bonds that are required to comply with the Rule in connection with the offering of the Bonds.

SECTION 3. Provision of Annual Reports.

(a) The Issuer shall, or shall cause the Dissemination Agent by written direction to such Dissemination Agent to, upon delivery of the Annual Report to the Dissemination Agent (if other than the Issuer), not later than April 1 of each year, commencing April 1, 2022, provide to the MSRB an Annual Report that is consistent with the requirements of Section 4 of this Disclosure Agreement (provided that the first Annual Report may consist solely of the Official Statement). The Annual Report may be submitted as a single document or as separate documents comprising a package, and may cross-reference other information as provided in Section 4 of this Disclosure Agreement; provided that the audited financial statements of the Issuer may be submitted separately from the balance of the Annual Report and later than the date required above for the filing of the Annual Report if they are not available by that date. If the Issuer’s Fiscal Year changes, it shall give notice of such change to the Dissemination Agent and the Issuer shall, or shall cause the Dissemination Agent, by written direction to such Dissemination Agent, to give notice of such change in the same manner as for a Listed Event under Section 5(a).

(b) Not later than fifteen (15) business days prior to each April 1, the Issuer shall provide the Annual Report to the Dissemination Agent (if other than the Issuer). The Issuer shall provide a written certification with each Annual Report furnished to the Dissemination Agent to the effect that such Annual Report constitutes the Annual Report required to be furnished by it hereunder. The Dissemination Agent may conclusively rely upon such certification of the Issuer and shall have no duty or obligation to review such Annual Report. If: (i) the Issuer is acting as Dissemination Agent and an Annual Report has not been provided to the MSRB by the date required in subsection (a); or (ii) if the Dissemination Agent is other than the Issuer and is unable to verify that an Annual Report has been provided to the MSRB by the date required in subsection (a), then the Issuer or the Dissemination Agent (if other than the Issuer), as applicable, shall send a notice to the MSRB in a timely manner in substantially the form attached as Exhibit A.

(c) The Dissemination Agent shall:

(i) determine each year prior to April 1 the then-applicable rules and electronic format prescribed by the MSRB for the filing of annual continuing disclosure reports; and

(ii) if the Dissemination Agent is other than the Issuer, promptly after receipt of the Annual Report, file a report with the Issuer certifying that the Annual Report has been filed with the MSRB pursuant to this Disclosure Agreement, and stating, to the extent that it can confirm such filing of the Annual Report, the date that it was filed.

SECTION 4. Content of Annual Reports. The Issuer’s Annual Report shall contain or include by reference the following:

(a) The Issuer does not currently prepare audited financial statements and it is not anticipated that the Issuer will prepare audited financial statements in the future. If the Issuer does prepare audited financial statements in the future, the Issuer’s Annual Report shall contain or incorporate by reference such audited financial statements, if any, for the most recently completed Fiscal Year, prepared in accordance with generally accepted accounting principles as promulgated to apply to governmental entities from time to time by the Governmental Accounting Standards Board. If audited financial statements of the Issuer are to be prepared in the future, but are not available at the time required for filing as set forth in Section 3(a), unaudited financial statements of the Issuer shall be submitted with the Annual Report and the audited financial statements shall be submitted once available. The financial statements of the City shall not be deemed to be the financial statements of the Issuer, unless such audited financial statements contain specific information as to the Issuer, its revenues, expenses and account balances. If the City’s audited financial statements contain

specific information as to the Issuer, its revenues, expenses and account balances, the Issuer's Annual Report shall contain or incorporate by reference the City's audited financial statements. If the City's audited financial statements contain specific information as to the Issuer, its revenues, expenses and account balances, but are not available at the time required for filing, unaudited financial statements of the City that contain specific information as to the Issuer, its revenues, expenses and account balances shall be submitted with the Annual Report and the City's audited financial statements shall be submitted once available.

(b) To the extent not contained in the audited financial statements filed pursuant to subsection (a):

(i) the principal amount of Bonds outstanding as of the September 2 preceding the filing of the Annual Report;

(ii) the balance in each fund under the Bond Indenture as of the September 2 preceding the filing of the Annual Report;

(iii) any changes to the Rate and Method approved or submitted to the qualified electors for approval prior to the filing of the Annual Report and a description of any parcels for which the Special Taxes have been prepaid, including the amount prepaid, since the date of the last Annual Report;

(iv) an update in substantially the form of Table 1 in the Official Statement based on development status as of January 1 of the Fiscal Year prior to the Fiscal Year in which the Annual Report is disseminated;

(v) an update in substantially the form of Table 2 in the Official Statement;

(vi) a table setting forth for the five most recent fiscal years in which Special Taxes were levied, the amount of Special Taxes levied in each fiscal year and the percentage delinquent as of June 30 of such fiscal year and as of the date of the Annual Report, and a description of the status of any foreclosure actions being pursued by the Issuer with respect to delinquent Special Taxes;

(vii) a statement or table identifying any owner of property within the Issuer that is responsible for more than 5% of the Special Tax levy and delinquent in the payment of Special Taxes; and

(viii) any information not already included under (i) through (vii) above that the Issuer is required to file in its annual report to the California Debt and Investment Advisory Commission pursuant to the provisions of the Mello-Roos Community Facilities Act of 1982, as amended.

(ix) In addition to any of the information expressly required to be provided under paragraphs (i) through (viii) of this Section, the Issuer shall provide such further information, if any, as may be necessary to make the specifically required statements, in the light of the circumstances under which they are made, not misleading.

Any or all of the items listed above may be included by specific reference to other documents, including official statements for debt issues of the Issuer or related public entities, which have been submitted to the MSRB or the Securities and Exchange Commission. If the document included by reference is a final official statement, it must be available from the MSRB. The Issuer shall clearly identify each such other document so included by reference.

SECTION 5. Reporting of Significant Events.

(a) Pursuant to the provisions of this Section 5, the Issuer shall give, or cause to be given, notice of the occurrence of any of the following events with respect to the Bonds in a timely manner not more than ten (10) Business Days after the event:

- (i) Principal and interest payment delinquencies.
- (ii) Unscheduled draws on debt service reserves reflecting financial difficulties.
- (iii) Unscheduled draws on credit enhancements reflecting financial difficulties.
- (iv) Substitution of credit or liquidity providers, or their failure to perform.
- (v) Adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability or Notices of Proposed Issue (IRS Form 5701 TEB).
- (vi) Tender offers.
- (vii) Defeasances.
- (viii) Rating changes.
- (ix) Bankruptcy, insolvency, receivership or similar proceedings.

Note: For the purposes of the event identified in subparagraph (ix), the event is considered to occur when any of the following occur: the appointment of a receiver, fiscal agent or similar officer for an obligated person in a proceeding under the U.S. Bankruptcy Code or in any other proceeding under state or federal law in which a court or governmental authority has assumed jurisdiction over substantially all of the assets or business of the obligated person, or if such jurisdiction has been assumed by leaving the existing governmental body and officials or officers in possession but subject to the supervision and orders of a court or governmental authority, or the entry of an order confirming a plan of reorganization, arrangement or liquidation by a court or governmental authority having supervision or jurisdiction over substantially all of the assets or business of the obligated person.

(b) Pursuant to the provisions of this Section 5, the Issuer shall give, or cause to be given, notice of the occurrence of any of the following events with respect to the Bonds, if material, in a timely manner not more than ten (10) Business Days after occurrence:

- (i) Unless described in Section 5(a)(v), other notices or determinations by the Internal Revenue Service with respect to the tax status of the Bonds or other events affecting the tax status of the Bonds.
- (ii) Modifications to the rights of Bondholders.
- (iii) Optional, unscheduled or contingent Bond calls.
- (iv) Release, substitution or sale of property securing repayment of the Bonds.
- (v) Non-payment related defaults.
- (vi) The consummation of a merger, consolidation or acquisition involving the Issuer or the sale of all or substantially all of the assets of the Issuer, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms.

(vii) Appointment of a successor or additional trustee or the change of the name of a trustee.

(viii) Incurrence of a Financial Obligation of the District, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a Financial Obligation of the District, any of which affect security holders.

(ix) Default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a Financial Obligation of the District, any of which reflect financial difficulties.

(c) If the Issuer determines that knowledge of the occurrence of a Listed Event under subsection (b) would be material under applicable federal securities laws, and if the Dissemination Agent is other than the Issuer, the Issuer shall promptly notify the Dissemination Agent in writing. Such notice shall instruct the Dissemination Agent to file a notice of such occurrence with the MSRB in an electronic format as prescribed by the MSRB in a timely manner not more than ten (10) Business Days after the event. Notwithstanding the foregoing, notice of Listed Events described in subsections (a)(vii) and (b)(iii) need not be given under this subsection any earlier than the notice (if any) of the underlying event is given to Owners of affected Bonds pursuant to the Bond Indenture. In each case of the Listed Event, the Dissemination Agent shall not be obligated to file a notice as required in this subsection (c) prior to the occurrence of such Listed Event.

(d) If the Issuer determines that a Listed Event under subsection (b) would not be material under applicable federal securities laws and if the Dissemination Agent is other than the Issuer, the Issuer shall so notify the Dissemination Agent in writing and instruct the Dissemination Agent not to report the occurrence.

(e) The Issuer hereby agrees that the undertaking set forth in this Disclosure Agreement is the responsibility of the Issuer and, if the Dissemination Agent is other than the Issuer, the Dissemination Agent shall not be responsible for determining whether the Issuer's instructions to the Dissemination Agent under this Section 5 comply with the requirements of the Rule.

SECTION 6. Termination of Reporting Obligation. The obligations of the Issuer and the Dissemination Agent under this Disclosure Agreement shall terminate upon the legal defeasance, prior redemption or payment in full of all of the Bonds. If such termination occurs prior to the final maturity of the Bonds, the Issuer shall give notice of such termination in the same manner as for a Listed Event under Section 5(a).

SECTION 7. Dissemination Agent. The Issuer may, from time to time, appoint or engage a Dissemination Agent to assist it in carrying out its obligations under this Disclosure Agreement, and may discharge any such Dissemination Agent, with or without appointing a successor Dissemination Agent. The Dissemination Agent shall not be responsible in any manner for the form or content of any notice or report prepared by the Issuer pursuant to this Disclosure Agreement. The Dissemination Agent may resign by providing thirty days' written notice to the Issuer and the Trustee. The Dissemination Agent shall not be responsible for the content of any report or notice prepared by the Issuer and shall have no duty to review any information provided to it by the Issuer. The Dissemination Agent shall have no duty to prepare any information report, nor shall the Dissemination Agent be responsible for filing any report not provided to it by the Issuer in a timely manner and in a form suitable for filing.

SECTION 8. Amendment; Waiver. Notwithstanding any other provision of this Disclosure Agreement, the Issuer may amend this Disclosure Agreement, and any provision of this Disclosure Agreement may be waived, provided that, in the opinion of nationally recognized bond counsel, such amendment or waiver is permitted by the Rule, and provided further that the Dissemination Agent shall have first consented

to any amendment that modifies or increases its duties or obligations hereunder. In the event of any amendment or waiver of a provision of this Disclosure Agreement, the Issuer shall describe such amendment in the next Annual Report, and shall include, as applicable, a narrative explanation of the reason for the amendment or waiver and its impact on the type (or in the case of a change of accounting principles, on the presentation) of financial information or operating data being presented by the Issuer. In addition, if the amendment relates to the accounting principles to be followed in preparing financial statements: (a) notice of such change shall be given in the same manner as for a Listed Event under Section 5(a); and (b) the Annual Report for the year in which the change is made shall present a comparison (in narrative form and also, if feasible, in quantitative form) between the financial statements as prepared on the basis of the new accounting principles and those prepared on the basis of the former accounting principles.

SECTION 9. Additional Information. Nothing in this Disclosure Agreement shall be deemed to prevent the Issuer from disseminating any other information, using the means of dissemination set forth in this Disclosure Agreement or any other means of communication, or including any other information in any Annual Report or notice of occurrence of a Listed Event, in addition to that which is required by this Disclosure Agreement. If the Issuer chooses to include any information in any Annual Report or notice of occurrence of a Listed Event in addition to that which is specifically required by this Disclosure Agreement, the Issuer shall have no obligation under this Disclosure Agreement to update such information or to include it in any future Annual Report or notice of occurrence of a Listed Event.

SECTION 10. Default. In the event of a failure by the Issuer or the Dissemination Agent to comply with any provision of this Disclosure Agreement, any Owner or Beneficial Owner of the Bonds may take such actions as may be necessary and appropriate, including seeking mandate or specific performance by court order, to cause the Issuer to comply with its obligations under this Disclosure Agreement. A default under this Disclosure Agreement shall not be deemed an Event of Default under the Bond Indenture, and the sole remedy under this Disclosure Agreement in the event of any failure of the Issuer or the Dissemination Agent to comply with this Disclosure Agreement shall be an action to compel performance.

No Owner or Beneficial Owner may institute such action, suit or proceeding to compel performance unless they shall have first delivered to the Issuer satisfactory written evidence of their status as such, and a written notice of and request to cure such failure, and the Issuer shall have refused to comply therewith within a reasonable time.

SECTION 11. Duties, Immunities and Liabilities of Dissemination Agent. The Dissemination Agent shall have only such duties as are specifically set forth in this Disclosure Agreement, and the Issuer agrees, to the extent permitted by law, to indemnify and save the Dissemination Agent, its officers, directors, employees and agents, harmless against any loss, expense and liabilities which it may incur arising out of or in the exercise or performance of its powers and duties hereunder, including the costs and expenses (including attorney's fees) of defending against any claim of liability, but excluding liabilities due to the Dissemination Agent's negligence or willful misconduct. The Dissemination Agent shall be paid compensation by the Issuer for its services provided hereunder in accordance with its schedule of fees as amended from time to time and all expenses, legal fees and advances made or incurred by the Dissemination Agent in the performance of its duties hereunder. In performing its duties hereunder, the Dissemination Agent shall not be deemed to be acting in any fiduciary capacity for the Issuer, the Owners, or any other party. The Dissemination Agent shall be entitled to the protections and limitations afforded to the Trustee under the Indenture. The obligations of the Issuer under this Section shall survive resignation or removal of the Dissemination Agent and payment of the Bonds.

SECTION 12. Notices. Any notices or communications to or among any of the parties to this Disclosure Agreement may be given to the Dissemination Agent (if other than the Issuer) and to the Issuer as follows:

Disclosure Representative: City Manager
City of Moreno Valley
14177 Fredrick Street
P.O. Box 88005
Moreno Valley, CA 92552-0805

Dissemination Agent: Willdan Financial Services
27368 Via Industria, Suite 200
Temecula, CA 92590

SECTION 13. Beneficiaries. This Disclosure Agreement inures solely to the benefit of the Issuer, the Dissemination Agent, the Underwriter and the Owners and Beneficial Owners from time to time of the Bonds, and shall create no rights in any other person or entity.

SECTION 14. Signature. This Disclosure Agreement has been executed by the undersigned on the date hereof, and such signature binds the Issuer to the undertaking herein provided.

Attachment: Continuing Disclosure Agreement (5520 : AUTHORIZATION TO REFINANCE COMMUNITY FACILITIES DISTRICT NO. 5 SPECIAL

ESCROW AGREEMENT (2007 BONDS)

THIS ESCROW AGREEMENT (2007 BONDS), dated as of December 1, 2021 (the “**Agreement**”), by and between Community Facilities District No. 5 of the City of Moreno Valley (the “**District**”) and Computershare Trust Company, N.A., as escrow agent (the “**Escrow Agent**”) and as 2007 Fiscal Agent (as such term is defined herein), is entered into in accordance with Resolution No. _____ of the District adopted on October 19, 2021 and a Fiscal Agent Agreement, dated as of May 1, 2007 (the “**2007 Fiscal Agent Agreement**”), by and between the District and Computershare Trust Company, N.A. (as successor to Wells Fargo Bank, National Association), as fiscal agent (the “**2007 Fiscal Agent**”), to refund the outstanding 2007 Special Tax Bonds (the “**2007 Bonds**”).

RECITALS

A. Pursuant to the 2007 Fiscal Agent Agreement, the District has previously caused the 2007 Bonds to be issued in the aggregate principal amount of \$5,870,000, of which \$4,985,000 is currently outstanding.

B. The District has determined that a portion of the proceeds of the \$ _____ aggregate principal amount of the Special Tax Refunding Bonds, Series 2021 (the “**Bonds**”) issued pursuant to a Bond Indenture, dated as of December 1, 2021, by and between the District and Wilmington Trust, National Association, as trustee, will be used to provide a portion of the funds to pay the regularly scheduled payment of interest on the 2007 Bonds on March 1, 2022 (the “**Redemption Date**”), and to pay on the Redemption Date the principal of the 2007 Bonds maturing on and after September 1, 2022, without premium (the “**Redemption Price**”).

C. The District will irrevocably deposit moneys with the Escrow Agent (as permitted by, in the manner prescribed by and all in accordance with the 2007 Fiscal Agent Agreement), which moneys will be used to purchase the securities that are described on Schedule A (the “**Defeasance Securities**”). Such Defeasance Securities satisfy the criteria set forth in Section 9.03(C) of the 2007 Fiscal Agent Agreement, and the principal of and interest on such Defeasance Securities when paid will provide money which, together with the moneys deposited with the Escrow Agent at the same time pursuant to this Agreement, will be fully sufficient to pay and discharge the 2007 Bonds.

AGREEMENT

SECTION 1. Deposit of Moneys. The District hereby instructs the Escrow Agent to deposit \$ _____ received from Stifel, Nicolaus & Company, Incorporated, from the net proceeds of the Bonds in the Escrow Fund established hereunder. The District hereby further instructs the 2007 Fiscal Agent to transfer to the Escrow Agent \$ _____, consisting of \$ _____ from the Reserve Fund established under the 2007 Fiscal Agent Agreement and \$ _____ from the Special Tax Fund established under the 2007 Fiscal Agent Agreement, which amount the District instructs the Escrow Agent to deposit in the Escrow Fund.

The Escrow Agent shall hold all such amounts in irrevocable escrow separate and apart from other funds of the District and the Escrow Agent in a fund hereby created and established to be known as the “**Escrow Fund**” and to be applied solely as provided in this Agreement. The District

represents that the moneys set forth above are at least equal to an amount sufficient to purchase the Defeasance Securities listed on Schedule A, and to hold \$ ___ uninvested as cash.

SECTION 2. Investment of Moneys. The Escrow Agent acknowledges receipt of the moneys described in Section 1 and agrees immediately to invest such moneys in the Defeasance Securities listed on Schedule A and to deposit such Defeasance Securities in the Escrow Fund. The Escrow Agent shall be entitled to rely upon the conclusion of Causey Demgen & Moore P.C., Denver, Colorado (the “**Verification Agent**”), that the Defeasance Securities listed on Schedule A mature and bear interest payable in such amounts and at such times as, together with cash on deposit in the Escrow Fund, will be sufficient to pay the regularly scheduled payment of interest on the 2007 Bonds on the Redemption Date, and to pay on the Redemption Date the Redemption Price of the 2007 Bonds.

SECTION 3. Investment of Any Remaining Moneys. At the written direction of the District, the Escrow Agent shall reinvest any other amount of principal and interest, or any portion thereof, received from the Defeasance Securities prior to the date on which such payment is required for the purposes set forth herein, in noncallable Defeasance Securities maturing not later than the date on which such payment or portion thereof is required for the purposes set forth in Section 5, at the written direction of the District, as verified in a report prepared by an independent certified public accountant or firm of certified public accountants of favorable national reputation experienced in the refunding of obligations of political subdivisions to the effect that the reinvestment described in said report will not adversely affect the sufficiency of the amounts of securities, investments and money in the Escrow Fund to pay the regularly scheduled payment of interest on the 2007 Bonds on the Redemption Date, and to pay on the Redemption Date the Redemption Price of the 2007 Bonds, and provided that the District has obtained and delivered to the Escrow Agent an unqualified opinion of Stradling Yocca Carlson & Rauth, a Professional Corporation, that such reinvestment will not adversely affect the exclusion from gross income for federal income tax purposes of interest on the 2007 Bonds or the Bonds. Any interest income resulting from investment or reinvestment of moneys pursuant to this Section 3 which are not required for the purposes set forth in Section 5, as verified in the letter of the Verification Agent originally obtained by the District with respect to the refunding of the 2007 Bonds or in any other report prepared by an independent certified public accountant or firm of certified public accountants of favorable national reputation experienced in the refunding of tax-exempt obligations of political subdivisions, shall be paid to the District promptly upon the receipt of such interest income by the Escrow Agent. The determination of the District as to whether an accountant qualifies under this Escrow Agreement shall be conclusive.

SECTION 4. Substitution of Securities. Upon the written request of the District, and subject to the conditions and limitations herein set forth and applicable governmental rules and regulations, the Escrow Agent shall sell, redeem or otherwise dispose of the Defeasance Securities, provided that there are substituted therefor from the proceeds of the Defeasance Securities other Defeasance Securities, but only after the District has obtained and delivered to the Escrow Agent: (i) an unqualified opinion of Stradling Yocca Carlson & Rauth, a Professional Corporation, to the effect that the substitution of securities is permitted under the legal documents in effect with respect to the 2007 Bonds and that such reinvestment will not adversely affect the exclusion from gross income for federal income tax purposes of interest on the 2007 Bonds or the Bonds; and (ii) a report by a firm of independent certified public accountants to the effect that the reinvestment described in said report will not adversely affect the sufficiency of the amounts of securities, investments and money in the Escrow Fund to pay the regularly scheduled payment of interest on the 2007 Bonds on the Redemption Date, and to pay on the Redemption Date the Redemption Price of the 2007 Bonds.

The Escrow Agent shall not be liable or responsible for any loss resulting from any reinvestment made pursuant to this Agreement and in full compliance with the provisions hereof.

SECTION 5. Payment of 2007 Bonds.

(a) Payment. From the maturing principal of the Defeasance Securities and the investment income and other earnings thereon and other moneys on deposit in the Escrow Fund, the Escrow Agent shall, apply the amounts on deposit in the Escrow Fund to pay: (i) the regularly scheduled payment of interest on the 2007 Bonds on the Redemption Date; and (ii) the Redemption Price of the 2007 Bonds maturing after the Redemption Date.

(b) Irrevocable Instructions to Provide Notice. The forms of the notices required to be mailed pursuant to Sections 2.03(F) and 9.03 of the 2007 Fiscal Agent Agreement are substantially in the forms attached hereto as Exhibits A and B. The District hereby irrevocably instructs the Escrow Agent to mail a notice of redemption and a notice of defeasance of the 2007 Bonds in accordance with Sections 2.03(F) and 9.03, respectively, of the 2007 Fiscal Agent Agreement, as required to provide for the redemption of the 2007 Bonds in accordance with this Section 5, and to file such notices with the Municipal Securities Rulemaking Board's Electronic Municipal Market Access System, maintained on the Internet at <http://emma.msrb.org/> at such times that such notices are provided pursuant to the 2007 Fiscal Agent Agreement.

(c) Unclaimed Moneys. Any moneys in the Escrow Fund which remain unclaimed for two years after the Redemption Date shall be repaid by the Escrow Agent to the District.

(d) Priority of Payments. The owners of the 2007 Bonds shall have a first and exclusive lien on all moneys and securities in the Escrow Fund until such moneys and such securities are used and applied as provided in this Agreement.

(e) Termination of Obligation. As provided in the 2007 Fiscal Agent Agreement, upon the deposit of moneys with the Escrow Agent in the Escrow Fund as set forth in Section 1 and the purchase of the various Defeasance Securities as provided in Section 2, the pledge of the Special Tax Revenues (as such term is defined in the 2007 Fiscal Agent Agreement) and other funds provided for in the 2007 Fiscal Agent Agreement and all other obligations of the City of Moreno Valley and the District under the 2007 Fiscal Agent Agreement with respect to the 2007 Bonds shall cease and terminate, except as set forth in the 2007 Fiscal Agent Agreement.

SECTION 6. Application of Certain Terms of the 2007 Fiscal Agent Agreement. All of the terms of the 2007 Fiscal Agent Agreement relating to the making of payments of principal and interest with respect to the 2007 Bonds and relating to the exchange or transfer of the 2007 Bonds are incorporated in this Agreement as if set forth in full herein. The procedures set forth in Article VII of the 2007 Fiscal Agent Agreement relating to the resignation, removal and merger of the 2007 Fiscal Agent under the 2007 Fiscal Agent Agreement are also incorporated in this Agreement as if set forth in full herein and shall be the procedures to be followed with respect to any resignation or removal of the Escrow Agent hereunder.

SECTION 7. Performance of Duties. The Escrow Agent agrees to perform only the duties set forth herein and shall have no responsibility to take any action or omit to take any action not set forth herein.

SECTION 8. Escrow Agent's Authority to Make Investments. Except as provided in Section 2 hereof, the Escrow Agent shall have no power or duty to invest any funds held under this Agreement or to sell, transfer or otherwise dispose of the moneys or Defeasance Securities held hereunder.

SECTION 9. Indemnity. The District hereby assumes liability for, and hereby agrees (whether or not any of the transactions contemplated hereby are consummated) to indemnify, protect, save and keep harmless the Escrow Agent and its respective successors, assigns, agents, employees and servants, from and against any and all liabilities, obligations, losses, damages, penalties, claims, actions, suits, costs, expenses and disbursements (including reasonable legal fees and disbursements) of whatsoever kind and nature that may be imposed on, incurred by or asserted against the Escrow Agent at any time (whether or not also indemnified against the same by the District or any other person under any other agreement or instrument, but without double indemnity) in any way relating to or arising out of the execution, delivery and performance of this Agreement, the establishment hereunder of the Escrow Fund, the acceptance of the funds and securities deposited therein, the retention of the proceeds thereof and any payment, transfer or other application of moneys or securities by the Escrow Agent in accordance with the provisions of this Agreement; provided, however, that the District shall not be required to indemnify the Escrow Agent against the Escrow Agent's own negligence or willful misconduct, the negligence or willful misconduct of the Escrow Agent's respective employees or the willful breach by the Escrow Agent of the terms of this Agreement. In no event shall the District or the Escrow Agent be liable to any person by reason of the transactions contemplated hereby other than to each other as set forth in this Section. The indemnities contained in this Section shall survive the termination of this Agreement and the resignation or removal of the Escrow Agent.

SECTION 10. Responsibilities of Escrow Agent. The Escrow Agent and its agents and servants shall not be held to any personal liability whatsoever, in tort, contract, or otherwise, in connection with the execution and delivery of this Agreement, the establishment of the Escrow Fund, the acceptance of the moneys or securities deposited therein, the retention of the Defeasance Securities or the proceeds thereof, the sufficiency of the Defeasance Securities to pay the 2007 Bonds or any payment, transfer or other application of moneys or obligations by the Escrow Agent in accordance with the provisions of this Agreement or by reason of any non-negligent act, non-negligent omission or non-negligent error of the Escrow Agent made in good faith in the conduct of its duties. The recitals of fact contained herein shall be taken as the statements of the District, and the Escrow Agent assumes no responsibility for the correctness thereof. The Escrow Agent makes no representation as to the sufficiency of the proceeds to accomplish the refunding of the 2007 Bonds or to the validity of this Agreement as to the District and, except as otherwise provided herein, the Escrow Agent shall incur no liability in respect thereof. The Escrow Agent shall not be liable in connection with the performance of its duties under this Agreement except for its own negligence or willful misconduct and the duties and obligations of the Escrow Agent shall be determined by the express provisions of this Agreement. The Escrow Agent may consult with counsel, who may or may not be counsel to the District, and in reliance upon the written opinion of such counsel shall have full and complete authorization and protection in respect of any action taken, suffered or omitted by it in good faith in accordance therewith. Whenever the Escrow Agent shall deem it necessary or desirable that a matter be proved or established prior to taking, suffering, or omitting any action under this Agreement, such matter may be deemed to be conclusively established by a certificate signed by an officer of the District.

The District acknowledges that to the extent that regulations of the Comptroller of the Currency or other applicable regulatory entity grant the District the right to receive brokerage confirmations of security transactions as they occur, the District specifically waives receipt of such confirmations to the extent permitted by law. The Escrow Agent will furnish the District with periodic transaction statements which include detail for all investment transactions made by the Escrow Agent hereunder; provided that the Escrow Agent is not obligated to provide an accounting for any fund or account that: (a) has a balance of \$0.00; and (b) has not had any activity since the last reporting date.

The Escrow Agent may execute any of the trusts or powers hereunder or perform any duties hereunder either directly or by or through agents, attorneys, custodians or nominees appointed with due care, and shall not be responsible for any willful misconduct or negligence on the part of any agent, attorney, custodian or nominee so appointed.

If the Escrow Agent learns that the Department of the Treasury or the Bureau of Public Debt will not, for any reason, accept a subscription of Defeasance Securities that is to be submitted pursuant to this Agreement, the Escrow Agent shall promptly request alternative written investment instructions from the District with respect to escrowed funds which were to be invested in Defeasance Securities. The Escrow Agent shall follow such instructions and, upon the maturity of any such alternative investment, the Escrow Agent shall hold funds uninvested and without liability for interest until receipt of further written instructions from the District. In the absence of investment instructions from the District, the Escrow Agent shall not be responsible for the investment of such funds or interest thereon. The Escrow Agent may conclusively rely upon the District's selection of an alternative investment as a determination of the alternative investment's legality and suitability and shall not be liable for any losses related to the alternative investments or for compliance with any yield restriction applicable thereto.

The Escrow Agent shall have the right to accept and act upon instructions, including funds transfer instructions ("**Instructions**") given pursuant to this Agreement and delivered using Electronic Means. ("**Electronic Means**" shall mean the following communications methods: e-mail, facsimile transmission, secure electronic transmission containing applicable authorization codes, passwords and/or authentication keys issued by the Escrow Agent, or another method or system specified by the Escrow Agent as available for use in connection with its services hereunder). The District shall provide to the Escrow Agent an incumbency certificate listing officers with the authority to provide such Instructions ("**Authorized Officers**") and containing specimen signatures of such Authorized Officers, which incumbency certificate shall be amended by the District whenever a person is to be added or deleted from the listing. If the District elects to give the Escrow Agent Instructions using Electronic Means and the Escrow Agent in its discretion elects to act upon such Instructions, the Escrow Agent's understanding of such Instructions shall be deemed controlling. The District understands and agrees that the Escrow Agent cannot determine the identity of the actual sender of such Instructions and that the Escrow Agent shall conclusively presume that directions that purport to have been sent by an Authorized Officer listed on the incumbency certificate provided to the Escrow Agent have been sent by such Authorized Officer. The District shall be responsible for ensuring that only Authorized Officers transmit such Instructions to the Escrow Agent and that the District and all Authorized Officers are solely responsible to safeguard the use and confidentiality of applicable user and authorization codes, passwords and/or authentication keys upon receipt by the District. The Escrow Agent shall not be liable for any losses, costs or expenses arising directly or indirectly from the Escrow Agent's reliance upon and compliance with such Instructions notwithstanding such directions conflict or are inconsistent with a subsequent

written instruction. The District agrees: (i) to assume all risks arising out of the use of Electronic Means to submit Instructions to the Escrow Agent, including without limitation the risk of the Escrow Agent acting on unauthorized Instructions, and the risk of interception and misuse by third parties; (ii) that it is fully informed of the protections and risks associated with the various methods of transmitting Instructions to the Escrow Agent and that there may be more secure methods of transmitting Instructions than the method(s) selected by the District; (iii) that the security procedures (if any) to be followed in connection with its transmission of Instructions provide to it a commercially reasonable degree of protection in light of its particular needs and circumstances; and (iv) to notify the Escrow Agent immediately upon learning of any compromise or unauthorized use of the security procedures.

No provision of this Agreement shall require the Escrow Agent to expend or risk its own funds or otherwise incur any financial liability in the performance or exercise of any of its duties hereunder, or in the exercise of its rights or powers.

SECTION 11. Amendments. This Agreement is made for the benefit of the District and the owners from time to time of the 2007 Bonds and it shall not be repealed, revoked, altered or amended without the written consent of all such owners, the Escrow Agent and the District; provided, however, that the District and the Escrow Agent may, without the consent of, or notice to, such owners, amend this Agreement or enter into such agreements supplemental to this Agreement as shall not adversely affect the rights of such owners and as shall not be inconsistent with the terms and provisions of this Agreement, the Act (as such term is defined in the 2007 Fiscal Agent Agreement), or the 2007 Fiscal Agent Agreement, for any one or more of the following purposes: (i) to cure any ambiguity or formal defect or omission in this Agreement; (ii) to grant to, or confer upon, the Escrow Agent for the benefit of the owners of the 2007 Bonds any additional rights, remedies, powers or authority that may lawfully be granted to, or conferred upon, such owners or the Escrow Agent; and (iii) to include under this Agreement additional funds. The Escrow Agent shall be entitled to rely conclusively upon an unqualified opinion of Stradling Yocca Carlson & Rauth, a Professional Corporation, with respect to compliance with this Section, including the extent, if any, to which any change, modification, addition or elimination affects the rights of the owners of the various 2007 Bonds or that any instrument executed hereunder complies with the conditions and provisions of this Section.

SECTION 12. Notice to Rating Agencies. In the event that this agreement or any provision thereof is severed, amended or revoked, the Escrow Agent shall provide written notice of such severance, amendment or revocation to the rating agencies then rating the 2007 Bonds.

SECTION 13. Term. This Agreement shall commence upon its execution and delivery and shall terminate on the later to occur of either: (i) the date upon which the 2007 Bonds have been paid in accordance with this Agreement; or (ii) the date upon which no unclaimed moneys remain on deposit with the Escrow Agent pursuant to Section 5(c) of this Agreement.

SECTION 14. Compensation. The Escrow Agent shall receive its reasonable fees and expenses as previously agreed to by the Escrow Agent and the District and any other reasonable fees and expenses of the Escrow Agent approved by the District; provided, however, that under no circumstances shall the Escrow Agent be entitled to any lien or assert any lien whatsoever on any moneys or obligations in the Escrow Fund for the payment of fees and expenses for services rendered or expenses incurred by the Escrow Agent under this Agreement.

SECTION 15. Severability. If any one or more of the covenants or agreements provided in this Agreement on the part of the District or the Escrow Agent to be performed should be determined by a court of competent jurisdiction to be contrary to law, such covenants or agreements shall be null and void and shall be deemed separate from the remaining covenants and agreements contained herein and shall in no way affect the validity of the remaining provisions of this Agreement.

SECTION 16. Counterparts. This Agreement may be executed in several counterparts, all or any of which shall be regarded for all purposes as an original but all of which shall constitute and be but one and the same instrument.

SECTION 17. Governing Law. THIS AGREEMENT SHALL BE CONSTRUED UNDER THE LAWS OF THE STATE OF CALIFORNIA.

SECTION 18. Insufficient Funds. If at any time the Escrow Agent has actual knowledge that the moneys and investments in the Escrow Fund, including the anticipated proceeds thereof and earnings thereon, will not be sufficient to make all payments required by this Agreement, the Escrow Agent shall notify the District in writing, of the amount thereof and the reason therefor to the extent known to it. The Escrow Agent shall have no responsibility regarding any such deficiency.

SECTION 19. Notice to District and Escrow Agent. Any notice to or demand upon the Escrow Agent may be served or presented, and such demand may be made, at the principal corporate trust office of the Escrow Agent at 600 South 4th Street, 7th Floor, MAC N9300-070, Minneapolis, Minnesota 55415, Attention: Corporate Trust, Reference: Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021. Any notice to or demand upon the District shall be deemed to have been sufficiently given or served for all purposes by being mailed by registered or certified mail, and deposited, postage prepaid, in a post office letter box, addressed to the Chief Financial Officer of the City of Moreno Valley at City of Moreno Valley, 14177 Frederick Street, Moreno Valley, California 92552, (or such other address as may have been filed in writing by the District with the Escrow Agent).

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK.]

NOTICE OF REDEMPTION

COMMUNITY FACILITIES DISTRICT NO. 5
OF THE CITY OF MORENO VALLEY
2007 SPECIAL TAX BONDS

BASE CUSIP 616865

NOTICE IS HEREBY GIVEN to the owners of the above-captioned bonds (the “Bonds”) of Community Facilities District No. 5 of the City of Moreno Valley (the “District”) pursuant to the Fiscal Agent Agreement, dated as of May 1, 2007 (the “2007 Fiscal Agent Agreement”), by and between the District and Computershare Trust Company, N.A. (as successor to Wells Fargo Bank, National Association), as fiscal agent (the “2007 Fiscal Agent”), that the Bonds in the amount of \$4,985,000 have been called for redemption on March 1, 2022 (the “Redemption Date”). The Bonds were originally issued on May 31, 2007.

<i>CUSIP</i>	<i>Maturity (September 1)</i>	<i>Rate</i>	<i>Amount</i>	<i>Price</i>
DJ7	2022	4.75%	\$ 150,000	100%
DK4	2027	5.00	1,010,000	100
DL2	2037	5.00	3,825,000	100

The Bonds will be payable on the Redemption Date at a Redemption Price of 100% (the “Redemption Price”). The Redemption Price of the Bonds will become due and payable on the Redemption Date. Interest on the Bonds to be redeemed will cease to accrue and be payable from and after the Redemption Date, and such Bonds will be surrendered to the 2007 Fiscal Agent.

All Bonds are required to be surrendered to the below-listed corporate trust offices of the 2007 Fiscal Agent, for redemption at the Redemption Price on the Redemption Date. If the Bonds are mailed, the use of registered, insured mail is recommended:

To receive payment on the Redemption Date, owners of the Bonds should present and to surrender said 2016 on the Redemption Date at the address of the 2007 Fiscal Agent set forth below:

Registered/Certified Mail:	Air Courier:
Computershare Trust Company, N.A.	Computershare Trust Company, N.A.
Corporate Trust Operations	Corporate Trust Operations
MAC N9300-070	MAC N9300-070
P. O. Box 1517	600 Fourth Street South, Seventh Floor
Minneapolis, MN 55480-1517	Minneapolis, MN 55415

If the Owner of any Bond subject to optional redemption fails to deliver such Bond to the 2007 Fiscal Agent on the Redemption Date, such Bond shall nevertheless be deemed redeemed on the Redemption Date and the Owner of such Bond shall have no rights in respect thereof except to receive payment of the Redemption Price from funds held by the 2007 Fiscal Agent for such payment.

Pursuant to U.S. federal tax laws, you have a duty to provide the applicable type of tax certification form issued by the U.S. Internal Revenue Service (“IRS”) to Computershare Trust Company, N.A. to ensure payments are reported accurately to you and to the IRS. In order to permit accurate withholding (or to prevent withholding), a complete and valid tax certification form must be received by Computershare Trust Company, N.A. before payment of the redemption proceeds is made to you. Failure to timely provide a valid tax certification form as required will result in the maximum amount of U.S. withholding tax being deducted from any redemption payment that is made to you.

Note: The District and the 2007 Fiscal Agent shall not be responsible for the selection or use of the CUSIP numbers selected, nor is any representation made as to their correctness in the notice or as printed on any Bond. They are included solely for the convenience of the holders.

COMPUTERSHARE TRUST COMPANY, N.A., as
2007 Fiscal Agent

DATED this 3rd day of January, 2022.

EXHIBIT B**NOTICE OF DEFEASANCE**

**COMMUNITY FACILITIES DISTRICT NO. 5
OF THE CITY OF MORENO VALLEY
2007 SPECIAL TAX BONDS**

BASE CUSIP 616865

NOTICE IS HEREBY GIVEN to the owners of the above-captioned bonds (as further defined below, the “2007 Bonds”), of Community Facilities District No. 5 of the City of Moreno Valley (the “District”), that the District has deposited with Computershare Trust Company, N.A. (as successor to Wells Fargo Bank, National Association), as fiscal agent (the “2007 Fiscal Agent”) under the Fiscal Agent Agreement, dated as of May 1, 2007 (the “2007 Fiscal Agent Agreement”), by and between the District, and the 2007 Fiscal Agent, cash and Defeasance Securities, the principal of and interest on which when paid will provide moneys sufficient to pay the regularly scheduled payment of interest on the 2007 Bonds on March 1, 2022, and to pay on March 1, 2022 the principal of the 2007 Bonds maturing on and after September 1, 2022, without premium.

The 2007 Bonds to be defeased are as follows:

<i>CUSIP</i>	<i>Maturity (September 1)</i>	<i>Rate</i>	<i>Amount</i>	<i>Price</i>
DJ7	2022	4.75%	\$ 150,000	100%
DK4	2027	5.00	1,010,000	100
DL2	2037	5.00	3,825,000	100

In accordance with the 2007 Fiscal Agent Agreement, and notwithstanding the fact that any 2007 Bonds are not surrendered for payment: (i) the 2007 Bonds are deemed to have been paid in accordance with Section 9.03 thereof; (ii) the pledge of the Special Tax Revenues (as such term is defined in the 2007 Fiscal Agent Agreement) and other funds provided for in the 2007 Fiscal Agent Agreement and all other obligations of the City of Moreno Valley and the District under the 2007 Fiscal Agent Agreement with respect to the 2007 Bonds have ceased and terminated, except as set forth in the 2007 Fiscal Agent Agreement; and (iii) the obligations of the District under the Continuing Disclosure Agreement, dated as of May 1, 2007, by and between the District and the 2007A Fiscal Agent, as dissemination agent, have terminated.

No representation is made as to the correctness of the CUSIP number either as printed on any 2007 Bond or as contained herein and any error in the CUSIP number shall not affect the validity of the proceedings for prepayment of the 2007 Bonds.

COMPUTERSHARE TRUST COMPANY, N.A., as
2007 Fiscal Agent

DATED this [1st day of December], 2021.

PRELIMINARY OFFICIAL STATEMENT DATED OCTOBER __, 2021

NEW ISSUE - BOOK-ENTRY ONLY

UNRATED

In the opinion of Stradling Yocca Carlson & Rauth, a Professional Corporation, Newport Beach, California, Bond Counsel, under existing statutes, regulations, rulings and judicial decisions, and assuming the accuracy of certain representations and compliance with certain covenants and requirements described in this Official Statement, interest (and original issue discount) on the Bonds is excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals and corporations. In the further opinion of Bond Counsel, interest (and original issue discount) on the Bonds is exempt from State of California personal income tax. See the caption "TAX EXEMPTION."

\$4,755,000*

**COMMUNITY FACILITIES DISTRICT NO. 5
OF THE CITY OF MORENO VALLEY
SPECIAL TAX REFUNDING BONDS
SERIES 2021**

Dated: Date of Delivery**Due: September 1, as shown on the inside front cover page**

The Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds Series, 2021 (the "Bonds") are being issued: (i) to refund all of the Community Facilities District No. 5 of the City of Moreno Valley 2007 Special Tax Bonds, which are currently outstanding in the aggregate principal amount of \$4,985,000; (ii) to fund a deposit to the Reserve Account; and (iii) to pay the costs of issuance of the Bonds. Community Facilities District No. 5 of the City of Moreno Valley has been formed by and is located in the City of Moreno Valley, California (the "City").

The Bonds are authorized to be issued pursuant to the Mello-Roos Community Facilities Act of 1982, as amended (Section 53311 *et seq.* of the Government Code of the State of California), and pursuant to a Bond Indenture, dated as of December 1, 2021, by and between the District and Wilmington Trust, National Association, as trustee. The Bonds are special obligations of the District and are payable solely from revenues derived from certain annual Special Taxes to be levied on and collected from the owners of certain taxable land within the District and from certain other funds pledged under the Indenture, all as further described in this Official Statement. The Special Taxes are to be levied according to the rate and method of apportionment approved by the City Council of the City and the qualified electors within the District. See the caption "SOURCES OF PAYMENT FOR THE BONDS—Special Taxes." The City Council of the City is the legislative body of the District.

The Bonds are issuable in fully registered form and when issued will be registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York. Individual purchases may be made in integral multiples of \$5,000 and will be in book-entry form only. Purchasers of the Bonds will not receive certificates representing their beneficial ownership in the Bonds but will receive credit balances on the books of their respective nominees. The Bonds will not be transferable or exchangeable except for transfer to another nominee of DTC or as otherwise described in this Official Statement. Interest on the Bonds will be payable on March 1 and September 1 of each year, commencing on March 1, 2022. Principal of and interest on the Bonds will be paid by the Trustee to DTC for subsequent disbursement to DTC Participants, who are obligated to remit such payments to the Beneficial Owners of the Bonds. See the captions "THE BONDS—General Provisions" and "THE BONDS—Book-Entry Only System."

Neither the faith and credit nor the taxing power of the City, the County of Riverside, the State of California or any political subdivision of the State is pledged to the payment of the Bonds. Except for the Net Taxes, no other taxes are pledged to the payment of the Bonds. The Bonds are limited obligations of the District payable solely from Net Taxes and certain other amounts held under the Indenture, as more fully described in this Official Statement.

The Bonds are subject to optional redemption, mandatory sinking fund redemption and extraordinary redemption from Special Tax prepayments prior to maturity. See the caption "THE BONDS—Redemption."

CERTAIN EVENTS COULD AFFECT THE ABILITY OF THE DISTRICT TO PAY THE PRINCIPAL OF AND INTEREST ON THE BONDS WHEN DUE. THE PURCHASE OF THE BONDS INVOLVES SIGNIFICANT INVESTMENT RISKS, AND THE BONDS ARE NOT SUITABLE INVESTMENTS FOR MANY INVESTORS. SEE THE CAPTION "SPECIAL RISK FACTORS" FOR A DISCUSSION OF CERTAIN RISK FACTORS THAT SHOULD BE CONSIDERED, IN ADDITION TO THE OTHER MATTERS SET FORTH IN THIS OFFICIAL STATEMENT, IN EVALUATING THE INVESTMENT QUALITY OF THE BONDS.

This cover page contains certain information for general reference only. It is not intended to be a summary of the security or terms of this issue. Investors are advised to read the entire Official Statement to obtain information essential to the making of an informed investment decision.

Maturity Schedule
(See Inside Cover Page)

The Bonds are offered when, as and if issued and accepted by the Underwriter, subject to approval as to their legality by Stradling Yocca Carlson & Rauth, a Professional Corporation, Newport Beach, California, Bond Counsel, and subject to certain other conditions. Nixon Peabody LLP, is serving as Disclosure Counsel with respect to the Bonds. Certain legal matters will be passed on for the District by the City Attorney, for the Underwriter by Kutak Rock LLP, Irvine, California, and for the Trustee by its counsel. It is anticipated that the Bonds in book-entry form will be available for delivery in book-entry form through the facilities of DTC on or about December __, 2021.

Except where otherwise indicated, all information contained in this Official Statement has been provided by the District and the City. No dealer, broker, salesperson or other person has been authorized by the District or the City to give any information or to make any representations in connection with the offer or sale of the Bonds other than those contained in this Official Statement and, if given or made, such other information or representations must not be relied upon as having been authorized by the District or the City. This Official Statement does not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the Bonds by a person in any jurisdiction in which it is unlawful for such person to make such an offer, solicitation or sale.

The information contained in this Official Statement has been obtained from sources that are believed to be reliable, but this information is not guaranteed as to accuracy or completeness. The Underwriter has provided the following sentence for inclusion in this Official Statement:

The Underwriter has reviewed the information in this Official Statement in accordance with, and as part of, its responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriter does not guarantee the accuracy or completeness of this information.

Certain statements included or incorporated by reference in this Official Statement constitute “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995, Section 21E of the United States Securities Exchange Act of 1934, as amended, and Section 27A of the United States Securities Act of 1933, as amended. Such statements are generally identifiable by the terminology used such as “plan,” “expect,” “estimate,” “project,” “budget,” “believe,” “anticipate” or other similar words. Such forward-looking statements include, but are not limited to, certain statements contained in the information under the caption “THE DISTRICT.”

The achievement of certain results or other expectations contained in such forward-looking statements involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements described in this Official Statement to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. The District does not plan to issue any updates or revisions to the forward-looking statements set forth in this Official Statement. In evaluating such statements, potential investors should specifically consider the various factors that could cause actual events or results to differ materially from those indicated by such forward-looking statements.

In connection with the offering of the Bonds, the Underwriter may overallocate or effect transactions that stabilize or maintain the market price of the Bonds at a level above that which might otherwise prevail in the open market. Such stabilizing, if commenced, may be discontinued at any time. The Underwriter may offer and sell the Bonds to certain dealers and dealer banks and banks acting as agent and others at prices lower than the public offering prices stated on the inside cover page of this Official Statement, and the Underwriter may change those public offering prices from time to time.

The Bonds have not been registered under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, in reliance upon an exemption contained in such act, and have not been registered or qualified under the securities laws of any state.

The City maintains a website. However, the information presented on such website is not a part of this Official Statement and should not be relied upon in making an investment decision with respect to the Bonds.

\$4,755,000*
COMMUNITY FACILITIES DISTRICT NO. 5
OF THE CITY OF MORENO VALLEY
SPECIAL TAX REFUNDING BONDS
SERIES 2021

INTRODUCTION

General

The purpose of this Official Statement, which includes the front cover page, the inside front cover page, the table of contents and the attached appendices (collectively, the “**Official Statement**”), is to provide certain information concerning the issuance of the \$4,755,000* Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021 (the “**Bonds**”). The proceeds of the Bonds will be used: (i) to refund all of the Community Facilities District No. 5 of the City of Moreno Valley 2007 Special Tax Bonds (the “**2007 Bonds**”), which are currently outstanding in the aggregate principal amount of \$4,985,000; (ii) to fund a deposit to the Reserve Account; and (iii) to pay the costs of issuance of the Bonds. See the captions “THE REFUNDING PLAN,” “ESTIMATED SOURCES AND USES OF FUNDS” and “SOURCES OF PAYMENT FOR THE BONDS—Reserve Account of the Special Tax Fund.”

This introduction is not a summary of this Official Statement. It is only a brief description of and guide to, and is qualified by, more complete and detailed information contained in the entire Official Statement, including the appendices, and the documents summarized or described in this Official Statement. A full review should be made of the entire Official Statement. The sale and delivery of Bonds to potential investors is made only by means of the entire Official Statement. All capitalized terms used in this Official Statement and not defined have the meanings set forth in Appendix B.

The Bonds are authorized to be issued pursuant to the Mello-Roos Community Facilities Act of 1982, as amended (Section 53311 *et seq.* of the Government Code of the State of California) (the “**Act**”), and a Bond Indenture dated as of December 1, 2021 (the “**Indenture**”) by and between Community Facilities District No. 5 of the City of Moreno Valley (the “**District**”) and Wilmington Trust, National Association, as trustee (the “**Trustee**”).

The Bonds are secured under the Indenture by a pledge of and lien upon certain Net Taxes (as such term is defined in this Official Statement) and all moneys in the Special Tax Fund (other than the Administrative Expenses Account) as described under the Indenture.

The District

Formation Proceedings. The District was formed on October 25, 2005 by the City of Moreno Valley (the “**City**”) pursuant to the Act.

The Act was enacted by the State of California (the “**State**”) Legislature to provide an alternative method of financing certain public capital facilities and services, especially in developing areas of the State. Any local agency (as such term is defined in the Act) may establish a district to provide for and finance the cost of eligible public facilities and services. Generally, the legislative body of the local agency that forms a district acts on behalf of such district as its legislative body. Subject to approval by two-thirds of the votes cast at an

* Preliminary; subject to change.

election and compliance with the other provisions of the Act, a legislative body of a local agency may issue bonds for a district and may levy and collect a special tax within such district to repay such indebtedness.

Pursuant to the Act, the City Council adopted the necessary resolutions stating its intent to establish the District, to authorize the levy of Special Taxes (as such term is defined in this Official Statement) on taxable property within the boundaries of the District, and to have the District incur bonded indebtedness. Following public hearings conducted pursuant to the provisions of the Act, the City Council adopted resolutions establishing the District and calling a special election to submit the levy of the Special Taxes and the incurring of bonded indebtedness to the qualified voters of the District.

On October 25, 2005, at an election held pursuant to the Act, the Stoneridge Centre Partners, L.P., a California limited partnership (the “Developer”) who was the sole landowner and qualified voter within the District, authorized the District to incur bonded indebtedness in the aggregate principal amount not to exceed \$10,000,000 and approved the rate and method of apportionment of the Special Taxes for the District (the “Rate and Method”) to pay the principal of and interest on the bonds of the District. See the caption “THE BONDS—Authority for Issuance.” The City Council of the City acts as the legislative body of the District.

The District consists of approximately 64.4 gross acres of which approximately 32.99 are net taxable acres and is located at the southeast corner of the intersection of State Route 60 and Nason Street in the City, and consists of the Stoneridge Towne Centre. **The portion of the Stoneridge Towne Centre owned and occupied by Target and Kohl’s is approximately 23.28 acres and is not subject to the Special Tax (as defined herein) lien of the District.** Accordingly, of the projected approximately 560,000 square feet of commercial retail space within the District, only approximately 288,000 square feet is projected to be subject to the levy of Special Taxes of the District.

As of September 1, 2021: (i) there are 25 commercial parcels that are taxed by acre, consisting of a total of approximately 32.99 acres and approximately 204,535 building square feet; and (ii) there are 6 undeveloped parcels, consisting of approximately 5.54 acres. The property owners within the District are referred to in this Official Statement as the “**Property Owners.**” See the caption “THE DISTRICT—General Description.”

Sources of Payment for the Bonds

Special Taxes. As used in this Official Statement, the term “**Special Taxes**” means the taxes authorized to be levied by the District on property within the District pursuant to the Act and in accordance with the Ordinance, the Resolution of Formation, the Act and the voter approval obtained at the October 25, 2005 election in the District, including any scheduled payments and any Prepayments (as such term is defined in the Indenture) of Special Taxes, and the net proceeds of the redemption or sale of property sold as a result of foreclosure of the lien of the Special Taxes to the amount of said lien and penalties and interest on such Special Taxes. See the caption “SOURCES OF PAYMENT FOR THE BONDS—Special Taxes” and Appendix A.

Under the Indenture, the District has pledged to repay the Bonds from: (i) the “**Net Taxes,**” which consist of the Special Taxes less amounts set aside to pay Administrative Expenses; and (ii) amounts in the Special Tax Fund (other than the Administrative Expenses Account) established under the Indenture.

The Net Taxes are the primary security for the repayment of the Bonds. In the event that the Special Taxes are not paid when due, the only sources of funds that are available to pay the debt service on the Bonds are amounts held by the Trustee in the Special Tax Fund, including amounts held in the Reserve Account. See the caption “SOURCES OF PAYMENT FOR THE BONDS—Reserve Account of the Special Tax Fund.”

Foreclosure Proceedings. The District has covenanted for the benefit of the Owners of the Bonds that it will: (i) commence judicial foreclosure proceedings against (a) parcels with delinquent Special Taxes in excess of \$5,000 by the October 1 following the close of each fiscal year of the District ending June 30 (each, a “**Fiscal Year**”) in which such Special Taxes were due; (b) all parcels with delinquent Special Taxes by the October 1

following the close of each Fiscal Year in which it receives Special Taxes in an amount which is less than 95% of the total Special Tax levied and the amount on deposit in the Reserve Account is at less than the Reserve Requirement; and (ii) diligently pursue such foreclosure proceedings until the delinquent Special Taxes are paid. See the caption “SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Proceeds of Foreclosure Sales.” There is no assurance that the property within the District can be sold for the assessed values described in this Official Statement, or for a price sufficient to pay the delinquent Special Taxes (plus related penalties and interest) in the event of a default in payment of Special Taxes by the current or future landowners within the District. See the caption “SPECIAL RISK FACTORS—Land Values.”

Neither the faith and credit nor the taxing power of the City, the State or any political subdivision of the State is pledged to the payment of the Bonds or any Parity Bonds (as such term is defined in this Official Statement). Except for the Net Taxes, no other taxes are pledged to the payment of the Bonds or any Parity Bonds. The Bonds and any Parity Bonds are neither general or special obligations of the City nor general obligations of the District, but are limited obligations of the District payable solely from certain amounts deposited by the District in the Special Tax Fund (exclusive of the Administrative Expenses Account), as more fully described in this Official Statement.

No Issuance of Parity Bonds Except for Refunding. The District may, without the consent of the Owners of the Bonds, issue additional indebtedness secured by the Net Taxes on a parity with the Bonds (“**Parity Bonds**”), but only for the purpose of refunding all or a portion of the Bonds or any Parity Bonds then Outstanding. See the caption “SOURCES OF PAYMENT FOR THE BONDS—Issuance of Parity Bonds for Refunding.”

Other taxes and/or special assessments with liens that are equal in priority to the continuing lien of the Special Taxes have been levied as described under the caption “THE DISTRICT—Estimated Direct and Overlapping Indebtedness.” Additional other taxes and/or special assessments may also be levied in the future on the property within the District, which could adversely affect the willingness of the Property Owners to pay the Special Taxes when due. See the caption “SPECIAL RISK FACTORS—Parity Taxes and Special Assessments.”

Description of the Bonds

The Bonds will be issued and delivered as fully registered Bonds, registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York (“**DTC**”), and will be available to actual purchasers of the Bonds (the “**Beneficial Owners**”) in the integral multiples of \$5,000, under the book-entry system maintained by DTC, only through brokers and dealers who are or act through DTC Participants as described in this Official Statement. Beneficial Owners will not be entitled to receive physical delivery of the Bonds. In the event that the book-entry only system described in this Official Statement is no longer used with respect to the Bonds, the Bonds will be registered and transferred in accordance with the Indenture. See Appendix B.

Principal of, premium, if any, and interest on the Bonds is payable by the Trustee to DTC. Disbursement of such payments to DTC Participants is the responsibility of DTC and disbursement of such payments to the Beneficial Owners is the responsibility of DTC Participants. In the event that the book-entry only system is no longer used with respect to the Bonds, the Beneficial Owners will become the registered owners of the Bonds and will be paid principal and interest by the Trustee, all as described in this Official Statement. See Appendix E.

The Bonds are subject to optional redemption, mandatory sinking fund redemption and extraordinary redemption from Special Tax Prepayments as described under the caption “THE BONDS—Redemption.” For a more complete description of the Bonds and the basic documentation pursuant to which they are being sold and delivered, see the caption “THE BONDS” and Appendix B.

Tax Matters

In the opinion of Stradling Yocca Carlson & Rauth, a Professional Corporation, Newport Beach, California (“**Bond Counsel**”), based on existing statutes, regulations, rulings and judicial decisions and assuming compliance with certain covenants and requirements described in this Official Statement, interest (and original issue discount) on the Bonds is excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals and corporations. It is the further opinion of Bond Counsel that interest (and original issue discount) on the Bonds is exempt from State personal income tax. See the caption “TAX EXEMPTION.”

Professionals Involved in the Offering

Wilmington Trust, National Association will act as Trustee under the Indenture. Willdan Financial Services has acted as Special Tax Consultant to the District. Stifel, Nicolaus & Company, Incorporated is the Underwriter of the Bonds. Certain proceedings in connection with the issuance and delivery of the Bonds are subject to the approval of Stradling Yocca Carlson & Rauth, a Professional Corporation, Newport Beach, California, as Bond Counsel. Fieldman, Rolapp & Associates, Inc. is acting as Municipal Advisor to the District in connection with the Bonds. Certain legal matters will be passed on for the District by the City Attorney, for the Underwriter by Kutak Rock LLP, Irvine, California, and for the Trustee by its counsel. Other professional services have been performed by Nixon Peabody LLP, Los Angeles, California, as Disclosure Counsel.

For information concerning the respects in which certain of the above-mentioned professionals, advisors, counsel and agents may have a financial or other interest in the offering of the Bonds, see the caption “FINANCIAL INTERESTS.”

Continuing Disclosure

The District has agreed to provide, or cause to be provided, to the Municipal Securities Rulemaking Board certain annual financial information and operating data and notice of certain enumerated events. The District’s covenants have been made in order to assist the Underwriter in complying with the Securities and Exchange Commission’s Rule 15c2-12 (“**Rule 15c2-12**”). See the caption “CONTINUING DISCLOSURE” and Appendix C for a description of the specific nature of the annual reports and notices of enumerated events to be filed by the District.

Bond Owners’ Risks

Certain events could affect the timely repayment of the principal of and interest on the Bonds when due. See the caption “SPECIAL RISK FACTORS” for a discussion of certain factors that should be considered, in addition to other matters set forth in this Official Statement, in evaluating an investment in the Bonds. *The purchase of the Bonds involves significant investment risks, and the Bonds are not suitable investments for many investors.*

Other Information

This Official Statement speaks only as of its date, and the information contained in this Official Statement is subject to change.

Brief descriptions of the Bonds and the Indenture are included in this Official Statement. Such descriptions and information do not purport to be comprehensive or definitive. All references to the Indenture, the Bonds and the Constitution and laws of the State as well as the proceedings of the City Council, acting as the legislative body of the District, are qualified in their entirety by references to such documents, laws and proceedings, and with respect to the Bonds, by reference to the Indenture.

Copies of the Indenture, the Continuing Disclosure Agreement, the Escrow Agreement and other documents and information referred to in this Official Statement are available for inspection and (upon request and payment to the City of a charge for copying, mailing and handling) for delivery from the City at 14177 Frederick Street, Moreno Valley, California 92553, Attention: City Clerk.

THE REFUNDING PLAN

General

The 2007 Bonds were issued pursuant to a Fiscal Agent Agreement, dated as of May 1, 2007 (the “**2007 Fiscal Agent Agreement**”), by and between the District and Computershare Trust Company, N.A. (as successor to Wells Fargo Bank, National Association), as fiscal agent (the “**2007 Fiscal Agent**”). Concurrently with the issuance of the Bonds, the District will cause a portion of the proceeds of the sale of the Bonds to be deposited into an escrow fund (the “**Escrow Fund**”) established under the Escrow Agreement (2007 Bonds), dated as of December 1, 2021 (the “**Escrow Agreement**”), by and between the District and Computershare Trust Company, N.A., as escrow agent and as 2007 Fiscal Agent (the “**Escrow Agent**”), to be applied, together with moneys that are held in the funds and accounts established in connection with the 2007 Bonds, to the redemption of the 2007 Bonds on March 1, 2022. A portion of the amounts in the Escrow Fund will be invested in Defeasance Securities (as such term is defined in the 2007 Fiscal Agent Agreement).

Sufficiency of the deposits in the Escrow Fund for such purposes will be verified by Causey Demgen & Moore P.C., Denver, Colorado (the “**Verification Agent**”). Assuming the accuracy of such computations, as a result of the deposit and application of funds as provided in the Escrow Agreement, the 2007 Bonds will be defeased pursuant to the provisions of the 2007 Fiscal Agent Agreement as of the date of issuance of the Bonds.

The amounts held by the Escrow Agent in the Escrow Fund are pledged solely to the payment of the 2007 Bonds and will not be available for the payments on the Bonds.

Verification of Mathematical Computations

Upon the issuance of the Bonds, the Verification Agent will deliver a report on the mathematical accuracy of certain computations based upon certain information and assertions provided to it by the Underwriter relating to: (a) the adequacy of the moneys deposited in the Escrow Fund to pay the redemption price of the 2007 Bonds; and (b) the computations of yield of the Bonds which support Bond Counsel’s opinion that the interest on the Bonds is excluded from gross income for federal income tax purposes.

Estimated Sources and Uses of Funds

The following table sets forth the expected sources and uses of Bond proceeds:

Sources of Funds⁽¹⁾

Principal Amount of Bonds	\$
[Plus/Less] Net Original Issue [Premium/Discount]	
Plus Available Funds ⁽²⁾	_____
TOTAL SOURCES	\$ _____

Uses of Funds⁽¹⁾

Transfer to Escrow Agent for Deposit in Escrow Fund	\$
Deposit in Reserve Account	
Costs of Issuance ⁽³⁾	_____
TOTAL USES	\$ _____

(1) Amounts rounded to the nearest dollar. Totals may not add.

(2) Reflects moneys held in funds and accounts established for the 2007 Bonds.

(3) Includes fees and expenses for the Municipal Advisor, Bond Counsel, Disclosure Counsel, the Trustee, the Escrow Agent and the Verification Agent, printing costs, Underwriter's discount and other costs of delivery.

THE BONDS

General Provisions

The Bonds will be dated their date of delivery and will bear interest at the rates per annum set forth on the inside front cover page of this Official Statement, payable semiannually on March 1 and September 1 of each year, commencing March 1, 2022 (each, an “**Interest Payment Date**”), and will mature in the amounts and on the dates set forth on the inside cover page of this Official Statement. The Bonds will be issued in fully registered form in integral multiples of \$5,000.

Interest will be calculated on the basis of a 360-day year comprised of twelve 30-day months. Interest on any Bond will be payable from the Interest Payment Date next preceding the date of authentication of such Bond, unless: (i) such date of authentication is an Interest Payment Date, in which event interest will be payable from such date of authentication; (ii) the date of authentication is after a Record Date but prior to the immediately succeeding Interest Payment Date, in which event interest will be payable from the Interest Payment Date immediately succeeding the date of authentication; or (iii) the date of authentication is prior to the close of business on the first Record Date, in which event interest will be payable from the dated date of the Bonds; provided, however, that if at the time of authentication of a Bond, interest is in default, interest on such Bond will be payable from the last Interest Payment Date to which the interest has been paid or made available for payment or, if no interest has been paid or made available for payment on such Bond, interest on such Bond will be payable from its dated date. The term “**Record Date**” is defined to mean the fifteenth day of the month preceding an Interest Payment Date, regardless of whether such day is a Business Day.

Interest on any Bond will be paid to the person whose name appears as its owner in the registration books held by the Trustee on the close of business on the Record Date. Interest will be paid by check of the Trustee mailed by first class mail, postage prepaid, to the Owner at its address on the registration books. Pursuant to a written request prior to the Record Date of an Owner of at least \$1,000,000 in aggregate principal amount of Bonds, payment will be made by wire transfer in immediately available funds to a designated account in the United States.

Principal of the Bonds and any premium due upon redemption is payable upon presentation and surrender of the Bonds at the principal corporate trust office of the Trustee in Los Angeles, California.

Book-Entry Only System

The Bonds are issued as fully registered bonds and will be registered in the name of Cede & Co., as nominee of DTC. DTC will act as securities depository of the Bonds. Ownership interests in the Bonds may be purchased in book-entry form only in integral multiples of \$5,000. The Trustee will make payments due with respect to the Bonds to DTC but assumes no responsibility for DTC's disbursement of funds to its principals. See Appendix E.

Authority for Issuance

The Bonds are issued pursuant to the Act and the Indenture. As required by the Act, the City Council of the City has taken the following actions with respect to establishing the District and the Bonds:

Resolutions of Intention: On September 13, 2005, the City Council of the City adopted a resolution stating its intention to establish the District and to authorize the levy of special taxes.

Resolutions of Formation: On October 25, 2005 the City Council of the City, adopted resolutions which established the District, authorized the submittal of levy of special taxes within the District to qualified electors, and determined the necessity to incur bonded indebtedness within the District, in the amount not to exceed \$10,000,000.

Resolution Calling Election: The resolutions adopted by the City Council of the City on October 25, 2005 also called for an election by the landowners in the District for the same date on the issues of the levy of the Special Tax, the incurring of bonded indebtedness in the District, and the establishment of an appropriations limit.

Landowner Election and Declaration of Results: On October 25, 2005, an election was held at which the Developer, as the sole landowner and qualified voter within the District approved a ballot proposition authorizing the issuance of up to \$10,000,000 of bonds to finance the acquisition and construction of various public facilities, the levy of the Special Tax and the establishment of an appropriations limit for the District. On October 25, 2005, the City Council adopted a resolution approving the canvass of the votes and declaring the District to be fully formed with the authority to levy the Special Taxes, to incur the bonded indebtedness, and to have the established appropriations limit.

Special Tax Lien and Levy: A Notice of Special Tax Lien for the District was recorded in the real property records of the County on November 8, 2005, as a continuing lien against the property in the District. On November 8, 2005, the City Council of the City, acting as the legislative body of the District, enacted Ordinance No. 701 authorizing the levy of the Special Tax within the District. On June 26, 2006 a Notice of Cessation of Special Tax Lien with respect to the Target and Kohl's parcels was recorded in the real property records of the County.

Resolution Authorizing Issuance of the Bonds: On October 19, 2021, the City Council of the City, acting as legislative body of the District, adopted a resolution authorizing the issuance of the Bonds for the purpose of refunding the 2007 Bonds.

Redemption*

Optional Redemption. The Bonds are subject to redemption, at the option of the District, from any source of funds in whole, or in part by lot, on any Interest Payment Date beginning on September 1, 20__ at the following redemption prices, expressed as a percentage of the principal amount to be redeemed, together with accrued interest to the redemption date:

<i>Redemption Date</i>	<i>Redemption Price</i>
September 1, 20__ and March 1, 20__	103%
September 1, 20__ and March 1, 20__	102
September 1, 20__ and March 1, 20__	101
September 1, 20__ and any Interest Payment Date thereafter	100

Mandatory Sinking Fund Redemption. The Bonds maturing on September 1, 20__ (the “Term Bonds”) will be called before maturity and redeemed, from the Sinking Fund Payments that have been deposited into the Redemption Account, on September 1, 20__, and on each September 1 thereafter prior to maturity, in accordance with the schedule of Sinking Fund Payments set forth below. The Term Bonds so called for redemption will be selected by the Trustee by lot and will be redeemed at a redemption price for each redeemed Term Bond equal to the principal amount thereof, plus accrued interest to the redemption date, without premium, as follows:

TERM BONDS MATURING SEPTEMBER 1, 20__

<i>Redemption Date (September 1)</i>	<i>Principal Amount</i>
	\$

If, during the Fiscal Year immediately preceding one of the redemption dates specified above, the District purchases Bonds, at least 45 days prior to the redemption date the District will notify the Trustee as to the principal amount purchased and the amount of Bonds so purchased will be credited at the time of purchase, to the extent of the full principal amount thereof, to reduce such upcoming Sinking Fund Payment for the Bonds so purchased. All Bonds purchased pursuant to the foregoing sentence will be cancelled pursuant to the Indenture.

In the event of a partial optional redemption or extraordinary redemption of the Bonds, each of the remaining Sinking Fund Payments for such Bonds, as described above, will be reduced, as nearly as practicable, on a pro rata basis, in integral multiples of \$5,000, as directed by the District.

* Preliminary; subject to change.

Extraordinary Redemption. The Bonds are subject to extraordinary redemption as a whole, or in part by lot, on any Interest Payment Date, and will be redeemed by the Trustee, from amounts paid by the District to the Trustee and designated by the District as a prepayment of Special Taxes for one or more parcels in the District made in accordance with the Rate and Method (“Prepayments”) deposited to the Redemption Account, plus amounts transferred from the Reserve Account, among maturities as directed in writing by the District, at the following redemption prices, expressed as a percentage of the principal amount to be redeemed, together with accrued interest to the redemption date:

<i>Redemption Date</i>	<i>Redemption Price</i>
Any Interest Payment Date from (and including) September 1, 20__ through (and including) March 1, 20__	103%
September 1, 20__ and March 1, 20__	102
September 1, 20__ and March 1, 20__	101
September 1, 20__ and any Interest Payment Date thereafter	100

Notice of Redemption. So long as the Bonds are held in book-entry form, notice of redemption will be mailed by the Trustee to DTC and not to the Beneficial Owners of the Bonds under the DTC book-entry only system. Neither the District nor the Trustee is responsible for notifying the Beneficial Owners, who are to be notified in accordance with the procedures in effect for the DTC book-entry system. See Appendix E.

The Trustee shall give notice, in the name of the District, of the redemption of Bonds; provided, however, that a notice of a redemption to be made from other than from Sinking Fund Payments will be conditioned on there being on deposit on the redemption date sufficient money to pay the redemption price of the Bonds to be redeemed. Such notice of redemption will: (a) specify the CUSIP numbers (if any) and the maturity date or dates of the Bonds selected for redemption; (b) state the date fixed for redemption and surrender of the Bonds to be redeemed; (c) state the redemption price; (d) state the place or places where the Bonds are to be redeemed; (e) in the case of Bonds to be redeemed only in part, state the portion of such Bond that is to be redeemed; (f) state the date of issue of the Bonds as originally issued; (g) state the rate of interest borne by each Bond being redeemed; and (h) state any other descriptive information needed to identify accurately the Bonds being redeemed as specified by the Trustee. Such notice will further state that on the date fixed for redemption, there will become due and payable on each Bond or portion thereof called for redemption, the principal thereof, together with any premium, and interest accrued to the redemption date, and that from and after such date, interest thereon will cease to accrue and be payable. At least 30 days but no more than 45 days prior to the redemption date, the Trustee will mail a copy of such notice, by first class mail, postage prepaid, to the respective Owners thereof at their addresses appearing on the Bond Register. The actual receipt by the Owner of any Bond or the original purchaser of any Bond of notice of such redemption is not a condition precedent to redemption, and neither the failure to receive nor any defect in such notice will affect the validity of the proceedings for the redemption of such Bonds, or the cessation of interest on the redemption date. A certificate by the Trustee that notice of such redemption has been given as provided in the Indenture will be conclusive as against all parties, and the Owner will not be entitled to show that he or she failed to receive notice of such redemption.

In addition to the foregoing notice, further notice will be given by the Trustee as set out below, but no defect in said further notice nor any failure to give all or any portion of such further notice will in any manner defeat the effectiveness of a call for redemption if notice thereof is given as above prescribed. In addition to providing any notice of redemption to the Owners, if the Bonds are held in book-entry form, each further notice of redemption will be sent not later than the date that notice of redemption is mailed to the Owners by electronic, registered or certified mail or overnight delivery service to the Depository and by electronic notice to the Municipal Securities Rulemaking Board.

Upon the payment of the redemption price of any Bonds being redeemed, each check or other transfer of funds issued for such purpose will to the extent practicable bear the CUSIP number (if any) identifying, by issue and maturity, the Bonds being redeemed with the proceeds of such check or other transfer.

With respect to any notice of optional redemption or extraordinary redemption of Bonds, such notice will state that such redemption will be conditional upon the receipt by the Trustee on or prior to the date fixed for such redemption of moneys sufficient to pay the principal of, premium, if any, and interest on such Bonds to be redeemed and that, if such moneys have not been so received, said notice will be of no force and effect and the Trustee will not be required to redeem such Bonds. In the event that such notice of redemption contains such a condition and such moneys are not so received, the redemption will not be made, and the Trustee will within a reasonable time thereafter give notice, in the manner in which the notice of redemption was given, that such moneys were not so received.

Registration, Transfer and Exchange

Registration. The Trustee will keep sufficient books for the registration and transfer of the Bonds. The ownership of the Bonds will be established by the Bond registration books held by the Trustee.

Transfer or Exchange. The registration of any Bond may, in accordance with its terms, be transferred upon the Bond registration books by the person in whose name it is registered, in person or by his or her duly authorized attorney, upon surrender of such Bond for cancellation at the Principal Office of the Trustee, accompanied by delivery of a written instrument of transfer in a form acceptable to the Trustee and duly executed by the Owner or his or her duly authorized attorney.

Bonds may be exchanged at the Principal Office of the Trustee for a like aggregate principal amount of Bonds for other authorized denominations of the same maturity and issue. The Trustee will not collect from the Owner any charge for any new Bond issued upon any exchange or transfer, but will require the Owner requesting such exchange or transfer to pay any tax or other governmental charge required to be paid with respect to such exchange or transfer. Whenever any Bonds are surrendered for registration of transfer or exchange, the District will execute and the Trustee will authenticate and deliver a new Bond or Bonds, as applicable, of the same issue and maturity, for a like aggregate principal amount; provided that the Trustee is not required to register transfers or make exchanges of: (a) Bonds for a period of 15 days next preceding any selection of the Bonds to be redeemed; or (b) any Bonds chosen for redemption.

[Remainder of page intentionally left blank.]

Debt Service Schedule

The following table presents the annual debt service on the Bonds (including sinking fund redemptions), assuming that there are no optional or extraordinary redemptions. See the caption “—Redemption.”

SOURCES OF PAYMENT FOR THE BONDS

Limited Obligations

The Bonds are special, limited obligations of the District payable only from amounts pledged under the Indenture and from no other sources.

The Net Taxes are the primary security for the repayment of the Bonds. Under the Indenture, the District has pledged to repay the Bonds and any Parity Bonds from the Net Taxes (which are Special Taxes less amounts set aside to pay Administrative Expenses (as such term is defined in Appendix B)). Special Tax revenues include the proceeds of the taxes authorized to be levied by the District on property within the District in accordance with the Ordinance, the Resolution of Formation, the Act and the voter approval obtained at the October 25, 2005 election in the District, including any scheduled payments and any Prepayments of Special Taxes, and the net proceeds of the redemption or sale of property sold as a result of foreclosure of the lien of the Special Taxes to the amount of said lien and penalties and interest on such Special Taxes.

In the event that the Special Tax revenues are not received when due, the only sources of funds available to pay the debt service on the Bonds and any Parity Bonds are amounts held by the Trustee in the Special Tax Fund (other than the Administrative Expenses Account), including amounts held in the Reserve Account, for the exclusive benefit of the Owners of the Bonds and any Parity Bonds.

Neither the faith and credit nor the taxing power of the City, the State or any political subdivision of the State is pledged to the payment of the Bonds or any Parity Bonds. Except for the Net Taxes, no other taxes are pledged to the payment of the Bonds or any Parity Bonds. The Bonds and any Parity Bonds are neither general or special obligations of the City nor general obligations of the District, but are limited obligations of the District payable solely from certain amounts deposited by the District in the

Special Tax Fund (exclusive of the Administrative Expenses Account), as more fully described in this Official Statement.

Special Taxes

Authorization and Pledge. In accordance with the provisions of the Act, the City Council established the District on October 25, 2005 for the purpose of financing the acquisition, construction and installation of various public improvements required in connection with the proposed development within the District. At a special election held on October 25, 2005, the owners of the property within the District authorized the District to incur indebtedness in an amount not to exceed \$10 million, and approved the Rate and Method, which authorized the Special Tax to be levied to repay District indebtedness, including the Bonds.

The District has covenanted in the Indenture that, so long as any Bonds or Parity Bonds issued under the Indenture are Outstanding, the legislative body of the District will levy the Special Tax in an amount sufficient, together with other amounts on deposit in the Special Tax Fund and available for such purpose, to pay: (i) the principal of and interest on the Bonds and any Parity Bonds when due; (ii) the Administrative Expenses; and (iii) any amounts required to replenish the Reserve Account of the Special Tax Fund to the Reserve Requirement. The District has further covenanted in the Indenture that it will take no actions that would discontinue or cause the discontinuance of the Special Tax levy or the District's authority to levy the Special Tax for so long as the Bonds and any Parity Bonds are Outstanding. See the caption “—Special Taxes—Collection and Application of Special Taxes.”

The Special Taxes levied in any fiscal year may not exceed the maximum rates authorized pursuant to the Rate and Method. See Appendix A. There is no assurance that the Net Taxes will, in all circumstances, be sufficient to pay the principal of and interest on the Bonds and any Parity Bonds when due. See the caption “SPECIAL RISK FACTORS—Insufficiency of Special Taxes.”

Rate and Method of Apportionment of Special Taxes. The Special Taxes will be levied in accordance with the terms of the Rate and Method, the text of which is set forth in Appendix A. All capitalized terms used in this section shall have the meaning set forth in Appendix A. This section provides only a summary of the Rate and Method, and is qualified by more complete and detailed information contained in the entire Rate and Method.

The Rate and Method provides that for each Fiscal Year all parcels in the District not otherwise exempt are to be classified as either Developed Property or Undeveloped Property. “Developed Property” is defined as all Assessor’s Parcels of Taxable Property for which a building permit for new construction was issued prior to March 1 of the prior Fiscal Year. “Undeveloped Property” is defined to include all Taxable Property not classified as Developed Property.

Under the Rate and Method, the Maximum Special Tax to be levied on each taxable parcel in the District classified as Developed Property or Undeveloped Property will be \$14,336.11 per acre for Fiscal Year 2021-22, and shall increase thereafter, on July 1 of each Fiscal Year thereafter, by an amount equal to two percent (2%) of the Maximum Annual Special Tax in effect in the previous Fiscal Year.

Commencing with Fiscal Year 2021-2022 and for each following Fiscal Year, the City Council shall levy the Special Tax until the amount of Special Taxes levied equals the Annual Special Tax Requirement. The Special Tax shall be levied for each Fiscal Year as follows:

First: The Special Tax shall be levied Proportionately on each Assessor’s Parcels of Developed Property up to 100% of the Maximum Annual Special Tax; and

Second: If additional Special Taxes are needed to satisfy the Annual Special Tax Requirement, the Special Tax shall be levied Proportionately on each Assessor's Parcels of Undeveloped Property up to 100% of the applicable Maximum Annual Special Tax.

Prepayment of Special Taxes. The Special Tax obligation applicable to an Assessor's Parcel may be prepaid at any time and the obligation of such Assessor's Parcel to pay any Special Tax may be fully or partially satisfied as described herein. See APPENDIX A—"RATE AND METHOD OF APPORTIONMENT OF SPECIAL TAXES" herein for a discussion of how the prepayment amount is calculated. No Special Tax prepayment shall be allowed unless the amount of Special Taxes, net of Administrative Expenses, that may be levied on Taxable Property within the District both prior to and after the proposed prepayment is at least 1.1 times the maximum annual debt service on all Outstanding Bonds. Tenders of Bonds in prepayment of Special Taxes may be accepted upon the terms and conditions established by the City Council pursuant to the Act. The Rate and Method provides that a property owner may prepay and satisfy the Special Tax obligation of an Assessor's Parcel in whole only if there are no delinquent Special Taxes with respect to such Assessor's Parcel at the time of prepayment.

In the event that a prepayment of Special Taxes occurs in the future, the net proceeds of such prepayment will be applied to effect a mandatory redemption of the Bonds. See "THE BONDS—Redemption" herein.

Collection and Application of Special Taxes. The Special Taxes are levied and collected by the Treasurer-Tax Collector of the County in the same manner and at the same time as *ad valorem* property taxes. The District may, however, collect the Special Taxes at a different time or in a different manner if necessary to meet its financial obligations.

The District has made certain covenants in the Indenture for the purpose of ensuring that the current Maximum Special Tax rate and method of collection of the Special Taxes are not altered in a manner that would impair the District's ability to collect sufficient Special Taxes to pay debt service on the Bonds, any Parity Bonds and Administrative Expenses when due. First, the City has covenanted that, to the extent it is legally permitted to do so, it will not reduce the Maximum Special Tax rates on then existing Developed Property in the District below the amounts which are necessary to provide Special Tax Revenues. Second, the City has covenanted that in the event that any initiative is adopted by the qualified electors in the District which purports to reduce or otherwise alter the Maximum Special Taxes, it will commence and pursue legal action seeking to preserve its ability to comply with its covenant contained in the preceding sentence.

See the captions "SPECIAL RISK FACTORS—Proposition 218" and "SPECIAL RISK FACTORS—Non-Cash Payments of Special Taxes."

Although the Special Taxes constitute liens on taxable parcels within the District, they do not constitute a personal indebtedness of the owners of property within the District. Moreover, other liens for taxes and assessments already exist on the property located within the District and others could come into existence in the future in certain situations without the consent or knowledge of the City, the District or the Property Owners. See the captions "SPECIAL RISK FACTORS—Parity Taxes and Special Assessments."

Under the terms of the Indenture, all Special Tax revenues received by the District are to be deposited in the Special Tax Fund. Special Tax revenues deposited in the Special Tax Fund each Fiscal Year are to be applied by the Trustee under the Indenture in the following order of priority: (i) to deposit an amount in the Administrative Expense Fund to pay Administrative Expenses (although a greater amount may be deposited in the Administrative Expense Fund if necessary to collect Delinquent Special Taxes); (ii) to deposit an amount in the Interest Account; (iii) to deposit an amount in the Principal Account; (iv) to deposit an amount in the Redemption Account; (v) to deposit an amount in the Reserve Account; (vi) to deposit an amount in the Rebate Fund; (vii) to deposit an amount in the Surplus Fund; and (viii) for any other lawful purpose of the District. See Appendix B.

Debt Service Coverage from Net Special Taxes. The table below shows the estimated debt service coverage on the Bonds.

Covenant to Foreclose; Proceeds of Foreclosure Sales. The net proceeds received following a judicial foreclosure sale of land within the District resulting from a Property Owner’s failure to pay the Special Taxes when due are included within the Net Taxes pledged to the payment of principal of and interest on the Bonds under the Indenture.

Pursuant to Section 53356.1 of the Act, in the event of any delinquency in the payment of any Special Tax or receipt by the District of Special Taxes in an amount which is less than the Special Tax levied, the City Council, as the legislative body of the District, may order that Special Taxes be collected by a superior court action to foreclose the lien within specified time limits. In such an action, the real property subject to the unpaid amount may be sold at a judicial foreclosure sale. Under the Act, the commencement of judicial foreclosure following the nonpayment of a Special Tax is not mandatory. However, the District has covenanted for the benefit of the Owners of the Bonds and any Parity Bonds that it will: (i) commence judicial foreclosure proceedings against (a) parcels with delinquent Special Taxes in excess of \$5,000 by the October 1 following the close of each Fiscal Year in which such Special Taxes were due; (b) all parcels with delinquent Special Taxes by the October 1 following the close of each Fiscal Year in which it receives Special Taxes in an amount which is less than 95% of the total Special Tax levied and the amount on deposit in the Reserve Account is at less than the Reserve Requirement; and (ii) diligently pursue such foreclosure proceedings until the delinquent Special Taxes are paid.

The District covenants that it will deposit the net proceeds of any foreclosure to the Special Tax Fund and will apply such proceeds remaining after the payment of Administrative Expenses to make current payments of principal of and interest on the Bonds and any Parity Bonds, to bring the amount on deposit in the Reserve Account up to the Reserve Requirement and to pay any delinquent installments of principal or interest due on the Bonds and any Parity Bonds.

If foreclosure is necessary and other funds (including amounts in the Reserve Account) have been exhausted, debt service payments on the Bonds could be delayed until the foreclosure proceedings have ended with the receipt of any foreclosure sale proceeds. Judicial foreclosure actions are subject to the normal delays associated with court cases and may be further slowed by bankruptcy actions, involvement by agencies of the federal government and other factors beyond the control of the City and the District. See the captions “SPECIAL RISK FACTORS—Bankruptcy and Foreclosure” and “SPECIAL RISK FACTORS—FDIC/Federal Government Interests in Properties.”

Moreover, no assurances can be given that the real property that is subject to foreclosure and sale at a judicial foreclosure sale will be sold or, if sold, that the proceeds of such sale will be sufficient to pay any delinquent Special Tax installment. See the caption “SPECIAL RISK FACTORS—Land Values.” Although the Act authorizes the District to cause such an action to be commenced and diligently pursued to completion, the Act does not impose on the District or the City any obligation to purchase or acquire any lot or parcel of property sold at a foreclosure sale if there is no other purchaser at such sale. Moreover, if the District chooses to purchase the property sold at foreclosure using a “credit bid” (where the District submits a bid crediting all or part of the amount required to satisfy the judgment for the delinquent amount of the Special Tax), as permitted under Section 53356.5 of the Act, the District must pay the amount of its credit bid into the redemption fund established for the Bonds, but this payment may be made up to 24 months after the date of the foreclosure sale. The Act provides that, in the case of a delinquency, the Special Tax will have the same lien priority as is provided for *ad valorem* taxes. See the caption “SPECIAL RISK FACTORS—Parity Taxes and Special Assessments.”

Because the County has not elected to follow the procedures of the “Teeter Plan” (which is the Alternative Method of Distribution of Tax Levies and Collections and of Tax Sale Proceeds, as provided for in Section 4701 *et seq.* of the Revenue and Taxation Code of the State of California) with respect to special taxes, collections of Special Taxes will reflect actual delinquencies.

Reserve Account of the Special Tax Fund

In order to secure further the payment of principal of and interest on the Bonds and any Parity Bonds, the District will maintain in the Reserve Account an amount equal to the least of: (a) Maximum Annual Debt Service (as such term is defined in Appendix B) on the Bonds and any Parity Bonds; (b) 125% of average Annual Debt Service (as such term is defined in Appendix B) on the then-Outstanding Bonds and any Parity Bonds; or (c) 10% of the initial outstanding principal amount of the Bonds and any Parity Bonds (the “**Reserve Requirement**”). The initial Reserve Requirement is \$ _____. The Reserve Account shall not exceed the initial Reserve Requirement.

Moneys in the Reserve Account will be used solely for the purpose of paying the principal of, including Sinking Fund Payments, and interest on the Bonds and any Parity Bonds when due in the event that the moneys in the Interest Account and the Principal Account of the Special Tax Fund are insufficient or moneys in the Redemption Account of the Special Tax Fund are insufficient to make a Sinking Fund Payment when due, and for the purpose of making any required transfer to the Rebate Fund pursuant to the Indenture upon written direction from the District. If the amounts in the Interest Account, the Principal Account or the Redemption Account of the Special Tax Fund are insufficient to pay the principal of, including Sinking Fund Payments, or interest on any Bonds and Parity Bonds when due, or amounts in the Special Tax Fund are insufficient to make transfers to the Rebate Fund when required, the Trustee will withdraw from the Reserve Account for deposit in the Interest Account, the Principal Account or the Redemption Account of the Special Tax Fund or the Rebate Fund, as applicable, moneys necessary for such purposes.

Whenever moneys are withdrawn from the Reserve Account, after making the required transfers to the Administrative Expenses Account, the Interest Account, the Principal Account or the Redemption Account of the Special Tax Fund, the Trustee will transfer to the Reserve Account from available moneys in the Special Tax Fund, or from any other legally available funds that the District elects to apply to such purpose, the amount needed to restore the amount of such Reserve Account to the Reserve Requirement. Moneys in the Special Tax Fund will be deemed available for transfer to the Reserve Account only if the Trustee determines that such amounts will not be needed to make the deposits required to be made to the Administrative Expenses Account, the Interest Account, the Principal Account or the Redemption Account of the Special Tax Fund on or before the next September 1. If amounts in the Special Tax Fund, together with any other amounts transferred to replenish the Reserve Account, are inadequate to restore the Reserve Account to the Reserve Requirement, then the District will include the amount necessary fully to restore the Reserve Account to the Reserve Requirement in the next annual Special Tax levy to the extent of the maximum permitted Special Tax rates.

In connection with an optional redemption of Bonds or Parity Bonds, an extraordinary redemption of Bonds or Parity Bonds from Prepayments or a partial defeasance of Bonds or Parity Bonds, amounts in the Reserve Account may be applied to such redemption or partial defeasance so long as the amount on deposit in the Reserve Account following such redemption or partial defeasance equals the Reserve Requirement. The District will set forth in a Certificate of an Authorized Representative the amount in the Reserve Account to be transferred to the Redemption Account on a redemption date or to be transferred to partially defease Bonds, and the Trustee will make such transfer on the applicable redemption or defeasance date, subject to the limitation in the preceding sentence.

To the extent that the Reserve Account is at the Reserve Requirement as of the first day of the final Bond Year for the Bonds or an issue of Parity Bonds, amounts in the Reserve Account may be applied to pay the principal of and interest due on the Bonds and Parity Bonds, as applicable, in the final Bond Year for such issue. Moneys in the Reserve Account in excess of the Reserve Requirement that are not transferred in accordance with the preceding provisions will be withdrawn from the Reserve Account on the Business Day before each March 1 and September 1 and transferred to the Interest Account of the Special Tax Fund.

The Reserve Requirement may be satisfied in whole or part by the deposit of a reserve fund surety policy or similar instrument therein.

No Issuance of Parity Bonds Except for Refunding

Subject to the limitations set forth in the Indenture, the District may, at any time after the issuance and delivery of the Bonds, and without the consent of the Owners of the Bonds, issue Parity Bonds payable from the Net Taxes and other amounts deposited in the Special Tax Fund (other than in the Administrative Expenses Account therein) and secured by a lien and charge upon such amounts equal to the lien and charge securing the Outstanding Bonds and any other Parity Bonds theretofore issued pursuant to the Indenture or under any Supplemental Indenture; provided, however, that Parity Bonds may only be issued for the purpose of refunding all or a portion of the Bonds or any Parity Bonds then Outstanding. See Appendix B under the caption “DEFEASANCE AND PARITY BONDS—Conditions for the Issuance of Parity Bonds and Other Additional Indebtedness” for the conditions that must be met in order for the District to issue Parity Bonds.

No Acceleration

The principal of and interest on the Bonds are not subject to acceleration under the Indenture in the event of a default relating to the Bonds. See Appendix B under the caption “EVENTS OF DEFAULT—Remedies of Owners” for a description of remedies that are available to the Bond Owner if the District defaults under the Indenture.

THE DISTRICT

General Description

The City encompasses approximately 49 square miles of land area in western Riverside County. The City is immediately east of the City of Riverside, 66 miles east of the City of Los Angeles, 48 miles northeast of the City of Irvine and 100 miles north of the City of San Diego. Geographically, the City is bordered by three low-lying mountain ranges, March Air Reserve Base and Lake Perris State Park. The City is situated at the junction of two major highways, California State Highway 60 (the Moreno Valley Freeway) and Interstate 215.

The District consists of approximately 64.4 gross acres of which approximately 32.99 are net taxable acres and is located at the southeast corner of the intersection of State Route 60 and Nason Street in the City, and consists of the Stoneridge Towne Centre. **The portion of the Stoneridge Towne Centre owned and occupied by Target and Kohl's is approximately 23.28 acres and is not subject to the Special Tax (as defined herein) lien of the District.** Accordingly, of the projected approximately 560,000 square feet of commercial retail space within the District, only approximately 288,000 square feet is projected to be subject to the levy of Special Taxes of the District.

As of September 1, 2021 there are 25 commercial parcels that are taxed by acre, consisting of a total of approximately 32.99 acres and approximately 207,311 building square feet and 6 undeveloped parcels, consisting of approximately 5.54 acres.

Development Status and Estimated Value-to-Lien Ratio

Under the Rate and Method, all Taxable Property in the District will be classified as Developed Property (property for which a building permit has been issued) or Undeveloped Property (property for which a building permit has not been issued) and will be subject to a Special Tax levy at the maximum rates described in Section C of the Rate and Method. As shown below, based on development status as of September 1, 2021, approximately 87.15% of the Fiscal Year 2021-22 Special levy was on Developed Property.

The assessed value net of exemptions of the land within the District for Fiscal Year 2021-22 is \$60,457,800. Dividing this assessed value by the \$4,755,000* principal amount of the Bonds results in an assessed value-to-lien ratio of approximately 12.71 to 1*. When the \$1,201,906 amount of additional overlapping debt that is payable from taxes levied on the property within the District (as set forth under the caption “—Estimated Direct and Overlapping Indebtedness”) is included in the calculation, the value-to-lien ratio is approximately 10.15 to 1*. The table below summarizes the development status of the property and the value-to-lien ratio for each of the parcels.

[Remainder of page intentionally left blank.]

* Preliminary, subject to change.

Estimated Direct and Overlapping Indebtedness

Numerous local agencies provide public services within the District's boundaries. Some of these local agencies have outstanding general obligation bonds that are secured by taxes on the parcels within the District and others have authorized but unissued general obligation bonds that, if issued, will be secured by taxes levied on parcels within the District. The approximate amount of the direct and overlapping debt secured by such taxes and assessments on the parcels within the District for Fiscal Year 2021-22 is shown in the table below. Increases in assessed valuations in the District relative to assessed valuations in the overlapping jurisdiction can increase the *ad valorem* tax levy on District parcels; similarly, a decrease in assessed valuations in the District relative to assessed valuations in the overlapping jurisdiction can decrease the *ad valorem* tax levy on District parcels.

Historical Assessed Values

The table below sets forth a summary of historical assessed values in the District. In the event of successful property tax appeals in the future, reduced assessed values would not affect the amount of Special Taxes that can be levied under the Rate and Method but may alter the amount of overlapping general obligation bond tax levies. The District is not aware of any other pending or successful property tax appeals within the District.

**TABLE 5
SUMMARY OF HISTORICAL ASSESSED VALUES
COMMUNITY FACILITIES DISTRICT NO. 5 OF THE CITY OF MORENO VALLEY**

<i>Fiscal Year</i>	<i>Land Assessed Value</i>	<i>Assessed Structure Value</i>	<i>Total Assessed Value</i>
2017-18	\$10,460,651	\$32,429,284	\$ 42,889,935
2018-19	10,882,851	37,744,861	48,627,712
2019-20	18,134,518	34,918,209	53,052,727
2020-21	18,645,002	35,702,522	54,347,524

Delinquency History

Under the provisions of the Act, the Special Taxes, from which funds necessary for the payment of principal of, and interest on, the Bonds are derived, will be billed to the Property Owners on their regular property tax bills. Such Special Tax installments are due and payable, and bear the same penalties and interest for non-payment, as do regular property tax installments. Special Tax installment payments cannot generally be made separately from property tax payments. Therefore, the unwillingness or inability of a property owner to pay regular property tax bills as evidenced by property tax delinquencies may also indicate an unwillingness or inability to make regular property tax payments and Special Tax installment payments in the future. See the caption “SPECIAL RISK FACTORS—Special Tax Delinquencies.”

There have been no delinquencies within the District within the past five fiscal years.

See the caption “SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Covenant to Foreclose; Proceeds of Foreclosure Sales” for a discussion of the provisions that apply, and procedures that the District is obligated to follow, in the event of delinquency in the payment of Special Tax installments.

SPECIAL RISK FACTORS

The following is a discussion of certain risk factors that should be considered, in addition to other matters set forth in this Official Statement, in evaluating the investment quality of the Bonds. This discussion does not purport to be comprehensive or definitive. In addition, the order in which the following information is presented is not intended to reflect the relative importance of any such risks. The occurrence of one or more events discussed below could adversely affect the value of the property in the District. Moreover, the occurrence of one or more of the events discussed below could adversely affect the ability or willingness of property owners in the District to pay their Special Taxes when due. Such a failure to pay Special Taxes could result in the inability of the District to make full and punctual payments on the Bonds.

Concentration of Ownership

The District has a significant concentration of ownership. As of September 1, 2021, there were 25 parcels in the District, a majority which are owned by a single Property Owner, MCA Stoneridge, LLC (“MCA”). MCA is responsible for approximately 46.41% of the estimated Fiscal Year 2021-22 Special Tax, and the other Property Owners are collectively responsible for approximately 53.59% of the estimated Fiscal Year 2021-22 Special Tax levy. See the caption “THE DISTRICT—Property Ownership.” Failure of the Property Owners, or any successor, to pay the annual Special Taxes when due could result in a default in payments of the principal of, and interest on, the Bonds, when due.

None of the Property Owners is obligated in any manner to continue to own, or to develop, any of such property. The Special Taxes are not a personal obligation of the owners of the property on which such Special Taxes are levied, and no assurances can be given that the current Property Owners within the District will be financially able to pay the Special Taxes levied on such property or that they will choose to pay even if financially able to do so. See the caption “—Payment of the Special Tax is Not a Personal Obligation of the Owners.” Such risk is greater and its consequence more severe when ownership is concentrated and may be expected to decrease when ownership is diversified.

Limited Obligations

The Bonds are revenue bonds, payable exclusively from Net Taxes and other funds provided in the Indenture. The Bonds are not payable from the general fund or other moneys of the City or moneys derived from the District. Except with respect to the Net Taxes from the District, neither the credit nor the taxing power of the District or the City is pledged for the payment of the Bonds or the interest on the Bonds, and, except as provided in the Indenture, no Owner of the Bonds may compel the exercise of any taxing power by the District

or the City or force the forfeiture of any City or District property. The principal of, premium, if any, and interest on the Bonds are not a debt of the City or a legal or equitable pledge, charge, lien or encumbrance upon any of the City's or the District's property or upon any of the City's or the District's income, receipts or revenues, except the Net Taxes and other amounts pledged under the Indenture. See the caption "SOURCES OF PAYMENT FOR THE BONDS—Limited Obligations."

Insufficiency of Special Taxes

Based on current projections, the Maximum Special Taxes that may be levied within the District exceed Maximum Annual Debt Service on the Bonds plus the Fiscal Year 2021-22 Administrative Expenses amount. See the caption "SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Debt Service Coverage from Net Special Taxes." Notwithstanding the fact that the Maximum Special Taxes that may be levied in the District exceed debt service on the Bonds, the Special Taxes that are actually collected could be inadequate to make timely payment of debt service either because of nonpayment or, as described under the caption "SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Rate and Method of Apportionment of Special Taxes," because property becomes exempt from taxation.

The Special Taxes will be billed to the properties within the District on the *ad valorem* property tax bills sent to owners of such properties. The Act provides that such Special Tax installments are due and payable, and bear the same penalties and interest for non-payment, as do *ad valorem* property tax installments. Significant delinquencies in the payment of Special Tax installments, or delays in the prosecution of foreclosure proceedings to collect such Special Taxes, could result in depletion of the Reserve Account and a default in the payment of the Bonds. See the caption "SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Covenant to Foreclose; Proceeds of Foreclosure Sales" for a discussion of the provisions that apply, and the procedures that the District has covenanted to follow, in the event of delinquencies in the payment of Special Taxes. See the captions "—FDIC/Federal Government Interests in Properties" and "—Bankruptcy and Foreclosure" for a discussion of the policy of the Federal Deposit Insurance Corporation (the "FDIC") regarding the payment of special taxes and assessments and limitations on the District's ability to foreclose on the lien of the Special Taxes in certain circumstances.

The annual levy of the Special Tax is subject to the maximum authorized tax rates. The levy cannot be made at a higher rate even if the failure to do so means that the estimated proceeds of the levy and collection of the Special Tax, together with other available funds, will not be sufficient to pay debt service on the Bonds. Other funds that might be available include moneys and reserve fund surety policies or similar instruments deposited in the Reserve Account, funds derived from the payment of penalties on delinquent Special Taxes and funds derived from the tax sale or foreclosure and sale of parcels on which levies of the Special Tax are delinquent.

The levy of the Special Tax will rarely, if ever, result in a uniform relationship between the value of particular property and the amount of the levy of the Special Tax against such property. Thus, there will rarely, if ever, be a uniform relationship between the value of such property and the proportionate share of debt service on the Bonds, and certainly not a direct relationship.

The Act provides that if any property within the District that is not otherwise exempt from the Special Tax is acquired by a public entity through a negotiated transaction, or by gift or devise, the Special Taxes will continue to be levied on and enforceable against the public entity that acquired the property. In addition, the Act provides that if property that is subject to the Special Tax is acquired by a public entity through eminent domain proceedings, the obligation to pay the Special Tax with respect to such property is to be treated as if it were a special assessment and paid from the eminent domain award. The constitutionality and operative effect of these provisions has not been tested in the courts.

If for any reason property that is subject to the Special Tax becomes exempt from taxation by reason of ownership by a nontaxable entity such as the federal government, or another public agency that asserts immunity

from the Special Tax, subject to the limitation of the Maximum Special Tax rates, the Special Taxes will be reallocated to the remaining properties within the District. This would cause the owners or tenants of such properties to pay a greater amount of the Special Tax and could have an adverse effect on the timely payment of the Special Tax. Because of the problems that are associated with collecting taxes from public agencies, if a substantial portion of land within the District were to become owned by public agencies, collection of the Special Tax might become more difficult and could result in collections of the Special Tax that might not be sufficient to pay principal of and interest on the Bonds when due, and a default could occur with respect to the payment of such principal and interest.

Failure to Develop Properties

Approximately 12.86% of the Fiscal Year 2021-22 Special Tax levy within the District has been levied on Undeveloped Property. Unimproved or partially improved land is inherently less valuable than land with improvements on it, especially if there are restrictions on development, and provides less security to the Owners should it be necessary for the District to foreclose on the property because of the nonpayment of Special Taxes. Any delays in developing unimproved property, or the decision not to construct improvements on such property, may affect the willingness and ability of the owners of property within the District to pay the Special Taxes when due.

Land development is subject to comprehensive federal, State and local regulations. Approval is required from various agencies in connection with the layout and design of developments, the nature and extent of improvements, construction activity, land use, zoning, school and health requirements, as well as numerous other matters. There is always the possibility that such approvals will not be obtained or, if obtained, will not be obtained on a timely basis. Failure to obtain any such agency approval or to satisfy such governmental requirements could adversely affect planned land development. In addition, there is a risk that future governmental restrictions, including, but not limited to, governmental policies restricting or controlling development within the District, will be enacted, and a risk that future voter approved land use initiatives could add more restrictions and requirements on development within the District.

Moreover, there can be no assurance that the means and incentive to conduct land development operations within the District will not be adversely affected by a deterioration of the real estate market and economic conditions or future local, State and federal governmental policies relating to real estate development, the income tax treatment of real property ownership or the national economy.

The Property Owners who own unimproved property are likely to need continued financing to complete the development of the property within the District. No assurance can be given that the required funding will be secured or that the proposed development will be partially or fully completed, and it is possible that cost overruns will be incurred that will require additional funding beyond what the Property Owners have projected, which may or may not be available.

Owners of the Bonds should assume that any event that significantly impacts the ability to complete the development of the land in the District would cause the property values within the District to decrease substantially and could affect the willingness and ability of the Property Owners to pay the Special Taxes when due.

COVID-19 Pandemic

The global outbreak of the novel coronavirus COVID-19 (“COVID-19”), a respiratory disease declared to be a pandemic (the “Pandemic”) by the World Health Organization, significantly affected the national capital markets and national, state and local economies in various ways. Unemployment in the United States dramatically increased as a result of the Pandemic and triggered a nationwide recession in February 2020. On May 6, 2020, Governor Newsom issued Executive Order N-61-20 (the “Executive Order”), waiving penalties and interest on taxes on property on the secured or unsecured roll through May 6, 2021 under certain conditions,

including: (i) the property is a residential property occupied by the taxpayer or the property is used for a small business, (ii) the taxes owed were not delinquent as of March 4, 2020, (iii) the taxpayer files for relief in a form prescribed by the tax collector, and (iv) the taxpayer demonstrates economic hardship to the satisfaction of the tax collector. The Executive Order ceased as of May 6, 2021. California fully reopened the economy on June 15, 2021. Businesses and activities returned to normal, subject to certain risk reduction and safety measures, except for certain “mega events” (1,000 people indoors or 10,000 outdoors).

There can be no assurance that more additional State or federal measures or more restrictive safety protocols (including business closures) will not be imposed or reimposed in the future, depending on the course of the Pandemic, variants, a significant increase in the number of COVID-19 cases, updated guidance by the Centers for Disease Control and Prevention, or other factors. The actual impact of COVID-19 on the District will depend on future events, including future events outside of the control of the District, and actions by the federal government and the State. The District cannot predict the extent or duration of the outbreak or what overall impact it may have on the District. Any adverse impact of COVID-19 on the District, landowners, operations, finances and ability to complete development within the District as planned, Property Owners’ willingness and ability to pay Special Taxes when due, and the real estate market in general cannot be predicted.

Natural Disasters

The District, like all California communities, may be subject to unpredictable seismic activity, fires, drought, floods or other natural disasters. The District is not situated within any currently designated State of California Earthquake Fault zones. However, the District, like most of Southern California is located in a seismically active area. Seismic activity from faults represents potential risk for damage to buildings, roads, bridges and property within the District in the event of an earthquake. There is significant potential for destructive ground-shaking during the occurrence of a major seismic event. In addition, land susceptible to seismic activity may be subject to liquefaction during the occurrence of such an event.

In the event of a severe earthquake, fire, flood or other natural disaster, there may be significant damage to both property and infrastructure in the District. As a result, the Developer or future property owners may be unable or unwilling to pay the Special Taxes when due. In addition, the value of land in the District could be diminished in the aftermath of such a natural disaster, reducing the resulting proceeds of foreclosure sales in the event of delinquencies in the payment of the Special Taxes.

The District is located outside the 500-year floodplain.

In recent years, wildfires have caused extensive damage throughout the State. In some instances, entire neighborhoods have been destroyed. Several of the fires that occurred in recent years damaged or destroyed property in areas that were not previously considered to be at risk from such events. Some commentators believe that climate change will lead to even more frequent and more damaging wildfires in the future. Additionally, wildfires increase the risk of mudslides in areas like those in the City that are surrounded by hillsides. In general, property damage due to wildfire or mudslides could result in a significant decrease in property tax and other revenues received by the District. However, the District is not located in a wildfire risk zone.

In the event of a natural disaster, there may be significant damage to both property and infrastructure in the District. As a result, a substantial portion of the Property Owners may be unable or unwilling to pay the Special Taxes when due. In addition, the value of land in the District could be diminished in the aftermath of such a natural disaster, reducing the resulting proceeds of foreclosure sales in the event of delinquencies in the payment of the Special Taxes.

Hazardous Substances

The presence of hazardous substances on a parcel may result in a reduction in the value of a parcel. In general, the owners and operators of a parcel may be required by law to remedy conditions of the parcel that

relate to releases or threatened releases of hazardous substances. The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, sometimes referred to as “CERCLA” or the “Superfund Act,” is the most well-known and widely applicable of these laws, but State laws with regard to hazardous substances are also stringent and similar. Under many of these laws, the owner or operator is obligated to remedy a hazardous substance condition of property whether or not the owner or operator had anything to do with creating or handling the hazardous substance. The effect, therefore, should any of the taxed parcels be affected by a hazardous substance, is to reduce the marketability and value of the parcel by the costs of remedying the condition, because the purchaser, upon becoming owner, will become obligated to remedy the condition just as is the seller.

The District has not independently verified, but is not aware, that any owner (or operator) of any of the parcels within the District has a liability related to hazardous substances with respect to any such parcel. However, it is possible that such liabilities do currently exist and that the District is not aware of them.

Further, it is possible that liabilities may arise in the future with respect to any of the parcels within the District resulting from the existence, currently, on the parcel of a substance that is presently classified as hazardous but which has not been released or the release of which is not presently threatened, or may arise in the future resulting from the existence, currently, on the parcel of a substance that is not presently classified as hazardous but which may in the future be so classified. Further, such liabilities may arise not simply from the existence of a hazardous substance but from the method of handling it. Any of these possibilities could significantly affect the willingness or ability of the owner of any parcel to pay the Special Taxes or the value of a parcel that is realizable upon a delinquency.

Cybersecurity Risk

The City, like many other public and private entities, relies on computer and other digital networks and systems to conduct its operations. As a recipient and provider of personal, private or other electronic sensitive information, the City is potentially subject to multiple cyber threats including, but not limited to, hacking, viruses, malware and other attacks on computer and other sensitive digital networks and systems. Entities or individuals may attempt to gain unauthorized access to the City’s systems for the purposes of misappropriating assets or information or causing operational disruption or damage. No assurance can be given that the City’s efforts to manage cyber threats and attacks will, in all cases, be successful or that any such attack will not materially impact the operations or finances of the City. The City is also reliant on other entities and service providers, such as the Fiscal Agent or the Dissemination Agent in connection with compliance by the City with its continuing disclosure undertakings. No assurance can be given that the City may not be affected by cyber threats and attacks against other entities or service providers in a manner which may affect the Owners of the Bonds, e.g., systems related to the timeliness of payments on their respective Bonds or compliance with disclosure filings pursuant to the Continuing Disclosure Agreement.

The City employs a multi-layer cyber protection scheme that includes weekly vulnerability scans by the Cybersecurity Infrastructure and Security Agency (part of the U.S. Department of Homeland Security), next-generation firewalls, anti-virus, anti-spam/malware software, intrusion detection/prevention, domain name system filtering services by Multi-State Information Sharing and Analysis Center, duplicate systems in a disaster recovery site, and multiple copies of everything that is backed up. The City implements recommended strategies suggested by security vendors and makes internal system changes as needed. To date, the City has not experienced a significant attack on its computer operating systems. However, there is no assurance that a future attack or attempted attack would not result in disruption of City operations. The City expects that any such disruptions would be temporary.

Shapiro Decision

On August 1, 2014, the California Court of Appeal, Fourth Appellate District, Division One (the “Court”), issued its opinion in *City of San Diego v. Melvin Shapiro, et al.* (D063997). The case involved a

Convention Center Facilities District (the “CCFD”) established by the City of San Diego. The CCFD was a financing district established under the City of San Diego’s charter (the “Charter”) and was intended to function much like a community facilities district established under the provisions of the Act. The CCFD was comprised of all of the real property in the entire City of San Diego. However, the special tax to be levied within the CCFD was to be levied only on properties improved with a hotel located within the CCFD.

At the election to authorize such special tax, the Charter proceeding limited the electorate to owners of hotel properties and lessees of real property owned by a governmental entity on which a hotel is located. Thus, the election was an election limited to owners and lessees of properties on which the special tax would be levied, and not a registered voter election. Such approach to determining who would constitute the qualified electors of the CCFD was based on Section 53326(c) of the Act, which generally provides that, if a special tax will not be apportioned in any tax year on residential property, the legislative body may provide that the vote will be by the landowners of the proposed district whose property would be subject to the special tax. The Court held that the CCFD special tax election did not comply with applicable requirements of Article XIII A, Section 4, and Article XIII C, Section 2, of the State Constitution, or with applicable provisions of the City of San Diego’s Charter, because the electors in such an election were not the registered voters residing within the district.

In the case of the CCFD, at the time of the election there were several hundred thousand registered voters within the CCFD (*viz.*, all of the registered voters in the City of San Diego). In the case of the District, there were no registered voters within the District at the time of the elections to authorize the special tax levy for the District. In *Shapiro*, the Court expressly stated that it was not addressing the validity of landowner voting to impose special taxes pursuant to the Act in situations where there are fewer than 12 registered voters. Thus, by its terms, the Court’s holding does not apply to the special tax election in the District. Moreover, Section 53341 of the Act provides that any “action or proceeding to attack, review, set aside, void or annul the levy of a special tax ... shall be commenced within 30 days after the special tax is approved by the voters.” Similarly, Section 53359 of the Act provides that any action to determine the validity of bonds issued pursuant to the Act or the levy of special taxes authorized pursuant to the Act be brought within 30 days of the voters approving the issuance of such bonds or the special tax. Voters approved the Special Tax and the issuance of bonds for the District in compliance with all applicable requirements of the Act at the time of formation of the District in 2005. Therefore, under the provisions of Sections 53341 and 53359 of the Act, the statute of limitations period to challenge the validity of the Special Tax for the District has expired.

Parity Taxes and Special Assessments

[Property within the District is subject to taxes and assessments imposed by other public agencies that have jurisdiction over the land within the District. See the caption “THE DISTRICT—Estimated Direct and Overlapping Indebtedness.”]

The Special Taxes and any penalties thereon constitute a lien against the lots and parcels of land on which they have been levied. Such lien is on a parity with all special taxes and special assessments levied by the City and other agencies and is co-equal to and independent of the lien for general property taxes, regardless of when they are imposed upon the same property. The Special Taxes have priority over all existing and future private liens imposed on the property except, possibly, for liens or security interests held by the Federal Deposit Insurance Corporation and other federal government entities. See the captions “—Bankruptcy and Foreclosure” and “—FDIC/Federal Government Interests in Properties” below.

Neither the City nor the District has control over the ability of other entities and districts to issue indebtedness that is secured by special taxes, *ad valorem* taxes or assessments that are payable from all or a portion of the property within the District. In addition, the Property Owners within the District may, without the consent or knowledge of the District, petition other public agencies to issue public indebtedness secured by special taxes, *ad valorem* taxes or assessments. Any such special taxes, *ad valorem* taxes or assessments may have a lien on such property on a parity with the Special Taxes and could reduce

the estimated value-to-lien ratios for property within the District or the willingness of property owners to pay the Special Tax.

Disclosures to Future Purchasers

The willingness or ability of an owner of a parcel to pay the Special Tax even if the value of the parcel is sufficient to do so may be affected by whether or not the owner was given due notice of the Special Tax authorization when the owner purchased the parcel, was informed of the amount of the Special Tax on the parcel should the Special Tax be levied at the maximum tax rate and the risk of such a levy, and, at the time of such a levy, has the ability to pay it as well as pay other expenses and obligations. The District has caused a notice of the Special Tax lien to be recorded in the Office of the Recorder for the County against each parcel. While title companies normally refer to such notices in title reports, there can be no guarantee that such reference will be made or, if made, that a prospective purchaser or lender will consider such Special Tax obligation in the purchase of a property within the District or lending of money secured by such property.

The Act requires the subdivider (or its agent or representative) of a subdivision to notify a prospective purchaser or long-term lessor of any lot, parcel, or unit that is subject to a Mello-Roos special tax of the existence and maximum amount of such special tax using a statutorily prescribed form. California Civil Code § 1102.6b requires that in the case of transfers other than those that are covered by the above requirement, the seller must at least make a good faith effort to notify the prospective purchaser of the special tax lien in a format that is prescribed by statute. Failure by an owner of the property to comply with the above requirements, or failure by a purchaser or lessor to consider or understand the nature and existence of the Special Tax, could adversely affect the willingness and ability of the purchaser or lessor to pay the Special Tax when due.

Special Tax Delinquencies

Under provisions of the Act, the Special Taxes, from which funds necessary for the payment of principal of and interest on the Bonds and any Parity Bonds are derived, are customarily billed to the properties within the District on the *ad valorem* property tax bills sent to owners of such properties. The Act currently provides that such Special Tax installments are due and payable, and bear the same penalties and interest for non-payment, as do *ad valorem* property tax installments.

Significant delinquencies in the payment of annual Special Tax installments, or delays in the prosecution of foreclosure proceedings to collect such Special Taxes, could result in default in depletion of the Reserve Account and default in payment of debt service on the Bonds. See the caption “THE DISTRICT—Delinquency History” for historical Special Tax delinquency information in the District. See the caption “SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Covenant to Foreclose; Proceeds of Foreclosure Sales” for a discussion of the provisions that apply, and the procedures that the District is obligated to follow under the Indenture, in the event of delinquencies in the payment of Special Taxes. See the captions “—FDIC/Federal Government Interests in Properties” and “—Bankruptcy and Foreclosure” for a discussion of the policy of the FDIC and the rights of federal government entities regarding the payment of special taxes and assessments and limitations on the District’s ability to foreclose on the lien of the Special Taxes in certain circumstances.

The Alternative Method of Distribution of Tax Levies and Collections and of Tax Sale Proceeds (known as the Teeter Plan), as provided for in Section 4701 *et seq.* of the State Revenue and Taxation Code, is not available in the County for community facilities districts such as the District. The collection of Special Taxes is therefore subject to the risk of delinquency, while the District is also entitled to collect penalties and interest on delinquent Special Taxes.

Non-Cash Payments of Special Taxes

Under the Act, the City Council, as the legislative body of the District, may reserve to itself the right and authority to allow the owner of any taxable parcel to tender a Bond or Parity Bond in full or partial payment

of any installment of the Special Taxes or the interest or penalties thereon. A Bond or Parity Bond so tendered is to be accepted at par and credit is to be given for any interest accrued thereon to the date of the tender. Thus, if Bonds or Parity Bonds can be purchased in the secondary market at a discount, it may be to the advantage of an owner of a taxable parcel to pay the Special Taxes applicable thereto by tendering a Bond or Parity Bond. Such a practice would decrease the cash flow available to the District to make payments with respect to other Bonds or Parity Bonds then outstanding; and, unless the practice was limited by the District, the Special Taxes paid in cash could be insufficient to pay the debt service due with respect to such other Bonds or Parity Bonds.

In order to provide some protection against the potential adverse impact on cash flows that might be caused by the tender of Bonds or Parity Bonds in payment of Special Taxes, the Indenture includes a covenant pursuant to which the District will not adopt any policy pursuant to Section 53341.1 of the Act permitting the tender of Bonds or Parity Bonds in full payment or partial payment of any Special Taxes unless the District has first received a certificate from an Independent Financial Consultant that the acceptance of such a tender will not result in the District having insufficient Special Tax revenues to pay the principal of and interest on the Bonds and Parity Bonds when due.

Payment of the Special Tax is Not a Personal Obligation of the Owners

The obligation to pay Special Taxes levied within the District does not constitute a personal obligation of the current or subsequent owners of the property in the District. Enforcement of Special Tax payment obligations by the District is limited to judicial foreclosure in the County Superior Court. See the caption “SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Covenant to Foreclose; Proceeds of Foreclosure Sales.” There is no assurance that any current or subsequent owner of a parcel that is subject to Special Taxes will be able to pay the Special Taxes, or that such owner will choose to pay such installments even though such owner is financially able to do so.

Land Values

The value of the property within the District is a critical factor in determining the investment quality of the Bonds. If a property owner is delinquent in the payment of Special Taxes, the District’s only remedy is to commence foreclosure proceedings against the delinquent parcel in an attempt to obtain funds to pay the Special Taxes. Reductions in property values due to a downturn in the economy, natural disasters, stricter land use regulations, delays in development or other events could adversely impact the security that underlies the Special Taxes. See the caption “THE DISTRICT—Estimated Value-to-Lien Ratio” herein.

The assessed values that are set forth in this Official Statement do not represent market values arrived at through an appraisal process and generally reflect only the sales price of a parcel when such parcel was acquired by its current owner, adjusted annually by an amount that is determined by the County Assessor, generally not to exceed an increase of more than 2% per Fiscal Year, and value increases attributable to new construction. In the last several years such upward adjustment has been less than 2% annually and in certain years, the assessed value for specific parcels within the District may have been revised downwards. In recent years, many counties in the State, including the County, have reassessed certain properties that were acquired at the peak of the real estate market. The District cannot predict whether the County will reduce assessed values within the District in future years. If the County did decide to broadly reassess assessed valuations in the County, it is possible that in future years the assessed values that shown in this Official Statement could be adjusted downward. Prospective purchasers of the Bonds should not assume that the property within the District could be sold for the assessed values that are described in this Official Statement at a foreclosure sale for delinquent Special Taxes or for an amount that is adequate to pay delinquent Special Taxes.

No assurance can be given that any bid will be received for a parcel with delinquent Special Taxes offered for sale at foreclosure or, if a bid is received, that such bid will be sufficient to pay all delinquent Special Taxes. See the caption “SOURCES OF PAYMENT FOR THE BONDS—Special Tax—Covenant to Foreclose; Proceeds of Foreclosure Sales.”

No assurance can be given that any of unimproved parcels in the District could be sold for their assessed value if such parcels should become delinquent in the payment of Special Taxes and be foreclosed upon.

Potential Early Redemption of Bonds from Prepayments

Property owners within the District are permitted to prepay their Special Taxes at any time. Such prepayments will result in a redemption of Bonds. See the caption “THE BONDS—Redemption—Extraordinary Redemption.”

Billing of Special Taxes

A special tax formula can result in a substantially heavier property tax burden being imposed upon properties within a community facilities district than elsewhere in a city or county, and this in turn can lead to problems in the collection of the special tax. In some community facilities districts (although not in the District), taxpayers have refused to pay the special tax and have commenced litigation to challenge the special tax, the community facilities district and bonds issued by the community facilities district.

Under provisions of the Act, the Special Taxes are to be billed to the properties within the District that were entered on the Assessment Roll of the County Assessor by January 1 of the previous Fiscal Year. Such Special Tax installments are due and payable, and bear the same penalties and interest for non-payment, as do regular property tax installments. These Special Tax installment payments cannot be made separately from property tax payments. Therefore, the unwillingness or inability of a property owner to pay regular property tax bills may also indicate an unwillingness or inability to make regular property tax payments and installment payments of Special Taxes in the future. See the caption “SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Covenant to Foreclose; Proceeds of Foreclosure Sales” for a discussion of the provisions that apply, and that procedures that the District is obligated to follow, in the event of delinquency in the payment of installments of Special Taxes.

Value-to-Lien Ratios

The estimated value-to-lien ratios set forth under the caption “THE DISTRICT—Estimated Value-to-Lien Ratio” are based on the assessed values of property in the District and the direct and overlapping debt that is currently allocable to such property, as of September 1, 2021. No assurance can be given that such value-to-lien ratios will be maintained over time. As discussed herein, many factors that are beyond the control of the City and the District could adversely affect the property values within the District. Neither the City nor the District has any control over the amount of additional indebtedness that may be issued by other public agencies, the payment of which, through the levy of a tax or an assessment, is on a parity with the Special Taxes. See the captions “—Parity Taxes and Special Assessments” and “THE DISTRICT—Estimated Direct and Overlapping Indebtedness.” A decrease in the property values in the District or an increase in the parity liens on property in the District, or both, could result in a reduction of the value-to-lien ratios of the property in District.

IRS Audit of Tax-Exempt Bond Issues

The Internal Revenue Service (the “IRS”) has initiated an expanded program for the auditing of tax-exempt bond issues, including both random and targeted audits. It is possible that the Bonds will be selected for audit by the IRS. It is also possible that the market value of the Bonds might be affected as a result of such an audit (or by an audit of similar bonds or securities).

FDIC/Federal Government Interests in Properties

General. The ability of the District to collect the Special Taxes and interest and penalties as specified by State law, and to foreclose the lien of delinquent Special Taxes, may be limited in certain respects with regard

to properties in which the FDIC, the Federal National Mortgage Association (“FNMA”), the IRS, the Drug Enforcement Administration or other similar federal governmental agencies has or obtains an interest.

Federal courts have held that, based on the supremacy clause of the United States Constitution, in the absence of Congressional intent to the contrary, a state or local agency cannot foreclose to collect delinquent taxes or assessments if foreclosure would impair the federal government’s interest. This means that, unless the United States Congress has otherwise provided, if a federal government entity owns a parcel of taxable property but does not pay taxes (including Special Taxes) and assessments levied on the parcel, the applicable state and local governments cannot foreclose on the parcel to collect the delinquent taxes and assessments.

Moreover, unless the United States Congress has otherwise provided, if the federal government has a mortgage interest in the parcel and the District wishes to foreclose on the parcel as a result of delinquent Special Taxes, the property cannot be sold at a foreclosure sale unless it can be sold for an amount that is sufficient to pay delinquent taxes and assessments on a parity with the Special Taxes and preserve the federal government’s mortgage interest. In *Rust v. Johnson*, 597 F.2d 174 (9th Cir. 1979), the United States Court of Appeal, Ninth Circuit (the “**Ninth Circuit**”), held that FNMA is a federal instrumentality for purposes of this doctrine rather than a private entity, and that, as a result, an exercise of state power over a mortgage interest that is held by FNMA constitutes an exercise of state power over property of the United States. For a discussion of risks that are associated with taxable parcels within the District becoming owned by the federal government, federal government entities or federal government sponsored entities, see the caption “—Insufficiency of Special Taxes.”

The District has not undertaken to determine whether any federal governmental entity currently has, or is likely to acquire, any interest (including a mortgage interest) in any of the parcels subject to the Special Taxes, and therefore expresses no view concerning the likelihood that the risks that are described above will materialize while the Bonds are outstanding.

FDIC. In the event that any financial institution making any loan which is secured by real property within the District is taken over by the FDIC, and prior thereto or thereafter the loan or loans go into default, resulting in ownership of the property by the FDIC, then the ability of the District to collect interest and penalties specified by State law and to foreclose the lien of delinquent unpaid Special Taxes may be limited. On June 4, 1991, the FDIC issued a Statement of Policy Regarding the Payment of State and Local Property Taxes (the “**1991 Policy Statement**”). The 1991 Policy Statement was revised and superseded by new Policy Statement effective January 9, 1997 (the “**Policy Statement**”). The Policy Statement provides that real property that is owned by the FDIC is subject to state and local real property taxes only if those taxes are assessed according to the property’s value, and that the FDIC is immune from real property taxes assessed on any basis other than property value. According to the Policy Statement, the FDIC will pay its property tax obligations when they become due and payable and will pay claims for delinquent property taxes as promptly as is consistent with sound business practice and the orderly administration of the institution’s affairs, unless abandonment of the FDIC’s interest in the property is appropriate. The FDIC will pay claims for interest on delinquent property taxes at the rate provided under state law, to the extent that the interest payment obligation is secured by a valid lien. The FDIC will not pay any amounts in the nature of fines or penalties and will not recognize liens for such amounts. If any property taxes (including interest) on FDIC-owned property are secured by a valid lien (in effect before the property became owned by the FDIC), the FDIC will pay those claims. The Policy Statement further provides that no property of the FDIC is subject to levy, attachment, garnishment, foreclosure or sale without the FDIC’s consent. In addition, the FDIC will not permit a lien or security interest that is held by the FDIC to be eliminated by foreclosure without the FDIC’s consent.

The Policy Statement states that the FDIC generally will not pay non-*ad valorem* taxes, including special assessments, on property in which it has a fee interest unless the amount of tax is fixed at the time that the FDIC acquires its fee interest in the property, nor will it recognize the validity of any lien to the extent that such lien purports to secure the payment of any such amounts. Special taxes imposed under the Act and a special tax formula that determines the special tax due each year are specifically identified in the Policy Statement as being

imposed each year and therefore covered by the FDIC's federal immunity. The Ninth Circuit issued a ruling on August 28, 2001 in which it determined that the FDIC, as a federal agency, is exempt from special taxes under the Act. With respect to property in the State that is owned by the FDIC on January 9, 1997 and that was owned by the Resolution Trust Company (the "RTC") on December 31, 1995, or that became the property of the FDIC through foreclosure of a security interest that was held by the RTC on that date, the FDIC will continue the RTC's prior practice of paying special taxes that are imposed pursuant to the Act if the taxes were imposed prior to the RTC's acquisition of an interest in the property. All other special taxes may be challenged by the FDIC.

The City and the District are unable to predict what effect the FDIC's application of the Policy Statement would have in the event of a delinquency on a parcel within the District in which the FDIC has an interest, although prohibiting the lien of the FDIC from being foreclosed at a judicial foreclosure sale would reduce or eliminate the number of persons who would purchase a parcel at a foreclosure sale. Owners of the Bonds should assume that the District will be unable to foreclose on any parcel owned by the FDIC. Such an outcome could cause a draw on the Reserve Account and perhaps, ultimately, a default in payment on the Bonds.

Bankruptcy and Foreclosure

The various legal opinions to be delivered concurrently with the delivery of the Bonds (including Bond Counsel's approving legal opinion) will be qualified, as to the enforceability of the various legal instruments, by bankruptcy, reorganization, insolvency, or other similar laws affecting the rights of creditors generally.

The payment of Special Taxes and the ability of the District to foreclose the lien of a delinquent Special Tax may be limited by bankruptcy, insolvency or other laws that generally affect creditors' rights or by the laws of the State that relate to judicial foreclosure.

Bankruptcy, insolvency and other laws that affect creditors' rights could adversely impact the interests of owners of the Bonds in at least two ways. First, the payment of property owners' taxes and the ability of the District to foreclose the lien of delinquent unpaid Special Taxes pursuant to its covenant to pursue judicial foreclosure proceedings may be limited by bankruptcy, insolvency or other laws (such as the Soldiers' and Sailors' Relief Act of 1940 discussed below) or by the laws of the State that relate to judicial foreclosure. See the caption "SOURCES OF PAYMENT FOR THE BONDS—Special Taxes—Covenant to Foreclose; Proceeds of Foreclosure Sales." In addition, the prosecution of a foreclosure could be delayed for many reasons, including crowded local court calendars or lengthy procedural delays.

Second, the United States Bankruptcy Code might prevent moneys that are deposited in the Special Tax Fund from being applied to pay interest on the Bonds and/or to redeem Bonds if bankruptcy proceedings were brought by or against a landowner in the District and if the court found that any of such landowners had an interest in such moneys within the meaning of Section 541(a)(1) of the United States Bankruptcy Code.

Although bankruptcy proceedings would not cause the Special Taxes to become extinguished, the amount and priority of any lien on property that secures the payment of delinquent Special Taxes could be reduced or modified if the value of the property were determined by the bankruptcy court to have become less than the amount of the lien, and the amount of the delinquent Special Taxes in excess of the reduced lien would then be treated as an unsecured claim by the court. Further, bankruptcy of a property owner could result in an unwillingness to pay Special Taxes, a stay or other delay in prosecuting Superior Court foreclosure proceedings. Such a delay would increase the likelihood of a delay or default in payment of the principal of, and interest on, the Bonds and the possibility of delinquent Special Tax installments not being paid in full.

On July 30, 1992, the Ninth Circuit issued its opinion in a bankruptcy case entitled *In re Glasply Marine Industries* ("Glasply"). In that case, the court held that *ad valorem* property taxes that were levied by Snohomish County in the State of Washington after the date that the property owner filed a petition for bankruptcy were not entitled to priority over a secured creditor with a prior lien on the property. Although the court upheld the priority of unpaid taxes imposed *before* the bankruptcy petition, unpaid taxes imposed after the filing of the bankruptcy

petition were declared to be “administrative expenses” of the bankruptcy estate, payable after all secured creditors. As a result, the secured creditor was able to foreclose on the property and retain all the proceeds of the sale except the amount of the pre-petition taxes.

The Bankruptcy Reform Act of 1994 included a provision which excepts from the United States Bankruptcy Code’s automatic stay provisions, “the creation of a statutory lien for an *ad valorem* property tax imposed by . . . a political subdivision of a state if such tax comes due after the filing of the petition [by a debtor in bankruptcy court].” This amendment effectively makes the *Glasply* holding inoperative as it relates to *ad valorem* real property taxes. However, it is possible that the original rationale of the *Glasply* ruling could still result in the treatment of post-petition special taxes as “administrative expenses,” rather than as tax liens secured by real property, at least during the pendency of bankruptcy proceedings.

According to the court’s ruling, as administrative expenses, post-petition taxes would be paid, assuming that the debtor had sufficient assets to do so. In certain circumstances, payment of such administrative expenses may be allowed to be deferred. Once the property is transferred out of the bankruptcy estate (through foreclosure or otherwise), it would at that time become subject to current *ad valorem* taxes.

The Act provides that the Special Taxes are secured by a continuing lien which is subject to the same lien priority in the case of delinquency as *ad valorem* taxes. No case law exists with respect to how a bankruptcy court would treat the lien for Special Taxes levied after the filing of a petition in bankruptcy. *Glasply* is controlling precedent on bankruptcy courts in the State. If the *Glasply* precedent was applied to the levy of the Special Taxes, the amount of Special Taxes received from parcels whose owners declare bankruptcy could be reduced.

Other laws generally affecting creditors’ rights or relating to judicial foreclosure may affect the ability to enforce payment of Special Taxes or the timing of enforcement of Special Taxes. For example, the Soldiers and Sailors Civil Relief Act of 1940 affords protections such as a stay in enforcement of the foreclosure covenant, a six-month period after termination of military service to redeem property sold to enforce the collection of a tax or assessment and a limitation on the interest rate on the delinquent tax or assessment to persons in military service if a court concludes that the ability to pay such taxes or assessments is materially affected by reason of such service.

No Acceleration Provision

The Bonds do not contain a provision that authorizes the acceleration of the Bonds in the event of a payment default or other default under the Bonds or the Indenture. See Appendix B under the caption “EVENTS OF DEFAULT—Remedies of Owners” for a description of remedies that are available to the Bond Owner if the District defaults under the Indenture.

Loss of Tax Exemption

As discussed under the caption “TAX EXEMPTION,” the interest on the Bonds could become includable in gross income for federal income tax purposes retroactive to the date of issuance of the Bonds as a result of a failure of the District to comply with certain provisions of the Internal Revenue Code of 1986, as amended, or certain legislative changes that occur subsequent to the issuance of the Bonds. Should such an event of taxability occur, the Bonds are not subject to early redemption and will remain outstanding to maturity or until redeemed under the redemption provisions of the Indenture.

Limitations on Remedies

Remedies that are available to the owners of the Bonds may be limited by a variety of factors and may be inadequate to assure the timely payment of principal of and interest on the Bonds or to preserve the tax-exempt status of the Bonds.

Bond Counsel has limited its opinion as to the enforceability of the Bonds and the Indenture to the extent that enforceability may be limited by bankruptcy, insolvency, reorganization, fraudulent conveyance or transfer, moratorium, or other similar laws affecting generally the enforcement of creditors' rights, by equitable principles and by the exercise of judicial discretion. The lack of availability of certain remedies or the limitation of remedies may entail risks of delay, limitation or modification of the rights of the owners of the Bonds.

Limited Secondary Market

There can be no guarantee that there will be a secondary market for the Bonds or, if a secondary market exists, that such Bonds can be sold for any particular price. Although the District has committed to provide certain financial and operating information on an annual basis, there can be no assurance that such information will be available to Owners of the Bonds on a timely basis. See the caption "CONTINUING DISCLOSURE." The failure to provide the required annual financial information does not give rise to monetary damages but merely an action for specific performance. Occasionally, because of general market conditions, lack of current information, or because of adverse history or economic prospects connected with a particular issue, secondary marketing practices in connection with a particular issue are suspended or terminated. Additionally, prices of issues for which a market is being made will depend upon then prevailing circumstances. Such prices could be substantially different from the original purchase price.

Proposition 218

An initiative measure, Proposition 218, which is commonly referred to as the "Right to Vote on Taxes Act" (the "**Initiative**") was approved by the voters of the State at the November 5, 1996 general election. The Initiative added Articles XIIC and XIID to the State Constitution. According to the "Title and Summary" of the Initiative prepared by the State Attorney General, the Initiative limits "the authority of local governments to impose taxes and property-related assessments, fees and charges." The Initiative could potentially impact the Special Taxes available to the District to pay the principal of and interest on the Bonds as described below.

Among other things, Section 3 of Article XIIC states that "... the initiative power shall not be prohibited or otherwise limited in matters of reducing or repealing any local tax, assessment, fee or charge." The Act provides for a procedure which includes notice, hearing, protest and voting requirements to alter the rate and method of apportionment of an existing special tax. However, the Act prohibits a legislative body from adopting any resolution to reduce the rate of any special tax or to terminate the levy of any special tax that is pledged to repay any debt that is incurred pursuant to the Act unless such legislative body determines that the reduction or termination of the special tax would not interfere with the timely retirement of that debt. On July 1, 1997, a bill was signed into law by the Governor of the State enacting Government Code Section 5854, which states that:

"Section 3 of Article XIIC of the California Constitution, as adopted at the November 5, 1996, general election, shall not be construed to mean that any owner or beneficial owner of a municipal security, purchased before or after that date, assumes the risk of, or in any way consents to, any action by initiative measure that constitutes an impairment of contractual rights protected by Section 10 of Article I of the United States Constitution."

Accordingly, although the matter is not free from doubt, it is likely that the Initiative has not conferred on the voters the power to repeal or reduce the Special Taxes if such reduction would interfere with the timely retirement of the Bonds. The provisions of the Initiative relating to the exercise of the initiative power have not been interpreted by the courts, and no assurance can be given as to the outcome of any such litigation.

It may be possible, however, for voters or the City Council, acting as the legislative body of the District, to reduce the Special Taxes in a manner that does not interfere with the timely repayment of the Bonds, but which does reduce the maximum amount of Special Taxes that may be levied in any year below the existing levels. Furthermore, no assurance can be given with respect to the future levy of the Special Taxes in amounts

greater than the amount necessary for the timely retirement of the Bonds. Therefore, no assurance can be given with respect to the levy of Special Taxes for Administrative Expenses.

It may be possible, however, for voters or the District or the City acting as the legislative body of the District to reduce the Special Taxes in a manner which does not interfere with the timely repayment of the Bonds, but which does reduce the maximum amount of Special Taxes that may be levied in any year below the existing levels. Furthermore, no assurance can be given with respect to the future levy of the Special Taxes in amounts greater than the amount necessary for the timely retirement of the Bonds. Therefore, no assurance can be given with respect to the levy of Special Taxes for Administrative Expenses. Nevertheless, the District has covenanted that it will not initiate proceedings under the Act to reduce the Maximum Special Tax rates on parcels of Developed Property within the District below the amounts which are necessary to provide the Special Tax Revenues in an amount equal to the estimated Administrative Expense on the then current Fiscal Year plus an amount equal to one hundred ten percent (110%) of Maximum Annual Debt Service on the Outstanding Bonds. The District also has covenanted that, in the event an initiative is adopted which purports to reduce or otherwise alter the Maximum Rates, it will commence and pursue legal action in seeking to preserve its ability to comply with the foregoing covenant. However, no assurance can be given as to the enforceability of the foregoing covenants.

The interpretation and application of Articles XIIC and XIID will ultimately be determined by the courts with respect to a number of the matters that are discussed above, and it is not possible at this time to predict with certainty the outcome of such determination or the timeliness of any remedy afforded by the courts. See the caption “—Limitations on Remedies.”

Ballot Initiatives

Article XIIC was adopted pursuant to a measure that qualified for the ballot pursuant to the State’s Constitutional initiative process, and the State Legislature has in the past enacted legislation that has altered the spending limitation or established minimum funding provisions for particular activities. On March 6, 1995, in the case of *Rossi v. Brown*, the State Supreme Court held that an initiative can repeal a tax ordinance and prohibit the imposition of further such taxes and that the exemption from the referendum requirements does not apply to an initiative. From time to time, other initiative measures could be adopted by State voters or legislation enacted by the State Legislature. The adoption of any such initiative or enactment of legislation might place limitations on the ability of the State, the County or local districts to increase revenues or appropriations or on the ability of a property owner to complete the development of property within the District.

CONTINUING DISCLOSURE

Pursuant to a Continuing Disclosure Agreement, dated as of December 1, 2021 (the “**District Disclosure Agreement**”), the City, for and on behalf of the District, has agreed to provide, or to cause to be provided, to the Municipal Securities Rulemaking Board’s Electronic Municipal Market Access (“EMMA”) system certain annual financial information and operating data concerning the District and notice of certain enumerated events (the “**District Annual Report**”). The District Annual Report is to be filed not later than April 1 of each year, beginning April 1, 2022.

Within the last five years, the City has not failed to file in a timely manner certain information required by the District’s existing continuing disclosure undertakings.

The proposed form of the District Disclosure Agreement is set forth in Appendix C.

LEGAL MATTERS

The validity of the Bonds and certain other legal matters are subject to the approving opinion of Stradling Yocca Carlson & Rauth, a Professional Corporation, Newport Beach, California, Bond Counsel. The

form of Bond Counsel's opinion with respect to the Bonds is set forth in Appendix D. In addition, certain legal matters will be passed upon for the City and the District by the City Attorney and for the District by Nixon Peabody LLP, as disclosure counsel ("**Disclosure Counsel**"). Certain other legal matters will be passed on for the District by the City Attorney, for the Underwriter by Kutak Rock LLP, and for the Trustee by its counsel.

TAX EXEMPTION

In the opinion of Bond Counsel, under existing statutes, regulations, rulings and judicial decisions, and assuming the accuracy of certain representations and compliance with certain covenants and requirements described herein, interest (and original issue discount) on the Bonds is excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals. In the further opinion of Bond Counsel, interest (and original issue discount) on the Bonds is exempt from State of California personal income tax.

The difference between the issue price of a Bond (the first price at which a substantial amount of the Bonds of the same maturity is to be sold to the public) and the stated redemption price at maturity with respect to such Bond constitutes original issue discount. Original issue discount accrues under a constant yield method, and original issue discount will accrue to a Bond Owner before receipt of cash attributable to such excludable income. The amount of original issue discount deemed received by the Bond Owner will increase the Bond Owner's basis in the Bond. In the opinion of Bond Counsel, the amount of original issue discount that accrues to the owner of a Bond is excluded from the gross income of such owner for federal income tax purposes, is not an item of tax preference for purposes of the federal alternative minimum tax imposed on individuals, and is exempt from State of California personal income tax.

Bond Counsel's opinion as to the exclusion from gross income of interest (and original issue discount) on the Bonds is based upon certain representations of fact and certifications made by the District and others and is subject to the condition that the District complies with all requirements of the Internal Revenue Code of 1986, as amended (the "Code"), that must be satisfied subsequent to the issuance of the Bonds to assure that interest (and original issue discount) on the Bonds will not become includable in gross income for federal income tax purposes. Failure to comply with such requirements of the Code might cause the interest (and original issue discount) on the Bonds to be included in gross income for federal income tax purposes retroactive to the date of issuance of the Bonds. The District will covenant to comply with all such requirements.

The amount by which a Bond Owner's original basis for determining loss on sale or exchange of a Bond (generally, the purchase price) exceeds the amount payable on maturity (or on an earlier call date) constitutes amortizable Bond premium, which must be amortized under Section 171 of the Code; such amortizable Bond premium reduces the Bond Owner's basis in the applicable Bond (and the amount of tax exempt interest received), and is not deductible for federal income tax purposes. The basis reduction as a result of the amortization of Bond premium may result in a Bond Owner realizing a taxable gain when a Bond is sold by the Owner for an amount equal to or less (under certain circumstances) than the original cost of the Bond to the Owner. Purchasers of the Bonds should consult their own tax advisors as to the treatment, computation and collateral consequences of amortizable Bond premium.

The Internal Revenue Service (the "IRS") has initiated an expanded program for the auditing of tax exempt bond issues, including both random and targeted audits. It is possible that the Bonds will be selected for audit by the IRS. It is also possible that the market value of the Bonds might be affected as a result of such an audit of the Bonds (or by an audit of other similar bonds). It is also possible that the market value of the Bonds might be affected as a result of such an audit of the Bonds (or by an audit of similar bonds). No assurance can be given that, in the course of an audit, as a result of an audit, or otherwise, Congress or the IRS might not change the Code (or interpretation thereof) subsequent to the issuance of the Bonds to the extent that it adversely affects the exclusion from gross income of interest on the Bonds or their market value.

Bond Counsel's opinions may be affected by actions taken (or not taken) or events occurring (or not occurring) after the delivery date of the Bonds. Bond Counsel has not undertaken to determine, or to inform any person, whether any such actions or events are taken or do occur. The Indenture and the Tax Certificate relating to the Bonds permit certain actions to be taken or to be omitted if a favorable opinion of Bond Counsel is provided with respect thereto. Bond Counsel expresses no opinion as to the effect on the exclusion from gross income of interest (and original issue discount) on the Bonds for federal income tax purposes with respect to any Bond if any such action is taken or omitted based upon the advice of counsel other than Stradling Yocca Carlson & Rauth, a Professional Corporation.

SUBSEQUENT TO THE ISSUANCE OF THE BONDS THERE MIGHT BE FEDERAL, STATE, OR LOCAL STATUTORY CHANGES (OR JUDICIAL OR REGULATORY CHANGES TO OR INTERPRETATIONS OF FEDERAL, STATE, OR LOCAL LAW) THAT AFFECT THE FEDERAL, STATE, OR LOCAL TAX TREATMENT OF THE BONDS INCLUDING THE IMPOSITION OF ADDITIONAL FEDERAL INCOME OR STATE TAXES BEING IMPOSED ON OWNERS OF TAX EXEMPT STATE OR LOCAL OBLIGATIONS, SUCH AS THE BONDS. THESE CHANGES COULD ADVERSELY AFFECT THE MARKET VALUE OR LIQUIDITY OF THE BONDS. NO ASSURANCE CAN BE GIVEN THAT SUBSEQUENT TO THE ISSUANCE OF THE BONDS STATUTORY CHANGES WILL NOT BE INTRODUCED OR ENACTED OR JUDICIAL OR REGULATORY INTERPRETATIONS WILL NOT OCCUR HAVING THE EFFECTS DESCRIBED ABOVE. BEFORE PURCHASING ANY OF THE BONDS, ALL POTENTIAL PURCHASERS SHOULD CONSULT THEIR TAX ADVISORS REGARDING POSSIBLE STATUTORY CHANGES OR JUDICIAL OR REGULATORY CHANGES OR INTERPRETATIONS, AND THEIR COLLATERAL TAX CONSEQUENCES RELATING TO THE BONDS.

Although Bond Counsel has rendered an opinion that interest (and original issue discount) on the Bonds is excluded from gross income for federal income tax purposes provided that the District complies with certain requirements of the Code, the ownership of the Bonds and the accrual or receipt of interest (and original issue discount) with respect to the Bonds may otherwise affect the tax liability of certain persons. Bond Counsel expresses no opinion regarding any such tax consequences. Accordingly, before purchasing any of the Bonds, all potential purchasers should consult their tax advisors with respect to collateral tax consequences relating to the Bonds.

A copy of the proposed form of opinion of Bond Counsel is attached hereto as Appendix D.

NO LITIGATION

At the time of delivery of and payment for the Bonds, the District will certify that there is no action, suit, proceeding, inquiry or investigation, at law or in equity, before or by any court, regulatory agency, public board or body, pending or, to the knowledge of the District, threatened against the District affecting the existence of the District or the titles of its directors or officers to their respective offices or seeking to restrain or to enjoin the sale or delivery of the Bonds, the application of the proceeds thereof in accordance with the Indenture, or in any way contesting or affecting the validity or enforceability of the Bonds, the Indenture, or any action of the District contemplated by any of said documents, or in any way contesting the completeness or accuracy of this Official Statement or any amendment or supplement thereto, or contesting the powers of the District or its authority with respect to the Bonds or any action of the District contemplated by any of said documents, nor to the knowledge of the District, is there any basis therefor.

NO RATING

The Bonds have not been rated by any credit rating agency.

UNDERWRITING

The Bonds are being purchased by Stifel, Nicolaus & Company, Incorporated (the “**Underwriter**”). The Underwriter has agreed to purchase the Bonds at a price of \$_____ (reflecting the \$_____ aggregate principal amount of the Bonds, less Underwriter’s discount of \$_____ and plus a net original issue premium of \$_____). The purchase agreement relating to the Bonds provides that the Underwriter will purchase all of the Bonds if any are purchased. The obligation to make such purchase is subject to certain terms and conditions set forth in such purchase agreement, the approval of certain legal matters by counsel and certain other conditions.

The initial offering prices that are stated on the inside front cover page of this Official Statement may be changed from time to time by the Underwriter. The Underwriter may offer and sell the Bonds to certain dealers (including dealers depositing Bonds into investment trusts), dealer banks, banks acting as agent and others at prices lower than said public offering prices.

MUNICIPAL ADVISOR

The District has retained Fieldman, Rolapp & Associates, Inc., Irvine, California, as municipal advisor (the “**Municipal Advisor**”) in connection with the sale of the Bonds. The Municipal Advisor is not obligated to undertake, and has not undertaken to make, an independent verification or to assume any responsibility for the accuracy, completeness or fairness of the information contained in this Official Statement.

The Municipal Advisor is an independent advisory firm and is not engaged in the business of underwriting, trading or distributing municipal or other public securities.

FINANCIAL INTERESTS

The fees being paid to the Municipal Advisor, the Underwriter, Underwriter’s Counsel, Bond Counsel and Disclosure Counsel are contingent upon the issuance and delivery of the Bonds. From time to time, Bond Counsel and Disclosure Counsel represent the Underwriter on matters unrelated to the Bonds.

PENDING LEGISLATION

The District is not aware of any significant pending legislation that would have material adverse consequences on the Bonds or the ability of the District to pay the principal of and interest on the Bonds when due.

[Remainder of page intentionally left blank.]

ADDITIONAL INFORMATION

The purpose of this Official Statement is to supply information to prospective buyers of the Bonds. Quotations and summaries and explanations of the Bonds and documents contained in this Official Statement do not purport to be complete, and reference is made to such documents for full and complete statements and their provisions.

This Official Statement is submitted only in connection with the sale of the Bonds by the District. This Official Statement does not constitute a contract with the purchasers of the Bonds.

The execution and delivery of this Official Statement by the City Manager of the City has been duly authorized by the City Council, acting in its capacity as the legislative body of the District.

SUMMARY OF BOND INDENTURE

The following is a summary of certain provisions of the Indenture that are not described elsewhere. This summary does not purport to be comprehensive and reference should be made to the Indenture for a full and complete statement of the provisions thereof.

[To be provided by Bond Counsel.]

APPENDIX C

FORM OF CONTINUING DISCLOSURE AGREEMENT

This Continuing Disclosure Agreement, dated as of December 1, 2021 (the “**Disclosure Agreement**”) is executed and delivered by Community Facilities District No. 5 of the City of Moreno Valley (the “**Issuer**”) and Willdan Financial Services as dissemination agent (the “**Dissemination Agent**”), in connection with the issuance of the Issuer’s \$ _____ Special Tax Refunding Bonds, Series 2021 (the “**Bonds**”). The Bonds are being issued pursuant to a Bond Indenture, dated as of December 1, 2021 (the “**Bond Indenture**”), by and between the Issuer and the Wilmington Trust, National Association. The Issuer and the Dissemination Agent covenant as follows:

SECTION 1. Purpose of the Disclosure Agreement. This Disclosure Agreement is being executed and delivered by the Issuer and the Dissemination Agent, for the benefit of the Owners and Beneficial Owners of the Bonds and in order to assist the Underwriter in complying with the Rule.

SECTION 2. Definitions. In addition to the definitions set forth in the Bond Indenture, which apply to any capitalized term used in this Disclosure Agreement unless otherwise defined in this Section, the following capitalized terms shall have the following meanings:

“**Annual Report**” shall mean any report provided by the Issuer pursuant to, and as described in, Sections 3 and 4 of this Disclosure Agreement.

“**Beneficial Owner**” shall mean any person which: (a) has the power, directly or indirectly, to vote or consent with respect to, or to dispose of ownership of, any Bonds (including persons holding Bonds through nominees, depositories or other intermediaries); or (b) is treated as the owner of any Bonds for federal income tax purposes.

“**City**” shall mean the City of Moreno Valley, California.

“**Disclosure Representative**” shall mean the City Manager of the City, the Chief Financial Officer of the City, the Special Districts Division Manager of the City, or the designee thereof, or such other officer or employee as the Issuer shall designate in writing to the Dissemination Agent from time to time.

“**Dissemination Agent**” shall mean, initially, Willdan Financial Services, or any successor Dissemination Agent designated in writing by the Issuer and which has filed with the then current Dissemination Agent a written acceptance of such designation.

“**Fiscal Year**” shall mean the period from July 1 to June 30, or any other period selected by the Issuer as its fiscal year.

“**Listed Events**” shall mean any of the events listed in Section 5(a) and (b) of this Disclosure Agreement.

“**MSRB**” shall mean the Municipal Securities Rulemaking Board, which has been designated by the Securities and Exchange Commission as the sole repository of disclosure information for purposes of the Rule, or any other repository of disclosure information that may be designated by the Securities and Exchange Commission as such for purposes of the Rule in the future.

“**Official Statement**” shall mean the Official Statement relating to the Bonds, dated _____, 2021.

“**Rule**” shall mean Rule 15c2-12 adopted by the Securities and Exchange Commission under the Securities Exchange Act of 1934, as the same may be amended from time to time.

“State” shall mean the State of California.

“Underwriter” shall mean the original underwriters of the Bonds that are required to comply with the Rule in connection with the offering of the Bonds.

SECTION 3. Provision of Annual Reports.

(a) The Issuer shall, or shall cause the Dissemination Agent by written direction to such Dissemination Agent to, upon delivery of the Annual Report to the Dissemination Agent (if other than the Issuer), not later than April 1 of each year, commencing April 1, 2022, provide to the MSRB an Annual Report that is consistent with the requirements of Section 4 of this Disclosure Agreement (provided that the first Annual Report may consist solely of the Official Statement). The Annual Report may be submitted as a single document or as separate documents comprising a package, and may cross-reference other information as provided in Section 4 of this Disclosure Agreement; provided that the audited financial statements of the Issuer may be submitted separately from the balance of the Annual Report and later than the date required above for the filing of the Annual Report if they are not available by that date. If the Issuer’s Fiscal Year changes, it shall give notice of such change to the Dissemination Agent and the Issuer shall, or shall cause the Dissemination Agent, by written direction to such Dissemination Agent, to give notice of such change in the same manner as for a Listed Event under Section 5(a).

(b) Not later than fifteen (15) business days prior to each April 1, the Issuer shall provide the Annual Report to the Dissemination Agent (if other than the Issuer). The Issuer shall provide a written certification with each Annual Report furnished to the Dissemination Agent to the effect that such Annual Report constitutes the Annual Report required to be furnished by it hereunder. The Dissemination Agent may conclusively rely upon such certification of the Issuer and shall have no duty or obligation to review such Annual Report. If: (i) the Issuer is acting as Dissemination Agent and an Annual Report has not been provided to the MSRB by the date required in subsection (a); or (ii) if the Dissemination Agent is other than the Issuer and is unable to verify that an Annual Report has been provided to the MSRB by the date required in subsection (a), then the Issuer or the Dissemination Agent (if other than the Issuer), as applicable, shall send a notice to the MSRB in a timely manner in substantially the form attached as Exhibit A.

(c) The Dissemination Agent shall:

(i) determine each year prior to April 1 the then-applicable rules and electronic format prescribed by the MSRB for the filing of annual continuing disclosure reports; and

(ii) if the Dissemination Agent is other than the Issuer, promptly after receipt of the Annual Report, file a report with the Issuer certifying that the Annual Report has been filed with the MSRB pursuant to this Disclosure Agreement, and stating, to the extent that it can confirm such filing of the Annual Report, the date that it was filed.

SECTION 4. Content of Annual Reports. The Issuer’s Annual Report shall contain or include by reference the following:

(a) The Issuer does not currently prepare audited financial statements and it is not anticipated that the Issuer will prepare audited financial statements in the future. If the Issuer does prepare audited financial statements in the future, the Issuer’s Annual Report shall contain or incorporate by reference such audited financial statements, if any, for the most recently completed Fiscal Year, prepared in accordance with generally accepted accounting principles as promulgated to apply to governmental entities from time to time by the Governmental Accounting Standards Board. If audited financial statements of the Issuer are to be prepared in the future, but are not available at the time required for filing as set forth in Section 3(a), unaudited financial statements of the Issuer shall be submitted with the Annual Report and the audited financial statements shall be submitted once available. The financial statements of the City shall not be deemed to be the financial

statements of the Issuer, unless such audited financial statements contain specific information as to the Issuer, its revenues, expenses and account balances. If the City's audited financial statements contain specific information as to the Issuer, its revenues, expenses and account balances, the Issuer's Annual Report shall contain or incorporate by reference the City's audited financial statements. If the City's audited financial statements contain specific information as to the Issuer, its revenues, expenses and account balances, but are not available at the time required for filing, unaudited financial statements of the City that contain specific information as to the Issuer, its revenues, expenses and account balances shall be submitted with the Annual Report and the City's audited financial statements shall be submitted once available.

(b) To the extent not contained in the audited financial statements filed pursuant to subsection (a):

(i) the principal amount of Bonds outstanding as of the September 2 preceding the filing of the Annual Report;

(ii) the balance in each fund under the Bond Indenture as of the September 2 preceding the filing of the Annual Report;

(iii) any changes to the Rate and Method approved or submitted to the qualified electors for approval prior to the filing of the Annual Report and a description of any parcels for which the Special Taxes have been prepaid, including the amount prepaid, since the date of the last Annual Report;

(iv) an update in substantially the form of Table 1 in the Official Statement based on development status as of January 1 of the Fiscal Year prior to the Fiscal Year in which the Annual Report is disseminated;

(v) an update in substantially the form of Table 2 in the Official Statement;

(vi) a table setting forth for the five most recent fiscal years in which Special Taxes were levied, the amount of Special Taxes levied in each fiscal year and the percentage delinquent as of June 30 of such fiscal year and as of the date of the Annual Report, and a description of the status of any foreclosure actions being pursued by the Issuer with respect to delinquent Special Taxes;

(vii) a statement or table identifying any owner of property within the Issuer that is responsible for more than 5% of the Special Tax levy and delinquent in the payment of Special Taxes; and

(viii) any information not already included under (i) through (vii) above that the Issuer is required to file in its annual report to the California Debt and Investment Advisory Commission pursuant to the provisions of the Mello-Roos Community Facilities Act of 1982, as amended.

(ix) In addition to any of the information expressly required to be provided under paragraphs (i) through (viii) of this Section, the Issuer shall provide such further information, if any, as may be necessary to make the specifically required statements, in the light of the circumstances under which they are made, not misleading.

Any or all of the items listed above may be included by specific reference to other documents, including official statements for debt issues of the Issuer or related public entities, which have been submitted to the MSRB or the Securities and Exchange Commission. If the document included by reference is a final official statement, it must be available from the MSRB. The Issuer shall clearly identify each such other document so included by reference.

SECTION 5. Reporting of Significant Events.

(a) Pursuant to the provisions of this Section 5, the Issuer shall give, or cause to be given, notice of the occurrence of any of the following events with respect to the Bonds in a timely manner not more than ten (10) Business Days after the event:

- (i) Principal and interest payment delinquencies.
- (ii) Unscheduled draws on debt service reserves reflecting financial difficulties.
- (iii) Unscheduled draws on credit enhancements reflecting financial difficulties.
- (iv) Substitution of credit or liquidity providers, or their failure to perform.
- (v) Adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability or Notices of Proposed Issue (IRS Form 5701 TEB).
- (vi) Tender offers.
- (vii) Defeasances.
- (viii) Rating changes.
- (ix) Bankruptcy, insolvency, receivership or similar proceedings.

Note: For the purposes of the event identified in subparagraph (ix), the event is considered to occur when any of the following occur: the appointment of a receiver, fiscal agent or similar officer for an obligated person in a proceeding under the U.S. Bankruptcy Code or in any other proceeding under state or federal law in which a court or governmental authority has assumed jurisdiction over substantially all of the assets or business of the obligated person, or if such jurisdiction has been assumed by leaving the existing governmental body and officials or officers in possession but subject to the supervision and orders of a court or governmental authority, or the entry of an order confirming a plan of reorganization, arrangement or liquidation by a court or governmental authority having supervision or jurisdiction over substantially all of the assets or business of the obligated person.

(b) Pursuant to the provisions of this Section 5, the Issuer shall give, or cause to be given, notice of the occurrence of any of the following events with respect to the Bonds, if material, in a timely manner not more than ten (10) Business Days after occurrence:

- (i) Unless described in Section 5(a)(v), other notices or determinations by the Internal Revenue Service with respect to the tax status of the Bonds or other events affecting the tax status of the Bonds.
- (ii) Modifications to the rights of Bondholders.
- (iii) Optional, unscheduled or contingent Bond calls.
- (iv) Release, substitution or sale of property securing repayment of the Bonds.
- (v) Non-payment related defaults.
- (vi) The consummation of a merger, consolidation or acquisition involving the Issuer or the sale of all or substantially all of the assets of the Issuer, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms.

(vii) Appointment of a successor or additional trustee or the change of the name of a trustee.

(viii) Incurrence of a Financial Obligation of the District, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a Financial Obligation of the District, any of which affect security holders.

(ix) Default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a Financial Obligation of the District, any of which reflect financial difficulties.

(c) If the Issuer determines that knowledge of the occurrence of a Listed Event under subsection (b) would be material under applicable federal securities laws, and if the Dissemination Agent is other than the Issuer, the Issuer shall promptly notify the Dissemination Agent in writing. Such notice shall instruct the Dissemination Agent to file a notice of such occurrence with the MSRB in an electronic format as prescribed by the MSRB in a timely manner not more than ten (10) Business Days after the event. Notwithstanding the foregoing, notice of Listed Events described in subsections (a)(vii) and (b)(iii) need not be given under this subsection any earlier than the notice (if any) of the underlying event is given to Owners of affected Bonds pursuant to the Bond Indenture. In each case of the Listed Event, the Dissemination Agent shall not be obligated to file a notice as required in this subsection (c) prior to the occurrence of such Listed Event.

(d) If the Issuer determines that a Listed Event under subsection (b) would not be material under applicable federal securities laws and if the Dissemination Agent is other than the Issuer, the Issuer shall so notify the Dissemination Agent in writing and instruct the Dissemination Agent not to report the occurrence.

(e) The Issuer hereby agrees that the undertaking set forth in this Disclosure Agreement is the responsibility of the Issuer and, if the Dissemination Agent is other than the Issuer, the Dissemination Agent shall not be responsible for determining whether the Issuer's instructions to the Dissemination Agent under this Section 5 comply with the requirements of the Rule.

SECTION 6. Termination of Reporting Obligation. The obligations of the Issuer and the Dissemination Agent under this Disclosure Agreement shall terminate upon the legal defeasance, prior redemption or payment in full of all of the Bonds. If such termination occurs prior to the final maturity of the Bonds, the Issuer shall give notice of such termination in the same manner as for a Listed Event under Section 5(a).

SECTION 7. Dissemination Agent. The Issuer may, from time to time, appoint or engage a Dissemination Agent to assist it in carrying out its obligations under this Disclosure Agreement, and may discharge any such Dissemination Agent, with or without appointing a successor Dissemination Agent. The Dissemination Agent shall not be responsible in any manner for the form or content of any notice or report prepared by the Issuer pursuant to this Disclosure Agreement. The Dissemination Agent may resign by providing thirty days' written notice to the Issuer and the Trustee. The Dissemination Agent shall not be responsible for the content of any report or notice prepared by the Issuer and shall have no duty to review any information provided to it by the Issuer. The Dissemination Agent shall have no duty to prepare any information report, nor shall the Dissemination Agent be responsible for filing any report not provided to it by the Issuer in a timely manner and in a form suitable for filing.

SECTION 8. Amendment; Waiver. Notwithstanding any other provision of this Disclosure Agreement, the Issuer may amend this Disclosure Agreement, and any provision of this Disclosure Agreement may be waived, provided that, in the opinion of nationally recognized bond counsel, such amendment or waiver is permitted by the Rule, and provided further that the Dissemination Agent shall have first consented to any amendment that modifies or increases its duties or obligations hereunder. In the event of any amendment or waiver of a provision of this Disclosure Agreement, the Issuer shall describe such amendment in the next Annual

Report, and shall include, as applicable, a narrative explanation of the reason for the amendment or waiver and its impact on the type (or in the case of a change of accounting principles, on the presentation) of financial information or operating data being presented by the Issuer. In addition, if the amendment relates to the accounting principles to be followed in preparing financial statements: (a) notice of such change shall be given in the same manner as for a Listed Event under Section 5(a); and (b) the Annual Report for the year in which the change is made shall present a comparison (in narrative form and also, if feasible, in quantitative form) between the financial statements as prepared on the basis of the new accounting principles and those prepared on the basis of the former accounting principles.

SECTION 9. Additional Information. Nothing in this Disclosure Agreement shall be deemed to prevent the Issuer from disseminating any other information, using the means of dissemination set forth in this Disclosure Agreement or any other means of communication, or including any other information in any Annual Report or notice of occurrence of a Listed Event, in addition to that which is required by this Disclosure Agreement. If the Issuer chooses to include any information in any Annual Report or notice of occurrence of a Listed Event in addition to that which is specifically required by this Disclosure Agreement, the Issuer shall have no obligation under this Disclosure Agreement to update such information or to include it in any future Annual Report or notice of occurrence of a Listed Event.

SECTION 10. Default. In the event of a failure by the Issuer or the Dissemination Agent to comply with any provision of this Disclosure Agreement, any Owner or Beneficial Owner of the Bonds may take such actions as may be necessary and appropriate, including seeking mandate or specific performance by court order, to cause the Issuer to comply with its obligations under this Disclosure Agreement. A default under this Disclosure Agreement shall not be deemed an Event of Default under the Bond Indenture, and the sole remedy under this Disclosure Agreement in the event of any failure of the Issuer or the Dissemination Agent to comply with this Disclosure Agreement shall be an action to compel performance.

No Owner or Beneficial Owner may institute such action, suit or proceeding to compel performance unless they shall have first delivered to the Issuer satisfactory written evidence of their status as such, and a written notice of and request to cure such failure, and the Issuer shall have refused to comply therewith within a reasonable time.

SECTION 11. Duties, Immunities and Liabilities of Dissemination Agent. The Dissemination Agent shall have only such duties as are specifically set forth in this Disclosure Agreement, and the Issuer agrees, to the extent permitted by law, to indemnify and save the Dissemination Agent, its officers, directors, employees and agents, harmless against any loss, expense and liabilities which it may incur arising out of or in the exercise or performance of its powers and duties hereunder, including the costs and expenses (including attorney's fees) of defending against any claim of liability, but excluding liabilities due to the Dissemination Agent's negligence or willful misconduct. The Dissemination Agent shall be paid compensation by the Issuer for its services provided hereunder in accordance with its schedule of fees as amended from time to time and all expenses, legal fees and advances made or incurred by the Dissemination Agent in the performance of its duties hereunder. In performing its duties hereunder, the Dissemination Agent shall not be deemed to be acting in any fiduciary capacity for the Issuer, the Owners, or any other party. The Dissemination Agent shall be entitled to the protections and limitations afforded to the Trustee under the Indenture. The obligations of the Issuer under this Section shall survive resignation or removal of the Dissemination Agent and payment of the Bonds.

SECTION 12. Notices. Any notices or communications to or among any of the parties to this Disclosure Agreement may be given to the Dissemination Agent (if other than the Issuer) and to the Issuer as follows:

Disclosure Representative: City Manager
City of Moreno Valley
14177 Fredrick Street
P.O. Box 88005
Moreno Valley, CA 92552-0805

Dissemination Agent: Willdan Financial Services
27368 Via Industria, Suite 200
Temecula, CA 92590

SECTION 13. Beneficiaries. This Disclosure Agreement inures solely to the benefit of the Issuer, the Dissemination Agent, the Underwriter and the Owners and Beneficial Owners from time to time of the Bonds, and shall create no rights in any other person or entity.

SECTION 14. Signature. This Disclosure Agreement has been executed by the undersigned on the date hereof, and such signature binds the Issuer to the undertaking herein provided.

APPENDIX D

FORM OF OPINION OF BOND COUNSEL

Upon issuance of the Bonds, Stradling Yocca Carlson & Rauth, a Professional Corporation, Bond Counsel, proposes to render its final approving opinions with respect to the Bonds in substantially the following form:

December __, 2021

Community Facilities District No. 5 of the City of Moreno Valley

Re: \$_____ Community Facilities District No. 5 of the City of Moreno Valley Special Tax Refunding Bonds, Series 2021

Ladies and Gentlemen:

We have examined the Constitution and the laws of the State of California (the "State"), a certified record of the proceedings of the City of Moreno Valley (the "City") taken in connection with the formation Community Facilities District No. 5 of the City of Moreno Valley (the "District") and the authorization and issuance of the District's Special Tax Refunding Bonds, Series 2021 in the aggregate principal amount of \$_____ (the "Bonds") and such other information and documents as we consider necessary to render this opinion. In rendering this opinion, we have relied upon certain representations of fact and certifications made by the City, the District, the initial purchasers of the Bonds and others. We have not undertaken to verify through independent investigation the accuracy of the representations and certifications relied upon by us.

The Bonds have been issued pursuant to the Mello-Roos Community Facilities Act of 1982, as amended (comprising Chapter 2.5 of Part 1 of Division 2 of Title 5 of the Government Code of the State of California), and a Bond Indenture dated as of December 1, 2021 (the "Indenture"), by and between the District and Wilmington Trust, National Association, as trustee (the "Trustee"). All capitalized terms not defined herein have the meanings set forth in the Indenture.

The Bonds are dated their date of delivery and mature on the dates and in the amounts set forth in the Indenture. The Bonds bear interest payable semiannually on March 1, 2022 and each March 1 and September 1 thereafter, at the rates per annum set forth in the Indenture. The Bonds are registered Bonds in the form set forth in the Indenture, redeemable in the amounts, at the times and in the manner provided for in the Indenture.

Based upon our examination of the foregoing, and in reliance thereon and on all matters of fact as we deem relevant under the circumstances, and upon consideration of applicable laws, we are of the opinion that:

(1) The Bonds have been duly and validly authorized by the District and are legal, valid and binding limited obligations of the District, enforceable in accordance with their terms and the terms of the Indenture. The Bonds are limited obligations of the District but are not a debt of the City, the State or any other political subdivision thereof within the meaning of any constitutional or statutory limitation, and, except for the Special Taxes, neither the faith and credit nor the taxing power of the City, the State or any of its political subdivisions is pledged for the payment thereof.

(2) The execution and delivery of the Indenture has been duly authorized by the District, and the Indenture is valid and binding upon the District and is enforceable in accordance with its terms, provided, however, that we express no opinion as to the enforceability of the covenant of the District contained in the

Indenture to levy Special Taxes for the payment of Administrative Expenses or as to any indemnification, penalty, choice of law, choice of forum or waiver provisions contained therein.

(3) The Indenture creates a valid pledge of that which the Indenture purports to pledge, subject to the provisions of the Indenture.

(4) Under existing statutes, regulations, rulings and judicial decisions, interest (and original issue discount) on the Bonds is excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals and corporations; however, it should be noted that, with respect to corporations, such interest (and original issue discount) may be included as an adjustment in the calculation of alternative minimum taxable income, which may affect the alternative minimum tax liability of corporations.

(5) Interest (and original issue discount) on the Bonds is exempt from State personal income tax.

(6) The difference between the issue price of a Bond (the first price at which a substantial amount of the Bonds of a maturity is to be sold to the public) and the stated redemption price at maturity with respect to such Bond constitutes original issue discount. Original issue discount accrues under a constant yield method, and original issue discount will accrue to a Bond owner before receipt of cash attributable to such excludable income. The amount of original issue discount deemed received by a Bond owner will increase the Bond owner's basis in the applicable Bond. The amount of original issue discount that accrues to the Bond owner is excluded from the gross income of such owner for federal income tax purposes, is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals or corporations and is exempt from State personal income tax.

(7) The amount by which a Bond owner's original basis for determining loss on sale or exchange in the applicable Bond (generally the purchase price) exceeds the amount payable on maturity (or on an earlier call date) constitutes amortizable Bond premium which must be amortized under Section 171 of the Internal Revenue Code of 1986, as amended (the "Code"); such amortizable Bond premium reduces the Bond owner's basis in the applicable Bond (and the amount of tax-exempt interest received), and is not deductible for federal income tax purposes. The basis reduction as a result of the amortization of Bond premium may result in a Bond owner realizing a taxable gain when a Bond is sold by the owner for an amount equal to or less (under certain circumstances) than the original cost of the Bond to the owner. Purchasers of the Bonds should consult their own tax advisors as to the treatment, computation and collateral consequences of amortizable bond premium.

The opinions expressed in paragraphs (4) and (6) above as to the exclusion from gross income for federal income tax purposes of interest (and original issue discount) on the Bonds are based upon certain representations of fact and certifications made by the District and are subject to the condition that the District comply with certain covenants and all requirements of the Code that must be satisfied subsequent to the issuance of the Bonds to assure that such interest (and original issue discount) will not become includable in gross income for federal income tax purposes. Failure to comply with such covenants and requirements of the Code may cause interest (and original issue discount) on the Bonds to be included in gross income for federal income tax purposes retroactive to the date of issuance of the Bonds. The District has covenanted to comply with all such requirements. Except as set forth in paragraphs (4), (5), (6) and (7) above, we express no opinion as to any tax consequences related to the Bonds.

The opinions expressed herein are based upon our analysis and interpretation of existing laws, regulations, rulings and judicial decisions and cover certain matters not directly addressed by such authorities. We call attention to the fact that the rights and obligations of the District under the Indenture and the Bonds are subject to and may be limited by bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance and other similar laws affecting creditors' rights, to the application of equitable principles if equitable remedies are sought, to the exercise of judicial discretion in appropriate cases and to limitations on legal remedies against public agencies in the State.

Our opinion is limited to matters governed by the laws of the State of California and federal law. We assume no responsibility with respect to the applicability or the effect of the laws of any other jurisdiction and express no opinion as to the enforceability of the choice of law provisions contained in the Indenture.

We express no opinion herein as to the accuracy, completeness or sufficiency of the Official Statement relating to the Bonds or other offering material relating to the Bonds and expressly disclaim any duty to advise the owners of the Bonds with respect to matters contained in the Official Statement.

Certain requirements and procedures contained or referred to in the Indenture and Tax Certificate may be changed, and certain actions may be taken or omitted, under the circumstances and subject to the terms and conditions set forth in the Indenture and Tax Certificate relating to the Bonds, upon the advice or with the approving opinion of counsel nationally recognized in the area of tax-exempt obligations. We express no opinion as to the effect on the exclusion from gross income for federal income tax purposes of the interest (and original issue discount) on any Bonds if any such change occurs or action is taken or omitted upon the advice or approval of counsel other than Stradling Yocca Carlson & Rauth, a Professional Corporation.

We call attention to the fact that the foregoing opinions may be affected by actions taken (or not taken) or events occurring (or not occurring) after the date hereof. We have not undertaken to determine, or to inform any person, whether such actions or events are taken (or not taken) or do occur (or do not occur). Our engagement as bond counsel to the District terminates upon the issuance of the Bonds.

Respectfully submitted,

APPENDIX E

BOOK-ENTRY ONLY SYSTEM

The information in this Appendix concerning DTC and DTC's book-entry only system has been obtained from sources that the District and the Underwriter believe to be reliable, but neither the District nor the Underwriter takes any responsibility for the completeness or accuracy thereof. The following description of the procedures and record keeping with respect to beneficial ownership interests in the Bonds, payment of principal, premium, if any, accreted value and interest on the Bonds to DTC Participants or Beneficial Owners, confirmation and transfers of beneficial ownership interests in the Bonds and other related transactions by and between DTC, the DTC Participants and the Beneficial Owners is based solely on information provided by DTC.

The Depository Trust Company (“DTC”), New York, NY, will act as securities depository for the Bonds. The Bonds will be issued as fully-registered securities registered in the name of Cede & Co. (DTC’s partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully registered bond will be issued for each annual maturity of the Bonds, each in the aggregate principal amount of such annual maturity, and will be deposited with DTC.

DTC, the world’s largest securities depository, is a limited-purpose trust company organized under the New York Banking Law, a “banking organization” within the meaning of the New York Banking Law, a member of the Federal Reserve System, a “clearing corporation” within the meaning of the New York Uniform Commercial Code, and a “clearing agency” registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC’s participants (“**Direct Participants**”) deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants’ accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation (“**DTCC**”). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly (“**Indirect Participants**”). DTC has a Standard & Poor’s rating of AA+. The DTC Rules applicable to its Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www.dtcc.com.

Purchases of Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for the Bonds on DTC’s records. The ownership interest of each actual purchaser of each Bond (“**Beneficial Owner**”) is in turn to be recorded on the Direct and Indirect Participants’ records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Bonds, except in the event that use of the book-entry system for the Bonds is discontinued.

To facilitate subsequent transfers, all Bonds deposited by Direct Participants with DTC are registered in the name of DTC’s partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of Bonds with DTC and their registration in the name of Cede & Co. or

such other DTC nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time. Beneficial Owners of Bonds may wish to take certain steps to augment the transmission to them of notices of significant events with respect to the Bonds, such as redemptions, tenders, defaults, and proposed amendments to the Bond documents. For example, Beneficial Owners of Bonds may wish to ascertain that the nominee holding the Bonds for their benefit has agreed to obtain and transmit notices to Beneficial Owners. In the alternative, Beneficial Owners may wish to provide their names and addresses to the registrar and request that copies of notices be provided directly to them.

Redemption notices shall be sent to DTC. If less than all of the Bonds within a maturity are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such maturity to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to Bonds unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the District as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Redemption proceeds, distributions, and dividend payments on the Bonds will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the District or the Trustee, on payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, the Trustee, or the District, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, distributions, and dividend payments to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the District or the Trustee, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

A Bond Owner shall give notice to elect to have its Bonds purchased or tendered, through its Participant, to the Trustee, and shall effect delivery of such Bonds by causing the Direct Participant to transfer the Participant's interest in the Bonds, on DTC's records, to the Trustee. The requirement for physical delivery of Bonds in connection with an optional tender or a mandatory purchase will be deemed satisfied when the ownership rights in the Bonds are transferred by Direct Participants on DTC's records and followed by a book-entry credit of tendered Bonds to the Trustee's DTC account. DTC may discontinue providing its services as depository with respect to the Bonds at any time by giving reasonable notice to the District or the Trustee. Under such circumstances, in the event that a successor depository is not obtained, physical certificates are required to be printed and delivered.

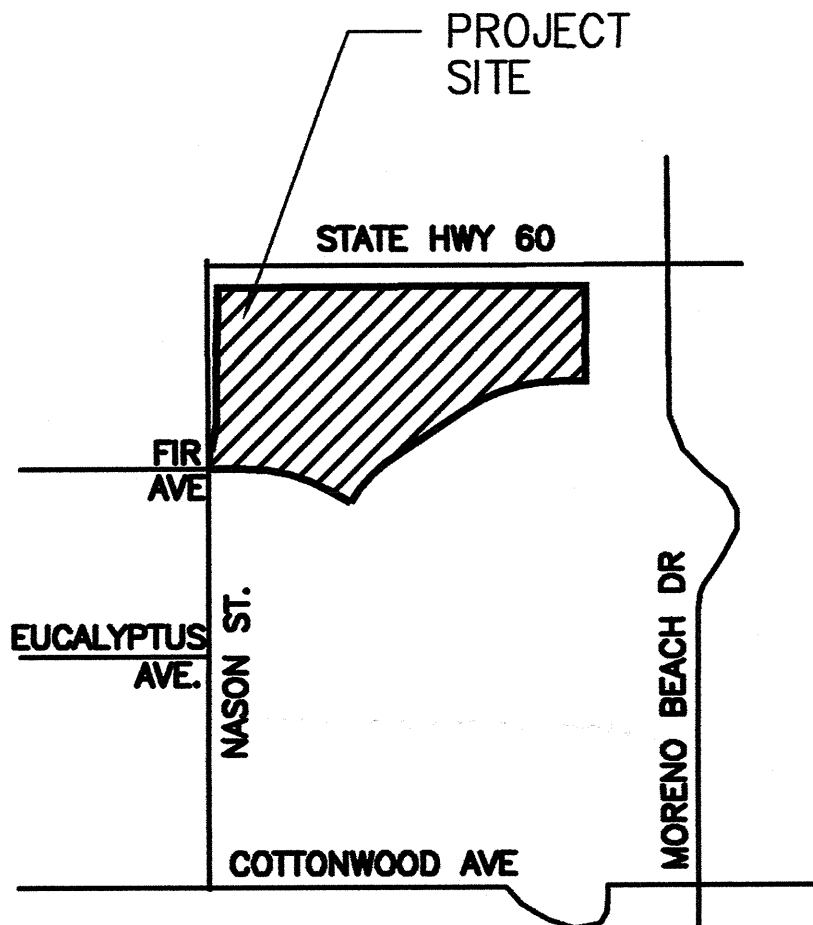

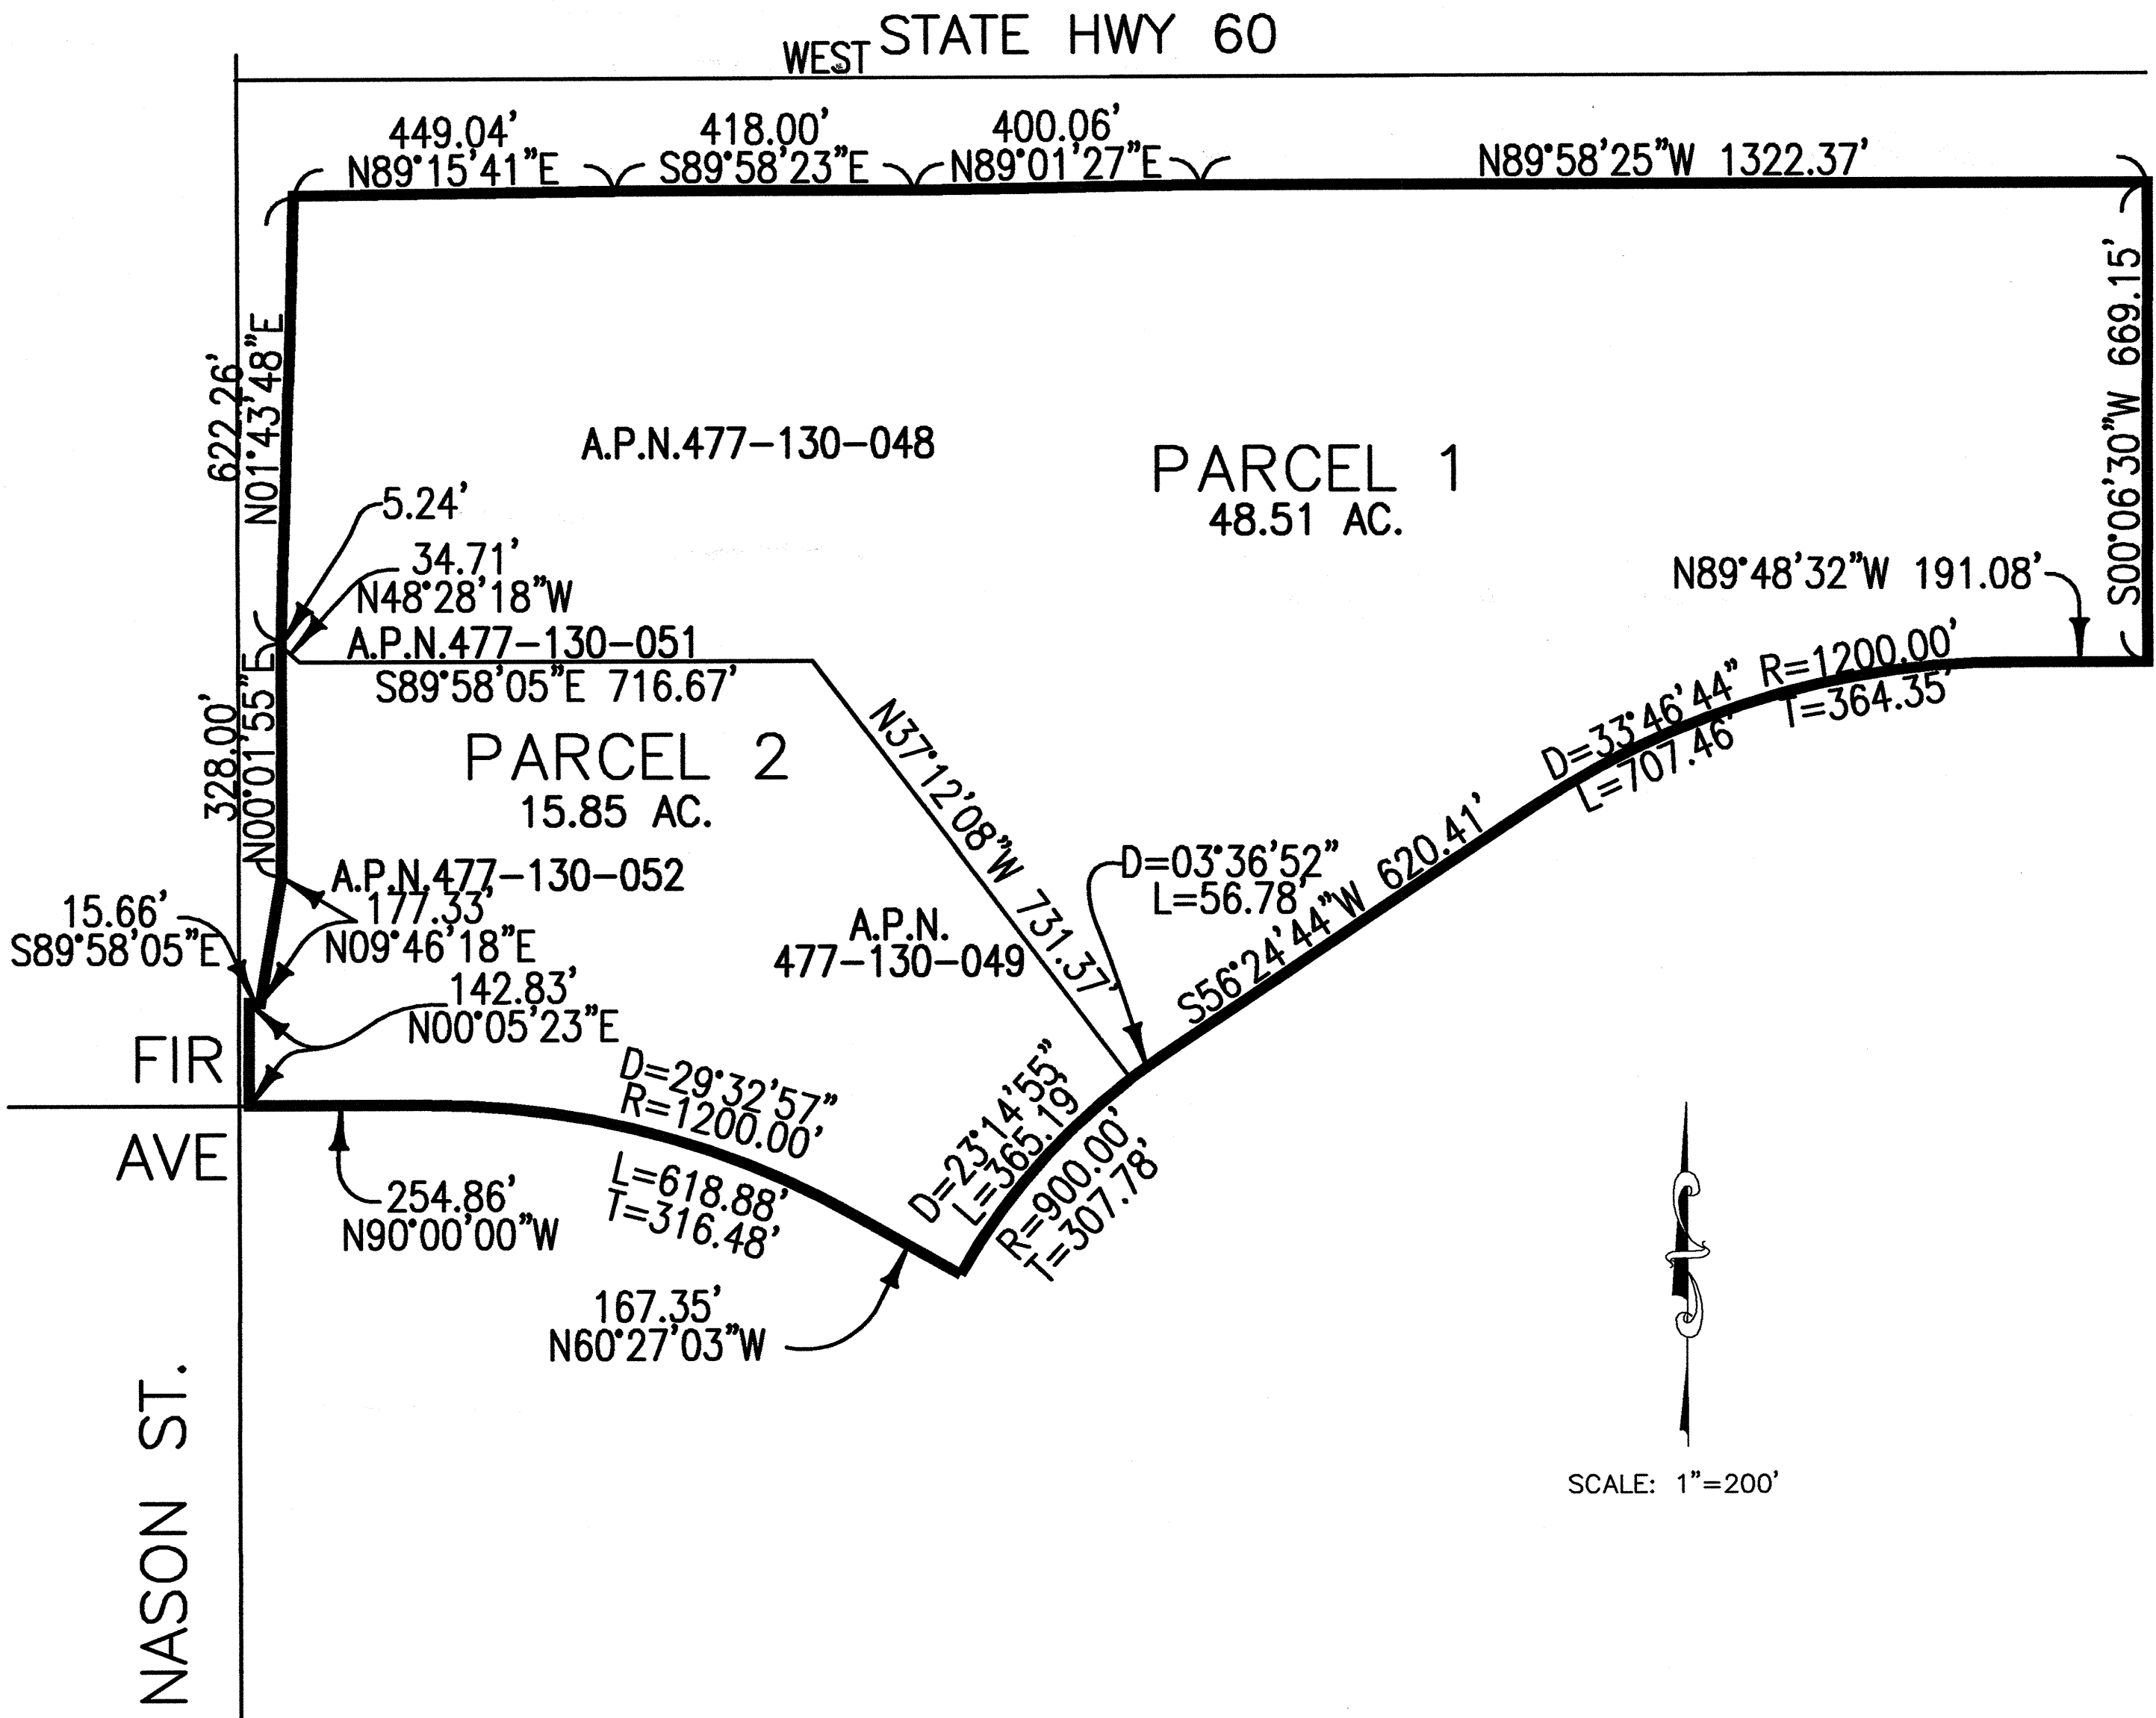

The District may decide to discontinue use of the system of book-entry only transfers through DTC (or a successor securities depository). In that event, bonds will be printed and delivered to DTC.

THE TRUSTEE, AS LONG AS A BOOK-ENTRY ONLY SYSTEM IS USED FOR THE BONDS, WILL SEND ANY NOTICE OF REDEMPTION OR OTHER NOTICES TO OWNERS ONLY TO DTC. ANY

FAILURE OF DTC TO ADVISE ANY DTC PARTICIPANT, OR OF ANY DTC PARTICIPANT TO NOTIFY ANY BENEFICIAL OWNER, OF ANY NOTICE AND ITS CONTENT OR EFFECT WILL NOT AFFECT THE VALIDITY OF SUFFICIENCY OF THE PROCEEDINGS RELATING TO THE REDEMPTION OF THE BONDS CALLED FOR REDEMPTION OR OF ANY OTHER ACTION PREMISED ON SUCH NOTICE.

Attachment: Boundary Map (5520 - AUTHORIZATION TO REFINANCE COMMUNITY FACILITIES DISTRICT NO. 5 SPECIAL TAX REFUNDING BONDS)

Report to City Council

TO: Mayor and City Council

FROM: Pat Jacquez-Nares, City Clerk

AGENDA DATE: October 19, 2021

TITLE: CITY COUNCIL DIRECTION REGARDING FILLING CITY COUNCIL DISTRICT 1 VACANCY

RECOMMENDED ACTION

Recommendations: That the City Council:

1. Direct the City Clerk to prepare the application for persons interested in being appointed by the City Council to fill the District 1 vacancy, until such time the person who is officially elected to the District 1 seat at the next General Municipal Election, held on November 1, 2022, is officially installed on the City Council.

OR

2. Direct the City Clerk to prepare the requisite resolutions and related documents calling for a Special Election on April 11, 2022, for the eligible voters of District No. 1 to vote for who they want to fill the full remaining unexpired term of the vacated seat, which expires in December 2024.

SUMMARY

This Staff Report is based on the facts that the subject vacancy occurred during the first half of the late Mayor Pro Tem Victoria Baca's unexpired term on the Moreno Valley City Council, which expires in 2024. Ms. Baca was most recently reelected to the City Council on November 3, 2020, and the vacancy occurred on October 6, 2021, which falls within the first half of her unexpired term.

DISCUSSION

A City Council seat becomes vacant upon the happening of certain events before the expiration of the term. Under Government Code Section 1770, the death of a Council Member is a qualifying event which triggers a vacancy on the City Council.

Under the particular circumstances, within 60 days of a vacancy (caused by the death of a council member), the City Council must either: (1) appoint someone to fill the vacancy until the person elected to fill the District 1 seat at the City's General Municipal Election on November 1, 2022 is officially installed to fill the subject vacancy through the remaining unexpired term of the vacated seat; or (2) call a Special Election to fill the vacancy for the unexpired term of the vacated seat which expires in December 2024.

By Appointment

Government Code Section 36512 provides that if the City Council fills the vacancy by appointment, the person appointed to fill the vacancy shall hold office pursuant to one of the following:

- (1) If the vacancy occurs in the first half of a term of office and at least 130 days prior to the next general municipal election, the person appointed to fill the vacancy shall hold office until the next general municipal election that is scheduled 130 days or more days after the date the council is notified of the vacancy, and thereafter until the person who is elected at that election to fill the vacancy has been qualified. The person elected to fill the vacancy shall hold office for the unexpired balance of the term of office.
- (2) If the vacancy occurs in the first half of a term of office, but less than 130 days prior to the next general municipal election, or if the vacancy occurs in the second half of a term of office, the person appointed to fill the vacancy shall hold office for the unexpired term of the former incumbent.

Since the subject vacancy occurred during the first half of Ms. Bacca's term and since the City's next General Municipal Election, scheduled for November 1, 2022, will not take place for at least 130 days after the vacancy occurred, a person appointed by the City Council will only serve until a person who is officially elected at the November 1, 2022 General Municipal Election is officially installed to serve out the remaining 2-year term of the vacated seat, which expires in December 2024.

Special Election

If the City Council calls a Special Election, the Special Election shall be held on the "next regularly established election date" not less than 114 days from the call of the special election. A person elected at a Special Election will fill the vacancy for the full unexpired term of the vacated seat, which in this case would be until December 2024.

Pursuant Section 1000 of the California Elections Code, the "Regular Election Dates" are as follows:

- (a) The first Tuesday after the first Monday in March of each even-numbered year that is evenly divisible by four.
- (b) The first Tuesday after the first Monday in March of each odd-numbered year.
- (c) The second Tuesday of April in each even-numbered year.
- (d) The first Tuesday after the first Monday in June in each even-numbered year that is not evenly divisible by four.
- (e) The first Tuesday after the first Monday in November of each year.

In light of the foregoing, it appears that if the City Council chooses to call a Special Election, the Special Election would have to be held on **Tuesday, April 12, 2022**.

Again, the person elected at a Special Election called to fill the vacancy would serve out the remaining term of the vacated seat.

Conclusion

In conclusion, if the City Council does not appoint someone to fill the subject vacancy by December 5, 2021 (60 days after vacancy occurred), a special election will have to be held to fill the vacancy, and the next regularly established election date available for the special election would be April 12, 2022.

ALTERNATIVES

There are really just two alternatives: 1) appoint someone to temporarily fill the vacated seat until December 2022, or 2) call a Special Election for Tuesday, April 11, 2022, to fill the full remaining term of the vacated seat which expired December 2024.

FISCAL IMPACT

None at this time.

NOTIFICATION

Indicate any outreach efforts made to elicit comments from parties with interest in the issue. Review comments that may have been made. Also, identify to whom copies of the report were sent so they could be informed about the agenda item.

In this case, the successor then serves until the expiration of the predecessor's term.

Report to City Council

TO: Mayor and City Council

FROM: Pat Jacquez-Nares, City Clerk

AGENDA DATE: October 19, 2021

TITLE: CITY COUNCIL REORGANIZATION - SELECTION OF MAYOR PRO TEM

RECOMMENDED ACTION

Recommendation: That the City Council:

1. Conduct the reorganization of the City Council by selecting one Council Member to serve as Mayor Pro Tem until December 31, 2021.

SUMMARY

The untimely passing of Mayor Pro Tem Baca has created a vacancy in that Council position. The City Council would like to appointment a new Mayor Pro Tem. The Mayor Pro Tem shall be installed, sworn, and shall assume the office at that City Council meeting.

DISCUSSION

Section 4.1.3 of the Rules of Procedure provides that nominations for the office Mayor Pro Tem may be made by any member of the City Council and need not be seconded in order to be effective. Appointment shall be made by three or more affirmative votes on a motion to appoint. In the event that no person receives three or more votes in the selection process, the selection process shall be repeated immediately; provided, however, that the two persons receiving the highest number of votes in the preceding selection process shall be the only nominees. If, upon repeating the selection process Mayor Pro Tem, no person has yet received three affirmative votes for such office, the City Council may either repeat the selection process until the officer has been duly selected or may continue the selection to the next regular meeting of the City Council.

The new Mayor Pro Tem, shall serve until December 31 2021.

ALTERNATIVES

1. Conduct the reorganization of the City Council by selecting a Mayor Pro Tem.
2. Continue the selection to the next regular meeting of the City Council if upon repeating the selection process, no person receives three affirmative votes for Mayor Pro Tem.

FISCAL IMPACT

There is no fiscal impact associated with the recommended action
